Science & Technology Studies

College of Letters & Science

Colin Milburn, Ph.D., Department Chair; term ends June 30, 2026.

Department Office

1246 Social Sciences & Humanities Building; Science & Technology Studies (<http://sts.ucdavis.edu>); Faculty (<http://sts.ucdavis.edu/directory-of-people/sts-faculty/>)

Advising

Staff advisors are located in Young Hall. To contact a major advisor, email stsadvising@ucdavis.edu, schedule an academic advising appointment (<https://appointments.ucdavis.edu/?calendar=133>), or join Drop-In Advising (<https://yellowcluster.ucdavis.edu/advising/undergraduate/drop-in/>) (no appointment needed).

- Data in Society, Minor (p. 464)
- History & Philosophy of Science, Minor (p. 465)
- Science & Technology Studies, Bachelor of Arts (p. 465)

Data in Society, Minor

College of Letters & Science

The Data in Society minor provides students with skills to work with and think critically about data in a variety of academic, administrative, and industrial domains. Courses in the minor teach students to use computational methods (primarily in R) to explore, manipulate, analyze, and visualize numeric and textual data with a critical awareness of the provenance of the data, the choices made in data collection, the questions that can and cannot be answered with any given data set, and the implications of all of these issues for analytic outcomes. Students learn how to communicate about data in written, oral, and visual media with data scientists and with diverse sets of stakeholders. The minor is sponsored by the Department of Science & Technology Studies (<https://sts.ucdavis.edu/>).

Minor Advisor

101 Young Hall; 530-752-5104. To contact a minor advisor, email stsadvising@ucdavis.edu, schedule an academic advising appointment (<https://appointments.ucdavis.edu/?calendar=418>), or join Drop-In Advising (<https://yellowcluster.ucdavis.edu/advising/undergraduate/drop-in/>) (no appointment needed).

Faculty Advisor

The current Chair of STS (Professor Colin Milburn (cnmilburn@ucdavis.edu)) is also available for advising by appointment.

History & Philosophy of Science, Minor

College of Letters & Science

History & Philosophy of Science Minor (<https://sts.ucdavis.edu/history-philosophy-science-minor/>)

The interdisciplinary minor in the History & Philosophy of Science invites students to examine historical and contemporary problems in a variety of scientific disciplines, and to explore concepts and procedures basic

to science and how they have evolved. The minor is sponsored by the Department of Science & Technology Studies (<https://sts.ucdavis.edu/>).

Minor Advisor

Staff advisors are located in Young Hall; To contact a minor advisor, email stsadvising@ucdavis.edu, schedule an academic advising appointment, or join Drop-In Advising (<https://yellowcluster.ucdavis.edu/advising/undergraduate/drop-in/>) (no appointment needed).

Faculty Advisor

The current Chair of STS (Professor Colin Milburn (cnmilburn@ucdavis.edu)) is also available for advising by appointment.

Science & Technology Studies, Bachelor of Arts

College of Letters & Science

The Science & Technology Studies (STS) major brings the perspectives of the humanities and social sciences together with science, technology, and medicine. It considers science, technology, and medicine in relation to their social, political, and economic contexts. The major combines history, philosophy, anthropology, sociology, cultural studies, environmental studies, law, business, literature, and media studies to address the impacts and implications of science, technology, and medicine. The major allows students to pursue a broader understanding of science than is available within a traditional science major, and

it provides important skills for interpreting science, technology, and medicine with regard to society and culture.

The Major

Graduation with a degree in Science & Technology Studies requires completion of courses in the social sciences and the humanities, as well as courses in the natural sciences. Upper division work includes 16 units in STS theories and methods, 20 units in a particular STS emphasis area, and 8 units (plus prerequisites) providing depth, concentration, and field work in the sciences. The STS emphasis areas are:

- Law & Innovation
- Health & Environment
- Data & Media Technologies
- History & Philosophy of Science

Students may alternatively choose not to specialize and instead pursue a more general STS emphasis. Prerequisites for courses in the sciences can be extensive and may require substantial advance planning. Students are encouraged to take advantage of faculty and staff advising to develop their plans of study.

Career Alternatives

The STS major enables students to analyze science and allied practices from historical, philosophical, sociological, political, anthropological, and cultural perspectives. STS prepares students for careers that address the broader ramifications of science, technology, and medicine. STS majors often pursue careers in health care & medicine, law, journalism, public policy, economics, government, media & technology industries, science education, non-profit health organizations, libraries & museums, public health administration, management consulting, and teaching. STS majors are also well prepared for advanced research careers in the sciences, the humanities, and the social sciences.

Major Advisor

Staff advisors are located in Young Hall. To contact a major advisor, email stsadvising@ucdavis.edu, schedule an academic advising appointment (<https://appointments.ucdavis.edu/?calendar=418>), or join Drop-In Advising (<https://yellowcluster.ucdavis.edu/advising/undergraduate/drop-in/>) (no appointment needed).

Faculty Advisor

The current chair of STS, Professor Colin Milburn (cnmilburn@ucdavis.edu), is also available for advising by appointment.

The major requirements below are in addition to meeting University Degree Requirements (p. 55) & College Degree Requirements (p. 60); unless otherwise noted. The minimum number of units required for the Science & Technology Studies Bachelor of Arts is 60.

Code	Title	Units
Preparatory Subject Matter		
STS 001	Introduction to Science, Technology & Medicine Studies	4
Choose three additional courses:		12
STS/HIS 002 or STS/HIS 002Y	Introduction to the History of Science & Technology Introduction to the History of Science & Technology	

STS 011	Science on Trial: Law, Science, & Technology in the United States	
STS/HIS 016	Sex, Science, & Society	
STS/ANT 032	Drugs, Science & Culture	
STS/CTS 040A	Media History 1, Gutenberg to Oppenheimer	
STS/CTS 040B	Media History 2 1945-Present	
STS/CLA 050	Ancient Science

Preparatory Subject Matter Subtotal		16
Depth Subject Matter		
<i>Methods & Theories</i>		
STS 100	Methods in Science, Technology, & Medicine Studies	4
Choose three:		12
STS 101	Data & Society	
STS 108	Intellectual Property in Science	
STS/ANT 121	Special Topics in Medical Anthropology	
STS 122	Health & Medical Technologies	
STS 150	Gender & Science	
STS 151/ CTS 150 (DISCONTINUED)	Media Theory	
STS/ENL 164	Writing Science	
STS 175	Laboratory Studies Lab	
STS/SOC 176	Sociology of Knowledge, Science, & Scientific Knowledge	

Note: Courses taken to fulfill the requirement above cannot also be used to fulfill the emphasis requirement.

Science Coursework

All STS majors are required to complete TWO upper division science courses in the same department. Science coursework should be planned in consultation with the faculty advisor or staff advisors.¹

Emphasis

Choose one of the following four options:	20-24
1. Complete five courses from one emphasis list.	
2. Complete four courses from one emphasis list and one additional STS course.	
3. Complete four courses from one emphasis list and a research thesis in STS ² . **The thesis option is open to all students. Students whose GPA meets the honors threshold may also qualify for High or Highest Honors in the College of Letters & Science.	
4. STS General Emphasis: Complete any five upper division STS courses (STS: 100-199). Note: Includes courses that are cross-listed with STS. ³	

Emphasis Lists:

- (1) Law & Innovation (p. 467)
- (2) Health & Environment (p. 467)
- (3) Data & Media Technologies (p. 467)
- (4) History & Philosophy of Science (p. 467)

Sociology, Bachelor of Arts

College of Letters & Science

The Major Programs

Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things. Students selecting the Sociology major will choose one of five options:

- The *General Sociology emphasis* allows students to gain a broad perspective of sociology by providing an introduction to the discipline and its central issues and concepts. This emphasis offers the most flexibility in allowing students to choose which upper division courses to take.
- The *Law & Society emphasis* is designed for students interested in the study of law, politics, and research. It offers a structured program of courses in law, criminology, deviance, and their relation to issues of societal order and change. Focusing on law in action, students will study how legal and criminal systems operate and theories of legal/criminal behavior. Students can expect to take courses in violence and inequality, delinquency, deviance, the criminal justice system, criminology, and social problems.
- The *Social Services emphasis* focuses on the interactive perspective of family, community, social problems, and social services. The core of the curriculum addresses the fields of social welfare, the family, and social stratification. Students round out their program with courses chosen from areas of social issues, social interaction, gender, and organizational behavior. Students will also take multiple

courses within the areas of psychology and race and ethnicity. The program provides a strong liberal arts education and adequately prepares students to work in the diverse social environment of the 21st century.

- The *Global & International Sociology* emphasis is designed for students interested in developing an interdisciplinary, historically-informed understanding of global issues as well as regional challenges and characteristics. Students will study the social bases of political and economic life, culture and communities, inequalities, ethnic relations, migration, environmental changes, and other issues. Besides sociology courses, students choose classes across diverse disciplines, for example, economics, anthropology, political science, history, religious studies, and international agriculture.
- The *Race, Ethnicity, & Immigration* emphasis brings together two sociological subfields by allowing students to take common core of lower division courses that provide them with a foundational knowledge of race & ethnicity and immigration. Students will build on this foundation by choosing from an array of Sociology courses that provide in-depth instruction in specific areas related to Race, Ethnicity, and Immigration, and from electives offered by the departments of African American and African Studies, Chicana/Chicano Studies, Native American Studies, Asian American Studies, Middle East and South Asia Studies, and other Social Science and Humanities departments offering relevant courses.

Career Opportunities

The Sociology major provides students with a solid liberal arts education that will prepare them for graduate work in the social sciences as well as a variety of careers. Students who major in sociology often work in areas such as business, education, law, social work or counseling, data analytics, research, health services, community engagement, and global fields.

Advising

Sociology Advising Office (<http://sociology.ucdavis.edu/undergraduate/advising/advising-office/>)

Honors Program

An Honors Program is available to Sociology and Sociology-Organizational Studies majors who have demonstrated excellence in their field of study. This programs gives students the opportunity to engage in their own sociological research in the form of an honors thesis.

To be eligible for the program, students must have a grade-point average of 3.500 in the major, completed 135 units, and obtained the recommendation of a sociology faculty sponsor familiar with their work. Honors students write an honors thesis and take two courses (SOC 194HA & SOC 194HB) during their senior year. Successful completion of the Honors Program, when combined with College GPA requirements, enables the student to graduate with High or Highest Honors. Students should apply for the program before they begin their fourth year.

The major requirements below are in addition to meeting University Degree Requirements (p. 55) & College Degree Requirements (p. 60); unless otherwise noted. Respective of the Emphasis, the minimum number of units required for the Sociology Bachelor of Arts are 73, 73, 72, 78, & 74.

Sociology–Organizational Studies, Bachelor of Arts

College of Letters & Science

The Major Programs

The Organizational Studies (OS) major is designed to provide a broad understanding of the political, social, and economic organizations

that make up modern society. Whether thinking about the structure of government bureaucracies, legal systems, economic markets, educational systems, or workplaces, OS offers an interdisciplinary view from which to understand the contemporary world in which complex and formal organizations are ubiquitous. Formal organizations influence how we feel, what we think, and what we can accomplish. As such, the OS major provides both a basic understanding of the field as well as enhances your ability to pursue their more specialized career interests.

At the upper division level, you can choose one of four specialized tracks, any one of which will help to better identify and inform your career goals —whether that be in postgraduate education or a specific type of job—and pursue them after graduation. Whether you select the “Business & Society,” “Public Policy & Social Welfare,” “Nonprofit & Social Movement Organizations” or the “Student-Initiated Theme” track, once completed you will have a unique and valuable area of expertise.

Students who plan to enroll in graduate programs in business, public policy, public administration, and education are advised to develop proficiencies in statistics and calculus (such as the MAT 016 series).

Track 1: Business & Society (BAS)

The Business and Society track is for students who hold an interest in or wish to pursue careers in management or corporate professions and who are interested in economic institutions and commerce, management and administration, work and workplaces, and labor markets. Courses in this cluster analyze businesses, firms, corporations, and markets—nationally and globally—and their place in society, historically and in the present, from a critical perspective. The BAS track examines the origins of business corporations and economic markets (and relations); the power relations, inequalities, and stratification associated with contemporary business organizations (firms and corporations); why business organizations rely on particular organizational structures to increase their efficiencies and effectiveness; and overviews of the role business and regulatory organizations play in the economy.

Career & Postgraduate Alternatives for the Business & Society Track:

- *Professional training:* MBA programs; mediation programs; law; public policy.
- *Graduate training:* sociology; economics; Ph.D. business school programs (with concentrations in organizational behavior, entrepreneurship, industrial relations, economic analysis, policy analysis, and labor relations).
- *Career paths:* managers, human resources professionals, project managers, diversity personnel, corporate social responsibility personnel, lobbyists, business entrepreneur, labor relations specialists, creative professionals, research staff at policy institutes such as Economic Policy Institute, Urban Institute or E2.

Track 2: Public Policy & Social Welfare (PPSW)

The PPSW track is for students who hold an interest in or plan to pursue careers in government and/or social welfare organizations. Courses in this track emphasize how formal organizations and institutions emerge to address key social problems and the policies they generate and utilize to solve them; the unique challenges that government and other policy-oriented organizations confront in addressing and managing public problems and promoting the common good; and the dynamics and special circumstances that specific organizational/institutional policy fields such as education, health care, and social welfare confront in seeking to fulfill their charge.

Career and Postgraduate Alternatives for the Public Policy & Social Welfare Track

- Professional training:* programs in public policy, public administration, government, social welfare, counseling, public affairs, law, leadership institutes, and community psychology.
- Graduate training:* Ph.D. programs in sociology, political science, public administration, education, and educational leadership.
- Career paths:* consultants, social service workers and administrators, staff at policy institutes and think tanks, program evaluation and development, nonprofit administrators, lawyers, teachers, research staff at policy institutes and think tanks, leadership positions in education, including higher education and counselors.

Track 3: Nonprofit & Social Movement Organizations (NSMO)

The NSMO track is for students who wish to contribute to local, national, and global transformation(s), to social justice, and/or who plan to pursue a career in the non-profit sector focusing on addressing specific causes and fulfilling social agendas. Students in this cluster may have particular interest in understanding the role that informal and formal organizations—from well-organized and mature non-profits to emergent social movement organizations—play in responding to and affecting social change. This cluster familiarizes students with the unique capacity of organizations to change the world but simultaneously, the barriers, limitations, and challenges to doing so.

Career and Postgraduate Alternatives for the Public Policy & Social Welfare Track:

- Professional training:* programs in community development, regional development, urban development, public policy, public administration, Master's programs in social change, law and social change, and business programs with a concentration in corporate responsibility.
- Graduate training:* programs sociology, history, labor studies, development, international relations, and political science.
- Career paths:* working in nongovernmental organizations around the world (NGO's), joining the Peace Corps or Teach America; teaching in other countries; jobs in any number of areas that are the focus of social change and social justice efforts (energy, housing, labor, community and regional development, health, corporate social responsibility); working in for-profit companies in the areas of energy, corporate social responsibility, work/family support programs, research staff at policy institutes and think tanks.

Track 4: Student-Initiated Track

Select a combination of five courses from any of the above 3 themes (at least three courses should be from SOC). Students choosing this track must meet with a SOC undergraduate advisor to obtain approval of selected courses.

Major Advisor

Consult the Departmental Advising office in 1282 Social Sciences & Humanities Building or see the SOC Advising Office (<http://sociology.ucdavis.edu/undergraduate/advising/advising-office/>).

Honors Program

An Honors Program is available to Sociology & Sociology-Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.500 in the major and the recommendation of a faculty sponsor

familiar with their work. Honors students write an honors thesis and take two quarters (8 units) of Honors coursework (SOC 194HA & SOC 194HB). Successful completion of the Honors Program, when combined with College GPA requirements, enables the student to graduate with High or Highest Honors. Students should apply for the program before they begin their fourth year.

The major requirements below are in addition to meeting University Degree Requirements (p. 55) & College Degree Requirements (p. 60); unless otherwise noted. Respective of the Emphasis, the minimum number of units required for the Sociology—Organizational Studies Bachelor of Arts is 74.

Track 4: Student-Initiated Track

Choose a combination of five courses from any of the above three themes; at least three courses should be from SOC. Students choosing this track must meet with a SOC undergraduate advisor to obtain approval of selected courses.

Sociology, Master of Arts

College of Letters & Science

Graduate Study

The Master of Arts degree is offered only en route to the Ph.D.

Graduate students in Sociology have the opportunity to pursue designated emphases in African American & African Studies, Critical Theory, Feminist Theory & Research, Human Rights, Science & Technology Studies, and Study of Religion.

Graduate Advisors

Sociology Graduate Advising (<https://sociology.ucdavis.edu/graduate/>)

Sociology, Doctor of Philosophy

College of Letters & Science

Graduate Study

The Department offers programs of study and research leading to a Ph.D. degree in sociology. Further information regarding graduate study may be obtained on our website (<https://sociology.ucdavis.edu/graduate/>).

Graduate students in Sociology have the opportunity to pursue designated emphases in African American & African Studies, Critical Theory, Feminist Theory & Research, Human Rights, Science & Technology Studies, and Study of Religion.

- Soils & Biogeochemistry, Doctor of Philosophy (p. 479)

Soils & Biogeochemistry, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The Soils & Biogeochemistry Graduate Group offers programs of study and research leading to M.S. and Ph.D. degrees. The focus of Soils and Biogeochemistry is on the physical, chemical and biological processes occurring in soils of different landforms and ecosystems. The goal is to understand the complex processes of mass and energy flow that control agricultural and natural ecosystem functions, productivity, and sustainability. Investigations assess impacts and implications of natural processes and anthropogenic effects, such as climate change, on soil and ecosystem behavior and development. Examples include: fate and emission of greenhouse gases; soil carbon sequestration; fate and transport of native and applied chemicals; soil microbial ecology; nutrient uptake and management; nutrient cycling in managed and wildland ecosystems; pesticide and trace element adsorption on surfaces; mineral weathering; organic agriculture; bioavailability of toxics; soil erosion; conservation; ecosystem productivity and sustainability; and the study of soil evolution on the landscape. These studies are carried out within a framework of integrating applied chemical, physical, mathematical, and biological sciences.

Graduate Advisors

Cristina Lazcano, Ph.D., Amelie Gaudin, Ph.D., Majdi Abou Najm, Ph.D., Anthony (Toby) O'Geen, Ph.D.

Graduate Admissions Officer

Anthony Toby O'Geen, Ph.D.

- Spanish, Master of Arts (p. 483)
- Spanish, Doctor of Philosophy (p. 483)

Luso-Brazilian Studies, Minor

College of Letters & Science

Department Office

Minor in Luso-Brazilian Studies (<https://spanish.ucdavis.edu/minor-luso-brazilian-studies/>)

The Department of Spanish & Portuguese sponsors the minor in Luso-Brazilian Studies, which offers students the opportunity to engage with the Portuguese-speaking world as a global space, as well as gain in-depth knowledge of Brazilian literature, culture and society. The minor is structured to facilitate engagement with Latin American, peninsular, and transatlantic topics, while ensuring that students master the essential skills of linguistic competence, and literary and cultural knowledge.

Education Abroad Program Options

We highly recommend that students participate in study abroad; see Study Abroad (<http://studyabroad.ucdavis.edu>). Courses taken abroad may count toward the Luso-Brazilian Studies minor.

Minor Advisor

L. Bernucci, R. Newcomb

Code	Title	Units

Note: Additional courses may count toward the minor with prior approval by a departmental advisor.		
Total Units		23-24

Spanish, Bachelor of Arts

College of Letters & Science

The Spanish major program assures proficiency in all four language skills-speaking, understanding, reading, and writing-and acquaints students with the intellectual and cultural contributions of the Spanish-speaking world through a study of its language, literature, and cultural productions.

The Program

The department's lower division program gives students a solid foundation in the Spanish language, either through the traditional elementary and intermediate language series or through an accelerated three-course sequence of Spanish for native speakers. At the upper division level, students receive a broad introduction to basic concepts and the practice of literary and cultural criticism and to the four areas of study represented in the department's curriculum: Spanish linguistics, Spanish literature and culture, Latin-American literature and culture, and Latina/o literatures and cultures in the United States. Students are encouraged to work closely with the department's academic advisors in designing a program of studies tailored to their individual needs and

interests. Many students combine the Spanish major with another major in the humanities or social sciences.

Prerequisite Credit

Credit normally will not be given for a course if that course is the prerequisite of a course already successfully completed. Exceptions can be made by the Department Chairperson only.

Advising

Given the great flexibility in the Spanish major, it is important that students design their programs in close consultation with their major advisor. This is especially important for students who intend to use their major as preparation for graduate study, for those who are planning a teaching career, and for those who wish to take advantage of our Education Abroad Program options.

Major Advisors

213 Sproul Hall.

Career Alternatives

The program, alone or in combination with other major programs, may lead to advanced study of the language or literature and culture of Spain and Spanish America, and to careers not only in teaching, but also in other professions such as library science, law, medicine, and in government, social service, business, or international relations.

Honors Program

Candidates for high or highest honors in Spanish must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in at least 6 units of SPA 194H distributed over two quarters. Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of their junior year (135 units), have attained a cumulative GPA of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Spanish are in addition to the regular requirements for the major in Spanish.

UC Education Abroad Program Options

The department encourages its majors to consider study in a Spanish-speaking country with our UC Education Abroad Program (UCEAP). It is now possible for our students to complete significant portions of the Spanish major in the UCEAP centers at both the lower (Preparatory Subject Matter) and upper division levels through newly introduced options. See the Global Learning Hub (<https://globallearning.ucdavis.edu/>).

UC Davis Quarter Abroad

The Quarter Abroad Program offers programs in Mendoza, Argentina (fall quarter) and in Madrid, Spain (spring quarter). These programs aim at providing students with opportunities to increase their knowledge of the Spanish language and cultures by experiencing the life-learning challenges of living and studying abroad.

Students may earn 15-22 UC Davis units toward the Spanish major, minor, or foreign language requirement. Each program may offer an upper division course taught by the UC Davis Program Director focusing on history, culture and society.

For more information, see UC Davis Quarter Abroad.

The major requirements below are in addition to meeting University Degree Requirements (p. 55) & College Degree Requirements (p. 60); unless otherwise noted. The minimum number of units required for the Spanish Bachelor of Arts is 41.

Choose six electives in consultation with the student's major advisor:	Native American Studies
Students may, with the approval of their advisor, choose up to two electives outside the Spanish department (p. 482)	NAS 120 Ethnopolitics of South American Indians 4
Depth Subject Matter Subtotal	NAS 133A Ethnohistory of Native Peoples of Mexico & Central America to 1500 4
Total Units	NAS 133B Ethnohistory of Native Peoples of Mexico & Central America 1500 to 2000 4
	NAS 184 Contemporary Indigenous Literature of Mexico 4

A maximum of 6 units of SPA 199 may be counted toward the major.

SPA 199 cannot be used to replace regular departmental courses.

Electives Outside the Spanish Department

Students may, with the approval of their advisor, choose up to two electives outside the Spanish department in such programs as:

Code	Title	Units
African American & African Studies		
AAS 107A	African Descent Communities & Culture in the Caribbean & Latin America	4
AAS 180	Race & Ethnicity in Latin America	4
Anthropology		
ANT 144	Contemporary Societies & Cultures of Latin America	4
Art History		
AHI 151	Arts of the Ancient New World	4

Educational Objectives

- **Linguistics.** Demonstrate knowledge of the Spanish speaking world's linguistic diversity through the comprehension of Spanish in a variety of situations, discursive modes and historical, regional or social variations. Demonstrates analytic, interpretative, and critical thinking skills; SPA 111N, SPA 113, SPA 115/SPA 115S, SPA 116, SPA 117, SPA 118, SPA 180.
- **Literature.** Demonstrate analytic, interpretative and critical thinking skills with respect to literary texts from Latin America, Spain, the United States and other countries in which there is a literary production in Spanish; SPA 100/SPA 100S, SPA 130, SPA 131N, SPA 134A/SPA 134B, SPA 142 (Spain); SPA 150N, SPA 151, SPA 157, SPA 159/SPA 159S (Latin America); SPA 117, SPA 174, SPA 176, SPA 177 (United States).
- **Culture.** Demonstrate cultural awareness with respect to the diversity of cultural products and manifestations produced in the Spanish speaking world (Latin America, Spain, the United States and

- other countries in which there is a cultural production in Spanish; SPA 100/SPA 100S, SPA 141/SPA 141S, SPA 170/SPA 170S, SPA 174.
- *Film & Art.* Demonstrate analytic interpretative and critical thinking skills with respect to linguistics, literature and cultural studies.

Data Science, Bachelor of Science

College of Letters & Science

The Data Science program has a capped admission process. Information about the requirements for continuing students to change majors into Data Science can be found at Department of Statistics (<https://statistics.ucdavis.edu/undergrad/advising/change-of-major/data-science/>).

Data Science combines computational, mathematical and statistical reasoning to draw conclusions based on data. Data science techniques and methods can be applied to problems from virtually any discipline; for example, in agricultural and environmental sciences, biological sciences, engineering, medical sciences and social sciences.

The Program

Data Science majors receive a Bachelor of Science degree. The program requires both theoretical and applied course work to underscore the strong interdependence of technical foundations in computer science, engineering, mathematics and statistics, and their applications to any field of inquiry relying on quantitative data analysis. The B.S. degree program has one track, the Foundations track.

B.S. in Data Science-Foundations Track emphasizes the underlying computer science, engineering, mathematics and statistics methodology and theory, and is especially recommended as preparation for graduate study in data science or related fields.

Career Opportunities

Inferential and computational techniques are used in many fields, including the agricultural and environmental sciences, biological

sciences, social sciences, and health sciences, business, and engineering. The wide applicability of data science is reflected in the strong demand for graduates with data science training in both the public and private sectors. Employment opportunities include careers in data & policy analysis in government & industry, tech industry, insurance & healthcare industry, engineering, public health, biological & pharmaceutical research, law, and education. Students with an undergraduate degree in data science may enter advanced studies in data science, computer science, applied mathematics, statistics, economics, finance, psychology, medicine, business management & analytics, and other professional school programs.

Major Advisor

For a current list of faculty and staff advisors in the Department of Statistics, see Undergraduate Advising (<https://statistics.ucdavis.edu/undergrad/advising/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 55) & College Degree Requirements (p. 60); unless otherwise noted. The minimum number of units required for the Data Science Bachelor of Science is 91.

Foundations Track

Statistics, Bachelor of Arts

College of Letters & Science

Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.

The Program

Statistics majors may receive either a Bachelor of Arts (A.B.) or a Bachelor of Science (B.S.) degree. Both the A.B. and the B.S. programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications and computational aspects of statistics. The B.S. degree program has five tracks: Applied Statistics Track, Computational Statistics Track, General Track, Machine Learning Track, and the Statistical Data Science Track. The A.B. degree program has one track.

A.B. in Statistics-Applied Statistics Track emphasizes statistical applications. This track is recommended for students who are interested in applications of statistical techniques to various disciplines, especially the social sciences.

Major Advisors

For a current list of faculty and staff advisors, see Undergraduate Advising (<https://statistics.ucdavis.edu/undergrad/advising/>).

Students are encouraged to meet with an advisor to plan a program as early as possible.

Career Alternatives

Probability models, statistical methods, and computational techniques are used in a great many fields, including the biological, physical, social, and health sciences, business, and engineering. The wide applicability of statistics is reflected in the strong demand for graduates with statistical training in both the public and private sectors. Employment opportunities include careers in data & policy analysis in government & industry, financial management, quality control, insurance & healthcare industry, actuarial science, engineering, public health, biological

and pharmaceutical research, law, and education. Students with an undergraduate degree in statistics have entered advanced studies in statistics, economics, finance, psychology, medicine, business management & analytics, and other professional school programs.

The major requirements below are in addition to meeting University Degree Requirements (p. 55) & College Degree Requirements (p. 60); unless otherwise noted. The minimum number of units required for the Statistics Bachelor of Arts is 65.

Code	Title	Units
Preparatory Subject Matter		
Mathematics		
Choose a series:		
MAT 016A & MAT 016B & MAT 016C	Short Calculus and Short Calculus and Short Calculus	9-12
MAT 017A & MAT 017B & MAT 017C	Calculus for Biology & Medicine and Calculus for Biology & Medicine and Calculus for Biology & Medicine	
MAT 019A & MAT 019B & MAT 019C	Calculus for Data-Driven Applications and Calculus for Data-Driven Applications and Calculus for Data-Driven Applications	
MAT 021A & MAT 021B & MAT 021C	Calculus and Calculus and Calculus	
MAT 021 series preferred.		
MAT 022A	Linear Algebra	3
Computer Science Engineering		
ECS 032A or ECS 036A	Introduction to Programming Programming & Problem Solving	4
Statistics		
Choose one:		4
STA 013 or STA 013Y	Elementary Statistics Elementary Statistics	
STA 032	Gateway to Statistical Data Science	
STA 100	Applied Statistics for Biological Sciences	
STA 032 or STA 100 preferred		
Preparatory Subject Matter Subtotal		20-23

Depth Subject Matter Subtotal		45-48
Total Units		65-71

Statistics, Bachelor of Science

College of Letters & Science

Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.

The Program

Statistics majors may receive either a Bachelor of Arts or a Bachelor of Science degree. Both the A.B. and the B.S. programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications and computational aspects of statistics. The B.S. degree program has five tracks: Applied Statistics Track, Computational Statistics Track, General Track, Machine Learning Track, and the Statistical Data Science Track.

B.S. in Statistics-Applied Statistics Track emphasizes statistical applications. This track is recommended for students who are interested in applications of statistical techniques to various disciplines including the biological, physical and social sciences.

B.S. in Statistic-Computational Statistics Track emphasizes computing. This track is recommended for students interested in the computational and data management aspects of statistical analysis.

B.S. in Statistics-General Track emphasizes statistical theory and is especially recommended as preparation for graduate study in statistics.

B.S. in Statistics-Machine Learning Track emphasizes algorithmic and theoretical aspects of statistical learning methodologies that are geared towards building predictive and explanatory models for large and complex data. It is recommended for students interested in pursuing graduate programs in statistics, machine learning, or data science, as well as for students interested in learning statistical techniques for industry.

B.S. in Statistic-Statistical Data Science Track emphasizes data handling skills and statistical computation. This track is recommended for students interested in statistical learning methodology, advanced data handling techniques and computational aspects of statistical analysis.

Major Advisors

For a current list of faculty and staff advisors, see Undergraduate Advising (<https://statistics.ucdavis.edu/undergrad/advising/>).

Students are encouraged to meet with an advisor to plan a program as early as possible.

Career Alternatives

Probability models, statistical methods, and computational techniques are used in a great many fields, including the biological, physical, social, and health sciences, business, and engineering. The wide applicability of statistics is reflected in the strong demand for graduates with statistical training in both the public and private sectors. Employment opportunities include careers in data & policy analysis in government & industry, financial management, quality control, insurance & healthcare industry, actuarial science, engineering, public health, biological & pharmaceutical research, law, and education. Students with an undergraduate degree in statistics have entered advanced studies in statistics, economics, finance, psychology, medicine, business management & analytics, and other professional school programs.

The major requirements below are in addition to meeting University Degree Requirements (p. 55) & College Degree Requirements (p. 60); unless otherwise noted. Respective of the Track, the minimum number of units required for the Statistics Bachelor of Science are 75, 79, 82, 79, & 79.

Applied Statistics Track

Code	Title	Units

Statistics, Minor

College of Letters & Science

The Program

The Department offers a minor program in Statistics that consists of five upper division level courses focusing on the fundamentals of mathematical statistics and of the most widely used applied statistical methods.

Minor Advisors

For a current list of faculty and staff advisors, see Undergraduate Advising (<https://statistics.ucdavis.edu/undergrad/advising/>).

Statistics, Master of Science

College of Letters & Science

Jiming Jiang, Ph.D., Chairperson of the Program
 Jie Peng, Ph.D., Vice Chairperson for Graduate Affairs

Graduate Study

The Graduate Program in Statistics offers programs of study and research leading to M.S. and Ph.D. degrees. The M.S. gives students a strong foundation in the theory of statistics as well as substantial familiarity with the most widely used statistical methods. Facility in computer programming is essential for some of the course work. The supervised statistical consulting required of all M.S. students has proven to be a valuable educational experience. The Ph.D. program combines advanced course work in statistics and probability with the opportunity for in-depth concurrent study in an applied field. For detailed information contact the Chairperson of the Program or the Graduate Advisor.

Standard Track. 32 units of core coursework and 12 units of electives are required for a total of 44 units.

Emphasis in Data Science Track. 32 units of core coursework and 16 units of electives are required for a total of 48 units.

Master's Program Information (<https://statistics.ucdavis.edu/grad/ms/>)

Preparation

Preparation for the graduate program requires a year of calculus, a course in linear algebra, facility with a programming language and upper division coursework in mathematics and/or statistics.

Master's Program Admissions Information (<https://statistics.ucdavis.edu/grad/admissions/>)

Graduate Advisor

Christiana Drake, Ph.D. (Statistics)

Statistics, Doctor of Philosophy

College of Letters & Science

Jiming Jiang, Ph.D., Chairperson of the Program

Theatre & Dance

College of Letters & Science

Margaret L. Kemp, M.F.A., Chairperson of the Department; term ends June 30, 2026

Department Office

101 Art Building; 530-752-0888; Fax 530-752-8818; Theatre & Dance (<http://arts.ucdavis.edu/theatre-dance/>); Faculty (<http://arts.ucdavis.edu/theatre-dance-faculty/>)

- Dramatic Art, Master of Fine Arts (p. 491)
- Theatre & Dance, Bachelor of Arts (p. 491)
- Theatre & Dance, Minor (p. 495)

Dramatic Art, Master of Fine Arts

College of Letters & Science

Department of Theatre & Dance

216A Art Building; 530-752-8710; Dramatic Art (<https://arts.ucdavis.edu/performance-studies-academics/>); Faculty (<http://arts.ucdavis.edu/theatre-dance-faculty/>)

Graduate Study

The Department of Theatre & Dance offers programs of study and research leading to the M.F.A. in Dramatic Art (the interdisciplinary weaving of acting, directing, design, choreography and practice and research) and contributing to the Graduate Group Ph.D. in Performance Studies (p. 396). Detailed information may be obtained by contacting the Graduate Program Administrators: for the M.F.A. in Theatre & Dance, 530-752-8710; Graduate Group in Performance Studies (p. 396), 530-754-6973.

Theatre & Dance, Bachelor of Arts

College of Letters & Science

The A.B. degree in Theatre & Dance provides students with an appreciation for an understanding of performance and its role in culture and society. Students build skills in specific areas as well as a broad knowledge of theatre and dance.

Productions & Facilities

Each year's schedule includes opportunities to work with professional artists (directors, choreographers and writers) in Granada Artists-in Residence productions, faculty and student-led workshops and productions, and the Film Festival at UC Davis. These productions are staged in our proscenium (Main), thrust (Wyatt), black box (Arena), performance studio (Della Davidson Performance Studio) and intimate laboratory theatre (Lab A). These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

Production Requirements

All students completing a major in Theatre & Dance must participate in productions, including work in at least two of the following three areas: performance (acting/dance), design, and directing/playwriting/stage management, as well as crew assignments and work in production labs.

Graduate Study

The Department of Theatre & Dance offers programs of study and research leading to the M.F.A. in Dramatic Art (**admissions currently suspended**) and contributing to the Graduate Group Ph.D. in Performance Studies (<https://catalog.ucdavis.edu/departments-programs-degrees/performance-studies-graduate-group/>). Detailed information may be obtained by contacting the Graduate Program Administrator for the Graduate Group in Performance Studies (<https://catalog.ucdavis.edu/departments-programs-degrees/performance-studies-graduate-group/>), 530-754-6973.

The major requirements below are in addition to meeting University Degree Requirements (p. 55) & College Degree Requirements (p. 60); unless otherwise noted. The minimum number of units required for the Theatre & Dance Bachelor of Arts is 66.

- Transportation Technology & Policy, Doctor of Philosophy (p. 496)

Transportation Technology & Policy, Master of Science

Graduate Studies

Graduate Study

The Graduate Group in Transportation Technology & Policy offers the M.S. (Plan I—thesis; and Plan II—exam), and Ph.D. degrees. Students complete three core courses in technology, policy, and data science and choose one of three tracks: Vehicles & Fuels, Demand & Behavior or Infrastructure & Operations. The curriculum draws on multiple disciplines including civil, mechanical, and environmental engineering, economics, statistics, political science, psychology, sociology, geography, and urban planning.

Preparation

Applicants will normally be expected to have completed two courses in calculus and one course each in calculus level statistics and microeconomics.

Program of Study

M.S. students complete three core courses, two track courses, two skills courses plus electives. Ph.D. students take the same plus an additional skill course and additional electives. Master's degrees require a minimum of 36 quarter units and doctoral degrees require a minimum of 54 units. M.S. Plan I students may replace up to 6 units of regular course work with research (course 299) units. At least two thirds of all credits must be at the graduate level.

University Writing Program

College of Letters & Science

John Marx, Ph.D., Interim Program Director

Program Office

109 Voorhies Hall; 530-752-6283; University Writing Program (<http://writing.ucdavis.edu>)

The Program

The University Writing Program (UWP) offers writing courses and seeks to improve writing instruction across campus through a variety of programs. The UWP coordinates first year, intermediate, and advanced writing courses that satisfy college composition requirements and offers courses in writing across the curriculum, writing in specific disciplines, and writing in the professions. The Professional Writing Minor serves students from all majors who are planning careers as professional writers or editors, as well as those whose academic and professional careers demand advanced writing skills. The Program offers graduate courses in the teaching of writing and in composition theory, history, and research. The Designated Emphasis in Writing, Rhetoric, and Composition Studies offers Ph.D. students in affiliated programs the opportunity to prepare for leadership roles in writing research, teaching, and program administration. The UWP also administers the English Composition Examination, an alternative way to satisfy the advanced writing requirement. The UWP publishes an annual anthology

of exemplary student writing, Prized Writing, and a journal for writing instructors, *Writing on the Edge*. The Writing in the Disciplines Workshop Program presents workshops on teaching writing for faculty and TAs and workshops on writing for students. The Writing Ambassadors Program trains advanced undergraduates and places them as interns in K-12 classrooms to improve writing instruction.

- Viticulture & Enology, Bachelor of Science (p. 498)

Viticulture & Enology, Bachelor of Science

College of Agricultural & Environmental Sciences

The Viticulture & Enology major provides an interdisciplinary education in the biological and physical principles underlying grape and wine production as well as practical knowledge of grape growing (viticulture) and wine making (enology). This program provides the knowledge base for problem-solving and decision-making in commercial grape and wine production.

Preparatory Requirements

Before transferring into the Viticulture & Enology major, students must complete the following courses with a grade of C- or better and with a combined grade point average of at least 2.500 at the University of California (at least 3.000 for similar courses taken at community college) for these and all other preparatory courses. In addition, students' overall UC GPA must be 2.250 or higher. All courses must be taken for a letter grade.

Requirement	Units
BIS 002A	5
CHE 002A, 002B, 002C, 008A	17
MAT 016A	3
PHY 001A, 001B or 007A	4-6

Recommendations

Completion of UC Davis equivalents of the following preparatory courses for the major are not required for entry but are highly recommended. Failure to complete these will delay entry into required upper division courses and may thus delay graduation. Some courses may be available at UC Davis during Summer Session:

Requirement	Units
CHE 008B	4
MAT 016B	3
PLS 002	4
BIS 102	3

The Program

The curriculum builds upon a foundation of biology, chemistry, biochemistry and mathematics with specialized courses related to grape and wine production. To complete the program, students may choose to place particular emphasis on viticulture, enology or economics. Credit may also be earned for foreign language study and internships.

Major Advisors

M. Bartlett

Related Major Programs

Food Science & Technology; Plant Sciences.

Career Alternatives

Graduates are qualified for a variety of vineyard and winery positions, including production management, quality control and research.

Additionally, they may work in related fields such as pest management, nursery production and analytical services.

Graduate Study

Several graduate groups offer programs of study leading to advanced degrees in the fields of viticulture and enology. For the M.S. or Ph.D. degree, see Agricultural & Environmental Chemistry (Graduate Group) (p. 85), Engineering: Chemical Engineering (p. 152), Ecology (Graduate Group) (p. 220), Food Science (Graduate Group) (p. 268), Integrative Genetics & Genomics (Graduate Group) (p. 308), Horticulture & Agronomy (Graduate Group) (p. 292), Microbiology (Graduate Group) (p. 353), Plant Biology (Graduate Group) (p. 415), Plant Pathology (p. 415), Soils & Biogeochemistry (Graduate Group) (p. 479), and Viticulture & Enology (Graduate Group) (p. 500).

The major requirements below are in addition to meeting University Degree Requirements (p. 55) & College Degree Requirements (p. 60); unless otherwise noted. The minimum number of units required for the Viticulture & Enology Bachelor of Science is 124.

Code	Title	Units

Viticulture & Enology, Master of Science

Graduate Studies

Graduate Study

The M.S. program offers advanced studies in viticulture and enology, ranging from the genetics, physiology and biochemistry of grapevines to the chemistry, microbiology and sensory science of wines and the chemical engineering of winemaking. Priority application deadline January 15, applications accepted until May 15.

Ph.D. studies are not offered by the Graduate Program in Viticulture & Enology.

Preparation

Applicants to the program are required to have a level of competence equivalent to that of a strong science undergraduate program. This includes coursework in biology, general chemistry, organic chemistry, calculus, statistics (analysis of variance), biochemistry, microbiology, and economics.

Specific requirements are outlined in detail and may be obtained by visiting Viticulture & Enology Graduate Group (<http://vengg.ucdavis.edu>).

Wildlife, Fish & Conservation Biology, Bachelor of Science

College of Agricultural & Environmental Sciences

The Wildlife, Fish & Conservation Biology major deals with the relationships between the requirements of wildlife and the needs of

people. Understanding these relationships is vital for the maintenance of ecological diversity, recreational resources, and food supplies. Students completing the major possess a broad knowledge of ecology and natural history, but with the quantitative skills to use this knowledge in critical thinking and decision-making.

The Program

The major emphasizes broad training in biological sciences, with specialization in one of four areas. The major is designed primarily for students interested in becoming professionals in the diverse fields of wildlife, fish, & conservation biology, including veterinary & wildlife health sciences. The breadth of course requirements, when combined with electives, also make this an excellent preparatory major for secondary school teaching. Certification by professional societies such as The Wildlife Society, American Fisheries Society, or the Ecological Society of America, or preparation for graduate studies may also be achieved by careful planning of electives with a faculty advisor.

Lead Faculty Advisor

Douglas Kelt

Wildlife, Fish, & Conservation Biology Major Advisor

Erica Cefalo

Students transferring to UC Davis from another institution or new students declaring the major of Wildlife, Fish & Conservation Biology must consult the major advisor so that their program can be evaluated and a faculty advisor assigned. Advising is located in 1086 Academic Surge and can be reached by email at wfcbadvising@ucdavis.edu.

Career Alternatives

The major prepares students to excel in the dynamic fields of environmental and conservation biology, emphasizing vertebrate animals –both native and invasive—in their natural environments, as well as resolution of conflicts between humans and wild animals. Positions now held by graduates of this major include wildlife biology, fisheries biology, wildlife damage management, and resource biologists and managers with local, state, and federal agencies, biologists or consultants with private industries such as environmental consulting firms, commercial fishing businesses, electrical utilities, sporting clubs or businesses, and aquaculture operations, as well as veterinarians, medical physicians, and professors/researchers who teach and/or conduct research in academic institutions.

The major requirements below are in addition to meeting University Degree Requirements (p. 55) & College Degree Requirements (p. 60); unless otherwise noted. The minimum number of units required for the Wildlife, Fish & Conservation Biology Bachelor of Science is 111.

Total Units**20-31*****Additional Preparatory***

Recommended, not required:

BIS 101	Genes & Gene Expression
CHE 002C	General Chemistry
CHE 118A	Organic Chemistry for Health & Life Sciences
CHE 118B	Organic Chemistry for Health & Life Sciences
CHE 118C	Organic Chemistry for Health & Life Sciences
PHY 007A	General Physics
PHY 007B	General Physics
PHY 007C	General Physics

Total Units **16-24****(4) Individualized**

Students may, with prior approval of their advisor and the curriculum committee, design their own individualized specialization within the major. The specialization will consist of at least four upper division courses with a coherent theme.

Wildlife, Fish & Conservation Biology, Minor

College of Agricultural & Environmental Sciences

The minor in Wildlife, Fish & Conservation Biology is designed for students interested in basic training and understanding of the ecology and conservation of wild terrestrial and aquatic vertebrates, emphasizing birds, mammals, amphibians, reptiles, and fish, but with relevance and application to all life forms.

Lead Faculty Advisor

Douglas Kelt

Code	Title	Units
WFC 100	Field Methods in Wildlife, Fish, & Conservation Biology	4
WFC 151	Wildlife Ecology	4
WFC 154	Conservation Biology	4

WFC 190	Departmental Research Seminar
WFC 191	Museum Science
WFC 192	Internship

ABOUT COURSES

Courses listed in this catalog are subject to change without notice.

Use this guide to understand course descriptions & requirements.

Course Descriptions

Below is a sample of how a course is listed in this catalog:

AAS 100 — Survey of Ethnicity in the US (4 units)

Description:

Learning Activities:

Prerequisite(s):

Enrollment Restriction(s):

Credit Limitation(s):

Cross Listing:

Repeat Credit:

General Education:

Grade Mode:

This course version is effective from, and including: Fall Quarter 2022

- The top line is the course subject code and course number—title; units.
- Below are the various attributes for each course. An attribute, like *Cross Listing* or *General Education*, only appears if there is data.
- Course changes during the catalog year** appear with a warning reading *This version has ended; see updated course, below*, under the title line (see example, below). The change may be anything from a unit change to the course being discontinued.

The last line is the term the course is effective *in this configuration; not when the course is taught*. Pay attention to the effective term; this is the *first* term the change is effective or the term the course is discontinued. A course that has one or more versions in a catalog year shows the latest version at the bottom of the roll-down box (see example, below).

NRS 224 — Developing Future Nurse Leaders (2 units)

This version has ended; see updated course, below.

Course Description: Effective decision-making, fiscal and environmental stewardship, initiating and maintaining effective working relationships, mutually respectful communication and collaboration, care coordination, delegation and supervision. Conflict resolution, leadership and interprofessional teamwork.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in the Nursing Science & Health-Care Leadership Graduate Group or by consent of the Instructor.

Grade Mode: Letter.

NRS 224 — Developing Future Nurse Leaders (3 units)

Course Description: Effective decision-making, fiscal and environmental stewardship, initiating and maintaining effective working relationships, mutually respectful communication and collaboration, care coordination, delegation and supervision. Conflict resolution, leadership and interprofessional teamwork.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in the Nursing Science & Health-Care Leadership Graduate Group or by consent of the Instructor.

Grade Mode: Letter.

This course version is effective from, and including: Spring Quarter 2023.

General Education (GE Credit)

For complete information, see General Education (GE) Requirement (p. 59).

Courses Taught Abroad

Some courses carry the "May be taught abroad" designation. If so, for more details, registration requirements, and information, check with your advisor and the Global Learning Hub (<https://globallearning.ucdavis.edu/>).

Prerequisites

Prerequisites for most undergraduate courses are checked by Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>). It is the student's responsibility to meet these requirements and the instructor's responsibility to enforce them. Students who have completed equivalent work may be admitted to the course at the instructor's discretion. For complete information, see Student Information on Prerequisites (<https://registrar.ucdavis.edu/registration/register-for-classes/prerequisites/>).

Undergraduate Courses

Generally, courses 092, 098, 099, 190C, 192, 197T, 197TC, 198, 199, 290, 290C, 298, and 299 may be repeated for credit; see Committee on Courses of Instruction (COCI) Policy III.B.17 (<https://academicsenate.ucdavis.edu/committees/courses-of-instruction/policies-procedures/#Course>)¹.

001-099, Lower Division Courses

Courses open to students for lower division credit who have met the necessary prerequisites and enrollment restrictions as indicated in Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>); designed primarily for freshmen and sophomores.

100-199, Upper Division Courses

Courses open to students who have met the necessary prerequisites and enrollment restrictions as indicated in Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>). Preparation generally includes completion of one lower division course in the given subject or completion of two years of college work.

090X/190X

Seminar courses for in-depth examination of a special topic within the subject area.

092/192

Internship courses enable individual students to obtain practical experience to complement their educational goals or to explore potential career interests and opportunities. Students must have completed 84 units before enrolling in course 192.

097T&C/197T&C

Tutoring and Tutoring in the Community courses for students who want to tutor in a subject in which they are proficient—generally in their major field—while enrolled as an undergraduate.

098/198

Directed Group Study courses are set up on a one-time basis for a group of students in a subject for which no regular courses have been established.

099

Special Study for Undergraduates courses arranged for an individual student who shares, with an instructor, an academic interest that cannot be accommodated within the formal course structure; credit is limited to a total of 5 units per term.

190C

Research Conference courses where advanced undergraduate students may participate in critical discussions of research activities. These one-unit courses are graded on a Passed/Not Passed basis.

194H

Special Study for Honors Students courses are for individual students with honor status, as determined by the department offering the course and who have completed 84 units; credit is limited to a total of 5 units per term.

199

Special Study for Advanced Undergraduates courses are the upper division counterparts of course 099 and involve supervised independent study and research requiring an adequate background in the subject proposed for study as well as prior completion of 84 units; credit is limited to a total of 5 units per term.

Variable-Unit

Subject to approval by the department chair, an instructor may arrange to give a special study course to interested students; numbers include 090X, 092, 097T, 097TC, 098, 099, 190X, 192, 194H, 197T, 197TC, 198, 199.

Auto tutorial

Courses where students instruct themselves at their own pace. Courses can be identified by the letters AT at the end of their course numbers; e.g., 013AT, 141AT.

Graduate Courses**200-299**

Courses open to graduate students and to undergraduates who have completed 18 units of upper division basic work related to the subject matter of the course. However, admission is subject to the approval of the instructor in charge of the course. Grading in 290C courses and most variable-unit 299 or 299D courses is Satisfactory/Unsatisfactory (S/U). Check the course description for grading information.

300-399, Professional Courses for Teachers & Nurse Practitioners

Professional courses for teachers and nurse practitioners are teacher-training courses in the School of Education and in other departments and are specifically intended for teachers or prospective teachers. Courses designed to provide instruction to teaching assistants are included. Courses for certification of family nurse practitioners and physician assistants are also included. Courses are open only to students enrolled in those programs.

400-499, Other Professional Courses

Professional training courses. Graduate students should consult their faculty advisor or contact Graduate Studies before registering in 400 series courses to determine if graduate credit may be awarded for the course in question.

Virtual & Hybrid Courses

Courses where instruction is delivered on the Internet. Courses delivered completely online are identified by the letter V at the end of their course numbers, e.g., 010V, 162V. Instructors may require in-person exams in V courses. Hybrid courses are a combination of online and classroom activities and are identified by the letter Y at the end of their course numbers, e.g., 010Y, 162Y.

Multi-Quarter Courses

A series of course numbers followed by two or three letters (for example, Physics (PHY) 110A-110B-110C) is continued through three successive quarters; e.g., fall through spring. The first quarter course listed this way is a prerequisite to the second and the second is a prerequisite to the third. On the other hand, where A and B portions of a course are listed separately (for example, Economics (ECN) 160A & 160B), the A course is not a prerequisite to B, unless A is specifically mentioned in the list of B prerequisites.

Cross-Listed Courses

A cross-listed course (shown as *Cross Listing:*) is a single course offered collaboratively through two or more departments or programs. Cross-listed courses have identical content. If a student passes one course in the cross-listing, they cannot register for the partner course(s).

Expanded Course Descriptions

You may find that the descriptions in the General Catalog do not include all the information you would like about a course. Expanded Course Descriptions are available for on-campus use at the College dean's offices or the Biology Academic Success Center (<https://basc.biology.ucdavis.edu/>), advisors' offices, advising centers, and departmental offices.

¹ Committee on Courses of Instruction (COCI) Policy III.B.17

Committee on Courses of Instruction (COCI) Policy III.B.17 (<https://academicsenate.ucdavis.edu/committees/courses-of-instruction/policies-procedures/#Course>)

17. Generally, courses 92, 98, 99, 190C, 192, 197T, 197TC, 198, 199, 290, 290C, 298, 299 may be repeated for credit. See COCI Policy III.C.1.c. for information that must be provided in ICMS.

COURSES BY SUBJECT CODE

A

- Aerospace Science & Engineering (EAE) (p. 509)
- African American & African Studies (AAS) (p. 511)
- Agricultural & Environmental Chemistry (AGC) (p. 517)
- Agricultural & Environmental Technology (TAE) (p. 518)
- Agricultural & Resource Econ (ARE) (p. 519)
- Agricultural Education (AED) (p. 529)
- American Studies (AMS) (p. 531)
- Anatomy, Physiology, & Cell Biology (APC) (p. 535)
- Anesthesiology (ANE) (p. 536)
- Animal Behavior (ANB) (p. 537)
- Animal Biology (ABI) (p. 538)
- Animal Biology Graduate (ABG) (p. 539)
- Animal Genetics (ANG) (p. 541)
- Animal Science (ANS) (p. 542)
- Anthropology (ANT) (p. 550)
- Applied Biological Systems Technology (ABT) (p. 565)
- Applied Science Engineering-Davis (EAD) (p. 568)
- Arabic (ARB) (p. 569)
- Art History (AHI) (p. 572)
- Art Studio (ART) (p. 580)
- Asian American Studies (ASA) (p. 589)
- Astronomy (AST) (p. 593)
- Atmospheric Science (ATM) (p. 593)
- Avian Sciences (AVS) (p. 599)

B

- Biochemistry, Molecular, Cellular, & Developmental Biology (BCB) (p. 601)
- Biological Chemistry (BCM) (p. 602)
- Biological Sciences (BIS) (p. 604)
- Biological Systems Engineering (EBS) (p. 609)
- Biomedical Engineering (BIM) (p. 615)
- Biophotonics (BPT) (p. 626)
- Biophysics (BPH) (p. 627)
- Biostatistics (BST) (p. 628)
- Biotechnology (BIT) (p. 629)
- Business Analytics (BAX) (p. 630)

C

- Cardiology (CAR) (p. 632)
- Cell Biology & Human Anatomy (CHA) (p. 633)
- Chemical Engineering (ECH) (p. 635)
- Chemistry (CHE) (p. 643)
- Chicano Studies (CHI) (p. 655)
- Chinese (CHN) (p. 663)
- Cinema & Digital Media (CDM) (p. 669)
- Cinema & Technocultural Studies (CTS) (p. 674)
- Civil & Environmental Engineering (ECI) (p. 675)
- Classics (CLA) (p. 690)

- Clinical Research (CLH) (p. 696)
- Cognitive Science (CGS) (p. 699)
- College of Letters & Science (LTS) (p. 701)
- Communication (CMN) (p. 701)
- Community & Regional Development (CRD) (p. 711)
- Comparative Literature (COM) (p. 716)
- Computer Science Engineering (ECS) (p. 727)
- Consumer Sciences (CNS) (p. 745)
- Critical Theory (CRI) (p. 745)
- Cultural Studies (CST) (p. 746)

D

- Data Science (DSC) (p. 748)
- Dermatology (DER) (p. 748)
- Design (DES) (p. 749)
- Designated Emphasis, Biotechnology (DEB) (p. 760)
- Dramatic Art (DRA) (p. 760)

E

- East Asian Studies (EAS) (p. 773)
- Ecology (ECL) (p. 774)
- Economics (ECN) (p. 776)
- Education (EDU) (p. 787)
- Education Abroad Program (EAP) (p. 800)
- Electrical & Computer Engineering (EEC) (p. 801)
- Emergency Medicine (EMR) (p. 819)
- Endocrinology & Metabolism (ENM) (p. 821)
- Energy Systems (EGG) (p. 822)
- Engineering (ENG) (p. 822)
- English (ENL) (p. 826)
- Entomology (ENT) (p. 840)
- Environmental Horticulture (ENH) (p. 844)
- Environmental Humanities (EVH) (p. 845)
- Environmental Policy & Management (ENV) (p. 845)
- Environmental Science & Management (ESM) (p. 846)
- Environmental Science & Policy (ESP) (p. 849)
- Environmental Toxicology (ETX) (p. 855)
- Epidemiology (EPI) (p. 860)
- Evolution & Ecology (EVE) (p. 863)
- Exercise Biology (EXB) (p. 869)
- Exercise Science (EXS) (p. 872)

F

- Family Practice (FAP) (p. 872)
- Fiber & Polymer Science (FPS) (p. 877)
- Film Studies (FMS) (p. 878)
- Fine Arts & Humanities (FAH) (p. 879)
- Food Science & Technology (FST) (p. 880)
- Food Service Management (FSM) (p. 885)
- Forensic Science (FOR) (p. 886)
- French (FRE) (p. 889)

- Freshman Seminar (FRS) (p. 897)
- Future Undergraduate Science Educators (FSE) (p. 898)

G

- Gastroenterology (GAS) (p. 898)
- Gender, Sexuality, & Women's Studies (GSW) (p. 899)
- General Medicine (GMD) (p. 901)
- Genetics (GGG) (p. 902)
- Geography (GEO) (p. 904)
- Geology (GEL) (p. 907)
- German (GER) (p. 920)
- Global Disease Biology (GDB) (p. 928)
- Global Studies (GLO) (p. 929)
- Graduate Education (GRD) (p. 929)
- Greek (GRK) (p. 930)

H

- Health Informatics (MHI) (p. 931)
- Hebrew (HEB) (p. 933)
- Hematology & Oncology (HON) (p. 934)
- Hindi/Urdu (HIN) (p. 935)
- History (HIS) (p. 936)
- Honors Challenge (HNR) (p. 960)
- Horticulture (HRT) (p. 961)
- Human Development (HDE) (p. 962)
- Human Physiology (HPH) (p. 968)
- Human Rights (HMR) (p. 970)
- Humanities (HUM) (p. 972)
- Hydrologic Science (HYD) (p. 974)

I

- Immunology (IMM) (p. 979)
- Infectious Diseases (IDI) (p. 980)
- Integrated Studies (IST) (p. 981)
- Internal Medicine (IMD) (p. 982)
- International Agricultural Development (IAD) (p. 987)
- International Commercial Law (ICL) (p. 989)
- International Relations (IRE) (p. 992)
- Italian (ITA) (p. 993)

J

- Japanese (JPN) (p. 1000)
- Jewish Studies (JST) (p. 1007)

L

- Landscape Architecture (LDA) (p. 1008)
- Latin (LAT) (p. 1013)
- Law (LAW) (p. 1015)
- Linguistics (LIN) (p. 1046)

M

- Management (MGT) (p. 1052)
- Management; Online (MGV) (p. 1066)

- Management; Working Professional (MGP) (p. 1074)
- Management; Working Professional Bay Area (MGB) (p. 1087)
- Masters Preventive Veterinary Medicine (MPM) (p. 1101)
- Materials Science Engineering (EMS) (p. 1102)
- Maternal & Child Nutrition (MCN) (p. 1107)
- Mathematics (MAT) (p. 1108)
- Mechanical & Aeronautical Engineering (MAE) (p. 1122)
- Mechanical Engineering (EME) (p. 1127)
- Medical Microbiology (MMI) (p. 1131)
- Medical Pharmacology & Toxicology (PHA) (p. 1133)
- Medical Sciences (MDS) (p. 1135)
- Medicine & Epidemiology (VME) (p. 1144)
- Medieval Studies (MST) (p. 1145)
- Microbiology & Molecular Genetics (MMG) (p. 1146)
- Microbiology (MIB) (p. 1147)
- Microbiology (MIC) (p. 1147)
- Middle East/South Asian Studies (MSA) (p. 1150)
- Military Science (MSC) (p. 1153)
- Molecular & Cellular Biology (MCB) (p. 1155)
- Molecular Biosciences (VMB) (p. 1160)
- Molecular, Cellular, & Integrative Physiology (MCP) (p. 1161)
- Music (MUS) (p. 1164)

N

- Native American Studies (NAS) (p. 1176)
- Nematology (NEM) (p. 1184)
- Nephrology (NEP) (p. 1185)
- Neurobiology, Physiology, & Behavior (NPB) (p. 1186)
- Neurology (NEU) (p. 1195)
- Neuroscience (NSC) (p. 1197)
- Neurosurgery (NSU) (p. 1200)
- Nursing (NRS) (p. 1201)
- Nutrition (NUT) (p. 1219)
- Nutritional Biology (NUB) (p. 1225)

O

- Obstetrics & Gynecology (OBG) (p. 1225)
- Ophthalmology (OPT) (p. 1228)
- Orthopaedic Surgery (OSU) (p. 1228)
- Otolaryngology (OTO) (p. 1229)

P

- Pathology (PMD) (p. 1230)
- Pathology, Microbiology, & Immunology (PMI) (p. 1233)
- Pediatrics (PED) (p. 1234)
- Performance Studies (PFS) (p. 1238)
- Persian (PER) (p. 1240)
- Pharmacology & Toxicology (PTX) (p. 1241)
- Philosophy (PHI) (p. 1242)
- Physical Medicine & Rehabilitation (PMR) (p. 1251)
- Physician Assistant Studies (PAS) (p. 1253)
- Physics (PHY) (p. 1256)

- Plant Biology (Graduate Group) (PBI) (p. 1269)
- Plant Biology (PLB) (p. 1271)
- Plant Pathology (PLP) (p. 1273)
- Plant Science (PLS) (p. 1276)
- Plastic Surgery (PSU) (p. 1284)
- Political Science (POL) (p. 1285)
- Population Biology (PBG) (p. 1300)
- Population Health & Reproduction (PHR) (p. 1302)
- Portuguese (POR) (p. 1303)
- Professional Accountancy (ACC) (p. 1306)
- Psychiatry (PSY) (p. 1308)
- Psychology (PSC) (p. 1311)
- Public Health Sciences (SPH) (p. 1324)
- Pulmonary Medicine (PUL) (p. 1331)
- Punjabi (PUN) (p. 1332)

R

- Radiation Oncology (RON) (p. 1332)
- Radiology-Diagnostic (RDI) (p. 1333)
- Radiology-Nuclear Medicine (RNU) (p. 1335)
- Religious Studies (RST) (p. 1336)
- Rheumatology & Allergy (RAL) (p. 1345)
- Russian (RUS) (p. 1346)

S

- School of Veterinary Medicine (VET) (p. 1349)
- Science & Society (SAS) (p. 1352)
- Science & Technology Studies (STS) (p. 1357)
- Social Theory & Comparative History (STH) (p. 1363)
- Sociology (SOC) (p. 1363)
- Soil Science (SSC) (p. 1373)
- Spanish (SPA) (p. 1375)
- Statistics (STA) (p. 1391)
- Study of Religion (REL) (p. 1399)
- Surgery (SUR) (p. 1401)
- Surgical & Radiological Sciences (VSR) (p. 1404)
- Sustainable Agriculture & Food Systems (SAF) (p. 1405)
- Systems & Synthetic Biology (SSB) (p. 1406)

T

- Technocultural Studies (TCS) (p. 1406)
- Textiles & Clothing (TXC) (p. 1406)
- Transportation Technology & Policy (TPP) (p. 1407)

U

- UC Davis Washington Center (WAS) (p. 1409)
- University Writing Program (UWP) (p. 1409)
- Urdu (URD) (p. 1421)
- Urology (URO) (p. 1421)

V

- Veterinary Clinical Rotation (DVM) (p. 1421)
- Viticulture & Enology (VEN) (p. 1421)

W

- Wildlife, Fish, & Conservation Biology (WFC) (p. 1426)
- Women's Studies (WMS) (p. 1431)

Aerospace Science & Engineering (EAE)

College of Engineering

EAE 001 – Introduction to Aerospace Science Engineering (1 unit)

Course Description: Description of the field of aerospace engineering with examples from industry, government, and research. Aerospace engineering principles, ethics, and responsibilities.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Pass/No Pass only.

EAE 010 – From the Wright Brothers to Drones & Quadcopters (2 units)

Course Description: History of aircraft and its influence on society. Topics covered will include Unmanned Aerial Vehicles, safety considerations, economics and privacy issues. Aerodynamics, stability and control will also be introduced.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

EAE 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EAE 126 – Theoretical & Computational Aerodynamics (4 units)

Course Description: Development of general equations of fluid motion. Study of flow field kinematics and dynamics. Flow about a body. Thin airfoil theory. Viscous effects. Applications of numerical methods to wing analysis and design.

Prerequisite(s): ENG 103 C- or better; ENG 105 C- or better; (ENG 180 C- or better or EAD 115 C- or better or MAT 128C C- or better or EME 115 C- or better).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EAE 127 – Applied Aircraft Aerodynamics (4 units)

Course Description: Principles, governing equations, and predictive theories for aircraft aerodynamics. Lift and drag of 2D airfoils, 3D wings, and high-lift devices.

Prerequisite(s): EME 106 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EAE 129 – Stability & Control of Aerospace Vehicles (4 units)

Course Description: Aircraft and spacecraft stability and control. Derivation of fundamental equations of motion for aircraft/spaceship. Fundamentals of feedback. Aircraft flight control systems. Spacecraft attitude control systems.
Prerequisite(s): ENG 102 C- or better.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Enrollment Restriction(s): Restricted to upper division standing.
Grade Mode: Letter.
General Education: Science & Engineering (SE).

EAE 130A – Aircraft Performance & Design (4 units)

Course Description: Major aircraft design experience with multiple realistic constraints including aerodynamics, performance analysis, weight estimation, stability and control, and appropriate engineering standards.
Prerequisite(s): (EAE 126 or EAE 127 C- or better); EAE 129 C- or better (can be concurrent).
Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).
Grade Mode: Letter.
General Education: Science & Engineering (SE).

EAE 130B – Aircraft Performance & Design (4 units)

Course Description: Major aircraft design experience including detailed design, cost analysis, analysis of aircraft structure, propulsion system, aerodynamics, aircraft handling qualities, manufacturing, or meeting relevant engineering standards.
Prerequisite(s): EAE 130A C- or better.
Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).
Enrollment Restriction(s): Restricted to upper division standing.
Grade Mode: Letter.
General Education: Science & Engineering (SE); Oral Skills (OL).

EAE 133 – Finite Element Methods in Structures (4 units)

Course Description: Introduction to the aerospace structural design process. History of aircraft and spacecraft materials. Effects of loading beyond elastic limit. Deflections and stresses due to combined loading. Virtual work principles, and finite element methods. Applications to aerospace structures.
Prerequisite(s): ENG 104 C- or better.
Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).
Enrollment Restriction(s): Open to College of Engineering Students.
Grade Mode: Letter.
General Education: Science & Engineering (SE).

EAE 135 – Aerospace Structures (4 units)

Course Description: Analysis and design methods used in aerospace structures. Shear flow in open, closed and multicell beam cross-sections, buckling of flat and curved sheets, tension field beams, local buckling.
Prerequisite(s): ENG 104 C- or better; EAE 126 or EAE 127 recommended.
Learning Activities: Lecture 4 hour(s).
Grade Mode: Letter.
General Education: Science & Engineering (SE).

EAE 137 – Structural Composites (4 units)

Course Description: Overview of materials and technology for creating structures from fiber reinforced resin matrix composite material systems. Elementary design analysis and case studies emphasizing aeronautical applications.
Prerequisite(s): ENG 104 C- or better.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Science & Engineering (SE).

EAE 138 – Aircraft Propulsion (4 units)

Course Description: Analysis/design of modern aircraft gas turbine engines. Development/application of cycle performance prediction techniques. Introduction to design of inlets, compressors, burners, turbines, and nozzles. Cycle design for specific applications.
Prerequisite(s): EME 106 C- or better.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Science & Engineering (SE).

EAE 140 – Rocket Propulsion (4 units)

Course Description: Fluid and thermodynamics of rocket engines, liquid and solid rocket propulsion. Space propulsion concepts and space mission requirements.
Prerequisite(s): EME 106 C- or better.
Learning Activities: Lecture 4 hour(s).
Enrollment Restriction(s): Restricted to upper division standing.
Credit Limitation(s): Not open for credit to students who have taken identical EAE 189A prior to Fall Quarter 2013.
Grade Mode: Letter.
General Education: Science & Engineering (SE).

EAE 142 – Orbital Mechanics (4 units)

Course Description: Satellite orbits, multistage rockets, current global boosters, and new technologies. Design application problems include satellites, trajectory optimizations, and interplanetary trajectories.
Prerequisite(s): ENG 102 C- or better.
Learning Activities: Lecture 4 hour(s).
Enrollment Restriction(s): Restricted to upper division standing.
Credit Limitation(s): Not open for credit to students who have completed EAE 189B prior to Fall Quarter 2013.
Grade Mode: Letter.
General Education: Science & Engineering (SE).

EAE 143A – Space Vehicle Design (4 units)

Course Description: Governing equations and operational practices of robotic and human space travel. Principles of Systems Engineering are introduced and are used as a basis for a team project in spacecraft reverse-engineering and design.
Prerequisite(s): EAE 140 C- or better; EAE 142 C- or better.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.

EAE 143B – Space Mission Design (4 units)

Course Description: Introduction to space systems design including space project organization, requirements definition & specification, concepts formulation, system tradeoffs, and subsystem design. Prototype space mission concepts & multidisciplinary mission design.

Prerequisite(s): EAE 143A C- or better.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Open to Mechanical Engineering and Aerospace Science & Engineering majors only.

Credit Limitation(s): Not open for credit to students who have completed EAE 141.

Grade Mode: Letter.

EAE 189C – Flight Simulation & Testing in Design of Aircraft & Spacecraft (4 units)

Course Description: Teaches flight test techniques together with data analysis methods to prepare students for any type of flight testing including fixed wing, rotary wing and launch vehicles.

Prerequisite(s): ENG 102; consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EAE 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

EAE 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

African American & African Studies (AAS)

College of Letters & Science

AAS 010 – African-American Culture & Society (4 units)

Course Description: Critical examination of the historical, political, social, and economic factors that have affected the development and status of African-American people in contemporary society.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AAS 012 – Introduction to African Studies (4 units)

Course Description: Introduction to African Studies which will focus on the various disciplinary perspectives through which African society and culture are generally studied. A survey of methods, resources and conceptual tools for the study of Africa.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

AAS 015 – Introduction to African American Humanities (4 units)

Course Description: Introduction to the humanist tradition developed by writers, philosophers, and artists of African descent in the West. Attention also given to African sources, as well as European, Caribbean, Latin-American, and North American variations on this tradition.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 165 students.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

AAS 016 – Verbal & Performance Arts in Africa (4 units)

Course Description: African verbal arts; oral texts from different African cultures. Types of critical response to oral texts, role of oral artists, context and esthetics of oral performance in Africa.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AAS 017 – Women in African Societies (4 units)

Course Description: Gender relations in traditional and contemporary African society. Involvement of African women in politics, religion, the economy, the arts. African responses to feminist theory. Images of women in African literature.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

AAS 018 – Introduction to Caribbean Studies (4 units)

Course Description: Introduction to the contemporary culture, peoples, politics, and societies of the Caribbean. Topics include movements of people, goods and ideas across the Atlantic world and creative productions within the Caribbean.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

AAS 050 – Black Popular Culture (4 units)

Course Description: Survey of the African American images in popular culture (film, television, comedy, sports and music).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); Writing Experience (WE).

AAS 051 – History of Afro American Dance (4 units)

Course Description: Evolution of African-American dance, tracing its history and development from West and Central Africa to the United States. Investigates the social and cultural relevance of African American dance and its artistic merits through contributions from its choreographers and performers.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL).

AAS 052 – African Traditional Religion (4 units)

Course Description: Introduction to traditional religions of the sub-Saharan African peoples: emphasis on myths, rituals and symbols in West, East, Central and South African indigenous religions. Examines themes: sacred kingship, divination system, women, prophecy, conversion and adaptation to Islam and Christianity.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

AAS 053 – Black California (4 units)

Course Description: Introduction to the experiences and contributions of people of African descent in California from the early 18th century to the present.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

AAS 080 – Introduction to Black Politics (4 units)

Course Description: Introduction to the analysis of Afro-American politics, using conceptual frameworks from political science and other social sciences.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

AAS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AAS 100 – Survey of Ethnicity in the US (4 units)

Course Description: Sociological and historical analysis of the experience, culture, and relations of and between groups considered racial and/or ethnic minorities in the United States.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

AAS 101 – Introduction to Research in the Afro-American Community (4 units)

Course Description: Introductory survey of Afro-American Studies methods and techniques; problems and methodology in Afro-American Studies.

Prerequisite(s): AAS 010; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

AAS 103 – The Black Human Rights Tradition (4 units)

Course Description: Key figures and frameworks in the Black human rights tradition. Significance of Black intellectuals and activists in social movements toward an expanded human rights tradition. Analysis and application of Black studies methods to contemporary social issues.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: HMR 137.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); World Cultures (WC).

AAS 107A – African Descent Communities & Culture in the Caribbean & Latin America (4 units)

Course Description: Origin and development of African descent communities and cultures in the Caribbean, and Latin America. Similarities and differences among African descent communities and cultures in terms of religious practices, music, and national identity.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: World Cultures (WC).

AAS 107B – African Descent Communities & Culture in North America (4 units)

Course Description: Study of the origin and development of African descent communities and cultures in the U.S.A., Canada, and Mexico.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD).

AAS 107C – African Descent Communities & Culture in Asia (4 units)

Course Description: Study of the origin and development of African Descent communities and cultures in Asia.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

AAS 107D – African Descent Communities & Cultures in Europe (4 units)

Course Description: Study of the origin and development of African Descent communities and cultures in Europe.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

AAS 110 – West African Social Organization (4 units)

Course Description: Ecology, population, social and political organization, and culture of West Africa in the precolonial, colonial, and post-colonial periods.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

AAS 111 – Cultural Politics in Contemporary Africa (4 units)

Course Description: Themes and style of new cultural forms in Africa as displayed in art, music, film and writing, especially in regard to blending of indigenous and foreign influences. Social and political forces shaping contemporary cultural expression.

Prerequisite(s): AAS 012; or upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

AAS 115 – Kingdoms in Contemporary African Politics (4 units)

Course Description: Kingdoms and monarchies in sub-Saharan Africa and their role in contemporary politics through the comparative political economy approach.

Prerequisite(s): AAS 012 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

AAS 116 – Presidential Politics in Africa (4 units)

Course Description: Political leadership in sub-Saharan Africa, focusing on historical, institutional, and biographical influences and outcomes through political economy approaches.

Learning Activities: Lecture/Discussion 3 hour(s); Term paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

AAS 123 – Black Female Experience in Contemporary Society (4 units)

Course Description: Black female social, intellectual, and psychological development. Black women's contributions in history, literature, and social science; life experiences of Black women and philosophical underpinnings of the feminist movement.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

AAS 130 – Education in the African-American Community (4 units)

Course Description: Examination of the history of the education of African Americans in the United States. Examination and critique of contemporary theories concerning the schooling of African Americans. (Former AAS 140.)

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

AAS 133 – The Black Family In America (4 units)

Course Description: Analysis of social science research to examine relationship between black (African-descent) family structures, patterns of functioning, and political, economic, and social conditions in the U.S.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

AAS 141 – Psychology of the African American Experience (4 units)

Course Description: Introduction to the psychological issues faced by African Americans. Description of any disparities in mental health care experienced by African American and Diaspora populations in the United States. Analysis of issues from European/Western and Afrocentric frame of reference. Emphasis on Optimal Theory, a psychological theory based on an Afrocentric world view.

Prerequisite(s): AAS 010; or consent of instructor; upper division status.

Learning Activities: Discussion 1 hour(s), Lecture 3 hour(s).

Grade Mode: Letter.

AAS 145A – Black Social & Political Thought (4 units)

Course Description: Exploration and analysis of Black social and political thought in the Americas.

Prerequisite(s): AAS 010 or AAS 080; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

AAS 145B – Black Intellectuals (4 units)

Course Description: Exposition and critical analysis of selected theoretical writings of Black intellectuals, and especially political and social thinkers, in the Americas.

Prerequisite(s): (AAS 010, AAS 080, AAS 145A); or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD); Writing Experience (WE).

AAS 150A – Afro-American Visual Arts Tradition: A Historical & Cultural Study (4 units)

Course Description: Afro-American visual arts tradition, folk and formal, in historical and cultural context, from 1600 through Reconstruction.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

AAS 150B – Afro-American Visual Arts Tradition: A Historical & Cultural Study (4 units)

Course Description: Afro-American visual arts tradition, folk and formal, in historical and cultural context, from Reconstruction to the present.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

AAS 151 – Afro-American Vernacular Music & Verbal Arts (4 units)

Course Description: Socio-political dimensions of Afro-American musical forms like spiritual, work song, minstrelsy blues, rhythm and blues, jazz, gospel, soul and contemporary pop, and related verbal arts like preaching, toasting, rapping.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

AAS 152 – Major Voices in Black World Literature (4 units)

Course Description: Recurrence of cultural tropes in the works of major black world authors and formation of an African-oriented canon. Principal activities include critical reading and discovery of literature as a cultural resource.

Prerequisite(s): AAS 010 or AAS 012 or AAS 018; upper division standing.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

AAS 153 – African Literature (4 units)

Course Description: Colonial and post-colonial sub-Saharan African literature and the African oral traditions from which it emerged. Genres and themes of African literature from the 19th century to the present.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: COM 154.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

AAS 155A – African-American Dance & Culture in the United States, Brazil & the Caribbean (4 units)

Course Description: Comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: DRA 155A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AAS 156 – Language & Identity in Africa & the African Diaspora (4 units)

Course Description: Relationship between language and identity in literature from Africa and the African Diaspora. Use of pidgins, Creoles, translation from African languages and impact of language policies.

Prerequisite(s): AAS 012; or upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); World Cultures (WC).

AAS 157 – Literature & Society in South Africa (4 units)

Course Description: Political and social developments in 20th-century South Africa as illustrated by a range of South African writing. Response of different writers to race relations, impact of government policy on types and context of writing.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

AAS 160 – African-American Folklore (4 units)

Course Description: Theory and history of African American folklore and folklife, including music, material culture, oral narrative, proverbs, and humor. African and Caribbean cultural influences on New World folk genres will be probed.

Prerequisite(s): AAS 010.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

AAS 162 – Islam in Africa & the Americas (4 units)

Course Description: Comparative and historical survey of Islam in the regional and cultural settings of Sub-Saharan Africa and the Americas.

Prerequisite(s): RST 060 or AAS 012 or AAS 110.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

AAS 163 – African Religions in the Americas (4 units)

Course Description: Comparative study of African religious heritage in the Americas: Jamaica, Trinidad, Cuba, U.S.A., Haiti, and Brazil. Emphasis on the origins and development of Candomble, Santeria, Shango, Vodun, and Rastafarianism in the New World.

Prerequisite(s): AAS 010; AAS 015; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

AAS 165 – Afro-Christianity & the Black Church (4 units)

Course Description: Examination of the historical role of Christian belief and practice as well as the institution of the Black Church in the experience of African Americans, from slavery to the present.

Prerequisite(s): AAS 010; AAS 015; or consent of instructor; upper division standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

AAS 168 – Black Documentary: History & Practice (4 units)

Course Description: Study of Black documentary history and understanding of the use of the documentary form for political purposes. Discussion of documentary theory. Each student, singly or in a team, will create and carefully edit a documentary project.

Prerequisite(s): FMS 001; AAS 170; and consent of instructor; AAS 050 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC).

AAS 169 – History of African American Television (4 units)

Course Description: History of the representation of African Americans in television; how the representations reflect social and political forces in American society. Role of African Americans in actively shaping their representation.

Prerequisite(s): AAS 050 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); Writing Experience (WE).

AAS 170 – African-American Film & Video (4 units)

Course Description: Comparative approach in the study of fictional film and video dealing with the African American experience drawing on film and cultural studies to examine and discuss selected works.

Prerequisite(s): FMS 001; AAS 050 recommended.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); Writing Experience (WE).

AAS 171 – Black African & Black European Film & Video (4 units)

Course Description: Comparative approach in the study of dramatic films and videos that treat black life in Africa and Europe. Critical attention focused on the imaginative construction of ethnicity, race, nationality, gender, and sexuality in each particular work.

Prerequisite(s): AAS 015 or AAS 050 or ENL 160 or ENL 162; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AAS 172 – Diaspora & New Black Identities (4 units)

Course Description: Critical analysis about what it means to be Black/African American in the United States today. Topics include old and new diasporas, immigration, national origin, language, religion, class, education, politics, identity and cultural heritage.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AAS 175A – Black Documentary: History & Theory (4 units)

Course Description: Black documentary history and documentary theory. Use of black documentary for political purposes.

Prerequisite(s): FMS 001; AAS 170; AAS 050 recommended.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); Writing Experience (WE).

AAS 175B – Black Documentary Practicum (4 units)

Course Description: Creation of documentary projects, with students working in production crews.

Prerequisite(s): AAS 175A; and consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD).

AAS 176 – The Politics of Resources (4 units)

Course Description: Examination of the ways in which the processes of the extraction, purification and use of natural resources and the complex regimes of valuation and commodification they (re)produce lead to cooperation and conflict in contemporary Africa and beyond.

Prerequisite(s): AAS 012 or AAS 110.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

AAS 177 – Politics of Life in Africa (4 units)

Course Description: Existing (in)capacities in the structures of state and society in Africa for people to live well. Topics include institutions and practices that define state and civil society encounters in Africa; democracy, ethnicity, economic crisis, religion, citizenship, etc.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

AAS 178 – African Modernity & Globalization (4 units)

Course Description: Exploration of modernity and globalization and their dimensions and impacts in/on Africa. Examination of modern necessities and constraints in Africa in relation to (neo)colonialism, transnational encounters, technology, gender, risk, ritual, identity, culture, etc.

Prerequisite(s): AAS 012; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Limited to 80 students.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

AAS 180 – Race & Ethnicity in Latin America (4 units)

Course Description: Social and political effects of racial and ethnic categorization in Latin America, including issues of economic production, citizenship, national belonging, and access to resources. Emphasis is on peoples of African, Indigenous, and Asian descent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

AAS 181 – Hip Hop in Urban America (4 units)

Course Description: History, aesthetics, urban context, and economics of hip-hop in the US, and its globalization. Hip-hop's four artistic elements—rap, deejaying, breakdance, and aerosol art—allow the examination of issues of race, ethnicity, and gender in youth culture and American society.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Must have Junior or Senior level standing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL).

AAS 182 – Hip Hop Culture & Globalization (4 units)

Course Description: Investigation of hip-hop youth cultures outside the United States using globalization and Cultural Studies theories. Analysis of international hip-hop sites in Africa, Asia, Europe, South America, and the Middle East through reading, discussion, and visiting virtual sites.

Prerequisite(s): AAS 181 preferable, not required.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

AAS 183A – Policing, Prison, & Protest in Local Perspective (4 units)

Course Description: Study of the history and current state of policing, prisons and protest movements in the U.S. through Black Studies framework and methods.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

AAS 183B – Policing, Prison, & Protest in Global Perspective (4 units)

Course Description: Study of the history and current workings of police, prisons, and protest movements globally through Black Studies frameworks and methods.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

AAS 185 – Topics in African American Film (4 units)

Course Description: Intensive study of special topics in African American film.

Prerequisite(s): AAS 170; AAS 050 recommended.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); Writing Experience (WE).

AAS 190 – Topics in African & African-Diaspora Studies (4 units)

Course Description: Intensive treatment of a special topic or problem in African or African Diaspora Studies.

Prerequisite(s): Upper division standing in African American African Studies (AAS) courses or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

AAS 192 – Internship in African-American & African Studies (1-8 units)

Course Description: Supervised internship in community, government, or private institutions, in all subject areas offered by the African American & African Studies Program.

Prerequisite(s): Consent of instructor; completion of 12 units of upper division study in African American African Studies (AAS) courses; upper division standing.

Learning Activities: Internship 3-24 hour(s).

Enrollment Restriction(s): Restricted to African American & African Studies majors and minors.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

AAS 194HA – Special Study for Honors Students (4 units)

Course Description: Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty advisor.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study, Term Paper.

Enrollment Restriction(s): Restricted to majors in African American & African Studies with upper division standing and a GPA of 3.500 in the major.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

AAS 194HB – Special Study for Honors Students (4 units)

Course Description: Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty advisor.

Prerequisite(s): AAS 194HA; consent of instructor.

Learning Activities: Independent Study, Term Paper

Enrollment Restriction(s): Restricted to majors in African American & African Studies with upper division standing and a GPA of 3.500 in the major.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

AAS 197T – Tutoring in Afro-American Studies (1-5 units)

Course Description: Leading of small voluntary discussion groups affiliated with one of the department's regular courses.

Prerequisite(s): Consent of major committee; upper division standing with major in African American African Studies.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

AAS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AAS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AAS 201 – Critical Foundations in African American Studies (4 units)

Course Description: Introduction to history of African American Studies.

Topics include: research agendas, policy implications, debates, crises, and institutional frameworks.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

AAS 202 – Critical Foundations in African Studies (4 units)

Course Description: Introduction to the history and current organization of African Studies as area of intellectual investigation. Offers an opportunity to review research agenda and policy implications, debates, crises, and institutional frameworks surrounding the production of knowledge about Africa.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

AAS 203 – Critical Foundations in African Diaspora Studies (4 units)

Course Description: Integrative conceptual framework includes History, Geography, Political Economy, Culture, Aesthetics as tools to investigate the African Diaspora. Engage African Diaspora theories within student's research projects understanding issues developing from the movement of Africans to the rest of the world.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

AAS 204 – Methodologies in African American & African Studies (4 units)

Course Description: Relationship between theory and methodology, with emphasis on identifying relevant methodological approaches and constructing theoretically informed research projects for studying the experience of people of African descent whether on the African continent or in the rest of the world.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

AAS 290 – Special Topics in African/African Diaspora/ African American Studies (4 units)

Course Description: Intensive study in special thematic topics in Africa, African Diaspora, and African American Studies. Course materials to be selected by the instructor.

Prerequisite(s): AAS 201 or AAS 202 or AAS 203 or AAS 204; or consent of Instructor.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

AAS 298A – Directed Group Study in African American & African Diaspora Studies (1-5 units)

Course Description: Group study.

Prerequisite(s): Graduate standing.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated 3 time(s) with consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

AAS 298B – Directed Group Study in African Studies (1-5 units)

Course Description: Directed group study in African Studies.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated 3 time(s) with consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

AAS 299 – Directed Research (1-12 units)

Course Description: Directed research.

Learning Activities: Variable 3-36 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

AAS 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Agricultural & Environmental Chemistry (AGC)

College of Agricultural & Environmental Sciences

AGC 290 – Seminar (1 unit)

Course Description: Selected topics in agricultural and environmental chemistry, presented by students.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

AGC 298 – Group Study (1-5 units)

Course Description: The chemistry and biochemistry of foods, nutritional chemicals, pesticides, and other special topics as they apply to agricultural and environmental chemistry.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Letter.

AGC 299 – Research (1-12 units)

Course Description: Arrangements should be made well in advance with a faculty member of the Group in Agricultural & Environmental Chemistry.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Agricultural & Environmental Technology (TAE)

College of Agricultural & Environmental Sciences

TAE 010 – Introduction to Agricultural & Environmental Technologies (3 units)

Course Description: Technologies of agriculture and the environmental sciences. History & revolution of industrial technology and its impacts on agriculture, environment, energy, and bioproducts; types of sensing technologies; communication and information transfer technologies; artificial intelligence, technologies for control of automatic processes; technologies for the production of food, bioproducts, clean energy and water purification; gene-editing technology; wearable technologies.

Learning Activities: Lecture 2 hour(s); Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Agricultural & Environmental Technologies majors and students in College of Agricultural & Environmental Sciences.

Grade Mode: Letter.

General Education: Oral Skills (OL).

TAE 014 – Introduction to Wearable Materials & Bioproducts (4 units)

Course Description: Technical terminologies describing chemical structures and properties of polymers, biopolymers, fibers and fabrics. Introduction to manufacturing processes, colorations, coating, printing, and basic performances of fibers and fabrics, and properties for functional wearable products.

Prerequisite(s): CHE 002B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

TAE 015 – Agricultural & Wood Framed Structures (3 units)

Course Description: Construction technologies for small farms. Design and construction of typical farm structures utilizing CAD, common construction tools and techniques while exploring the effects of wood properties on structures.

Learning Activities: Lecture/Lab 3 hour(s), Lecture 1 hour(s); Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Visual Literacy (VL);

TAE 020 – Sustainable Energy Technologies (4 units)

Course Description: Sustainable and efficient energy technologies and their application in agriculture and other sectors. Basic principles of energy efficiency, conservation, and conversion technologies using solar, wind, water, biomass, geothermal, and other renewable sources. Environmental impacts and energy policy. Experiential learning about solar drying, controlled environment agriculture, net-zero energy building, electricity generation, energy storage, biofuels, and integrated waste management; field visits.

Learning Activities: Lecture/Discussion 3 hour(s), Lecture/Lab 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Agricultural & Environmental Technology and Biological Systems Engineering students.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

TAE 030 – Mobile Communication & Computing Technologies for Agriculture & the Environment (4 units)

Course Description: Modern computer technologies and the applications of sensing technologies and the Internet of Things (IoT) in agriculture and the environment. IoT and embedded devices; history and evolution of IoT, communication, and computing technologies; sensors and actuators; microcontrollers; data communication technology; introduction to data analysis and data visualization; designing web applications; and hands-on IoT-based projects.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to students in the College of Agricultural & Environmental Sciences.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL); Visual Literacy (VL).

TAE 092 – Internship in Agricultural & Environmental Technology (1-12 units)

Course Description: Supervised internship in agricultural and environmental technology.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: P/NP only.

TAE 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

TAE 099 – Special Study for Lower Division Students (1-5 units)

Course Description: Special study for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

TAE 100 – Smart Control Systems for Agricultural & Environmental Technologies (4 units)

Course Description: Smart devices that communicate, sense their environment, and control their environment. Application examples include smart plant & animal care, and irrigation & fertigation. Technologies include Supervisory Control & Data Acquisition (SCADA) and Programmable Logic Controllers (PLCs) for applications in agricultural, environmental, and food sciences.

Prerequisite(s): Upper division standing; TAE 030 recommended.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Pass One restricted to Agricultural & Environmental Technology majors.

Credit Limitation(s): Only 3 units of credit if the student has taken EME 172, EEC 157A, and EEC 157B.

Grade Mode: Letter.

TAE 121 – Controlled Environments for Plants & Animals (4 units)

Course Description: Principles of environmental control (temperature, humidity, lighting, CO₂, air circulation, air quality) for plants and animals. Psychrometrics and applications. Energy-efficient building envelopes for greenhouses, vertical farmings, and animal barns. Heating, ventilation, and air-conditioning (HVAC) systems, lighting and CO₂ enrichment systems, growing substrates, and irrigation systems. Control systems (sensors and sensing for automated control). Visiting controlled environment facilities.

Prerequisite(s): Upper division standing in Agricultural Environmental Technology; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s); Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Agricultural & Environmental Technology or Biological Systems Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

TAE 192 – Internship in Agricultural & Environmental Technology (1-12 units)

Course Description: Supervised internship in agricultural and environmental technology.

Prerequisite(s): Consent of instructor; approval of project prior to period of internship.

Learning Activities: Internship 3-36 hour(s).

Enrollment Restriction(s): Restricted to upper division students.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

TAE 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

TAE 199 – Special Study for Upper Division Students (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

Agricultural & Resource Econ (ARE)

College of Agricultural & Environmental Sciences

ARE 001 – Economic Basis of the Agricultural Industry (4 units)

Course Description: Agriculture and man; the agricultural industry in U.S. and world economies; production and supply, marketing and demand; agricultural land, capital and labor markets; economic and social problems of agriculture in an urban and industrialized economy emphasizing California. Not currently offered.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 001S – Economic Basis of the Agricultural Industry (4 units)

Course Description: Agriculture and man; the agricultural industry in Australia and world economies; production and supply, marketing and demand; agricultural land, capital and labor markets; economic and social problems of agriculture in an urban and industrialized economy emphasizing Australia. May be taught abroad in Australia under the supervision of a UC Davis faculty member. Not currently offered.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ARE 001.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ARE 015 – Population, Environment & World Agriculture (4 units)

Course Description: Economic analysis of interactions among population, environment, natural resources and development of world agriculture. Introduces students to economic thinking about population growth, its causes and consequences for world food demand, and environmental and technological limits to increasing food supplies. Not currently offered.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ARE 018 – Business Law (4 units)

Course Description: General principles of business law in the areas of contracts, business organization, real property, uniform commercial code, sales, commercial paper, employment relations, and creditor-debtor against a background of the history and functioning of our present legal system.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to sophomore, junior, and senior level students.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Enrollment Restriction(s): Restricted to lower division students.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS).

ARE 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS).

ARE 100A – Intermediate Microeconomics: Theory of Production & Consumption (4 units)

Course Description: Theory of individual consumer and market demand; theory of production and supply of agricultural products, with particular reference to the individual firm; price determination, and employment of resources under pure competition.

Prerequisite(s): ((ECN 001A C- or better or ECN 001AY C- or better) or ECN 001AV C- or better); (ECN 001B C- or better or ECN 001BV C- or better); ((MAT 016A C- or better, MAT 016B C- or better, MAT 016C C- or better) or (MAT 017A C- or better, MAT 017B C- or better) or (MAT 021A C- or better, MAT 021B C- or better)).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM), and Textiles and Clothing (ATXC) Majors and Agricultural and Resource Economics (GARE), International Agricultural Development (GIAD), Viticulture and Enology (GVEN) and Transportation Technology and Policy (GTTP) Graduate Majors.

Credit Limitation(s): Not open for credit to students who have completed ECN 100.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

ARE 100B – Intermediate Microeconomics: Imperfect Competition, Markets & Welfare Economics (4 units)

Course Description: Price determination, and employment of resources under conditions of monopoly, oligopoly, and monopolistic competition.

Prerequisite(s): ARE 100A C- or better; ((ECN 001A C- or better or ECN 001AY C- or better or ECN 001AV C- or better); ECN 001B C- or better or ECN 001BV C- or better); ((MAT 016A C- or better, MAT 016B C- or better, MAT 016C C- or better) or (MAT 017A C- or better, MAT 017B C- or better) or (MAT 021A C- or better, MAT 021B C- or better)); ARE 018 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics Majors (AMGE) and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

ARE 106 – Econometric Theory & Applications (4 units)

Course Description: Statistical methods for analyzing data to solve problems in managerial economics. Topics include the linear regression model, methods to resolve data problems, and the economic interpretation of results.

Prerequisite(s): ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics Majors (AMGE) and Agricultural & Resource Economics (GARE) Graduate Majors.

Credit Limitation(s): Not open for credit to students who have enrolled in or completed ECN 140.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

ARE 107 – Econometrics for Business Decisions (4 units)

Course Description: Covers state-of-the art econometric and statistical methods for causal and predictive modeling with applications to finance and marketing.

Prerequisite(s): ARE 100A C- or better; ARE 106 C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics majors; Pass Two open to majors in the College of Agricultural & Environmental Sciences.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 112 – Fundamentals of Organization Management (4 units)

Course Description: Role of organizational design and behavior in business and public agencies. Principles of planning, decision making, individual behavior, management, leadership, informal groups, conflict and change in the organization. May be taught abroad.

Prerequisite(s): Upper division standing recommended.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 113 – Fundamentals of Marketing Management (4 units)

Course Description: Nature of product marketing by the business firm. Customer-product relationships, pricing and demand; new product development and marketing strategy; promotion and advertising; product life cycles; the distribution system; manufacturing, wholesaling, retailing. Government regulation and restraints.

Prerequisite(s): ECN 001A or ECN 001AY or ECN 001AV. For non-majors only.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ARE 136.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 115A – Economic Development (4 units)

Course Description: Major issues encountered in emerging from international poverty, problems of growth and structural change, human welfare, population growth and health, labor markets and internal migration. Important issues of policy concerning international trade and industrialization.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 115A.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ARE 115B – Economic Development (4 units)

Course Description: Macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 115B.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ARE 115BY – Economic Development (4 units)

Course Description: Macroeconomic issues of developing countries. Problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Issues of policy concerning international borrowing and external debt of developing countries.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV).

Learning Activities: Lecture 1.50 hour(s), Web Virtual Lecture 1.50 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Economics, Managerial Economics, and International Relations Majors.

Cross Listing: ECN 115BY.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ARE 118 – Tax Accounting (4 units)

Course Description: Development and application of a framework to understand the tax effects of typical management decisions on both entities and their owners. Impacts that different methods of taxation have on business entities with emphasis on tax planning, using income and deduction strategies, retirement plans, and choice of business entity for tax minimization. Irregularly offered.

Prerequisite(s): MGT 011A C- or better; MGT 011B C- or better; ARE 018 recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 119 – Intermediate Managerial Accounting (4 units)

Course Description: Use of accounting information by managers in decision making, planning, directing and controlling operations. Focuses on managerial/cost accounting theory and practice. Covers costing systems, budgeting, and financial statement analysis.

Prerequisite(s): MGT 011A C- or better; MGT 011B C- or better.

Learning Activities: Lecture 4 hour(s), Extensive Problem Solving 8 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 120 – Agricultural Policy (4 units)

Course Description: Analytical treatment of historical and current economic problems and governmental policies influencing American agriculture. Uses of economic theory to develop historical and conceptual understanding of the economics of agriculture; how public policy influences the nature and performance of American agriculture.

Prerequisite(s): ARE 100A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 120S – Agricultural Policy (4 units)

Course Description: Analytical treatment of historical and current economic problems and governmental policies influencing agriculture. Uses of economic theory to develop historical and conceptual understanding of the economics of agriculture; how public policy influences the nature and performance of agriculture. May be taught abroad in Australia under the supervision of a UC Davis faculty member. Not currently offered.

Prerequisite(s): ARE 100A; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ARE 120.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ARE 121 – Economics of Agricultural Sustainability (4 units)

Course Description: Application of economic concepts to agro-environmental issues relevant to agricultural sustainability. Topics include market efficiency, production externalities, government policies, agricultural trade, product differentiation, all linked to sustainability issues. Case studies include biofuels, genetically modified foods and geographically differentiated products.

Prerequisite(s): ECN 001A C- or better or ECN 001AY C- or better. or ECN 001AV C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Majors in the College of Agricultural & Environmental Sciences and Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 130 – Agricultural Markets (4 units)

Course Description: Nature, function, organizational structure, and operation of agricultural markets; prices, costs, and margins; market information, regulation, and controls; cooperative marketing. Irregularly offered.

Prerequisite(s): ARE 106 C- or better; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 132 – Cooperative Business Enterprises (4 units)

Course Description: Study of cooperative business enterprise in the United States and elsewhere; economic theories of behavior, principles of operation, finance, decision-making, and taxation.

Prerequisite(s): ECN 001A C- or better or ECN 001AY C- or better or ECN 001AV C- or better.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE) and Animal Science & Management Majors (AANM) and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 133 – Introduction to Behavioral Economics (4 units)

Course Description: Inclusion of non-economic factors such as psychological principles in economic decisions and model predictions. Emphasis on behavioral principles, resulting strategies and implications for diverse market settings.

Prerequisite(s): (ECN 001A C- or better or ECN 001AY C- or better or ECN 001AV C- or better); (STA 013 C- or better or STA 013Y C- or better).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics majors.

Grade Mode: Letter.

ARE 135 – Agribusiness Marketing Plan Development (2 units)

Course Description: Fundamental components required to develop a marketing plan. Appreciation of the concept of marketing plans, appropriate research required, including the use of library, Internet, survey and interview instruments, government documents, market analysis, business proposition, action planning, financial evaluation and monitoring.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS).

ARE 136 – Managerial Marketing (4 units)

Course Description: Application of economic theory and econometrics to the study of marketing and consumer research. Emphasis on industry structure, history, regulatory aspects, integrated brand promotion, market segmentation, optimal product mix, message placement.

Prerequisite(s): (ARE 100B C- or better or ECN 100B C- or better); ARE 106 C- or better; STA 103 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Managerial Economics (AMGE) and Animal Science & Management (AANM) majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 138 – International Commodity & Resource Markets (4 units)

Course Description: Basic nature and scope of international trade in agricultural commodities, agricultural inputs, and natural resources. Market dimensions and policy institutions. Case studies to illustrate import and export problems associated with different regions and commodities.

Prerequisite(s): ARE 100A C- or better; ARE 100B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 139 – Futures & Options Markets (4 units)

Course Description: History, mechanics, and economic functions of futures and options markets; hedging; theory of inter-temporal price formation and behavior of futures and options prices; price forecasting; futures and options as policy tools.

Prerequisite(s): (ARE 100A C- or better or ECN 100A C- or better); STA 103 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Managerial Economics (AMGE) majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 140 – Farm Management (4 units)

Course Description: Farm organization and resources; economic and technological principles in decision making; analytical techniques and management control; problems in organizing and managing the farm business. Irregularly offered.

Prerequisite(s): ECN 001A C- or better or ECN 001AY C- or better or ECN 001AV C- or better.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 142 – Personal Finance (3 units)

Course Description: Management of income and expenditures by the household. Use of consumer credit, savings, and insurance by households. Principles of tax, retirement, and estate planning.

Prerequisite(s): ECN 001B or ECN 001BV.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 143 – Investments (4 units)

Course Description: Survey of investment institutions, sources of investment information, and portfolio theory. Analysis of the stock, bond and real estate markets from the perspective of the investor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to upper division Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Credit Limitation(s): Not open for credit to students concurrently enrolled in or have completed ARE 171 or ARE 171A.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 144 – Real Estate Economics (4 units)

Course Description: Economic theory, analysis, and institutions of real estate markets and related financial markets. Techniques for appraising property values. Cases drawn from the raw land, single family, multifamily, industrial and office real estate markets.

Prerequisite(s): ARE 100A C- or better.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 145 – Farm & Rural Resources Appraisal (4 units)

Course Description: Principles and procedures of the valuation process with emphasis placed on rural real estate. Includes identification of the major physical and economic determinants of value, the three primary appraisal approaches to valuation, discussion of appraisal activity and practice.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 146 – Business, Government Regulation, & Society (4 units)

Course Description: Variety, nature and impact of government regulation: anti-trust laws and economic and social regulation. Nature of the legislative process, promulgation of regulations, and their impact, especially as analyzed by economists.

Prerequisite(s): ARE 100A C- or better; ARE 100B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH).

ARE 147 – Resource & Environment Policy Analysis (3 units)

Course Description: Natural resource use problems with emphasis on past and current policies and institutions affecting resource use; determinants, principles, and patterns of natural resource use; property rights; conservation; private and public resource use problems; and public issues. Not currently offered.

Prerequisite(s): ECN 001A or ECN 001AY or ECN 001AV.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to non-majors only.

Credit Limitation(s): Students who have had or are taking ARE 100A, ECN 100, or the equivalent, may receive only 2 units of credit, so must enroll in ARE 147M instead.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 147M – Resource & Environmental Policy Analysis (2 units)

Course Description: Natural resource use problems with emphasis on past and current policies and institutions affecting resource use; determinants, principles, and patterns of natural resource use; property rights; conservation; private and public resource use problems; and public issues. Not currently offered.

Prerequisite(s): ECN 001A or ECN 001AY or ECN 001AV.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to non-majors only.

Credit Limitation(s): Students who have had or are taking ARE 100A, ECN 100, or the equivalent, must enroll in this course for 2 units rather than ARE 147.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 150 – Agricultural Labor (4 units)

Course Description: Analysis of labor markets with focus on U.S. and world agriculture. Labor supply, demand, market equilibrium; why farm labor markets are different; global trends in farm labor; U.S. farm labor history; unions and collective bargaining; immigration policy.

Prerequisite(s): ARE 100A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 155 – Operations Research & Management Science (4 units)

Course Description: Introduction to quantitative methods used to analyze business and economic processes: decision analysis for management, mathematical programming, competitive analysis, and other methods.

Prerequisite(s): ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE) and Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

ARE 156 – Introduction to Mathematical Economics (4 units)

Course Description: Linear algebra for economists; necessary and sufficient conditions in static optimization problems; implicit function theorem; economic methodology and mathematics; comparative statics; envelope theorem; Le Chatelier principle; applications to production and consumer models. Not currently offered.

Prerequisite(s): ARE 100B; ARE 155; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

ARE 157 – Analysis for Operations & Production Management (4 units)

Course Description: Application of economic theory and quantitative methods to analyze operations and production management problems including process strategy, quality management, location and plant layout, and inventory management.

Prerequisite(s): ARE 155 C- or better; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 165 – Emerging Economies & Globalization (4 units)

Course Description: Economic drivers and policy challenges in the major emerging markets, with an emphasis on the effects of rising incomes, population growth, urbanization, and relative wages on world markets and natural resources. Not currently offered.

Prerequisite(s): ARE 100A C- or better; ARE 115A; ARE 115B; completion of ARE 106 ECN 162 strongly recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics and graduate majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 166 – Economics of Global Poverty Reduction: What Works & Why (4 units)

Course Description: Application of microeconomic theory and econometrics to understand causes of poverty and critically evaluate poverty alleviation policies in low income countries. Irregularly offered.

Prerequisite(s): (ARE 100B C- or better or ECN 100B C- or better); (ARE 106 C- or better or ECN 140 C- or better); (ARE 115A C- or better or ECN 115A C- or better).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE) and Economics (LECN) majors only.

Grade Mode: Letter.

ARE 171 – Principles of Finance (4 units)

Course Description: Principles of corporate financial management. Time value of money, interest rates, principles of valuation, NPV, risk and return, and cost of capital.

Prerequisite(s): ARE 100A C- or better; ARE 106 C- or better; MGT 011A C- or better; MGT 011B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics Majors and Agricultural & Resource Economics Graduate Majors.

Credit Limitation(s): Not open for credit to students who have completed ECN 134.

Grade Mode: Letter.

ARE 172 – Financial Management of the Firm (4 units)

Course Description: Financial analysis at the firm level: optimizing capital structure; minimizing the cost of capital; dividend policies; mergers and acquisitions; real options; and risk management.

Prerequisite(s): ARE 171 C- or better; ARE 106 C- or better; ARE 100A C- or better; MGT 011A C- or better; MGT 011B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics Majors and Agricultural & Resource Economics Graduate Majors.

Grade Mode: Letter.

ARE 173 – Capital Markets (4 units)

Course Description: Introduction to asset pricing. Valuation and risk characteristics of financial assets, including stocks, bonds, futures, and options. Investors' attitudes toward risk, capital allocation, portfolio selection, the capital asset pricing model, and the efficient market hypothesis.

Prerequisite(s): ARE 171 C- or better; ARE 106 C- or better; ARE 100A C- or better; MGT 011A C- or better; MGT 011B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics majors and Agricultural & Resource Economics Graduate Majors.

Grade Mode: Letter.

ARE 175 – Natural Resource Economics (4 units)

Course Description: Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil).

Prerequisite(s): ARE 100A C- or better or ECN 100A C- or better or ECN 100 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE) and Environmental Policy Analysis & Planning (AEPP) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Cross Listing: ESP 175.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 176 – Environmental Economics (4 units)

Course Description: Role of the environment in economic activity and methods for protecting and enhancing environmental quality; implications of market failures for public policy; design of environmental policy; theory of welfare measurement; measuring the benefits of environmental improvement.

Prerequisite(s): ARE 100A C- or better or ECN 100A C- or better or ECN 100 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 190 – Topics in Managerial Economics (3 units)

Course Description: Selected topics in managerial economics, focusing on current research.

Prerequisite(s): ARE 100A; STA 103; and consent of instructor.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated 4 time(s) when the topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ARE 192 – Internship (1-6 units)

Course Description: Internship experience off and on campus in all subject areas offered in the Department of Agricultural & Resource Economics.

Internships are supervised by a member of the staff.

Learning Activities: Internship 3-18 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS).

ARE 194HA – Special Study for Honors Students (4 units)

Course Description: A program of research culminating in the writing of a senior honors thesis under the direction of a faculty advisor.

Prerequisite(s): ARE 100B; ARE 106; ARE 155 (can be concurrent); and consent of instructor; minimum GPA of 3.500; major in Agricultural Managerial Economics or Managerial Economics; senior standing.

Learning Activities: Independent Study 3 hour(s), Seminar 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL);

Writing Experience (WE).

ARE 194HB – Special Study for Honors Students (4 units)

Course Description: A program of research culminating in the writing of a senior honors thesis under the direction of a faculty advisor.

Prerequisite(s): ARE 100B; ARE 106; ARE 155 (can be concurrent); minimum GPA of 3.500; major in Agricultural Managerial Economics or Managerial Economics; senior standing.

Learning Activities: Independent Study 3 hour(s), Seminar 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

ARE 197T – Tutoring in Managerial Economics (1-3 units)

Course Description: Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses.

Prerequisite(s): Senior standing in Managerial Economics and consent of Department Chairperson.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS).

ARE 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS).

ARE 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS).

ARE 200A – Microeconomic Theory (4 units)

Course Description: Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 200A.

Grade Mode: Letter.

ARE 200B – Microeconomic Theory (4 units)

Course Description: Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failure.

Prerequisite(s): ARE 200A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 200B.

Grade Mode: Letter.

ARE 200C – Microeconomic Theory (4 units)

Course Description: Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed.

Prerequisite(s): ARE 200B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 200C.

Grade Mode: Letter.

ARE 202A – Introduction to Applied Research Methods (4 units)

Course Description: Study of philosophy and methodology of applied research in agricultural economics. Methods of conceptualization of researchable topics. Method of communication and constructive criticism.

Prerequisite(s): ARE 204A; ARE 200A (can be concurrent); ARE 256A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 202B – Applied Microeconomics: Consumer & Producer Behavior (4 units)

Course Description: Application of consumer and producer theory in models of individual behavior and market-level phenomena. Implications of consumer and producer theory for specification of empirical models of supply and demand for inputs and outputs and market equilibrium displacement models.

Prerequisite(s): ARE 200A; ARE 200B (can be concurrent); ARE 202A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 202C – Research Design for Applied Microeconomics (4 units)

Course Description: Third of three courses in the Ph.D. level applied microeconomics sequence. Examines the design of empirical research and the application of econometric theory.

Prerequisite(s): ARE 202B; ARE 240A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 204A – Microeconomic Analysis I (4 units)

Course Description: Behavior of consumers and producers and their interactions; tools and methods needed to analyze economic behavior in the marketplace. Application of those methods to real-world problems.

Prerequisite(s): ARE 100B or ECN 100; advanced undergraduates with consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 204B – Microeconomic Analysis II (4 units)

Course Description: Behavior in imperfectly competitive markets—monopoly and price discrimination; oligopoly. Introduction to noncooperative game theory. Analysis of decisions made under risk and uncertainty and imperfect information. The economics of externalities and public goods.

Prerequisite(s): ARE 204A; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 214 – Development Economics (4 units)

Course Description: Review of the principal theoretical and empirical issues whose analysis has formed development economics. Analysis of economic development theories and development strategies and their application to specific policy issues in developing country contexts.

Prerequisite(s): ARE 100A; ARE 100B; ECN 101; ARE 204A and ECN 160A, ECN 160B recommended.

Learning Activities: Lecture 4 hour(s).

Cross Listing: ECN 214.

Grade Mode: Letter.

ARE 215A – Microdevelopment Theory & Methods I (4 units)

Course Description: Agricultural development theory, with a focus on microeconomics. Agricultural household behavior with and without imperfections and uncertainty. Analysis of rural land, labor, credit and insurance markets, institutions, and contracts.

Prerequisite(s): ARE 200A or ARE 204A; ARE 240A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 215A.

Grade Mode: Letter.

ARE 215B – Open Macroeconomics of Development (4 units)

Course Description: Models and policy approaches regarding trade, monetary and fiscal issues, capital flows and debt are discussed in the macroeconomic framework of an open developing country. Basic analytical focus is real exchange rate and its impact on sectoral allocation of resources.

Prerequisite(s): (ARE 200A or ARE 204A); (ARE 214 or ARE 215A); (ARE 200D or ARE 205).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 215B.

Grade Mode: Letter.

ARE 215C – Microdevelopment Theory & Methods II (4 units)

Course Description: Extension of development theory and microeconomic methods. Agricultural growth and technological change; poverty and income inequality; multisectoral, including village and regional models. Computable general equilibrium methods and applications.

Prerequisite(s): ARE 215A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 215C.

Grade Mode: Letter.

ARE 215D – Environmental & Economic Development (4 units)

Course Description: Interdisciplinary course drawing on theoretical and empirical research on interactions between environmental resource use and economic development processes. Analysis of issues emerging at the interface of environmental and development economics.

Prerequisite(s): ARE 200A; (ARE 204A or ARE 275).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 215D.

Grade Mode: Letter.

ARE 222 – International Agricultural Trade & Policy (4 units)

Course Description: Analysis of country interdependence through world agricultural markets. Partial equilibrium analysis is used to study the impacts of national intervention on world markets, national policy choice in an open economy and multinational policy issues.

Prerequisite(s): (ARE 100B or ARE 204A); ECN 160A; or the equivalent of ECN 160A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 223 – Economics of Agriculture (4 units)

Course Description: Analytic treatment of the historical development and contemporary role of agriculture in the global, U.S. and California economies. Uses economic reasoning and evidence to develop historical and conceptual understanding of the economics of agriculture, agricultural issues, and related government policies.

Prerequisite(s): ARE 204A (can be concurrent); ARE 256A (can be concurrent); or equivalent course(s) completed or concurrent required.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to M.S. students in Agricultural & Resource Economics; Ph.D. students in Agricultural & Resource Economics and qualified students from other UC Davis graduate groups/programs.

Grade Mode: Letter.

ARE 231 – Supply & Demand for Agricultural Products (4 units)

Course Description: Analysis of supply and demand for agricultural commodities emphasizing the effective use of microeconomic theory with econometric methods, and other empirical procedures, in conducting applied analysis of supply and demand at the firm and industry level.

Prerequisite(s): ARE 200A; ARE 202A; ARE 240A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ARE 232 – Agricultural Commodity Markets (4 units)

Course Description: Economic analysis of industries that produce, market, transport, store, and process basic commodities. Analysis of market equilibrium under perfect and imperfect competition, with and without government involvement.

Prerequisite(s): ARE 200A; ARE 202A; ARE 240A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ARE 233 – Agricultural Policy (4 units)

Course Description: Nature, formation, evolution, and institutions of economic policy applied to food, agricultural, and rural issues. Examples for detailed consideration include food security, commodity issues, and trade policy. Analytical approaches include static and dynamic welfare analysis, policy design, and political-economic analysis.

Prerequisite(s): ARE 200A; ARE 202A; ARE 240A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ARE 239 – Econometric Foundations (4 units)

Course Description: Prepares students for econometric theory and empirical work by examining the statistical foundation of econometrics. Special attention is paid to problems specific to non-experimental data common to social sciences. Topics from matrix algebra are also covered.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 239.

Grade Mode: Letter.

ARE 240A – Econometric Methods (4 units)

Course Description: Least squares, instrumental variables, and maximum likelihood estimation and inference for single equation linear regression model; linear restrictions; heteroskedasticity; autocorrelation; lagged dependent variables.

Prerequisite(s): ARE 239; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 240A.

Grade Mode: Letter.

ARE 240B – Econometric Methods (4 units)

Course Description: Topics include asymptotic theory and instrumental variables, pooled time-series cross-section estimation, seemingly unrelated regression, classical hypothesis tests, identification and estimation of simultaneous equation models, cointegration, errorcorrection models, and qualitative and limited dependent variable models.

Prerequisite(s): ARE 240A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 240B.

Grade Mode: Letter.

ARE 240C – Time Series Econometrics (4 units)

Course Description: Probability theory; estimation, inference and forecasting of time series models; trends and non-standard asymptotic theory; vector time series methods and cointegration; time series models for higher order moments and transition data; state-space modeling; the Kalman filter.

Prerequisite(s): ARE 240B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 240C.

Grade Mode: Letter.

ARE 240D – Cross Section Econometrics (4 units)

Course Description: Estimation and inference for nonlinear regression models for cross-section data; models for discrete data and for limited dependent variables; models for panel data; additional topics such as bootstrap and semiparametric regression.

Prerequisite(s): ARE 240B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 240D.

Grade Mode: Letter.

ARE 240E – Topics in Time Series Econometrics (4 units)

Course Description: Modern econometric techniques for time series data. Expand on topics covered in ECN 240A, ECN 240B and ECN 240C. Contents vary from year to year.

Prerequisite(s): ARE 240C; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 240E.

Grade Mode: Letter.

ARE 240F – Topics in Cross Section Econometrics (4 units)

Course Description: Modern econometrics techniques for cross-section data. Expand on topics covered in ECN 240A, ECN 240B and ECN 240D. Contents vary from year to year.

Prerequisite(s): ARE 240D; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECN 240F.

Grade Mode: Letter.

ARE 252 – Optimization with Economic Applications (4 units)

Course Description: Microeconomic topics in the framework of mathematical programming.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ARE 254 – Dynamic Optimization Techniques with Economic Applications (4 units)

Course Description: Necessary and sufficient conditions in the calculus of variations and optimal control, economic interpretations, the dynamic envelope theorem and transversality conditions, infinite horizon problems and phase diagrams, local stability and comparative statics of the steady state, comparative dynamics.

Prerequisite(s): Elementary knowledge of ordinary differential equations.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 255 – Applied Dynamic Structural Econometric Modeling (4 units)

Course Description: Covers structural econometric models of static games of incomplete information, single-agent dynamic optimization problems and multi-agent dynamic games, with a focus on applications to issues relevant to the environment, energy, natural resources, agriculture, and development.

Prerequisite(s): ARE 254.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 256A – Applied Econometrics I (4 units)

Course Description: First of two courses in the Masters-level econometrics sequence. The linear regression model and generalizations are applied to topics in applied economics. Tools for empirical research for problems requiring more sophisticated tools than standard regression models are emphasized.

Prerequisite(s): ARE 106 or ECN 140; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ARE 256B – Applied Econometrics II (4 units)

Course Description: Second of two courses in the Masters-level econometrics sequence. The linear regression model and generalizations are applied to a variety of topics in applied economics. Tools for empirical research for problems requiring more sophisticated tools than standard regression models are emphasized.

Prerequisite(s): ARE 256A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ARE 258 – Demand & Market Analysis (4 units)

Course Description: Application of theoretical material covered in ECN 204A and ECN 204B, with particular focus on production theory/factor demand and imperfect competition/market power. Use of theoretical models as a foundation for empirical economic analysis, and empirical exercises. Independent research on chosen topics, with empirical application.

Prerequisite(s): ARE 204B; ARE 256B; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 271 – Financial Economics (4 units)

Course Description: Risk, aversion, choice under uncertainty. Arrow-Debreu securities. Valuation and risk characteristics of financial assets, capital allocation, portfolio selection, Capital Asset Pricing Model, efficient market hypothesis. Applications to topics in agricultural, resource and development economics.

Prerequisite(s): ARE 204A; ARE 256A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 275 – Economic Analysis of Resource & Environmental Policies (4 units)

Course Description: Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain.

Prerequisite(s): ARE 204A.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: ESP 275.

Grade Mode: Letter.

ARE 276A – Environmental Economics: Externalities (4 units)

Course Description: Introduces fundamental and recent research in environmental economics, focusing on the design, implementation and evaluation of environmental policy instruments to correct market failures. Exposure to economic theories and empirical techniques frequently used in this field.

Prerequisite(s): Students should have completed the first year graduate level sequence in microeconomics and econometrics.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 276B – Environmental Economics: Non-Market Valuation (4 units)

Course Description: Second Ph.D. field course in environmental economics, covering theory and econometrics of methods for valuing non-market goods and environmental quality changes. Topics include revealed preference (travel cost, hedonics, sorting equilibrium) and stated preference (contingent valuation, choice experiments, conjoint analysis) techniques.

Prerequisite(s): Students should have completed the first year graduate level sequence in microeconomics and econometrics.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 277 – Natural Resource Economics (4 units)

Course Description: Application of capital theory and dynamic methods to issues of optimal use of renewable and nonrenewable resources. Examination of policy issues associated with forests, fisheries, groundwater, energy resources, watersheds, soil, global climate, and wildlife.

Prerequisite(s): ARE 254; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ARE 290 – Topics in Agricultural & Resource Economics (3 units)

Course Description: Selected topics in agricultural and resource economics, focusing on current research.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated 4 time(s).

Grade Mode: Letter.

ARE 293 – Analysis of California Agriculture & Resources (3 units)

Course Description: Review and analysis of production, marketing, and resource issues facing agricultural firms in California. Application of economic theory and measurement to individual firm and industry decisions in an applied setting. Fieldwork-45 hours total, including one five-day summer field trip.

Learning Activities: Lecture 1.50 hour(s), Fieldwork 45 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ARE 298 – Directed Group Study (1-5 units)

Course Description: Advanced study through special seminars, informal group studies, or group research on problems for analysis and experimentation. Sections:(1) Managerial Economics; (2) Agricultural Policy; (3) Community & Regional Development; (4) Natural Resources; (5) Human Resources; (6) Research Methods & Quantitative Analysis.

Learning Activities: Variable.

Grade Mode: Letter.

ARE 299 – Individual Study (1-12 units)

Course Description: Sections: (1) Managerial Economics; (2) Agricultural Policy; (3) Community & Regional Development; (4) Natural Resources; (5) Human Resources; (6) Research Methods & Quantitative Analysis; and (7) Dissertation Research Prospectus.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ARE 299D – Special Study for Doctoral Dissertation (1-12 units)

Course Description: Special study for doctoral dissertation.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ARE 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Agricultural Education (AED)

College of Agricultural & Environmental Sciences

AED 092 – Internship (1-12 units)

Course Description: Supervised internship off and on campus in areas of agricultural education.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

AED 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AED 099 – Special Study for Undergraduates (1-5 units)

Course Description: AED support moved to ANS, informed July 2018 by Lisa Holmes. Subject moved in ICMS, took some time.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AED 100 – Concepts in Agricultural & Environmental Education (3 units)

Course Description: Philosophy and nature of formal and non-formal agricultural and environmental education programs. Emphasis on understanding the role of the teacher and observing a variety of programs.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

AED 160 – Vocational Education (3 units)

Course Description: Philosophy and organization of vocational education, with particular reference to educational principles for agriculture commerce, home economics, and industry.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

AED 171 – Audiovisual Communications (2 units)

Course Description: Theory and principles of audiovisual communications. Comparison of audiovisual materials such as transparencies, slides, computer-generated graphics, and videos. Operation and use of audiovisual equipment is stressed.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

AED 172 – Multimedia Productions (3 units)

Course Description: Design and production of educational, technical, and professional multimedia presentations. Instructional or professional presentations using a variety of media, including slides, video, transparencies, and computer-generated graphics.

Prerequisite(s): AED 171 recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

AED 178 – Capstone for Agricultural & Environmental Education Majors (4 units)

Course Description: Critical thinking in reference to undergraduate coursework. Assessment of Agricultural & Environmental Education Student Learning Outcomes. Preparation to utilize these concepts and skills professionally.

Learning Activities: Lecture 3 hour(s); Discussion 1 hour(s).

Enrollment Restriction(s): Open to students with upper division standing only.

Grade Mode: Letter.

AED 190 – Seminar in Agricultural Education (2 units)

Course Description: Discussion of selected critical issues in agricultural education.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Pass/No Pass only.

AED 192 – Internship (1-12 units)

Course Description: Supervised internship off and on campus in areas of agricultural education.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

AED 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AED 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AED 300 – Directed Field Experience in Teaching (2 units)

Course Description: Experience as teaching assistant in agriculture or home economics programs in public schools.

Prerequisite(s): AED 100.

Learning Activities: Discussion 1 hour(s), Fieldwork 3 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

AED 301 – Planning for Instructional Programs (3 units)

Course Description: Major paradigms in program planning and development. Emphasis on key steps in curriculum development, including selection and organization of educational objectives, learning experiences and teaching materials and resources.

Prerequisite(s): AED 100; AED 300 (can be concurrent).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

AED 302 – Teaching Methods in Agricultural Education (3 units)

Course Description: Development of teaching strategies with special emphasis on the designing of learning experiences, instructional execution, and use of teaching aids in agricultural education.

Prerequisite(s): AED 100; AED 300 (can be concurrent).

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

AED 306A – Field Experience with Future Farmers of America & Supervised Experience Programs (4 units)

Course Description: Develop an understanding of the Future Farmers of America and supervised occupational experience programs through planning, conducting, and evaluating actual programs.

Prerequisite(s): AED 306B (can be concurrent); acceptance into a teacher education program.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 6 hour(s).

Grade Mode: Letter.

AED 306B – Field Experience in Teaching Agriculture (5-18 units)

Course Description: Directed teaching including supervision of occupational experience programs and youth activities in secondary schools or community colleges.

Prerequisite(s): AED 306A (can be concurrent); AED 100; AED 300; AED 301; AED 302; and consent of instructor; acceptance into a teacher education program.

Learning Activities: Variable.

Repeat Credit: May be repeated 18 unit(s).

Grade Mode: Letter.

AED 323 – Resource Development: Agricultural Education (3 units)

Course Description: Selection and implementation of community resources in teaching.

Prerequisite(s): AED 306A; AED 306B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

AED 390 – Seminar: Issues in Agricultural Education (2 units)

Course Description: Discussion and evaluation of current issues, theories and research in agricultural education.

Prerequisite(s): AED 306A; AED 306B; acceptance into a teacher education program.

Learning Activities: Discussion/Laboratory 4 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

American Studies (AMS)

College of Letters & Science

AMS 001C – American Lives Through Autobiography (4 units)

Course Description: American culture as understood through the individual life stories told by Americans, with attention to the roles of gender, race, ethnicity, social class, and sexual orientation in the individual's life course.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 001E – Nature & Culture in America (4 units)

Course Description: Uses and abuses of nature in America; patterns of inhabitation, exploitation, appreciation, and neglect; attention to California; emphasis on metaphor as a key to understanding ourselves and the natural world; attention to models of healing: stewardship, ecology, the "rights" movement.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 004 – Freshman Seminar (2 units)

Course Description: Investigation of a special topic in American Studies through shared readings, discussions, written assignments, and special activities (such as fieldwork, site visits). Emphasis on student participation in learning.

Prerequisite(s): Open only to students who have completed fewer than 40 quarter units.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited to 25 students.

Grade Mode: Letter.

AMS 005 – Technology in American Lives (4 units)

Course Description: Technology as both a material cultural force and a symbol in American culture; the lives of engineers at work and play; images of the engineer and technology in popular culture; social political and ethical issues raised by technology.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

AMS 010 – Introduction to American Studies (4 units)

Course Description: Ideals, conflicts, and realities defining American Cultures through study of popular music, advertising, and other media. Themes include Imagining America, Citizenship and Belonging, and Cultural/Spatial Practices.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 012 – U.S. Disability Culture & Medicine (4 units)

Course Description: Disability as a form of social exclusion; disability as social and cultural identity; intersections of disability with race, gender, class, and sexuality; popular culture, art, television, film, and literature by disabled people; critiques of medicine by people with disabilities; health disparities; ways to make medicine more inclusive.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 021 – Objects & Everyday Life (4 units)

Course Description: Material culture (objects and artifacts ranging from everyday objects like toys and furnishings to buildings and constructed landscapes) as evidence for understanding the everyday (vernacular) lives (gender, social class, ethnicity, region, age, and other factors; collecting and displaying material).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 025 – United States as a Business Culture (4 units)

Course Description: Business as a cultural system and its relation to religion, politics, arts, science, technology, and material culture; business themes of success, creativity, invention, and competition in American autobiographies, fiction, advice literature, film, and television; cultures of the workplace; multinational business.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 030 – Images of America & Americans in Popular Culture (4 units)

Course Description: Investigation of verbal and visual discourses about American identity in various popular culture products, including film, television, radio, music, fiction, art, advertising, and commercial experiences; discourses about the United States in the popular culture of other societies.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 055 – Food in American Culture (4 units)

Course Description: Relationship between food and culture; relationship between food and the social order; influences on eating habits and the tensions between them including identity, convenience, and responsibility; multiple disciplines and genres.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: FST 055.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 059 – Music & American Culture (4 units)

Course Description: Examination of music and American culture. Studies will explore music in its cultural contexts, which may include examinations of recording and broadcasting, of race, class, and gender, the role of technology, and relationships between musical production, consumption and listening.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 095 – Careers & Identity in American Culture (2 units)

Course Description: Defining one's identity through the career. Life course, preparation, and choices. Personality and career. Ethics. Gender, ethnicity, sexuality, and social class in the workplace. Transnational workplace.

Conflicts between the career and other social roles.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

AMS 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AMS 099 – Individual Study for Undergraduates (1-5 units)

Course Description: Individual study for undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AMS 100 – Methods in American Studies (4 units)

Course Description: Design and implementation of interdisciplinary research, analysis and writing for American Studies and other cultural studies fields. Library and Internet research skills, project/problem definition, methods for study of texts, individuals, communities. Hand-on, skill-building, focused reading, discussion.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

AMS 101A – Special Topics: Popular Culture Studies (4 units)

Course Description: Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

AMS 101B – Special Topics: Queer & Trans Studies (4 units)

Course Description: Intensive reading, writing, and special projects in queer and/or transgender studies. Specific topic depends on research interests of the instructor.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

AMS 101C – Special Topics: Material Aspects of American Culture (4 units)

Course Description: Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

AMS 101E – Special Topics: American Lives Through Autobiography (4 units)

Course Description: Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

AMS 101F – Special Topics: Interrelationship Between Arts & Ideas (4 units)

Course Description: Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

AMS 101G – Special Topics: New Directions in American Culture Studies (4 units)

Course Description: Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

AMS 101H – Special Topics: Problems in Cross-Cultural American Studies (4 units)

Course Description: Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

AMS 110 – A Decade in American Civilization (4 units)

Course Description: Close examination of a single decade in American civilization; the connections between the history, literature, arts, customs, and ideas of Americans living in the decade. Issues and representations of race, class, gender, age, and sexuality in the decade.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Repeat Credit: May be repeated when studied decades differ.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 125 – Corporate Cultures (4 units)

Course Description: Exploration of the small group cultures of American corporate workplaces, including the role of environment, stories, jokes, rituals, ceremonies, personal style, and play. The effects of cultural diversity upon corporate cultures, both from within and in contact with foreign corporations.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

AMS 130 – American Popular Culture (4 units)

Course Description: American popular expression and experience as a cultural system, and the relationship between this system and elite and folk cultures. Exploration of theories and methods for discovering and interpreting patterns of meaning in American popular culture.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 139 – Feminist Cultural Studies (4 units)

Course Description: Histories, theories, and practices of feminist traditions within cultural studies.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: GSW 139.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Writing Experience (WE).

AMS 150 – Interdisciplinary Approaches to Environmental Justice/Injustice (4 units)

Course Description: Environmental justice through interdisciplinary lenses. Frameworks that analyze environmental issues through the lens of social justice and human inequality, specifically categories of race, class, gender, nature and nation. Particular focus on California and the Central Valley.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 151 – American Landscapes & Places (4 units)

Course Description: Comparative study of several American cultural populations inhabiting a region, including their relationship to a shared biological, physical, and social environment, their intercultural relations, and their relationships to the dominant American popular and elite culture and folk traditions.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 152 – The Lives of Children in America (4 units)

Course Description: Multiple histories and cultural specificity of childhood and adolescence in the United States.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 153 – The Individual & Community in America (4 units)

Course Description: Interdisciplinary examination of past and present tensions between the individual and the community in American experience, as those tensions are expressed in such cultural systems as folklore, public ritual, popular entertainment, literature, fine arts, architecture, and social thought.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 154 – The Lives of Men in America (4 units)

Course Description: Interdisciplinary examination of the lives of boys and men in America, toward understanding cultural definitions of masculinity, the ways individuals have accepted or resisted these definitions, and the broader consequences of the struggle over the social construction of gender.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 155 – Eating in America (4 units)

Course Description: Interdisciplinary examination of the culture of food in America. Exploration of eating as a richly symbolic event integral to how Americans express and negotiate values, politics and identity.

Learning Activities: Lecture 3 hour(s), Fieldwork.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 156 – Race, Culture & Society in the United States (4 units)

Course Description: Interdisciplinary examination of the significance of race in the making of America; how race shapes culture, identities and social processes in the United States; the interweaving of race with gender, class and nationhood in self and community.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 157 – Animals in American Culture (4 units)

Course Description: Animals as symbols in American thought, as found in folklore, popular culture, literature, and art; customs and stories around human-animal interactions, including hunting, religion, foodways, pets, zoos, circuses, rodeos, theme parks, and scientific research on animals.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

AMS 158 – Technology & the Modern American Body (4 units)

Course Description: History and analysis of relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have taken TCS 158.

Cross Listing: CDM 158.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

AMS 160 – Undergraduate Seminar in American Studies (4 units)

Course Description: Intensive reading, discussion, research, and writing by small groups in selected topics of American Studies scholarship; emphasis on theory and its application to American material.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One restricted to American Studies majors; limited enrollment.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

AMS 190A – Senior Thesis Research Seminar (4 units)

Course Description: Research and prospectus writing for senior thesis.

Learning Activities: Seminar 2 hour(s), Extensive Writing.

Grade Mode: Letter.

AMS 190B – Senior Thesis (4 units)

Course Description: In consultation with advisor, student writes an extended research paper on a topic proposed in AMS 190A.

Prerequisite(s): AMS 190A; consent of instructor.

Learning Activities: Independent Study 12 hour(s).

Grade Mode: Letter.

AMS 192 – Internship in American Studies (1-12 units)

Course Description: Supervised internship and study in social & community organizations, schools, cultural institutions (e.g., libraries, museums, and archives), or other work sites. Final written report and other assignments as per contract with supervisor.

Prerequisite(s): Consent of instructor; enrollment dependent on availability of intern positions, with priority to American Studies majors.

Learning Activities: Internship.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

AMS 197T – Tutoring in American Studies (1-5 units)

Course Description: Tutoring in lower division American Studies courses, usually in small discussion groups. Periodic meetings with the instructor in charge; reports and readings.

Prerequisite(s): Consent of Chairperson of American Studies Program.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated when the tutoring is for a different course.

Grade Mode: Pass/No Pass only.

AMS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AMS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor and chairperson of American Studies Program.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AMS 220 – American Folklore & Folklife (4 units)

Course Description: Theory and methods for the study of the folklore and the folk customary behavior of Americans; contributions of folklore studies to scholarship in humanities and social science disciplines.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

AMS 250 – Cultural Study of Masculinities (4 units)

Course Description: Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and national identities; criticism of oral, printed, visual, and mass mediated texts, and of social relations and structure.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Cross Listing: WMS 250.

Grade Mode: Letter.

AMS 255 – Food in American Culture (4 units)

Course Description: Interdisciplinary theories and methods for the study of food in American culture; food studies in relation to issues of identity (age, gender, ethnicity, religion, region, etc.), social relations, systems of production, and cultures of consumption.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing or advanced undergraduate with consent of instructor.

Grade Mode: Letter.

AMS 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

AMS 299 – Individual Study (1-12 units)

Course Description: Individual study.

Learning Activities: Variable 1-12 hour(s).

Grade Mode: Pass/No Pass only.

AMS 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Anatomy, Physiology, & Cell Biology (APC)

School of Veterinary Medicine

APC 092 – Internship (1-12 units)

Course Description: Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology & Cell Biology.

Internships are supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

APC 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

APC 100 – Comparative Vertebrate Organology (4 units)

Course Description: Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions.

Prerequisite(s): (BIS 001A, BIS 001B) or (BIS 002A, BIS 002B).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: NPB 123.

Grade Mode: Letter.

