Course Description: Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Cross Listing: GMD 291.

Grade Mode: Satisfactory/Unsatisfactory only.

EPI 298 – Group Study (1-5 units)

Course Description: Group study in selected areas of epidemiology.

Learning Activities: Seminar 1-5 hour(s).

Grade Mode: Letter.

EPI 299 – Research (1-12 units)

Course Description: Research in selected areas of epidemiology.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Evolution & Ecology (EVE)

College of Biological Sciences

EVE 002 – Biodiversity (3 units)

Course Description: Introduction to nature, scope and geographical distribution of biodiversity (the diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity; domestication, aesthetics, ethics and valuation. Species richness and "success." Biodiversity through time; monitoring, evaluation and conservation. Biomes - global, continental and Californian.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 1 hour(s).

Cross Listing: ENT 002.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

EVE 010 – Evolution for Non-Biologists (3 units)

Course Description: Introduction to evolutionary biology for the general population.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

EVE 011 – Principles of Ecology (4 units)

Course Description: Ecological principles with emphasis on humans and their interactions with the environment; how humans affect and depend on natural ecosystems; the future of the Earth's biosphere.

Prerequisite(s): Elementary biology recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL); Writing Experience (WE).

EVE 012 – Life in the Sea (3 units)

Course Description: Diversity of life in the sea; adaptations to physical/chemical ocean environment; marine science research methods; utilization of living marine resources by humans; factors and processes that influence diversity of sea life, including humans.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

EVE 013 – Sex in the Natural World (3 units)

Course Description: Explores the diversity, mechanisms and evolution of sexual behaviors across the kingdoms of life.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

EVE 016 – Wild Davis: A California Naturalist Certification Course (4 units)

Course Description: Natural history and urban ecology of Davis. Basics of ecological observation, community science and service, and California's unique natural communities. If fee is paid, completion of the course provides certification in the UC California Naturalist Program.

Learning Activities: Lecture 3 hour(s), Fieldwork.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

EVE 017 – Dining with Darwin: Evolutionary Insights Into Your Diet (3 units)

Course Description: Crave salty, fatty, sugary foods? Want to know why? Evolution of cravings, metabolism and dentition, and of cooking our food. Relate Paleo, South Beach, and vegan diets to ancestral and global diets and current metabolism. For majors and nonmajors.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); World Cultures (WC).

EVE 020 – Darwinian Medicine (3 units)

Course Description: Introduction for non-biologists to the evolved traits of humans and pathogens that influence human biological variation, health, and disease.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

EVE 092 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the Department of Evolution & Ecology. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EVE 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EVE 099 – Special Study for Lower Division Students (1-5 units)

Course Description: Special study for lower division students.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EVE 100 – Introduction to Evolution (4 units)

Course Description: General survey of the origins of biological diversity and evolutionary mechanisms.

Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (MAT 016A or MAT 017A or MAT 019A or MAT 021A); (MAT 016B or MAT 017B or MAT 019B or MAT 021B); STA 100 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

EVE 101 – Introduction to Ecology (4 units)

Course Description: General survey of the principles of ecology.

Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (MAT 016A or MAT 017A or MAT 019A or MAT 021A); (MAT 016B or MAT 017B or MAT 019B or MAT 021B); or the equivalent.

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

EVE 101Q – Introduction to Computer Models in Ecology (1 unit)

Course Description: Computational methods and mathematical models used to study ecological phenomena.

Prerequisite(s): EVE 101 (can be concurrent); EVE 101 required concurrently.

Learning Activities: Auto Tutorial 1.50 hour(s), Extensive Problem Solving 1.50 hour(s).

Grade Mode: Letter.

EVE 102 – Population & Quantitative Genetics (4 units)

Course Description: Evolution as caused by random mating, genetic drift, natural selection, inbreeding, migration, and mutation in theory and actuality. The resemblance between relatives and consequences of selection for quantitative traits. Application of these ideas to topics such as the evolution of sex.

Prerequisite(s): BIS 101; (STA 100 or STA 102); EVE 100.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EVE 103 – Phylogeny, Speciation & Macroevolution (4 units)

Course Description: Statistical inference of evolutionary patterns and processes above the species level. Topics include estimation of phylogenies and divergence times, character evolution, biogeographic history, and rates and patterns of lineage diversification, with an emphasis on the origin of species.

Prerequisite(s): EVE 100.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

EVE 104 – Community Ecology (4 units)

Course Description: Population growth and density dependence; predation; exploitative, interference and apparent competition; mutualism and facilitation; coexistence mechanisms; niches, spatial and temporal variation etc. Emphasis on quantitative understanding through models, concepts, and empirical evidence.

Prerequisite(s): EVE 101 or ESP 100.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ESP 104.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

EVE 105 – Phylogenetic Analysis of Vertebrate Structure (4 units)

Course Description: The structure of the classes and subclasses of vertebrates is described and interpreted in terms of phylogeny.

Prerequisite(s): (BIS 001A, BIS 001B) or (BIS 002B, BIS 002C).

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EVE 106 – Mechanical Design in Organisms (3 units)

Course Description: Explores fundamental principles in the form and function of organisms, examining how basic properties of size, shape, structure, and habitat constrain ways in which plants and animals interact and cope with their physical surroundings.

Prerequisite(s): Upper division standing or consent of instructor; introductory animal biology (BIS 001B or BIS 002B), invertebrate zoology (EVE 112), and/or ecology (EVE 101) are recommended; residence at or near Bodega Marine Lab required.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s), Fieldwork 3 hour(s).

Enrollment Restriction(s): Enrollment restricted to application at <http://www.bml.ucdavis.edu>.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

EVE 107 – Animal Communication (4 units)

Course Description: How animals use songs, dances, colors, chemicals, electricity and vibrations to communicate. Mechanisms of signal production and detection (sensory systems), theory of information transfer and signal design, and the role of natural selection in shaping communication.

Prerequisite(s): BIS 002B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

EVE 109 – Molecular Ecology (4 units)

Course Description: Use of molecular tools to answer fundamental questions in ecology and evolution of natural populations. Use of DNA and protein sequences to measure diversity and natural selection within and between populations and species and application to the fields of ecology and conservation. Hands-on manipulation and analysis of data in R.

Prerequisite(s): BIS 002B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EVE 110 – Running, Swimming & Flying (3 units)

Course Description: Examines the bases of organism movement in terrestrial, aquatic, and aerial environments, emphasizing both the unifying principles underlying locomotion, as well as a range of strategies employed across diverse groups of organisms.

Prerequisite(s): Upper division standing or consent of instructor; introductory animal biology (BIS 001B or BIS 002B), invertebrate zoology (EVE 112), and/or ecology (EVE 101) are recommended; residence at or near Bodega Marine Lab required.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s), Fieldwork 3 hour(s).

Enrollment Restriction(s): Enrollment restricted to application at <http://www.bml.ucdavis.edu>.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

EVE 111 – Marine Environmental Issues (1 unit)

Course Description: Examination of critical environmental issues occurring in coastal waters including the effects of climate change, overfishing, and other human impacts. Through readings and group discussions, students will develop an integrative understanding of the oceanographic and ecological processes.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Cross Listing: ESP 111.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

EVE 112 – Biology of Invertebrates (3 units)

Course Description: Survey of the invertebrate phyla, emphasizing aquatic forms, and focusing on morphology, development, natural history, ecology, and phylogenetic relationships.

Prerequisite(s): BIS 001B or (BIS 002B, BIS 002C); courses in systematics, ecology, and evolution recommended.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

EVE 112L – Biology of Invertebrates Laboratory (2 units)

Course Description: Field and laboratory experience with representative members of the major invertebrate phyla discussed in EVE 112. Emphasis on comparative morphology, natural history, ecology, and behavior of living invertebrates. Two field trips required.

Prerequisite(s): (BIS 001B or (BIS 002B, BIS 002C)), EVE 112 (can be concurrent); EVE 112 required concurrently.

Learning Activities: Laboratory 6 hour(s).

Enrollment Restriction(s): Enrollment limited to 50 students.

Grade Mode: Letter.

EVE 114 – Experimental Invertebrate Biology (3 units)

Course Description: Biology, ecology, and evolution of local marine invertebrates with a focus on adaptations to environmental and biological factors encountered on the California coast. Hands-on field and laboratory learning with an emphasis on generating and testing hypotheses.

Prerequisite(s): Upper division standing or consent of instructor; introductory cell, animal and plant biology (BIS 001A and BIS 001B and BIS 001C, or BIS 002B), invertebrate zoology (EVE 112), ecology (EVE 101), and/or evolution (EVE 100) are recommended; residence at or near Bodega Marine Lab required.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s), Fieldwork 3 hour(s).

Enrollment Restriction(s): Enrollment restricted to application at <http://www.bml.ucdavis.edu>.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

EVE 115 – Marine Ecology (4 units)

Course Description: Processes affecting the distribution, abundance, and diversity of plant and animal life in the sea. Introduction to marine habitat diversity and human impacts on marine ecosystems.

Prerequisite(s): EVE 101 or ESP 100 or BIS 002B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EVE 117 – Plant Ecology (4 units)

Course Description: The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required.

Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); PLB 111 recommended.

Learning Activities: Lecture 3 hour(s), Fieldwork 3 hour(s).

Cross Listing: PLB 117.

Grade Mode: Letter.

EVE 119 – Population Biology of Invasive Plants & Weeds (3 units)

Course Description: Origin and evolution of invasive plant species and weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions between invasive species, native species, and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species.

Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); introductory statistics recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Cross Listing: PLB 119.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EVE 120 – Global Change Ecology (3 units)

Course Description: Treatment of historical evolution of the biosphere resulting from physical, chemical, and biological influences. Special focus upon changes caused by humans. Topics pertain to biodiversity, resources, conservation, and ecosystem services.

Prerequisite(s): EVE 100; EVE 101; or equivalents.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

EVE 127 – Systematics of Vascular Plants (5 units)

Course Description: Diversity, phylogeny, and taxonomy of lycophytes, ferns, and seed plants (gymnosperms and angiosperms), emphasizing relationships and distinguishing characteristics of families and genera represented in the California flora. Principles and methods of phylogeny reconstruction, classification, and plant nomenclature. Practice identifying plants to species using taxonomic keys.

Prerequisite(s): BIS 002C or PLS 002; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 6 hour(s).

Credit Limitation(s): No credit if student has taken PLB/PLS 102 or EVE/PLB 108.

Cross Listing: PLB 127, PLS 127.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

EVE 131 – Human Genetic Variation & Evolution (3 units)

Course Description: Introduction to genome-wide nucleotide sequence variation in human populations and computational methods for its analysis. Topics to include forensics, disease gene mapping, and studies of human evolutionary history. Misuses, such as eugenics, and ethical/legal issues will be discussed.

Prerequisite(s): BIS 001B or BIS 002B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EVE 138 – Ecology of Tropical Latitudes (5 units)

Course Description: Biological, physical, and human-related aspects of the ecology of low latitudes. Distribution, numbers, and relationships of tropical organisms. Problems of development and conservation in the context of ecological and evolutionary theory.

Prerequisite(s): Consent of instructor. One course in Biological Sciences (BIS), Entomology (ENT), Wildlife, Fish, Conservation Biology (WFC), Geography (GEO), or tropical experience.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

EVE 140 – Paleobotany (4 units)

Course Description: Introduction to plant fossil record, beginning with invasion of land in the Silurian, emphasizing origin and evolution of major groups and adaptations and changing composition and distribution of floras in relation to plate tectonics and climatic change.

Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

EVE 141 – Principles of Systematics (3 units)

Course Description: Historical background, philosophical rationale, contemporary approaches, and working rules of biosystematics, including International Code of Zoological Nomenclature.

Prerequisite(s): BIS 001B or BIS 001C or BIS 002B; EVE 100 recommended.

Learning Activities: Lecture 2 hour(s), Independent Study.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EVE 147 – Biogeography (4 units)

Course Description: Movements of terrestrial organisms. The role of geologic, climatic, and biologic changes in the geographic distribution of organisms.

Prerequisite(s): BIS 002B or (BIS 001A, BIS 001B).

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EVE 149 – Evolution of Ecological Systems (4 units)

Course Description: Evolution as an organizing force in natural communities. Coadaptation in trophic and competitive relationships. Ecology of polymorphisms, clines, and speciation.

Prerequisite(s): (EVE 101 or ESP 100); EVE 100; or equivalent courses.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

EVE 150 – Evolution of Animal Development (3 units)

Course Description: Comparative analysis of animal development and the genetic basis of morphological diversification.

Prerequisite(s): BIS 101; EVE 100; EVE 100 (may be waived for graduate students with consent of instructor).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

EVE 161 – Microbial Phylogenomics; Genomic Perspectives on the Diversity & Diversification of Microbes (3 units)

Course Description: Use of DNA and genomic sequencing in studies of the diversity of microorganisms. Diversity of microbes, phylogenetics, genome sequencing, comparative genomics, phylogenomics, lateral gene transfer, molecular ecology, metagenomics, and studies of the human microbiome.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EVE 175 – Computational Genetics (3 units)

Course Description: The use of computers to solve problems in genetics and evolution. Introduction to a general purpose computer language (Python), computational statistical methods, and applications such as QTL mapping, linkage detection, estimation of rates of evolution, and gene finding.

Prerequisite(s): BIS 101; (STA 100 or STA 102).

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EVE 180A – Experimental Ecology & Evolution in the Field (4 units)

Course Description: Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments.

Prerequisite(s): EVE 100 (can be concurrent); (EVE 101 (can be concurrent) or ESP 100 (can be concurrent) or ENT 105 (can be concurrent)); consent of instructor.

Learning Activities: Lecture/Lab 3 hour(s), Project 3 hour(s); Fieldwork.

Cross Listing: ENT 180A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

EVE 180B – Experimental Ecology & Evolution in the Field (4 units)

Course Description: Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments.

Prerequisite(s): EVE 180A or ENT 180A.

Learning Activities: Lecture/Lab 3 hour(s), Project 3 hour(s); Fieldwork.

Cross Listing: ENT 180B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

EVE 181 – Ecology & Evolution of Animal-Plant Interactions (4 units)

Course Description: Animal adaptations for eating plants, pollinating flowers, dispersing seeds. Plant adaptations to herbivore defense, attraction of mutualists; role of coevolutionary arms race, mutualists and cheaters in plant/animal speciation. Exploration through lectures, original scientific literature, discussions and term paper.

Prerequisite(s): BIS 002B; BIS 002C (can be concurrent).

Learning Activities: Lecture 1.50 hour(s), Lecture/Discussion 1.50 hour(s), Term Paper, Extensive Writing/Discussion.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Writing Experience (WE).

EVE 189 – Introduction to Biological Research (1 unit)

Course Description: Introduction to research methods in biology. Presentation and discussion of research by faculty, graduate, and undergraduate students.
Prerequisite(s): Consent of instructor; upper division standing in Evolution Ecology or related biological science.
Learning Activities: Discussion 1 hour(s).
Repeat Credit: May be repeated 6 unit(s).
Grade Mode: Pass/No Pass only.
General Education: Science & Engineering (SE).

EVE 190 – Undergraduate Seminar (2 units)

Course Description: Student reports on current topics with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included.
Prerequisite(s): Upper division standing in the biological sciences or a related discipline.
Learning Activities: Seminar 2 hour(s).
Repeat Credit: May be repeated.
Grade Mode: Pass/No Pass only.
General Education: Science & Engineering (SE).