APC 192 – Internship (1-15 units)

Course Description: Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology & Cell Biology.

Internships are supervised by a member of the faculty.

Prerequisite(s): Upper division standing; approval of internship.

Learning Activities: Internship 3-45 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

APC 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

APC 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 3-15 hour(s).

Grade Mode: Pass/No Pass only.

APC 286 – Basics of Microscopy & Cellular Imaging (2 units)

Course Description: Practical applications of basic microscope techniques used to image cells and tissues with the goal of using these techniques to generate publication quality images. Principles of light, epifluorescent, confocal and electron microscopy, their applications and limitations.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Lecture 1 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Limited to 20 students.

Grade Mode: Letter.

APC 290 – Seminar (1 unit)

Course Description: Discussion and critical evaluation of advanced topics and current trends in research.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Pass/No Pass only.

APC 291 – Topics in Biology of Respiratory System (1 unit)

Course Description: Topics concerning structure and function of respiratory system. Possible topics include: lung growth, pulmonary reaction to toxicants, pulmonary inflammation, lung metabolism, biology of lung cells, tracheobronchial epithelium, nasal cavity structure and function.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

APC 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 6-15 hour(s).

Grade Mode: Letter.

APC 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 6-36 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Anesthesiology (ANE)

School of Medicine

ANE 192 – Internship in Anesthesiology (1-6 units)

Course Description: Supervised work experience in anesthesia and related fields.

Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor.

Learning Activities: Internship 3-18 hour(s), Project.

Grade Mode: Pass/Fail only.

ANE 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ANE 430 – Intro to Anesthesiology & Perioperative Medicine (3-6 units)

Course Description: Introduction to anesthesiology during the MS3 year, with emphasis on introduction to the field of anesthesiology and the day-to-day practice of an anesthesiologist in the perioperative setting.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

ANE 435 – Primary Care Multidisciplinary Pain Management (3 units)

Course Description: Rotation will give 3rd year primary-care bound students an overview of the scope of Pain Medicine.

Learning Activities: Clinical Activity.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

ANE 455 – Externship in Anesthesiology (3-6 units)

Course Description: Away clinical rotation in Anesthesiology or Pain Medicine.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

ANE 460 – Anesthesiology Clinical Clerkship (3-18 units)

Course Description: In-depth exposure to anesthesia through informal lectures and mentoring by anesthesiologists. Emphasis on understanding and applying anesthetic principles in managing administration of general, regional, and specialized areas.

Prerequisite(s): Consent of instructor; medical student.

Learning Activities: Variable 30 hour(s), Practice 10 hour(s), Discussion 2 hour(s).

Grade Mode: Honors/Pass/Fail.

ANE 461 – Perioperative Medicine (3-12 units)

Course Description: Two week rotation provides a broad exposure to various patient care services within the Department of Anesthesiology and Pain Medicine to apply medical knowledge to safely care for patients.

Prerequisite(s): Successful completion of third-year clerkships; consent of instructor of record.

Learning Activities: Clinical Activity 30 hour(s).

Grade Mode: Honors/Pass/Fail.

ANE 462 – Perioperative Management of the Obstetric Patient (3-6 units)

Course Description: Perioperative Management of Obstetric Patient advanced clinical clerkship will offer the medical student the chance to understand and be able to apply the principles of basic science into major improvements in obstetric anesthesia patient care.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

ANE 463 – Multidisciplinary Pain Management (3-6 units)

Course Description: Senior clerkship to expose students to all facets of treating pain in all aspects of clinical care: outpatient and inpatient settings, acute and chronic pain, end of life issues, pediatrics, rehabilitation, etc. Daily clinics, rounds, and lectures.

Prerequisite(s): Senior medical student in good standing.

Learning Activities: Clinical Activity 30 hour(s), Lecture/Discussion 10 hour(s).

Grade Mode: Honors/Pass/Fail.

ANE 464 – Multidisciplinary Approach to the Neurosurgical Patient (3-9 units)

Course Description: Participate in the perioperative care of patients undergoing neurosurgical procedures while under the supervision of anesthesia, neurology and neurosurgical ICU residents and attending physicians.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

ANE 465 – Away Acting Internship in Anesthesiology (3-18 units)

Course Description: Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management.

Prerequisite(s): Consent of instructor; satisfactory completion of Anesthesiology Clerkship.

Learning Activities: Clinical Activity 40 hour(s), Variable 3-18 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

ANE 480 – Brief Introduction to Clinical Anesthesiology & Chronic Pain Management (3 units)

Course Description: Daily experience in clinical anesthesiology at the preoperative screening unit, operating room, post anesthesia care unit, chronic pain management clinic with daily clinical correlation case discussions, and one-on-one interaction with faculty anesthesiologists.

Prerequisite(s): Second-year medical student.

Learning Activities: Clinical Activity 30 hour(s).

Grade Mode: Honors/Pass/Fail.

ANE 490 – A Pain in the Neck: Assessment & Management of Spinal Pain (3 units)

Course Description: Designed to assess and treat spinal pain. Reviews the pathophysiology, clinical assessment, and management of: lumbar spinal pain, cervical spinal pain, differential diagnosis & differentiation between sacroiliac/hip/shoulder joint pain, medication management with risk assessment, and non-pharmacological treatments including interventional pain procedures, acupuncture, and psychological support.

Learning Activities: Seminar.

Grade Mode: Pass/Fail only.

ANE 493A – Applied Physiology & Pharmacology (6 units)

Course Description: Review and demonstrate the application of basic physiology and pharmacology to patient care. There will be an in-depth analysis of the physiology and pharmacology of the cardiovascular, pulmonary, nervous, renal and endocrine systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Lecture/Lab 10 hour(s), Laboratory 16 hour(s), Clinical Activity 4 hour(s).

Enrollment Restriction(s): UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

ANE 493B – Interdisciplinary Medicine in Pain Care (6 units)

Course Description: Integrate applied and practical neuroanatomy, physiology, pharmacology, psychology/psychiatry and social medicine in the care of patients who are receiving care for pain caused by acute or chronic medical disease or trauma.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Lecture/Lab 10 hour(s), Laboratory 16 hour(s), Clinical Activity 4 hour(s).

Enrollment Restriction(s): UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

ANE 493C – Applied Physiology & Pharmacology (3-6 units)

Course Description: Review and demonstrate the application of basic physiology and pharmacology to patient care. In-depth analysis of the physiology and pharmacology of the cardiovascular, pulmonary, nervous, renal and endocrine systems.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

ANE 498 – Individual or Group Study (1-5 units)

Course Description: Directed reading and discussion and/or laboratory investigation on selected topics.

Prerequisite(s): Interns and residents with consent of instructor.

Learning Activities: Discussion 1-5 hour(s), Laboratory 2-10 hour(s).

Grade Mode: Honors/Pass/Fail.

ANE 499 – Anesthesiology Research (1-18 units)

Course Description: Problems in clinical and/or laboratory research.

Prerequisite(s): Third- or fourth-year medical students, advanced standing undergraduate and veterinary medicine students; or consent of instructor.

Learning Activities: Laboratory 12-54 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Animal Behavior (ANB)

College of Biological Sciences

ANB 201 – Scientific Approaches to Animal Behavior Research (3 units)

Course Description: Philosophical issues, goals, strategies and tools in field and laboratory research.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ANB 210 – History of Animal Behavior (1 unit)

Course Description: Classic, seminal papers in animal behavior. Discussion of readings and broader historical context in which papers were written.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ANB 218A – Fundamentals of Animal Behavior (5 units)

Course Description: Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science.

Prerequisite(s): Consent of instructor; upper division undergraduate introduction to the biology of behavior, such as PSC 101, PSC 122, PSC 123, NPB 102, NPB 150, NPB 152, WFC 141, ENT 104, or ANS 105.

Learning Activities: Lecture/Discussion 4 hour(s), Discussion 1 hour(s).

Cross Listing: PSC 218A.

Grade Mode: Letter.

ANB 218B – Fundamentals of Animal Behavior (5 units)

Course Description: Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science.

Prerequisite(s): ANB 218A or PSC 218A; or ECL 218A; consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Discussion 1 hour(s).

Cross Listing: PSC 218B.

Grade Mode: Letter.

ANB 221 – Animal Behavior, Ecology & Evolution (3 units)

Course Description: Interface between animal behavior, ecology and evolution. New developments in behavioral ecology development and testing of hypotheses in this discipline.

Prerequisite(s): NPB 102; EVE 100; EVE 101; and consent of instructor, or the equivalent; graduate standing.

Learning Activities: Lecture 3 hour(s).

Cross Listing: PBG 221.

Grade Mode: Letter.

ANB 230A – Interdisciplinary Approaches to Animal Behavior (3 units)

Course Description: Analysis of literature in behavior and an allied discipline or disciplines that offer the potential, in combination, to advance the understanding of a topic in animal behavior conceptually and empirically. Topics vary from year to year.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ANB 230B – Interdisciplinary Approaches to Animal Behavior (5 units)

Course Description: Development of an empirical or theoretical interdisciplinary approach to research on a current topic in animal behavior.

Prerequisite(s): ANB 230A; taken the previous quarter.

Learning Activities: Workshop 4 hour(s), Discussion 3 hour(s), Term Paper 1 hour(s).

Grade Mode: Letter.

ANB 270 – Research Conference in Behavioral Ecology (1 unit)

Course Description: Critical presentation and evaluation of current literature and ongoing research in behavioral ecology.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Conference 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ANB 287 – Advanced Animal Behavior (2 units)

Course Description: Reading, reports and discussion on current topics in animal behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution.

Prerequisite(s): NPB 102; (EVE 100 or EVE 101); and consent of instructor, or the equivalents; graduate standing.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 2 time(s).

Cross Listing: PBG 287.

Grade Mode: Letter.

ANB 290 – Seminar in Animal Behavior (1-3 units)

Course Description: Selected topics in animal behavior.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1-3 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ANB 294 – Seminar in Behavioral Ecology of Predators & Prey (3 units)

Course Description: Presentation and analysis of research papers on social and foraging behavior of predatory animals, antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator-prey interactions.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 2 time(s).

Cross Listing: WFC 294.

Grade Mode: Letter.

ANB 298 – Group Study (1-5 units)

Course Description: Lectures and/or discussion of current issues, problems, or techniques in animal behavior.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1-5 hour(s), Laboratory 5-15 hour(s).

Grade Mode: Letter.

ANB 299 – Research (1-12 units)

Course Description: Advanced research in one of the specialty areas in animal behavior.

Learning Activities: Laboratory 3-36 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ANB 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Animal Biology (ABI)

College of Agricultural & Environmental Sciences

ABI 050A – Animal Biology Laboratory (2 units)

Course Description: Scientific methods for answering questions in animal biology by doing exercises to demonstrate hypothesis testing and reporting, short laboratory, population and field experiments. Maintain notebooks, analyze data, interpret results and write reports.

Learning Activities: Lecture/Lab 4 hour(s).

Grade Mode: Letter.

ABI 050B – Animal Biology (3 units)

Course Description: Basic biological disciplines important to an understanding of practical animal biology issues including the evolution of animal groups, genetic mechanisms, animal physiology as it relates to maintenance and production, and aspects of comparative anatomy, behavior and ecology.

Prerequisite(s): BIS 001A; BIS 001B (can be concurrent).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ABI 050C – Animal Biology (3 units)

Course Description: Animal management and conservation. Societal concerns arising from management and conservation issues, including economics, aesthetics, regulations, safety, public perspectives and advocacy.

Prerequisite(s): BIS 001B; BIS 001C; ABI 050A; ABI 050B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ABI 092 – Internship in Animal Biology (1-12 units)

Course Description: Office, laboratory or fieldwork off or on campus in research, governmental regulation, policy making, and private enterprise dealing with animal related issues of production, welfare, pest management, biodiversity and the environment. All requirements of Internship Approval Request form must be met.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

ABI 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

ABI 099 – Special Study for Undergraduate (1-5 units)

Course Description: Special study for undergraduate.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

ABI 102 – Animal Biochemistry & Metabolism (5 units)

Course Description: Water and biological buffers; thermodynamics of metabolism; structure and function of biomolecules; enzyme kinetics and function; membrane biology; digestion and absorption; carbohydrate metabolism.

Prerequisite(s): (CHE 002A, CHE 002B, CHE 008A, CHE 008B) or (CHE 118A, CHE 118B).

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed BIS 102.

Grade Mode: Letter.

ABI 103 – Animal Biochemistry & Metabolism (5 units)

Course Description: Physiological function and metabolism of lipids and amino acids; integrative metabolism; biochemical basis for nutrient requirements; structure and function of vitamins; mineral metabolism and requirements.

Prerequisite(s): ABI 102 or BIS 102.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed BIS 103.

Grade Mode: Letter.

ABI 187 – Animal Biology Seminar (2 units)

Course Description: Seminar leading to development of the Major Proposal for the Animal Biology major.

Learning Activities: Seminar 1 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Junior standing.

Grade Mode: Letter.

ABI 189 – Senior Practicum (2 units)

Course Description: Practicum may be an experimental research project, a library research project or some other creative activity that will serve as a capstone experience for the Animal Biology major.

Prerequisite(s): ABI 050A; ABI 050B; ABI 050C; ABI 187; Junior standing.

Learning Activities: Independent Study 6 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Pass/No Pass only.

ABI 189D – Senior Practicum Discussion (1 unit)

Course Description: Helps prevent or solve problems during the students' senior practicum activity.

Prerequisite(s): ABI 050A; ABI 050B; ABI 050C; ABI 187; ABI 189 (can be concurrent); junior standing.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

ABI 192 – Internship in Animal Biology (1-12 units)

Course Description: Office, laboratory or fieldwork off or on campus in research, governmental regulations, policy making, and private enterprise dealing with animal related issues of production, welfare, pest management, biodiversity and the environment. All requirements of Internship Approval Request form must be met.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ABI 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

ABI 199 – Special Study for Advanced Undergraduate (1-5 units)

Course Description: Special study for advanced undergraduate.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

Animal Biology Graduate (ABG)

College of Agricultural & Environmental Sciences

ABG 200A – Integrated Animal Biology I (3 units)

Course Description: Natural history, management, historical and current uses, and specialized disciplinary features of model and novel animal systems used in research. Development of conceptual approaches in organismal biology to improve experimental design and interpretation of interdisciplinary research studies.

Prerequisite(s): BIS 101; or consent of instructor, or equivalent course; graduate standing.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Limited to 20 students; Pass One restricted to Animal Biology Graduate Group students.

Grade Mode: Letter.

ABG 200B – Integrated Animal Biology II (3 units)

Course Description: Natural history, management, historical and current uses, and specialized disciplinary features of model and novel animal systems used in research. Development of conceptual approaches in organismal biology to improve experimental design and interpretation of interdisciplinary research studies.

Prerequisite(s): ABG 200A.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Limited enrollment; Pass One restricted to Animal Biology Graduate Group students.

Grade Mode: Letter.

ABG 202 – Grant Procurement & Administration (2 units)

Course Description: Topics include: structure of grants, attention to specifications, concise persuasive writing, and grant budgeting. Identify grant opportunities, write a persuasive research grant proposal, and administer grants.

Prerequisite(s): ABG 200B.

Learning Activities: Lecture 1 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Limited to 12 graduate students; Pass One restricted to Animal Biology Graduate Group students.

Grade Mode: Letter.

ABG 203 – Advanced Animal Welfare (3 units)

Course Description: Advanced animal welfare. Key concepts used when evaluating and understanding the welfare of animals kept by humans. Topics include animal pain, stress, cognition, motivation and emotions. Critical discussion of primary literature.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated 1 time(s) every other year, when topic differs.

Grade Mode: Letter.

ABG 205 – Advanced Nutritional Energetics (3 units)

Course Description: History of nutritional energetics. Evaluation of energy transformations associated with food utilization. Energy expenditures at cellular, tissue, and animal levels as affected by diet and physiological state. Current and future feeding systems.

Prerequisite(s): (ABI 102, ABI 103, NPB 101); or the equivalent courses.

Learning Activities: Discussion/Laboratory 1 hour(s), Lecture 2 hour(s).

Enrollment Restriction(s): Limited to 30 students.

Grade Mode: Letter.

ABG 211 – Advances in Animal Biotechnology & Genetics (3 units)

Course Description: Introduction to advanced techniques used for assisted reproductive technologies in mammals and birds, genetic engineering, gene editing, stem cell biology. Offered in alternate years.

Prerequisite(s): NPB 121; BIS 101; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students.

Grade Mode: Letter.

ABG 250 – Mathematical Modeling in Biological Systems (4 units)

Course Description: Model development and evaluation including sensitivity analyses using R. Four principle modeling methodologies included: algebraic functions of biological processes, physiological-based compartmental models, linear programming and meta-analysis. Fundamental background and understanding of mathematical modeling principles in biological systems.

Prerequisite(s): MAT 016A; MAT 016B; STA 100; or equivalents required; graduate standing; MAT 016C or equivalent recommended; more than one course in statistics recommended; ABI 102 or BIS 102 recommended or equivalent course in biochemistry.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

ABG 251 – Gastrointestinal Microbiology of Livestock (3 units)

Course Description: Microbiology of the gastrointestinal tract of ruminants and other livestock species; its relation to improving livestock production.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ABG 255 – Physiology of the Stress Response (2 units)

Course Description: Definition of Stress; Physiological mechanisms of adaptation to stress; Hormonal control of the systemic stress response; Mechanisms of the cellular stress response; Discussion of current trends in stress physiology and current methods for studying the stress response.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: MCP 255.

Grade Mode: Letter.

ABG 290 – Seminar in Animal Biology (1 unit)

Course Description: Seminar on advanced topics in animal biology. Presentations by members of the Animal Biology Graduate Group and guest speakers.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ABG 290C – Research Conference (1 unit)

Course Description: Student presentations of research in Animal Biology and discussions among participating students and Animal Biology faculty.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ABG 298 – Group Study in Animal Biology (1-5 units)

Course Description: Group study in Animal Biology.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Lecture.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

ABG 299 – Research (1-11 units)

Course Description: Research with a faculty member in Animal Biology Graduate Group.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion/Laboratory 3-33 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ABG 300 – Methods in Teaching Animal Biology (2 units)

Course Description: Practical experience in the methods and problems of teaching animal biology. Includes analysis of laboratory exercises, discussion of teaching techniques, grading scientific essays, preparing for and conducting discussion or laboratory sections, formulating quiz and exam questions under instructor supervision.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Lecture/Discussion 2 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ABG 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ABG 401 – Ethics & Professionalism in Animal Biology (2 units)

Course Description: Case studies and discussion of ethical and professional issues for animal biologists, including the use of animals in research and teaching, patenting and intellectual property, consulting and conflict of interest, scientific integrity, dealing with the media, and mentoring relationships.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to graduate standing; Pass One restricted to Animal Biology graduate group students.

Grade Mode: Letter.

Animal Genetics (ANG)

College of Agricultural & Environmental Sciences

ANG 101 – Animal Cytogenetics (3 units)

Course Description: Principles and techniques of cytogenetics applied to animal systems; chromosome harvest techniques, analysis of mitosis and meiosis, karyotyping, chromosome banding, cytogenetic mapping, chromosome structure and function, comparative cytogenetics.

Prerequisite(s): BIS 101; BIS 102; or equivalent of BIS 102.

Learning Activities: Discussion/Laboratory 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANG 105 – Horse Genetics (3 units)

Course Description: Coat color, parentage testing, medical genetics, pedigrees, breeds, the gene map and genus Equus. Emphasis on understanding horse genetics based on the unity of mammalian genetics and making breeding decisions based on fundamental genetic concepts.

Prerequisite(s): BIS 101; ANS 015 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ANG 107 – Genetics & Animal Breeding (5 units)

Course Description: Principles of quantitative genetics applied to improvement of livestock and poultry. Effects of mating systems and selection methods are emphasized with illustration from current breeding practices.

Prerequisite(s): BIS 101.

Learning Activities: Lecture 4 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science or Animal Science & Management majors in senior standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANG 111 – Molecular Biology Laboratory Techniques (4 units)

Course Description: Introduction to the concepts and techniques used in molecular biology; the role of this technology in both basic and applied animal research, and participation in laboratories using some of the most common techniques in molecular biology.

Prerequisite(s): BIS 002C; BIS 101; (BIS 102 or ABI 102); (BIS 103 or ABI 103).

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science majors in Senior standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ANG 185 – Science of Captive Breeding & Reintroduction (1 unit)

Course Description: Explore peer-reviewed literature surrounding the latest advances in captive breeding and reintroduction biology.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

ANG 198 – Directed Group Study (1-5 units)

Course Description: Selected topics relating to animal genetics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ANG 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study.

Grade Mode: Pass/No Pass only.

ANG 204 – Theory of Quantitative Genetics (3 units)

Course Description: Theoretical basis of quantitative genetics and the consequences of Mendelian inheritance. Concepts used to estimate quantitative genetic differences and basis for partitioning the phenotypic variance.

Prerequisite(s): ANG 107; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ANG 206 – Advanced Domestic Animal Breeding (3 units)

Course Description: Procedures for the genetic evaluation of individuals to include selection indices and mixed model evaluation for single and multiple traits. Methods of estimating genetic trends.

Prerequisite(s): ANG 107; ANS 205; ANG 204 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ANG 208 – Estimation of Genetic Parameters (3 units)

Course Description: General methods for the estimation of components of variance and covariance and their application to the estimation of heritability, repeatability and genetic correlations are considered. Specific emphasis is given to procedures applicable to livestock populations under selection.

Prerequisite(s): ANG 107; ANS 205; ANG 204 and ANG 108 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ANG 211 – Genetic Engineering of Animals (2 units)

Course Description: Review of techniques for the genetic engineering of animals and their limitations and applications. Student-led discussions of recent papers in the field and possible future applications of genetically engineered animals in basic research and applied agricultural and medical research.

Learning Activities: Lecture 1 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ANG 212 – Sequence Analysis in Molecular Genetics (2 units)

Course Description: Use of computer algorithms and on-line databases to analyze nucleic acid and protein sequences in molecular genetics research.

Prerequisite(s): BIS 101; or the equivalent; graduate standing or consent of instructor.

Learning Activities: Lecture/Lab 2 hour(s).

Grade Mode: Letter.

ANG 298 – Group Study (1-5 units)

Course Description: Lectures and discussions of advanced topics in animal genetics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ANG 299 – Research in Animal Genetics (1-12 units)

Course Description: Research in Animal Genetics.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Animal Science (ANS)**College of Agricultural & Environmental Sciences****ANS 001 – Domestic Animals & People (4 units)**

Course Description: Animal domestication and factors affecting their characteristics and distribution. Animal use for food, fiber, work, drugs, research and recreation; present and future roles in society. Laboratory exercises with beef and dairy cattle, poultry, sheep, swine, laboratory animals, fish, horses, meat and dairy products.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to lower division students majoring in Agricultural & Environmental Education (AAEE), Animal Science & Management (AANM), Animal Science (AANS), or Sustainable Agriculture & Food Systems (ASAF).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 002 – Introductory Animal Science (4 units)

Course Description: Growth, reproduction, lactation, inheritance, nutrition, and disease control in domesticated animals and species used in aquaculture; the application of sciences to animal production.

Prerequisite(s): ANS 001 and BIS 002A recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to students in Animal Science, Animal Science and Management, Agricultural and Environmental Education, and Sustainable Agriculture and Food Systems majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ANS 012 – Animal Science: Basic Principles & Application (3 units)

Course Description: Overview of domestic and global animal industries. Exploration of production systems, animal biology, genetics, anatomy, physiology, reproduction, health, behavior, research, biotechnology and welfare.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 015 – Introductory Horse Husbandry (3 units)

Course Description: Introduction to care and use of light horses emphasizing the basic principles for selection of horses, responsibilities of ownership, recreational use and raising of foals.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ANS 017 – Canine Behavior: Learning & Cognition (3 units)

Course Description: Domestic dog behavior from basic principles of learning to complex cognitive behaviors; interaction between learning and cognition including how these processes contribute to interactions with humans; basic genetic correlates of learning and cognition.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ANS 018 – Introductory Aquaculture (4 units)

Course Description: Historical and contemporary aquacultural practices. Interaction between the aqueous culture environment and the biology of aquatic animals. Impact of economics and governmental policies on the development of aquaculture. Interaction of aquacultural practices with larger societal goals.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ANS 021 – Livestock & Dairy Cattle Judging (2 units)

Course Description: Evaluation of type as presently applied to light horses, meat animals and dairy cattle. Relationship between form and function, form and carcass quality, and form and milk production.

Prerequisite(s): ANS 001 or ANS 002 recommended.

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL).

ANS 022A – Animal Evaluation (2 units)

Course Description: Attendance at 3 one-day weekend field trips required. Domestic livestock species with emphasis on visual appraisal, carcass evaluation, and application of performance information. Emphasis on accurate written and oral descriptions of evaluations. Prerequisite to intercollegiate judging competition.

Prerequisite(s): ANS 021; or equivalent.

Learning Activities: Laboratory 3 hour(s), Fieldwork 30 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL).

ANS 022B – Animal Evaluation (2 units)

Course Description: Attendance at three one-day weekend field trips required. Continuation of ANS 022A with emphasis on specific species: swine, beef cattle and sheep. Application of animal science principles to selection and management problem-solving scenarios. Prerequisite to intercollegiate judging competition.

Prerequisite(s): ANS 022A; or equivalent.

Learning Activities: Laboratory 3 hour(s), Fieldwork 30 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL).

ANS 041 – Domestic Animal Production (2 units)

Course Description: Principles of farm animal management, including dairy and beef cattle, sheep, and swine. Industry trends, care and management, nutrition, and reproduction.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 041L – Domestic Animal Production Laboratory (2 units)

Course Description: Animal production principles and practices, including five field trips to dairy cattle, beef cattle, sheep, and swine operations and campus labs.

Prerequisite(s): ANS 041 (can be concurrent).

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ANS 042 – Introductory Companion Animal Biology (4 units)

Course Description: Companion animal domestication. Historical, contemporary perspectives. Legislation concerning companion animals. Selected topics in anatomy, physiology, genetics, nutrition, behavior and management. Scientific methods in studying the human-animal bond. Discussions: application of biological concepts to problems related to companion animals.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Writing Experience (WE).

ANS 049A – Animal Management Practices: Aquaculture (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 049B – Animal Management Practices: Beef (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 049C – Animal Management Practices: Dairy (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 049D – Animal Management Practices: Goats (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 049E – Animal Management Practices: Horses (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 049F – Animal Management Practices: Laboratory Animals (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 049G – Animal Management Practices: Meats (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 049H – Animal Management Practices: Poultry (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 049I – Animal Management Practices: Sheep (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 049J – Animal Management Practices: Swine (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 049K – Animal Management Practices: Captive & Companion Avian (2 units)

Course Description: Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 090C – Research Group Conference (1 unit)

Course Description: Weekly conference on research problems, progress and techniques in the animal sciences.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to lower division standing.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ANS 092 – Internship in Animal Science (1-12 units)

Course Description: Internship off and on campus in dairy, livestock, and aquaculture production, research and management; or in a business, industry, or agency associated with these or other animal enterprises. All requirements of Internship Approval form must be met.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-18 hour(s).

Enrollment Restriction(s): Restricted to lower division standing.

Grade Mode: Pass/No Pass only.

ANS 092D – Internship in Animal Science Discussion (1 unit)

Course Description: Provides opportunities to meet and discuss with staff and/or faculty the biological concepts that are the basis for the care and management programs used with animals during their lower division internship.

Prerequisite(s): ANS 092 (can be concurrent); consent of instructor.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open to students with lower division standing only; must be concurrently enrolled in the corresponding ANS 092.

Repeat Credit: May be repeated for credit up to 6 unit(s); repeat credit is allowed when corresponding to different ANS 092 internships.

Grade Mode: Passed/Not Passed only.

ANS 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Enrollment Restriction(s): Restricted to lower division standing.

Grade Mode: Pass/No Pass only.

ANS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Enrollment Restriction(s): Restricted to lower division standing.

Grade Mode: Pass/No Pass only.

ANS 100 – Animal Physiology (5 units)

Course Description: Basic principles of animal physiology in domesticated and captive animals with a comparative approach. Molecular, biochemical, chemical and physical aspects and their influences on function of physiological systems in animals.

Prerequisite(s): BIS 002A; CHE 002B.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to students in the Animal Science and Animal Science and Management majors.

Credit Limitation(s): Not open for credit to students who have taken NPB 101.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 103 – Animal Welfare (4 units)

Course Description: Application of principles of animal behavior and physiology to assessment and improvement of the welfare of wild, captive, and domestic animals. Topics include animal pain, stress, cognition, motivation, emotions, and preferences, as well as environmental enrichment methods.

Prerequisite(s): ANS 104 or NPB 102 or WFC 141; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ANS 104 – Principles & Applications of Domestic Animal Behavior (4 units)

Course Description: Basic principles of animal behavior as applied to domesticated species. Emphasis placed on application of the principles of animal behavior.

Prerequisite(s): ANS 002 or BIS 002B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Animal Science majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 106 – Domestic Animal Behavior Laboratory (3 units)

Course Description: Research experience with the behavior of large domestic animals. Experimental design, methods of data collection & analysis, and reporting of experimental results.

Prerequisite(s): ANS 104 or NPB 102; or consent of instructor.

Learning Activities: Laboratory 6 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science (AANS) majors in Senior standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Writing Experience (WE).

ANS 107 – Zoo Biology & Research (3 units)

Course Description: Introduction to the modern zoo, including history, staffing structure, aspects of animal care such as housing, social management, and enrichment, research in genetics, health, nutrition, behavior, cognition, and guest perceptions. Requires a visit to the Sacramento Zoo and development of a project research proposal based on a specific exhibit at the zoo.

Prerequisite(s): BIS 002B.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 108 – Equine Behavior & Welfare (3 units)

Course Description: Improve the understanding and application of good welfare practices when managing, training, transporting, treating, or breeding equine. Recognize changes in behavior or causes related to comprised health or welfare.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ANS 112 – Sustainable Animal Agriculture (3 units)

Course Description: Current applications of sustainable animal agriculture including the challenges of animal production, animal needs, animal well-being, and protection of the environment and resources for future food supply systems. Various scenarios for meeting sustainability objectives are evaluated using computing modeling.

Prerequisite(s): BIS 002B or ANS 001; STA 100 or PLS 120 recommended.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Oral Skills (OL); Quantitative Literacy (QL).

ANS 113 – Meat Safety & Hazard Analysis & Critical Control Points (2 units)

Course Description: Fundamentals of meat safety and Hazard Analysis Critical Control Points (HACCP). Principles, development, implementation of HACCP. Control of physical, chemical, biological hazards assuring meat/food safety via programs (Good Manufacturing Practices, Sanitation Standard Operating Procedures), hazard analysis critical control points. Regulations, focusing on HACCP implementation in meat & seafood products. Value, shortcomings of sampling, and microbial testing in meat safety assurance programs.

Prerequisite(s): ANS 002 or consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 115 – Advanced Horse Production (4 units)

Course Description: Feeding, breeding, and management of horses; application of the basic principles of animal science to problems of production of all types of horses. Designed for students who wish to become professionally involved in the horse industry.

Prerequisite(s): ANS 015; BIS 101; NUT 115; (ANS 100 or NPB 101); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Writing Experience (WE).

ANS 118 – Fish Production (4 units)

Course Description: Current practices in fish production; relationship between the biological aspects of a species and the production systems, husbandry, management, and marketing practices utilized. Emphasis on species currently reared in California.

Prerequisite(s): WFC 120.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 119 – Invertebrate Aquaculture (4 units)

Course Description: Management, breeding and feeding of aquatic invertebrates; application of basic principles of physiology, reproduction, and nutrition to production of mollusks and crustaceans for human food; emphasis on interaction of species biology and managerial techniques on production efficiencies.

Prerequisite(s): BIS 002B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 120 – Principles of Meat Science (3 units)

Course Description: Anatomical, physiological, developmental, and biochemical aspects of muscle underlying the conversion of muscle to meat. Includes meat processing, preservation, microbiology, and public health issues associated with meat products.

Prerequisite(s): ANS 002.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 120L – Meat Science Laboratory (2 units)

Course Description: Laboratory exercises and student participation in transformation of live animal to carcass and meat, structural and biochemical changes related to meat quality, chemical and sensory evaluation of meat, and field trips to packing plant and processing plant.

Prerequisite(s): ANS 002; ANS 120 (can be concurrent).

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 123 – Animal Growth & Development (4 units)

Course Description: Growth and development of animals from conception to maturity, viewed from practical and biological perspectives; includes genetic, metabolic, nutritional control of cell and organism function.

Prerequisite(s): (ABI 103 or BIS 103); (ANS 100 or NPB 101).

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ANS 124 – Lactation (4 units)

Course Description: Biochemical, genetic, physiological, nutritional, and structural factors relating to mammary gland development, the initiation of lactation, the composition of milk and lactational performance.

Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 (can be concurrent) or BIS 103 (can be concurrent)).

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science (AANS) students in senior standing only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ANS 125 – Equine Exercise Physiology (3 units)

Course Description: Basic and applied physiology of the exercising horse. Includes physiological systems, gait analysis, lameness, pharmacology, sports medicine; sport horse performance evaluation and conditioning.

Prerequisite(s): (NPB 101 or ANS 100); ANS 015.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 126 – Equine Nutrition (3 units)

Course Description: Equine digestion, digestive physiology, diet development and evaluation, and the relationship of the topics to recommended feeding practices and nutritional portfolios.

Prerequisite(s): ANS 015; NUT 115.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 127 – Advanced Equine Reproduction (3 units)

Course Description: Reproductive physiology, anatomy and endocrinology of the mare and stallion. Emphasis on structure/function relationships as they are applied to improving equine reproductive management and efficiency.

Prerequisite(s): ANS 115; (ANS 100 or NPB 101).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ANS 128 – Agricultural Applications of Linear Programming (4 units)

Course Description: Applications of linear programming in agriculture, emphasizing resource allocation problems and decision making.

Problems include crop production, ration formulation, and farm management. Hands-on experience in developing linear programs and interpreting the results.

Prerequisite(s): (PLS 021 or PLS 021V) or ECS 015; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ANS 129 – Environmental Stewardship in Animal Production Systems (3 units)

Course Description: Management principles of environmental stewardship for grazing lands, animal feeding, operations and aquaculture operations; existing regulations, sample analyses, interpretation and utilization of data, evaluation of alternative practices, and policy development.

Prerequisite(s): (BIS 010 or (BIS 002A, BIS 002B)), CHE 002A, CHE 002B, (CHE 008A, CHE 008B) or (CHE 118A, CHE 118B); and consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ANS 130 – Endocrinology Laboratory (3 units)

Course Description: Experimental approaches used in animal endocrinology research. Introductions to a variety of topics to help assimilate many ideas from physiology courses, experimental approaches, and skills reading and interpreting scientific papers.

Prerequisite(s): ANS 100 or NPB 101.

Learning Activities: Lecture 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science (AANS) majors in Senior standing.

Grade Mode: Letter.

ANS 131 – Reproduction & Early Development in Aquatic Animals (4 units)

Course Description: Physiological and developmental functions related to reproduction, breeding efficiency and fertility of animals commonly used in aquaculture.

Prerequisite(s): MCB 150; WFC 120; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 132 – Microbiology of Animal Systems Laboratory (3 units)

Course Description: Basic microbiology techniques and the ability to produce recombinant proteins from genomic information. Importance of carbohydrate degrading enzymes in animal systems. Animal systems of interest range from the digestive tract of animals (e.g. rumen) to animal waste (e.g. manure).

Prerequisite(s): (BIS 002A or BIS 002B); (CHE 008B or CHE 118B).

Learning Activities: Laboratory 6 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science majors in Senior standing.

Grade Mode: Letter.

ANS 133 – Animal Cell Culture Laboratory (4 units)

Course Description: Design, conduct, analyze, and present a research project involving cell culture.

Prerequisite(s): ABI 102; ABI 103; (ANS 100 or NPB 101); or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science (AANS) majors in Senior standing.

Grade Mode: Letter.

ANS 134 – Animal Nutrition Laboratory (3 units)

Course Description: Animal nutrition research experience for senior-level students. Forming a valid hypothesis, designing treatments, preparing for experiments, recording measurements in the field, summarizing results. Emphasis on developing essential research skills & proper techniques for collecting, summarizing, and presenting data.

Prerequisite(s): ABI 103 (can be concurrent); (ANS 100 (can be concurrent) or NPB 101 (can be concurrent)); (STA 100 or PLS 120).

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 3 hour(s), Project.

Enrollment Restriction(s): Pass One restricted to Animal Science (AANS) majors in Senior standing.

Grade Mode: Letter.

ANS 135 – Production Animal Laboratory (3 units)

Course Description: Biochemical methods for developing and conducting research with production animals, and interpreting and presenting data. Laboratory focus course which uses sheep as model. There may be one or two mandatory all day Saturday field trips.

Prerequisite(s): ABI 102; ABI 103; (NPB 101 or ANS 100).

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 3 hour(s), Fieldwork.

Enrollment Restriction(s): Pass One restricted to Animal Science majors in senior standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 136 – Techniques & Practices of Fish Culture (3 units)

Course Description: Daily care and maintenance of fish in residential aquariums, research and commercial facilities. Biological and environmental factors important to sound management of fish. Laboratories focus on fish culture including growth trials and biochemical assays.

Prerequisite(s): ANS 002; BIS 002A; BIS 002B; BIS 002C; ((CHE 008A, CHE 008B) or (CHE 118A, CHE 118B)).

Learning Activities: Lecture 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science majors in Senior standing.

Credit Limitation(s): Not open for credit to students who have previously completed ANS 136A or ANS 137.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ANS 137 – Techniques & Practices of Avian Culture (3 units)

Course Description: Daily care and maintenance of birds for research, commercial production and companion or hobby uses. Biological and environmental factors important to sound management of birds. Laboratories focus on bird husbandry, management and care and include growth trials and biochemical assays.

Prerequisite(s): ANS 002; BIS 002A; BIS 002B; BIS 002C; ((CHE 008A, CHE 008B) or (CHE 118A, CHE 118B)).

Learning Activities: Lecture 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science majors in senior standing.

Credit Limitation(s): Not open for credit to students who have previously completed ANS 136B or ANS 137.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ANS 138 – Meat Quality & Safety Laboratory (3 units)

Course Description: Advanced hands-on experience with meat and food related research. Development of laboratory skills in chemistry, biochemistry, microbiology, and meat science.

Prerequisite(s): CHE 002B; ANS 120 recommended.

Learning Activities: Lecture 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science majors with Senior standing.

Grade Mode: Letter.

ANS 139 – Experimental Animal Physiology (3 units)

Course Description: Combination of theory and hands-on experiences in animal physiology using various experimental techniques. Practical laboratory skill development from cellular level to whole animal, in areas such as genetics, endocrinology, histology and physiological function.

Prerequisite(s): ABI 102; BIS 101; or consent of instructor.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s), Fieldwork 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science majors in senior standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ANS 140 – Management of Laboratory Animals (4 units)

Course Description: Laboratory animal management procedures in view of animal physiology, health and welfare, government regulations, and experimental needs. Clinical techniques using rodents and rabbits as models.

Prerequisite(s): NPB 101 or ANS 100.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 141 – Equine Enterprise Management (4 units)

Course Description: Examination of the concepts and principles involved in the operation of an equine enterprise. Essential aspects of equine enterprise management, including equine law, marketing, cash flow analysis, and impact of state and federal regulations.

Prerequisite(s): ANS 115; ECN 001A and ECN 001B recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ANS 142 – Companion Animal Care & Management (4 units)

Course Description: Management and production of companion animals. Integration of the disciplinary principles of behavior, genetics, nutrition, and physiology as related to the care of companion animals.

Prerequisite(s): ANS 042; BIS 101; (NPB 101 or ANS 100); ((ABI 102 or BIS 102) and (ABI 103 or BIS 103)) recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Animal Science or Animal Science & Management majors in senior standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ANS 143 – Pig & Poultry Care & Management (4 units)

Course Description: Care and management of swine, broilers and turkeys as related to environmental physiology, nutrition and metabolism, disease management and reproduction. Saturday field trips.

Prerequisite(s): NUT 115; (NPB 101 or ANS 100); ANS 041; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ANS 144 – Beef Cattle & Sheep Production (4 units)

Course Description: Genetics, physiology, nutrition, economics and business in beef cattle and sheep production. Resources used, species differences, range and feedlot operations. Emphasis on integration and information needed in methods for management of livestock enterprises. One or two Saturday field trips.

Prerequisite(s): ANS 041; NUT 115; or consent of instructor; ANG 107 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Fieldwork 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ANS 145 – Meat Processing & Marketing (4 units)

Course Description: Distribution, processing and marketing of meat and meat products. Meat and meat animal grading and pricing. Government regulations and social/consumer concerns. Future trends and impact on production management practices. Includes poultry.

Prerequisite(s): ANS 002; consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 146 – Dairy Cattle Production (5 units)

Course Description: Scientific principles from genetics, nutrition, physiology, and related fields applied to conversion of animal feed to human food through dairy animals. Management and economic decisions are related to animal biology considering the environment and animal well-being. Mandatory Saturday field-trip.

Prerequisite(s): NUT 115; or consent of instructor; ANG 107 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Fieldwork 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL);

Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ANS 147 – Dairy Processing & Marketing (3 units)

Course Description: Examination of distribution systems, processing practices, product quality, impact of government policy (domestic and foreign), marketing alternatives, and product development.

Prerequisite(s): ANS 002; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 148 – Enterprise Analysis in Animal Industries (4 units)

Course Description: Examination and application of decision making and problem solving in the production enterprise. Areas of production analysis, problem solving, risk analysis and cost-benefit analysis will be examined in terms of the total enterprise.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to students with upper division standing.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Quantitative Literacy (QL); Writing Experience (WE).

ANS 149 – Farrier Science (3 units)

Course Description: In-depth examination of the structure-function relationship of the equine hoof and how it relates to conformation, injury and performance.

Prerequisite(s): ANS 115.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANS 149L – Farrier Science Laboratory (1 unit)

Course Description: Art and science of horseshoeing in equine related fields. Proper use of the tools, materials and techniques in the fabrication of shoes and safe preparation of the hoof for application of shoes.

Prerequisite(s): ANS 149 (can be concurrent); or consent of instructor.

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

ANS 150 – Animal Health & Disease (4 units)

Course Description: Basic concepts of animal immunology, microbiology, parasitology, epidemiology, vaccination, and how the knowledge can be used to improve animal health and prevent animal infection & disease. Includes relevant health and disease issues.

Prerequisite(s): ANS 002 or BIS 002B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ANS 160A – Stress & Reproduction I (2 units)

Course Description: Evaluation of the impact of chronic stress on male reproductive development. Isolation stress tests on young animals. Data collection of treatment and control groups. Biological laboratory techniques and analysis. Two-quarter course.

Prerequisite(s): NPB 121 (can be concurrent); (ANS 104 (can be concurrent) or NPB 102 (can be concurrent)).

Learning Activities: Laboratory 3 hour(s), Project.

Enrollment Restriction(s): Pass One restricted to Animal Science majors in Senior standing.

Grade Mode: Letter.

ANS 160B – Stress & Reproduction II (2 units)

Course Description: Evaluation of the impact of chronic stress on male reproductive development. Isolation stress tests on young animals. Data collection of treatment and control groups. Biological laboratory techniques and analysis. Two-quarter course.

Prerequisite(s): ANS 160A.

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

ANS 170 – Ethics of Animal Use (4 units)

Course Description: Ethical issues relating to animal use in contemporary society. Integration of philosophical theories with scientific evidence relating to animal behavior, mentality, and welfare. Uses of animals in agriculture, research, and as companions. Ethical responsibilities regarding wildlife and the environment.

Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y or CMN 001 or COM 001 or COM 002 or COM 003 or COM 004 or ENL 003 or ENL 003V or NAS 005.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One Open to Animal Science (AANS) majors with upper division standing only.

Grade Mode: Letter.

General Education: Social Sciences (SS); Scientific Literacy (SL); Writing Experience (WE).

ANS 190C – Research Group Conference (1 unit)

Course Description: Weekly conference on research problems, progress and techniques in the animal sciences.

Prerequisite(s): Consent of instructor; advanced standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ANS 192 – Internship in Animal Science (1-12 units)

Course Description: Internship off and on campus in dairy, livestock and aquaculture production, research and management; or in a business, industry, or agency associated with these or other animal enterprises. All requirements of Internship Approval Form must be met.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

ANS 192D – Internship in Animal Science Discussion (1 unit)

Course Description: Weekly meeting with staff and/or faculty to discuss the biological concepts that are the basis for the care and management programs used with animals during their internship.

Prerequisite(s): ANS 192 (can be concurrent); consent of instructor.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open to students with upper division standing only; must be enrolled concurrently in corresponding ANS 192.

Repeat Credit: May be repeated for credit up to 6 unit(s); repeat credit is allowed when corresponding to different ANS 192 internships.

Grade Mode: Passed/Not Passed only.

ANS 194 – Research in Animal Science (3 units)

Course Description: Research with a faculty mentor. Weekly discussion and laboratory on specific research topic. May include a seminar to research group. Choose from sections: (1) Animal Behavior; (2) Animal Genetics; (3) Animal Nutrition; (4) Animal Physiology.

Prerequisite(s): ANS 106 or ANS 135 or ANS 136 or ANS 137 or ANS 139 or ANG 111; or ANS 133; and consent of instructor.

Learning Activities: Laboratory 6 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 4 time(s).

Grade Mode: Letter.

ANS 194HA – Undergraduate Honors Thesis in Animal Science (4 units)

Course Description: Carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, write a thesis and present a public seminar describing his/her research.

Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 or BIS 103); and consent of instructor; minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee.

Learning Activities: Lecture 1 hour(s), Laboratory 9 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL).

ANS 194HB – Undergraduate Honors Thesis in Animal Science (4 units)

Course Description: Carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, write a thesis and present a public seminar describing his/her research.

Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 or BIS 103); and consent of instructor; minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee.

Learning Activities: Lecture 1 hour(s), Laboratory 9 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ANS 194HC – Undergraduate Honors Thesis in Animal Science (4 units)

Course Description: Carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, write a thesis and present a public seminar describing his/her research.

Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 or BIS 103); and consent of instructor; minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee.

Learning Activities: Lecture 1 hour(s), Laboratory 9 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ANS 197T – Tutoring in Animal Science (1-4 units)

Course Description: Tutoring of students in courses taught by instructors in the Department of Animal Science; weekly conference with instructor(s) in charge of the course; written critiques of teaching procedures; assist in preparation and development of instructional materials.

Prerequisite(s): Consent of instructor; animal Science or related major; upper division standing.

Learning Activities: Tutorial 3-6 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

ANS 198 – Directed Group Study (1-5 units)

Course Description: Selected topics relating to the animal sciences. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ANS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Enrollment Restriction(s): Restricted to students with upper division standing.

Grade Mode: Pass/No Pass only.

ANS 200 – Strategies in Animal Production (4 units)

Course Description: Examines the forces and issues in animal agriculture through the strategic management process.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

ANS 206 – Models in Agriculture & Nutrition (3 units)

Course Description: Basic model building principles and techniques for statistical and systems simulation models. Optimization techniques for non-linear experimental designs and management models are presented. Quantitative analysis and evaluation of linear and non-linear equations used in agriculture and nutrition.

Prerequisite(s): MAT 016B; STA 108.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

ANS 259 – Literature in Animal Science (1 unit)

Course Description: Critical presentation and analysis of recent journal articles in animal science.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 9 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ANS 290 – Seminar (1 unit)

Course Description: Reports and discussions of topics of interest in genetics, nutrition, and physiology as they apply to animal science.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ANS 290C – Research Group Conference (1 unit)

Course Description: Weekly conference on research problems, progress and techniques in the animal sciences.

Prerequisite(s): Graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ANS 291 – Current Research in Animal Science (1 unit)

Course Description: Current research in animal science explored at weekly seminars presented by guest lecturers. Discussion of research presented.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ANS 297 – Supervised Teaching in Animal Science (2 units)

Course Description: Practical experience in teaching Animal Science at University level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. Evaluation letter sent to the graduate advisor with copy to the student.

Learning Activities: Variable 6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ANS 298 – Group Study (1-5 units)

Course Description: Lectures and discussions of advanced topics in the animal sciences. (Sect. 1, 2, 3-letter grading; from Sect. 4 on-S/U grading only.)

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Discussion 1-5 hour(s).

Grade Mode: Letter.

ANS 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Anthropology (ANT)

College of Letters & Science

ANT 001 – Human Evolutionary Biology (4 units)

Course Description: Evolutionary theory and mechanisms of evolution; basic population and quantitative genetics; primatology; biological and cultural diversity within Homo sapiens; paleoanthropology.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ANT 001Y – Human Evolutionary Biology (4 units)

Course Description: Evolutionary theory and mechanisms of evolution; basic population and quantitative genetics; primatology; biological and cultural diversity within Homo sapiens; paleoanthropology.

Learning Activities: Web Virtual Lecture 1.50 hour(s), Lecture/Discussion 1.50 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ANT 002 – Cultural Anthropology (5 units)

Course Description: Introduction to cultural diversity in its many forms and methods used by anthropologists to account for it. Relational dynamic of culture, history, and power in constituting "social facts" and "realities." Critical thinking of contemporary concerns.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

ANT 003 – Introduction to Archaeology (4 units)

Course Description: Development of archaeology as an anthropological study; objectives and methods of modern archaeology.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL).

ANT 004 – Introduction to Anthropological Linguistics (4 units)

Course Description: Exploration of the role of language in social interaction and world view, minority languages and dialects, bilingualism, literacy, the social motivation of language change. Introduction of analytical techniques of linguistics and demonstration of their relevance to language in sociocultural issues.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 013 – Scientific Method in Physical Anthropology (4 units)

Course Description: Skills for scientific thinking; designing, implementing, analyzing, interpreting, presenting, and criticizing research. Collection and analysis of original data. Basic statistical methods.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

ANT 015 – From Birth to Death: The Evolution of the Human Life Cycle (5 units)

Course Description: Introduction to the biology of birth, childhood, marriage, the family, old age, and death. Examines comparative characteristics of nonhuman primates and other animals as well as cross-cultural variation in humans by study of selected cases.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); World Cultures (WC); Writing Experience (WE).

ANT 020 – Comparative Cultures (4 units)

Course Description: Introduction to the anthropological study of cultural diversity. Case studies of eight societies will be presented to illustrate and compare the distinctive features of major cultural regions of the world. Concludes with a discussion of modernization.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

ANT 021 – Zombies (2 units)

Course Description: Figure of the zombie as window into ideas about race, economic exploitation, and what it means to be human. Zombie lore in the Afro-Atlantic world and its re-imagining in contemporary pop culture.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ANT 022 – Myths About Human Evolution (2 units)

Course Description: Myths about human evolution. Use of evidence from evolutionary biology, geology, paleontology, archaeology, and genetics to dispel misconceptions about human evolution.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS) or Science & Engineering (SE).

ANT 023 – Introduction to World Prehistory (4 units)

Course Description: Broadly surveys patterns and changes in the human species' physical and cultural evolution from earliest evidence for "humanness" to recent development of large-scale complex societies or "civilizations." Lectures emphasize use of archaeology in reconstructing the past.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 024 – Ancient Crops & People (4 units)

Course Description: The archaeological evidence for domestication of plants and the origins of agricultural societies. Anthropological context of agriculture and the effects on sexual division of labor, social inequality, wealth accumulation, warfare, human health, and sedentism.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 025 – Ancient Animals & People (2 units)

Course Description: History of human and animal relationships and how animals have influenced social and economic structures of past societies. Why, when and how humans used animals in the context of hunting, domestication, secondary products, ritual, companionship, and conservation.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ANT 026 – Mummies of the Ancient World (2 units)

Course Description: Archaeological approaches for studying mummies and the process of mummification in the ancient world. Analytical techniques used, environmental factors promoting mummification, and archaeological conservation of mummified bodies.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ANT 027 – Great Adaptations: Genetic & Cultural Evolution in the Spread of Humanity (2 units)

Course Description: How humans adapted to diverse ecologies through cultural and genetic changes. Illustrations include evolution in response to disease, dietary, social, and communication challenges.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL); World Cultures (WC).

ANT 028 – Prehistoric Origins of Art (2 units)

Course Description: Interdisciplinary look at the earliest evidence for art and symbolic behavior. Method and techniques to investigate Prehistoric art. Interpretative framework and relevance for understanding the role of symbolic activities in traditional societies.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ANT 029 – Vikings (2 units)

Course Description: History of the Vikings through the Slavic and Mediterranean regions in the East and across the vast North Atlantic region to the west. Emphasis on archaeology and sagas to understand Viking culture from the 8th to 11th centuries.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ANT 030 – Sexualities (4 units)

Course Description: Introduction to the study of sexuality, particularly to the meanings and social organization of same-sex sexual behavior across cultures and through time. Biological and cultural approaches will be compared, and current North American issues placed in a wider comparative context.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC).

ANT 032 – Drugs, Science & Culture (4 units)

Course Description: Drugs, politics, science, society in a cultural perspective: emphasis on roles of science, government and the media in shifting attitudes toward alcohol, marijuana, Prozac and other pharmaceuticals; drug laws, war on drugs and global trade in sugar, opium, cocaine.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: STS 032.

Grade Mode: Letter.

General Education: Social Sciences (SS); Visual Literacy (VL); Writing Experience (WE).

ANT 034 – Cultures of Consumerism (4 units)

Course Description: Aspects of modern consumer cultures in capitalist and socialist countries. Transformations of material cultures over the past century. Case studies on the intersections of gender, class, and culture in everyday consumption practices.

Learning Activities: Lecture/Discussion 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ANT 036 – Star Trek as Social Theory (4 units)

Course Description: Introduction to core concepts in anthropological and social theory using Star Trek as a teaching vehicle. Emphasis on thinking anthropologically about everyday life and popular culture.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ANT 054 – Introduction to Primatology (4 units)

Course Description: Basic survey of the primates as a separate order of mammals; natural history and evolution of primates; consideration of hypotheses for their origin.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ANT 056 – Introduction to Forensic Anthropology (3 units)

Course Description: Survey of anthropological techniques as applied within the legal system, including scene documentation and recovery, human identification, and trauma analysis. Examination of error and uncertainty, ethics, and human rights in forensic anthropology.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Scientific Literacy (SL).

ANT 092 – Internship in Anthropology (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the Department of Anthropology under the supervision of a member of the faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

ANT 098 – Directed Group Study (1-5 units)

Course Description: Primarily intended for lower division students.
Learning Activities: Variable.
Grade Mode: Pass/No Pass only.

ANT 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.
Prerequisite(s): Consent of instructor.
Learning Activities: Variable.
Grade Mode: Pass/No Pass only.

ANT 100 – Theory in Social-Cultural Anthropology (4 units)

Course Description: Discussion of the theoretical and philosophical developments in cultural anthropology from the 19th century to the present.

Prerequisite(s): ANT 002 recommended.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Social Sciences (SS); Writing Experience (WE).

ANT 101 – Ecology, Nature, & Society (4 units)

Course Description: Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation.

Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ESP 101.
Grade Mode: Letter.
General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 103 – Indigenous Peoples & Natural Resource Conservation (4 units)

Course Description: Integration of the interests of resident and indigenous peoples with the conservation of natural resources and ecosystems, using case study examples from both the developing and developed world.

Prerequisite(s): ANT 002 or GEL 001 or ESP 030 recommended.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Credit Limitation(s): Not open for credit for students who have completed ANT 121N. (Former ANT 121N.)
Grade Mode: Letter.
General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

ANT 104N – Cultural Politics of the Environment (4 units)

Course Description: Political economy of environmental struggles. Relationship between social inequality (based on race, class and/or gender) and ecological degradation. Articulation of local peoples, national policy, and the international global economy in the contestation over the use of environmental resources.

Prerequisite(s): ANT 002 recommended.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Credit Limitation(s): Not open for credit to students who have completed ANT 134N. (Former ANT 134N.)
Grade Mode: Letter.
General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

ANT 107 – Law, Power, Violence (4 units)

Course Description: Cultural dimensions of law and political power. Colonial and postcolonial legal regimes, bureaucratic reason, legalized violence, sovereign power, and human rights.

Prerequisite(s): ANT 002 recommended.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 109 – Visualization in Science: A Critical Introduction (4 units)

Course Description: Anthropological approaches to scientific visualization techniques, informatics, simulations. Examination of different visualization techniques toward understanding the work involved in producing them, critical assessment of their power and limits, especially when visualizations are used socially to make claims.

Prerequisite(s): ANT 002 or STS 001 or STS 020 recommended.
Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).
Cross Listing: STS 109.
Grade Mode: Letter.
General Education: Social Sciences (SS); Visual Literacy (VL); Writing Experience (WE).

ANT 111 – Science & Race (4 units)

Course Description: Race and racial formations in science, technology, and medicine. History of racial thought in scientific and medical research; colonial and decolonial modes of knowledge production; the racialization of technology; intersectional approaches to technoscience, social justice, environmental justice, and health care equity.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Cross Listing: STS 111.
Grade Mode: Letter.
General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

ANT 117 – The Ethnographic & Literary Imagination (4 units)

Course Description: The ethnographic and literary imagination. Relationship between fiction & anthropology, narrative form, modalities of ethnographic encounter, social & historical phenomena, aesthetics, poetics, language, and the question of representation.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 120 – Language & Culture (4 units)

Course Description: Culture, cognition, meaning, and interpretation; language and the classification of experience; communication and learning in crosscultural perspective.

Prerequisite(s): ANT 004 or LIN 001 recommended; ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

ANT 121 – Special Topics in Medical Anthropology (4 units)

Course Description: Introduction to critical medical anthropology. Topics include anthropological analysis of bio-medicine, psychiatry, systems of knowledge and healing, the body, emotions, and clinical encounters in a cross-cultural perspective.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: STS 121.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 122A – Economic Anthropology (4 units)

Course Description: The varieties of production, exchange, and consumption behavior in precapitalist economies, their interaction with culture and social-political organization, and the theories that account for these phenomena. The effects of capitalism on precapitalist sectors.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ANT 122. (Former ANT 122.)

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

ANT 122B – Capitalism & Power (4 units)

Course Description: Theorizations of economy and society. The rise of modern capitalism and new social and political formations. Relationships between value and violence, subjectivity, the unconscious, money, imperialism and different understandings of exchange and the political.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 123AN – Resistance, Rebellion, & Popular Movements (4 units)

Course Description: Analysis of popular protest in Third World and indigenous societies ranging from covert resistance to national revolts. Comparative case studies and theories of peasant rebellions, millenarian movements, social bandits, Indian "wars", ethnic and regional conflicts, gender and class conflicts.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ANT 123B. (Former ANT 123B.)

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 124 – Religion in Society & Culture (4 units)

Course Description: Discussion of anthropological theories of religion with emphasis on non-literate societies. Survey of shamanism, magic and witchcraft, ritual and symbols, and religious movements. Extensive discussion of ethnographic examples and analysis of social functions of religious institutions.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ANT 125A – Structuralism & Symbolism (4 units)

Course Description: Survey of anthropological approaches to understanding the logic of structuralism and symbolism in cultural analysis. Focus on how structural and symbolic interpretations relate to cultural and linguistic universals and to the philosophical basis of relativism in the social sciences. (Former ANT 125.)

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 125B – Postmodernism(s) & Culture (4 units)

Course Description: Crucial theories of modernity and post-modernity. How postmodernism is distinct from modernism, why it is related to the collapse of certainty about our collective reality and what it reveals about the status of reason, the self, and collective experience. Readings draw from various philosophical-theoretical, artistic and political literatures.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 126A – Anthropology of Development (4 units)

Course Description: Theories of development and current critiques. Colonial legacies and post-colonial realities. Roles of the state and NGOs, population migrations, changing gender identities, cash-earning strategies, and sustainability issues. Stresses importance of cultural understandings in development initiatives. Case studies emphasizing non-industrial societies.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ANT 126. (Former ANT 126.)

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 126B – Women & Development (4 units)

Course Description: Current Third World and Western development issues concerning women in agriculture, industry, international division of labor, political movements, revolutions, politics of health, education, family and reproduction. Impact of colonialism, capitalism, the world system, and international feminism on women and development.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): No credit if taken ANT 131.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 127 – Urban Anthropology (4 units)

Course Description: Survey of approaches to urban living: political structures, organization of labor, class relations, world views. The evolution of urban life and its contemporary dilemmas. Cross-cultural comparisons discussed through case studies.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 128A – Kinship & Social Organization: From Clans to Countries (4 units)

Course Description: Family, marriage, household and social organization from a cross-cultural and evolutionary perspective. Emphasis on case studies that illustrate human variation, theories that account for this variation, and recent advances in the treatment of this data.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ANT 128. (Former ANT 128.)

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 128B – Self, Identity, & Family (4 units)

Course Description: Exploration of self, identity, and family systems cross-culturally. Impact of class, gender, race, ethnicity, ruralization, urbanization, and globalization on notions of selfhood in different social/cultural systems.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ANT 129. (Former ANT 129.)

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 129 – Health & Medicine in a Global Context (4 units)

Course Description: Recent works in medical anthropology and the science studies of medicine dealing with social and cultural aspects of global health issues such as AIDS, pandemics, clinical trials, cultural differences in illnesses, diabetes, organ trafficking, medical technologies, illness narratives, and others.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Cross Listing: STS 129.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 130A – Cultural Dimensions of Globalization (4 units)

Course Description: Cultural dimensions of recent economic and political developments frequently termed "globalization."

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 130BN – Migration & the Politics of Place & Identity (4 units)

Course Description: Internal and international migration from an anthropological perspective, including causes, processes, and political, economic, and cultural effects of spatial mobility and displacement. Emphasizes the interplay of identity, place, and power in diverse cultural and historical contexts.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ANT 123D. (Former ANT 123D.)

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 131 – Ecology & Politics (4 units)

Course Description: Analysis of the complex interactions between ecological dynamics and political processes employing the emerging approach of political ecology. Case studies of environmental degradation (e.g., desertification, logging, mineral extraction, petroleum, water) from various cultural and geographic regions.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ANT 132 – Psychological Anthropology (4 units)

Course Description: History of the relationship between anthropology and psychoanalysis. Exploration of anthropology of emotions, colonial psychology, contemporary ethno-psychiatry, studies on personhood, possession, magic, altered states, subjectivity, and definitions of the normal and the pathological in different contexts and cultures.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 133 – Anthropology of Ocean Worlds (4 units)

Course Description: Exploration of various oceanic cultures and their engagement with the sea. Piracy, smuggling, exchange, maritime legal regimes, offshore policing, media infrastructures, and ocean ecologies.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 134 – Buddhism in Global Culture (4 units)

Course Description: Buddhist meditation and ritual as a cultural system that adapts to global and local forces of change. Anthropological theory and method in understanding global culture transmission, including Buddhist reform movements in Asia and Buddhist practice in the West.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 50 students.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 135 – Media Anthropology (4 units)

Course Description: Examining human practices through their inscription in old and new media; evaluating the emergent fields of "cyber" and "digital" anthropology; and problematizing terms and concepts routinely deployed in studies of media worlds (platform, social media, hologram, algorithm, remediation, curation, animation).

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC).

ANT 136 – Ethnographic Film (4 units)

Course Description: Overview of the use of film in anthropology and its advantages and limitations in comparison to written ethnographic descriptions. Essential features of ethnographic films. Film production in anthropological research and problems encountered in producing films in the field.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

ANT 137 – Meditation & Culture (4 units)

Course Description: Study and practice of the relation between meditation and cultural conditioning; comparison of Buddhist practice with other cultural constructions of mind, body, brain, thought, emotion, and self.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 50 students.

Grade Mode: Letter.

ANT 138 – Ethnographic Research Methods in Anthropology (4 units)

Course Description: Basic concepts in and approaches to ethnographic field research. Problem formulation, research design, qualitative and quantitative data collection procedures, and techniques for organizing, retrieving, and analyzing information. Ethnographic description and constructed inference. Students will organize and conduct individual research projects.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 139AN – Race, Class, Gender Systems (4 units)

Course Description: Comparative analysis of class/race/gender inequality, concentrating on the ways in which beliefs about descent, "blood," and biological difference interact with property and marital systems to affect the distribution of power in society.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ANT 139. (Former ANT 139.)

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

ANT 139BN – Gender & Sexuality (4 units)

Course Description: Gender and sexuality in foraging bands, horticultural and pastoral tribes, agricultural and industrial states. Debates on cultural evolution and distribution of gender hierarchies. Impact of politics, economics, religion, social practices, women's movements on gender and sexuality. Culture, nature and sexuality.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ANT 130. (Former ANT 130.)

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

ANT 140A – Cultures & Societies of West & Central Africa (4 units)

Course Description: Ethnographic survey of West Africa and Congo Basin with analyses of representative societies which illustrate problems of general theoretical concern. Major consideration will be the continuities and discontinuities between periods prior to European contact and the present.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 140B – Cultures & Societies of East & South Africa (4 units)

Course Description: Ethnographic survey of Eastern and Southern Africa with analyses of selected societies which illustrate problems of interest to anthropologists. Major consideration will be given to continuities and discontinuities between periods prior to European contact and the present.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 141C – People of the Arctic: Contemporary & Historic Cultures of the Circumpolar Region (4 units)

Course Description: Social, economic, political, and religious lives of Russian, American, Canadian, and Greenlandic Arctic people (Yup'ik, Iñupiat, Inuit). Topics include Arctic ecosystems, archaeological record of human occupation, ethnohistorical and ethnographic accounts, arctic people in popular culture, and contemporary issues.

Prerequisite(s): ANT 002 or ANT 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ANT 142 – Peoples of the Middle East (4 units)

Course Description: Peoples of the Middle East (including North Africa). Discussions of class relations, kinship organization, sex/gender systems, religious beliefs and behavior, ethnic relations, political systems. Impact of world systems, political and religious movements and social change. (Former ANT 136.)

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 143A – Ethnology of Southeast Asia (4 units)

Course Description: Patterns of culture and social organization from prehistory to the present, in the context of historical, ecological, economic, and political settings. Emphasis on the relation of ethnic minorities to national states.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 144 – Contemporary Societies & Cultures of Latin America (4 units)

Course Description: Introduction to contemporary social structure of Latin America. Origins, maintenance and changes in inequality: economic responses to poverty, sociocultural responses to discrimination, and political responses to powerlessness.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 145 – Performance, Embodiment, & Space in South Asia (4 units)

Course Description: South Asian cultures and societies with a focus on performance, embodiment, and space from several disciplinary fields. Topics may include colonialism, nationalism, religious traditions, media, popular culture, cities, social movements, modernity, body-cultures, identity, gender, and diasporas.

Prerequisite(s): ANT 002; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 146N – Topics in the Anthropology of Europe (4 units)

Course Description: Recent ethnographies of different nation-states and socio-political spaces in Europe. Topics include the question of old and new boundaries, historical and contemporary constructions of Europe, migration and ethnicity, citizenship, belonging, multiculturalism, and post/socialisms.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 147 – Modern South Asia Cinema (4 units)

Course Description: South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: MSA 131B, CTS 146B.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

ANT 148A – Culture & Political Economy in Contemporary China (4 units)

Course Description: Examining contemporary Chinese culture and political economy through reading ethnographic studies on recent transformations in rural and urban Chinese society. Special attention is given to state power, popular culture, spatial mobility, city space, and gender.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 151 – Primate Evolution (4 units)

Course Description: Origin and relationships of the prosimians, monkeys, and apes.

Prerequisite(s): ANT 001 or BIS 002B or BIS 002C or EVE 010 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ANT 152 – Human Evolution (5 units)

Course Description: Nature and results of the evolutionary processes involved in the formation and differentiation of humankind.

Prerequisite(s): ANT 001 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ANT 153 – Human Genetics: Mutation & Migration (5 units)

Course Description: Introduction to human genetics. Principles of inheritance, the human genome, population genetics, mutation, genetic diversity, using DNA to study ancient human history, personal genomics. Human genetics as a tool to understand the patterns and processes of human migration. Introduction to the major concepts in human genetic and genomic research.

Prerequisite(s): BIS 002B C- or better or MCB 010 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ANT 154A – The Evolution of Primate Behavior (5 units)

Course Description: Examines ecological diversity and evolution of social systems of prosimians, monkeys, and apes, placing the social behavior of the primates in the context of appropriate ecological and evolutionary theory.

Prerequisite(s): ANT 001 or ANT 054 or EVE 010 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ANT 154B – Primate Evolutionary Ecology (5 units)

Course Description: Examination of the ecology of primates within an evolutionary framework. Theoretical concepts in individual, population, and community ecology, illustrated with primate (and other vertebrate) examples, with additional discussion of primate and rainforest conservation.

Prerequisite(s): ANT 001 or EVE 010 recommended.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

ANT 154C – Primate Behavior: Methods & Experimental Design (2 units)

Course Description: Scientific methods of studying, describing and analyzing the behavior and ecology of primates.

Prerequisite(s): (ANT 054 or ANT 154A or ANT 154B or NPB 102); (STA 013 or STA 013Y or STA 032 or STA 100 or SOC 046B); ANT 154CL (can be concurrent).

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Pass One restricted to upper division ANT majors; concurrent enrollment in ANT 154CL required.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ANT 154CL – Laboratory in Primate Behavior (4 units)

Course Description: Design and conduct of scientific "field studies" of the behavior of group-living primates at the California National Primate Research Center.

Prerequisite(s): (ANT 054 or ANT 154A or ANT 154B or NPB 102); (STA 013 or STA 013Y or STA 032 or STA 100 or SOC 046B); ANT 154C (can be concurrent); concurrent enrollment with ANT 154C required.

Learning Activities: Laboratory 6 hour(s), Term Paper.

Enrollment Restriction(s): Pass One restricted to upper division Anthropology majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Writing Experience (WE).

ANT 155 – Primate Conservation Biology (4 units)

Course Description: Study of the taxonomic, ecological and cultural diversity of Primates and how human activities impact tropical ecosystems. Emphasis on case studies and applied research methods. Includes discussion about career opportunities in conservation.

Prerequisite(s): ANT 001 or ANT 054 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Quantitative Literacy (QL); Scientific Literacy (SL).

ANT 156A – Human Osteology (4 units)

Course Description: Human skeleton from archaeological, forensic, and paleontological perspectives, including anatomical nomenclature, variation with sex and age, function, evolution, growth, and development of bones and teeth. Hands-on study and identification of human skeletal remains.

Prerequisite(s): ANT 001 or ANT 001Y recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Enrollment Restriction(s): Not open to students who have previously completed ANT 156.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANT 156B – Advanced Human Osteology (4 units)

Course Description: Human skeletons from archaeological, forensic, and paleontological contexts. Bone and tooth structure, growth, and development; measurement, statistics, and biomechanics; assessment of age, sex, weight, height, and ancestry; and indicators of illness, injuries, diet, and activities.

Prerequisite(s): ANT 156A; or equivalent.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANT 157 – Advanced Human Genetics (2 units)

Course Description: Advanced concepts in human genetics and genomics. Identification of genes underlying human health and disease. Use of genomic data in clinical settings and examination of biases associated with "personalized medicine." Emphasis on current human genomic technology and critical reading of scientific papers.

Prerequisite(s): ANT 153 or BIS 101 or EVE 102 or EVE 131 or EVE 175 or MCB 162 or MCB 182.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ANT 157L – Advanced Human Genetics Lab (4 units)

Course Description: Computer lab in human genetics and genomics. Emphasizes hands-on engagement with human genetic/genomic data. Ancestry analysis, pedigrees, de novo Mendelian disease.

Prerequisite(s): ANT 153 or EVE 102 or EVE 131 or EVE 175 or MCB 162 or MCB 182; concurrent enrollment in ANT 157 encouraged.

Learning Activities: Discussion/Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ANT 158 – The Evolution of Sex: A Biological Perspective (4 units)

Course Description: Current theoretical frameworks for explaining the evolution of sex differences and for understanding the interrelationship between biological processes and cultural construction of gender roles.

Prerequisite(s): ANT 001 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Domestic Diversity (DD); Scientific Literacy (SL).

ANT 159 – Disease Outbreaks in Humans and Other Primates (4 units)

Course Description: Impacts of infectious diseases on human and other primate populations, illustrated with past and present epidemiological studies from around the world. Theoretical concepts and applied questions, from local outbreaks to pandemics.

Prerequisite(s): ANT 001 or ANT 001Y or BIS 002B; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ANT 160 – Neandertals & Modern Human Origins (4 units)

Course Description: Origins, evolution, and disappearance of Neandertals. Emergence of humans like us in both anatomy and behavior. Interpretation of the fossil and archaeological records of Europe and Africa. Genetics of living and fossil humans.

Prerequisite(s): ANT 001 or ANT 001Y or equivalent recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANT 170 – Archeological Theory & Method (4 units)

Course Description: Introduction to history and development of archeological theory and method, with particular emphasis on the basic dependence of the latter on the former. Stress is on historical development of archaeology in the New World.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

ANT 172 – New World Prehistory: The First Arrivals (4 units)

Course Description: Survey of data relating to the peopling of the New World. Cultural adaptation and development of early inhabitants of North and South America.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 174 – European Prehistory (4 units)

Course Description: Survey of the prehistory of Europe from its earliest human inhabitants, to the Neandertals and first modern humans, and through early agricultural and complex societies. Analysis and interpretation of the European archaeological record for understanding human dispersals into Europe.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 175 – Andean Prehistory: Archaeology of the Incas & Their Ancestors (4 units)

Course Description: Prehistory of the Andean region, especially Peru, from the earliest hunting and gathering societies through the Inca. Focus on the use of archaeological data to reconstruct ancient human adaptations to the varied Andean environments.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 176 – California Archaeology (4 units)

Course Description: Discussion and analysis of archaeology and archaeological practice in California. Emphasis on precontact periods and earliest contact, from the late Pleistocene through to time of the Spanish Missions.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 3 hour(s); Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

ANT 177 – African Prehistory (4 units)

Course Description: Survey of prehistory of Africa from early human ancestors, through modern human origins, and into early agricultural and complex societies and the Bantu expansion. Analysis and interpretation of the African archaeological record, incorporating human paleontology and genetics.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 178 – Hunter-Gatherers (4 units)

Course Description: Study and interpretation of the ancient and modern lifeway in which peoples support themselves with primitive technologies and without benefit of domesticated plants and animals.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ANT 179 – Asian Prehistory (4 units)

Course Description: Survey of the prehistory of Asia from the earliest human occupations to the rise of complex societies. Special focus on fossil and archeological records.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ANT 180 – Zooarchaeology (4 units)

Course Description: Theories and methods for studying animal skeletal remains from archaeological sites. Identification and quantification of zooarchaeological material, cultural and natural processes affecting animal bones pre- and postburial, and use of faunal remains for determining past human diets and past environments.

Prerequisite(s): ANT 001 or ANT 003 recommended.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to junior or senior standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANT 181 – Archaeological Field Methods (4 units)

Course Description: Survey of archeological field methods and techniques. Strategies for survey and site location, mapping of artifacts and features, geophysical techniques, and hand excavation and analysis of stratigraphy.

Prerequisite(s): ANT 003.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Domestic Diversity (DD); Scientific Literacy (SL).

ANT 181L – Field Course in Archeological Methods (4 units)

Course Description: On-site course using archaeological methods and techniques held at a field location in the western United States, generally California or Nevada. Incorporates basic methods of archaeological survey, mapping, and excavation.

Prerequisite(s): ANT 181; or consent of instructor.

Learning Activities: Fieldwork 18 hour(s), Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ANT 182 – Archaeometry (4 units)

Course Description: Scientific techniques used to study the chemical and physical properties of archaeological materials. Types of anthropological questions that can be addressed with different methods. Preparation and analysis of archaeological materials.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

ANT 183 – Laboratory in Archeological Analysis (4 units)

Course Description: Museum preparation, advanced field investigation, and guidance in preparation of museum material for publication.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s), Project.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

ANT 184 – Prehistoric Technology: The Material Aspects of Prehistoric Adaptation (4 units)

Course Description: Examination of the role of lithic, ceramic, textile and wooden implements as elements in prehistoric survival and development. Emphasis is descriptive, but the significance of material resources as factors in prehistoric adaptation, settlement patterns, and culture change are discussed.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

ANT 185 – Lithic Analysis (4 units)

Course Description: Basic concepts of lithic analysis. General introduction on the place of stone tool technology in the archeological record. Physics, terminology and methodological concepts behind the study of stone tools. Review of the development of stone tool technology from its emergence.

Prerequisite(s): ANT 003 recommended.

Learning Activities: Lecture/Lab 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ANT 187 – Cultural Resource Management in Archaeology (4 units)

Course Description: Examination of legal foundations and goals of cultural resource management in the United States, with a focus on archaeological resources. Review of state and federal regulations, guidelines for assessing eligibility for listing in the National Register of Historic Places, professional practices to preserve and mitigate damage to resources, and public outreach practices.

Prerequisite(s): ANT 003; or consent of instructor; ANT 170 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

ANT 191 – Topics in Anthropology (4 units)

Course Description: Intensive treatment of a special anthropological topic or problem.

Prerequisite(s): Upper division standing.

Learning Activities: Term Paper, Lecture/Discussion 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ANT 192 – Internship in Anthropology (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the Department of Anthropology under the supervision of a member of the faculty.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3-36 hour(s).

Enrollment Restriction(s): Limited to Anthropology majors.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

ANT 194H – Special Study for Honors Students (1-5 units)

Course Description: Independent study of an anthropological problem involving the writing of an honors thesis.

Prerequisite(s): Consent of instructor; open only to majors of senior standing who qualify for honors program.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Writing Experience (WE).

ANT 197T – Tutoring in Anthropology (1-5 units)

Course Description: Leading of small voluntary discussion groups affiliated with one of the department's regular courses.

Prerequisite(s): Upper division standing with major in Anthropology and consent of Department Chairperson.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ANT 198 – Directed Group Study (1-5 units)

Course Description: Directed reading and group discussion of selected anthropological problems.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Pass/No Pass only.

ANT 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ANT 200 – History of Anthropology (4 units)

Course Description: Historical development of socio-cultural theory within anthropology, from mid-19th to mid-20th centuries. Focus on original theory texts in context of historical developments in the field as a whole.

Learning Activities: Lecture/Discussion 2 hour(s), Term Paper.

Grade Mode: Letter.

ANT 201 – Critical Readings in Ethnography (4 units)

Course Description: Critical readings of selected ethnographies that examine a wide range of important topics and analytical issues in social and cultural anthropology. Emphasis on how and why ethnographic writing has changed over time and its relationship with contemporary theoretical explorations.

Prerequisite(s): Graduate student in Anthropology or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 202 – History & Theory of Biological Anthropology (4 units)

Course Description: History of thought in biological anthropology and analysis of major theoretical problems in the field. Suggested for all first-year graduate students lacking intensive preparation in biological anthropology.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

ANT 203 – History & Theory of Archaeology (4 units)

Course Description: History of archaeology and archaeological theory and analysis of archaeological research methodology.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Generally restricted to graduate students; outstanding undergraduates with extensive training in archaeology with consent of instructor.

Grade Mode: Letter.

ANT 204 – Contemporary Issues in Anthropological Theory (4 units)

Course Description: Advanced consideration of fundamental issues in anthropological theory. Emphasis on critical examination of major contemporary debates between proponents of competing theories.

Prerequisite(s): ANT 002; ANT 137; or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 205 – History & Theory in Anthropological Linguistics (4 units)

Course Description: History of thought in anthropological linguistics. Consideration of the historical development of fundamental ideas in anthropological linguistics, of major theoretical issues, and of research methodology.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 206 – Research Design & Method in Social Anthropology (5 units)

Course Description: Formulation of research problems and preparation of research proposals; relationships between theory and method, funding, pre-fieldwork preparations, entering the community, field research techniques, and problems of ethics; intensive work on proposal writing.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

ANT 207 – Ethnographic Writing (4 units)

Course Description: Relationship between conducting participant observation of others and writing it up, emphasizing the processual rift between the reality of fieldwork and its written representation. Study of various literary genres and textual strategies used in cultural anthropology.

Prerequisite(s): ANT 137; ANT 201; or the equivalent.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ANT 208 – Writing & Research Design in Evolutionary Anthropology (4 units)

Course Description: Guided preparation of a Ph.D. dissertation proposal or MA thesis/report. Discussion of literature review, hypothesis testing, research design and grant writing as relates to anthropology. Culminates in an oral capstone presentation to the department

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

ANT 210 – Aspects of Culture Structure (4 units)

Course Description: Analysis of various phases of culture, such as religion, economics, law, and folklore.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ANT 212 – Political Ecology (4 units)

Course Description: Interdisciplinary seminar evaluating contributions from ecological anthropology, political economy, cultural constructivism, postmodernism, and feminism towards development of theories of political ecology. Historical relationships between local/global power structures, environmental degradation, and resistance movements. Case studies of desertification, deforestation, mining, conservation, development.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 216 – Problems in Archeological Method (4 units)

Course Description: Techniques for analyzing archeological data; application to various prehistoric cultures.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

ANT 217 – Quantitative Modeling in Archaeology (4 units)

Course Description: Examination of the nature of archaeological data with a focus on the quantitative and statistical techniques available to model, analyze, display, and make sense of such data.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 218 – Topics in New World Prehistory (4 units)

Course Description: Advanced study on current problems in New World Prehistory and archaeology.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated only when material is unique for that student and with consent of instructor.

Grade Mode: Letter.

ANT 219 – Topics in Old World Prehistory (4 units)

Course Description: Advanced study on current problems in Old World prehistory and archaeology.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated only when material is unique for that student and with consent of instructor.

Grade Mode: Letter.

ANT 220 – Field Course in Linguistics (4 units)

Course Description: Techniques of eliciting, recording, and analyzing; work with a native speaker.

Prerequisite(s): ANT 110; ANT 111.

Learning Activities: Seminar 2 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

ANT 221 – Rural Transformation in Postcolonial Societies (4 units)

Course Description: Problems of rural transformation arising out of political and economic interaction between national elites and rural regional and local populations under varying conditions of induced change in postcolonial societies. Attention given to the implications of this interaction for rapid economic growth.

Prerequisite(s): ANT 223; ANT 265; or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ANT 222 – Cities & Citizenship (4 units)

Course Description: Explores the nature of modern cities, urban socioeconomic life, and urban culture and politics from an anthropological perspective.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ANT 223 – Economic Anthropology (4 units)

Course Description: Selected current methodological and theoretical problems in the analysis of nonindustrial economic systems.

Prerequisite(s): ANT 122; or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 224 – Problems in Comparative Religion (4 units)

Course Description: Advanced study of current problems in the anthropological study of religion.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 225 – State & Nation in the Modern World (4 units)

Course Description: A presentation of current anthropological theories of the origins and nature of the modern nation-state in both the First and Third Worlds, with special reference to state ideology (nationalism) and forms of control.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 226 – Consciousness & Resistance (4 units)

Course Description: Consideration of approaches to the study of social inequality, and responses of subordinated groups. Emphasis on situating approaches to contemporary social theory, concrete research problems, and political strategies. Topics: formation of consciousness and identity; collective action, accommodation to frontal resistance.

Prerequisite(s): Completion of first-year graduate work or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 228 – Culture & Power (4 units)

Course Description: Exploration of one of the core paradigms within contemporary anthropological inquiry, "culture and power." Focus on how distinct theoretical perspectives—Marxism, post-Marxism, structuralism, post-structuralism, and feminism—have examined the mutually constitutive nature of culture and power.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Extensive Writing.

Grade Mode: Letter.

ANT 229 – Gender, Identity, & Self (4 units)

Course Description: Intersections of gender, identity, and selfhood cross-culturally and historically. How the self is feminized and masculinized, and interfaces with sexual, race, class, work, national, minority, and majority identities under different historical, cultural, and social structural conditions.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ANT 230 – Family Systems & Reproduction: Theory & Comparisons (4 units)

Course Description: Comparative examination of family systems in historical context and of reproductive behaviors and strategizing. A major theme is how family-system norms specify the relative desirability of differently configured offspring sets. Cases are drawn from Western Europe and South and East Asia.

Prerequisite(s): Graduate standing in one of the social sciences including History.

Learning Activities: Lecture 1.50 hour(s), Seminar 1.50 hour(s), Term Paper.

Grade Mode: Letter.

ANT 232 – Political Movements (4 units)

Course Description: Interdisciplinary approach to political movements of protest, reform, and revolution emphasizing historical comparison and evaluation of major theoretical approaches including world systems, resource mobilization, state & culture, rational choice, moral economy, social class and gender.

Prerequisite(s): Completion of first-year graduate work recommended.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 239 – Problems in African Society & Culture (4 units)

Course Description: Diachronic analyses of traditional institutions in sub-Saharan Africa.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 241 – Topics in North American Ethnology (4 units)

Course Description: Advanced study on current problems in North American ethnography and culture history.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

ANT 245 – Ethnology of Northern & Central Asia (4 units)

Course Description: Lectures on the culture aboriginally found north of the Caucasus-Korea line. Supervised study of the primary and secondary sources. Work with informants when available.

Prerequisite(s): Reading knowledge of German, Russian, Chinese, or Japanese.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 246 – Ethnology of Europe (4 units)

Course Description: Supervised study of the primary and secondary sources dealing with the ethnography and ethnology of the peoples of Europe. Emphasis upon folk, peasant, and minority groups.

Prerequisite(s): Reading knowledge of a European language other than English.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 248 – Topics in Chinese Culture & Society (4 units)

Course Description: Selected topics in the anthropology of Chinese society. Focus on one or more of the following topics: state-society dynamics, family and gender, city formation and urban life, social movement, labor politics, and religion and ideology in Chinese society.

Prerequisite(s): Graduate standing in the social sciences, history, or the humanities.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ANT 250 – Behavioral Ecology of Primates (4 units)

Course Description: Concepts, issues, and hypotheses in primate behavioral ecology, with emphasis on the social and ecological determinants and consequences of variation in social organization for individuals.

Prerequisite(s): ANT 154A (can be concurrent); or the equivalent, graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 252 – Human Evolution Seminar (4 units)

Course Description: Study of selected topics in human evolutionary studies. Each year, focuses on one or more of the following: molecular evolution, primate evolutionary biology, Tertiary hominoids, Australopithecus, Homo erectus, archaic Homo sapiens, brain evolution. *Prerequisite(s):* ANT 152; and consent of instructor, or the equivalent of ANT 152.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ANT 253 – Seminar in Human Genomics (3 units)

Course Description: In-depth study of current topics in human genomics including genetic diversity, migration, phenotypic evolution and genetic associations with disease. Focus on population genetic theory. Topic changes yearly.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

ANT 254 – Current Issues in Primate Sociobiology (4 units)

Course Description: Analysis of primate behavior, with particular emphasis on preparation for field studies.

Prerequisite(s): ANT 154B; or the equivalent.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ANT 256 – Primate Conservation Biology (4 units)

Course Description: Application of understanding of primate biology to conservation of primates and their habitat. Topics include evolutionary anthropology, behavioral ecology, biogeography, macroecology, population biology, and socio-ecology of primates.

Prerequisite(s): ANT 154; Graduate standing, or upper division undergraduates with consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 10 students.

Repeat Credit: May be repeated 1 time(s) when term paper differs.

Grade Mode: Satisfactory/Unsatisfactory only.

ANT 261 – Modeling the evolution of social behavior (4 units)

Course Description: Tools and topics in modeling the evolution of social behavior in humans and other animals. Game theory, basic population genetics, animal conflict, altruism, reciprocity, signaling, and group selection.

Prerequisite(s): MAT 016C; or consent of instructor, or equivalent of MAT 016C.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

ANT 262 – Evolution & Human Behavior (4 units)

Course Description: Exploration of the links between behavioral ecological theory and human cultural variation, focusing on reproduction, marriage, parental investment and family structure; implications of evolutionary theory for social organization in human communities, historical and contemporary.

Prerequisite(s): Graduate standing, or consent of instructor.

Learning Activities: Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

ANT 263 – Human Applications of Foraging Theory (4 units)

Course Description: Foraging theory models and their use in ethnographic and archaeological analyses of human behavior, with a focus on hunter-gatherers and resource selection, patch use, population and habitat, central places, sharing, stochastic processes, population dynamics, and conservation behavior.

Learning Activities: Discussion 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ANT 258.

Grade Mode: Letter.

ANT 265 – Language, Performance, & Power (4 units)

Course Description: Exploration of the intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate standing or consent of instructor.

Cross Listing: LIN 265.

Grade Mode: Letter.

ANT 270 – Anthropology Colloquium Seminar (1 unit)

Course Description: Reports and discussions of recent advances in the four subfields of anthropology. Presented by guest speakers.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ANT 280 – Current Anthropology Journal Editorial Workshop (4 units)

Course Description: Reading and offering workshop critiques of manuscripts submitted for publication, and reading and discussion of other relevant work in anthropology and human ecology. Track and edit published comments and authors' replies that accompany major features. Participation in the development of new sections for the electronic edition of the journal, including a "news and views" section and a debate section.

Prerequisite(s): Consent of instructor.

Learning Activities: Workshop 1 hour(s), Independent Study 3 hour(s).

Enrollment Restriction(s): Students must enroll for all three quarters.

Repeat Credit: May be repeated 12 unit(s) with consent of instructor.

Cross Listing: ECL 280.

Grade Mode: Satisfactory/Unsatisfactory only.

ANT 291 – Advanced Topics in Human Behavioral Ecology (4 units)

Course Description: Topically focused, critical discussion of current and emerging research in the field of human behavioral ecology, giving special attention to theory, concepts, models, and methods for the evolutionary analysis of ethnographic and archaeological evidence.

Prerequisite(s): ANT 261 or ANT 262 or ANT 263; and consent of instructor, or comparable experience in anthropology, or related disciplines.

Learning Activities: Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) when topic differs & material covered is substantially different.

Grade Mode: Letter.

ANT 292 – Seminar in Linguistic Anthropology (4 units)

Course Description: Selected topics in linguistic anthropology.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ANT 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ANT 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ANT 299D – Dissertation Research (1-12 units)

Course Description: Dissertation research.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ANT 390 – Teaching Anthropology (4 units)

Course Description: Intellectual and practical elements of college teaching in the field of Anthropology, from curriculum design and the syllabus through grading and course evaluations, including classroom and information technology methods, and problems and rewards of teaching in higher education.

Prerequisite(s): Graduate standing in Anthropology or closely related discipline.

Learning Activities: Seminar 3 hour(s), Practice 1 hour(s).

Grade Mode: Letter.

ANT 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Applied Biological Systems Technology (ABT)

College of Agricultural & Environmental Sciences

ABT 016 – Metal Properties & Fabrication (2 units)

Course Description: Study of metal properties and of techniques for fabricating in metal. Physical principles, design considerations, effects of techniques on quality and appearance, and evaluation procedures. Experience in working with metal.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ABT 017 – Plastic Properties & Fabrication (2 units)

Course Description: Study of the properties of plastic materials and the fundamentals of fabrication techniques. Experience in working with common plastics, with applications to biological systems.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ABT 049 – Field Equipment Operation (2 units)

Course Description: Operation, adjustment, and troubleshooting of farm tractors and field equipment. Principles of operation, equipment terminology and uses of tilling, cultivating, thinning, and planting equipment. Typical sequences in cropping practices.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ABT 052 – Field Equipment Welding (2 units)

Course Description: Intermediate welding to include hardfacing and inert gas welding. Class projects on repair and fabrication by welding. Troubleshooting and major repair of field equipment.

Prerequisite(s): ABT 016; or consent of instructor.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ABT 060 – Introduction to Unmanned Aerial Systems for Agriculture & Environmental Science (4 units)

Course Description: Operation, use and impact of Unmanned Aerial Systems (UAS) for applications in agriculture and environmental assessment. Principles of unmanned flight, vehicle systems, safety, and airspace regulations for communicating spatial relationships. UAS sensors, data acquisition, management, processing, visualization and analysis. Ethics and professional responsibilities in operations and public communication, and potential impacts for agricultural and environmental policy.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to College of Agricultural & Environmental Sciences students.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ABT 101 – Engine Technology (3 units)

Course Description: Principles of 2-stroke cycle, 4-stroke cycle gasoline and 4-stroke cycle diesel engine construction and operation. Engine systems, performance, troubleshooting, and overhaul.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ABT 110 – Irrigation Systems & Water Management (4 units)

Course Description: Soil and plant aspects of irrigation and drainage. Soil-water principles including water storage and movement, plant response to irrigation, water use by crops, irrigation systems (i.e., micro-irrigation, sprinkler irrigation and surface irrigation), and related salinity and water quality impacts.

Prerequisite(s): PHY 007A; SSC 100 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: ESM 110, HYD 110.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ABT 110L – Experiments in Food Engineering (2 units)

Course Description: Use of temperature sensors; measurement of thermal conductivity and heat transfer in foods; refrigeration, freezing, concentration and dehydration of foods.

Prerequisite(s): FST 110B (can be concurrent).

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

ABT 121 – Animal Housing & Environment Management (2 units)

Course Description: Optimal structures and environments for animal growth and comfort; heat and moisture transfer principles; heating, cooling, ventilating principles and equipment; animal housing design; environmental regulations and waste management practices.

Prerequisite(s): ANS 001 or ANS 002.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ABT 142 – Equipment & Technology for Small Farms (2 units)

Course Description: Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Cross Listing: IAD 142.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ABT 150 – Introduction to Geographic Information Systems (4 units)

Course Description: Basic concepts, principles, and methods of GIS are presented. Data structures, database design, GIS data creation, GPS, and spatial analysis. May be taught abroad.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Landscape Architecture and Sustainable Environmental Design majors.

Credit Limitation(s): Not open for credit to students who have completed ABT 180/PLS 180 or ABT 181N.

Cross Listing: LDA 150.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ABT 161 – Water Quality Management for Aquaculture (3 units)

Course Description: Basic principles of water chemistry and water treatment processes as they relate to aquacultural systems.

Prerequisite(s): BIS 001B; MAT 016B; CHE 002B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ABT 163 – Aquaculture Systems Engineering (3 units)

Course Description: Design of aquacultural systems: design methodology, principles of fluid mechanics, site selection and facility planning, management operations, computer modeling.

Prerequisite(s): ABT 161.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ABT 165 – Irrigation Practices for an Urban Environment (3 units)

Course Description: Basic design, installation, and operation principles of irrigation systems for turf and landscape: golf courses, parks, highways, public buildings, etc. Emphasis on hardware association with sprinkler and drip/trickle systems.

Prerequisite(s): PHY 001A.

Learning Activities: Lecture/Discussion 2 hour(s), Project.

Cross Listing: SAF 165.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ABT 181N – Concepts & Methods in Geographic Information Systems (4 units)

Course Description: Data representation and analysis in geographic information systems (GIS). Creation of spatial data sets from analog and digital sources such as aerial photography and maps; data structures, data management, database design, georeferencing, georectification, surface models, analysis, and spatial data visualization.

Prerequisite(s): LDA 150 or ABT 150; or consent of instructor.

Learning Activities: Lecture/Lab 8 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

ABT 182 – Environmental Analysis Using GIS (4 units)

Course Description: Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS.

Prerequisite(s): ABT 150 or LDA 150; or equivalent GIS experience and skills; general biology and/or ecology courses recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Cross Listing: HYD 182.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ABT 190C – Research Conference for Advanced Undergraduates (1 unit)

Course Description: Research conferences for specialized study in applied biological systems technology.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ABT 197T – Tutoring in Applied Biological Systems Technology (1-5 units)

Course Description: Tutoring individual students, leading small voluntary discussion groups, or assisting the instructor in laboratories affiliated with one of the department's regular courses.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Tutorial.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ABT 212 – Path to Zero Net Energy (4 units)

Course Description: Zero Net Energy concepts and social, technical, economic, and environmental considerations. Multidisciplinary research and analysis for clients.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Enrollment Restriction(s): Open to upper division or graduate students.

Grade Mode: Letter.

ABT 233 – Pest Control Practices (3 units)

Course Description: Practical and theoretical considerations of pest control systems and techniques. Design, selection, and use of mechanical systems for field, orchard, greenhouse, and vector control use. Biological, legal, and environmental considerations in pest control and pesticide application.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

ABT 289A – Selected Topic in Applied Biological Systems Technology: Agricultural & Natural Resources (1-5 units)

Course Description: Special topic.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ABT 289B – Selected Topics in Applied Biological Systems Technology: Biotechnology (1-5 units)

Course Description: Special topic.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ABT 289C – Selected Topics in Applied Biological Systems Technology: Food Technology (1-5 units)

Course Description: Special topic.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ABT 290C – Graduate Research Conference (1 unit)

Course Description: Research problems, progress, and techniques in applied biological systems technology.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ABT 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ABT 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ABT 317 – Teaching Agricultural Mechanics (2 units)

Course Description: Preparation of the teacher to plan, organize, and conduct an agricultural mechanics program in secondary schools.

Development of and presentation of lesson plans and teaching aids.

Review of subject matter in metal fabrication, power and machinery and agricultural structures areas.

Prerequisite(s): A course in physics; 6 units related to agricultural mechanics; enrolled in Agricultural Education Teacher Credential Program.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

Applied Science Engineering-Davis (EAD)

College of Engineering

EAD 230 – Topics in Computational Fluid Dynamics (3 units)

Course Description: Hands-on approach to numerical methods for compressible fluid flow. Readings and discussions of solution strategies will be complemented with programming exercises and projects to give first-hand experience with performance and accuracy of several computational methods; from upwind differencing to Godunov methods.

Prerequisite(s): EAD 210A; EAD 210B; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EAD 289A – Special Topics in Applied Science: Atomic, Molecular, & Optical Physics (1-5 units)

Course Description: Special topic in Atomic, Molecular, and Optical Physics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289B – Special Topics in Applied Science: Chemical Physics (1-5 units)

Course Description: Special topic in Chemical Physics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289C – Computational Physics: Computational Physics (1-5 units)

Course Description: Special topic in Computational Physics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289D – Special Topics in Applied Science: Biophotonics/Biotechnology (1-5 units)

Course Description: Special topic in Biophotonics/Biotechnology.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289E – Special Topics in Applied Science: Materials Science (1-5 units)

Course Description: Special topic in Materials Science.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289F – Special Topics in Applied Science: Imaging Science & Photonics (1-5 units)

Course Description: Special topic in Imaging Science and Photonics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289G – Special Topics in Applied Science: Nonlinear Optics (1-5 units)

Course Description: Special topic in Nonlinear Optics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289H – Special Topics in Applied Science: Plasma/Fusion Energy Physics (1-5 units)

Course Description: Special topic in Plasma/Fusion Energy Physics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289I – Special Topics in Applied Science: Quantum Electronics (1-5 units)

Course Description: Special topic in Quantum Electronics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289J – Special Topics in Applied Science: Condensed Matter/Statistical Physics (1-5 units)

Course Description: Special topic in Condensed Matter/Statistical Physics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289K – Special Topics in Applied Science: Classical Optics (1-5 units)

Course Description: Special topic in Classical Optics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289L – Special Topics in Applied Science: Microwave & Millimeter-Wave Technology (1-5 units)

Course Description: Special topic in Microwave and Millimeter-Wave Technology.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289M – Special Topics in Applied Science: Synchrotron Radiation Science (1-5 units)

Course Description: Special topic in Synchrotron Radiation Science.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 289N – Special Topics in Applied Science: Space Physics (1-5 units)

Course Description: Special topic in Space Physics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s) per segment when topic differs.

Grade Mode: Letter.

EAD 290 – Seminar (1-2 units)

Course Description: Seminar.

Learning Activities: Seminar 1-2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

EAD 290C – Graduate Research Group Conference (1 unit)

Course Description: Graduate research group conference.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EAD 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Lecture 3-15 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

EAD 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Arabic (ARB)

College of Letters & Science

ARB 001 – Elementary Arabic 1 (5 units)

Course Description: Introduction to basic Arabic. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including the alphabet and basic syntax. Focus on standard Arabic with basic skills in spoken Egyptian and/or one other colloquial dialect.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ARB 001A – Accelerated Intensive Elementary Arabic (15 units)

Course Description: Special 12-week accelerated, intensive summer session course that combines the work of courses ARB 001, 002, and 003. Introduction to Modern Standard Arabic through development of all language skills in a cultural context with emphasis on communicative proficiency.

Learning Activities: Lecture/Discussion 15 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ARB 001, ARB 002, or ARB 003.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ARB 002 – Elementary Arabic 2 (5 units)

Course Description: Continuation of basic Arabic from ARB 001.

Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic and limited use of spoken Egyptian and/or one other colloquial dialect.

Prerequisite(s): ARB 001; or consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ARB 003 – Elementary Arabic 3 (5 units)

Course Description: Continuation of introduction to basic Arabic from ARB 001 and ARB 002. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic with limited use of spoken Egyptian and/or one other colloquial dialect.

Prerequisite(s): ARB 002; or consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ARB 021 – Intermediate Arabic 21 (4 units)

Course Description: Builds on courses ARB 001, ARB 002, and ARB 003. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect.

Prerequisite(s): ARB 003; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ARB 021A – Accelerated Intensive Intermediate Arabic (15 units)

Course Description: Special 12-week accelerated, intensive summer session course that combines the work of courses ARB 021, ARB 022, and ARB 023. Modern Standard Arabic through development of all language skills in a cultural context with emphasis on communicative proficiency.

Learning Activities: Lecture/Discussion 15 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ARB 021, ARB 022, or ARB 023.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ARB 021C – Colloquial Egyptian Arabic (4 units)

Course Description: Continuation of the Colloquial Egyptian Arabic covered in the first year of Arabic; ARB 001, ARB 002, and ARB 003.

Prerequisite(s): ARB 003; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Lecture/Lab 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when instruction material changes.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ARB 021L – Colloquial Levantine Arabic (4 units)

Course Description: Continuation of colloquial Levantine Arabic presented in ARB 001, ARB 002 and ARB 003. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic, with reading and writing in Modern Standard Arabic that is related to Levantine cultural production and social life.

Prerequisite(s): ARB 003; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ARB 022 – Intermediate Arabic 22 (4 units)

Course Description: Continuation of ARB 021. Interactive and integrated presentation of listening, speaking, reading, and writing, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect.

Prerequisite(s): ARB 021; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ARB 022C – Colloquial Egyptian Arabic (4 units)

Course Description: Continuation of the Colloquial Egyptian Arabic covered in first year of Arabic; courses ARB 001, ARB 002, and ARB 003 and the first quarter of Colloquial Arabic ARB 021C.

Prerequisite(s): ARB 021C; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Lecture/Lab 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when instruction material changes.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ARB 022L – Colloquial Levantine Arabic (4 units)

Course Description: Continuation of colloquial Levantine Arabic presented in ARB 021L. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic; reading and writing in Modern Standard Arabic related to Levantine social life.

Prerequisite(s): ARB 021L; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ARB 023 – Intermediate Arabic 23 (4 units)

Course Description: Continuation of ARB 021 and ARB 022. Interactive and integrated presentation of Arabic listening, speaking, reading, and writing skills, including idiomatic expression.

Prerequisite(s): ARB 022; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ARB 023C – Colloquial Egyptian Arabic (4 units)

Course Description: Continuation of Colloquial Egyptian Arabic covered in ARB 022C.

Prerequisite(s): ARB 022C; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Lecture/Lab 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when instruction material changes.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ARB 023L – Colloquial Levantine Arabic (4 units)

Course Description: Continuation of colloquial Levantine Arabic presented in ARB 022L. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic; reading and writing in Modern Standard Arabic related to Levantine social life.

Prerequisite(s): ARB 022L; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ARB 097T – Arabic Tutoring (1-5 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): ARB 023 B or better; consent of Program Director required.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: P/NP only.

ARB 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ARB 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ARB 101A – Readings in Arabic: 600-1850 (4 units)

Course Description: Readings in Arabic. Poetry, prose literature, and selections from texts on religion, history, politics, science, philosophy and mysticism.

Prerequisite(s): ARB 123; or consent of instructor.

Learning Activities: Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s) when instructor decides there is benefit from additional practice working on the different selections from the same texts or if 50% or more of the texts are different.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

ARB 121 – Advanced Arabic (4 units)

Course Description: Review, refinement, and development of skills learned in intermediate Arabic through work with texts, video, and audio on cultural and social issues. Integrated approach to reading, writing, listening, speaking primarily standard Arabic, with limited use of one colloquial dialect.

Prerequisite(s): ARB 023; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when based on different readings.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ARB 122 – Advanced Arabic (4 units)

Course Description: Continuation of ARB 121. Further development of advanced skills in reading, listening, writing, and speaking standard Arabic through work with texts, video, and audio on cultural and social issues. Limited use of one colloquial dialect.

Prerequisite(s): ARB 121; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ARB 123 – Advanced Arabic (4 units)

Course Description: Continuation of ARB 122. Further development of advanced skills in reading, listening, writing, and speaking standard Arabic through work with texts, video, and audio on cultural and social issues. Limited use of one colloquial dialect.

Prerequisite(s): ARB 122; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ARB 140 – A Story for a Life: The Arabian Nights (4 units)

Course Description: In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: COM 172, MSA 121C.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ARB 141 – Readings in Modern Arabic Literature (4 units)

Course Description: Readings of modern Arabic poetry and fiction in original format, assisted by instructor-prepared glossaries and other supplementary material. Readings to be followed by class discussion and short writing assignments in Arabic. Open to students at advanced proficiency in Arabic.

Prerequisite(s): ARB 123; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s) if reading material changes.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ARB 197T – Tutoring in Arabic (1-5 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): ARB 023 B or better; consent of Program Director.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: P/NP only.

ARB 198 – Directed Group Study (1-5 units)

Course Description: Development of reading, writing, speaking, and listening skills in advanced Arabic. Materials may include al-Kitaab Part Two or Three, news articles and broadcasts, short stories, poetry, novels, essays, scripture, prophetic traditions, audio recordings, and television and film.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated 4 time(s) when content differs.

Grade Mode: Letter.

ARB 297 – Directed Independent Study (4 units)

Course Description: Directed Independent Study on a topic culminating in a term paper. Independent Study may only be arranged with consent of the instructor when graduate seminars are unavailable. Topic varies by instructor.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Discussion 1 hour(s), Independent Study.

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated 5 time(s) when no graduate seminars are available and topic differs.

Grade Mode: Letter.

ARB 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ARB 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Variable.

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated 18 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Art History (AHI)

College of Letters & Science

AHI 001A – Ancient Mediterranean Art (4 units)

Course Description: Introduction to the art and architecture of the ancient Mediterranean world, including Mesopotamia, Egypt, Greece, and Rome.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 001B – Medieval & Renaissance Art (4 units)

Course Description: Christian, Barbarian, Moslem, and Classical traditions in European Art from the 4th through the 16th centuries.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 001C – Baroque to Modern Art (4 units)

Course Description: Introduction to visual analysis through study of western art 1600-present, examining major artists and movements from Europe to North America. Study of the relationship of art and artists to political, religious, social change, and to changes in ideology, patronage, audience.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 001D – Arts of Asia (4 units)

Course Description: Introduction to major forms and trends in the arts, architecture, and material culture of Asia from the Neolithic to the contemporary emphasizing the visual manifestation of secular and religious ideas and ideals.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed AHI 001DV.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 001E – Islamic Art & Architecture (4 units)

Course Description: Introduction to the art and architecture of the Islamic world including the Middle East, Africa, Europe, and South Asia, from the 7th century CE to the 20th century.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 005 – Understanding Visual Culture (4 units)

Course Description: Development of visual literacy for an increasingly visual world; critical analyses focusing on the widest variety of visual imagery: the fine arts across media and eras of world culture, television, film, and advertising. Intended for a diverse spectrum of audiences.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 025 – Understanding Architecture (4 units)

Course Description: Development of architecture and urban design; how form, space, order are conceived and used across eras and cultures. Examines the function and organization of space, technological problems of construction, visual qualities of architecture, and social issues connected to architecture.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC).

AHI 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

AHI 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1-5 hour(s).

Grade Mode: Pass/No Pass only.

AHI 100 – Methods of Art History (4 units)

Course Description: Methods of art historical research and analysis, and general issues in critical thought. Writing skills appropriate to a range of art-historical exposition.

Prerequisite(s): Prior completion of two upper-division Art History (AHI) courses recommended.

Learning Activities: Extensive Writing/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

AHI 101 – Understanding Museum Practices (4 units)

Course Description: Museum theory and practice. Mission of the museum to collect, preserve and educate. Museum administrative structure and the role of the curator. Visitor engagement, ethics of display, interpretation and content production.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

AHI 102 – Exhibition Practicum (4 units)

Course Description: Curate an exhibition. Development of exhibition proposal, object selection and installation, design, lighting, creation of exhibition text and promotional material. Production of a public display for a campus museum or elsewhere.

Learning Activities: Discussion/Laboratory 3 hour(s), Project.

Enrollment Restriction(s): Pass One restricted to Art History and Art Studio majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

AHI 110 – Cultural History of Museums (4 units)

Course Description: Evolution of museums in the western world from the "cabinet of curiosities" of 16th-century Europe to the modern "art center." Changing motives behind collecting, exhibiting, and interpretation of objects. Attention to museums' historical legacies and continuing philosophical dilemmas.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 120A – Art, Architecture, & Human Rights (4 units)

Course Description: Study of human rights as they relate to art, architecture, and cultural heritage. Examines museums, art collections, and cultural-heritage management, their relation to the cultural prerogatives of communities and indigenous groups, and protection of cultural heritage during war and conflict.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: HMR 120A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 121 – Politics of Public Art (4 units)

Course Description: Politics of public art. Role of contemporary artists, public monuments, urban spaces, the movie industry, photography, propaganda art, and comics in construction of political ideologies and collective identities.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

AHI 122 – Sex & Space (4 units)

Course Description: Relationship between space and sexuality. Sexual metaphors in art and architecture, gender identity formation via images and space. Diverse intersections of sexuality and art history.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); Writing Experience (WE).

AHI 123 – The Museum in the Age of Spectacle (4 units)

Course Description: The institution of the museum in the context of modernity, nationalism, (post) colonialism, and the society of spectacle. Designed to bring art objects of the Manetti Shrem collection, global art history, and foundational critical theory together in a meaningful and experimental way.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

AHI 130 – Landscape, Nature, & Art (4 units)

Course Description: Interpretation of the natural world in the western world 1600-1900, with perspectives on the present; landscape painting, ideology of picturesque and sublime, landscape art and travel, reshaping the land as art; dialogues between art and science; nature as national identity.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 148 – Theory & Criticism: Painting & Sculpture (4 units)

Course Description: Study of forms and symbols in historic and contemporary masterpieces.

Prerequisite(s): ART 005 or 007 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: ART 148.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

AHI 150 – Arts of Subsaharan Africa (4 units)

Course Description: Traditional arts and crafts of subsaharan Africa from prehistoric times to the present; the relationships among art, nature, cycles of life, and religion; art as expression of power; sculpture and culture in West and Central Africa; Colonialism and collecting.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 151 – Arts of the Ancient New World (4 units)

Course Description: Artistic developments of the ancient New World. Interpretations of art and architecture in relation to religious ideologies, social structures, and political paradigms in Peru, Central America, the Caribbean, and Mesoamerica.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 152 – Arts of Oceania & Prehistoric Europe (4 units)

Course Description: Traditional arts of aboriginal Australia, Melanesia, Polynesia, and Micronesia, as seen in their cultural contexts. Prehistoric art of Europe and the Near East.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 153 – Hindu Gods & Hindu Symbols (4 units)

Course Description: A historical survey of the development of the language of symbolism and iconography in Hinduism.

Prerequisite(s): RST 068 Hinduism or RST 069 Hindu Mythology recommended, but not required.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: RST 181.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 154 – The Hindu Temple (4 units)

Course Description: Comparative history of architecture and symbolism of the Hindu Temple in India, Southeast Asia and the United States. Attention to the temple as expression of religious knowledge, political authority, and cultural heritage through the lens of colonialism and postcolonialism.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: RST 154.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 155 – The Islamic City (4 units)

Course Description: Introduction to the urban history of the Islamic world. Critical study of the historiography of the Islamic city, development of urban form, institutions and rituals, and analysis of selected themes.

Prerequisite(s): AHI 001E recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC).

AHI 156 – Arts of the Islamic Book (4 units)

Course Description: Critical study of the arts of the luxury book in the pre-modern Islamic world. Representation in Islam, the relationship of word and image, the discipline of calligraphy, aesthetics and representation in Persianate painting.

Prerequisite(s): Prior completion of AHI 001E recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 157 – Buddhist Art (4 units)

Course Description: A historical survey of Buddhist art in relation to the development of Buddhist doctrine and philosophy.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: RST 171.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 158 – Popular Religious Art in India (4 units)

Course Description: Survey of Indian popular religious art in prints, trade labels, comics and photographs.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: RST 180.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 163A – Early Chinese Art (4 units)

Course Description: Thematic and chronological examination of 3000 years of Chinese art and culture from Neolithic through Tang Dynasty (10th c. CE). Study of ceremonial and secular objects manifesting folk beliefs and belief systems of ancestor worship, Buddhism, Daoism, and Confucianism.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 163B – Chinese Painting (4 units)

Course Description: Thematic and chronological examination of Chinese painting and culture from the Tang Dynasty (7th century CE) through the early 20th century. Issues considered include political art (made to support or protest regimes), art and the market, art and individual expression.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 163C – Early Modern Chinese Painting (4 units)

Course Description: Topics in Chinese Art History, 13th-19th century. Study of issues pertaining to self and society; gender and gendering; religion and philosophy; political engagement and protest; economy and the market; the effects created by periods of transition on visual expression.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 163D – Art from China 1900 to the Present (4 units)

Course Description: Forms of modern and avant-garde expression from China's industrialization to the 21st century. Interactions of art and politics, individual and state, art for the free market versus art for the state, expressions of modernity; China on the world stage.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 164 – The Arts of Japan (4 units)

Course Description: Japan's painting, architecture, decorative arts, and print heritage, ancient times to the 20th century in literary, political, intellectual, and spiritual contexts; impact of Japanese art on the West and the West's transformative impact upon Japan's opening in the 19th century.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 168 – Great Cities (4 units)

Course Description: Transformation in architecture and urban form in Paris, London, and Vienna in the context of varying social, political, and economic systems as well as very different cultural traditions, concentrating on the years 1830-1914.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

AHI 172A – Early Greek Art & Architecture (4 units)

Course Description: Examination of the origin and development of the major monuments of Greek art and architecture from the 8th century to the mid-5th century B.C.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: CLA 172A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

AHI 172B – Later Greek Art & Architecture (4 units)

Course Description: Study of the art and architecture of later Classical and Hellenistic Greece, from the mid-5th century to the 1st century B.C.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: CLA 172B.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

AHI 173 – Roman Art & Architecture (4 units)

Course Description: Art and architecture of Rome and the Roman Empire, from the founding of Rome through the 4th century C.E.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: CLA 173.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

AHI 175 – Architecture & Urbanism in Mediterranean Antiquity (4 units)

Course Description: Architecture and urban development in the ancient Near East, Greece, and Rome. Special emphasis on the social structure of the ancient city as expressed in its architecture, and on the interaction between local traditions and the impact of Greco-Roman urbanism.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Cross Listing: CLA 175.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 176A – Art of the Middle Ages: Early Christian & Byzantine Art (4 units)

Course Description: Term paper or gallery studies and review. Painting, sculpture and architecture of the early Christian era and Byzantine Empire: through the later Roman Empire in the West and to the final capture of Constantinople in the East.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 176B – Art of the Middle Ages: Early Medieval & Romanesque Art (4 units)

Course Description: Term paper or gallery studies and review. Painting, sculpture and architecture of western Europe in the early medieval era: from the rise of the barbarian kingdoms through the 12th century.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 176C – Art of the Middle Ages: Gothic (4 units)

Course Description: Term paper or gallery studies and review. Painting, sculpture and architecture in northern Europe from the 12th through the 15th centuries.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 177 – Northern Renaissance Art (4 units)

Course Description: Artistic culture of Western and Central Europe c. 1350-1600. Topics include the development of "realism" in portraiture and landscape, prints and print culture, urbanism, science and the exotic, anti-religious artworks, religious attacks on art, contacts with Renaissance Italy.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 178B – Early Italian Renaissance Art & Architecture (4 units)

Course Description: Artists of the 15th century, with a focus on Florence; Donatello and Masaccio through Botticelli, in their artistic, architectural, and cultural setting; the impact of Humanism and the rebirth of classical learning.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

AHI 178C – High & Late Italian Renaissance Art & Architecture (4 units)

Course Description: High Renaissance and Mannerism in 16th-century Italy: Leonardo, Michelangelo, Raphael, and Titian in their artistic and cultural settings, Florence, Rome, and Venice; the architecture of Bramante, Michelangelo, and Palladio.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

AHI 179B – Baroque Art (4 units)

Course Description: Painting, sculpture and graphic arts in the 17th century, including such artists as Caravaggio, Rubens, Rembrandt, and Velázquez in their political and social context.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

AHI 180 – Arts of the Rococo (4 units)

Course Description: European design culture between 1710 and 1780, including painting, sculpture, architecture, interior design, furniture, metalwork, and ceramics. Concentration on the arts in France and Germany, but in dialogue with art from China, India, the Middle East, and the Americas. Ornamentation and decoration as critical concepts in art history.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 181 – Latin American Art & Architecture (4 units)

Course Description: Art and architecture of Latin America since Spanish arrival in the New World to the present. Visual, spatial, and material practices (painting, sculpture, urban form, cartography, and film, among others) from North and South America. How art and architecture shape and define colonial encounters and negotiations, religious and cultural exchange, conceptions of race and gender, and notions of nationalism and globalism.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 182 – British Art & Culture (1750-1900) (4 units)

Course Description: British painting in relation to the position of women in society and the rise of the middle-class art market. Topics covered Hogarth and popular culture, Queen Victoria and the female gaze, and Pre-Raphaelite artists and collectors.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 183A – Art in the Age of Revolution, 1750-1850 (4 units)

Course Description: Emergence of modernism in Europe from the late 18th century to the middle of the 19th century. Major artistic events viewed against a revolutionary backdrop of changing attitudes toward identity, race, and gender.

Prerequisite(s): Prior completion of AHI 001C recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 183B – Impressionism & Post-Impressionism: Manet to 1900 (4 units)

Course Description: Innovations of Impressionists, Post-Impressionists, and Symbolists in relation to social changes. Assessment of role of dealers and critics, myth of the artist-genius, and gender relations in French art and culture of the late 1800s.

Prerequisite(s): Prior completion of AHI 001C recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 183C – Modernism in France, 1880-1940 (4 units)

Course Description: Development of modern art in France, its social context, and its transnational aspects. Post-Impressionism, Fauvism, Cubism, Expressionism, and Surrealism are considered in relation to secessionist movements, the formation of other artistic groups, new forms of patronage, and new audiences.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

AHI 184 – 20th-Century Architecture (4 units)

Course Description: Major movements in architecture of the 20th century in Europe and America. Formal innovations are examined within the social, political, and economic circumstances in which they emerged.

Prerequisite(s): Prior completion of AHI 025 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

AHI 185 – Avant-Gardism & its Aftermath, 1917-1960 (4 units)

Course Description: Social, cultural, aesthetic, and theoretical development for artists and their audiences in the context of larger issues like the Mexican, Russian and German revolutions, WWI, the Depression, WWII, etc., and a critical-theoretical inquiry into questions of modernism, modernity, and avant-gardism.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

AHI 186 – Contemporary Art 1960-Present (4 units)

Course Description: Development of new media and aesthetics in the context of such cultural and political phenomena as the New Left, feminism, and globalization; investigation of the critical-theoretical questions of neo avant-gardism, postmodernism, and postmodernity.

Learning Activities: Lecture/Discussion 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Visual Literacy (VL); Writing Experience (WE).

AHI 187 – Contemporary Architecture (4 units)

Course Description: Introduction to world architecture and urban design since circa 1966. Relation of influential styles, buildings, and architects to postmodern debates and to cultural, economic, technological and environmental change.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

AHI 188A – The American Home (4 units)

Course Description: American domestic architecture and its responsiveness to changes in daily life from Colonial times to the 1960s. Vernacular developments, effects of different socioeconomic conditions, and women's role in shaping the home receive special attention.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL).

AHI 188B – Architecture of the United States (4 units)

Course Description: Major movements from colonial times to the present. The role of buildings in a changing American society, the interplay of styles with technologies of construction, relationship between American and European developments and evolution of the architectural and planning professions.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Visual Literacy (VL); Writing Experience (WE).

AHI 188C – American Art to 1910 (4 units)

Course Description: Major movements in American art from the 17th-century English-speaking colonies to the onset of World War I.

Learning Activities: Lecture/Discussion 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Visual Literacy (VL).

AHI 189 – Photography in History (4 units)

Course Description: Social, cultural, aesthetic and technical developments in the history of photography including patronage and reception, commercial, scientific, political and artistic applications, and a critical-theoretical inquiry into photography's impact on the social category "art" and the history of subjectivity.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

AHI 190A – Undergraduate Seminar in Art History: Mediterranean Antiquity (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Upper division standing; significant training in Art History recommended; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190B – Undergraduate Seminar in Art History: Medieval (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Upper division standing; significant training in Art History recommended; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190C – Undergraduate Seminar in Art History: Renaissance (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Upper division standing; significant training in Art History recommended; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190D – Undergraduate Seminar in Art History: American (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Upper division standing; significant training in Art History recommended; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190E – Undergraduate Seminar in Art History: Gendering of Culture (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Upper division standing; significant training in Art History recommended; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190F – Undergraduate Seminar in Art History: Chinese (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Upper division standing; significant training in Art History recommended; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190G – Undergraduate Seminar in Art History: Japanese (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Upper division standing; significant training in Art History recommended; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190H – Undergraduate Seminar in Art History: Modern-Contemporary (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Upper division standing; significant training in Art History recommended; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190I – Undergraduate Seminar in Art History: 17th-18th Century (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Upper division standing; significant training in Art History recommended; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190J – Undergraduate Seminar in Art History: Islamic (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Upper division standing; significant training in Art History recommended, or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190K – Undergraduate Seminar in Art History: 19th Century (4 units)

Course Description: Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing.

Prerequisite(s): Art History major, minor, or other significant training in Art History recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 students; for majors, minors, other advanced students; restricted to upper-division students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

AHI 190L – Undergraduate Seminar in Art History: Cultures of Collecting (4 units)

Course Description: Study of a broad problem or theoretical issue in the history of collecting, including individual and institutional collecting practices.

Prerequisite(s): Art History major, minor, or other significant training in Art History recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 25 upper-division students; for majors, minors, other advanced students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

AHI 192 – Internship (1-6 units)

Course Description: Supervised program of internships at professional art institutions such as museums, galleries, and art archives including collections of slides and photographs.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

AHI 194HA – Honors Thesis Research (4 units)

Course Description: Research and initial drafting of a senior thesis paper in a scholarly area of Art History, under supervision of Art History faculty advisor.

Prerequisite(s): Consent of instructor; a minimum GPA of 3.7 and completion of one undergraduate seminar in Art History (AHI 190A-L).

Learning Activities: Independent Study.

Enrollment Restriction(s): Only open to Art History majors with a minimum 135 units toward graduation.

Grade Mode: Letter.

AHI 194HB – Honors Thesis Writing (4 units)

Course Description: Final writing of a senior thesis paper in a scholarly area of Art History, under supervision of Art History faculty advisor.

Prerequisite(s): AHI 194HA A- or better; consent of instructor.

Learning Activities: Independent Study.

Enrollment Restriction(s): Only open to majors in the Art History Honors Program with upper division standing.

Grade Mode: Letter.

AHI 198 – Directed Group Study (1-5 units)

Course Description: Directed group Study. May be taught abroad.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AHI 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AHI 200A – Visual Theory & Interpretive Methods (4 units)

Course Description: Close study of selected recent developments in interpretive methodology used by art historians and other analysts of visual culture and the place of those developments within art history's history and in the larger field of social, cultural and historical analysis.

Learning Activities: Discussion 3 hour(s), Extensive Writing 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

AHI 200B – Research & Writing Methods in Art History (4 units)

Course Description: Development of the research, writing, and editing skills necessary for producing publishable work. Focus on reference tools used by art historians and the mechanics of scholarship, from question framing and organization of ideas to writing clear, effective prose.

Learning Activities: Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students in Art History.

Grade Mode: Letter.

AHI 200C – Thesis Writing Colloquium (1 unit)

Course Description: Meeting concurrently with AHI 200B, the colloquium provides a structured, supportive environment for second-year Art History graduate students drafting masters' theses. Offers a forum for technical discussions, discussion of writing/editing procedures, and peer review of writing in progress.

Prerequisite(s): AHI 200B; taken by all Art History M.A. students in their first year.

Learning Activities: Discussion 1.50 hour(s), Auto Tutorial.

Enrollment Restriction(s): Restricted to graduate students in Art History.

Grade Mode: Satisfactory/Unsatisfactory only.

AHI 210 – Museums, Art Exhibitions & Culture (4 units)

Course Description: Issues accompanying the evolution and function of museums from cabinets of curiosities in 16th-century Europe to modern art centers. Examination of divergent motives behind collecting, exhibiting, and interpretation of objects. Investigation of museums' historical legacies and continuing philosophical dilemmas.

Prerequisite(s): Graduate status in art history or an allied field.

Learning Activities: Seminar 3 hour(s), Extensive Writing/Discussion, Term Paper.

Enrollment Restriction(s): Limited to 20 students.

Grade Mode: Letter.

AHI 250 – Problems in Art Historical Research (4 units)

Course Description: Major topics in art historical research, emphasizing special methods of investigation, and of historical and critical analysis.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

AHI 254 – Seminar in Classical Art (4 units)

Course Description: Selected areas of special study in classical art of the Greek and Roman tradition.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

AHI 263 – Seminar in Chinese Art (4 units)

Course Description: Selected areas of special study in Chinese Art.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

AHI 276 – Seminar in Medieval Art (4 units)

Course Description: Selected areas of special study in medieval art from Early Christian to late Gothic.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

AHI 278 – Seminar in Italian Renaissance Art (4 units)

Course Description: Selected areas of special study in Italian art from the 14th to the 16th century.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

AHI 283 – Seminar in Visual Culture & Gender (4 units)

Course Description: Selected areas of special study in the relationship between visual culture and gender in Europe and America from 1750 to present.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

AHI 288 – Seminar in European & American Architecture (4 units)

Course Description: Exploration of selected topics in European and American architectural history with concentration on the Modern Period.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

AHI 290 – Special topics in Art History (4 units)

Course Description: Special research seminar in the theory or methods of Art History, or in a period of Art History. Topic varies depending on the interests of the instructor or students.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs and with consent of instructor.

Grade Mode: Letter.

AHI 292 – Internship (1-4 units)

Course Description: Supervised internship at professional art or cultural institution including museum, galleries, archives, government offices, visual resources libraries, etc.

Prerequisite(s): Consent of instructor; graduate student.

Learning Activities: Internship 3-12 hour(s).

Enrollment Restriction(s): Restricted to graduate students in Art History only.

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

AHI 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Seminar.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

AHI 299 – Individual Study (1-12 units)

Course Description: Individual study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

AHI 390 – Introduction to Teaching Art History for Teaching Assistants (1 unit)

Course Description: Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of undergraduate art history.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

AHI 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar, Practice.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

AHI 402 – Museum Training: Exhibition Methods (4 units)

Course Description: Approved for graduate degree credit. History of exhibition methods in private and public collections. Comparisons of different types of museums and their exhibition problems. Lighting and techniques of display with emphasis on actual design. Experimentation with unusual presentation forms.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

Art Studio (ART)

College of Letters & Science

ART 001 – Introduction to Studio Art Practice (4 units)

Course Description: Introduction to studio art practice. Overview and practice of artists' creative process including hands-on visual exercises, reading, writing, presentation, and critique.

Learning Activities: Lecture 3 hour(s), Studio 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 002 – Beginning Drawing (5 units)

Course Description: Introduction to drawing using various black and white media to articulate forms and organize space, with reference to historical and contemporary works.

Learning Activities: Studio 6 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 005 – Beginning Sculpture (5 units)

Course Description: Basic sculpture techniques using a variety of media. Form in space using cardboard, plaster, and/or cement, wood and/or metal and other media.

Learning Activities: Studio 6 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 007 – Beginning Painting (5 units)

Course Description: Introduction to techniques and concepts in the practice of painting.

Learning Activities: Studio 6 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 008 – Beginning Ceramic Sculpture (5 units)

Course Description: Introduction to ceramic sculpture construction and processes. Large scale hand-building, glazing, kilns and kiln firing technology.

Learning Activities: Studio 6 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 009 – Beginning Photography (5 units)

Course Description: Introduction to visual language of photographic art and technique. Manual camera operation and printing techniques. Concept and practice of photography as an art form and creating photographic projects.

Learning Activities: Studio 6 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 010D – Contemporary Art Appreciation (4 units)

Course Description: Survey of contemporary art since 1960; includes discussion. Explores contemporary thought within the visual arts using forms and strategies of painting, sculpture, installation, performance, photo and video in collaborative, ephemeral and multimedia approaches. For Art and non-Art majors.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ART 010F.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 010F – Contemporary Art Appreciation (4 units)

Course Description: Survey of contemporary art since 1960; includes fieldwork. Explores contemporary thought within the visual arts using forms and strategies of painting, sculpture, installation, performance, photo and video in collaborative, ephemeral and multimedia approaches. For Art and non-Art majors.

Learning Activities: Lecture 3 hour(s), Fieldwork.

Credit Limitation(s): Not open for credit to students who have taken ART 010D.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 011 – Beginning Printmaking (5 units)

Course Description: Introduction to printmaking such as monoprint, intaglio, lithography, relief and digital techniques. Practical methods taught within a workshop environment using art historical and contemporary examples.

Learning Activities: Studio 6 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 012 – Beginning Video (5 units)

Course Description: Production techniques of video shooting, editing, lighting, sound and effects. A conceptual framework for video-art techniques.

Learning Activities: Lecture/Discussion 2 hour(s), Studio 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 024 – Introduction to Experimental Video & Film (4 units)

Course Description: Evolution of moving image technologies. Shifts within avant-garde artistic practices. Conceptual and historical differences between film and video. Relationship of film and video to fine arts.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

ART 030 – Introduction to Contemporary Visual Culture (4 units)

Course Description: Establishing visual literacy across the media of fine art, photography, advertising, television and film; media culture; focus on critical decoding of contemporary visual culture.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Enrollment Restriction(s): Restricted to lower division students.

Grade Mode: Pass/No Pass only.

ART 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ART 101A – Intermediate Painting (5 units)

Course Description: Individualized projects exploring color and space in a variety of subject matter and approaches. Builds on basic skills and concepts from beginning drawing and painting courses. Study of historical and contemporary art in relation to studio practice.

Prerequisite(s): ART 007.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 101B – Intermediate Painting: Figure (5 units)

Course Description: Study of the human figure through the medium of painting with emphasis on development of skill and conceptual awareness.

Prerequisite(s): ART 007.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 101C – Intermediate Painting: Watercolor (5 units)

Course Description: Watercolor as a means of visual expression.

Techniques and medium used in water media.

Prerequisite(s): ART 007.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 101D – Intermediate Painting: Installation (5 units)

Course Description: Expanded fields of painting and installation art in the context of contemporary art practice. Painting's possibilities in relation to space and pushing the boundaries of two-dimensional art.

Prerequisite(s): ART 007.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 101E – Intermediate Painting: Reinterpreting Landscape (5 units)

Course Description: Interpretation of landscape through painting, drawing, and related media. Integration of historical, cultural, natural, and artistic contexts.

Prerequisite(s): ART 007.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 102A – Advanced Painting: Studio Projects (5 units)

Course Description: Sustained development of painting for advanced students. Approaches will vary according to the instructor.

Prerequisite(s): Three courses from ART 101, ART 101A, ART 101B, ART 101C, ART 101D, or ART 101E or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 102C – Advanced Painting: Special Topics (4 units)

Course Description: Special topics in painting for upper division students. Emphasis on development of a personal practice of painting informed by awareness of contemporary issues in painting and their historical background. Topics will vary with instructor.

Prerequisite(s): (ART 002, ART 007, ART 101); (ART 102A or ART 102B).

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 103AN – Intermediate Drawing (5 units)

Course Description: Study of drawing composition using charcoal and ink.

Prerequisite(s): ART 002.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors; students who have completed ART 103A or 103B can take ART 103AN once for credit.

Repeat Credit: May be repeated 1 time(s) when instructor differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 103BN – Intermediate Drawing: Figure (5 units)

Course Description: Study of the human figure through the medium of drawing.

Prerequisite(s): ART 002.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors; students who have completed ART 105B can take ART 103BN once for credit.

Repeat Credit: May be repeated 1 time(s) when instructor differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 103C – Intermediate Drawing: 3 Dimensions (5 units)

Course Description: Study of drawing composition using three dimensional media.

Prerequisite(s): ART 002.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio Major.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 105A – Advanced Drawing: Studio Projects (5 units)

Course Description: Exploration of composition and process in drawing. Emphasis on the role of drawing in contemporary art and on drawing as an interdisciplinary practice.

Prerequisite(s): ART 002; (ART 103A or ART 103B or ART 103C).

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 110A – Intermediate Photography: Black & White Analog (5 units)

Course Description: Introduction to analog black-and-white film photography. Technical instruction in 35mm film camera operation, developing film, making prints in the dark-room. Critical exploration of great works of photography and peer critique. Development of photographic project.

Prerequisite(s): ART 009.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 110B – Intermediate Photography: Digital Imaging (5 units)

Course Description: Introduction to digital photography on screen and paper. Technical demonstrations, workshops, and critique. Development of photographic project.

Prerequisite(s): ART 009.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated for credit 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 110C – Intermediate Photography: Photographic Lighting (5 units)

Course Description: Effects of lighting on photographic image. Ability to read, utilize, modify natural lighting conditions. Studio lighting equipment, and use of photographic studio. Photographic production management.

Prerequisite(s): ART 009; or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 110DA – The Photobook (5 units)

Course Description: History and practice of photographic book. Sequencing, use of text & image, page layout and bookbinding techniques. Development of major photographic project. Includes technical lessons on image correction, digital page layout, and bookbinding techniques.

Prerequisite(s): ART 009; or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 110DB – The Photobook (5 units)

Course Description: Continuation of 110DA. Advanced practice of photographic book. Sequencing, use of text & image, page layout and bookbinding techniques. Development of major photographic project. Topics include cover design and use of non-photographic techniques such as screen printing.

Prerequisite(s): ART 009; ART 110DA; or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 111A – Advanced Photography: Special Topics (5 units)

Course Description: Special topics related to photography and contemporary art practice. Multiple projects in a variety of approaches.

Prerequisite(s): ART 009; (ART 110A or ART 110B).

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One open to Art Studio majors.

Repeat Credit: May be repeated 1 time(s); consent of instructor required for taking the course a second time.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 111B – Advanced Photography: Digital Imaging (5 units)

Course Description: In-depth exploration of digital photography, including refined digital imaging techniques. Theoretical issues involved in digital media.

Prerequisite(s): ART 009; ART 110B.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 112 – Sound for Vision (5 units)

Course Description: Sound composition and development of an audio databank. Study of repetition and phase shifts. Creation of descriptive acoustic space recordings in combination with other artistic media. Audio as stand alone or accompaniment.

Prerequisite(s): ART 012 or CDM 020 or CTS 020.

Learning Activities: Lecture/Discussion 2 hour(s), Studio 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 113 – Interdisciplinary Art (4 units)

Course Description: Experimental interdisciplinary strategies. Use of various media in creation of collaborative or independent works. Production of participatory audio-visual works, installations, or two dimensional explorations.

Prerequisite(s): Upper division standing in Art Studio, Theater and Dance, Design, Technocultural Studies, or Music.

Learning Activities: Studio 6 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 114A – Intermediate Video: Animation (5 units)

Course Description: Exploration of animation as an artistic approach and conceptual platform. Relationship between drawing, digital stills, and moving images through use of drawing techniques.

Prerequisite(s): ART 012 or CTS 020 or CDM 020.

Learning Activities: Lecture/Discussion 2 hour(s), Studio 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 114B – Intermediate Video: Experimental Documentary (5 units)

Course Description: Experimental documentary practice. Use of interviews, voice-overs, and still and moving images. Production of alternative conceptual and visual projects.

Prerequisite(s): ART 012 or CTS 020 or CDM 020.

Learning Activities: Studio 3 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 114C – Intermediate Video: Performance Strategies (5 units)

Course Description: Use of video to expand performance art production. Exploration of improvisation, direction, projection, and image processing in real time.

Prerequisite(s): ART 012 or CTS 020 or CDM 020.

Learning Activities: Lecture/Discussion 2 hour(s), Studio 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 117 – Advanced Video & Electronic Arts (5 units)

Course Description: Independently driven video, digital, and/or performance projects. Further development in the electronic arts ranging from video installation to performance.

Prerequisite(s): ART 012 or CDM 020; (ART 112 or ART 114A or ART 114B or ART 114C or CDM 100 or CDM 104 or CDM 105 or TCS 100 or CDM 101 or TCS 104); upper division standing Art Studio majors.

Learning Activities: Studio 3 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors; upper division standing.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 125A – Intermediate Printmaking: Relief (5 units)

Course Description: Relief printmaking, experimental printing of found surfaces, single-color block printing and reduction woodcut techniques. Development of conceptual and technical progress.

Prerequisite(s): ART 011.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 125B – Intermediate Printmaking: Intaglio (5 units)

Course Description: Intaglio printmaking techniques including copper-plate drypoint, engraving, etching, aquatint. Development of on soft-ground, spit bite and chine-collé. Development of conceptual and technical progress.

Prerequisite(s): ART 011.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 125C – Intermediate Printmaking: Lithography (5 units)

Course Description: Polyester-plate printing. Drawing materials and chemistry for stone or ball-grained plates. Digital processes in photo-platemaking. Development of conceptual and technical progress.

Prerequisite(s): ART 011.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 125D – Intermediate Printmaking: Screenprinting (5 units)

Course Description: Screen printing including the introduction of photo-emulsion, hand stencil making and digital stencil making techniques for screen printing on paper or alternative surfaces. Development of conceptual and technical progress.

Prerequisite(s): ART 011.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 125E – Intermediate Printmaking: Post-Digital Print Media (5 units)

Course Description: Post-digital print media integrating digital forms of image making and print-on-demand technology with established printing processes; screen printing, lithography or intaglio. Development of conceptual and technical progress.

Prerequisite(s): ART 011 D or better.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 129 – Advanced Printmaking (5 units)

Course Description: Advanced printmaking. Further development of intaglio, relief, lithography screen printing and post-digital print media. Study of a body of work that broadens knowledge of one or more methods. Processes integrated in a self-directed project, researched within historic and contemporary printmaking discourse.

Prerequisite(s): ART 011; (ART 125A or ART 125B or ART 125C or ART 125D or ART 125E).

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 138 – The Artist's Book (4 units)

Course Description: Creation of an artist's book in an edition of three. Use of a variety of media.

Prerequisite(s): Completion of three upper division Art Studio (ART) courses.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 142A – Intermediate Ceramic Sculpture: Industrial Production Methods (5 units)

Course Description: Ceramic sculpture creation using two forms of industrial processes: plaster mold design, fabrication and casting; and extrusion with dies, including die fabrication.

Prerequisite(s): ART 008.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 142B – Intermediate Ceramic Sculpture: Material Study (5 units)

Course Description: Study of ceramic materials and processes.

Areas studied include clay and clay bodies; glaze materials through temperature, color and texture; history and technology of kilns and kiln firing. Examination of material properties and characteristics through experimentation.

Prerequisite(s): ART 008.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 142C – Intermediate Ceramic Sculpture: Ceramics & the Painted Surface (5 units)

Course Description: Exploration of the ceramic surface for creative expression. Use of glazing techniques including china paint, decals, luster, and silkscreen with underglaze and overglaze as well as the use of common materials such as epoxy, paint, oil and wax.

Prerequisite(s): ART 008.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 142D – Intermediate Ceramic Sculpture: Special Topics (5 units)

Course Description: Studio work and professional practice practicum. Visit artist's studios, museums and galleries, and attend artist lectures. Both drawings and written journals are kept throughout the term.

Prerequisite(s): ART 008.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 143 – Advanced Ceramic Sculpture: Studio Projects (5 units)

Course Description: Experimentation with all techniques learned in prerequisite ceramics classes. Includes class projects in consultation with faculty.

Prerequisite(s): ART 008; (ART 142A or ART 142B or ART 142C).

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 2 time(s) with consent of instructor required for taking the course a third time.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 147 – Theory & Criticism of Photography (4 units)

Course Description: Development of camera vision, ideas, and aesthetics and their relationship to the fine arts from 1839 to the present.

Prerequisite(s): ART 009.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 148 – Theory & Criticism: Painting & Sculpture (4 units)

Course Description: Study of forms and symbols in historic and contemporary masterpieces.

Prerequisite(s): ART 005 or ART 007 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: AHI 148.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

ART 149 – Introduction to Critical Theory (4 units)

Course Description: Overview of 20th-century critical theories of culture and their relation to visual art and mass media culture.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 150 – Theory & Criticism of Electronic Media (4 units)

Course Description: Study of electronic media, focusing on critique, application, and relationship to art practice. Analysis of the conceptual basis of electronic media as an artistic mode of expression.

Prerequisite(s): ART 024 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

ART 151 – Intermediate Sculpture (5 units)

Course Description: Individualized explorations through multiple projects in a variety of sculpture media and techniques. Builds upon technical skills and concepts covered in ART 005.

Prerequisite(s): ART 005.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 152A – Advanced Sculpture: Studio Projects (5 units)

Course Description: Sculpture for advanced students. Emphasis on concept, idea development and honing technical skills. Approaches and projects will vary according to the instructor.

Prerequisite(s): ART 005; ART 151.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 152B – Advanced Sculpture: Material Explorations (5 units)

Course Description: Primary application and exploration of a single sculpture material chosen by the student. Examination of its properties, qualities, and characteristics for three-dimensional expression.

Prerequisite(s): ART 005; ART 151.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 152C – Advanced Sculpture: Concepts (5 units)

Course Description: Investigation of a specific idea chosen by the class. Relationship of idea to form and content. Individual development of conceptual awareness.

Prerequisite(s): ART 005; ART 151.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 152D – Advanced Sculpture: Metals (5 units)

Course Description: Technical aspects of the use of metals in contemporary art practice. Projects assigned to demonstrate the evolution of concepts and processes.

Prerequisite(s): ART 005; ART 151.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 152E – Advanced Sculpture: Site Specific Public Sculpture (5 units)

Course Description: Place and site specificity in contemporary sculpture. Individual and group work to conceive and fabricate sculpture in a public space.

Prerequisite(s): ART 005; ART 151.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 152F – Advanced Sculpture: Figure (5 units)

Course Description: Exploration of historical and contemporary approaches to the body in three-dimensions. Projects based on observational and conceptual strategies. Variety of media and techniques, including clay, wax, plaster, plastics, found objects, and others.

Prerequisite(s): ART 005; ART 151.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 152G – Advanced Sculpture: The Miniature & Gigantic (5 units)

Course Description: Exploration of scale, from the very small to the very large in a series of projects in a variety of media. Tools and techniques of enlargement and miniaturization.

Prerequisite(s): ART 005; ART 151.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 171 – Mexican & Chicano Mural Workshop (4 units)

Course Description: The Mural: a collective art process that empowers students and people through design and execution of mural paintings in the tradition of the Mexican Mural Movement; introduces materials and techniques.

Prerequisite(s): CHI 070; and consent of instructor.

Learning Activities: Studio 8 hour(s), Independent Study 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Cross Listing: CHI 171.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 190 – Seminar in Art Practice (4 units)

Course Description: Introduction to professional practices. Development of an artist's packet including a resume, cover letter, artist statement, and statement of purpose. Ongoing independent studio work with group critiques. Research on galleries and museums, and readings in contemporary theory and criticism.

Prerequisite(s): Upper division standing Art Studio major and completion of two upper division ART classes.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Art Studio majors.

Repeat Credit: May be repeated 1 time(s) when instructor differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ART 192 – Internship (2-12 units)

Course Description: Supervised program of internships in artists' studios and at professional art institutions such as museums, galleries, and art archives including collections of slides and photographs.

Learning Activities: Internship.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

ART 195 – Expanded Field: Artist Lecture Series (1 unit)

Course Description: Exploration of the expanded field of practice, theory and criticism in the visual arts. Presentations and discussions with professional practitioners in the field.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Repeat Credit: May be repeated 12 unit(s) when topic differs.

Grade Mode: Pass/No Pass only.

ART 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Enrollment Restriction(s): Restricted to lower division students.

Grade Mode: Pass/No Pass only.

ART 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ART 220 – Research Methods for Artists (4 units)

Course Description: Research methods for artists through critical reading and writing, studio practice, presentations, site-visits, and professional engagement related to the field of visual art.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 221A – Critical Exploration & Collaboration (4 units)

Course Description: During the first year of study, MFA graduate students take the Critical Exploration & Collaboration seminar. Explore and analyze a range of subjects in contemporary art and begin to define their relationship to these ideas through speaking, writing, research and presentation in ways that are relevant to their own art practice.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

ART 221B – Advanced Critical Exploration & Collaboration (4 units)

Course Description: Advanced course for second-year graduate students. Explore and analyze a range of subjects in contemporary art and begin to define their relationship to these ideas through speaking, writing, research and presentation in ways that are relevant to their own art practice.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 223 – Concepts & Critique (4 units)

Course Description: Focuses on research methods for artists through critical reading and writing, studio practice, presentations, site-visits, and professional engagement related to the field of visual art. Faculty-moderated group critique course to develop a sense of the theoretical foundations and implications of the work of each of the participants through class analysis and extended discussion.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 224 – Theory & Concepts on Critical Issues in Contemporary Art (4 units)

Course Description: Critical and conceptual foundations for graduate students. Political, social and cultural questions as they relate to the production and reception of art. Contemporary theories to develop verbal and analytical skills.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 225 – Professional Practice in Contemporary Art (4 units)

Course Description: Fluctuating critical and cultural environment of the professional art world. New strategies to support the social and philosophical networks and frameworks that inform contemporary cultural production. Emphasis on new esthetics concepts, practices and technologies.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 226 – Exhibition Strategy & Thesis Seminar (4 units)

Course Description: Completion of a body of work and development of a thesis show. Curation, design, installation, documentation, contributing to catalog content and design, and promoting work in a public forum.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 227 – Collaboration & Interdisciplinarity (4 units)

Course Description: Explores methodologies in practice with emphasis on collaboration and interdisciplinarity. Artistic production and directed research supporting the development of site. Work across artistic mediums, academic disciplines, and social concerns.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 290 – Seminar (4 units)

Course Description: Original works produced for group discussion and criticism; associated topics of a contemporary and historical nature.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ART 290A – Critical Discourse in Contemporary Art (4 units)

Course Description: Critical discourse in contemporary art and application to practice. Exploration of concerns in broader artistic and contemporary context. How artists look to shift prevalent expectations through critical analysis.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 290B – Critical Discourse in Studio Practice (4 units)

Course Description: Advanced course for second-year graduate students. Critical discussion and contemporary readings pertinent to studio practice and artwork, including video, installation, photography, interactive arts, performance, sculpture, painting, printmaking, ceramics, sound, and all other mediums.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 290C – Critical Discourse in Materiality (4 units)

Course Description: Mid-year study focusing on individual work in the studio. Explores mediums, techniques, skill building, resourcing and problem solving. Defining the artists relationship to topics in contemporary art through speaking, writing, research and presentation.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only, or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 290D – Critical Discourse in Context (4 units)

Course Description: Advanced course for second-year Graduate students. Discussion of social, political, cultural, and economic issues in a constantly changing world. How contemporary art practice are affected by global issues.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only; or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 290E – Critical Discourse on Media (4 units)

Course Description: Critical discussion and contemporary readings pertinent to artwork that uses digital media including video, installation, photography, interactive arts, performance, sculpture, painting, printmaking, ceramics, sound, and all other mediums.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only; or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 290F – Critical Discourse in Presentation (4 units)

Course Description: For second-year graduate students. Study focuses on individual performance work. Exploration extends into other mediums, techniques for props or sites, tapping the resources of peers, problem solving with the intention to deepen understanding and engagement with an audience. Exploration and analysis of subjects in cont. art and begin to define their relationship to these ideas through speaking, writing, research and presentation in ways that are relevant to their performance art practice.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Art Studio graduate students only; or with prior written consent of faculty member.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

ART 291 – Seminar: Critical Evaluation (1 unit)

Course Description: Seminar in critical evaluation.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ART 292 – Seminar: Comprehensive Qualifying (1 unit)

Course Description: Further critical evaluation of the student's work to determine his eligibility to begin the Comprehensive Project.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ART 299 – Individual Study (1-12 units)

Course Description: Individual study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ART 299D – Comprehensive Project (1-12 units)

Course Description: An original body of work accompanied by a catalog summarizing the student's aesthetic position.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ART 401 – Museum Training: Curatorial Principles (4 units)

Course Description: Approved for graduate degree credit. Study of private and public collections. Museum personalities. Appraisal of works of art; ethics of appraisal. Auction and sales: methods and catalogues. Registration. Technical problems of the museum. Connoisseurship. Collateral reading. Visits to museums.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

ART 402 – Museum Training: Exhibition Methods (4 units)

Course Description: Approved for graduate degree credit. History of exhibition methods in private and public collections. Comparisons of different types of museums and their exhibition problems. Lighting and techniques of display with emphasis on actual design. Experimentation with unusual presentation forms.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

Asian American Studies (ASA)

College of Letters & Science

ASA 001 – Historical Experience of Asian Americans (4 units)

Course Description: Introduction to Asian American Studies through an overview of the history of Asians in America from the 1840s to the present within the context of the development of the United States.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

ASA 002 – Contemporary Issues of Asian Americans (4 units)

Course Description: Introduction to Asian American Studies through the critical analysis of the impact of race, racism, ethnicity, imperialism, militarism, and immigration since post-World War II on Asian Americans. Topics may include sexuality, criminality, class, hate crimes, and inter-ethnic relations.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

ASA 003 – Methods in Asian American Studies (4 units)

Course Description: Diverse research methods used in the multidisciplinary field of Asian American studies and research by department faculty. Application of methods to case studies of Asian American communities and issues. Methods include: historical/ archival research, literary analysis, feminist methods, media analysis, visual critique, ethnography, interviews, community-engaged research, and quantitative methods. Faculty guest lectures on relevant scholarship and their own research.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH), Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

ASA 004 – Asian American Cultural Studies (4 units)

Course Description: Interdisciplinary course examines the multiple ways in which race, class, sexuality and gender, as well as the recent turn to transnationalism and postcolonial theory, have changed the ways we read Asian American literature and see art, theater and film.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

ASA 092 – Internship (1-3 units)

Course Description: Supervised internship in community and institutional settings related to Asian American concerns.

Prerequisite(s): Consent of instructor; enrollment dependent on availability of intern positions.

Learning Activities: Internship 3-9 hour(s).

Grade Mode: Pass/No Pass only.

ASA 098 – Directed Group Study (1-5 units)

Course Description: Primarily intended for lower division students.

Learning Activities: Lecture 1-5 hour(s).

Grade Mode: Pass/No Pass only.

ASA 098F – Student Facilitated Course (1-4 units)

Course Description: Student-facilitated (taught) course intended for lower division students.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ASA 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable 3-15 hour(s).

Grade Mode: Pass/No Pass only.

ASA 100 – Asian American Communities (4 units)

Course Description: Survey and analysis of Asian American communities within both historical and contemporary contexts. Presentation of the analytical skills, theories, and concepts needed to describe, explain, and understand the diversity of Asian American communities within the larger, dominant society.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

ASA 102 – Theoretical Perspective in Asian American Studies (4 units)

Course Description: Critically examines major theoretical perspectives and approaches central to the intellectual and political concerns of Asian American studies as a distinct field of intellectual inquiry and sustained site of critique.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

ASA 112 – Asian American Women (4 units)

Course Description: Experiences of Asian American women from major ethnic subgroups comparatively examined in their social, economic and historical contexts using theoretical perspectives from social sciences, humanities/arts: identity, racialization, immigration, gender, sexuality, labor, socialization, cultural expression, social movements and feminist theorizing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

ASA 113 – Asian American Sexuality (4 units)

Course Description: Restrictive U.S. immigration laws, labor exploitation, race-based exclusionary laws, removal and internment, anti-miscegenation laws, and other examples of social control are surveyed to assess their role in shaping the sexuality of the different Asian American groups.

Learning Activities: Discussion/Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

ASA 114 – Asian Diasporas (4 units)

Course Description: Asian diasporic communities and the experiences of its members in the United States and internationally. Community building, cyberspace, gender issues, labor, transnational practices, effects of globalization, political organizing, homeland politics, humanitarian projects, citizenship and nationalism.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC).

ASA 115 – Multiracial Asian Pacific American Issues (4 units)

Course Description: Introduction to the experiences of biracial and multiracial Asian Pacific people in the U.S., concentrating on theories of race, racial identity formation, culture, media, and anti-racist struggles. Critical approaches to the analysis of popular media and academic representations.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

ASA 116 – Asian American Youth (4 units)

Course Description: Social experiences of diverse groups of Asian American youth. Ways in which youth themselves actively create cultural expressions and political interventions.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

ASA 121 – Asian American Performance (4 units)

Course Description: Performance work by, for, and/or about Asian Pacific Americans including dramatic literature, performance art, dance, and film. Ethnicity, gender and sexuality, class and age as they intersect with Asian Pacific American identities in and through dramatic performance.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

ASA 130 – Asian American Literature (4 units)

Course Description: Works of Asian American literature by writers from the major ethnic subgroups, examined in their social, economic and historical contexts. Intertextual analysis of their thematic and formal elements to form an understanding of Asian American literary traditions.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

ASA 131 – Ethnicity, Culture, & the Self (4 units)

Course Description: Cultural and social psychological influences on Asian Americans focusing on the individual.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

ASA 132 – Health Issues Confronting Asian Americans & Pacific Islanders (4 units)

Course Description: Health issues confronting Asian Americans & Pacific Islanders.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: SPH 132.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ASA 141 – Asian Americans & the Political Culture of Fashion in the U.S. & Asia (4 units)

Course Description: Historical, cultural and sociopolitical development of fashion in Asia and the U.S. as it relates to the Asian Diasporas. Specific aspects of material culture: textiles, clothing and fashion.

Learning Activities: Lecture/Discussion 4 hour(s), Term Paper, Project.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

ASA 150 – Filipino American Experience (4 units)

Course Description: Examination of the relationship between the Filipino-American community, the Philippine home community and the larger American society through a critical evaluation of the historical and contemporary conditions, problems and prospects of Filipinos in the U.S.

Learning Activities: Discussion/Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC).

ASA 150B – Japanese American Experience (4 units)

Course Description: Different analytical approaches to understand Japanese American history, culture and society.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

ASA 150C – Chinese American Experience (4 units)

Course Description: Survey of the historical and contemporary experiences of Chinese in the United States, starting with the gold rush era and concluding with the present-day phenomenon of Chinese transnational movement to the United States and its diasporic significance.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC).

ASA 150D – Korean American Experience (4 units)

Course Description: Interdisciplinary survey of the historical and contemporary experiences of Koreans in the United States from the late-19th century to the present.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC).

ASA 150E – Southeast Asian American Experience (4 units)

Course Description: Historical survey of Southeast Asian experiences with special focus on United States involvement and post 1975 migrations. Defines international and transnational conditions that led up to the large exodus and resettlement of Southeast Asians.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

ASA 150F – South Asian American History, Culture, & Politics (4 units)

Course Description: South Asian American experiences, focusing on the histories, cultures, and politics of Indian, Pakistani, Bangladeshi, and Sri Lankan communities in the U.S. Interdisciplinary approaches to migration, labor, gender, racialization, ethnicity, youth, community mobilization.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

ASA 155 – Asian American Legal History (4 units)

Course Description: Legal history of Asian Americans, from the mid-19th century to present. Laws and administrative policies affecting Asian American communities, including those governing immigration, social and economic participation, WWII internment, and affirmative action.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

ASA 189A – Topics in Asian American Studies: History (4 units)

Course Description: Intensive treatment of a topic in Asian American Studies; history.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC).

ASA 189B – Topics in Asian American Studies: Culture (4 units)

Course Description: Intensive treatment of a topic in Asian American Studies; culture.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

ASA 189C – Topics in Asian American Studies: Physical & Mental Health (4 units)

Course Description: Intensive treatment of a topic in Asian American Studies; physical and mental health.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ASA 189D – Topics in Asian American Studies: Policy & Community (4 units)

Course Description: Intensive treatment of a topic in Asian American Studies: policy and community.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

ASA 189E – Topics in Asian American Studies: Comparative Racial Studies (4 units)

Course Description: Intensive treatment of a topic in Asian American Studies: comparative racial studies.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

ASA 189F – Topics in Asian American Studies: Asian Studies & Asian American Studies (4 units)

Course Description: Intensive treatment of a topic in Asian American Studies: asian studies and asian american studies.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ASA 189G – Topics in Asian American Studies: Race, Class, Gender, & Sexuality (4 units)

Course Description: Intensive treatment of a topic in Asian American Studies: race, class, gender, and sexuality.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ASA 189H – Topics in Asian American Studies: Society & Institutions (4 units)

Course Description: Intensive treatment of a topic in Asian American Studies: society and institutions.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

ASA 189I – Topics in Asian American Studies: Politics & Social Movements (4 units)

Course Description: Intensive treatment of a topic in Asian American Studies: politics and social movements.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

ASA 192 – Internships (1-5 units)

Course Description: Supervised internship in community and institutional settings related to Asian American concerns.

Prerequisite(s): Consent of instructor; enrollment dependent on availability of intern position with priority to Asian American Studies minors; consent of instructor.

Learning Activities: Internship 3-15 hour(s).

Grade Mode: Pass/No Pass only.

ASA 194 – Asian American Studies Capstone Course (4 units)

Course Description: Synthesis of the approaches and methods learned by students in Asian American Studies and development of specialization in their areas of interest. Development of a research proposal for thesis project.

Learning Activities: Lecture/Discussion 4 hour(s), Project, Extensive Writing.

Enrollment Restriction(s): Open to junior or senior level standing in Asian American Studies or consent of instructor.

Grade Mode: Letter.

ASA 195 – Asian American Studies Senior Thesis Seminar (4 units)

Course Description: Synthesis of the approaches and methods learned in Asian American Studies. Production of an original research paper on a topic of student's interest, building on the research proposal submitted in the capstone seminar.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing, Project.

Enrollment Restriction(s): Restricted to junior and senior level standing in Asian American Studies. Completion of ASA 194 required.

Grade Mode: Letter.

ASA 197T – Tutoring in Asian American Studies (1-5 units)

Course Description: Tutoring in lower division Asian American Studies courses in small group discussion. Weekly meetings with instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated 1 time(s) for a given course and also for a different course.

Grade Mode: Pass/No Pass only.

ASA 198 – Directed Group Study (1-5 units)

Course Description: Primarily intended for upper division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s).

Grade Mode: Pass/No Pass only.

ASA 198F – Student Facilitated Course (1-4 units)

Course Description: Student-facilitated (taught) course intended for upper division students.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ASA 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

ASA 199FA – Student Facilitated Course Development (1-4 units)

Course Description: Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 098F/198F.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ASA 199FB – Student Facilitated Teaching (1-4 units)

Course Description: Student facilitated. Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F.

Prerequisite(s): ASA 199FA.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

Astronomy (AST)

College of Letters & Science

AST 010C – Introduction to Cosmology (3 units)

Course Description: Introduction to the fundamentals of modern cosmology, humanity's changing view of the Universe, and our current understanding of its origin and evolution.

Prerequisite(s): High school algebra.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed any quarter of the PHY 009 series or the PHY 009H series, or any upper-division physics course.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

AST 010G – Introduction to Stars, Galaxies, & the Universe (3 units)

Course Description: Non-mathematical introduction to astrophysics of the Universe beyond our solar system using concepts of modern physics.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken AST 002, the former AST 010, any quarter of PHY 009 or PHY 009H, or any upper division physics course (other than PHY 137 or PHY 160).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

AST 010L – Observational Astronomy Lab (1 unit)

Course Description: Introduction to observations of the night sky using small telescopes in nighttime laboratory.

Learning Activities: Laboratory 2.50 hour(s).

Credit Limitation(s): Not open for credit to students who have taken AST 002 or AST 010.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

AST 010S – Astronomy of the Solar System (3 units)

Course Description: Introduction to naked eye and telescopic observations of events in the night sky: positions of sun, moon, planets throughout the year. Historical perspective on how our understanding of the solar system evolved to current non-mathematical astrophysical interpretation of planetary systems.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken AST 002, any quarter of PHY 009 or PHY 009H, or any upper division PHY course (other than PHY 137 or PHY 160).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

AST 025 – Introduction to Modern Astronomy & Astrophysics (4 units)

Course Description: Description and interpretation of astronomical phenomena using the laws of modern physics and observations by modern astronomical instruments. Gravity, relativity, electromagnetic radiation, atomic and nuclear processes in relation to the structure and evolution of stars, galaxies and the universe.

Prerequisite(s): Good facility in high school physics and mathematics (algebra and trigonometry).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2.50 hour(s).

Credit Limitation(s): Not open to students who have received credit for AST 002, AST 010G, or AST 010L.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

Atmospheric Science (ATM)

College of Agricultural & Environmental Sciences

ATM 005 – Global Climate Change (3 units)

Course Description: Scientific concepts needed to understand climate and climate change. Principles of regional variations in climate. Understanding observed seasonal, decadal and millennial changes. Analysis of the Antarctic ozone hole, El Nino and human-induced global warming.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ATM 006 – Fundamentals of Atmospheric Pollution (3 units)

Course Description: Effects of human emissions on the atmosphere: smog, ozone pollution, and ozone depletion; indoor air pollution; global warming; acid rain. Impacts of these problems on the earth, ecosystems, and humans. Strategies to reduce atmospheric pollution.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

ATM 010 – Severe & Unusual Weather (3 units)

Course Description: Introduction to physical principles of severe and unusual weather: flood, blizzards, thunderstorms, lightning, tornadoes, and hurricanes. Emphasis on scientific perspective and human context. Not open to students who have received credit for ATM 100. (Former ATM 100.)

Prerequisite(s): High school physics.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ATM 060 – Introduction to Atmospheric Science (4 units)

Course Description: Fundamental principles of the physics, chemistry, and fluid dynamics underlying weather and climate. Solar radiation, the greenhouse effect, and the thermal budget of the Earth. Clouds and their formation, convection, precipitation, mid-latitude storm systems.

Prerequisite(s): (MAT 016A or MAT 021A); (PHY 007A or PHY 009A).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ATM 092 – Atmospheric Science Internship (1-12 units)

Course Description: Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

ATM 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ATM 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ATM 110 – Weather Observation & Analysis (4 units)

Course Description: Acquisition, distribution and analysis of meteorological data. Vertical sounding analysis, stability indices, probability of local severe weather, weather map analysis. Use of National Weather Service analyses and forecast products. Laboratory makes use of computer-generated analyses.

Prerequisite(s): ATM 060.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Visual Literacy (VL).

ATM 111 – Weather Analysis & Prediction (3 units)

Course Description: Tools for analyzing observed properties of mid-latitude weather systems. The analysis-forecast system, including various weather forecast models. General structure and properties of mid-latitude weather systems.

Prerequisite(s): ATM 110; ATM 121B; (ATM 111L (can be concurrent) or ATM 111LY (can be concurrent)); knowledge of a programming language.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ATM 111LY – Weather Analysis & Prediction Laboratory (2 units)

Course Description: Subjective and objective analysis of weather data. Web-based learning of the analysis-forecast system and various weather forecasting situations. Weather map interpretation and forecast discussions.

Prerequisite(s): ATM 111 (can be concurrent).

Learning Activities: Laboratory 2 hour(s), Web Virtual Lecture 4 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Visual Literacy (VL).

ATM 112 – Weather Forecasting Practice (2 units)

Course Description: Formal practice in preparing local weather forecasts. Analysis of current weather conditions and recent model performance. Verification and discussion of prior forecast. Interpretation of current forecast model guidance. Posting of forecast.

Prerequisite(s): ATM 110.

Learning Activities: Discussion 2 hour(s), Laboratory 1 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

ATM 115 – Hydroclimatology (3 units)

Course Description: Examination of climate as the forcing function for the hydrologic system. Emphasis on seasonal variations in the relationship between precipitation and evapotranspiration for meso-scale areas. Watershed modeling of floods and drought for evaluating the effects of climatic fluctuations.

Prerequisite(s): ATM 060.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ATM 116 – Modern Climate Change (3 units)

Course Description: Factors that determine the Earth's climate, including natural and human-caused changes. Impacts of climate change. Possible future climates and policies to reduce human emissions of greenhouse gases.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ATM 120 – Atmospheric Thermodynamics & Cloud Physics (4 units)

Course Description: Atmospheric composition and structure, thermodynamics of atmospheric gases, thermal properties of dry and moist air, atmospheric stability; cloud nucleation, cloud growth by condensation and collision, cloud models.

Prerequisite(s): MAT 021C; PHY 009B; ATM 060 (can be concurrent).

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ATM 121A – Atmospheric Dynamics (4 units)

Course Description: Fundamental forces of atmospheric flow; noninertial reference frames; development of the equations of motion for rotating stratified atmospheres; isobaric and natural coordinate systems; geostrophic flow; thermal wind; circulation and vorticity.

Prerequisite(s): ATM 120; MAT 021D; PHY 009B.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ATM 121B – Atmospheric Dynamics (4 units)

Course Description: Dynamics of fluid motion in geophysical systems; quasi-geostrophic theory; fundamentals of wave propagation in fluids; Rossby waves; gravity waves; fundamentals of hydrodynamic instability; two-level model; baroclinic instability and cyclogenesis.

Prerequisite(s): ATM 121A.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ATM 124 – Meteorological Instruments & Observations (3 units)

Course Description: Modern meteorological instruments and their use in meteorological observations and measurements. Both standard and micrometeorological instruments are included.

Prerequisite(s): ATM 060.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ATM 128 – Radiation & Satellite Meteorology (4 units)

Course Description: Concepts of atmospheric radiation and the use of satellites in remote sensing. Emphasis on the modification of solar and infrared radiation by the atmosphere. Estimation from satellite data of atmospheric variables such as temperatures and cloudiness.

Prerequisite(s): ATM 060; PHY 009B; MAT 022B; MAT 021D.

Learning Activities: Discussion/Laboratory 3 hour(s), Extensive Problem Solving 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ATM 133 – Biometeorology (4 units)

Course Description: Atmospheric and biological interactions. Physical and biological basis for water vapor, carbon dioxide and energy exchanges with the atmosphere associated with plants and animals, including humans. Microclimate of plant canopies and microclimatic modification such as frost protection and windbreaks.

Prerequisite(s): MAT 016B; one course in a biological discipline or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ATM 149N – Air Pollution (4 units)

Course Description: Physical and technical aspects of air pollution. Factors that determine local, regional, and global air quality; climate change; and physical and chemical properties of pollutants.

Prerequisite(s): MAT 021D; (MAT 022B or MAT 027B); CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better).

Learning Activities: Discussion 1 hour(s), Lecture 3 hour(s).

Cross Listing: ECI 149N.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ATM 150 – Introduction to Computer Methods in Physical Sciences (4 units)

Course Description: Computational techniques used in physical sciences. Integral and differential equation numerical solution: mainly finite differencing and spectral (Fourier transform) methods. Time series applications (time-permitting). Specific applications drawn from meteorology. Accelerated introduction to FORTRAN including programming assignments.

Prerequisite(s): MAT 022B; PHY 009B; computer programming course such as ECS 030; additional courses in fluid dynamics (ATM 121A or ENG 103) and in Fourier transforms (MAT 118C or PHY 104A) helpful but not required.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Enrollment limited to 12, preference to Atmospheric Science majors.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ATM 158 – Boundary-Layer Meteorology (4 units)

Course Description: Dynamics of the atmosphere nearest the Earth's surface. Friction and heat transfer. Properties of turbulent flows; statistical and spectral techniques; use and interpretation of differential equations. Emphasis on the importance to weather, air pollution, and the world's oceans.

Prerequisite(s): ATM 121A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ATM 160 – Introduction to Atmospheric Chemistry (4 units)

Course Description: Quantitative examination of current local, regional and global problems in atmospheric chemistry (including photochemical smog, acid deposition, climate change, and stratospheric ozone depletion) using fundamental concepts from chemistry. Basic chemical modeling of atmospheric reaction systems.

Prerequisite(s): CHE 002B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ATM 192 – Atmospheric Science Internship (1-12 units)

Course Description: Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty.

Prerequisite(s): Consent of instructor. Completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

ATM 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; three upper division units in Atmospheric Science.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ATM 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor; three upper division units in Atmospheric Science and at least an overall B average.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ATM 215 – Advanced Hydroclimatology (3 units)

Course Description: Theoretical and applied aspects of energy and mass fluxes linking the earth's surface, atmosphere, and hydrologic system. Emphasis on regional scale analysis and modeling, spatial data representation, and climate change influences on precipitation and its hydroclimatic expression.

Prerequisite(s): ATM 115.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ATM 221 – Advanced Atmospheric Dynamics (3 units)

Course Description: Conditions for instability in stratified atmospheres; baroclinic instability; forced topographic Rossby Waves; wave-mean flow interaction theory; tropical dynamics; stratospheric dynamics.

Prerequisite(s): ATM 121B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ATM 223 – Advanced Boundary-Layer Meteorology (3 units)

Course Description: Characteristics of the atmospheric boundary layer under convective and nocturnal conditions. Heat budget at the surface and boundary layer forcing. Similarity theory and scaling of the boundary layer. Measurement and simulation techniques.

Prerequisite(s): ATM 230.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ATM 230 – Atmospheric Turbulence (3 units)

Course Description: Dynamics and energetics of turbulence in the atmosphere including vorticity dynamics. Statistical description of turbulence; Eulerian and Lagrangian scales, spectral analysis, conditional sampling techniques. Turbulent diffusion; the closure problem, gradient-diffusion and second-order methods.

Prerequisite(s): ATM 121B or ATM 158.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ATM 231 – Advanced Air Pollution Meteorology (3 units)

Course Description: Processes determining transport and diffusion of primary and secondary pollutants. Models of chemical transformation, of the atmospheric boundary layer and of mesoscale wind fields, as applicable to pollutant dispersion problems.

Prerequisite(s): ATM 160; ATM 149A; course in fluid dynamics.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ATM 233 – Advanced Biometeorology (3 units)

Course Description: Current topics in biometeorology. Physical and biological basis for water vapor, other gases, and energy exchange with the atmosphere. Topics include modeling and measuring turbulent transport from plant canopies, surface temperatures and energy budgets, bio-aerosol physics and aerobiology.

Prerequisite(s): ATM 133; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

ATM 240 – General Circulation of the Atmosphere (4 units)

Course Description: Large-scale, observed atmospheric properties. Radiation, momentum, and energy balances derived and compared with observations. Lectures and homework synthesize observations and theories, then apply them to understand the large-scale circulations.

Prerequisite(s): ATM 121B.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

ATM 241 – Climate Dynamics (3 units)

Course Description: Dynamics of large-scale climatic variations over time periods from weeks to centuries. Description of the appropriate methods of analysis of atmospheric and oceanic observations. Conservation of mass, energy and momentum. Introduction to the range of climate simulations.

Prerequisite(s): ATM 121B.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

ATM 244 – Cloud & Precipitation Physics (3 units)

Course Description: Observations and modeling of clouds and precipitation. Physics and parameterization of cloud microphysical processes including nucleation, condensation/evaporation, deposition/sublimation, collision-coalescence and sedimentation.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to Atmospheric Science graduate group students or consent of instructor.

Grade Mode: Letter.

ATM 245 – Climate Change, Water & Society (4 units)

This version has ended; see updated course, below.

Course Description: Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Limited to 25 students.

Cross Listing: HYD 245, ECL 245.

Grade Mode: Letter.

ATM 245 – Climate Change Science & Impacts (4 units)

Course Description: Overview of climate change science with a focus on climate change communication. Impacts of climate change on water, agriculture, energy, health, infrastructure, ecosystem services, tribal and indigenous communities. Climate justice, political, societal, and economic dimensions of these issues.

Learning Activities: Lecture 3 hour(s), Project.

Cross Listing: HYD 245, ECL 245.

Grade Mode: Letter.

This course version is effective from, and including: Fall Quarter 2024.

ATM 250 – Meso-Scale Meteorology (3 units)

Course Description: The study of weather phenomena with horizontal spatial dimensions between 2.5 and 2500 kilometers. Methods of observational study and numerical modeling of the structure and temporal behavior of these weather systems.

Prerequisite(s): ATM 150; graduate standing; course in partial differential equations or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ATM 255 – Numerical Modeling of the Atmosphere (4 units)

Course Description: Principles of numerical modeling of the dynamic, thermodynamic and physical processes of the atmosphere. Hands-on experiments on model development using the shallow water equations and the primitive equations. Operational forecast models.

Prerequisite(s): ATM 121B; ENG 005; ATM 150 recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

ATM 260 – Atmospheric Chemistry (3 units)

Course Description: Chemistry and photochemistry in tropospheric condensed phases (fog, cloud, and rain drops and aerosol particles). Gas-drop and gas-particle partitioning of compounds and effects of reactions in condensed phases on the fates and transformations of tropospheric chemical species.

Prerequisite(s): ATM 160.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ATM 265 – The Art of Climate Modeling (4 units)

Course Description: Over the past fifty years, global models have given us incredible insight into the Earth system. Provides an introduction to these models, with a focus on their design and the science questions they have been built to address.

Prerequisite(s): ATM 121A.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

ATM 270A – Topics in Atmospheric Science: Meteorological Statistics (1-3 units)

Course Description: Applications and concepts in meteorological statistics.

Learning Activities: Discussion 1-3 hour(s).

Grade Mode: Letter.

ATM 270B – Topics in Atmospheric Science: Computer Modeling of the Atmosphere (1-3 units)

Course Description: Applications and concepts in computer modeling of the atmosphere.

Learning Activities: Discussion 1-3 hour(s).

Grade Mode: Letter.

ATM 270C – Topics in Atmospheric Science: Design of Experiments & Field Studies in Meteorology (1-3 units)

Course Description: Applications and concepts in design of experiments and field studies in meteorology.

Learning Activities: Discussion 1-3 hour(s).

Grade Mode: Letter.

ATM 270D – Topics in Atmospheric Science: Solar & Infrared Radiation in the Atmosphere (1-3 units)

Course Description: Applications and concepts in solar and infrared radiation in the atmosphere.

Learning Activities: Discussion 1-3 hour(s).

Grade Mode: Letter.

ATM 270E – Topics in Atmospheric Science: Aerosol & Cloud Physics (1-3 units)

Course Description: Applications and concepts in aerosol and cloud physics.

Learning Activities: Discussion 1-3 hour(s).

Grade Mode: Letter.

ATM 270F – Topics in Atmospheric Science: Atmospheric Chemistry (1-3 units)

Course Description: Applications and concepts in atmospheric chemistry.

Learning Activities: Discussion 1-3 hour(s).

Grade Mode: Letter.

ATM 270G – Topics in Atmospheric Science: General Meteorology (1-3 units)

Course Description: Applications and concepts in general meteorology.

Learning Activities: Discussion 1-3 hour(s).

Grade Mode: Letter.

ATM 280A – Air Quality Policy in the Real World (4 units)

Course Description: In-depth investigation of an air quality problem with a team and mentor from government or industry. Science, engineering and policy will be involved. Findings will be presented orally and in writing.

Prerequisite(s): (ATM 149 or ECI 149); ECI 242; consent of instructor, or equivalent of ECI 242.

Learning Activities: Project.

Grade Mode: Letter.

ATM 280B – Air Quality Policy in the Real World (4 units)

Course Description: In-depth investigation of an air quality problem with a team and mentor from government or industry. Science, engineering and policy will be involved. Findings will be presented orally and in writing.

Prerequisite(s): ATM 280A; and consent of instructor.

Learning Activities: Project.

Grade Mode: Letter.

ATM 290 – Seminar (1 unit)

Course Description: Current developments in selected areas of atmospheric research. Topics will vary according to student and faculty interests.

Prerequisite(s): Graduate standing in Atmospheric Science or related field.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ATM 291A – Research Conference in Atmospheric Science: Air Quality Meteorology (1-3 units)

Course Description: Review and discussion of current literature and research in Air Quality Meteorology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1-3 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ATM 291B – Research Conference in Atmospheric Science: Biometeorology (1-3 units)

Course Description: Review and discussion of current literature and research in Biometeorology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1-3 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ATM 291C – Research Conference in Atmospheric Science: Boundary Layer Meteorology (1-3 units)

Course Description: Review and discussion of current literature and research in Boundary Layer Meteorology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1-3 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ATM 291D – Research Conference in Atmospheric Science: Climate Change (1-3 units)

Course Description: Review and discussion of current literature and research in Climate Change.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1-3 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ATM 291E – Research Conference in Atmospheric Science: General Meteorology (1-3 units)

Course Description: Review and discussion of current literature and research in General Meteorology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1-3 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ATM 291F – Research Conference in Atmospheric Science: Atmospheric Chemistry (1-3 units)

Course Description: Review and discussion of current literature and research in Atmospheric Chemistry.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1-3 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ATM 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ATM 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ATM 393 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ATM 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Avian Sciences (AVS)

College of Agricultural & Environmental Sciences

AVS 011 – Introduction to Poultry Science (3 units)

Course Description: The mosaic of events that have tied poultry science to other scientific disciplines and poultry to humans. Poultry science techniques and production methods from the time of domestication to the present. One field trip required.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 013 – Birds, Humans & the Environment (3 units)

Course Description: Interrelationships of the worlds of birds and humans. Lectures, discussions, field trips and projects focus on ecology, avian evolution, physiology, reproduction, flight, behavior, folklore, identification, ecotoxicology and conservation. Current environmental issues are emphasized. Half-day field trip.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to students with lower division standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 014L – Management of Captive Birds (2 units)

Course Description: One weekly discussion and field trip to study practical captive management (housing, feeding, equipment, marketing, diseases). Visit facilities rearing birds such as commercial parrots, hobbyist exotics, ostrich, raptors, waterfowl, game birds, poultry and pigeons.

Prerequisite(s): Consent of instructor.

Learning Activities: Fieldwork 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 015L – Captive Raptor Management (2 units)

Course Description: Hands-on experience handling birds of prey. Students are taught all of the skills required to handle and care for raptors, including husbandry, biology, habitat requirements, cage design, veterinary care, rehabilitation methods, research potential and long-term care requirements. One Saturday fieldtrip.

Learning Activities: Laboratory 3 hour(s), Independent Study 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 016LA – Raptor Migration & Population Fluctuations (2 units)

Course Description: Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip.

Prerequisite(s): Consent of instructor.

Learning Activities: Fieldwork 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 016LB – Raptor Migration & Population Fluctuations (2 units)

Course Description: Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip.

Prerequisite(s): Consent of instructor.

Learning Activities: Fieldwork 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 016LC – Raptor Migration & Population Fluctuations (2 units)

Course Description: Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip.

Prerequisite(s): Consent of instructor.

Learning Activities: Fieldwork 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 092 – Internship in the Avian Sciences (1-12 units)

Course Description: Internship on and off campus in poultry, game birds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval form essential.

Prerequisite(s): Consent of instructor. Sophomore standing preferred.

Learning Activities: Variable 3-36 hour(s).

Grade Mode: Pass/No Pass only.

AVS 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AVS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

AVS 100 – Avian Biology (3 units)

Course Description: Biology of domesticated poultry, specifically chickens and turkeys. Avian genetics, immunology, reproduction, growth and development, broiler and layer management.

Prerequisite(s): BIS 002A; BIS 002B; ANS 002 preferred.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 103 – Avian Development & Genomics (3 units)

Course Description: Unique features of avian development and genomics: Incubation; Staging; Egg Structure/Function; Fertilization; Pre-oviposital; Oviposition, Cold Torpor; Post-oviposital Development; Organogenesis, Growth; Sexual Differentiation; Extraembryonic Membranes; Mortality/ Hatching; Genome Organization; Comparative Avian Genomics; Telomere Biology; Sex Chromosomes/Sex Determination; Advanced Technologies; Genome Manipulation; Mutations.

Prerequisite(s): BIS 002A; BIS 002B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 115 – Raptor Biology (3 units)

Course Description: Study of birds of prey: classification, distribution, habits, migration, unique anatomical and physiological adaptations, natural and captive breeding, health and diseases, environmental concerns, conservation, legal considerations, rehabilitation, and falconry. Includes two Saturday field trips.

Prerequisite(s): BIS 002A; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 121 – Avian Reproduction (2 units)

Course Description: Breeding cycles and reproductive strategies, egg and sperm formation, incubation, sexual development, imprinting, hormonal control of reproductive behavior and song. Species coverage includes wild and companion birds. Course has a physiological orientation.

Prerequisite(s): BIS 002A; BIS 002B.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

AVS 123 – Management of Birds (3 units)

Course Description: Captive propagation of birds, including reproduction, genetic management, health, feeding, artificial incubation, artificial insemination, and related legal aspects, including trade and smuggling. Emphasis on exotic species and the role of captive propagation in conservation.

Prerequisite(s): BIS 002A; BIS 002B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

AVS 149 – Egg Production Management (2 units)

Course Description: Management of commercial table egg flocks as related to environment, nutrition, disease control, economics, housing, equipment, egg processing and raising replacement pullets. Offered in alternate years. One Saturday field trip required.

Prerequisite(s): AVS 011; or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 150 – Nutrition of Birds (1 unit)

Course Description: Principles of nutrition specific to avian species, including feedstuffs, feed additives, nutrient metabolism, energy systems, and nutritional support of egg production and growth. Use of computers for feed formulation to support production.

Prerequisite(s): ABI 103 (can be concurrent) or BIS 103 (can be concurrent).

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

AVS 160 – Designing & Performing Experiments in Avian Sciences (2 units)

Course Description: Experiments in current problems in avian biology. Introduction to experimental design. Students choose a project, design a protocol, perform an experiment and report their findings.

Prerequisite(s): AVS 100 or WFC 111; or consent of instructor.

Learning Activities: Laboratory 6 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 170 – Advanced Avian Biology (4 units)

Course Description: Ecology, behavior, functional morphology and lifehistory evolution of birds. Emphasis on the importance of body size as a principle determinant of most aspects of avian performance from lifespan to reproduction and species abundance. Analytical synthesis and critical thought emphasized.

Prerequisite(s): AVS 100 or WFC 111.

Learning Activities: Lecture/Discussion 3 hour(s), Project 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

AVS 190 – Seminar in Avian Sciences (1 unit)

Course Description: Seminar in Avian Sciences.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

AVS 192 – Internship in Avian Sciences (1-12 units)

Course Description: Internship on and off campus in poultry, game birds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval form essential.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 3-36 hour(s).

Grade Mode: Pass/No Pass only.

AVS 195 – Topics in Current Research (1-3 units)

Course Description: Discussion of topics of current interest in avian sciences.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-3 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Letter.

AVS 197T – Tutoring in Avian Sciences (1-3 units)

Course Description: Tutoring of students in lower division avian sciences courses; weekly conference with instructors in charge of courses; written critiques of teaching procedures.

Prerequisite(s): Consent of instructor.

Learning Activities: Tutorial 1-3 hour(s).

Grade Mode: Pass/No Pass only.

AVS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Enrollment Restriction(s): Restricted to upper division students.

Grade Mode: Pass/No Pass only.

AVS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

AVS 203 – Advanced Avian Development & Genomics (1 unit)

Course Description: In consultation with the instructor, students develop a lecture and associated instructional materials, i.e., lesson plan, including justification, reading and presentation and evaluation aids. Topic must complement a topic covered in AVS 103.

Prerequisite(s): AVS 103 (can be concurrent); graduate standing.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Letter.

AVS 290 – Seminar (1 unit)

Course Description: Reports and discussions of recent advances and selected topics of current interest in avian genetics, physiology, nutrition, and poultry technology.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Letter.

AVS 290C – Research Conference (1 unit)

Course Description: Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

AVS 297T – Supervised Teaching in Avian Sciences (1-4 units)

Course Description: Tutoring of students in lower, upper division, and graduate courses in Avian Sciences; weekly conference with instructor in charge of course; written critiques of teaching methods in lectures and laboratories.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Tutorial 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

AVS 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Letter.

AVS 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-12 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Biochemistry, Molecular, Cellular, & Developmental Biology (BCB)**Graduate Studies****BCB 210 – Molecular Genetics & Genomics (3 units)**

Course Description: Emphasizes molecular genetic and genomic approaches to address fundamental biological questions. Introduces and emphasizes the strengths of prokaryotic and eukaryotic model systems and serves as building block for the BMCDB core courses, which use model systems to develop their themes.

Prerequisite(s): BIS 101; MCB 121; or equivalent courses.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students.

Grade Mode: Letter.

BCB 211 – Macromolecular Structure & Interactions (3 units)

Course Description: Conceptual and quantitative basis for macromolecular structure-function relationships. Investigation of the paradigm form follows function. Review of key elements of protein, nucleic acid, and membrane structure. Exploration of specific macromolecular associations by analyzing chemical structure and physical-chemical behavior.

Prerequisite(s): BIS 102; or the equivalent, or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students.

Grade Mode: Letter.

BCB 212 – Cell Biology (3 units)

Course Description: Analysis of basic processes governing cell organization, division, and transport. Study of the integration and regulation of cell behavior in response to changes in cellular environment.

Prerequisite(s): BIS 104; or the equivalent, or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students.

Grade Mode: Letter.

BCB 213 – Developmental Biology (3 units)

Course Description: Fundamental principles in embryonic development that guide application of modern cellular and genetic approaches to understand developmental mechanisms. Emphasis on experimental approaches used to critically address scientific questions.

Prerequisite(s): Undergraduate biology course or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students.

Grade Mode: Letter.

BCB 214 – Molecular Biology (3 units)

Course Description: Investigation of the basic cellular processes in prokaryotes and eukaryotes that govern the central dogma of molecular biology (DNA-RNA-protein).

Prerequisite(s): BCB 211; or the equivalent, or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students.

Grade Mode: Letter.

BCB 215 – Graduate Reading Course (2 units)

Course Description: Development of critical reading skills through study of major paradigm advances in specialized fields of biochemistry, molecular, cell, and developmental biology. Emphasis on active learning and student participation. Guided analysis of literature and major advances in field of study.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Discussion 10 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

BCB 220L – Advanced Biochemistry Laboratory Rotations (5 units)

Course Description: Two five-week assignments in BMCDB research laboratories. Individual research problems with emphasis on methodological/procedural experience, experimental design, proposal writing and oral communication of results.

Prerequisite(s): BCB 210; BCB 211 (can be concurrent); BCB 120L or the equivalent.

Learning Activities: Laboratory 15 hour(s).

Enrollment Restriction(s): Open to graduate students.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

BCB 251 – Molecular Mechanisms in Early Development (3 units)

Course Description: Analysis of the early events of development including: germ cells and other stem cells, gametogenesis, meiosis, imprinting, fertilization, genetically-engineered organisms, egg activation and establishment of embryonic polarity with focus on cellular events including gene regulation and cell signaling.

Prerequisite(s): Graduate standing or consent of instructor; introductory background in developmental biology and/or cell biology recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BCB 255 – Molecular Mechanisms in Pattern Formation & Development (3 units)

Course Description: Genetic and molecular analysis of mechanisms that control animal development after fertilization. Establishment of embryonic axes, cell fate and embryonic pattern; induction, apoptosis, tissue patterning. Critical reading of current literature in C.elegans, Drosophila, and mouse genetic model systems.

Prerequisite(s): Graduate standing or consent of instructor; introductory background in developmental biology and/or genetics recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BCB 256 – Cell & Molecular Biology of Cancer (3 units)

Course Description: Analysis of the pathologic alterations of cancer cells and therapeutic opportunities; with emphasis on animal models, tumor immunotherapy, stress response, metabolism, epigenetics, microRNAs and non-coding RNAs, and microbiota and inflammation.

Prerequisite(s): BCB 210; BCB 212; BCB 213; BCB 214.

Learning Activities: Lecture 1.50 hour(s), Seminar 1.50 hour(s).

Grade Mode: Letter.

BCB 257 – Cell Proliferation & Cancer Genes (3 units)

Course Description: Genetic and molecular alterations underlying the conversion of normal cells to cancers, emphasizing regulatory mechanisms and pathways. Critical reading of the current literature and development of experimental approaches.

Prerequisite(s): BCB 221C BCB 221D or equivalent courses.

Learning Activities: Lecture 1.50 hour(s), Seminar 1.50 hour(s).

Grade Mode: Letter.

BCB 290 – Seminar (1 unit)

Course Description: Presentation and discussion of faculty and graduate-student research.

Prerequisite(s): Consent of instructor and/or graduate standing.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

BCB 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

BCB 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

BCB 396 – Methods of Teaching (1 unit)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Biological Chemistry (BCM)

School of Medicine

BCM 092 – Internship in Biological Chemistry (1-12 units)

Course Description: Supervised work experience in biological chemistry and related fields.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

BCM 192 – Internship in Biological Chemistry (1-12 units)

Course Description: Supervised work experience in Biological Chemistry and related fields.

Prerequisite(s): Upper division standing; approval of project prior to internship by preceptor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

BCM 198 – Group Study (1-5 units)

Course Description: For undergraduate students desiring to explore particular topics in depth. Lecture and conferences may be involved.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

BCM 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

BCM 209 – Prostaglandins/Leukotrienes & Related Lipids (2 units)

Course Description: Oxidative desaturation/elongation of polyunsaturated fatty acids. Biosynthesis of prostaglandins/leukotrienes from polyunsaturated fatty acids. Chemistry, biochemistry, and metabolism. Nutritional regulation. Physiological/pathophysiological implications; pharmacological and clinical relevance.

Prerequisite(s): (BCP 101A and BCP 101B) or (PHC 101A and PHC 101B) or (PGG 100A and PGG 100B).

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

BCM 217 – Molecular Genetics of Fungi (3 units)

Course Description: Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; secretion; control of reproduction; molecular evolution; transformation; and gene manipulation.

Prerequisite(s): PLP 130; PLP 215X; BCP 101B; BOT 119; GGG 100; GGG 102A; graduate standing in a biological science; MIC 215 recommended.

Learning Activities: Lecture 3 hour(s).

Cross Listing: PLP 217.

Grade Mode: Letter.

BCM 222 – Mechanisms of Translational Control (2 units)

Course Description: Molecular mechanisms of protein synthesis and translational control in eukaryotic cells, with emphasis on mammalian cells and their viruses. An advanced graduate-level treatment of topics of current interest, with readings and discussion of primary papers from the literature.

Prerequisite(s): BCP 201C or consent of instructor.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

BCM 230 – Practical NMR Spectroscopy & Imaging (1 unit)

Course Description: Basic theory, experimental methods, and instrumentation of NMR. Enables understanding of NMR spectroscopy and imaging experiments.

Prerequisite(s): CHE 107A; CHE 107B; (PHY 009A, PHY 009B, PHY 009C; or PHY 005A, PHY 005B, PHY 005C) or consent of instructor.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

BCM 231 – Biological Nuclear Magnetic Resonance (3 units)

Course Description: Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics.

Prerequisite(s): MCB 221A; or equivalent or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Cross Listing: BPH 231.

Grade Mode: Letter.

BCM 250 – Functional Genomics: From Bench to Bedside (3 units)

Course Description: Functional genomics (how genetic variation and epigenomics affect gene expression), with an emphasis on clinical relevance and applications. Topics include genetic variation and human disease, cancer therapeutics, and biomarker discovery.

Prerequisite(s): GGG 201C; MCB 214; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): No credit to students who have previously completed PHA 250.

Cross Listing: GGG 250.

Grade Mode: Letter.

BCM 291 – Seminar in Genetic Approaches to Pathogenesis of Human Disease (1 unit)

Course Description: Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression.

Prerequisite(s): Student in Genetics Graduate Group or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Cross Listing: BCM 491.

Grade Mode: Satisfactory/Unsatisfactory only.

BCM 298 – Group Study (1-5 units)

Course Description: For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

BCM 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

BCM 491 – Seminar in Genetic Approaches to Pathogenesis of Human Disease (1 unit)

Course Description: Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression.

Prerequisite(s): Student in Genetics Graduate Group or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Cross Listing: BCM 291.

Grade Mode: Honors/Pass/Fail.

BCM 493 – Medical Genomics (6 units)

Course Description: Four-week module will focus on the clinical methods and applications of medical genomics. Topics will include an introduction to the human genome and human genomics, genetic and epigenetic variation and the ethics of medical genomics.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 4 hour(s), Lecture 4 hour(s), Laboratory 12 hour(s).

Grade Mode: Honors/Pass/Fail.

BCM 497T – Tutoring in Biological Chemistry (1-5 units)

Course Description: Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine.

Prerequisite(s): Advanced standing or consent of instructor.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: Honors/Pass/Fail.

BCM 498 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

BCM 499 – Research (1-12 units)

Course Description: Research with Department of Biological Chemistry.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Biological Sciences (BIS)**BIS 002A – Introduction to Biology: Essentials of Life on Earth (5 units)**

Course Description: Essentials of life including sources and use of energy, information storage, responsiveness to natural selection and cellularity. Origin of life and influence of living things on the chemistry of the Earth. May be taught abroad.

Prerequisite(s): CHE 002A or CHE 004A or equivalent recommended.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed BIS 001A with a grade of C- or better.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIS 002B – Introduction to Biology: Principles of Ecology & Evolution (5 units)

Course Description: Introduction to basic principles of ecology and evolutionary biology, focusing on the fundamental mechanisms that generate and maintain biological diversity across scales ranging from molecules and genes to global processes and patterns. May be taught abroad.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed BIS 001B with a grade of C- or better.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

BIS 002C – Introduction to Biology: Biodiversity & the Tree of Life (5 units)

Course Description: Introduction to organismal diversity, using the phylogenetic tree of life as an organizing theme. Lectures and laboratories cover methods of phylogenetic reconstruction, current knowledge of the tree of life, and the evolution of life's most important and interesting innovations. May be taught abroad.

Prerequisite(s): BIS 001B C- or better or BIS 002B C- or better.

Learning Activities: Lecture 4 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed BIS 001C with a grade of C- or better.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

BIS 002D – Introduction to Biology: Principles of Cell Biology & Physiology (3 units)

Course Description: Introduction to the essential principles underlying cellular organization and function, how the properties of cells give rise to complex cellular behaviors that contribute to tissue organization/function and the physiological paradigms that govern complex life.

Prerequisite(s): BIS 002A C- or better.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken BIS 104 and NPB 110A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIS 005 – Exploring Biological Sciences (1 unit)

Course Description: Introduction to biology at UC Davis through discussions with faculty and speakers from industry and medicine.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Enrollment limited to first year College of Biological Sciences students.

Grade Mode: Pass/No Pass only.

BIS 006 – BioLaunch: Career Pathways Seminar (1.5 units)

Course Description: Exploration of diverse career options, building professional networks, transferable skills, and developing materials and strategies for landing relevant experiential learning opportunities in the biological sciences fields.

Prerequisite(s): BIS 005; or consent of instructor.

Learning Activities: Discussion 1.5 hour(s).

Grade Mode: P/NP only.

BIS 010 – Everyday Biology (4 units)

Course Description: Everyday biological concepts using contemporary readings for non-scientists. Key topics include: personal genomics; food & health; climate & evolution; brain biology & the law. Innovative projects apply biological concepts to current events. For students not specializing in biology.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed BIS 002A or NEM 010V or equivalent.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

BIS 011 – Issues in the Life Sciences (2 units)

Course Description: The range of subjects and approaches in the field of biology, including both basic and applied research topics.

Prerequisite(s): Consent of instructor. Enrollment limited to BUSP students.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

BIS 011L – Basic Life Sciences Laboratory (1 unit)

Course Description: Basic laboratory skills in life sciences research, including microbiology, molecular biology, and genetics.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 3 hour(s).

Enrollment Restriction(s): Limited to Biology Undergraduate Scholars Program (BUP) students.

Grade Mode: Letter.

BIS 015L – Introduction to Data Science for Biologists (2 units)

Course Description: Introduction to data science with a focus on developing practical computational skills for biologists. Data management, transformation, visualization, and analysis using R. Fundamentals of the UNIX shell including navigation and automation. Computational resources for biologists with emphasis on the management of genomic data.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

BIS 020Q – Modeling in Biology (2 units)

Course Description: Introduction to the application of quantitative methods to biological problems. Use a mathematical software package to tackle problems drawn from all aspects of biology.

Prerequisite(s): MAT 016B C- or better (can be concurrent) or MAT 017B C- or better (can be concurrent) or MAT 021B C- or better (can be concurrent) or MAT 021BH C- or better (can be concurrent).

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

BIS 023A – Genome Hunters (3 units)

Course Description: Hands-on, project-based introduction to genome-centric biology with specific focus on quantitative elements of associated experimental approaches. Measurement error and error estimation, experimental design, data analysis, model generation and fitting, and model-guided hypothesis generation and testing. Content covered through quarter-long interactive experiment to isolate an organism, quantitatively characterize its behavior, and sequence its genome.

Prerequisite(s): MAT 017A (can be concurrent) or MAT 021A (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

BIS 023B – Genome Hunters (3 units)

Course Description: Hands-on, project-based introduction to modern computational and bioinformatics analyses using genome sequence data generated in BIS 023A. Genome sequence assembly and alignment, genome annotation, and genetic correlates of behavior. Additional topics may include scientific and societal implications of the availability and usage of genome information and genome manipulation, and real-life applications of genome analysis.

Prerequisite(s): BIS 023A; MAT 017B (can be concurrent) or MAT 021B (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

BIS 027A – Linear Algebra with Applications to Biology (4 units)

Course Description: Introduction to linear algebra with biological, medical, and bioengineering applications. Matrix algebra, vector spaces, orthogonality, determinants, eigenvalues, eigenvectors, principal component analysis, singular value decomposition, and linear transformations. Computer labs cover mathematical and computational techniques for modeling biological systems.

Prerequisite(s): MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Only 1 unit of credit for students who have completed MAT 022A.

Cross Listing: MAT 027A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIS 027B – Differential Equations with Applications to Biology (4 units)

Course Description: Solutions of differential equations with biological, medical, and bioengineering applications. First and second order linear equations, phase plane analysis, nonlinear dynamics, Laplace transforms, and the diffusion equation. Computer labs cover mathematical and numerical techniques for modeling biological systems.

Prerequisite(s): (BIS 027A C- or better or MAT 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or ECS 032A C- or better or ECS 036A C- or better or ECH 060 C- or better or EME 005 C- or better).

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Only 1 unit of credit for students who have completed MAT 022B.

Cross Listing: MAT 027B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIS 060 – BioLaunch: Career Laboratory (2 units)

Course Description: Interactive, simulated activities that demonstrate day-to-day work in a variety of careers facilitated by professionals in industries related to Biological Sciences.

Prerequisite(s): BIS 005 P or better; BIS 006 P or better; or consent of instructor.

Learning Activities: Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Open to College of Biological Sciences students only.

Grade Mode: P/NP only.

BIS 092 – Internship in Biological Sciences (1-12 units)

Course Description: Internship in Biological Sciences.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Enrollment Restriction(s): Restricted to lower division standing.

Grade Mode: Pass/No Pass only.

BIS 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

BIS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Independent Study 3-15 hour(s).

Enrollment Restriction(s): Restricted to lower division standing.

Grade Mode: Pass/No Pass only.

BIS 101 – Genes & Gene Expression (4 units)

Course Description: Nucleic acid structure and function; gene expression and its regulation; replication; transcription and translation; transmission genetics; molecular evolution. May be taught abroad.

Prerequisite(s): (BIS 002A C- or better, BIS 002B C- or better); (CHE 008A or CHE 118A or CHE 128A); ((STA 013 or STA 013Y) or STA 100 or STA 102 or STA 130A)); STA 100 preferred.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

BIS 101D – Genes & Gene Expression Discussion (1 unit)

Course Description: Discussion and problem solving related to fundamental principles of classical and molecular genetics as presented in BIS 101.

Prerequisite(s): BIS 101 (can be concurrent); and consent of instructor.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

BIS 102 – Structure & Function of Biomolecules (3 units)

Course Description: Structure and function of macromolecules with emphasis on proteins, catalysis, enzyme kinetics, lipids, membranes, and proteins as machines. May be taught abroad.

Prerequisite(s): (BIS 001A or BIS 002A); (CHE 008B or CHE 118B or CHE 128B).

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Only 1 unit of credit for students who have completed ABI 102; only 1.5 units of credit for students who have completed BIS 105.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

BIS 103 – Bioenergetics & Metabolism (3 units)

Course Description: Fundamentals of the carbon, nitrogen, and sulfur cycles in nature, including key reactions of biomolecules such as carbohydrates, amino acids, lipids, and nucleotides, and of energy production and use in different types of organisms. Principles of metabolic regulation.

Prerequisite(s): BIS 102.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): 1.5 units of credit for students who have completed BIS 105; 1 unit of credit if students who have completed ABI 103.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIS 104 – Cell Biology (3 units)

Course Description: Membrane receptors and signal transduction; cell trafficking; cell cycle; cell growth and division; extracellular matrix and cell-cell junctions; cell development; immune system.

Prerequisite(s): BIS 101; (BIS 102 or BIS 105 or ABI 102 C- or better).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIS 105 – Biomolecules & Metabolism (3 units)

Course Description: Fundamentals of biochemical processes, with emphasis on protein structure and activity; energy metabolism; catabolism of sugars, amino acids, and lipids; and gluconeogenesis.

Prerequisite(s): BIS 002A; (CHE 008B or CHE 118B or CHE 128B).

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): 1.5 units of credit for students who have completed BIS 102 or BIS 103; no credit for students who have completed both BIS 102 and BIS 103; 1 unit of credit for students who have completed ABI 102 or ABI 103; no credit for students who have completed both ABI 102 and ABI 103.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

BIS 106 – BioLaunch: Experiential Learning Seminar (1 unit)

Course Description: Applied learning experience for self evaluation of a current or recent internship or research position. Analysis of workplace culture, identification of opportunities for professional growth, and useful lessons from peer experiences.

Prerequisite(s): BIS 005; BIS 006; BIS 060; or consent of instructor.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open to College of Biological Sciences students only.

Grade Mode: P/NP only.

BIS 107 – Probability & Stochastic Processes with Applications to Biology (4 units)

Course Description: Introduction to probability theory and stochastic processes with biological, medical, and bioengineering applications. Combinatorics, discrete and continuous random variables, Bayes' formula, conditional probability, Markov chains, Poisson processes, and Brownian motion. Computer labs cover mathematical and computational modeling techniques.

Prerequisite(s): (BIS 027A C- or better or MAT 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or ECS 032A C- or better or ECS 036A C- or better or ECH 060 C- or better or EME 005 C- or better)).

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Only 2 units of credit for students who have completed MAT 135A or STA 131A.

Cross Listing: MAT 107.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIS 122 – Population Biology & Ecology (3 units)

Course Description: Biological and physical processes affecting plant and animal populations in the rich array of habitats at the Bodega Marine Laboratory ecological preserve. Emphasis on field experience, with complementing lectures to address population and community processes. See Bodega Marine Laboratory Program.

Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); residence at Bodega Marine Laboratory required.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

BIS 122P – Population Biology & Ecology/Advanced Laboratory Topics (5 units)

Course Description: Training in scientific research, from hypothesis testing to publication, including methods of library research. Research will be related to a topic covered in BIS 122. Final presentation both oral and written. See Bodega Marine Laboratory Program.

Prerequisite(s): BIS 122 (can be concurrent).

Learning Activities: Laboratory 12 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Residence at Bodega Marine Laboratory required.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL); Writing Experience (WE).

BIS 123 – Undergraduate Colloquium in Marine Science (1 unit)

Course Description: Series of weekly seminars by recognized authorities in various disciplines of marine science from within and outside the UC system. Includes informal discussion with speaker. Held at Bodega Marine Laboratory; see Bodega Marine Laboratory Program.

Prerequisite(s): Enrolled student at the Bodega Marine Laboratory.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Pass/No Pass only.

BIS 124 – Coastal Marine Research (6 units)

Course Description: Independent research on topics related to an accompanying core Bodega Marine Laboratory summer course. Receive training in generating hypotheses, designing experiments, collecting and analyzing data, and scientific communication.

Prerequisite(s): (EVE 114 (can be concurrent) or EVE 106 (can be concurrent) or ESP 152 (can be concurrent) or ESP 124 (can be concurrent)); concurrent enrollment in one of the above listed courses required; upper division standing or consent of instructor.

Learning Activities: Laboratory 12 hour(s), Fieldwork 12 hour(s), Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Student must complete the application at <http://www.bml.ucdavis.edu>.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

BIS 133 – Collaborative Studies in Mathematical Biology (3 units)

Course Description: Interdisciplinary research and training that uses mathematics and computation to solve current problems in biology.

Prerequisite(s): MAT 016A; MAT 016B; MAT 016C; (BIS 001A or BIS 001B or BIS 001C or BIS 002A or BIS 002B or BIS 002C or BIS 010); and consent of instructor, or equivalents.

Learning Activities: Lecture/Discussion 3 hour(s).

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

BIS 160 – BioLaunch: Career Next Step Seminar (1 unit)

Course Description: Preparation for the next step after undergraduate work at UC Davis with support from staff, faculty, and industry partners. Applications for careers, graduate and professional schools.

Prerequisite(s): BIS 005; BIS 006; BIS 060; BIS 106; or consent of instructor.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open to College of Biological Sciences students only.

Grade Mode: Pass/No Pass only.

BIS 180L – Genomics Laboratory (5 units)

Course Description: Computational approaches to model and analyze biological information about genomes, transcriptomes, and proteomes. Topics include genome assembly and annotation, mRNA and small RNA profiling, proteomics, protein-DNA and protein-protein interactions, network analysis, and comparative genomics.

Prerequisite(s): BIS 015L; (BIS 181 or BIS 183 or MCB 182); or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Students who have received credit for taking BIT 150 will receive 3 units for completing BIS 180L.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIS 181 – Comparative Genomics (3 units)

Course Description: Comparison of genomes at the population and species level. Genomic techniques for mapping disease (and other) genes, reconstruction of evolutionary history and migration patterns, determination of gene function, prediction of organismal traits, and metagenomics: determination of community composition and function.

Prerequisite(s): BIS 101 C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

BIS 183 – Functional Genomics (3 units)

Course Description: Overview of genomic methodologies and key biological findings obtained using genome-wide analyses. RNA profiling, small RNAs, epigenomics, chromatin immunoprecipitation, protein-DNA interactions, proteomics and network analysis.

Prerequisite(s): BIS 101; (BIS 102 or BIS 105 recommended.)

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

BIS 185L – Systems & Synthetic Biology Lab (5 units)

Course Description: Principles & applications of systems and synthetic biology. Bistable & monostable switches, single cell sequencing, genetic circuits, design of biological parts and pathway modeling. Computational & experimental labs use single cell sequence data to determine switch types in cell identity, design and characterize promoter libraries and use genomics-enabled approaches to discover and characterize enzymes & metabolites.

Prerequisite(s): BIS 015L C- or better; BIS 134 C- or better (can be concurrent); BIM 143 C- or better (can be concurrent); or consent of instructor.

Learning Activities: Discussion 1 hour(s), Laboratory 6 hour(s), Lecture 2 hour(s).

Grade Mode: Letter.

BIS 192 – Internship in Biological Sciences (1-12 units)

Course Description: Internship in Biological Sciences.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

BIS 194H – Research Honors (2 units)

Course Description: Students majoring in Biological Sciences who have completed two quarters (3-5 units per quarter) of 199 and who qualify for the honors program as defined by the current catalog. Opportunity for Biological Sciences majors to pursue intensive research culminating in the writing of a senior thesis with the guidance of faculty advisors.

Prerequisite(s): Senior standing.

Learning Activities: Independent Study 6 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Writing Experience (WE).

BIS 195A – Science Teaching Internship Program (4 units)

Course Description: Basic teaching techniques including lesson planning, classroom management, and presentation skills. Interns spend time in K-12 science classrooms working with a master teacher observing, assisting with labs and activities, managing students, and teaching lessons.

Prerequisite(s): Upper division standing in a science major or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Internship 6 hour(s).

Enrollment Restriction(s): Major in science; junior or senior status (based on units); application and interview; limited to 24 students.

Grade Mode: Pass/No Pass only.

BIS 195B – Science Teaching Internship (1-5 units)

Course Description: Reinforcement of teaching techniques learned in 195A with additional classroom experience in K-12 science classrooms working with a master teacher observing, assisting with labs and activities, managing students and teaching lessons.

Prerequisite(s): BIS 195A.

Learning Activities: Internship 1-5 hour(s).

Repeat Credit: May be repeated 1 time(s) with consent of instructor.

Grade Mode: Pass/No Pass only.

BIS 197T – Tutoring in Biological Sciences (1-5 units)

Course Description: Assisting the instructor by tutoring students in one of the Biological Sciences' regular courses.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Discussion 2-6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

BIS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

BIS 199 – Special Study in Biological Sciences (1-5 units)

Course Description: Special study in Biological Sciences.

Prerequisite(s): Consent of instructor. Upper division standing.

Learning Activities: Independent Study 3-15 hour(s).

Grade Mode: Pass/No Pass only.

BIS 298 – Group Study (1-5 units)

Course Description: College of Biological Sciences staff members offer group study courses under this number.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

Biological Systems Engineering (EBS)

College of Engineering

EBS 001 – Foundations of Biological Systems Engineering (4 units)

Course Description: Introduction to engineering and the engineering design process with examples drawn from the field of biological systems engineering. Introduction to computer-aided design and mechanical fabrication of designs. Quarter-long group design project.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s), Project.

Enrollment Restriction(s): Open only to students in Biological Systems Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

EBS 075 – Properties of Materials in Biological Systems (4 units)

Course Description: Properties of typical biological materials; composition and structure with emphasis on the effects of physical and biochemical properties on design of engineered systems; interactions of biological materials with typical engineering materials.

Prerequisite(s): BIS 002A; PHY 009B (can be concurrent).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 090C – Research Group Conference in Biological Systems Engineering (1 unit)

Course Description: Research group conference.

Prerequisite(s): Consent of instructor. Lower division standing in Biological Systems Engineering or Food Engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EBS 092 – Internship in Biological Systems Engineering (1-5 units)

Course Description: Supervised work experience in biological systems engineering.

Prerequisite(s): Consent of instructor. Lower division standing; project approval prior to period of internship.

Learning Activities: Internship.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EBS 098 – Directed Group Study (1-5 units)

Course Description: Group study of selected topics; restricted to lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EBS 099 – Special Study for Lower Division Students (1-5 units)

Course Description: Special study for lower division students.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EBS 103 – Fluid Mechanics Fundamentals (4 units)

Course Description: Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macroscopic balances to solve a range of practical problems.

Prerequisite(s): PHY 009B.

Learning Activities: Lecture 4 hour(s).

Cross Listing: HYD 103N.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

EBS 114 – Principles of Field Machinery Design (3 units)

Course Description: Traction and stability of vehicles with wheels or tracks. Operating principles of field machines and basic mechanisms used in their design.

Prerequisite(s): ENG 102; ENG 104.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

EBS 115 – Forest Engineering (3 units)

Course Description: Applications of engineering principles to problems in forestry including those in forest regeneration, harvesting, residue utilization, and transportation.

Prerequisite(s): ENG 104.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

EBS 120 – Power Systems Design (4 units)

Course Description: Design and performance of power devices and systems including combustion engines, electric generators and motors, fluid power systems, fuels, and emerging technologies. Selection of units for power matching and optimum performance.

Prerequisite(s): (ENG 017 or ENG 017V); ENG 102; ENG 103; ENG 105.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 125 – Heat Transfer in Biological Systems (4 units)

Course Description: Fundamentals of heat transfer with application to biological systems. Steady and transient heat transfer. Analysis and simulation of heat conduction, convection and radiation. Heat transfer operations.

Prerequisite(s): BIS 002A; EBS 075; ENG 103; ENG 105.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

EBS 127 – Mass Transfer & Kinetics in Biological Systems (4 units)

Course Description: Fundamentals of mass transfer and kinetics in biological systems. Molecular diffusion and convection.

Thermodynamics and bioenergetics. Biological and chemical rate equations. Heterogeneous kinetics. Batch and continuous reaction processes. Mass transfer operations.

Prerequisite(s): EBS 125.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

EBS 128 – Biomechanics & Ergonomics (4 units)

Course Description: Anatomical, physiological, and biomechanical bases of physical ergonomics. Human motor capabilities, body mechanics, kinematics and anthropometry. Use of bioinstrumentation, industrial surveillance techniques and the NIOSH lifting guide. Cumulative trauma disorders. Static and dynamic biomechanical modeling. Emphasis on low back, shoulder and hand/wrist biomechanics.

Prerequisite(s): STA 100; ENG 102.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 130 – Modeling of Dynamic Processes in Biological Systems (4 units)

Course Description: Techniques for modeling processes through mass & energy balance, rate equations, and equations of state. Computer problem solution of models. Example models include package design, evaporation, respiration heating, thermal processing of foods, and plant growth.

Prerequisite(s): (ENG 006 or ECS 032A); (MAT 022B C- or better or MAT 027B C- or better); EBS 075.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

EBS 135 – Bioenvironmental Engineering (4 units)

Course Description: Biological responses to environmental conditions. Principles and engineering design of environmental control systems. Overview of environmental pollution problems and legal restrictions for biological systems, introduction of environmental quality assessment techniques, and environmental pollution control technologies.

Prerequisite(s): EBS 125; EBS 130.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 144 – Groundwater Hydrology (4 units)

Course Description: Global role of groundwater resources in society; groundwater in the hydrologic cycle; geology of groundwater; global, US, and California geography of groundwater; physical measures of groundwater occurrence and flow; water balance; modeling groundwater flow; principles of well construction; aquifer tests; groundwater quality; contaminant transport and monitoring; groundwater law, water quality regulations, and sustainable management.

Prerequisite(s): MAT 012 (can be concurrent) or MAT 016B (can be concurrent) or MAT 021A (can be concurrent).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: HYD 144.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 145 – Irrigation & Drainage Systems (4 units)

Course Description: Engineering and scientific principles applied to the design of surface, sprinkle and micro irrigation systems and drainage systems within economic, biological, and environmental constraints. Interaction between irrigation and drainage.

Prerequisite(s): EBS 103 or HYD 103N.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

EBS 147 – Runoff, Erosion & Water Quality Management (3 units)

Course Description: Practical hydrology and runoff water quality management from disturbed watersheds. Development of hillslope and soils restoration concepts and practice, modeling and application.

Prerequisite(s): (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 021C); (ECI 142 or HYD 141 or ESM 100); or equivalent.

Learning Activities: Lecture/Lab 3 hour(s), Fieldwork.

Cross Listing: HYD 147.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EBS 148 – Evapotranspiration Principles, Measurement & Modeling (4 units)

Course Description: Estimation of evapotranspiration (ET) for irrigation management and water resources planning; including the basic principles and key factors controlling evaporation and ET rates, methods of measuring these factors in the field and remotely, and determination of likely water requirements for crops and various landscape conditions as needed for water resources planning.

Prerequisite(s): HYD 124 C or better; consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: ESM 118; HYD 118.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EBS 161 – Kinetics & Bioreactor Design (4 units)

Course Description: Provide the basic principles of reactor design for bioprocess applications. Emphasizes the following topics: 1) kinetics and reactor engineering principles; 2) bio-reaction kinetics; and 3) bioreactor design.

Prerequisite(s): EBS 127.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

EBS 165 – Bioinstrumentation & Control (4 units)

Course Description: Instrumentation and control for biological production systems. Measurement system concepts, instrumentation and transducers for sensing physical and biological parameters, data acquisition and control.

Prerequisite(s): ENG 100.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 170A – Engineering Design & Professional Responsibilities (3 units)

Course Description: Engineering design including professional responsibilities. Emphasis on project selection, data sources, specifications, human factors, biological materials, safety systems, and professionalism. Detailed design proposals developed for EBS 170B and EBS 170BL.

Prerequisite(s): EBS 001; ENG 102; ENG 104.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 170B – Engineering Projects: Design (2 units)

Course Description: Individual or group projects involving the design of devices, structures, or systems to solve specific engineering problems in biological systems. Project for study is jointly selected by student and instructor.

Prerequisite(s): EBS 170A; EBS 170BL (can be concurrent); EBS 170BL required concurrently.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 170BL – Engineering Projects: Design Laboratory (1 unit)

Course Description: Individual or group projects involving the design of devices, structures, or systems to solve specific engineering problems in biological systems.

Prerequisite(s): EBS 170B (can be concurrent); EBS 170B required concurrently.

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 170C – Engineering Projects: Design Evaluation (1 unit)

Course Description: Individual or group projects involving the fabrication, assembly and testing of components, devices, structures, or systems designed to solve specific engineering problems in biological systems. Project for study previously selected by student and instructor in EBS 170B.

Prerequisite(s): EBS 170B; EBS 170CL (can be concurrent); EBS 170CL required concurrently.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 170CL – Engineering Projects: Design Evaluation (2 units)

Course Description: Individual or group projects involving the fabrication, assembly and testing of components, devices, structures, or systems designed to solve specific engineering problems in biological systems.

Prerequisite(s): EBS 170C (can be concurrent); EBS 170C required concurrently.

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EBS 175 – Rheology of Biological Materials (3 units)

Course Description: Fluid and solid rheology, viscoelastic behavior of foods and other biological materials, and application of rheological properties to food and biological systems (i.e., pipeline design, extrusion, mixing, coating).

Prerequisite(s): EBS 103 or ENG 103.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

EBS 189A – Special Topics in Biological Systems Engineering: Agricultural Engineering (1-5 units)

Course Description: Special topics in Agricultural Engineering.

Prerequisite(s): Consent of instructor; upper division standing in Engineering.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EBS 189B – Special Topics in Biological Systems Engineering: Aquacultural Engineering (1-5 units)

Course Description: Special topics in Aquacultural Engineering.

Prerequisite(s): Consent of instructor; upper division standing in Engineering.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EBS 189C – Special Topics in Biological Systems Engineering: Biomedical Engineering (1-5 units)

Course Description: Special topics in Biomedical Engineering.

Prerequisite(s): Consent of instructor; upper division standing in Engineering.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EBS 189D – Special Topics in Biological Systems Engineering: Biotechnical Engineering (1-5 units)

Course Description: Special topics in Biotechnical Engineering.

Prerequisite(s): Consent of instructor; upper division standing in Engineering.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EBS 189E – Special Topics in Biological Systems Engineering: Ecological Systems Engineering (1-5 units)

Course Description: Special topics in Ecological Systems Engineering.

Prerequisite(s): Consent of instructor; upper division standing in Engineering.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EBS 189F – Special Topics in Biological Systems Engineering: Food Engineering (1-5 units)

Course Description: Special topics in Food Engineering.

Prerequisite(s): Consent of instructor; upper division standing in Engineering.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EBS 189G – Special Topics in Biological Systems Engineering: Forest Engineering (1-5 units)

Course Description: Special topics in Forest Engineering.

Prerequisite(s): Consent of instructor; upper division standing in Engineering.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EBS 190C – Research Group Conference in Biological Systems Engineering (1 unit)

Course Description: Research group conference.

Prerequisite(s): Consent of instructor; upper division standing in Biological Systems Engineering or Food Engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EBS 192 – Internship in Biological Systems Engineering (1-5 units)

Course Description: Supervised work experience in biological systems engineering.

Prerequisite(s): Consent of instructor; upper division standing; approval of project prior to period of internship.

Learning Activities: Internship.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EBS 197T – Tutoring in Biological Systems Engineering (1-5 units)

Course Description: Tutoring individual students, leading small voluntary discussion groups, or assisting the instructor in laboratories affiliated with one of the department's regular courses.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EBS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EBS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EBS 200 – Research Methods in Biological Systems Engineering (2 units)

Course Description: Planning, execution and reporting of research projects. Literature review techniques and proposal preparation.

Record keeping and patents. Uncertainty analysis in experiments and computations. Graphic analysis. Oral and written presentation of research results, manuscript preparation, submission and review.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

EBS 216 – Energy Systems (4 units)

Course Description: Theory and application of energy systems. Systems analysis, energy conversion technologies, environmental considerations, economics and system optimization.

Prerequisite(s): ENG 105; or equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

EBS 228 – Occupational Musculoskeletal Disorders (3 units)

Course Description: Epidemiology and etiology of occupational musculoskeletal disorders (MSDs) with focus on low back and upper extremities disorders; anatomical and biomechanical functions of lower back and upper extremities; MSDs risk factors assessment and control; research opportunities related to MSDs.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

EBS 240 – Infiltration & Drainage (3 units)

Course Description: Aspects of multi-phase flow in soils and their application to infiltration and immiscible displacement problems. Gas phase transport and entrapment during infiltration, and oil-water-gas displacement will be considered.

Prerequisite(s): SSC 107; ENG 103.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EBS 241 – Precision Irrigation Systems & Management (3 units)

Course Description: Advanced irrigation science and engineering for agricultural, horticultural, engineering, and hydrology graduate students. Precision irrigation techniques for application of water to meet specific requirements of individual plants or management units and maximum economic benefits of crop production.

Prerequisite(s): EBS 145; SSC 100; ABT 110; HYD 110.

Learning Activities: Lecture 3 hour(s).

Cross Listing: HYD 241.

Grade Mode: Letter.

EBS 242 – Hydrology & Sustainability of Irrigated Lands (3 units)

Course Description: Impact of irrigated agricultural on groundwater depletion, surface water and groundwater quality, soil salinization, downstream ecosystems, and seawater intrusion. Exploration of efficient resource use, and policies adopted in California to enhance sustainability of irrigated crop production.

Prerequisite(s): ABT 110 or ESM 110 or HYD 110 or EBS 145.

Learning Activities: Lecture 3 hour(s).

Cross Listing: HYD 242.

Grade Mode: Letter.

EBS 243 – Water Resource Planning & Management (3 units)

Course Description: Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design, and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models.

Prerequisite(s): HYD 141; or equivalent.

Learning Activities: Lecture 3 hour(s).

Cross Listing: HYD 243.

Grade Mode: Letter.

EBS 245 – Waste Management for Biological Production Systems (3 units)

Course Description: Characterization of solid and liquid wastes from animal, crop, and food production systems. Study of methods and system design for handling, treatment, and disposal/utilization of these materials.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EBS 265 – Design & Analysis of Engineering Experiments (5 units)

Course Description: Simple linear, multiple, and polynomial regression, correlation, residuals, model selection, one-way ANOVA, fixed and random effect models, sample size, multiple comparisons, randomized block, repeated measures, and Latin square designs, factorial experiments, nested design and subsampling, split-plot design, statistical software packages.

Prerequisite(s): STA 100; ASE 120; or an introductory course in statistics.

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

EBS 268 – Polysaccharides Surface Interactions (3 units)

Course Description: Study of fundamental surface science theories as applied to physical and chemical interactions of carbohydrates and polysaccharides.

Prerequisite(s): Graduate students in science or engineering.

Learning Activities: Lecture 3 hour(s).

Cross Listing: ECH 268.

Grade Mode: Letter.

EBS 270 – Modeling & Analysis of Physical and Biological Processes & Systems (4 units)

Course Description: Mathematical modeling of biological systems: model development; analytical and numerical solutions. Case studies from various specializations within Biological & Agricultural Engineering.
Prerequisite(s): MAT 022B or EBS 130; Familiarity with a programming language.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EBS 275 – Physical Properties of Biological Materials (3 units)

Course Description: Selected topics on physical properties, such as mechanical, optical, rheological, and aerodynamic properties, as related to the design of harvesting, handling, sorting, and processing equipment. Techniques for measuring and recording physical properties of biological materials.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

EBS 289A – Selected Topics in Biological Systems Engineering: Animal Systems Engineering (1-5 units)

Course Description: Special topics in Animal Systems Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 289B – Selected Topics in Biological Systems Engineering: Aquacultural Engineering (1-5 units)

Course Description: Special topics in Aquacultural Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 289C – Selected Topics in Biological Systems Engineering: Biological Engineering (1-5 units)

Course Description: Special topics in Biological Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 289D – Selected Topics in Biological Systems Engineering: Energy Systems (1-5 units)

Course Description: Special topics in Energy Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 289E – Selected Topics in Biological Systems Engineering: Environmental Quality (1-5 units)

Course Description: Special topic in Environmental Quality.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 289F – Selected Topics in Biological Systems Engineering: Food Engineering (1-5 units)

Course Description: Special topics in Food Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 289G – Selected Topics in Biological Systems Engineering: Forest Engineering (1-5 units)

Course Description: Special topics in Forest Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 289H – Selected Topics in Biological Systems Engineering: Irrigation & Drainage (1-5 units)

Course Description: Special topics in Irrigation & Drainage.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 289I – Selected Topics in Biological Systems Engineering: Plant Production & Harvest (1-5 units)

Course Description: Special topics in Plant Production & Harvest.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 289J – Selected Topics in Biological Systems Engineering: Postharvest Engineering (1-5 units)

Course Description: Special topics in Postharvest Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 289K – Selected Topics in Biological Systems Engineering: Sensors & Actuators (1-5 units)

Course Description: Special topics in Sensors & Actuators.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EBS 290 – Seminar (1 unit)

Course Description: Weekly seminars on recent advances and selected topics in biological systems engineering. Theme changes from quarter to quarter.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EBS 290C – Graduate Research Conference (1 unit)

Course Description: Research problems, progress and techniques in biological systems engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EBS 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

EBS 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

EBS 390 – Supervised Teaching in Biological & Agricultural Engineering (1-3 units)

Course Description: Tutoring and teaching students in undergraduate courses offered in the Department of Biological and Agricultural Engineering. Weekly conferences with instructor; evaluation of teaching. Preparing for and conducting demonstrations, laboratories and discussions. Preparing and grading exams.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Laboratory 3 hour(s), Tutorial 3-9 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Biomedical Engineering (BIM)

College of Engineering

BIM 001 – Introduction to Biomedical Engineering (2 units)

Course Description: Introduction to the field of biomedical engineering with emphasis on design, careers, and specializations, including (1) medical devices (2) cellular & tissue engineering, (3) biomechanics, (4) systems & synthetic biology, and (5) biomedical imaging.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One open to freshmen.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 020 – Fundamentals of Bioengineering (4 units)

Course Description: Basic principles of mass, energy and momentum conservation equations applied to solve problems in the biological and medical sciences.

Prerequisite(s): CHE 002B C- or better; MAT 021D C- or better; PHY 009B; ENG 006; BIM 020L (can be concurrent).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to BME majors only.

Credit Limitation(s): Only 2 units of credit to students who have previously taken ECH 051, ENG 105.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

BIM 020L – Graphics Design for BME (2 units)

Course Description: Computer-aided design and its application to problems in Biomedical Engineering.

Prerequisite(s): CHE 002B C- or better; MAT 021D C- or better; PHY 009B; ENG 006; BIM 020 (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Open to BME majors only.

Credit Limitation(s): No credit for students who have previously taken ENG 004.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 088V – Introduction to Research (2 units)

Course Description: Introduction to types of research, including the basics of joint research with a faculty mentor. Self-assessments to identify areas of interest, priorities, and fit. Literature search and library skills used in early stages of research. Research safety, integrity, and intellectual property.

Learning Activities: Web Virtual Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

BIM 089A – Topics in Biomedical Engineering (1-5 units)

Course Description: Topics in Biomedical Engineering. (A) Cellular and Molecular Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Enrollment Restriction(s): Restricted to lower division students.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 089B – Topics in Biomedical Engineering (1-5 units)

Course Description: Topics in Biomedical Engineering. (B) Biomedical Imaging.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 089C – Topics in Biomedical Engineering (1-5 units)

Course Description: Topics in Biomedical Engineering. (C) Biomedical Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

BIM 102 – Cellular Dynamics (4 units)

Course Description: Fundamental cell biology for bioengineers. Emphasis on physical concepts underlying cellular processes including protein trafficking, cell motility, cell division and cell adhesion. Current topics including cell biology of cancer and stem cells will be discussed.

Prerequisite(s): BIS 002A; CHE 008B or CHE 118B.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to College of Engineering students only.

Credit Limitation(s): Only 2 units of credit for students who have completed BIS 104.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 105 – Probability & Data Science for Biomedical Engineers (4 units)

Course Description: Concepts of probability, random variables, stochastic processes, mathematical modeling, and data analysis, with applications to biomedical engineering. Includes combinatorics, discrete, continuous, and jointly distributed random variables, probability distributions and models, Markov Chains, and Poisson Processes. Computer labs using MATLAB cover mathematical and computational modeling techniques, hands-on data analysis, and computer simulations.

Prerequisite(s): MAT 022A C- or better or MAT 027A C- or better or BIS 027A C- or better or ENG 006 (can be concurrent); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): No credit for students who have taken MAT 107 or BIS 107; only 2 units of credit for students who have completed MAT 135A or STA 131A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 106 – Biotransport Phenomena (4 units)

Course Description: Principles of momentum and mass transfer with applications to biomedical systems; emphasis on basic fluid transport related to blood flow, mass transfer across cell membranes, and the design and analysis of artificial human organs.

Prerequisite(s): BIM 020 C- or better; BIM 020L; (BIM 116 or BIM 181 or NPB 101); PHY 009B; (MAT 022B or MAT 027B or BIS 027B).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Biomedical Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

BIM 107 – Manufacturing Processes for BME (2 units)

Course Description: Manufacturing processes and computer numerical control methods applied to the design and fabrication of biomedical devices.

Prerequisite(s): BIM 020 C- or better; BIM 020L C- or better.

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to BME majors only.

Credit Limitation(s): No credit for students who have previously taken EME 050.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 108 – Biomedical Signals & Control (4 units)

Course Description: Systems and control theory applied to biomedical engineering problems. Time-domain and frequency-domain analyses of signals and systems, convolution, Laplace and Fourier transforms, transfer function, dynamic behavior of first and second order processes, and design of control systems for biomedical applications.

Prerequisite(s): ENG 006; (ENG 017 or ENG 017V); (MAT 022B C- or better or MAT 027B C- or better or BIS 027B C- or better).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to Biomedical Engineering majors only.

Credit Limitation(s): No credit for students who have taken EEC 150; 2 units of credit for students who have taken EME 171.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 109 – Biomaterials (4 units)

Course Description: Introduce important concepts for design, selection and application of biomaterials. Given the interdisciplinary nature of the subject, principles of polymer science, surface science, materials science and biology will be integrated into the course.

Prerequisite(s): BIS 002A; CHE 002C; BIM 106.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to Biomedical Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

BIM 110A – Biomedical Engineering Senior Design Experience (3 units)

Course Description: Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution to a biomedical problem. Continues in BIM 110B.

Prerequisite(s): BIM 105; BIM 106; BIM 107; BIM 108; BIM 109; BIM 020L; (BIM 116 or BIM 181 or NPB 101).

Learning Activities: Lecture/Discussion 2 hour(s), Project 6 hour(s).

Enrollment Restriction(s): Restricted to senior Biomedical Engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Visual Literacy (VL).

BIM 110B – Biomedical Engineering Senior Design Experience (3 units)

Course Description: Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution to a biomedical problem. Continues in BIM 110C.

Prerequisite(s): BIM 110A.

Learning Activities: Lecture/Discussion 2 hour(s), Project 6 hour(s).

Enrollment Restriction(s): Restricted to senior Biomedical Engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Visual Literacy (VL).

BIM 110C – Biomedical Engineering Senior Design Experience (3 units)

Course Description: Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution to a biomedical problem.

Prerequisite(s): BIM 110B.

Learning Activities: Lecture/Discussion 2 hour(s), Project 6 hour(s).

Enrollment Restriction(s): Restricted to senior Biomedical Engineering majors.

Grade Mode: Letter.

General Education: Oral Skills (OL); Visual Literacy (VL).

BIM 111 – Biomedical Instrumentation Laboratory (6 units)

Course Description: Basic biomedical signals and sensors. Topics include analog and digital records using electronic, hydrodynamic, and optical sensors, and measurements made at cellular, tissue and whole organism level.

Prerequisite(s): BIM 105; BIM 106; BIM 107; BIM 108; BIM 109; (ENG 100 or EEC 100); (BIM 116 or BIM 181 or NPB 101).

Learning Activities: Lecture 4 hour(s), Discussion/Laboratory 4 hour(s).

Enrollment Restriction(s): Open to Biomedical Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 116 – Quantitative Physiology (5 units)

Course Description: Human physiology from a quantitative and engineering perspective; quantitative models to understand human physiology of the pulmonary and cardiovascular systems with an emphasis on organ transport (convection and diffusion) and biomechanics.

Prerequisite(s): BIS 002A C- or better; BIM 020 C- or better; (MAT 022B or MAT 027B or BIS 027B); PHY 009C recommended.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Open to students in the Biomedical Engineering (EBIM) major only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 117 – Modeling Strategies for Biomedical Engineering (4 units)

Course Description: Non-simulation strategies for modeling biomedical engineering systems, including natural and synthetic systems at the cell and molecular level. Formulating and testing hypotheses by translating real-world problems into appropriate mathematical models, translating mathematical results into real-world understanding, and gaining appreciation for how models contribute to the development cycle of biomedical engineering applications.

Prerequisite(s): BIS 002A C- or better; MAT 022A C- or better.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 118 – Microelectromechanical Systems (4 units)

Course Description: Introduction to the theory and practice of microelectromechanical systems (MEMS), including fundamentals of micro-nanofabrication, microscale sensing and actuation, self assembly, microfluidics and lab-on-a-chip. Weekly hands-on laboratory sections are emphasized on implementation and utilization of MEMS technologies.

Prerequisite(s): CHE 002A; (ENG 017 or ENG 017V).

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to upper division standing in Biomedical Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 120 – Introduction to Materials Science for Biomedical Engineers (4 units)

Course Description: Historical perspective on materials usage in the body. Fundamental properties of materials and key considerations needed for material selection in the context of biomedical applications. Case studies of commonly used biomaterials spanning a range of material types.

Prerequisite(s): (BIM 020 C- or better or ENG 105 C- or better); PHY 009C; MAT 022B or MAT 27B or BIS 027B recommended.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to upper division Biomedical Engineering students only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 125 – Introduction to Design & Analysis of Experiments for BME (4 units)

Course Description: Basic concepts and methods in design of experiments with biomedical engineering applications. Statistical concepts and methods to study strategies to design efficient industrial experiments that can improve data quality and simplify data analysis.

Prerequisite(s): BIM 105 or STA 100.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 126 – Tissue Mechanics (3 units)

Course Description: Structural and mechanical properties of biological tissues, including bone, cartilage, ligaments, tendons, nerves, and skeletal muscle.

Prerequisite(s): EXB 103 or ENG 045 or ENG 045Y.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 140 – Protein Engineering (4 units)

Course Description: Introduction to protein structure and function. Modern methods for designing, producing, and characterizing novel proteins and peptides. Design strategies, computer modeling, heterologous expression, in vitro mutagenesis. Protein crystallography, spectroscopic and calorimetric methods for characterization, and other techniques.

Prerequisite(s): BIS 002A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

BIM 140L – Protein Engineering Laboratory (2 units)

Course Description: Optional hands-on laboratory for BIM 140. Students use the engineering design process to design, build, and test a solution to a practical problem in the field of protein engineering. Problems change each offering.

Prerequisite(s): BIM 140 (can be concurrent); concurrent enrollment in BIM 140 required.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 141 – Cell & Tissue Mechanics (4 units)

Course Description: Mechanical properties that govern blood flow in the microcirculation. Concepts in blood rheology and cell and tissue viscoelasticity, biophysical aspects of cell migration, adhesion, and motility.

Prerequisite(s): PHY 009B; ENG 006; ENG 035.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

BIM 142 – Principles & Practices of Biomedical Imaging (4 units)

Course Description: Basic physics, engineering principles, and applications of biomedical imaging techniques including x-ray imaging, computed tomography, magnetic resonance imaging, ultrasound and nuclear imaging.

Prerequisite(s): (MAT 022B or MAT 027B or BIS 027B); PHY 009B.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 143 – Biomolecular Systems Engineering: Synthetic Biology (4 units)

Course Description: Includes analysis, design, construction and characterization of molecular systems. Process and biological parts standardization, computer aided design, gene synthesis, directed evolution, protein engineering, issues of human practice, biological safety, security, innovation, and ethics are covered.

Prerequisite(s): BIS 002A; (MAT 016C or MAT 017C or MAT 021C).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 143L – Synthetic Biology Laboratory (2 units)

Course Description: Optional hands-on laboratory for BIM 143. Students solve a practical problem in the field of synthetic biology by designing, building, and testing an appropriate solution or product. Problems change each offering.

Prerequisite(s): BIM 143 (can be concurrent); concurrent enrollment in BIM 143 required.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 144 – Principles of Biophotonics (4 units)

Course Description: Principles of biophotonics, emphasizing quantitative description of light propagation, light tissue interactions, and working operation and design of biosensors and devices for optical imaging for detection of biomolecules. Key technologies and illustrative applications in basic research, clinical diagnostics, and therapy.

Prerequisite(s): PHY 009B; (MAT 022B or MAT 027B or BIS 027B); or consent of instructor; BIM 108 or equivalent helpful.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to upper division Biomedical Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 145 – Immuno-Engineering (4 units)

Course Description: Basic immunology and immunological tools. Survey of current immuno-therapeutic strategies. Ongoing research efforts to engineer the immune system for positive diagnostic and therapeutic outcomes.

Prerequisite(s): BIM 161A or BIS 102.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 146 – Biomedical Image Processing (4 units)

Course Description: Concepts and tools of digital image processing with focus on biomedical images. Mathematical basics of various transforms used in image processing. Image denoising, image segmentation, feature extraction, image registration, and image classification. Image processing algorithms in MATLAB. Coding to process biomedical images. Essential scientist skills, including scientific writing, reading, and presentations.

Prerequisite(s): (BIM 105 C- or better or STA 131A C- or better); (BIM 108 C- or better or EEC 150 C- or better); or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to College of Engineering students only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 151 – Computational Tools & Applications in Bioengineering & Biomedicine (4 units)

Course Description: State-of-the-art computational tools and methods for biomolecular systems in bioengineering and biomedicine applications. Foundations, methods, and tools for the design of aptamers in biosensor applications, design of cancer vaccines, identification of therapeutic targets in cancer pathways, control of signal transduction networks disrupted in disease, and design of transcriptional programs for genetic engineering.

Prerequisite(s): BIS 002A; PHY 009B; (MAT 022B or MAT 027B or BIS 027B).

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 152 – Molecular Control of Biosystems (4 units)

Course Description: Fundamentals of molecular biomedicine covering state-of-the-art methods for quantitative understanding of gene regulation and signal transduction networks at different levels of organization in health and disease. Topics include classic genetic systems, synthetic circuits, networks disrupted in disease and cancer.

Prerequisite(s): BIS 002A; PHY 009B; (MAT 022B or MAT 027B or BIS 027B).

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL).

BIM 154 – Computational Genomics (4 units)

Course Description: Fundamental computational and probabilistic modeling techniques underlying analytical approaches to recent problems in functional genomics and molecular biology; DNA sequencing technologies; sequencing-based genomic assays; genomics and molecular biology lab techniques; gene expression quantification; nucleic acid structure; statistical inference and parameter estimation; resampling methods; simulations of genomic big data sets.

Prerequisite(s): ENG 006 C- or better; MAT 021D C- or better; (MAT 022A C- or better or MAT 027A C- or better or BIS 027A C- or better); BIM 105 C- or better.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 155 – Machine Learning for Biomedical Engineering (4 units)

Course Description: Selected machine learning methods with biomedical engineering applications. Machine learning algorithms including linear regression, logistic regression, support vector machines, decision trees, fully connected neural networks, and clustering methods. Computer labs provide applications of machine learning algorithms to biomedical data.

Prerequisite(s): ENG 006 C- or better; (MAT 022A or MAT 027A or BIS 027A); BIM 105; BIM 108 (can be concurrent); ECS 032B recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to upper division Biomedical Engineering majors only.

Credit Limitation(s): No credit if student has taken ECS 111, ECS 171, or EEC 179; 3 units of credit if student has taken EEC 174AY or NPB 136.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 161A – Biomolecular Engineering (4 units)

Course Description: Introduction to the basic concepts and techniques of biomolecular engineering such as recombinant DNA technology, protein engineering, and molecular diagnostics.

Prerequisite(s): BIS 002A; CHE 008B or CHE 118B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Credit Limitation(s): Only 3 units of credit for students who have taken BIM 161S.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

BIM 161L – Biomolecular Engineering Laboratory (3 units)

Course Description: Introduction to the basic techniques in biomolecular engineering. Lectures, laboratory, and discussion sessions will cover basic techniques in DNA cloning, bacterial cell culture, gene regulation, protein expression, and data analysis.

Prerequisite(s): BIM 161A or BIS 101.

Learning Activities: Laboratory 4.50 hour(s), Lecture/Discussion 1.50 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

BIM 162 – Introduction to the Biophysics of Molecules & Cells (4 units)

Course Description: Introduction to fundamental physical mechanisms governing structure and function of bio-macromolecules. Emphasis on a quantitative understanding of the nano- to microscale biomechanics of interactions between and within individual molecules, as well as of their assemblies, in particular membranes.

Prerequisite(s): PHY 009C C- or better; (MAT 022B C- or better or MAT 027B C- or better or BIS 027B C- or better).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

BIM 163 – Bioelectricity, Biomechanics, & Signaling Systems (4 units)

Course Description: Fundamentals of bioelectricity in cells, the calcium signaling system, and mechanical force generation in muscle.

Combination of lecture and projects to promote learning of important concepts in hands-on projects using neurons and muscle as microcosms.

Prerequisite(s): (BIM 116 or BIM 181 or NPB 101); (MAT 022B C- or better or MAT 027B C- or better or BIS 027B C- or better).

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

BIM 167 – Biomedical Fluid Mechanics (4 units)

Course Description: Theories of fluid mechanics, including Navier Stokes Equation and Conservation Laws, will be presented to understand dynamics of human circulatory systems. Fluid dynamics will be analyzed using partial differential equations.

Prerequisite(s): BIM 106 C- or better; (NPB 101 or BIM 116 or BIM 181).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 170 – Aspects of Medical Device Design & Manufacturing (2 units)

Course Description: Survey of medical device design & impact on manufacturing operations. Introduction to medical device design process & product lifecycle. Principles of Design for Manufacturability, Design for Lean Manufacturing, and quality management systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to upper division Biomedical Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 171 – Clinical Applications for Biomedical Device Design (4 units)

Course Description: Clinical applications for biomedical devices with emphasis in the pathophysiology of common diseases as it relates to the biodesign process, biosensors principles, in vitro diagnostics, needs assessment, and regulatory considerations.

Prerequisite(s): BIM 116 C- or better or BIM 181 C- or better or NPB 101 C- or better; NPB 101 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Biomedical Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 172 – Introduction to Neuroengineering Lab (2 units)

Course Description: Basics of electroencephalography (EEG). Recording EEG signals from the brain. Machine learning tools for brain-computer interface (BCI) techniques. The power of neural signals to improve health outcomes.

Prerequisite(s): BIM 105; (ENG 100 or EEC 100).

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 173 – Cell & Tissue Engineering (4 units)

Course Description: Engineering principles to direct cell and tissue behavior and formation. Cell sourcing, controlled delivery of macromolecules, transport within and around biomaterials, bioreactor design, tissue design criteria and outcomes assessment.

Prerequisite(s): BIM 106 C- or better; BIM 109 C- or better.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL); Writing Experience (WE).

BIM 174 – Microcontroller Applications Lab (2 units)

Course Description: Hands-on design module to introduce microcontroller platforms, e.g., Arduino; programming microcontroller development board, use of external programs to support development of controlled systems, design of simple control systems.

Prerequisite(s): ENG 017 C- or better or ENG 017V C- or better..

Learning Activities: Laboratory 3 hour(s), Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to upper division BME students.

Credit Limitation(s): No credit for students who have previously taken EEC 010.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 176 – Microfluidic Lab (2 units)

Course Description: Theory and practice of microfluidic and lab-on-a-chip (LOC) systems. Microfluidic theories, microfluidic functions and operations, microfluidic sensing, and organ-on-a-chip development. Laboratory sections emphasize implementation and utilization of modern microfluidic devices, interfacial phenomena, and digital and droplet microfluidics.

Prerequisite(s): CHE 002A; (ENG 017 or ENG 017V).

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Upper division standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 177 – Introduction to Rapid Prototyping for BME (2 units)

Course Description: Introduction to additive manufacturing techniques (3D printing), laser cutting, and other rapid prototyping technologies, their strengths and limitations. Emphasis on workflows and design considerations including features that enhance function, manufacturability, and common pitfalls. Application to problems in biology and medicine, including medical model development.

Prerequisite(s): BIM 110A; BIM 020L.

Learning Activities: Laboratory 2 hour(s); Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to Biomedical Engineering seniors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 178 – Biomedical Engineering Cell Culture Laboratory (2 units)

Course Description: Fundamentals of cell culture techniques in the context of biomedical engineering research and applications. Lab basics and safety, basic wet bench skills, pipetting, aseptic technique, and fundamental two-dimensional and three-dimensional cell culture processes.

Prerequisite(s): BIM 116 or BIM 181 or NPB 101.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to upper division Biomedical Engineering majors only.

Credit Limitation(s): 1 unit of credit if student has taken ANS 133.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 180 – Clinical Needs in Healthcare Settings (5 units)

Course Description: Unique hands-on experience that brings students into clinical arenas where biomedical technologies are deployed, such as surgical suites and operating rooms. Direct interaction with surgeons, radiologists and other medical providers on how engineering concepts and techniques can be applied. Development of skills necessary to identify unmet clinical needs, including observations in workflow and communication skills.

Prerequisite(s): Consent of instructor; complete all BME lower division coursework; must apply and be selected to the BME Quarter at Aggie Square program.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Biomedical Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 181 – Clinical Physiology for Engineers (5 units)

Course Description: Physiological systems and their integration and homeostatic control. Biology and physics of tissues and organ systems. Disease processes. Application to clinical problems and approaches via case studies.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s), Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to Biomedical Engineering majors only; must be selected to Biomedical Engineering Quarter at Aggie Square program.

Credit Limitation(s): Only 2 units of credit if student has taken BIM 116, or NPB 110C, or NPB 101.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 189A – Topics in Biomedical Engineering: Cellular & Molecular Engineering (1-5 units)

Course Description: Topics in Biomedical Engineering: Cellular & Molecular Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 189B – Topics in Biomedical Engineering: Biomedical Imaging (1-5 units)

Course Description: Topics in Biomedical Engineering: Biomedical Imaging.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 189C – Topics in Biomedical Engineering: Biomedical Engineering (1-5 units)

Course Description: Topics in Biomedical Engineering: Biomedical Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIM 190A – Upper Division Seminar in Biomedical Engineering (1 unit)

Course Description: In depth examination of research topics in a small group setting. Question and answer session with faculty members.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

BIM 192 – Internship in Biomedical Engineering (1-12 units)

Course Description: Supervised work experience in the Biomedical Engineering field.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Enrollment Restriction(s): Restricted to upper division majors.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

BIM 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated 3 time(s) when content differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

BIM 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

BIM 201 – Scientific Communication for Biomedical Engineers (1 unit)

Course Description: Designed to improve the written and oral communication skills of first-year graduate students through writing fellowship proposals, analyzing data, and critically reviewing research papers.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

BIM 202 – Cell & Molecular Biology for Engineers (4 units)

Course Description: Preparation for research and critical review in the field of cell and molecular biology for biomedical or applied science engineers. Emphasis on biophysical and engineering concepts intrinsic to specific topics including receptor-ligand dynamics in cell signaling and function, cell motility, DNA replication and RNA processing, cellular energetics and protein sorting. Modern topics in bioinformatics and proteomics.

Prerequisite(s): BIS 104 or MCB 121.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

BIM 204 – Physiology for Bioengineers (5 units)

Course Description: Basic human physiology of the nervous, muscular, cardiovascular, respiratory, and renal systems and their interactions; Emphasis on the physical and engineering principles governing these systems, including control and transport processes, fluid dynamics, and electrochemistry.

Prerequisite(s): BIS 001A; or equivalent; graduate standing or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 208Y – Towards Well-Being (2 units)

Course Description: Mental health issues, key elements in collaboration and team science, and select coping skills to deal with common graduate school stressors. Self-efficacy, resilience, problem-solving, conflict resolution, self-compassion, and role of psychosocial factors in well-being. Wellness topics in art therapy, interaction with nature, soothing sound/music, cooking, and walking. Mind-body activities. Extensive small group discussion.

Learning Activities: Web Electronic Discussion 1 hour(s); Lecture/Discussion 1 hour(s).

Grade Mode: S/U only.

BIM 209 – Scientific Integrity for Biomedical Engineers (2 units)

Course Description: Scientific integrity and ethics for biomedical engineers, with emphasis and discussion on mentoring, authorship and peer review, use of humans and animals in biomedical research, conflict of interest, intellectual property, genetic technology and scientific record keeping.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Biomedical Engineering majors only.

Grade Mode: Satisfactory/Unsatisfactory only.

BIM 210 – Introduction to Biomaterials (4 units)

Course Description: Mechanical and atomic properties of metallic, ceramic, and polymeric implant materials of metallic, ceramic, and polymeric implant materials; corrosion, degradation, and failure of implants; inflammation, wound and fracture healing, blood coagulation; properties of bones, joints, and blood vessels; biocompatibility of orthopaedic and cardiovascular materials.

Prerequisite(s): ENG 045 or ENG 045Y; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 211 – Design of Polymeric Biomaterials & Biological Interfaces (4 units)

Course Description: Design, selection and application of polymeric biomaterials. Integration of the principles of polymer science, surface science, materials science and biology.

Prerequisite(s): ENG 045 or ENG 045Y; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to upper division undergraduates or graduate students.

Grade Mode: Letter.

BIM 212 – Biomedical Heat & Mass Transport Processes (4 units)

Course Description: Application of principles of heat and mass transfer to biomedical systems related to heat exchange between the biomedical system and its environment, mass transfer across cell membranes and the design and analysis of artificial human organs.

Prerequisite(s): EME 165; EBS 125; ECH 153; or equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: MAE 212.

Grade Mode: Letter.

BIM 213 – Principles & Applications of Biological Sensors (4 units)

Course Description: Biological sensors based on principles of electrochemical, optical and affinity detection. Methods for integration of sensing elements (e.g. enzymes) into biosensors and miniaturization of biosensors.

Prerequisite(s): CHE 002C.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 214 – Continuum Biomechanics (4 units)

Course Description: Continuum mechanics relevant to bioengineering. Concepts in tensor calculus, kinematics, stress and strain, and constitutive theories of continua. Selected topics in bone, articular cartilage, blood/circulation, and cell biomechanics will illustrate the derivation of appropriate continuum mechanics theories.

Prerequisite(s): BIM 141; ENG 102; or equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 216 – Advanced topics in Cellular Engineering (4 units)

Course Description: Advanced research strategies and technologies used in the study of immune function and inflammation. Static and dynamic measurements of stress, strain, and molecular scale forces in blood and vascular cells, as well as genetic approaches to the study of disease.

Prerequisite(s): BIM 214; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 217 – Mechanobiology in Health & Disease (4 units)

Course Description: Principles by which biomechanical forces affect cell and tissue function to impact human health and disease. Emphasis on cardiovascular system: structure and function, biofluid mechanics and mechanotransduction, disease mechanisms and research methods.

Cartilage, bone and other systems; current topics discussed.

Prerequisite(s): BIM 106; BIS 101; NPB 101; or equivalents.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

BIM 221 – Drug Delivery Systems (4 units)

Course Description: Fundamental engineering and biotechnology principles critical for the formulation and delivery of therapeutic agents, including peptide/protein drugs and small molecules.

Prerequisite(s): BIM 204 recommended but not required.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

BIM 222 – Cytoskeletal Mechanics (4 units)

Course Description: Current topics in cytoskeletal mechanics including physical properties of the cytoskeleton and motor proteins, molecular force sensor and generator, cytoskeletal regulation of cell motility and adhesion.

Prerequisite(s): BIM 202.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

BIM 223 – Multibody Dynamics (4 units)

Course Description: Coupled rigid-body kinematics/dynamics; reference frames; vector differentiation; configuration and motion constraints; holonomicity; generalized speeds; partial velocities; mass; inertia tensor/theorems; angular momentum; generalized forces; comparing Newton/Euler, Lagrange's, Kane's methods; computer-aided equation derivation; orientation; Euler; Rodrigues parameters.

Prerequisite(s): ENG 102.

Learning Activities: Lecture 4 hour(s).

Cross Listing: MAE 223.

Grade Mode: Letter.

BIM 225 – Spatial Kinematics & Robotics (4 units)

Course Description: Spatial kinematics, screw theory, spatial mechanisms analysis and synthesis, robot kinematics and dynamics, robot workspace, path planning, robot programming, real-time architecture and software implementation.

Prerequisite(s): BIM 222; C Language.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: MAE 225.

Grade Mode: Letter.

BIM 228 – Skeletal Muscle Mechanics: Form, Function, Adaptability (4 units)

Course Description: Basic structure and function of skeletal muscle examined at the microscopic and macroscopic level. Muscle adaptation in response to aging, disease, injury, exercise, and disuse. Analytic models of muscle function are discussed.

Prerequisite(s): ENG 035; (ENG 045 or ENG 045Y); MAT 021D; basic background in biology, physiology, and engineering; NPB 101 recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 232 – Skeletal Tissue Mechanics (3 units)

Course Description: Overview of the mechanical properties of the various tissues in the musculoskeletal system, the relationship of these properties to anatomic and histologic structure, and the changes in these properties caused by aging and disuse.

Prerequisite(s): Engineering 104B.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Cross Listing: MAE 232.

Grade Mode: Letter.

BIM 233 – Soft Tissue Mechanics (4 units)

Course Description: Presentation of structure and function of musculoskeletal soft tissues: cartilage, tendon, ligament, meniscus, and intervertebral disc. Instruction in engineering principals governing the mechanical behavior of these tissues: viscoelasticity, quasilinear viscoelasticity, and biphasic theory.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 239 – Advanced Finite Elements & Optimization (4 units)

Course Description: Introduction to advanced finite elements and design optimization methods, with application to modeling of complex mechanical, aerospace and biomedical systems. Application of states of the art in finite elements in optimum design of components under realistic loading conditions and constraints.

Prerequisite(s): ENG 180 or MAT 128C or EAD 115.

Learning Activities: Lecture 4 hour(s).

Cross Listing: MAE 239.

Grade Mode: Letter.

BIM 240 – Computational Methods in Nonlinear Mechanics (4 units)

Course Description: Deformation of solids and the motion of fluids treated with state-of-the-art computational methods. Numerical treatment of nonlinear dynamics; classification of coupled problems; applications of finite element methods to mechanical, aeronautical, and biological systems.

Prerequisite(s): MAT 128B or ENG 180 or EAD 115.

Learning Activities: Lecture 4 hour(s).

Cross Listing: MAE 240.

Grade Mode: Letter.

BIM 241 – Introduction to Magnetic Resonance Imaging (4 units)

Course Description: Basic hardware, acquisition, and reconstruction of MRI. Basic and advanced pulse sequences, MRI sequence design and sampling requirements, and image reconstruction strategies. Clinical applications of MRI.

Prerequisite(s): BIM 108; PHY 009D.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

BIM 242 – Introduction to Biomedical Imaging (4 units)

Course Description: Basic physics and engineering principles of image science. Emphasis on ionizing and nonionizing radiation production and interactions with the body and detectors. Major imaging systems: radiography, computed tomography, magnetic resonance, ultrasound, and optical microscopy.

Prerequisite(s): PHY 009D; EEC 106 or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 243 – Radiation Detectors for Biomedical Applications (4 units)

Course Description: Radiation detectors and sensors used for biomedical applications. Emphasis on radiation interactions, detection, measurement and use of radiation sensors for imaging. Operating principles of gas, semiconductor, and scintillation detectors.

Prerequisite(s): PHY 009D; MAT 021D; MAT 022B.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

BIM 246 – Magnetic Resonance Technology (3 units)

Course Description: Covers MRI technology at an advanced level with emphasis on mathematical descriptions and problem solving. Topics include spin dynamics, signal generation, image reconstruction, pulse sequences, biophysical basis of T1, T2, RF, gradient coil design, signal to noise, image artifacts.

Prerequisite(s): PHY 009D; MAT 022B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BIM 248 – Multi-modal Neuroimaging Techniques (4 units)

Course Description: Neuroimaging techniques including magnetic resonance imaging (MRI) and positron emission tomography (PET) and their multi-modal applications in neuroscience and neurological disorders. Imaging methods and brain biomarkers. Software and coding experience to analyze imaging datasets of brain structure, function, and pathology.

Prerequisite(s): BIM 108; BIM 142.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

BIM 251 – Medical Image Analysis (4 units)

Course Description: Techniques for assessing the performance of medical imaging systems. Principles of digital image formation and processing. Measurements that summarize diagnostic image quality and the performance of human observers viewing those images. Definition of ideal observer and other mathematical observers that may be used to predict performance from system design features. Obtain hands-on experience in computer vision by completing individual Matlab assignments that they select from topics in the course.

Prerequisite(s): EEC 106.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 252 – Computational Methods in Biomedical Imaging (4 units)

Course Description: Analytic tomographic reconstruction from projections in 2D and 3D; model-based image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT.

Prerequisite(s): (BIM 105 or STA 120); (BIM 108 or EEC 150A).

Learning Activities: Lecture 4 hour(s).

Cross Listing: EEC 205.

Grade Mode: Letter.

BIM 254 – Statistical Methods in Genomics (4 units)

Course Description: Statistical approaches to problems in computational molecular biology and genomics; formulation of questions via probabilistic modeling, statistical inference methods for parameter estimation, and interpretation of results to address biological questions; application to high-impact problems in functional genomics and molecular biology.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 255 – Nanoscale Imaging for Molecular Medicine (3 units)

Course Description: Current and emerging technologies to visualize biological structures and processes at size scales = 100 nanometers – and their application towards the advancement of molecular medicine. Technologies include superresolution optical microscopy, electron microscopy and tomography. Emphasis on quantitative imaging.

Prerequisite(s): BIM 202 highly recommended; graduate standing.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: BPH 255.

Grade Mode: Letter.

BIM 257 – Fundamentals of Tissue Optics & Biomedical Applications (5 units)

Course Description: Fundamentals of optical properties of tissue. Range of optical technologies and their applications to tissue characterization and diagnostics.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

BIM 258 – Advanced Biophotonics & Bioimaging (4 units)

Course Description: Quantitative basis for biophotonics and bioimaging, with an emphasis on the physical and mathematical description of optics, light propagation, and light-tissue interactions. Advantages and limitations of various optical imaging and sensing technologies. Illustrative applications in diagnostics, basic research, and therapy.

Prerequisite(s): BIM 108; PHY 108; or an equivalent undergraduate optics course to PHY 108.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 260 – Techniques in Molecular & Cellular Mechanics (4 units)

Course Description: Physical techniques used to visualize and manipulate mechanical processes in cells. Biophysical techniques used to characterize cellular and molecular mechanics, with a particular emphasis on single molecule technologies.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

BIM 262 – Cell & Molecular Biophysics for Bioengineers (4 units)

Course Description: Introduction to fundamental mechanisms governing the structure, function, and assembly of bio-macromolecules. Emphasis is on a quantitative understanding of the nano-to-microscale interactions between and within individual molecules, as well as of their assemblies, in particular membranes.

Prerequisite(s): BIM 284; or equivalent; graduate standing; undergraduate students by consent of instructor.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed BIM 162.

Cross Listing: ECH 269.

Grade Mode: Letter.

BIM 263 – Optical Microscopy Hands-On (4 units)

Course Description: Informed use of an optical research microscope. Analysis of digitized images. Optical image formation and its limitations. Laboratories on modern microscope usage and videomicroscopy techniques including optimization of recorded images and quantification of microscopic distances and displacements.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

BIM 264 – Synthetic & Systems Engineering of Cells (4 units)

Course Description: Introduction to the design, engineering, and control of biological systems for biotechnological applications and biological studies.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 265 – NanoEngineering (4 units)

Course Description: Inorganic and organic nanomaterials and their technological applications in medicine, imaging, energy harvesting, and computing. Fundamentals and applications of methods to fabricate, image, and analyze materials and devices that are structured at the nanometer scale. Intermolecular forces between atoms and molecules and how these forces give rise to exploitable phenomena at the nanoscale.

Prerequisite(s): BIM 109 or BIM 120.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

BIM 272 – Tissue Engineering (3 units)

Course Description: Based on morphogenetic signals, responding stem cells and extracellular matrix scaffolding. Design and development of tissues for functional restoration of various organs damaged/lost due to cancer, disease and trauma. Fundamentals of morphogenetic signals, responding stem cells and extracellular matrix scaffolding.

Prerequisite(s): BIS 104 or MCB 121.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

BIM 273 – Integrative Tissue Engineering & Technologies (4 units)

Course Description: Engineering principles to direct cell and tissue behavior and formation. Contents include controlled delivery of macromolecules, transport within and around biomaterials, examination of mechanical forces of engineered constructs, and current experimental techniques used in the field.

Prerequisite(s): BIM 202; BIM 204; or equivalent; strongly encourage completion of BIM 272 although not a prerequisite.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to graduate standing.

Grade Mode: Letter.

BIM 280 – Neural Signals & Machine Learning Tools for Neural Data (4 units)

Course Description: Select and use machine learning tools to analyze neural data. Knowledge of the definitions and fundamental principles of data analytics related to neural data including field potentials (EEG, iEEG, local field potentials, EMG) and single neuron or muscle action potentials. Neural decoding/encoding, how to apply classifiers, regression and dimension reduction techniques, factor analysis and dynamic modeling.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

BIM 281 – Acquisition & Analysis of Biomedical Signals (4 units)

Course Description: Basic concepts of digital signal recording and analysis; sampling; empirical modeling; Fourier analysis, random processes, spectral analysis, and correlation applied to biomedical signals.

Prerequisite(s): ENG 100; STA 130A.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to upper division engineering.

Grade Mode: Letter.

BIM 283 – Advanced Design of Experiments for Biomedical Engineers (4 units)

Course Description: Provides biomedical engineering graduate students with the tools to properly design experiments, collect and analyze data, and extract, communicate and act on information generated.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Credit Limitation(s): Not open for credit to students who have taken EBS 265.

Grade Mode: Letter.

BIM 284 – Mathematical Methods for Biomedical Engineers (4 units)

Course Description: Theoretical applications of linear systems, ordinary and partial differential equations, and probability theory and random processes that describe biological systems and instruments that measure them. Students will be introduced to numerical solution techniques in MATLAB.

Prerequisite(s): MAT 022B; STA 130A; or consent of instructor; upper division biomedical engineering majors, and graduate students in sciences and engineering; priority given to Biomedical Engineering graduate students.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

BIM 286 – Nuclear Imaging in Medicine & Biology (4 units)

Course Description: Radioactive decay, interaction of radiation with matter, radionuclide production, radiation detection, digital autoradiography, gamma camera imaging, single photon emission computed tomography, positron emission tomography and applications of these techniques in biology and medicine.

Prerequisite(s): BIM 243; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

BIM 287 – Concepts in Molecular Imaging (4 units)

Course Description: Current techniques and tools for molecular imaging. Emphasis on learning to apply principles from the physical sciences to imaging problems in medicine and biology.

Prerequisite(s): CHE 002C; MAT 021C; PHY 009D; and consent of instructor.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 2 hour(s), Term Paper.

Grade Mode: Letter.

BIM 288 – Living Matter: Physical Biology of the Cell (3 units)

Course Description: Introduction to the origin, maintenance, and regulation of the dynamic architecture of the cell, including cellular modes of organization, dynamics and energy dissipation, molecular transport, motility, regulation, and adaptability.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to any student possessing general background in any disciplines of physical or biological sciences and engineering.

Cross Listing: EMS 288, BPH 288.

Grade Mode: Letter.

BIM 289A – Selected Topics in Biomedical Engineering: Cellular & Molecular Systems Engineering (1-5 units)

Course Description: Selected topics in Cellular and Molecular Systems Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

BIM 289B – Selected Topics in Biomedical Engineering: Biomedical Imaging (1-5 units)

Course Description: Selected topics in Biomedical Imaging.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

BIM 289C – Selected Topics in Biomedical Engineering: Computational Bioengineering (1-5 units)

Course Description: Selected topics in Computational Bioengineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

BIM 289D – Selected Topics in Biomedical Engineering: Cell & Tissue Biomechanics (1-5 units)

Course Description: Selected topics in Cell and Tissue Biomechanics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

BIM 289E – Selected Topics in Biomedical Engineering: Analysis of Human Movement (1-5 units)

Course Description: Selected topics in Analysis of Human Movement.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

BIM 290 – Seminar (1 unit)

Course Description: Seminar in biomedical engineering.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

BIM 290C – Graduate Research Conference (1 unit)

Course Description: Individual and/or group conference on problems, progress, and techniques in biomedical engineering research.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

BIM 295 – Literature in Neuroengineering (2 units)

Course Description: Critical presentation and discussion of current literature in neuroengineering.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Repeat Credit: May be repeated.

Cross Listing: NSC 295.

Grade Mode: Satisfactory/Unsatisfactory only.

BIM 298 – Directed Group Study (1-5 units)

Course Description: Directed group study in Biomedical Engineering.

Learning Activities: Variable 1-5 hour(s).

Enrollment Restriction(s): Open to graduate students in the Biomedical Engineering Graduate Group, or consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

BIM 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

BIM 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Biophotonics (BPT)

College of Engineering

BPT 201 – Current Topics in Biophotonics & Bioimaging Research (1 unit)

Course Description: Designed to help graduate students develop and maintain familiarity with the current and past literature in the field of Biophotonics and Bioimaging research and related areas.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated 4 time(s) when subject differs.

Grade Mode: Letter.

BPT 290 – Biophotonics Seminar (1 unit)

Course Description: Presentation of current research in the area of biophotonics by experts in the field, followed by group discussions.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Restricted to graduate standing.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: S/U only.

Biophysics (BPH)

College of Agricultural & Environmental Sciences

BPH 200A – Current Techniques in Biophysics (3 units)

Course Description: Current Techniques in Biophysics. Topics include mathematical methods, modeling, mass spectrometry, stochastic process, scanning probe microscopy, electron microscopy, fluorescence, membrane diffusion/mechanics, and single particle tracking.

Prerequisite(s): BIS 102; CHE 110A; or equivalents.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

BPH 200B – Current Techniques in Biophysics (3 units)

Course Description: Current Techniques in Biophysics. Topics include protein folding, membrane structure and dynamics, Raman spectroscopy, fluorescence resonance energy transfer, time resolved fluorescence, quantum dot, fluorescence imaging, esr, high resolution nmr, and in vivo nmr.

Prerequisite(s): CHE 110A; BIS 102; or equivalent of BIS 102.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

BPH 200LA – Biophysics Laboratory (3 units)

Course Description: One five-week laboratory assignment in the research laboratory of a Biophysics Graduate Group faculty member. Individual research problems with emphasis on methodological/procedural experience and experimental design.

Prerequisite(s): BPH 200 (can be concurrent).

Learning Activities: Laboratory 18 hour(s).

Repeat Credit: May be repeated 4 time(s).

Grade Mode: Letter.

BPH 200LB – Biophysics Laboratory (6 units)

Course Description: Two five-week laboratory assignments in the research laboratories of Biophysics Graduate Group faculty members. Individual research problems with emphasis on methodological/procedural experience and experimental design.

Prerequisite(s): BPH 200 (can be concurrent).

Learning Activities: Laboratory.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

BPH 231 – Biological Nuclear Magnetic Resonance (3 units)

Course Description: Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics.

Prerequisite(s): MCB 221A; or consent of instructor, or the equivalent.

Learning Activities: Lecture 3 hour(s).

Cross Listing: BCM 231.

Grade Mode: Letter.

BPH 241 – Membrane Biology (3 units)

Course Description: Advanced topics on membrane biochemistry and biophysics. Relationship of the unique properties of biomembranes to their roles in cell biology and physiology.

Prerequisite(s): BIS 102; BIS 103; BIS 104; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BPH 255 – Nanoscale Imaging for Molecular Medicine (3 units)

Course Description: Current and emerging technologies to visualize biological structures and processes at size scales = 100 nanometers – and their application towards the advancement of molecular medicine. Technologies include superresolution optical microscopy electron microscopy and tomography. Emphasis on quantitative imaging.

Prerequisite(s): BIM 202 highly recommended; graduate standing.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: BIM 255.

Grade Mode: Letter.

BPH 271 – Optical Methods in Biophysics (4 units)

Course Description: Principal optical techniques used to study biological structures and their related functions. Specific optical techniques useful in the studies of protein-nucleic acid, protein-membrane and protein-protein interactions. Biomedical applications of optical techniques.

Prerequisite(s): BIS 102; EAD 108B; CHE 110A; or equivalents.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

BPH 288 – Living Matter: Physical Biology of the Cell (3 units)

Course Description: Introduction to the origin, maintenance, and regulation of the dynamic architecture of the cell, including cellular modes of organization, dynamics and energy dissipation, molecular transport, motility, regulation, and adaptability.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to any student possessing general background in any disciplines of physical or biological sciences and engineering.

Cross Listing: BIM 288, EMS 288.

Grade Mode: Letter.

BPH 290 – Biophysics Seminar (1 unit)

Course Description: Presentation of current research by experts in biophysics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

BPH 290C – Research Conference in Biophysics (1 unit)

Course Description: Presentation and discussion of faculty and graduate-student research in biophysics.

Prerequisite(s): BPH 299 (can be concurrent); graduate standing in Biophysics and/or consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

BPH 293 – Introduction to Research Topics (1 unit)

Course Description: Presentation of current research activities of the Biophysics Graduate Group faculty. Facilitation of students in developing their research interest, and promoting collegial interactions.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topics differ.

Grade Mode: Satisfactory/Unsatisfactory only.

BPH 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

BPH 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable 3-36 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Biostatistics (BST)**Graduate Studies****BST 222 – Biostatistics: Survival Analysis (4 units)**

Course Description: Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics.

Prerequisite(s): STA 131C.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: STA 222.

Grade Mode: Letter.

BST 223 – Biostatistics: Generalized Linear Models (4 units)

Course Description: Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs.

Prerequisite(s): STA 131C.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: STA 223.

Grade Mode: Letter.

BST 224 – Analysis of Longitudinal Data (4 units)

Course Description: Standard and advanced methodology, theory, algorithms, and applications relevant for analysis of repeated measurements and longitudinal data in biostatistical and statistical settings.

Prerequisite(s): (BST 222 or STA 222); (BST 223 or STA 223); STA 232B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: STA 224.

Grade Mode: Letter.

BST 225 – Clinical Trials (4 units)

Course Description: Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials.

Prerequisite(s): BST 223 or STA 223; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: STA 225.

Grade Mode: Letter.

BST 226 – Statistical Methods for Bioinformatics (4 units)

Course Description: Standard and advanced statistical methodology, theory, algorithms, and applications relevant to the analysis of -omics data.