EVE 192 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the Department of Evolution & Ecology. Internships supervised by a member of the faculty.
Prerequisite(s): Consent of instructor; completion of 84 units.
Learning Activities: Internship 3-36 hour(s).
Repeat Credit: May be repeated.
Grade Mode: Pass/No Pass only.

EVE 194HA – Research Honors (2 units)

Course Description: Students pursue intensive research under the guidance of a faculty advisor. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis.
Prerequisite(s): Students who have completed 135 units and qualify for the Honors Program (as defined by the current catalog).
Learning Activities: Laboratory 6 hour(s).
Grade Mode: Letter.
General Education: Science & Engineering (SE); Writing Experience (WE).

EVE 194HB – Research Honors (2 units)

Course Description: Students pursue intensive research under the guidance of a faculty advisor. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis.
Prerequisite(s): Students who have completed 135 units and qualify for the Honors Program (as defined by the current catalog).
Learning Activities: Laboratory 6 hour(s).
Grade Mode: Letter.
General Education: Science & Engineering (SE); Writing Experience (WE).

EVE 194HC – Research Honors (2 units)

Course Description: Students pursue intensive research under the guidance of a faculty advisor. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis.
Prerequisite(s): Students who have completed 135 units and qualify for the Honors Program (as defined by the current catalog).
Learning Activities: Laboratory 6 hour(s).
Grade Mode: Letter.
General Education: Science & Engineering (SE); Writing Experience (WE).

EVE 197T – Tutoring in Biological Sciences 2B (1-2 units)

Course Description: Assisting the instructor by tutoring students in a Biological Sciences 2B laboratory. Tutoring is voluntary and is supervised by a Laboratory Teaching Assistant and the Laboratory Coordinator.
Prerequisite(s): BIS 001B B or better.
Learning Activities: Tutorial 3 hour(s).
Repeat Credit: May be repeated 3 time(s).
Grade Mode: Pass/No Pass only.
General Education: Science & Engineering (SE).

EVE 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.
Learning Activities: Variable.
Grade Mode: Pass/No Pass only.

EVE 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.
Prerequisite(s): Consent of instructor.
Learning Activities: Variable.
Grade Mode: Pass/No Pass only.
General Education: Science & Engineering (SE).

EVE 210 – Molecular Phylogenetic Analysis (3 units)

Course Description: Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses.
Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Cross Listing: NEM 210.
Grade Mode: Letter.

EVE 211 – Applied Phylogenetics (3 units)

Course Description: Applications of phylogenetic methods to fields outside of systematics. Core lectures/labs in remedial phylogenetics, phylogeography, conservation and comparative morphology. Special topics vary yearly.
Prerequisite(s): EVE 103 or EVE 210 or PBG 200C; or equivalent, graduate standing.
Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).
Repeat Credit: May be repeated 1 time(s).
Grade Mode: Letter.

EVE 220 – Species & Speciation (3 units)

Course Description: Current status of species concepts, models of speciation, current research on speciation, and relevance of species to conservation biology.
Prerequisite(s): EVE 100 or PHI 108; or the equivalent; HPS 130B recommended.
Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.

EVE 225 – Linear Mixed Modeling in Ecology & Evolution (4 units)

Course Description: Analysis of clustered data requires hierarchical or mixed statistical models. Conceptual basis and practical application of linear (mixed) models. Examples drawn from evolutionary and behavioral ecology. Hands-on manipulation and analysis of data in R.

Prerequisite(s): PLS 205 or equivalent coursework or experience with basic linear modelling is strongly recommended.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

EVE 231 – Principles of Biological Data Analysis (3 units)

Course Description: Introduction to the principles of data analysis, experimental design, statistical modeling, inference, and hypothesis tests. Statistical methods of particular importance in biological applications will be emphasized. Examples will be presented from the fields of ecology and evolutionary genetics.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

EVE 240 – Paleobotany & Angiosperm Evolution (4 units)

Course Description: Critical analysis of the plant fossil record as a source of evidence on origin, evolution, and phylogeny of the angio-sperms, Cretaceous and Tertiary climates, geographic history of modern taxa, and origin of modern vegetation types.

Prerequisite(s): PLB 108 or PLB 116 or EVE 140.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

EVE 290C – Research Conference (1 unit)

Course Description: Presentation and discussion of faculty and graduate student research in biology.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EVE 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

EVE 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

EVE 390 – Methods of Teaching (2 units)

Course Description: Practical experience in the methods and problems of teaching. Includes analyses of texts and supporting material, discussion of teaching techniques and preparing and conducting of laboratory and discussion sections.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Exercise Biology (EXB)

College of Biological Sciences

EXB 090C – Research Conference (1 unit)

Course Description: Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students.

Prerequisite(s): EXB 099 (can be concurrent); Lower division standing in Exercise Biology or related biological science and consent of instructor; EXB 099 required concurrently.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EXB 090X – Lower Division Seminar (1-2 units)

Course Description: Gives freshman or sophomore level students the opportunity to study a special topic in the general area of Exercise Biology in a small class setting.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Lecture 1-2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 092 – Exercise Biology Internship (1-5 units)

Course Description: Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision.

Prerequisite(s): Consent of instructor; enrollment dependent on availability of intern positions.

Learning Activities: Internship 3-15 hour(s).

Credit Limitation(s): No internship units will be counted towards the Exercise Biology major.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Pass/No Pass only.

EXB 097T – Tutoring in Exercise Biology (1-5 units)

Course Description: Assisting the professor by tutoring students in exercise biology course-related projects.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Tutorial 3-15 hour(s).

Credit Limitation(s): No tutorial units will be counted towards the Exercise Biology major.

Repeat Credit: May be repeated 10 unit(s) including EXB 097TC, EXB 197T, EXB 197TC.

Grade Mode: Pass/No Pass only.

EXB 097TC – Tutoring Exercise Biology in the Community (1-5 units)

Course Description: Tutoring in the community in exercise biology related projects under the guidance of the faculty.

Prerequisite(s): Consent of instructor and chairperson.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Pass/No Pass only.

EXB 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor and chairperson.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EXB 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EXB 101 – Exercise Physiology (4 units)

Course Description: Physiology of Exercise; acute responses and adaptations to training. Neuromuscular function; bioenergetics; metabolic responses to acute exercise; adaptation to trainings; cardiorespiratory; and, applications to environmental physiology, and human health.

Prerequisite(s): NPB 101 or NPB 110C; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 102 – Introduction to Motor Learning & the Psychology of Sport & Exercise (4 units)

Course Description: Theoretical and practical issues in motor learning, sport psychology, and exercise psychology are examined. Emphasis is placed on how motor skills are acquired and retained, and on the application of social psychology and human motivation studies to human performance.

Prerequisite(s): PSC 001 recommended.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Only 2 units of credit allowed for students who have completed EXB 104; only 2 units of credit allowed for students who have completed EXB 105; not open for credit to students who have completed EXS 104 and EXS 105.

Grade Mode: Letter.

General Education: Social Sciences (SS).

EXB 106 – Human Gross Anatomy (4 units)

Course Description: Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions.

Prerequisite(s): BIS 002A; concurrent enrollment in EXB 106L or CHA 101L strongly recommended.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major.

Cross Listing: CHA 101.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 106L – Human Gross Anatomy Laboratory (3 units)

Course Description: Detailed study of prospected human cadavers in small group format with extensive hands-on experience.

Prerequisite(s): BIS 002A; EXB 106 (can be concurrent) or CHA 101 (can be concurrent); must have completed EXB 106 or CHA 101 or required concurrently.

Learning Activities: Laboratory 9 hour(s).

Enrollment Restriction(s): Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab.

Cross Listing: CHA 101L.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 110 – Exercise Metabolism (3 units)

Course Description: Exercise metabolism, with emphasis on skeletal muscle and cardiac muscle metabolism during activity and inactivity. Basics of bioenergetics, substrate utilization, and cell signaling; mechanisms that regulate these properties, and differences between skeletal muscle and cardiac muscle metabolism.

Prerequisite(s): EXB 101 or NPB 101 or NPB 110C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 112 – Clinical Exercise Physiology (4 units)

Course Description: Physical activity as a therapeutic modality in normal and diseased populations (cardiovascular, pulmonary, diabetic). Effects of exercise and inactivity in terms of normal physiology, pathophysiology, and therapeutic benefit. Exercise fitness and disease assessment methods.

Prerequisite(s): NPB 101 or NPB 110C; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 115 – Biomechanical Bases of Movement (3 units)

Course Description: Biomechanical bases of human movement investigated; topics include musculo-skeletal mechanics, tissue mechanics, electromyography, and measurement and analysis techniques. Application made to sport, clinical, and work environments, including extensive analysis of locomotion.

Prerequisite(s): EXB 103; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 116 – Nutrition for Physically Active Persons (3 units)

Course Description: The role of nutrition and exercise in modifying metabolism, body composition, performance and health of humans.

Prerequisite(s): EXB 101; NPB 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 117 – Exercise & Aging in Health & Disease (3 units)

Course Description: Etiology of and standard therapy for various diseases associated with inactivity and aging; e.g., cardiovascular, pulmonary, diabetes, obesity, lipemias, etc. Exercise will then be considered as a protective and/or therapeutic modality.

Prerequisite(s): NPB 101 or NPB 110C; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 121 – Advanced Sport Psychology (3 units)

Course Description: Advanced study and consideration of major theoretical and practical issues in sport psychology. Emphasis on practical application to sport and human performance.

Prerequisite(s): EXB 102; PSC 001 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EXB 122 – Psychological Effects of Physical Activity (3 units)

Course Description: Physical activity is evaluated in terms of its ability to enhance the quality of life. Topics studied include: individual factors (self concept, type A); special populations (elderly, cardiovascular); and mental health changes (depression, anxiety).

Prerequisite(s): PSC 001 or PSC 001Y.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Upper division standing.

Grade Mode: Letter.

EXB 124 – Physiology of Maximal Human Performance (4 units)

Course Description: Molecular mechanisms underlying adaptation to training. Learn how to exercise to maximize their own performance as well as learning how the frequency, intensity and timing of exercise and nutrition affect the molecular signals that underlie performance.

Prerequisite(s): EXB 101; or consent of instructor; BIS 101, BIS 102, and BIS 103 recommended.

Learning Activities: Lecture 3 hour(s), Practice 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 125 – Neuromuscular & Behavioral Aspects of Motor Control (3 units)

Course Description: Factors which affect control of movement from neuropsychological, physiological, behavioral, and mechanical viewpoints. Topics include central vs. peripheral control mechanisms, open and closed loop theories, motor programming, cognitive learning strategies, and the effects of biochemical and biomechanical influences.

Prerequisite(s): EXB 101.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 148 – Theory & Practice of Exercise Testing (1 unit)

Course Description: Theory and practice of exercise testing applied to older adult populations. Physiological responses to and limitations of exercise testing. Application of exercise testing and training to healthy and diseased populations.

Prerequisite(s): EXB 112 (can be concurrent).

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EXB 179 – Frontiers in Exercise Biology (3 units)

Course Description: Lectures by leading authorities and discussion of the latest research in newly emerging areas in exercise biology. Offered every fourth year.

Prerequisite(s): EXB 101; EXB 102; EXB 103 (can be concurrent); EXB 104L recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EXB 189 – International Perspectives in Exercise Biology (4 units)

Course Description: Compare and contrast exercise science issues between the US and an international location. Identify political, economic, cultural, technological and environmental issues that impact human exercise, physical activity, wellness, and sport from a global perspective.

Prerequisite(s): EXB 010; or upper division standing in Exercise Biology; consent of instructor. students will be accepted based upon academic merit, personal experience, and academic discipline in order to provide multidisciplinary perspectives.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to 22 students.

Grade Mode: Letter.

EXB 190C – Research Conference (1 unit)

Course Description: Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students.

Prerequisite(s): EXB 099 (can be concurrent); upper division standing in Exercise Biology or related biological science and consent of instructor; EXB 199 required concurrently.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to upper division students.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EXB 192 – Exercise Biology Internship (1-12 units)

Course Description: Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under program faculty supervision. Written report required.

Prerequisite(s): Consent of instructor; enrollment dependent on availability of intern positions.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 15 unit(s) including EXB 092.

Grade Mode: Pass/No Pass only.

EXB 194H – Research Honors (2 units)

Course Description: Completion of individual honors research project in Exercise Biology, under the guidance of an Exercise Biology faculty advisor, culminating in written honors thesis.

Prerequisite(s): Senior standing; minimum of 6 units of EXB 199; 3.500 GPA or greater in major courses; consent of honors thesis advisor.

Learning Activities: Independent Study 6 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EXB 197T – Tutoring in Exercise Biology (1-5 units)

Course Description: Assisting the instructor by tutoring students in exercise biology course-related projects.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Tutorial 3-15 hour(s).

Credit Limitation(s): No tutorial units will be counted towards the Exercise Biology major.

Repeat Credit: May be repeated 10 unit(s) including EXB 097T, EXB 097TC, EXB 197TC.

Grade Mode: Pass/No Pass only.

EXB 197TC – Tutoring Exercise Biology in the Community (1-5 units)

Course Description: Tutoring in the community in exercise biology related projects under the guidance of the faculty.

Prerequisite(s): Consent of instructor and chairperson.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated 10 unit(s) including EXB 097T, EXB 097TC, EXB 197T.

Grade Mode: Pass/No Pass only.

EXB 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor and chairperson.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

EXB 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of chairperson.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

Exercise Science (EXS)

College of Letters & Science

EXS 201 – Exercise Cardiorespiratory Physiology (3 units)

Course Description: Advanced course on integrated responses of the cardiovascular and respiratory systems to exercise. Includes hemodynamic, neurohormonal, and autonomic aspects of cardiac and vascular function, principles of myocardial metabolism, and mechanisms underlying changes in pulmonary function and gas transport.

Prerequisite(s): Undergraduate course in systemic physiology, exercise physiology, and biochemistry (intermediary metabolism).

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

Family Practice (FAP)

School of Medicine

FAP 092C – Primary Care Clinic (2 units)

Course Description: Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience exposes lower division students to health care delivery, patient histories, physical examinations, health promotion, disease prevention, diagnosis; treatment of episodic, acute, chronic illness; appropriate referral and follow-up.

Prerequisite(s): Consent of instructor; enrollment at the UC Davis campus, for freshman and sophomore students.

Learning Activities: Clinical Activity 8 hour(s), Seminar 2 hour(s), Lecture 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

FAP 192C – Primary Care Clinics (1-2 units)

Course Description: Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience introduces students to health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness, basic laboratory testing and appropriate referral and follow-up.

Prerequisite(s): Consent of instructor; enrollment at the UC Davis campus; upper division standing.

Learning Activities: Clinical Activity 6-8 hour(s), Seminar 2 hour(s), Lecture 1-2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

FAP 195 – Health Care to Underserved Populations (1 unit)

Course Description: Discusses sociocultural perspectives of underserved populations in California impacting their health; roles of family/interpersonal relationships in making health care decisions; and clinician's perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine.

Prerequisite(s): Sociology, political science, or applied behavioral science background recommended, or registration in medical school.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

FAP 401 – Introductory Preceptorship in Family Practice (3-9 units)

Course Description: Preceptorship in family practice offered as an introduction to clinical medicine. 20 hours or 40 hours per week in a family physician's office, doing patient interviews, historytaking, and performing physical exams.