Prerequisite(s): BST 131C or consent of instructor; data analysis experience recommended.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: STA 226.

Grade Mode: Letter.

BST 227 – Machine Learning in Genomics (4 units)

Course Description: Emerging problems in molecular biology and current machine learning-based solutions to those problem. How deep learning, kernel methods, graphical models, feature selection, non-parametric models and other techniques can be applied to application areas such as gene editing, gene network inference and analysis, chromatin state inference, cancer genomics and single cell genomics.

Prerequisite(s): STA 208 or ECS 171; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Grade Mode: Letter.

BST 252 – Advanced Topics in Biostatistics (4 units)

Course Description: Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; analysis of environmental data; dose-response, nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics.

Prerequisite(s): BST 222; BST 223.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Repeat Credit: May be repeated when topic differs with consent of advisor.

Cross Listing: STA 252.

Grade Mode: Letter.

BST 290 – Seminar in Biostatistics (1 unit)

Course Description: Seminar on advanced topics in the field of biostatistics. Presented by members of the Biostatistics Graduate Group and other guest speakers.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Restricted to graduate standing.

Repeat Credit: May be repeated 12 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

BST 298 – Directed Group Study (1-5 units)

Course Description: Special topics in Biostatistics appropriate for group study at the graduate level.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

BST 299 – Special Study for Biostat Graduate Students (1-12 units)

Course Description: Special topics in Biostatistics appropriate for directed individual study on advanced topics not otherwise covered in the Biostatistics curriculum.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

BST 299D – Dissertation Research (1-12 units)

Course Description: Research in Biostatistics under the supervision of major professor.

Prerequisite(s): Consent of instructor; advancement to Candidacy for Ph.D.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Biotechnology (BIT)

College of Agricultural & Environmental Sciences

BIT 001Y – Introduction to Biotechnology (4 units)

Course Description: Principles and technologies of biotechnology as applied to agriculture, the environment, and medicine. Business plans and presentation pitches for new biotechnology products. Bioinformatics approaches exploring genomic databases and DNA manipulations in silica.

Learning Activities: Lecture 2 hour(s), Web Virtual Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIT 091 – Undergraduate Seminars in Biotechnology (1 unit)

Course Description: Undergraduate oriented seminar series focused on biotechnology research and product development. Speakers from campus and the private sectors discuss ongoing research, product development and biotechnology careers.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Pass/No Pass only.

BIT 092 – Internship in Biotechnology (1-12 units)

Course Description: Work experience on or off campus in subject area pertaining to biotechnology or in a business, industry or agency associated with biotechnology. Internship supervised by faculty member in the animal or plant sciences.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

BIT 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

BIT 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 3-15 hour(s).

Grade Mode: Pass/No Pass only.

BIT 150 – Applied Bioinformatics (4 units)

Course Description: Concepts and programs needed to apply bioinformatics in biotechnology research. Sequence analysis and annotation and use of plant and animal databases for students in biological and agricultural sciences.

Prerequisite(s): BIS 101; (ECS 032A or ECS 032B or ECS 010 or ECS 015 or PLS 021 or PLS 021V); (PLS 120 or STA 013 or STA 013Y or STA 100); or consent of Instructor.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Credit Limitation(s): Only 2 units of credit for students who have completed ECS 124.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

BIT 160 – Principles of Plant Biotechnology (3 units)

Course Description: Principles and concepts of plant biotechnology including recombinant DNA technology, molecular biology, genomics, cell and tissue culture, gene transfer and crop improvement strategies using transgenic crops.

Prerequisite(s): (BIS 001A or BIS 002A); (BIS 101 or PLS 152).

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 160. (Former PLB 160.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIT 161A – Genetics & Biotechnology Laboratory (6 units)

Course Description: Techniques of genetic analysis at the molecular level including recombinant DNA, gene mapping and basic computational biology.

Prerequisite(s): PLS 152 or BIS 101; and consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 9 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 161A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

BIT 161B – Plant Genetics & Biotechnology Laboratory (4 units)

Course Description: Advanced techniques of genetic analysis at the molecular and cellular levels, including transformation, gene expression and analysis of transgenic plants.

Prerequisite(s): PLS 152 or BIS 101; and consent of instructor.

Learning Activities: Lecture 1 hour(s), Laboratory 8 hour(s).

Credit Limitation(s): Not open for credit to students who have taken PLB 161B. (Former PLB 161B.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

BIT 171 – Professionalism & Ethics in Genomics & Biotechnology (3 units)

Course Description: Real and hypothetical case studies to illustrate ethical issues in genomics and biotechnology. Training and practice in difficult ethical situations and evaluating personal and social consequences.

Prerequisite(s): Upper division standing in a natural science major.

Learning Activities: Lecture 1 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

BIT 188 – Undergraduate Research Proposal (3 units)

Course Description: Preparation and review of a scientific proposal. Problem definition, identification of objectives, literature survey, hypothesis generation, design of experiments, data analysis planning, proposal outline and preparation.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: PLS 188.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

BIT 189L – Laboratory Research in Genomics & Biotechnology (2-5 units)

Course Description: Formulating experimental approaches to current questions in biotechnology; performance of proposed experiments.

Prerequisite(s): BIT 188; and consent of instructor.

Learning Activities: Laboratory 3-12 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

BIT 192 – Internship in Biotechnology (1-12 units)

Course Description: Work experience on or off campus in a subject area pertaining to biotechnology or in a business, industry or agency associated with biotechnology. Internship supervised by faculty member in the animal or plant sciences.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

BIT 194H – Honors Thesis in Biotechnology (1-2 units)

Course Description: Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis.

Prerequisite(s): BIT 188; BIT 189L; consent of instructor; senior standing in Biotechnology with 3.250 GPA or higher.

Learning Activities: Independent Study 3-6 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Writing Experience (WE).

BIT 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

BIT 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 3-15 hour(s).

Grade Mode: Pass/No Pass only.

Business Analytics (BAX)

Graduate School of Management

BAX 400 – Foundations of Analytics (4 units)

Course Description: Focuses on teaching the fundamentals of R and SQL. Introduces the topic of numerical optimization, and review the concepts of linear algebra and calculus.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 401 – Information, Insight & Impact (3 units)

Course Description: Introduction to the process of analyzing raw data to gain profitable business insight. Applications selected across organizational functions include prediction, process improvement, and general operational decision-making.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 402 – Organizational Issues in Implementing Analytics (3 units)

Course Description: Review the evolution of analytics in business, how to assemble and manage analytics teams, and the decision life-cycle. Emphasis on structuring communications to improve buy-in from peers and non-quantitatively-inclined colleagues.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 403 – Organizational Effectiveness Workshop (2 units)

Course Description: Examine leadership, communication, and project management within the business, legal and societal contexts in which analytics is applied. Emphasis on privacy, data security, responsibility, and ethics.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

BAX 411 – Problem Structuring (2 units)

Course Description: Synthesize data-rich business challenges using analytic frameworks and techniques for modeling business problems. Emphasis on modeling uncertainty, optimizing multiple criteria, and building consensus.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

BAX 421 – Data Management (2 units)

Course Description: Introduction to the extraction, assembly, storage and organization of data in IT systems.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

BAX 422 – Data Design & Representation (2 units)

Course Description: Introduction to business applications involving standard, streaming, and network data. Emphasis on scalable technologies for processing and analyzing big data for diverse applications.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

BAX 423 – Big Data (3 units)

Course Description: Learn computational reasoning about data representations by mapping conceptual data models to relational structures and analyzing database architectures and design trade-offs.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 424 – Analytics for Logistics & Supply Chain Management (3 units)

Course Description: Introduction to various optimization methods in the domain of logistics and supply chains.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to students in Master of Business Analytics (MSBA) program only.

Grade Mode: Letter.

BAX 431 – Data Visualization (2 units)

Course Description: Extract insights using visualization tools in R, Python, ManyEyes, HTML/CSS, etc. Standard (histograms, boxplots, and dashboards) and specialized (3D, animation, word clouds) formats are covered.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

BAX 441 – Statistical Exploration & Reasoning (3 units)

Course Description: Introduction to statistical reasoning and inference extraction from large data-sets. Learn to obtain preliminary insights and form initial hypotheses through exploratory data analysis (EDA).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 442 – Advanced Statistics (3 units)

Course Description: Continue exploring statistical reasoning using maximum likelihood estimation, Bayesian models, nonparametric models, Monte Carlo Markov Chain, time series, model specification, model selection, and dimension reduction.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 443 – Analytic Decision Making (3 units)

Course Description: Using spreadsheets and specialized modeling tools, explore structured problem solution through meta-heuristics, Monte Carlo simulation, and mathematical optimization.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 452 – Machine Learning (3 units)

Course Description: Construct algorithms for learning from data and analyze the process for deriving business intelligence. Coverage of supervised and unsupervised learning, neural networks, etc.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 453 – Application Domains (3 units)

Course Description: Students explore contemporary and emerging domains for high-yield applications of analytics. Topics: social network analytics, search analytics, health care analytics, Internet of things, supply chain/operations analytics, and marketing analytics.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 461 – Practicum Initiation (3 units)

Course Description: Students form teams, scope their project in light of team capability and business opportunity, create a preliminary structure and solution approach for the core problem, and assess data quality and project risks.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 462 – Practicum Elaboration (2 units)

Course Description: Building on problems chosen in BAX 461, teams refine the business opportunity and draw insights from exploratory data analysis.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

BAX 463 – Practicum Analysis & Implementation (3 units)

Course Description: Focus on completing project deliverables by polishing statistical and non-statistical quantitative analysis, generating insights for technical and business stakeholders, integrating proposed solutions into partner workflows and organizations, and disseminating the findings and outcomes through presentations and publications.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

BAX 464 – Practicum Implementation (4 units)

Course Description: Project teams complete analysis, plan deployment and obtain client buy-in. Culminates in a project presentation, preferably including representatives from the client organization.

Learning Activities: Lecture 2 hour(s), Project, Term Paper, Discussion.

Grade Mode: Letter.

BAX 493 – People Analytics (3 units)

Course Description: Students develop an understanding of how to position themselves as strategic partners in a company's talent management efforts. Explore a range of topics related to people analytics, including hiring and selection, performance evaluation, training/development, promotion, compensation, social networks, diversity, and retention.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Masters in Business Analytics Program only.

Grade Mode: Letter.

BAX 493A – Topics in Business Analytics–Cloud Computing (1 unit)

Course Description: Covers the foundations of cloud computing models including (IaaS) Infrastructure as a Service, (PaaS) Platform as a Service, and Software as a Service (SaaS).

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MSBA program only.

Grade Mode: Letter.

BAX 493B – Topics in Business Analytics– Implementing Machine Learning on the Cloud (1 unit)

Course Description: Covers the four layers of Machine Learning in the cloud: AI services, ML services, ML Engines & Frameworks, and Infrastructure & Serverless Environments and how to implement solutions on all of the layers by using the best abstraction for the task at hand.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MSBA program only.

Grade Mode: Letter.

Cardiology (CAR)

School of Medicine

CAR 192 – Internship in Cardiology (1-12 units)

Course Description: Supervised work experience in cardiology.

Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

CAR 199 – Cardiology Research (1-5 units)

Course Description: Special study by individual arrangement in cardiovascular medicine. Work will include directed readings, laboratory and discussions.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CAR 220 – Basic Science in Cardiology (1 unit)

Course Description: Fundamentals underlying cardiovascular medicine. Including hemodynamics, neural control of the circulation, biochemistry and some experimental design and statistics. Experts in each of these fields will give current information in their areas.

Prerequisite(s): Graduate or medical student status.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CAR 299 – Cardiology Research (1-12 units)

Course Description: Research or special studies.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 40 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CAR 401 – Clinical Cardiology Clerkship: Kaiser (3-18 units)

Course Description: Emphasis placed on history taking and physical examination of pediatric and adult patients with congenital and acquired cardiovascular disease. Hospital rounds in CCU and elsewhere. Roles of ECG, PCG, and cardiac fluoroscopy, etc., in office cardiology will be evaluated.

Prerequisite(s): Third- and fourth-year medical students with advance approval by Division of Cardiology.

Learning Activities: Clinical Activity 1-5 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

CAR 460 – Cardiology Clinical Clerkship (3-18 units)

Course Description: Participation with members of subspecialty consultation service in initial clinical evaluation, work-up, management, and follow-up of patients with cardiologic disorders. Two outpatient clinics per week.

Prerequisite(s): IMD 430; third- and fourth-year medical students in good academic standing with consent of instructor.

Learning Activities: Clinical Activity 2-12 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

CAR 461 – Management of Coronary Artery Disease: Coronary Care Unit (3-18 units)

Course Description: Research in laboratory and exercise testing to be determined by instructor. Current methods of clinical research involving certain aspects of diagnosis and treatment.

Prerequisite(s): Completion of second-year of medical school and advance approval by Division of Cardiology.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

CAR 462 – Management of Coronary Artery Disease (CICU) (3-8 units)

Course Description: Research in laboratory and exercise testing to be determined by instructor. Current methods of clinical research involving certain aspects of diagnosis and treatment.

Learning Activities: Variable.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Honors/Pass/Fail Only.

CAR 464 – Preventive Cardiology (3-6 units)

Course Description: Clinical experience, weekly seminar and reading on primary and secondary prevention of cardiovascular disease. Will be carried out in Lipid and Hypertension Clinics, Exercise Laboratory, Cardiac Care Unit, Cardiac Catheterization, and Cardiac Surgery services.

Prerequisite(s): Consent of instructor; completion of third-year medical school.

Learning Activities: Seminar 2 hour(s), Clinical Activity.

Grade Mode: Honors/Pass/Fail.

CAR 480 – Insights in Cardiology (1-3 units)

Course Description: Students attend one or more cardiovascular medicine clinics: general, hypertension, arrhythmia. Introduction to the diagnosis/treatment of common cardiovascular problems.

Prerequisite(s): Medical student in good academic standing and approval by Division of Cardiology.

Learning Activities: Clinical Activity 3-9 hour(s).

Grade Mode: Honors/Pass/Fail.

CAR 493 – Gender Specific Medicine SSM (6 units)

Course Description: Special Studies Module, a four-week course on the topic Basic Science Principles Relating to Gender Specific Medicine.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Lecture/Lab 10 hour(s), Laboratory 16 hour(s), Clinical Activity 4 hour(s).

Enrollment Restriction(s): UC Davis School of Medicine students only.

Cross Listing: OBG 493.

Grade Mode: Honors/Pass/Fail.

CAR 498 – Special Group Study: EKG Unit (1-12 units)

Course Description: Special group study in cardiology for medical students in EKG unit. May include lectures, directed reading, and/or discussion groups.

Prerequisite(s): Medical student with advance approval by monthly attending faculty.

Learning Activities: Variable.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

CAR 499 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor; approval by Division of Cardiology.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

Cell Biology & Human Anatomy (CHA)

School of Medicine

CHA 101 – Human Gross Anatomy (4 units)

Course Description: Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions.

Prerequisite(s): BIS 002A; concurrent enrollment in EXB 106L or CHA 101L strongly recommended.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major.

Cross Listing: EXB 106.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHA 101L – Human Gross Anatomy Laboratory (3 units)

Course Description: Detailed study of prospected human cadavers in small group format with extensive hands-on experience.

Prerequisite(s): BIS 002A; (EXB 106 (can be concurrent) or CHA 101 (can be concurrent)); if EXB 106 or CHA 101 is not taken concurrently, it must have been already completed.

Learning Activities: Laboratory 9 hour(s).

Enrollment Restriction(s): Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab.

Cross Listing: EXB 106L.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHA 102 – Human Microscopic Anatomy: Structure & Function of Human Tissues & Organ Systems (4.5 units)

Course Description: Complements Gross Anatomy by extending the study of structure to the microscopic level. Shows how cells are assembled into tissues, and tissues into organs, with an emphasis on demonstrating how microscopic structure explains function.

Prerequisite(s): BIS 104.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHA 103 – Human Clinical Neuroanatomy (4 units)

Course Description: Clinically relevant anatomy of the normal human nervous system, including external and internal anatomy of the brain, spinal cord, and cranial nerves. Blood supply to the brain and spinal cord. Functional neuroanatomy of motor, sensory, and cognitive systems. Application of neuroanatomical principles relevant to clinical problem solving for students entering health care professions.

Prerequisite(s): CHA 101; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to upper division students.

Cross Listing: NEU 103.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHA 192 – Internship in Morphology (1-12 units)

Course Description: Experience of supervised internship in research laboratories of members of the department.

Prerequisite(s): Upper division standing; laboratory science experience including some chemistry; approval of project by preceptor prior to period of internship.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

CHA 197T – Tutoring in Cell Biology & Human Anatomy (1-5 units)

Course Description: Provides laboratory instruction in gross and microscopic human anatomy, with small groups of undergraduates under the supervision of the instructor.

Prerequisite(s): CHA 101 B or better; and consent of instructor.

Learning Activities: Discussion 1 hour(s), Laboratory 6-9 hour(s).

Grade Mode: Pass/No Pass only.

CHA 198 – Directed Group Study (1-5 units)

Course Description: Directed reading, discussion, and/or laboratory experience on selected topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1-10 hour(s).

Grade Mode: Pass/No Pass only.

CHA 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHA 200 – Graduate Human Gross Anatomy (6 units)

Course Description: Lectures on human gross anatomy and cadaver dissection laboratory. Topics arranged by region; emphasis on osteology, neuromuscular anatomy, cardiovascular anatomy, gastrointestinal anatomy and anatomy of reproductive systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Open only to full-time graduate students.

Credit Limitation(s): Only 2 units of credit for students who have completed CHA 101.

Grade Mode: Letter.

CHA 202 – Microscopic Anatomy for Researchers (3 units)

Course Description: The growing importance of the use of gene knock-out studies and imaging technology requires significant understanding of basic anatomy. Designed to familiarize students in diverse fields with anatomical, cellular and tissue organization of typical animal models.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 3 hour(s).

Enrollment Restriction(s): Open to graduate students in the biomedical sciences (no consent required); advanced undergraduates seeking research careers in the biomedical sciences (consent of instructor required).

Grade Mode: Letter.

CHA 203 – Neurobiology (4 units)

Course Description: Physiology and anatomy of the normal human nervous system in an integrated format.

Prerequisite(s): Consent of instructor. Two upper division or one graduate course in Neurobiology.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

CHA 290 – Seminar (1 unit)

Course Description: Seminar.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CHA 290C – Research Group Conference (1 unit)

Course Description: Discussion of problems, progress and literature groups relevant to current research undertaken by laboratory groups Human Anatomy.

Prerequisite(s): Consent of instructor. Graduate student with research experience (may be taken concurrently).

Learning Activities: Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CHA 298 – Advanced Group Study (1-5 units)

Course Description: Advanced group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

CHA 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

CHA 400 – Developmental, Gross & Radiologic Anatomy (7.5 units)

Course Description: Integrated presentation of developmental, gross and radiologic anatomy. Embryology and radiology correlated with the dissection of the entire body. Embryology from implantation to birth.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 5 hour(s).

Enrollment Restriction(s): Medical students only.

Grade Mode: Pass/Fail only.

CHA 402 – Cell & Tissue Biology (4.5 units)

Course Description: Microscopic structure of the basic cells, tissues and organs of the body with an emphasis on how structure explains function. Analysis and identification of sectioned material at the light microscopic and ultrastructural levels.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Enrollment Restriction(s): Medical student only.

Grade Mode: Pass/Fail only.

CHA 403 – Medical Neuroanatomy (5 units)

Course Description: Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving.

Prerequisite(s): CHA 400; Block 1.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to medical students only.

Cross Listing: HPH 403.

Grade Mode: Pass/Fail only.

CHA 493B – Anatomy Medical Education Special Study Module (6 units)

Course Description: Attend all of the lectures and laboratory sessions for CHA 400 and CHA 402 during the four-week section; approximately seven anatomy labs and three-four histology labs. Tutor first-year students during the laboratory sessions. Prepare and present a clinical correlate session.

Prerequisite(s): Consent of instructor. UC Davis School of Medicine students only.

Learning Activities: Seminar 10 hour(s), Clinical Activity 14 hour(s), Auto Tutorial 6 hour(s), Independent Study 10 hour(s).

Grade Mode: Honors/Pass/Fail.

CHA 497T – Tutoring in Human Anatomy (3-6 units)

Course Description: Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum for the School of Medicine.

Prerequisite(s): Advanced standing or consent of instructor.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

CHA 498 – Advanced Group Study (1-12 units)

Course Description: Directed reading and group discussions and/or laboratory experience on selected topics.

Prerequisite(s): Medical students, interns, and residents with consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

CHA 499 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

Chemical Engineering (ECH)

College of Engineering

ECH 001 – Design of Coffee—An Introduction to Chemical Engineering (3 units)

Course Description: Non-mathematical introduction to how chemical engineers think, illustrated by elucidation of the process of roasting and brewing coffee. Qualitative overview of the basic principles of engineering analysis and design. Corresponding experiments testing design choices on the sensory qualities of coffee.

Learning Activities: Lecture 1 hour(s), Laboratory 2 hour(s), Project 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ECH 001Y, ECM 001, ECM 005 or ECH 005.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

ECH 001Y – Design of Coffee—An Introduction to Chemical Engineering (3 units)

Course Description: Non-mathematical introduction to how chemical engineers think, illustrated by elucidation of the process of roasting and brewing coffee. Qualitative overview of the basic principles of engineering analysis and design. Corresponding experiments testing design choices on the sensory qualities of coffee.

Learning Activities: Web Virtual Lecture 1 hour(s), Laboratory 2 hour(s), Project 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ECH 001, ECM 001, ECM 005 or ECH 005.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

ECH 005 – Introduction to Analysis & Design in Chemical Engineering (3 units)

Course Description: Quantitative introduction to the engineering principles of analysis and design. Applications of differential and integral calculus. Laboratory experiments using coffee to illustrate chemical engineering concepts and to conduct an engineering design competition.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Only 2 units of credit to students who have completed ECM 001 or ECH 001; not open for credit to students who have completed ECM 005.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECH 051 – Material Balances (4 units)

Course Description: Application of the principle of conservation of mass to single and multicomponent systems in chemical process calculations. Studies of batch, semi-batch, and continuous processes involving mass transfer, phase change, and reaction stoichiometry.

Prerequisite(s): MAT 021B C- or better.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ECH 151.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 060 – Chemical Engineering Problem Solving (4 units)

Course Description: Problem solving in chemical, biochemical and materials engineering. Programming styles, data structures, working with lists, functions and rules. Applications drawn from material balances, statistics, numerical methods, bioinformatics, transport phenomena, kinetics, and computational analysis.

Prerequisite(s): MAT 021C.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECH 080 – Chemical Engineering Profession (1 unit)

Course Description: Professional opportunities and professional responsibilities of chemical engineers. Opportunities and needs for post-baccalaureate education. Relationship of chemical engineering to contemporary issues.

Learning Activities: Lecture/Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

ECH 090X – Honors Discussion Section (1 unit)

Course Description: Examination of special topics covered in selected lower division courses through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open only to students in the Chemical Engineering or Biochemical Engineering Honors Programs.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 098 – Directed Group Study (1-5 units)

Course Description: Directed Group Study.

Prerequisite(s): Consent of instructor. Lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECH 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECH 140 – Mathematical Methods in Biochemical & Chemical Engineering (4 units)

Course Description: Mathematical and computational methods for solving problems in chemical/biochemical engineering, with an emphasis on transport phenomena. Tensor analysis. Solutions of nonlinear equations. Filtering data and images. Numerical differentiation and integration. Ordinary and partial differential equations. Finite difference methods. Fourier series and separation of variables. Sturm-Liouville eigenvalue problems. Similarity transformations. Bessel functions.

Prerequisite(s): MAT 022B; (ECH 060 or ECS 032A); or equivalents of ECH 060 or ECS 032A.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Chemical Engineering and Biochemical Engineering majors.

Credit Limitation(s): Not open for credit to students who have completed ECH 159.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 141 – Fluid Mechanics for Biochemical & Chemical Engineers (4 units)

Course Description: Principles and applications of fluid mechanics in chemical and biochemical engineering. Hydrostatics. Stress tensor and Newton's law of viscosity.

Prerequisite(s): ECH 051 (can be concurrent); ECH 140 (can be concurrent).

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ECH 150B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECH 142 – Heat Transfer for Biochemical & Chemical Engineers (4 units)

This version has ended; see updated course, below.

Course Description: Conduction, convection, and radiation of thermal energy in applications to chemical and biochemical engineering. Derivation of thermal and mechanical energy equations. Thermal boundary layers. Macroscopic balances. Applications: heat transfer in tubes, channels, and integrated circuits, and analysis of heat exchangers.

Prerequisite(s): ECH 141.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ECH 153.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECH 142 – Heat Transfer for Biochemical & Chemical Engineers (4 units)

Course Description: Conduction, convection, and radiation of thermal energy in applications to chemical and biochemical engineering. Derivation of thermal and mechanical energy equations. Thermal boundary layers. Macroscopic balances. Applications: heat transfer in tubes, channels, and integrated circuits, and analysis of heat exchangers.

Prerequisite(s): ECH 051; ECH 141.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ECH 153.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

This course version is effective from, and including: Fall Quarter 2024.

ECH 143 – Mass Transfer for Biochemical & Chemical Engineers (4 units)

Course Description: Derivation of species conservation equations describing convective and diffusive mass transfer. Fick's law and the Stefan-Maxwell constitutive equations. Mass transfer coefficients. Multicomponent mass transfer across gas/liquid interfaces. Applications include drying, heterogeneous chemical reactions, and membrane separations.

Prerequisite(s): ECH 142.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 144 – Rheology & Polymer Processing (3 units)

Course Description: Deformation in steady shear, unsteady shear, and elongational flows. Linear and non-linear viscoelastic constitutive models. The principle of material indifference and admissibility of constitutive equations. Introduction to the unit operations of polymer processing.

Prerequisite(s): ECH 141.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ECH 150C.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 145A – Chemical Engineering Thermodynamics Laboratory (3 units)

Course Description: Laboratory experiments in chemical engineering thermodynamics.

Prerequisite(s): ECH 152A (can be concurrent); UWP 102E (can be concurrent).

Learning Activities: Laboratory 2 hour(s), Discussion 2 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors in Chemical Engineering, Materials Science & Engineering, and Biochemical Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ECH 145B – Chemical Engineering Transport Lab (3 units)

Course Description: Laboratory experiments in chemical engineering transport phenomena.

Prerequisite(s): ECH 142; ECH 145A; UWP 102E.

Learning Activities: Laboratory 2 hour(s), Discussion 2 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors in Chemical Engineering, Materials Science & Engineering and Biochemical Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ECH 148A – Chemical Kinetics & Reaction Engineering (3 units)

Course Description: Ideal chemical reactors. Rate laws and stoichiometry. Design and analysis of isothermal reactors with multiple reactions.

Prerequisite(s): ECH 143; ECH 152B.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ECH 146 (Formerly ECH 146).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 148B – Chemical Kinetics & Reaction Engineering (4 units)

Course Description: Design and analysis of non-isothermal reactors.

Reactions in packed beds with pressure drop. Adsorption and heterogeneous catalysis. Transport limitations.

Prerequisite(s): ECH 148A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ECH 146 (Formerly ECH 146).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 152A – Chemical Engineering Thermodynamics (3 units)

Course Description: Application of principles of thermodynamics to chemical processes.

Prerequisite(s): ECH 051; MAT 021C.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ENG 105 or ENG 105A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 152B – Chemical Engineering Thermodynamics (4 units)

Course Description: Continuation of ECH 152A.

Prerequisite(s): ECH 152A.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 155 – Chemical Engineering Kinetics & Reactor Design Laboratory (4 units)

Course Description: Laboratory experiments in chemical kinetics, reactor design and process control.

Prerequisite(s): ECH 145B; ECH 148B (can be concurrent); ECH 157 (can be concurrent).

Learning Activities: Laboratory 6 hour(s), Discussion 1 hour(s), Term Paper.

Enrollment Restriction(s): Open to majors in Chemical Engineering, Materials Science & Engineering, and Biochemical Engineering.

Credit Limitation(s): Not open for credit to students who have taken ECH 155B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL);

Writing Experience (WE).

ECH 157 – Process Dynamics & Control (4 units)

Course Description: Fundamentals of dynamics and modeling of chemical processes. Design and analysis of feedback control of chemical processes.

Prerequisite(s): ECH 140.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECH 158AN – Separations & Unit Operations (4 units)

This version has ended; see updated course, below.

Course Description: Senior design experience with multiple realistic constraints. Heuristic and rigorous design of chemical process equipment. Separation by filtration, distillation and extraction. Synthesis of reactor and separation networks, heat and power integration.

Prerequisite(s): ECH 142; ECH 143.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to Chemical Engineering Majors.

Credit Limitation(s): No credit if student has taken ECH 158B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 158AN – Separations & Unit Operations (4 units)

Course Description: Senior design experience with multiple realistic constraints. Heuristic and rigorous design of chemical process equipment. Separation by filtration, distillation and extraction. Synthesis of reactor and separation networks, heat and power integration.

Prerequisite(s): ECH 143; ECH 152B.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to Chemical Engineering Majors.

Credit Limitation(s): No credit if student has taken ECH 158B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

This course version is effective from, and including: Fall Quarter 2024.

ECH 158BN – Process Economics & Green Design (4 units)

Course Description: Senior design experience in process and product creation and design with multiple realistic constraints. Cost accounting and capital investment estimation. Profitability analysis techniques. Green chemistry, health risk assessment and life cycle assessment concepts.

Prerequisite(s): ECH 158AN or ECH 161AN.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): No credit if student has taken ECH 158A.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL); Visual Literacy (VL).

ECH 158C – Plant Design Project (4 units)

This version has ended; see updated course, below.

Course Description: Senior design experience for chemical and biochemical processes. Impact of multiple realistic constraints. Design, costing and profitability analysis of complete plants. Use of computer-aided design techniques.

Prerequisite(s): ECH 158B or ECH 161C.

Learning Activities: Discussion/Laboratory 2 hour(s), Project 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Visual Literacy (VL).

ECH 158C – Plant Design Project (4 units)

Course Description: Senior design experience for chemical and biochemical processes. Impact of multiple realistic constraints. Design, costing and profitability analysis of complete plants. Use of computer-aided design techniques.

Prerequisite(s): (ECH 158AN or ECH 161C); ECH 158BN.

Learning Activities: Discussion/Laboratory 2 hour(s), Project 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Visual Literacy (VL).

This course version is effective from, and including: Fall Quarter 2024.

ECH 160 – Fundamentals of Biomanufacturing (3 units)

Course Description: Principles of large scale bioreactor production of metabolites, enzymes, and recombinant proteins including the development of strains/cell lines, fermentor/bioreactor design, monitoring and operation, product recovery and purification, and biomanufacturing economics.

Prerequisite(s): MIC 102 or BIS 102 or ABI 102.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ECH 161C or both ECH 161A and ECH 161B; only 2 units of credit to students who have completed either ECH 161A or ECH 161B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ECH 161AN – Bioseparations (4 units)

This version has ended; see updated course, below.

Course Description: Product recovery and purification of biochemicals. Cell disruption, centrifugation, filtration, membrane separations, extraction, and chromatographic separation.

Prerequisite(s): ECH 143.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Biochemical Engineering Majors.

Credit Limitation(s): No credit if student has taken ECH 161B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 161AN – Bioseparations (4 units)

Course Description: Product recovery and purification of biochemicals. Cell disruption, centrifugation, filtration, membrane separations, extraction, and chromatographic separation.

Prerequisite(s): ECH 143; ECH 152B.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Biochemical Engineering Majors.

Credit Limitation(s): No credit if student has taken ECH 161B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

This course version is effective from, and including: Fall Quarter 2024.

ECH 161BN – Biochemical Engineering Fundamentals (4 units)

Course Description: Biokinetics; bioreactor design and operation; transport phenomena in bioreactors; microbial, plant, and animal cell cultures.

Prerequisite(s): ECH 148A.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One restricted to biochemical engineering majors.

Credit Limitation(s): Not credit if student has taken ECH 161A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 161C – Biotechnology Facility Design & Regulatory Compliance (4 units)

This version has ended; see updated course, below.

Course Description: Design of biotechnology manufacturing facilities. Fermentation and purification equipment, and utility systems.

Introduction to current good manufacturing practices, regulatory compliance, and documentation.

Prerequisite(s): (ECH 158A or ECH 158BN); (ECH 161A { can be concurrent } or ECH 161AN { can be concurrent }); (ECH 161B { can be concurrent } or ECH 161BN { can be concurrent }); DEB 263 { can be concurrent }.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ECH 161C – Biotechnology Facility Design & Regulatory Compliance (4 units)

Course Description: Design of biotechnology manufacturing facilities. Fermentation and purification equipment, and utility systems.

Introduction to current good manufacturing practices, regulatory compliance, and documentation.

Prerequisite(s): (ECH 158BN { can be concurrent }, ECH 161AN, ECH 161BN { can be concurrent }) or DEB 263 { can be concurrent }.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

This course version is effective from, and including: Fall Quarter 2024.

ECH 161L – Bioprocess Engineering Laboratory (4 units)

This version has ended; see updated course, below.

Course Description: Laboratory experiments in the operation and analysis of bioreactors; determination of oxygen mass transfer coefficients in bioreactors and ion exchange chromatography.

Prerequisite(s): ECH 145B; (ECH 161A or ECH 161AN); (ECH 161B or ECH 161BN); VEN 186 or (BIS 103, MCB 120L).

Learning Activities: Laboratory 9 hour(s), Discussion 1 hour(s), Term Paper.

Enrollment Restriction(s): Pass One restricted to chemical/biochemical engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

ECH 161L – Bioprocess Engineering Laboratory (4 units)

Course Description: Laboratory experiments in the operation and analysis of bioreactors; determination of oxygen mass transfer coefficients in bioreactors and ion exchange chromatography.

Prerequisite(s): (ECH 145B, ECH 161AN, ECH 161BN) or VEN 186 or (BIS 103, MCB 120L).

Learning Activities: Laboratory 9 hour(s), Discussion 1 hour(s), Term Paper.

Enrollment Restriction(s): Pass One restricted to chemical/biochemical engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

This course version is effective from, and including: Fall Quarter 2024.

ECH 166 – Catalysis (3 units)

Course Description: Principles of catalysis based on an integration of principles of physical, organic, and inorganic chemistry and chemical kinetics and chemical reaction engineering. Catalysis in solution; catalysis by enzymes; catalysis in swellable polymers; catalysis in microscopic cages (zeolites); catalysis on surfaces.

Prerequisite(s): ECH 148A; consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 168 – Chemical & Engineering Principles in Whisky & Fuel Alcohol Production (3 units)

Course Description: Chemical & engineering principles underlying the manufacture of whisky & fuel alcohol. Biochemistry of malting.

Assessment of grain modification & diastatic power, and of the phenol content of peated malt. Lautering as a problem of fluidized bed compaction. Fermentation and its assessment. Fractional distillation and the Rayleigh equation. The fate of congeners in pot and column distillation. Chemical reactions affecting flavor from kilning to maturation.

Prerequisite(s): CHE 128A; CHE 128B (can be concurrent); or consent of instructor.

Learning Activities: Laboratory 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to students aged 21 years or older; open to seniors in chemical engineering and seniors in chemistry; non-majors require consent of instructor.

Cross Listing: CHE 168.

Grade Mode: Letter.

ECH 169 – The Design of Cocktails: Applied Thermodynamics & Transport Phenomena in Mixed Drinks (1 unit)

Course Description: Scientific and engineering principles underlying the preparation of mixed drinks. Thermodynamics and kinetics of ice crystallization; phase diagram of ethanol-water-ice mixtures; mass transfer of aromatics; solubility of sucrose and carbon dioxide; colloidal behavior of dispersed solids and emulsified oils. Corresponding laboratory experiments testing the effect of design choices on the sensory quality of cocktails.

Prerequisite(s): ECH 145B; ECH 152B; consent of instructor.

Learning Activities: Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Enrollment by permission of instructors only; limited to students over 21 years old.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECH 170 – Introduction to Colloid & Surface Phenomena (3 units)

Course Description: Introduction to the behavior of surfaces and disperse systems. Fundamentals will be applied to the solution of practical problems in colloid science. Should be of value to engineers, chemists, biologists, soil scientists, and related disciplines.

Prerequisite(s): CHE 110A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECH 171 – Chemical Engineering Principles in Food Processing (4 units)

Course Description: Chemical engineering principles underlying the manufacture of food production. Chemical reactions affecting flavor and color. Food preservation and Raoult's Law. Emulsion stability and rheology. Manipulation of phase transition and food texture. Viscosity of food systems and pump design. Application of heat and mass transfer to food processes.

Prerequisite(s): ECH 142.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s), Project 1 hour(s).

Grade Mode: Letter.

ECH 190C – Research Group Conference (1 unit)

Course Description: Research group conferences.

Prerequisite(s): Consent of instructor; upper division standing in Chemical Engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECH 190X – Honors Discussion Section (1 unit)

Course Description: Examination of special topics covered in selected upper division courses through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open only to students in the Chemical Engineering or Biochemical Engineering Honors Programs.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 192 – Internship in Chemical or Biochemical Engineering (1-5 units)

Course Description: Supervised work experience in Chemical or Biochemical Engineering.

Prerequisite(s): Consent of instructor; completion of a minimum of 84 units; project approval before period of internship.

Learning Activities: Internship 3-15 hour(s).

Repeat Credit: May be repeated when project differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECH 198 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECH 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECH 200 – Preparing for Graduate Student Success (1 unit)

Course Description: Introduction to the soft-skills and campus resources needed to succeed in graduate school. Emphasis on the student-mentor relationship and the process of selecting a research mentor.

Learning Activities: Seminar 1.50 hour(s).

Enrollment Restriction(s): Restricted to graduate students in Chemical Engineering.

Cross Listing: EMS 200.

Grade Mode: Satisfactory/Unsatisfactory only.

ECH 206 – Biochemical Engineering (3 units)

Course Description: Interaction of chemical engineering, biochemistry, and microbiology. Mathematical representations of microbial systems. Kinetics of growth, death, and metabolism. Continuous fermentation, agitation, mass transfer and scale-up in fermentation systems, product recovery, enzyme technology.

Prerequisite(s): MIC 102; MIC 102L; BIS 101; BIS 102; BIS 103; MCB 120L; MCB 200A; or consent of instructor; FST 205 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ECH 226 – Enzyme Engineering (3 units)

Course Description: Application of basic biochemical and engineering principles of practical enzymatic processes. Lectures cover large scale production and separation of enzymes, immobilized enzyme systems, enzyme related biotechnology, reactor design and optimization, and new application of enzymes in genetic engineering.

Prerequisite(s): MIC 102; MIC 102L; BIS 102; BIS 103; MCB 122; MCB 120L; MCB 200A; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ECH 245 – Micro- & Nano-Technology in Life Sciences (4 units)

Course Description: Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: EEC 245, EMS 245, MAE 245.

Grade Mode: Letter.

ECH 246 – Advanced Biochemical Engineering (2 units)

Course Description: Advances in the field of biotechnology including genetic engineering, enzyme engineering, fermentation science, and renewable resources development. The important results of original research will be evaluated for understanding of the fundamental principles and for potential practical application.

Prerequisite(s): ECH 206; or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

ECH 252 – Statistical Thermodynamics (4 units)

Course Description: A treatment of the statistical basis of thermodynamics; introduction to statistical mechanics; discussion of the laws of thermodynamics; application of thermodynamic relationships to phase and chemical reaction equilibrium; introduction to molecular simulations and the evaluation of thermodynamic properties from molecular simulations.

Prerequisite(s): ECH 152B; ENG 105B or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECH 253A – Advanced Fluid Mechanics (4 units)

Course Description: Kinematics and basic principles of fluid flow. Principles of constitutive equations. Navier-Stokes equations for Newtonian fluids. Survey of rectilinear creeping flow, lubrication flow and boundary layer theory.

Prerequisite(s): ECH 141; ECH 259.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECH 253B – Advanced Heat Transport (4 units)

Course Description: Fundamental energy postulates and derivation of microscopic and macroscopic energy equations. Mechanisms of conduction. Isotropic, thermoelastic and anisotropic materials solution problems using Greens functions and perturbation theory.

Prerequisite(s): ECH 142; ECH 259; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECH 253C – Advanced Mass Transfer (4 units)

Course Description: Kinematics and basic conservation principles for multicomponent systems. Constitutive equations for momentum, heat and mass transfer, applications to binary and ternary systems. Details of diffusion with reaction, and the effects of concentration.

Prerequisite(s): ECH 253A; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECH 254 – Colloid & Surface Phenomena (4 units)

Course Description: Thermodynamics and rate processes at interfaces. These fundamental processes will be applied to determine the collective properties of thin films and membranes, self-assembled systems, liquid crystals and colloidal systems. Experimental techniques in surface analysis.

Prerequisite(s): Graduate standing in science or engineering or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECH 256 – Chemical Kinetics & Reaction Engineering (4 units)

Course Description: Analysis of the performance of chemical reactors and design of chemical reactors based on the principles of chemical kinetics and transport phenomena. Consideration of noncatalytic/catalytic reactions in single fluid phases and emphasis on reactions in multiphase mixtures, especially gas-solid reactors.

Prerequisite(s): ECH 146; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECH 259 – Advanced Engineering Mathematics (4 units)

Course Description: Applications of methods of applied mathematics to the analytical and numerical solution of linear and nonlinear ordinary and partial differential equations arising in the study of transport phenomena.

Prerequisite(s): MAT 021D; MAT 022A; MAT 022B.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECH 261 – Molecular Modelling of Soft & Biological Matter (4 units)

Course Description: Modern molecular simulation techniques with a focus on soft matter like polymers, biologically relevant systems, and glasses.

Prerequisite(s): EMS 247 or ECH 252; or equivalent course in advanced thermodynamics/statistical mechanics.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

ECH 262 – Transport Phenomena in Multiphase Systems (3 units)

Course Description: Heat, mass and momentum transfer in multiphase, multicomponent systems with special emphasis on transport processes in porous media. Derivation of the averaging theorem and application of the method of volume averaging to multicomponent, reacting systems.

Prerequisite(s): ECH 253C.

Learning Activities: Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

ECH 263 – Rheology & Mechanics of Non-Newtonian Fluids (3 units)

Course Description: Mechanics of polymer solutions and suspension, especially the development of properly invariant constitutive equations. Topics include: viscometry, linear and nonlinear viscoelasticity, continuum mechanics, kinetic theory.

Prerequisite(s): ECH 253A; ECH 259; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ECH 265 – Emulsions, Microemulsions & Bilayers (3 units)

Course Description: Thermodynamic and mechanical descriptions of surfactant-laden interfaces. Forces between and within interfaces. Physics of micelle and microemulsion formation. Structure and stability of emulsions. Properties of phospholipid bilayers, with emphasis on vesicles.

Prerequisite(s): An undergraduate course in physical chemistry.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ECH 267 – Advanced Process Control (4 units)

Course Description: Advanced course in analysis and synthesis of linear multivariable systems. Emphasis on frequency domain techniques and applications to chemical processes. Topics include singular value analysis, internal model control, robust controller design methods as well as self-tuning control techniques.

Prerequisite(s): ECH 157; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECH 268 – Polysaccharides Surface Interactions (3 units)

Course Description: Study of fundamental surface science theories as applied to physical and chemical interactions of carbohydrates and polysaccharides.

Prerequisite(s): Graduate students in science or engineering.

Learning Activities: Lecture 3 hour(s).

Cross Listing: EBS 268.

Grade Mode: Letter.

ECH 269 – Cell & Molecular Biophysics for Bioengineers (4 units)

Course Description: Introduction to fundamental mechanisms governing the structure, function, and assembly of bio-macromolecules. Emphasis is on a quantitative understanding of the nano-to-microscale interactions between and within individual molecules, as well as of their assemblies, in particular membranes.

Prerequisite(s): BIM 284; or equivalent; graduate standing; undergraduate students by consent of instructor.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed BIM 162.

Cross Listing: BIM 262.

Grade Mode: Letter.

ECH 282 – Organic Electronic Materials, Processing & Devices (3 units)

Course Description: Organic electronic materials synthesis and molecular design, methods for device fabrication, optical and electrical characteristics of the devices, discussion of the technology readiness, and a broad survey of methods used to characterize organic electronic materials and devices.

Prerequisite(s): Graduate major in Chemistry, Physics or Engineering discipline or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

ECH 289A – Special Topics in Chemical Engineering: Fluid Mechanics (1-5 units)

Course Description: Special topics in Fluid Mechanics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289B – Special Topics in Chemical Engineering: Nonlinear Analysis & Numerical Methods (1-5 units)

Course Description: Special topics in Nonlinear Analysis and Numerical Methods.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289C – Special Topics in Chemical Engineering: Process Control (1-5 units)

Course Description: Special topics in Process Control.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289D – Special Topics in Chemical Engineering: Chemistry of Catalytic Processes (1-5 units)

Course Description: Special topics in Chemistry of Catalytic Processes.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289E – Special Topics in Chemical Engineering: Biotechnology (1-5 units)

Course Description: Special topics in Biotechnology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289F – Special Topics in Chemical Engineering: Interfacial Engineering (1-5 units)

Course Description: Special topics in Interfacial Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289G – Special Topics in Chemical Engineering: Molecular Thermodynamics (1-5 units)

Course Description: Special topics in Molecular Thermodynamics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289H – Special Topics in Chemical Engineering: Membrane Separations (1-5 units)

Course Description: Special topics in Membrane Separations.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289I – Special Topics in Chemical Engineering: Advanced Materials Processing (1-5 units)

Course Description: Special topics in Advanced Materials Processing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289J – Special Topics in Chemical Engineering: Novel Experimental Methods (1-5 units)

Course Description: Special topics in Novel Experimental Methods.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289K – Special Topics in Chemical Engineering: Advanced Transport Phenomena (1-5 units)

Course Description: Special topics in Advanced Transport Phenomena.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 289L – Special Topics in Chemical Engineering: Biomolecular Engineering (1-5 units)

Course Description: Special topics in Biomolecular Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECH 290 – Seminar (1 unit)

Course Description: Seminar.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ECH 290C – Graduate Research Group Conference (1 unit)

Course Description: Research problems, progress and techniques in chemical engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ECH 294 – Current Progress in Biotechnology (1 unit)

Course Description: Seminars presented by guest lecturers on subjects of their own research activities.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Cross Listing: DEB 294.

Grade Mode: Satisfactory/Unsatisfactory only.

ECH 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ECH 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ECH 390 – Teaching of Chemical Engineering (1 unit)

Course Description: Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports.

Prerequisite(s): Consent of instructor; qualifications and acceptance as teaching assistant and/or associate-in in chemical engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Chemistry (CHE)

College of Letters & Science

CHE 001 – Preparation for General Chemistry (3 units)

Course Description: Preparation for the general chemistry series (CHE 002ABC & CHE 004ABC); unit conversion, dimensional analysis, periodic table, chemical equations, stoichiometry, and gases.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Concurrent enrollment in CHE 002A or CHE 004A not allowed.

Credit Limitation(s): Not open for credit to students who have completed CHE 002A or CHE 004A with a grade of C- or better.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 001V – Preparation for General Chemistry (3 units)

Course Description: Preparation for the general chemistry series (CHE 002ABC & CHE 004ABC); unit conversion, dimensional analysis, periodic table, chemical equations, stoichiometry, and gases.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Concurrent enrollment in CHE 002A or CHE 004A not allowed.

Credit Limitation(s): Not open for credit to students who have completed CHE 002A or CHE 004A with a grade of C- or better.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 002A – General Chemistry (5 units)

Course Description: Periodic table, stoichiometry, chemical equations, physical properties and kinetic theory of gases, chemical equilibrium, acids and bases. Laboratory experiments in stoichiometric relations, properties and collection of gases, atomic spectroscopy, introductory quantitative analysis and acids and bases.

Prerequisite(s): High school chemistry and physics, and concurrent enrollment in mathematics at or above the level of MAT 012 strongly recommended; must earn a qualifying score of 24 or better on the Chemistry Placement Exam or complete CHE 001V with a C- or higher; more information about the Chemistry Placement Requirements to ensure enrollment in CHE 002A can be found at <https://chemistry.ucdavis.edu/undergraduate/general-chemistry-series/chemistry-placement-requirements>.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Only three units of credit for students who have completed CHE 004A; not open for credit for students who have completed CHE 002AH or CHE 004B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 002AH – Honors General Chemistry (5 units)

Course Description: Limited enrollment course with a more rigorous treatment of material covered in CHE 002A. Students completing CHE 002AH can continue with CHE 002BH or CHE 002B.

Prerequisite(s): Consent of instructor; high school chemistry and physics, and concurrent enrollment in mathematics at or above the level of MAT 012 strongly recommended; must earn a qualifying score of 33 or better on the Chemistry Placement Exam; more information about the Chemistry Placement Requirements to ensure enrollment in CHE 002A can be found at <https://chemistry.ucdavis.edu/undergraduate/general-chemistry-series/chemistry-placement-requirements>.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CHE 002A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 002B – General Chemistry (5 units)

Course Description: Continuation of CHE 002A. Thermodynamics, atomic and molecular structure and chemical bonding, condensed phases and intermolecular forces, solubility. Laboratory experiments in thermochemistry, equilibria, and quantitative analysis using volumetric methods.

Prerequisite(s): CHE 002A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Only three units of credit for students who have completed CHE 004A; not open for credit for students who have completed CHE 002BH or CHE 004B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 002BH – Honors General Chemistry (5 units)

Course Description: Limited enrollment course with a more rigorous treatment of material covered in CHE 002B. Students completing CHE 002BH can continue with CHE 002CH or CHE 002C.

Prerequisite(s): CHE 002A or CHE 002AH C or better; MAT 021B (can be concurrent); or consent of instructor; CHE 002A with consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CHE 002B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 002C – General Chemistry (5 units)

Course Description: Continuation of CHE 002B. Kinetics, electrochemistry, spectroscopy, structure and bonding in transition metal compounds, application of principles to chemical reactions. Laboratory experiments in selected analytical methods and syntheses.

Prerequisite(s): CHE 002B C- or better or CHE 002BH C- or better or CHE 004B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CHE 002CH.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 002CH – Honors General Chemistry (5 units)

Course Description: Limited enrollment course with a more rigorous treatment of material covered in CHE 002C.

Prerequisite(s): CHE 002B or CHE 002BH C or better; MAT 021C (can be concurrent); or consent of instructor; CHE 002B with consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 6 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CHE 002C.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 003A – Chemistry for Life Sciences: Determining Structure & Predicting Properties (5 units)

Course Description: Integrated General and Organic Chemistry intended for majors in the life sciences. Core concepts of chemical composition, structure and properties. Includes phase changes, separation methods, composition, spectroscopy, atomic & molecular structure, periodicity, bonding, charge distribution, intermolecular forces, and physical properties.

Prerequisite(s): High school chemistry and physics strongly recommended; satisfactory score on the Chemistry and Mathematics Placement Examinations or satisfactory completion of the ALEKS Summer Chemistry Prep Course; a satisfactory grade in WKL 041C ('P' or 'C' or better) will suffice in lieu of a satisfactory Chemistry Placement Examination score.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Concurrent enrollment with CHE 002A, CHE 002B, CHE 002C, CHE 002AH, CHE 002BH, CHE 002CH prohibited; not open for enrollment to students who have completed CHE 002C or 002CH with a C- or better.

Credit Limitation(s): Only 3 units credit for students who have completed CHE 002A or CHE 002AH with a C- or better; only 1 unit of credit to students who have completed CHE 002B or CHE 002BH with a C- or better.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 003B – Chemistry for Life Sciences: Predicting & Characterizing Chemical Change (5 units)

Course Description: Continuation of CHE 003A covering core concepts of characterization of chemical processes and predicting chemical changes. Includes modeling chemical reactions, understanding proportions/stoichiometry, tracking energy, activation energy, reaction kinetics, thermodynamics, and equilibrium.

Prerequisite(s): CHE 003A C- or better; note: C- or better in CHE 002A or 002AH does not satisfy the prerequisite requirement.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Concurrent enrollment with CHE 002A, CHE 002B, CHE 002C, CHE 002AH, CHE 002BH, CHE 002CH prohibited.

Credit Limitation(s): Only 3 units credit for students who have completed CHE 002B or CHE 002BH with a C- or better.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 003C – Chemistry for Life Sciences: Controlling Processes & Synthetic Pathways (5 units)

Course Description: Continuation of CHE 003B covering core concepts of harnessing energy, controlling reaction extent, and organic chemistry synthetic pathways. Includes acids and bases, thermodynamics, chemical equilibria, organic chemistry terminology and mechanisms.

Prerequisite(s): CHE 003B C- or better; note: C- or better in CHE 002B or 002BH does not satisfy the prerequisite requirement.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Concurrent enrollment with CHE 002A, CHE 002B, CHE 002C, CHE 002AH, CHE 002BH, CHE 002CH prohibited.

Credit Limitation(s): Only 3 units credit for students who have completed CHE 002C or CHE 002CH with a C- or better.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 004A – General Chemistry for the Physical Sciences & Engineering (5 units)

Course Description: General chemistry course with a more rigorous treatment of material covered in CHE 002A, intended for students majoring in the physical sciences and engineering.

Prerequisite(s): MAT 021A (can be concurrent); must earn a qualifying score of 28 or better on the Chemistry Placement Exam or complete CHE 001V with a C- or higher; high school chemistry and physics strongly recommended; more information about the Chemistry Placement Requirements to ensure enrollment in CHE 004A can be found at <https://chemistry.ucdavis.edu/undergraduate/general-chemistry-series/chemistry-placement-requirements>.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Only 3 units of credit for students who have completed CHE 002A; not open for credit for students who have completed CHE 002AH or 002B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 004B – General Chemistry for the Physical Sciences & Engineering (5 units)

Course Description: General chemistry course with a more rigorous treatment of material covered in CHE 002B, intended for students majoring in the physical sciences and engineering.

Prerequisite(s): MAT 021B (can be concurrent); (CHE 004A C- or better or CHE 002AH C- or better); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Only three units of credit for students who have completed CHE 002A; not open for credit for students who have completed CHE 002B or 002BH.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 004C – General Chemistry for the Physical Sciences & Engineering (5 units)

Course Description: General chemistry course with a more rigorous treatment of material covered in CHE 002C, intended for students majoring in the physical sciences and engineering.

Prerequisite(s): MAT 021C (can be concurrent); (CHE 004B C- or better or CHE 002B B or better or CHE 002BH B or better); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Not open for credit for students who have completed CHE 002C or 002CH.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 008A – Organic Chemistry: Brief Course (2 units)

Course Description: With CHE 008B, an introduction to the nomenclature, structure, chemistry, and reaction mechanisms of organic compounds. Intended for students majoring in areas other than organic chemistry.

Prerequisite(s): CHE 002B C- or better or CHE 002BH C- or better or CHE 004B C- or better.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): No credit to students who have completed CHE 118A or 128A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 008B – Organic Chemistry: Brief Course (4 units)

Course Description: Laboratory concerned primarily with organic laboratory techniques and the chemistry of the common classes of organic compounds. Lecture portion a continuation of CHE 008A.

Prerequisite(s): CHE 008A or CHE 118A or CHE 128A.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Varying credit hours according to courses taken previously and corresponding expected workload for this course; full credit to students who complete CHE 118A or 128A; 3 units credit to students who have completed CHE 128A and CHE 129A (students who have completed CHE 129A are exempt from the laboratory portion of CHE 008B); 2 units credit to students who have completed CHE 128B; 1 unit credit to students who have completed CHE 118B or CHE 128B and CHE 129A (students who have completed CHE 118B are exempt from the laboratory portion of CHE 008B).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 010 – Concept of Chemistry (4 units)

Course Description: Survey of basic concepts and contemporary applications of chemistry. Designed for non-science majors and not as preparation for CHE 002A.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have had CHE 002A; but students with credit for CHE 010 may take CHE 002A for full credit.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

CHE 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHE 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHE 100 – Environmental Water Chemistry (3 units)

Course Description: Practical aspects of water chemistry in the environment, including thermodynamic relations, coordination chemistry, solubility calculations, redox reactions and rate laws. Computer modeling of the evolution in water chemistry from contact with minerals and gases.

Prerequisite(s): CHE 002C or CHE 002CH or CHE 004C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 103A – Chemistry for Life Sciences: Determining Organic Structures & Properties (5 units)

Course Description: Continuation of PHE 003C. Core concepts of organic structure, nomenclature, functional groups, organic acids and bases, resonance and delocalization, aromaticity, intermolecular forces, three-dimensional structure and conformational analysis, spectroscopy.

Prerequisite(s): CHE 002C C- or better or CHE 002CH C- or better; (CHE 008A or CHE 118A or CHE 128A).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Not open for enrollment to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, CHE 128C with a C- or better.

Credit Limitation(s): Only 3 Units of credit for students who have completed CHE 008A with a C- or better; only 2 units of credit for students who have completed CHE 118A or CHE 128A with a C- or better; not open for credit to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, CHE 128C with a C- or better.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

CHE 103B – Chemistry for Life Sciences: Predicting & Controlling Organic Pathways (5 units)

Course Description: Continuation of CHE 103A. Core concepts of functional group transformations, synthesis, mechanisms, sustainable chemistry, structure and function of biomolecules, organic reactions in biological systems, molecular design, detection, separation, and identification of organic molecules.

Prerequisite(s): CHE 103A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Not open for enrollment to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, or CHE 128C with a C- or better.

Credit Limitation(s): Not open for credit to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, or CHE 128C.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

CHE 104 – Forensic Applications of Analytical Chemistry (3 units)

Course Description: Theory and application of standard methods of chemical analysis to evidentiary samples. Use and evaluation of results from screening tests, FTIR, GC and GCMS to various sample types encountered in forensics.

Prerequisite(s): CHE 002C or CHE 002CH or CHE 004C.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

CHE 105 – Analytical & Physical Chemical Methods (4 units)

Course Description: Fundamental theory and laboratory techniques in; analytical and physical chemistry, errors and data analysis methods, basic electrical circuits in instruments, advanced solution equilibria, potentiometric analysis, chromatographic separations, UV-visible spectroscopy, lasers.

Prerequisite(s): CHE 110A (can be concurrent) or CHE 107B (can be concurrent).

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

CHE 107A – Physical Chemistry for the Life Sciences (3 units)

Course Description: Physical chemistry intended for majors in the life science area. Introductory development of classical and statistical thermodynamics including equilibrium processes and solutions of both non-electrolytes and electrolytes. The thermodynamic basis of electrochemistry and membrane potentials.

Prerequisite(s): (CHE 002C or CHE 002CH or CHE 004C); (MAT 016C or MAT 017C or MAT 021C); (PHY 007C or PHY 009C or PHY 009HC).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 107B – Physical Chemistry for the Life Sciences (3 units)

Course Description: Continuation of CHE 107A. Kinetic theory of gases and transport processes in liquids. Chemical kinetics, enzyme kinetics and theories of reaction rates. Introduction to quantum theory, atomic and molecular structure, and spectroscopy. Application to problems in the biological sciences.

Prerequisite(s): CHE 107A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 108 – Molecular Biochemistry (3 units)

Course Description: Chemical principles and experimental methods applied to the biological sciences to understand the molecular structure and function of proteins, nucleic acids, carbohydrates, and membrane lipids.

Prerequisite(s): CHE 128C or CHE 118C.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Pass One open to Chemistry majors.

Grade Mode: Letter.

CHE 110A – Physical Chemistry: Introduction to Quantum Mechanics (4 units)

Course Description: Introduction to the postulates and general principles of quantum mechanics. Approximations based on variational method and time independent perturbation theory. Application to harmonic oscillator, rigid rotor, one-electron and many-electron atoms, and homo-and heteronuclear diatomic molecules.

Prerequisite(s): (PHY 007C or PHY 009C or PHY 009HC); (CHE 002C or CHE 002CH or CHE 004C); (MAT 016C or MAT 017C or MAT 021C); completion of MAT 021D, MAT 022A, MAT 022AL; PHY 009C or PHY 009HC, strongly recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

CHE 110B – Physical Chemistry: Properties of Atoms & Molecules (4 units)

Course Description: Group theory. Application of quantum mechanics to polyatomic molecules and molecular spectroscopy. Intermolecular forces and the gas, liquid and solid states. Distributions, ensembles and partition functions. Transport properties.

Prerequisite(s): CHE 110A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

CHE 110C – Physical Chemistry: Thermodynamics, Equilibria & Kinetics (4 units)

Course Description: Development and application of the general principles of thermodynamics and statistical thermodynamics. Chemical kinetics, rate laws for chemical reactions and reaction mechanisms.

Prerequisite(s): CHE 110B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

CHE 115 – Instrumental Analysis (4 units)

Course Description: Intermediate theory and laboratory techniques in analytical and physical chemistry. Advanced data analysis methods and goodness-of-fit criteria. Fourier-transform spectroscopic methods and instrumentation. Mass spectrometry. Electrochemistry. Liquid chromatography.

Prerequisite(s): CHE 105; (CHE 110B (can be concurrent) or (CHE 107A, CHE 107B)).

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

CHE 118A – Organic Chemistry for Health & Life Sciences (4 units)

Course Description: The 118A-C series is for students planning professional school studies in health and life sciences. Rigorous, in-depth presentation of basic principles with emphasis on stereochemistry and spectroscopy and preparations and reactions of nonaromatic hydrocarbons, haloalkanes, alcohols and ethers.

Prerequisite(s): CHE 002C C- or better or CHE 002CH C- or better or CHE 004C C- or better.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1.50 hour(s).

Credit Limitation(s): Only 2 units credit for students who have completed CHE 008A; not open for credit to students who have completed CHE 008B or CHE 128A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

CHE 118B – Organic Chemistry for Health & Life Sciences (4 units)

Course Description: Continuation of CHE 118A, with emphasis on spectroscopy and the preparation and reactions of aromatic hydrocarbons, organometallic compounds, aldehydes and ketones.

Prerequisite(s): CHE 118A or CHE 128A.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Only 1 unit of credit to students who completed CHE 128B; not open for credit to students who have completed 8 or more units of CHE 128 and CHE 129.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

CHE 118C – Organic Chemistry for Health & Life Sciences (4 units)

Course Description: Continuation of CHE 118B, with emphasis on the preparation, reactions and identification of carboxylic acids and their derivatives, alkyl and acyl amines, β -dicarbonyl compounds, and various classes of naturally occurring, biologically important compounds.

Prerequisite(s): CHE 118B or (CHE 128B, CHE 129A).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to students changing from the CHE 128 course sequence only if they have completed prior organic laboratory work (at least course CHE 129A).

Credit Limitation(s): Not open for credit to students who have completed CHE 128C.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

CHE 121 – Introduction to Molecular Structure & Spectra (4 units)

Course Description: Modern theoretical and experimental methods used to study problems of molecular structure and bonding; emphasis on spectroscopic techniques.

Prerequisite(s): CHE 110B.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

CHE 122 – Chemistry of Nanoparticles (3 units)

Course Description: Chemical and physical aspects of inorganic nanoparticles. Topics include synthesis, structure, colloidal behavior, catalytic activity, size and shape dependency of physical properties, analytical methods and applications.

Prerequisite(s): CHE 110C (can be concurrent) or CHE 107B (can be concurrent).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 124A – Inorganic Chemistry: Fundamentals (3 units)

Course Description: Symmetry, molecular geometry and structure, molecular orbital theory of bonding (polyatomic molecules and transition metals), solid state chemistry, energetics and spectroscopy of inorganic compounds.

Prerequisite(s): CHE 002C or CHE 002CH or CHE 004C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 124B – Inorganic Chemistry: Main Group Elements (3 units)

Course Description: Synthesis, structure and reactivity of inorganic and heteroorganic molecules containing the main group elements.

Prerequisite(s): CHE 124A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 124C – Inorganic Chemistry: D & F Block Elements (3 units)

Course Description: Synthesis, structure and reactivity of transition metal complexes, organometallic and bioinorganic chemistry, the lanthanides and actinides.

Prerequisite(s): CHE 124A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 124L – Laboratory Methods in Inorganic Chemistry (2 units)

Course Description: The preparation, purification and characterization of main group and transition metal inorganic and organometallic compounds.

Prerequisite(s): CHE 124B or CHE 124C (can be concurrent).

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

CHE 125 – Advanced Methods in Physical Chemistry (4 units)

Course Description: Advanced theory and laboratory techniques in analytical and physical chemistry. Advanced spectroscopic methods. Thermodynamics. Kinetics. Chemical literature. Digital electronics and computer interfacing. Laboratory measurements and vacuum techniques.

Prerequisite(s): CHE 110C (can be concurrent); CHE 115.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

CHE 128A – Organic Chemistry (3 units)

Course Description: Introduction to the basic concepts of organic chemistry with emphasis on stereochemistry and the chemistry of hydrocarbons. Designed primarily for majors in chemistry. Chemistry majors should enroll in CHE 129A concurrently. May be taught abroad.

Prerequisite(s): CHE 002C C or better or CHE 002CH C or better or CHE 004C C- or better.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Only 2 units credit allowed for students who have completed CHE 008A; not open for credit to students who have completed CHE 008B or 118A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 128B – Organic Chemistry (3 units)

Course Description: Continuation of CHE 128A with emphasis on the chemistry of alcohols, ethers, their sulfur analogs, and carbonyl compounds. Introduction to the application of spectroscopic methods to organic chemistry. Introduction to synthesis of moderately complex organic molecules. May be taught abroad.

Prerequisite(s): CHE 128A; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Full credit to students who completed CHE 008B or CHE 118A; not open for credit to students who have completed CHE 118B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 128C – Organic Chemistry (3 units)

Course Description: Continuation of CHE 128B with emphasis on enolate condensations and the chemistry of amines, phenols, and sugars; selected biologically important compounds. May be taught abroad.

Prerequisite(s): CHE 128B.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Full credit to students who completed CHE 118B; Not open for credit to students who have completed CHE 118C.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 129A – Organic Chemistry Laboratory (2 units)

Course Description: Introduction to laboratory techniques of organic chemistry. Emphasis on methods used for separation and purification of organic compounds. May be taught abroad.

Prerequisite(s): (CHE 002C C or better or CHE 002CH C or better or CHE 004C C- or better); CHE 128A (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Full credit to students who completed CHE 008B; not open for credit to students who have completed CHE 118B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 129B – Organic Chemistry Laboratory (2 units)

Course Description: Continuation of CHE 129A. Emphasis on methods used for synthesis and isolation of organic compounds.

Prerequisite(s): CHE 129A; CHE 128B (can be concurrent).

Learning Activities: Laboratory 6 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHE 118C.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 129C – Organic Chemistry Laboratory (2 units)

Course Description: continuation of PHE 129B.

Prerequisite(s): CHE 128C (can be concurrent); CHE 129B.

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

CHE 130A – Principles of Medicinal Chemistry (3 units)

Course Description: Examination of the design principles and experimental methods used in pharmaceutical and medicinal chemistry. May be taught abroad.

Prerequisite(s): CHE 118C or CHE 128C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 130B – Computational Drug Design (3 units)

Course Description: Continuation of CHE 130A with emphasis on case studies of various drugs and the use of computational methods in drug design. May be taught abroad.

Prerequisite(s): CHE 130A (can be concurrent).

Learning Activities: Lecture 2 hour(s), Lecture/Lab 1 hour(s).

Grade Mode: Letter.

CHE 130C – Case Studies in Medicinal Chemistry (1 unit)

Course Description: Seminar. Exploration of medicinal and pharmaceutical chemistry topics through seminars presented by professional chemists (and allied professionals). Designed to highlight career opportunities for students with a degree in pharmaceutical chemistry.

Prerequisite(s): CHE 130A (can be concurrent); CHE 130B (can be concurrent).

Learning Activities: Seminar 2 hour(s), Independent Study.

Grade Mode: Pass/No Pass only.

CHE 131 – Modern Methods of Organic Synthesis (3 units)

Course Description: Introduction to modern synthetic methodology in organic chemistry with emphasis on retrosynthetic analysis, reaction mechanisms, and application to multistep syntheses of pharmaceuticals and natural products.

Prerequisite(s): CHE 128C or CHE 118C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 135 – Drug Development Laboratory (3 units)

Course Description: Separation, purification, identification and biological evaluation of organic compounds using modern methods of synthesis, computational chemistry and instrumentation. Emphasis on pharmaceutical and medicinal substances.

Prerequisite(s): CHE 130B (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

CHE 145 – Good Quality Practices (3 units)

Course Description: Preparation for work in GQP laboratories in both research and industry. Context within GQP-Good Quality Practices (GMP Good Manufacturing Practice, GCP Good Clinical Practices). Lab practice in GQP skills.

Prerequisite(s): CHE 118B or CHE 129B.

Learning Activities: Discussion 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Open to Chemistry and science majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 150 – Chemistry of Natural Products (3 units)

Course Description: Chemistry of terpenes, steroids, acetogenins, and alkaloids: isolation, structure determination, biosynthesis, chemical transformations, and total synthesis. May be taught abroad.

Prerequisite(s): CHE 118C or CHE 128C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

CHE 155 – Scientific Programming for Chemistry (3 units)

Course Description: Chemical applications of computer programming with Python. Numpy, Scipy, Matplotlib libraries. Multidimensional arrays, data visualization, linear algebra routines. Force fields and molecular dynamics simulations. Numerical integration of differential equations with applications to chemical kinetics. Least squares fitting of experimental data.

Prerequisite(s): ECS 032A recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 168 – Chemical & Engineering Principles in Whisky & Fuel Alcohol Production (3 units)

Course Description: Chemical & engineering principles underlying the manufacture of whisky & fuel alcohol. Biochemistry of malting. Assessment of grain modification & diastatic power, and of the phenol content of peated malt. Lautering as a problem of fluidized bed compaction. Fermentation and its assessment. Fractional distillation and the Rayleigh equation. The fate of congeners in pot and column distillation. Chemical reactions affecting flavor from kilning to maturation.

Prerequisite(s): CHE 128A; CHE 128B (can be concurrent); or consent of instructor.

Learning Activities: Laboratory 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to students aged 21 years or older; open to seniors in chemical engineering and seniors in chemistry; non-majors require consent of instructor.

Cross Listing: ECH 168.

Grade Mode: Letter.

CHE 192 – Internship in Chemistry (1-6 units)

Course Description: Supervised internship in chemistry; requires a final written report.

Prerequisite(s): Upper division standing; project approval by faculty sponsor prior to enrollment.

Learning Activities: Internship 3-18 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

CHE 194HA – Undergraduate Honors Research (2 units)

Course Description: Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report.

Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program.

Learning Activities: Independent Study 2 hour(s).

Grade Mode: Letter.

CHE 194HB – Undergraduate Honors Research (2 units)

Course Description: Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report.

Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program.

Learning Activities: Independent Study 2 hour(s).

Grade Mode: Letter.

CHE 194HC – Undergraduate Honors Research (2 units)

Course Description: Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report.

Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program.

Learning Activities: Independent Study 2 hour(s).

Grade Mode: Letter.

CHE 195 – Careers in Chemistry (1 unit)

Course Description: Designed to give Chemistry undergraduate students an in-depth appreciation of career opportunities with a bachelors degree in chemistry. Professional chemists (and allied professionals) describe research and provide career insights.

Prerequisite(s): Junior or senior standing in Chemistry.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Pass/No Pass only.

CHE 197 – Projects in Chemical Education (1-4 units)

Course Description: Participation may include development of laboratory experiments, lecture demonstrations, autotutorial modules or assistance with laboratory sessions.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion/Laboratory.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

CHE 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor based upon adequate preparation in chemistry, mathematics and physics.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHE 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates. May be taught abroad.

Prerequisite(s): Consent of instructor based upon adequate preparation in chemistry, mathematics, and physics.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHE 201 – Chemical Uses of Symmetry & Group Theory (3 units)

Course Description: Symmetry elements and operations, point groups, representations of groups. Applications to molecular orbital theory, ligand field theory, molecular vibrations, and angular momentum. Crystallographic symmetry.

Prerequisite(s): CHE 124A; CHE 110B; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 204 – Mathematical Methods in Chemistry (3 units)

Course Description: Introduction to mathematical and numerical methods in chemistry. Real and complex functions. Methods of integration.

Differential equations. Linear algebra and matrices. Special functions.

Integral transforms. Statistics.

Prerequisite(s): CHE 110C.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Graduate standing in Chemistry.

Grade Mode: Letter.

CHE 205 – Symmetry, Spectroscopy, & Structure (3 units)

Course Description: Vibrational and rotational spectra; electronic spectra and photoelectron spectroscopy; magnetism; electron spin and nuclear quadrupole resonance spectroscopy; nuclear magnetic resonance spectroscopy; other spectroscopic methods.

Prerequisite(s): CHE 201; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 209 – Special Topics in Physical Chemistry (3 units)

Course Description: Advanced topics in physical chemistry, biophysical chemistry or chemical physics chosen from areas of current research interest.

Prerequisite(s): CHE 210A; CHE 211A.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Graduate standing in Chemistry.

Repeat Credit: May be repeated when topics differ.

Grade Mode: Letter.

CHE 210A – Quantum Chemistry: Introduction & Stationary-State Properties (3 units)

Course Description: Stationary-state quantum chemistry: postulates of quantum mechanics, simple solutions, central field problems and angular momenta, hydrogen atom, perturbation theory, variational theory, atoms and molecules.

Prerequisite(s): CHE 110B; CHE 110C; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 210B – Quantum Chemistry: Time-Dependent Systems (3 units)

Course Description: Matrix mechanics and time-dependent quantum chemistry: matrix formulation of quantum mechanics, Heisenberg representation, time-dependent perturbation theory, selection rules, density matrices, and miscellaneous molecular properties.

Prerequisite(s): CHE 210A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 210C – Quantum Chemistry: Molecular Spectroscopy (3 units)

Course Description: Molecular spectroscopy: Born-Oppenheimer approximation, rotational, vibrational and electronic spectroscopy, spin systems, and molecular photophysics.

Prerequisite(s): CHE 210B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 211A – Advanced Physical Chemistry: Statistical Thermodynamics (3 units)

Course Description: Principles and applications of statistical mechanics; ensemble theory; statistical thermodynamics of gases, solids, liquids, electrolyte solutions and polymers; chemical equilibrium.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 211B – Statistical Mechanics (3 units)

Course Description: Statistical mechanics of nonequilibrium systems, including the rigorous kinetic theory of gases, continuum mechanics transport in dense fluids, stochastic processes, brownian motion and linear response theory.

Prerequisite(s): CHE 211A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 212 – Chemical Dynamics (3 units)

Course Description: Introduction to modern concepts in chemical reaction dynamics for graduate students in chemistry. Emphasis will be placed on experimental techniques as well as emerging physical models for characterizing chemical reactivity at a microscopic level.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 215 – Theoretical & Computational Chemistry (3 units)

Course Description: Mathematics of wide utility in chemistry, computational methods for guidance or alternative to experiment, and modern formulations of chemical theory. Emphasis will vary in successive years.

Prerequisite(s): CHE 211A; CHE 210B; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

CHE 216 – Magnetic Resonance Spectroscopy (3 units)

Course Description: Quantum mechanics of spin and orbital angular momentum, nuclear magnetic resonance, theory of chemical shift and multiplet structures, electron spin resonance, theory of tensor in organic and transition ions, spin Hamiltonians, nuclear quadrupolar resonance, spin relaxation processes.

Prerequisite(s): CHE 210A; CHE 210B (can be concurrent).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 217 – X-Ray Structure Determination (3 units)

Course Description: Introduction to x-ray structure determination; crystals, symmetry, diffraction geometry, sample preparation and handling, diffraction apparatus and data collection, methods of structure solution and refinement, presentation of results, text, tables and graphics, crystallographic literature.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 218 – Macromolecules: Physical Principles (3 units)

Course Description: Relationship of higher order macromolecular structure to subunit composition; equilibrium properties and macromolecular dynamics; physical chemical determination of macromolecular structure.

Prerequisite(s): CHE 110A; CHE 110B; CHE 110C; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 219 – Spectroscopy of Organic Compounds (3 units)

Course Description: Identification of organic compounds and investigation of stereochemical and reaction mechanism phenomena using spectroscopic methods—principally NMR, IR and MS.

Prerequisite(s): CHE 128C; or equivalent.

Learning Activities: Lecture 3 hour(s), Laboratory 2.50 hour(s).

Grade Mode: Letter.

CHE 219L – Laboratory in Spectroscopy of Organic Compounds (1 unit)

Course Description: Practical application of NMR, IR and MS techniques for organic molecules.

Prerequisite(s): CHE 219 (can be concurrent).

Learning Activities: Laboratory 2.50 hour(s).

Enrollment Restriction(s): Restricted to Chemistry graduate students only or consent of instructor.

Grade Mode: Letter.

CHE 221A – Special Topics in Organic Chemistry (3 units)

Course Description: Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 221B – Special Topics in Organic Chemistry (3 units)

Course Description: Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 221C – Special Topics in Organic Chemistry (3 units)

Course Description: Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 221D – Special Topics in Organic Chemistry (3 units)

Course Description: Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 221E – Special Topics in Organic Chemistry (3 units)

Course Description: Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 221F – Special Topics in Organic Chemistry (3 units)

Course Description: Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 221G – Special Topics in Organic Chemistry (3 units)

Course Description: Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 221H – Special Topics in Organic Chemistry (3 units)

Course Description: Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 222 – Chemistry of Nanoparticles (3 units)

Course Description: Chemical and physical aspects of inorganic nanoparticles, including synthesis, purification, reactivity, characterization, and applications for technology. Emphasis is on problems from the current literature.

Prerequisite(s): CHE 110C; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CHE 122.

Grade Mode: Letter.

CHE 226 – Principles of Transition Metal Chemistry (3 units)

Course Description: Electronic structures, bonding, and reactivity of transition metal compounds.

Prerequisite(s): CHE 124A; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 228A – Bio-inorganic Chemistry (3 units)

Course Description: Defines role of inorganic chemistry in the functioning of biological systems by identifying the functions of metal ions and main group compounds in biological systems and discussing the chemistry of model and isolated biological compounds. Offered every third year.

Prerequisite(s): CHE 226; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 228B – Main Group Chemistry (3 units)

Course Description: Synthesis, physical properties, reactions and bonding of main group compounds. Discussions of concepts of electron deficiency, hypervalency, and non-classical bonding. Chemistry of the main group elements will be treated systematically. Offered every third year.

Prerequisite(s): CHE 226; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 228C – Solid-State Chemistry (3 units)

Course Description: Design and synthesis, structure and bonding of solid-state compounds; physical properties and characterization of solids; topics of current interest such as low-dimensional materials, inorganic polymers, materials for catalysis. Offered every third year.

Prerequisite(s): CHE 124A; CHE 110B; CHE 226; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 228D – Homogeneous Catalysis (3 units)

Course Description: Overview of homogeneous catalysis and related methods, with emphasis on kinetics, mechanisms, and applications for organic synthesis. The related methods may include cluster, colloid, phase transfer, enzymatic, heterogeneous and polymer-supported catalysis. Offered every third year.

Prerequisite(s): CHE 226.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 228E – Magnetochemistry (3 units)

Course Description: Covers the basic principles and concepts of magnetism, methods used for characterization of magnetic properties, as well as specific state-of-the-art magnetic materials and topics from the recent chemistry literature.

Prerequisite(s): CHE 124A or CHE 201; or an equivalent class from either Physics or Chemical Engineering and Materials Science.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

CHE 231A – Organic Synthesis: Methods & Strategies (4 units)

Course Description: Current strategies and methods in synthetic organic chemistry. Focus on construction of carbon frameworks, control of relative and absolute stereochemistry and retrosynthetic strategies. Use of databases and molecular modeling software in multistep strategies.

Prerequisite(s): CHE 128C; or equivalent.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

CHE 231B – Advanced Organic Synthesis (3 units)

Course Description: Current strategies and methods in synthetic organic chemistry. Continuation of CHE 231A. Organic synthesis of complex target molecules. Stereochemical considerations and asymmetric synthesis. Organometallics for selective transformations. Carbocyclic and heterocyclic ring formation.

Prerequisite(s): CHE 231A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 233 – Physical-Organic Chemistry (3 units)

Course Description: Introduction to elementary concepts in physicalorganic chemistry including the application of simple numerical techniques in characterizing and modeling organic reactions.

Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; CHE 110A; CHE 110B; CHE 110C; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 234 – Chemical & Molecular Neuroscience (3 units)

Course Description: Basic principles in chemistry and molecular biology applied to questions in neuroscience. Chemical and molecular tools driving innovative work in chemical and molecular biology.

Prerequisite(s): CHE 128C; BIS 102; or equivalent courses.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 235 – Organometallic Chemistry in Organic Synthesis (3 units)

Course Description: Current trends in use of organometallics for organic synthesis; preparations, properties, applications, and limitations of organometallic reagents derived from transition and/or main group metals.

Prerequisite(s): CHE 128C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 236 – Chemistry of Natural Products (3 units)

Course Description: Advanced treatment of chemistry of naturally occurring compounds isolated from a variety of sources. Topics will include isolation, structure determination, chemical transformations, total synthesis, biological activity, and biosynthesis. Biosynthetic origin will be used as a unifying theme.

Prerequisite(s): CHE 128C; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 237 – Bio-Organic Chemistry (3 units)

Course Description: Structure and function of biomolecules; molecular recognition; enzyme reaction mechanisms; design of suicide substrates for enzymes; enzyme engineering; design of artificial enzymes and application of enzymes in organic synthesis.

Prerequisite(s): Graduate standing in Chemistry or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 238 – Introduction to Chemical Biology (3 units)

Course Description: Synthesis of complex molecules in nature. Use of biosynthetic pathways in synthesis of new chemical entities. Applications of small molecules in chemical genetics and structural biology. Solving biological problems using synthetic biomolecules.

Prerequisite(s): CHE 118C or CHE 128C; or equivalent; CHE 130A, CHE 130B and BIS 102, BIS 103, and BIS 104, or the equivalents recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 240 – Advanced Analytical Chemistry (3 units)

Course Description: Numerical treatment of experimental data; thermodynamics of electrolyte and non-electrolyte solutions; complex equilibria in aqueous and non-aqueous solutions; potentiometry and specific ion electrodes; mass transfer in liquid solutions; fundamentals of separation science, including column, gas and liquid chromatography.

Prerequisite(s): CHE 110A; CHE 115; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 241A – Surface Analytical Chemistry (3 units)

Course Description: Concepts of surfaces and interfaces: physical properties, unique chemistry and electronic effects. Focus on gas-solid interfaces, with some discussion of liquid-solid interfaces.

Prerequisite(s): CHE 110C; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 241B – Laser & X-ray Spectroscopy (3 units)

Course Description: Concepts and mechanisms of light-matter interactions. Chemical applications of modern spectroscopic methods, including multiphoton spectroscopy, time-resolved laser and x-ray photolysis, and phase-contrast x-ray imaging.

Prerequisite(s): CHE 110B; or equivalent.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

CHE 241C – Mass Spectrometry (3 units)

Course Description: Mass spectrometry and related methods with emphasis on ionization methods, mass analyzers, and detectors. Related methods may include ion-molecule reactions, unimolecular dissociation of organic and bio-organic compounds, and applications in biological and environmental analysis.

Prerequisite(s): CHE 110C; CHE 115; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 241D – Electroanalytical Chemistry (3 units)

Course Description: Electroanalytical chemistry with consideration of mass transfer and electrode kinetics for polarizable electrodes. Current-potential curves for a variety of conditions, including both potentiostatic and galvanostatic control, and their application in chemical analysis.

Prerequisite(s): CHE 110C; CHE 115; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 241E – Microscopy & Imaging Techniques (3 units)

Course Description: Introduction to modern microscopy and imaging techniques: scanning tunneling, atomic force, far-field optical, fluorescence, scanning near-field optical, and scanning electron microscopy. Application to nanoscience and analytical and bioanalytical chemistry. Some laboratory demonstrations.

Prerequisite(s): CHE 110C; CHE 115; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 245 – Mechanistic Enzymology (3 units)

Course Description: Advanced topics in chemical kinetics relevant to enzymes, enzyme kinetics, theory of enzyme catalysis, and the analysis of a selection of organic enzyme reaction mechanisms by the tools introduced in the first part of the course.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

CHE 261 – Current Topics in Chemical Research (2 units)

Course Description: Designed to help chemistry graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas.

Prerequisite(s): Graduate standing in Chemistry or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

CHE 262 – Introduction to Chemistry Research (1 unit)

Course Description: Group and individual discussion of research activities in the Department and research topic selection. Designed for incoming graduate students preparing for higher degrees in chemistry.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students; Pass Two open to all majors.

Grade Mode: Satisfactory/Unsatisfactory only.

CHE 263 – Introduction to Chemical Research Methodology (3 units)

Course Description: Introduction to identification, formulation, and solution of meaningful scientific problems including experimental design and/or theoretical analyses of new and prevailing techniques, theories and hypotheses. May be repeated for credit when topic differs.

Prerequisite(s): CHE 293; and consent of instructor; graduate student standing in Chemistry.

Learning Activities: Discussion/Laboratory 9 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CHE 264 – Advanced Chemical Research Methodology (6 units)

Course Description: Applications of the methodology developed in CHE 263 to experimental and theoretical studies. Advanced methods of interpretation of results are developed. Includes the preparation of manuscripts for publication.

Prerequisite(s): CHE 263; or consent of instructor.

Learning Activities: Discussion/Laboratory 18 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

CHE 290 – Seminar (2 units)

Course Description: Seminar.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CHE 294 – Presentation of Chemistry Research (1 unit)

Course Description: Introduces first- and second-year Chemistry graduate students to the process of giving an effective research presentation. Advanced Ph.D. students give formal seminars describing the design and execution of their research projects.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to graduate students in Chemistry who have not yet given their departmental presentation.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CHE 295 – Careers in Chemistry (1 unit)

Course Description: Designed to give Chemistry graduate students an in-depth appreciation of career opportunities with a M.S. or Ph.D. degree in chemistry. Professional chemists (and allied professionals) give seminars describing both research and career insights.

Prerequisite(s): Graduate standing in Chemistry.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CHE 296 – Research in Pharmaceutical Chemistry (6 units)

Course Description: Laboratory provides qualified graduate students with the opportunity to pursue original investigation in Pharmaceutical Chemistry and allied fields in order to fulfill the letter-graded research requirement of the Integrated B.S./M.S. Program in Chemistry (Pharmaceutical Chemistry Emphasis).

Prerequisite(s): CHE 130A; CHE 130B; CHE 135; CHE 233 (can be concurrent); and consent of instructor.

Learning Activities: Laboratory 18 hour(s).

Enrollment Restriction(s): Restricted to students in the Integrated B.S./M.S. Program in Chemistry.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

CHE 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Letter.

CHE 299 – Research (1-12 units)

Course Description: The laboratory is open to qualified graduate students who wish to pursue original investigation. Students wishing to enroll should communicate with the department well in advance of the quarter in which the work is to be undertaken.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

CHE 390 – Methods of Teaching Chemistry (2 units)

Course Description: Practical experience in methods and problems of teaching chemistry. Includes analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting of discussion sessions and student laboratories. Participation in the teaching program required for Ph.D. in chemistry.

Prerequisite(s): Consent of instructor; graduate student standing in Chemistry.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

CHE 392 – Advanced Methods of Teaching Chemistry (2 units)

Course Description: Advanced topics in teaching chemistry. Analysis and discussion of curricular design, curricula materials, teaching methods and evaluation. For students who are planning a career in teaching chemistry.

Prerequisite(s): CHE 390.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Chicano Studies (CHI)

College of Letters & Science

CHI 010 – Introduction to Chicana/o Studies (4 units)

Course Description: Analysis of the situation of the Chicana/o (Mexican-American) people, emphasizing their history, literature, political movements, education and related areas.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

CHI 021 – Chicana/o & Latina/o Health Care Issues (4 units)

Course Description: Overview of health issues of Chicanas/os and Latinas/os in the State of California; role of poverty/lack of education in limited access to health care.

Prerequisite(s): CHI 010.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL); Writing Experience (WE).

CHI 021S – Chicana/o & Latina/o Health Care Issues (4 units)

Course Description: Overview of health issues of Chicanas/os and Latinas/os in the State of California; role of poverty/lack of education and limited access to health care. All course instruction in Spanish. May be taught abroad.

Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; or equivalent.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHI 021.

Grade Mode: Letter.

General Education: Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 023 – Qualitative Research Methods (4 units)

Course Description: Dominant models of qualitative inquiry in educational and social science research as well as mestizo approaches to research with latinos. Emphasis given to choosing and designing culturally appropriate strategies to investigate latino health, education, social context, and policy issues.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

CHI 030 – United States Political Institutions & Chicanas/os (4 units)

Course Description: Overview of the major political institutions and ideologies of the United States and the Chicana/o people's historical and contemporary role in, effects from, and responses to them. Theory, method and critical analysis.

Learning Activities: Discussion/Laboratory 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

CHI 040 – Comparative Health: Top Leading Causes of Death (4 units)

Course Description: Introduction to the epidemiology of the leading causes of death for ethnic/racial minorities. Assessment of disproportionate rates at which ethnic/racial minorities suffer and die from chronic and infectious diseases and injuries and statistical methods used to calculate these rates.

Prerequisite(s): STA 013 or STA 013Y; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHI 040S.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

CHI 040S – Comparative Health: Leading Causes of Death (4 units)

Course Description: Introduction to epidemiology of leading causes of death for ethnic/racial minorities. Assessment of disproportionate rates at which ethnic/racial minorities suffer & die from chronic and infectious diseases & injuries & statistical methods used to calculate these rates.

May be taught abroad.

Prerequisite(s): STA 013 or STA 013Y; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHI 040.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); World Cultures (WC); Writing Experience (WE).

CHI 042 – Food Justice: Chicana/o & Indigenous Communities (4 units)

Course Description: Issues surrounding food justice in Chicana/o and Indigenous Communities. Emphasis on discourses and practices of growing a food justice movement centered on the ecological care of the earth and decolonized environmental methodologies.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Scientific Literacy (SL); Visual Literacy (VL).

CHI 050 – Chicana & Chicano Culture (4 units)

Course Description: Interdisciplinary survey of Chicana/o cultural representation in the 20th century. Examines Chicana/o culture within a national and transnational context. Explores how Chicano cultural forms and practices intersect with social/material forces, intellectual formations and cultural discourses. (Former CHI 020.)

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

CHI 060 – Chicana & Chicano Representation in Cinema (4 units)

Course Description: Introductory-level study of Chicana and Chicano representation in cinema. Depiction of Chicana and Chicano experience by Chicana/o filmmakers, as well as by non-Chicanos, including independent filmmakers and the commercial industry.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Film Viewing 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); Writing Experience (WE).

CHI 065 – New Latin American Cinema (4 units)

Course Description: Historical, critical, and theoretical survey of the cinemas of Latin America and their relationship to the emergence of U.S. Latino cinema. Emphasis on representation and social identity including gender, sexuality, class, race and ethnicity.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion 1 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CHI 070 – Survey of Chicana/o Art (4 units)

Course Description: Survey of contemporary Chicana/o art in context of the social turmoil from which it springs. Includes political use of the poster and the mural, the influence of the Mexican mural and graphic movement, and social responsibility of the artist.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CHI 073 – Chicana/o Art Expression Through Silk Screen (4 units)

Course Description: Introductory level studio course using silk screen and basic printing techniques to explore and develop images of Chicana/o cultural themes and expressions. Students experiment with images and symbols from their immediate environment/culture. Integrated approach to Chicana/o philosophy of art.

Learning Activities: Studio 8 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC).

CHI 092 – Internship (1-12 units)

Course Description: Academic guidance combined with internship in community agencies serving Mexican/Latina/Latino/Chicana/Chicano clients. Students will use their bilingual skills and knowledge of history, culture, economics, politics and social issues.

Prerequisite(s): CHI 010; or consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

CHI 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHI 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHI 100 – Chicana/o Theoretical Perspective (4 units)

Course Description: Critical examination of emerging Chicana/o Studies theoretical perspectives in light of contemporary intellectual frameworks in the social sciences, arts, and humanities. Includes analysis of practices of self-representation, and socio-cultural developments in the Chicana/o community.

Prerequisite(s): CHI 010; CHI 050.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

CHI 102A – Chicana/o Feminist Theoretical Understandings of K-20 Educational Disparities (4 units)

Course Description: Examination of educational disparities of the K-20 educational system. Chicana/o education theory and analysis with a specific emphasis on feminist frameworks and analytical tools used to guide and inform educational policy-making.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork.

Grade Mode: Letter.

CHI 102B – Grassroots Community Activism & Mobilization Efforts Challenging Educational Inequity (4 units)

Course Description: Exploration and research on effective grassroots community activism and mobilization efforts by Chicana/o students, along with their teachers, families, and other allies to protest structured inequality of the U.S. educational system. Mentoring and tutoring in a school under the supervision of a faculty member is required.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork.

Grade Mode: Letter.

CHI 102C – Policy & Law Challenging Segregation & Educational Inequity (4 units)

Course Description: Focus on successful lawsuits against school segregation of Mexican-origin children in the United States. Mentoring and tutoring in a school under the supervision of a faculty member is required.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork.

Grade Mode: Letter.

CHI 110 – Sociology of the Chicana/o Experience (4 units)

Course Description: The Chicana/o experience in the American society and economy viewed from theoretical perspectives. Immigration, history of integration of Chicana/o labor into American class structure, education inequality, ethnicity, the family and Chicana/o politics. (Former course SOC 110.)

Prerequisite(s): CHI 010 or SOC 001.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

CHI 111 – Chicanas/Mexicanas in Contemporary Society (4 units)

Course Description: Analysis of the role and status of Chicanas/Mexicanas in contemporary society. Special emphasis on their historical role, the political, economic and social institutions that have affected their status, and their contributions to society and their community. (Former CHI 102.)

Prerequisite(s): CHI 010 or CHI 050; (WMS 050 or HIS 169B).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

CHI 112 – Globalization, Transnational Migration, & Chicana/o & Latina/o Communities (4 units)

Course Description: Chicana/o and Latina/o migration experiences within a global context. Topics include national and/or transnational migration in Mexico, Central America, and the United States.

Prerequisite(s): CHI 010.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

CHI 113 – Latin American Women's Engagement in Social Movements (4 units)

Course Description: Examination of how women of different racial/ethnic and class backgrounds in Latin America challenge their marginalization. Exploration of US foreign policy, its effects on Latin American's institutions and on Latin American citizens. Using Chicana feminist perspective.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

CHI 114 – Women of Color Reproductive Health & Reproductive Politics in a Global Perspective (4 units)

Course Description: Study contemporary issues in reproductive health and reproductive politics, both globally and in the U.S., for women of color.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

CHI 114S – Women of Color Reproductive Health & Gender Politics in Cuba & the U.S. (4 units)

Course Description: Study of contemporary issues in reproductive health, reproductive politics, and gender politics both in Cuba and in the U.S., for women of color.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

CHI 120 – Chicana/o Psychology (4 units)

Course Description: Introduction to the field of Chicana/o psychology. Analysis of socio-cultural context of Chicanas/os and Latinas/os. Special attention to issues of ethnic identity development, bilingualism, and development of self esteem. Impact of minority experience, migration, acculturation are examined.

Prerequisite(s): CHI 021; Introductory psychology course recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

CHI 121 – Chicana/o Community Mental Health (4 units)

Course Description: Mental health needs, problems, and service utilization patterns of Chicanas/os and Latinas/os will be analyzed. Analysis of social service policy, and the economic context of mental health programs.

Prerequisite(s): CHI 010; or CHI 020.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

CHI 122 – Psychology Perspectives Chicana/o & Latina/o Family (4 units)

Course Description: Role of migration and acculturation on family structure and functioning. From a psychological and Chicana/o Studies perspective, contemporary gender roles and variations in family structures are examined. Special topics include family violence, addiction, family resilience and coping strategies.

Prerequisite(s): CHI 010; and consent of instructor; introductory psychology course highly recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CHI 122S – Psychology Perspectives Chicana/o & Latina/o Family (4 units)

Course Description: Role of migration and acculturation on family structure and functioning. From a psychological and Chicana/o Studies perspective, contemporary gender roles and variations in family structures are examined. Special topics include family violence, addiction, family resilience and coping strategies. May be taught abroad.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHI 122.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 123 – Psychological perspectives on Chicana/o & Latina/o Children & Adolescents (4 units)

Course Description: Psychological and educational development of Chicano/Latino children and adolescents, with particular attention to the formation of ethnic, gender, class, race, and sexual identities.

Prerequisite(s): CHI 010 or CHI 021.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

CHI 125S – Latino Families in the Age of Globalization: Migration & Transculturation (4 units)

Course Description: Impact of globalization on Latino families in the American continent. Relationships of political structure, economics and family. Intimate partner violence, child maltreatment and alcohol/drug abuse in contemporary Latino families. Offered in a Spanish speaking country; may be taught abroad.

Prerequisite(s): SPA 003 or the equivalent highly recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 130 – United States-Mexican Border Relations (4 units)

Course Description: Theories of U.S.-Mexican border relations, with an overview of the political, economic, and social relationships and an in-depth analysis of immigration issues, border industrialization, women's organizations, economic crises, and legal issues.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

CHI 131 – Chicanas in Politics & Public Policy (4 units)

Course Description: Historical and political analysis of Chicana/Latina political involvement and activities in the general political system, women's movement, Chicano movement, and Chicana movement. Examines the public policy process and the relationship of Chicanas/Latinas to public policy formation.

Prerequisite(s): CHI 030 or POL 001 or POL 001Y.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

CHI 131S – Chicanas in Politics & Public Policy (4 units)

Course Description: Historical and political analysis of Chicana/Latina political involvement and activities in the general political system, women's movement, Chicano/a movement. Examines the public policy process and the relationship of Chicanas/Latinas to public policy formation. May be taught abroad.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHI 131.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 132 – Political Economy of Chicana/o Communities (4 units)

Course Description: Historical and contemporary study of political and economic forces which define and influence the development of Chicana/o communities. Includes critiques of traditional and Marxian theories and concepts applicable to Chicana/o communities, case studies of Chicana/o communities, especially in California and Texas.

Prerequisite(s): Upper division standing; lower division Chicana/o Studies (CHI) course recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

CHI 135S – Transnational Latina/o Political Economy (4 units)

Course Description: Intensive reading, discussion and research on selected topics from Latin America and the U.S. with regard to immigrant and native communities. Topics include comparative immigration and macroeconomic policies in the U.S. and Latin America. Offered in a Spanish speaking country; may be taught abroad.

Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; or consent of instructor, or equivalent; ECN 001A and ECN 001B recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 136 – Critical & Abolitionist Pedagogies (4 units)

Course Description: How marginalized groups conceptualize learning and teaching as a practice of freedom. Foundational text and concepts in critical pedagogy. Diverse and intersecting intellectual traditions that inform how oppressed peoples use education as a tool of liberation.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

CHI 140A – Quantitative Methods: Chicano/Latino Health Research (4 units)

Course Description: Focuses on measuring Latino/Chicano health outcomes using a quantitative approach. Assesses main types of study designs and addresses measurement of disease frequency and health effects.

Prerequisite(s): Two years of high school algebra or the equivalent in college.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Quantitative Literacy (QL).

CHI 141 – Community-Based Participatory Research & Chicana/o & Latina/o Health (4 units)

Course Description: Overview of CBPR, as well as methodological CBPR considerations in building community partnerships, community assessment, issue analysis, research planning, data gathering, and data sharing with Chicana/o and Latina/o communities in particular.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Domestic Diversity (DD); Writing Experience (WE).

CHI 145S – Bi-National Health (5 units)

Course Description: Examination of health status and intervention strategies presented in public health care settings, private clinics and by indigenous healers in Mexico. Analysis of impact of high risk diseases. Offered in a Spanish speaking country under supervision of UC Davis faculty/lecturer; may be taught abroad.

Prerequisite(s): BIS 001A; BIS 001B; BIS 001C; (SPA 021 or SPA 021V or SPA 021Y or SPA 031); or consent of instructor. Upper division standing only.

Learning Activities: Lecture 5 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 146S – Public Health in Latin America (5 units)

Course Description: Critical examination of emerging Public Health issues in Latin America in light of economic, political and social conditions. Contemporary behavioral frameworks used in public health. Includes analysis of clinical medicine and health care systems.

Learning Activities: Lecture/Discussion 4 hour(s), Term Paper.

Grade Mode: Letter.

CHI 147S – Indigenous Healing & Biodiversity in Latin America (5 units)

Course Description: Contrast between western and traditional healing practices in Latin America and the role of the natural environment in creating sustainable health delivery systems. Questions of health status attributable to public health and environmental risk factors. May be taught abroad.

Learning Activities: Lecture 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 148 – Decolonizing Spirit (4 units)

Course Description: Legacies of colonization and decolonization; indigenous forms of spirituality and sacredness. Emphasis on remembering traditions, practices, relations, and forms of indigenous knowledge.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CHI 150 – The Chicana & Chicano Movement (4 units)

Course Description: Development of the Chicano Movement within the context of the socio-political movements of the 1960's in a national and global perspective. Ideological/political perspectives and the implications for political strategies.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

CHI 154 – The Chicana/o Novel (4 units)

Course Description: Introduction to the forms and themes of the Chicana/o novel with special attention to the construction of gender, nationality, sexuality, social class, and the family by contemporary Chicana/o novelists. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course SPA 126A.)

Prerequisite(s): Intermediate Spanish or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 155 – Chicana/o Theater (4 units)

Course Description: Examination of the formal and thematic dimensions of Chicana/o theater in the contemporary period with special emphasis on El Teatro Campesino and Chicana Feminist Theater. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course SPA 126B.)

Prerequisite(s): Intermediate Spanish or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CHI 156 – Chicana/o Poetry (4 units)

Course Description: Survey of Chicana/o poetry with special emphasis on its thematic and formal dimensions. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course SPA 126C.)

Prerequisite(s): Intermediate Spanish or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 157 – Chicana & Chicano Narrative (4 units)

Course Description: Exploration of contemporary forms of the Chicana and Chicano narrative, encompassing visual art, fiction, poetry, film, theater, and creative nonfiction. Exposure to a variety of artists and scholars whose work shapes our evolving understanding of the Chicana/o experience.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CHI 158 – Contemporary Issues in Latinx Literature (4 units)

Course Description: Contemporary Chicanx Literature within the broader umbrella of Latinx Literature. Genres, including fiction, nonfiction, and poetry, but also hybrid and mixed genre texts. New trends and topics relating to 21st Century Latinx authors, including intersectionality and multiple identities, AfroLatinx and Indigenous identity, Queer representation, Young Adult literature, and undocumented writers.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

CHI 160 – Mexican Film & Greater Mexican Identity (4 units)

Course Description: Survey of the role Mexican cinema plays in consolidation and contestation of post-revolutionary Mexican state and in the formation of a Greater Mexican cultural identity including Chicana/o identity. Showcases genres, perios, auteurs, movements and emphasis on gendered and sexualized narratives.

Prerequisite(s): Intermediate Spanish.

Learning Activities: Lecture/Discussion 4 hour(s), Film Viewing 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CHI 161 – Queer Latinidad (4 units)

Course Description: Introduction to queer Latina and Latino studies with a focus on Chicana and Chicano theory and cultural production.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

CHI 165 – Chicanas, Latinas & Mexicanas in Commercial Media (4 units)

Prerequisite(s): CHI 060; or other film or feminist theory course; conversational fluency in Spanish.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CHI 170 – Contemporary Issues in Chicano Art (4 units)

Course Description: Issues and conflicts in the dismantling of the Contemporary Chicano Art Movement. Response and challenge to the dominant culture.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CHI 171 – Mexican & Chicano Mural Workshop (4 units)

Course Description: The Mural: a collective art process that empowers students and people through design and execution of mural paintings in the tradition of the Mexican Mural Movement; introduces materials and techniques.

Prerequisite(s): CHI 070; and consent of instructor.

Learning Activities: Studio 8 hour(s), Independent Study 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Cross Listing: ART 171.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CHI 172 – Chicana/o Voice/Poster Silk Screen Workshop (4 units)

Course Description: The poster as a voice art form used by Chicanas/os and other people of color to point to the defects of social and political existence and the possibility for change, from the Chicana/o artists' perspective.

Prerequisite(s): CHI 070 or CHI 073; and consent of instructor.

Learning Activities: Studio 8 hour(s), Independent Study 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC).

CHI 180 – Grant Writing in the Chicana/o/Latina/o Community (4 units)

Course Description: Overview of key elements for grant writing. Topics include community needs assessments, development of human subjects protocols, data collection, methods, evaluation designs and community based methodologies for grant development applications in the Latino community.

Prerequisite(s): CHI 010 or CHI 023; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Upper division standing.

Grade Mode: Letter.

CHI 181 – Chicanas & Latinas in the U.S.: Historical Perspectives (4 units)

Course Description: Historical issues in the lives of Chicanas and Latinas in the U.S. and their diverse countries of origin.

Prerequisite(s): CHI 010 or WMS 050.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

CHI 182 – Race & Juvenile Justice (4 units)

Course Description: Individual and institutional responses to "troublesome" youth of color through history and in contemporary society. Emphasis on how race, as well as ethnicity, class, and gender have informed the treatment of "delinquent" youth.

Prerequisite(s): CHI 010; or equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

CHI 184 – Latino Youth Gangs in Global Perspective (4 units)

Course Description: Comparative analysis of Latino youth gangs in Europe, Latin America, and the United States. Social, economic, political, and cultural factors leading to youth gangs as well as the responses are considered within a global perspective.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have completed CHI 184S.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 184S – Latino Youth Gangs in Global Perspective (4 units)

Course Description: Comparative analysis of Latino youth gangs in Europe, Latin America, and the United States. Social, economic, political, and cultural factors leading to youth gangs as well as the responses to the youths are considered within a global perspective. May be taught abroad.

Learning Activities: Lecture/Discussion 12 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHI 184.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHI 188A – Transforming Violence: Healing our Relations (4 units)

Course Description: Transforming violence with a focus on emerging abolitionist movements in community accountability and transformative justice; emphasis on the study and practice of nurturing life-honoring and care-centered sacred relations through decolonizing, indigenous, and spirit-centered traditions and cosmologies.

Prerequisite(s): CHI 010 (can be concurrent).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

CHI 192 – Internship in the Chicana/Chicano/Latina/ Latino Community (1-12 units)

Course Description: Academic guidance combined with internship in community agencies serving Mexican/Latina/Latino/Chicana/ Chicano clients. Use of bilingual skills and knowledge of history, culture, economics, politics and social issues. Internship project required.

Prerequisite(s): (CHI 010 or CHI 021 or CHI 050); (SPA 003 or SPA 003V or SPA 003Y); or equivalent of SPA 003.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Oral Skills (OL).

CHI 192S – Internship (1-12 units)

Course Description: Internship. May be taught abroad.

Prerequisite(s): (CHI 010 or CHI 021 or CHI 050); (SPA 003 or SPA 003V or SPA 003Y); and consent of instructor, or equivalent of SPA 003, SPA 003V, SPA 003Y.

Learning Activities: Internship.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

CHI 194HA – Senior Honors Research Project (2-5 units)

Course Description: Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics.

Prerequisite(s): Consent of instructor; senior standing in Chicana/o Studies major.

Learning Activities: Independent Study 6-15 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL); Writing Experience (WE).

CHI 194HB – Senior Honors Research Project (2-5 units)

Course Description: Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics.

Prerequisite(s): Consent of instructor; senior standing in Chicana/o Studies major.

Learning Activities: Independent Study 6-15 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL); Writing Experience (WE).

CHI 194HC – Senior Honors Research Project (2-5 units)

Course Description: Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics.

Prerequisite(s): Consent of instructor; senior standing in Chicana/o Studies major.

Learning Activities: Independent Study 6-15 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL); Writing Experience (WE).

CHI 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Upper division standing and consent of Program Chairperson.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHI 198S – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

CHI 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Upper division standing and consent of Program Chairperson.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHI 199S – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

CHI 230 – Chicano/Latino Hispanic Politics (4 units)

Course Description: Examination of Chicano/Latino political experiences. Evaluate theories, ideology, and practice of Chicano politics. Brief history of Chicano/Latino/Hispanic political activity, comparisons among political modes, gendered politics, and understanding relationships among Chicano, Mexican, American and world politics.

Prerequisite(s): Two undergraduate courses in Chicana/o Studies (CHI) or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

CHI 241 – Community Based Participatory Research (4 units)

Course Description: Provides knowledge & skills to plan and implement participatory & community based projects that highlight community empowerment framework.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

CHI 298 – Group Study for Graduate Students (1-5 units)

Course Description: Group study for graduate students.
Prerequisite(s): Consent of instructor; graduate standing.
Learning Activities: Variable.
Repeat Credit: May be repeated when topics differs.
Grade Mode: Satisfactory/Unsatisfactory only.

CHI 299 – Special Study for Graduate Students (1-12 units)

Course Description: Special study for graduate students.
Prerequisite(s): Consent of instructor; graduate standing.
Learning Activities: Variable.
Grade Mode: Satisfactory/Unsatisfactory only.

CHI 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.
Prerequisite(s): Consent of instructor; graduate standing.
Learning Activities: Variable.
Repeat Credit: May be repeated.
Grade Mode: Satisfactory/Unsatisfactory only.

Chinese (CHN)

College of Letters & Science

CHN 001 – Elementary Chinese (5 units)

Course Description: Developing elementary level skills of listening, speaking, reading and writing in Mandarin Chinese in everyday communication settings. Introduction of fundamentals of pronunciation, grammar, and Chinese characters will be introduced.
Prerequisite(s): No background in Chinese or placement exam or consent of instructor.
Learning Activities: Lecture/Discussion 5 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 001A – Accelerated Intensive Elementary Chinese (15 units)

Course Description: Introduction and practice in contexts of pronunciation, writing system, basic grammar and vocabulary as basis of communicative competency in Mandarin Chinese within a special nine-week intensive course which combines CHN 001, CHN 002 and CHN 003.
Prerequisite(s): No background in Chinese or placement exam or consent of instructor.
Learning Activities: Lecture/Discussion 15 hour(s).
Credit Limitation(s): Not open for credit to students who have completed CHN 001, CHN 002, or CHN 003.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 001BL – Accelerated Written Chinese I (5 units)

Course Description: Trainings on all the communicative skills of listening, speaking, reading, and writing for students who already have elementary level ability to understand or speak Mandarin Chinese. Emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations.

Prerequisite(s): Placement exam or consent of instructor.
Learning Activities: Lecture 5 hour(s).
Credit Limitation(s): Not open for credit to students who have completed CHN 008.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 001CN – Mandarin for Cantonese Speakers I (5 units)

Course Description: Training in spoken Mandarin, particularly in the phonetic transcription system known as pinyin, for students who already read and write Chinese.
Prerequisite(s): Placement exam or consent of instructor.
Learning Activities: Lecture 5 hour(s).
Credit Limitation(s): Not open for credit to students who have completed CHN 007.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 002 – Elementary Chinese (5 units)

Course Description: Continuation of elementary level skill development in listening, speaking, reading and writing Mandarin Chinese in everyday communication settings. Continued introduction of basic vocabulary and characters as well as core grammar, and further train pronunciation.
Prerequisite(s): CHN 001; or placement exam or consent of instructor.
Learning Activities: Lecture/Discussion 5 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 002BL – Accelerated Written Chinese II (5 units)

Course Description: Further trainings on all the communicative skills of listening, speaking, reading, and writing for students that already have elementary level ability to understand or speak Mandarin Chinese. Emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations.
Prerequisite(s): CHN 001BL; or placement exam or consent of instructor.
Learning Activities: Lecture 5 hour(s).
Credit Limitation(s): Not open for credit to students who have completed CHN 018.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 002CN – Mandarin for Cantonese Speakers II (5 units)

Course Description: Continuation of CHN 001CN. Training in spoken Mandarin for students who can already read and write Chinese.

Prerequisite(s): CHN 001CN; or placement exam or consent of instructor.

Learning Activities: Lecture 5 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHN 017.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 003 – Elementary Chinese (5 units)

Course Description: Continuation of elementary level skill development in listening, speaking, reading and writing Mandarin Chinese in everyday communication settings. Continued introduction of basic vocabulary and characters as well as core grammar, and further train pronunciation.

Prerequisite(s): CHN 002; or placement exam or consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 003BL – Accelerated Written Chinese III (5 units)

Course Description: Continuation of CHN 002BL with further trainings on all the communicative skills of listening, speaking, reading, and writing with emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations in more communication settings.

Prerequisite(s): CHN 002BL; or placement exam or consent of instructor.

Learning Activities: Lecture 5 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHN 028.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 003CN – Mandarin for Cantonese Speakers III (5 units)

Course Description: Continuation of CHN 002CN. Prepares students for entering upper division courses in Chinese.

Prerequisite(s): CHN 002CN; or placement exam or consent of instructor.

Learning Activities: Lecture 5 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHN 027.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 004 – Intermediate Chinese (5 units)

Course Description: Continuation of intermediate-level communication skills in spoken and written Mandarin, based on language skills developed in CHN 003.

Prerequisite(s): CHN 003 or placement exam or consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 004A – Accelerated Intensive Intermediate Chinese (15 units)

Course Description: Special nine-week accelerated, intensive summer session course that combines the work of CHN 004, CHN 005, and CHN 006. Intermediate-level training in spoken and written Chinese in cultural and communicative contexts, based on language skills developed in CHN 003 or CHN 001A.

Prerequisite(s): CHN 003 or CHN 001A or placement exam or consent of instructor.

Learning Activities: Lecture/Discussion 15 hour(s).

Credit Limitation(s): Not open to students who have completed CHN 004, CHN 005, or CHN 006.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 005 – Intermediate Chinese (5 units)

Course Description: Training continues at intermediate-level in spoken and written Chinese in cultural contexts, based on language skills developed in CHN 004.

Prerequisite(s): CHN 004 or placement exam or consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 006 – Intermediate Chinese (5 units)

Course Description: Intermediate-level training in spoken and written Chinese in cultural contexts, based on language skills developed in CHN 005.

Prerequisite(s): CHN 005; CHN 005 or placement exam or consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 007 – Chinese Business Culture (4 units)

Course Description: Introduction to business culture of China. Basic conversation and Romanization of Chinese words.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to non-heritage students who have no prior knowledge of, or background in, the Chinese language; anyone who has taken Chinese language classes before or after being enrolled at UC Davis, or anyone who is currently enrolled in a Chinese language class, or who speaks any Mandarin or Chinese dialect (e.g., Cantonese), cannot take the course for credit without the instructor's permission.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); World Cultures (WC).

CHN 009 – Introduction to Chinese Language & Culture (4 units)

Course Description: Chinese culture through the lens of Chinese language. Relationship of language to religion, food, arts, ethnic groups, dialects, writing systems, etc. All readings are in English; no previous background is necessary.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 010 – Modern Chinese Literature (In English) (4 units)

Course Description: Introductory course requiring no knowledge of Chinese language or history. Reading and discussion of short stories and novels and viewing of two films. Designed to convey a feeling for what China has experienced in the 20th century.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have already taken, or are taking concurrently, CHN 104.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 011 – Great Books of China (in English) (4 units)

Course Description: Readings in English translation of classical and medieval Chinese poetry, Chinese historiography, tales of the supernatural, Tang romances, opera, and late imperial era vernacular literature, with key works by Sima Qian, Gan Bao, Tao Qian, Han Yu, and Feng Menglong. Background information on periods, authors and the interrelationships of culture, literature and social change.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 050 – Introduction to the Literature of China & Japan (4 units)

Course Description: Methods of literary analysis and their application to major works from the various genres of Chinese and Japanese literature (in translation), including film. East Asian cultural traditions will also be introduced.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: JPN 050.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHN 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHN 100A – Daoist Traditions (4 units)

Course Description: English-language survey of key Daoist texts and scholarship. Topics include Daoist concepts of the cosmos, the natural world, scripture, the body, and immortality; Daoist divinities; Daoism and the state.

Prerequisite(s): A course in Chinese history recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: RST 175A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CHN 100B – Confucian Traditions (4 units)

Course Description: Key aspects of the Confucian tradition in dynastic China. Major themes addressed include ritual, classical studies, and Confucian influences on the Chinese family and state.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 101 – Chinese Film (4 units)

Course Description: English language survey of Chinese film, from its inception to the end of the 20th century. Chinese films as important texts for understanding national, transnational, racial, gender, and class politics of modern China.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

CHN 103 – Modern Chinese Drama (4 units)

Course Description: English language survey of modern Chinese spoken drama in the 20th century and its major playwrights, in the context of Chinese history and the interaction of Chinese culture with other cultures.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

CHN 104 – Modern Chinese Fiction (in English) (4 units)

Course Description: English language survey of Chinese fiction as it evolved amidst the great historical, social and cultural changes of the 20th century. Thorough study of the most influential writers and genres.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 105 – Western Influences on 20th-Century Chinese Literature (in English) (4 units)

Course Description: Introduction of Western literary thought into modern China, the experimentation with Western literary forms and techniques, and the development of Marxism in contemporary literary writing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 106 – Chinese Poetry (in English) (4 units)

Course Description: Organized topically and chronologically, the lyric tradition is explored from the dawn of folk songs down to modern expressions of social protest. Topics include friendship, love, oppression, war, parting, death, ecstasy and beauty. All readings are in English.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 107 – Traditional Chinese Fiction (in English) (4 units)

Course Description: Dawn of Chinese fiction and its development down to modern times. Survey of literary history with close reading of representative works. Readings, lectures, and discussions in English.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CHN 108 – Poetry of China & Japan (in English) (4 units)

Course Description: A comparative approach to Chinese and Japanese poetry, examining poetic practice in the two cultures; includes a general outline of the two traditions, plus study of poetic forms, techniques, and distinct treatments of universal themes: love, nature, war, etc.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: JPN 108.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 109A – Topics in Chinese Literature: Crime & Punishment (4 units)

Course Description: Examines how crime and punishment have been represented in traditional Chinese short stories, novels, operas, and histories.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CHN 109C – Topics in Chinese Literature: Women Writers (in English) (4 units)

Course Description: Topics in Chinese literature; women writers.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 109D – Topics in Chinese Literature: The Knight-Errant (in English) (4 units)

Course Description: Topics in Chinese literature; the knight-errant.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 109E – Topics in Chinese Literature: The City in Fiction (in English) (4 units)

Course Description: Topics in Chinese literature; the city in fiction.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 109G – Topics in Chinese Literature: The Literature of 20th-Century Taiwan (in English) (4 units)

Course Description: Topics in Chinese literature; the literature of 20th-century Taiwan.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 109H – Topics in Chinese Literature: Popular Literature (in English) (4 units)

Course Description: Topics in Chinese literature; popular literature.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 109I – Topics in Chinese Literature: Scholar & The Courtesan (in English) (4 units)

Course Description: Chinese romance stories, focusing on depictions of scholars and courtesans in Tang fables, late imperial operas, Ming short-stories, and 19th-century novels.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CHN 110 – Great Writers of China: Texts & Context (in English) (4 units)

Course Description: Examination of major theoretical concepts and interpretive methods in the study of literature by using examples from the Chinese tradition; discussions of classical and modern works with an emphasis on the relations between literature, author, society, and culture.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 111 – Modern Chinese: Reading & Discussion (4 units)

Course Description: Building on Chinese 006/003BL, further development of communication skills in Modern Standard Mandarin-speaking environments. Reading of dialogues/articles pertaining to contemporary China.

Prerequisite(s): CHN 006 C- or better or CHN 003BL C- or better or CHN 004A C- or better; or placement exam or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Concurrent enrollment in Chinese language courses is not allowed.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 111A – Intensive Third-Year Chinese (12 units)

Course Description: Nine-week intensive summer course combines CHN 111, CHN 112, and CHN 113. Training at intermediate-high and advanced-low level in spoken and written Chinese in cultural and communicative contexts based on language skills developed in CHN 006.

Prerequisite(s): CHN 006 or CHN 003BL or CHN 004A; or placement exam or consent of instructor.

Learning Activities: Lecture/Discussion 13.30 hour(s).

Enrollment Restriction(s): Not open to students who have completed CHN 111, CHN 112, or CHN 113.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 112 – Modern Chinese: Reading & Discussion (4 units)

Course Description: Further development of communication skills from CHN 111 in Modern Standard Mandarin-speaking environments. Reading dialogues/articles pertaining to contemporary China issues and discussing ethical, moral, aesthetic, social, and cultural concerns. **Prerequisite(s):** CHN 111; or placement exam or consent of instructor. **Learning Activities:** Lecture 3 hour(s), Discussion 1 hour(s). **Enrollment Restriction(s):** Concurrent enrollment in Chinese language courses is not allowed. **Grade Mode:** Letter. **General Education:** Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 113 – Modern Chinese: Reading & Discussion (4 units)

Course Description: Continuation of CHN 112, further developing communication skills in Modern Standard Mandarin-speaking environments. Read dialogues/articles pertaining to contemporary China issues and discuss ethical, moral, aesthetic, social, and cultural concerns. Study strategies for moving between simplified and traditional Chinese characters. **Prerequisite(s):** CHN 112; or placement exam or consent of instructor. **Learning Activities:** Lecture 3 hour(s), Discussion 1 hour(s). **Enrollment Restriction(s):** Concurrent enrollment in Chinese language courses is not allowed. **Grade Mode:** Letter. **General Education:** Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 114 – Introduction to Classical Chinese (4 units)

Course Description: Introduction to the language in which, until the 20th century, most official, documentary, scholarly, and belle-lettristic Chinese literature was written. **Prerequisite(s):** CHN 112; or equivalent language proficiency. consent of instructor. **Learning Activities:** Lecture/Discussion 4 hour(s). **Grade Mode:** Letter. **General Education:** Arts & Humanities (AH); World Cultures (WC).

CHN 115 – Introduction to Classical Chinese II (4 units)

Course Description: Continuation of enhancing classical Chinese reading skills with literature ranging from the prose found in Han dynasty historical works, Six Dynasties anecdotal literature, and Tang occasional texts, as well as the poetic shi and fu genres. **Prerequisite(s):** CHN 114; or Consent of instructor. **Learning Activities:** Lecture/Discussion 4 hour(s). **Grade Mode:** Letter. **General Education:** Arts & Humanities (AH); World Cultures (WC).

CHN 116 – Introduction to Classical Chinese III (4 units)

Course Description: Translations of extended readings in the original sources and brief analyses of syntax. These sources will include texts written by well-known figures from the 8th through 15th centuries, composing in a wide variety of genres. **Prerequisite(s):** CHN 115; or consent of instructor. **Learning Activities:** Lecture 3 hour(s), Discussion 1 hour(s). **Grade Mode:** Letter. **General Education:** Arts & Humanities (AH); World Cultures (WC).

CHN 118 – Advanced Chinese for Non-Native Speakers (4 units)

Course Description: Analysis of material from various genres (literature, newspapers, blogs, TV, film, etc) with focus on Chinese society and culture. Advanced reading, writing, aural comprehension, and formal speech in Mandarin Chinese. For students who have completed the third-year Chinese series (CHN 111-113), but do not have substantial background as heritage or native speakers of Chinese. **Prerequisite(s):** CHN 113; or equivalent language proficiency; consent of instructor. **Learning Activities:** Lecture/Discussion 4 hour(s). **Grade Mode:** Letter. **General Education:** Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 120 – Advanced Chinese (4 units)

Course Description: Evaluation of readings from various genres (literature, newspapers, TV and movies, etc.) develop advanced reading, writing, aural comprehension, and formal/professional speech skills in Mandarin Chinese. Chinese society/cultural studies, especially those sociocultural issues reflected in the language used in learning materials. **Prerequisite(s):** CHN 113; or placement exam or consent of instructor. **Learning Activities:** Lecture 3 hour(s), Discussion 1 hour(s). **Repeat Credit:** May be repeated 1 time(s) when material is different for each quarter of an academic year; cannot be for the same quarter taken in a previous academic year. **Grade Mode:** Letter. **General Education:** Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 122V – Business Chinese (3 units)

Course Description: Mandarin Chinese language for business and professional purposes. Appropriate usages and protocols within the context of Chinese business culture. **Prerequisite(s):** CHN 113 or consent of instructor. **Learning Activities:** Web Virtual Lecture 3 hour(s). **Grade Mode:** Letter. **General Education:** Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

CHN 130 – Readings in Traditional Chinese Fiction (4 units)

Course Description: Examination of representative works of traditional Chinese fiction popular from the 12th Century until the 17th and 18th centuries. Translations in English of the Chinese texts will be available to students as reference. **Prerequisite(s):** CHN 111; or equivalent language proficiency. **Learning Activities:** Lecture 3 hour(s), Discussion 1 hour(s). **Repeat Credit:** May be repeated 1 time(s). **Grade Mode:** Letter. **General Education:** Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

CHN 131 – Readings in Traditional Chinese Poetry (4 units)

Course Description: Traditional Chinese poetry from its beginnings to the golden ages of Tang and Song, surveying forms and poets that best reveal the Chinese poetic sensibility and the genius of the language of Chinese poetry.

Prerequisite(s): CHN 111; consent of instructor, or equivalent language proficiency.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

CHN 132 – Readings in Modern Chinese Poetry (4 units)

Course Description: Chinese poetry from the Literary Revolution of 1917 to the present, surveying works that embody exciting innovations and reflect the modernity of 20th-century Chinese society and culture.

Prerequisite(s): CHN 111; consent of instructor, or equivalent language proficiency.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 133 – Readings in Modern Chinese Prose & Drama (4 units)

Course Description: Literary works and scholarly essays on selected topics of Chinese prose and drama, development of a deep understanding of Chinese culture and society through sophisticated reading materials of these two important genres of the modern period.

Prerequisite(s): CHN 111; or equivalent language proficiency, or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 134 – Chinese Film in Chinese Language (4 units)

Course Description: Chinese film and scholarly essays on Chinese cinema and film history. Develop a deep understanding of Chinese culture and society through viewing and studying Chinese films in the Chinese language.

Prerequisite(s): CHN 111; or equivalent language proficiency.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC).

CHN 140 – Readings in Classical Chinese (4 units)

Course Description: Study and philological analysis of selected texts from the first millennium of Imperial China.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

CHN 150 – Fifth-Year Chinese: Selected Topics in Chinese Language, Literature, & Culture (4 units)

Course Description: Examination of literary works and scholarly essays on selected topics of Chinese culture and society. Development of a deep understanding of Chinese culture and society through sophisticated Chinese speaking and writing exercises.

Prerequisite(s): CHN 120; or placement exam or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Concurrent enrollment in Chinese language courses is not allowed.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CHN 160 – The Chinese Language (4 units)

Course Description: Introduction to structural features of Chinese (Mandarin) sounds, lexicon, grammar, and writing (characters), as well as relevant dialectal and sociolinguistic issues of the language.

Prerequisite(s): CHN 006 (can be concurrent) or CHN 003BL (can be concurrent) or CHN 003CN (can be concurrent) or CHN 004A (can be concurrent); or placement exam or consent of instructor; LIN 001 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CHN 192 – Chinese Internship (1-12 units)

Course Description: Work experience in the Chinese language, with analytical term paper on a topic approved by instructor.

Prerequisite(s): Upper division standing and consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

CHN 194H – Senior Thesis Honors Project (1-5 units)

Course Description: Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Chinese literature, civilization, or language studies.

Prerequisite(s): Consent of instructor; senior standing and qualification for the Chinese honors program.

Learning Activities: Independent Study 3-15 hour(s).

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CHN 197T – Tutoring in Chinese (1-4 units)

Course Description: Leading of small voluntary discussion groups affiliated with one of the Department's regular courses.

Prerequisite(s): Consent of Department.

Learning Activities: Tutorial 1-4 hour(s).

Repeat Credit: May be repeated 4 unit(s).

Grade Mode: Pass/No Pass only.

CHN 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHN 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CHN 297 – Directed Independent Study (4 units)

Course Description: Directed independent study on a topic culminating in a term paper. Independent studies may only be arranged with consent of the instructor and when graduate seminars are unavailable.

Prerequisite(s): Consent of instructor.

Learning Activities: Term Paper, Independent Study, Conference 1 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

CHN 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

CHN 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Any course taught by a graduate student under the direction of the Director.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Cinema & Digital Media (CDM)

College of Letters & Science

CDM 001 – Introduction to Film Studies (4 units)

Course Description: Analysis of film form and narrative, including cinematography, editing, and sound. Issues in film studies including authorship, stardom, race, gender, class, and cultural identity. Introduction to selected cinematic movements and national film traditions.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CDM 002 – Introduction to Technocultural Studies (4 units)

Course Description: Contemporary developments in the fine and performing arts, media arts, digital arts, and literature as they relate to technological and scientific practices.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken TCS 001.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

CDM 003 – Media Archaeology (4 units)

Course Description: Evolution of media technologies and practices beginning in the 19th century as they relate to contemporary digital arts practices. Special focus on the reconstruction of the social and artistic possibilities of lost and obsolete media technologies.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have taken TCS 005.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Visual Literacy (VL); Writing Experience (WE).

CDM 012 – Introduction to Media Computation (4 units)

Course Description: Introduction to key computational ideas necessary to understand and produce digital media. Fundamentals of programming and analysis of how media are represented and transmitted in digital form. Aimed primarily at non-computer science students.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Two units of credit for students that have taken ECS 010, ECS 030, ECS 032A, ECS 036A, or ENG 006.

Cross Listing: ECS 012.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

CDM 020 – Filmmaking Foundations (5 units)

Course Description: Introduction to filmmaking concepts, principles, and methods. Emphasis on form, content and historical dialectic between classical narrative filmmaking conventions and artists' challenges to these conventions.

Prerequisite(s): CDM 001 and/or CDM 003 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Film Viewing 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CTS 020.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 020V – Filmmaking Foundations (5 units)

Course Description: Introduction to filmmaking concepts, principles, and methods. Emphasis on form, content and historical dialectic between classical narrative filmmaking conventions and artists' challenges to these conventions.

Prerequisite(s): CDM 001 and/or CDM 003 recommended.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 3 hour(s), Film Viewing.

Credit Limitation(s): Not open for credit to students who have taken CTS 020 or CDM 020.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 041A – History of Cinema from 1895-1945 (4 units)

Course Description: Examination of the cultural context of the emergence of cinema. Discussion of cinema as a product of the age of industrialization and conquest, as well as an element of urban culture, and mass transportation.

Prerequisite(s): CDM 001 recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CTS 041A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CDM 041B – History of Cinema from 1945-Present (4 units)

Course Description: Examines cinema from 1945 through the present, with focus on neo-realist, new wave and third-world movements. Examines social critique in cinema from studio system to New Wave, Cine Novo, postcolonial cinema and contemporary independent cinema.

Prerequisite(s): CDM 001 recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CDM 041BV – History of Cinema from 1945-Present (4 units)

Course Description: Examines cinema from 1945 through the present, with focus on neo-realist, new wave and third-world movements. Examines social critique in cinema from studio system to New Wave, Cine Novo, postcolonial cinema and contemporary independent cinema.

Prerequisite(s): CDM 001 recommended.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s), Film Viewing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CDM 072 – Introduction to Games (4 units)

Course Description: Introduction to the history, theory, and practice of play. Survey of both analog and digital games. Overview of gaming cultures, aesthetics, industries, and technologies.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Cross Listing: ENL 072.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 092 – Internship (1-12 units)

Course Description: Supervised internship, on or off campus, in the area of cinema and digital media.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 1-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

CDM 098 – Directed Group Study (1-5 units)

Course Description: Directed group study in cinema and digital media.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topics differ.

Grade Mode: Pass/No Pass only.

CDM 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates in cinema and digital media.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

CDM 100 – Experimental Digital Cinema I (4 units)

Course Description: Experimental approaches to the making of film and video in the age of digital technologies. Builds upon the foundation provided by CDM 020. Instruction in technical, conceptual, creative, and critical skills for taking a project from idea to fruition.

Prerequisite(s): CDM 020 or ART 012; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

CDM 101 – Experimental Digital Cinema II (4 units)

Course Description: Continuation of CDM 100 with further exploration of digital cinema creation. Additional topics include new modes of distribution, streaming, installation and exhibition.

Prerequisite(s): CDM 100; consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 103 – Interactivity & Animation (4 units)

Course Description: Fundamentals of creating interactive screen-based work. Theories of interactivity, linear versus non-linear structures & audience involvement and participation. Use of digital production tools to produce class projects.

Learning Activities: Laboratory 3 hour(s), Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 104 – Documentary Production (4 units)

Course Description: Traditional and new forms of documentary, with focus on technocultural issues. Skills and strategies for producing work in various media. Progression through all stages of production, from conception through post-production to critique.

Prerequisite(s): CDM 020; CDM 155; TCS 155; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 105 – Feminist Media Production (6 units)

Course Description: Media production as a mode of cultural criticism, furthering feminist and social justice goals. Fundamentals of camera, editing and distribution via a social engagement model. Study and hands-on response to key historic and contemporary feminist and social justice media discourses.

Prerequisite(s): (CTS 020 or CDM 020); or two WMS courses.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s), Fieldwork 6 hour(s).

Cross Listing: WMS 165.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL).

CDM 107 – Acting for Camera (4 units)

Course Description: Analysis and practice of acting skills required for camera work and digital media.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Repeat Credit: May be repeated 2 time(s) when instructor differs.

Cross Listing: DRA 174.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

CDM 111 – Community Media Production (4 units)

Course Description: Use of video and new media tools to address social issues among neighborhood and community groups. Use basic video, sound, and lighting techniques while working with local groups in a group video project.

Prerequisite(s): CDM 020 recommended.

Learning Activities: Laboratory 3 hour(s), Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 113 – Community Networks & Social Media (4 units)

Course Description: Impact and implications of computer-based networks in community, civic, and social life. Subjects may include community-access computer sites, neighborhood wireless networks, the digital divide, open-source software, and citizen action.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

CDM 121 – Introduction to Sonic Arts (4 units)

Course Description: Introduction to the use of sound within the arts. Techniques and aesthetics of experimental contemporary practices. Creation of original sound works.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

CDM 121V – Introduction to Sonic Arts (4 units)

Course Description: Introduction to use of sound within the arts.

Techniques and aesthetics of experimental contemporary practices.

Creation of original sound works.

Learning Activities: Web Virtual Lecture 3 hour(s); Web Electronic

Discussion.

Grade Mode: Letter.

CDM 122 – Intermediate Sonic Arts (4 units)

Course Description: Techniques of recording, editing, mixing, and synthesis to combine voice, field recordings, and electronic signals. Incorporating live, recorded, found sounds to create multidimensional stories. Presentation of live performances, etc.

Prerequisite(s): CDM 121 or CDM 121V; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

CDM 122V – Intermediate Sonic Arts (4 units)

Course Description: Techniques of recording, editing, mixing, and synthesis to combine voice, field recordings, and electronic signals. Incorporating live, recorded, found sounds to create multidimensional stories. Presentation of live performances, etc.

Prerequisite(s): CDM 121 or CDM 121V; or consent of instructor.

Learning Activities: Web Virtual Lecture 3 hour(s); Web Electronic

Discussion.

Grade Mode: Letter.

CDM 123 – Sight & Soundtrack (4 units)

Course Description: Use of sound to articulate, lend mood or subconsciously underscore visual, environmental, or performative situations, combining music, voice, sound effects and other noises to create sound designs that enhance, alter or support action and movement.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

CDM 125 – Advanced Sound: Performance & Improvisation (4 units)

Course Description: Culmination of CDM sound courses. Focuses on performance and improvisation, culminating in a final public performance. Expectation of extensive reading and rehearsal outside of class time.

Prerequisite(s): (CDM 121 or CDM 121V); (CDM 122 or CDM 122V); or consent of instructor.

Learning Activities: Practice 3 hour(s), Workshop 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

CDM 130 – Fundamentals of Computer Graphics (4 units)

Course Description: Foundation course teaches the theory of three-dimensional computer graphics, including modeling, rendering and animation. Development of practical skills through the use of professional software to create computer graphics.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken TCS 130.

Grade Mode: Letter.

General Education: Visual Literacy (VL).

CDM 131 – Character Animation (4 units)

Course Description: The art of character animation in three dimensional computer animation. Movement theory, principles of animation, animation timing. Development of technical and practical skills.

Prerequisite(s): CDM 130 or TCS 130.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken TCS 131.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 135 – Object-Oriented Programming for Artists (4 units)

Course Description: Introduction to object-oriented programming for artists. Focus on understanding the metaphors and potential of object-oriented programming for sound, video, performance, and interactive installations.

Prerequisite(s): CDM 002 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Visual Literacy (VL).

CDM 136 – Electronics for Artists (4 units)

Course Description: Creative application of electronic technology relevant to media and fine arts involving both electronic principles and hands-on application.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

CDM 137 – Topics in Virtuality (4 units)

Course Description: Social, political, economic, and aesthetic factors in virtual reality. Artificial environments, telepresence, and simulated experience. Focus on contemporary artists' work and writing.

Prerequisite(s): CDM 002 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

CDM 151 – Media Theory (5 units)

Course Description: Critical and theoretical approaches to the emergence of new technologies since the invention of photography. Examine various approaches to media (formalist, semiotic, structuralist, Frankfurt School, cybernetics, visual and gamer theory).

Prerequisite(s): CDM 002 or CDM 003 recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing 3 hour(s), Extensive Writing.

Cross Listing: STS 151.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

CDM 156 – Epic Television: The Golden Age of TV?**Sopranos, Wire, Girls, Walking Dead (4 units)**

Course Description: Critically celebrated scripted television since the mid-1990s. Key themes including class, ethnicity, race, violence, and US politics. Major developments in the medium's history as context for recent wave of epic television.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

CDM 158 – Technology & the Modern American Body (4 units)

Course Description: History and analysis of relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have taken TCS 158.

Cross Listing: AMS 158.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

CDM 163 – Art & Cinema: Between the White Cube & the Black Box (4 units)

Course Description: Current debates between cinema studies and contemporary art. Issues covered include, experimental modes of filming, montaging, installing, screening, and displaying images between the White Cube (gallery/museum) and the Black Box (cinema).

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Enrollment Restriction(s): Open to students with upper division standing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

CDM 163V – Art & Cinema: Between the White Cube & the Black Box (4 units)

Course Description: Current debates between cinema studies and contemporary art. Experimental modes of filming, montaging, installing, screening, and displaying images between the White Cube (gallery/museum) and the Black Box (cinema).

Learning Activities: Web Virtual Lecture 3 hour(s), Film Viewing.

Enrollment Restriction(s): Open to students with upper division standing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

CDM 165E – Nazi & Fascist Cinema: Film & other Visual Media (4 units)

Course Description: Analysis of nefarious and noxious cultural products in history: films made under the Nazis and other fascists, 1933-1945. Questions at heart of humanistic studies: relationship of culture to propaganda, politics, and even unfathomable crime.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing.

Cross Listing: GER 165E.

Grade Mode: Letter.

General Education: Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CDM 165L – Human Rights in Film & Television (4 units)

Course Description: Human rights depictions in film and on television, including topics: genocide (Rwanda, Armenia, Indonesia), political persecution (Guatemala), carceral abuses (U.S.), human trafficking (Europe), persecution for sexual preference (Cuba). Documenting abuse as well as remediying it.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing 2.5 hour(s), Term Paper.

Cross Listing: HMR 165.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CDM 166 – Topics in U.S. Film History (4 units)

Course Description: Study of an aspect of American film history (such as the silent era; the studio system; U.S. avant-garde cinema), including the influences of technological, economic, regulatory, cultural, and artistic forces.

Prerequisite(s): CDM 001; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 167 – Topics in Film Genres (4 units)

Course Description: Study of one or more of the film genres (such as musicals, film noir, screwball comedy, or westerns), including genre theory and the relationship of the genre(s) to culture, history, and film industry practices. May be taught abroad.

Prerequisite(s): CDM 001; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 171 – Game Studies Seminar (4 units)

Course Description: Theory and methods for researching games, play, media, and culture. Reading, writing, and discussion about playable media.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: ENL 171.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

CDM 172 – Video Games & Culture (4 units)

Course Description: Critical approaches to the study of video games, focusing on formal, historical, and cultural modes of analysis. History of software and hardware in North American and global contexts. Relations of games to society, politics, economics, media, etc.

Prerequisite(s): CDM 072 or ENL 072 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CTS 172 (former course CTS 172).

Cross Listing: STS 172, ENL 172.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Visual Literacy (VL); Writing Experience (WE).

CDM 173 – Introduction to Analog Game Design (4 units)

Course Description: Fundamental theories and practices of analog game design. Pen & paper, dice & cards, checkers & chess to riddles & stories, track & field, and other forms of play. Prototype, playtest, and presentation of original analog games.

Prerequisite(s): CDM 072 or CDM 172 or CTS 172; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 174 – Special Topics in Analog Game Design (4 units)

Course Description: Special topics in analog game design for upper division students.

Prerequisite(s): CDM 072 or CDM 172 or CTS 172; or consent of instructor; Recommended: CDM 173, CDM 175 or CDM 177.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Repeat Credit: May be repeated 3 time(s) when topic or instructor differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CDM 175 – Introduction to Digital Game Development (4 units)

Course Description: Digital game development. Theories of control, interface, game feel, glitch, mechanics. Design, demo, and distribution of new digital games.

Prerequisite(s): CDM 072 or CDM 172 or CTS 172; consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Visual Literacy (VL).

CDM 176 – Special Topics in Digital Game Development (4 units)

Course Description: Special topics in digital game development for upper division students.

Prerequisite(s): CDM 072 or CDM 172 or CTS 172; or consent of instructor; Recommended: CDM 173, CDM 175 or CDM 177.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Repeat Credit: May be repeated 3 time(s) when instructor or topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Visual Literacy (VL).

CDM 177 – Introduction to Game Programming (4 units)

Course Description: Introduction to computer science concepts and programming practices for video games.

Prerequisite(s): CDM 072 or CDM 172 or CTS 172; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE);

Quantitative Literacy (QL); Visual Literacy (VL).

CDM 178 – Special Topics in Game Programming (4 units)

Course Description: Special topics in game programming for upper division students.

Prerequisite(s): CDM 072 or CDM 172 or CTS 172; or consent of instructor.

Recommended: CDM 173, CDM 175 or CDM 177.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Repeat Credit: May be repeated 3 time(s) when instructor or topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE);

Quantitative Literacy (QL); Visual Literacy (VL).

CDM 189 – Special Topics in Cinema & Digital Media (4 units)

Course Description: Special topics in cinema & digital media.

Prerequisite(s): CDM 001 or CDM 002 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion/Laboratory 3 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing

Experience (WE).

CDM 190 – Research Methods in Cinema & Digital Media (4 units)

Course Description: Introduction to basic research methods for Cinema and Digital Media; e.g., electronic & archived images, sounds & data, etc.

Learning Activities: Lecture 3 hour(s); Project.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

CDM 192 – Internship (1-12 units)

Course Description: Supervised internship, on or off campus, in the area of cinema and digital media.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 1-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

CDM 195HA – Honors Project in Cinema & Digital Media (1-5 units)

Course Description: Directed reading, research and writing culminating in the completion of a senior honors thesis or significant creative project under direction of faculty sponsor.

Prerequisite(s): Consent of instructor; GPA of at least 3.500; senior standing.

Learning Activities: Independent Study 3-15 hour(s).

Grade Mode: Letter.

CDM 195HB – Honors Project in Cinema & Digital Media (1-5 units)

Course Description: Directed reading, research and writing culminating in the completion of a senior honors thesis or significant creative project under direction of faculty sponsor.

Prerequisite(s): Consent of instructor; GPA of at least 3.500; senior standing.

Learning Activities: Independent Study 3-15 hour(s).

Grade Mode: Letter.

CDM 197T – Tutoring in Cinema & Digital Media (1-5 units)

Course Description: Leading small voluntary discussion groups affiliated with departmental courses under the supervision of the course instructor.

Prerequisite(s): Consent of instructor. Consent of Department Chair.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated 10 unit(s).

Grade Mode: Pass/No Pass only.

CDM 198 – Directed Group Study (1-5 units)

Course Description: Directed group study in cinema and digital media. For students with upper division standing. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

CDM 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study in cinema and digital media. For advanced undergraduates with upper division standing.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

CDM 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Cinema & Technocultural Studies (CTS)

College of Letters & Science

CTS 040A – Media History 1, Guttenberg to Oppenheimer (4 units)

Course Description: History of Media to 1945, with particular focus on mechanically reproduced mass media technologies including the printing press, the newspaper, photography, cinema, radio and early computing technology. Analysis of inter-related cultural and political topics.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Film Viewing 2 hour(s), Extensive Writing.

Cross Listing: STS 040A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

CTS 040B – Media History 2 1945-Present (4 units)

Course Description: History of media from 1945 to present, with particular focus on the development of the computer, digital network and Internet technologies in the context of other media infrastructures like radio, television and satellite networks. Analysis of inter-related cultural/political topics.

Prerequisite(s): CTS 040A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Film Viewing 2 hour(s), Extensive Writing.

Cross Listing: STS 040B.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

CTS 116 – Design on Screen (4 units)

Course Description: Analysis of the contribution of outstanding designers for cinema, television and filmed entertainment. Study of diverse aesthetic theories of production design and art direction, costume design, or cinematography. Introductory principles and practice, history.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Cross Listing: DRA 116.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CTS 124E – Costume Design for Film (4 units)

Course Description: Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Execution of designs for period and contemporary films. Viewing of current films.

Prerequisite(s): DRA 024; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Theatre & Dance majors.

Cross Listing: DRA 124E.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

CTS 146A – Modern Iranian Cinema (4 units)

Course Description: Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf, Bahram Beizaie are included. Knowledge of Persian not required.

Prerequisite(s): Upper division standing, or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: MSA 131A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CTS 146B – Modern South Asia Cinema (4 units)

Course Description: South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: MSA 131B, ANT 147.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CTS 148B – Japanese Literature on Film (4 units)

Course Description: Survey of films based on works of Japanese literature, emphasis on pre-modern and early modern texts. Introduction to major directors of Japan, with a focus on cinematic adaptation. Lectures and readings in English. Films in Japanese with English subtitles.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: JPN 156.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CTS 162 – Surveillance Technologies & Social Media (4 units)

Course Description: Study of the ubiquitous presence of CCTV, face recognition software, global tracking systems, biosensors, and data mining practices that have made surveillance part of our daily life. Study boundaries between security and control, information and spying.

Prerequisite(s): TCS 001 or STS 020.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s), Term Paper.

Cross Listing: STS 162.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

Civil & Environmental Engineering (ECI)

College of Engineering

ECI 003 – Civil & Environmental Infrastructure & Society (4 units)

Course Description: Introduction to civil infrastructure and its relationship with society and the natural environment. Exposure to innovative research on civil engineering and environmental systems. Participation in laboratory experiments illustrative of the solution of representative but simplified engineering problems.

Prerequisite(s): MAT 021A (can be concurrent).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Civil Engineering and Environmental Engineering majors; not open for credit to upper division students.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

ECI 016 – Spatial Data Analysis (2 units)

Course Description: Computer-aided design and geographic information systems in civil engineering practice.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Civil Engineering, Environmental Engineering and Biological Systems Engineering majors; non-majors accommodated on a space-available basis.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECI 040 – Introduction to Environmental Engineering (4 units)

Course Description: Introduction to topics in environmental engineering; discussion on influence of literary work, art, and media on the evolution of environmental engineering practice, relevant laws, and regulations; presentations of historical case studies. Major themes include sustainability, environmental justice, and laws/regulations.

Prerequisite(s): CHE 002B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to College of Engineering students.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

ECI 090X – Lower Division Seminar (1-4 units)

Course Description: Examination of a special topic in a small group setting.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 092 – Internship for Engineering (1-5 units)

Course Description: Supervised work experience in civil engineering.

Prerequisite(s): Lower division standing; approval of project prior to period of internship.

Learning Activities: Internship.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECI 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor. Lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECI 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor. Lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECI 100 – Introduction to Fluid Mechanics for Civil & Environmental Engineers (4 units)

Course Description: Fluid flow in civil & environmental engineering, basis for design, buoyancy, hydrostatics, gravity dams, hydraulic modeling: similarity & scaling, conservation laws, flow in bends, nozzles, pipes, pumps, turbines, complimentary lab experiments.

Prerequisite(s): ENG 035 C- or better; (MAT 022B C- or better or MAT 027B C- or better); PHY 009B C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Civil Engineering, Environmental Engineering and Hydrology majors.

Credit Limitation(s): Not open for credit to students who have taken ENG 103.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 101 – Transfer Transition for Civil & Environmental Engineering (4 units)

Course Description: Introduction for transfer students to the Department of Civil and Environmental Engineering, civil and environmental engineering disciplines, and active areas of research in the department. Interaction with faculty in the department and campus student services that can support them while at UC Davis.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to first-quarter transfer students in Civil Engineering and Environmental Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 114 – Probabilistic Systems Analysis for Civil & Environmental Engineers (4 units)

Course Description: Probabilistic concepts and models in engineering. Statistical analysis of engineering experimental and field data.

Introduction to stochastic processes and models of engineering systems.

Prerequisite(s): MAT 021C C- or better.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed STA 120.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECI 115 – Computer Methods in Civil & Environmental Engineering (4 units)

Course Description: Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering.

Prerequisite(s): (ENG 006 C- or better or ECS 030 C- or better or ECS 032A C- or better); (MAT 022B C- or better or MAT 027B C- or better).

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Pass One Restricted to Civil Engineering and Environmental Engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 123 – Urban Systems & Sustainability (4 units)

Course Description: Systems-level approach of how to evaluate and then modify sustainability of urban systems based on interaction with natural environments. Topics include: definition/metrics of urban sustainability; system analyses of urban systems; enabling technology, policies, legislation; measures and modification of ecological footprints.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Scientific Literacy (SL).

ECI 130 – Structural Analysis (4 units)

Course Description: Elastic structural analysis of determinate and indeterminate trusses, beams and frames. Plastic bending and limit analysis.

Prerequisite(s): ENG 104 C- or better; (MAT 022A or MAT 027A).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Civil Engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECI 131 – Matrix Structural Analysis (4 units)

Course Description: Matrix formulation and computer analysis of statically indeterminate structures. Stiffness and flexibility formulations for elastic structures. Finite element methods for elasticity and bending problems.

Prerequisite(s): ENG 104 C- or better; ENG 006.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 132 – Structural Design: Metallic Elements (4 units)

Course Description: Design of metallic beams, columns, and other members for various types of loading and boundary conditions; design of connections between members; member performance within structural systems.

Prerequisite(s): ECI 130 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ECI 133 – Structure & Properties of Civil Engineering Materials (4 units)

Course Description: Structures & properties of common civil engineering materials including concrete, alloys, plastics, and wood. Mechanical behavior of elastic & plastic response to loading, thermal conductivity and resistivity, diffusivity, and deterioration mechanisms.

Prerequisite(s): CHE 002A C- or better; ENG 035 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to College of Engineering students.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 134 – Structural Loads: Calculation & Modeling (4 units)

Course Description: Structural analysis process and model idealization; design codes, standards, and guidelines (e.g., IBC & ASCE 7); load paths for vertical and horizontal loads; load cases and load combinations; modeling of loads using finite element software; dead and live loads; snow loads; wind loads; climate change effects on snow and wind loads.

Prerequisite(s): ECI 130 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Civil Engineering majors only.

Grade Mode: Letter.

ECI 135 – Structural Design: Concrete Elements (4 units)

Course Description: Strength design procedures for columns, rectangular beams, T-beams and beams of general cross-section. Building code requirements for bending, shear, axial load, combined stresses and bond. Introduction to prestressed concrete.

Prerequisite(s): ECI 130 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Civil Engineering, Civil Engineering/Materials Science and Engineering, and Materials Science and Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECI 136 – Building Design (4 units)

Course Description: Design of a building structure for a specific need under the multiple constraints of safety, serviceability, cost and aesthetics.

Prerequisite(s): (ECI 130 C- or better or ECI 131 C- or better); (ECI 135 or ECI 132).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 137 – Construction Principles & Project Management (4 units)

Course Description: Project management, with civil engineering construction and design applications, including project scope, schedule, resources, cost, quality, risk, and control. Construction industry overview. Interactions between planning, design, construction, operations. Construction operations analysis. Contract issues. Project management software, field trips, guest lectures.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to upper division standing in Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Quantitative Literacy (QL).

ECI 138 – Earthquake Loads on Structures (4 units)

Course Description: Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements.

Prerequisite(s): ECI 130 C- or better or ECI 131 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 139 – Advanced Structural Mechanics (4 units)

Course Description: Review of stress, strain, equilibrium, compatibility, and elastic material behavior. Plane stress and plane strain problems in elasticity; energy methods. Theories for unsymmetric bending, straight and curved beams. Beams on elastic foundations; stresses in plates and shells; elastic stability.

Prerequisite(s): ENG 104 C- or better.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECI 140A – Environmental Analysis of Aqueous Systems (4 units)

Course Description: Introduction to "wet chemical" and instrumental techniques commonly used in the examination of water and wastewater and associated data analysis.

Prerequisite(s): CHE 002B C- or better; ECI 040 (can be concurrent).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Environmental Engineering majors.

Credit Limitation(s): Not open for credit to students who have taken ECH 140 or CHE 100.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 140B – Chemical Principles for Environmental Engineers (4 units)

This version has ended; see updated course, below.

Course Description: Aqueous chemistry; equilibrium relationships; carbonate system; thermodynamics; kinetics & rate laws; precipitation, adsorption, & volatilization phenomenon; oxidation & reduction reactions; pH, pE and predominance diagrams; organic chemicals.

Prerequisite(s): CHE 002B C- or better.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ECI 140.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 140B – Chemical Principles for Environmental Engineers (4 units)

Course Description: Aqueous chemistry; equilibrium relationships; carbonate system; thermodynamics; kinetics & rate laws; precipitation, adsorption, & volatilization phenomenon; oxidation & reduction reactions; pH, pE and predominance diagrams; organic chemicals.

Prerequisite(s): ECI 140A C- or better.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ECI 140.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

This course version is effective from, and including: Fall Quarter 2024.

ECI 140CN – Water & Wastewater Treatment System Design (4 units)

Course Description: Evaluation and design of water and wastewater treatment systems.

Prerequisite(s): ECI 140A C- or better; ECI 140B C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 141 – Engineering Hydraulics (3 units)

Course Description: Nature of flow of a real fluid; flow in pipes; open channel flow; turbomachinery; fluid forces on objects: boundary layers, lift and drag.

Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 141L – Engineering Hydraulics Laboratory (1 unit)

Course Description: Laboratory experiments and demonstrations on flow measurements, sluice gates, hydraulic jump, flow characteristics, and centrifugal pumps.

Prerequisite(s): ECI 141 (can be concurrent).

Learning Activities: Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Engineering students only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 142 – Engineering Hydrology (4 units)

Course Description: The hydrologic cycle. Evapotranspiration, interception, depression storage and infiltration. Streamflow analysis and modeling. Flood routing through channels and reservoirs. Frequency analysis of hydrologic variables. Precipitation analysis for hydrologic design.

Hydrologic design.

Prerequisite(s): ECI 141 (can be concurrent).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to students in the College of Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECI 144 – Groundwater Systems Design (4 units)

Course Description: Groundwater occurrence, distribution, and movement; groundwater flow systems; radial flow to wells and aquifer testing; aquifer management; groundwater contamination; solute transport by groundwater; fate and transport of subsurface contaminants. Groundwater supply and transport modeling.

Prerequisite(s): ECI 141.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 145 – Hydraulic Structure Design (4 units)

Course Description: Project-based course on the design of an integrated urban drainage system with focus on consideration of design alternatives, multiple realistic constraints, quantification of uncertainty, codes and standards, technical drawing and cost analysis.

Prerequisite(s): ECI 141 C- or better.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 146 – Water Resources Simulation (4 units)

Course Description: Computer simulation techniques in the analysis, design and operation of surface water systems; modeling concepts and practices with application to surface runoff; water quality in rivers and streams and dispersion of contaminants in water bodies.

Prerequisite(s): ECI 141 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 149L – Air Pollution Lab (1 unit)

Course Description: Laboratory characterization of air pollutants; data analysis; experimental design.

Prerequisite(s): ECI 149 C- or better (can be concurrent).

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Letter.

ECI 149N – Air Pollution (4 units)

Course Description: Physical and technical aspects of air pollution. Factors that determine local, regional, and global air quality; climate change; and physical and chemical properties of pollutants.

Prerequisite(s): MAT 021D; (MAT 022B or MAT 027B); CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better).

Learning Activities: Discussion 1 hour(s), Lecture 3 hour(s).

Cross Listing: ATM 149N.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ECI 153 – Deterministic Optimization & Design (4 units)

Course Description: Operations research. Optimization techniques such as linear programming, dynamic programming, and non-linear programming. Applications in civil engineering disciplines, including multiple realistic constraints, through computer-based course projects.

Prerequisite(s): MAT 021C; (MAT 022A or MAT 027A); computer programming course.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ECI 155 – Water Resources Engineering Planning (4 units)

Course Description: Basic engineering planning concepts; role of engineering, economic, environmental and social information and analysis; institutional, political and legal aspects. Case studies and computer models illustrate the planning of water resource systems.

Prerequisite(s): (ENG 106 or ECN 001A or ECN 001AY or ECN 001AV); ECI 114.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Quantitative Literacy (QL); Scientific Literacy (SL); Writing Experience (WE).

ECI 161 – Transportation System Operations (4 units)

Course Description: Principles of transportation system operations; traffic characteristics and methods of measurement; models of transportation operations and congestion applied to urban streets and freeways.

Prerequisite(s): MAT 021C C- or better; PHY 009A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECI 162 – Transportation Infrastructure Design (4 units)

Course Description: Foundation in roadway design with a multimodal perspective. Transportation content related to sight distance, horizontal and vertical roadway design. Holistic perspective to design for multiple roadway users including bicycles, pedestrians, vehicle sharing, and public transit.

Prerequisite(s): PHY 009A C- or better; MAT 021B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECI 163 – Energy & Environmental Aspects of Transportation (4 units)

Course Description: Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models.

Prerequisite(s): Upper division standing in engineering or economics or environmental studies.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ESP 163.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

ECI 164 – Introduction to Electric Vehicles (4 units)

This version has ended; see updated course, below.

Course Description: Interdisciplinary exploration of electric vehicles. Underlying technology, challenges, and societal impacts. Battery technology, vehicle efficiency, charging infrastructure, total cost of ownership, consumer and travel behavior, life-cycle emissions, and policy landscape. Perspectives from engineering, physics, chemistry, economics, finance, public policy, and social sciences.

Learning Activities: Discussion 1 hour(s), Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Scientific Literacy (SL).

ECI 164 – Introduction to Electric Vehicles (4 units)

Course Description: Interdisciplinary exploration of electric vehicles. Underlying technology, challenges, and societal impacts. Battery technology, vehicle efficiency, charging infrastructure, total cost of ownership, consumer and travel behavior, life-cycle emissions, and policy landscape. Perspectives from engineering, physics, chemistry, economics, finance, public policy, and social sciences.

Learning Activities: Discussion 1 hour(s), Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Scientific Literacy (SL); Science & Engineering (SE).

This course version is effective from, and including: Fall Quarter 2024.

ECI 165 – Transportation Policy (4 units)

Course Description: Transportation and associated environmental problems confronting urban areas, and prospective technological and institutional solutions. Draws upon concepts and methods from economics, engineering, political science and environmental studies.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

ECI 171 – Soil Mechanics (4 units)

Course Description: Soil formations, mass-volume relationships, soil classification, effective stress, soil-water-void relationships, compaction, seepage, capillarity, compressibility, consolidation, strength, states of stress and failure, lateral earth pressures, and slope stability.

Prerequisite(s): (ENG 103 (can be concurrent) or ECI 100 (can be concurrent)); ENG 104 C- or better; ECI 171L (can be concurrent); ECI 171L required concurrently.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Civil Engineering and Environmental Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 171L – Soil Mechanics Laboratory (1 unit)

Course Description: Laboratory studies utilizing standard testing methods to determine physical, mechanical and hydraulic properties of soil and demonstration of basic principles of soil behavior.

Prerequisite(s): ECI 171 (can be concurrent); ECI 171 required concurrently.

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 173 – Foundation Design (4 units)

Course Description: Foundation analysis and design, including site characterization, evaluation of shallow and deep foundation alternatives, evaluation of bearing capacity and settlements, design of retaining structures, and case-based design experiences.

Prerequisite(s): ECI 171.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 175 – Geotechnical Earthquake Engineering (4 units)

Course Description: Tectonics, faults, site response, and probabilistic ground motion prediction equations. Cyclic loading and liquefaction of soil elements and layers. Empirical procedures and field tests for evaluation of triggering and consequences, of liquefaction.

Prerequisite(s): ECI 171 C- or better.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 178 – Pavement Engineering & Design (4 units)

Course Description: Pavement types (rigid, flexible, unsurfaced, rail), their applications (roads, airfields, ports, rail) and distress mechanisms. Materials, traffic and environment characterization. Empirical and mechanistic-empirical design procedures. Construction quality; asphalt concrete mix design.

Prerequisite(s): ENG 104 C- or better; ECI 171 C- or better recommended.

Learning Activities: Lecture 3 hour(s); Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ECI 179 – Pavement Management, Evaluation, & Rehabilitation (4 units)

Course Description: Engineering concepts and practices to evaluate, preserve, maintain and rehabilitate highway pavements, focusing on pavement asset management, pavement failure mechanisms, site investigation for rehabilitation design, flexible and rigid pavement preservation and maintenance, flexible & rigid overlays, economic analysis of rehabilitation alternatives and selection of the most suitable strategy.

Prerequisite(s): ENG 104 C- or better; ECI 178 C- or better recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 181 – Construction Cost Estimation & Analysis (4 units)

Course Description: Fundamentals of cost estimation within the construction industry. Methodologies and use of estimating processes through each stage of project acquisition and delivery. Case-study based projects involve current technologies and estimating practices.

Learning Activities: Lecture 3 hour(s); Laboratory 3 hour(s).

Grade Mode: Letter.

ECI 182 – Buildings: Assemblage & Construction Quality Management (4 units)

Course Description: Materials and methods used in building construction. Assemblage of construction materials in building systems and related effects on productivity, equipment selection and job site layout.

Learning Activities: Lecture 3 hour(s); Laboratory 3 hour(s).

Grade Mode: Letter.

ECI 189A – Selected Topics in Civil Engineering: Environmental Engineering (1-5 units)

Course Description: Directed group study in Environmental Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 189B – Selected Topics in Civil Engineering: Hydraulics & Hydrologic Engineering (1-5 units)

Course Description: Directed group study in Hydraulics & Hydrologic Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 189C – Selected Topics in Civil Engineering: Engineering Planning (1-5 units)

Course Description: Directed group study in Engineering Planning.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 189D – Selected Topics in Civil Engineering: Geotechnical Engineering (1-5 units)

Course Description: Directed group study in Geotechnical Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 189E – Selected Topics in Civil Engineering: Structural Engineering (1-5 units)

Course Description: Directed group study in Structural Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 189F – Selected Topics in Civil Engineering: Structural Mechanics (1-5 units)

Course Description: Directed group study in Structural Mechanics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 189G – Selected Topics in Civil Engineering: Transportation Engineering (1-5 units)

Course Description: Directed group study in Transportation Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 189H – Selected Topics in Civil Engineering: Transportation Planning (1-5 units)

Course Description: Directed group study in Transportation Planning.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 189I – Selected Topics in Civil Engineering: Water Resources Engineering (1-5 units)

Course Description: Directed group study in Water Resources Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 189J – Selected Topics in Civil Engineering: Water Resources Planning (1-5 units)

Course Description: Directed group study in Water Resources Planning.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECI 190C – Research Group Conferences in Civil & Environmental Engineering (1 unit)

Course Description: Research group conferences.

Prerequisite(s): Consent of instructor. Upper division standing in Civil and Environmental Engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECI 192 – Internship in Engineering (1-5 units)

Course Description: Supervised work experience in civil engineering.

Prerequisite(s): Upper division standing; approval of project prior to the period of the internship.

Learning Activities: Internship.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECI 193A – Civil & Environmental Engineering Senior Design (4 units)

This version has ended; see updated course, below.

Course Description: Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem.

Prerequisite(s): ECI 114 C- or better; (ECI 115 C- or better or ECI 153 C- or better or MAT 118A C- or better); (ECI 140CN C- or better or (ECI 171 C- or better, ECI 171L C- or better) or (ECI 132 C- or better, ECI 134 C- or better) or (ECI 132 C- or better, ECI 135 C- or better) or (ECI 134 C- or better, ECI 135 C- or better) or (ECI 161 C- or better, ECI 162 C- or better) or (ECI 162 C- or better, ECI 163 C- or better) or (ECI 163 C- or better, ECI 161 C- or better) or (ECI 141 C- or better, ECI 141L C- or better)), (UWP 101 or UWP 102E or UWP 102G or UWP 104A or UWP 104E or UWP 104T).

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to seniors in Civil Engineering and Environmental Engineering only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL).

ECI 193A – Civil & Environmental Engineering Senior Design (4 units)

Course Description: Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem.

Prerequisite(s): ECI 114 C- or better; (ECI 115 C- or better or ECI 153 C- or better or MAT 118A C- or better); (ECI 140CN C- or better or (ECI 171 C- or better, ECI 171L C- or better) or (ECI 132 C- or better, ECI 134 C- or better) or (ECI 132 C- or better, ECI 135 C- or better) or (ECI 161 C- or better, ECI 162 C- or better) or (ECI 162 C- or better, ECI 163 C- or better) or (ECI 163 C- or better, ECI 161 C- or better) or (ECI 141 C- or better, ECI 141L C- or better)), (UWP 101 or UWP 102E or UWP 102G or UWP 104A or UWP 104E or UWP 104T).

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to seniors in Civil Engineering and Environmental Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL).

This course version is effective from, and including: Fall Quarter 2024.

ECI 193B – Civil & Environmental Engineering Senior Design (4 units)

Course Description: Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem.

Prerequisite(s): ECI 193A.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to seniors in Civil Engineering and Environmental Engineering only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Visual Literacy (VL).

ECI 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECI 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ECI 201 – Introduction to Theory of Elasticity (4 units)

Course Description: Fundamental equations of elasticity in three dimensions; plane stress and plane strain; flexure and torsion of bars of various shapes. Introduction to variational and approximate methods.

Prerequisite(s): ENG 104.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECI 203 – Inelastic Behavior of Solids (4 units)

Course Description: Fundamentals of theories of plasticity, viscoelasticity and viscoplasticity for solids. Macroscopic constitutive modelling for engineering materials, e.g., metals, polymers, soils, etc., and microscopic motivation.

Prerequisite(s): ECI 201.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

ECI 205 – Continuum Mechanics (4 units)

Course Description: Tensor formulation of the field equations for continuum mechanics, including large deformation effects. Invariance and symmetry requirements. Introduction to nonlinear thermoelasticity and thermodynamics. Solution of three-dimensional problems. Selected topics.

Prerequisite(s): ECI 201.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 211A – Advanced Matrix Structural Analysis (4 units)

Course Description: Matrix structural analysis for automated analysis of structures using computers. Application of matrix analysis techniques to complex problems in structural engineering arising from soil-structure interactions, three-dimensional effects, and nonlinear material response.

Prerequisite(s): ECI 130; or equivalent or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 211B – Nonlinear Structural Analysis (4 units)

Course Description: Geometric and material nonlinear response of framed structures, and methods for computational simulation of such response. Applications of these concepts and techniques to structural design within modern performance assessment frameworks and software platforms.

Prerequisite(s): ECI 211A; or equivalent or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 212A – Finite Element Procedures in Applied Mechanics (4 units)

Course Description: Weighted-residual and Rayleigh-Ritz methods. Weak/variational formulation and development of discrete equations using finite element approximations. Application to one- and two-dimensional problems (heat conduction).

Prerequisite(s): EAD 115 or (MAT 128A, MAT 128B (can be concurrent)).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 212B – Finite Elements: Application to Linear & Non-Linear Structural Mechanics Problems (4 units)

Course Description: Application to linear and nonlinear structural mechanics problems. Linear elasticity, weak form, and finite element approximation. Incompressible media problems. Non-linear problems with material nonlinearity.

Prerequisite(s): ECI 212A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 213 – Structural Dynamics (4 units)

Course Description: Analysis of structures subjected to dynamic loading; single and multi-degree of freedom systems; response spectrum analysis; numerical methods for analysis of linear systems.

Prerequisite(s): ECI 138; Or equivalent or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 214 – Probabilistic Seismic Hazard Analysis & Design Ground Motions (4 units)

Course Description: Probabilistic seismic hazard analysis for use in developing design spectra and for seismic risk analyses, including the development of earthquake ground motion time series for use in dynamic analyses of structures.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 224 – Structural Reliability Analysis (4 units)

Course Description: Review of probability theory (probability distributions, conditional probability, functions of random variables); component reliability analysis (exact solutions, FORM, SORM); system reliability analysis (series systems, parallel systems, general systems); simulation methods (Monte Carlo simulation, variance reduction techniques); probabilistic codified design and reliability-based design; applications to earthquake and wind engineering.

Prerequisite(s): Highly recommended, but not required, that students have taken a graduate/undergraduate level course in Matrix and/or Indeterminate Structural Analysis and an undergraduate course in Probability Theory.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 225 – Random Vibrations (4 units)

Course Description: Probability theory; stochastic processes/random fields (time/frequency domain description, stationarity, mean square calculus, multivariate processes); response of linear systems under stochastic excitations (single-/multi-DOF systems, time/frequency domain, state space approach); reliability-based structural design (first-excursion and fatigue failures); applications to earthquake and wind engineering.

Prerequisite(s): Graduate level course in (deterministic) Structural Dynamics such as ECI 213 required (can be concurrent).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 232 – Advanced Topics in Concrete Structures (4 units)

Course Description: Ductility of reinforced concrete; strength of two-way slabs; modified compression field theory.

Prerequisite(s): ECI 130; ECI 135; ECI 138; graduate standing.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 233 – Advanced Design of Steel Structures (4 units)

Course Description: Review of Load and Resistance Factor Design (LRFD); design of indeterminate systems; moment frames and bracing systems; connection design; seismic design of steel structures; direct analysis method for stability design; and performance assessment of steel structures.

Prerequisite(s): (ECI 130 or ECI 131); ECI 132.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

ECI 234 – Prestressed Concrete (4 units)

Course Description: Survey of methods and applications; prestressing materials and systems; prestress losses; flexural design; design for shear and torsion; deflection computation and control; continuous beams and indeterminate structures; floor systems; partial prestressing; design of compression members; strut-and-tie models.

Prerequisite(s): ECI 135; (ECI 130 or ECI 131).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 235 – Cement Composites (4 units)

Course Description: Applications of cement composites; materials selection and proportioning; component and composite properties; hydration reactions and microstructure development; mechanisms of failure; nondestructive test methods; fiber reinforcement; concrete durability; novel reinforcing materials; ferrocement; repair and retrofit technologies; applications to structural design.

Prerequisite(s): ENG 104.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

ECI 236 – Design of Fiber Reinforced Polymer Composite Structures (4 units)

Course Description: Basics of mechanics and design of polymer matrix composites: composite classification, manufacturing process, micromechanical property determination, classical lamination theory, strength theories, first-ply-failure, test methods, design practice, strengthening and retrofitting of existing reinforced concrete structures.

Prerequisite(s): ECI 135.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

ECI 237 – Bridge Design (4 units)

Course Description: Bridge types, behavior and construction characteristics; design philosophy, details according to Caltrans and American Association of State Highway and Transportation Officials codes, principles; seismic design and retrofit of concrete bridges; modern bridges using advanced fiber reinforced polymer composites; fieldtrip required.

Prerequisite(s): ECI 130; ECI 135; ECI 234 recommended.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to Graduate Students only.

Grade Mode: Letter.

ECI 238 – Performance-Based Seismic Engineering (4 units)

Course Description: Modern seismic design; performance-based seismic design; seismic hazard; seismic demands: linear and nonlinear procedures; performance assessment: deterministic and probabilistic procedure; review of FEMA-350, FEMA-356, ATC-40 and other performance-based guidelines.

Prerequisite(s): ECI 138; ECI 213.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 239 – Design of Materials & Systems for Sustainability (4 units)

Course Description: Effects on environmental impacts from materials selection and design in the built environment. Material mechanics, design constraints, and life cycle assessment in the development of "greener" materials and systems. Design of engineered materials through selecting constituents & processing techniques and the influence on mechanical properties, microstructure, and environmental impacts. Role of materials in the environmental impacts of buildings, infrastructure, and other systems.

Prerequisite(s): ENG 104 C or better; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Graduate Students.

Grade Mode: Letter.

ECI 240 – Water Quality (4 units)

Course Description: Quality requirements for beneficial uses of water. Hydrologic cycle of quality. Hydromechanics in relation to quality of surface and groundwaters; transport and fate of waterborne pollutants. Heat budget for surface waters; predictive methods; introduction to water quality modeling.

Prerequisite(s): ECI 141; ECI 142.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 241 – Environmental Reactive Chemical Transport Modeling (4 units)

Course Description: Modeling of reactive chemical transport in air and water including kinetic reactions, equilibrium reactions, and phase partitioning. Emphasis on numerical solution schemes and programming techniques to provide deeper insight into model performance and limitations.

Prerequisite(s): CHE 002A or CHE 002B or ECI 149; or equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 242 – Air Quality (4 units)

Course Description: Factors determining air quality. Effects of air pollutants. Physical and chemical fundamentals of atmospheric transport and reaction. Introduction to dispersion modeling.

Prerequisite(s): ENG 105; ECI 141; ECI 149; or equivalents.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 243A – Water & Waste Treatment (4 units)

Course Description: Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design.

Prerequisite(s): ECI 148A; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to graduate majors only.

Grade Mode: Letter.

ECI 243B – Biological Treatment of Wastewater (4 units)

Course Description: Regulations; microbiology and kinetics of engineered biological processes; aeration; and activated sludge.

Prerequisite(s): ECI 243A.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to graduate majors only.

Grade Mode: Letter.

ECI 243C – Biological Treatment of Wastewater (4 units)

Course Description: Biological treatment of wastewater using fixed film, hybrid, digestion, and biological nutrient removal processes.

Prerequisite(s): ECI 243A; ECI 243B.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 243L – Pilot Plant Laboratory (4 units)

Course Description: Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment.

Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or consent of instructor. Graduate standing.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Open to graduate majors only.

Grade Mode: Letter.

ECI 244A – Life Cycle Assessment for Sustainable Engineering (4 units)

Course Description: Life cycle assessment methodology. Emphasis on applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Enrollment restricted to graduate students.

Credit Limitation(s): Not open to students who have taken ECI 244.

Cross Listing: EGG 201.

Grade Mode: Letter.

ECI 244B – Advanced Methods in Industrial Ecology (4 units)

Course Description: Implementation, interpretation, and methodological issues and advances in life cycle assessment and other complementary methods from the field of Industrial Ecology with a focus on use in research.

Prerequisite(s): ECI 244A; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 245A – Applied Environmental Chemistry: Inorganic (4 units)

Course Description: Chemistry of natural and polluted waters. Topics include chemical, kinetic and equilibrium principles, redox reactions, gas solution and solid-solution equilibria, thermodynamics, carbonate systems, coordination chemistry, interfacial phenomena.

Prerequisite(s): ENG 105; ECI 140; CHE 002B; or the equivalent of CHE 002B; CHE 002C or CHE 107A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECI 245B – Applied Environmental Chemistry: Organic (4 units)

Course Description: Transport and transformation of organic chemicals in the environment. Topics include application of thermodynamics to predict solubility and activity coefficients; distribution of organic chemicals between the aqueous phase and air, solvent, or solid phases; chemical, photochemical and biological transformation reactions.

Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; or the equivalent; CHE 002C or CHE 107A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECI 247 – Aerosols (4 units)

Course Description: Behavior of airborne particles including particle formation, modification, and removal processes.

Prerequisite(s): ENG 103; ENG 105; ECI 141; ECI 149N.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 247L – Aerosols Laboratory (4 units)

Course Description: Methods of generation and characterization of aerosols. Detailed topics may include flow rate measurement, aerosol generation, aerosol collection, ions measurement, metals measurement, and carbon measurement.

Prerequisite(s): ECI 247.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

ECI 249 – Probabilistic Design & Optimization (4 units)

Course Description: Design by optimization for probabilistic systems, decision theory, the value of information, probabilistic linear programming, probabilistic dynamic programming, nonlinear probabilistic optimization. Applications in civil engineering design, project evaluation, and risk management.

Prerequisite(s): ECI 114; ECI 153; ENG 106; or equivalents.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 251 – Transportation Demand Analysis (4 units)

Course Description: Procedures used in urban travel demand forecasting. Principles and assumptions of model components (trip generation, trip distribution, model split). New methods of estimating travel demand. Computer exercises using empirical data to calibrate models and forecast travel demand.

Prerequisite(s): ECI 114; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 252 – Sustainable Transportation Systems (4 units)

Course Description: Freight transportation systems, with optimization model applications beyond freight including mobility, autonomous vehicles, electrification, and planning. Evaluation of freight improvement strategies including operations, infrastructure, management, and vehicle technologies. Analysis of private and system impacts and environmental and social issues of freight activity such as traffic, behaviors, logistics, and e-commerce.

Prerequisite(s): ECI 251; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

ECI 253 – Dynamic Programming & Multistage Decision Processes (4 units)

Course Description: Operations research. Optimization techniques with a focus on dynamic programming in treating deterministic, stochastic, and adaptive multistage decision processes. Brief review of linear programming and non-linear programming. Applications in transportation networks and other civil infrastructure systems.

Prerequisite(s): MAT 021C; MAT 022A; programming course; EAD 115 recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 254 – Exploring Data from Built Environment Using R (4 units)

Course Description: Introduction to modern data science, specifically data acquisition, exploratory data analysis, visualization, and beginning data analysis using R. Emphasizes computational reasoning and working with tabular and non-standard data. Focus will be on data generated in the built environment.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: GEO 279.

Grade Mode: Letter.

ECI 256 – Urban Traffic Management & Control (4 units)

Course Description: Basic concepts, models, and methods related to the branch of traffic science that deals with the movement of vehicles on a road network, including travel speed, travel time, congestion concepts, car-following and hydrodynamic traffic models.

Prerequisite(s): ECI 114.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 257 – Flow in Transportation Networks (4 units)

Course Description: Elements of graph theory, a survey of pertinent optimization techniques, extremal principles in network flow problems, deterministic equilibrium assignment, stochastic equilibrium assignment, extensions of equilibrium assignments and dynamic transportation network assignment.

Prerequisite(s): ECI 153; ECI 161 or ECI 256 recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 259 – Asphalt & Asphalt Mixes (4 units)

Course Description: Asphalts and asphalt mix types and their use in civil engineering structures, with primary emphasis on pavements. Asphalt, aggregate properties and effects on mix properties. Design, construction, recycling. Recent developments and research.

Prerequisite(s): ECI 179; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 260 – Sediment Transport (4 units)

Course Description: Sediment transport in hydrologic systems. Process-oriented course which will emphasize how sediment moves and the physical processes that affect sediment transport. Field trip.

Prerequisite(s): ECI 141; or equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 261 – Colloids in Soil & Water (4 units)

Course Description: Colloid occurrence, properties, behavior in different environments, and transport mechanisms in water and soils. Emphasis on their role in water contamination.

Prerequisite(s): CHE 002B; (ENG 103 or ECI 100); upper division or graduate standing.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate standing; Pass Two restricted to upper division standing or graduate standing.

Grade Mode: Letter.

ECI 262 – Turbulent Land-Water-Atmosphere Interactions in the Atmospheric Boundary Layer (4 units)

Course Description: Atmospheric boundary layer and the associated thermodynamics, surface energy balance partitioning, equations of motion for the atmospheric boundary layer, turbulent scalar (e.g., heat, water vapor, pollution, etc.) transport equations for stratified flow, atmospheric stability, land-water-atmosphere interactions, similarity relations, modeling parameterizations, and field data analysis.

Prerequisite(s): MAT 022B; ECI 100; ECI 141; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

ECI 263 – Evolutionary Algorithms (4 units)

Course Description: Engineering systems design via approximate optimization of simulation models. Local vs. global search. Genetic algorithms, evolutionary strategies, genetic programming. Multi-objective methods. Parameter sensitivity and convergence assessment. Surrogate modeling.

Prerequisite(s): ECI 153 C or better; or consent of instructor. Computer programming experience required.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to Graduate Students.

Grade Mode: Letter.

ECI 264A – Transport, Mixing & Water Quality in River & Lakes (4 units)

Course Description: Principal causes of mixing and transport in rivers, lakes and reservoirs, and their impacts on water quality. Case studies of specific lakes and rivers.

Prerequisite(s): ECI 141; ECI 240.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 264B – Transport, Mixing & Water Quality in Estuaries & Wetlands (4 units)

Course Description: Principal causes of mixing and transport in estuaries and wetlands, and their impacts on water quality. Topics include advection/diffusion; tides; transverse mixing; longitudinal dispersion; sediment transport; nutrient cycling; computer modeling of estuaries. Case studies of specific systems.

Prerequisite(s): ECI 141; ECI 240.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 265 – Stochastic Hydrology & Hydraulics (4 units)

Course Description: Physics-based stochastic methods in modeling hydrologic and hydraulic processes; theory for modeling hydrologic-hydraulic governing equations as stochastic partial differential equations applied to various hydrologic-hydraulic processes under uncertainty, including transport, open channel flow, overland flow, soil water flow, and groundwater.

Prerequisite(s): ECI 266; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 266 – Applied Stochastic Methods in Engineering (4 units)

Course Description: Stochastic processes classification; Gaussian random fields; stochastic calculus in mean square; Ito and Stratonovich stochastic differential equations; Fokker-Planck equation; stochastic differential equations with random coefficients.

Prerequisite(s): ECI 114 or MAT 131 or STA 130A or STA 131A or MAT 118A (can be concurrent).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 267 – Water Resource Management (4 units)

Course Description: Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management.

Prerequisite(s): ECI 114; ECI 142; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Cross Listing: GEO 212.

Grade Mode: Letter.

ECI 268 – Infrastructure Economics (4 units)

Course Description: Economics applied to infrastructure engineering planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; effect of uncertainty; optimization economics; non-classical economics; public finance.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); ENG 106; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 269 – Transportation-Air Quality: Theory & Practice (4 units)

Course Description: Health and regulatory aspects of airborne pollutants. Principles of modeling vehicle emissions. Conformity issues and the regulatory framework. Regional and micro-scale modeling.

Prerequisite(s): ECI 149; or the equivalent.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

ECI 270 – Advanced Water Resources Management (3 units)

Course Description: Discussion of technical papers related to planning theory, system maintenance, regionalization, multi-objective methods, risk analysis, institutional issues, pricing model application, economic development, forecasting, operations, and other topics.

Prerequisite(s): ECI 153; ECI 267; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ECI 272N – Contaminant Fate & Transport in Porous Media (4 units)

Course Description: Solute and colloid mass transport processes in porous media. Characterizing and quantifying physical processes of advection, diffusion/dispersion, sorption, as well as basic biogeochemical reactions. Colloid-facilitated transport in porous media. Analytical and numerical solutions to the reactive advection-dispersion equation in Eulerian and Lagrangian forms with an introduction to advanced random walk models.

Prerequisite(s): ECI 144; MAT 021A; MAT 021B; MAT 021C; MAT 022A; MAT 022B; Ability to program.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to upper division and graduate students only.

Grade Mode: Letter.

ECI 273 – Water Resources Systems Engineering (4 units)

Course Description: Planning and management of water resource systems. Deterministic and stochastic simulation and optimization techniques. Capacity design and operation of reservoir systems for water supply, hydropower, flood control, and environmental objectives.

Prerequisite(s): ECI 114; ECI 153; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 274 – Introduction to Turbulence (4 units)

Course Description: Fundamental theory, statistics, analysis tools and models for turbulence and turbulent flows. Practical skills related to the analysis and study of turbulence.

Prerequisite(s): MAT 022B; ECI 100; ECI 141; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

ECI 275 – Hydrologic Time-Series Analysis (4 units)

Course Description: Application of statistical methods for analysis and modeling of hydrologic series. Statistical simulation and prediction of hydrologic sequences using time series methodology.

Prerequisite(s): ECI 114; ECI 142.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 276 – Watershed Hydrology (4 units)

Course Description: Analysis and mathematical modeling of hydrologic processes taking place in a watershed. Precipitation analysis and modeling. Theory of overland flow and its kinematic wave approximation. Analysis and modeling of saturated and unsaturated subsurface flow processes taking place on a hill slope.

Prerequisite(s): ECI 142; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 277A – Computational River Mechanics I (4 units)

Course Description: Unsteady open channel flows, computation of water surface profiles, shallow water equations, St. Venant equations, method of characteristics, finite difference methods, stability and accuracy of explicit and implicit schemes, flood routing in simple and compound channels, advection of plumes.

Prerequisite(s): EAD 115 (can be concurrent); ECI 141 (can be concurrent).

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ECI 277.

Grade Mode: Letter.

ECI 277B – Computational River Mechanics II (4 units)

Course Description: Open channel flows, physical aspects of river mechanics, formulation of depth-averaged equations, boundary conditions, coordinates transformation and grid generation, finite-difference solution techniques, applications to two-dimensional momentum and pollutant transport in rivers.

Prerequisite(s): ECI 277A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 278 – Hydrodynamics (3 units)

Course Description: Perturbation methods. Basic water waves. Governing equations for fluid motion on a rotating earth. Rotation effects, vorticity dynamics, Ekman layer. Stratification effects, internal waves and turbulent mixing. Combined effects.

Prerequisite(s): ECI 141.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ECI 279 – Advanced Mechanics of Fluids (4 units)

Course Description: Rotational flows. Navier-Stokes equations and solutions for laminar flow; boundary layer equations and solution techniques. Nature of turbulence. Reynolds equations. Introduction to turbulence modeling.

Prerequisite(s): ECI 141.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 280A – Nonlinear Finite Elements for Elastic-Plastic Problems (4 units)

Course Description: State of the art finite element methods and tools for elasticplastic problems, including computational techniques based on the finite element method and the theory of elastoplasticity.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 280B – Nonlinear Dynamic Finite Elements (4 units)

Course Description: State of the art computational methods and tools for analyzing linear and nonlinear dynamics problems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 281A – Advanced Soil Mechanics (4 units)

Course Description: Consolidation and secondary compression. Preloading and wick drains. Seepage and seepage pressures. Filtration, drainage, and dewatering. Shear strength: friction, cohesion, dilatancy and critical states.

Prerequisite(s): ECI 171.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 281B – Advanced Soil Mechanics (5 units)

Course Description: Site investigation and soil characterization within the context of slope stability analysis.

Prerequisite(s): ECI 281A.

Learning Activities: Lecture 4 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

ECI 282 – Pavement Design & Rehabilitation (4 units)

Course Description: Advanced pavement design and structural/functional condition evaluation for concrete and asphalt pavements. Highways, airfields, port facilities; new facilities, rehabilitation, reconstruction. Mechanistic-empirical procedures, materials, climate and traffic characterization. Use of current design methods; recent developments and research.

Prerequisite(s): ECI 179; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 283 – Physico-Chemical Aspects of Soil Behavior (4 units)

Course Description: Study of the geotechnical behavior of soils considering formation, transport, mineralogy, soil-fluid-electrolyte systems, surface tension, particle mechanics, shape, fabric, and structure. Laboratories demonstrate effects of fundamental interparticle forces (contact, Van Der Waals, capillarity and chemical).

Prerequisite(s): ECI 171.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

ECI 284 – Theoretical Geomechanics (4 units)

Course Description: Elasticity, plasticity, micromechanics, coupled behavior and large deformations for geomaterials. Prediction of stress-strain-volume change behavior of geomaterials. Monotonic and cyclic loading, anisotropy, bifurcation of deformation.

Prerequisite(s): ECI 171.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 285 – Advanced Topics in Concrete Pavement Engineering & Materials (4 units)

Course Description: Advances in concrete pavements engineering and materials, current and future needs. Strategies to reduce global warming potential through optimizing structural design and enhancing the durability of concrete pavements. Topics include structural design optimization strategies, mixture design optimization, implementation of performance-based specifications for concrete pavements, use of supplementary cementitious materials, fibers, nanomaterials, admixtures.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 286 – Advanced Foundation Design (4 units)

Course Description: Design and analysis of pile and pier foundations, including seismic effects; deep excavation systems; tie-back, nailing, and anchor systems; coffer dams; loads on buried conduits; ground modification techniques; and other related topics.

Prerequisite(s): ECI 173.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 287 – Geotechnical Earthquake Engineering (4 units)

Course Description: Characteristics and estimation of earthquake ground motions; wave propagation and local site response; liquefaction potential and remediation; residual strength and stability considerations; ground deformations; dynamic soil-structure interaction.

Prerequisite(s): ECI 138; ECI 281A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 288 – Earth & Rockfill Dams (4 units)

Course Description: Site selection; design considerations; layout; seismic effects including considerations of fault movements; construction; environmental considerations, instrumentation; maintenance remediation and retrofit of existing dams.

Prerequisite(s): ECI 281A; ECI 281B (can be concurrent).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ECI 289A – Selected Topics in Civil Engineering: Environmental Engineering (1-5 units)

Course Description: Directed group study in Environmental Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECI 289B – Selected Topics in Civil Engineering: Hydraulics & Hydrologic Engineering (1-5 units)

Course Description: Directed group study in Hydraulics & Hydrologic Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECI 289C – Selected Topics in Civil Engineering: Engineering Planning (1-5 units)

Course Description: Directed group study in Engineering Planning.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECI 289D – Selected Topics in Civil Engineering: Geotechnical Engineering (1-5 units)

Course Description: Directed group study in Geotechnical Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECI 289E – Selected Topics in Civil Engineering: Structural Engineering (1-5 units)

Course Description: Directed group study in Structural Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECI 289F – Selected Topics in Civil Engineering: Structural Mechanics (1-5 units)

Course Description: Directed group study in Structural Mechanics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECI 289G – Selected Topics in Civil Engineering: Transportation Engineering (1-5 units)

Course Description: Directed group study in Transportation Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECI 289H – Selected Topics in Civil Engineering: Transportation Planning (1-5 units)

Course Description: Directed group study in Transportation Planning.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECI 289I – Selected Topics in Civil Engineering: Water Resources Engineering (1-5 units)

Course Description: Directed group study in Water Resources Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECI 290 – Seminar (1 unit)

Course Description: Discussion of current graduate research, and guest lectures on recent advances. Oral presentation of individual study.

Required of graduate degree candidates.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ECI 290C – Graduate Research Group Conference (1 unit)

Course Description: Research problems, progress, and techniques in civil engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ECI 291 – Projects for Environmental & Water Resources (4 units)

Course Description: Capstone independent literature-based research project. Project development, reading and mining the literature, strategies and best-practices for writing and oral communication.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Project 2 hour(s)

Enrollment Restriction(s): Open to Graduate Students only.

Grade Mode: Satisfactory/Unsatisfactory only.

ECI 292A – Geotechnical Professional Practice 1 (1 unit)

Course Description: Geotechnical practice issues that affect the delivery of technical solutions for geotechnical projects, including business and management practices, contract documents, legal constraints, public policy and societal concerns, ethics, and professional development. Part 1 of three part series that includes a capstone project.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

ECI 292B – Geotechnical Professional Practice 2 (1 unit)

Course Description: Geotechnical practice issues that affect the delivery of technical solutions for geotechnical projects, including business and management practices, contract documents, legal constraints, public policy and societal concerns, ethics, and professional development. Part 2 of three part series that includes a capstone project.

Prerequisite(s): ECI 292A; or consent of instructor.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

ECI 292C – Geotechnical Professional Practice 3 (2 units)

Course Description: Geotechnical practice issues that affect the delivery of technical solutions for geotechnical projects, including business and management practices, contract documents, legal constraints, public policy and societal concerns, ethics, and professional development. Part 3 of three part series that includes a capstone project.

Prerequisite(s): ECI 292B; or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

ECI 295A – Engineering Education I (2 units)

Course Description: Overview of the discipline of engineering education.

One course in a three-course series.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

ECI 295B – Engineering Education II - DEI (2 units)

Course Description: Diversity, equity, inclusion and justice in engineering education. One course in a three-course series.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

ECI 295C – Engineering Education III (2 units)

Course Description: Designing engineering lessons and modules for an academic or professional audience. One course in a three-course series.

Learning Activities: Lecture/Discussion.

Grade Mode: Letter.

ECI 296 – Topics in Water & Environmental Engineering (1 unit)

Course Description: Seminars presented by visiting lecturers, UC Davis faculty, and graduate students.

Prerequisite(s): Graduate standing; or consent of instructor.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ECI 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ECI 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ECI 390 – The Teaching of Civil Engineering (1 unit)

Course Description: Participation as teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports.

Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Civil Engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated 9 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Classics (CLA)

College of Letters & Science

CLA 001 – Ancient Near East & Early Greece: 3000-500 B.C.E. (4 units)

Course Description: Introduction to the literature, art, and social and political institutions of ancient Mesopotamia, Egypt, Palestine, and early Greece from 3000 to 500 B.C.E.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 002 – Ancient Greece & the Near East: 500-146 B.C.E. (4 units)

Course Description: Introduction to the literature, art and thought and the political and social institutions and values of Greece and its eastern Mediterranean neighbors—the Persians, Egyptians, and Judeans.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 003 – Rome & the Mediterranean: 800 B.C.E.-500 C.E. (4 units)

Course Description: Introduction to the history, literature, material culture, political and social institutions and values of Roman Civilization, with an emphasis on the development of the Roman Empire and the interactions of Roman culture with other Mediterranean cultures.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 004 – Late Antiquity (4 units)

Course Description: History and culture of the Roman and Byzantine empires from the 3rd to the 8th century. Transformation of the classical Mediterranean world through political and cultural interactions, rise of Christianity and Islam, beginning of the medieval period in Europe.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 008 – World Classical Cultures (4 units)

Course Description: Study of selected ancient cultures of the world.

Analysis of the construction of terms such as "classics," "civilization," and "culture." Examination of the plural legacies of classical cultures in the modern world. Ancient cultures examined may include the Greco-Roman Mediterranean, Egypt, Maya Mesoamerica, Han China, Maurya South Asia, Mesopotamia.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CLA 010 – Greek, Roman, & Near Eastern Mythology (3 units)

Course Description: Examination of major myths of Greece, Rome, and the Ancient Near East; their place in the religion, literature and art of the societies that produced them; their subsequent development, influence and interpretation.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

CLA 010Y – Greek, Roman, & Near Eastern Mythology-Hybrid (3 units)

Course Description: Examination of major myths of Greece, Rome, and the Ancient Near East; their place in the religion, literature and art of the societies that produced them; their subsequent development, influence and interpretation.

Learning Activities: Lecture 2 hour(s), Web Virtual Lecture 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

CLA 015 – Women & Gender in Classical Antiquity (4 units)

Course Description: Lives and roles of women and men in ancient Greece and Rome. Readings from history, philosophy, medical and legal documents, literature and myth.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CLA 020 – Pompeii AD 79 (4 units)

Course Description: Roman life in an urban community at the time of the eruption of Vesuvius. Slide presentations of the archeological evidence will be supplemented by selected readings from Petronius' Satyricon and other ancient authors.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CLA 025 – The Classical Heritage in America (4 units)

Course Description: Classical heritage in the New World, with emphasis on the United States from its colonial past to the present day. The reception of Greco-Roman thought and values as expressed in art, architecture, education, law, government, literature, and film.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

CLA 030 – Greek & Latin Elements in English Vocabulary (3 units)

Course Description: Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CLA 030F.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

CLA 030F – Greek & Latin Elements in English Vocabulary (3 units)

Course Description: Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to incoming freshmen.

Credit Limitation(s): Not open for credit to students who have completed CLA 030.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

CLA 031 – Greek & Latin Elements in Technical Vocabulary (3 units)

Course Description: Knowledge of Greek and Latin not required. Elements of Greek and Latin vocabulary to increase understanding of English word formation in medical, scientific and technical terminology and improve ability to understand and retain unfamiliar terms.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

CLA 035 – Food & Wine in the Ancient Mediterranean (3 units)

Course Description: Social, political, and economic history of food and wine in ancient Mediterranean cultures. Development of agriculture and technology, trade, empires. Representation of food and wine in literary and visual arts, religious significance.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CLA 036V.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

CLA 036V – Food & Wine in Ancient Greece (4 units)

Course Description: Social, political, and economic history of food and wine in Ancient Greece. Development of agriculture and technology, trade, cross-cultural exchanges. Representation of food and wine in literary and visual arts, religious significance. Online format combining asynchronous discussion with technologically based materials.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have taken CLA 035.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CLA 040 – Life & Economy in the Ancient Mediterranean World (4 units)

Course Description: Characterization of ancient Mediterranean economies, with emphasis on Greece and Rome. Utilization of archaeological, art historical, and literary evidence. Craft production, labor specialization, trade networks, ancient technology, urban growth, agricultural productivity, coinage systems, and household economies.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CLA 045 – Sport & Spectacle in the Ancient Mediterranean (3 units)

Course Description: Cultural practices and attitudes related to sport and spectacle in the ancient Mediterranean. Secular and ritual festivals and competitions, funerary games, gladiatorial combat and violent mass entertainment, royal hunts and imperial triumphs, and literary, artistic, and philosophical depictions of ancient athletes and physical performances and competitions.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CLA 045V.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

CLA 050 – Ancient Science (4 units)

Course Description: Study of science in ancient Greece and Rome; consideration of its social context; concentration on the basic concepts of physics, the world of medicine and biology, the history of mathematics, and the practices of astronomy, astrology and meteorology.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: STS 050.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 051 – Ancient Medicine (4 units)

Course Description: Medicine in ancient Greece and Rome; physiological conceptions of the body within scientific and social frameworks; exploration of sanitation technology and health in antiquity; medical treatment of the female body; medicine and the economy.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: STS 051.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 060 – Magic in the Ancient Greco-Roman World (4 units)

Course Description: Magical practices and theories in ancient Greece and Rome and in the wider Mediterranean, including Mesopotamia and Egypt. Curses and spells in material culture, literary depictions of spell-casters, magic's place in ancient society, and the modern afterlife of ancient magical practices.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CLA 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Pass/No Pass only.

CLA 101A – Topics in Ancient Mediterranean Civilizations (4 units)

Course Description: Topics may be ordered by time or place (e.g. Hellenistic Egypt) or by theme or genre (e.g. slavery in the ancient world).
Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.
Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.
Repeat Credit: May be repeated 2 time(s) when topic differs.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 101B – Topics in Greek Civilization (4 units)

Course Description: Topics may be ordered by time or place (e.g. the world of Homer) or by theme or genre (e.g. the Greek art of war).
Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.
Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.
Repeat Credit: May be repeated 2 time(s) when topic differs.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 101C – Topics in Roman Civilization (4 units)

Course Description: Topics may be ordered by time or place (e.g. Julius Caesar and his age) or by theme or genre (e.g. gladiators: blood in the arena).
Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.
Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.
Repeat Credit: May be repeated 2 time(s) when topic differs.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 101D – Topics in Classical Receptions (4 units)

Course Description: Topics in classical reception from late antiquity to the present. Topics may be ordered by time or place (e.g. the classical tradition in Washington, D.C.) or by theme or genre (e.g. cinematic representations of the ancient world).
Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.
Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.
Repeat Credit: May be repeated 2 time(s) when topic differs.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 101E – Topics in Ancient Science (4 units)

Course Description: Topics may be ordered by discipline (e.g. ancient medicine), historical figure (e.g. Galen) or topic (e.g. science and the economy).
Prerequisite(s): CLA 050 or CLA 051; or consent of instructor.
Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.
Repeat Credit: May be repeated 2 time(s) when topic differs.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Writing Experience (WE).

CLA 102 – Film & the Classical World (4 units)

Course Description: Classical World as portrayed in films. Viewings and discussions of modern versions of ancient dramas, modern dramas set in the Ancient Mediterranean world, and films imbued with classical themes and allusions. Supplementary readings in ancient literature and mythology.
Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.
Learning Activities: Lecture 3 hour(s), Film Viewing 2.50 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Writing Experience (WE).

CLA 103 – Love & Beauty in the Ancient World (4 units)

Course Description: Philosophical and literary traditions connecting love, beauty, and goodness in ancient thought. Moral and ethical implications, ideologies of sexuality and gender; transmission into the medieval and modern world.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 104 – Death & Dying in the Ancient Mediterranean (4 units)

Course Description: Ideas and practices related to death in the ancient Mediterranean. Burial rituals and spaces, philosophical and medical theories of death and the afterlife, the dying and dead in social life, and literary and artistic depictions of violence and the dead.
Prerequisite(s): One lower-division Classics (CLA) course; or consent of instructor.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CLA 105 – Theory & Practice of Greek & Roman Mythology (4 units)

Course Description: Thematically focused study of mythological narratives. Emphasis on the historical development of myths and the variety of theoretical approaches for the study of myth.
Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.
Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Writing Experience (WE).

CLA 106 – Latine/x & Latin American Perspectives & the Classical Tradition (4 units)

Course Description: Latine/x and Latin American engagement with the classical tradition. Literary, cinematic, and artistic adaptations of Greco-Roman literature, art, and material culture. Social and political responses to the intellectual milieu of the ancient Mediterranean.
Prerequisite(s): One lower division Classics (CLA) course; or consent of instructor.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

CLA 110 – Origins of Rhetoric (4 units)

Course Description: Issues in the development of rhetoric from its origins in ancient Greece to A.D.430. Special attention to works of Plato, Aristotle, Cicero, and Quintilian. Role of grammar and rhetoric in schools of Roman Empire. The Christian rhetoric of Saint Augustine.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have completed RCM 110 or CMN 110. (Former RCM 110.)

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

CLA 111 – Forms of Knowledge in the Ancient World (4 units)

Course Description: History of knowledge preservation and transfer in the ancient Mediterranean. Oral tradition, technology, innovations, forms of writing, libraries, ancient scholarship, cultural exchange and influence.

Learning Activities: Extensive Writing, Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CLA 120 – Greek & Roman Historiography (4 units)

Course Description: Survey of Greek and Roman historical writing in English translation. Authors to be read may include Herodotus, Thucydides, Sallust, Livy, and Tacitus. Focus on the development of historical writing as a literary genre.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 125 – Roman Political Thought (4 units)

Course Description: Survey of Roman thinking about politics, as expressed both in formal theorizing and in a variety of other contexts, including oratory, historiography, and epic. Study of Roman political reflection in its historical, cultural, and literary context.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 140 – Homer & Ancient Epic (4 units)

Course Description: Reading of the classical epics of Homer (*Iliad*, *Odyssey*) and Virgil (*Aeneid*) in English. Discussion of techniques of composition, the beliefs and values of their respective societies, and the generic tradition of ancient epic.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 141 – Greek & Roman Comedy (4 units)

Course Description: Readings in Aristophanes, Menander, Plautus, and Terence; lectures on the development of ancient comedy.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture 3 hour(s), Conference 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

CLA 142 – Greek & Roman Novel (4 units)

Course Description: Examination of the ancient Greek romances and their development into the grotesque realism of Petronius' *Satyricon*, and the religious mysticism of Apuleius' *The Golden Ass*.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 143 – Greek Tragedy (4 units)

Course Description: Reading in English of selected plays of Aeschylus, Sophocles, and Euripides. Discussion of the development and influence of Athenian tragedy.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

CLA 150 – Socrates & Classical Athens (4 units)

Course Description: Study of the major sources of our knowledge of Socrates, assessment of his role in the politics and culture of ancient Athens, his method of teaching, and his place in Western thought.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 170 – Cultural Interactions in the Ancient Mediterranean World (4 units)

Course Description: Exploration of the role of colonial encounters in the spread of ideas throughout the ancient Mediterranean from an archaeological and artistic perspective. Emphasis on material and literary expressions of culture, trade routes, and theories pertaining to culture contact.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CLA 171 – Mediterranean Bronze Age Archaeology (4 units)

Course Description: Archaeological monuments of the ancient Near East, including Egypt and Mesopotamia, and of Greece and Crete during the Bronze Age. Special emphasis on the problems of state formation and on the co-existence and collapse of Bronze Age societies.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CLA 172A – Early Greek Art & Architecture (4 units)

Course Description: Examination of the origin and development of the major monuments of Greek art and architecture from the 8th century to the mid-5th century B.C.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: AHI 172A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

CLA 172B – Later Greek Art & Architecture (4 units)

Course Description: Study of the art and architecture of later Classical and Hellenistic Greece, from the mid-5th century to the 1st century B.C.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: AHI 172B.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

CLA 173 – Roman Art & Architecture (4 units)

Course Description: Art and architecture of Rome and the Roman Empire, from the founding of Rome through the 4th century C.E.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: AHI 173.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

CLA 174 – Greek Religion & Society (4 units)

Course Description: Cults, festivals, and rituals of Greek religious practice and their relationship to Greek social and political institutions, and to Greek private life. Includes discussion of major sanctuaries at Olympia, Delphi, Athens, and others.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

CLA 175 – Architecture & Urbanism in Mediterranean Antiquity (4 units)

Course Description: Architecture and urban development in the ancient Near East, Greece, and Rome. Special emphasis on the social structure of the ancient city as expressed in its architecture, and on the interaction between local traditions and the impact of Greco-Roman urbanism.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Cross Listing: AHI 175.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

CLA 176 – Roman Religions (4 units)

Course Description: Roman religion from republic to empire. Gods, rituals, and festivals at Rome; sacrifice, sacred places, magic. Gender roles, social status, national identity. Influences from other cultures, especially Egypt and the eastern Mediterranean.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CLA 180 – Ancient Mediterranean Technologies (4 units)

Course Description: Practical recreation of and experimentation with ancient technologies. Projects may include pottery and glazing, papyrus and ink making, textile arts, woodworking, pneumatic devices, automata, medicinal processes.

Prerequisite(s): A lower division Classics (CLA) course or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion/Laboratory 2 hour(s).

Repeat Credit: May be repeated for credit when topics differ.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

CLA 190 – Senior Seminar (4 units)

Course Description: Advanced interdisciplinary study of a problem in the ancient Mediterranean world using the techniques of history, archaeology, art history and philology.

Prerequisite(s): Completion of one upper division course in Latin (LAT), Greek (GRK) or Hebrew (HEB) or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

CLA 194HA – Special Study for Honors Students (3 units)

Course Description: Directed reading, research and writing culminating in the completion of a senior honors thesis under the direction of faculty advisor.

Prerequisite(s): Admission to the Honors Program; consent of faculty member supervising honors thesis.

Learning Activities: Discussion 1 hour(s), Independent Study, Term Paper.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

CLA 194HB – Special Study for Honors Students (3 units)

Course Description: Directed reading, research, and writing culminating in the completion of a senior honors thesis under the direction of faculty advisor.

Prerequisite(s): Admission to the Honors Program and consent of faculty member supervising honors thesis.

Learning Activities: Discussion 1 hour(s), Independent Study, Term Paper.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

CLA 197TC – Community Tutoring in Classical Languages (1-5 units)

Course Description: Supervised instruction of Greek or Latin in nearby schools by qualified students in department.

Prerequisite(s): Consent of instructor.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated 5 unit(s).

Grade Mode: Pass/No Pass only.

CLA 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CLA 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CLA 200A – Approaches to the Classical Past (4 units)

Course Description: Survey of major areas of classical scholarship, with special emphasis on the continuing impact of Mediterranean antiquity on later literature, history, art, and culture.

Prerequisite(s): Graduate student status or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

CLA 200B – Approaches to the Classics Past (4 units)

Course Description: Research project on major area of Classical scholarship, with special emphasis on the continuing impact of Mediterranean antiquity on later literature, history, art, and culture.

Prerequisite(s): CLA 200A; graduate student status or consent of instructor.

Learning Activities: Independent Study 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

CLA 201 – Introduction to Classical Philology (4 units)

Course Description: Survey of major contemporary areas of classical scholarship with special attention devoted to current problems in literary and textual criticism.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

CLA 202 – Homer (4 units)

Course Description: Readings in the Iliad and Odyssey: the origins and transmission of the poems.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

CLA 203 – Vergil (4 units)

Course Description: Reading of selected books of the Bucolics, Georgics, and Aeneid. Emphasis will be placed on the study of Vergilean poetic language.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

CLA 204 – Greek & Roman Comedy (4 units)

Course Description: Historical and critical problems in Aristophanes or New Comedy.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

CLA 205 – Latin Lyric & Elegy (4 units)

Course Description: Critical examination of the works of Catullus, Horace, or Propertius.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

CLA 206 – Greek Historiography (4 units)

Course Description: Development of historical writing in Greece.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

CLA 207 – Greek Drama (4 units)

Course Description: Literary and philological analysis of the plays of Euripides, Sophocles, or Aeschylus.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

CLA 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

CLA 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Clinical Research (CLH)

School of Medicine

CLH 200 – Introduction to Translational Research (1 unit)

Course Description: Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project.

Prerequisite(s): Consent of instructor; one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 201 – Strategies for Grant Writing (2 units)

Course Description: Practical skills and strategies to create successful grant proposals in NIH style/format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (Former MDS 461CR.)

Prerequisite(s): Consent of instructor; completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training program.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 202 – Introduction to Clinical Research (3 units)

Course Description: Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs: cross-sectional, case-control, and cohort. Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research.

Prerequisite(s): Consent of instructor; completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, MRCTP program, Clinical Research Certificate or other SOM/CTSC training programs.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

CLH 203 – Methods in Clinical Research (2 units)

Course Description: Overview of major approaches to clinical research, including health services research techniques, informatics, GCRC, and preclinical methodologies to enhance clinical projects. Overview of UC Davis clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective.

Prerequisite(s): Consent of instructor; Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, TL1/T32, KL2/K12, MRCTP, or other SOM training program.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 204 – The Ethics of Research (3 units)

Course Description: Ethical responsibilities, major questions in ethics, the role of trust in scientific research, and the application of ethical principles, concepts, and values.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Priority given to those with acceptance into the Clinical Research Graduate Group, K12, T32 or other SOM/CTSC training program.

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 207 – Team Science (1 unit)

Course Description: Today's scientific challenges necessitate cross-disciplinary engagement and high collaboration levels. Offers guidance on how best to engage in team science to pursue complex questions, work effectively with team members, and produce high impact research that meets society's needs.

Prerequisite(s): Participation in CTSC Research Education and Training Programs, or consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to 25 students.

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 208 – Introduction to Grant Writing, I (2 units)

Course Description: First in a two-quarter series. Scholars are encouraged to enroll in both classes. The two-course sequence provides training in practical aspects of competitive grant writing. The focus is NIH, but information will apply to other funding agencies.

Learning Activities: Lecture/Discussion 2 hour(s), Extensive Writing.

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 209 – Introduction to Grant Writing, II (2 units)

Course Description: Second in a two-quarter series. Two-course sequence provides training in practical aspects of competitive grant writing.

Prerequisite(s): CLH 208; consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to students who have completed CLH 208.

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 210Y – Principles & Methods of Comparative Effectiveness Research (4 units)

Course Description: Provides an introduction to Comparative Effectiveness Research (CER) and methods for conducting CER.

Prerequisite(s): Consent of instructor; familiarity with research methodology; course in introductory statistics.

Learning Activities: Web Virtual Lecture 4 hour(s), Discussion 2 hour(s), Project 6 hour(s).

Grade Mode: Letter.

CLH 211 – Critical Assessment of the Biomedical Literature (1 unit)

Course Description: Exposure to topical issues and controversies in the design of interdisciplinary translational research, with an emphasis on critical assessment of the biomedical and health sciences literature. Extends students' knowledge of study design through practical application.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated 3 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 212 – Introduction to Stem Cell Biology (3 units)

Course Description: Introduction to Stem Cell Biology. Each week will focus on different aspects of stem cells, including general concepts, stem cells in lower organisms, embryonic stem cells and cellular reprogramming.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to graduate students with a fundamental knowledge of cell biology.

Grade Mode: Letter.

CLH 214A – Biodesign I (2 units)

Course Description: Focuses on the principles of needs identification and invention of biomedical technologies. Two part course provides a basic understanding of the elements of the innovation process and how to translate these principles into biomedical device design.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Prior approval by instructor required; student must commit to taking both courses; Biodesign I and Biodesign II.

Grade Mode: Letter.

CLH 214B – Biodesign II (2 units)

Course Description: Focuses on the implementation of biomedical technologies and translational process. Two part course provides a basic understanding of the elements of the innovation process and how to translate these principles into biomedical device design.

Prerequisite(s): CLH 214A; consent of instructor.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Prior approval by instructor required; student must commit to taking both courses; Biodesign I and Biodesign II.

Grade Mode: Letter.

CLH 215 – Clinical Trials in Medicine (2 units)

Course Description: Importance, design, and execution of clinical trials.

Prerequisite(s): CLH 244 C or better; SPH 205AY C or better; or equivalent; or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: S/U only.

CLH 217 – Healthcare Delivery Science – Implementing, Improving, & Disseminating Health Innovations (2 units)

Course Description: Methods for moving evidence-based interventions into real-world settings. Strategies for communicating information on evidence-based interventions to health practitioners, improvements in healthcare delivery, and techniques to promote the systematic uptake of evidence-based practices into routine care to improve health outcomes.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in master's programs in Clinical Research, Public Health, or Health Informatics at UC Davis, or scholars enrolled in a UC Davis CTSC training program.

Grade Mode: S/U only.

CLH 220 – Basics of Stem & Progenitor Cells (1 unit)

Course Description: Lecture designed for graduate students who have experience in cell culture techniques. Designed to give a broad overview of the field and current cells of interest to the greater research community.

Prerequisite(s): MCP 200L; MCP 200; consent of instructor; graduate standing.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 222 – Ethical Issues in Stem Cell Biology (1 unit)

Course Description: Critical presentation and analysis of recent articles in stem cell biology and small group discussions of the ethical issues surrounding this area of research.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 225 – Stem Cell Biology & current Good Manufacturing Practice (2 units)

Course Description: Introduction to human stem cell biology; development of cellular therapeutics based on human stem cells for the treatment of currently incurable diseases; introduction to current Good Manufacturing Practice (cGMP), and theoretical & practical exploration of cGMP to manufacture such cellular therapies.

Prerequisite(s): Must have foundational knowledge of biology and chemistry; graduate students preferred, other students upon instructor's consent.

Learning Activities: Lecture/Discussion 2 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Graduate students preferred, other students upon instructor's consent.

Grade Mode: Letter.

CLH 230 – Congestive Heart Failure, Mechanism of Disease (3 units)

Course Description: Underlying mechanisms of cardiomyopathy and heart failure. Presentation of fundamental knowledge of and recent basic research on heart failure. Student team projects: investigation and presentation of a research topic and bench research project to advance research in the same area.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Lecture/Discussion 2 hour(s), Project.

Grade Mode: Letter.

CLH 231 – Current Techniques in Clinical Research (2 units)

Course Description: Current techniques used in clinical research such as electrophysiology, cardiovascular surgery, cardiac catheterization and echocardiography, team science, and patient management. Lectures are presented by experts on each technique, with an emphasis on use in translational research.

Prerequisite(s): CLH 250; and consent of instructor; graduate standing.

Learning Activities: Lecture 1 hour(s), Clinical Activity 3 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 233 – Molecular Mechanisms of Disease: Cancer (3 units)

Course Description: Cutting edge of research on underlying mechanisms of cancer development, progression and prevention; clinical trials/drug development, signaling pathways and molecular mechanisms of cancer development, recent basic research on cancer stem cells, genetics and epigenetic events and animal models used.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Project 3 hour(s).

Enrollment Restriction(s): Restricted to students pursuing the designated emphasis in Translational Research; graduate standing.

Grade Mode: Letter.

CLH 240 – Predoctoral Clinical Research Training Program Research Integration (1 unit)

Course Description: Alternating sessions: journal club, seminar/discussion, and research integration sessions.

Prerequisite(s): Consent of instructor; enrollment in the Predoctoral Clinical Research Training Program in the CTSC, School of Medicine.

Learning Activities: Seminar 0.50 hour(s), Discussion 0.50 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 244 – Introduction to Medical Statistics (4 units)

Course Description: Introduction to statistical methods and software in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Only 1 unit of credit for students who have completed STA 100 or MPM 402.

Cross Listing: SPH 244.

Grade Mode: Letter.

CLH 245 – Biostatistics for Biomedical Science (4 units)

Course Description: Analysis of data and design of experiments for laboratory data.

Prerequisite(s): CLH 244 or SPH 244; consent of instructor, or equivalent course.

Learning Activities: Lecture 4 hour(s).

Cross Listing: SPH 245.

Grade Mode: Letter.

CLH 246 – Biostatistics for Clinical Research (4 units)

Course Description: Emphasizes critical biostatistics for clinical research and targets biomedical audience. Students will develop understanding for basic planning and analysis of clinical studies and learn to develop collaborations with biostatisticians.

Prerequisite(s): CLH 245 or SPH 245.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated.

Cross Listing: SPH 246.

Grade Mode: Letter.

CLH 247 – Statistical Analysis for Laboratory Data (4 units)

Course Description: Statistical methods for experimental design and analysis of laboratory data including gene expression arrays, RNA-Seq, and mass spec.

Prerequisite(s): CLH 245 or SPH 245.

Learning Activities: Lecture 4 hour(s).

Cross Listing: SPH 247.

Grade Mode: Letter.

CLH 250 – Integrating Medicine Into Basic Science (3 units)

Course Description: Immersive experience consisting of didactic lectures, reading assignments, group discussions, and clinical rotations to acculturate students to the human medical environment; integrate medical principles, physiology and pathophysiology into basic research; and introduce high-impact clinical studies related to medicine and health.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Clinical Activity.

Enrollment Restriction(s): Graduate standing; priority given to students pursuing Designated Emphasis in Translational Research or CTSC TL1 training program.

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 290A – Hot Topics in Clinical Research (1 unit)

Course Description: Seminars presented by guest lecturers on subjects of their own research activities.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 290B – Hot Topics in Stem Cell Biology (1 unit)

Course Description: Seminars presented by guest lecturers on subjects of their own research.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 290C – Literature in Stem Cell Biology (1 unit)

Course Description: Critical presentation and analysis of recent journal articles in stem cell biology by students.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 290D – Literature in Translational Research (1 unit)

Course Description: Critical presentation and analysis of recent journal articles in translational research by students.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 298 – Group Study in Clinical Research (1-5 units)

Course Description: Special topics in Clinical Research appropriate for group study at the graduate level.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the Mentored Clinical Research Training Program.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

CLH 299 – Clinical Research (1-5 units)

Course Description: Independent research and special topics in clinical research appropriate for graduate level.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the Mentored Clinical Research Training Program.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Cognitive Science (CGS)

College of Letters & Science

CGS 001 – Introduction to Cognitive Science (4 units)

Course Description: Introduction to the interdisciplinary cognitive scientific approach to the study of mind, drawing concepts and methods from psychology, philosophy, linguistics, artificial intelligence, and other disciplines.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Cognitive Science majors only.

Cross Listing: PHI 010.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

CGS 098 – Directed Group Study (0.5-5 units)

Course Description: Directed group study in cognitive science.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

CGS 099 – Special Study for Lower Division Students (1-5 units)

Course Description: Special study for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

CGS 107 – Neuroeconomics/Reinforcement Learning & Decision Making (4 units)

Course Description: Theoretical and empirical approaches to neuroeconomics (neuroscience of decision making) from psychology, neuroscience, economics, and computer science. Neuroscience of judgment and decision making, behavioral economics, and reinforcement learning.

Prerequisite(s): (PSC 100 or PSC 100Y or PSC 135 or ECN 100A or ARE 100A or NPB 162 or NPB 163); (STA 013 or STA 013Y or STA 100 or PSC 103A); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: ECN 107, PSC 133.

Grade Mode: Letter.

General Education: Social Sciences (SS); Scientific Literacy (SL).

CGS 134 – Computational Cognitive Neuroscience (4 units)

Course Description: Explorations of how brain secretes mind, via computer simulations that are manipulated and probed to investigate how neurons produce perception, attention, memory, language, and cognitive control.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 100 or PSC 101 or PSC 135 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Cross Listing: PSC 134.

Grade Mode: Letter.

CGS 138 – Consciousness & Cognition (4 units)

Course Description: Current theoretical and empirical evidence in the study of cognition and consciousness. Theories of consciousness, psychological and neural basis of conscious and unconscious processes such as attention, intentionality, and dreams.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 100Y or PSC 135).

Learning Activities: Lecture 4 hour(s).

Cross Listing: PSC 138.

Grade Mode: Letter.

CGS 190 – Seminar in Cognitive Science (4 units)

Course Description: Intensive treatment of a special topic or problem related to cognitive science.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Extensive Writing/Discussion.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

CGS 192 – Fieldwork in Cognitive Science (1-5 units)

Course Description: Supervised internship off and on campus, in community and institutional settings.

Prerequisite(s): Consent of instructor.

Learning Activities: Fieldwork 3-15 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

CGS 194HA – Special Study for Honors Students (3 units)

Course Description: Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor.

Prerequisite(s): Consent of instructor. Senior standing in Cognitive Science; qualifications for admission into college honors program.

Learning Activities: Independent Study 9 hour(s).

Grade Mode: Letter.

CGS 194HB – Special Study for Honors Students (3 units)

Course Description: Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor.

Prerequisite(s): Consent of instructor. Senior standing in Cognitive Science; qualifications for admission into college honors program.

Learning Activities: Independent Study 9 hour(s).

Grade Mode: Letter.

CGS 198 – Directed Group Study (0.5-5 units)

Course Description: Directed group study in cognitive science.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-15 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

CGS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

College of Letters & Science (LTS)

College of Letters & Science

LTS 001 – First Year Engagement: Student Success in Letters & Science (2 units)

Course Description: Introduction to university life. Topics include transition to academic and campus life; academic expectations and the skills to meet them; campus resources; social and professional development; assistance in choice of major, and academic planning.

Learning Activities: Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Open only to students who have completed fewer than 45 quarter units.

Repeat Credit: May be repeated for credit when topic differs. Each quarter the course syllabi is different and following are some of the varying topics: Fall • Academic Success strategies • Introduction to Campus Life & Resources • Time Management Winter • Career and Professional Development • Intro to ICC & Professional development tools • Learning difference between choosing major & identifying your passion • Learning and understanding professional etiquette (written, verbal, social). • Speaker Series Spring • Practicum on the following: 1. Group projects 2. Resume building 3. Group dynamics 4. Speech Exercises 5. Formal Etiquette.

Grade Mode: Pass/No Pass only.

LTS 002 – Aggie Explorers: Major Exploration (1 unit)

Course Description: Overview of majors offered in College of Letters & Science. Exploration of majors through self-assessments and other tools. Guest lecturers include faculty and academic advisors from across Letters and Science. Receive personalized academic planning to help guide student's undergraduate path. Designed for students who have not yet declared a major or are exploring their options.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

LTS 098 – Directed Group Study (1-4 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

LTS 101 – First Year Transfer Engagement: Student Success in Letters & Science (1 unit)

Course Description: Integration of transfer students into university life. Comprehensive foundation for a successful career at UC Davis. Transition from community college to the university, quarter vs. semester systems, academic expectations of faculty and developing skills to meet them, overview of campus resources, evaluating and applying information, social and professional development, and academic planning.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to new transfer students.

Grade Mode: Pass/No Pass only.

LTS 198 – Directed Group Study (1-4 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Communication (CMN)

College of Letters & Science

CMN 001 – Introduction to Public Speaking (4 units)

Course Description: Practice in the preparation and delivery of speeches based on principles and strategies of informing and persuading audiences drawn from the social sciences and humanities.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

CMN 003 – Interpersonal Communication Competence (4 units)

Course Description: Communication competence in professional settings. Managing face-to-face and virtual teams. Leadership, conflict management and negotiation skills. Communication in diverse organizations. Leveraging communication networks. Effective interviewing.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 003V – Interpersonal Communication Competence (4 units)

Course Description: Communication competence in professional settings. Managing face-to-face and virtual teams. Leadership, conflict management and negotiation skills. Communication in diverse organizations. Leveraging communication networks. Effective interviewing.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 003Y – Interpersonal Communication Competence (4 units)

Course Description: Communication competence in professional settings. Managing face-to-face and virtual teams. Leadership, conflict management and negotiation skills. Communication in diverse organizations. Leveraging communication networks. Effective interviewing.

Learning Activities: Web Virtual Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 005 – Global English & Communication (4 units)

Course Description: English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative competence for a globalized world.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Cross Listing: LIN 005.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); World Cultures (WC).

CMN 010V – Introduction to Communication (4 units)

Course Description: Basic principles of communication and communication processes; models of communication; foundations of empirical research in communication; contexts of communication and communication research, including interpersonal, intercultural, news, entertainment, mediated, and others.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CMN 010Y.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 010Y – Introduction to Communication (4 units)

Course Description: Basic principles of communication and communication processes; models of communication; foundations of empirical research in communication; contexts of communication and communication research including interpersonal, intercultural, news, entertainment, mediated, and others.

Learning Activities: Web Virtual Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CMN 010V.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 012Y – Data Visualization in the Social Sciences (4 units)

Course Description: Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations.

Learning Activities: Lecture 2 hour(s), Laboratory 1.50 hour(s), Web Virtual Lecture 1.50 hour(s).

Cross Listing: SOC 012Y, POL 012Y, PSC 012Y.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL); Visual Literacy (VL).

CMN 076 – Video Games & Virtual Environments (4 units)

Course Description: Impact of video games on players and society. Topics include motivations for playing games; cognitive, emotional, and behavioral effects, including violence and addiction; interpersonal and group processes in online games; virtual communities; and video games for education.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Visual Literacy (VL).

CMN 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CMN 101 – Communication Theories (4 units)

Course Description: Forms, functions, development, and testing of communication theory, with emphasis on social scientific approaches. Survey and comparison of significant micro and macro theories and models of face-to-face and mediated communication. Application of theories to real-world problems.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CMN 101Y.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 101Y – Communication Theories (4 units)

Course Description: Forms, functions, development, and testing of communication theory, with emphasis on social scientific approaches. Survey and comparison of significant micro and macro theories and models of face-to-face and mediated communication. Application of theories to real-world problems.

Learning Activities: Web Virtual Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CMN 101.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 102 – Empirical Methods in Communication (4 units)

Course Description: Social scientific research methods employed in Communication. Topics include research design, measurement, sampling, questionnaire construction, survey research, experimental design, content analysis and qualitative field methods.

Prerequisite(s): STA 013 or STA 013Y; or equivalent of STA 013.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 102V – Empirical Methods in Communication (4 units)

Course Description: Social scientific research methods employed in Communication. Topics include research design, measurement, sampling, questionnaire construction, survey research, experimental design, content analysis and qualitative field methods.

Prerequisite(s): STA 013 or STA 013Y; or equivalent of STA 013.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 110 – Communication Networks (4 units)

Course Description: Theoretical approaches to communication networks, practical applications of network studies, and network analysis tools. Friendship, political discussion, social support, organizational, social media, and disease transmission networks are examined. Impact of emerging technologies on network creation, maintenance, and expansion.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 111 – Gender Differences in Communication (4 units)

Course Description: Examination of communication differences between men and women as sources of male/female stereotypes, misunderstandings, dilemmas, and difficulties (real and imagined). Treatment of genders as cultures. Topics include male/female differences in discursive practices and patterns, language attitudes, and relationship dynamics.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Credit Limitation(s): Not open for credit to students who have taken CMN 103.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

CMN 112 – Theories of Persuasion (4 units)

Course Description: Theories and models of persuasion that account for the effects of source, channel and audience factors on message recipients. Examination of message strategies for altering attitudes and gaining compliance. Contexts of application include interpersonal relationships, advertising, politics, and health.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Credit Limitation(s): Not open for credit to students who have taken CMN 152.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 114 – Communication & Cognition (4 units)

Course Description: Relationship between communication and cognition in interpersonal and mediated contexts. Discourse comprehension and production, impact of language attitudes on social judgments, the effects of information processing on decision making.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Credit Limitation(s): Not open for credit to students who have completed CMN 138.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 120 – Interpersonal Communication (4 units)

Course Description: Theories and principles of interpersonal communication related to perception, verbal and nonverbal channels, mutual understanding, and relationship development. Communication processes in face-to-face and technologically-mediated encounters. Consideration of different relationship contexts, including friendships, dating and family relationships, and the workplace.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Credit Limitation(s): Not open for credit to students who have taken CMN 134.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 120V – Interpersonal Communication (4 units)

Course Description: Theories and principles of interpersonal communication related to perception, verbal and nonverbal channels, mutual understanding, and relationship development. Communication processes in face-to-face and technologically-mediated encounters. Consideration of different relationship contexts, including friendships, dating and family relationships, and the workplace.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Repeat Credit: Not open for credit to students who have taken CMN 134.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 121 – Language Use in Conversation (4 units)

Course Description: Examination of how people use language in social interaction, how they exchange meaning during conversation, and how their use of language plays a central role in turn-taking, speech acts, attitude formation, figurative speech, politeness, and other aspects of conversation.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Credit Limitation(s): Not open for credit to students who have taken CMN 105.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 122 – Nonverbal Communication (4 units)

Course Description: Examination of the interaction between nonverbal communication and verbal communication channels in influencing outcomes in interpersonal relationships. Underlying functions served by nonverbal communication are considered.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Credit Limitation(s): Not open for credit to students who have completed CMN 135.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 123 – Intercultural Communication (4 units)

Course Description: Major concepts and theories of intercultural communication. Topics include cultural similarities and differences in verbal and nonverbal communication; dimensions of cultural variations, barriers to intercultural communication, and intercultural communication competence.

Learning Activities: Seminar 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have taken CMN 137.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

CMN 124 – Family Communication (4 units)

Course Description: Theories and research on family communication. Communication in courtship, marriage, and relational dissolution. Processes and outcomes of parent-child, sibling, family roles, and intergenerational communication. Interaction patterns associated with marital/family satisfaction, maintenance, divorce, and dysfunction. Cultural influences on family communication.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 130 – Group Communication (4 units)

Course Description: Communication processes in the development and maintenance of effective groups and teams in organizations. Examination of both face-to-face and computer-mediated group interaction. Topics include group development, power, norms, cohesion, decision making, problem solving, creativity, conflict management, working remotely, and leadership.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 131 – Strategic Communication in Public Relations (4 units)

Course Description: Principles, evolution, and professional practice of public relations. Planning and execution of effective, ethical communication strategies and campaigns. Distribution of messages through traditional and new media, including social media. Cultivation of relationships between organizations and their publics. Crisis communication management.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 132 – Social Media for Public Relations (4 units)

Course Description: Uses of social media technologies in contemporary public relations practice. Social and behavioral theories of social media processes and effects. Strategies and tools for authoring content that builds relationships and creates conversations with key publics.

Prerequisite(s): CMN 131.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 136 – Organizational Communication (4 units)

Course Description: Organizational communication theory and practice is examined with an emphasis on the use of effective communication strategies for achieving organizational goals.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 139 – Advanced Organizational Communication (4 units)

Course Description: Communication processes within and among social organizations. Examines formal organizations as information processing systems. Topics include general systems theory, input-output analysis, structural-functionalism, cybernetics, organizational network analysis, organization environments, organizations as cultures, organizational learning, information technologies, and communication diagnostic/auditing strategies.

Prerequisite(s): CMN 136.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 140 – Introduction to Mass Communication (4 units)

Course Description: History of mass media and media research traditions. Organization and economics of the media industry. Media policy, law, regulation and ethics. Impact of the media on individuals and society. Traditional, new and emerging communication technologies.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 141 – Media Effects: Theory & Research (4 units)

Course Description: Social scientific studies of the effects of mass media messages on audience members' actions, attitudes, beliefs, and emotions. Topics include the cognitive processing of media messages, television violence, political socialization, cultivation of beliefs, agenda-setting, and the impact of new technologies.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 142 – Newsmaking (4 units)

Course Description: The making of news. How journalists construct news and how consumers and newsmakers use it. Effects of news, technology's challenges to journalism, and the relationship of news to other institutions.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH).

CMN 143 – Analysis of Media Messages (4 units)

Course Description: Examination of alternative approaches to the analysis, interpretation, and evaluation of media messages, including those disseminated through broadcasting, print, and new technologies.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

CMN 144 – Media Entertainment (4 units)

Course Description: Effects and appeal of media entertainment, emphasizing emotional reactions. Topics include key concepts of entertainment research such as mood management, and the respective features and emotional/social-psychological effects of genres such as comedy, mystery, thriller, sports, music, horror, and erotica.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 145 – Political Communication (4 units)

Course Description: Relationships among the mass media, citizens, and politics, production of political news, campaign strategies, and citizens' attitudes and behaviors. Frameworks for mediated politics, the news, and elite discourse and campaign messages.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

CMN 146 – Communication Campaigns (4 units)

Course Description: Strategic uses of media and interpersonal communication channels in health, environmental advocacy, and political campaigns. Emphasis on general principles relevant to most campaign types, including public information, social marketing, and media advocacy campaigns.

Learning Activities: Lecture/Discussion 4 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 147 – Children, Adolescents, & the Media (4 units)

Course Description: Research on the adaptive and maladaptive effects of media (e.g., television, movies, video games, social media) on the social, emotional, cognitive, and physical development of youth, considering the protective role of parents, teachers, ethics, and policy.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to Communication majors only on Pass 1.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 147V – Children, Adolescents, and the Media (4 units)

Course Description: Research on the adaptive and maladaptive effects of media (e.g., television, movies, video games, social media) on the social, emotional, cognitive, and physical development of youth, considering the protective role of parents, teachers, ethics, and policy.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 148 – Contemporary Trends In Media (4 units)

Course Description: Global trends in media, including media and globalization, impacts of the new media economy, media and security, and effects of ownership on media content and culture.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); World Cultures (WC).

CMN 149 – Race & Media (4 units)

Course Description: Examines how race and ethnicity as social categories are shaped by mass media. Focuses on the impact of race and ethnicity role portrayals in content and style of news, television and cinema.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

CMN 150V – Computational Social Science (4 units)

Course Description: Nontechnical survey of modern computational research methods. Web scraping, artificial intelligence, visualizing social networks, and computer simulations. Hands-on use of diverse software applications. Professors from all ten UC campuses contribute.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

CMN 151 – Simulating Communication Processes (4 units)

Course Description: Simulations of communication and sociality using agent-based models. Focus on strategic behavior, cooperation, coordination, self-organization, information diffusion, and other communication phenomena. No programming skills assumed.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

CMN 152V – Social Science with Online Data (4 units)

Course Description: Survey of web-driven social science and its methods. Focus on web scraping and social media API's. Covers wrangling and analysis of data from social networks, online experiments, and other digital traces. Python programming skills helpful, but not assumed.

Prerequisite(s): Programming experience helpful, but not required.

Learning Activities: Extensive Problem Solving, Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1.50 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Scientific Literacy (SL).

CMN 161 – Health Communication (4 units)

Course Description: Health communication theories and research. Health literacy, social support and coping, doctor-patient interaction, health communication campaigns, media influences on health, and applications of new technologies in health promotion.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 165 – Media & Health (4 units)

Course Description: Content and effects of health messages in the media. Topics include health news reporting; portrayals of disease, disability, death and health-related behaviors; promotion of drugs and other health products; and tobacco and alcohol advertising.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 170 – Digital Technology & Social Change (4 units)

Course Description: Conceptual understanding of how digital communication technologies transform our lives through social media, mobile connectivity, globalization, and big data. Contexts include education, health, entrepreneurship, democracy, and poverty.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CMN 170V.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 170V – Digital Technology & Social Change (4 units)

Course Description: Conceptual understanding of how digital technologies transform our lives, through social media, mobile connectivity, globalization, big data, and artificial intelligence. Context includes education, health, entrepreneurship, democracy, among others.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CMN 170.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 172 – Interpersonal Technologies (4 units)

Course Description: Theories and research findings on how people use technologies for interpersonal and relational purposes, including impression formation, self-presentation, deception, anonymity, friendship maintenance, online dating, and emotional expression.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 174 – Social Media (4 units)

Course Description: Application of communication theories to the study and design of social media. Examination of social media in contexts such as political activism and collaboration. Topics include online credibility, participatory culture, viral media and privacy.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

CMN 176 – Video Games Theory & Research (4 units)

Course Description: Communication theory and research on the uses and effects of video games. Research methods available for investigating game use and the impact of games on behavior. Application of those methods in a research project.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 176V – Video Games Theory & Research (4 units)

Course Description: Communication theory and research on the uses and effects of video games. Research methods available for investigating game use and the impact of games on behavior. Application of those methods in a research project.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 178 – Persuasive Technologies (4 units)

Course Description: Designing and testing ethical, technology-based communication interventions in the domains of health, marketing, education, and environment. Social media, mobile apps, wearable devices, recommendation systems, serious games, and augmented reality.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 180 – Current Topics in Communication (4 units)

Course Description: Group study of a special topic in communication.

Prerequisite(s): (CMN 101 or CMN 101Y); CMN 102; or a research methods course equivalent to CMN 102.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Communication majors only.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 189A – Proseminar in Social Interaction (4 units)

Course Description: Reading, discussion, research, and writing on a selected topic in the specialty of social interaction. Potential topics include relationship initiation, maintenance, and deterioration; communication failure; nonverbal communication; conversational management; semantics and pragmatics of languages; and family/marital communication.

Prerequisite(s): (CMN 101 or CMN 101Y); CMN 102; CMN 136; and consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to Communication majors only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 189B – Proseminar in Mass Communication (4 units)

Course Description: Reading, discussion, research, and writing on a selected topic in the specialty of mass communication. Potential topics include, agenda-setting, the cultivation of beliefs, television violence, media portrayals of underprivileged groups, mediated political discourse, interactive technologies, and international/global communications.

Prerequisite(s): (CMN 101 or CMN 101Y); CMN 102; CMN 140; and consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to Communication majors only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 189C – Proseminar in Health Communication (4 units)

Course Description: Reading, discussion, research, and writing on a selected topic in health communication. Potential topics include health communication design and evaluation, media advocacy, physician-patient interaction, uses of communication technologies in health settings, and health-related advertising.

Prerequisite(s): (CMN 101 or CMN 101Y); CMN 102; (CMN 161 or CMN 165); and consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to Communication majors only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 189D – Proseminar in Organizational Communication (4 units)

Course Description: Reading, discussion, research, and writing on a selected topic in the specialty of organizational communication. Potential topics include organizational networks, organizational conflict and its resolution, mediation, bargaining and negotiation, superior-subordinate interaction, leadership styles, and inter-organizational communication.

Prerequisite(s): (CMN 101 or CMN 101Y); CMN 102; CMN 136; and consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to Communication majors only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 189E – Proseminar in Information & Communication Technologies (4 units)

Course Description: Reading, discussion, research and writing on a selected topic in information and communication technologies. Potential topics include the role played by digital technologies in social change, serious games for change, and virtual and offline worlds.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS).

CMN 192 – Internship in Communication (1-12 units)

Course Description: Supervised work experience requiring the application of communication principles and strategies or the evaluation of communication practices in a professional setting. Relevant experiences include public relations, advertising, sales, human resources, health promotion, political campaigns, journalism, and broadcasting.

Prerequisite(s): Consent of instructor. Communication majors who have completed 20 units of upper division communication courses.

Learning Activities: Internship 3-36 hour(s).

Enrollment Restriction(s): Open to Communication majors only.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

CMN 194H – Senior Honors Thesis (4 units)

Course Description: Directed reading, research, and writing culminating in the preparation of honors thesis under direction of faculty advisor.

Prerequisite(s): Senior standing and approval by Honors Committee.

Learning Activities: Seminar 1 hour(s), Project 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CMN 197T – Tutoring in Communication (2-4 units)

Course Description: Tutoring in undergraduate Communication courses, including leadership of discussion groups affiliated with departmental courses.

Prerequisite(s): Upper division standing with major in Communication and consent of Department Chairperson.

Learning Activities: Seminar 1-2 hour(s), Laboratory 1-2 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

CMN 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CMN 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CMN 201 – Theoretical Perspectives on Communication (4 units)

Course Description: Social scientific study of Communication.

Research on interpersonal, organizational, mass, political, and health communication; communication technologies (e.g., video games, social media, persuasive technologies); and communication network analysis.

Prerequisite(s): Consent of instructor. Graduate standing in Communication.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to Communication graduate students only.

Grade Mode: Letter.

CMN 202 – Communication Theory Construction (4 units)

Course Description: Alternative meta-theoretical perspectives for theory generation in communication inquiry. Processes of construct explication, operationalization and theory construction. Emphasis on the critique of extant communication theories and the development of theory construction skills.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

CMN 203 – Scientific Methods for Communication (4 units)

Course Description: Social scientific research methods commonly employed in Communication. Topics include research design measurement sampling questionnaire construction survey research experimental design evaluation research content analysis and qualitative field methods.

Prerequisite(s): CMN 201; CMN 202; PSC 204A; PSC 204B; or equivalents.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

CMN 204 – Biological Foundations of Communication (4 units)

Course Description: Communibiological, evolutionary, neuroscience, and neurophysiological perspectives on communication. Methodologies for examining human physiological responses to messages, such as heart rate, skin conductance, electromyography, and cortical activity.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

CMN 210 – Experimental Methods & Analysis in Communication (4 units)

Course Description: Experimental designs in communication. Topics include: causation; threats to validity; conceptualization, operationalization, and measurement; hypothesis testing; ethics; data analysis software focusing on the analysis of variance and planned contrasts; and the practical and effective implementation and writing of experiments.

Prerequisite(s): Consent of instructor. Graduate standing; one course in inferential statistics.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

CMN 211 – Survey Research Methods in Communication (4 units)

Course Description: Methods for designing personal interview, phone, mail, and web-based surveys in communication. Topics include: sampling strategies, sources of error and bias in survey designs, questionnaire construction, cognitive interviewing, interviewer behavior, and analysis of complex survey data using standard software packages.

Prerequisite(s): Consent of instructor. Graduate standing; one course in inferential statistics.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

CMN 212 – Web Science Research Methods (4 units)

Course Description: Applications of data science to web-based communication research. Design, implementation, analysis, and reporting of studies using online data. Use of Python to scrape, organize, analyze, and visualize web data.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

CMN 213 – Simulation Methods in Communication Research (4 units)

Course Description: Simulation methods for modeling human communication. Single and multiple agent approaches to developing process theories of cooperation, coordination, strategic behavior, information and innovation diffusion, and other aspects of sociality.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

CMN 214 – Analysis of Communication Networks (4 units)

Course Description: Theoretical and analytic issues pertaining to network perspectives on communicating and organizing. Consideration of structural and dynamic features of communication networks. Introduction to network analysis software and various analysis techniques.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

CMN 220 – Persuasion Theories & Message Design (4 units)

Course Description: Major social scientific theories and perspectives on attitude change and persuasion. Application of persuasion theories and principles to persuasive message design in applied contexts.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

CMN 221 – Communication & Cognition (4 units)

Course Description: Explores the cognitive structures and processes that enable the production, comprehension and interpretation of messages in face-to-face and mediated communication contexts. Explores the communication outcomes associated with these processes.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

CMN 222 – Risk Communication (4 units)

Course Description: Theories and models of individual risk information processing. Media depictions of threats and risk-related information and their potential effects on audiences. Implications for the design and implementation of messages concerning threat and risk.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

CMN 230 – Social Interaction Theory & Research (4 units)

Course Description: Survey of theories and research on social interaction and interpersonal communication. Covers communication codes, individual differences in communication, communication and relationship development, family communication, conflict, cognitive and emotional processes underlying social interaction, social influence, intercultural communication, and nonverbal behavior.

Prerequisite(s): Graduate standing; consent of instructor.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

CMN 231 – Tactics of Interpersonal Influence (4 units)

Course Description: Achievement of interpersonal goals in social interaction. Topics include message production; tactics, strategies and planning; anticipating potential obstacles; resisting and thwarting goals; plan recognition; and goal detection. Examined goals include compliance gaining, attitude change, ingratiation, information seeking, comforting, and deception.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

CMN 232 – Health Communication (4 units)

Course Description: Health communication theories and research traditions. Topics include consumer health information seeking; physician-patient interaction; information, social marketing, "edutainment" and media advocacy campaigns; social networks and coping; media influences on health; and new communication technologies in health promotion and healthcare delivery.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Cross Listing: SPH 232.

Grade Mode: Letter.

CMN 233 – Persuasive Technologies for Health (4 units)

Course Description: Theorizing, designing and evaluating ethical technology-based health communication interventions. Uses of social media, mobile communication apps, wearable devices, computer-generated tailored messages, educational games, and computational approaches in health promotion and healthcare delivery.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: SPH 233.

Grade Mode: Letter.

CMN 234 – Intercultural Communication (4 units)

Course Description: Theories and research on intercultural communication. Topics include national, racial, and ethnic similarities and differences in communication practices; cultural beliefs and values; identity and conflict; and technological influences on intercultural communication. Methodological issues in intercultural communication research are also examined.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate standing.

Grade Mode: Letter.

CMN 235 – Health Communication Campaigns (4 units)

Course Description: Principles of health communication campaign planning, implementation and evaluation. Strategies for changing health behaviors, shaping policy, and improving healthcare organizations' relations with stakeholders.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Cross Listing: SPH 235.

Grade Mode: Letter.

CMN 243 – Media & Health (4 units)

Course Description: Survey of research on media and health. Topics include health news coverage; depictions of health, illness and disability in entertainment; health campaigns; advertising of health products and services; and the influence of gaming and other new media on health behaviors.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate standing.

Grade Mode: Letter.

CMN 244 – Organizational Communication (4 units)

Course Description: Theory and research on communication processes in organizations.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

CMN 250 – Mediated Communication Theory & Research (4 units)

Course Description: Survey of major theories on the intended and unintended effects of mediated communication. Topics include media's effects on learning, political behavior, interpersonal violence, sexual socialization, consumer behavior, race relations, gender socialization, and cultural processes.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

CMN 251 – Digital Technology & Social Change (4 units)

Course Description: Conceptual, theoretical, and international consideration of how digital communication technologies transform social organization and development. Topics include social media, big data, political revolutions, e-democracy, digital divide, e-education, e-health, entrepreneurship, public policies, poverty reduction, technological innovations, microfinance, and entertainment.

Learning Activities: Seminar 3 hour(s), Term Paper.

Credit Limitation(s): Not open to students who have taken CMN 251Y.

Repeat Credit: May be repeated.

Grade Mode: Letter.

CMN 251Y – Digital Technology & Social Change (4 units)

Course Description: Discussion and research on how digital technologies transform our lives through social media, mobility, big data, global connectivity, and artificial intelligence; changing business, health, democracy, globalization, families, dating, and education.

Learning Activities: Web Virtual Lecture 2 hour(s), Discussion 2 hour(s).

Credit Limitation(s): Not open to students who have taken CMN 251.

Grade Mode: Letter.

CMN 252 – Computer-Mediated Communication (4 units)

Course Description: Effects of computer-mediated communication on the ways in which people express themselves, form impressions about strangers, develop and maintain relationships, collaborate on group work, and expand social network, especially in comparison to face-to-face communication.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

CMN 253 – Children, Adolescents, & the Media (4 units)

Course Description: Theory and research on the uses and effects of traditional and new media on children and adolescents, emphasizing social, emotional, cognitive, and physical development. Methodological approaches and ethical issues in studies of underage populations. Parent and family mediation of effects.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

CMN 254 – Communication Campaigns (4 units)

Course Description: Strategic uses of media and interpersonal channels to promote social change through social marketing, information, and media advocacy campaigns. Focus on theory-based interventions in a variety of applied contexts.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

CMN 255 – Social Media (4 units)

Course Description: Theoretical, conceptual and analytic issues pertaining to social media research. Topics include motivation, participation, virality, and social-technical capital. Examination of social media in various contexts. Introduction to online behavioral data collection and analysis methods.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

CMN 256 – Communication Perspective on Video Games (4 units)

Course Description: Review of theory and research on the uses and effects of video games and virtual environments developed for entertainment and education. Study of the research methods available for documenting and measuring game use and effects on behavior.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

CMN 259 – Cognitive Approaches to Media (4 units)

Course Description: Interdisciplinary examination of cognitive approaches to mediated communication. Application of studies on mediated message processing, cognitive and emotional information processing, psychophysiology, and neuroscience to mass communication. Review of media research and methods on attention, memory, motivation, and limited capacity.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate standing.

Grade Mode: Letter.

CMN 260 – Political Communication (4 units)

Course Description: Theories and research on the connections between media, politics, and citizens in the digital age. Critical framework for understanding the nature of mediated politics by assessing inter-relationships between production of news, political elites' campaign strategies, and behaviors of citizens.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

CMN 270 – Diffusion of Innovations (4 units)

Course Description: Communication processes by which information and innovations spread through social systems. Models of diffusion, including spatial, network, time dependent, semantic and cognitive frameworks. Impact of communication technologies on diffusion.

Practical application of diffusion models in a variety of contexts.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

CMN 275Y – Computational Social Science (4 units)

Course Description: Survey of modern computational research methods. Big data, social network analysis, machine learning, Agent-based computer simulations. Online lectures are taught by faculty from all 10 UC campuses. Local face-to-face discussion section.

Learning Activities: Web Virtual Lecture 1.50 hour(s), Discussion 2 hour(s), Term Paper.

Credit Limitation(s): Only 2 units of credit to students who have taken CMN 150V.

Grade Mode: Letter.

CMN 280 – Special Topics in Social Interaction (4 units)

Course Description: Reading, discussion, research, and writing on a selected topic in the specialty of social interaction.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

CMN 281 – Special Topics in Mediated Communication (4 units)

Course Description: Reading, discussion, research, and writing on a selected topic in the specialty of mediated communication.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

CMN 282 – Special Topics in Health Communication (4 units)

Course Description: Reading, discussion, research and writing on a focused topic in health communication.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

CMN 283 – Special Topics in Organizational Communication (4 units)

Course Description: Reading, discussion, research, and writing on a selected topic in the specialty of organizational communication.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when topics differ.

Grade Mode: Letter.

CMN 284 – Special Topics in Political Communication (4 units)

Course Description: Reading, discussion, research, and writing on a selected topic in the specialty of political communication.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated 4 time(s) when topic differs.

Grade Mode: Letter.

CMN 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CMN 299 – Individual Study (1-12 units)

Course Description: Individual study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

CMN 299R – Thesis/Dissertation Research & Writing (1-12 units)

Course Description: Students in the Department of Communication graduate programs conduct dissertation research and writing under the supervision of a faculty member.

Prerequisite(s): Consent of instructor. Graduate standing in Communication.

Learning Activities: Independent Study 3-36 hour(s).

Repeat Credit: May be repeated 21 time(s) as across campus, students use 299 courses to reach the 12-unit requirement for full time student status; in saying students may repeat 21 times, we assume students complete their doctoral programs within seven years (five is the norm); the value 21 is based on the calculation 3 quarters x 7 years.

Grade Mode: Satisfactory/Unsatisfactory only.

CMN 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Community & Regional Development (CRD)

College of Agricultural & Environmental Sciences

CRD 001 – The Community (4 units)

Course Description: Basic concepts of community analysis and planned social change. The dynamics of community change through case studies of communities including peasant, urban ghetto, suburban mainline, and California farm workers.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

CRD 020 – Food Systems (4 units)

Course Description: Social aspects of agri-food systems. Social science perspectives applied to food and agricultural sustainability in relation to ecology, knowledge, technology, power, governance, labor, social difference, and social movements. Social and environmental effects of commodity chains in comparative global context.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

CRD 092 – Internship (1-12 units)

Course Description: Supervised internship, off and on campus, in community and institutional settings.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

CRD 098 – Directed Group Study for Undergraduates (1-5 units)

Course Description: Directed group study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Grade Mode: Pass/No Pass only.

CRD 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CRD 118 – Technology & Society (4 units)

Course Description: Impact of technology on labor relations, employment, industrial development and international relations. Internal relations of technology development and deployment.

Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Extensive Writing, Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

CRD 140 – Dynamics of Regional Development (4 units)

Course Description: Industrial cluster formation and institutions.

Technology, labor relations and interfirm linkages in global value chains. California and other regions are used as case studies.

Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002.

Learning Activities: Lecture 4 hour(s), Extensive Writing, Term Paper, Project.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CRD 141 – Organization of Economic Space (4 units)

Course Description: Globalization and technological restructuring of economic activity focusing on new spatial patterns of production and circulation and their implications for workers, communities and societies, both in the U.S. and around the globe.

Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

CRD 142 – Rural Change in the Industrialized World (4 units)

Course Description: Geography of rural environment with emphasis on rural restructuring. Demographics, community, economy, governance, agriculture, and environmental conservation in rural areas of industrialized world. Case studies from and comparisons drawn between North America, Europe, Australia, New Zealand, and Japan.

Prerequisite(s): SOC 001 or CRD 001 or CRD 002 or ANT 002.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Extensive Writing, Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CRD 147 – Community Youth Development (4 units)

Course Description: Community influences on youth well-being, youth as agents of community change, and policies to support healthy communities for young people. Special emphasis on disparities in youth well-being related to race, class, immigration status, gender, sexual-orientation.

Learning Activities: Lecture/Discussion 4 hour(s), Project, Extensive Writing/Discussion, Term Paper hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

CRD 149 – Community Development Perspectives on Environmental Justice (4 units)

Course Description: Environmental justice social movements; inequitable distribution of pollution on low-income communities of color; histories, policies, and innovations associated environmental justice movements in the United States and around the world.

Learning Activities: Lecture/Discussion 4 hour(s), Extensive Writing/Discussion, Project, Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

CRD 150 – Quantitative Methods in Community Research (5 units)

Course Description: Introduction to statistical analysis of social data relevant to community research, planning and assessment, emphasizing data sources and acquisition, descriptive and inferential analysis techniques, and data interpretation and presentation. Emphasis on spatial data and methods, focusing on the sources, processing, analysis, and presentation of spatial data in a community assessment context.

Prerequisite(s): SOC 046B or STA 013 or STA 013Y or STA 032; consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Scientific Literacy (SL).

CRD 151 – Community Field Research: Theory & Analysis (5 units)

Course Description: Design and analysis of community research considering the relationship between theory and practice. Community research methods, including elite interviewing, ethnographic approaches, and statistical methods, descriptive statistics and OLS regression. Requires design and completion of field research project.

Prerequisite(s): CRD 001; (STA 013 or STA 013Y or SOC 046B); any upper division Community Regional Development (CRD) course recommended.

Learning Activities: Lecture 4 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL); Writing Experience (WE).

CRD 152 – Community Development (4 units)

Course Description: Principles and strategies of community organizing and development. Social change from the grassroots organizing perspective to the formalized public participation process involved in general plan revisions. Practical experience in conducting charrettes, visioning and community needs assessments.

Prerequisite(s): CRD 001 or CRD 151 or SOC 002 or ANT 002 or ASA 100 or CHI 132 or AAS 101.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

CRD 153A – International Community Development: Asia (4 units)

Course Description: Examination and analysis of community development efforts in a range of Asian countries and the impact of global forces in different settings. Includes classroom lectures, workshops, field trips, and collaborative action research projects. Taught abroad.

Prerequisite(s): Consent of instructor. 2.000 GPA; good academic standing.

Learning Activities: Project 3 hour(s), Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): For summer and quarter abroad versions, limited to 30 students; for the Seminar Abroad version, limited to 15 students; this allows for the small group learning methodology as well as the active collaboration with in-country university students; available for undergraduate and graduate students; applications through UC Davis Study Aboard accepted on a first-come, first-reserved basis for qualified applicants.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

CRD 153B – International Community Development: Europe (4 units)

Course Description: Examination and analysis of community development efforts in Europe and the impact of global forces in different settings. Alternative strategies with emphasis on self-reliance and locally controlled development. Based in Freiburg, Germany, including field trips to France and Switzerland; taught abroad.

Prerequisite(s): ANT 002 or IAD 010 or CRD 001 or CRD 002 or SOC 001 or SOC 002 or POL 001 or POL 001Y.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

CRD 153C – International Community Development: Africa (4 units)

Course Description: Examination and analysis of community development efforts in Africa and the impact of global forces in urban and rural settings. Focus on strategies that promote self-reliance and locally controlled development. Based in South Africa; includes field trips.

Prerequisite(s): CRD 001 or CRD 002 or ANT 002 or IAD 010 or SOC 001 or SOC 002 or POL 001 or POL 001Y.

Learning Activities: Lecture 2 hour(s), Fieldwork 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

CRD 154 – Social Theory & Community Change (4 units)

Course Description: Comparative overview of the dominant social science paradigms for the study of community development and change. Among the paradigms discussed are functionalism, conflict theory/Marxism, structuralism, community capitals, social exchange, post-positivism, feminist theories and social constructivism.

Prerequisite(s): CRD 001 or SOC 001 or ANT 002; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

CRD 156 – Community Economic Development (5 units)

Course Description: How government and community organizations help firms grow and create jobs through local economic development corporations, small business centers, revolving loan funds, incubators, and other programs. Techniques to analyze community economic potential and identification of appropriate intervention tools. Group project.

Prerequisite(s): CRD 152 or PLS 021 or PLS 021V or ECS 015; and consent of instructor.

Learning Activities: Lecture 4 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

CRD 157 – Politics & Community Development (4 units)

Course Description: Analyzes political, economic and sociocultural forces shaping the form and function of local communities in the U.S. Considers theories of the state, the community and social change and case studies of actual community development in comparative historical perspective.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

CRD 158 – Community Governance (4 units)

Course Description: Governing institutions and political processes at the local level. Local government organization, community autonomy, leadership, political change, policy development, and select policy issues including public finance. Topics change depending on student interest. Field research on coalition building or policy issues in select communities.

Prerequisite(s): CRD 001 or SOC 001 or POL 001 or POL 001Y.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

CRD 162 – People, Work & Technology (5 units)

Course Description: Analysis of the relationship between work, technology, and the human experience. Theories of the causes and consequences of labor process, changes under capitalism and globalization, impacts of race/ethnicity, class, gender, and citizenship status on work in the United States and globally; responses of workers, communities, and policy-makers to workplace changes.

Prerequisite(s): CRD 001 or SOC 001 or ANT 001 or ANT 001Y; upper division standing recommended.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

CRD 164 – Theories of Organizations & Their Role in Community Change (5 units)

Course Description: Planned change within and through community organizations. Private voluntary organizations, local community associations, and local government. Relationship between community organizations and social capital. Collaborative original data gathering and professional report writing.

Prerequisite(s): (STA 013 or STA 013Y or SOC 046B); (CRD 001 or CRD 002 or SOC 001 or ANT 002).

Learning Activities: Lecture 4 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

CRD 171 – Housing & Social Policy (4 units)

Course Description: Social impact, economics, and politics of housing in the United States. Special attention given to federal, state, and local policy and program strategies to produce and preserve affordable housing and inclusive neighborhoods.

Learning Activities: Lecture 4 hour(s), Term Paper.

Grade Mode: Letter.

CRD 172 – Social Inequality: Issues & Innovations (4 units)

Course Description: Focus on the dimensions, causes, and means of alleviating social inequality in the U.S. Examination and analysis of major theories and forms (class, race/ethnicity, gender, and citizenship status) of inequality. Policy-based and grassroots approaches to change.

Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002; upper division standing recommended.

Learning Activities: Lecture/Discussion 4 hour(s), Extensive Writing, Term Paper, Project.

Grade Mode: Letter.

CRD 176 – Comparative Ethnicity (4 units)

Course Description: Role of ethnicity in shaping social systems and interaction. Analytical approaches to and issues arising from the study of ethnicity, through utilization of data from a range of different societies.

Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002; upper division standing recommended.

Learning Activities: Lecture 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

CRD 180 – Transnational Community Development (4 units)

Course Description: The effects of grassroots, non-state, non-corporate actors from abroad on local, national and international development. Socioeconomic, political, and cultural implications of transnational actions undertaken by international non-governmental organizations, individual migrants, and migrant grassroots civic organizations.

Prerequisite(s): CRD 001 or ANT 002 or SOC 001.

Learning Activities: Lecture/Discussion 4 hour(s), Extensive Writing, Project, Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

CRD 192 – Internship (1-12 units)

Course Description: Supervised internship, off and on campus, in community and institutional settings.

Prerequisite(s): Consent of instructor. Completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

CRD 194HA – Special Study for Honors Students (4 units)

Course Description: Community & Regional Development Honors is a program of direct reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of a faculty advisor.

Prerequisite(s): Consent of instructor. Completion of 135 units at the time of enrollment; GPA 3.500 in the major; GPA 3.300 in overall standing; completion of at least four upper division courses; agreement of a faculty member to serve as thesis advisor.

Learning Activities: Independent Study 3 hour(s), Seminar 1 hour(s), Project, Term Paper.

Grade Mode: Letter.

CRD 194HB – Special Study for Honors Student (4 units)

Course Description: Community & Regional Development Honors is a program of direct reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of a faculty advisor.

Prerequisite(s): Consent of instructor. Completion of 135 units at the time of enrollment; GPA 3.500 in the major; GPA 3.300 in overall standing; completion of at least four upper division courses; agreement of a faculty member to serve as thesis advisor.

Learning Activities: Independent Study 3 hour(s), Seminar 1 hour(s), Project, Term Paper.

Grade Mode: Letter.

CRD 197T – Tutoring in Community & Regional Development (1-5 units)

Course Description: Assisting instructor in one of the Community & Regional Development's regular courses by tutoring individual students or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary activities.

Prerequisite(s): Consent of instructor. Upper division standing; completion of course to be tutored.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated 10 unit(s).

Grade Mode: Pass/No Pass only.

CRD 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CRD 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CRD 200 – Planning for Health (4 units)

Course Description: Focused on the intersection of city planning and public health. The health of an individual or community is determined not only by the health care they receive, but also by the natural, social, physical, economic, and political environment. Covers topics such as food access, air quality, water quality, waste and energy infrastructure, community engagement, and the planning process. Provides an overview of available public spatially explicit data.

Learning Activities: Lecture/Discussion 2 hour(s), Extensive Writing, Project 1 hour(s).

Grade Mode: Letter.

CRD 230 – Spatial Methods in Community Research (4 units)

Course Description: Spatial analysis of social data relevant to community research, with focus on neighborhoods as units of analysis. Clustering, segregation, geodemographic modelling, spatial regression, multilevel models, spatial data management, accessibility.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

CRD 240 – Community Development Theory (4 units)

Course Description: Introduction to theories of community development and different concepts of community, poverty, and development.

Emphasis on building theory, linking applied development techniques to theory, evaluating development policy, and examining case studies of community development organizations and projects.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: GEO 240.

Grade Mode: Letter.

CRD 241 – The Economics of Community Development (4 units)

Course Description: Economic theories and methods of planning for communities. Human resources, community services and infrastructure, industrialization and technological change, and regional growth. The community's role in the greater economy.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 4 hour(s).

Cross Listing: GEO 241.

Grade Mode: Letter.

CRD 242 – Community Development Organizations (4 units)

Course Description: Theory and praxis of organizations with social change agendas at the community level. Emphasis on non-profit organizations and philanthropic foundations.

Prerequisite(s): CRD 240; and consent of instructor.

Learning Activities: Seminar 4 hour(s).

Enrollment Restriction(s): Limited to 15 students.

Grade Mode: Letter.

CRD 242S – Community Development Organizations (International) (4 units)

Course Description: Theory and praxis of organizations with social change agendas at the community level. Emphasis on local governance, non-profit organizations and philanthropic foundations at an international level. May be taught abroad.

Prerequisite(s): CRD 240.

Learning Activities: Fieldwork 10 hour(s), Lecture 5 hour(s), Workshop 5 hour(s).

Enrollment Restriction(s): Limited to 10 students.

Grade Mode: Letter.

CRD 243 – Critical Environmental Justice Studies (4 units)

Course Description: Application of social science theories of race, ethnicity, class, gender, and power to understand the production and contestation of environmental inequities.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

CRD 244 – Political Ecology of Community Development (4 units)

Course Description: Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamic relationship between communities and land-based resources, and between social groups. Cases of community conservation and development in developing and industrialized countries.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 4 hour(s).

Cross Listing: GEO 254.

Grade Mode: Letter.

CRD 245 – The Political Economy of Urban & Regional Development (4 units)

Course Description: How global, political and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California.

Prerequisite(s): CRD 157; CRD 244; or equivalent.

Learning Activities: Lecture 4 hour(s).

Cross Listing: GEO 245.

Grade Mode: Letter.

CRD 246 – The Political Economy of Transnational Migration (4 units)

Course Description: Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 4 hour(s).

Cross Listing: GEO 246.

Grade Mode: Letter.

CRD 247 – Transformation of Work (4 units)

Course Description: Exploration of the ways that the experience, organization, and systems of work are being reconfigured in the late-20th century. The impacts of economic restructuring on local communities and workers.

Prerequisite(s): Graduate standing in history or social science degree program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

CRD 248 – Social Policy, Welfare Theories & Communities (4 units)

Course Description: Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects. Analysis of specific social issues within the U.S./California context.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 4 hour(s).

Credit Limitation(s): Not open for credit to students having completed CRD 248A and CRD 248B.

Cross Listing: GEO 248.

Grade Mode: Letter.

CRD 248A – Social Policy, Welfare Theories & Communities I (2 units)

Course Description: Theories and comparative histories of modern welfare states. Theories of welfare & social policy in relation to normative, organizational, and administrative aspects of welfare & social policy.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

CRD 248B – Social Policy, Welfare Theories & Communities II (2 units)

Course Description: Analysis of a specific set of social issues within the U.S./California context. Issues may include poverty, hunger, housing, health, family, disability, economic opportunity, affirmative action orientations, gender, old age, or special social groups.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Concurrent enrollment in CRD 248A.

Grade Mode: Letter.

CRD 249 – Media Innovation & Community Development (4 units)

Course Description: Role of innovative media in communities and social change. Studies historical, practical and theoretical issues involving media in community organizing, social justice movements, democracy initiatives, and economic justice.

Learning Activities: Seminar 4 hour(s).

Enrollment Restriction(s): Open to graduate students.

Grade Mode: Letter.

CRD 250 – Professional Skills for Community Development (4 units)

Course Description: Help develop the practical skills needed to work professionally in organizations that are involved in community development. Provides an overview of community development planning, project management, and consultation skills.

Prerequisite(s): CRD 240.

Learning Activities: Lecture/Discussion 2 hour(s), Project 2 hour(s), Fieldwork, Extensive Writing/Discussion.

Enrollment Restriction(s): Priority enrollment for Masters & Ph.D. students in Community & Regional Development.

Grade Mode: Letter.

CRD 251 – Critical Social Science of the Environment (4 units)

Course Description: Relationships between forces of society and the environment through careful examination of the interactions between politics, economics, and global dynamics. Schools of thought concerning society, gender, environmental dynamics, and political economic arrangements across local and global spheres.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

CRD 260 – Thesis Seminar (2 units)

Course Description: Workshop to help finalize thesis proposals and complete thesis.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

CRD 290 – Community Development Seminar (1 unit)

Course Description: Speaker series on key topics in community development.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students in the CDGG masters program; open to other programs by consent of the instructor.

Repeat Credit: May be repeated as CDGG MS students must take four quarters to satisfy the MS degree requirements; may take course as many times as student chooses.

Grade Mode: Satisfactory/Unsatisfactory only.

CRD 292 – Graduate Internship (1-12 units)

Course Description: Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated and student may register in more than one internship section per term.

Grade Mode: Satisfactory/Unsatisfactory only.

CRD 293 – Community Development Graduate Proseminar (1 unit)

Course Description: Introduction to graduate training in Community Development. Seminar designed to introduce students entering graduate work in the Community Development Graduate Group to its ongoing activities.

Prerequisite(s): Enrollment in Community Development graduate group.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to first year Community Development graduate students only.

Grade Mode: Satisfactory/Unsatisfactory only.

CRD 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Letter.

CRD 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Comparative Literature (COM)

College of Letters & Science

COM 001 – Major Works of the Ancient World (4 units)

Course Description: Introduction, through class discussion and frequent written assignments, to some of the major works of the ancient world (up to 5th century CE) such as The Odyssey, the Bible, Augustine's Confessions, and works by Plato and Confucius. Examined genres include religious texts, the epic, philosophy, drama, poetry.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 002 – Major Works of the Medieval & Early Modern World (4 units)

Course Description: Introduction, through class discussion and frequent written assignments, to some of the major works of the medieval and early modern worlds (6th century to the mid-17th century) such as Dante's Comedy, 1001 Nights, The Tale of Genji, and Elizabethan/Jacobean plays. Examined genres include framed narratives, courtly literature, and early modern drama.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 003 – Major Works of the Modern World (4 units)

Course Description: Introduction, through class discussion and frequent written assignments, to some of the major works of the modern world (mid-17th to the mid-20th centuries) such as those by Dostoevsky, Tolstoy, Flaubert, Woolf, Lu Xun, Borges and Yeats. Examined genres include realist fiction, modernist fiction, and modernist poetry.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 004 – Major Works of the Contemporary World (4 units)

Course Description: Comparative study of selected major Western and non-Western texts composed in the period from 1945 to the present. Intensive focus on writing about these texts, with frequent papers written about these works.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 4 hour(s).

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010B – Master Authors in World Literature:

Metamorphoses, Decameron, Arabian Nights, Canterbury Tales (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Metamorphoses, Decameron, Arabian Nights, Canterbury Tales.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010C – Master Authors in World Literature:

Chanson de Roland, El Cid, Igor's Campaign, Morte D'Arthur (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Chanson de Roland, El Cid, Igor's Campaign, Morte D'Arthur.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010D – Master Authors in World Literature: Sakuntala, Tristan & Isolde, Aucassin & Nicolette, Gawain (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Sakuntala, Tristan and Isolde, Aucassin and Nicolette, Gawain and the Green Knight.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010E – Master Authors in World Literature: Swift, Rabelais, La Celestina, Simplicissimus (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Swift, Rabelais, La Celestina, Simplicissimus.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010F – Master Authors in World Literature: Cervantes, Saikaku, Fielding, Voltaire (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Cervantes, Saikaku, Fielding, Voltaire.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010G – Master Authors in World Literature: Machiavelli, Shakespeare, Calderón, Racine, Schiller (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Machiavelli, Shakespeare, Lope de Vega/Calderón, Molière/Racine, Lessing/Schiller.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010H – Master Authors in World Literature: Goethe, Byron, Stendhal, Pushkin, Lermontov (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Goethe, Byron, Stendhal, Pushkin, Lermontov.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010I – Master Authors in World Literature: Hoffmann, Gogol, Poe, Hawthorne, Maupassant, Chekhov, Melville (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Hoffmann, Gogol, Poe, Hawthorne, Maupassant, Chekhov, Melville.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010J – Master Authors in World Literature: Flaubert, Twain, Turgenev, Galdós, Ibsen (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Flaubert, Twain, Turgenev, Galdós, Ibsen.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010K – Master Authors in World Literature: Balzac, Dostoevski/Tolstoi, Hardy, Shaw, Strindberg (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Balzac, Dostoevski/Tolstoi, Hardy, Shaw, Strindberg.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010L – Master Authors in World Literature: Unamuno, Svevo, Conrad, Gide, Kafka, Faulkner (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Unamuno, Svevo, Conrad, Gide, Kafka, Faulkner.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010M – Master Authors in World Literature: Yeats, Woolf, Céline, Tanizaki, Brecht, Pirandello (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Rilke/Yeats, Joyce/Woolf, Mann/Céline, Bulgakov/Tanizaki, O'Neill/Brecht, Lorca/Pirandello.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 010N – Master Authors in World Literature: Camus, Márquez, Borges, Bellow, Beckett, Genet (2 units)

Course Description: Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Camus/Sartre, García Márquez/Grass, Borges/Sarraute, Bellow/Nabokov, Beckett/Pinter, Genet/Dürrenmatt.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

COM 011 – Travel & the Modern World (4 units)

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 164C – Baroque & Neoclassicism (4 units)

Course Description: Readings in major authors such as Calderón, Corneille, Pascal, Racine, Milton, and Grimmelshausen, with consideration of the tension between the expansive energies of the "baroque" and the restraints of dogma and reason.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 164D – The Enlightenment (4 units)

Course Description: Enlightenment writers such as Swift, Voltaire, Sterne, Rousseau, Wollstonecraft, and Kant. Emphasis on the revolutionary impact of 18th-century philosophical ideas and literary forms on modern political, social, and aesthetic culture.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 165 – Caribbean Literatures (4 units)

Course Description: Comparative approach to the multi-lingual, multi-cultural literatures of the Caribbean. Works from English, French, and Spanish speaking regions with special attention to problems of identity, diaspora and resistance, class, gender, race.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open to students who have completed COM 165S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 165S – Caribbean Literatures (4 units)

Course Description: Comparative approach to the multi-lingual, multi-cultural literatures of the Caribbean. Works from English, French, and Spanish speaking regions with special attention to problems of identity, diaspora and resistance, class, gender, race. May be taught abroad at the University of Havana, Cuba.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to upper division standing in the student's discipline of origin.