Prerequisite(s): Completion of first-year of medical training.

Learning Activities: Clinical Activity 20-40 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 405 – The Healer's Art (1 unit)

Course Description: Learning to strengthen your humanity and remain open-hearted can make the difference between burnout and a fulfilling life. Learn tools for selfcare, healing, finding meaning, strengthening commitment and becoming a true physician.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 0.60 hour(s), Workshop 3 hour(s).

Enrollment Restriction(s): Limited to first-year medical students.

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

FAP 411 – Selected Studies of Systems for Chronic Illness Care (3 units)

Course Description: Understanding of chronic illness, particularly diabetes, participate in patient care, alternative techniques.

Prerequisite(s): FAP 400A; FAP 400B; FAP 400C; medical students with consent of instructor.

Learning Activities: Clinical Activity 4 hour(s), Discussion 4 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Honors/Pass/Fail.

FAP 430 – Family Medicine Clerkship (3-12 units)

Course Description: Family medicine clerkship for third year medical students.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430FA – SJVP Longitudinal Family Medicine Clerkship (1.5-6 units)

Course Description: Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430FB – SJVP Longitudinal Family Medicine Clerkship (1.5-6 units)

Course Description: Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430FC – SJVP Longitudinal Family Medicine Clerkship (1.5-6 units)

Course Description: Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430FD – SJVP Longitudinal Family Medicine Clerkship (1.5-6 units)

Course Description: Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430R – Rural PRIME Family Medicine Longitudinal Clerkship (2 units)

Course Description: Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430RA – Rural PRIME Family Medicine Longitudinal Clerkship (3 units)

Course Description: Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430RB – Rural PRIME Family Medicine Longitudinal Clerkship (3 units)

Course Description: Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430RC – Rural PRIME Family Medicine Longitudinal Clerkship (3 units)

Course Description: Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430RD – Rural PRIME Family Medicine Longitudinal Clerkship (1 unit)

Course Description: Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430TA – TeachMS Longitudinal Primary Care Clerkship (A) (4 units)

Course Description: Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430TB – TeachMS Longitudinal Primary Care Clerkship (B) (6 units)

Course Description: Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 430TC – TeachMS Longitudinal Primary Care Clerkship (C) (2 units)

Course Description: Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s), Lecture 2 hour(s), Workshop 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 431 – Introduction to Primary Care Continuity Clinic (1 unit)

Course Description: Longitudinal component of the third-year primary care curriculum. Attend clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor.

Prerequisite(s): Consent of instructor; completion of the Pre-Clinical Curriculum.

Learning Activities: Clinical Activity 4 hour(s), Project 1 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 431A – Primary Care Continuity Clinic (1 unit)

Course Description: Longitudinal component of the third-year primary care curriculum. Attend clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor.

Prerequisite(s): Consent of instructor; completion of the Pre-Clinical Curriculum.

Learning Activities: Clinical Activity 4 hour(s), Project 1 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 431B – Primary Care Continuity Clinic (1 unit)

Course Description: Longitudinal component of the third-year primary care curriculum. Attend clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor.

Prerequisite(s): Consent of instructor; completion of the Pre-Clinical Curriculum.

Learning Activities: Clinical Activity 4 hour(s), Project 1 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 431C – Primary Care Continuity Clinic (1 unit)

Course Description: Longitudinal component of the third-year primary care curriculum. Attend clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor.

Prerequisite(s): Consent of instructor; completion of the Pre-Clinical Curriculum.

Learning Activities: Clinical Activity 4 hour(s), Project 1 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 431D – Primary Care Continuity Clinic (1 unit)

Course Description: Longitudinal component of the third-year primary care curriculum. Attend clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor.

Prerequisite(s): Consent of instructor; completion of the Pre-Clinical Curriculum.

Learning Activities: Clinical Activity 4 hour(s), Project 1 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 431KA – ACE-PC Continuity Clinic (6 units)

Course Description: Longitudinal clinic component of the second year of the ACE-PC Program. Start with a four-week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 431KB – ACE-PC Continuity Clinic (0.5 units)

Course Description: Longitudinal clinic component of the second year of the ACE-PC Program. Start with a four-week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 20 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 431KC – ACE-PC Continuity Clinic (0.5 units)

Course Description: Longitudinal clinic component of the second year of the ACE-PC Program. Start with a four-week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 431KD – ACE-PC Continuity Clinic (0.5 units)

Course Description: Longitudinal clinic component of the second year of the ACE-PC Program. Start with a four-week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 2 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 434 – Primary Care Clinics-Clínica Tepati (1-12 units)

Course Description: Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations.

Learning Activities: Clinical Activity 32-36 hour(s), Seminar 0-2 hour(s), Lecture 1-2 hour(s).

Enrollment Restriction(s): Open to medical students in all four years of medical school.

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

FAP 435 – Primary Care Clinics-Imani Clinic (1-12 units)

Course Description: Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations.

Learning Activities: Clinical Activity 32-36 hour(s), Seminar 0-2 hour(s), Lecture 1-2 hour(s).

Enrollment Restriction(s): Open to medical students in all four years of medical school.

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

FAP 436 – Continuity Clinic in Primary Care; Shifa Clinic (3-12 units)

Course Description: Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations.

Learning Activities: Clinical Activity 32-36 hour(s), Seminar 0-2 hour(s), Lecture 1-2 hour(s), Variable.

Enrollment Restriction(s): Open to medical students in all four years of medical school.

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

FAP 437 – Primary Care Clinics: Knights Landing (1-12 units)

Course Description: Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations in the community of Knights Landing.

Learning Activities: Clinical Activity 3 hour(s), Lecture 1 hour(s).

Enrollment Restriction(s): Must complete an application and interview prior to registering.

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

FAP 438 – Primary Care Clinics - River Clinic (1-12 units)

Course Description: Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations.

Learning Activities: Clinical Activity, Seminar, Lecture.

Repeat Credit: May be repeated for credit.

Grade Mode: Pass/Fail only.

FAP 439D – Directed Clinical Studies in Family Medicine (1-12 units)

Course Description: Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

FAP 439R – Directed Studies in Family Medicine (1-12 units)

Course Description: Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s), Independent Study 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

FAP 444 – Advanced Preceptorship in Family Medicine (3-18 units)

Course Description: Preceptorships with primary care physicians in a variety of settings. Acquisition skills to evaluate and develop a treatment plan for patients with common medical problems seen by primary care physicians in an out patient setting.

Prerequisite(s): Completion of third-year primary care plus clerkship or consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Enrollment Restriction(s): Open to medical students only.

Repeat Credit: May be repeated 18 unit(s).

Grade Mode: Honors/Pass/Fail.

FAP 450 – CAM in Family & Community Health (3-18 units)

Course Description: Complementary and alternative medicine courses at away institutions that cover various aspects of integrative medicine, including but not limited to: botanicals, homeopathy, mind/body, naturopathy, nutrition, traditional Chinese medicine, osteopathy, and energy medicine. Intended to grant units for away rotations; not offered at the UC Davis Medical Center.

Learning Activities: Variable 20-40 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 454 – Away Advanced Clinical Clerkship in Family Medicine (3-12 units)

Course Description: Preceptorships with primary care physicians in a variety of settings. Acquisition skills to evaluate and develop a treatment plan for patients with common medical problems seen by primary care physicians in an out patient setting.

Learning Activities: Clinical Activity 40 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 460 – Geriatrics in Community Health (3-6 units)

Course Description: Visits to community agencies including mental health teams, adult day health centers, a diagnostic and research center, and case management specialists. Observation and participation in MMSE's, patient-family conferences, interdisciplinary team meetings, neuropsychiatric testing and home visit evaluations.

Prerequisite(s): FAP 430.

Learning Activities: Fieldwork 24 hour(s), Clinical Activity 12 hour(s), Lecture 4 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 468 – International Preceptorship (3-12 units)

Course Description: Preceptorship with a family practitioner in a foreign country (Arranged by student contact or with assistance of the Family and Community Medicine Department.) Participate in clinical activities, analyze and report characteristics of the practice.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Honors/Pass/Fail.

FAP 469 – Inpatient Acting Internship in Family Medicine (3-12 units)

Course Description: Comprehensive primary medical care of inpatients on a family medicine hospital service. Available sites are university-based family medicine residency programs and programs within the UC Davis Network of Affiliated Family Medicine Residency Programs.

Prerequisite(s): Completion of third-year of medical school or consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Enrollment Restriction(s): Open to medical students only.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Honors/Pass/Fail.

FAP 470 – Inpatient Clinical Elective in Family Medicine (3-12 units)

Course Description: Comprehensive primary medical care of patients on a family medicine hospital service. Usually includes inpatient and outpatient experience.

Prerequisite(s): Completion of third-year of medical school or consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Enrollment Restriction(s): Open to medical students only.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Honors/Pass/Fail.

FAP 475 – Combined Inpatient/Outpatient Clinical Elective in Family Medicine (3-12 units)

Course Description: Combined inpatient and outpatient elective. Consists of comprehensive primary medical care of patients on a family medicine hospital service and in a family medicine outpatient clinic.

Prerequisite(s): Completion of third-year of medical school or consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Enrollment Restriction(s): Open to Medical students only.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Honors/Pass/Fail.

FAP 479 – Away Inpatient Acting Internship in Family Medicine (3-12 units)

Course Description: Comprehensive primary medical care of inpatients on a family medicine hospital service.

Learning Activities: Clinical Activity 40 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 488 – Selected Studies in Family Practice (1-9 units)

Course Description: Assigned readings in family practice to increase understanding on selected topics relating to family medicine and primary health care delivery; visits to and written analysis of selected health care programs; and/or exposure to family practice with a community physician preceptor.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Variable 3-27 hour(s).

Repeat Credit: May be repeated 9 unit(s).

Grade Mode: Honors/Pass/Fail.

FAP 490 – Health Care to Underserved Populations (1 unit)

Course Description: Discusses sociocultural perspectives of underserved populations impacting health; roles of family/interpersonal relationships in making health care decisions; the nature of ethnic/racial/socioeconomic health care disparities; and clinicians' perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine.

Prerequisite(s): Sociology, Political Science, or Applied Behavioral Science background recommended, or registration in medical school.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

FAP 493 – Aging & Health (6 units)

Course Description: Is disease and infirmity the inevitable consequence of aging? We will spend four weeks exploring this question by reviewing the biology of aging, physiologic changes seen in aged individuals and disease processes commonly found in elderly persons.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 12 hour(s).

Grade Mode: Honors/Pass/Fail.

FAP 495 – LGBTIQQA Healthcare Lecture Series (1 unit)

Course Description: Increase the awareness of medical issues surrounding the LGBTIQQA community and arm students with knowledge of the health disparities the community faces. Provide better quality care to the LGBTIQQA patients cared for as physicians.

Learning Activities: Lecture 6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

FAP 496 – Advanced Transgender & Gender Nonbinary (TGNB) Health (6 units)

Course Description: Focuses on cultural competency in caring for Transgender & Gender Nonbinary (TGNB) patients, including awareness of health disparities.

Learning Activities: Seminar.

Grade Mode: Pass/Fail only.

FAP 498 – Directed Group Study (1-5 units)

Course Description: Explore in-depth various topics in primary care.

Extensive contact with and oversight by instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

FAP 499 – Research (1-12 units)

Course Description: Research in various aspects of the health care delivery system.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

Fiber & Polymer Science (FPS)

College of Agricultural & Environmental Sciences

FPS 100 – Principles of Polymer Materials Science (3 units)

Course Description: Basic principles of polymer science are presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing.

Prerequisite(s): CHE 002A; CHE 002B; ((CHE 008A, CHE 008B) or (ENG 045 or ENG 045Y)); Introductory physics.

Learning Activities: Lecture 3 hour(s).

Cross Listing: EMS 147.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

FPS 110 – Plastics in Society & the Environment (4 units)

Course Description: Basic concepts and methodologies in the study of plastics. Formation, classification, structure, properties, processing, and formulation. Their application to societal needs, and their impact on society and the environment.

Prerequisite(s): CHE 010; or introductory course in physical sciences.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL); Writing Experience (WE).

FPS 150 – Polymer Syntheses & Reactions (3 units)

Course Description: Organic and physical chemistry aspects of polymer syntheses and reactions including polymerization mechanisms, kinetics and thermodynamics for major types of organic high polymers.

Prerequisite(s): (CHE 128B or CHE 008B); CHE 107A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

FPS 161 – Structure & Properties of Fibers (3 units)

Course Description: Structure, properties and reactions of natural- and man-made fibers; the relations between molecular structure of fibers and their physical properties; interactions of fibers and detergents.

Prerequisite(s): TXC 006; CHE 008B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

FPS 161L – Textile Chemical Analysis Laboratory (1 unit)

Course Description: Laboratory methods and procedures employed in qualitative and quantitative analysis of textile fibers and auxiliaries.

Prerequisite(s): FPS 161 (can be concurrent).

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

FPS 180A – Introduction to Research in Fiber & Polymer Science (2 units)

Course Description: Senior thesis on independent problems. Research begun in TXC 180A continued and completed in TXC 180B.

Prerequisite(s): Consent of instructor; senior standing in major related to Fiber and Polymer Science.

Learning Activities: Lecture/Discussion 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

FPS 180B – Introduction to Research in Fiber & Polymer Science (2 units)

Course Description: Senior thesis on independent problems. Research begun in TXC 180A continued and completed in TXC 180B.

Prerequisite(s): Consent of instructor; senior standing in major related to Fiber and Polymer Science.

Learning Activities: Lecture/Discussion 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

FPS 192 – Internship in Fiber & Polymer Science (1-12 units)

Course Description: Work experience off campus in a fiber and polymer science related area. Supervision by a member of the Textiles and Clothing faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

FPS 197T – Tutoring in Fiber & Polymer Science (1-5 units)

Course Description: Tutoring of students in Fiber & Polymer Science courses. Assistance with discussion groups and laboratory sections under supervision of instructor.

Prerequisite(s): Consent of instructor; upper division fiber and polymer science related major.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated if tutoring in another Fiber & Polymer Science course.

Grade Mode: Pass/No Pass only.

FPS 198 – Directed Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

FPS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

FPS 250A – Special Topics in Polymer & Fiber Science (3 units)

Course Description: Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered.

Prerequisite(s): FPS 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Cross Listing: EMS 250A.

Grade Mode: Letter.

FPS 250B – Special Topics in Polymer & Fiber Science (3 units)

Course Description: Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered.

Prerequisite(s): FPS 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Cross Listing: EMS 250B.

Grade Mode: Letter.

FPS 250E – Special Topics in Polymer & Fiber Science (3 units)

Course Description: Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered.

Prerequisite(s): FPS 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Cross Listing: EMS 250E.

Grade Mode: Letter.

FPS 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Independent Study 3-36 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

FPS 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant, training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Film Studies (FMS)

College of Letters & Science

FMS 045 – Vampires & Other Horrors in Film & Media (4 units)

Course Description: History of representations of vampires and horror generally from the 19th-21st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice, medicine, modernity.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing 3 hour(s).