Credit Limitation(s): Not open to students who have completed COM 165.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 166 – Literatures of the Modern Middle East (4 units)

Course Description: Major translated works in modern Middle Eastern and North African Literature, including Arabic, Hebrew, Persian, and Turkish. Social and historical formation, with topics such as conflict and coexistence, journeys, and displaced people, gender and family.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 166A – The Epic (4 units)

Course Description: Study of various forms of epic poetry in both the oral and literary traditions.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated in different subject area.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 166B – The Novel (4 units)

Course Description: The novel as global genre: picaresque, epistolary, Bildungsroman, historical novel, contemporary forms.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 167 – Comparative Study of Major Authors (4 units)

Course Description: Pivotal works of artists in the Western mainstream, such as Dante, Shakespeare, Cervantes, Goethe, Tolstoi, Proust, and Joyce.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 168A – Romanticism (4 units)

Course Description: Introduction to the Romantic movement with emphasis upon Romantic concepts of the self, irony, love, the imagination and artistic creativity, and the relationship of the individual to nature and society.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 168B – Realism & Naturalism (4 units)

Course Description: Novels and plays by Dickens, Zola, Flaubert, Dreiser, Ibsen, and Strindberg investigate marriage & adultery, the city & its perils, the hardships of industrialization, the war between the sexes, the New Woman, and other 19th-century themes.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 169 – The Avant-Garde (4 units)

Course Description: Studies in movements such as surrealism, expressionism and the absurd.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

COM 170 – The Contemporary Novel (4 units)

Course Description: Study of important novels from different parts of the world, including Asia, Africa, Latin America, Europe, and the United States, in the period from the Second World War to the present.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 171 – Partition Literature: South Asia (4 units)

Course Description: An exploration of novels, short stories, plays, and films in translation and in English, produced about the Partition of India in 1947.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 172 – A Story for a Life: The Arabian Nights (4 units)

Course Description: In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: ARB 140, MSA 121C.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 173 – Sakuntala: The Story of a Ring (4 units)

Course Description: A comparative examination of the Indian story of Sakuntala in multiple genres, languages, and media from the c. 400 BCE to the contemporary century.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

COM 175 – Shahnameh: The Persian Book of Kings (4 units)

Course Description: In-depth analysis of the Persian Book of Kings (Shahnameh) by Abu al-Qasim Ferdowsi (d. 1020 CE) in its historical context with a comparative perspective on the role of this work in Persian and world literature.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: MSA 121A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 180 – Selected Topics in Comparative Literature (4 units)

Course Description: Study of a selected topic or topics appropriate to student and faculty interests and areas of specialization of the instructor.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR); at least one course in literature.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 180S – Selected Topics in Comparative Literature (Taught Abroad) (4 units)

Course Description: Study of selected topics appropriate to student and faculty interests and areas of specialization of the instructor. May be taught abroad.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR); at least one course in literature or consent of instructor.

Learning Activities: Lecture/Discussion 6 hour(s), Extensive Writing, Fieldwork 6 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

COM 192 – Internship in Comparative Literature (1-12 units)

Course Description: Internships in fields where students can practice their skills.

Prerequisite(s): Consent of instructor. Completion of 84 units.

Learning Activities: Internship 1-12 hour(s).

Enrollment Restriction(s): Restricted to Comparative Literature majors.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

COM 194H – Special Study for Honors Students (1-5 units)

Course Description: Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a comparative topic.

Prerequisite(s): Consent of instructor. Open only to majors of senior standing who qualify for Honors Program.

Learning Activities: Independent Study 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); Writing Experience (WE).

COM 195 – Senior Seminar in Comparative Literature (4 units)

Course Description: Advanced study of selected topics and texts in Comparative Literature, with explicit emphasis on the theoretical and interpretive approaches that define Comparative Literature as a discipline and distinguish it from other literary disciplines. Required for the major.

Prerequisite(s): Senior standing as a Comparative Literature major or minor or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open only to Comparative Literature majors or minors in or consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

COM 197T – Tutoring in Comparative Literature (1-5 units)

Course Description: Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with current courses offered by Comparative Literature.

Prerequisite(s): Consent of instructor. Upper division standing with declared major in Comparative Literature.

Learning Activities: Discussion 2-4 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

COM 198 – Directed Group Study for Advanced Undergraduates (1-5 units)

Course Description: Directed group study. May be taught abroad.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

COM 198F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for upper division students.

Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y; consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Passed/No Passed Only.

COM 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

COM 199FA – Student Facilitated Course Development (1-4 units)

Course Description: Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 098F/198F.

Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y; consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Passed/Not Passed only.

COM 199FB – Student Facilitated Teaching (1-4 units)

Course Description: STU FAC. Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F.

Prerequisite(s): COM 199FA; (UWP 001 or UWP 001V or UWP 001Y); consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Passed/Not Passed only.

COM 210 – Topics & Themes in Comparative Literature (4 units)

Course Description: Comparative, interpretive study of the treatment of specific topics and themes in literary works from various periods, societies, and cultures, in light of these works' historical and sociocultural contexts.

Prerequisite(s): Graduate standing in Comparative Literature, English, or a foreign-language literature, or consent of instructor.

Learning Activities: Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

COM 214 – Approaches to Lyric Poetry (4 units)

Course Description: Analysis and interpretation of poetic texts in different historical periods and national literatures, with consideration of major theoretical developments in the understanding of poetic discourse.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

COM 215 – Forms of the Spiritual Quest (4 units)

Course Description: An exploration, culminating in a research paper, of changing forms of the quest for transcendence in different cultures, mainly in major works of Western literature, but also in other traditions and from the perspectives of other disciplines.

Prerequisite(s): Graduate standing or consent of instructor; knowledge of at least one foreign language.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

COM 220 – Literary Genres (4 units)

Course Description: Comparative literature of major works in a particular genre from various linguistic, national, and cultural traditions, with particular attention to historical developments within the genre and to genre theory.

Prerequisite(s): Graduate standing in Comparative Literature, English, or a foreign-language literature or consent of instructor.

Learning Activities: Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

COM 238 – Gender & Interpretation (4 units)

Course Description: Study of how literary texts from different periods, societies, and cultures represent gender roles and gender hierarchy, building on recent work on gender in anthropology, literature, psychology, and women's studies.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

COM 250A – Research in Primary Literature (4 units)

Course Description: Individually guided research in the primary literature of concentration, under the supervision of a faculty member culminating in a conference paper. Required of M.A. and Ph.D. candidates.

Learning Activities: Project.

Grade Mode: Letter.

COM 250B – Research in Second Literature (4 units)

Course Description: Individually guided research in the secondary literature of concentration, under the supervision of a faculty member, culminating in a paper. Required of Ph.D. candidates.

Learning Activities: Project.

Grade Mode: Letter.

COM 250C – Research in Third Literature or Special Topic (4 units)

Course Description: Individually guided research, under the supervision of a faculty member, in the third literature of concentration or on a special topic culminating in a paper. Required of Ph.D. candidates.

Learning Activities: Conference 1 hour(s), Term Paper, Independent Study 8 hour(s).

Grade Mode: Letter.

COM 250D – Dissertation Prospectus (4 units)

Course Description: Individually guided writing of the dissertation prospectus under supervision of a faculty member. Must be taken prior to completion of the qualifying exam. Required of Ph.D. candidates.

Learning Activities: Independent Study.

Grade Mode: Satisfactory/Unsatisfactory only.

COM 255 – Proseminar: Comparative Literature: Past, Present, Future (4 units)

Course Description: History, theory, and methodology of comparative literature. Issues of national literature, world literature, and comparative literature. Relation of comparative literature to other disciplines and diverse expressions. Discussion of current problems in teaching and research in comparative literature. Required of M.A. and Ph.D. candidates.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated.

Grade Mode: Letter.

COM 260 – Contexts of the 19th-Century Novel (4 units)

Course Description: Development in 19th-century history, culture, and society in relation to major trends in the 19th-century novel.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

COM 297 – Directed Independent Study in Primary, Secondary, or Third Literature (4 units)

Course Description: Directed Independent Study in Primary, Secondary, or Third Literature culminating in term paper. Only for languages with no graduate course offerings.

Prerequisite(s): Consent of instructor.

Learning Activities: Conference 1 hour(s), Term Paper, Independent Study 8 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated when no seminars are available and topic differs.

Grade Mode: Letter.

COM 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

COM 299 – Individual Study (1-12 units)

Course Description: Individual study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

COM 299D – Special Study for the Doctoral Dissertation (1-12 units)

Course Description: Special study for the doctoral dissertation.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

COM 390 – Teaching Comparative Literature in College (4 units)

Course Description: Discussion of the theory and practice of teaching composition at the college level in a department of comparative literature in relation to the major cultural and social developments and with specific application to the introductory COM 001, COM 002, COM 003, COM 004.

Prerequisite(s): Appointment as a Comparative Literature Associate Instructor or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Satisfactory/Unsatisfactory only.

COM 392 – Teaching Internship in Comparative Literature (2 units)

Course Description: Regular consultations between the student instructor teaching Comparative Literature courses and a supervisor. Specifically designed for first-time TAs in COM 005, COM 006, COM 007, and COM 010. Instruction in the teaching of writing in a literature course, grading of papers, leading discussions.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

COM 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Computer Science Engineering (ECS)

College of Engineering

ECS 012 – Introduction to Media Computation (4 units)

Course Description: Introduction to key computational ideas necessary to understand and produce digital media. Fundamentals of programming are covered as well as analysis of how media are represented and transmitted in digital form. Aimed primarily at non-computer science students.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Credit Limitation(s): Only 2 units of credit for students that have taken ECS 010 or ECS 030 or ENG 006.

Cross Listing: CTS 012.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Visual Literacy (VL).

ECS 017 – Data, Logic, & Computing (4 units)

Course Description: Display, processing, and representation of information and data on a computer. Understanding and analyzing the digital representations of numbers, images, and sounds. Basic computer operations and their logic. Introduction to discrete mathematics in computer science, including propositional logic, proofs by induction, recursions, and counting. Introduction to algorithms. Uses of computers and their influence on society.

Prerequisite(s): MAT 016A (can be concurrent) or MAT 017A (can be concurrent) or MAT 019A { can be concurrent } or MAT 021A (can be concurrent).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed course ECS 020 or MAT108.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECS 020 – Discrete Mathematics For Computer Science (4 units)

Course Description: Discrete mathematics of particular utility to computer science. Proofs by induction. Propositional and first-order logic. Sets, functions, and relations. Big-O and related notations. Recursion and solutions of recurrence relations. Combinatorics. Probability on finite probability spaces. Graph theory.

Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 019A C- or better or MAT 021A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECS 032A – Introduction to Programming (4 units)

Course Description: Introduction to programming and problem solving in Python. Aimed primarily at non-major students.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to undergraduate students only.

Credit Limitation(s): No credit to students who have completed ECS 030, ECS 032B, ECS 032C, ECS 036A, ECS 036B, ECS 036C, ECS 040 or ECS 060.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 032B – Introduction to Data Structures (4 units)

Course Description: Design and analysis of data structures using Python; trees, heaps, searching, sorting, and graphs.

Prerequisite(s): ECS 010 C- or better or ECS 030 C- or better or ECS 032A C- or better or ECS 036A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): No credit to students who have completed ECS 036B, ECS 036C, ECS 040 or ECS 060.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 032C – Implementation of Data Structures in C (4 units)

Course Description: Programming in the C language. Use of basic UNIX tools. Writing good programs of increased complexity and efficiency. Implementation of data structures in C.

Prerequisite(s): ECS 032B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): No credit to students who have completed ECS 036B, ECS 036C, ECS 040 or ECS 060.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 034 – Software Development in UNIX & C++ (4 units)

Course Description: UNIX Operating system tools and programming environment. Methods for debugging and verification. Principles object-oriented programming in C++.

Prerequisite(s): ECS 032C C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): No credit to students who have completed ECS 036B, ECS 036C, ECS 040 or ECS 060.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 036A – Programming & Problem Solving (4 units)

Course Description: Computers and computer programming for students with some prior experience, algorithm design, and debugging. Good programming style. Use of basic UNIX tools.

Prerequisite(s): ECS 032A C- or better or ECS 010 C- or better; or must satisfy computer science placement exam; prior experience with basic programming concepts (variable, loops, conditional statements) required.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Science, Computer Science & Engineering, and Computer Engineering majors only; Pass Two restricted to Computer Science, Computer Science & Engineering, Computer Engineering, Cognitive Science, Applied Physics, Statistics, and Psychology majors only.

Credit Limitation(s): Only 2 units of credit to students who have completed ECS 032A; no credit to students who have completed ECS 032B, ECS 032C, ECS 034, ECS 040 or ECS 060.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 036B – Software Development & Object-Oriented Programming in C++ (4 units)

Course Description: Object-oriented programming in C++. Basic data structures and their use. Writing good programs of increased complexity and efficiency. Methods for debugging and verification.

Prerequisite(s): ECS 030 C- or better or ECS 036A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Science, Computer Science & Engineering, Computer Engineering majors only; Pass Two restricted to Computer Science, Computer Science & Engineering, Computer Engineering, Cognitive Science, and Applied Physics majors only.

Credit Limitation(s): No credit to students who have completed ECS 032B, ECS 032C, ECS 034, ECS 040 or ECS 060.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 036C – Data Structures, Algorithms, & Programming (4 units)

Course Description: Design and analysis of data structures for a variety of applications; trees, heaps, searching, sorting, hashing, and graphs. Extensive programming.

Prerequisite(s): (ECS 040 C- or better or ECS 036B C- or better); ECS 020 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science, Computer Science & Engineering, and Computer Engineering majors only. Pass Two open to Computer Science, Computer Science & Engineering, Computer Engineering, Cognitive Science, and Applied Physics majors only.

Credit Limitation(s): No credit to students who have completed ECS 032B, ECS 032C, ECS 034, ECS 040 or ECS 060.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 050 – Computer Organization & Machine-Dependent Programming (4 units)

This version has ended; see updated course, below.

Course Description: Comparative study of different hardware architectures via programming in the assembly languages of various machines. Role of system software in producing an abstract machine. Introduction to I/O devices and programming.

Prerequisite(s): ECS 040 C- or better or ECS 034 C- or better or ECS 036B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Science and Computer Science & Engineering majors only.

Credit Limitation(s): 1 unit of credit if taken EEC 070.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 050 – Computer Organization & Machine-Dependent Programming (4 units)

Course Description: Comparative study of different hardware architectures via programming in the assembly languages of various machines. Role of system software in producing an abstract machine. Introduction to I/O devices and programming.

Prerequisite(s): ECS 040 C- or better or ECS 036B C- or better or ECS 032C C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Science and Computer Science & Engineering majors only.

Credit Limitation(s): 1 unit of credit if student has taken EEC 070.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

This course version is effective from, and including: Fall Quarter 2024.

ECS 089A – Special Topics in Computer Science: Computer Science Theory (1-5 units)

Course Description: Special topics in Computer Science Theory.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089B – Special Topics in Computer Science: Architecture (1-5 units)

Course Description: Special topics in Architecture.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089C – Special Topics in Computer Science: Programming Languages & Compilers (1-5 units)

Course Description: Special topics in Programming Languages & Compilers.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089D – Special Topics in Computer Science: Operating Systems (1-5 units)

Course Description: Special topics in Operating Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089E – Special Topics in Computer Science: Software Engineering (1-5 units)

Course Description: Special topics in Software Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089F – Special Topics in Computer Science: Databases (1-5 units)

Course Description: Special topics in Databases.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089G – Special Topics in Computer Science: Artificial Intelligence (1-5 units)

Course Description: Special topics in Artificial Intelligence.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089H – Special Topics in Computer Science: Computer Graphics (1-5 units)

Course Description: Special topics in Computer Graphics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089I – Special Topics in Computer Science: Networks (1-5 units)

Course Description: Special topics in Networks.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089J – Special Topics in Computer Science: Computer-Aided Design (1-5 units)

Course Description: Special topics in Computer-Aided Design.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089K – Special Topics in Computer Science: Scientific Computing (1-5 units)

Course Description: Special topics in Scientific Computing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 089L – Special Topics in Computer Science: Computer Science (1-5 units)

Course Description: Special topics in Computer Science.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 092 – Internship in Computer Science (1-5 units)

Course Description: Supervised work experience in computer science.

Prerequisite(s): Lower division standing; project approval prior to period of internship.

Learning Activities: Internship.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ECS 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ECS 098F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ECS 099 – Special Study for Lower Division Students (1-5 units)

Course Description: Special study for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ECS 111 – Applied Machine Learning for Non-Majors (4 units)

This version has ended; see updated course, below.

Course Description: Machine learning methods and their application.

Theory, design and evaluation of supervised/unsupervised machine learning algorithms. Practical use of matching learning methods and their challenges.

Prerequisite(s): (ECS 032B or ECS 036C); (MAT 135A or STA 035C).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Data Science majors; Pass Two restricted to undergraduates.

Credit Limitation(s): No credit if student has taken ECS 171; not intended for Computer Science and Computer Science Engineering Majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 111 – Applied Machine Learning for Non-Majors (4 units)

Course Description: Machine learning methods and their application.

Theory, design and evaluation of supervised/unsupervised machine learning algorithms. Practical use of matching learning methods and their challenges.

Prerequisite(s): (ECS 032B or ECS 036C); (MAT 135A or STA 035C); (MAT 022A or MAT 027A or MAT 067).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restrictions: Pass One restricted to Data Science majors; Pass Two restricted to undergraduates.

Credit Limitation(s): No credit if student has taken ECS 171; not intended for Computer Science and Computer Science Engineering Majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

This course version is effective from, and including: Fall Quarter 2024.

ECS 113 – Computer Security for Non-Majors (4 units)

Course Description: Principles, mechanisms, implementation, and sound practices of computer security and data protection. Cryptography, authentication and access control. Internet security. Malicious software. Common vulnerabilities. Practical security in everyday life. Not intended for Computer Science or Computer Science & Engineering majors.

Prerequisite(s): ECS 010 or ECS 030 or ECS 032A or ECS 036A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): No credit allowed to students who have completed ECS 153 or ECS 155.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 115 – Computer Networks for Non-Majors (4 units)

This version has ended; see updated course, below.

Course Description: Overview of computer networks, World Wide Web, email, local & wide-area computer networks, TCP/IP protocol suite, network protocols for data transmission, introduction to network programming.

Prerequisite(s): ECS 032B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Not intended for Computer Science or Computer Science & Engineering majors.

Credit Limitation(s): No credit for students who have completed any of ECS 152A, ECS 152B, ECS 152C, EEC 173A, or EEC 173B.

Grade Mode: Letter.

General Education: Science & Engineering

ECS 115 – Computer Networks for Non-Majors (4 units)

Course Description: Overview of computer networks, World Wide Web, email, local & wide-area computer networks, TCP/IP protocol suite, network protocols for data transmission, introduction to network programming.

Prerequisite(s): ECS 032B or ECS 036C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restrictions: Not intended for Computer Science or Computer Science & Engineering majors.

Credit Limitation(s): No credit for students who have completed any of ECS 152A, ECS 152B, ECS 152C, EEC 173A, or EEC 173B.

Grade Mode: Letter.

General Education: Science & Engineering

This course version is effective from, and including: Fall Quarter 2024.

ECS 116 – Databases for Non-Majors (4 units)

This version has ended; see updated course, below.

Course Description: Overview of Database Systems, Conceptual Modeling and Design, E/R diagrams, Relational Model, Relational Algebra, SQL, File and Index Structures, Query Evaluation, Transaction Concepts, Concurrency and Recovery, and NoSQL Databases.

Prerequisite(s): ECS 032B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Not intended for Computer Science or Computer Science & Engineering majors.

Credit Limitation(s): Not open for credit for students who have completed ECS 165A or ECS 165B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 116 – Databases for Non-Majors (4 units)

Course Description: Overview of Database Systems, Conceptual Modeling and Design, E/R diagrams, Relational Model, Relational Algebra, SQL, File and Index Structures, Query Evaluation, Transaction Concepts, Concurrency and Recovery, and NoSQL Databases.

Prerequisite(s): ECS 032B or ECS 036C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restrictions: Not intended for Computer Science or Computer Science & Engineering majors.

Credit Limitation(s): Not open for credit for students who have completed ECS 165A or ECS 165B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

This course version is effective from, and including: Fall Quarter 2024.

ECS 117 – Algorithms for Data Science (4 units)

Course Description: Algorithms for searching, pattern matching, combinatorial problems, clustering, and time series analysis with practical emphasis.

Prerequisite(s): ECS 017 or ECS 020; ECS 032B or ECS 036C.

Learning Activities: Lecture 3 hour(s); Discussion 1 hour(s).

Credit Limitation(s): No credit if ECS 122A has been taken.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 119 – Data Processing Pipelines (4 units)

Course Description: Introduction to software systems for processing large datasets. Hands-on experience with scripting, data streams, distributed computing, and software development and deployment infrastructure.

Prerequisite(s): ECS 116 or ECS 165A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Data Science majors; Pass Two restricted to undergraduate students.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 120 – Theory of Computation (4 units)

Course Description: Fundamental ideas in the theory of computation, including formal languages, computability and complexity. Reducibility among computational problems.

Prerequisite(s): (ECS 020 or MAT 108); (ECS 32B or ECS 36C recommended).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Science and Computer Science Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECS 122A – Algorithm Design & Analysis (4 units)

Course Description: Complexity of algorithms, bounds on complexity, analysis methods. Searching, sorting, pattern matching, graph algorithms. Algorithm design techniques: divide-conquer, greedy, dynamic programming. Approximation methods. NP-complete problems.

Prerequisite(s): ECS 020; (ECS 060 or ECS 032B or ECS 036C).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 122B – Algorithm Design & Analysis (4 units)

Course Description: Theory and practice of hard problems, and problems with complex algorithm solutions. NP-completeness, approximation algorithms, randomized algorithms, dynamic programming and branch and bound. Theoretical analysis, implementation and practical evaluations. Examples from parallel, string, graph, and geometric algorithms.

Prerequisite(s): ECS 122A; (ECS 060 or ECS 034 or ECS 036C).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECS 124 – Theory & Practice of Bioinformatics (4 units)

Course Description: Fundamental biological, mathematical and algorithmic models underlying bioinformatics and systems biology; sequence analysis, database search, genome annotation, clustering and classification, functional gene networks, regulatory network inference, phylogenetic trees, applications of common bioinformatics tools in molecular biology and genetics.

Prerequisite(s): (ECS 032A or ECS 036A or ENG 006); (STA 032 or STA 035B or STA 100 or STA 131A or ECS 132 or MAT 135A or EEC 161 or BIM 105); (BIS 002A or MCB 010).

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 127 – Cryptography (4 units)

Course Description: Introduction to the theory and practice of cryptographic techniques used in computer security. Encryption (secret-key and public-key), message authentication, digital signatures, entity authentication, key distribution, and other cryptographic protocols. The social context of cryptography.

Prerequisite(s): (ECS 020 or MAT 108); (ECS 010 or ECS 032A or ECS 030 or ECS 036A).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ECS 129 – Computational Structural Bioinformatics (4 units)

Course Description: Fundamental biological, chemical and algorithmic models underlying computational structural biology; protein structure and nucleic acids structure; comparison of protein structures; protein structure prediction; molecular simulations; databases and online services in computational structural biology.

Prerequisite(s): (BIS 002A or MCB 010); (ECS 010 or ECS 032A or ECS 036A).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 130 – Scientific Computation (4 units)

Course Description: Matrix-vector approach using MATLAB for floating-point arithmetic, error analysis, data interpolation, least squares data fitting, quadrature, zeros, optimization and matrix eigenvalues and singular values. Parallel computing for matrix operations and essential matrix factorizations.

Prerequisite(s): (ECS 030 or ENG 006 or ECS 032A or ECS 010 or ECS 036A); (MAT 022A or MAT 027A or MAT 067).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 132 – Probability & Statistical Modeling for Computer Science (4 units)

Course Description: Univariate and multivariate distributions. Estimation and model building. Markov/Hidden Markov models. Applications to data mining, networks, security, software engineering and bioinformatics.

Prerequisite(s): (ECS 040 or ECS 034 or ECS 036B); ECS 020; MAT 021C; (MAT 022A or MAT 027A or MAT 067).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ECS 140A – Programming Languages (4 units)

This version has ended; see updated course, below.

Course Description: Syntactic definition of programming languages. Introduction to programming language features including variables, data types, data abstraction, object-orientedness, scoping, parameter disciplines, exception handling. Non-imperative programming languages. Comparative study of several high-level programming languages.

Prerequisite(s): ECS 050; ECS 020; (ECS 034 or 036C); ECS 150 is recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Science and Computer Science Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 140A – Programming Languages (4 units)

Course Description: Syntactic definition of programming languages. Introduction to programming language features including variables, data types, data abstraction, object-orientedness, scoping, parameter disciplines, exception handling. Non-imperative programming languages. Comparative study of several high-level programming languages.

Prerequisite(s): ECS 050; ECS 020; (ECS 034 or 036C); ECS 150 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Computer Science and Computer Science Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

This course version is effective from, and including: Fall Quarter 2024.

ECS 140B – Programming Languages (4 units)

Course Description: Continuation of programming language principles. Further study of programming language paradigms such as functional and logic; additional programming language paradigms such as concurrent (parallel); key implementation issues for those paradigms; and programming language semantics.

Prerequisite(s): ECS 140A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 142 – Compilers (4 units)

Course Description: Principles and techniques of lexical analysis, parsing, semantic analysis, code generation, and code optimization. Implementation of compilers.

Prerequisite(s): ECS 140A; ECS 120; ECS 122A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 145 – Scripting Languages & Their Applications (4 units)

Course Description: Goals and philosophy of scripting languages, with Python and R as prime examples. Applications include networking, data analysis and display, and graphical user interfaces (GUIs).

Prerequisite(s): ECS 034 or ECS 036C or ECS 060; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 150 – Operating Systems & System Programming (4 units)

Course Description: Basic concepts of operating systems and system programming. Processes and interprocess communication/synchronization; virtual memory, program loading and linking; file and I/O subsystems; utility programs. Study of a real operating system.

Prerequisite(s): (ECS 034 or ECS 036C or ECS 060); (ECS 154A or EEC 170).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science Engineering and Computer Engineering majors only; Pass Two open to Computer Science majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 152A – Computer Networks (4 units)

This version has ended; see updated course, below.

Course Description: Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis.

Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Credit Limitation(s): Only 2 units of credit for students who have taken ECS 157.

Cross Listing: EEC 173A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 152A – Computer Networks (4 units)

Course Description: Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis.

Prerequisite(s): (ECS 032B or ECS 036C); (ECS 132 or EEC 161 or MAT 135A or STA 032 or STA 035B or STA 100 or STA 131A).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Credit Limitation(s): Only 2 units of credit for students who have taken ECS 157.

Cross Listing: EEC 173A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

This course version is effective from, and including: Fall Quarter 2024.

ECS 152B – Computer Networks (4 units)

Course Description: TCP/IP protocol suite, computer networking applications, client-server and peer-to-peer architectures, application-layer protocols, transport-layer protocols, transport-layer interfaces, sockets, network programming, remote procedure calls, and network management.

Prerequisite(s): ECS 150; (ECS 152A or EEC 173A).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 152C – Advanced Topics in Computer Networks (4 units)

Course Description: Advanced topics in computer networks, wireless networks, multimedia networking, traffic analysis and modeling, network design and management, network simulation and performance analysis, and design projects in communication networks.

Prerequisite(s): EEC 173A or ECS 152A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: EEC 173B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 153 – Computer Security (4 units)

Course Description: Principles, mechanisms, and implementation of computer security and data protection. Policy, encryption and authentication, access control, and integrity models and mechanisms; network security; secure systems; programming and vulnerabilities analysis. Study of an existing operating system.

Prerequisite(s): ECS 150; (ECS 152A or EEC 173A).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Credit Limitation(s): Not open for credit to students who have completed ECS 155.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 154A – Computer Architecture (4 units)

Course Description: Introduction to digital design. Interfacing of devices for I/O, memory and memory management. Input/output programming, via wait loops, hardware interrupts and calls to operating system services. Hardware support for operating systems software.

Prerequisite(s): ECS 050 or EEC 070.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One and Pass Two open to Computer Science and Computer Science Engineering majors only.

Credit Limitation(s): Only 1 unit of credit allowed for students who have taken EEC 170.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 154B – Computer Architecture (4 units)

Course Description: Hardwired and microprogrammed CPU design. Memory hierarchies. Uniprocessor performance analysis under varying program mixes. Introduction to pipelining and multiprocessors.

Prerequisite(s): ECS 154A or EEC 170 or EEC 180A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Credit Limitation(s): Not open for credit to students who have taken ECS 201A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 158 – Programming on Parallel Architectures (4 units)

Course Description: Techniques for software development using the shared-memory and message-passing paradigms, on parallel architectures and networks of workstations. Locks, barriers, and other techniques for synchronization. Introduction to parallel algorithms.

Prerequisite(s): ECS 150; ECS 154B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 160 – Software Engineering (4 units)

Course Description: Requirements, specification, design, implementation, testing, and verification of large software systems. Study and use of software engineering methodologies.

Prerequisite(s): ECS 140A; extensive programming experience recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 161 – Modern Programming Tools (4 units)

Course Description: Concepts and practice of collaborative software development using modern software tools.

Prerequisite(s): (ECS 040 or ECS 032B or ECS 036B).

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 162 – Web Programming (4 units)

Course Description: Technical aspects of building websites, including both server-side and client-side software development.

Prerequisite(s): ECS 030 or ECS 034 or ECS 036B; or equivalent programming experience in C and the Unix environment.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ECS 163 – Information Interfaces (4 units)

Course Description: Art and science of information visualization and interfaces for information systems. Design principles of human-computer interaction. Visual display and navigation of nonspatial and higher dimensional data. Implementations, performance issues, tradeoffs, and evaluation of interactive information systems.

Prerequisite(s): ECS 060 or ECS 032B or ECS 036C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ECS 164 – Human-Computer Interaction (4 units)

Course Description: Introduction to concepts and practice of modern human-computer interaction design.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to computer science and computer science & engineering students only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 165A – Database Systems (4 units)

Course Description: Database modeling and design (E/R model, relational model), relational algebra, query languages (SQL), file and index structures, query processing, transaction management.

Prerequisite(s): ECS 060 or ECS 032B or ECS 036C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 165B – Database Systems (4 units)

Course Description: Data modeling (object-relational, graph-based, spatiotemporal models). Querying semistructured data (XML). Database theory (normalization, integration, provenance). Database programming (stored procedures, embedded SQL, web programming). Advanced topics (data warehousing, parallel data processing).

Prerequisite(s): ECS 165A; (ECS 060 or ECS 034 or ECS 036C).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 170 – Introduction to Artificial Intelligence (4 units)

Course Description: Design and implementation of intelligent computer systems. Knowledge representation and organization. Memory and inference. Problem solving. Natural language processing.

Prerequisite(s): ECS 060 or ECS 032B or ECS 036C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science & Engineering Majors only; Pass Two open to undergraduate students only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 171 – Machine Learning (4 units)

Course Description: Introduction to machine learning. Supervised & unsupervised learning, including classification, dimensionality reduction, regression & clustering using modern machine learning methods. Applications of machine learning to other fields.

Prerequisite(s): (ECS 032B or ECS 036C); (STA 032 or STA 035B or STA 100 or STA 131A or MAT 135A or EEC 161 or ECS 132); (MAT 022A or MAT 027A or MAT 067).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science & Engineering Majors only; Pass Two open to undergraduate students only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 172 – Recommender Systems (4 units)

Course Description: Collaborative filtering and content-based methods for building recommender systems. Statistical, matrix factorization, textual analysis, and nearest-neighbor approaches. Case studies.

Prerequisite(s): (ECS 032B or ECS 036B or ECS 040); (ECS 132 or STA 130A or STA 131A or ECN 140); (MAT 022A or MAT 027A or MAT 067).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Science and Computer Science & Engineering students only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 173 – Image Processing & Analysis (4 units)

Course Description: Techniques for automated extraction of high-level information from images generated by cameras, three-dimensional surface sensors, and medical devices. Typical applications include detection of objects in various types of images and describing populations of biological specimens appearing in medical imagery.

Prerequisite(s): (MAT 067 C- or better or MAT 027A C- or better or MAT 022A C- or better); (ECS 060 or ECS 032B or ECS 036C).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 174 – Computer Vision (4 units)

Course Description: Computer vision is the study of enabling machines to "see" the visual world; e.g., understand images and videos. Explores several fundamental topics in the area, including feature detection, grouping and segmentation, and recognition.

Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); recommended (STA 032 or STA 131A or MAT 135A or EEC 161 or ECS 132); (MAT 022A or MAT 27A or MAT 067).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science and Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 175 – Computer Graphics (4 units)

Course Description: Principles of computer graphics, with a focus on interactive systems. Current graphics hardware, elementary operations in two-and three-dimensional space, geometric transformations, camera models and interaction, graphics system design, standard graphics APIs, individual projects.

Prerequisite(s): (ECS 060 or ECS 034 or ECS 036C); (MAT 022A or MAT 027A or MAT 067).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 177 – Scientific Visualization (4 units)

Course Description: Computer graphics techniques for generating images of various types of measured or computer-simulated data. Typical applications for these graphics techniques include study of air flows around car bodies, medical data, and molecular structures.

Prerequisite(s): ECS 175.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ECS 178 – Geometric Modeling (4 units)

Course Description: Interactive graphics techniques for defining and manipulating geometrical shapes used in computer animation, car body design, aircraft design, and architectural design.

Prerequisite(s): ECS 175.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ECS 179 – Gameplay Programming (4 units)

Course Description: Developing gameplay systems in the context of game design and software engineering. Aspects of technical game development that depend on the genre or details of a specific game design, thus making them difficult to abstract and engineer into game engines.

Prerequisite(s): ECS 032B or ECS 036C; extensive programming experience recommended.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Science and Computer Science & Engineering majors; Pass Two restricted to undergraduates.

Grade Mode: Letter.

ECS 188 – Ethics in an Age of Technology (4 units)

Course Description: Foundations of ethics. Views of technology. Technology and human values. Costs and benefits of technology. Character of technological change. Social context of work in computer science and engineering.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science Engineering Majors only; Pass Two open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS); Scientific Literacy (SL); Writing Experience (WE).

ECS 189A – Special Topics in Computer Science: Computer Science Theory (1-5 units)

Course Description: Special topic in Computer Science Theory.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189B – Special Topics in Computer Science: Architecture (1-5 units)

Course Description: Special topic in Architecture.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189C – Special Topics in Computer Science: Programming Languages & Compilers (1-5 units)

Course Description: Special topic in Programming Languages & Compilers.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189D – Special Topics in Computer Science: Operating Systems (1-5 units)

Course Description: Special topic in Operating Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189E – Special Topics in Computer Science: Software Engineering (1-5 units)

Course Description: Special topic in software engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189F – Special Topics in Computer Science: Databases (1-5 units)

Course Description: Special topic Databases.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189G – Special Topics in Computer Science: Artificial Intelligence (1-5 units)

Course Description: Special topic in Artificial Intelligence.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to undergraduate students only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189H – Special Topics in Computer Science: Computer Graphics (1-5 units)

Course Description: Special topic in Computer Graphics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189I – Special Topics in Computer Science: Networks (1-5 units)

Course Description: Special topic in Networks.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189J – Special Topics in Computer Science: Computer-Aided Design (1-5 units)

Course Description: Special topic in Computer-Aided Design.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189K – Special Topics in Computer Science: Scientific Computing (1-5 units)

Course Description: Special topic in Scientific Computing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189L – Special Topics in Computer Science: Computer Science (1-5 units)

Course Description: Special topic in Computer Science.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 189M – Special Topics in Computer Security: Computer Security (1-5 units)

Course Description: Special topics in Computer Security.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 189N – Special Topics in Bioinformatics & Computational Biology (1-5 units)

Course Description: Special topics in Bioinformatics & Computational Biology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 190C – Research Group Conferences in Computer Science (1 unit)

Course Description: Research group conferences.

Prerequisite(s): Consent of instructor. Upper division standing in Computer Science or Computer Science and Engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ECS 190X – Senior Seminar (2 units)

Course Description: Examination of a special topic in a small group setting.

Prerequisite(s): Senior standing.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

ECS 191 – Software Design Project (4 units)

Course Description: Student teams plan, implement, and evaluate large-scale projects involving computer and computational systems. Project proposed and supervised by a faculty member.

Prerequisite(s): ECS 160.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science and Computer Science Engineering Majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 192 – Internship in Computer Science (1-5 units)

Course Description: Supervised work experience in computer science.

Prerequisite(s): Completion of a minimum of 84 units; project approval prior to period of internship.

Learning Activities: Internship.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ECS 193A – Capstone Project (3 units)

Course Description: Responding to real-life client design challenges, student teams plan, implement, and evaluate large-scale projects involving computer and computational systems. Project supervised by a faculty member. Must take ECS 193A & ECS 193B to receive credit.

Prerequisite(s): ECS 160 (can be concurrent); ECS 150; upper division standing in Computer Science or Computer Science Engineering; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Science Engineering majors; Pass Two restricted to Computer Science and Computer Science majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 193B – Capstone Project (3 units)

Course Description: Responding to real-life client design challenges, student teams plan, implement, and evaluate large-scale projects involving computer and computational systems. Project supervised by a faculty member. Must take ECS 193A & ECS 193B to receive credit.

Prerequisite(s): ECS 193A IP or better.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Science Engineering majors; Pass Two restricted to Computer Science and Computer Science majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ECS 197T – Tutoring in Computer Science (1-3 units)

Course Description: Tutoring in computer science courses, especially introductory courses.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s), Discussion/Laboratory 3-6 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Pass/No Pass only.

ECS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ECS 198F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for upper division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ECS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ECS 199FA – Student Facilitated Course Development (1-4 units)

Course Description: Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 098F/198F.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ECS 199FB – Student Facilitated Teaching (1-4 units)

Course Description: STU FAC. Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F.

Prerequisite(s): ECS 199FA; consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ECS 201A – Advanced Computer Architecture (4 units)

Course Description: Modern research topics and methods in computer architecture. Design implications of memory latency and bandwidth limitations. Performance enhancement via within-processor and between-processor parallelism.

Prerequisite(s): ECS 154A or EEC 170.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Ph.D. students in Computer Science only and Pass Two open to graduate students in Computer Science only.

Credit Limitation(s): One unit of credit if student has previously taken ECS 154B after Fall 2019.

Grade Mode: Letter.

ECS 201B – High-Performance Uniprocessing (4 units)

Course Description: Maximizing uniprocessor performance. Barriers to high performance; solutions to the problems; historical and current processor designs.

Prerequisite(s): ECS 201A.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Credit Limitation(s): Not open for credit to students who have completed ECS 250B.

Grade Mode: Letter.

ECS 201C – Parallel Architectures (4 units)

Course Description: Evolution of parallel architectures from special-purpose machines to commodity servers. Emphasis on recent machines and applications that drive them.

Prerequisite(s): ECS 201A.

Learning Activities: Lecture 3 hour(s), Project.

Enrollment Restriction(s): Pass One open to Ph.D. students in Computer Science only and Pass Two open to graduate students in Computer Science only.

Credit Limitation(s): Not open for credit to students who have completed ECS 250C.

Grade Mode: Letter.

ECS 203 – Novel Computing Technologies (4 units)

Course Description: Novel computing technologies that could revolutionize computer architecture. Quantum computing technologies, including algorithms, devices, and fault tolerance. A survey of other unconventional technologies including nanoscale electronics, MEMS devices, biological devices, and nanotechnology.

Prerequisite(s): ECS 201A.

Learning Activities: Lecture 3 hour(s), Project 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 220 – Theory of Computation (4 units)

Course Description: Time and space complexity classes. Reductions, completeness, and the role of randomness. Logic and undecidability.

Prerequisite(s): ECS 120; ECS 122A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Ph.D. students in Computer Science only and Pass Two open to graduate students in Computer Science only.

Grade Mode: Letter.

ECS 221 – Computational Methods in Systems & Synthetic Biology (4 units)

Course Description: Computational methods related to systems and synthetic biology. An overview of machine learning techniques related to the analysis of biological data, biological networks. Predictive modeling and simulation of biological systems. Topics on biological circuit construction.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 222A – Design & Analysis of Algorithms (4 units)

Course Description: Techniques for designing efficient algorithms, analyzing their complexity and applying these algorithms to a broad range of applications. Methods for recognizing and dealing with difficult problems.

Prerequisite(s): ECS 122A; STA 031A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to PhD students in Computer Science only and Pass Two open to graduate students in Computer Science only.

Grade Mode: Letter.

ECS 222B – Advanced Design & Analysis of Algorithms (4 units)

Course Description: Advanced topics in complexity theory. Problem classification. The classes P, NP, P-space, co-NP. Matching and network flow algorithms. Matrix multiplication. Approximation algorithms.

Prerequisite(s): ECS 222A.

Learning Activities: Lecture 3 hour(s), Project 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 223 – Parallel Algorithms (4 units)

Course Description: Models of parallel computer systems including PRAMs, loosely coupled systems and interconnection networks. Parallel algorithms for classical problems and general techniques for their design and analysis. Proving lower bounds on parallel computation in several settings.

Prerequisite(s): ECS 222A.

Learning Activities: Discussion/Laboratory 3 hour(s), Project 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 224 – String Algorithms & Applications in Computational Biology (4 units)

Course Description: Algorithms that operate on strings. Pattern matching, sets of patterns, regular expression pattern matching, suffix trees and applications, inexact similarity, parametric sequence alignment, applications to DNA sequencing and protein database searching.

Prerequisite(s): ECS 122A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 225 – Graph Theory (4 units)

Course Description: Fundamental concepts. Planar graphs: Kuratowski's theorem. Packings and coverings. Menger's theorem, representation of cuts, Hamilton graphs, rigid graphs, chordal graphs, graph coloring, graph isomorphism, applications and some algorithms.

Prerequisite(s): graduate standing in electrical engineering or computer science or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 226 – Computational Geometry (4 units)

Course Description: Mathematics of unstructured data. Algorithms for data structures such as Voronoi diagrams, oct-trees, and arrangements. Applications in computer graphics, concentrating on problems in three-dimensions.

Prerequisite(s): ECS 175; ECS 222A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 227 – Modern Cryptography (4 units)

Course Description: Modern cryptography as a discipline emphasizing formal definitions and proofs of security. One-way functions, pseudo-randomness, encryption, digital signatures, zero-knowledge, secure protocols.

Prerequisite(s): ECS 220 or ECS 222A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 228 – Cryptography for E-Commerce (4 units)

Course Description: Cryptographic primitives and protocols of importance to e-commerce, present and future, including content distribution mechanisms, payment mechanisms, pricing mechanisms, anonymity and privacy mechanisms, fair exchange mechanisms.

Prerequisite(s): ECS 222A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 229 – Advanced Computational Structural Bioinformatics (4 units)

Course Description: Algorithmic problems in structural biology; protein structure classification; protein structure prediction (including comparative modeling and ab initio protein structure prediction); molecular simulations (molecular dynamics and Monte Carlo simulations).

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 230 – Applied Numerical Linear Algebra (4 units)

Course Description: Numerical linear algebra (NLA) with emphasis on applications in engineered systems; matrix factorizations; perturbation and rounding error analyses of fundamental NLA algorithms.

Prerequisite(s): ECS 130 or EAD 209 or MAT 167.

Learning Activities: Discussion/Laboratory 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Ph.D. students in Computer Science only and Pass Two open to graduate students in Computer Science only.

Grade Mode: Letter.

ECS 231 – Large-Scale Scientific Computation (4 units)

Course Description: Algorithms and techniques for large-scale scientific computation, including basics for high performance computing, iterative methods, discrete approximation, fast Fourier transform, Poisson solvers, particle methods, spectral graph partition and its applications.

Prerequisite(s): ECS 130.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 232 – Theory of Molecular Computation (4 units)

Course Description: Theory of chemical reaction networks, molecular circuits, DNA self-assembly, DNA sequence design and thermodynamic energy models, and connections to the field of distributed computing.

Prerequisite(s): ECS 120 or ECS 220 recommended; probability course recommended, for example ECS 132 or MAT 135A or STA 012 or STA 131A or MAT 131A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Enrollment Restriction(s): Pass One restricted to graduate students in Computer Science; Pass Two restricted to graduate students.

Grade Mode: Letter.

ECS 234 – Computational Functional Genomics (4 units)

Course Description: Bioinformatics methods for analysis and inference of functional relationships among genes using large-scale genomic data, including methods for integration of gene expression, promoter sequence, TF-DNA binding and other data, and approaches in modeling of biological networks.

Prerequisite(s): ECS 124; graduate standing in Computer Science or Life Sciences.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 235A – Computer & Information Security (4 units)

Course Description: Modern topics in computer security, including: protection, access control, operating systems security, network security, applied cryptography, cryptographic protocols, secure programming practices, safe languages, mobile code, malware, privacy and anonymity, and case studies from real-world systems.

Prerequisite(s): ECS 150; ECS 152A recommended.

Learning Activities: Lecture 3 hour(s), Project.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Credit Limitation(s): Not open for credit to students who have taken ECS 235.

Grade Mode: Letter.

ECS 235B – Foundations of Computer & Information Security (4 units)

Course Description: Theoretical foundations of methods used to protect data in computer and communication systems. Access control matrix and undecidability of security; policies; Bell-LaPadula, Biba, Chinese Wall models; non-interference and non-deducibility; information flow and the confinement problem.

Prerequisite(s): ECS 235A; ECS 120 and ECS 150 recommended.

Learning Activities: Lecture 3 hour(s), Project.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Credit Limitation(s): Not open for credit to students who have taken ECS 235.

Grade Mode: Letter.

ECS 236 – Computer Security: Intrusion Detection Based Approach (4 units)

Course Description: Concepts of intrusion detection, anomaly detection based on machine learning, signature-based detection using pattern matching, automated response to attacks using artificial intelligence planning, tracing intruders based on principal component analysis, security policy languages.

Prerequisite(s): ECS 150; ECS 153 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 240 – Programming Languages (4 units)

Course Description: Advanced topics in programming languages, including formal syntax and semantics, the relation between formal semantics and verification, an introduction to the lambda calculus. Additional topics will include language design principles, alternative programming languages, in-depth semantic theory and models of language implementation.

Prerequisite(s): ECS 140A; ECS 142.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Ph.D. students in Computer Science only and Pass Two open to graduate students in Computer Science only.

Grade Mode: Letter.

ECS 242 – Translation of Programming Languages (4 units)

Course Description: Lexical analysis, parsing, storage management, symbol table design, semantic analysis and code generation. LR, LALR grammars. Compilercompilers.

Prerequisite(s): ECS 240.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 243 – Code Generation & Optimization (4 units)

Course Description: Compiler optimizations for performance, code size and power reduction. Topics include control- and data-flow analysis, redundancy elimination, loop and cache optimizations, register allocation, local and global instruction scheduling, and modulo scheduling.

Prerequisite(s): ECS 201A or EEC 270.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 244 – Principles of Concurrent Programming (4 units)

Course Description: Fundamental concepts and applications of concurrent programs; concurrent program verification and derivation; synchronization mechanisms in programming languages; distributed programming techniques; case studies of languages.

Prerequisite(s): ECS 020; ECS 150.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 245 – Analysis of Software Artifacts (4 units)

Course Description: Techniques for the analysis of software artifacts, including source code, build processes, test suites, bug reports and documentation with a special emphasis on software correctness and performance in real-world settings.

Prerequisite(s): ECS 140A; ECS 142.

Learning Activities: Lecture 3 hour(s), Project.

Enrollment Restriction(s): Pass One restricted to PhD students in Computer Science; Pass Two restricted to Graduate Students in Computer Science.

Grade Mode: Letter.

ECS 247 – Concurrent Programming Languages (4 units)

Course Description: Language design parameters. Models of parallel machines. Load balancing. Scalability. Portability. Efficiency measures. Design and implementation techniques for several classes of concurrent programming languages (such as object-oriented, functional, logic, and constraint programming languages).

Prerequisite(s): ECS 140A; ECS 150.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 251 – Operating Systems (4 units)

Course Description: Models, design, implementation, performance evaluation in operating systems. Algorithms, internal architectures for single processor OS and distributed systems. Concurrency control, recovery, security. OS kernel-level programming. Special topics embedded systems, real-time system, device driver, NPU (Network Processor Unit).

Prerequisite(s): ECS 150.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 252 – Computer Networks (4 units)

Course Description: Internet protocol based computer networks applications, transport, network layer protocols. High speed LAN technologies: Ethernet, Asynchronous Transfer Mode (ATM). Delay models in data networks: analysis of multiaccess techniques in polling, ring, random access networks. Multimedia applications requirements and design.

Prerequisite(s): ECS 152B.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 253 – Network Theory & Applications (4 units)

Course Description: Develops the mathematical theory underlying growth, structure and function of networks with applications to physical, social, biological and engineered systems. Topics include network growth, resilience, epidemiology, phase transitions, software and algorithms, routing and search control, cascading failures.

Prerequisite(s): MAT 022A; MAT 022B; (STA 013 or STA 013Y or STA 120); experience with computer software, or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: MAE 253.

Grade Mode: Letter.

ECS 255 – Resource Management in Wireless Communication Networks (4 units)

Course Description: Advanced research issues in wireless communication networks, including multi-user diversity and cross-layer optimization, basic network information theory, MIMO systems and the impact on networks, and dynamics spectrum management.

Prerequisite(s): ECS 252A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 256 – Probability Models for Computer Science (4 units)

Course Description: Probabilistic and statistical models useful in computer/data science. Applications to networks, bioinformatics, database management, machine learning, software engineering and image processing.

Prerequisite(s): A calculus-based course in probability, such as ECS132, STA 131A, or EEC 161; programming skills and familiarity with matrix algebra.

Learning Activities: Lecture 3 hour(s), Project, Extensive Problem Solving.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Credit Limitation(s): Not open for credit to students who have completed ECS 256A.

Grade Mode: Letter.

ECS 257 – Mobile & Wireless Networks (4 units)

Course Description: Fundamental techniques in design of second generation wireless networks: cellular network and protocols, medium access techniques, handoff control, signaling and mobility management, wireless data works, Internet mobility and Personal Communication Services (PCS). Third generation wideband systems, novel technologies, adhoc networks.

Prerequisite(s): ECS 252.

Learning Activities: Lecture 3 hour(s), Independent Study 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 259 – Optical Networks (4 units)

Course Description: Optical networks. Enabling technologies. Multiplexing techniques. WDM. Broadcast networks. Wavelength-routed networks. Network architectures. Protocols. Network algorithms. Device-network interface. Optimization problems.

Prerequisite(s): ECS 252.

Learning Activities: Lecture 3 hour(s), Independent Study 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 260 – Software Engineering (4 units)

Course Description: Advanced techniques for domain-specific software reuse.

Prerequisite(s): ECS 142; ECS 160 recommended.

Learning Activities: Lecture 3 hour(s), Project 3 hour(s).

Enrollment Restriction(s): Pass One open to Ph.D. students in Computer Science only and Pass Two open to graduate students in Computer Science only.

Grade Mode: Letter.

ECS 261 – Program Verification (4 units)

Course Description: Methods of proving correctness of programs with respect to formal specifications, with attention to those suited for employing automated deduction. Logic background, symbolic execution, techniques suited to iterative programming, methods from denotational semantics, termination, dynamic logic and proofs of concurrent programs.

Prerequisite(s): PHI 112; or MAT 125 or familiarity with first-order logic; knowledge of an integrative and functional programming language.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 262 – Formal Specification (3 units)

Course Description: Formal specification of modules, and its relationship to topdown programming development and verification. Abstract data types, together with methods for specifying them. Implementations and proofs of implementation. Using specifications to reason about programs. Parameterized types. Constructing good formal specifications.

Prerequisite(s): ECS 261.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 265 – Distributed Database Systems (4 units)

Course Description: Concepts of distributed database systems and architectures, distributed database design, distributed query processing and optimization, transaction management and concurrency control, heterogeneous and multidatabase systems.

Prerequisite(s): ECS 165A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 266 – Spatial Databases (4 units)

Course Description: Concepts, models, and architectures for spatial databases, spatial access methods, query processing, spatio-temporal data management, moving objects, spatial data mining.

Prerequisite(s): ECS 165A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 267 – Wide-Area Distributed Information Systems (4 units)

Course Description: Wide-area distributed information systems, data broadcast, multicast, publish/subscribe, service differentiation, information retrieval, Web caching.

Prerequisite(s): ECS 152B or ECS 165A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 268 – Scientific Data & Workflow Management (4 units)

Course Description: Scientific data integration, metadata, knowledge representation, ontologies, scientific workflow design and management.

Prerequisite(s): ECS 165A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 269 – Visual Recognition (4 units)

Course Description: Graduate seminar course on computer vision with an emphasis on object recognition, activity recognition, and scene understanding.

Prerequisite(s): ECS 171 or ECS 174; or equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 270 – Artificial Intelligence (3 units)

Course Description: Concepts and techniques underlying the design and implementation of models of human performance on intelligent tasks. Representation of high-level knowledge structures. Models of memory and inference. Natural language and story understanding. Common sense planning and problem solving.

Prerequisite(s): ECS 140A; ECS 172 recommended.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Pass One open to Ph.D. students in Computer Science only and Pass Two open to graduate students in Computer Science only.

Grade Mode: Letter.

ECS 271 – Machine Learning & Discovery (4 units)

Course Description: Artificial intelligence techniques for knowledge acquisition by computers. Fundamental problems in machine learning and discovery. Systems that learn from examples, analogies, and solved problems. Systems that discover numerical laws and qualitative relationships. Projects centering on implementation and evaluation.

Prerequisite(s): ECS 170.

Learning Activities: Lecture 3 hour(s), Project 1 hour(s).

Enrollment Restriction(s): Pass One open to PhD students in Computer Science only and Pass Two open to graduate students in Computer Science only.

Grade Mode: Letter.

ECS 272 – Information Visualization (4 units)

Course Description: Advanced topics in information visualization: perceptually effective display methods, color design and selection, interaction models and techniques, focus-context techniques, distortion methods, large graph visualization techniques, visual data mining methods, and evaluation methods.

Prerequisite(s): ECS 163 or ECS 175 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 273 – Visual Analytics (4 units)

Course Description: Analytical reasoning using visual means, data and visual transformations, exploratory visualization, explanatory visualization, interactive intelligent systems, qualitative and quantitative evaluation.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s), Project.

Enrollment Restriction(s): Pass One restricted to graduate students in Computer Science only; Pass Two restricted to graduate students only.

Grade Mode: Letter.

ECS 274 – Automated Deduction (4 units)

Course Description: Techniques of mechanical theorem proving. Methods based on resolution and termrewriting. Decision procedures. Induction. Applications to program verification, question/answering and plan generation. Study existing mechanical theorem provers.

Prerequisite(s): PHI 112; or MAT 125 or familiarity with first order logic.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 275A – Advanced Computer Graphics (4 units)

Course Description: Advanced topics in computer graphics. Hidden surface models, rendering of various surface types, subdivision methods, shading techniques, anti-aliasing, modeling techniques.

Prerequisite(s): ECS 175 or ECS 177 or ECS 178.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 275B – Advanced Computer Graphics (4 units)

Course Description: Advanced topics in computer graphics and geometric modeling. Topics taken from advanced research papers in computer graphics, image synthesis, visualization and geometric modeling.

Discussion of current research in the field.

Prerequisite(s): ECS 175 or ECS 177 or ECS 178.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 276 – Advanced Volume Visualization (4 units)

Course Description: Applications, available tools and techniques, the challenges confronting the field of volume visualization, and some of the advanced topics in the field. Primary emphasis on advanced software and hardware techniques to achieve interactive visualization.

Prerequisite(s): ECS 177.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 277 – Advanced Visualization (4 units)

Course Description: Visualization of 3D data, including scalar fields, vector fields, and medical data.

Prerequisite(s): ECS 177.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 278 – Computer-Aided Geometric Design (4 units)

Course Description: Mathematical techniques for the definition and manipulation of curves and surfaces. Bezier curves and surfaces, B-spline curves and surfaces, subdivision surfaces, wavelets. Integration into various computer graphics rendering models, visualization systems and computer-aided design systems.

Prerequisite(s): ECS 175.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 279 – Computer Animation (4 units)

Course Description: Surveys current research and fundamental techniques that lie behind character animation tools. Emphasis on improving expressive aspects of movement and how physics, motion capture data, the arts and psychology literature, and interactive techniques can be used towards this goal.

Prerequisite(s): ECS 175; or ECS 275.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 280 – Virtual Reality Technology (4 units)

Course Description: Fundamentals and principles of Virtual Reality (VR) technology. Potential and limits for its useful application. Developing a complete virtual reality application.

Prerequisite(s): ECS 175.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Letter.

ECS 289A – Special Topics in Computer Science: Computer Science Theory (1-5 units)

Course Description: Special topic in Computer Science Theory.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289B – Special Topics in Computer Science: Architecture (1-5 units)

Course Description: Special topic in Architecture.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289C – Special Topics in Computer Science: Programming Languages & Compilers (1-5 units)

Course Description: Special topic in Programming Languages & Compilers.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289D – Special Topics in Computer Science: Operating Systems (1-5 units)

Course Description: Special topic in Operating Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289E – Special Topics in Computer Science: Software Engineering (1-5 units)

Course Description: Special topic in Software Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289F – Special Topics in Computer Science: Databases (1-5 units)

Course Description: Special topic in Databases.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289G – Special Topics in Computer Science: Artificial Intelligence (1-5 units)

Course Description: Special topic in Artificial Intelligence.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289H – Special Topics in Computer Science: Computer Graphics (1-5 units)

Course Description: Special topic in Computer Graphics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289I – Special Topics in Computer Science: Networks (1-5 units)

Course Description: Special topic in Networks.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289J – Special Topics in Computer Science: Computer-Aided Design (1-5 units)

Course Description: Special topic in Computer-Aided Design.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289K – Special Topics in Computer Science: Scientific Computing (1-5 units)

Course Description: Special topic in Scientific Computing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289L – Special Topics in Computer Science: Computer Science (1-5 units)

Course Description: Special topic in Computer Science.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289M – Special Topics in Computer Science: Security (1-5 units)

Course Description: Special topic in Security.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 289N – Special Topics in Bioinformatics & Computational Biology (1-5 units)

Course Description: Special topic in Bioinformatics & Computational Biology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECS 290 – Seminar in Computer Science (1 unit)

Course Description: Participating seminar; discussion and presentation of current research and development in computer science.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Satisfactory/Unsatisfactory only.

ECS 290C – Graduate Research Group Conference (1 unit)

Course Description: Research problems, progress and techniques in computer science.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ECS 293A – Research in Computer Science (1 unit)

Course Description: Study of research topics in computer science, Ph.D. level research methodologies (experimental, applied and theoretical). Study skills necessary to successfully find/solve significant research problems. Finding and successful interacting with a research advisor. Ethical issues in research/collaborative work.

Prerequisite(s): Graduate standing in computer science.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Satisfactory/Unsatisfactory only.

ECS 293B – Research in Computer Science (1 unit)

Course Description: Study of Ph.D. level research methodologies (experimental, applied and theoretical), presenting research results for the computer science community. Study skills necessary to successfully find/solve significant research problems.

Prerequisite(s): Graduate standing in computer science; ECS 293A recommended.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Satisfactory/Unsatisfactory only.

ECS 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Grade Mode: Satisfactory/Unsatisfactory only.

ECS 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Enrollment Restriction(s): Open to all Graduate Students.

Grade Mode: Satisfactory/Unsatisfactory only.

ECS 390 – The Teaching of Computer Science (1 unit)

Course Description: Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports.

Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Computer Science.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ECS 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Enrollment Restriction(s): Open to Graduate Students in Computer Science only.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Consumer Sciences (CNS)

College of Agricultural & Environmental Sciences

CNS 092 – Internship in Consumer Science (1-12 units)

Course Description: Internship on and off campus in a consumer science related area.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

CNS 100 – Consumer Behavior (3 units)

Course Description: Provides a set of behavioral concepts and theories useful in understanding consumer behavior on the part of the individual, business, and social organizations. Conceptual models to help guide and understand consumer research will be presented.

Prerequisite(s): Preparation in areas of psychology or sociology and economics recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

CNS 192 – Internship in Consumer Science (1-12 units)

Course Description: Internship on and off campus in a consumer science related area.

Prerequisite(s): Consent of instructor. Completion of a minimum of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

CNS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CNS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

CNS 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

CNS 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Critical Theory (CRI)

College of Letters & Science

CRI 101 – Introduction to Critical Theoretical Approaches to Literature & Culture (4 units)

Course Description: Introduction to critical theory and its use for interpreting literary texts, film, and media forms in our present global culture.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: COM 141.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

CRI 200A – Approaches to Critical Theory (4 units)

Course Description: Critical overview of modern theoretical texts (e.g., semiotics, hermeneutics, deconstruction, social and cultural critique, feminist theory, psychoanalysis).

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to Graduate students.

Grade Mode: Letter.

CRI 200B – Problems in Critical Theory (4 units)

Course Description: Focused study of a particular critical theoretical approach, school or perspective. Topics may include but are not limited to: critical approaches to the study of literature, culture, film, historiography, visual culture, the body, and aesthetics.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to Graduate students.

Repeat Credit: May be repeated when topic differs and with consent of instructor.

Grade Mode: Letter.

CRI 200C – History of Critical Theory (4 units)

Course Description: Critical analysis and discussion of pre-20th century theories of literary and cultural criticism. Topics may include but are not limited to: ancient and early modern philosophy; nature and culture in the Renaissance; theories of Mimesis from antiquity to the Renaissance.

Prerequisite(s): Graduate student standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to Graduate students.

Repeat Credit: May be repeated when topic differs and with consent of instructor.

Grade Mode: Letter.

CRI 201 – Critical Theory Special Topics (4 units)

Course Description: Application of theoretical principles to one specific research topic. May be repeated for credit with consent of instructor when topic differs.

Prerequisite(s): Graduate student standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

CRI 202 – Visual Culture (4 units)

Course Description: Analysis of image production in the contemporary world (photography, film, television, advertising, etc.) and their effects on individual subjectivities and collective social identities.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to Graduate student standing.

Grade Mode: Letter.

CRI 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Restricted to Graduate student standing.

Grade Mode: Letter.

CRI 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor. Graduate student standing.

Learning Activities: Variable 3-36 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Cultural Studies (CST)

Graduate Studies

CST 200A – Histories of Cultural Studies (4 units)

Course Description: Histories and traditions of cultural studies internationally; multiple legacies of cultural studies as a field of inquiry in various geographical contexts; foregrounds important critical perspectives resulting from social and intellectual movements worldwide.

Prerequisite(s): Graduate standing or consent of instructor required.

Undergraduate coursework in the humanities or social sciences recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

CST 200B – Theories of Cultural Studies (4 units)

Course Description: Definitions of "critical" scholarship and examination of various contexts in which cultural studies theory has emerged worldwide. Both mainstream and alternative theoretical traditions, such as those developed by people of color and by other minoritized groups.

Prerequisite(s): CST 200A; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

CST 200C – Practices of Cultural Studies (4 units)

Course Description: Methodological and practical applications of cultural studies research. Critical analyses of ethnography, textual analysis, social change, community development, and identity formation. Emphasis given to students' unique versions of cultural studies practices.

Prerequisite(s): CST 200A; CST 200B; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

CST 204 – History & Theory of Sexualities (4 units)

Course Description: Studies of sexuality in feminist, literary, historical, and cultural studies research, specifically examining the emergence of "sexuality" as a field of research and the relationship of sexuality studies to cultural forms, subjectivity, and social relations generally.

Prerequisite(s): CST 200A (can be concurrent); or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

CST 206 – Studies in Race Theory (4 units)

Course Description: Theoretical framework for the critical study of race, drawing on contemporary cultural studies and postcolonial scholarship in order to understand the social production of "race" as a category for organizing social groups and determining group processes.

Prerequisite(s): CST 200A (can be concurrent); or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

CST 208 – Studies in Nationalism, Transnationalism, & Late Capitalism (4 units)

Course Description: Contemporary theories of nation, nationalism, postcolonialism, and transnationalism. Specific attention to the relationship between cultural production and the formation of ideas about nation and nationalism, including examination of both "legitimizing" and resistant discourses.

Prerequisite(s): CST 200A (can be concurrent); or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

CST 210 – Memory, Culture, & Human Rights (4 units)

Course Description: Explores the multiple convergences among memory, culture, and human rights. Discusses diverse approaches to how societal actors in different historical, cultural, and national settings, construct meanings of past political violence, inter-group conflicts, and human rights struggles.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Cross Listing: HMR 200B.

Grade Mode: Letter.

CST 212 – Studies in the Rhetorics of Culture (4 units)

Course Description: Survey of critical and analytical approaches to the study of texts. Examination of multi-mediated objects to understand their cultural import by focusing on discursive production, dispersal, and reception processes, and related shifts in power relations.

Prerequisite(s): CST 200A (can be concurrent); or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

CST 214 – Studies in Political & Cultural Representations (4 units)

Course Description: Framework for the analysis of political and popular cultural representations. Emphasis on concepts, theories, and methodologies illuminating dominant and vernacular cultural representation, appropriation, and innovation in transnational contexts.

Prerequisite(s): CST 200A (can be concurrent); consent of graduate advisor required.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated 4 time(s) when topic differs.

Grade Mode: Letter.

CST 250 – Research Seminar (4 units)

Course Description: Designed to facilitate student interaction and promote student research by guiding students through the production of a publishable essay. Essays submitted, distributed, and discussed by seminar participants.

Prerequisite(s): CST 200A; CST 200B; CST 200C; or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Letter.

CST 270A – Individually Guided Research in Cultural Studies (4 units)

Course Description: Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus.

Prerequisite(s): CST 200C; CST 250; and consent of instructor.

Learning Activities: Discussion 1 hour(s), Independent Study 2 hour(s), Extensive Writing.

Grade Mode: Letter.

CST 270B – Individually Guided Research in Cultural Studies (4 units)

Course Description: Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus.

Prerequisite(s): CST 200C; CST 250; and consent of instructor.

Learning Activities: Discussion 1 hour(s), Independent Study 2 hour(s), Extensive Writing.

Grade Mode: Letter.

CST 270C – Individually Guided Research in Cultural Studies (4 units)

Course Description: Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus.

Prerequisite(s): CST 200C; CST 250; and consent of instructor.

Learning Activities: Discussion 1 hour(s), Independent Study 2 hour(s), Extensive Writing.

Grade Mode: Letter.

CST 290 – Colloquium (1 unit)

Course Description: Designed to provide cohort identity and faculty student exchange. Opportunity to present papers, hear guest lecturers, and see faculty presentations, gather for organizational and administrative news, exchange information, and make announcements.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

CST 295 – Special Topics (4 units)

Course Description: Special topics courses offered according to faculty and student interests and demands.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated with consent of advisor.

Grade Mode: Letter.

CST 298 – Group Research (1-5 units)*Course Description:* Group research.*Learning Activities:* Variable.*Repeat Credit:* May be repeated.*Grade Mode:* Satisfactory/Unsatisfactory only.**CST 299 – Directed Research (1-5 units)***Course Description:* Directed research.*Learning Activities:* Variable.*Repeat Credit:* May be repeated.*Grade Mode:* Satisfactory/Unsatisfactory only.**CST 299D – Dissertation Research (1-12 units)***Course Description:* Dissertation research.*Prerequisite(s):* Advancement to doctoral candidacy.*Learning Activities:* Independent Study 3-36 hour(s).*Repeat Credit:* May be repeated.*Grade Mode:* Satisfactory/Unsatisfactory only.**CST 396 – Teaching Assistant Training Practicum (1-4 units)***Course Description:* Teaching assistant training practicum.*Prerequisite(s):* Graduate standing.*Learning Activities:* Variable 3-12 hour(s).*Repeat Credit:* May be repeated.*Grade Mode:* Satisfactory/Unsatisfactory only.**Data Science (DSC)**

College of Letters & Science

DSC 192 – Internship in Data Science (1-12 units)*Course Description:* Work experience in Data Science. Supervised internship, on or off campus in areas of data science including data analysis, machine learning, optimization, quantitative finance, geographic information systems, engineering, or data science applications in other fields of inquiry. Final written report on internship experience required.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Internship 3-36 hour(s).*Enrollment Restriction(s):* Restricted to upper division standing.*Repeat Credit:* May be repeated for credit.*Grade Mode:* P/NP only.**DSC 194HA – Special Studies for Honors Students (4 units)***Course Description:* Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty advisor.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Independent Study 12 hour(s).*Enrollment Restriction(s):* Open to Data Science majors only; restricted to seniors qualifying for honors.*Grade Mode:* Letter.*General Education:* Science & Engineering (SE).**DSC 194HB – Special Studies for Honors Students (4 units)***Course Description:* Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty advisor.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Independent Study 12 hour(s).*Enrollment Restriction(s):* Open to Data Science majors only; restricted to seniors qualifying for honors.*Grade Mode:* Letter.*General Education:* Science & Engineering (SE).**Dermatology (DER)**

School of Medicine

DER 192 – Internship in Cutaneous Biology (1-4 units)*Course Description:* Approval of project prior to internship by preceptor. Supervised work experience involving research on the skin. Final report.*Prerequisite(s):* Upper division standing or consent of instructor.*Learning Activities:* Internship 8-20 hour(s).*Grade Mode:* Pass/No Pass only.**DER 199 – Special Study in Cutaneous Biology (1-4 units)***Course Description:* Special study by individual arrangement of specialized topics in biology of skin. Work may be assigned readings, laboratory research or a combination.*Prerequisite(s):* Advanced undergraduate standing and/or consent of instructor.*Learning Activities:* Variable.*Grade Mode:* Pass/No Pass only.**DER 299 – Research in Cutaneous Biology (1-12 units)***Course Description:* Independent research in cellular and biochemical mechanisms of cutaneous biology and pathology.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Laboratory 3-36 hour(s).*Grade Mode:* Satisfactory/Unsatisfactory only.**DER 420 – Integumentary System (2 units)***Course Description:* Cell biology, pathology, and physical diagnosis of the skin. Recognition of normal variations, and common or important dermatoses. Patient demonstrations of select conditions.*Prerequisite(s):* Approval of School of Medicine Committee on Student Promotions.*Learning Activities:* Lecture/Discussion 3 hour(s), Clinical Activity 0.25 hour(s).*Enrollment Restriction(s):* Restricted to Medical students only; student must have passed all SOM Year 1 courses.*Grade Mode:* Pass/Fail only.

DER 460 – Dermatology Clinical Clerkship (3-9 units)

Course Description: Observation and participation in dermatology clinics/practice and participation in Ward Rounds and Dermatology Clinics at UC Davis Medical Center, Kaiser, and private practitioner offices.

Prerequisite(s): Completion of three years of medical school; or consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

DER 465 – Specialty Externship in Dermatology (3-16 units)

Course Description: Externship provides in-depth exposure to one of a variety of sub-specialties in Dermatology.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

DER 466 – Away Acting Internship in Dermatology (3-18 units)

Course Description: Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40 hour(s), Lecture 6 hour(s), Variable 3-18 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

DER 470 – Introduction to Dermatopathology (3-9 units)

Course Description: Integrated, multi-specialty approach to the microscopic diagnosis of inflammatory and neoplastic skin disorders.

Prerequisite(s): Consent of instructor; previous rotation in a Dermatology Clerkship.

Learning Activities: Clinical Activity 20 hour(s), Independent Study 20 hour(s), Lecture/Discussion 6 hour(s).

Enrollment Restriction(s): Restricted to fourth-year medical student.

Grade Mode: Honors/Pass/Fail.

DER 475 – Telehealth in Dermatology (6 units)

Course Description: Introduction to the application of telehealth in dermatology to provide diagnoses, consultation, treatment, and education. Participate in teledermatology clinics with remote sites throughout California, conduct telehealth project(s), and review the latest literature in telehealth application in improving healthcare access.

Learning Activities: Clinical Activity 4 hour(s), Project 36 hour(s).

Enrollment Restriction(s): Restricted to Medical students.

Repeat Credit: May be repeated 6 unit(s) for additional time to complete telehealth project or to work on new telehealth projects.

Grade Mode: Honors/Pass/Fail.

DER 480 – Insights in Dermatology (1-3 units)

Course Description: Clinical experience limited to observation of delivery of dermatologic care and attendance at some conferences.

Prerequisite(s): Consent of instructor; first- and second- year medical students in good academic standing.

Learning Activities: Clinical Activity 3-9 hour(s).

Grade Mode: Honors/Pass/Fail.

DER 495 – Wound Healing: From Bench to Bedside (6 units)

Course Description: An integrated, multi-specialty approach to clinical soft tissue wound healing.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 12 hour(s), Laboratory 8 hour(s), Auto Tutorial 15 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to medical students only.

Grade Mode: Honors/Pass/Fail.

DER 498 – Special Topics in Clinical Dermatology (1-6 units)

Course Description: Individually arranged study of special topics in clinical dermatology determined by student and instructor. Assigned readings and/or clinical examination of selected patients.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Independent Study 3-18 hour(s).

Grade Mode: Honors/Pass/Fail.

DER 499 – Research in Cutaneous Biology (1-12 units)

Course Description: Research, either laboratory or clinical, on ongoing projects within the department under supervision of faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 3-36 hour(s).

Grade Mode: Honors/Pass/Fail.

Design (DES)

College of Letters & Science

DES 001 – Introduction to Design (4 units)

Course Description: Introduction to design discipline through readings, writing, visual problem solving, and critical analysis. Topics: design principles and elements, vocabulary, color theory, Gestalt principles, conceptualization strategies. Role of designer and products in contemporary culture including social responsibility and sustainability.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 014 – Design Drawing (4 units)

Course Description: Drawing as a tool for design. Basic skills in objective observation and representation, including line, shape, tone, and space.

Drawing as a tool for formulating and working through design problems.

Prerequisite(s): DES 001 (can be concurrent); students who have prior unarticulated college level credit in design drawing are encouraged to submit a course equivalency review; this can include classes that have been granted Advanced Placement or International Baccalaureate credits; please see Design Department website for submission requirements and deadlines.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 015 – Form & Color (4 units)

Course Description: Understanding color, form and composition as ways of communicating design concepts and content. Color theory, color mixing, interaction of color. Design principles and elements. Gestalt theory.

Explores a variety of materials, media and presentation techniques.

Prerequisite(s): DES 001 (can be concurrent); or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 016 – Graphic Design & Computer Technology (4 units)

Course Description: Introduction to digital tools with emphasis on graphic design including theory, practice and technology. Includes principles of color, resolution, pixels, vectors, image enhancement, layout, visual organization, visual hierarchy, typography.

Prerequisite(s): DES 001 (can be concurrent); or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 021 – Drafting & Perspective (4 units)

Course Description: Introduction to mechanical drafting, including scaled drawing, orthogonal projection, isometric, axonometric and perspective. Includes basic rendering techniques.

Prerequisite(s): DES 001 (can be concurrent); or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 040A – Energy, Materials, & Design Over Time (4 units)

Course Description: Global history of design across time, viewed through the lens of the effects of the creation and discovery of new energy sources, processes, and materials on design.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: SAS 043.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

DES 040B – Ideologies of Design (4 units)

Course Description: Introduction to the history and theory of design in particular relation to political, philosophical, cultural, economic, and environmental debates and objectives.

Prerequisite(s): DES 001.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

DES 040C – Design for Aesthetics & Experience (4 units)

Course Description: Global historical survey of design's engagement with changing notions of aesthetics and experience. Relates transformations in the theory, production, and reception of all aspects of design (objects, landscapes, architectures, etc.) to larger cultural, social, and political contexts.

Prerequisite(s): DES 001.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DES 040D – Designed Geographies: Environment, Containment, Sanctuary (4 units)

Course Description: Historical survey of the role of design in the production of geographic location. Role of design in the choreography or enforcement of bodies in geographic space. Global exploration of the design imagination in the creation of alternatives to built space in the present.

Prerequisite(s): DES 001.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 1 hour(s), Independent Study.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

DES 050 – Introduction to Three-Dimensional Design (4 units)

Course Description: Design concept development and detailing as it relates to the making of objects, structures and models using form, scale and materials. Product design and rapid prototyping methods using a range of techniques for advancing the design process.

Prerequisite(s): DES 001 (can be concurrent); or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 051 – Computer-Assisted Drawing for Designers (4 units)

Course Description: Computer-assisted drawing (CAD) and modeling using a mid-level, multi-use CAD program. Basic architectural drawing and modeling technique in both two-dimensional and three-dimensional CAD environments.

Prerequisite(s): DES 001 (can be concurrent); or consent of instructor.

Learning Activities: Studio 6 hour(s).

Credit Limitation(s): Not open for credit to students who have taken DES 150A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 070 – Introduction to Textile Design Structures (4 units)

Course Description: Introduction to diverse methods for creating textile structures. Exploration of the creative potential of hand-constructed textiles, manipulation of fabric to create dimensional surfaces, and the basics of building and joining fabric structures.

Prerequisite(s): DES 001 (can be concurrent); or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Credit Limitation(s): Only 2 units of credit to students who have completed DES 023 or DES 024; not open for credit for students who have completed both DES 023 & DES 024.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 077 – Introduction to Structural Design for Fashion (4 units)

Course Description: Study and practice of designing clothing for the human body. Emphasis on flat pattern development, structural joining sequences and the development of three-dimensional garments from two-dimensional drawings.

Prerequisite(s): DES 001 (can be concurrent); or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Credit Limitation(s): Not open for credit to students who have completed DES 077A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

DES 107 – Advanced Structural Design for Fashion (4 units)

Course Description: Advanced study and practice of designing clothing for the human body through pattern development and structural joining. Emphasis on draping techniques and advanced conceptualization for fashion design.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 077; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 111 – Coding for Designers (4 units)

Course Description: Programming concepts/skills for design. Algorithm-based design and development flowcharts. Pseudo-code entry level programming. Principles of coding logic syntax structure. Analysis of history. Development iteration presentation of design projects.

Prerequisite(s): DES 001; DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Credit Limitation(s): Not open for credit to students who completed DES 037.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

DES 112 – UI/UX Design: Principles & Practices (4 units)

Course Description: Principles and practices of User Interface (UI) and User Experience (UX). Design for digital, interactive media. Iterative design processes, audience research.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 113 – Photography & Digital Imaging (4 units)

Course Description: Digital imaging techniques using black/white and color. Critical analysis of photographs and the role of photography in society. Explore use and meaning of single, sequence and single composite images.

Prerequisite(s): DES 001; DES 015; DES 016.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Credit Limitation(s): Not open for credit to students who have taken DES 031.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 115 – Letterforms & Typography (4 units)

Course Description: Fundamentals of letterforms and typography. Characteristics of typefaces; formatting and composition of type. Principles of legibility, visual hierarchy, grid systems, and the integration of type and image.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Credit Limitation(s): Not available for credit to students who have completed DES 022.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 116 – Visual Communication: Graphic Design Studio (4 units)

Course Description: Multiple, conceptually-linked assignments focusing on the fundamental choices designers make in translating concepts into effective graphic form. Problem finding and analysis of audience needs. Design process from research and initial concepts to project prototypes. May be taught abroad.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 115; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Credit Limitation(s): Not open for credit to students who have completed DES 152 or DES 152A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 117 – Interactive Media I (4 units)

Course Description: Practice of creating interactive visual media for network-based applications and principles of human computer interaction. Responsive design. User-centered research, information architecture, interface and interaction. Analysis of usability. Development and presentation of design production materials and completed interactive projects.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 126 – Design Ethnography (4 units)

Course Description: Practical introduction to design ethnography through project-based work. Tools and methods, observation, interviews, fieldnotes, and synthesis of qualitative data. Exploration of participatory design. Examination of the ethical questions.

Prerequisite(s): DES 001; or consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DES 127A – Sustainable Design (4 units)

Course Description: Principles, practice and materials of contemporary sustainable design in the context of environmental crisis. History of sustainable design in relation to the fields of product design, material science, energy, architecture, and transportation.

Prerequisite(s): DES 001.

Learning Activities: Discussion 1 hour(s), Lecture 3 hour(s).

Enrollment Restriction(s): Pass One open to Design Majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 127B – Studio Practice in Sustainable Design (4 units)

Course Description: Analysis and practice of sustainable design within studio context. Design project that incorporate the reuse of post consumer waste; standard materials vs. sustainable materials; Cradle to Cradle philosophy and practice. Field trips required.

Prerequisite(s): DES 127A; DES 001; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 128A – Biodesign Theory & Practice: Biodesign Challenge Part I (4 units)

Course Description: Foundational principles of biodesign, with examples in textiles, fashion, graphics, lighting, products, and architecture.

Team-based experience in biodesign intervention; first steps in a mini-entrepreneurial start-up experience.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DES 128B – Biodesign Experimentation & Prototyping: Biodesign Challenge Part II (4 units)

Course Description: Team-based, experimentally grounded prototype design in a mini-entrepreneurial start-up context.

Prerequisite(s): DES 128A C or better; consent of instructor.

Learning Activities: Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

DES 131 – Global Fashion & Product Design (4 units)

Course Description: Exploration of materials, embellishments, and structural techniques derived from historic and contemporary world cultures. Emphasis on unique qualities of individual expression applied to hand made textiles, fashion and textile products. May be taught abroad.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 132A – Textile Design: Woven Structures (4 units)

Course Description: Foundation in handwoven textile structure and design, emphasizing yarn identification, basic drafting, basic weaves and their derivatives explored in context of original color effects and yarn combinations.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Repeat Credit: May be repeated 1 time(s) with consent of instructor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 134A – Introduction to Interior Design–Residential (4 units)

Course Description: Introduction to the theory and practice of interior design with focus on residential spaces. Basic methods of design conceptualization, development, and presentation.

Prerequisite(s): DES 001; (DES 021 or DES 051 or DES 150A); or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 134B – Introduction to Interior Design–Commercial & Technical Spaces (4 units)

Course Description: Introduction to the theory and practice of interior design with focus on small commercial and technical spaces. Archetypal spaces, non-residential building systems, ADA accessibility, design programming and research methods.

Prerequisite(s): DES 001; (DES 021 or DES 051 or DES 150A); or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Pass One priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 135A – Furniture Design & Detailing (4 units)

Course Description: Development of designs for contemporary furniture. Consideration of behavioral and physical requirements, cultural and historic expression, and structural and aesthetic qualities. Process includes research, drawings, and construction of scale models. Required field trip.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 135B – Furniture Design & Prototyping (4 units)

Course Description: Design and construction of full size prototype furniture based on preliminary work completed in DES 135A. Material technology, construction methods, and finishes discussed. Development of shop drawings and furniture construction. Required field trip.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 136A – Lighting Technology & Design (4 units)

Course Description: Introduction to lighting design and technology. Understanding the role of lighting and vision in the development of functional and aesthetically pleasing environments.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Laboratory 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 136B – Designing with Light–Industrial Design (4 units)

Course Description: Design and manipulation of light sources, luminaires, and lighting controls to enhance the functional and aesthetic impact of interior and exterior spaces. Industrial design projects explore lighting effects, light distribution characteristics, and luminaire design.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 136A; or consent of instructor.

Learning Activities: Laboratory 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 137A – Daylighting & Interior Design (4 units)

Course Description: Emphasis on understanding the effect of daylight on the perception of interior designs as well as on vision, luminous and thermal comfort, health and energy efficiency.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 137B – Daylighting Design Studio (4 units)

Course Description: Introduction to daylighting through observation of its effects on interior designs using scale models of interior designs of choice and photographing them outdoors and in CLTC's Heliodon to understand year-round performance.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 138 – Materials & Methods in Interior Design (4 units)

Course Description: Introduction to the finish materials used for interior design with special emphasis on sustainable and recycled products. Performance factors, relative costs and energy impacts, installation conditions and construction details, and design potential for a full range of interior materials.

Prerequisite(s): DES 001; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Project 1 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

DES 141 – Cultural Studies of Fashion (4 units)

Course Description: Cultural studies theories and methods used to explore an inclusive approach to design studies. Fashion in dress and other areas of design in society. Race, ethnicity, gender, sexuality, class, national identity, dis/ability, age/generation, and religion, and the intersectionalities among these subject positions in the transnational design, production, circulation, and consumption of fashion.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken TXC 007.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

DES 142A – World Textiles: Eastern Hemisphere (4 units)

Course Description: Social contexts, meanings, aesthetics, stylistic developments, and methods significant in eastern hemisphere textiles. Emphasis on Japan, China, Indonesia, Oceania, Southern and Central Asia, Africa.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DES 142B – World Textiles: Western Hemisphere (4 units)

Course Description: Social context, aesthetics, stylistic developments and methods significant in western hemisphere textiles. Emphasis on the Middle East, Europe, and the Americas up to contemporary times. Two required field trips.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DES 143 – History of Fashion (4 units)

Course Description: History of fashion design from the earliest times to the present focusing on the ancient Middle East and Common Era North America and Europe. Emphasis on aesthetic, functional, social, economic, political and cultural aspects of clothing and personal adornment.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 144 – History of Interior Architecture (4 units)

Course Description: Thematic survey of interior architecture. Emphasis on dwellings in their cultural settings and development of modern interior design theories. Interiors considered in relation to buildings' exteriors, sites, and uses.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

DES 145 – History of Visual Communication (4 units)

Course Description: Historical developments of visual communication, concentrating on the technological and aesthetic development of graphic design; origins and manifestations of current issues in visual communication; provide framework for analysis of current and future trends in visual communication.

Prerequisite(s): DES 001; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 146 – Mobilities (4 units)

Course Description: Mobilization of social space through ships, trains, bicycles, cars, planes, and skate parks. Exploration of the impact of driverless vehicles and civilian space travel on the safety, enjoyability, sustainability, and accessibility of social space. Critical, historical, aesthetic and political understanding of how humans move.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

DES 148 – Trend Research & Forecasting in Design (4 units)

Course Description: Short term and long term trends, micro and macro trends. Theories of adoption and diffusion of trends. Economic, political, technological and psychological indicators in trend forecasting. Future trends in design using cultural brailing, cross-cultural analysis methods and ethnographic research.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 149 – Information Design: Principles & Practice (4 units)

Course Description: Design principles and visual strategies for effective information display; analysis of contemporary and historical examples of visual representations and visual narratives in science, humanities, and the arts; emergence of digital methods for interactive data presentation.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to students with upper division standing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 150 – Computer-Assisted Presentations for Interior Architecture (4 units)

Course Description: Computer-assisted architectural presentation including the development of complex 3D models, techniques of photo-realistic rendering and computer simulation of movement through architectural and interior space.

Prerequisite(s): DES 051 or DES 150A.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Open to Design Majors only.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 151 – Type in Motion (4 units)

Course Description: Fundamentals of creating motion-based, screen-based typography. Consideration of narrative structures, movement assemblage, and other visual languages, synthesized within a nuanced understanding of typography within digital space. May be taught abroad.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor. DES 115 recommended.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 154 – Visual Communication: Message Campaign Design (4 units)

Course Description: Principles and application of visual design strategies for projects that address a broad public audience. Emphasis on design for social awareness/interaction/benefit. Creation of public visual-media campaign.

Prerequisite(s): DES 115; DES 116; DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Credit Limitation(s): Not open for credit to students who have completed DES 152B.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 155A – Pattern, Form & Surface (4 units)

Course Description: Experimental approaches to form-making through an examination of pattern, form, and surface in historical and contemporary contexts. Explorations of alternative design processes, methods, and materials that open up new possibilities for content creation and invention in design practice.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 113; DES 115; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority given to Design majors.

Grade Mode: Letter.

General Education: Visual Literacy (VL).

DES 156 – Graphitecture: Architecture in the Age of New Media (4 units)

Course Description: New media and its impact on environmental design; analysis of contemporary projects at the intersection of architecture and new media; time-based strategies of representation; digital narrative.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 157A – Interactive Media II (4 units)

Course Description: Technical practice for interactive media using the front-end stack (html, css, js). Conceptual framework, user experience, visual interface and interaction design. Research and written pre-production materials required.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 111; DES 117; or consent of instructor.

Learning Activities: Studio 5 hour(s), Practice 1 hour(s).

Enrollment Restriction(s): Open to Design majors only.

Grade Mode: Letter.

General Education: Visual Literacy (VL).

DES 157B – Interactive Media III (4 units)

Course Description: Capstone interactive media course that furthers understanding of and experimentation with the front-end stack with libraries, databases, sensors and microcomputers.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 021; DES 111; DES 112; DES 117; (DES 157 or DES 157A); or consent of instructor.

Learning Activities: Studio 5 hour(s), Practice 1 hour(s).

Enrollment Restriction(s): Pass One open to Design majors only.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 158 – Data & Large-Scale Installation (4 units)

Course Description: Design of large-scale installations using data for engagement with sites, systems, phenomena, or situations that promote interaction between information, narrative, media, and space. Data literacy tools and methods in data acquisition, visualization, and analytics for designers. Data discoveries, formulating narratives, and building large-scale installations as critical design.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; (DES 111 or DES 135A or ART 005); or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One open to Design majors; enrollment restricted to upper division students.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 159 – Design for Understanding (4 units)

Course Description: Principles of effective information display including aspects of language, structure, legibility, sequencing, and context. Analysis of historical examples of typographic, diagrammatic, and cartographic excellence. User-centered research. Development and presentation of iterative design prototypes. Design that informs, connects, and inspires.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 115; DES 116; or consent of instructor. DES 117 recommended.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Pass One open to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 160 – Textile Surface Design: Patterns & Resists (4 units)

Course Description: Use of traditional and contemporary processes to create images and patterns on fabric using a variety of dyes, including direct applications, bound and mechanical resists, and surface additives.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass one restricted to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 161 – Textile Surface Design: Screen & Digital Printing (4 units)

Course Description: Design of textiles and screen printing on fabrics; soft-product development; integration of hand-produced and digitally generated imagery on cloth.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 165 – Studio Practices in Industrial Design (4 units)

Course Description: 3D studio methods for design, including: historic and contemporary developments in industrial design; innovation in material and fabrication technology; design based projects for everyday objects including soft goods, electronics, transportation.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; (DES 050 or DES 050), or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

DES 166 – Human Centered Design (4 units)

Course Description: Human-centered approach to problem solving, ethnography, ideation, project framing, rapid prototypes, visual communication, and experiential learning. Creative approaches to graphic design, industrial design, fashion, business, and entrepreneurship.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 167 – Prototyping: From Objects to Systems (4 units)

Course Description: Exploration of rapid prototyping techniques for objects, interactive experiences, services and organizations. Understanding of additive manufacturing, foam models, digital interfaces and business models.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

DES 168 – Interactive Objects (4 units)

Course Description: Introduction to Physical Computing through a hands-on experience. Concepts, techniques and technologies required to conceptualize, design and prototype interactive devices by the merge of digital fabrication, computer programming, and electronics.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One open to Design majors only.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Visual Literacy (VL).

DES 169 – Textile Soft Product Design (4 units)

Course Description: Exploration of textile design aimed at developing unique textiles for specific end products such as a fashion collection, fashion accessory, functional interior design, art textile, graphic surface design, or other soft product.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; previous textile and/or sewing experience or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Repeat Credit: May be repeated 1 time(s) with consent of instructor; topics and themes change yearly; criteria is: (1) space with first priority to students not previously taken the course and (2) course content must be sufficiently different from the previous time the student took the course.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DES 170 – Experimental Fashion & Textile Design (4 units)

Course Description: Experimental approaches to fashion and textile design. Emphasis on developing conceptual ideas and translating them into one-of-a-kind garments and soft products. Exploration of a variety of current topics including sustainability, pattern design, new technologies, and social activism.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Repeat Credit: May be repeated 1 time(s) with consent of instructor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 171 – Fashion Drawing: Technical & Illustration (4 units)

Course Description: Exploration of fashion design processes for industry within the social and physical context. Emphasis on two-dimensional conceptualization of ideas, garment construction, and ideation processes utilizing commercial textiles. Field trip required.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor; DES 014 recommended.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 175 – Functional Apparel Design (4 units)

Course Description: Application of hands-on & theoretical human-centered design processes and methods to functional apparel. Materials and methods for designing functional apparel for extreme environments and activities, performance and bodily function enhancement, health and wellbeing of users. Dynamics of the human body that interact with clothing during environmental and activity-based challenges.

Prerequisite(s): DES 001; DES 014; DES 015; and consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 177 – Computer-Assisted Fashion Design (4 units)

Course Description: Advanced exploration of apparel design processes for industry and personal expression with emphasis on computer-assisted design applications. Field trip required.

Prerequisite(s): DES 077; DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 178 – Design & Wearable Technology (4 units)

Course Description: Introduction to wearable technology and related technologies. Emphasis on designing, and fabricating prototypes of wearable technology for value-added designs and to improve quality of life.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; (DES 037 or DES 111); or consent of instructor.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 179 – Fashion Design: Signature Collection (4 units)

Course Description: Advanced exploration of fashion design with an emphasis on professional portfolio development and presentation. Emphasis on conceptualizing, designing, and fabricating a cohesive line of wearable garments suitable for presenting in a public fashion show.

Prerequisite(s): DES 077; (DES 107 or DES 177); DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Credit Limitation(s): Not open for credit to students who have taken more than 8 units of DES 191A.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 180A – Advanced Interior Design: Institutional Spaces (4 units)

Course Description: Advanced interior design problems focused on complex institutional spaces. Introduction to building codes related to interior design. Integration of building systems with interior design solutions.

Prerequisite(s): DES 001; (DES 021 or DES 051 or DES 150A); or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 180B – Advanced Interior Architecture (4 units)

Course Description: Advanced problems in interior architectural design emphasizing space planning for corporate and institutional environments. Field trips required.

Prerequisite(s): (DES 180A or DES 134B); DES 134A; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 185 – Exhibition Design (4 units)

Course Description: Design of cultural and commercial exhibition environments, including exhibition development and object selection, spatial planning and architectural finishes, object placement and staging, interpretive strategies, exhibition and promotional graphics.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor; DES 051 or DES 150A recommended.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 186 – Environmental Graphic Design (4 units)

Course Description: Design of informational and directional graphics for the built environment. Application and integration of typography, imagery and symbols into the architectural landscape. Development of universal wayfinding and graphic navigational systems to help people find their way.

Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or consent of instructor; DES 115 recommended.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 187 – Narrative Environments (4 units)

Course Description: Design of storytelling environments and multi-sensory experiences for cultural, commercial, entertainment and public spaces. Interpretive planning and design for specific exhibit audiences. Manipulation of objects and the communication of complex ideas in the exhibition environment. May be taught abroad.

Prerequisite(s): (DES 185 or DES 186); (DES 014 or DES 021); DES 001; DES 015; DES 016; or consent of instructor.

Learning Activities: Studio 4 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Priority to Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DES 190 – Proseminar (1 unit)

Course Description: Philosophies of design explored through discussion and presentation of research results.

Prerequisite(s): Design major or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

DES 191A – Workshops in Design (4-12 units)

Course Description: Faculty initiated workshops featuring advanced studies and applications of original work in Design: Costume. Letter grading by contract. Field trips included.

Prerequisite(s): DES 014; DES 015; and consent of instructor; upper division standing.

Learning Activities: Seminar 1 hour(s), Studio 3 hour(s).

Credit Limitation(s): Credit limited to 12 units in one section or a combination of sections.

Repeat Credit: May be repeated.

Grade Mode: Letter.

DES 191B – Workshops in Design (4-12 units)

Course Description: Faculty initiated workshops featuring advanced studies and applications of original work in Design: Environment. Letter grading by contract. Field trips included.

Prerequisite(s): DES 014; DES 015; and consent of instructor; upper division standing.

Learning Activities: Seminar 1 hour(s), Studio 3 hour(s).

Credit Limitation(s): Credit limited to 12 units in one section or a combination of sections.

Repeat Credit: May be repeated.:.

Grade Mode: Letter.

DES 191C – Workshops in Design (4-12 units)

Course Description: Faculty initiated workshops featuring advanced studies and applications of original work in Design: Graphics. Letter grading by contract. Field trips included.

Prerequisite(s): DES 014; DES 015; and consent of instructor; upper division standing.

Learning Activities: Seminar 1 hour(s), Studio 3 hour(s).

Credit Limitation(s): Credit limited to 12 units in one section or a combination of sections.

Repeat Credit: May be repeated.

Grade Mode: Letter.

DES 191D – Workshops in Design (4-12 units)

Course Description: Faculty initiated workshops featuring advanced studies and applications of original work in Design: Textiles. Letter grading by contract. Field trips included.

Prerequisite(s): DES 014; DES 015; and consent of instructor; upper division standing.

Learning Activities: Seminar 1 hour(s), Studio 3 hour(s).

Credit Limitation(s): Credit limited to 12 units in one section or a combination of sections.

Repeat Credit: May be repeated.

Grade Mode: Letter.

DES 192 – Internship (1-12 units)

Course Description: Supervised internship, off and on campus, in areas of design including graphics, fashion, information, museum, interaction, interiors, lighting, product and textiles.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

DES 194HA – Special Study for Honors Students (3 units)

Course Description: Preparation and presentation of a culminating project. Supervision of an instructor in one of the creative or scholarly areas of Design.

Prerequisite(s): Consent of instructor; qualification for Letters and Science Honors Program; senior standing; approval of Design Honors Program proposal by the Curriculum Committee and major advisor.

Learning Activities: Independent Study 9 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

DES 194HB – Special Study for Honors Students (3 units)

Course Description: Preparation and presentation of a culminating project. Supervision of an instructor in one of the creative or scholarly areas of Design.

Prerequisite(s): DES 194HA; and consent of instructor; qualification for Letters and Science Honors Program; senior standing.

Learning Activities: Independent Study 9 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

DES 197T – Tutoring in Design (1-5 units)

Course Description: Leading of small discussion groups or studio meetings affiliated with one of the department's regular courses.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Discussion 3-15 hour(s).

Grade Mode: Pass/No Pass only.

DES 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor. Upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

DES 198F – Student-Taught Course (1-4 units)

Course Description: Student-facilitated (taught) course intended for upper division students.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

DES 199 – Special Study of Advanced Undergraduates (1-5 units)

Course Description: Special study of advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

DES 199FA – Student Facilitated Course Development (1-4 units)

Course Description: Planning and development for student led DES 198F under the supervision of a faculty member.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

DES 199FB – Student Facilitated Teaching (1-4 units)

Course Description: Student-facilitated course under the supervision of a faculty member, an undergraduate student teaching a course under 098F/198F.

Prerequisite(s): DES 199FA; and consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

DES 221 – Theory & Issues in Design (4 units)

Course Description: Perspectives on theoretical and aesthetic issues related to the design professions such as methodology in historical and contemporary contexts, implications of technology on design theory and practice, and design relationships to environmental sustainability, recycling, and other social issues.

Prerequisite(s): Graduate standing in Design or consent of instructor.

Learning Activities: Seminar 3 hour(s), Independent Study.

Grade Mode: Letter.

DES 222 – Research Methods & Critical Writing for Design (4 units)

Course Description: Focused on research methods and critical writing related to design topics including case studies, original and secondary sources, critical reviews. Expectation of a paper meeting professional standards suitable for publication from each student at end of course.

Prerequisite(s): DES 221; graduate standing in Design or consent of instructor.

Learning Activities: Seminar 3 hour(s), Independent Study.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

DES 223 – Professional Practice & Ethics in Design (4 units)

Course Description: Introduce students to issues of professional design practice: business ethics, contracts and business practices, social responsibility through case studies, guest lectures and field trips, and readings. Short written assignments and presentations will be required.

Prerequisite(s): DES 221; DES 222; graduate standing in Design or consent of instructor.

Learning Activities: Seminar 3 hour(s), Independent Study.

Grade Mode: Letter.

DES 224 – Seminar in Design Research & Teaching (4 units)

Course Description: Work closely with instructor on a research and writing project related to subject matter of undergraduate history courses noted above with the goal of introducing student to advanced historical research processes and development of writing skills.

Prerequisite(s): DES 221; DES 222; DES 223; and consent of instructor; concurrent academic appointment (TA) in DES 142A, DES 142B, DES 143, DES 144, DES 145; graduate standing in Design.

Learning Activities: Independent Study 6 hour(s), Extensive Writing 4 hour(s), Discussion 2 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

DES 225 – Studio Practice in Design (4 units)

Course Description: Students work together on a collective project to experience the multiple phases of design through an iterative process. Design projects will be geared towards relevance in contemporary social, cultural and political contexts.

Prerequisite(s): DES 221.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Restricted to graduate standing in Design or consent of instructor.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

DES 226 – Studio Practice & Critique (4 units)

Course Description: Development of design mastery through individual design process and projects. Risk taking and development of the ability to add form to ideas both speculative and practical. Various design methodologies and creative making. Presentation of works in progress. Communication of effective feedback.

Prerequisite(s): Graduate status in the Department of Design or consent of instructor.

Learning Activities: Studio 5 hour(s), Practice 1 hour(s).

Enrollment Restriction(s): Open to Design Graduate students only.

Repeat Credit: May be repeated 2 time(s) no more than once per year.

Grade Mode: Letter.

DES 227 – Thesis Exhibition Studio & Critique (4 units)

Course Description: Development of final thesis exhibition. Focus on audience engagement and accessibility. Ideation, content selection, formal development, spatial planning sketches, scaled models, mockups, material testing, sequencing, staging, technical riders, maintenance requirement write-ups. Individual statement writing, collective catalog writing, exhibition promotion.

Prerequisite(s): Consent of instructor.

Learning Activities: Studio 5 hour(s), Practice 1 hour(s).

Enrollment Restriction(s): Open to second year Design MFA students only.

Grade Mode: Letter.

DES 290 – Seminar in Design (4 units)

Course Description: Selected topics in design methodology, research, communication, and education.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

DES 292 – Practicum in Design (1-12 units)

Course Description: Interaction with a working professional in the student's field of interest to apply theories and concepts to working practice.

Prerequisite(s): Graduate standing in Design or consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

DES 298 – Directed Group Study for Graduate Students (1-5 units)

Course Description: Directed group study for graduate students.

Prerequisite(s): Consent of instructor.

Learning Activities: Studio.

Grade Mode: Satisfactory/Unsatisfactory only.

DES 299 – Individual Focused Study (1-12 units)

Course Description: Advanced study in studio practice on independent projects with faculty consultation.

Prerequisite(s): Graduate standing in Design or consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

DES 299D – Project Concentration (1-12 units)

Course Description: Student creates a body of original work at a professional level, with written and visual documentation of process and concepts underlying the project, culminating in public presentation.

Prerequisite(s): Graduate standing in Design or consent of instructor; minimum of 22 units must be taken in Project Concentration and Individual Focused Study.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

DES 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Designated Emphasis, Biotechnology (DEB)

Graduate Studies

DEB 263 – Biotechnology Fundamentals & Application (2 units)

Course Description: Fundamentals of molecular biology and chemical engineering involved in recombinant DNA technology. Topics: principles of rate processes of biological systems, optimization of bioreactors, and issues related to overexpression and production of recombinant molecules. Participation in student-directed team projects.

Prerequisite(s): BIS 101; BIS 102; MIC 102; or consent of instructor; must be a graduate student in good standing.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

DEB 282 – Biotechnology Internship (7-12 units)

Course Description: Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of three months as part of the Designated Emphasis in Biotechnology Program.

Prerequisite(s): Graduate standing and consent of instructor.

Learning Activities: Internship 21-36 hour(s).

Enrollment Restriction(s): Open only to students participating in the Designated Emphasis in Biotechnology program.

Grade Mode: Satisfactory/Unsatisfactory only.

DEB 294 – Current Progress in Biotechnology (1 unit)

Course Description: Seminars presented by guest lecturers on subjects of their own research activities.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Cross Listing: ECH 294.

Grade Mode: Satisfactory/Unsatisfactory only.

Dramatic Art (DRA)

College of Letters & Science

DRA 001 – Theatre, Performance & Culture (4 units)

Course Description: Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions."

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Not open to students who have completed DRA 001S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); Writing Experience (WE).

DRA 001S – Theatre, Performance & Culture (4 units)

Course Description: Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." For Short Term Programs Abroad; may be taught abroad.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Not open to students who have completed DRA 001.

Grade Mode: Letter.

DRA 002 – Acting: The Basics: History & Practice (4 units)

Course Description: Introduction to the historical evolution of the actor—from ancient Greece & Asia to the Hollywood icon & postdramatic performer—and the practical foundations of acting for stage and screen. Onstage opportunities within lecture course structure.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

DRA 005 – Understanding Performance: Appreciation of Modern Theatre, Dance, Film & Performance Art (4 units)

Course Description: Relevance of theatre and performance to modern culture, science and society. Approaches to theatre/dance/media/ performance art, integrated into Mondavi Center for the Arts and Theatre & Dance Department programs.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: SAS 041.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

DRA 010 – Introduction to Performance & Digital Media (4 units)

Course Description: An embodied exploration of the fundamentals of movement, speech, theatre, sound and the foundations of digital media. Collaborative and solo performance (spoken and movement) assignments, selected readings and viewing of live and digital performance productions.

Learning Activities: Discussion/Laboratory 4 hour(s).

Repeat Credit: May be repeated 1 time(s) when instructor differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL).

DRA 014 – Introduction to Contemporary Dance (4 units)

Course Description: Introduction to basic issues and methods in contemporary dance. Focus on preparing the student for dancing and dance-making through basic techniques of improvisation and composition. Consideration of dance as a cultural practice.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Visual Literacy (VL).

DRA 020 – Introduction to Dramatic Art (4 units)

Course Description: Understanding and appreciation of both the distinctive and collaborative contributions of playwright, actor, director, and designer to the total work of dramatic art. Study of plays from the major periods of dramatic art in their cultural contexts.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

DRA 021A – Fundamentals of Acting (4 units)

Course Description: Physical and psychological resources of the actor. Experience in individual and group contact and communication, theatre games, advanced improvisation, sound and movement dynamics.

Viewing of theatre productions.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Enrollment Restriction(s): Open to Theatre & Dance majors only; all other students may enroll in DRA 010.

Grade Mode: Letter.

General Education: Oral Skills (OL); Visual Literacy (VL).

DRA 024 – Visual Aspects of Dramatic Art (4 units)

Course Description: Understanding and appreciation of the visual aspects of dramatic art: theatre architecture, scenery, lighting, costume, and makeup.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 028 – Entertainment Engineering & Management: Stagecraft to Stage Management (4 units)

Course Description: Introduction to technical production and management in theatre and dance. Topics include stage management, theatrical mechanics, backstage protocols, scenic construction, properties, lighting, basic shop tools, costume shop use and construction, basic make-up, sound equipment, graphics and robotics for theatre.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DRA 030 – Theatre Laboratory (1-5 units)

Course Description: Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions.

Prerequisite(s): Consent of instructor.

Learning Activities: Project 2 hour(s).

Repeat Credit: May be repeated 11 unit(s).

Grade Mode: Letter.

DRA 040A – Beginning Modern Dance (2 units)

Course Description: Fundamentals of modern dance focusing primarily on the development of techniques and creative problem solving. Basic anatomy, dance terminology, and a general overview of modern dance history.

Learning Activities: Discussion/Laboratory 4 hour(s).

Repeat Credit: May be repeated 2 time(s) if a non-Dance major; a Dance major may apply to the dance faculty advisor for permission to repeat more times as dance is a repetitive practice that involves constant reiteration and demands this for improvement and better understanding of the somatic and proprioceptive skills.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 040B – Intermediate Modern Dance (2 units)

Course Description: Modern dance techniques. Basic anatomy, dance terminology and a general overview of modern dance history.

Prerequisite(s): DRA 040A; or consent of instructor.

Learning Activities: Discussion/Laboratory 4 hour(s).

Repeat Credit: May be repeated 1 time(s) if a Dance major; further repeats negotiated with the Dance faculty advisor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 041A – Beginning Jazz Dance (2 units)

Course Description: Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminology and general overview of jazz dance history.

Learning Activities: Discussion/Laboratory 4 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

DRA 041B – Intermediate Jazz Dance (2 units)

Course Description: Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and a general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers.

Prerequisite(s): DRA 041A; or consent of instructor.

Learning Activities: Discussion/Laboratory 4 hour(s).

Repeat Credit: May be repeated 1 time(s) with consent of instructor.

Grade Mode: Letter.

DRA 042A – Beginning Ballet (2 units)

Course Description: Fundamentals of ballet, focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history.

Learning Activities: Discussion/Laboratory 4 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 042B – Intermediate Ballet (2 units)

Course Description: Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythmic, and qualitative understanding. Anatomy, ballet terminology, and dance history.

Prerequisite(s): DRA 042A; or consent of instructor.

Learning Activities: Discussion/Laboratory 4 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 043A – Contact Improvisation Dance (2 units)

Course Description: Fundamentals of contact improvisation and its applications to all forms of dance, performance, sports, physical safety and health. Solo improvisation, safety, communication, alignment, basic lifting and weight-sharing, intuition, developing relaxed readiness and personal expression.

Learning Activities: Lecture/Lab 4 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 043B – Intermediate Contact Improvisation (2 units)

Course Description: Building on the fundamentals. Reviewing basics, extended improvising, skillfully working with partners of different sizes and abilities, advanced lifting, advanced safety practices, embracing risk and disorientation, subtle nuances of communication.

Prerequisite(s): DRA 043A; or consent of instructor.

Learning Activities: Lecture/Lab 4 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 044A – Beginning Hip Hop Dance (2 units)

Course Description: Fundamentals of Hip Hop dance focusing on developing a fluid movement vocabulary, facility in body isolations, intricate rhythmic patterning, quick shifts of weight and mastering dance combinations. Discussions on Hip Hop dance history, styles and terminology.

Learning Activities: Discussion/Laboratory 4 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

DRA 044B – Intermediate Hip Hop Dance (2 units)

Course Description: Expansion of Hip Hop dance vocabulary by focusing on mastering body isolations and intricate rhythmic techniques, complex dance combinations, advanced across the floor sequences.

Prerequisite(s): DRA 044A; or consent of instructor.

Learning Activities: Discussion/Laboratory 4 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

DRA 055 – Contemporary Local, National & Global Theatre, Dance & Performance (4 units)

Course Description: Introduction a range of contemporary theatre, dance and performance in local, national and international settings. Training in critical approaches to and aesthetic appreciation of these forms.

Emphasis varies based on instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC).

DRA 056A – History of Theatre & Dance I: Myth, Magic & Madness (4 units)

Course Description: Exploration of aesthetic movements in various disciplines of theatre and dance from the origins to 1550. Examination of Greek, Roman, Sanskrit, Kathakali, Chinese, Japanese, Mesoamerican, Medieval European, and Indigenous theatre and dance including oral, ritual and shamanic performance. Offered once a year.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

DRA 056B – History of Theatre & Dance II: Romance, Revenge & Rebellion (4 units)

Course Description: Exploration of aesthetic movements in various disciplines of theatre and dance from 1550-1850. Examination of genres related to romance, revenge and rebellion using European, North and South American, and Asian examples. Offered once a year.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

DRA 056C – History of Theatre & Dance III: Sex, Society & the State (4 units)

Course Description: Exploration of aesthetic movements in various disciplines of theatre and dance from 1850-1968. Examination of melodrama, popular theatre, naturalism, psychological realism, and the avant-garde using European, North and South American, Asian, and African examples. Offered once a year.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

DRA 092 – Internship in Dramatic Art (1-12 units)

Course Description: Internship outside the Department of Theatre & Dance enabling students to practice their skills.

Prerequisite(s): Consent of instructor and department chairperson.

Learning Activities: Variable 1-12 hour(s).

Enrollment Restriction(s): Restricted to lower division students with less than 84 units completed.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

DRA 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students.

Learning Activities: .

Grade Mode: Pass/No Pass only.

DRA 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

DRA 111 – Presentation, Communication & Collaboration (4 units)

Course Description: Use of theater techniques for development of clear oral and physical communication skills that build confidence, presentational style and clarity for students whose command of English is at a competent to fluent level.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 4 hour(s).

Enrollment Restriction(s): Limited to 20 students.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL).

DRA 111S – Representation & Identity in Culture & Cinema (4 units)

Course Description: Issues of personal and collective identity via study of film narratives from different cultures. Reflection of dominant cultural identities in film. May be taught abroad in Australia.

Learning Activities: Lecture/Discussion 2 hour(s), Film Viewing 4 hour(s).

Grade Mode: Letter.

DRA 114 – Theatre on Film (4 units)

Course Description: Study of six/eight plays on film, using mixed casts and raising issues of diversity. Focus: sociohistorical context for production and reception, interpretation and analysis of topics (gender, ethnicity, age, politics, philosophy), and filming, screenwriting, design, and acting/directing for film.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 2 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL).

DRA 115 – Advanced Study of Major Film Makers (4 units)

Course Description: Analysis of the contribution of some outstanding film creators. Study of diverse aesthetic theories of the cinema and their application to selected films.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 2 hour(s).

Repeat Credit: May be repeated when different film creator studied, or studied with a different methodological approach.

Grade Mode: Letter.

General Education: Visual Literacy (VL).

DRA 116 – Design on Screen (4 units)

Course Description: Analysis of the contribution of outstanding designers for cinema, television and filmed entertainment. Study of diverse aesthetic theories of production design and art direction, costume design, or cinematography. Introductory principles and practice, history.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Cross Listing: CTS 116.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 120 – Intermediate Acting/Gateway: The Actor's Toolkit (4 units)

Course Description: Implementation of acting tools drawn predominantly from Stanislavsky's 'system'. Gateway into the Advanced Acting courses.

Prerequisite(s): DRA 021A; or consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Oral Skills (OL); Visual Literacy (VL).

DRA 121A – Advanced Acting: Scene Study & Script Analysis (4 units)

Course Description: In-depth study, analysis and performance of texts from different eras, genres and styles. Implementation of tools to undertake independent preparation of character creation.

Prerequisite(s): DRA 120; and consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 8 unit(s) (twice) as acting requires repetition to habituate the body and imagination to new practices; new scripts and scenes must be undertaken in the repetition.

Grade Mode: Letter.

General Education: Oral Skills (OL); Visual Literacy (VL).

DRA 121B – Advanced Acting: Rehearsal Processes & Practices (4 units)

Course Description: Development of rehearsal practice and etiquette, using a variety of scenes from different eras and genres. Established to enable visiting artists in residence to undertake the instruction, as well as faculty.

Prerequisite(s): DRA 120; and consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 8 unit(s) (twice) as student is exposed to different professional practitioners' working processes; new etudes, scripts and scenes must be undertaken in the repetition.

Grade Mode: Letter.

General Education: Oral Skills (OL); Visual Literacy (VL).

DRA 121C – Advanced Acting: Character & Style (4 units)

Course Description: Study of psycho-physical techniques to create characters with an emphasis on non-realistic styles.

Prerequisite(s): DRA 120; and consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 8 unit(s) (twice) as acting requires repetition to habituate the body and imagination to new practices; new scripts and scenes must be undertaken in the repetition.

Grade Mode: Letter.

General Education: Oral Skills (OL); Visual Literacy (VL).

DRA 122A – Advanced Acting: Devising & Collaboration (4 units)

Course Description: Study and practice of various devising techniques, to collaborate on and produce a series of short etudes and dramatic scenes/short plays.

Prerequisite(s): DRA 120; and consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 8 unit(s) (twice) as acting requires repetition to habituate the body and imagination to new practices; new scripts and scenes must be undertaken in the repetition.

Grade Mode: Letter.

General Education: Oral Skills (OL); Visual Literacy (VL).

DRA 122B – Advanced Acting: Shakespeare & His Contemporaries (4 units)

Course Description: Study and performance of classical texts (monologues and dialogues), with a focus on Shakespeare and the Elizabethan world view.

Prerequisite(s): DRA 120; and consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 8 unit(s) (twice) as acting requires repetition to habituate the body and imagination to new practices; new monologues and scenes must be undertaken in the repetition.

Grade Mode: Letter.

General Education: Oral Skills (OL); Visual Literacy (VL).

DRA 122C – Advanced Acting: Special Topics in Acting (4 units)

Course Description: Intensive study and practical exploration of a specialized area; for example, World Theatre, Social Theatre, Physical Theatre, Musical Theatre, the Ancient Greeks, etc.

Prerequisite(s): DRA 120; and consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Enrollment Restriction(s): Restricted to Theatre & Dance majors; limited enrollment.

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

DRA 124A – Principles of Theatrical Design: Scenery (4 units)

Course Description: Scene design processes, working drawings, sketching techniques, scale models, methods and materials of scenery construction.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Upper division standing; Pass One restricted to Theatre & Dance majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 124B – Principles of Theatrical Design: Scenery (4 units)

Course Description: Analysis of plays in terms of scene design, elements of design, execution of designs for modern and period plays.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Upper division standing; Pass One restricted to Theatre & Dance majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 124C – Principles of Theatrical Design: Lighting (4 units)

Course Description: Theories of lighting the stage, equipment and control systems, execution of lighting plots.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 4 hour(s).

Enrollment Restriction(s): Upper division standing; Pass One restricted to Theatre & Dance majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 124D – Principles of Theatrical Design: Costume (4 units)

Course Description: Source materials for theatrical costuming, selecting fabrics, elements of design, analysis of plays in terms of costume design, execution of designs for modern and period plays.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Upper division standing; Pass One restricted to Theatre & Dance majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

DRA 124E – Costume Design for Film (4 units)

Course Description: Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Execution of designs for period and contemporary films. Viewing of current films.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Theatre & Dance majors.

Cross Listing: CTS 124E.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

DRA 125 – Scenic Painting: Studio (4 units)

Course Description: Scene painting techniques, practices and materials including color mixing and matching, wood graining, faux painting techniques, glazing, creating foliage, stone and brick.

Prerequisite(s): DRA 024 or DRA 028; or consent of instructor. Upper division standing in Theatre Dance, Art Studio, or Design.

Learning Activities: Lecture 2 hour(s), Studio 1 hour(s), Laboratory 3 hour(s).

Repeat Credit: May be repeated 1 time(s) with consent of instructor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 126 – Principles of Performing Arts Stage Management (4 units)

Course Description: Stage management principles for theatre, dance, musical theatre, music, and concerts. The dynamical role of the stage manager in the performing arts, upper-management team.

Prerequisite(s): DRA 028.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

DRA 126A – Topics in Entertainment Engineering (4 units)

Course Description: Engineering topics faced by technical designers in live entertainment. Project-based exploration of: theatrical rigging, scenic automation, the role of the technical director, and structural design for the stage.

Prerequisite(s): DRA 028 C- or better; consent of instructor.

Learning Activities: Lecture/Lab 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Theatre & Dance majors.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DRA 127A – Principles of Directing (4 units)

Course Description: Director's creative approach to the play and to its staging.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Visual Literacy (VL).

DRA 127B – Principles of Directing (4 units)

Course Description: Director's creative approach to the actor.

Prerequisite(s): DRA 127A; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s), Rehearsal.

Grade Mode: Letter.

General Education: Visual Literacy (VL).

DRA 128 – Principles of Theatre Sound (4 units)

Course Description: Fundamentals of sound, sound equipment, and sound design as used in modern theatre and other performance venues. Assembly, set-up, and operation of basic theatre sound reinforcement system, recording system, and theatrical playback system.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DRA 130 – Approaches to Theatrical Design: Practice & Theory (4 units)

Course Description: Advanced design study in specific areas including but not limited to: research, design styles and concepts, new materials and techniques, scenery, lighting, costume, makeup, photography, projections, computer technology, spectacle and special effects, and alternative theatre forms and genres.

Prerequisite(s): DRA 124A or DRA 124B or DRA 124C or DRA 124D or DRA 124E; upper division standing in Theatre Dance, Art Studio or Design; or consent of instructor.

Learning Activities: Seminar 2 hour(s), Studio 4 hour(s).

Repeat Credit: May be repeated 3 time(s) when topic differs; when instructor differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 135 – Voice in Performance (4 units)

Course Description: Progression of exercises to free, develop and strengthen the voice, as a human and then as an actor's instrument with emphasis on how the voice works, to freeing the channel for sound, to interpersonal communication. Exploration of sound use from student's individual history and culture. Required to complete more in-depth and advanced midterm and final assignments. Repeat to further develop an understanding of technique and practice.

Prerequisite(s): DRA 120; or consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD).

DRA 140A – Dance Composition (4 units)

Course Description: Introduction to the craft of choreography. Compose phrases and present movement studies based on the elements of choreography: motivation, space, time, force/energy.

Prerequisite(s): DRA 040A or DRA 041A or DRA 042A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Visual Literacy (VL).

DRA 140B – Dance Composition (4 units)

Course Description: Continuation of the study of choreography, focusing on the development of group choreography: duets, trios, quartets and group work, form, and accompaniment.

Prerequisite(s): DRA 140A.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

DRA 140C – Dance Composition (4 units)

Course Description: Continuation of study of choreography focusing on sequencing movements for groups. The relation between dance and allied mediums of music, sets, costumes and lighting. Students conceptualize a choreographic issue and explore it through creation of short dance studies.

Prerequisite(s): DRA 140A; DRA 140B.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

DRA 141 – Introduction to the Fundamentals of Movement (4 units)

Course Description: Introduction to fundamentals of movement that combines intellectual and kinesthetic understanding of the body's skeletal and muscular systems. Explorations based on theories of various body mind specialists including Laban, Feldenkrais, Bartenieff and Sweigard as well as the eastern discipline of Yoga.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Visual Literacy (VL).

DRA 142 – History of Modern Dance (4 units)

Course Description: Modern Dance tradition, focusing on its theorizations of individual and social identity. Students will write and choreograph analyses of principle dances in this tradition.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

DRA 143 – Dance & Movement Studio (1-4 units)

Course Description: Special studies in dance and movement such as African, Balinese, Baroque, Chinese, European, and stage combat. Offered as needed for stage productions.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion/Laboratory 2-8 hour(s).

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 144 – Introduction to Traditional Chinese Physical Culture (4 units)

Course Description: Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

DRA 144A – Introduction to Traditional Chinese Embodied Culture (4 units)

Course Description: Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC).

DRA 144B – Traditional Chinese Physical Culture (4 units)

Course Description: Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications.

Prerequisite(s): DRA 144A.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated 2 time(s) when content and instructor differs and if student progression is required.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC).

DRA 144C – Daoist Philosophy in Traditional Chinese Movement Culture (4 units)

Course Description: Daoist practices of movement and their relation to daoist philosophy, explored through work in dance laboratory conditions. Integration of practice with conceptual analysis, and critical philosophy around values and ethical action.

Prerequisite(s): DRA 144B.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated 2 time(s) when content or instructor differs and if student progression is required.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC).

DRA 145 – Directed Choreography Projects (4 units)

Course Description: Conceptualization, creation, casting, rehearsing, and concert presentation of complete dances, with students integrating elements of stagecraft and directing the on-stage rehearsals.

Prerequisite(s): DRA 140A or DRA 140B or DRA 140C; or consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s), Rehearsal.

Repeat Credit: May be repeated 4 time(s) with consent of instructor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DRA 146A – Professional Track Modern Dance I (4 units)

Course Description: Professionally oriented performance training. Rigorous, consistent training regimen based on traditional modern dance technique. Breath and voice, skeletal and muscular placement, moving from the spine, contraction technique, movement intention.
Prerequisite(s): Consent of instructor.
Learning Activities: Lecture/Lab 6 hour(s).
Repeat Credit: May be repeated 2 time(s).
Grade Mode: Letter.
General Education: Visual Literacy (VL).

DRA 146B – Professional Track Modern Dance II (4 units)

Course Description: Body and space relationships in solos, duets and group work; stylistic variations of Graham technique; works of Paul Taylor.
Prerequisite(s): DRA 146A; and consent of instructor.
Learning Activities: Lecture/Lab 6 hour(s).
Repeat Credit: May be repeated 1 time(s).
Grade Mode: Letter.
General Education: Visual Literacy (VL).

DRA 146C – Professional Track Modern Dance III (4 units)

Course Description: Continuation of DRA 146B. Time as a theatrical device, sustaining movement and non-movement, phrasing, musicality.
Prerequisite(s): DRA 146A; DRA 146B; and consent of instructor.
Learning Activities: Lecture/Lab 6 hour(s).
Repeat Credit: May be repeated 1 time(s).
Grade Mode: Letter.
General Education: Visual Literacy (VL).

DRA 150 – American Theatre & Drama (4 units)

Course Description: The history of the theatre from Colonial times to the present. Readings of selected plays.
Learning Activities: Lecture 4 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); Writing Experience (WE).

DRA 151 – Musicals: History, Practice & Production (4 units)

Course Description: Historical exploration of the musical through the lens of practice and production. Choreographic and compositional elements. Tracing of evolution of story through development, production, revival, and adaptation. Collaborative production of excerpts from work.
Prerequisite(s): Consent of instructor; DRA 021A or previous experience in theatre performance recommended.
Learning Activities: Lecture/Lab 4 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Domestic Diversity (DD).

DRA 151S – Australian Performance & Culture (4 units)

Course Description: Australian performance and theatre practices as a product of its culture of origin. Relationships between art and society. May be taught abroad in Australia.
Learning Activities: Lecture/Discussion 2 hour(s), Seminar 2 hour(s).
Grade Mode: Letter.

DRA 153 – Latinx Theatre & Performance (4 units)

Course Description: Latinx theatre and performance. Historical, aesthetic, and socio-cultural contexts. Engagement through critical analysis, embodied practice, and creation of new work.

Learning Activities: Lecture/Lab 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Writing Experience (WE).

DRA 154 – Asian Theatre & Drama: Contexts & Forms (4 units)

Course Description: Selected Asian plays and performance forms in their cultural and artistic contexts; myth, ritual and the theatre; performance training, visual presentation of the text; political theatre; intercultural performance—the fusion of Asian and Western traditions.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

DRA 155 – Representing Race in Performance (4 units)

Course Description: Representation and performance of "race" in American culture featuring different sub-headings such as "African American Theatre" or "Asian-Americans on Stage."

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Writing Experience (WE).

DRA 155A – African American Dance & Culture in the United States, Brazil & the Caribbean (4 units)

Course Description: Comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: AAS 155A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

DRA 155B – Ancient & Contemporary Greek Theatre & Dance (6 units)

Course Description: Origins of early theatres and the first actors, playwrights and dancers and their powerful influence on western performance and thought up to present day. Offered in Greece.

Learning Activities: Discussion/Laboratory 10 hour(s), Performance Instruction 10 hour(s), Seminar 13 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DRA 156A – Performance Analysis (4 units)

Course Description: Performance on the stage, in the street, in everyday life, ritual and in politics. Satire, irony, creative protest and performance. Social movements, the state and performance as tactical intervention.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Writing Experience (WE).

DRA 156B – Theatre in History & Place: Local, National & Global Conditions for Production (4 units)

Course Description: Exploration of local, national and global issues in theatre production, with special attention to historical changes in social and political contexts for performance.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

DRA 156C – Modern Aesthetic Movements in Performance (4 units)

Course Description: Important movements in performance, especially theatre and dance, from realism to the present. Primary emphasis on Western traditions though others may be studied.

Learning Activities: Discussion/Laboratory 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

DRA 156D – Theatre History Through Shakespeare (4 units)

Course Description: Shakespeare's plays, theatre history, and theatre today. European contexts from 1590-2004 and international theatre from 20th century. Stagecraft, different media (print, stage, film), social/political environments, design, and cultural change (gender, sexuality and ethnicity).

Learning Activities: Lecture 4 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

DRA 158 – Performance Studies Undergraduate Seminar (4 units)

Course Description: Focused inquiry into a particular genre, period, movement, artist, or theme in performance. Philosophical and aesthetic issues as well as historical and cultural performance contexts. In-depth research projects in relationship to the subject of inquiry.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

DRA 159 – Contemporary Experimental Performance, Theatre & Drama (4 units)

Course Description: Evaluation and examination of the "New Theatre;" its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 3 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

DRA 159S – Contemporary Experimental Performance, Theatre & Drama (4 units)

Course Description: Evaluation and examination of the "New Theatre;" its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature. May be taught abroad.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated 12 unit(s) when instructor or content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

DRA 160A – Principles of Playwriting (4 units)

Course Description: Analysis of dramatic structure; preparation of scenarios; the composition of plays.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

DRA 160B – Principles of Playwriting (4 units)

Course Description: Analysis of dramatic structure; preparation of scenarios; the composition of plays.

Prerequisite(s): DRA 160A; and consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

DRA 170 – Media Theatre (4 units)

Course Description: New media and application of in theatre devising and performance. Emphasis on collaborative process in relationship to integration of emerging technologies and formation of new theatrical works. Development of collaborative performance through lecture, demonstration, improvisation and experimentation.

Learning Activities: Lecture 1 hour(s), Rehearsal 2 hour(s), Performance Instruction 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 174 – Acting for Camera (4 units)

Course Description: Analysis and practice of acting skills required for camera work and digital media.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 6 hour(s).

Repeat Credit: May be repeated 2 time(s) when instructor differs.

Cross Listing: CDM 107.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DRA 175 – Small Scale Film Production (4 units)

Course Description: Lecture and intensive workshop teaching small-scale film production. Appointments as a(n) director, director of photography, actor, writer, lighting designer, sound designer and other critical positions are used to produce and submit a short film to a film festival.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Repeat Credit: May be repeated 2 time(s).

Cross Listing: TCS 175.

Grade Mode: Letter.

DRA 180 – Theatre Laboratory (1-5 units)

Course Description: Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 180A – Theatre Laboratory: Performance (1-5 units)

Course Description: Rehearsal and performance of a production directed or choreographed by visiting Granada Artists-in-Residence and/or faculty, and/or the UG Edge Festival.

Prerequisite(s): Consent of instructor.

Learning Activities: Rehearsal 12 hour(s).

Enrollment Restriction(s): Limited enrollment; admission by audition.

Repeat Credit: May be repeated as each production involves different scripts, directions, challenges of rehearsal practices and performance processes, it is possible for students to appear in a variety of productions in the course of their education.

Grade Mode: Letter.

DRA 180B – Theatre Laboratory: Design (1-4 units)

Course Description: Design-related participation in Theatre & Dance productions involves research, creation and implementation of design concept in collaboration with the director and other members of the production team.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Repeat Credit: May be repeated as each theatrical piece is conceived and produced afresh with new source material, scripts, and production style, the challenges and assignments for the designers are new each time they design a show.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

DRA 180C – Theatre Laboratory: Management, Directing, other Production Team (1-5 units)

Course Description: Participation in Theatre & Dance production in management, direction, choreography, dramaturgy, writing or other production related role; research, creation and implementation of production concept in collaboration with members of the production team and cast.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated with required permission from the Theatre & Dance department.

Grade Mode: Letter.

DRA 180D – Theatre Laboratory: Crew (2-4 units)

Course Description: Participation in Theatre & Dance productions as backstage running crew which will involve skill development, rehearsal and execution of performance.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 6-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 180E – Theatre Laboratory: Scenic (1-4 units)

Course Description: Practical experience working on scenery and properties for Theatre & Dance department productions. Study and execution of basic scenery and prop engineering, construction, painting, rigging. Study of techniques, materials, tools, and equipment use. Skill development, professional etiquette. Safety training requirement.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 180F – Theatre Laboratory: Costume (1-4 units)

Course Description: Practical experience working on costumes for Theatre & Dance department productions. Study and execution of basic costume construction techniques and materials, tools, and equipment use. Skills development, professional etiquette. Safety training requirement.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 180G – Theatre Laboratory: Lighting/Sound/Projection (1-4 units)

Course Description: Practical experience working on lighting, sound or projections for Theatre & Dance department productions. Study and execution of basic techniques, materials, tools, and equipment use. Skill development, professional etiquette. Safety training requirement.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 185A – Special Topics: Artist in Residence-Seminar (4 units)

Course Description: Exploration of contemporary topics in Theatre and Dance. Individual and collaborative project-based learning. Topics vary by instructor.

Prerequisite(s): Consent of instructor or upper division major in Theatre and Dance.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Theatre & Dance majors only.

Repeat Credit: May be repeated 3 time(s) when instructor differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DRA 185B – Special Topics: Artist in Residence-Studio (4 units)

Course Description: Studio course in any area of Theatre & Dance offered by artist in residence. Individual and collaborative studio and practice-based learning. Topics vary by instructor.

Prerequisite(s): Consent of instructor or upper division major standing in Theatre Dance.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Pass One restricted to Theatre & Dance majors.

Repeat Credit: May be repeated 3 time(s) when instructor differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

DRA 192 – Internships in Theatre & Dance (1-12 units)

Course Description: Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies.

Learning Activities: Internship 3-36 hour(s).

Credit Limitation(s): Not open to students who have completed DRA 192S.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

DRA 192S – Internships in Theatre & Dance (1-12 units)

Course Description: Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. May be taught abroad.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

DRA 194HA – Special Study for Honors Students (3 units)

Course Description: Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Theatre & Dance.

Prerequisite(s): Qualification for Letters Science Honors Program and admission to Theatre Dance Senior Honors Program.

Learning Activities: Independent Study 9 hour(s).

Grade Mode: Pass/No Pass only.

DRA 194HB – Special Study for Honors Students (3 units)

Course Description: Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Theatre & Dance.

Prerequisite(s): Consent of instructor; qualification for Letters Science Honors Program and admission to Theatre Dance Senior Honors Program.

Learning Activities: Independent Study 9 hour(s).

Grade Mode: Letter.

DRA 195 – Senior Capstone Experience (2 units)

Course Description: Capstone experience for majors. Examination, reflection and synthesis on development. Discussion of professional development and translatable skills. Individual project and development of portfolio.

Learning Activities: Project, Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to Theatre & Dance Majors who have completed 135 or more units.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); Writing Experience (WE).

DRA 197T – Tutoring in Dramatic Art (1-5 units)

Course Description: Leading of small voluntary groups affiliated with one of the department's regular courses.

Prerequisite(s): Consent of instructor; upper division or graduate standing with major in Theatre Dance; consent of department chairperson.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

DRA 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

DRA 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

DRA 200 – Methods & Materials in Theatre Research (4 units)

Course Description: Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

DRA 211 – Advanced Voice & Speech (3 units)

Course Description: Review a progression of exercises to free, develop and strengthen the voice, first as a human instrument, and then as an actor's instrument using various texts such as Shakespeare, Ibsen and contemporary plays. Required for the M.F.A. degree in Acting.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Open only to Dramatic Arts Students and Ph.D. students with an emphasis in Performance and Theatre.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

DRA 212 – Advanced Stage Movement (3 units)

Course Description: Application of modes of exploration, breath placement, and the use of imagery as well as Laban's effort/shape system as a method of analysis in classic and modern plays.

Prerequisite(s): Consent of instructor; graduate standing in the MFA Program.

Learning Activities: Laboratory 6 hour(s).

Enrollment Restriction(s): Open to advanced undergraduates by consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 221 – Special Problems in Advanced Acting (4 units)

Course Description: Advanced acting problems arising from differences in the type and style of plays selected from Greece to the present.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s), Laboratory 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 224A – Seminar in Theatrical Design: Ancient Worlds; Early 17th Century (4 units)

Course Description: Group study while focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Greek, Medieval, Renaissance, Shakespearean, Jacobean, early 17th century. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s), Project 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 224B – Seminar in Theatrical Design: Mid-17th Century to 1900 (4 units)

Course Description: Group study focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Cavalier, Restoration 18th century opera and ballet, 19th century drama. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s), Project 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 224C – Seminar in Theatrical Design: the 20th Century (4 units)

Course Description: Group study focusing primarily on one discipline: scenic, costume or lighting design. Genres covered in 20th century: Realism, Brecht, Musicals, Contemporary Dance, short narrative film. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s), Project 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 224D – Seminar in Theatrical Design: Contemporary Concepts (4 units)

Course Description: Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on contemporary design concepts for new works and classics: Shakespeare, modern dance, concept plays and musicals. Script and character analysis for design in performance, research, design projects.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s), Project 2 hour(s).

Grade Mode: Letter.

DRA 224E – Seminar in Theatrical Design: Advanced Concepts (4 units)

Course Description: Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on special issues in contemporary design concepts for new works and classics. Script and character analysis for design in performance, research, design projects.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s), Project 2 hour(s).

Grade Mode: Letter.

DRA 225 – Performance Design Studio: Techniques & Media (2 units)

Course Description: Exploration and development of techniques and skills in the performance design process. Drafting, model building, drawing, painting and rendering, costume drawing, color theory, lighting techniques, design portfolio preparation and presentation.

Prerequisite(s): DRA 224A (can be concurrent) or DRA 224B (can be concurrent) or DRA 224C (can be concurrent) or DRA 224D (can be concurrent) or DRA 224E (can be concurrent); consent of instructor.

Learning Activities: Studio 2 hour(s).

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

DRA 228 – Seminar in Directing Theory: Non-Realism (4 units)

Course Description: Modern directing theory as it applies to non-realistic theatre; development of directorial concepts for production of selected non-realistic plays-Greek to the present; emphasis on textual analysis.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

DRA 229 – Special Problems in Directing (4 units)

Course Description: Projects in directing scenes selected from plays from ancient Greece to the present.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s), Laboratory 2 hour(s), Rehearsal 4 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

DRA 230 – Advanced Problems in Choreography & Performance (2 units)

Course Description: Explores contemporary issues of choreography and performance in depth and how those issues pertain to performance work. Focus will include contemporary thought on representation, legibility, new forms, and cultural attitudes.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion/Laboratory 2 hour(s).

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Letter.

DRA 244 – Critical Approaches to Traditional Systems of Body Movement (4 units)

Course Description: Introduction to traditional systems for body movement, development of critical approaches to them, and experiments in how they inform training and practice in theatre, dance, and performance.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion/Laboratory 6 hour(s), Project, Term Paper.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

DRA 250 – Modern Theatre (4 units)

Course Description: Theatre of Europe and America, 1860-1940, with emphasis on the relationship of the dramas of the period to the physical circumstances under which they were produced.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

DRA 251 – Scoring & Scripting in Performance (4 units)

Course Description: Process of weaving together various performance elements brought into play by the artists in their respective disciplines. The "script" is the thread from which the artists' "scores" will layer and transform the "script" into performance for specific time, place, spectators.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

DRA 252 – Performance: Concepts of Space, Place, & Time (4 units)

Course Description: Innovative theories of creating performance spaces, establishing a sense of place, and communicating the concept of time explored through collaborative interaction. Research includes traditional principles, site-specific spaces and consideration of various tempi from music and movement.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

DRA 253 – Approaches to Collaboration (4 units)

Course Description: Exploration of different approaches to collaboration among artists in different media and their influence on the creative process.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

DRA 254 – Performing Identities/Personae (4 units)

Course Description: Historical and contemporary theories of constructing stage identities. Discussion and project collaborations based on theories. Questions of identity related to ethnicity, gender or sexual orientation.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

DRA 255 – Composition in the Arts (4 units)

Course Description: Examine manner in which specific elements utilized by actors, dancers, directors, choreographers, and designers are combined or related to form a whole in space and time, as well as methods of sequencing used by each discipline to produce artistic products.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

DRA 256 – Visual Language for Performance (4 units)

Course Description: Exploration of different approaches and methods to the visual elements of performance. Focus on design and style for different media and genres, storytelling through visual elements of performance.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

DRA 257 – Interdisciplinary Seminar in Theatre, Dance & Performance (1 unit)

Course Description: Interdisciplinary seminar for first- and second-year M.F.A. students in Theatre & Dance. Topics range from current practice in dance, theatre, film and performance, to leading edge developments by outstanding practitioners in the field.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1.50 hour(s), Project 1.50 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.F.A. in Dramatic Art; students taking the Ph.D. in Performance Studies or the D.E. in Studies in Performance & Practice.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

DRA 259 – Topics in Contemporary Theatre & Performance (4 units)

Course Description: Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship; e.g., "Brecht & After," "British Theater," "Race & Gender in Performance."

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

DRA 260 – Approaches & Methodologies to Studies in Performance & Practice (4 units)

Course Description: Instruction is offered a variety of disciplinary approaches and methodologies in Performance & Practice, with a focus is on cross-disciplinary learning and research. Usually offered each quarter.

Prerequisite(s): Admission to any graduate program in the University and consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper, Project.

Enrollment Restriction(s): Preference to students enrolled in the Designated Emphasis in Studies in Performance and Practice.

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

DRA 265A – Performance Studies: Modes of Production (4 units)

Course Description: Introduces students to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetorical and political theory. Usually offered in alternate years.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper, Project.

Repeat Credit: May be repeated 3 time(s) when topic and instructor differs.

Grade Mode: Letter.

DRA 265B – Performance Studies: Signification & the Body (4 units)

Course Description: Introduces students to analysis of the body in performance, drawing on theoretical models from several fields.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper, Project.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

DRA 265C – Performance Studies: Performance & Society (4 units)

Course Description: Introduces students to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper, Project.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

DRA 265D – Performance studies: Theory, History, Criticism (4 units)

Course Description: Introduction to the theory, history and criticism, informing performance studies.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper, Project.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

DRA 280 – Theatre Laboratory (1-12 units)

Course Description: Advanced practice in acting, designing, directing, playwriting, and technical theatre.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

DRA 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

DRA 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

DRA 299D – Dissertation Research (1-12 units)

Course Description: Dissertation research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

DRA 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

DRA 413 – Stage Make-up (1 unit)

Course Description: Approved for graduate degree credit. Lectures, demonstrations, and practical work in aspects of theatrical make-up.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 2 hour(s).

Grade Mode: Letter.

East Asian Studies (EAS)

College of Letters & Science

EAS 088 – Korean Culture & Society: From Ancient Three Kingdoms to the Global K-Pop (4 units)

Course Description: Evolution of Korean society from Three Kingdoms period (B.C.E 57 to C.E. 676) to the contemporary era emphasizing the perseverance and transformations of traditional social and cultural patterns.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: HIS 009C.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

EAS 113 – Cinema & Society in China (4 units)

Course Description: Knowledge of Chinese not required. Viewing and analysis of one Chinese film with English subtitles each week, followed by discussion and short essays. Cinematic technique, social values and film topics from 1930s to today.

Prerequisite(s): HIS 190C; HIS 193; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHN 113.

Grade Mode: Letter.

EAS 190 – East Asian Studies Seminar (4 units)

Course Description: Political, social, cultural, and economic issues in East Asia. Topic varies each year.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EAS 192 – East Asian Studies Seminar (1-12 units)

Course Description: Work experience in the East Asian Studies field, with analytical term paper on a topic approved by the instructor.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3-36 hour(s), Term Paper.

Grade Mode: Pass/No Pass only.

EAS 194H – Special Study for Honors Students (1-5 units)

Course Description: Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in East Asian Studies culture, society, or language.

Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program.

Learning Activities: Independent Study 1-5 hour(s).

Grade Mode: Pass/No Pass only.

EAS 196A – Honors Seminar (4 units)

Course Description: A two-quarter research project culminating in an Honors thesis. A grade of B or higher must be earned to qualify the student for honors distinction at graduation.

Prerequisite(s): Consent of instructor; GPA of 3.500 in the major; senior standing.

Learning Activities: Seminar 2 hour(s), Conference 2 hour(s).

Grade Mode: Pass/No Pass only.

EAS 196B – Honors Seminar (4 units)

Course Description: A two-quarter research project culminating in an Honors thesis. A grade of B or higher must be earned to qualify the student for honors distinction at graduation.

Prerequisite(s): Consent of instructor; GPA of 3.500 in the major, senior standing.

Learning Activities: Seminar 2 hour(s), Conference 2 hour(s).

Grade Mode: Pass/No Pass only.

EAS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

Ecology (ECL)

College of Agricultural & Environmental Sciences

ECL 200AN – Principles & Applications of Ecology (5 units)

Course Description: Covers principles of community structure and functioning, species diversity patterns, ecosystem ecology and biogeochemistry, landscape ecology, biogeography and phylogenetics. *Prerequisite(s):* STA 102; MAT 016A; MAT 016B; or consent of instructor; first course in Ecology (e.g., ESP 100).

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to graduate majors.

Grade Mode: Letter.

ECL 200BN – Principles & Applications of Ecology (5 units)

Course Description: Provides a broad background in the principles and applications of ecology, and serves as a foundation for advanced ecology courses. Topics include ecophysiology, behavioral ecology, population ecology, genetics and evolution. Emphasis on historical developments, current understanding, and real world applications.

Prerequisite(s): STA 102; MAT 016A; MAT 016B; or consent of instructor; first course in Ecology (e.g., ESP 100).

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to graduate majors.

Grade Mode: Letter.

ECL 205 – Community Ecology (4 units)

Course Description: Introduction to literature and contemporary research into processes structuring ecological communities.

Prerequisite(s): An upper division course in Ecology (ECL).

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

ECL 206 – Concepts & Methods in Plant Community Ecology (4 units)

Course Description: Principles and techniques of vegetation analysis, including structure, composition, and dynamics. Emphasis given to sampling procedures, association analysis, ordination, processes and mechanisms of succession, and classification. Most techniques are demonstrated or conducted during field trips and laboratories.

Prerequisite(s): Consent of instructor; introductory courses in statistics and plant ecology.

Learning Activities: Lecture 3 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

ECL 207 – Plant Population Biology (3 units)

Course Description: Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological ecological and genetic approaches to plant population biology.

Prerequisite(s): Advanced undergraduate ecology course (e.g., ESP 100, EVE 101, ENT 104 or PLB 117), and advanced undergraduate course in genetics and/or evolution (e.g., BIS 101 or EVE 100).

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: PBG 207.

Grade Mode: Letter.

ECL 208 – Issues in Conservation Biology (4 units)

Course Description: Graduate-level introduction to current research in conservation biology. Emphasizes reading and discussing primary literature. Specific topics will reflect the research interests of UC Davis conservation biology faculty.

Prerequisite(s): Introductory biology (e.g. BIS 002B) and an upper division organismal biology class.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECL 212A – Environmental Policy Process (4 units)

Course Description: Introduction to selected topics of the policy process and applications to the field of environmental policy. Develops critical reading skills, understanding of policy theory, and an ability to apply multiple theories to the same phenomena.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to graduate standing.

Cross Listing: ESP 212A.

Grade Mode: Letter.

ECL 212B – Environmental Policy Evaluation (4 units)

Course Description: Method and practice, philosophical basis, and political role of policy analysis. Reviews basic concepts from economic theory; how and why environmental problems emerge in a market economy; and tools necessary for solving environmental problems.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Graduate Standing.

Cross Listing: ESP 212B, ENV 200B.

Grade Mode: Letter.

ECL 214 – Marine Ecology: Concepts & Practice (3 units)

Course Description: Critical review and analysis of concepts and practices in modern marine ecology at the interface of several fields of study including oceanography, evolution, behavior, and physiology. Emphasis on critical thinking, problem solving, and hands-on study. Two field trips required.

Prerequisite(s): Consent of instructor. Graduate standing or one course in ecology, one course in evolution or genetics; survey course in marine ecology recommended.

Learning Activities: Lecture 1 hour(s), Discussion 1.50 hour(s), Fieldwork 1.50 hour(s).

Grade Mode: Letter.

ECL 215 – Social Ecological Systems (3 units)

Course Description: Overview of social-ecological systems that links environmental policy and decision-making to ecological processes. Delves deeper into different social science topics related to this broader idea. Applying of course readings to case studies chosen by students and a final paper.

Prerequisite(s): Completion of core courses for specific graduate programs, for example ECL 200A, ECL 200B.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

ECL 216 – Ecology & Agriculture (4 units)

Course Description: Ecological principles as relevant to agriculture. Integration of ecological approaches into agricultural research to increase ecosystem functions and services. Topics include crop autoecology, biotic interactions among crops and pests, ecosystem and landscape ecology.

Prerequisite(s): EVE 011; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have completed VCR 216. (Former VCR 216).

Grade Mode: Letter.

ECL 219 – Ecosystem Biogeochemistry (4 units)

Course Description: Multi-disciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere, and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies.

Prerequisite(s): Introductory courses in ecology/biology and soils are recommended; undergraduates accepted with consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Cross Listing: SSC 219.

Grade Mode: Letter.

ECL 224 – Data Management & Visualization in R (3 units)

Course Description: Introduction to programming and data analysis in R. Workflow (version control, markdown, reading and writing data), object-oriented programming, statistical analysis, and visualization.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Cross Listing: ENV 224.

Grade Mode: Letter.

ECL 225 – Terrestrial Field Ecology (4 units)

Course Description: Field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results are stressed.

Prerequisite(s): Introductory ecology and introductory statistics or consent of instructor.

Learning Activities: Seminar 1 hour(s), Fieldwork 12 hour(s).

Cross Listing: ENT 225, PBG 225.

Grade Mode: Letter.

ECL 231 – Mathematical Methods in Population Biology (3 units)

Course Description: Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed.

Prerequisite(s): MAT 016C or MAT 021C; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Cross Listing: PBG 231.

Grade Mode: Letter.

ECL 232 – Theoretical Ecology (3 units)

Course Description: Examination of major conceptual and methodological issues in theoretical ecology. Model formulation and development will be emphasized. Topics differ from year to year.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECL 233 – Computational Methods in Population Biology (3 units)

Course Description: Numerical methods for simulating population dynamics using the computational software package R. Emphasis placed on model formulation and development, theoretical concepts and philosophical principles to guide simulation efforts, model parameterization, and implementing simulations with R.

Prerequisite(s): A course in theoretical ecology (e.g., ECL 231 or an equivalent to ESP 121 from your undergraduate institution) or consent of instructor; no programming experience required.

Learning Activities: Lecture/Lab 2 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: PBG 233.

Grade Mode: Satisfactory/Unsatisfactory only.

ECL 234 – Bayesian Models: A Statistical Primer (4 units)

Course Description: Practical model-building skills and intuition in statistical modeling. Construction of accurate mathematical expressions to link observation to specific hypotheses. For researchers in the natural and social sciences.

Prerequisite(s): EVE 231 or PLS 205 or PLS 120 or EVE 225; or consent of instructor; experience with basic linear modeling and R coding strongly recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ECL 243 – Ecological Genomics (4 units)

Course Description: Genomics concepts, technologies, and analyses for ecology research. Mixture of lecture, discussion of recent literature, hands-on training in data analysis and experimental design, and research proposal preparation and evaluation. One all-day field trip is required.

Prerequisite(s): ECL 242; or equivalent training in ecology and genetics according to the discretion of the instructors.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

ECL 245 – Climate Change, Water & Society (4 units)

This version has ended; see updated course, below.

Course Description: Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Limited to 25 students.

Cross Listing: HYD 245, ATM 245.

Grade Mode: Letter.

ECL 245 – Climate Change Science & Impacts (4 units)

Course Description: Overview of climate change science with a focus on climate change communication. Impacts of climate change on water, agriculture, energy, health, infrastructure, ecosystem services, tribal and indigenous communities. Climate justice, political, societal, and economic dimensions of these issues.

Learning Activities: Lecture 3 hour(s), Project.

Cross Listing: HYD 245, ATM 245.

Grade Mode: Letter.

This course version is effective from, and including: Fall Quarter 2024.

ECL 262 – Advanced Population Dynamics (3 units)

Course Description: Logical basis for population models, evaluation of simple ecological models, current population models with age, size, and stage structure, theoretical basis for management and exemplary case histories. Emphasis on development and use of realistic population models in ecological research.

Prerequisite(s): Graduate standing; advanced course in ecology (e.g., EVE 101), population dynamics (e.g., WFC 122), and one year of calculus; familiarity with matrix algebra and partial differential equations recommended.

Learning Activities: Lecture 3 hour(s).

Cross Listing: WFC 262.

Grade Mode: Letter.

ECL 271 – Research Conference in Ecology (1 unit)

Course Description: Critical presentation and evaluation of current literature and ongoing research in ecology. Requirements include active participation in weekly discussions and the presentation of a paper or chapter once per quarter.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Cross Listing: PBG 271.

Grade Mode: Satisfactory/Unsatisfactory only.

ECL 280 – Current Anthropology Journal Editorial Workshop (4 units)

Course Description: Reading and offering workshop critiques of manuscripts submitted for publication, and reading and discussion of other relevant work in anthropology and human ecology. Track and edit published comments and authors' replies that accompany major features. Participation in the development of new sections for the electronic edition of the journal, including a "news and views" section and a debate section.

Prerequisite(s): Consent of instructor.

Learning Activities: Workshop 1 hour(s), Independent Study 3 hour(s).

Enrollment Restriction(s): Students must enroll for all three quarters.

Repeat Credit: May be repeated 12 unit(s) with consent of instructor.

Cross Listing: ANT 280.

Grade Mode: Satisfactory/Unsatisfactory only.

ECL 290 – Seminar in Ecology (1-4 units)

Course Description: Topics in ecology. Students are expected to present an oral seminar on a particular aspect of the general topic under consideration.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1-4 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ECL 296 – Topics in Ecology & Evolution (1 unit)

Course Description: Seminars presented by visiting lecturers, UC Davis faculty, and graduate students.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Cross Listing: PBG 292.

Grade Mode: Satisfactory/Unsatisfactory only.

ECL 297T – Tutoring in Ecology (1-4 units)

Course Description: Teaching ecology including conducting discussion groups for regular departmental courses under direct guidance of staff.

Prerequisite(s): Consent of instructor; graduate standing in ecology.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ECL 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ECL 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Economics (ECN)

College of Letters & Science

ECN 001A – Principles of Microeconomics (4 units)

Course Description: ECN 001A & ECN 001B may be taken in either order. Analysis of the allocation of resources and the distribution of income through a price system; competition and monopoly; the role of public policy; comparative economic systems.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL).

ECN 001AV – Principles of Microeconomics (4 units)

Course Description: Analysis of the allocation of resources and the distribution of income through a price system; competition and monopoly; the role of public policy; comparative economic systems.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ECN 001A.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL).

ECN 001AY – Principles of Microeconomics (4 units)

Course Description: Analysis of the allocation of resources and the distribution of income through a price system; competition and monopoly; the role of public policy; comparative economic systems.

Learning Activities: Web Virtual Lecture 1.5 hour(s), Lecture 1.5 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL).

ECN 001B – Principles of Macroeconomics (4 units)

Course Description: ECN 001A & ECN 001B may be taken in either order. Analysis of the economy as a whole; determinants of the level of income, employment and prices; money and banking, economic fluctuations, international trade, economic development; the role of public policy.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL).

ECN 001BV – Principles of Macroeconomics (4 units)

Course Description: Analysis of the economy as a whole; determinants of the level of income, employment and prices; money and banking, economic fluctuations, international trade, economic development; the role of public policy.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL).

ECN 090X – Lower Division Seminar (1-2 units)

Course Description: Examination of a special topic in Economics through shared readings, discussions, and written assignments.

Prerequisite(s): Consent of instructor. Lower division standing.

Learning Activities: Seminar 1-2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

ECN 092 – Internship & Field Work (1-12 units)

Course Description: Intensive study of practical application of concepts in economics, stressing research methods and empirical analysis.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s), Term Paper.

Grade Mode: Pass/No Pass only.

ECN 098 – Group Study for Undergraduates (1-5 units)

Course Description: Primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ECN 099 – Individual Study for Undergraduates (1-5 units)

Course Description: Individual study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ECN 100A – Intermediate Micro Theory: Consumer & Producer Theory (4 units)

Course Description: Consumer and producer theory. Equilibrium and welfare analysis. Topics include competitive markets, consumer and producer surplus at an intermediate level.

Prerequisite(s): (ECN 001A C- or better or ECN 001AY C- or better or ECN 001AV C- or better); (ECN 001B C- or better, or ECN 001BV C- or better); (MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better); (MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students that have taken ARE 100A or ECN 100.

Grade Mode: Letter.

ECN 100B – Intermediate Micro Theory: Imperfect Competition & Market Failure (4 units)

Course Description: Imperfect competition and market failure. Topics include exchange, monopoly, game theory, uncertainty, asymmetric information, and public goods.

Prerequisite(s): ECN 100A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students that have taken ARE 100B.

Grade Mode: Letter.

ECN 101 – Intermediate Macro Theory (4 units)

Course Description: Theory of income, employment and prices under static and dynamic conditions, and long term growth.

Prerequisite(s): (ECN 001A C- or better or ECN 001AV C- or better); (ECN 001B C- or better, or ECN 001BV C- or better); ((MAT 016A C- or better, MAT 016B C- or better) or (MAT 021A C- or better, MAT 021B C- or better) or (MAT 017A C- or better, MAT 017B C- or better)).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 102 – Analysis of Economic Data (4 units)

Course Description: Analysis of economic data to investigate key relationships emphasized in introductory micro and macro economics. Obtaining, transforming, displaying data; statistical analysis of economic data; basic univariate and multivariate regression analysis.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV); (STA 013 or STA 013Y or STA 032); (MAT 016A or MAT 017A or MAT 021A); (MAT 016B or MAT 017B or MAT 021B); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ECN 103 – Economics of Uncertainty & Information (4 units)

Course Description: Optimal decisions under uncertainty, expected utility theory, economics of insurance, asymmetric information, signalling in the job market, incentives and Principal-Agent theory, optimal search strategies and the reservation price principle.

Prerequisite(s): (ECN 100 or ECN 100A or (ARE 100A, ARE 100B)), ECN 100B, (MAT 016A or MAT 017A or MAT 021A), (MAT 016B or MAT 017B or MAT 021B).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 106 – Decision Making (4 units)

Course Description: Descriptive and normative analysis of individual decision making, with applications to personal, professional, financial, and public policy decisions. Emphasis on decision making under uncertainty and over time. Heuristics and biases in the psychology of decisions; overcoming decision traps.

Prerequisite(s): ((MAT 016A C- or better, MAT 016B C- or better) or (MAT 017A C- or better, MAT 017B C- or better) or (MAT 021A C- or better, MAT 021B C- or better)); (STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 107 – Neuroeconomics/Reinforcement Learning & Decision Making (4 units)

Course Description: Theoretical and empirical approaches to neuroeconomics (neuroscience of decision making) from psychology, neuroscience, economics, and computer science. Neuroscience of judgment and decision making, behavioral economics, and reinforcement learning.

Prerequisite(s): (PSC 100 or PSC 100Y or PSC 135 or ARE 100A or ECN 100A or NPB 162 or NPB 163); (STA 013 or STA 013Y or STA 100 or PSC 103A); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: PSC 133, CGS 107.

Grade Mode: Letter.

General Education: Social Sciences (SS); Scientific Literacy (SL).

ECN 110A – World Economic History Before the Industrial Revolution (4 units)

Course Description: Development and application of analytical models to explain the nature and functioning of economies before the Industrial Revolution. Examples will be drawn from a variety of societies, including England, China, Polynesia, and Pre-Columbian America.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 100BV).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ECN 110B – World Economic History Since the Industrial Revolution (4 units)

Course Description: Development and application of analytical models to explain the nature and functioning of economies since the Industrial Revolution. Examples will be drawn from a variety of societies, including England, China, Germany, and India.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ECN 111A – Economic History (4 units)

Course Description: Survey of economic change in the United States from Colonial times to 1865; reference to other regions in the Western Hemisphere.

Prerequisite(s): (ECN 001A or OR ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ECN 111B – Economics History (4 units)

Course Description: Survey of economic change in the United States from 1865 to the post World War II era.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ECN 115A – Economic Development (4 units)

Course Description: Major issues encountered in emerging from international poverty, including problems of growth and structural change, human welfare, population growth and health, labor markets and internal migration. Important issues of policy concerning international trade and industrialization.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 115A.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ECN 115B – Economic Development (4 units)

Course Description: Major macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 115B.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ECN 115BY – Economic Development (4 units)

Course Description: Macroeconomic issues of developing countries. Problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Issues of policy concerning international borrowing and external debt of developing countries.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV).

Learning Activities: Lecture 1.50 hour(s), Web Virtual Lecture 1.50 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Economics, Managerial Economics, and International Relations Majors.

Cross Listing: ARE 115BY.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ECN 116 – Comparative Economic Systems (4 units)

Course Description: Economics analysis of the relative virtues of capitalism and socialism, including welfare economics. Marxian exploitation theory, the socialist calculation debate (Hayek and Lange), alternative capitalist systems (Japan, Germany, U.S.) and contemporary models of market socialism.

Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: World Cultures (WC).

ECN 117 – Economics of International Immigration (4 units)

Course Description: Introduction to research on the economics of immigration. Immigrant demographics and reasons for migrating. Immigrant success and effects on native populations. Influence of immigrants on those left behind. Discussion of migration policy in the US and other countries.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Pass One open to Economics majors only.

Credit Limitation(s): Not open for credit to students who have previously completed an upper division economics course in international immigration.

Grade Mode: Letter.

ECN 121A – Industrial Organization (4 units)

Course Description: Appraisal of the role of competition and monopoly in the American economy; market structure, conduct, and economic performance of a variety of industries.

Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ECN 121B – Industrial Organization (4 units)

Course Description: Study of antitrust and economic regulation. Emphasis on applying theoretical models to U.S. industries and case studies, including telecommunications, software, and electricity markets. Topics include natural monopoly, optimal and actual regulatory mechanisms, deregulation, mergers, predatory pricing, and monopolization.

Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B); ECN 102.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: American Cultures, Governance, & History (ACGH).

ECN 122 – Theory of Games & Strategic Behavior (4 units)

Course Description: Introduction to game theory. Explanation of the behavior of rational individuals with interacting and often conflicting interests. Non-cooperative and cooperative theory. Applications to economics, political science and other fields.

Prerequisite(s): (MAT 016A, MAT 016B) or (MAT 021A, MAT 021B) or (MAT 017A, MAT 017B); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 125 – Energy Economics (4 units)

Course Description: Application of theoretical and empirical models to examine efficiency in energy production and use. Energy and environmental policy, market structure and power, global climate change, optimal regulation, and real-world applications; e.g., California electricity crisis.

Prerequisite(s): ECN 100 or ECN 100A or ARE 100A; consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Economics Majors, Energy Systems, Transportation Technology & Policy, and Civil & Environmental Engineering Graduate students and Graduate School of Management.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ECN 130 – Public Microeconomics (4 units)

Course Description: Public expenditures; theory and applications.

Efficiency and equity of competitive markets; externalities, public goods, and market failures; positive and normative aspects of public policy for expenditure, including benefit-cost analysis. Topics include consumer protection, pollution, education, poverty and crime.

Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 131 – Public Finance (4 units)

Course Description: Economic burden of taxation; equity and efficiency considerations in tax design; structure and economic effects of the U.S. tax system (including personal income tax, corporation income tax, and property tax); tax loopholes; recent developments; tax reform proposals.
Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 132 – Health Economics (4 units)

Course Description: The health care market, emphasizing the role and use of economics. Individual demand, provision of services by doctors and hospitals, health insurance, managed care and competition, the role of government access to health care.

Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 102 or ECN 140 or ARE 106 or STA 108); ECN 100B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 133Y – Poverty, Inequality & Public Policy (4 units)

Course Description: Examination of the economics of poverty and inequality in the United States, including measurement, trends, and related policies.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV).

Learning Activities: Web Virtual Lecture 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Limited to 99; 3 sections of 33 each.

Grade Mode: Letter.

ECN 134 – Financial Economics (4 units)

Course Description: General background and rationale of corporation; finance as resource allocation over time; decision making under uncertainty and the role of information; capital market and interest rate structure; financial decisions.

Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (STA 013 or STA 013Y); (ECN 100B or ARE 100B).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): No credit for students who have completed ARE 171A.
Grade Mode: Letter.

ECN 135 – Money, Banks, & Financial Institutions (4 units)

Course Description: Banks and the banking system. Uncertainty and asymmetric information in the lending process; efficiency of competitive equilibrium in lending markets. Regulation and the conduct of monetary policy.

Prerequisite(s): ECN 101; (STA 013 or STA 013Y).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 136 – Topics in Macroeconomic Theory (4 units)

Course Description: Advanced Topics in macroeconomics theory. Develops the theoretical and empirical analysis of a specific field of macroeconomics. Possible topics include, business cycle theories, growth theory, monetary economics, political economics and theories of unemployment and inflation.

Prerequisite(s): ECN 101.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 137 – Macroeconomic Policy (4 units)

Course Description: Theory and practice of macroeconomic policy, both monetary and fiscal.

Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B); ECN 101; (STA 013 or STA 013Y).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 138 – Public Economics in International Perspective (4 units)

Course Description: Social problems and government responses in developed and developing countries; health, unemployment, informal insurance, poverty, corruption, and public service delivery; emphasis on quantitative and data analysis skills; applications to real world policy problems.

Prerequisite(s): (ECN 100A or ECN 100 or ARE 100A); ECN 102.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Economics majors only.

Credit Limitation(s): Not open for credit to students who have previously completed an upper division economics course in international public economics.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

ECN 140 – Econometrics (4 units)

Course Description: Problems of observation, estimation and hypotheses testing in economics through the study of the theory and application of linear regression models. Critical evaluation of selected examples of empirical research and exercises in applied economics.

Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 102 or STA 108); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Economics Majors.

Grade Mode: Letter.

ECN 141 – Economic & Financial Forecasting (4 units)

Course Description: Introduction to economics and financial forecasting tools. Econometrics modeling methods and real-world data applications using the computing language R. Time-series techniques including auto-regression, random walk, and volatility forecasting. Financial econometrics topics including yield curve modeling and asset pricing.

Prerequisite(s): (ECN 100 or ECN 100A); ECN 101; (ECN 102 or STA 108); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Economics majors only.

Grade Mode: Letter.

ECN 142 – Economics & Business Data Analytics (4 units)

Course Description: Introduction to economics and business data analytics. Statistical learning methods to analyze big data in economics and business data analysis. Statistical learning, linear regression, classification, resampling methods, and linear model selection and regularization.

Prerequisite(s): (ECN 100 or ECN 100A); (ECN 102 B or better or ECN 140 B or better).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open Economics majors only.

Credit Limitation(s): Not open for credit to students who have previously completed an upper division economics course in economics and business data analytics.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ECN 145 – Transportation Economics (4 units)

Course Description: Examination of fundamental problems of planning and financing transportation "infrastructure" (roads, ports, airports). Economics of the automobile industry, as well as the impact of government regulation and deregulation in the airlines and trucking industries. Intended for advanced Economics undergraduates.

Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 102 or STA 108); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 151A – Economics of the Labor Market (4 units)

Course Description: Theory of labor supply and demand; determination of wages and employment in the labor market. Policy issues: labor force participation by married women; minimum wages and youth unemployment; effect of unions on wages.

Prerequisite(s): ECN 100 or ECN 100A or ARE 100A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 151B – Economics of Human Resources (4 units)

Course Description: Human resource analysis; introduction to human capital theory and economics of education; the basic theory of wage differentials, including theories of labor market discrimination; income distribution; poverty. Policy issues; negative income tax; manpower training programs; incomes policy.

Prerequisite(s): ECN 100 or ECN 100A or ARE 100A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 152 – Economics of Education (4 units)

Course Description: Application of theoretical and empirical tools of economics to the education sector. Demand for Education; Education Production and Market Structures in Education. Policy applications: class size reduction, school finance equalization, accountability, and school choice.

Prerequisite(s): (ECN 100 C- or better or ECN 100A or ARE 100A C- or better); (ECN 100B or ARE 100B C- or better); ECN 102 C- or better; (STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 160A – International Microeconomics (4 units)

Course Description: International trade theory: impact of trade on the domestic and world economies; public policy toward external trade.

Prerequisite(s): ECN 100 or ECN 100A or ARE 100A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Only 2 units of credit allowed to students who have completed ECN 162.

Grade Mode: Letter.

ECN 160B – International Macroeconomics (4 units)

Course Description: Macroeconomic theory of an open economy. Balance of payments adjustment mechanism, international monetary economics issues; international financial institutions and their policies.

Prerequisite(s): ECN 101.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Only 2 units of credit allowed to students who have completed ECN 162.

Grade Mode: Letter.

ECN 162 – International Economic Relations (4 units)

Course Description: International trade & monetary relations, trade policy, exchange rate policy, policies toward international capital migration and investment. Emphasis on current policy issues. Intended especially for non-majors.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ECN 160A or ECN 160B.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

ECN 164 – International Finance (4 units)

Course Description: Advanced international finance. Decision-making processes of large firms, institutional investors and sovereign governments, and their interactions in global financial markets. Pricing of currencies, equities and bonds as well as intermediation and regulation of asset markets. Solving theoretical models, analyzing financial data, and presenting real-life case studies.

Prerequisite(s): (ECN 100A or ECN 100 or ARE 100A); ECN 101.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Economics majors only.

Credit Limitation(s): Not open for credit to students who have previously completed an advanced upper division economics course in economic international finance.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ECN 167 – Economic Development in Weak States (4 units)

Course Description: Barriers to economic development in developing countries. Economic and policy tools to address barriers within a functioning, well-intentioned government and non-functioning or ill-intentioned governments. Conflict between the state and other subnational actors for legitimate political control. Field experiments and other methodology to understand the success of economic and policy tools in weak states.

Prerequisite(s): ECN 100A; ECN 100B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Economics majors only.

Credit Limitation(s): Not open for credit to students who have previously completed an upper division economics course in economic development in weak states.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ECN 171 – Economy of East Asia (4 units)

Course Description: Intensive reading, discussion and research on selected topics from the economies of the countries of East Asia. Consult department for course scheduling.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (ECN 001B or ECN 001BV); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 190 – Topics in Economics (4 units)

Course Description: Selected topics in economic analysis and public policy. Variable content.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ECN 190X – Upper Division Seminar (1-4 units)

Course Description: In-depth examination at an upper division level of a special topic in Economics. Emphasis on focused analytical work. May not be repeated for credit.

Prerequisite(s): (ECN 100 or ECN 100A); ECN 100B; ECN 101; and consent of instructor.

Learning Activities: Seminar 1-4 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

ECN 192 – Internship (1-6 units)

Course Description: Internship experience off and on campus in all subject areas offered in the Department of Economics. Supervised by a member of the staff.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3-18 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ECN 194HA – Special Study for Honors Students (4 units)

Course Description: A program of research culminating in the writing of a senior honors thesis under the direction of a faculty advisor.

Prerequisite(s): Major in Economics with senior standing; consent of instructor and completion of 135 units with a minimum GPA of 3.500 in courses counted toward the major.

Learning Activities: Independent Study 3 hour(s), Seminar 1 hour(s).

Grade Mode: Letter.

ECN 194HB – Special Study for Honors Students (4 units)

Course Description: A program of research culminating in the writing of a senior honors thesis under the direction of a faculty advisor.

Prerequisite(s): Major in Economics with senior standing; consent of instructor and completion of 135 units with a minimum GPA of 3.500 in courses counted toward the major.

Learning Activities: Independent Study 3 hour(s), Seminar 1 hour(s).

Grade Mode: Letter.

ECN 197T – Tutoring in Economics (1-5 units)

Course Description: Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses.

Prerequisite(s): Consent of instructor and chairperson.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated 10 unit(s).

Grade Mode: Pass/No Pass only.

ECN 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ECN 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ECN 200A – Microeconomic Theory (4 units)

Course Description: Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 200A.

Grade Mode: Letter.

ECN 200B – Microeconomic Theory (4 units)

Course Description: Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failure.

Prerequisite(s): ECN 200A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 200B.

Grade Mode: Letter.

ECN 200C – Microeconomic Theory (4 units)

Course Description: Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed.

Prerequisite(s): ECN 200B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 200C.

Grade Mode: Letter.

ECN 200D – Macroeconomic Theory (4 units)

Course Description: Macro static theory of income, employment, and prices.

Prerequisite(s): ECN 101; MAT 021A; MAT 021B; MAT 021C; or equivalent courses.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 200E – Macroeconomic Theory (4 units)

Course Description: Macrodynamic theory of income, employment, and prices.

Prerequisite(s): ECN 200B (can be concurrent); ECN 200D.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 200F – Macroeconomic Theory (4 units)

Course Description: Interaction between financial markets' frictions and macroeconomic fluctuations. Leverage and the financial accelerator, fire sales, credit booms and busts, liquidity, the role of intermediaries and the risk of bank runs, speculative bubbles, and incomplete markets and precautionary savings.

Prerequisite(s): ECN 200A; ECN 200B; ECN 200C { can be concurrent }; ECN 200D; ECN 200E.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 201A – History of Economic Thought (4 units)

Course Description: Economic thought from the classical Greece era to modern times.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 201B – History of Economic Thought II (4 units)

Course Description: Origins and emergence of modern economic analysis.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 203A – Advanced Economic Theory (4 units)

Course Description: Advanced topics in general equilibrium theory and welfare economics: existence, determinateness and efficiency; intertemporal economies; uncertainty.

Prerequisite(s): ECN 200A; ECN 200B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 203B – Advanced Economic Theory: Game Theory (4 units)

Course Description: Covers the most recent developments in game theory, with the focus changing from year to year. Main topics are: refinements Nash equilibrium, repeated games, evolution, social situations, bounded rationality, and bargaining theory.

Prerequisite(s): ECN 200A; ECN 200B; ECN 200C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 203C – Topics in Economic Theory (4 units)

Course Description: Selected topics in contemporary microeconomic theory.

Prerequisite(s): ECN 200A; ECN 200B; ECN 200C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated with the consent of the Graduate Studies Committee.

Grade Mode: Letter.

ECN 210A – Economic History (4 units)

Course Description: Economic history of the eastern hemisphere in the modern period. Medieval Europe or other regions may be studied, depending on student interest.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

ECN 210B – Economic History (4 units)

Course Description: The United States from Colonial times to the present. Other areas of the western hemisphere may be studied, according to student interest.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

ECN 210C – Economic History (4 units)

Course Description: Selected topics and issues, emphasis on current research. (Quarter offered to be flexible.)

Prerequisite(s): A graduate course in economic history.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

ECN 214 – Development Economics (4 units)

Course Description: Review of the principal theoretical and empirical issues whose analysis has formed development economics. Analysis of economic development theories and development strategies and their application to specific policy issues in developing country contexts.

Prerequisite(s): ARE 100A; ARE 100B; ECN 101; ARE 204/ECN 204 and ECN 160A-ECN 160B recommended.

Learning Activities: Lecture 4 hour(s).

Cross Listing: ARE 214.

Grade Mode: Letter.

ECN 215A – Microdevelopment Theory & Methods I (4 units)

Course Description: Agricultural development theory, with a focus on microeconomics. Agricultural household behavior with and without market imperfections and uncertainty. Analysis of rural land, labor, credit and insurance markets, institutions, and contracts.

Prerequisite(s): ECN 200A or ECN 204; ECN 240A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 215A.

Grade Mode: Letter.

ECN 215B – Open Macroeconomics of Development (4 units)

Course Description: Models and policy approaches regarding trade, monetary and fiscal issues, capital flows and debt are discussed in the macroeconomic framework of an open developing country. Basic analytical focus is real exchange rate and its impact on sectoral allocation of resources.

Prerequisite(s): (ARE 200A or ECN 200A); (ARE 204 or ECN 204); (ECN 214 or ECN 215A); ECN 200D or ECN 205.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 215B.

Grade Mode: Letter.

ECN 215C – Microdevelopment Theory & Methods II (4 units)

Course Description: Extension of development theory and microeconomic methods. Agricultural growth and technological change; poverty and income inequality; multisectoral, including village and regional models. Computable general equilibrium methods and applications.

Prerequisite(s): ECN 215A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 215C.

Grade Mode: Letter.

ECN 215D – Environmental & Economic Development (4 units)

Course Description: Interdisciplinary course drawing on theoretical and empirical research on interactions between environmental resource use and economic development processes. Analysis of issues emerging at the interface of environmental and development economics.

Prerequisite(s): ECN 200A; (ECN 204 or ARE 275).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 215D.

Grade Mode: Letter.

ECN 216 – Energy & Climate Policy (4 units)

Course Description: Fundamentals of energy technology, economics, and policy. Survey and analysis of current and prospective climate policies at the local and global level, including but not limited to cap-and-trade, emissions offsets, intensity standards, technology standards, mandates and subsidies.

Prerequisite(s): ECN 100A or ARE 100A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion.

Enrollment Restriction(s): Pass One restricted to graduate students in the following programs: Economics, Energy Graduate Group, and Transportation Technology and Policy Graduate Group.

Cross Listing: EGG 202.

Grade Mode: Letter.

ECN 221A – The Theory of Industrial Organization (4 units)

Course Description: Game theory is used to analyze strategic interaction of firms in industries. Topics include models of competition, product differentiation, entry-deterring strategies, contractual arrangements, vertical control and antitrust issues.

Prerequisite(s): ECN 200A; ECN 200B; ECN 200C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 221B – Empirical Analysis in Industrial Organization (4 units)

Course Description: Recent empirical work in industrial organization. Topics include empirical analysis of cartels, product differentiation, innovation and technological change, and imperfect competition in international markets.

Prerequisite(s): ECN 221A; ECN 240B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 221C – Industrial Organization & Regulation (4 units)

Course Description: Optimal regulation of natural monopoly. Topics include regulatory mechanisms for single and multiple output firms under symmetric and asymmetric information, optimality without regulation, the economic theory of regulation, and empirical studies of regulation and deregulation.

Prerequisite(s): ECN 221A; ECN 240B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 230A – Public Economics (4 units)

Course Description: Measures of deadweight loss and consumer surplus; optimal commodity and income taxation; tax incidence; policy issues in personal taxation, corporate taxation, and social insurance; the evaluation of effective tax rates.

Prerequisite(s): ECN 200C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 230B – Public Economics (4 units)

Course Description: Effects of government policies on economic behavior; labor supply, program participation, investment, consumption and savings.

Prerequisite(s): ECN 240A; ECN 240B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 230C – Public Economics (4 units)

Course Description: Advanced topics in economics of the public sector, with emphasis on current research. Topics differ from year to year.

Prerequisite(s): ECN 200C; ECN 240B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 233 – Poverty & Public Policy (4 units)

Course Description: Interdisciplinary course covering qualitative and quantitative U.S. based poverty research. Topics include measurement, statistics, theories and evidence on the causes and consequences of poverty, and the history and efficacy of major anti-poverty programs.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

ECN 235A – Macroeconomics (4 units)

Course Description: Frontiers of applied/empirical macroeconomics. Evidence and lessons from macroeconomic history for The Great Depression, financial crises, efficient markets, parity conditions, capital flows, default, financial crises, exchange rates, growth, and other current empirical research topics.

Prerequisite(s): ECN 200D; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 235B – Macroeconomics (4 units)

Course Description: Search theory, theory of real-world markets characterized by search frictions, with applications: Labor economics: models of unemployment and wages differentials; Financial economics: determination of asset prices in OTC financial markets; Monetary Economics: foundations for money as a medium of exchange.

Prerequisite(s): ECN 200D; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 235C – Macroeconomics (4 units)

Course Description: Basic numerical methods for analytically intractable problems in economics. Techniques presented applicable in a wide range of fields including macroeconomics, econometrics, resource economics, labor economics, economic theory, international trade, finance, game theory, public finance, contract theory, and others.

Prerequisite(s): ECN 200D; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 235D – Macroeconomics (4 units)

Course Description: Selected topics in Macroeconomics.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated with consent of Economics Graduate Studies Committee.

Grade Mode: Letter.

ECN 239 – Econometric Foundations (4 units)

Course Description: Prepares students for econometric theory and empirical work by examining the statistical foundation of econometrics. Special attention is paid to problems specific to non-experimental data common to social sciences. Topics from matrix algebra are also covered.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 239.

Grade Mode: Letter.

ECN 240A – Econometric Methods (4 units)

Course Description: Least squares, instrumental variables, and maximum likelihood estimation and inference for single equation linear regression model; linear restrictions; heteroskedasticity; autocorrelation; lagged dependent variables.

Prerequisite(s): ECN 239; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 240A.

Grade Mode: Letter.

ECN 240B – Econometric Methods (4 units)

Course Description: Topics include asymptotic theory and instrumental variables, pooled time-series cross-section estimation, seemingly unrelated regression, classical hypothesis tests, identification and estimation of simultaneous equation models, cointegration, errorcorrection models, and qualitative and limited dependent variable models.

Prerequisite(s): ECN 240A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 240B.

Grade Mode: Letter.

ECN 240C – Time Series Econometrics (4 units)

Course Description: Probability theory; estimation, inference and forecasting of time series models; trends and non-standard asymptotic theory; vector time series methods and cointegration; time series models for higher order moments and transition data; state-space modeling and the Kalman filter.

Prerequisite(s): ECN 240B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 240C.

Grade Mode: Letter.

ECN 240D – Cross Section Econometrics (4 units)

Course Description: Estimation and inference for nonlinear regression models for cross-section data; models for discrete data and for limited dependent variables; models for panel data; additional topics such as bootstrap and semiparametric regression.

Prerequisite(s): ECN 240B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 240D.

Grade Mode: Letter.

ECN 240E – Topics in Time Series Econometrics (4 units)

Course Description: Modern econometric techniques for time series data. Expand on topics covered in ECN 240A, ECN 240B, ECN 240C. Content may differ year to year.

Prerequisite(s): ECN 240C; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 240E.

Grade Mode: Letter.

ECN 240F – Topics in Cross Section Econometrics (4 units)

Course Description: Modern econometrics techniques for cross-section data. Expand on topics covered in ECN 240A, ECN 240B, ECN 240D. Content may differ year to year.

Prerequisite(s): ECN 240D; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ARE 240F.

Grade Mode: Letter.

ECN 250A – Labor Economics (4 units)

Course Description: Philosophy, theory and history of American and foreign labor movements; union structure, organization and collective bargaining under changing labor market conditions; current labor market issues.

Prerequisite(s): (ECN 150A and ECN 150B) or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 250B – Labor Economics (4 units)

Course Description: Microeconomic theory of labor supply and labor demand, estimation of labor supply and demand functions; human capital theory; labor market analysis.

Prerequisite(s): ECN 151A; or consent of instructor; ECN 204 or ECN 200A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 260A – International Economics (4 units)

Course Description: Theory of trade determinants; gains from trade; tariffs and effective protection; economic unions.

Prerequisite(s): ECN 200A or ECN 204.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 260B – International Economics (4 units)

Course Description: Balance of payments adjustment mechanisms; foreign exchange markets theories of balance of payments policy and international monetary mechanisms.

Prerequisite(s): ECN 200D; ECN 200E.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 260CN – International Investment & Trade (4 units)

Course Description: Analysis of foreign investment and its links to trade; theories of the firm as they relate to firm's export and investment decisions; and an introduction to the political economy of trade policies.

Prerequisite(s): ECN 260A.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

ECN 260D – Topics in International Macroeconomics (4 units)

Course Description: Survey of current literature in international macroeconomic theory.

Prerequisite(s): ECN 260B; or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

ECN 260E – Topics in International Trade (4 units)

Course Description: Current literature in international trade theory.

Prerequisite(s): ECN 260A; ECN 260B.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

ECN 260F – International Macroeconomic Policy (4 units)

Course Description: Theory and practice of international macroeconomic policy. Topics include exchange rate regimes, international financial institutions, crises and current topics.

Prerequisite(s): ECN 260B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 270A – Economics of Growth (4 units)

Course Description: Modern theories and empirics of economic growth beginning with the neoclassical theories up to current endogenous growth models. Emphasis on the analysis of human capital and growth, technological innovation, its diffusion and empirical evidence on growth.

Prerequisite(s): ECN 200D; ECN 200E.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 270B – Economics of Growth (4 units)

Course Description: Empirical analysis of growth patterns and growth models. Emphasis on the relationship between macroeconomic management and long-term growth; the use of foreign capital in accelerating growth and its occasional mishaps; the comparison of growth performance in East Asia and Latin America since WW2; the experiences of centrally-planned economies and transitions to market-based growth; and the transformation from an industrial economy to a knowledge economy.

Prerequisite(s): ECN 200D; ECN 200E.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 270C – Economics of Growth (4 units)

Course Description: Institutional bases; politics; contracts and commitment; money and finance; malthusian dynamics; modern economic growth; transition of industrialization; dual economies, core and periphery; sources of convergence and divergence; openness and growth; resources, demography, and geography; institutions, imperialism, and class conflicts.

Prerequisite(s): ECN 200D; ECN 200E.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ECN 280 – Orientation to Economic Research (2 units)

Course Description: Bridge the gap between students' classwork and their subsequent research. Topics such as the origination of a research project, some mechanics of empirical research and hints on the submission of research papers.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ECN 290 – Topics in Economics (4 units)

Course Description: Selected topics in economic analysis and public policy, focusing on current research.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ECN 291 – Contemporary Economics Seminar (2 units)

Course Description: Seminar series on topics of current interest.

Prerequisite(s): Graduate standing in Economics.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ECN 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Discussion 1-5 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ECN 299 – Individual Study (1-12 units)*Course Description:* Individual study.*Prerequisite(s):* Consent of instructor. Graduate standing.*Learning Activities:* Variable.*Grade Mode:* Satisfactory/Unsatisfactory only.**ECN 299D – Dissertation Research (1-12 units)***Course Description:* Dissertation research.*Learning Activities:* Variable.*Repeat Credit:* May be repeated.*Grade Mode:* Satisfactory/Unsatisfactory only.**ECN 397 – Teaching of Economics (2 units)***Course Description:* Teaching of economics: methods of instruction, organization of courses, examination and evaluation procedures.*Prerequisite(s):* Graduate standing in economics.*Learning Activities:* Lecture/Discussion 2 hour(s).*Grade Mode:* Satisfactory/Unsatisfactory only.

Education (EDU)

School of Education**EDU 065A – Foundations for University Success: Introduction to the University System (2 units)***Course Description:* Introduction to resources supporting first year student academic success and transition to a tier one research university.*Prerequisite(s):* Consent of instructor; student must be a part of an approved Foundations for University Success program.*Learning Activities:* Lecture/Discussion 2 hour(s), Fieldwork.*Grade Mode:* Pass/No Pass only.**EDU 065B – Foundations for University Success: Introduction to Research at a Tier 1 University (2 units)***Course Description:* Development of important skills necessary for research including critical thinking, study skills, writing skills, and presentation skills.*Prerequisite(s):* Consent of instructor; student must be a part of an approved Foundations for University Success program.*Learning Activities:* Lecture/Discussion 2 hour(s), Fieldwork.*Grade Mode:* Pass/No Pass only.*General Education:* Oral Skills (OL).**EDU 065C – Foundations for University Success: Internships, Graduate School & Careers (2 units)***Course Description:* Resources to explore academic and career connections and opportunities including internships, volunteer opportunities, graduate schools and careers.*Prerequisite(s):* Consent of instructor; student must be a part of an approved Foundations for University Success program.*Learning Activities:* Lecture/Discussion 2 hour(s), Fieldwork.*Grade Mode:* Pass/No Pass only.**EDU 081 – Learning in Science & Mathematics (2 units)***Course Description:* Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning.*Learning Activities:* Lecture/Discussion 2 hour(s), Fieldwork 2 hour(s).*Enrollment Restriction(s):* Limited to 26 students per section.*Cross Listing:* GEL 081.*Grade Mode:* Pass/No Pass only.*General Education:* Social Sciences (SS); Visual Literacy (VL); Writing Experience (WE).**EDU 092 – Internship (1-3 units)***Course Description:* Internship as a teacher's aide or tutor in K-12 classrooms under the supervision of a faculty member.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Internship 3-9 hour(s).*Enrollment Restriction(s):* Enrollment dependent on availability of intern placements.*Repeat Credit:* May be repeated.*Grade Mode:* Pass/No Pass only.**EDU 098 – Directed Group Study (1-5 units)***Course Description:* Primarily for lower division students.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Variable.*Repeat Credit:* May be repeated.*Grade Mode:* Pass/No Pass only.**EDU 100 – Introduction to Schools (4 units)***Course Description:* Study of occupational concerns of teachers; skills for observing classroom activities; school organization and finance; school reform movement; observing, aiding, and tutoring in schools.*Learning Activities:* Lecture 3 hour(s), Fieldwork 3 hour(s).*Grade Mode:* Letter.*General Education:* Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL).**EDU 110 – Educational Psychology: General (4 units)***Course Description:* Learning processes, cognitive development, individual differences, testing and evaluation.*Learning Activities:* Lecture/Discussion 4 hour(s).*Grade Mode:* Letter.*General Education:* Social Sciences (SS); Writing Experience (WE).**EDU 114 – Quantitative Methods in Educational Research (4 units)***Course Description:* Problems and methods in data analysis. Design of research projects. Some consideration of procedures suited to digital computers.*Learning Activities:* Lecture/Discussion 4 hour(s).*Grade Mode:* Letter.*General Education:* Quantitative Literacy (QL).

EDU 115 – Educating Children with Disabilities (2 units)

Course Description: Educational issues and processes involved in teaching children with disabilities. Focuses on the structure of special education, with an emphasis on meeting the educational needs of children who are mainstreamed in regular classes.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

EDU 116Y – Inclusive Education within General Education Classrooms (2 units)

Course Description: Preparation for preservice teachers to work with neurodivergent learners who are required by law to receive special education within

Prerequisite(s): EDU 115 or equivalent.

Learning Activities: Discussion/Laboratory 1 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students in Teacher Credential Program.

Grade Mode: Letter.

General Education: classrooms. Recognizing and removing instructional barriers that prevent students from accessing instructional opportunities by universally designing their classrooms. Emphasis on learning and applying evidence-based practices within a Multi-Tier System of Support (MTSS) framework for learners that need supplemental support. General Education:

EDU 119 – Use & Misuse of Standardized Tests (4 units)

Course Description: Principles underlying educational and psychological testing. Purposes of testing for individual achievement and evaluation of school programs. Interpretation and misinterpretations of outcomes. Analysis of SAT, GRE and other common tests. Experience in test administration and outcome interpretation.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

EDU 120 – Philosophical & Social Foundations of Education (4 units)

Course Description: Philosophical, historical, and sociological study of education and the school in our society.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

EDU 121 – Introduction to Education Policy Analysis: Tools, Methods & Frameworks (4 units)

Course Description: Introduces students to the field of education policy analysis with a specific emphasis on the quantitative frameworks and analytical tools, drawn primarily from economics and statistics, that are used to guide and inform educational policymaking.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

EDU 122 – Children, Learning & Material Culture (4 units)

Course Description: How material artifacts shape what and how children learn in school, at home, and in the community. Artifacts examined include books, computers, household appliances, toys and games, entertainment media, collectibles, sports equipment, clothing, folk arts and crafts, and neighborhood space.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing/Discussion 1 hour(s), Fieldwork.

Grade Mode: Letter.

General Education: Social Sciences (SS); Visual Literacy (VL); Writing Experience (WE).

EDU 130 – Issues in Higher Education (4 units)

Course Description: Analysis of current issues in higher education and of some practical implications of varying philosophical approaches to the role of the university.

Learning Activities: Discussion 3 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

EDU 142 – Introduction to Environmental Education (4 units)

Course Description: Study of history, philosophy, principles and approaches to environmental education (EE) and outreach; learning theories, teaching strategies and techniques in EE and outreach; evaluation of EE curricula in non-formal and in-school contexts; observing, aiding and facilitating local environmental education programs.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL).

EDU 147 – Anglos, Latinos, & Spanish Black Legend: Anti-Hispanic Prejudice Origins & Educational Implications (4 units)

Course Description: Examination of anti-Hispanic prejudice in the United States focusing on the "Black Legend," a 16th-century, anti-Spanish myth underpinning the doctrine of "Manifest Destiny." Exploration of the Legend's presence in contemporary American society through interviews and analysis of school textbooks.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork, Term Paper.

Cross Listing: SPA 147.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

EDU 150 – Cultural Diversity & Education in a Sociopolitical Context (4 units)

Course Description: Introduction to cultural diversity and education in a sociopolitical context. Interactive course. Small and large-group discussions explore, extend, and apply readings; range of writing genres for responses to assignments and course themes; lectures, slide shows, speakers, brief fieldwork, and presentations.

Learning Activities: Lecture/Discussion 4 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD); Writing Experience (WE).

EDU 151 – History & Approaches to Multilingualism in K-12 Contexts (3 units)

Course Description: First and second language acquisition processes for emergent bilinguals/dual language learners with an emphasis on sociocultural contexts and equity. The history and politics of bilingual education, benefits of bilingualism, role of family and community, assessments, language varieties and dialectical differences, translanguaging, and strategies for scaffolding instruction. Current research on bilingualism and pedagogical programs and trends will be addressed.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Acceptance in Teacher Credential Program.

Grade Mode: Letter.

EDU 152 – Academic Spanish for Bilingual Teachers (3 units)

Course Description: Communicative class taught in Spanish focused on the development of Spanish communication skills for current and/or future bilingual teachers. Main topics are related to school content areas in bilingual settings, with an emphasis on standard and Southwest Spanish dialects.

Prerequisite(s): Acceptance in Teaching Credential Program or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork, Recitation 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

EDU 153 – Diversity in the K-12 Classroom (2 units)

Course Description: Analysis of research on learning styles among culturally diverse students with review and evaluation of responsive curricula and classroom teaching techniques. The ethnographic interview as a research tool.

Prerequisite(s): Acceptance in Teaching Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

EDU 154 – Languaging in Chicanx & Latinx Communities & Schools (4 units)

Course Description: Interdisciplinary research on the diverse communicative practices of individuals from Chicanx/Latinx communities in the U.S. Critiques deficit orientation of early social science research and introduces scholarship providing contextualized and nuanced findings about the linguistic practices that Chicanxs and Latinxs use to communicate across a range of learning settings in and out of schools.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Domestic Diversity (DD).

EDU 155 – Ethnic Studies in K-12 Schools (4 units)

Course Description: Brief historical genealogy of Ethnic Studies as an interdisciplinary field, content and pedagogical knowledge of Ethnic Studies approaches in K-12 school settings and grassroots communities, and reviews the existing research of Ethnic Studies literacies in US public schools.

Learning Activities: Lecture 4 hour(s),

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

EDU 160A – Introduction to Peer Counseling (2 units)

Course Description: Introduction to peer counseling techniques and development of peer counseling skills.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Pass/No Pass only.

EDU 160B – Issues in Peer Counseling (2 units)

Course Description: In-depth review and development of skills for specific counseling topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Pass/No Pass only.

EDU 163 – Guidance & Counseling (4 units)

Course Description: Nature and scope of pupil personnel services; basic tools and techniques of guidance; theory and practice of counseling psychology, with emphasis on educational and vocational adjustment.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EDU 173 – Language Development (4 units)

Course Description: Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories.

Prerequisite(s): LIN 001 or LIN 001Y; or consent of instructor. LIN 103A, LIN 103B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: LIN 173.

Grade Mode: Letter.

General Education: Social Sciences (SS).

EDU 180A – Computers in Education (1 unit)

Course Description: Applications of computers in education as instructional, intellectual, and communication tools.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 2 hour(s), Project 3 hour(s).

Enrollment Restriction(s): Restricted to Teaching Credential Majors.

Grade Mode: Letter.

EDU 180B – Computers in Education (1 unit)

Course Description: Applications of computers in education as instructional, intellectual, and communication tools.

Prerequisite(s): EDU 180A; acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 2 hour(s), Project 3 hour(s).

Enrollment Restriction(s): Restricted to Teaching Credential Majors.

Grade Mode: Letter.

EDU 180C – Computers in Education (1 unit)

Course Description: Applications of computers in education as instructional, intellectual, and communication tools.

Prerequisite(s): EDU 180B; acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 2 hour(s), Project 3 hour(s).

Enrollment Restriction(s): Restricted to Teaching Credential Majors.

Grade Mode: Letter.

EDU 181 – Teaching in Science & Mathematics (2 units)

Course Description: Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms.

Prerequisite(s): Consent of instructor; major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 2 hour(s).

Enrollment Restriction(s): Limited to 40 students per section.

Cross Listing: GEL 181.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS); Writing Experience (WE).

EDU 182 – Computer Project for Curricular Integration (1 unit)

Course Description: Design and implementation of a curricular unit to integrate computer technology into a K-12 classroom setting. A project-based seminar intended for students with substantial prior experience with instructional use of computers and related technologies.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed EDU 180 or EDU 181.

Grade Mode: Letter.

EDU 183 – Teaching High School Mathematics & Science (3 units)

Course Description: Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms.

Prerequisite(s): Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork.

Enrollment Restriction(s): Limited to 40 students per section.

Cross Listing: GEL 183.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

EDU 185 – Learning in a Digital Age: Information, Schooling, & Society (4 units)

Course Description: Focus on the changing nature of learning in a digital age: social media, ubiquitous connectivity, online education, electronic communication, writing, gaming, and youth culture. Readings drawn from major recent works detailing fundamental shifts in information, schooling, and society.

Learning Activities: Lecture/Discussion 2 hour(s), Lecture/Lab 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL).

EDU 192 – Internship (1-3 units)

Course Description: Internship as a tutor, teacher's aide, or peer counselor in a school or educational counseling setting under the supervision of a faculty member. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 2-8 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EDU 197T – Tutoring in Education (1-2 units)

Course Description: Leading of small voluntary discussion groups affiliated with the School's upper division courses under the supervision of, and at the option of, the course instructor, who will submit a written evaluation of the student's work.

Prerequisite(s): Consent of instructor.

Learning Activities: Tutorial 1-2 hour(s).

Repeat Credit: May be repeated 1 time(s) up to 4 units.

Grade Mode: Pass/No Pass only.

EDU 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EDU 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Grade Mode: Pass/No Pass only.

EDU 200 – Educational Research (4 units)

Course Description: Defining educational research questions, reviewing relevant literature, developing research designs, developing research instruments, selecting appropriate data analysis procedures, and writing research projects. A case problem will provide practice in designing and reporting research.

Prerequisite(s): Introductory statistics or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

EDU 201 – Qualitative Research in Education (4 units)

Course Description: Examines the design and conduct of educational research using non-numerical data (e.g., text, discourse, imagery and artifacts). Focuses on issues (e.g., validity, reliability, generalizability, ethics) and reporting genres (e.g., narrative accounts, case studies, and arguments).

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 2 hour(s), Lecture 2 hour(s).

Grade Mode: Letter.

EDU 202N – Computer Analysis of Qualitative Data (4 units)

Course Description: Critical and practical understanding of how to use computer software programs to analyze qualitative data (text, images, and videotape) in conducting social research.

Learning Activities: Seminar 3 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

EDU 203 – Educational Testing & Evaluation (4 units)

Course Description: Introduces the theoretical assumptions underlying traditional test construction, as well as the basic statistical principles involved in the design, evaluation, and interpretation of standardized tests. Introduces the debates surrounding the uses of different kinds of tests and evaluation tools.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

EDU 204A – Quantitative Methods in Educational Research: Analysis of Correlational Designs (4 units)

Course Description: Methods for analysis of correlational data in educational research. Topics include multiple correlation and regression, discriminant analysis, logistic regression, and canonical correlation. Emphasis on conceptual understanding of the techniques and use of statistical software.

Prerequisite(s): Introductory statistics or consent of instructor.

Learning Activities: Discussion 2 hour(s), Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

EDU 204B – Quantitative Methods in Educational Research: Experimental Designs (4 units)

Course Description: Methods for analysis of experimental data in educational research. Topics include ANOVA, fixed v. random effects models, repeated measures ANOVA, analysis of co-variance, MANOVA, chi square tests, small sample solutions to t and ANOVA.

Prerequisite(s): Introductory statistics or consent of instructor.

Learning Activities: Discussion 2 hour(s), Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

EDU 205A – Ethnographic Research in Schools I: Current Theory & Practice (4 units)

Course Description: Current literature from anthropology and society related to schools. Emphasis on the organizational structure of institutions, and the analysis of face-to-face interaction. Explore the relationship between field-based research and theory development on the acquisition of knowledge in specific social and cultural contexts.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EDU 205B – Ethnographic Research in Schools II: Field-Based Research Projects (4 units)

Course Description: Research projects in specific schools with cooperative critical analysis of the design, data collection, and inferencing by researchers. Continue to meet with instructors as a group throughout the quarter to discuss specific projects.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

EDU 206A – Inquiry into Classroom Practice: Traditions & Approaches (2 units)

Course Description: Introduction to traditions and approaches of teachers conducting research in their own classrooms: purposes, focal areas, methods of data collection and analysis, and written genre conventions.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork.

Grade Mode: Letter.

EDU 206B – Inquiry into Classroom Practice: Application of Teacher Research Approaches (4 units)

Course Description: Analysis and application of teacher research through the development, implementation and evaluation of a short-term classroom research-based intervention. Particular attention to research that enhances learning of English language learners and under-performing students.

Prerequisite(s): EDU 206A; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork 1 hour(s).

Enrollment Restriction(s): Open to Graduate Teaching Credential students.

Grade Mode: Letter.

EDU 206C – Inquiry into Classroom Practice: Study Design (4 units)

Course Description: Proposal development for classroom-based inquiry designed to address student learning needs. Mixed methods research design and preliminary data collection approaches. Design and application of baseline student assessment for proposal development. Literature review. Data collection in K-12 classrooms required.

Prerequisite(s): EDU 206B; or consent of instructor.

Learning Activities: Seminar 3 hour(s), Fieldwork 1 hour(s).

Enrollment Restriction(s): Open to Graduate MA Credential students.

Grade Mode: Letter.

EDU 206D – Inquiry into Classroom Practice: Data Analysis & Research Reporting (4 units)

Course Description: Support of the inquiry in EDU 206C through continuous collaborative critique and feedback resulting in the writing and presentation of a research study.

Prerequisite(s): EDU 206C; or consent of instructor.

Learning Activities: Seminar 2 hour(s), Fieldwork 1 hour(s), Extensive Writing/Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate MA Credential students.

Grade Mode: Letter.

EDU 207 – Concepts of the Curriculum (4 units)

Course Description: Development of the skills of philosophical analysis and argument for the establishment of a point of view, in the consideration of curriculum theory and practice. Classical and contemporary approaches to subject matter and activity emphases, hidden curriculum, and moral education.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

EDU 208 – Presenting Educational Research in Written Reports (4 units)

Course Description: Rhetorical and substantive challenges of presenting educational research through written reports; research rhetoric and genres; competing discourse conventions of educational research, policy, and practice; the social organization of publishing educational research.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

EDU 209 – Image-Based Field Research (4 units)

Course Description: Critical and practical understanding of video tape and still photography as resources for enhancing field research in schools and other social setting.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork 2 hour(s).

Grade Mode: Letter.

EDU 210 – Psychological Perspectives on School Learning (4 units)

Course Description: Study of human learning theory and research related to learning of academic content. Review of contemporary issues of constructivism, problem solving, expertise, conceptual change, transfer, and metacognition.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

EDU 211 – Sociocultural & Situative Perspectives on Learning & Cognition (4 units)

Course Description: Sociocultural and situative theories of cognition and learning. Major ideas of L.S. Vygotsky, followed by modern perspectives: situated cognition, cognitive apprenticeship, situated learning, communities of practice, cultural-historical activity theory, and distributed cognition. Implications of each theoretical perspective for educational practice.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

EDU 213 – Individual Assessment (4 units)

Course Description: Theories of intellectual functioning and the measurement of cognitive abilities in school-aged children. Supervised practice in administration and scoring of contemporary tests for children including the WISC-R, the WAIS-R, the Stanford Binet, the McCarthy Scales of Children's Ability.

Prerequisite(s): Introductory statistics or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EDU 215 – Research on Achievement Motivation in Education (4 units)

Course Description: Analysis and critique of recent research on cognitive processes related to achievement motivation in school settings. Topics include self-determination theory, attribution theory, goal theory, intrinsic and extrinsic motivation, learned helplessness, psychological reactance, gender and culture, and research design.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

EDU 220 – Concepts & Methods of Policy Analysis (4 units)

Course Description: Introduction to concepts and methods of policy analysis. Emphasis on the relationship between educational issues and problems; policy development; constructing persuasive policy analyses; issues related to policy process.

Learning Activities: Seminar 3 hour(s), Fieldwork, Term Paper.

Grade Mode: Letter.

EDU 221 – Culture & Social Organization of Schools (4 units)

Course Description: Culture and social organization of schools. Examines perspectives of social researchers, educational policy-makers, and school members and their implications for educational research, policy and practice.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 222 – School Change & Educational Reform (4 units)

Course Description: Analysis of models, processes, and case studies of school change and educational reform with respect to variable characteristics of schools and schooling, planned and unplanned change, the moral evaluation of school change, and the role of educational research.

Learning Activities: Lecture/Discussion 2 hour(s), Seminar 2 hour(s).

Grade Mode: Letter.

EDU 223 – Education & Social Policy (4 units)

Course Description: Focuses on understanding the social and political context of education in the U.S. and California and how education policy is formed in the broader public arena. Develops skills in educational policy analysis. (Former EDU 237.)

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 225 – Education Policy & Law (4 units)

Course Description: Examination of law as an instrument of social policy. Specific focus on the legalization of education decision making, its causes, dimensions, and effects on administrative and teacher authority.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

EDU 226 – Culture & Social Organization of Higher Education (4 units)

Course Description: Critical study of culture and social organization of higher education institutions policies and functions in the U.S., with some attention to other countries.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

EDU 228 – Politics & Governance of Education (4 units)

Course Description: Examination of political power, representation, influence, decision-making and inter-governmental relations in the public schools.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

EDU 229 – Education Finance Policy (4 units)

Course Description: Examination of (1) United States financing public education, (2) the relationship between school finance and education policy, and (3) the relationship between education finance and education practice.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

EDU 230 – Special Topics in Education Policy (4 units)

Course Description: Selected topics in education policy. Designed to facilitate preparation for the qualifying examination or dissertation.

Critically analyze scholarly work including their own works in progress.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EDU 234 – Humanizing Research Methods (4 units)

Course Description: Methodological approaches that humanize the qualitative inquiry process for researchers and the non-dominant communities they serve with a focus on ethnography, historiography, and social design experiments. Strategies for leveraging and disseminating findings to engage in transformational problem solving in education both in schools and in out-of-school settings.

Prerequisite(s): EDU 201 or similar introductory qualitative methods course.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

EDU 235 – Critical Pedagogy (4 units)

Course Description: A socio-cultural critique, from an interdisciplinary perspective, of educational reform and change. The critique will include an analysis of the influence of text content on the perpetuation of social power differences.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 236 – Application of Hierarchical Linear Models in Education Research (4 units)

Course Description: Application of hierarchical linear models in education research across multiple areas, such as policy, curriculum, and assessment. Develop working knowledge of hierarchical linear modeling and an understanding of its use in existing research as well as student's work.

Prerequisite(s): EDU 204A; or similar course with permission of the instructor.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 2 hour(s), Term Paper.

Grade Mode: Letter.

EDU 237 – Survey Research Methods (4 units)

Course Description: Theories, principles and application of survey research methodology. Students develop, validate, and administer survey instruments; select representative samples; conduct focus groups; and collect, organize, and analyze survey data. Familiarity with introductory concepts in descriptive and inferential statistics is assumed.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork 1 hour(s), Term Paper.

Grade Mode: Letter.

EDU 238 – Participatory Action Research (PAR) (4 units)

Course Description: Principles and strategies of PAR and related methodologies that emphasize collaborating with those affected by the issue being researched in order to educate, take action or effect social change. Conduct interviews with potential collaborators, case analyses and research proposals.

Prerequisite(s): Introductory research methods course recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

EDU 239 – Interview Methods (4 units)

Course Description: Introduction to qualitative interviewing, focused in particular on narrative and self-story as both practical method and theoretical stance. Complete a case-focused interview project during the course: designing an interview protocol, conducting the interview, transcribing, analyzing, and presenting their research.

Prerequisite(s): EDU 201 or equivalent course recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

EDU 242 – Research on Text Comprehension (4 units)

Course Description: Analysis of recent research related to cognitive processing of written texts. Topics include word decoding, schema theory, background knowledge, assimilation, accommodation, working memory, processing depth, vocabulary acquisition, sentence-level processes, text-level processes, text structure, implications for curriculum and instruction.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

EDU 243 – Research on the Teaching & Learning of Writing (4 units)

Course Description: Study of issues in research on composition; history of composition studies; data analysis techniques; product and process approaches; cognitive and social perspectives.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 244 – Topical Seminar in Language, Literacy & Culture (4 units)

Course Description: Critical study of selected issues of language, literacy, and culture as they relate to education.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topics differ.

Grade Mode: Letter.

EDU 245 – Theory & Research in Early Literacy (4 units)

Course Description: Analysis of children's initial processes in learning to read extending from the preschool years into second grade. Topics include emergent literacy, phonological awareness, word recognition, decoding, spelling, vocabulary, comprehension, second language reading, assessment, intervention, and instruction.

Learning Activities: Seminar 3 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

EDU 246 – Reading as a Social & Cultural Process (4 units)

Course Description: Recent theoretical and empirical work on reading in social contexts. Topics include reading as an individual interactive process; reading as a social and cultural process; critical perspectives on reading; implications of contrastive theoretical perspectives for curriculum and instruction in reading.

Prerequisite(s): EDU 211 recommended.

Learning Activities: Lecture 3 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

EDU 247 – Research on Response to Culturally Diverse Literature, K-12 (4 units)

Course Description: Research on response to culturally diverse literature in classrooms and other K-12 settings. Topics include reader response theories, values in expanding the literary canon, problems of cultural authenticity, resistance to multicultural literature, and instruction for diverse texts and learners.

Learning Activities: Seminar 3 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

EDU 248 – Academic Language & Literacies (4 units)

Course Description: Exploration of theories and research on academic language and literacies for the schooling of first and second language learners. Students use basic qualitative methods to collect and analyze classroom language and literacy data.

Learning Activities: Seminar 3 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 249 – Discourse Analysis in Educational Settings (4 units)

Course Description: Examines form and type in discourse (e.g., narration, conversation, routines), approaches to discourse analysis, and research on classroom discourse (lessons, teaching/learning interactional sequences). Final term paper is an analysis of discourse data tape-recorded by student in a field setting.

Prerequisite(s): An introductory linguistics or sociolinguistics course or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

EDU 251 – Research in Bilingual & Second Language Education (3 units)

Course Description: Discussion and analysis of recent research in bilingual and second language education. Topics include:language acquisition in second language learners and bilinguals, second language teaching methods, language-use models in bilingual education, interaction analysis in bilingual/cross-cultural classrooms,use of the vernacular in classrooms.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

EDU 253 – Inquiry into Classroom Practice: Bilingual Methods (4 units)

Course Description: Analysis and application of teacher research through the development, implementation and evaluation of a short-term research-based classroom intervention. Research that enhances learning of multilingual language learners.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

EDU 255 – Curriculum Development & Evaluation in Mathematics (4 units)

Course Description: Analysis of curricular issues and goals in mathematics education, including long-term trends, current status and influences, proposed changes, and evaluation issues. Selected curriculum projects examined.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 256A – Research in Mathematics Education (4 units)

Course Description: Examination of research process in mathematics education; review of critical productive problems identified by researchers; evolution of trends, issues, theories and hypotheses in various areas of mathematics education research. Emphasizes foundations.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 256B – Research in Mathematics Education (4 units)

Course Description: Current research issues and activities in mathematics education: status, trends, theories and hypotheses. Formulation of research questions and design of studies. Projection of future directions for research.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 257 – Computer Technology in Mathematics Education (4 units)

Course Description: Roles of calculators, computers, and graphing calculators in mathematics education will be addressed, with emphasis on the impact of these technologies on curriculum reform. Selected efforts to integrate technology into mathematics instruction will be examined.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 260 – The Modern History of Science Education (4 units)

Course Description: History of curricular issues and goals in science education from the late-19th century forward, including long-term trends, current status and influences, proposed changes, and evaluation issues. National science standards and curriculum projects.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 262A – Research Topics in Science Education I (4 units)

Course Description: Research process and product in science education; review of critical science education issues; evolution of trends, theories and hypotheses in various areas of science education research. Survey of current major research in science education.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 262B – Research Topics in Science Education II (4 units)

Course Description: Current research issues and activities in science education: status, trends, theories and hypotheses. Formulation of research questions, design of studies and critical, in-depth review of literature related to the student's research interests.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 264 – Scientific Literacy & Science Education Reform (4 units)

Course Description: Current trends in science education reform locally, regionally, and nationally focusing on scientific literacy. Equity, access and "science for all."

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

EDU 270 – Research on Teacher Education & Development (4 units)

Course Description: Research on teacher preparation in university credential programs and on professional development of in-service teachers, with special attention to teacher preparation for work with culturally and linguistically diverse youth.

Learning Activities: Seminar 3 hour(s), Project.

Grade Mode: Letter.

EDU 271 – Supervision of Student Teachers: Research, Theory & Practice (4 units)

Course Description: Research, theory and practice in the preparation and supervision of teachers. Practice in the supervision of candidates in university teaching credential programs during the student teaching field placement and the mentoring of novice teachers by expert teachers.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

EDU 275A – Effective Instruction: Curriculum & Assessment-Theory, Research, & Practice (2 units)

Course Description: Examination of contemporary theories of curriculum development, research about the relationship among instructional planning, classroom assessment, and student learning to guide teaching practice.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to Teaching Credential majors.

Grade Mode: Letter.

EDU 275B – Effective Instruction: English Language Development & Instructing English Language Learners (2 units)

Course Description: Analysis and application of English language acquisition and development research to teaching practice. Particular attention to research that enhances learning of English language learners and under-performing students.

Prerequisite(s): Acceptance in the Teaching Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

EDU 280A – Inquiry & Practice: Qualitative Research for Educational Leaders (4 units)

Course Description: Prepares students to understand the nature/assumptions/logic of qualitative methodology as applied to educational settings, focusing on issues of design/conceptualization/ interpretation/application of qualitative research procedures. Use these methods in conducting studies in their educational settings.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 280B – Inquiry & Practice: Quantitative Research for Educational Leaders (4 units)

Course Description: Focus is on field-based and general quantitative research methods in education. Acquire skills and knowledge to collect, organize, analyze, and interpret univariate and multivariate quantitative data in educational research, dissertation projects, and field-based projects.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 280C – Inquiry & Practice: Research Design & Application for Educational Leaders (4 units)

Course Description: Educational leaders are introduced to qualitative, quantitative, and mixed-methods educational research methods and learn to frame research questions, identify data/data sources, use descriptive statistics, critically examine research studies, make sense of educational research/policy, and conduct independent studies.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 281A – Problem-Based Learning Courses: Part 1 (4 units)

Course Description: Students identify problems from their educational settings, engage in data collection/analysis, write-up the process/results, and present to class. Work may become a dissertation proposal, if the problem or its extension is of sufficient interest and value.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Extensive Writing/Discussion, Fieldwork.

Grade Mode: Letter.

EDU 281B – Problem-Based Learning Courses: Part 2 (4 units)

Course Description: Continuation of part one.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Extensive Writing/Discussion, Fieldwork.

Grade Mode: Letter.

EDU 281C – Problem-Based Learning Courses: Part 3 (4 units)

Course Description: Continuation of part two.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Extensive Writing/Discussion, Fieldwork.

Grade Mode: Letter.

EDU 282A – Beginning Issues & Practices: Contemporary Educational Leadership (4 units)

Course Description: Explore the history and emergent relationships among leadership theories/practice and their application to current educational settings. Reflect on and refine their personal theory of leadership.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 282B – Beginning Issues & Practices: Diversity Issues for Educational Leaders (4 units)

Course Description: Diversity of stakeholders and community issues in California schools and colleges will be explored. Emphasis will be placed on the interaction between underrepresented segments of society and educational institutions. Best Practices in leading diverse schools will be explored.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 283A – Advanced Issues & Practices: Leadership Across Communities (4 units)

Course Description: Examine the theory/practice/process of leadership in community-building and collaboration in/across communities, while addressing the utilization of human and material resources and the creation of partnerships, community linkages, and collaborative efforts.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 283B – Advanced Issues & Practices: Leadership & Student Services (4 units)

Course Description: Practical and theoretical perspectives for building a sense of vision to lead the profession of student affairs and to meet the needs of the whole student.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 284A – Policy: History & Theory of Educational Policy (4 units)

Course Description: Learn/analyze the history/theory of educational policy. Explore how education leaders have/can positively influence the process and implement effective policies in their local institutions. Policy issues covered: educational opportunity, equity, access, regulation, testing, tenure, accountability.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 284B – Policy: Formulating & Influencing Policy (4 units)

Course Description: Conduct critical analyses of policy at the federal, judicial, state, regional and local levels. Specific California and federal policy environment structures, processes and people will be examined for intended consequences, ethical dilemmas, social justice and equity issues.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 284C – Policy: Possibilities & Limitations of Educational Policy in a Democracy (4 units)

Course Description: Critically examine the democratic purposes of education in light of existing National, State, and local policy reform efforts. Questions include, "In what ways are these reforms and policies guided by democratic ideas and challenged by those ideals."

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 285A – Educational Finance, Human Resources, & Law; Human & Financial Assets; Allocations & Budgets (4 units)

Course Description: Topics include: education finance theory, contemporary finance policy issues, intergovernmental relations, effective resource management, budget analysis and preparation.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 285B – Educational Finance, Human Resources, & Law: Ethical & Legal Issues in Education (4 units)

Course Description: Human resource and legal concepts and activities governing decisions of school leaders in public education. Attention to theory, application, and practice of personnel and risk management, curriculum, student services, teacher rights, torts, student rights.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 285C – Educational Finance, Human Resources, & Law: Human Resources & Personnel (4 units)

Course Description: Human resource management research and theory and for applying human resource techniques in the educational setting.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 286A – Organizational Structures & Change: Data-Driven Decision-Making for Change (4 units)

Course Description: Use and examine multiple sources of information and data and trends found in making quality decisions to improve P-12/ community college settings and addressing problems at sites. Learn limitations of these data sources.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 286B – Organizational Structures & Change: Curriculum & Instruction Issues in Education (4 units)

Course Description: Addresses the historical development of various curriculum and instructional methodologies found in public and private schools and colleges, and their impact on current curriculum development and reform efforts at the national, state and local level.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Fieldwork, Project.

Grade Mode: Letter.

EDU 287 – CANDEL Dissertation Seminars (6-12 units)

Course Description: Third-year seminars encourage students to complete dissertations within the year. Cohort members meet together in every three-week meetings with faculty members and share their writing, data collection, analysis, discussion of results, development of conclusions/ implications.

Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor.

Learning Activities: Variable 18-36 hour(s).

Repeat Credit: May be repeated 9 time(s) until dissertation is completed.

Grade Mode: Satisfactory/Unsatisfactory only.

EDU 287D – CANDEL Dissertation (6-12 units)

Course Description: Cohort members continue to meet with faculty and share their writing, data collection, analysis, development of conclusions/ implications.

Prerequisite(s): Consent of instructor; passing of qualifying exams in CANDEL program and advancement to candidacy.

Learning Activities: Variable 18-36 hour(s).

Repeat Credit: May be repeated 9 time(s) until dissertation is completed.

Grade Mode: Satisfactory/Unsatisfactory only.

EDU 288AV – Inquiry & Practice: Academic Writing for Educational Leaders (4 units)

Course Description: Rigorous practice in the types of writing required of educational doctorate (CANDEL) students. Synthesizing literature as part of a literature review; crafting arguments using empirical and theoretical literature; and addressing implications of research as they relate to policy and practice.

Prerequisite(s): Consent of instructor.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s), Extensive Writing.

Enrollment Restriction(s): Admission into the CANDEL EdD program or consent of instructor.

Grade Mode: Letter.

EDU 291 – Proseminar in Education (4 units)

Course Description: Professional induction into educational research field and Graduate Group in Education at UC Davis. Introduction to landscape of educational research methodologies, purposes and theories. Analysis of debates within field. Investigation of K-12 educational outreach efforts at UC Davis.

Prerequisite(s): Admission to the M.A. or Ph.D. graduate program in Education.

Learning Activities: Seminar 3 hour(s), Fieldwork 3 hour(s).

Repeat Credit: May be repeated 2 time(s) divided as an M.A. student once; as a Ph.D. student once.

Grade Mode: Letter.

EDU 292 – Special Topics in Education (2-4 units)

Course Description: Selected topics in education. Designed to facilitate preparation for the qualifying examination or dissertation. Students will critically analyze scholarly work including their own works in progress.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 2-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

EDU 294 – Special Topics in Science, Agriculture & Mathematics Education (4 units)

Course Description: Critical study of special topics of research relevant to science, agricultural and mathematics education. Students and faculty present work-in-progress on a major research project, and critically analyze and discuss one another's developing scholarly work.

Learning Activities: Seminar 3 hour(s), Term Paper, Project.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EDU 295 – Special Topics in Learning & Mind Science (4 units)

Course Description: Critical study of selected issues in the learning sciences, neurodevelopmental disorders, and psychometrics and measurement, as they relate to education.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topics differs.

Grade Mode: Letter.

EDU 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

EDU 299 – Individual Study (1-6 units)

Course Description: Individual study under the direction of a faculty member.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-18 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

EDU 299D – Research (1-12 units)

Course Description: Research for individual graduate students.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 3-36 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

EDU 300 – Reading in the Elementary School (4 units)

Course Description: Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture 3 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

EDU 300A – Reading in the Elementary School, Part A (1 unit)

Course Description: Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Pass/No Pass only.

EDU 300B – Reading in the Elementary Schools, Part B (3 units)

Course Description: Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

EDU 301 – Reading in the Secondary School (4 units)

Course Description: Principles, procedures, and materials to help secondary school teachers improve the reading competence of students. Strategies for enhancing learning through reading and writing in all disciplines, with special attention to linguistically diverse populations.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

EDU 301A – Teaching Literacy in High School Contexts (2 units)

Course Description: Focuses on secondary school literacy practices and strategies for engaging English-speaking and bilingual students with textual, image, and digital literacies across content areas. Covers reading and writing, the Common Core and Language Proficiency standards.

Prerequisite(s): Consent of instructor. Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the secondary credential program.

Grade Mode: Letter.

EDU 301B – Teaching Literacy in High School Contexts (2 units)

Course Description: Focuses on secondary school literacy practices and strategies for engaging English-speaking and bilingual students with textual, image, and digital literacies across content areas. Covers reading and writing, the Common Core and Language Proficiency standards.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the secondary credential program.

Grade Mode: Letter.

EDU 302 – Language Arts in the Elementary School (2 units)

Course Description: Principles, procedures, and materials for the teaching of oral and written expression, listening skills, drama, and children's literature in elementary schools.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

EDU 303 – Art Education in the Elementary School (2 units)

Course Description: Understanding the principles of education in the arts through participation. Development of concepts, introduction to media, and techniques suitable for the elementary school with emphasis on cross-discipline exploration.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

EDU 304A – Teaching in the Elementary Schools (2-18 units)

Course Description: Supervised teaching in regular classrooms in elementary schools. Selection and organization of teaching materials.

Introduction to techniques of diagnosing school achievement of children.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 9-48 hour(s).

Grade Mode: Letter.

EDU 304B – Teaching in the Elementary Schools (2-18 units)

Course Description: Supervised teaching in regular classrooms in elementary schools. Current conceptions of elementary school curriculum, emphasis on contributions from the social, biological, and physical sciences. Emphasis on effective teaching methods.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 9-48 hour(s).

Grade Mode: Letter.

EDU 304C – Teaching in the Elementary Schools (2-18 units)

Course Description: Supervised teaching in regular classrooms in elementary schools. Evaluation of teaching materials including instructional technology. Current elementary school curriculum with emphasis on contributions from fine arts and humanities.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 9-48 hour(s).

Grade Mode: Letter.

EDU 305A – Teaching in the Middle Grades (5-8 units)

Course Description: Supervised teaching in regular or special education classrooms in middle grades. Current conceptions of the middle-grades curriculum with emphasis on social, biological, and physical sciences. Effective teaching methods.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Seminar 2 hour(s), Seminar 2 hour(s), Variable 15-30 hour(s).

Grade Mode: Letter.

EDU 306A – Teaching in the Secondary Schools (2-18 units)

Course Description: Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 9-48 hour(s).

Grade Mode: Letter.

EDU 306B – Teaching in the Secondary Schools (2-18 units)

Course Description: Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 9-48 hour(s).

Grade Mode: Letter.

EDU 306C – Teaching in the Secondary Schools (2-18 units)

Course Description: Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 9-48 hour(s).

Grade Mode: Letter.

EDU 307 – Methods in Elementary Science (2 units)

Course Description: Principles, procedures, and materials for teaching the biological and physical sciences in elementary schools.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

EDU 308 – Methods in Elementary Social Studies (2 units)

Course Description: Principles, procedures, and materials for teaching history and the social sciences in elementary schools.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

EDU 309 – The Teaching of Mathematics, K-9 (3 units)

Course Description: Mathematics curriculum and teaching methods for K-9 reflecting the needs of California's diverse student populations.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

EDU 309A – The Teaching of Mathematics, K-9, Part A (1 unit)

Course Description: Mathematics curriculum and teaching methods for K-9 reflecting the needs of California's diverse student populations.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Pass/No Pass only.

EDU 309B – The Teaching of Mathematics, K-9, Part B (2 units)

Course Description: Mathematics curriculum and teaching methods for K-9 reflecting the needs of California's diverse student populations.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

EDU 310 – Teaching as Reflective Practice (1 unit)

Course Description: Presentation of issues related to classroom instruction and professional practice, reflections on classroom instruction and other documentation related to student teaching experience.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Acceptance in Teacher Credential Program.

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Letter.

EDU 320 – Creating Classroom Communities (1 unit)

Course Description: Observation of classrooms at beginning of academic year for first-hand experience with teachers' approaches to creating communities and setting routines. Candidates are placed with students they will teach during student teaching. Candidates may take on teaching tasks as appropriate.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 30 hour(s).

Enrollment Restriction(s): Acceptance in Teacher Credential Program.

Grade Mode: Letter.

EDU 322A – Pedagogical Preparation for Secondary Social Science I (3 units)

Course Description: Introduction to teaching methods and curriculum approaches for secondary social science teaching. State and national curriculum standards; application of learning theory to effective instruction; interdisciplinary teaching and active learning approaches; effective teaching strategies for English learners.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EDU 322B – Pedagogical Preparation for Secondary Social Science II (3 units)

Course Description: Intermediate teaching methods and curriculum approaches for secondary social science teaching. Interdisciplinary approaches to teaching major themes across social science content areas; teaching potentially controversial social science topics; teaching democratic civic values, student assessment and evaluation.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 1 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

EDU 323A – Physical Science in the Secondary School (3 units)

Course Description: Activity-based overview of concepts and processes in secondary school physical sciences. Emphasis upon philosophy, appropriate teaching methods, materials, assessment and evaluation of learning.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Discussion/Laboratory 2 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

EDU 323B – Life Sciences in the Secondary School (3 units)

Course Description: Activity-based overview of concepts and processes in secondary school biology and life sciences. Emphasis on philosophy, appropriate teaching methods, materials, assessment and evaluation of learning, and issues.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Discussion/Laboratory 2 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

EDU 324A – Methods & Technology in Secondary Mathematics I (4 units)

Course Description: Introduction to methods and curriculum for teaching mathematics at the secondary level. Introduction to applications of computer technology as instructional, intellectual, and communication tools for mathematics teachers.

Prerequisite(s): Consent of instructor. Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

EDU 324B – Methods in Secondary Mathematics II (3 units)

Course Description: Expansion of methods and curriculum for teaching mathematics at the secondary level. Intermediate applications of computer technology as instructional, intellectual, and communication tools in mathematics teaching.

Prerequisite(s): Consent of instructor. Acceptance in Teacher Credential Program.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

EDU 325 – Research & Methods in Secondary English Language Arts (4 units)

Course Description: Research on teaching and learning in the language arts. Principles, procedures and materials for improving the writing, reading and oral language of secondary students, with special attention to students from culturally and linguistically diverse populations.

Prerequisite(s): Consent of instructor. Acceptance in Teacher Credential Program.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

EDU 326 – Teaching Language Minority Students in Secondary Schools: Methods & Research (4 units)

Course Description: Research on principles, procedures and curricula for teaching discipline-specific concepts to language-minority students in secondary schools. Second-language acquisition principles and instructional strategies.

Prerequisite(s): Consent of instructor. Acceptance in Teacher Credential Program.

Learning Activities: Seminar 3 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

EDU 327A – Teaching Methods for Secondary Foreign Language/Spanish, Part I (3 units)

Course Description: Introduction to methods for teaching Spanish as a foreign and a heritage language in secondary schools. State and National Standards. Theories on second language acquisition. Lesson plans. Effective teaching strategies and class management.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EDU 327B – Teaching Methods for Secondary Foreign Language/Spanish, Part II (3 units)

Course Description: Continuation to methods for teaching Spanish as a foreign and a heritage language in secondary schools. Research and practice on foreign and heritage language teaching. Expansion of effective teaching strategies and class management.

Prerequisite(s): Acceptance in Teacher Credential Program.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EDU 380 – Active Literacy Academyo—The UK Experience (2 units)

Course Description: One-week introduction to the teaching of dense text for teachers of grades K-12. Examination of Shakespeare's canon and immersion in active classroom practices that deepen engagement and understanding of key themes that transcend content areas.

Prerequisite(s): Consent of Instructor; consent of instructor based on selection/application process of participants.

Learning Activities: Lecture/Discussion 45 hour(s).

Enrollment Restriction(s): Admission to Active Literacy Academy through application process.

Grade Mode: Passed/Not Passed only.

EDU 398 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

EDU 399 – Individual Study (1-5 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Education Abroad Program (EAP)

College of Letters & Science

EAP 001 – Global Thinking (4 units)

Course Description: Global perspectives on challenges facing our planet and humanity in historical and contemporary contexts. Understanding transnational systems' impacts and roles in generating equitable solutions. Global diversity and global action on climate, migration, public health, food/water, inequality, and more.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

EAP 090X – International Education Seminar (1 unit)

Course Description: Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues.

Prerequisite(s): Open to lower division applicants for EAP or UC Davis study abroad and international internship programs.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EAP 180 – Education Abroad: Special Topics (1-12 units)

Course Description: Students who participate in approved international programs take this course up to 12 units while studying abroad.

Prerequisite(s): Minimum GPA requirement for each study abroad program as specified in the written agreement between UC Davis and the host institution; prerequisites for language courses may also apply.

Learning Activities: Lecture/Discussion 3-12 hour(s), Discussion/Laboratory 3 hour(s).

Repeat Credit: May be repeated when credits are reviewed by departments & Dean's Office to determine how they fulfill UC Davis requirements.

Grade Mode: Letter.

EAP 190X – International Education Seminar (1 unit)

Course Description: Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues.

Prerequisite(s): Open to upper division applicants for EAP or UC Davis study abroad and international internship programs.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EAP 192 – Internship in Education Abroad (1-12 units)

Course Description: Internship with Education Abroad program, potentially either at university or taught abroad.

Prerequisite(s): Participation in a study abroad program.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

Electrical & Computer Engineering (EEC)

College of Engineering

EEC 001 – Introduction to Electrical & Computer Engineering (2 units)

Course Description: Introduction to Electrical & Computer Engineering with focus on sub-disciplines of Electrical & Computer Engineering, engineering design, and problem solving. Microcontrollers, analog circuits, signal processing, and communications links. Application of topics to create a functional device.

Learning Activities: Lecture 1 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 007 – Introduction to Programming & Microcontrollers (4 units)

Course Description: Programming computers using C/C++ languages. Software engineering and object-oriented design. Programming for hardware devices.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Pass One restricted to Electrical Engineering majors only.

Credit Limitation(s): Only 2 units of credit for students who have previously taken ECS 036A or ECS 032A.

Grade Mode: Letter.

EEC 010 – Introduction to Digital & Analog Systems (4 units)

Course Description: Interactive and practical introduction to fundamental concepts of electrical and computer engineering by implementing electronic systems, which can be digitally controlled and interrogated, with a programmable microcontroller with the ability to program the electrical connections between analog and digital components.

Learning Activities: (ECS 030 or ECS 036B or EEC 007); (ENG 017 or ENG 017); consent of instructor.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 018 – Digital Systems I (5 units)

Course Description: Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools.

Prerequisite(s): ENG 017 or ENG 017V.

Learning Activities: Lecture 3 hour(s), Laboratory 4 hour(s).

Credit Limitation(s): No credit to students who have previously completed EEC 180A.

Grade Mode: Letter.

EEC 089A – Special Topics in Electromagnetics (1-5 units)

Course Description: Special topics in Electromagnetics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 089B – Special Topics in Physical Electronics (1-5 units)

Course Description: Special topics in Physical Electronics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 089C – Special Topics in Active & Passive Circuits (1-5 units)

Course Description: Special topics in Active & Passive Circuits.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 089D – Special Topics in Signals & Systems (1-5 units)

Course Description: Special topics in Signals & Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 089E – Special Topics in Computer Systems & Software (1-5 units)

Course Description: Special topics in Computer Systems & Software.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 089F – Special Topics in Digital System Design (1-5 units)

Course Description: Special topics in Digital System Design.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 090C – Research Group Conference in Electrical & Computer Engineering (1 unit)

Course Description: Research group conferences.

Prerequisite(s): Consent of instructor. Lower division standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EEC 090X – Lower Division Seminar (1-4 units)

Course Description: Examination of a special topic in a small group setting.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

EEC 092 – Internship in Electrical & Computer Engineering (1-5 units)

Course Description: Supervised work experience in Electrical & Computer Engineering.

Prerequisite(s): Lower division standing; project approval prior to period of internship.

Learning Activities: Internship 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EEC 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EEC 099 – Special Study for Lower Division Students (1-5 units)

Course Description: Special study for lower division students.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EEC 100 – Circuits II (5 units)

Course Description: Theory, application, and design of analog circuits.

Methods of analysis including frequency response, SPICE simulation, and Laplace transform. Operational amplifiers and design of active filters.

Prerequisite(s): (ENG 017 C or better or ENG 017V C or better);

(MAT 022B or MAT 027B).

Learning Activities: Laboratory 3 hour(s), Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to the following majors: Electrical Engineering, Computer Engineering, Computer Science & Engineering, Electrical Engineering/Materials Science, Biomedical Engineering, Applied Physics, graduate students in the Electrical & Computer Engineering major.

Credit Limitation(s): Students who have completed ENG 100 may receive 3.5 units of credit.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

EEC 105A – EE-Emerge 1 (1 unit)

Course Description: Work in groups to conceive, design and prototype electronic exhibits to promote engineering to the public.

Learning Activities: Workshop 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Electrical & Computer Engineering Junior and Sophomore-level students.

Grade Mode: Pass/No Pass only.

EEC 105B – EE-Emerge 2 (2 units)

Course Description: Work in groups to construct electronic exhibits.

Learning Activities: Workshop 2 hour(s).

Enrollment Restriction(s): Pass One restricted to Electrical & Computer Engineering Junior and Sophomore-level students.

Grade Mode: Pass/No Pass only.

EEC 105C – EE-Emerge 3 (1 unit)

Course Description: Work in groups to present electronic exhibits to the public.

Prerequisite(s): EEC 105B.

Learning Activities: Workshop 1 hour(s).

Grade Mode: Pass/No Pass only.

EEC 110A – Electronic Circuits I (4 units)

Course Description: Use and modeling of nonlinear solid-state electronic devices in basic analog and digital circuits. Introduction to the design of transistor amplifiers and logic gates.

Prerequisite(s): EEC 100; (EEC 140A (can be concurrent) or EEC 140AV (can be concurrent) or EEC 111 (can be concurrent)).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

EEC 110B – Electronic Circuits II (4 units)

Course Description: Analysis and design of integrated circuits. Single-stage amplifiers, cascaded amplifier stages, differential amplifiers, current sources, frequency response, and return-ratio analysis of feedback amplifiers.

Prerequisite(s): EEC 110A.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

EEC 111 – Digital Electronic Circuits (4 units)

Course Description: MOS device fundamentals, introduction to the design of CMOS logic gates, layout, circuits, and modeling. Examination of voltage transfer characteristics, and propagation delay.

Prerequisite(s): EEC 100.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Computer Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 112 – Communication Electronics (4 units)

Course Description: Electronic circuits for analog and digital communication, including oscillators, mixers, tuned amplifiers, modulators, demodulators, and phase-locked loops. Circuits for amplitude modulation (AM) and frequency modulation (FM) are emphasized.

Prerequisite(s): EEC 110A; EEC 150; EEC 110B recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 113 – Power Electronic Circuits (4 units)

Course Description: Electronic circuits for power applications, including linear voltage regulators, switching DC-DC converters, DC-AC converters (inverters) and AC-DC converters (rectifiers). Control loop and stability of circuits.

Prerequisite(s): EEC 110A or (EEC 111, (EEC 157A or EEC 157AV)).

Learning Activities: Lecture/Lab 4 hour(s).

Grade Mode: Letter.

EEC 116 – VLSI Design (4 units)

Course Description: CMOS devices, layout, circuits, and functional units; VLSI fabrication and design methodologies.

Prerequisite(s): EEC 110A or EEC 111; EEC 018 or 180A recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 118 – Digital Integrated Circuits (4 units)

Course Description: Analysis and design of digital integrated circuits.

Emphasis on MOS logic circuit families. Logic gate construction, voltage transfer characteristics, propagation delay, and power consumption. Regenerative circuits, sequential elements, interconnect, RAMs, ROMs, and PLAs.

Prerequisite(s): EEC 110A; (EEC 018 or EEC 180A).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 119A – Integrated Circuit Design Project (3 units)

Course Description: Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report.

Prerequisite(s): EEC 116 or EEC 118.

Learning Activities: Workshop 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 119B – Integrated Circuit Design Project (3 units)

Course Description: Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report.

Prerequisite(s): EEC 119A.

Learning Activities: Workshop 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 130A – Electromagnetics I (4 units)

Course Description: Basics of static electric and magnetic fields and fields in materials. Work and scalar potential. Maxwell's equations in integral and differential form. Plan waves in lossless media. Lossless transmission lines.

Prerequisite(s): MAT 021D; (PHY 009C or PHY 009HD); (ENG 017 or ENG 017V).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 130B – Introductory Electromagnetics II (4 units)

Course Description: Plane wave propagation in lossy media, reflections, guided waves, simple modulated waves and dispersion, and basic antennas.

Prerequisite(s): EEC 130A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 132A – RF & Microwaves in Wireless Communication (5 units)

Course Description: Study of Radio Frequency and Microwave theory and practice for design of wireless electronic systems. Transmission lines, microwave integrated circuits, circuit analysis of electromagnetic energy transfer systems, the scattering parameters.

Prerequisite(s): EEC 110A; EEC 130B.

Learning Activities: Lecture 3 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 132B – RF & Microwaves in Wireless Communication (5 units)

Course Description: Passive RF and microwave device analysis, design, fabrication, and testing for wireless applications. RF and microwave filter and coupler design. Introductory analysis and design of RF and microwave transistor amplifiers.

Prerequisite(s): EEC 132A.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 132C – RF & Microwaves in Wireless Communications (5 units)

Course Description: RF and microwave amplifier theory and design, including transistor circuit models, stability considerations, noise models and low noise design. Theory and design of microwave transistor oscillators and mixers. Wireless system design and analysis.

Prerequisite(s): EEC 132B.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 133 – Electromagnetic Radiation & Antenna Analysis (4 units)

Course Description: Properties of electromagnetic radiation; analysis and design of antennas: ideal, small loop, aperture, and arrays; antenna simulations/measurements.

Prerequisite(s): EEC 130B.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 134A – RF/Microwave Systems Design (3 units)

Course Description: Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models.

Prerequisite(s): EEC 130B or EEC 110B or EEC 150A.

Learning Activities: Workshop 3 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Limited to 24 students.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 134B – RF/Microwave Systems Design (3 units)

Course Description: Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models.

Prerequisite(s): EEC 134A.

Learning Activities: Workshop 3 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Limited to 24 students.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 135 – Optoelectronics for High-Speed Data Networking & Computing Systems (4 units)

Course Description: Principles of optical communication systems. Planar dielectric waveguides. Optical fibers. Silicon photonics. Attenuation and dispersion in optical fibers. Optical sources, detectors, transmitters, receivers, modulators, optical amplifiers, and optical multiplexers/demultiplexers. Optics in data centers and computing systems. Design of digital optical communication links.

Prerequisite(s): EEC 130B.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 136A – Electronic Design Project (3 units)

Course Description: Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized.

Prerequisite(s): (ECS 036B or EEC 007); EEC 018; EEC 100; (EEC 110B or EEC 180 or EEC 157A (can be concurrent) or EEC 157AV (can be concurrent)).

Learning Activities: Workshop 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Pass One restricted to major.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 136B – Electronic Design Project (3 units)

Course Description: Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized.

Prerequisite(s): EEC 136A.

Learning Activities: Workshop 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 140A – Principles of Device Physics I (4 units)

Course Description: Semiconductor device fundamentals, equilibrium and non-equilibrium statistical mechanics, conductivity, diffusion, electrons and holes, p-n and Schottky junctions, first-order metal-oxide-semiconductor (MOS) field effect transistors, bipolar junction transistor fundamentals.

Prerequisite(s): (ENG 017 (can be concurrent) or ENG 017V (can be concurrent)); (PHY 009D or PHY 009HE).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 140AV – Principles of Device Physics I (4 units)

Course Description: Semiconductor device fundamentals, equilibrium and non-equilibrium statistical mechanics, conductivity, diffusion, electrons and holes, p-n and Schottky junctions, first-order metal-oxide-semiconductor (MOS) field effect transistors, bipolar junction transistor fundamentals.

Prerequisite(s): (ENG 017 (can be concurrent) or ENG 017V (can be concurrent)); (PHY 009D or PHY 009HE).

Learning Activities: Web Virtual Lecture 3 hour(s); Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Electrical Engineering majors.

Grade Mode: Letter.

EEC 140B – Principles of Device Physics II (4 units)

Course Description: Electrical properties, designs, models and advanced concepts for MOS, Bipolar, and Junction Field-Effect Transistors, including scaling, minority-carrier distributions, non-ideal effects, and device fabrication methods. MESFET and heterojunction bipolar transistors (HBTs). Fundamentals of solar cells, photodetectors, LEDs and semiconductor lasers.

Prerequisite(s): EEC 140A or EEC 140AV.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 145 – Electronic Materials (4 units)

Course Description: Electronic and physical properties of materials used in electronics, ICs, optoelectronics and MEMS. Semiconductors, dielectrics, metals, optical materials, organic semiconductive, optical and nonlinear properties, as well as their synthesis and deposition methods.

Prerequisite(s): EEC 140A or EEC 140AV.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 146A – Integrated Circuits Fabrication (4 units)

Course Description: Theoretical and experimental study of basic fabrication processes for metal oxide semiconductor integrated circuits, including oxidation, photolithography, impurity diffusion, metallization, wet chemical etching, and characterization.

Prerequisite(s): EEC 140A or EEC 140AV.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 146B – Advanced Integrated Circuits Fabrication (3 units)

Course Description: Fabrication processes for CMOS VLSI. Laboratory projects examine deposition of thin films, ion implantation, process simulation, anisotropic plasma etching, sputter metallization, and C-V analysis. Topics include isolation, projection alignment, epitaxial growth, thin gate oxidation, and rapid thermal annealing.

Prerequisite(s): EEC 146A.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Electrical, Computer, and Electrical/Materials Science majors and Electrical Engineering graduate students; non-majors accommodated when space available.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 150 – Introduction to Signals & Systems (4 units)

Course Description: Characterization and analysis of continuous-time linear systems. Fourier series and transforms with applications. Introduction to communication systems. Transfer functions and block diagrams. Elements of feedback systems. Stability of linear systems.

Prerequisite(s): EEC 100; (ENG 006 or MAT 022AL).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 151 – Digital Signals & Systems (4 units)

Course Description: Characterization and analysis of discrete time systems. Difference equation models. Z-transform analysis methods. Frequency Analysis. Discrete and fast Fourier transforms. Digital Filtering.

Prerequisite(s): EEC 100.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 152 – Digital Signal Processing (4 units)

Course Description: Theory and practice of real-time digital signal processing. Fundamentals of real-time systems. Programmable architectures including I/O, memory, peripherals, interrupts, DMA. Interfacing issues with A/D and D/A converters to a programmable DSP. Specification driven design and implementation of simple DSP applications.

Prerequisite(s): EEC 150B; (EEC 070 or ECS 050).

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 157A – Control Systems (4 units)

Course Description: Analysis and design of feedback control systems. Examples are drawn from electrical and mechanical systems as well as other engineering fields. Mathematical modeling of systems, stability criteria, root-locus and frequency domain design methods.

Prerequisite(s): EEC 100.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 157AV – Control Systems (4 units)

Course Description: Analysis and design of feedback control systems. Examples drawn from electrical and mechanical systems as well as other engineering fields. Mathematical modeling of systems, stability criteria, root-locus and frequency domain design methods.

Prerequisite(s): EEC 100.

Learning Activities: Web Virtual Lecture 3 hour(s); Web Electronic Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 157B – Control Systems II (4 units)

Course Description: Control system design; transfer-function and state-space methods; sampled-data implementation, digital control. Laboratory includes feedback system experiments and simulation studies.

Prerequisite(s): EEC 157A or EEC 157AV.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 157BY – Control Systems II (4 units)

Course Description: Control system design; transfer-function and state-space methods; sampled-data implementation, digital control. Laboratory includes feedback system experiments and simulation studies.

Prerequisite(s): EEC 157A or EEC 157AV.

Learning Activities: Web Virtual Lecture 3 hour(s); Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 160 – Signal Analysis & Communications (4 units)

Course Description: Signal analysis based on Fourier methods. Fourier series and transforms; time-sampling, convolution, and filtering; spectral density; modulation: carrier-amplitude, carrier-frequency, and pulse-amplitude.

Prerequisite(s): EEC 150.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 161 – Applied Probability for Electrical & Computer Engineers (4 units)

Course Description: Axioms of probability, discrete and continuous random variables, expectation and moments. Transformation of random variables. Joint and conditional densities. Limit theorems, Markov and Poisson processes. Applications in Electrical and Computer Engineering.

Prerequisite(s): (ENG 006 or MAT 022AL); MAT 021D; MAT 022A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 165 – Statistical & Digital Communication (4 units)

Course Description: Introduction to random process models of modulated signals and noise, and analysis of receiver performance. Analog and digitally modulated signals. Signal-to-noise ratio, probability of error, matched filters. Intersymbol interference, pulse shaping and equalization. Carrier and clock synchronization.

Prerequisite(s): EEC 160; EEC 161.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 170 – Introduction to Computer Architecture (4 units)

Course Description: Introduces basic aspects of computer architecture, including computer performance measurement, instruction set design, computer arithmetic, pipelined/non-pipelined implementation, and memory hierarchies (cache and virtual memory). Presents a simplified Reduced Instruction Set Computer using logic design methods from the prerequisite course.

Prerequisite(s): (ECS 036B or ECS 030 or ECS 034 or EEC 007); (EEC 018 or EEC 180A).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 171 – Parallel Computer Architecture (4 units)

Course Description: Organization and design of parallel processors including shared-memory multiprocessors, cache coherence, memory consistency, snooping protocols, synchronization, scalable multiprocessors, message passing protocols, distributed shared memory and interconnection networks.

Prerequisite(s): EEC 170 or ECS 154B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 172 – Embedded Systems (4 units)

Course Description: Introduction to embedded-system hardware and software. Topics include: embedded processor and memory architecture; input/output hardware and software, including interrupts and direct memory access; interfacing with sensors and actuators; wired and wireless embedded networking.

Prerequisite(s): (EEC 170 or ECS 154A); EEC 100.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 173A – Computer Networks (4 units)

This version has ended; see updated course, below.

Course Description: Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis.

Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science, Computer Science Engineering and Computer Engineering Majors only.

Credit Limitation(s): Only 2 units of credit for students who have taken ECS 157.

Cross Listing: ECS 152A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 173A – Computer Networks (4 units)

Course Description: Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis.

Prerequisite(s): (ECS 032B or ECS 036C); (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 100 or STA 032, STA 035B).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Computer Science, Computer Science Engineering and Computer Engineering Majors only.

Credit Limitation(s): Only 2 units of credit for students who have taken ECS 157.

Cross Listing: ECS 152A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

This course version is effective from, and including: Fall Quarter 2024.

EEC 173B – Advanced Topics in Computer Networks (4 units)

Course Description: Advanced topics in computer networks, wireless networks, multimedia networking, traffic analysis and modeling, network design and management, network simulation and performance analysis, and design projects in communication networks.

Prerequisite(s): EEC 173A or ECS 152A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECS 152C.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 174AY – Applied Machine Learning (3 units)

Course Description: Applied machine learning (ML) and deep learning (DL) in engineering systems. Design and evaluation of components that are critical to artificial intelligence (AI) driven control systems, including but not limited to sensor fusion, feature engineering, computer vision (semantic segmentation, objection detection), ML based classification, and learning-based control systems. Team project including a final presentation and report.

Prerequisite(s): ENG 006 or MAT 022AL); (EEC 007 or ECS 036B); (EEC 161 or EEC 151 or ECS 036C).

Learning Activities: Laboratory 3 hour(s), Web Virtual Lecture 2 hour(s).

Enrollment Restriction(s): Pass One restricted to Computer Engineering and Electrical Engineering majors.

Grade Mode: Letter.

EEC 174BY – Applied Machine Learning Senior Design Projects (3 units)

Course Description: Design, development, and evaluation of components that are critical to artificial intelligence (AI) driven control systems.

Team project including a final presentation and report. Example design themes include but not limited to self-driving cars, smart healthcare, and precision agriculture.

Prerequisite(s): EEC 174AY.

Learning Activities: Web Virtual Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

EEC 175A – Internet of Things (3 units)

Course Description: Introduction to principles, technologies, challenges, and required expertise to build the Internet of Things (IoT) solutions. Sensing, computing, wireless communication, IP communication, and cloud processing for building an IoT solution.

Prerequisite(s): EEC 018; (EEC 111 or EEC 110A).

Learning Activities: Lecture 2 hour(s); Laboratory 3 hour(s).

Grade Mode: Letter.

EEC 175B – Internet of Things Senior Design Project (3 units)

Course Description: Propose and design a senior IoT design project, using the design principles they have studied in the prerequisite course, Internet of Things.

Prerequisite(s): EEC 175A.

Learning Activities: Lecture 1 hour(s); Laboratory 3 hour(s).

Grade Mode: Letter.

EEC 179 – Applied Machine Learning for Electrical & Computer Engineers (4 units)

Course Description: Fundamental techniques in machine learning for data preparation, preprocessing, classification, and regression. Bringing practical machine learning algorithms to the field and deploying them on real problems in hardware, mobile health, embedded systems, security, and other related topics.

Prerequisite(s): EEC 161.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 180 – Digital Systems II (5 units)

Course Description: Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits.

Prerequisite(s): EEC 018 or EEC 180A.

Learning Activities: Lecture 3 hour(s), Laboratory 4 hour(s).

Credit Limitation(s): No credit to students who have previously completed EEC 180B.

Grade Mode: Letter.

EEC 181A – Digital Systems Design Project (3 units)

Course Description: Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. Team project includes a final presentation and report.

Prerequisite(s): (EEC 180 or EEC 180B); EEC 170.

Learning Activities: Workshop 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 181B – Digital Systems Design Project (3 units)

Course Description: Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. Team project includes a final presentation and report.

Prerequisite(s): EEC 181A.

Learning Activities: Workshop 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 183 – Testing & Verification of Digital Systems (5 units)

Course Description: Computer aided-testing and design verification techniques for digital systems; physical fault testing; simulation-based design verification; formal verification; timing analysis.

Prerequisite(s): EEC 170; EEC 180B.

Learning Activities: Lecture 3 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189A – Special Topics in Electrical Engineering & Computer Science: Computer Science (1-5 units)

Course Description: Special topics in Computer Science.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189B – Special Topics in Electrical Engineering & Computer Science: Programming Systems (1-5 units)

Course Description: Special topics in Programming Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189C – Special Topics in Electrical Engineering & Computer Science: Digital Systems (1-5 units)

Course Description: Special topics in Digital Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189D – Special Topics in Electrical Engineering & Computer Science: Communications (1-5 units)

Course Description: Special topics in Communications.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189E – Special Topics in Electrical Engineering & Computer Science: Signal Transmission (1-5 units)

Course Description: Special topics in Signal Transmission.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189F – Special Topics in Electrical Engineering & Computer Science: Digital Communication (1-5 units)

Course Description: Special topics in Digital Communication.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189G – Special Topics in Electrical Engineering & Computer Science: Control Systems (1-5 units)

Course Description: Special topics in Control Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189H – Special Topics in Electrical Engineering & Computer Science: Robotics (1-5 units)

Course Description: Special topics in Robotics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189I – Special Topics in Electrical Engineering & Computer Science: Signal Processing (1-5 units)

Course Description: Special topics in Signal Processing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189J – Special Topics in Electrical Engineering & Computer Science: Image Processing (1-5 units)

Course Description: Special topics in Image Processing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189K – Special Topics in Electrical Engineering & Computer Science: High-Frequency Phenomena & Devices (1-5 units)

Course Description: Special topics in High-Frequency Phenomena & Devices.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189L – Special Topics in ECS: Solid-State Devices & Physical Electronics (1-5 units)

Course Description: Special topics in Solid-State Devices & Physical Electronics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189M – Special Topics in Electrical Engineering & Computer Science: Systems Theory (1-5 units)

Course Description: Special topics in Systems Theory.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189N – Special Topics in Electrical Engineering & Computer Science: Active & Passive Circuits (1-5 units)

Course Description: Special topics in Active & Passive Circuits.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189O – Special Topics in Electrical Engineering & Computer Science: Integrated Circuits (1-5 units)

Course Description: Special topics in Integrated Circuits.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189P – Special Topics in Electrical Engineering & Computer Science: Computer Software (1-5 units)

Course Description: Special topics in Computer Software.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189Q – Special Topics in Electrical Engineering & Computer Science: Computer Engineering (1-5 units)

Course Description: Special topics in Computer Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189R – Special Topics in Electrical Engineering & Computer Science: Microprocessing (1-5 units)

Course Description: Special topics in Microprocessing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189S – Special Topics in Electrical Engineering & Computer Science: Electronics (1-5 units)

Course Description: Special topics in Electronics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189T – Special Topics in Electrical Engineering & Computer Science: Electromagnetics (1-5 units)

Course Description: Special topics in Electromagnetics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189U – Special Topics in Electrical Engineering & Computer Science: Opto-Electronics (1-5 units)

Course Description: Special topics in Opto-Electronics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory, Lecture/Lab.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 189W – Special Topics in Electrical Engineering & Computer Science: Computer Networks (1-5 units)

Course Description: Special topics in Computer Networks.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 190C – Research Group Conferences in Electrical & Computer Engineering (1 unit)

Course Description: Research group conferences.

Prerequisite(s): Consent of instructor. Upper division standing in Electrical and Computer Engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EEC 192 – Internship in Electrical & Computer Engineering (1-6 units)

Course Description: Supervised work experience in electrical and computer engineering.

Prerequisite(s): Consent of instructor. Completion of a minimum of 84 units; project approval before period of internship.

Learning Activities: Internship 3-18 hour(s).

Repeat Credit: May be repeated when project differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EEC 193A – Senior Design Project (3 units)

Course Description: Team design project for seniors in Electrical or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project is supervised by a faculty member.

Prerequisite(s): EEC 196 (can be concurrent); and consent of instructor.

Learning Activities: Workshop 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Restricted to senior standing in Electrical or Computer Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 193B – Senior Design Project (3 units)

Course Description: Team design project for seniors in Electrical Engineering or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project supervised by a faculty member.

Prerequisite(s): EEC 193A.

Learning Activities: Workshop 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 195A – Autonomous Vehicle Design Project (3 units)

Course Description: Design and construct an autonomous race car. Work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop.

Prerequisite(s): (ECS 036A or EEC 007); EEC 018; (EEC 110B or EEC 157A (can be concurrent) or EEC 157AV (can be concurrent) or ECS 036B).

Learning Activities: Workshop 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Pass One restricted to major.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 195B – Autonomous Vehicle Design Project (3 units)

Course Description: Design and construct an autonomous race car. Students work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop.

Prerequisite(s): EEC 195A.

Learning Activities: Workshop 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): May be repeated.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 196 – Issues in Engineering Design (1 unit)

Course Description: Covers various electrical and computer engineering standards and realistic design constraints including economic, manufacturability, sustainability, ethical, health & safety, environmental, social, and political.

Prerequisite(s): Senior standing in Electrical or Computer Engineering.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EEC 197T – Tutoring in Electrical & Computer Engineering (1-3 units)

Course Description: Tutoring in Electrical & Computer Engineering courses, especially introductory circuits. For upper division undergraduate students who will provide tutorial assistance.

Prerequisite(s): Consent of instructor. Upper division standing.

Learning Activities: Discussion 1 hour(s), Discussion/Laboratory 2-8 hour(s).

Grade Mode: Pass/No Pass only.

EEC 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EEC 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EEC 200 – Navigating Graduate School (1 unit)

Course Description: Practical and non-technical skills necessary for first-year students in the Electrical & Computer Engineering Graduate Group. Mentorship, time management, research ethics, science communication, intellectual property.

Prerequisite(s): First-year Electrical Computer Engineering graduate student, Electrical Computer Engineering transfer student, or instructor approval.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 201 – Digital Signal Processing (4 units)

Course Description: Theory and design of digital filters. Classification of digital filters, linear phase systems, all-pass functions, FIR and IIR filter design methods and optimality measures, numerically robust structures for digital filters.

Prerequisite(s): EEC 150B; STA 120 or MAT 131 or MAT 167 recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 205 – Computational Methods in Biomedical Imaging (4 units)

Course Description: Analytic tomographic reconstruction from projections in 2D and 3D; model-based image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT.

Prerequisite(s): (BIM 105 or STA 120); (BIM 108 or EEC 150A).

Learning Activities: Lecture 4 hour(s).

Cross Listing: BIM 252.

Grade Mode: Letter.

EEC 206 – Digital Image Processing (4 units)

Course Description: Two-dimensional systems theory, image perception, sampling and quantization, transform theory and applications, enhancement, filtering and restoration, image analysis, and image processing systems.

Prerequisite(s): EEC 150B.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

EEC 210 – MOS Analog Circuit Design (4 units)

Course Description: Analysis and design of MOS amplifiers, bias circuits, voltage references and other analog circuits. Stability and compensation of feedback amplifiers. Introduction to noise analysis in MOS circuits.

Prerequisite(s): EEC 110B; (EEC 140A B or better or EEC 140AV B or better).

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 211 – Advanced Analog Circuit Design (4 units)

Course Description: Noise and distortion in electronic circuits and systems. Application to communication circuits. Specific applications include mixers, low-noise amplifiers, power amplifiers, phase-locked loops, oscillators and receiver architectures.

Prerequisite(s): EEC 210; STA 131A EEC 112 recommended.

Learning Activities: Lecture 3 hour(s), Project (Term Project).

Grade Mode: Letter.

EEC 212 – Analog MOS IC Design for Signal Processing (4 units)

Course Description: Analysis and design of analog MOS integrated circuits. Passive components, Single-ended and fully differential op amps, Sampled-data and continuous-time filters.

Prerequisite(s): EEC 210.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

EEC 213 – Data-Conversion Techniques & Circuits (4 units)

Course Description: Digital-to-analog and analog-to-digital conversion; component characteristics and matching; sample-and-hold, comparator, amplifier, and reference circuits.

Prerequisite(s): EEC 210.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 214 – Integrated Circuit Design for Power Electronics (4 units)

Course Description: IC design for power electronics. Linear and switching regulation. Integrated power management. DC/DC and AC/DC conversion. Applications in portable electronics and wireless sensors.

Prerequisite(s): EEC 210.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 215 – Circuits for Digital Communications (4 units)

Course Description: Analog, digital, and mixed-signal CMOS implementations of communication-circuit blocks: gain control, adaptive equalizers, sampling detectors, clock recovery.

Prerequisite(s): EEC 150B; EEC 210 (can be concurrent); EEC 165, EEC 166, or EEC 265 recommended.

Learning Activities: Lecture 3 hour(s), Project (Term Project).

Grade Mode: Letter.

EEC 216 – Low Power Digital Integrated Circuit Design (4 units)

Course Description: Integrated circuit design for low power and energy consumption. Low power architectures, logic styles and circuit design. Variable supply and threshold voltages. Leakage management. Power estimation. Energy sources, power electronics, and energy recovery. Applications in portable electronics and sensors. Thermodynamic limits.

Prerequisite(s): EEC 118.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

EEC 221 – Radio Frequency & Microwave Filter Design (4 units)

Course Description: Design of radio frequency and microwave filters including filter specification and approximation theory. Passive LC filter design covers doubly-terminated reactance two-port synthesis and coupling matrix based synthesis. Active filter design includes sensitivity, op-amp building blocks, and cascade filter design.

Prerequisite(s): EEC 132A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 222 – RF IC Design (4 units)

Course Description: Radio frequency (RF) solid-state devices, RF device modeling and design rules; non-linear RF circuit design techniques; use of non-linear computer-aided (CAD) tools; RF power amplifier design.

Prerequisite(s): EEC 210.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 223 – RF Integrated Circuits for Wireless Communications (4 units)

Course Description: Integrated RF front end circuit design of receivers and synthesizers for wireless communications, such as LNA, mixers, PLL; noise and linearity analysis and specifications; theory and working mechanism of synthesizers and phase noise analysis.

Prerequisite(s): EEC 132A; EEC 112.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 224 – Terahertz & mm-Wave Integrated Circuit Design (4 units)

Course Description: Fundamental theory of RF transmitter and receiver, including noise analysis, transceiver architectures, and antenna arrays. Fundamental limitations, theory and design of amplifiers, oscillators and signal sources at THz and mm-wave frequencies.

Prerequisite(s): EEC 132A; EEC 112; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 228 – Advanced Microwave Circuit & Device Design Techniques (4 units)

Course Description: Theory, design, fabrication, analysis of advanced microwave circuits and devices. Wideband transformers, stripline/microstripline broadband couplers. Lumped and distributed filter synthesis. Broadband matching theory applied to microwave devices. Wideband and low noise FET/HEMT amplifiers. Advanced microwave oscillator theory. Phase noise analysis.

Prerequisite(s): EEC 132B.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

EEC 229 – RF-MEMS & Adaptive Wireless Frontends (4 units)

Course Description: Focuses on the modeling, design, fabrication, and characterization of RF-MEMS while providing a thorough introduction to the technology with an emphasis on how it will benefit the design of adaptive RF/microwave wireless systems.

Prerequisite(s): EEC 130A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 230 – Electromagnetics (4 units)

Course Description: Maxwell's equations, plane waves, reflection and refraction, complex waves, waveguides, resonant cavities, and basic antennas.

Prerequisite(s): EEC 130B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 231A – Plasma Physics & Controlled Fusion I (4 units)

Course Description: Equilibrium plasma properties; single particle motion; fluid equations; waves & instabilities in a fluid plasma; plasma kinetic theory & transport coefficients; linear & nonlinear Vlasov theory; fluctuations, correlations & radiation; inertial & magnetic confinement systems in controlled fusion.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Graduate Standing in Engineering or Consent of Instructor.

Grade Mode: Letter.

EEC 231B – Plasma Physics & Controlled Fusion II (4 units)

Course Description: Equilibrium plasma properties; single particle motion; fluid equations; waves & instabilities in a fluid plasma; plasma kinetic theory & transport coefficients; linear & nonlinear Vlasov theory; fluctuations, correlations & radiation; inertial & magnetic confinement systems in controlled fusion.

Prerequisite(s): EEC 231A; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 231C – Plasma Physics & Controlled Fusion III (4 units)

Course Description: Equilibrium plasma properties; single particle motion; fluid equations; waves & instabilities in a fluid plasma; plasma kinetic theory & transport coefficients; linear & nonlinear Vlasov theory; fluctuations, correlations & radiation; inertial & magnetic confinement systems in controlled fusion.

Prerequisite(s): EEC 231B; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 232A – Advanced Applied Electromagnetics I (4 units)

Course Description: The exact formulation of applied electromagnetic problems using Green's functions. Applications of these techniques to transmission circuits.

Prerequisite(s): EEC 132B or EEC 230.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 232B – Advanced Applied Electromagnetics II (4 units)

Course Description: An advanced treatment of electromagnetics with applications to passive microwave devices and antennas.

Prerequisite(s): EEC 132B.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

EEC 233 – High Speed Signal Integrity (4 units)

Course Description: Design and analysis of interconnects in high-speed circuits and sub-systems; understanding of high-speed signal propagation and signal integrity concepts; electromagnetic modeling tools and experimental techniques.

Prerequisite(s): EEC 130B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 234A – Physics & Technology of Microwave Vacuum Electron Beam Devices I (4 units)

Course Description: Physics & technology of electron beam emission, flow and transport, electron gun design, space charge waves & klystrons with applications to accelerator systems, RF power sources for radar & communication systems, thermionic energy conversion, and electric space propulsion. Recent advances in materials & manufacturing technologies are also reviewed.

Prerequisite(s): B.S. degree in physics or engineering or the equivalent background or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 234B – Physics & Technology of Microwave Vacuum Electron Beam Devices II (4 units)

Course Description: Theory, modeling, & experimental design of traveling wave tubes, backward wave oscillators, and extended interaction oscillators employed in satellite commutations, plasma imaging, and underground imaging systems.

Prerequisite(s): EEC 234A; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 234C – Physics & Technology of Microwave Vacuum Electron Beam Devices III (4 units)

Course Description: Physics & technology of gyrotrons, gyro-amplifiers, free electron lasers, magnetrons, cross-field amplifiers, and relativistic devices employed in plasma fusion reactors, microwave heating, and high power microwave applications.

Prerequisite(s): EEC 234B; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 235 – Photonics (4 units)

Course Description: Optical propagation of electromagnetic waves and beams in photonic components and the design of such devices using numerical techniques.

Prerequisite(s): EEC 130B; EEC 230 recommended.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 236 – Nonlinear Optical Applications (3 units)

Course Description: Nonlinear optical interactions in optical communication, optical information processing and integrated optics. Basic concepts underlying optical nonlinear interactions in materials and guided media.

Prerequisite(s): EEC 130B; EEC 230 (can be concurrent).

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed EEC 233.

Grade Mode: Letter.

EEC 237A – Lasers (3 units)

Course Description: Theoretical and practical description of lasers. Theory of population inversion, amplification and oscillation using semiclassical oscillator model and rate equations. Description and design of real laser system.

Prerequisite(s): EEC 235; EEC 130B; or the equivalent of EEC 130B.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed EEC 226A.

Grade Mode: Letter.

EEC 237B – Laser Physics II (4 units)

Course Description: Oscillation threshold. Coupled cavity/atomic rate equations, Linear pulse propagation; dispersion, broadening, compression. Nonlinear pulse propagation. Energy extraction. Optical beams, resonators, eigenmodes, axial/transverse modes. Paraxial ray optics, resonator stability, ABCD matrices. Laser dynamics; transients, spiking, Q-switching, active and passive modelocking.

Prerequisite(s): EEC 237A or EAD 265A.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Credit Limitation(s): Not open for credit to students who have completed EEC 226B.

Grade Mode: Letter.

EEC 238 – Semiconductor Lasers & Photonic Integration (4 units)

Course Description: Understanding of fundamental optical transitions in semiconductors and quantum-confined systems are applied to diode & unipolar lasers and selected photonic devices. The importance of radiative and non-radiative recombination, simulated emission, excitons in quantum wells, and strained quantum layers are considered. Photonic integrated circuits based on active (with optical gain) and passive (without optical gain).

Prerequisite(s): EEC 140A or EEC 140AV.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 239A – Optical Communication Technologies for High-Speed Data Networking (4 units)

Course Description: Enabling technologies for optical fiber communication and data center networks. Physical layer issues for component and system technologies in high-speed data optical communications. High-capacity data multiplexing technologies including wavelength-division-multiplexing, time-division-multiplexing, and advanced coherent modulation. Optical signal transmission, optical amplification, and optical switching for telecom and data center networks.

Prerequisite(s): EEC 130B.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 239B – High-Capacity Optical Data Systems & Networks (4 units)

Course Description: High-capacity optical data systems and networks, built-on modern optical communication technologies. Technologies behind data center networking, software defined networking, and RF-optical networking. Physical layer issues in light of networking architectures and protocols. Optical communications systems design and integration. Systems technologies and higher-level network architecture, case studies. WDM, TDM, and EON networking, optical and wireless access technologies based on PON and ROF.

Prerequisite(s): EEC 239A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 240 – Semiconductor Device Physics (4 units)

Course Description: Physical principles, characteristics and models of various semiconductor materials and devices, including: P-N junction, metal-semiconductor diodes, junction, and insulated-gate field effect transistors. Elements of basic design exercises to explore circuit design, RF phenomenon, optoelectronics, solid-state devices, materials, and large-scale integration.

Prerequisite(s): EEC 140B.

Learning Activities: Lecture 3 hour(s); Project.

Grade Mode: Letter.

EEC 241 – Introduction to Molecular Electronics (4 units)

Course Description: Examines molecules for electronic devices and sensors. Covers: electronic states of molecules, charge transport in nanoscale systems, and fabrication and measurement of molecular-scale devices. Specific Topics: Hartree-Fock & Density Functional Theory, Landauer formalism, coulomb blockade, tunneling and hopping transport.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

EEC 242 – Advanced Nanostructured Devices (4 units)

Course Description: Physics of nano-structured materials and device operation. Overview of new devices enabled by nanotechnology; fabrication and characterization methods; applications of nano-structures and devices.

Prerequisite(s): EEC 130A; (EEC 140A or EEC 140AV).

Learning Activities: Lecture 4 hour(s); Project.

Grade Mode: Letter.

EEC 243 – Optical Imaging & Microscopy (4 units)

Course Description: Theory and techniques of optical imaging & microscopy. Fourier optics; light propagation & light detection; imaging contrast mechanisms; optical & microscopy techniques.

Prerequisite(s): PHY 009B; EEC130AB recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 244 – Introduction to Neuroengineering (4 units)

Course Description: Survey of neuroengineering field from engineering and biological perspectives; micro-/nano-fabrication technology; optical and electrical techniques to monitor and modulate neural activity; computational tools and control systems; prosthetics and human machine interfaces; human performance and rehabilitation; cognitive neuroengineering; neuroethics; extensive proposal development to merge aforementioned themes into a multidisciplinary project.