Cross Listing: GER 045.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

FMS 090X – Lower Division Seminar (4 units)

Course Description: Study of a special topic in Film Studies in a small class setting.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

FMS 120 – Italian-American Cinema (4 units)

Course Description: Exploration of representations of Italian-American identity in American (U.S.) cinema. Analysis of both Hollywood and independently produced films, especially as they represent ethnicity, gender, and social class of Italian Americans.

Prerequisite(s): FMS 001.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken HUM 120.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

FMS 121 – New Italian Cinema (4 units)

Course Description: Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required.

Prerequisite(s): FMS 001; and upper division standing, or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: ITA 121.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

FMS 121S – New Italian Cinema (4 units)

Course Description: Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. May be taught abroad.

Prerequisite(s): FMS 001; and upper division standing, or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: ITA 121S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

FMS 127 – Film Theory (4 units)

Course Description: Survey of the conceptual frameworks used to study film (including semiotics, psychoanalysis, spectatorship, auteur, genre and narrative theories). Historical survey of major film theorists.

Prerequisite(s): FMS 001; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

FMS 129 – Russian Film (4 units)

Course Description: History of Russian film; film & social revolution, the cult of Stalin, dissident visions; film & the collapse of the Soviet empire; gender and the nation in Russian film. Taught in English; Russian films with English subtitles.

Prerequisite(s): Completion of Subject A requirement.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: RUS 129.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

FMS 142 – New German Cinema (4 units)

Course Description: German filmmakers of the 1960s-1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorf, Kluge, Wenders. Knowledge of German is not required.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated with consent of instructor.

Cross Listing: GER 142.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

FMS 176A – Classic Weimar Cinema (4 units)

Course Description: German Weimar (1919-1933) cinema. Fritz Lang, F.W. Murnau, and G.W. Pabst among others. Influence on world-wide (esp. Hollywood) film genres such as film noir, horror, science fiction, and melodrama.

Prerequisite(s): HUM 001.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken HUM 176.

Cross Listing: GER 176A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

FMS 176B – Postwar German Cinema (4 units)

Course Description: Exploration of German cinema from 1945 to 1980, when the Nazi past was a central theme. Includes study of postwar "rubble films," escapist "homeland films," and New German Cinema of the 1970s (including films by Fassbinder, Kluge, Syberberg, and Herzog).

Prerequisite(s): FMS 001.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken HUM 177.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

FMS 190X – Upper Division Seminar (4 units)

Course Description: Study of a special topic in film studies in a small class setting.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

Fine Arts & Humanities (FAH)

College of Letters & Science

FAH 098 – Directed Group Study (1-4 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

FAH 198 – Directed Group Study (1-4 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Food Science & Technology (FST)

College of Agricultural & Environmental Sciences

FST 001 – Principles of Food Science (3 units)

Course Description: Food science fundamentals. Fresh and processed food technologies; world food problems; food composition; food microbiological and toxicological safety; food laws; evaluation of acceptability and nutritional value.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed any FST course, except FST 010.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

FST 003 – Introduction to Brewing & Beer (3 units)

Course Description: Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken FST 003V.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

FST 003V – Introduction to Brewing & Beer (3 units)

Course Description: Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1.50 hour(s), Project.

Credit Limitation(s): Not open for credit to students who have taken FST 003.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

FST 010 – Food Science, Folklore & Health (3 units)

Course Description: Ancient and modern food folklore in relation to health and well-being. Food safety, organic food, herbalism, food preservation, and nutritional enhancement.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed FST 002.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL); Visual Literacy (VL); World Cultures (WC).

FST 050 – Introduction to Food Preservation (3 units)

Course Description: Introduction to modes of fresh food preservation including use of chemicals and microbes, heat and energy, control of water and atmosphere, and by indirect approaches such as packaging, hygienic design and sanitation.

Prerequisite(s): CHE 002A; BIS 002A (can be concurrent); (STA 013 (can be concurrent) or STA 013Y (can be concurrent) or STA 100 (can be concurrent)).

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Pass One restricted to Food Science majors; Pass Two open to all students.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

FST 055 – Food in American Culture (4 units)

Course Description: Relationship between food and culture; relationship between food and the social order; influences on eating habits and the tensions between them including identity, convenience, and responsibility; multiple disciplines and genres.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: AMS 055.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

FST 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

FST 100A – Food Chemistry (4 units)

Course Description: Chemical aspects of food composition. Emphasis on the functional properties and chemical reactions of the major components of foods: carbohydrates, lipids, proteins, and water.

Prerequisite(s): (CHE 008B or CHE 118B or CHE 128B); BIS 002A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Food Science, Clinical Nutrition, and Nutrition Science majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

FST 100B – Food Properties (4 units)

Course Description: Sensory quality, chemical and microbial safety, and nutritional properties of foods. Effects of food processing and preparation on these properties. Selected properties of food commodities.

Prerequisite(s): FST 100A; CHE 008B; and consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

FST 100C – Food Physical Chemistry (4 units)

Course Description: Fundamentals of thermodynamics and kinetics related to food physical chemistry. Phase behavior, crystallization, water activity and food stability, solubility, aroma volatility, formation of glasses, gels and dispersions, biopolymers and rheology.

Prerequisite(s): PHY 007A; PHY 007B; PHY 007C; FST 100A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

FST 101A – Food Chemistry Laboratory (3 units)

Course Description: Study of basic chemical and physical properties that influence the reactivity and functional properties of components in food systems.

Prerequisite(s): FST 100A (can be concurrent).

Learning Activities: Discussion 1 hour(s), Lecture 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to Food Science and Clinical Nutrition majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

FST 101B – Food Properties Laboratory (2 units)

Course Description: Study of properties of food described in FST 100B.

Prerequisite(s): FST 100B (can be concurrent); must be taken concurrently.

Learning Activities: Lecture/Lab 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

FST 102A – Malting & Brewing Science (4 units)

Course Description: Technology of the malting, brewing and fermentation processes is integrated with the chemistry, biochemistry and microbiology that determine industrial practices and product quality.

Prerequisite(s): (BIS 102, BIS 103) or BIS 105; senior standing recommended.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken FST 102.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

FST 102B – Practical Malting & Brewing (4 units)

Course Description: Provides practical working knowledge of analytical methods used in malting and brewing and experience with brewing materials and processes, by analysis of samples that illustrate the range of values experienced in practice and pilot scale brewing.

Prerequisite(s): FST 102A; CHE 002C.

Learning Activities: Lecture/Discussion 2 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Open to seniors only in Fermentation Science or Food Science and Technology.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

FST 103 – Physical & Chemical Methods for Food Analysis (4 units)

Course Description: Theory and application of physical and chemical methods for determining the constituents of foods. Modern separation and instrumental analysis techniques are stressed.

Prerequisite(s): CHE 002C; CHE 008B; BIS 103; FST 101A; FST 100C (can be concurrent); or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

FST 104 – Food Microbiology (3 units)

Course Description: Microorganisms in food safety, spoilage, and production. Food-borne disease agents and their control. Growth parameters of food spoilage agents. Destruction of microbes in food. Food fermentations. The development of microbes as a resource for the food industry.

Prerequisite(s): BIS 002A; BIS 103.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

FST 104L – Food Microbiology Laboratory (4 units)

Course Description: Cultural and morphological characteristics of microorganisms involved in food spoilage, in foodborne disease, and food fermentation. Analysis of microbiological quality of foods. May be taught abroad.

Prerequisite(s): BIS 002A; BIS 103; FST 104.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Restricted to juniors and seniors in the Food Science major.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

FST 106 – Food Chemistry for Clinical Nutrition (5 units)

Course Description: Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition.
Prerequisite(s): CHE 008B C- or better or CHE 118B C- or better or CHE 128B C- or better; concurrent with FST 100A recommended.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Only open to Clinical Nutrition majors.

Credit Limitation(s): Not open to students who have completed FST 101A and/or FST 101B.

Cross Listing: NUT 106.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

FST 107 – Food Sensory Science (4 units)

Course Description: Critical examination of techniques and theories of sensory measurement of food; measures of consumer perception and acceptance. An introduction to the sensory and cognitive systems associated with the perception of food.

Prerequisite(s): FST 117 (can be concurrent); (STA 013 or STA 013Y).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed FST 107A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

FST 109 – Principles of Quality Assurance in Food Processing (3 units)

Course Description: Quality assurance systems for food industry with essential measurement & analysis techniques and discussion of QA management & control programs. Regulations and audit, as well as the processes for validation and verification of quality of food systems, are emphasized.

Prerequisite(s): STA 013 or STA 013Y.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

FST 110 – Food Processing (4 units)

Course Description: Application of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, heat and mass transfer. Quantitative analysis through problem solving and simulation.

Prerequisite(s): PHY 007A; PHY 007B; PHY 007C (can be concurrent); (MAT 016C or MAT 017C or MAT 021C).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students enrolled in College of Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

FST 110L – Food Processing Laboratory (2 units)

Course Description: Laboratory exercises to gain experience with common food processing operations at the bench and pilot plant scales.

Prerequisite(s): FST 110 (can be concurrent).

Learning Activities: Laboratory 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Food Science majors only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

FST 113 – Food Law & Regulations (3 units)

Course Description: Food law and regulatory landscape of the food industry. Regulatory aspects of food safety. Major U.S. food laws and regulations including labeling, standards, misbranding, adulteration, food fraud, environmental policies, as well as international law. Laws pertaining to specific food categories including milk, dairy, meat, poultry, eggs, seafood, produce, packaged foods, and alcohol.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Upper division standing or consent of instructor.

Grade Mode: Letter.

General Education: Scientific Literacy (SL); Visual Literacy (VL).

FST 114 – Fermented Foods (4 units)

Course Description: Physiology, biochemistry, and genetics of microorganisms important in food fermentations. How microorganisms are used in fermentations and how raw materials are converted into finished fermented foods and beverages.

Prerequisite(s): BIS 103; MIC 102; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One restricted to upper division or graduate level Food Science and Viticulture & Enology majors.

Cross Listing: VEN 114.

Grade Mode: Letter.

FST 117 – Design & Analysis for Sensory Food Science (4 units)

Course Description: Methods of design and analysis for sensory food science. Experimental design strategies. Use of taste panels and consumer testing. Data analysis and computation including the relative merits and limitations of parametric and nonparametric approaches. Modifications for quality assurance.

Prerequisite(s): STA 013 or STA 013Y.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

FST 119 – Chemistry & Technology of Milk & Dairy Products (4 units)

Course Description: Composition, structure and properties of milk and products derived from milk. Relates chemical, microbiological, and technological principles to commercial practices in processing of milk and its products.

Prerequisite(s): BIS 002A; BIS 102; consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

FST 123 – Introduction to Enzymology (3 units)

Course Description: Principles of physical, chemical and catalytic properties of enzymes and their importance. Purification, characterization, and quantitative evaluation of reaction conditions on activity are stressed. Specificity and mechanism of action illustrated by use of selected enzymes. (Former course BCP 123.)

Prerequisite(s): FST 123L (can be concurrent); BIS 102; BIS 103.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

FST 123L – Enzymology Laboratory (2 units)

Course Description: Laboratory procedures involved in detection, purification and characterization of enzymes. (Former course BCP 123L.)

Prerequisite(s): BIS 103; FST 123 (can be concurrent); FST 123 required concurrently.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

FST 127 – Sensory Evaluation of Foods (4 units)

Course Description: Critical examination of methods of sensory measurement applied to food and beverage systems; descriptive analysis and consumer tests and their application to quality assurance, product development and optimization.

Prerequisite(s): FST 117.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

FST 128 – Food Toxicology (3 units)

Course Description: Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards.

Prerequisite(s): BIS 102; BIS 103.

Learning Activities: Lecture 3 hour(s).

Cross Listing: ETX 128.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

FST 131 – Food Packaging (4 units)

Course Description: Principles of food packaging. Functions of packaging. Properties of metal, glass, paper and plastic materials and packages. Design, fabrication, and applications of food packaging. Packaging of fresh and processed foods, including fruits and vegetables, dairy foods, beer and wine.

Prerequisite(s): CHE 008B; BIS 001B; PHY 007C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 50 students.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

FST 151Y – Food Freezing (1 unit)

Course Description: Mechanisms of ice crystallization, interpretation of freezing diagrams, and modes of heat transfer. Food properties at sub-freezing temperatures, refrigeration requirements, and estimation of freezing times. Industrial systems used in freezing foods.

Prerequisite(s): FST 110A; or the equivalent.

Learning Activities: Discussion 1 hour(s), Web Virtual Lecture.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

FST 159 – New Food Product Ideas (3 units)

Course Description: Create, refine, test and present viable ideas for new food products. Activities include trend monitoring, consumer research, idea generation, concept screening, and new product concept presentations.

Prerequisite(s): FST 050; BIS 002A; PHY 007A; PHY 007B; PHY 007C; CHE 002A; CHE 002B; CHE 002C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

FST 160 – Food Product Development (4 units)

Course Description: Product implementation stage of food product development including preliminary product description, prototype development, product testing, and formal presentation of a new product development.

Prerequisite(s): FST 050; FST 103; FST 104; FST 110.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Visual Literacy (VL).

FST 190 – Senior Seminar (1 unit)

Course Description: Selected topics presented by students on recent advances in food science and technology. Reports and discussions concerning oral and written presentations, literature sources and career opportunities.

Prerequisite(s): Senior standing or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL).

FST 192 – Internship for Advanced Undergraduates (1-12 units)

Course Description: Work experience on or off campus in the practical application of food science.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

FST 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

FST 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

FST 201 – Food Chemistry & Biochemistry (4 units)

Course Description: Advanced topics in food chemistry and biochemistry, emphasizing the application of the basic principles of chemistry and biochemistry to food composition, properties, preservation and processing. Chemical structures, interactions, reaction mechanisms and experimental methods are stressed.

Prerequisite(s): Undergraduate courses in organic chemistry and biochemistry; undergraduate course in food chemistry is recommended.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Food Science graduate level standing or consent of instructor.

Grade Mode: Letter.

FST 202 – Physical Chemistry of Foods (4 units)

Course Description: Fundamental principles of chemistry and physics are applied to a study of changes in water binding properties and activity, changes in proteins, nutrients, toxic constituents, and other compounds during storage, heating, freezing, dehydrating, and concentrating of food materials.

Prerequisite(s): CHE 107A; CHE 107B; BIS 102 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

FST 203 – Food Processing (4 units)

Course Description: Principles of food engineering applied to food processing. Relationship of Newtonian and non-Newtonian fluid properties to heat and momentum transfer. Application of mass transfer in controlling kinetics and quality changes of foods.

Prerequisite(s): FST 110A; PHY 007C; CHE 107B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

FST 204 – Advanced Food Microbiology (4 units)

Course Description: Principles and recent developments in food microbiology. Mechanisms of foodborne disease, pathogen detection, parameters of microbial growth and control in foods, intestinal microbiology including probiotics and prebiotics, and the microbiology of food and beverage fermentations.

Prerequisite(s): Undergraduate level coursework in microbiology, or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

FST 205 – Industrial Microbiology (3 units)

Course Description: Use of microorganisms for producing substances such as amino acids, peptides, enzymes, antibiotics and organic acids. Emphasis on metabolic regulation of pathways leading to fermentation products, on yeast fermentations, and on genetic manipulations (including recombinant DNA techniques) of industrial microorganisms.