Prerequisite(s): Graduate standing; or consent of instructor.

Learning Activities: Lecture 2 hour(s); Discussion 1 hour(s); Extensive Writing.

Grade Mode: Letter.

EEC 245 – Micro- & Nano-Technology in Life Sciences (4 units)

Course Description: Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: ECH 245, EMS 245, MAE 245.

Grade Mode: Letter.

EEC 246 – Advanced Projects in IC Fabrication (4 units)

Course Description: Individualized projects in the fabrication of analog or digital integrated electronic or optoelectronic circuits.

Prerequisite(s): EEC 146B.

Learning Activities: Discussion 1 hour(s), Laboratory 9 hour(s).

Grade Mode: Letter.

EEC 247 – Advanced Semiconductor Devices (4 units)

Course Description: Semiconductor devices, including MOSFETs, heterojunction transistors, light-emitting diodes, lasers, sensors, detectors, power and high-voltage transistors, MEMS resonators, organic semiconductors and photovoltaics. All material is from recent literature, encouraging students to utilize search methods and critically assess the latest research.

Prerequisite(s): Graduate standing in Engineering.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 248 – Photovoltaics & Solar Cells (3 units)

Course Description: Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation. Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns.

Prerequisite(s): EEC 140B; or consent of instructor, or equivalent.

Learning Activities: Lecture 3 hour(s).

Cross Listing: EMS 246.

Grade Mode: Letter.

EEC 249 – Nanofabrication (4 units)

Course Description: Theory and practice of nanofabrication (top-down and bottom-up approaches), used for producing integrated circuits, electronic devices, sensors, and microstructures. Process development and characterization.

Prerequisite(s): Graduate standing in Engineering.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 250 – Linear Systems & Signals (4 units)

Course Description: Mathematical description of systems. Selected topics in linear algebra. Solution of the state equations and an analysis of stability, controllability, observability, realizations, state feedback and state estimation. Discrete-time signals and systems, and the Z-transform.

Prerequisite(s): EEC 150A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 251 – Nonlinear Systems (4 units)

Course Description: Nonlinear differential equations, second-order systems, approximation methods, bifurcations, Lyapunov stability, absolute stability, Popov criterion, circle criterion, sliding-mode control, feedback linearization techniques.

Prerequisite(s): EEC 250.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 252 – Multivariable Control System Design (4 units)

Course Description: Review of single-loop feedback design. Stability, performance and robustness of multi-input multi-output control systems. H-infinity design. Frequency response methods. Optimization-based design. Algebraic design methods for uncertain systems.

Prerequisite(s): EEC 250.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 254 – Optimization (3 units)

Course Description: Modeling optimization problems in engineering design and other applications; optimality conditions; unconstrained optimization (gradient, Newton, conjugate gradient and quasi-Newton methods); duality and Lagrangian relaxation constrained optimization. (Primal method and an introduction to penalty and augmented Lagrangian methods.)

Prerequisite(s): MAT 022A; Knowledge of FORTRAN or C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EEC 255 – Robotic Systems (3 units)

Course Description: Introduction to robotic systems. Mechanical manipulators, kinematics, manipulator positioning and path planning. Dynamics of manipulators. Robot motion programming and control algorithm design.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EEC 256 – Reinforcement Learning (4 units)

Course Description: Reinforcement Learning (RL) is the subset of machine learning, the core of artificial intelligence. Topics include fundamentals of RL, bandit problems, Markov decision processes, and dynamic programming.

Prerequisite(s): EEC 260; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 260 – Random Signals & Noise (4 units)

Course Description: Random processes as probabilistic models for signals and noise. Probability and random variables, Convergence and limit theorems, Specification of random processes, Markov Chains, Wiener process and white Gaussian noise, Poisson process and shot noise, Processing and frequency analysis of random signals.

Prerequisite(s): EEC 150A; EEC 161.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 261 – Signal Processing for Communications (4 units)

Course Description: Signal processing in wireless and wireline communication systems. Characterization and distortion of wireless and wireline channels. Channel equalization and maximum likelihood sequence estimation. Channel precoding and pre-equalization. OFDM and transmit diversity. Array processing.

Prerequisite(s): EEC 165; EEC 260; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 262 – Multi-access Communications Theory (4 units)

Course Description: Maximum stable throughput of Poisson collision channels. Classic collision resolution algorithms. Carrier sensing multiple access and its performance analysis. System stability analysis. Joint design of the physical/medium access control layers. Capacity region of multi-access channels. Multi-access with correlated sources.

Prerequisite(s): (EEC 173A or ECS 152A); STA 120; or equivalent of STA 120.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 263 – Optimal & Adaptive Filtering (4 units)

Course Description: Geometric formulation of least-squares estimation problems. Theory and applications of optimum Wiener and Kalman filtering. MAP and maximum likelihood estimation of hidden Markov models, Viterbi algorithm. Adaptive filtering algorithms, properties and applications.

Prerequisite(s): EEC 260.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 264 – Estimation & Detection of Signals in Noise (4 units)

Course Description: Introduction to parameter estimation and detections of signals in noise. Bayes and Neyman-Pearson likelihood-ratio tests for signal detection. Maximum-likelihood parameter estimation. Detection of known and Gaussian signals in white or colored noise. Applications to communications, radar, signal processing.

Prerequisite(s): EEC 260.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EEC 265 – Principles of Digital Communications (4 units)

Course Description: Introduction to digital communications. Coding for analog sources. Characterization of signals and systems. Modulation and demodulation for the additive Gaussian channel. Digital signaling over bandwidth-constrained linear filter channels and over fading multipath channels. Spread spectrum signals.

Prerequisite(s): EEC 165; EEC 260; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 266 – Information Theory & Coding (4 units)

Course Description: Topics include Entropy, Relatively Entropy, Mutual Information; Asymptotic Equipartition Property; Entropy Rates of Stochastic Process; Data Compression; Channel Capacity; Differential Entropy; Gaussian Channel; Rate Distortion Theory; Network Information Theory.

Prerequisite(s): EEC 161.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 267 – Mobile Communications (4 units)

Course Description: Time-varying multi-path fading channel models and receiver performance in fading channels; multiple access techniques and multiple access receivers design and performance; optimum design and the capacity of wireless channels.

Prerequisite(s): EEC 260; EEC 265 (can be concurrent).

Learning Activities: Lecture/Lab 3 hour(s).

Grade Mode: Letter.

EEC 269A – Error Correcting Codes: Algebraic Approach (4 units)

Course Description: Introduction to theory and practice of block codes, linear block codes, cyclic codes, decoding algorithms, and coding techniques.

Prerequisite(s): MAT 022A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 269B – Error Correcting Codes II (3 units)

Course Description: Introduction to convolutional codes, turbo codes, trellis and block coded modulation codes, soft-decision decoding algorithms, the Viterbi algorithm, reliability-based decoding, trellis-based decoding, multistage decoding.

Prerequisite(s): EEC 165; EEC 269A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EEC 270 – Computer Architecture (4 units)

Course Description: Introduction to modern techniques for high-performance single and multiple processor systems. Topics include advanced pipeline design, advanced memory hierarchy design, optimizing pipeline and memory use, and memory sharing among multiprocessors. Case studies of recent single and multiple processor systems.

Prerequisite(s): EEC 170 or ECS 154B.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

EEC 272 – High-Performance Computer Architecture (4 units)

Course Description: Designing and analysis of high performance computer architecture with emphasis on vector processing, on-chip interconnect networks, chip-level multiprocessors, memory and storage subsystem design and impact of technological advances on computer architecture.

Prerequisite(s): EEC 270 or ECS 201A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 273 – Networking Architecture & Resource Management (4 units)

Course Description: Design & implementation principles of networking architecture and protocols. Internet, data center, and telephony case studies. Topics: Internet data & control planes; application & services; resource management; Quality of Service (QoS) provisioning; traffic engineering; performance evaluation, software-defined networks, & future research issues.

Prerequisite(s): ECS 152A or EEC 173A.

Learning Activities: Lecture 3 hour(s), Project.

Enrollment Restriction(s): Pass One and Pass Two only open to Graduate Students in Computer Science and Electrical & Computer Engineering.

Grade Mode: Letter.

EEC 279 – Modern Parallel Computing (4 units)

Course Description: Exploration of the architecture of modern parallel computers, their programming models, and their programming systems.

Prerequisite(s): Prior experience in C/C++ required; experience with other computer architecture, computer graphics, algorithms, and data structures are also useful; all assignments use C/C++.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 281 – VLSI Digital Signal Processing (4 units)

Course Description: Digital signal processors, building blocks, and algorithms. Design and implementation of processor algorithms, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation.

Prerequisite(s): EEC 150B; EEC 170; (EEC 180 or EEC 180B); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 283 – Advanced Design Verification of Digital Systems (4 units)

Course Description: Design verification techniques for digital systems; simulation-based design verification techniques; formal verification techniques, including equivalence checking, model checking, and theorem proving; timing analysis and verification; application of design certification techniques to microprocessors.

Prerequisite(s): EEC 170; (EEC 018 or EEC 180A).

Learning Activities: Lecture 3 hour(s), Project 1 hour(s).

Grade Mode: Letter.

EEC 284 – Design & Optimization of Embedded Computing Systems (4 units)

Course Description: Introduction to design and optimization of digital computing systems for embedded applications. Topics include combinatorial optimization techniques, performance and energy optimization in embedded systems, compilation and architecture-specific mapping, programmable and reconfigurable platforms; design automation and algorithmic improvements to design process.

Prerequisite(s): EEC 170; (EEC 180 or EEC 180B); or consent of instructor. ECS 122A recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

EEC 286 – Introduction to Digital System Testing (4 units)

Course Description: Review of several current techniques used to detect physical faults in both combinational and sequential circuits. Topics include fault modeling, fault simulation, test generation, compression techniques, and testing architectures.

Prerequisite(s): EEC 018.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

EEC 289A – Special Topics in Electrical & Computer Engineering: Computer Science (1-5 units)

Course Description: Special topics in Computer Science.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289B – Special Topics in Electrical & Computer Engineering: Programming Systems (1-5 units)

Course Description: Special topics in Programming Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289C – Special Topics in Electrical & Computer Engineering: Digital Systems (1-5 units)

Course Description: Special topics in Digital Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289D – Special Topics in Electrical & Computer Engineering: Digital Systems (1-5 units)

Course Description: Special topics in Digital Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289E – Special Topics in Electrical & Computer Engineering: Signal Transmission (1-5 units)

Course Description: Special topics in Signal Transmission.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289F – Special Topics in Electrical & Computer Engineering: Digital Communication (1-5 units)

Course Description: Special topics in Digital Communication.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289G – Special Topics in Electrical & Computer Engineering: Control Systems (1-5 units)

Course Description: Special topics in Control Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289H – Special Topics in Electrical & Computer Engineering: Robotics (1-5 units)

Course Description: Special topics in Robotics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289I – Special Topics in Electrical & Computer Engineering: Signal Processing (1-5 units)

Course Description: Special topics in Signal Processing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289J – Special Topics in Electrical & Computer Engineering: Image Processing (1-5 units)

Course Description: Special topics in Image Processing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289K – Special Topics in Electrical & Computer Engineering: High Frequency Phenomena & Devices (1-5 units)

Course Description: Special topics in High Frequency Phenomena & Devices.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289L – Special Topics in Electrical & Computer Engineering: Solid-State Devices & Physical Electronics (1-5 units)

Course Description: Special topics in Solid-State Devices & Physical Electronics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289M – Special Topics in Electrical & Computer Engineering: Systems Theory (1-5 units)

Course Description: Special topics in Systems Theory.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289N – Special Topics in Electrical & Computer Engineering: Active & Passive Circuits (1-5 units)

Course Description: Special topics in Active & Passive Circuits.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289O – Special Topics in Electrical & Computer Engineering: Integrated Circuits (1-5 units)

Course Description: Special topics in Integrated Circuits.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289P – Special Topics in Electrical & Computer Engineering: Computer Software (1-5 units)

Course Description: Special topics in Computer Software.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289Q – Special Topics in Electrical & Computer Engineering: Computer Engineering (1-5 units)

Course Description: Special topics in Computer Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289R – Special Topics in Electrical & Computer Engineering: Microprocessing (1-5 units)

Course Description: Special topics in Microprocessing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289S – Special Topics in Electrical & Computer Engineering: Electronics (1-5 units)

Course Description: Special topics in Electronics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289T – Special Topics in Electrical & Computer Engineering: Electromagnetics (1-5 units)

Course Description: Special topics in Electromagnetics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289U – Special Topics in Electrical & Computer Engineering: Optoelectronics (1-5 units)

Course Description: Special topics in Optoelectronics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 289W – Special Topics in Electrical Engineering & Computer Science: Computer Networks (1-5 units)

Course Description: Special topics in Computer Networks.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EEC 290 – Seminar in Electrical & Computer Engineering (1 unit)

Course Description: Discussion and presentation of current research and development in Electrical & Computer Engineering.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 290C – Graduate Research Group Conference in Electrical & Computer Engineering (1 unit)

Course Description: Research problems, progress, and techniques in electrical and computer engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 290P – Capstone Project For MS Plan II (4 units)

Course Description: Conducting research projects in electrical and computer engineering. Communicating research results in written reports and oral presentations. Systemic project implementation to answer a comprehensive scientific or technical question in the area of electrical and computer engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Term Paper, Lecture 1 hour(s), Extensive Problem Solving.

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 291 – Solid-State Circuit Research Laboratory Seminar (1 unit)

Course Description: Lectures on solid-state circuit and system design by various visiting experts in the field.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 292 – Seminar in Solid-State Technology (1 unit)

Course Description: Lectures on solid-state technology by various visiting experts in the field.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 293 – Computer Engineering Research Seminar (1 unit)

Course Description: Lectures, tutorials and seminars on topics in computer engineering.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 4 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 294 – Communications, Signal & Image Processing Seminar (1 unit)

Course Description: Communications, signal and image processing, video engineering and computer vision.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 295 – Systems, Control & Robotics Seminar (1 unit)

Course Description: Seminars on current research in systems and control by faculty and visiting experts. Technical presentations and lectures on current topics in robotics research and robotics technology.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 296 – Photonics Research Seminar (1 unit)

Course Description: Lectures on photonics and related areas by faculty and visiting experts.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

EEC 299 – Research (1-12 units)*Course Description:* Research.*Learning Activities:* Variable.*Grade Mode:* Satisfactory/Unsatisfactory only.**EEC 390 – The Teaching of Electrical Engineering (1 unit)***Course Description:* Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports.*Prerequisite(s):* Meet qualifications for teaching assistant and/or associate-in in Electrical Engineering.*Learning Activities:* Discussion 1 hour(s).*Repeat Credit:* May be repeated.*Grade Mode:* Satisfactory/Unsatisfactory only.**EEC 396 – Teaching Assistant Training Practicum (1-4 units)***Course Description:* Teaching Assistant training.*Prerequisite(s):* Graduate standing.*Learning Activities:* Variable.*Repeat Credit:* May be repeated.*Grade Mode:* Pass/No Pass only.

Emergency Medicine (EMR)

School of Medicine**EMR 092 – Emergency Medicine Clinical Research Internship (1-4 units)***Course Description:* Intended to give the undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students will learn the basics of conducting and developing clinical research studies, using examples from ongoing studies.*Prerequisite(s):* Consent of instructor; undergraduate student in good academic standing at UC Davis.*Learning Activities:* Internship 6-12 hour(s).*Credit Limitation(s):* Units awarded depend on hours worked.*Repeat Credit:* May be repeated 4 unit(s).*Grade Mode:* Pass/No Pass only.**EMR 092C – Joan Viteri Memorial Clinic Preceptorship (1.5 units)***Course Description:* Directed towards the undergraduate students at UC Davis that volunteer at the Joan Viteri Memorial Clinic (JVMC).*Prerequisite(s):* Consent of instructor.*Learning Activities:* Clinical Activity, Seminar 1 hour(s).*Repeat Credit:* May be repeated.*Grade Mode:* Pass/No Pass only.**EMR 192 – Emergency Medicine Clinical Research Internship (1-4 units)***Course Description:* Intended to give the upper division undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students learn the basics of conducting and developing clinical research studies.*Prerequisite(s):* Consent of instructor; undergraduate student in good academic standing at UC Davis.*Learning Activities:* Internship 6-12 hour(s).*Repeat Credit:* May be repeated 2 time(s).*Grade Mode:* Pass/No Pass only.**EMR 192A – Joan Viteri Memorial Clinic (JVMC) Student Volunteer (1 unit)***Course Description:* Field experience in health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness, basic laboratory testing and appropriate referral and follow-up. Students must apply and interview.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Lecture/Discussion 1 hour(s).*Enrollment Restriction(s):* Open to undergraduate students only.*Repeat Credit:* May be repeated 9 time(s).*Grade Mode:* Pass/No Pass only.**EMR 199A – Special Study for Advanced Undergraduates (4-12 units)***Course Description:* For students interested in working on specific EM projects in a more extensive way. Must commit at least four hours per week for two quarters.*Prerequisite(s):* Consent of instructor; experienced RA's who have successfully performed in the EMRAP program for a minimum of three quarters; must have database skills.*Learning Activities:* Variable 4-12 hour(s).*Credit Limitation(s):* Credit awarded upon completion of EMR 199B.*Grade Mode:* Letter.**EMR 299 – Research (1-12 units)***Course Description:* Directed research in the Department of Emergency Medicine.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Variable 1-12 hour(s).*Repeat Credit:* May be repeated.*Grade Mode:* Satisfactory/Unsatisfactory only.**EMR 401 – Preceptorship in Emergency Medicine (1-6 units)***Course Description:* Exposure to the specialty of Emergency Medicine and observation of a wide array of patients in the Emergency Department.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Clinical Activity 10 hour(s).*Repeat Credit:* May be repeated.*Grade Mode:* Pass/Fail only.

EMR 405A – Fundamentals of Point-of-Care Ultrasound (1 unit)

Course Description: First in a longitudinal elective course spanning the first two years of medical school. Introduces the fundamental concepts and technique of ultrasonography in preparation for patient assessment during clinical work. Through a series of lectures accompanied by hands-on practice sessions and case challenges, spaced teaching and deliberate practice, students will grasp the fundamentals of diagnostic ultrasound and solidify their knowledge of key medical science concepts.

Learning Activities: Lecture 5 hour(s), Discussion/Laboratory 4 hour(s).

Grade Mode: Pass/Fail only.

EMR 405B – Fundamentals of Point-of-Care Ultrasound (1 unit)

Course Description: Second longitudinal elective course spanning the first two years of medical school. Introduces the fundamental concepts and technique of ultrasonography in preparation for patient assessment during clinical work. Through a series of lectures accompanied by hands-on practice sessions and case challenges, spaced teaching and deliberate practice, students will grasp the fundamentals of diagnostic ultrasound and solidify their knowledge of key medical science concepts.

Learning Activities: Lecture 5 hour(s), Discussion/Laboratory 4 hour(s).

Grade Mode: Pass/Fail only.

EMR 430 – Introduction to Medical Toxicology (3-6 units)

Course Description: In-depth review of clinical and medical toxicologic emergencies. Rotation includes contact with toxicology trained emergency faculty, didactic lectures, journal club, simulation training and exposure to a very busy poison control center.

Prerequisite(s): Consent of instructor; fourth-year medical student in good standing.

Learning Activities: Variable 40 hour(s).

Grade Mode: Honors/Pass/Fail.

EMR 431 – Diagnostic Medicine for the Undifferentiated Patient (3 units)

Course Description: Distance Learning Didactic Elective. Develop skills for clinical assessment and diagnostic planning for common acute complaints. Develop a process for further expansion of clinical assessment skills that can be utilized for any chief complaint. Develop a broad differential diagnosis based solely on the chief complaint; "scripts" are created. Problem-based learning, self-study, and a diagnostic modality project is utilized.

Learning Activities: Clinical Activity.

Grade Mode: Pass/Fail only.

EMR 435 – Wilderness Medicine (3-6 units)

Course Description: Introductory elective course for students to explore how physicians can interact with the environment in austere conditions through lectures, hands-on/field experience, and case-based learning.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 20 hour(s), Clinical Activity 12 hour(s), Independent Study 8 hour(s).

Grade Mode: Pass/Fail only.

EMR 440 – Emergency Medicine Clerkship (3-6 units)

Course Description: Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion.

Prerequisite(s): Satisfactory completion of Medicine, Surgery, and Pediatric Clerkship.

Learning Activities: Variable, Clinical Activity 46 hour(s), Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

EMR 445 – Emergency Medicine Ultrasound for Fourth-Year Medical Student (3-6 units)

Course Description: Intended for students interested in learning both the technical and cognitive skills of bedside ultrasound. Emphasis will be on the use of ultrasound in emergency medicine as a diagnostic tool and in procedural guidance.

Prerequisite(s): Fourth-year Medical Student in good standing; interest in Emergency Medicine or Critical Care is recommended; EMR 440 or equivalent is recommended prior to the rotation.

Learning Activities: Variable.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

EMR 450 – Ambulatory Elective in Emergency Medicine (3-18 units)

Course Description: Credit will be given for approved non-AI Emergency Medicine courses at other institutions to which there is not an equal learning experience at UC Davis.

Learning Activities: Variable.

Enrollment Restriction(s): Restricted to MS4 students in good standing; externships/away rotations only.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Honors/Pass/Fail.

EMR 455A – Focus on POCUS A (3-6 units)

Course Description: Gain a greater proficiency of point-of-care ultrasound. Particularly useful for pursuing careers that use this modality heavily in clinical practice, such as primary care, pediatrics, emergency medicine, critical care, physical medicine and rehabilitation, etc.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s).

Grade Mode: Honors/Pass/Fail.

EMR 455B – Focus on POCUS B (6 units)

Course Description: Directed towards gaining a greater proficiency of point-of-care ultrasound. Particularly useful for those pursuing careers that use this modality heavily in clinical practice such as primary care, pediatrics, emergency medicine, critical care, physical medicine and rehabilitation, etc.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s).

Grade Mode: Honors/Pass/Fail.

EMR 465 – Externship in Emergency Medicine (3-9 units)

Course Description: Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion.

Prerequisite(s): Satisfactory completion of Medicine, Surgery and Pediatrics.

Learning Activities: Clinical Activity 36 hour(s), Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

EMR 470 – Pediatric Emergency Medicine Clerkship (3-6 units)

Course Description: See patients in the Pediatric area of the Emergency Department under the supervision of an Emergency Medicine Attending. Emphasis on recognition and management of the acutely ill pediatric patient and treatment of common pediatric complaints.

Prerequisite(s): Satisfactory completion of Medicine, Surgery, and Pediatrics.

Learning Activities: Clinical Activity 36 hour(s), Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to fourth-year medical student in good standing only.

Grade Mode: Honors/Pass/Fail.

EMR 475 – Addiction Medicine; Advanced Clinical Clerkship (3-6 units)

Course Description: Consists primarily of clinical experiences, with complementary didactics. Clinical experiences will be multidisciplinary, working with drug and alcohol counselors, harm reduction workers, and physicians in family medicine, emergency medicine, internal medicine, and psychiatry. Clinical skills focus on risk factors, diagnosis, comorbidities, and treatment of substance use disorders.

Learning Activities: Variable, Clinical Activity.

Grade Mode: Pass/Fail only.

EMR 480 – Understanding Health Policy: A Focus on Analysis & Translation (1-6 units)

Course Description: Paradigm of healthcare delivery in the U.S. is changing rapidly. To prepare the next generation of physician leaders, provide the skills, tools, and knowledge needed to impact decisions made at the policy level.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion 16 hour(s), Independent Study 10 hour(s).

Grade Mode: Honors/Pass/Fail.

EMR 490 – Emergency Procedures Elective (3 units)

Course Description: Simulator-based skills training for emergency procedures. Topics include airway management, central venous access, chest tube placement, and general critical care resuscitation skills.

Prerequisite(s): Current basic life support (BLS) certification.

Learning Activities: Discussion/Laboratory 24 hour(s), Web Virtual Lecture 8 hour(s), Tutorial 4 hour(s), Independent Study 4 hour(s).

Enrollment Restriction(s): Restricted to fourth-year medical student in good standing only.

Grade Mode: Pass/Fail only.

EMR 493A – Cardiac Arrest, Resuscitation & Repurfusion SSM (3 units)

Course Description: Special Studies Module, a four-week course specific to the topics of Cardiac Arrest, Resuscitation & Repurfusion.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Lecture/Lab 10 hour(s), Laboratory 16 hour(s), Clinical Activity 4 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

EMR 493B – Cardiac Arrest, Resuscitation & Repurfusion SSM (3 units)

Course Description: Special Studies Module, a four-week course specific to the topics of Cardiac Arrest, Resuscitation & Repurfusion.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Lecture/Lab 10 hour(s), Laboratory 16 hour(s), Clinical Activity 4 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

EMR 499 – Research (2-18 units)

Course Description: Elective where topics may be selected in either basic or clinical research areas of Emergency and/or Critical Care Medicine.

The goals will be tailored to each individual student. Enrollment requires prior discussion and consent of instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory.

Grade Mode: Honors/Pass/Fail.

Endocrinology & Metabolism (ENM)

School of Medicine

ENM 192 – Internship in Endocrinology (1-12 units)

Course Description: Supervised work experience in endocrinology.

Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

ENM 299 – Research (1-12 units)

Course Description: Endocrinology research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ENM 460 – Endocrinology Clinical Clerkship (3-18 units)

Course Description: Participation with members of subspecialty service in the initial evaluation, work-up, management and follow-up of patients with endocrinologic disorders.

Prerequisite(s): IMD 430; and/or consent of instructor.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

ENM 465 – Clinical Nutrition Clerkship (3-18 units)

Course Description: In-depth experience in assessment and monitoring of nutritional support of patients whose illnesses are complicated by malnutrition and of patients with problems in under-nutrition due to various illnesses.

Prerequisite(s): IMD 430; consent of instructor of record.

Learning Activities: Clinical Activity 30 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

ENM 480 – Insights in Endocrinology (1-3 units)

Course Description: First- or second-year students observe in morning Endocrine and Diabetes clinics; attend bi-weekly noon and afternoon endocrine conferences. Present brief endocrine physiology oral presentation to the endocrine group.

Prerequisite(s): Consent of instructor; student in good academic standing.

Learning Activities: Clinical Activity 3-9 hour(s).

Grade Mode: Honors/Pass/Fail.

ENM 499 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

Energy Systems (EGG)**Graduate Studies****EGG 200 – Introduction to Energy Systems (4 units)**

Course Description: Technical, societal and environmental components of energy systems at global, national and regional scales from an interdisciplinary perspective. Energy resources; end-uses and demand; electricity systems; energy efficiency; energy justice; energy emissions; energy policy.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

EGG 201 – Life Cycle Assessment for Sustainable Engineering (4 units)

Course Description: Life cycle assessment methodology. Emphasis on applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Enrollment restricted to graduate students.

Credit Limitation(s): Not open to students who have taken ECI 244.

Cross Listing: ECI 244A.

Grade Mode: Letter.

EGG 202 – Energy & Climate Policy (4 units)

Course Description: Fundamentals of energy technology, economics, and policy. Survey and analysis of current and prospective climate policies at the local and global level, including but not limited to cap-and-trade, emissions offsets, intensity standards, technology standards, mandates and subsidies.

Prerequisite(s): ECN 100A or ARE 100A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion.

Enrollment Restriction(s): Pass One restricted to graduate students in Economics, Energy Graduate Group, and Transportation Technology & Policy Graduate Group.

Cross Listing: ECN 216.

Grade Mode: Letter.

EGG 290 – Energy Seminar (1 unit)

Course Description: Selected topics of current interest in energy. Topics vary and will be announced at the beginning of each quarter. Seminar speakers include invited speakers from outside the university as well as faculty.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

EGG 298A – Group Study (1-5 units)

Course Description: Directed reading and discussion on select topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EGG 298B – Group Study (1-5 units)

Course Description: Directed reading and discussion on select topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

EGG 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Engineering (ENG)**College of Engineering****ENG 001 – Introduction to Engineering (1 unit)**

Course Description: Introduction to the role of engineers in the acquisition and development of engineering knowledge, the differences and similarities among engineering fields, and the work ethic and skills required for engineering.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to first year students only.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ENG 003 – Introduction to Engineering Design (4 units)

Course Description: Introduction to the engineering design process that incorporates the development of oral and written communication skills integral to the design process. Conducted in workshop format with hands-on engagement in the design process.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture 2 hour(s), Studio 2 hour(s), Project 2 hour(s).

Enrollment Restriction(s): Pass One restricted to lower division College of Engineering students; Pass Two restricted to lower division students.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Oral Skills (OL).

ENG 003Y – Introduction to Engineering Design (4 units)

Course Description: Introduction to the engineering design process that incorporates the development of oral and written communication skills integral to the design process. Conducted in workshop format with hands-on engagement in the design process.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Web Virtual Lecture 2 hour(s), Studio 2 hour(s), Project 2 hour(s).

Enrollment Restriction(s): Pass One restricted to lower division College of Engineering students; Pass Two restricted to undergraduate College of Engineering students.

Credit Limitation(s): Not credit if student has taken ENG 003.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Oral Skills (OL).

ENG 004 – Engineering Graphics in Design (3 units)

Course Description: Engineering design, descriptive geometry, pictorial sketching, computer-aided graphics, and their application in the solution of engineering problems.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ENG 006 – Engineering Problem Solving (4 units)

Course Description: Methodology for solving engineering problems.

Engineering computing and visualization based on MATLAB. Engineering examples and applications.

Prerequisite(s): (MAT 016A C- or better or MAT 017A C- or better or MAT 019A C- or better or MAT 021A C- or better); (MAT 016B C- or better (can be concurrent) or MAT 017B C- or better (can be concurrent) or MAT 019B C- or better (can be concurrent) or MAT 021B C- or better (can be concurrent)).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENG 008 – Introduction to Entrepreneurship (3 units)

Course Description: Students from all majors will learn the processes involved in modern entrepreneurship and identify an opportunity for innovation. The 3 C's of the entrepreneurial mindset (developed by KEEN) will be covered: Curiosity, Connections, and Creating Values.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ENG 009 – Technology Startup Speaker Series (1 unit)

Course Description: Presentations from successful entrepreneurs about the challenges of building a technology company, leadership, barriers faced by underrepresented founders, and professional resources to support student entrepreneurship.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s).

Grade Mode: P/NP only.

General Education: Social Sciences (SS).

ENG 010 – The Science Behind the Technology in Our Lives (4 units)

Course Description: Understanding of how the technology in our lives works using only basic concepts and rudimentary mathematics.

Prerequisite(s): High school algebra.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

ENG 011A – Issues in Engineering (1 unit)

Course Description: Engineering profession and its role in society; engineering design and development process; introduction to the engineering grand challenges; and professional resources for students.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ENG 011B – Issues in Engineering (1 unit)

Course Description: Engineering disciplines; the engineering profession's methods, principles, and career opportunities; professional resources for students.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s).

Credit Limitation(s): No credit for students who have completed ENG 001.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ENG 017 – Circuits I (4 units)

Course Description: Basic electric circuit analysis techniques, including electrical quantities and elements, resistive circuits, transient and steady-state responses of RLC circuits, sinusoidal excitation and phasors, and complex frequency and network functions.

Prerequisite(s): MAT 021C; C- or better recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ENG 017V – Circuits I (4 units)

Course Description: Basic electric circuit analysis techniques, including electrical quantities and elements, resistive circuits, transient and steady-state responses of RLC circuits, sinusoidal excitation and phasors, and complex frequency and network functions.

Prerequisite(s): MAT 021C.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ENG 020 – Introduction to Space Exploration: Understanding the Technological & Environmental Challenges (4 units)

Course Description: Introductory overview of the space environment. Discussion of space exploration technology including propulsion, orbital mechanics, and spacecraft engineering.

Prerequisite(s): High school level Algebra, Geometry, General Science (Physics and Chemistry).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ENG 035 – Statics (4 units)

Course Description: Force systems and equilibrium conditions with emphasis on engineering problems.

Prerequisite(s): (PHY 009A C- or better or PHY 009HA C- or better); MAT 021D C- or better (can be concurrent).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENG 045 – Properties of Materials (4 units)

Course Description: Introduction to the properties of engineering materials and their relation to the internal structure of materials.

Prerequisite(s): (MAT 016C C- or better or MAT 017C C- or better or MAT 019C C- or better or MAT 021C C- or better); (CHE 002B C- or better or CHE 004A C- or better); (PHY 007B C- or better or PHY 009A C- or better or PHY 009HA C- or better).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to College of Engineering majors and Physics/Applied Physics majors (LPHY and LAPP).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENG 045H – Honors Properties of Materials (1 unit)

Course Description: Examination of special materials science and engineering topics through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations.

Prerequisite(s): ENG 045 (can be concurrent) or ENG 045Y (can be concurrent); enrollment in the Materials Science and Engineering Honors Program; ENG 045 or ENG 045Y required concurrently.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open only to students in the Materials Science and Engineering Honors Program.

Grade Mode: Letter.

ENG 045Y – Properties of Materials (4 units)

Course Description: Introduction to the properties of engineering materials and their relation to the internal structure of materials.

Prerequisite(s): (MAT 016C C- or better or MAT 017C C- or better or MAT 019C C- or better or MAT 021C C- or better); (CHE 002B C- or better or CHE 004A C- or better); (PHY 007B C- or better or PHY 009A C- or better, PHY 009HA C- or better).

Learning Activities: Web Virtual Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to College of Engineering majors and Physics/Applied Physics majors (LPHY and LAPP).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENG 098 – Directed Group Study (1-4 units)

Course Description: Directed group study.

Learning Activities: Variable.

Enrollment Restriction(s): Restricted to College of Engineering students only.

Repeat Credit: May be repeated 3 time(s) when content differs.

Grade Mode: Pass/No Pass only.

ENG 100 – Electronic Circuits & Systems (3 units)

Course Description: Introduction to analog and digital circuit and system design through hands on laboratory design projects.

Prerequisite(s): (ENG 017 or ENG 017V) C- or better recommended.

Learning Activities: Laboratory 3 hour(s), Lecture 2 hour(s).

Credit Limitation(s): Students who have completed EEC 100 may receive only 1.5 units of credit.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ENG 102 – Dynamics (4 units)

Course Description: Kinematics and kinetics of particles, systems of particles, and of rigid bodies; application of these topics are applied to engineering problems.

Prerequisite(s): ENG 035 C- or better; (MAT 022B C- or better or MAT 027B C- or better).

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to College of Engineering students only.

Credit Limitation(s): Only 2 units of credit allowed to students who have previously taken ENG 036.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ENG 103 – Fluid Mechanics (4 units)

Course Description: Fluid properties, fluid statics, continuity and linear momentum equations for control volumes, flow of incompressible fluids in pipes, dimensional analysis and boundary-layer flows.

Prerequisite(s): ENG 035 C- or better; PHY 009B C- or better; (MAT 022B C- or better or MAT 027B C- or better).

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to students in the College of Engineering and Hydrology majors.

Credit Limitation(s): Not open for credit to students who have completed ECH 150A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENG 104 – Mechanics of Materials (4 units)

Course Description: Uniaxial loading and deformation. General concepts of stress-strain-temperature relations and yield criteria. Torsion of shafts. Bending of beams. Deflections due to bending. Introduction to stability and buckling.

Prerequisite(s): ENG 035 C- or better; (MAT 022B C- or better or MAT 027B C- or better).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to Engineering majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ENG 104L – Mechanics of Materials Laboratory (1 unit)

Course Description: Experiments which illustrate the basic principles and verify the analysis procedures used in the mechanics of materials are performed using the basic tools and techniques of experimental stress analysis.

Prerequisite(s): ENG 104.

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENG 105 – Thermodynamics (4 units)

Course Description: Fundamentals of thermodynamics: heat energy and work, properties of pure substances, First and Second Law for closed and open systems, reversibility, entropy, thermodynamic temperature scales. Applications of thermodynamics to engineering systems. May be taught abroad.

Prerequisite(s): PHY 009B C- or better; (MAT 022B C- or better or MAT 027B C- or better).

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to College of Engineering students only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ENG 106 – Engineering Economics (4 units)

Course Description: Analysis of problems in engineering economy; the selection of alternatives; replacement decisions. Compounding, tax, origins and cost of capital, economic life, and risk and uncertainty are applied to methods of selecting most economic alternatives.

Prerequisite(s): Upper division standing in Engineering.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ENG 108 – Launching a Company (3 units)

Course Description: Technological innovation and product development. Working as a team to turn ideas into companies through customer development.

Prerequisite(s): ENG 008 or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): No credit for students who have previously completed ENG 002 or ENG 080.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ENG 111 – Electric Machinery Fundamentals (4 units)

Course Description: Principles of AC and DC electric motors and generators, their control systems and power sources. Selection of electric power equipment components based on their construction features and performance characteristics.

Prerequisite(s): ENG 017 C- or better or ENG 017V C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ENG 121 – Fluid Power Actuators & Systems (4 units)

Course Description: Hydraulic and pneumatic systems with emphasis on analysis and control of actuators. Design of hydraulic and pneumatic systems, specification and sizing of components, and selection of electro-hydraulics/electro-pneumatics, servo valves, and closed loop systems to solve basic control problems.

Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ENG 122 – Introduction to Mechanical Vibrations (4 units)

Course Description: Free and forced vibrations in lumped-parameter systems with and without damping; vibrations in coupled systems; electromechanical analogs; use of energy conservation principles.

Prerequisite(s): ENG 102 C- or better; (ENG 006 C- or better or ENG 005 C- or better or ECS 030 C- or better); ability to program in MATLAB.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENG 160 – Environmental Physics & Society (3 units)

Course Description: Impact of humankind on the environment are discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications are considered.

Prerequisite(s): (PHY 009D or PHY 010 or PHY 001B); MAT 016B; or the equivalent of MAT 016B.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): In the College of Engineering, students may receive only 1 unit of credit towards the Technical Electives requirement.

Cross Listing: PHY 160.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ENG 180 – Engineering Analysis (4 units)

Course Description: Solutions of systems of linear and nonlinear algebraic equations; approximation methods; solutions of ordinary differential equations; initial and boundary value problems; solutions of partial differential equations of Elliptic, parabolic, and hyperbolic types; Eigen value problems.

Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better or ECS 032A C- or better or ECS 036A C- or better); ((MAT 021D C- or better, (MAT 022B C- or better or MAT 027B C- or better)).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENG 188 – Science & Technology of Sustainable Power Generation (4 units)

Course Description: Focus on scientific understanding and development of power generation that is the basis of modern society. Concentration on power generation methods that are sustainable, in particular, discussion of the most recent innovations.

Prerequisite(s): PHY 007C or PHY 009C; upper division standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ENG 190 – Professional Responsibilities of Engineers (3 units)

Course Description: Organization of the engineering profession; introduction to contracts, specifications, business law, patents, and liability; discussion of professional, ethical, societal, and political issues related to engineering.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to upper division students in the College of Engineering.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ENG 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Learning Activities: Variable.

Repeat Credit: May be repeated 3 time(s) when content differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ENG 250 – Technology Management (3 units)

Course Description: Management of the engineering and technology activity. Functions of design, planning, production, marketing, sales, and maintenance. Technological product life cycle. Research and development activity. Project planning and organization. Manufacturing issues. Case studies.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

English (ENL)

College of Letters & Science

ENL 003 – Introduction to Literature (4 units)

Course Description: Introductory study of several genres of English literature, emphasizing both analysis of particular works and the range of forms and styles in English prose and poetry. Frequent writing assignments.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR); or concurrent enrollment in ENL 003A or ENL 003AV.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 003A – Writers' Workshop (2 units)

Course Description: Focuses on the development of writing and revision strategies, exploring ways to understand a writing task; to develop appropriate content for a writing task; to revise content to reflect competence as a communicator.

Prerequisite(s): ENL 003 or ENL 003V; has not yet completed the Entry Level Writing Requirement and concurrent enrollment in ENL 003 or ENL 003V

Learning Activities: Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Concurrent enrollment in ENL 003 or ENL 003V required.

Grade Mode: Letter.

ENL 003V – Introduction to Literature (4 units)

Course Description: Introductory study of several genres of English literature, emphasizing both analysis of particular works and the range of forms and styles in English prose and poetry. Frequent writing assignments will be made.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR); or concurrent enrollment in ENL 003A or ENL 003AV.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 005F – Introduction to Creative Writing: Fiction (4 units)

Course Description: Elementary principles of writing fiction. Write both in prescribed forms and in experimental forms of their own choosing. No final examination.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 005NF – Introduction to Creative Writing: Non-Fiction (4 units)

Course Description: Elementary principles of writing creative non-fiction. Work in prescribed literary forms (such as essay, meditation, biography, memoir, book review, documentary, or experimental non-fiction forms) and forms of students' choosing. No final examination.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated 1 time(s) when instructor differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 005P – Introduction to Creative Writing: Poetry (4 units)

Course Description: Elementary principles of writing poetry. Write both in prescribed forms and in experimental forms of their own choosing. No final examination.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

ENL 010A – Literatures in English I: To 1700 (4 units)

Course Description: Historical introduction to English language and literature from 800-1700. Linguistic borrowing, innovation, and change. Emergence of key literary genres. Colonial America as a new site of English literary production and consumption.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 010B – Literatures in English II: 1700-1900 (4 units)

Course Description: Historical introduction to English language and literature from 1700-1900. Linguistic borrowing, innovation, colonization, and change. Emergence and development of key literary genres. America, Britain, Ireland, Scotland, and India as important sites of English literary production and consumption.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 010C – Literatures in English III: 1900 to Present (4 units)

Course Description: Historical introduction to English language and literature from 1900-present. Linguistic borrowing, innovation, and change. Emergence and development of key literary genres. Formal experimentation. Modernism as transnational phenomenon.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 040 – Introductory Topics in Literature (4 units)

Course Description: Study of a special topic. Literature written in English in any period or place or genre. Thematic, formal, or temporal focus.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 041 – Introductory Topics in Literature & Media (4 units)

Course Description: Study of a topic centered on the relationships between literature and moving-image media.

Prerequisite(s): (ENL 003 or ENL 003V) or UWP 001 or UWP 001V or UWP 001Y; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

ENL 042 – Approaches to Reading (4 units)

Course Description: Close reading and interpretation of literature from a variety of traditional and contemporary approaches. Topics include traditional textual and historical approaches; new criticism; formalism; psychological criticism; feminism and gender; reader-response; materialist approaches. Frequent written assignments.

Prerequisite(s): (ENL 003 or ENL 003V) or (UWP 001 or UWP 001V or UWP 001Y); or equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 043 – Introductory Topics in Drama (4 units)

Course Description: Close reading of, and topics relating to selected works of British and American drama from a range of historical periods.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 044 – Introductory Topics in Fiction (4 units)

Course Description: Close reading of, and topics relating to, British and American Fiction: short stories, novellas, novels.

Prerequisite(s): (ENL 003 or ENL 003V) or (UWP 001 or UWP 001V or UWP 001Y); or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 045 – Introductory Topics in Poetry (4 units)

Course Description: Topical study and close reading of selections from English and American poetry.

Prerequisite(s): (ENL 003 or ENL 003V) or (UWP 001 or UWP 001V or UWP 001Y); or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 051 – Hot Bars, Supreme Lyrics, & Rhymes for Days: Hip Hop as Poetry (3 units)

Course Description: Literary approaches to hip hop as poetry. Formal examination of rap lyrics in relation to technology, visual expression, dance, and knowledge production. Historical and cultural consideration of race, ethnicity, gender, urban culture, and politics.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

ENL 052 – Pop Culture Shakespeare (3 units)

Course Description: Critical approaches to the study of Shakespeare's afterlife in contemporary American media. Focus on visual, audio, and kinesthetic modes of analysis and presentation. Relation of Shakespeare to contemporary society, politics, media, and economics.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL).

ENL 053 – Youth in Revolt (3 units)

Course Description: American literary and cultural representations of adolescence as a time of rebellious refusals and wild behaviors in relation to questions of gender and sexuality, psychological states, economic pressures, racial inequality, and methods of discipline and punishment.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD).

ENL 054 – Literature, Health, & Medicine (3 units)

Course Description: Literary and cultural representations of health and medicine in relation to issues of race, gender, sexuality, and disability. Narratives and reading practices that provide complex accounts of the social determinants of health, contested understandings of illness, and critical perspectives on biomedicine.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD).

ENL 055 – Literary Animals (3 units)

Course Description: Literary exploration of animals as spectacles, symbols, scientific objects, human companions, and speaking subjects through animal fables and allegories, tales for children, poems, realist narratives, essays, and experimental fictions.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

ENL 056 – Speculative Fictions (3 units)

Course Description: Historical or thematic exploration of speculative genres such as science fiction, fantasy, utopia/dystopia, and/or horror. May include worldbuilding, intersections with scientific and other disciplinary knowledges, relation to social and political conditions.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

ENL 057 – Literatures of Climate Change (3 units)

Course Description: Readings in English-language climate change literature from around the world. Narratives of climate migration, adaptation, and geopolitical upheaval. Use of innovative literary forms and genres for representing the scale and impacts of global warming. Comparison of scientific and fictional scenarios.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ENL 059 – Racial Imaginaries (3 units)

Course Description: Critical vocabularies and frameworks for studying the cultural construction of race as a signifier of human difference. Theories of racial formation in poetry, fiction, and other imaginative genres. Rhetorical and media strategies that present and/or obscure the material sources and institutional histories of race and racism.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL).

ENL 072 – Introduction to Games (4 units)

Course Description: Introduction to the history, theory, and practice of play. Survey of both analog and digital games. Overview of gaming cultures, aesthetics, industries, and technologies.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Cross Listing: CDM 072.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

ENL 092 – Internship in English (1-12 units)

Course Description: Internships in fields where students can practice their skills. May be taught abroad.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; and consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

ENL 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; and consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ENL 098F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for lower division students.

Prerequisite(s): (ENL 003 or ENL 003V) or (UWP 001 or UWP 001V or UWP 001Y); consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ENL 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Grade Mode: Pass/No Pass only.

ENL 100F – Creative Writing: Fiction (4 units)

Course Description: Writing of fiction. No final examination.

Prerequisite(s): ENL 005F or ENL 005P; ENL 005NF; and consent of instructor.

Learning Activities: Discussion 4 hour(s).

Enrollment Restriction(s): Priority given to English (Creative Writing) majors.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

ENL 100FA – Creative Writing Advanced Fiction (4 units)

Course Description: Development and evaluation of students' work in prose, primarily in the workshop format. Some reading and discussion of published novels and short stories. Conferences with individual students once per quarter.

Prerequisite(s): ENL 100F.

Learning Activities: Discussion 4 hour(s).

Enrollment Restriction(s): Priority given to English majors; admission by application only.

Repeat Credit: May be repeated 1 time(s) with consent of instructor.

Grade Mode: Letter.

ENL 100NF – Creative Writing: Non-Fiction (4 units)

Course Description: Writing of non-fiction. No final examination.

Prerequisite(s): ENL 005F or ENL 005P or ENL 005NF; and consent of instructor.

Learning Activities: Discussion 4 hour(s).

Enrollment Restriction(s): Priority given to English (Creative Writing) majors.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

ENL 100P – Creative Writing: Poetry (4 units)

Course Description: Writing of poetry.

Prerequisite(s): ENL 005F or ENL 005P or ENL 005NF; and consent of instructor.

Learning Activities: Discussion 4 hour(s).

Enrollment Restriction(s): Priority given to English (Creative Writing) majors.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

ENL 100PA – Creative Writing Advanced Poetry (4 units)

Course Description: Development and evaluation of students' work in poetry, primarily in the workshop format. Some reading and discussion of published works of poetry. Conferences with individual students once per quarter.

Prerequisite(s): ENL 100P.

Learning Activities: Discussion 4 hour(s).

Enrollment Restriction(s): Priority to English majors; admission by application only.

Repeat Credit: May be repeated 1 time(s) with consent of instructor.

Grade Mode: Letter.

ENL 105 – History of the English Language (4 units)

Course Description: History of the English language. Examination of the language as recorded from Old English to present-day English. Relationship of English to other languages; development of vocabulary, phonology, and grammatical patterns.

Prerequisite(s): (ENL 003 or ENL 003V) or (UWP 001 or UWP 001V or UWP 001Y); or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 106 – English Grammar (4 units)

Course Description: Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English.

Prerequisite(s): ENL 003 or ENL 003V or LIN 001 or UWP 001 or UWP 001V or UWP 001Y; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: LIN 106, UWP 106.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

ENL 106P – English Grammar Practicum (2 units)

Course Description: Practice in teaching the principles of grammar to the kinds of audiences teachers encounter in California. Discussions with teachers who teach in these areas. Examination of pedagogical research on teaching grammar.

Prerequisite(s): ENL 106; LIN 106 (can be concurrent).

Learning Activities: Discussion 2 hour(s).

Grade Mode: Pass/No Pass only.

ENL 107 – Freedom of Expression (4 units)

Course Description: Historical development of fundamental issues and contemporary controversies about freedom of expression, with emphasis on literary and artistic censorship.

Prerequisite(s): ENL 003 or ENL 003V or (UWP 001 or UWP 001V or UWP 001Y); or the equivalent.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 110A – Introduction to Literary Theory (4 units)

Course Description: Key theoretical terms, concepts, and thinkers from the Greeks to the modern era.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 110B – Introduction to Modern Literary & Critical Theory (4 units)

Course Description: History of literary criticism in the modern era, with emphasis on the ties with the past and the special problems presented by modern literary theory.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 111 – Topics in Medieval Literature (4 units)

Course Description: Historically or thematically focused intensive examination of selected topics in Medieval British literature.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 113A – Chaucer: Troilus & the "Minor" Poems (4 units)

Course Description: Development of the poet's artistry and ideas from his first work to his masterpiece, "Troilus and Criseyde"

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 113B – Chaucer: The Canterbury Tales (4 units)

Course Description: Literary analysis of the complete "Canterbury Tales." Courtly love, literary forms, medieval science and astrology, theology and dogma as they inform the reading of Chaucer's work.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 115 – Topics in 16th- & 17th-Century Literature (4 units)

Course Description: Historically or thematically focused study of works of the Renaissance.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 117 – Shakespeare (4 units)

Course Description: Historically, generically, or thematically focused study of Shakespeare's works.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 120 – Law & Literature (4 units)

Course Description: Historically, thematically, or generically focused study of the relationship between law and literature.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

ENL 122 – Milton (4 units)

Course Description: Selected major works, including Paradise Lost.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 123 – 18th-Century British Literature (4 units)

Course Description: Historically or thematically focused study of 18th-century English literature.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 125 – Topics in Irish Literature (4 units)

Course Description: Intensive study or treatment of special topics relating to the emergence, invention, and re-invention of Irish literature.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 126 – Food & Literature (4 units)

Course Description: English-language literatures of food from around the world. Literary cultures of food as they relate to broader cultural practices, ethnic and racial identities, place and diaspora. Literary genres and forms of food writing.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y or COM 001 or COM 002 or COM 003 or COM 004 or NAS 005.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 130 – British Romantic Literature (4 units)

Course Description: Historically or thematically focused study of works of Romantic English literature.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 133 – 19th-Century British Literature (4 units)

Course Description: Historically or thematically focused study of works of 19th-century English literature.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 137 – British Literature, 1900-1945 (4 units)

Course Description: Historically or thematically focused study of works of British literature (drama, poetry, prose fiction) from the period between 1900 and the end of World War II.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 138 – British Literature, 1945 to Present (4 units)

Course Description: Historically or thematically focused study of works of British literature (drama, poetry, prose fiction) from the period between 1945 and the present. May be taught abroad.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 139 – Topics in Global Literatures & Cultures (4 units)

Course Description: Historically or regionally focused study of world literatures in English (other than the national literatures of British Isles and the United States), particularly from post-colonial regions in Africa, the Caribbean, and Asia, and immigrant cultures in the English-speaking world.

Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion.

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 140 – Topics in Postcolonial Literatures & Cultures (4 units)

Course Description: Study of postcolonial literature of Anglophone colonies. Specific emphases may include literature from and about Anglophone India, the Caribbean, the Middle East, South Asia, Africa, and/or South America.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 141 – Topics in Diasporic Literatures & Migration (4 units)

Course Description: Study of literatures, histories, and cultures of one or more diasporic groups.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 142 – Early American Literature (4 units)

Course Description: Historically or thematically focused study of American literature of the 17th and 18th centuries.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

ENL 143 – 19th-Century American Literature to the Civil War (4 units)

Course Description: Historically or thematically focused study of works of 19th-century American literature.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

ENL 144 – Post-Civil War American Literature (4 units)

Course Description: Historically or thematically focused study of works of post-Civil War American literature.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 145 – Reading Race, Class, & Gender (4 units)

Course Description: Readings in literature and culture that present race, class, gender, sexuality, ability, and citizenship as inter-articulated signifiers of difference. Literature is contextualized alongside works of sociology, history, philosophy, and law. Inter-discursive nature of racial thought and policy, and on historical and rhetorical practices through which race acquires meaning.

Prerequisite(s): ENL 003 or ENL 003V or COM 001 or COM 002 or COM 003 or COM 004 or NAS 005 or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 146 – American Literature 1900-1945 (4 units)

Course Description: Historically or thematically focused study of American literature (drama, poetry, prose fiction) from the period between 1900 and the end of World War II.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

ENL 147 – American Literature, 1945 to the Present (4 units)

Course Description: Historically or thematically focused study of American literature (drama, poetry, prose fiction) from the period between 1945 and the present.

Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; or equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

ENL 149 – Topics in Literature (4 units)

Course Description: Intensive examination of literature considered in topical terms, not necessarily historically. May be taught abroad.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 150A – British Drama to 1800 (4 units)

Course Description: Historically or thematically focused study of works of English drama prior to 1800.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 150B – Drama from 1800 to the Present (4 units)

Course Description: Historically or thematically focused study of works of British drama from 1800 to the present.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 153 – Topics in Drama (4 units)

Course Description: Historical or thematic study of drama.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 154 – The Graphic Novel (4 units)

Course Description: Thematically, historically, and formally focused study of the graphic novel genre. Contents may include any regional, national, or transnational group of graphic novels.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or equivalent courses.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

ENL 155A – 18th-Century British Novel (4 units)

Course Description: Historically or thematically organized examination of the 18th-century British novel, with particular emphasis on its evolution, including the epistolary novel, the picaresque novel, and the Gothic novel: Richardson, Fielding, Sterne, Austen.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 155B – 19th-Century British Novel (4 units)

Course Description: Historically or thematically organized examination of 19th-century British novelists, with emphasis on the historical novel, the social novel, and novels by women: Scott, Dickens, the Brontes, Eliot, Hardy.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 155C – 20th-Century British Novel (4 units)

Course Description: Historically or thematically organized examination of the 20th-century British novel, with emphasis on impressionism; the revolt against naturalism; the experimental novel; the anti-modernist reaction: Conrad, Joyce, Woolf, Lawrence, Drabble, Rhys.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 156 – The Short Story (4 units)

Course Description: The short story as a genre; its historical development, techniques, and formal character as a literary form. European as well as American writers.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 157 – Detective Fiction (4 units)

Course Description: Historically, formally, and thematically focused study of novels and short stories in the detective fiction genre.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 158A – The American Novel to 1900 (4 units)

Course Description: Historically or thematically organized examination of the rise and development of the American novel from its beginnings; Hawthorne, Melville, Twain, James, and others.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

ENL 158B – The American Novel from 1900 to the Present (4 units)

Course Description: Historically or thematically organized examination of important American novelists from 1900 to the present: authors may include Willa Cather, Nathanael West, William Faulkner, Ralph Ellison, Zora Neale Hurston, Thomas Pynchon, Ishmael Reed, Maria Helena Viramontes, Rachel Kushner, and others.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Writing Experience (WE).

ENL 159 – Topics in the Novel (4 units)

Course Description: Examination of major novels arranged thematically. Topics might include Bildungsroman, stream-of-consciousness novel, Gothic novel, historical novel.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 160 – Film as Narrative (4 units)

Course Description: Study of modern film (1930 to present) as a storytelling medium.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

ENL 162 – Film Theory & Criticism (4 units)

Course Description: Film theory and criticism, with a study of ten major works of international film art.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

ENL 163 – Literary Study in the British Isles (4 units)

Course Description: Literary Study in the British Isles: On-site study of the literature, film, and/or performance of the British Isles. Taught abroad.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Enrollment by application only through the Education Abroad Center.

Repeat Credit: May be repeated 2 time(s) when subject differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

ENL 164 – Writing Science (4 units)

Course Description: Texts and writing practices in the production of scientific knowledge. Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

ENL 197T – Tutoring in English (1-5 units)

Course Description: Leading of small voluntary discussion groups designed to develop reading and writing skills and affiliated with one of the university's regular courses.

Prerequisite(s): Upper division standing and consent of Chairperson.

Learning Activities: Tutorial.

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Pass/No Pass only.

ENL 197TC – Community Tutoring in English (1-5 units)

Course Description: Field experience, with individuals or in classroom in instruction of English language, literature, and composition. Does not fulfill requirement for major.

Prerequisite(s): Upper division standing and a major in English; consent of Chairperson.

Learning Activities: Tutorial 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ENL 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): ENL 003 or ENL 003V or ENL 005F or ENL 005P or UWP 001 or UWP 001V or UWP 001Y.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ENL 198F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for upper division students.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ENL 198S – Directed Group Study (4 units)

Course Description: Group study closely tied to the texts and periods studied in ENL 163S. Investigations of historical sites, museums, galleries, and performances. May be taught abroad in London.

Prerequisite(s): ENL 163S (can be concurrent); and consent of instructor; ENL 163S required concurrently.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Pass/No Pass only.

ENL 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ENL 199FA – Student Facilitated Course Development (1-4 units)

Course Description: Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 098F/198F.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ENL 199FB – Student Facilitated Teaching (1-4 units)

Course Description: STU FAC. Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F.

Prerequisite(s): ENL 003 or ENL 003V or UWP 001 or UWP 001V or UWP 001Y; consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

ENL 200 – Introduction to Graduate Studies in English (4 units)

Course Description: Introduction to literary scholarship with special attention to the elements of professionalism and to different modes of literary investigation.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Course Description: Study of the phonology, morphology, syntax, and lexicon between 1100 and 1500 with investigation of the regional dialects; pertinent facts on both the internal and external linguistic history; intensive reading of texts.

Learning Activities: Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

ENL 210 – Readings in English & American Literature (4 units)

Course Description: Content varies according to specialty of instructor.

Prerequisite(s): Upper division course in area studied.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 225 – Topics in Irish Literature (4 units)

Course Description: Varied topics, including the 19th-century novel, contemporary Irish poetry, rise of the drama, or a study of a major author.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 230 – Study of a Major Writer (4 units)

Course Description: Artistic development of one major writer and his intellectual and literary milieu.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when writer differs.

Grade Mode: Letter.

ENL 232 – Problems in English Literature (4 units)

Course Description: Selected issues in the current study and critical assessment of a limited period or topic in English literature.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when period or topic differs.

Grade Mode: Letter.

ENL 233 – Problems in American Literature (4 units)

Course Description: Selected topics for intensive investigation.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when period or topic differs.

Grade Mode: Letter.

ENL 234 – Dramatic Literature (4 units)

Course Description: Historical introduction to dramatic theory; the genres of tragedy, comedy, and tragicomedy.

Learning Activities: Lecture 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

ENL 235 – Theory of Fiction (4 units)

Course Description: Theories of fiction as they relate to the professional writer's practice of the craft. For students in the Creative Writing Program.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

ENL 237 – Seminar for Writers (4 units)

Course Description: Varied topics in the study of literature and literary culture craft and poetics from the perspective of the writer/practitioner.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 2 time(s) when focus differs.

Grade Mode: Letter.

ENL 238 – Special Topics in Literary Theory (4 units)

Course Description: Advanced topics in literary theory and criticism.

Preparation and evaluation of research paper.

Prerequisite(s): ENL 237; or the equivalent.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic and/or reading list differs.

Grade Mode: Letter.

ENL 240 – Medieval Literature (4 units)

Course Description: Studies of Medieval literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 242 – 16th-Century Literature (4 units)

Course Description: Studies in 16th-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 244 – Shakespeare (4 units)

Course Description: Studies in Shakespeare. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 246 – 17th-Century Literature (4 units)

Course Description: Studies in 17th-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 248 – 18th-Century Literature (4 units)

Course Description: Studies in 18th-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 250 – Romantic Literature (4 units)

Course Description: Studies in Romantic literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 252 – Victorian Literature (4 units)

Course Description: Studies in Victorian literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 254 – 20th-Century British Literature (4 units)

Course Description: Studies in 20th-century British literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 256 – Early American Literature (4 units)

Course Description: Studies in Early American literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 258 – American Literature: 1800 to the Civil War (4 units)

Course Description: Studies in American literature from 1800 to Civil War. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 260 – American Literature: Civil War to 1914 (4 units)

Course Description: Studies in American literature from the Civil War to 1914. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 262 – American Literature after 1914 (4 units)

Course Description: Studies in American literature after 1914. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 264 – Studies in Modern British & American Literature (4 units)

Course Description: Studies in modern British and American literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 270 – Studies in Contemporary World Literature (4 units)

Course Description: Emerging global, international or transnational techniques, theories, and individual works of contemporary world prose or poetry. Discussion, seminar reports, research papers.

Prerequisite(s): Graduate standing, consent of instructor, with preference given to those enrolled in the masters program in Creative Writing.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENL 275 – Proseminar in Research Practices (2 units)

Course Description: Study of various practical and technical skills needed to perform research in literary studies. Materials to be selected by the instructor. Evaluation based on student projects that involve hands-on application of skills taught in the proseminal.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Must have passed Departmental Preliminary Exam.

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

ENL 280 – Seminar in Research Practices (4 units)

Course Description: Study of various practical and technical skills needed to perform research in literary studies. Course materials to be selected by the instructor. Evaluation based on student projects that involve hands-on application of skills taught in the seminar.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

ENL 285 – Literature by Women (4 units)

Course Description: Studies in literature by women and the theoretical approaches to literature by women. Course materials to be selected by the instructor. Preparation and evaluation of research papers.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated when topic and/or reading list differs.

Grade Mode: Letter.

ENL 287 – Topics in Literature & Media (4 units)

Course Description: Study of a topic centered on film or other moving-image media. Course materials to be selected by the instructor.

Preparation and evaluation of research papers.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Film Viewing 3 hour(s).

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

ENL 288 – Prospectus Workshop (4 units)

Course Description: Training in writing the dissertation prospectus.

Participation in group discussions of preparatory assignments and final proposal.

Learning Activities: Extensive Writing, Workshop 2 hour(s), Conference 1 hour(s).

Enrollment Restriction(s): Must have passed Departmental Preliminary Exam.

Grade Mode: Satisfactory/Unsatisfactory only.

ENL 289 – Article Writing Workshop (4 units)

Course Description: Training in preparing an article for publication.

Participation in group discussions of article drafts.

Prerequisite(s): Consent of instructor.

Learning Activities: Extensive Writing, Workshop 2 hour(s), Conference 1 hour(s).

Enrollment Restriction(s): Limited to 12 students; nomination for admission by Dissertation Director.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ENL 290 – Creative Writing: Special Topic (4 units)

Course Description: Writing that falls outside the generic confines of traditional genres (fiction, poetry, and nonfiction) or traditional workshop formats. Evaluation of written materials and individual student conferences.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ENL 290F – Creative Writing: Fiction (4 units)

Course Description: Writing of prose fiction. Evaluation of written materials and individual student conferences.

Prerequisite(s): Consent of instructor. Graduate standing, with preference given to those enrolled in master's program in Creative Writing.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ENL 290NF – Creative Writing: Non-Fiction (4 units)

Course Description: Writing of literary non-fiction, with emphasis on autobiography, biography, memoir, the occasional or nature essay, or other non-fiction prose narratives.

Prerequisite(s): Consent of instructor. Graduate standing; with preference given to those enrolled in the master's program in Creative Writing.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ENL 290P – Creative Writing: Poetry (4 units)

Course Description: Writing of poetry. Evaluation of written materials and individual student conferences.

Prerequisite(s): Consent of instructor. Graduate standing, with preference given to those enrolled in master's program in Creative Writing.

Learning Activities: Seminar 3 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

ENL 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ENL 299 – Individual Study (1-12 units)

Course Description: Individual study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ENL 299D – Special Study for the Doctoral Dissertation (1-12 units)

Course Description: Special study for the doctoral dissertation.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ENL 391 – Teaching Creative Writing (2 units)

Course Description: Designed for new instructors of ENL 005F or ENL 005P; discussion of ways to facilitate creative writing workshops and to respond to student manuscripts.

Prerequisite(s): Graduate standing; appointment as Teaching Assistant in the English Department.

Learning Activities: Discussion 2 hour(s).

Repeat Credit: May be repeated 1 time(s) for those teaching ENL 005 for the first time.

Grade Mode: Satisfactory/Unsatisfactory only.

ENL 393 – Teaching Literature & Composition (2 units)

Course Description: Designed for new instructors of ENL 003 or the equivalent courses; discussion of problems related to teaching literature and composition to lower division students.

Prerequisite(s): Graduate standing; appointment as Teaching Assistant in the English Department.

Learning Activities: Discussion 2 hour(s).

Repeat Credit: May be repeated 1 time(s) Course repeatable for those teaching ENL 003 for the first time.

Grade Mode: Satisfactory/Unsatisfactory only.

ENL 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Entomology (ENT)

College of Agricultural & Environmental Sciences**ENT 001 – Art, Science & the World of Insects (3 units)**

Course Description: Fusion of entomology and art to create an appreciation of insect biology, ecology, interactions with humans and importance in human culture. Multidisciplinary approaches in education and career paths in entomology and art will be highlighted.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE) or Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

ENT 002 – Biodiversity (3 units)

Course Description: Introduction to nature, scope and geographical distribution of biodiversity (diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity; domestication, aesthetics, ethics and valuation. Species richness and "success." Biodiversity through time; monitoring, evaluation and conservation. Biomes-global, continental and Californian.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 1 hour(s).

Cross Listing: EVE 002.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ENT 010 – Natural History of Insects (3 units)

Course Description: Introduction to the insects detailing their great variety, structures and functions, habits, and their significance in relation to plants and animals including man. Designed for students not specializing in entomology.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have had ENT 100, but students who have taken this course may take ENT 100 for credit.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ENT 090X – Special Topics in Entomology (2 units)

Course Description: Freshman seminar course for indepth examination of a special topic within the subject area.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Pass/No Pass only.

ENT 092 – Internship (1-12 units)

Course Description: Work-learn experience on and off campus in all subject areas offered by the department, supervised by a member of the faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

ENT 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Grade Mode: Letter.

ENT 100 – General Entomology (4 units)

Course Description: Biology, anatomy, physiology, development, classification, ecology and relation of insects to human welfare.

Prerequisite(s): BIS 002B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper 1 hour(s).

Grade Mode: Letter.

ENT 100L – General Entomology Laboratory (2 units)

Course Description: Anatomy, development, population ecology, methods of collecting, classification and identification of insects of all orders and of major families.

Prerequisite(s): ENT 100 (can be concurrent).

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Visual Literacy (VL).

ENT 101 – Functional Insect Morphology (3 units)

Course Description: Study of the basic external and internal structures, organs and tissues of insects, with emphasis on functional systems. Functional anatomy, histology and fine structures of important organs and tissues will be discussed.

Prerequisite(s): ENT 100.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

ENT 102 – Insect Physiology (4 units)

Course Description: Processes by which insects maintain themselves, reproduce, and adapt to environment. Insects as models for basic/applied research through detailed analysis of metabolic, physiological, and behavioral processes. Emphasis on analysis of methodology, fact, and theory.

Prerequisite(s): ENT 100; or course in physiology or invertebrate zoology.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ENT 103 – Insects Systematics (3 units)

Course Description: Principles and methods of systematics, with particular reference to insects. Emphasis on different theories of classification, and analysis of phylogenetic relationships.

Prerequisite(s): Introductory course in zoology or entomology.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ENT 104 – Behavioral Ecology of Insects (3 units)

Course Description: Basic principles and mechanisms of insect behavior and ecology. An evolutionary approach to understanding behavioral ecology of insects.

Prerequisite(s): Introductory biology or zoology.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ENT 105 – Insect Ecology (4 units)

Course Description: Introduction to insect ecology combining fundamental concepts and questions in ecology with ideas, hypotheses and insights from insects. Integrates aspects of individual, population, community and ecosystem ecology.

Prerequisite(s): BIS 002B (can be concurrent); or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ENT 107 – California Insect Diversity (5 units)

Course Description: Survey of the diversity of insects from selected ecological zones in California with emphasis on collection, identification, and natural history.

Prerequisite(s): An introductory course in entomology.

Learning Activities: Lecture 1 hour(s), Laboratory 6 hour(s), Fieldwork 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENT 108 – Evolution & Ecology of Arachnids (3 units)

Course Description: Spider external morphology, functional anatomy, metabolism, neurobiology, development, predatory & reproductive behavior, ecology, phylogeny, systematics, zoogeography, and faunistics.

Prerequisite(s): BIS 002C or ENT 100

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ENT 108L – Evolution & Ecology of Arachnids**Laboratory (1 unit)**

Course Description: Laboratory on spider natural history, identification, external morphology, and taxonomy, morphology and identification. Emphasis on the spiders of the California Floristic Province.

Prerequisite(s): (BIS 002C or ENT 100 or ENT 100L); ENT 108 (can be concurrent); ENT 108 required concurrently or consent of instructor.

Learning Activities: Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

ENT 109 – Field Taxonomy & Ecology (7 units)

Course Description: Study of insects in their natural habitats; their identification and ecology.

Prerequisite(s): An introductory course in entomology or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 36 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENT 110 – Arthropod Pest Management (5 units)

Course Description: Sustainable management & ecology of arthropod pests in agricultural systems. Techniques for effective, management of arthropod pests via in-depth knowledge about pest biology, life strategies, spatial ecology, and food web functions. Lab & field trip exercises in applied research in pest management, ecology, and evolution using digital technologies (apps, remote sensing, cloud-based decision support).

Prerequisite(s): (STA 013 or STA 013Y or STA 100 C- or better); BIS 002B C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ENT 111 – Chemical Ecology (3 units)

Course Description: Fundamental concepts in chemical ecology, classic and recent examples of chemical-mediated species interactions; introduction to the methods and techniques used in the field of chemical ecology.

Prerequisite(s): BIS 002B C- or better; CHE 002A C- or better; CHE 002B C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ENT 117 – Longevity (4 units)

Course Description: Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper 1 hour(s).

Cross Listing: HDE 117.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ENT 119 – Apiculture (3 units)

Course Description: Biology and behavior of honeybees; communication, orientation, social organization, foraging activities, honey production, pollination activities.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENT 120 – Pollination Biology (3 units)

Course Description: Natural history, ecology, evolution and applications of pollination. Conceptual underpinnings and basic methodologies of pollination. Primary focus on animal-mediated pollination.

Prerequisite(s): BIS 002B C- or better; or consent of instructor. EVE 100 EVE 101 recommended.

Learning Activities: Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENT 123 – Plant-Virus-Vector Interaction (3 units)

Course Description: Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement.

Prerequisite(s): BIS 002A; BIS 101; PLB 105, PLP 120, and ENT 100 recommended.

Learning Activities: Lecture 3 hour(s).

Cross Listing: PLB 123, PLP 123.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ENT 135 – Introduction to Biological Control (4 units)

Course Description: Introduction to biological control.

Prerequisite(s): ENT 100 or ENT 110.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

ENT 153 – Medical Entomology (3 units)

Course Description: Basic biology and classification of medically important arthropods with special emphasis on the ecology of arthropodborne diseases and principles of their control. Relationships of arthropods to human health.

Prerequisite(s): BIS 002A; BIS 002B; or consent of instructor; upper division standing in one of the biological sciences.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ENT 153L – Lab Course in Medical Entomology (4 units)

Course Description: Medical entomology and vector control; physiology and identification of disease vectors; methods for trapping and sampling mosquitoes and ticks; techniques for testing insecticide resistance; utilization of online resources for epidemiological data analysis; inclusion of field trips for mosquito and tick collections and visits to vector control districts for practical insights.

Prerequisite(s): ENT 153 C or better; or consent of instructor.

Learning Activities: Discussion/Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Writing Experience (WE).

ENT 156 – Biology of Parasitism (3 units)

Course Description: Lectures on the biological and ecological aspects affecting host-parasite relationships using selected examples from protozoan and metazoan fauna.

Prerequisite(s): BIS 002A; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENT 156L – Biology of Parasitism Laboratory (1 unit)

Course Description: Laboratory demonstrations using selected examples of protozoan and metazoan organisms along with various techniques used in parasitology to exemplify concepts presented in the lecture course.

Prerequisite(s): ENT 156 (can be concurrent); ENT 156 required concurrently or consent of instructor.

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENT 158 – Forensic Entomology (3 units)

Course Description: Arthropods, their general biology, succession, developmental cycles and population biology in matters of criminal prosecution and civil litigation. Emphasis on basic arthropod biology, ecological and developmental concepts and methods, development of reasoning abilities, implication, development of opinions and evidence.

Prerequisite(s): ENT 100; or consent of instructor; upper division standing.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

ENT 180A – Experimental Ecology & Evolution in the Field (4 units)

Course Description: Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments.

Prerequisite(s): EVE 100 (can be concurrent); (ENT 105 (can be concurrent) or ESP 100 (can be concurrent) or EVE 101 (can be concurrent)); consent of instructor.

Learning Activities: Lecture/Lab 3 hour(s), Project 3 hour(s); Fieldwork.

Cross Listing: EVE 180A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ENT 180B – Experimental Ecology & Evolution in the Field (4 units)

Course Description: Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments.

Prerequisite(s): EVE 180A or ENT 180A.

Learning Activities: Lecture/Lab 3 hour(s), Project 3 hour(s); Fieldwork.

Cross Listing: EVE 180B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

ENT 192 – Internship (1-12 units)

Course Description: Laboratory experience or fieldwork off and on campus in all subject areas offered in the Department of Entomology. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

ENT 197T – Tutoring in Entomology (1-3 units)

Course Description: Leading small discussion groups. Preview assignments and prepare guidelines for discussion.

Learning Activities: Discussion 1-3 hour(s).

Grade Mode: Pass/No Pass only.

ENT 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ENT 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ENT 212 – Molecular Biology of Insects & Insect Viruses (3 units)

Course Description: Molecular biological analysis of insect systematics, physiology, and defense mechanisms. Molecular biology of insect viruses. Baculovirus expression vectors and post-translation modification of expressed polypeptides. Biological control of using neuropeptides and toxin genes in insect viruses.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ENT 225 – Terrestrial Field Ecology (4 units)

Course Description: Field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results are stressed.

Prerequisite(s): Introductory ecology and introductory statistics or consent of instructor.

Learning Activities: Seminar 1 hour(s), Fieldwork 12 hour(s).

Cross Listing: ECL 225, PBG 225.

Grade Mode: Letter.

ENT 230 – Advanced Biological Control (4 units)

Course Description: Principles and current issues in biological control of arthropod pests and weeds; laboratory devoted to identification and life history of the major groups of parasitic and predaceous arthropods.

Prerequisite(s): Graduate or upper division standing in biological science or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

ENT 253 – Advanced Medical Entomology (3 units)

Course Description: An analysis of several anthropod-borne human diseases with emphasis on the relationships of the biology of the vector to the ecology of the disease. Discussion includes demonstration of vectors and techniques.

Prerequisite(s): One upper division ENT course (other than ENT 153) and one course in Microbiology; ENT 153 strongly recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ENT 290 – Exploratory Topics in Entomology (2 units)

Course Description: Interdisciplinary topics in entomology, including innovative applications of entomological concepts to other fields of research and human endeavor (e.g. medicine, technology, art, criminology).

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 8 unit(s) when topic differs.

Grade Mode: Letter.

ENT 291 – Current Topics in Medical & Veterinary Entomology (2 units)

Course Description: Discussions of parasitology, ecology and epidemiology related to vectors of pathogens causing disease in humans and animals.

Prerequisite(s): ENT 153.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

ENT 292 – Current Topics in Insect Physiology & Behavior (2 units)

Course Description: Analysis of contemporary advances in insect physiology, biochemistry and/or behavior. Interpretation and description of physiological and behavioral mechanisms and functions. Application of general principles to solution of problems in the laboratory and field.

Prerequisite(s): ENT 102 if topic is physiology, a course in behavior if topic is behavior, or either if topic bridges both.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 8 unit(s) when topic differs.

Grade Mode: Letter.

ENT 293N – Current Topics in Insect Biotechnology & Genomics (2 units)

Course Description: Discussion of advances in insect biotechnology, including genetic engineering and genomics.

Prerequisite(s): ENT 212.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 6 unit(s) when topic differs.

Grade Mode: Letter.

ENT 294 – Current Topics in Insect Ecology, Evolution, & Systematics (2 units)

Course Description: Discussions of advanced topics in ecology, evolution and systematics with emphasis on analysis of factors influencing the distribution, abundance, adaptations and evolutionary relationships of insects. Includes consideration of applications of basic theory; e.g. biological control.

Prerequisite(s): ENT 103; general course in ecology or evolution.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 8 unit(s) when topic differs.

Grade Mode: Letter.

ENT 295 – Current Topics in Agricultural Entomology & Bee Biology (2 units)

Course Description: Discussion of advanced topics about the biology, ecology, behavior, and management of pest and beneficial insects.

Prerequisite(s): ENT 110 if topic relates to pests and beneficial predators; ENT 119 if topic is bee biology; either if topic bridges both.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 8 unit(s) when topic differs.

Grade Mode: Letter.

ENT 297N – Seminar in Entomology (1 unit)

Course Description: Weekly Entomology seminar.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 9 unit(s) when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

ENT 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ENT 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Environmental Horticulture (ENH)

College of Agricultural & Environmental Sciences

ENH 006 – Introduction to Environmental Plants (4 units)

Course Description: Classification, nomenclature and variation of environmental plants. The use of floral and vegetative characteristics and terminology to key unknown plants. Characteristics of plant groups and basics of climate, soils and plant selection. Identification of 150 common landscape plants.

Learning Activities: Lecture 1 hour(s), Discussion 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ENH 100 – Urban Forests are Nature-Based Solutions (4 units)

Course Description: Principles and practices of planning and managing urban vegetation, forests, green infrastructures and nature-based solutions. Basics of tree/site monitoring, natural resource inventory, and development of long term urban forest management plans at both local and landscape scales.

Prerequisite(s): PLS 002 or BIS 002B or LDA 001.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENH 101 – Trees of the Urban Forest (2 units)

Course Description: Identification and evaluation of 200 tree species of the urban forest on campus, in the Arboretum, and in the city of Davis; appraised and aesthetic values, condition, and branch structure; contribution of trees to this ecosystem. Bicycle required.

Prerequisite(s): ENH 006; or consent of instructor.

Learning Activities: Lecture 1 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ENH 105 – Taxonomy & Ecology of Environmental Plant Families (4 units)

Course Description: Classification and identification of introduced and native species used in urban forests, with emphasis on floral and vegetative characteristics of the prominent families of angiosperms and gymnosperms, adaptations to environmental variations in western landscapes, and horticultural classification.

Prerequisite(s): ENH 006; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ENH 120 – Management of Container Media (3 units)

Course Description: Principles of soil science and practices related to management of container media are taught, emphasizing appropriate use of soils and amendments, irrigation, and fertilizers. Physical and chemical properties are tested and effects of management on crops are evaluated in the laboratory.

Prerequisite(s): SSC 010 or SSC 100.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

ENH 125 – Greenhouse & Nursery Crop Production (5 units)

Course Description: Principles and techniques for the production of ornamental greenhouse and nursery crops. Hands-on experience producing greenhouse crops. Optional weekend field trip.

Prerequisite(s): PLS 002.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ENH 133 – Woody Plants in the Landscape: Growth, Ecology & Management (4 units)

Course Description: Principles and practices of managing trees and shrubs in the urban landscape and other managed environments. Topics include woody plant form; growth response and adaptation; tree management in relation to soil, moisture, climate; plant problems.

Prerequisite(s): PLS 002 or BIS 002C.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ENH 150 – Genetics & Plant Conservation: The Biodiversity Crisis (3 units)

Course Description: Conservation of genetic diversity, measurement of diversity, threats to diversity and reasons for protection, the process of extinction, distribution of diversity, determination of what to conserve and means of conservation. Examples drawn largely from forest tree species.

Prerequisite(s): BIS 001C; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ENH 160 – Restoration Ecology (4 units)

Course Description: Broad, interdisciplinary approach to effective restoration. Design and implementation of restoration projects based on principles of physiology, population, community, ecosystem and landscape ecology.

Prerequisite(s): SSC 112 C or better or ESP 100 C or better or ESM 144 C or better or PLS 162 C or better or PLS 163 C or better or PLS 130 C or better or PLS 144 C or better or PLS 147 C or better or PLS 160 C or better or ESP 121 C or better or ESP 127 C or better or ESP 155 C or better or EVE 101 C or better or EVE 104 C or better or EVE 117 C or better or EVE 119 C or better or EVE 181 C or better or PLB 117 C or better or ECL 200AN C or better or ECL 200BN C or better; or consent of instructor; or equivalent course in ecology/plant ecology.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ENH 160L – Restoration Ecology Laboratory (1 unit)

Course Description: Companion field course to ENH 160. Design, implementation, and analysis of ecological monitoring of a site, followed by design of a restoration project for the site through work in ENH 160. Weekly field trips and classroom training on monitoring design and analysis.

Prerequisite(s): ENH 160 (can be concurrent); consent of instructor.

Learning Activities: Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

Environmental Humanities (EVH)

College of Letters & Science

EVH 200 – Interdisciplinary Readings in the Environmental Humanities (4 units)

Course Description: Classic and contemporary readings in environmental history, ecocriticism, environmental philosophy and ethics, geography, design, cultural anthropology, cultural studies, ecoarts, and other fields that make up the environmental humanities.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

Environmental Policy & Management (ENV)

Graduate Studies

ENV 200A – Climate Change Impacts, Mitigation, & Natural Resources Management (4 units)

Course Description: Major topics in environmental sciences, with emphasis on climate change impacts on natural and human managed systems.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ENV 200B – Environmental Policy Evaluation (4 units)

Course Description: Method and practice, philosophical basis, and political role of policy analysis. Reviews basic concepts from economic theory; how and why environmental problems emerge in a market economy; and tools necessary for solving environmental problems.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Graduate Standing.

Cross Listing: ECL 212B, ESP 212B.

Grade Mode: Letter.

ENV 200CN – Environmental Governance (4 units)

Course Description: Theories of environmental governance and their practical applications in solving modern environmental problems.

Application of governance theory to choice of real-world case studies of environmental problems.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

ENV 201 – Environmental Law (4 units)

Course Description: Roles of legislatures, agencies, and courts in creating and interpreting law; legal strategies for addressing environmental problems; major environmental statutes; and the relationship between federal and state/local legal authority.

Prerequisite(s): Graduate standing; consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Environmental Policy & Management graduate students.

Grade Mode: Letter.

ENV 202 – Policy Development & Implementation (4 units)

Course Description: Environmental policy development and implementation processes: developing and enacting legislation, regulation development and review, and implementation of new laws. California state processes. Local, federal, and international policy. Business' role in climate policy. Theory, applied study, discussion with guest experts, and practical skills such as how to write for a policy audience.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass one restricted to Environmental Policy & Management students.

Grade Mode: Letter.

ENV 203A – Environmental Policy Clinic (4 units)

Course Description: Teams analyze environmental policy problems and natural resources issues from scientific, legal, and economic perspectives. Hands-on learning partnering with a client organization.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s), Project.

Enrollment Restriction(s): Open to graduate students in Environmental Policy & Management only.

Grade Mode: Letter.

ENV 203B – Environmental Policy Clinic (4 units)

Course Description: Teams analyze environmental policy problems and natural resources issues from scientific, legal, and economic perspectives. Hands-on learning partnering with a client organization. Continuation of ENV 203A.

Prerequisite(s): ENV 203A B- or better; or consent of instructor.

Learning Activities: Lecture 1 hour(s), Project.

Enrollment Restriction(s): Open to graduate students in Environmental Policy & Management only.

Grade Mode: Letter.

ENV 203P – Policy Clinic Prep Seminar (1 unit)

Course Description: Introductions to project management, conflict resolution and team building. Review and selection of project proposals and draft scope of work.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1.5 hour(s).

Enrollment Restriction(s): Open to Environmental Policy & Management students only.

Repeat Credit: May be repeated 2 time(s) with consent of instructor; generally, students only repeat seminar if they do not successfully complete ENV 203A or ENV 203B.

Grade Mode: S/U only.

ENV 224 – Data Management & Visualization in R (3 units)

Course Description: Introduction to programming and data analysis in R. Workflow (version control, markdown, reading and writing data), object-oriented programming, statistical analysis, and visualization.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Cross Listing: ECL 224.

Grade Mode: Letter.

ENV 290 – Seminar (1 unit)

Course Description: Varied topics in environmental policy and management. May feature guest speakers.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated for credit when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

ENV 292 – Graduate Internship (1-12 units)

Course Description: Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 1-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ENV 296 – Environmental Policy & Management Practicum (2-6 units)

Course Description: Practicum experience integrating coursework into an applied professional setting.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 0.50 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

ENV 297 – Professional Development Seminar (1 unit)

Course Description: Weekly seminar inviting policy and management professionals to come and discuss their challenges and achievements.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1.50 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ENV 298 – Group Study (1-5 units)

Course Description: Group Study.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

ENV 299 – Research (1-12 units)

Course Description: Individual study under the direction of a faculty member.

Learning Activities: Variable 1-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Environmental Science & Management (ESM)

College of Agricultural & Environmental Sciences

ESM 008 – Water Quality at Risk (3 units)

Course Description: Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination. Decoding popular media coverage of water quality and water contamination.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Not open to students who have successfully completed ERS 008. (Formerly ERS 008.)

Cross Listing: SAS 008.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL); Writing Experience (WE).

ESM 092 – Internship (1-12 units)

Course Description: Work experience off and on campus in resource sciences. Internship supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ESM 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

ESM 098F – Student Facilitated Course Development (1-3 units)

Course Description: Student-facilitated (taught) course intended for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-3 hour(s).

Grade Mode: Pass/No Pass only.

ESM 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ESM 100 – Principles of Hydrologic Science (4 units)

Course Description: Topics include hydrology (surface and ground water), hydraulic flow through porous media, water in the soil-plant-atmosphere continuum, water quality, flow through open channels, and representative water-resource problems.

Prerequisite(s): CHE 002B; MAT 016B; (PHY 007A or PHY 009A).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Not open to students who have successfully completed ERS 100. (Formerly ERS 100.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ESM 108 – Environmental Monitoring (3 units)

This version has ended; see updated course, below.

Course Description: Instrumentation and methods for environmental and ecological monitoring; GPS, sensors, datalogging, and GIS. Wide range of measurement techniques for environmental parameters.

Prerequisite(s): (ESP 100 or EVE 101); (SSC 100 or WFC 100 or ESM 100).

Learning Activities: Lecture/Discussion 2 hour(s), Laboratory 2 hour(s), Fieldwork.

Enrollment Restriction(s): Not open to students who have successfully completed ERS 108. (Formerly ERS 108.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESM 108 – Environmental Monitoring (3 units)

Course Description: Instrumentation and methods for environmental and ecological monitoring; GPS, sensors, datalogging, and GIS. Wide range of measurement techniques for environmental parameters.

Prerequisite(s): (MAT 016B or MAT 017B or MAT 019C or MAT 021B); (STA 013 or STA 013Y or STA 100); ESM 120; (ESP 106 (can be concurrent) or LDA 150 (can be concurrent) or ABT 150 (can be concurrent))

Learning Activities: Lecture/Discussion 2 hour(s), Laboratory 2 hour(s), Fieldwork.

Enrollment Restriction(s): Not open to students who have successfully completed ERS 108. (Formerly ERS 108.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

This course version is effective from, and including: Fall Quarter 2024.

ESM 110 – Irrigation Systems & Water Management (4 units)

Course Description: Soil and plant aspects of irrigation and drainage. Soil-water principles including water storage and movement, plant response to irrigation, water use by crops, irrigation systems (i.e., micro-irrigation, sprinkler irrigation and surface irrigation), and related salinity and water quality impacts.

Prerequisite(s): PHY 007A; SSC 100 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: ABT 110, HYD 110.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESM 118 – Evapotranspiration Principles, Measurement & Modeling (4 units)

Course Description: Estimation of evapotranspiration (ET) for irrigation management and water resources planning; including the basic principles and key factors controlling evaporation and ET rates, methods of measuring these factors in the field and remotely, and determination of likely water requirements for crops and various landscape conditions as needed for water resources planning.

Prerequisite(s): HYD 124 C or better; consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: HYD 118; EBS 148.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ESM 120 – Global Environmental Interactions (4 units)

Course Description: Relationships among climate, hydrology, biogeochemical cycles, soils and vegetation distribution in diverse landscapes and biomes. Emphasis on physical, chemical, and biological processes affecting ecosystems from the poles to the equator, and human impacts on the environment.

Prerequisite(s): One college level chemistry course; one college level biology course.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 25 students per discussion section; not open to students who have successfully completed ERS 060 or 120. (Formerly ERS 060 & 120.)

Grade Mode: Letter.

ESM 121 – Water Science & Management (3 units)

Course Description: Role of water as an essential natural resource in contemporary society. Aspects of the scientific method, including descriptions of natural phenomena and underlying physical causes. Water for cities, agriculture, industry, wildlife and recreation; case studies of water management.

Prerequisite(s): PHY 010 or GEL 001.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Not open to students who have successfully completed ERS 121. (Formerly ERS 121.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ESM 125 – River Conservation (4 units)

Course Description: Law, policy, science, and practice used in managing rivers with the aim of balancing human societal needs and those of riparian and aquatic species.

Prerequisite(s): ESM 100 or ESM 108 or ESM 120 or ESM 121 or GEL 001 or GEL 050 or HYD 010 or HYD 141 or HYD 143 or SSC 100 or EVE 101 or ESP 100 or ESP 001 or ESP 110 or WFC 010 or WFC 051 or ECI 040 or ECI 100.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL).

ESM 131 – Air as a Resource (3 units)

Course Description: Degradation of the atmospheric resource, historical aspects and effects of air pollution examined. Evaluation of primary gaseous and particulate pollutants and discussion of their impact.

Prerequisite(s): (CHE 010 or CHE 002A); CHE 002B.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Not open to students who have successfully completed ERS 131. (Formerly ERS 131.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ESM 141 – Role of Fire in Natural Ecosystems (4 units)

Course Description: Fire regimes and roles in major North American vegetation types, especially in the west. Physics of fire, fire effects on organisms and ecosystem functioning, reconstructing fire histories, fire in resource management, and fire use by indigenous people.

Prerequisite(s): (BIS 002A or PLS 002); (BIS 002B or BIS 002C); basic biological, ecology/evolution concepts.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Not open to students who have successfully completed ERS 141. (Formerly ERS 141.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ESM 144 – Trees & Forests (4 units)

Course Description: Biological structure and function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life histories, dormancy, forest biodiversity, and agroforestry.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 144 or ENH 144 or ERS 144. (Formerly PLB 144 or ENH 144 or ERS 144.)

Cross Listing: PLS 144.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ESM 185 – Aerial Photo Interpretation & Remote Sensing (4 units)

Course Description: Basics of remote sensing and photogrammetry, grids and map projections, aerial photo interpretation, sensors and platforms for aerial and space photography and non-photographic imaging systems, aerial thermography, microwave sensing, and introduction to remote sensing applications.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Enrollment Restriction(s): Not open to students who have successfully completed ERS 185. (Formerly ERS 185.)

Grade Mode: Letter.

ESM 186 – Environmental Remote Sensing (5 units)

Course Description: Overview of satellite, airborne, and ground-based remote sensing, building on properties of electromagnetic radiation. Applications include hydrologic processes, weather and climate, ecology and land use, soils, geology, forestry, and agriculture. Computer based analysis and visualization of images and processing techniques.

Prerequisite(s): MAT 016B; (PHY 007C or PHY 009B); upper division standing; LDA 150 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Not open to students who have successfully completed HYD 186 or ERS 186. (Formerly HYD 186 & formerly ERS 186.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

ESM 192 – Internship (1-12 units)

Course Description: Work experience off and on campus in resource sciences. Internship supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

ESM 194H – Senior Honor Thesis (2-6 units)

Course Description: Independent study, guided research on an environmentally related subject of special interest to the student.

Prerequisite(s): Senior standing, overall GPA of 3.50 or higher and consent of master advisor.

Learning Activities: Independent Study 2-6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ESM 195 – Integrating Environmental Science & Management (2 units)

Course Description: Practical aspects of environmental improvement through integrated analyses of contemporary issues or problems associated with advocacy, regulation, science and resource management from the perspectives of the physical and ecological sciences and current policy/management.

Prerequisite(s): Consent of instructor; senior status in Environmental Science Management major or other environmental science major (e.g. Environmental Resource Science; Environmental Biology Management; Environmental Toxicology; Environmental Policy Analysis Planning; Wildlife, Fish, Conservation Biology; Hydrologic Science).

Learning Activities: Lecture/Discussion 2 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

ESM 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ESM 198F – Student Facilitated Course (1-3 units)

Course Description: Student-facilitated (taught) course intended for upper division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-3 hour(s).

Enrollment Restriction(s): Restricted to upper division standing or consent of instructor.

Grade Mode: Pass/No Pass only.

ESM 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

ESM 199FA – Student Teaching Course Development (1-3 units)

Course Description: Under the supervision of a faculty member, an undergraduate student plans and develops the course they will teach under 098F/198F.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-3 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Pass/No Pass only.

ESM 199FB – Student Teaching Course Development (1-3 units)

Course Description: Student facilitated. Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-3 hour(s).

Grade Mode: Pass/No Pass only.

Environmental Science & Policy (ESP)

College of Agricultural & Environmental Sciences

ESP 001 – Environmental Analysis (4 units)

Course Description: Analysis of the physical, biological, and social interactions which constitute environmental problems. Emphasis on analysis of environmental problems, the consequences of proposed solutions, and the interaction of environmental science and public policy in creating solutions.

Prerequisite(s): UWP 001 (can be concurrent) or UWP 001Y (can be concurrent) or UWP 001V (can be concurrent) or ENL 003 (can be concurrent) or ENL 003V (can be concurrent); or equivalent; sophomore standing; ECN 001A and BIS 002B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

ESP 010 – Current Issues in the Environment (3 units)

Course Description: Science behind environmental issues, and policies affecting our ability to solve domestic and international environmental problems. Resources, environmental quality, regulation, environmental perception and conservation. Integrative case studies.

Prerequisite(s): Elementary biology recommended.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ESP 001.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL); Writing Experience (WE).

ESP 092 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the College of Agricultural & Environmental Sciences. Internship supervised by member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ESP 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ESP 100 – General Ecology (4 units)

Course Description: Theoretical & experimental analysis of the distribution, growth & regulation of species populations; predator-prey & competitive interactions; and the organization of natural communities. Application of evolutionary & ecological principles to selected environmental problems.

Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (MAT 016A or MAT 017A or MAT 021A); (MAT 016B or MAT 017B or MAT 021B); STA 013 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESP 101 – Ecology, Nature, & Society (4 units)

Course Description: Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation.

Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ANT 101.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

ESP 104 – Community Ecology (4 units)

Course Description: Population growth and density dependence; predation; exploitative, interference and apparent competition; mutualism and facilitation; coexistence mechanisms; niches, spatial and temporal variation etc. Emphasis on quantitative understanding through models, concepts, and empirical evidence.

Prerequisite(s): ESP 100 or EVE 101.

Learning Activities: Lecture 3 hour(s); Discussion 1 hour(s).

Cross Listing: EVE 104.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

ESP 106 – Environmental Data Science (4 units)

Course Description: Programming with environmental data using R.

Understanding data types, loops, branching and functions. Reproducible workflows and version control to import, organize, explore, analyze and visualize environmental data. Data science terminology and approaches. Common data sources used in environmental science and policy.

Prerequisite(s): STA 013 (can be concurrent) or STA 013 (can be concurrent) or STA 032 (can be concurrent) or STA 100 (can be concurrent).

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ESP 110 – Principles of Environmental Science (4 units)

Course Description: Application of physical and chemical principles, ecological concepts, and systems approach to policy analysis of atmospheric environments, freshwater and marine environments, land use, energy supplies and technology, and other resources.

Prerequisite(s): (PHY 001A or PHY 007A); (MAT 016B or MAT 017B or MAT 021B); BIS 002A or BIS 010 recommended; upper division standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ESP 111 – Marine Environmental Issues (1 unit)

Course Description: Examination of critical environmental issues occurring in coastal waters including the effects of climate change, overfishing, and other human impacts. Through readings and group discussions, students will develop an integrative understanding of the oceanographic and ecological processes.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Cross Listing: EVE 111.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESP 116N – Oceanography (3 units)

Course Description: Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip.

Prerequisite(s): GEL 001 or GEL 002 or GEL 016 or GEL 016V or GEL 050.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s), Fieldwork.

Cross Listing: GEL 116N.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESP 121 – Population Ecology (4 units)

Course Description: Development of exponential and logistic growth models for plant and animal populations, analysis of age structure, analysis of competition and predator-prey systems, and analysis of disease dynamics. Developing mathematical models and using them to make predictions and solve problems.

Prerequisite(s): BIS 002B; (MAT 016B or MAT 017B or MAT 019C or MAT 021B or MAT 021BH).

Learning Activities: Lecture 3 hour(s), Laboratory 2.5 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ESP 123 – Introduction to Field & Laboratory Methods in Ecology (4 units)

Course Description: Introduction to methods used for collecting ecological data in field and laboratory situations. Methods used by population ecologists and community ecologists; emphasis on experimental design, scientific writing and data analysis.

Prerequisite(s): (ESP 100 or EVE 101); (STA 013 or STA 013Y or STA 100); or equivalent.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s), Fieldwork 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESP 124 – Marine & Coastal Field Ecology (3 units)

Course Description: Ecology of marine populations and communities living in diverse habitats along the California coast. Hands-on learning using scientific process and tools of the biological trade to address ecological questions arising during field trips. Critical thinking through discussing scientific literature.

Prerequisite(s): Upper division standing or consent of instructor; introductory animal biology (BIS 001B) recommended; residence at or near Bodega Marine Lab required.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s), Fieldwork 3 hour(s).

Enrollment Restriction(s): Enrollment restricted to application at <http://www.bml.ucdavis.edu>.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESP 127 – Plant Conservation Biology (4 units)

Course Description: Principles governing the conservation of plant species and plant communities, including the roles of fire, exotic species, grazing, pollination, soils, and population genetics; analytic and practical techniques for plant conservation; and introduction to relevant legal, ethical, and policy issues.

Prerequisite(s): ESP 100 or EVE 101; or equivalent upper division general ecology.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESP 150A – Physical & Chemical Oceanography (4 units)

Course Description: Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles.

Prerequisite(s): (ESP 116N or GEL 116N); (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 019C or MAT 021C); (CHE 002C or GEL 055); and consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: GEL 150A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

ESP 150B – Geological Oceanography (3 units)

Course Description: Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory.

Prerequisite(s): GEL 050 or (GEL 116N or ESP 116N).

Learning Activities: Lecture 3 hour(s).

Cross Listing: GEL 150B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ESP 150C – Biological Oceanography (4 units)

Course Description: Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. One weekend field trip required.

Prerequisite(s): BIS 002A; consent of instructor; a course in general ecology.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Fieldwork.

Cross Listing: GEL 150C.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESP 151 – Limnology (4 units)

Course Description: Biology and productivity of inland waters with emphasis on the physical and chemical environment.

Prerequisite(s): BIS 002A; BIS 002B; (BIS 002C and ESP 100 or EVE 101 recommended.)

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ESP 151L – Limnology Laboratory (3 units)

Course Description: Limnological studies of lakes, streams, and reservoirs with interpretation of aquatic ecology.

Prerequisite(s): ESP 151 (can be concurrent); junior, senior, or graduate standing.

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ESP 152 – Coastal Oceanography (3 units)

Course Description: Oceanography of coastal waters, including bays, river plumes, nearshore and estuaries; focus on transport patterns, how they are forced and implications for ecological and environmental problems. Pertinent for students in oceanography, ecology, environmental engineering, geology and hydrology.

Prerequisite(s): Upper division standing or consent of the instructor; physics (PHY 009B), calculus (MAT 021B) and exposure to physical and chemical oceanography (GEL 150A and ESP 150A) are recommended; residence at or near Bodega Marine Laboratory required.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s), Fieldwork 3 hour(s).

Enrollment Restriction(s): Enrollment restricted to application at <http://www.bml.ucdavis.edu>.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESP 155 – Wetland Ecology (4 units)

Course Description: Introduction to wetland ecology. The structure and function of major wetland types and principles that are common to wetlands and that distinguish them from terrestrial and aquatic ecosystems.

Prerequisite(s): BIS 002A; or equivalent of BIS 002A; ESP 100 or EVE 101 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ESP 155L – Wetland Ecology Laboratory (3 units)

Course Description: Modern and classic techniques in wetland field ecology. Emphasis on sampling procedures, vegetation analysis, laboratory analytical procedures, and examples of successful wetland restoration techniques.

Prerequisite(s): ESP 155 (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 6 hour(s), Fieldwork.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ESP 160 – The Policy Process (4 units)

Course Description: Alternative models of public policymaking and application to case studies in the U.S. and California.

Prerequisite(s): POL 001 or POL 001Y; ECN 001A and STA 013 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ESP 161 – Environmental Law (4 units)

Course Description: Introduction for non-Law School students to some of the principal issues in environmental law and the judicial interpretation of some important environmental statutes, e.g., NEPA.

Prerequisite(s): Upper division standing; one course in environmental science or political science recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

ESP 162 – Environmental Policy (4 units)

Course Description: Compares economic with socio-cultural approaches to understanding the causes of environmental problems and strategies for addressing them. Includes different approaches to the policy process, policy instruments, and environmental behavior. Applies these principles to several problems.

Prerequisite(s): ECN 001A or ECN 001AY or ECN 001AV.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ESP 163 – Energy & Environmental Aspects of Transportation (4 units)

Course Description: Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models.

Prerequisite(s): Upper division standing in engineering or economics or environmental studies.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ECI 163.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

ESP 165 – Climate Policy (3 units)

Course Description: Models, data and assumptions behind competing arguments regarding societal response to the prospect of climate change at the state, national and international level from economic, ethical and policy science perspectives.

Prerequisite(s): ESP 001 or ECN 001A or ESP 001AY or ECN 001AV; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

ESP 166 – Ocean & Coastal Policy (3 units)

Course Description: Overview of U.S. and International ocean and coastal policy, including energy, coastal land-use and water quality, protected areas and species.

Prerequisite(s): ESP 001; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ESP 167 – Energy Policy (4 units)

Course Description: Survey of primary energy resources (fossil, renewable, nuclear), energy conversion methods, future energy demand scenarios, and environmental impacts of energy. Overview of energy policy in the U.S. Analysis of policy alternatives for addressing energy-related environmental and national security issues.

Prerequisite(s): (ECN 001A or ECN 001AY or ECN 001AV); (MAT 016B or MAT 017B or MAT 021B); or consent of instructor.

Learning Activities: Lecture 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ESP 168A – Methods of Environmental Policy Analysis (5 units)

Course Description: Evaluation of alternatives for solution of complex environmental problems; impact analysis, benefit cost analysis, distributional analysis, decision making under uncertainty, and multi-objective evaluation.

Prerequisite(s): (ESP 001 or ESP 010); (STA 013 or STA 013Y or STA 100); (ECN 001A or ECN 001AY or ECN 001AV); ECN 100 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ESP 168B – Methods of Environmental Policy

Evaluation (4 units)

Course Description: Continuation of ESP 168A. Emphasis on examination of the literature for applications of research & evaluation techniques to problems of transportation, air & water pollution, land use, and energy policy.

Prerequisite(s): ESP 168A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ESP 169 – Water Policy & Politics (3 units)

Course Description: Governance of water, including issues of water pollution/quality and water supply. Politics of water decision-making and effectiveness of water policy. Broad focus on federal water policy, with case examples from nationally significant U.S. watersheds.

Prerequisite(s): ECN 001A or POL 001 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ESP 170 – Conservation Biology Policy (4 units)

Course Description: Analysis of policies designed to conserve species and their habitats. Emphasis on how individual incentives affect the success of conservation policies. Valuation of endangered species and biodiversity. Criteria for deciding conservation priorities.

Prerequisite(s): One course in environmental science (e.g., ESP 001), conservation (e.g., WFC 011 or WFC 154), or government (e.g., POL 001) recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

ESP 171 – Urban & Regional Planning (4 units)

Course Description: How cities plan for growth in ways that minimize environmental harm. Standard city planning tools (general plan, zoning ordinance) and innovative new approaches. Focus on planning requirements and practices in California. Relationships between local, regional, state, and federal policy.

Prerequisite(s): ESP 001 or ESP 161 or ESP 179 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

ESP 172 – Public Lands Management (4 units)

Course Description: Investigation of alternative approaches to public lands management by Federal and state agencies. Role each agency's legislation plays in determining the range of resource allocations.

Prerequisite(s): POL 001 and ECN 001A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH).

ESP 173 – Land Use & Growth Controls (4 units)

Course Description: Exposes students to the economic, political, and legal factors affecting land use and growth controls, and helps students critically evaluate written materials in terms of their arguments and supporting data. May be taught abroad.

Prerequisite(s): Upper division standing; one course in environmental policy.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ESP 174 – Environmental Justice Policy & Practice (4 units)

Course Description: History and frameworks of environmental justice; environmental justice policy; methods of spatial analysis. Emphasis on California and the United States.

Prerequisite(s): ESP 001 or equivalent recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD); Writing Experience (WE).

ESP 175 – Natural Resource Economics (4 units)

Course Description: Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil).

Prerequisite(s): ARE 100A C- or better or ECN 100A C- or better or ECN 100 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Managerial Economics (AMGE), Environmental Policy Analysis & Planning (AEPP) Majors, Agricultural & Resource Economics (GARE) Graduate Majors.

Cross Listing: ARE 175.

Grade Mode: Letter.

General Education: Social Sciences (SS).

ESP 178 – Applied Research Methods (4 units)

Course Description: Research methods for analysis of urban and regional land use, transportation, and environmental problems. Survey research and other data collection techniques; demographic analysis; basic forecasting, air quality, and transportation models. Collection, interpretation, and critical evaluation of data.

Prerequisite(s): STA 103 or STA 100 or STA 108 or SOC 106 or ARE 106; or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

ESP 179 – Environmental Impact Assessment (4 units)

Course Description: Introduction to the information resources and methods typically used in environmental impact analysis. Emphasis on how environmental information is applied to planning, environmental regulation, and public policymaking, with case studies from California land use and natural resource policy.

Prerequisite(s): ESP 001; or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

ESP 179L – Environmental Impact Reporting Using Geographic Information (2 units)

Course Description: Introduction to Geographic Information Systems (GIS) by using ArcView for assessment and environmental planning.

Prerequisite(s): ESP 179 (can be concurrent); ESP 179 required concurrently.

Learning Activities: Discussion/Laboratory 2 hour(s), Laboratory 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ABT 180, ABT 181, or ASE 132.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ESP 190 – Workshops on Environmental Problems (1-8 units)

Course Description: Workshops featuring empirical analyses of contemporary environmental problems by multidisciplinary student teams. Guided by faculty and lay professionals, the teams seek to develop an integrated view of a problem and outline a series of alternative solutions.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 2-16 hour(s).

Enrollment Restriction(s): Open to all upper division and graduate students on application.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ESP 191A – Workshop on Food System Sustainability (3 units)

Course Description: First in a two-quarter senior capstone course sequence. Identify projects addressing specific problems and opportunities of sustainable agriculture and food systems, form multidisciplinary teams, and identify and consult with key stakeholders to understand their needs and concerns.

Prerequisite(s): PLS 015; CRD 020; ARE 121; PLS 150; or consent of instructor; upper division standing.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ESP 191B – Workshop on Food System Sustainability (3 units)

Course Description: Continuation of ESP 191A. Teams conduct analyses of a specific issue in sustainable agriculture or food systems, prepare a critical assessment of technological, economic, environmental, and social dimensions of options for action and present their results to stakeholders.

Prerequisite(s): ESP 191A.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ESP 192 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

ESP 197T – Tutoring in Environmental Science & Policy (1-5 units)

Course Description: Experience in teaching under guidance of faculty member.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Tutorial 2-6 hour(s).

Grade Mode: Pass/No Pass only.

ESP 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ESP 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

ESP 212A – Environmental Policy Process (4 units)

Course Description: Introduction to selected theories of the policy process and applications to the field of environmental policy. Develops critical reading skills, understanding of policy theory, and an ability to apply multiple theories to the same phenomena.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to graduate standing.

Cross Listing: ECL 212A.

Grade Mode: Letter.

ESP 212B – Environmental Policy Evaluation (4 units)

Course Description: Method and practice, philosophical basis, and political role of policy analysis. Reviews basic concepts from economic theory; how and why environmental problems emerge in a market economy; and tools necessary for solving environmental problems.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Graduate Standing.

Cross Listing: ECL 212B, ENV 200B.

Grade Mode: Letter.

ESP 220 – Tropical Ecology (3 units)

Course Description: Overview of present status of knowledge on structure and processes of major tropical ecosystems. Differences and similarities among tropical and temperate systems stressed.

Prerequisite(s): ESP 100; EVE 101; EVE 117; EVE 138 recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate and undergraduate students who meet requirement subject to consent of instructor.

Grade Mode: Letter.

ESP 228 – Advanced Simulation Modeling (3 units)

Course Description: Advanced techniques in simulation modeling; optimization and simulation, dynamic parameter estimation, linear models, error propagation, and sensitivity testing. Latter half of course introduces model evaluation in ecological and social system models.

Prerequisite(s): (STA 108 or ARE 106); (ESP 128 and ESP 128L).

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ESP 275 – Economic Analysis of Resource & Environmental Policies (4 units)

Course Description: Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain.

Prerequisite(s): ARE 204 or ECN 204.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: ARE 275.

Grade Mode: Letter.

ESP 278 – Research Methods in Environmental Policy (3 units)

Course Description: Introduction to scientific research in environmental policy. Major issues in the philosophy of the social sciences. How to design research that acknowledges theoretical assumptions and that is likely to produce evidence in an intersubjectively reliable fashion with explicit recognition of its uncertainties.

Prerequisite(s): ARE 106; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

ESP 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Letter.

ESP 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ESP 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-12 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Environmental Toxicology (ETX)

College of Agricultural & Environmental Sciences

ETX 010 – Introduction to Environmental Toxicology (3 units)

Course Description: Hazardous substances, their effects on humans and their actions and movement in the environment. Emphasis on substances of current concern.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ETX 020 – Introduction to Forensic Science (3 units)

Course Description: Basic principles of forensic science, types of information on which investigations focus, how information is obtained and used in criminal investigations, types of scientific skills required to practice forensic science, guidance on training. Real cases discussed; demonstrations of methods provided.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

ETX 030 – Chemical & Drug Use & Abuse (3 units)

Course Description: Overview of chemical use and abuse in our society. Effects of chemicals (therapeutic drugs, pesticides, food additives, herbal remedies, environmental contaminants, and recreational drugs) on humans and other living systems.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ETX 040 – Contaminants in Our Environment (3 units)

Course Description: Contaminants in the environment (air, water, and soil) that influence the health of the environment, wildlife, and humans. An emphasis on contaminant properties, sources, and movement, public policy, and applying quantitative reasoning.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ETX 092 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the College of Agricultural & Environmental Sciences. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 098 – Directed Group Study (1-5 units)

Course Description: Group study on focused topics in Environmental Toxicology. Topic varies according to instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: P/NP only.

ETX 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 101 – Principles of Environmental Toxicology (4 units)

Course Description: Principles of toxicology with a focus on environmental, industrial, and natural chemicals. Topics include fate and effects of chemicals in organisms and the environment, air pollutants, insecticides, aquatic toxicology, endocrine disruptors, biomarkers and bioassays, and risk assessment.

Prerequisite(s): (CHE 008B or CHE 118B or CHE 128B); BIS 002A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

ETX 102A – Environmental Fate of Toxicants (4 units)

Course Description: Properties of toxic chemicals influencing their distribution and transformations; action of environmental forces affecting toxicant breakdown, movement, and accumulation; sources and occurrence of major classes of environmental toxicants.

Prerequisite(s): CHE 008B or CHE 118B or CHE 128B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ETX 112A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ETX 102B – Quantitative Analysis of Environmental Toxicants (5 units)

Course Description: Sample preparation methods for trace analysis of environmental toxicants. Concept and techniques of advanced analytical instrumentation. Interpretation and use of analytical data.

Prerequisite(s): ETX 102A.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ETX 112B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ETX 103A – Biological Effects of Toxicants (4 units)

Course Description: Biological effects of toxic substances in living organisms. Metabolism, cellular and tissue targets, mechanisms of action, and pathological effects.

Prerequisite(s): BIS 102; NPB 101 ETX 101 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ETX 114A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ETX 103B – Biological Effects of Toxicants: Experimental Approaches (5 units)

Course Description: Experimental approaches for assessing the biological effects of toxicants.

Prerequisite(s): ETX 103A.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ETX 114B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL); Writing Experience (WE).

ETX 104 – Environmental & Nutritional Factors in Cellular Regulation & Nutritional Toxicants (4 units)

Course Description: Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism.

Prerequisite(s): BIS 101; (BIS 103 or ABI 103).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: NUT 104.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL).

ETX 110 – Toxic Tragedies & Their Impact on Society (2 units)

Course Description: Examination of toxic tragedies, their origins, consequences, and effects on toxic regulation.

Prerequisite(s): Upper division status or consent of instructor required.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL); Writing Experience (WE).

ETX 111 – Introduction to Mass Spectrometry (3 units)

Course Description: Introduction to mass spectrometry, including ionization techniques, mass analyzers, interpretation of mass spectra, and applications of mass spectrometry. Emphasis on fundamental concepts of mass spectrometry necessary to identify and quantify organic molecules.

Prerequisite(s): CHE 118C or CHE 128C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ETX 120 – Perspectives in Aquatic Toxicology (4 units)

Course Description: Toxic substances, their fate in marine and freshwater systems, and their effects on aquatic organisms, populations, and ecosystems. Emphasis will be on substances and issues of current concern.

Prerequisite(s): CHE 008B; (CHE 118B or CHE 128B); BIS 002A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ETX 127 – Environmental Stress & Development in Marine Organisms (10 units)

Course Description: Taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods.

Prerequisite(s): ETX 101 or BIS 102 or BIS 104; and consent of instructor, or the equivalent; ETX 114A or NUT 114 recommended.

Learning Activities: Lecture 4 hour(s), Laboratory 12 hour(s), Discussion 2 hour(s).

Cross Listing: NUT 127.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ETX 128 – Food Toxicology (3 units)

Course Description: Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards.

Prerequisite(s): BIS 102; BIS 103.

Learning Activities: Lecture 3 hour(s).

Cross Listing: FST 128.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ETX 130 – Role & Applications of Toxicology in Modern Industry (3 units)

Course Description: Role of toxicology in industry research and development, human health and environmental protection, hazard and risk evaluations, risk management and communications, product stewardship, and regulatory compliance. Scientific principles and methods of toxicology in chemical, energy, pharmaceutical, pesticide, biotechnology industries.

Prerequisite(s): ETX 101; ETX 103A recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

ETX 131 – Environmental Toxicology of Air Pollutants (3 units)

Course Description: Field trip required. Toxicology of air pollutants in the ambient, indoor, and occupational environments. Health effects, sources, environmental fates, pulmonary responses, sampling and analyses, and air-quality criteria and standards. Field trip required.

Prerequisite(s): CHE 008B (can be concurrent); or the equivalent; BIS 102 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

ETX 135 – Health Risk Assessment of Toxicants (3 units)

Course Description: Current practices of health risk assessment of environmental chemicals using toxicological principles and their application to regulatory control of these chemicals.

Prerequisite(s): ETX 101; ETX 114A recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ETX 138 – Legal Aspects of Environmental Toxicology (3 units)

Course Description: Federal and California legislation concerning air and water pollution, pesticide use, food and feed additives, consumer protection, and occupational exposure to toxic substances; roles of federal regulatory agencies; alternatives to government control.

Prerequisite(s): Consent of instructor. ETX 010 or ETX 101 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL); Writing Experience (WE).

ETX 140 – Genes & the Environment (3 units)

Course Description: Evaluation of evidence that human health and disease susceptibility result from complex interactions between genes and the environment. Critical thinking through problem solving using the scientific method with examples of cancer, metabolic, cardiovascular, and neurological health outcomes related to environmental and genetic risk factors and mechanisms.

Prerequisite(s): BIS 002A (can be concurrent) or MCB 010 (can be concurrent) or BIS 101 (can be concurrent); college-level coursework in environmental toxicology recommended.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

ETX 146 – Exposure & Dose Assessment (3 units)

Course Description: Exposure component of risk assessment; specifically, the presence and/or formation of toxic substances in environmental media, their movement within and between contaminated media, and the contacts of human populations with those media.

Prerequisite(s): ETX 112A; ETX 135 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ETX 150 – Evolution in Human-Altered Environments (4 units)

Course Description: Effects of recent human alterations to the natural environment on the evolutionary trajectories of diverse species, including our own.

Prerequisite(s): BIS 002B.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to upper division students.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

ETX 180 – Chemistry & Toxicology of Metals (4 units)

Course Description: Metal contaminants in the environment (air, water, and soil) and their effects on the health of the environment and humans. How the chemistry of metals ultimately controls their environmental fate and toxicity, application of numerical models, and discussion of case studies.

Prerequisite(s): ETX 102A or CHE 008B or CHE 118B or CHE 128B; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

ETX 190 – Seminar (1 unit)

Course Description: Selected topics presented by students, faculty, or outside speakers covering current research and instructional activities within environmental toxicology. Reports and discussion concerning oral and written presentations, literature sources, and career opportunities.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 190C – Research Group Conference (1 unit)

Course Description: Weekly conference of advanced research methods and the interpretation of research results.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 190S – Environmental Toxicology Career Seminar (1 unit)

Course Description: Careers in environmental toxicology; discussions with graduates from the Department of Environmental Toxicology and other experts in the field.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 192 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 194HA – Honors Research (3 units)

Course Description: Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design, learning new techniques, data analysis and interpretation of findings.

Prerequisite(s): Consent of instructor; senior standing; minimum GPA of 3.250.

Learning Activities: Discussion 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

ETX 194HB – Honors Research (3 units)

Course Description: Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design, learning new techniques, data analysis and interpretation of findings.

Prerequisite(s): Consent of instructor; senior standing; minimum GPA of 3.250.

Learning Activities: Discussion 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 194HC – Honors Research (3 units)

Course Description: Continuation of ETX 194HA & ETA 194HB.

Prerequisite(s): Consent of instructor; senior standing, minimum GPA of 3.250.

Learning Activities: Laboratory 9 hour(s), Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 197T – Tutoring in Environmental Toxicology (1-5 units)

Course Description: Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff.

Prerequisite(s): Consent of instructor; advanced standing in Environmental Toxicology, a related major, or the equivalent experience.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

ETX 203 – Environmental Toxicants (4 units)

Course Description: Toxic chemicals: selected topics illustrating their occurrence, structure, and the reactions underlying detection, toxicity, fate, and ecological importance.

Prerequisite(s): CHE 008B or CHE 128C; and consent of instructor, or the equivalent of CHE 128C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

ETX 214 – Mechanisms of Toxic Action (3 units)

Course Description: Chemical, biochemical, and molecular mechanisms underlying the adverse effects of toxic chemicals. Students are required to write a grant proposal and participate in a grant review panel.

Prerequisite(s): BIS 102; BIS 103; and consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ETX 220 – Analysis of Toxicants (3 units)

Course Description: Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques.

Prerequisite(s): Coursework in organic chemistry.

Learning Activities: Lecture 3 hour(s).

Cross Listing: FOR 220.

Grade Mode: Letter.

ETX 220L – Analysis of Toxicants Laboratory (2 units)

Course Description: Laboratory techniques for microanalysis of toxicants. Separation, detection, and quantitative determination of toxicants using chemical and instrumental methods.

Prerequisite(s): ETX 220 (can be concurrent); consent of instructor.

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

ETX 234 – Current Topics in Neurotoxicology (3 units)

Course Description: General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex eurodevelopmental disorders and neurodegenerative diseases.

Prerequisite(s): Core courses in one of the following graduate programs: Pharmacology Toxicology (PTX), Agricultural Environmental Chemistry (AGC), Biochemistry Molecular Biology (BMB), Cell Developmental Biology (CDB), Immunology (IMM), Molecular Cellular Integrative Physiology (MCP) or Neuroscience (NSC).

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to upper level undergraduate students must obtain permission from the course coordinator.

Cross Listing: MCP 234, VMB 234.

Grade Mode: Letter.

ETX 240 – Ecotoxicology (3 units)

Course Description: Principles of toxicology as applied to chemical action on natural populations, communities, and ecosystems. Physical, chemical, and biological characteristics which influence ecotoxic effects, modeling, and field research. Selected case histories are analyzed and presented in class.

Prerequisite(s): Consent of instructor; elementary course in toxicology and ecology or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ETX 250 – Reproductive Toxicology (3 units)

Course Description: Application of toxicological principles in reproductive studies. Effects of toxicants on the male, female, and developing embryo/fetus. Critical evaluation of reproductive toxicity studies and development of mechanistic approaches to understanding how chemical exposure can adversely affect reproduction.

Prerequisite(s): PTX 203.

Learning Activities: Lecture 1.50 hour(s), Lecture/Discussion 1.50 hour(s).

Grade Mode: Letter.

ETX 260 – Immunotoxicology (3 units)

Course Description: Provides students with skills and knowledge for evaluating and applying research on the impact of environmental toxicants on immunological function in human and wildlife populations.

Prerequisite(s): Undergraduate or graduate introduction to immunology coursework recommended but not required; graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ETX 270 – Toxicology of Pesticides (3 units)

Course Description: Classification and chemical properties of pesticides, their mode of action, metabolism and disposition, pesticide resistance, effects on human health and ecological health and methods of risk benefit analyses.

Prerequisite(s): ETX 101; one course each in (a) Organic Chemistry, (b) Biochemistry, (c) Toxicology (ETX 101 or equivalent), or with consent of instructor; graduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

ETX 278 – Molecular Techniques (3 units)

Course Description: Recombinant DNA technology and its applications.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Cross Listing: FOR 278.

Grade Mode: Letter.

ETX 280 – Forensic DNA Analysis (3 units)

Course Description: Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data.

Prerequisite(s): Coursework in genetics and molecular biology.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Graduate standing; consent of instructor required for all students not enrolled in the MS Forensics program.

Cross Listing: FOR 280.

Grade Mode: Letter.

ETX 281 – Principles & Practice of Forensic Serology & DNA Analysis (3 units)

Course Description: Comprehensive overview of forensic serology and DNA typing techniques and technologies. Strong emphasis on real-world applications, including preservation and tracking of biological evidence, detection and identification of bodily fluids, and methods to extract, quantify, and type human DNA.

Prerequisite(s): (FOR 278 or ETX 278) or (FOR 280 or ETX 280); or equivalent; consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director.

Cross Listing: FOR 281.

Grade Mode: Letter.

ETX 284 – Non-Human Forensic DNA; Theory & Casework Application (2 units)

Course Description: Provides a comprehensive understanding of plant and animal forensic biology in terms of sample collection, preservation, analytical methods, and of the invaluable lines of inquiry these forensic evidence may permit.

Prerequisite(s): Consent of instructor required for all students not enrolled in the MS Forensics program; upper division Molecular Biology and Genetics or its equivalent.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to graduate standing.

Cross Listing: FOR 284.

Grade Mode: Letter.

ETX 290 – Seminar (1 unit)

Course Description: Current topics in environmental toxicology.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ETX 290C – Advanced Research Conference (1 unit)

Course Description: Presentation and critical discussion of advanced research methods and interpretation of research results. Designed primarily for graduate students.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ETX 297T – Tutoring in Environmental Toxicology (1-5 units)

Course Description: Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff.

Prerequisite(s): Consent of instructor; graduate standing in Environmental Toxicology, a related major, or the equivalent experience.

Learning Activities: Variable.

Repeat Credit: May be repeated 5 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ETX 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

ETX 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

ETX 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Epidemiology (EPI)

Graduate Studies

EPI 202 – Quantitative Epidemiology I: Probability (5 units)

This version has ended; see updated course, below.

Course Description: Foundations in probability for epidemiologists.

Emphasis on properties of and relationships between distributions and application of probability concepts to epidemiology. Includes a mathematical skills laboratory to assist in solution of epidemiologic problems.

Prerequisite(s): ((MAT 016A, MAT 016B) or (MAT 017A, MAT 017B) or (MAT 021A, MAT 021B)); STA 102; STA 108; or PHR 402 PHR 403 or equivalent of any listed course; concurrent or previous enrollment in a basic epidemiology course; e.g., EPI 205.

Learning Activities: Lecture 4 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

EPI 202 – Quantitative Epidemiology I: Probability (5 units)

Course Description: Foundations in probability for epidemiologists.

Emphasis on properties of and relationships between distributions and application of probability concepts to epidemiology. Includes a mathematical skills laboratory to assist in solution of epidemiologic problems.

Prerequisite(s): ((MAT 016A, MAT 016B) or (MAT 017A, MAT 017B) or (MAT 021A, MAT 021B)); STA 100; STA 108 (can be concurrent); or equivalent of any listed course with consent of instructor; concurrent or previous enrollment in a basic epidemiology course (e.g., EPI 205).

Learning Activities: Lecture 4 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

This course version is effective from, and including: Fall Quarter 2024.

EPI 203 – Quantitative Epidemiology II: Statistical Inference (4 units)

Course Description: Provides the mathematical statistics foundation for statistical models, methods, and data analysis.

Prerequisite(s): STA 108; (EPI 202 or STA 130A or STA 131A); EPI 205.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

EPI 204 – Quantitative Epidemiology III: Statistical Models (4 units)

Course Description: Introduces statistical models, methods, and data analysis in the areas of generalized linear model and survival analysis methodology.

Prerequisite(s): STA 108; (EPI 203 or STA 130B or STA 131B); EPI 205.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

EPI 205 – Principles of Epidemiology (4 units)

Course Description: Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance.

Prerequisite(s): MPM 202; or consent of instructor; an introductory statistics course.

Learning Activities: Lecture 4 hour(s).

Cross Listing: MPM 205.

Grade Mode: Letter.

EPI 205B – Integration of Epidemiologic Concepts (2 units)

Starting Fall Quarter 2024, this course is no longer offered.
Course Description: In-depth analysis and integration of basic epidemiologic concepts and approaches to epidemiologic research presented in MPM 405/EPI 205A, with more mathematical and theoretical basis and examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of diagnostic tests, study design, and surveillance.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

EPI 206 – Epidemiologic Study Design (4 units)

Course Description: Builds on concepts presented in EPI 205. Concepts of epidemiologic study design (clinical trials, observational cohort studies, case control studies) introduced in EPI 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies.

Prerequisite(s): EPI 205; or consent of instructor.

Learning Activities: Lecture 30 hour(s), Discussion 9 hour(s), Laboratory 2 hour(s).

Cross Listing: MPM 206.

Grade Mode: Letter.

EPI 207 – Advanced Epidemiologic Methodology (4 units)

Course Description: In-depth integration of advanced epidemiological concepts. Theory, methods, and applications for observational studies including random and systematic error, confounding, counterfactuals, causal inference, effect modification, internal and external validity, estimability, and interpretation of effect measures, and advanced study designs.

Prerequisite(s): EPI 206.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: SPH 207.

Grade Mode: Letter.

EPI 208 – Analysis & Interpretation of Epidemiologic Data (3 units)

Course Description: Application of theory and concepts of statistics and epidemiology to analysis and interpretation of data typically found in veterinary and human epidemiologic research.

Prerequisite(s): EPI 204 (can be concurrent); EPI 207; (STA 144 or PHR 202); and entry level skill in standard statistical software (eg. SPSS, BMDP, SAS, Stata, MinTab, S-Plus).

Learning Activities: Lecture 16 hour(s), Laboratory 21 hour(s), Project.

Grade Mode: Letter.

EPI 209 – History of Epidemiology in Public Health (2 units)

Course Description: Introduction to the history of epidemiology in solving major public health problems. Original historical articles will be read/discussed. Topics may include: infectious disease, accidents/adverse events, nutritional deficiencies, community vaccination trials, occupational exposures, cancer, birth defects, cardiovascular disease, and smoking.

Learning Activities: Lecture 0.50 hour(s), Discussion 1.50 hour(s).

Cross Listing: SPH 209.

Grade Mode: Letter.

EPI 220 – Problems in Epidemiologic Study Design (4 units)

Course Description: Design and development of research protocols and funding applications for peer review. Application of research methods data collection and management and statistical analysis in research proposals. Methods of evaluating research proposals, mechanisms of funding, specifying human subjects considerations.

Prerequisite(s): MPM 405; STA 102; STA 106; or the equivalent; MPM 406 or the equivalent; PHR 207 required concurrently.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

EPI 223 – Spatial Epidemiology (3 units)

Course Description: Geographic Information Systems (GIS) and spatial statistics. Students are expected to complete a term project based on their graduate research.

Prerequisite(s): EPI 205 or MPM 205.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

EPI 224 – Health & Ecological Risk Analysis (4 units)

Course Description: Methodological approach to risk analysis for human and animal-related health and ecological issues. Basic principles of risk analysis, including perception, communication, assessment and management. Emphasis on the assessment of risk.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

EPI 225 – Advanced Topics in Epidemiology Methods (2 units)

Course Description: In-depth study of topics in epidemiology theory and methods, selected from: causal inference, confounding, study design, or other related areas, with year to year variation. Readings are assigned and students are expected to lead discussions on the readings.

Prerequisite(s): EPI 205; EPI 206; EPI 207; or equivalents, with consent of instructor.

Learning Activities: Discussion 2 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EPI 226 – Methods for Longitudinal & Repeated Measurement Data (3 units)

Course Description: Mixed models for longitudinal data (LD)/repeated measurements; Mean and covariance models; General linear LD models; Random coefficients models; Linear mixed effects models for continuous outcome; Generalized linear mixed effects model for discrete outcome including binary, ordinal and count data.

Prerequisite(s): EPI 204; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EPI 227 – Meta Analysis (4 units)

Course Description: Systematic review, standard and advanced statistical methods for meta-analysis and syntheses of knowledge and evidence. Quantitative analysis of published data, primarily in aggregate form. Students demonstrate skills in study design, protocol, analysis, and results reporting through presentation of drafted first author paper.

Prerequisite(s): A course in basic statistics or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

EPI 229 – Geographic Information Systems for Health Professionals (4 units)

Course Description: Emphasis on basic geographic and data management principles. Focus on software proficiency in application to analyzing/solving health-related problems. For graduate and professional students in epidemiology, public health, preventive veterinary medicine, health informatics with interest in spatial techniques in research.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

EPI 230 – Introduction to Molecular Epidemiology (3 units)

Course Description: Overview of the modern field of molecular epidemiology. Integrates molecular biology into traditional epidemiologic research by identifying pathways, molecules and genes that influence the risk of developing disease.

Prerequisite(s): EPI 205.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

EPI 231 – Infectious Disease Epidemiology (3 units)

Course Description: Infectious disease epidemiology and prevention, with emphasis on human and veterinary diseases of global health importance. Major global health epidemics and challenges of infectious diseases, by mode of transmission.

Prerequisite(s): Introductory epidemiology course; e.g., EPI 205.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EPI 232 – Advanced Data Analysis with SAS (3 units)

Course Description: Provide an overview of common advanced statistical methods as well as a treatment of how to use SAS to implement them. Learn the ideas of reproducible research and reporting of statistical analyses.

Prerequisite(s): EPI 202; EPI 203; EPI 204; or the equivalent, or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EPI 240 – Principles of Injury Epidemiology (3 units)

Course Description: Overview of the epidemiology of human injury, including general principles, surveillance methods, behavioral factors, environmental factors, treatment issues and engineering and legal interventions related to vehicular injuries, drownings, falls, fires and burns, poisonings, firearm injuries, and other intentional injuries.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

EPI 242 – Critical Thinking in Epidemiology (3 units)

Course Description: Critical thinking in Epidemiology.

Prerequisite(s): EPI 205 B or better; EPI 206 B or better; EPI 207 (can be concurrent).

Learning Activities: Discussion 3 hour(s).

Enrollment Restriction(s): Open to Epidemiology Graduate Group students or advanced medical students only; limited to 15 students.

Grade Mode: Letter.

EPI 251 – Environmental Epidemiology (3 units)

Course Description: Examination of the human health effects and the risk of disease from community, occupational, and personal exposure to toxic substances.

Prerequisite(s): MPM 405 (can be concurrent); upper division undergraduates who have completed EST 126; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EPI 252 – Social Epidemiology (2 units)

Course Description: Social determinants of health; psychosocial and physiological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social gradient in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants.

Prerequisite(s): EPI 205A; and consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: SPH 252.

Grade Mode: Letter.

EPI 260 – Epidemiology of Chronic Diseases & Aging (3 units)

Course Description: Overview of the epidemiology of chronic disease in old age. Topics include biology of aging, epidemiology of cardiovascular disease, neoplasms, osteoporosis and fractures, psychosocial factors and health in old age, dementias, functional status and prevention of disease.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

EPI 270 – Research Methods in Occupational Epidemiology (3 units)

Course Description: Methods used in epidemiologic research on occupational hazards. Topics include design and analysis of cohort and case-control studies, sample size, measuring dose, choosing a control group, validation of employment and health data, interpreting negative studies, and analysis software.

Prerequisite(s): (EPI 205 or MPM 205); (MPM 202 or STA 100).

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

EPI 272 – Cancer Epidemiology (2 units)

Course Description: Covers the underlying concepts essential to understanding cancer epidemiology, such as trends in incidence and survival, epidemiologic methods used to assess cancer etiology, prevention and control, and an introduction to the cancer initiation and progression multi-stage model.

Prerequisite(s): EPI 205; EPI 206 (can be concurrent); STA 100; must have basic understanding of epidemiologic and statistical concepts covered in the listed courses.

Learning Activities: Recitation 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EPI 277 – Mathematical Models in Epidemiology (3 units)

Course Description: Theory of epidemics and mathematical modeling concepts for infectious diseases to include discrete and continuous time models, their use to explore disease dynamics and investigate prevention and control strategies for human and veterinary infectious diseases.
Prerequisite(s): MPM 403; MPM 405; consent of instructor; although not required, students encouraged to refresh their knowledge of high school calculus and differential equations.

Learning Activities: Lecture/Discussion 2 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Limited to 30 students.

Cross Listing: PHR 277.

Grade Mode: Letter.

EPI 280 – Introduction to SAS Programming (3 units)

Course Description: Introduction to SAS, an integrated software system for data retrieval and management, data manipulation and programming.

Prerequisite(s): Introductory statistics course; e.g., MPM 402, STA 102.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: SPH 280.

Grade Mode: Letter.

EPI 290 – Seminars in Epidemiology (0.5 units)

Course Description: Faculty and students will present and lead discussion of ongoing or published epidemiologic research.

Learning Activities: Seminar 0.50 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

EPI 291 – Seminars in Human Health Services Research & Clinical Epidemiology (1 unit)