Prerequisite(s): BIS 001A; BIS 102; BIS 103; MIC 130A and MIC 130B or BIS 101 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

FST 207 – Advanced Sensory-Instrumental Analyses (3 units)

Course Description: Basic principles of measurement of color, texture, and flavor of foods by sensory and instrumental methods. Advanced statistical analysis of relation of colorimetry, texturometry, and chemistry of volatile compounds to perception of appearance, texture, flavor.

Prerequisite(s): FST 107; and consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

FST 210 – Proteins: Functional Activities & Interactions (3 units)

Course Description: Relationships of structure of proteins to their biological functions. Structural proteins, complexing proteins, and catalytic proteins in plant and animal materials and products.

Prerequisite(s): BIS 103.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

FST 211 – Lipids: Chemistry & Nutrition (3 units)

Course Description: Chemistry of lipids as it pertains to research in food and nutrition. Relations between lipid structure and their physical properties in tissues and foods. Regulation of absorption, transport, and metabolism of lipids. Implications of dietary fats and health.

Prerequisite(s): BIS 103; CHE 107B; CHE 128B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

FST 213 – Flavor Chemistry of Foods & Beverages (3 units)

Course Description: Become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and processed foods.

Required to read and critically evaluate flavor chemistry literature.

Prerequisite(s): CHE 008B; VEN 123; (VEN 123L or FST 103); or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: VEN 213.

Grade Mode: Letter.

FST 217 – Advanced Food Sensory Science (3 units)

Course Description: Advanced study of the techniques and theory of the sensory measurement of food as an analytical tool and as a measure of consumer perception and acceptance. Advanced examination of the sensory and cognitive systems associated with the perception of food.

Prerequisite(s): FST 107 (can be concurrent); or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

FST 219 – Biochemistry, Microbiology & Technology of Cheeses of the World (4 units)

Course Description: Compositional and physico-chemical aspects of milk and their implications on cheesemaking; enzymatic, microbiological and physical aspects of cheesemaking; cheese as a biological composite; designing cheese quality attributes; cheese aging. Cheese from all over the world tasted and discussed.

Prerequisite(s): FST 119; (BIS 103 or FST 100A); FST 123; BIS 103; CHE 107B; CHE 128B; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate level students or senior undergraduate students with appropriate background in biochemistry and microbiology.

Grade Mode: Letter.

FST 227 – Food Perception & the Chemical Senses (2 units)

Course Description: Examination of the anatomy and physiology of the chemical senses (taste, smell, and the trigeminal senses) and how they are involved in the perception of food and food intake.

Prerequisite(s): FST 107B (can be concurrent); and consent of instructor.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

FST 228 – Sustainable Food Systems (3 units)

Course Description: Environmental impacts of food systems. Methods for quantifying resource use and managing waste for food production and processing. Influence of policies, technologies, and consumer demand on advancing sustainable food systems.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

FST 230 – Food & Gut Microbiota (4 units)

Course Description: Impact of specific food structures on the structure and function of the animal gut microbiota. How food is transformed by, and modulates, the gut microbiota to provide the host with nutrients and protection.

Prerequisite(s): Microbiology and molecular biology undergraduate coursework or consent of instructor.

Learning Activities: Lecture 1.50 hour(s), Discussion 1.50 hour(s), Term Paper.

Enrollment Restriction(s): Upper division or graduate standing.

Grade Mode: Letter.

FST 259 – Design Thinking of Food (4 units)

Course Description: Tools of design thinking as applied to high-impact, food-related challenges through a multi-disciplinary team based, experiential learning process. Application of the field of food studies to the social and cultural contexts of eating habits, food systems, and the design solutions that respond to these factors. Working with stakeholders to design innovative solutions to food system challenges.

Learning Activities: Lecture/Discussion 3 hour(s); Fieldwork.

Enrollment Restriction(s): Open to Graduate students only.

Grade Mode: Letter.

FST 290 – Seminar (1 unit)

Course Description: Seminar.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

FST 290C – Advanced Research Conference (1 unit)

Course Description: Critical presentation and evaluation of original research by graduate students. Planning of research programs and proposals. Discussion led by individual major instructors for their research group.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

FST 291 – Advanced Food Science Seminar (1 unit)

Course Description: Oral presentation of student's original research, discussion, and critical evaluation.

Prerequisite(s): FST 290; completion of at least one quarter of FST 290.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

FST 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

FST 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

FST 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Food Service Management (FSM)

College of Agricultural & Environmental Sciences

FSM 120 – Principles of Quantity Food Production (4 units)

Course Description: Fundamental principles of food service management, including quantity food preparation, institutional equipment, receiving and storage, service, menu planning, merchandising, and safety. Students earn food safety certification.

Prerequisite(s): FST 100B; (FST 101B or NUT 106).

Learning Activities: Lecture 3 hour(s), Independent Study 1 hour(s).

Enrollment Restriction(s): Restricted to upper division Clinical Nutrition students only.

Grade Mode: Letter.

FSM 120L – Quantity Food Production Laboratory (2 units)

Course Description: Laboratory experience in quantity food production and service.

Prerequisite(s): FSM 120.

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

FSM 122 – Food Service Systems Management (3 units)

Course Description: Principles of quantity food production management: production schedules, portion control, financial management, layout and equipment planning, evaluation of alternative systems, and computer applications.

Prerequisite(s): ARE 112; FSM 120.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

FSM 192 – Internship (1-12 units)

Course Description: Work experience on or off campus in practical aspects of food service management, supervised by a faculty member.

Prerequisite(s): Consent of instructor; one upper division course in Food Service Management (FSM).

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

FSM 197T – Tutoring in Food Service Management (1-5 units)

Course Description: Tutoring of students in food service management, assistance with discussion groups or laboratory sections; weekly conference with instructor in charge of course; written evaluations.

Prerequisite(s): Dietetics or related major; completion of the Food Service Management (FSM) course in which tutoring is done.

Learning Activities: Discussion/Laboratory 3-6 hour(s).

Repeat Credit: May be repeated when tutoring a different course.

Grade Mode: Pass/No Pass only.

FSM 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

FSM 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

Forensic Science (FOR)

Graduate Studies

FOR 200 – Fundamental Concepts in Forensic Science (3 units)

Course Description: Overview of Forensic Science. Problem definition, strategies for problem solving, analytical tools, and professional and ethical considerations.

Learning Activities: Lecture 2 hour(s), Fieldwork 0.25 hour(s), Lecture/Lab 0.25 hour(s), Seminar 0.50 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program.

Grade Mode: Letter.

FOR 201A – Forensic Science Fundamentals-A (3 units)

Course Description: Professional responsibilities and ethics, physical evidence concepts, drug chemistry and toxicology, controlled substances and analytical chemistry and instrumentation as practiced in the forensic sciences. First of three courses that, in part, covers the curriculum requirements of the Forensic Education Program Accreditation Committee (FEPAC).

Prerequisite(s): Consent of instructor; enrolled in the Forensic Science Graduate Program.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to Forensic Science Graduate Program students only.

Grade Mode: Letter.

FOR 201B – Forensic Science Fundamentals-B (3 units)

Course Description: Forensic biology and DNA, microscopy and materials analysis and pattern evidence as practiced in the forensic sciences. Second in a series of three courses which covers the curriculum requirements of the Forensic Education Program Accreditation Committee (FEPAC).

Prerequisite(s): Consent of instructor; enrolled in the Forensic Science Graduate Program.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to Forensic Science Graduate Program students only.

Grade Mode: Letter.

FOR 201C – Forensic Science Fundamentals-C (3 units)

Course Description: Arson and explosives, quality assurance and accreditation, the law and science interface and court testimony as practiced in the forensic sciences. Third in a series of three courses that covers the curriculum requirements of the Forensic Education Program Accreditation Committee (FEPAC).

Prerequisite(s): Consent of instructor; enrolled in the Forensic Science Graduate Program.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

FOR 205 – Microscopy & Microanalytical Methods in Forensic Science (3 units)

Course Description: Introduction to optical and electron microscopy. Transmission, diffraction, reflection and absorption; polarized light and polarizing crystals; phase contrast. Radiography; image recording, SEM analysis of gunshot residues, paints, glass. EDS, XRF analysis, signal-to-noise ratios, minimum detectable levels and homogeneity.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program; a minimum, year each of the following chemistry, organic chemistry, calculus, & physics.

Grade Mode: Letter.

FOR 207 – Advanced Spectroscopy Methods in Forensic Science (3 units)

Course Description: Discuss, evaluate and interpret advanced molecular spectra/structure, Infrared Spectroscopy, such as chemical applications of spectroscopic methods, vibrational, rotational spectra; electronic spectra, photoelectron spectroscopy generated by various analytical instruments used in forensic science community.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to Forensic Science Graduate program or consent of instructor.

Grade Mode: Letter.

FOR 208 – Forensic Toxicology (3 units)

Course Description: Forensic toxicology as related to driving under the influence of drugs (DUID) investigations, detection, and evaluation through the use of standardized field sobriety tests and drug recognition protocols.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

FOR 209 – Forensic Alcohol (3 units)

Course Description: Analytical methods used in the determination and quantitation of ethanol in biological matrices commonly encountered in cases involving operating a motor vehicle.

Prerequisite(s): FOR 220 (can be concurrent); consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

FOR 210 – Personal Identification Methods In Forensic Science (3 units)

Course Description: Methods for identifying individuals from evidence collected at crime scenes, suspects or victims, crime scene examination and analytical methods used to support such investigations. Topics include forensic anthropology and odontology; latent prints; shoe prints; facial reconstruction/recognition; eyewitness identifications; biometric systems.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of instructor.

Grade Mode: Letter.

FOR 212 – Scientific Evidence & Courtroom Testimony (3 units)

Course Description: Explores the relationship between science and the criminal justice system. Admissibility of scientific testimony and documentary proof during the trial, concepts of relevancy, hearsay and opinion rule, examination of expert witnesses, impact of Kelley-Fry and Daubert decisions & court testimony.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to graduate students enrolled in the MS Forensic Science program or by the consent of the instructor.

Grade Mode: Letter.

FOR 215 – Forensic Fire & Arson Investigation (3 units)

Course Description: Principles and techniques of scientific investigation of fires and related crimes; offer peer-reviewed protocols for processing fire and explosion scenes; discuss recognition, collection, analysis of physical evidence, and describe the scientific method for decision-making in fire/arson investigation.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. Forensic Science program or by consent of the Forensic Science Program Director.

Grade Mode: Letter.

FOR 218 – Technical Writing in Forensic Science (3 units)

Course Description: How to write clear, credible forensic science reports and scientific articles, that (a) serve the ends of the justice system, (b) meet their readers' varying needs and (c) reflect well on the author.

Prerequisite(s): Consent of the instructor required for all students not enrolled in the Forensic Science program.

Learning Activities: Lecture 2 hour(s), Extensive Writing/Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to graduate standing in the Forensic Science program.

Grade Mode: Letter.

FOR 220 – Analysis of Toxicants (3 units)

Course Description: Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques.

Prerequisite(s): Coursework in organic chemistry.

Learning Activities: Lecture 3 hour(s).

Cross Listing: ETX 220.

Grade Mode: Letter.

FOR 221L – Forensic Science Analytical Instrumentation (2 units)

Course Description: Methodology and instruments used for the analysis of substances of interest in the discipline of Forensic Science. Practical experience with modern instrumental techniques & methodologies used in the advanced forensic science laboratory.

Learning Activities: Discussion/Laboratory 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Enrollment limited to students accepted in the Forensic Science Graduate program or subject to the approval of the instructor if the student has the appropriate chemistry, calculus and physics courses required of students in the graduate forensic science program.

Grade Mode: Letter.

FOR 240 – Homicide Crime Scene Investigation (3 units)

Course Description: Processing and evaluating complex homicide scenes. Functions and activities of police agencies. Recognition, documentation, identification, and collection of evidence. Event sequence reconstruction. Evidence collection, preservation, report writing. Courtroom presentation.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Forensic Science Masters Program Students; enrollment is limited to 15 students per class.

Grade Mode: Letter.

FOR 263 – Forensic Computer Science Investigations (3 units)

Course Description: Discuss the threats to the security of any kind of evidence that is captured, transmitted, or stored digitally and develop critical thinking and basic knowledge of computer forensic science issues in the evaluation of digital evidence.

Prerequisite(s): Consent of instructor; graduate student.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students in the Forensic Science Graduate program unless approved by instructor.

Grade Mode: Letter.

FOR 268 – Statistics in Forensic Science (3 units)

Course Description: Statistics that are used by the forensic scientist, their limitations/applications in presenting evidential results in such areas as DNA-STR results, trace evidence correlation, fingerprint statistics, population sampling and the Bayes method.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of forensic program director.

Grade Mode: Letter.

FOR 276 – Population Genetics (3 units)

Course Description: Principles, theories, and models of population genetics as they apply to forensic science.

Prerequisite(s): FOR 280; FOR 281; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open only to majors in Forensic Science Program unless by consent of the Chair Forensic Science Graduate group.

Grade Mode: Letter.

FOR 277 – Forensic Genetics; Next Generation Techniques & Applications (3 units)

Course Description: Review organization/function of the human genome, recent developments, next generation sequencing techniques including the preparation of DNA samples, principles of the new generation sequencing assay formats and biochemical reactions. Includes quality control parameter, and bioinformatic approaches.

Prerequisite(s): Undergraduate courses in fundamental and applied principles of: genetics, biochemistry, and molecular biology, or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to Forensic Science Graduate students (GFOR) or consent of instructor.

Grade Mode: Letter.

FOR 278 – Molecular Techniques (3 units)

Course Description: Recombinant DNA technology and its applications.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Cross Listing: ETX 278.

Grade Mode: Letter.

FOR 280 – Forensic DNA Analysis (3 units)

Course Description: Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data.

Prerequisite(s): Coursework in genetics and molecular biology.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Graduate standing; consent of instructor required for all students not enrolled in the M.S. Forensics program.

Cross Listing: ETX 280.

Grade Mode: Letter.

FOR 281 – Principles & Practice of Forensic Serology & DNA Analysis (3 units)

Course Description: Comprehensive overview of forensic serology and DNA typing techniques and technologies. Strong emphasis on real-world applications, including preservation and tracking of biological evidence, detection and identification of bodily fluids, and methods to extract, quantify, and type human DNA.

Prerequisite(s): (FOR 278 or ETX 278) or (FOR 280 or ETX 280); and consent of instructor, or equivalent of FOR 280/ETX 280.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director.

Cross Listing: ETX 281.

Grade Mode: Letter.

FOR 283 – Forensic Biology (3 units)

Course Description: Overview to the foundational concepts in forensic biology: chemistry and molecular biology of biological evidence, genetic basis of biological uniqueness, evolutionary basis of species differences, patterns and dynamics of evidence deterioration, and the legal/ professional considerations associated with biological evidence.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science program or by consent of the Forensic Science Program Director.

Grade Mode: Letter.

FOR 284 – Non-Human Forensic DNA; Theory & Casework Application (2 units)

Course Description: Provides a comprehensive understanding of plant and animal forensic biology in terms of sample collection, preservation, analytical methods, and of the invaluable lines of inquiry these forensic evidence may permit.

Prerequisite(s): Consent of instructor required for all students not enrolled in the M.S. Forensics program; upper division Molecular Biology and Genetics or its equivalent.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to graduate standing.

Cross Listing: ETX 284.

Grade Mode: Letter.

FOR 289 – Survey in Forensic Science (3 units)

Course Description: Analytical methods in contemporary forensic science. Clandestine laboratories in California, crime scene management, examination and analysis of human hair, forensic ballistics/trajectory reconstruction, shoe/tire print impressions, serial number restoration, forensic aspects of alcohol impairment, bloodstain pattern interpretation, microscopy of building materials, biological aspect of forensic science.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

FOR 290 – Seminar in Forensic Science (1 unit)

Course Description: Students will be exposed to topical areas in Forensic Science by presentations conducted by expert guest speakers. The seminar will also serve as a medium whereby the exiting students will present the research conducted as part of their thesis requirement.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

FOR 290C – Graduate Research Conference in Forensic Science (1 unit)

Course Description: Individual and/or group conference on problems, progress and techniques in forensic science and research.

Learning Activities: Independent Study 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

FOR 293 – Forensic Science Research Methodology (2 units)

Course Description: Introduction to identification, formulation, and solution of meaningful scientific problems encountered in the Forensic Science area including experimental design and/or theoretical analysis of new and prevailing techniques, theories and hypotheses. Students will present and defend their thesis research/journal article proposals.

Learning Activities: Lecture 1.50 hour(s), Extensive Writing/Discussion 0.50 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the Graduate Forensic Science program or by consent of the instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

FOR 298 – Group Study in Forensic Science (1-5 units)

Course Description: Group study in Forensic Science.

Learning Activities: Independent Study 1-5 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

FOR 299 – Research in Forensic Science (1-12 units)

Course Description: Research in Forensic Science.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 1-12 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the M.S. in Forensic Science Program.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

French (FRE)

College of Letters & Science

FRE 001 – Elementary French (5 units)

Course Description: Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken FRE 001A; students who have successfully completed FRE 002 or FRE 003 in the 10th or higher grade in high school or who have successfully completed two or more years of high school in a French-speaking country or in a French-language high school may receive unit credit for this course on a P/NP grading basis only, although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

FRE 001A – Accelerated Intensive Elementary French (15 units)

Course Description: Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Special 12-week, accelerated, intensive summer session course that combines the work of FRE 001, FRE 002, and FRE 003.

Prerequisite(s): Placement exam required.

Learning Activities: Lecture/Discussion 15 hour(s).

Credit Limitation(s): Not open for credit to students who have completed FRE 001, FRE 001S, FRE 002, FRE 002S, FRE 003, or FRE 003S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

FRE 001Y – Elementary French (5 units)

Course Description: Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication.

Learning Activities: Lecture/Discussion 4 hour(s), Web Electronic Discussion 1 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent courses FRE 001 or FRE 001S; students who have completed two or more years of French in high school may receive unit credit for this course on a P/NP basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

FRE 002 – Elementary French (5 units)

Course Description: Continuation of FRE 001.

Prerequisite(s): FRE 001 or FRE 001Y.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken FRE 001A; students who have successfully completed two or more years of high school in a French-speaking country or in a French language high school may receive unit credit for this course on a P/NP grading basis only.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

FRE 002Y – Elementary French (5 units)

Course Description: Continuation of FRE 001.

Prerequisite(s): FRE 001 or FRE 001Y.

Learning Activities: Lecture/Discussion 4 hour(s), Web Virtual Lecture 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

FRE 003 – Elementary French (5 units)

Course Description: Continuation of FRE 002.

Prerequisite(s): FRE 002 or FRE 002Y.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken FRE 001A; students who have successfully completed two or more years of high school in a French-speaking country or in a French-language high school may receive unit credit for this course on a P/NP grading basis only.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

FRE 003Y – Elementary French (5 units)

Course Description: Continuation of FRE 002.

Prerequisite(s): FRE 002 or FRE 002Y.

Learning Activities: Lecture/Discussion 4 hour(s), Web Virtual Lecture 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

FRE 021 – Intermediate French (5 units)

Course Description: Review of grammar and vocabulary acquired in the elementary sequence, as well as the study of new grammatical structures and a continuing enrichment of vocabulary through oral work in class, written exercises, readings and compositions.

Prerequisite(s): FRE 001A or FRE 003 or FRE 003S.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed FRE 021S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

FRE 022 – Intermediate French (5 units)

Course Description: Continuation of FRE 021 or FRE 021S. Review of grammar and vocabulary, as well as the study of new grammatical structures and a continuing enrichment of vocabulary.

Prerequisite(s): FRE 021 or FRE 021S.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed FRE 022S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

FRE 023 – Intermediate French (5 units)

Course Description: Continuation of FRE 022 or FRE 022S. Review of grammar and vocabulary, as well as the study of new grammatical structures and a continuing enrichment of vocabulary.

Prerequisite(s): FRE 022 or FRE 022S.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed FRE 023S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

FRE 050 – French Film (4 units)

Course Description: Introduction to the tradition of French cinema from its invention by Méliès and the Lumière brothers through New Wave (especially the works of Truffaut and Godard) and more recent developments in French and Francophone film. Taught in English.

Learning Activities: Lecture 1 hour(s), Discussion 2 hour(s), Term Paper.

Grade Mode: Letter.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

FRE 206A – 17th-Century Literature: Theater (4 units)

Course Description: Works of Corneille, Racine, Molière, and minor dramatists. One or more authors may be covered.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor when topic differs.

Grade Mode: Letter.

FRE 206B – 17th-Century Literature: Prose (4 units)

Course Description: Works of authors such as Pascal, Descartes, Mme de Lafayette. One or more authors may be covered.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor as topics differ from quarter to quarter.

Grade Mode: Letter.

FRE 206C – 17th-Century Literature: Poetry (4 units)

Course Description: Studies of the works of one or more poets of the period.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

FRE 207A – 18th-Century Literature: Philosophies (4 units)

Course Description: Not a course in philosophy, but an examination of the role of philosophy in the design and context of literary works. Study of one or more authors.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated.

Grade Mode: Letter.

FRE 207B – 18th-Century Literature: Novel (4 units)

Course Description: Rise of the novel. Study of narrative experiments in the context of the philosophical climate and new literary values. May treat one or more novelists of the period.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

FRE 208A – 19th-Century Literature: Fiction (4 units)

Course Description: Study of the works of one or several novelists and/or short-story writers of the period.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor when topic differs.

Grade Mode: Letter.

FRE 208B – 19th-Century Literature: Poetry (4 units)

Course Description: Study of the works of one or several poets of the period.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor when topic differs.

Grade Mode: Letter.

FRE 209A – 20th-Century: Prose (4 units)

Course Description: Study of the works of one or several writers of the period.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Grade Mode: Letter.

FRE 209B – 20th-Century: Theater (4 units)

Course Description: Study of the works of one or several dramatists of the period.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated.

Grade Mode: Letter.

FRE 209C – 20th-Century: Poetry (4 units)

Course Description: Study of the works of one or several poets of the period.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

FRE 210 – Studies in Narrative Fiction (4 units)

Course Description: Studies in narrative fiction.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor when topic differs.

Grade Mode: Letter.

FRE 211 – Studies in Criticism (4 units)

Course Description: Studies in criticism.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor when topic differs.

Grade Mode: Letter.

FRE 212 – Studies in Theater (4 units)

Course Description: Studies in the theater.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor when topic differs.

Grade Mode: Letter.

FRE 213 – Studies in Poetry (4 units)

Course Description: Studies in poetry.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor when topic differs.

Grade Mode: Letter.

FRE 214 – Study of a Literary Movement (4 units)

Course Description: Study of a literary movement.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor when topic differs.

Grade Mode: Letter.

FRE 215 – Topics in French & Francophone Film (4 units)

Course Description: Aspects of French and Francophone film from the Lumière Brothers through the present. Topics may include a specific historical period of filmmaking, film theories and the analysis of film form and narrative, and major filmmakers and filmic traditions.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

FRE 224 – Francophone Literatures (4 units)

Course Description: Study of cultural productions (literature, film, visual arts) by Francophone peoples such as found in North Africa, West Africa, the Caribbean, South-East Asia, the Americas, and Metropolitan France.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor when topic differs.

Grade Mode: Letter.

FRE 250A – French Linguistics I (4 units)

Course Description: Theoretical approach to the forms and functions of French, with emphasis on phonology and morphology. Overview of current linguistic theories and their application to French. Offered in alternate years.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated.

Grade Mode: Letter.

FRE 250B – French Linguistics II (4 units)

Course Description: Theoretical approach to the forms and functions of French, with emphasis on syntax and semantics. Overview of current linguistic theories and their application to French. Offered in alternate years.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Grade Mode: Letter.

FRE 251 – Topics in the Linguistic Study of French (4 units)

Course Description: Questions relevant to the linguistic study of French, such as language acquisition, sociolinguistics, or theoretical examination of structure. Intended for students in French Linguistics and those applying linguistic models to literature or teaching.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

FRE 291 – Foreign Language Learning in the Classroom (4 units)

Course Description: Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Project.

Enrollment Restriction(s): Graduate standing.

Cross Listing: GER 291, SPA 291.

Grade Mode: Letter.

FRE 297 – Individual Study (1-5 units)

Course Description: Description:

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

FRE 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1-5 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

FRE 299 – Research (1-12 units)

Course Description: Description:

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Enrollment Restriction(s): Graduate standing.

Grade Mode: Satisfactory/Unsatisfactory only.

FRE 299D – Dissertation Research (1-12 units)

Course Description: Dissertation research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

FRE 300 – Teaching of a Modern Foreign Language (3 units)

Course Description: Teaching of a modern foreign language.

Prerequisite(s): Senior or graduate standing; a major or minor in a modern foreign language.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

FRE 390A – The Teaching of French in College (2 units)

Course Description: Designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

FRE 390B – The Teaching of French in College (2 units)

Course Description: Designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

FRE 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Freshman Seminar (FRS)

College of Letters & Science

FRS 001 – First-Year Seminar (1 unit)

Course Description: Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Open only to students who have completed fewer than 45 quarter units and transfer students in their first academic year at UC Davis.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

FRS 002 – First-Year Seminar (2 units)

Course Description: Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Open only to students who have completed fewer than 45 quarter units and transfer students in their first academic year at UC Davis.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

FRS 003 – First-Year Seminar (1 unit)

Course Description: Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Open only to students who have completed fewer than 45 quarter units and transfer students in their first academic year at UC Davis.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

FRS 004 – First-Year Seminar (2 units)

Course Description: Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Open only to students who have completed fewer than 45 quarter units and transfer students in their first academic year at UC Davis.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

Future Undergraduate Science Educators (FSE)

College of Biological Sciences

FSE 301 – Developing Teaching Resources (2 units)

Course Description: Development of curricular materials relevant to undergraduate science courses including complete learning outcomes, lesson plans, learning activities, assessments, data from implementation, and student or peer evaluation of material.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students admitted to the Future Undergraduate Science Educators (FUSE) Graduate Academic Certificate program only.

Grade Mode: Satisfactory/Unsatisfactory only.

FSE 305 – Building a Teaching Portfolio (2 units)

Course Description: Development of a professional and comprehensive teaching portfolio including a teaching philosophy statement, teaching resume/CV, cover letter, reflection on teaching and professional development experiences, sample curricular materials, student evaluations, and peer evaluation. Careers in higher education.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Satisfactory/Unsatisfactory only.

FSE 310 – Effective Teaching of College Biology (3 units)

Course Description: Undergraduate science education pedagogy. Evidence-based practices in undergraduate science course design, structure and facilitation of classroom learning, assessment, student engagement, inclusion of diverse learners, and the use of technology in enhancing learning.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

FSE 391 – Scholarship of Teaching & Learning Seminar (2 units)

Course Description: Research articles on the scholarship of teaching and learning. Current trends in undergraduate level pedagogical research methods and results.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

FSE 392 – Teaching Practicum in the Sciences (2-6 units)

Course Description: Teaching practicum in a college-level science course. Planning and facilitation of class sessions in a college-level setting. Assessment of student learning under the guidance of a science faculty mentor. Teaching assignments must be approved by the instructor of record and the students' thesis advisor.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 1-3 hour(s).

Enrollment Restriction(s): Open only to graduate students enrolled in the Future Undergraduate Science Educators (FUSE) Graduate Academic Certificate program.

Grade Mode: Satisfactory/Unsatisfactory only.

Gastroenterology (GAS)

School of Medicine

GAS 192 – Internship in Gastroenterology (1-12 units)

Course Description: Supervised work experience in gastroenterology.

Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

GAS 299 – Research (1-12 units)

Course Description: Research in gastroenterology.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

GAS 460 – Gastroenterology Clinical Clerkship (3-18 units)

Course Description: Work-up, manage, and follow-up new patients on active inpatient consulting service. Gastroenterology/Hepatology patients. Daily rounds with attending physician.
Prerequisite(s): Consent of instructor. Completion of third-year of medical school.
Learning Activities: Clinical Activity 30 hour(s).
Repeat Credit: May be repeated.
Grade Mode: Honors/Pass/Fail.

GAS 480 – Insights in Gastroenterology (1-3 units)

Course Description: To gain insight in clinical activities of Gastroenterology Division through attendance at any of the following: endoscopic procedures, ward rounds, outpatient clinic, and G.I. grand rounds.
Prerequisite(s): Consent of instructor; student in good academic standing.
Learning Activities: Clinical Activity 3-9 hour(s).
Grade Mode: Honors/Pass/Fail.

GAS 499 – Research (1-12 units)

Course Description: Part-time participation in active clinical and basic research projects. Some will involve both patient care and relevant laboratory procedures. Basic research includes liver metabolism, cancer markers, porphyrias diet and cancer, folate metabolism.
Prerequisite(s): Consent of instructor; medical student status.
Learning Activities: Clinical Activity.
Repeat Credit: May be repeated.
Grade Mode: Honors/Pass/Fail.

Gender, Sexuality, & Women's Studies (GSW)

College of Letters & Science

GSW 050 – Introduction to Critical Gender Studies (4 units)

Course Description: Introduction to interdisciplinary, critical gender studies. The emergence of women's, gender and feminist studies internationally, its links to women's movements, and its influence within the various arts, humanities and social science disciplines.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

GSW 070 – Theory & History of Sexualities (4 units)

Course Description: Key issues in the social construction, organization, and reproduction of sexualities such as the intersection of sexual identity with gender, race, ethnicity, and class, and the relation between movements for sexual liberation and the regulation of the body.
Learning Activities: Lecture/Discussion 4 hour(s).
Credit Limitation(s): Not open for credit to students who have taken former course WMS 070.
Grade Mode: Letter.
General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

GSW 080 – Special Topics in Critical Gender Studies (4 units)

Course Description: In-depth examination of a women and gender studies topic related to the research interest of the instructor.
Learning Activities: Lecture/Discussion 4 hour(s).
Repeat Credit: May be repeated 1 time(s) when topic differs.
Grade Mode: Letter.
General Education: Social Sciences (SS); Writing Experience (WE).

GSW 090X – First Year Seminar (2 units)

Course Description: Examination of a special topic in Gender, Sexuality, and Women's Studies through shared readings, discussions, and written assignments.
Learning Activities: Seminar 2 hours(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH).

GSW 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.
Learning Activities:
Prerequisite(s): Consent of instructor. Enrollment Restrictions: Credit Limitation(s): Cross Listing: Repeat Credit: General Education: Grade Mode: Passed/Not Passed only.
Learning Activities: Variable 1-5 hour(s).
Repeat Credit: May be repeated for credit.

GSW 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduate students.
Learning Activities: Variable 1-5 hour(s).
Repeat Credit: May be repeated for credit.
Grade Mode: Pass/Not Passed only.

GSW 102 – Colonialism (4 units)

Course Description: Changing configurations of gender, class, culture and sexuality in colonial pacification and anti-colonial resistance in diverse societies.
Learning Activities: Lecture 4 hour(s).
Credit Limitation(s): Not open for credit to students who have taken former course WMS 102.
Grade Mode: Letter.
General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

GSW 103 – Introduction to Feminist Theory (4 units)

Course Description: Introduction to the emergence of feminist theory and to key concepts in feminist theorizing. Examination of past and current debates over sexuality, race, identity politics, and the social construction of women's experience.
Prerequisite(s): GSW 050.
Learning Activities: Lecture/Discussion 4 hour(s).
Enrollment Restriction(s): Pass One open to GSW Majors only.
Grade Mode: Letter.
General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

GSW 139 – Feminist Cultural Studies (4 units)

Course Description: Histories, theories, and practices of feminist traditions within cultural studies.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: AMS 139.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS);

Domestic Diversity (DD); Writing Experience (WE).

GSW 148 – Science, Gender, & Social Justice (4 units)

Course Description: Critical reading and reflection on the history and practice of Western science, scientific institutions and the changing role of science in relation to inequalities of class, race, gender and sexuality, and global struggles for equality and justice.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Course cannot be counted for credit if former course WMS 148 has been taken.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD).

GSW 176 – Autobiography, Narrative, Memoir (4 units)

Course Description: Life narrative writings by women. Transgressive voices exploring issues of race, class, sexuality, women's silence, and marginalization. Theories of autobiography, autoethnography, and memoir.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s); Discussion 1 hour(s); Term paper.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS);

Domestic Diversity (DD); Writing Experience (WE).

GSW 179 – Literature as Aesthetics of Resistance (4 units)

Course Description: Literature by women and other marginal groups which embody dissent and subversion as a means of challenging the status quo to affect social transformation.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

GSW 185 – Women & Islamic Discourses (4 units)

Course Description: Introduction to debates/discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East & South Asia. Comparative study of debates/discourses on family, work, law, sexuality, religion, comportment, human rights, and feminist and religious movements.

Prerequisite(s): GSW 050; or comparable course.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: MSA 150.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

GSW 190 – Senior Seminar (4 units)

Course Description: Capstone course for senior GSW majors, which focuses on current issues in feminism as they impact theory, public policy, and practice.

Learning Activities: Seminar 4 hour(s).

Enrollment Restriction(s): Open to GSW majors with senior standing only.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS);

Domestic Diversity (DD); Writing Experience (WE).

GSW 192 – (GSW) Gender, Sexuality, & Women's Studies (1-12 units)

Course Description: Supervised internship and study in positions or institutional settings dealing with gender-related problems or issues, for example, a women's center, affirmative action office, advertising agency, or social welfare agency. Final written report on internship experience required.

Prerequisite(s): Completion of 84 units; enrollment is dependent on the availability of intern positions with priority given to GSW majors; consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: Pass/No Pass only.

GSW 194HA – Senior Honors Project in Gender, Sexuality, & Women's Studies (4-6 units)

Course Description: In consultation with an advisor, students complete a substantial research paper or significant creative project on a GSW topic.

Prerequisite(s): Senior standing; GSW major; advisor's approval; consent of instructor.

Learning Activities: Independent Study 12 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

GSW 194HB – Senior Honors Project in Gender, Sexuality, & Women's Studies (4-6 units)

Course Description: In consultation with an advisor, students complete a substantial research paper or significant creative project on a GSW topic.

Prerequisite(s): Senior standing; GSW major; advisor's approval; consent of instructor.

Learning Activities: Independent Study 12 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

GSW 197T – Tutoring in Gender, Sexuality, & Women's Studies (1-4 units)

Course Description: Leading small, voluntary discussion groups affiliated with a Gender, Sexuality, & Women's Studies course.

Prerequisite(s): Upper division standing; consent of instructor.

Learning Activities: Tutorial 3-12 hour(s).

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Pass/No Pass only.

GSW 198 – Directed Group Study (1-5 units)

Course Description: Directed Group Study.

Learning Activities: Variable 1-5 hour(s).

Enrollment Restriction(s): Must be Upper Division Standing.

Repeat Credit: May be repeated for credit.

Grade Mode: Pass/Not Passed only.

GSW 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special Study for Advanced Undergraduates.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: Pass/Not Passed only.

GSW 200A – Current Issues in Feminist Theory (4 units)

Course Description: Current issues in feminist theory; techniques employed to build feminist theory in various fields.

Learning Activities: Seminar 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken former course WMS 200A.

Grade Mode: Letter.

GSW 200B – Feminism & Research Methodology (4 units)

Course Description: Application of feminist epistemology and ethics in the design of graduate research.

Prerequisite(s): Consent of instructor; students are required to have Bachelor's Level Competency in Gender Studies.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to Graduate Students only.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

GSW 201 – Special Topics in Feminist Theory & Research (4 units)

Course Description: In-depth exploration of a topic of feminist theory and research related to the interests of the instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated for credit when topic differs

Grade Mode: Letter.

GSW 299 – Special Study for Graduate Students (1-12 units)

Course Description: Special study for graduate students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-12 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory only.

GSW 299D – Dissertation Research & Writing (4 units)

Course Description: Dissertation Research & Writing.

Prerequisite(s): GSW 200A; GSW 200B; consent of instructor; fulfillment of course requirements for DE in Feminist Theory Research; advancement to candidacy.

Learning Activities: Independent Study.

Repeat Credit: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory only.

GSW 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

General Medicine (GMD)

School of Medicine

GMD 192 – Internship in General Medicine (1-12 units)

Course Description: Supervised work experience in general medicine.

Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

GMD 291 – Seminars in Human Health Services Research & Clinical Epidemiology (1 unit)

Course Description: Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Cross Listing: EPI 291.

Grade Mode: Satisfactory/Unsatisfactory only.

GMD 460 – General Medicine Consults (1-18 units)

Course Description: Supervised opportunity to see entire spectrum of medical problems encountered by a general internist. Student spends time in General Medicine Clinic and on the General Medicine Consult Service. Consultation Service is particularly concerned with medical evaluation of surgical patients.

Prerequisite(s): Fourth-year medical students with consent of instructor; a general medicine clerkship.

Learning Activities: Clinical Activity 1-18 hour(s), Variable 1-18 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

GMD 470 – Health Care Ethics (3-9 units)

Course Description: Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: NRS 470.

Grade Mode: Honors/Pass/Fail.

GMD 485 – Introduction to Health Care Ethics (1 unit)

Course Description: Introduction to concepts and methods of healthcare ethics. Emphasis on problems and methods.

Prerequisite(s): Medical student in good standing.

Learning Activities: Lecture.

Grade Mode: Honors/Pass/Fail.

GMD 499 – General Medicine Research (1-18 units)

Course Description: Student will be involved in a clinical research problem within the areas, interest and expertise of members of Division of General Internal Medicine. Alternatively, the research effort will be directed toward investigation of a clinical problem of general medical interest.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 3 hour(s), Clinical Activity 8-40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Genetics (GGG)

College of Agricultural & Environmental Sciences

GGG 201A – Advanced Genetic Analysis (5 units)

Course Description: Fundamentals of genetic analysis and chromosome structure using model organisms including mutation, transmission, complementation, suppression, and enhancement as well as epigenetic phenomena at the whole organism and molecular levels.

Prerequisite(s): BIS 101; STA 100; or the equivalent, graduate standing.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

GGG 201B – Genomics (5 units)

Course Description: Prokaryotic and eukaryotic genomes. Experimental strategies and analytical challenges of modern genomics research and the theory and mechanics of data analysis. Structural, functional, and comparative genomics. Related issues in bioinformatics.

Prerequisite(s): GGG 201A; GGG 201C; or equivalents that provide a basic understanding of genetics and molecular biology.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Class limited to 40 students; priority to Genetics Graduate Group students.

Grade Mode: Letter.

GGG 201C – Molecular Genetic Mechanisms in Disease (4 units)

Course Description: Exploration of how basic mechanisms of molecular biology contribute to health and disease. Diseases related to animals, plants, and microbes will highlight fundamental concepts in the assembly, function and regulation of DNA, RNA, and protein.

Prerequisite(s): BIS 101; or the equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students in genetics, microbiology or biochemistry and molecular biology graduate groups.

Grade Mode: Letter.

GGG 201D – Quantitative & Population Genetics (5 units)

Course Description: Basic concepts of quantitative and population genetics including gene and genotypic frequencies, multiple factor hypothesis, phenotypic and genotypic values, heritability, selection, genetic variation, the detection of quantitative trait loci and evolution in populations. Experimental and analytical methods.

Prerequisite(s): GGG 201A; or consent of instructor.

Learning Activities: Lecture 5 hour(s).

Grade Mode: Letter.

GGG 205 – Molecular Genetics Laboratory (5 units)

Course Description: Students will conduct experiments in molecular genetics laboratories. Individual research problems will emphasize experimental design, experience with methodologies, and data interpretation.

Prerequisite(s): BIS 101 (can be concurrent); or the equivalent course; enrolled in Genetics Graduate Group.

Learning Activities: Laboratory 15 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

GGG 211 – Concepts in Human Genetics & Genomics (3 units)

Course Description: Human genomic organization; genetic structure of populations; positional cloning, application of linkage, association, and haplotypes; quantitative trait loci analyses; integrative genetic studies of gene expression; DNA repair mechanisms in genetic disease; mutation analyses; epigenetics; mitochondrial disease; gene manipulation and therapy.

Prerequisite(s): GGG 201A; or equivalent course; GGG 201B and GGG 201C or equivalent are recommended.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students enrolled in the Human Genetics Focus Group; Pass Two restricted to graduate students enrolled in Genetics Graduate Group; after that, open enrollment for graduate students up to 12 students, then undergraduates.

Grade Mode: Letter.

GGG 220 – Genomics & Biotechnology of Plant Improvement (3 units)

Course Description: Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits.

Prerequisite(s): BIS 101; or equivalent.

Learning Activities: Lecture 3 hour(s).

Cross Listing: PLS 220.

Grade Mode: Letter.

GGG 225 – Gene & Cellular Therapies (3 units)

Course Description: Gene therapy from basic concepts to clinical applications. Topics include the human genome and genetic variation, genetic diseases, methods to manipulate gene expression, viral and non-viral delivery vectors, history and progress of gene therapy, case studies, and ethical issues.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: PHA 225.

Grade Mode: Letter.

GGG 250 – Functional Genomics: From Bench to Bedside (3 units)

Course Description: Functional genomics (how genetic variation and epigenomics affect gene expression), with an emphasis on clinical relevance and applications. Topics include genetic variation and human disease, cancer therapeutics, and biomarker discovery.

Prerequisite(s): GGG 201C; MCB 214; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): No credit to students who have previously completed PHA 250.

Cross Listing: BCM 250.

Grade Mode: Letter.

GGG 280 – Genetics, Racism, & Inequality (2 units)

Course Description: Issues of diversity, equity, and inclusion in the context of the science of genetics. Association between theories of race, genetic science, and racism. Impact of and responses to bias and lack of diversity in science.

Prerequisite(s): GGG 291 B or better (can be concurrent); or consent of Instructor.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to graduate students and upper-division undergraduates with a focus on genetics or molecular biology.

Repeat Credit: May be repeated for credit since every year the focus is on different aspects of DEI in genetics; can be taken again with no possible overlap with previous sessions.

Grade Mode: Letter.

GGG 290 – Seminar in Evolutionary, Developmental & Population Genetics (1 unit)

Course Description: Topics of current interest in evolutionary, population, and developmental genetics.

Learning Activities: Seminar 1 hour(s); Discussion 0.5 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students; undergraduate students may enroll with consent of instructor.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

GGG 290A – Graduate Student Conference in Genetics (1 unit)

Course Description: Student-given seminars on topics in genetics, with critiques by instructor and peers.

Learning Activities: Conference 1 hour(s).

Enrollment Restriction(s): Restricted to Genetics Graduate Group students.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

GGG 291 – Seminar in History of Genetics (2 units)

Course Description: The development of modern genetic theories beginning with Mendel.

Prerequisite(s): BIS 101.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

GGG 292 – Seminar in Genomics & Epigenomics (1 unit)

Course Description: Topics of current interest in genomics and epigenomics.

Learning Activities: Seminar 1 hour(s); Discussion 0.5 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students; or consent of instructor.

Repeat Credit: May be repeated credit when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

GGG 293 – Seminar in Animal Genetics (1-3 units)

Course Description: Emphasis on recent advances in the field of animal genetics, ranging from quantitative genetics to molecular biology as it relates to animals.

Prerequisite(s): GGG 201A; or consent of instructor.

Learning Activities: Seminar 1-3 hour(s).

Grade Mode: Letter.

GGG 294 – Seminar in Human Genetics (1 unit)

Course Description: In-depth study of current topics in human genomics including genetic diversity, migration, phenotypic evolution and genetic associations with disease. Focus on population genetic theory. Topic changes yearly.

Prerequisite(s): GGG 201A; consent of instructor.

Learning Activities: Seminar 1 hour(s); Discussion 0.5 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students; or consent of instructor.

Repeat Credit: May be repeated when topic differs.

Grade Mode: S/U only.

GGG 295 – Seminar in Molecular Genetics (1-3 units)

Course Description: Topics of current interest related to the structure, modification and expression of genes.

Prerequisite(s): GGG 201A; or consent of instructor.

Learning Activities: Seminar 1 hour(s); Discussion 0.5 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students; or consent of instructor.

Repeat Credit: May be repeated when topic differs.

Grade Mode: S/U only.

GGG 296 – Scientific Professionalism & Integrity (2 units)

Course Description: Review of basic skills required of contemporary scientists. Topics include scientific conduct, manuscript preparation, grant writing, seminar presentations, and time management.

Emphasis on responsibilities of scientists to factually and thoughtfully communicate results.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 1 hour(s), Seminar 1 hour(s).

Grade Mode: Pass/No Pass only.

GGG 297 – Seminar in Plant Genetics (1-3 units)

Course Description: Current topics in plant genetics examined in student-conducted seminars and discussion format. Integration of molecular, organismal and population genetics to address questions in plant biology will be emphasized.

Prerequisite(s): GGG 201A; or consent of instructor.

Learning Activities: Seminar 1 hour(s); Discussion 0.5 hour(s).

Enrollment Restriction(s): Pass One restricted to graduate students; or consent of instructor.

Repeat Credit: May be repeated when topic differs.

Grade Mode: S/U only.

GGG 298 – Group Study (1-5 units)

Course Description: Group study of selected topics in genetics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

GGG 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

GGG 300 – Methods in Teaching Genetics (1-3 units)

Course Description: Practical experience in the methods and problems of teaching genetics. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion or laboratory sections, formulating examinations under supervision of instructor.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Lecture/Discussion, Variable.

Repeat Credit: May be repeated 3 time(s) or 9 units when teaching in different genetics related course.

Grade Mode: Satisfactory/Unsatisfactory only.

Geography (GEO)

College of Letters & Science

GEO 200A – Research Trends in Geography (1 unit)

Course Description: Major current research themes and trends in geography.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

GEO 200AN – Geographical Concepts (4 units)

Course Description: Concepts and thematic content of the discipline, including contemporary research questions. A brief review of the history of geographic thought and practice is done at the beginning of the course.

Prerequisite(s): Graduate standing in Geography or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

GEO 200BN – Theory & Practice of Geography (4 units)

Course Description: Development, application, and philosophical background of theory in discipline of geography and geographical knowledge production. Similarities and differences in theories employed in physical and human geography and cartography. Geographic contributions to interdisciplinary theory bridging biophysical sciences, social sciences, and humanities.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Limited to 20 students.

Grade Mode: Letter.

GEO 200CN – Quantitative Geography (4 units)

Course Description: Provides an overview of quantitative approaches in spatial data analysis. Overview of different approaches used for inference, modeling, and prediction. Also learn how to write computer programs to implement these methods.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Limited to 25 students.

Grade Mode: Letter.

GEO 200DN – Socio-Spatial Analysis in Geography (4 units)

Course Description: Introduction to methodologies of socio-spatial analysis in interviews, and ethnographic fieldwork. Students develop a critical understanding of different methodological and theoretical approaches, and their appropriate applications in overall research design.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Limited to 25 students.

Grade Mode: Letter.

GEO 200E – Advanced Research Design in Geography (2 units)

Course Description: Helps Ph.D. students develop their research question, design their research plan and complete a full dissertation research proposal.

Prerequisite(s): GEO 200AN; GEO 200BN; GEO 200CN; GEO 200DN; graduate standing.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Limited to 15 students.

Grade Mode: Letter.

GEO 201 – Sources & General Literature of Geography (4 units)

Course Description: Designed for students preparing for higher degrees in geography.

Prerequisite(s): Consent of instructor. Graduate standing in geography.

Learning Activities: Discussion 4 hour(s).

Repeat Credit: May be repeated in one or more subfields: physical, cultural, economic, urban, historical, political, conservation, regional geography.

Grade Mode: Letter.

GEO 210 – Topics in Biogeography (3 units)

Course Description: Current topics in historical and ecological biogeography, including macroecology and areography, GIS and remote sensing, phylogeography, vegetation, plant and animal community and species geography. Systematics, climate change, and conservation will be addressed.

Prerequisite(s): EVE 147 or WFC 156 (can be concurrent); or equivalent.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Consent of instructor required for undergraduates.

Grade Mode: Letter.

GEO 211 – Physical Geography Traditions & Methods (3 units)

Course Description: Discussion of the physical science tradition in geography, including key concepts and current research in climatology, geomorphology, soils geography, biogeography, climate change, watershed science, and coastal studies. Research paradigms, programs, and methods as used by physical geographers will be discussed.

Prerequisite(s): Introductory course in physical geography.

Learning Activities: Discussion/Laboratory 2 hour(s), Term Paper.

Enrollment Restriction(s): Graduate-level standing in geography or related discipline.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Letter.

GEO 212 – Water Resource Management (4 units)

Course Description: Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management.

Prerequisite(s): ECI 114; ECI 142; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Cross Listing: ECI 267.

Grade Mode: Letter.

GEO 214 – Seminar in Geographical Ecology (2 units)

Course Description: Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics.

Prerequisite(s): EVE 100 or EVE 101; or consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Cross Listing: PBG 296.

Grade Mode: Satisfactory/Unsatisfactory only.

GEO 215 – What is Infrastructure; Critical Infrastructure Studies (3 units)

Course Description: Introduction to interdisciplinary scholarship and design on expanding conceptions of infrastructure, that include social, technical, ecological, political and aesthetic dimensions of the medium. Focus on application of theory to case studies and thinking through landscape as infrastructure.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to graduate standing or consent of instructor.

Cross Listing: LDA 215.

Grade Mode: Letter.

GEO 220 – Topics in Human Geography (4 units)

Course Description: Examination of philosophy and theory in human geography with an emphasis on contemporary debates and concepts in social, cultural, humanistic, political, and economic geographies. Specific discussion of space, place, scale and landscape; material and imagined geographies.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Enrollment Restriction(s): Limited to 20 students.

Grade Mode: Letter.

GEO 230 – Citizenship, Democracy, & Public Space (4 units)

Course Description: Introduction to seminal works in political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of critical perspective regarding restructuring of public space in a pluralistic and global culture; discussion of contemporary case studies.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Cross Listing: LDA 200.

Grade Mode: Letter.

GEO 233 – Urban Planning & Design (4 units)

Course Description: Regulation, design, and development of the built landscape, planning and land development processes, zoning and subdivision regulation, site planning, urban design goals and methods, public participation strategies, creatively designing landscapes to meet community and ecological goals.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Limited to graduate students.

Cross Listing: LDA 205.

Grade Mode: Letter.

GEO 236 – Transportation Planning & Policy (4 units)

Course Description: Transportation planning process at the regional level, including the role of federal policy in shaping regional transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of potential solutions and strategies.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Limited enrollment.

Credit Limitation(s): Students taking this course previously as TTP 289 cannot repeat it for credit; taking other TTP 289 offerings does not preclude taking TTP 220 for credit.

Cross Listing: TTP 220.

Grade Mode: Letter.

GEO 240 – Community Development Theory (4 units)

Course Description: Introduction to theories of community development and different concepts of community, poverty, and development.

Emphasis on building theory, linking applied development techniques to theory, evaluating development policy, and examining case studies of community development organizations and projects.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: CRD 240.

Grade Mode: Letter.

GEO 241 – The Economics of Community Development (4 units)

Course Description: Economic theories and methods of planning for communities. Human resources, community services and infrastructure, industrialization and technological change, and regional growth. The community's role in the greater economy.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 4 hour(s).

Cross Listing: CRD 241.

Grade Mode: Letter.

GEO 245 – The Political Economy of Urban & Regional Development (4 units)

Course Description: How global, political and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California.

Prerequisite(s): CRD 157; CRD 244; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Cross Listing: CRD 245.

Grade Mode: Letter.

GEO 246 – The Political Economy of Transnational Migration (4 units)

Course Description: Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 4 hour(s).

Cross Listing: CRD 246.

Grade Mode: Letter.

GEO 248 – Social Policy, Welfare Theories & Communities (4 units)

Course Description: Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects. Analysis of specific social issues within the U.S./California context.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 4 hour(s).

Credit Limitation(s): Not open for credit to students having completed CRD 248A and CRD 248B.

Cross Listing: CRD 248.

Grade Mode: Letter.

GEO 254 – Political Ecology of Community Development (4 units)

Course Description: Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamic relationship between communities and land-based resources, and between social groups. Cases of community conservation and development in developing and industrialized countries.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 4 hour(s).

Cross Listing: CRD 244.

Grade Mode: Letter.

GEO 260 – Global Political Ecology (4 units)

Course Description: Background, genesis, current debates in political ecology. Examination of political-economic and social-cultural causes of environmental change. Introduction to development theory, globalization, history of science and power/knowledge. Cases of social movements, justice, resistance, gender, race and class. Focus outside North America.

Learning Activities: Seminar 3 hour(s), Term Paper/Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students only or consent of instructor.

Grade Mode: Letter.

GEO 279 – Exploring Data from Built Environment Using R (4 units)

Course Description: Introduction to modern data science, specifically data acquisition, exploratory data, visualization, and beginning data analysis using R. Emphasizes computational reasoning and working with tabular and non-standard data. Focus will be on data generated in the built environment.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: ECI 254.

Grade Mode: Letter.

GEO 280 – Field Studies in Geography (3 units)

Course Description: A topic or sub-discipline of geography forms the theme for the course in any given offering, with a focus on current research on this topic, field methodologies, and data analysis in human and physical geography.

Prerequisite(s): Consent of instructor; undergraduate or graduate coursework in geography.

Learning Activities: Lecture 1 hour(s), Fieldwork 6 hour(s).

Enrollment Restriction(s): Limited to 20 students.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

GEO 281 – Transportation Survey Methods (4 units)

Course Description: Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis.

Prerequisite(s): (STA 013 or STA 013Y); ECI 251 recommended.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ECI 255.

Cross Listing: TTP 200.

Grade Mode: Letter.

GEO 286 – Selected Topics in Environmental Remote Sensing (3 units)

Course Description: In depth investigation of advanced topics in remote sensing applications, measurements, and theory.

Prerequisite(s): ERS 186; and consent of instructor, or equivalent required; ERS 186L recommended.

Learning Activities: Discussion 2 hour(s), Lecture 1 hour(s), Project.

Repeat Credit: May be repeated.

Cross Listing: HYD 286.

Grade Mode: Letter.

GEO 290 – Seminar in Geography (1-3 units)

Course Description: Seminar focuses on specified topical areas within geography, which will vary quarter to quarter. Students expected to present an oral seminar on an aspect of the general topic under discussion.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 1-3 hour(s).

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

GEO 291 – Seminar in Cultural Geography (4 units)

Course Description: Seminar in cultural geography.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

GEO 293 – Graduate Internship (1-12 units)

Course Description: Individually designed, supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

GEO 295 – Seminar in Urban Geography (4 units)

Course Description: Seminar in urban geography.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

GEO 297 – Graduate Group in Geography (2 units)

Course Description: Seminars by UC Davis faculty and prominent national and international scholars; research presentations by Graduate Group in Geography Ph.D. candidates.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 1 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

GEO 298 – Group Study (1-5 units)*Course Description:* Group study.*Prerequisite(s):* Graduate standing or consent of instructor.*Learning Activities:* Seminar 1 hour(s).*Repeat Credit:* May be repeated 10 unit(s).*Grade Mode:* Satisfactory/Unsatisfactory only.**GEO 299 – Research (1-12 units)***Course Description:* Research.*Learning Activities:* Variable.*Grade Mode:* Satisfactory/Unsatisfactory only.**GEO 299D – Individual Study (1-12 units)***Course Description:* Individual study.*Prerequisite(s):* Consent of instructor; graduate student status in Geography.*Learning Activities:* Variable.*Repeat Credit:* May be repeated.*Grade Mode:* Satisfactory/Unsatisfactory only.**Geology (GEL)**

College of Letters & Science

GEL 001 – The Earth (4 units)*Course Description:* Introduction to the study of the Earth. Earth's physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources.*Learning Activities:* Lecture 3 hour(s), Discussion 1 hour(s).*Credit Limitation(s):* Not open for credit to students who have taken GEL 050; only 2 credits for students who have taken GEL 002.*Grade Mode:* Letter.*General Education:* Science & Engineering (SE); Scientific Literacy (SL).**GEL 002 – Earth System Science (3 units)***Course Description:* Solid and fluid earth and its place in the solar system. How the solid earth interacts with the atmosphere, hydrosphere, biosphere, and extraterrestrial environment.*Learning Activities:* Lecture 3 hour(s).*Credit Limitation(s):* Only 2 units credit for students who have taken GEL 050; only 2 units credit for students who have taken GEL 001.*Grade Mode:* Letter.*General Education:* Science & Engineering (SE); Scientific Literacy (SL).**GEL 002G – Earth System Science Discussion (1 unit)***Course Description:* Small group discussion and preparation of short papers for GEL 002.*Prerequisite(s):* GEL 002 (can be concurrent); GEL 002 required concurrently.*Learning Activities:* Discussion 1 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE).**GEL 003 – History of Life (3 units)***Course Description:* The history of life during the three and onehalf billion years from its origin to the present day. Origin of life and processes of evolution; how to visualize and understand living organisms from their fossil remains.*Prerequisite(s):* GEL 001 recommended.*Learning Activities:* Lecture 3 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE).**GEL 003G – History of Life: Discussion (1 unit)***Course Description:* Small group discussion and preparation of short papers for GEL 003. GE credit with concurrent enrollment in GEL 003: WE.*Prerequisite(s):* GEL 003 (can be concurrent); GEL 003 required concurrently.*Learning Activities:* Discussion 1 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE).**GEL 003L – History of Life Laboratory (1 unit)***Course Description:* Exercises in understanding fossils as the clues to interpreting ancient life, including their functional morphology, paleoecology, and evolution.*Prerequisite(s):* GEL 003 (can be concurrent); GEL 003 required concurrently.*Learning Activities:* Laboratory 3 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE).**GEL 004 – Evolution: Science & World View (3 units)***Course Description:* Introduction to biological evolution. Emphasis on historical development, major lines of evidence and causes of evolution; relationships between evolution and Earth history; the impact of evolutionary thought on other disciplines.*Learning Activities:* Lecture 2 hour(s), Discussion 1 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE).**GEL 005 – Mass Extinctions: Past & Future (2 units)***Course Description:* The big five mass extinctions that occurred in deep-time, with comparisons to the extinctions that are occurring currently. Similarities and dissimilarities between the past and modern extinctions.*Prerequisite(s):* Ability to interpret a table of data.*Learning Activities:* Lecture 2 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE).**GEL 009 – Geology Field Experience (1 unit)***Course Description:* Exposure to geologic features and earth processes in the field. Experiential instruction in earth-science concepts, spatial visualization, landscape evolution, deep time, critical thinking skills, and integrative scientific themes. One 4-5 day field trip.*Prerequisite(s):* Consent of instructor; at least one previous GEL class, or concurrent enrollment.*Learning Activities:* Fieldwork.*Enrollment Restriction(s):* Pass One open to non-Geology Majors only.*Repeat Credit:* May be repeated 1 time(s) when field trip destination differs.*Grade Mode:* Pass/No Pass only.*General Education:* Science & Engineering (SE).

GEL 010 – Modern & Ancient Global Environmental Change (3 units)

Course Description: Fundamental scientific concepts underlying issues such as global warming, pollution, and the future of nonsustainable resources presented in the context of anthropogenic processes as well as natural forcing of paleoenvironmental change throughout Earth's history.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

GEL 012 – Evolution & Paleobiology of Dinosaurs (2 units)

Course Description: Introduction to evolutionary biology, paleobiology, ecology and paleoecology, using dinosaurs as case studies.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 016 – The Oceans (3 units)

Course Description: Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken GEL 116.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 016G – The Oceans: Discussion (2 units)

Course Description: Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of term paper.

Prerequisite(s): GEL 016 (can be concurrent) or GEL 016V (can be concurrent).

Learning Activities: Discussion/Laboratory 2 hour(s), Term Paper/ Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken GEL 116G.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 016V – The Oceans (3 units)

Course Description: Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken GEL 116.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 017 – Earthquakes & Other Earth Hazards (2 units)

Course Description: Impact of earthquakes, tsunami, volcanoes, landslides, and floods on humans, structures, and the environment. Discussion of the causes and effects of disasters and catastrophes, and on prediction, preparation, and mitigation of natural hazards.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 018 – Energy & the Environment (3 units)

Course Description: Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current advantages and disadvantages, future prospects. Oil, natural gas, coal, nuclear, wind, geothermal, water, tidal, solar, hydrogen, and other sources of energy for the 21st century.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 018V – Energy & the Environment (3 units)

Course Description: Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current advantages and disadvantages, future prospects. Oil, natural gas, coal, nuclear, wind, geothermal, water, tidal, solar, hydrogen, and other sources of energy for the 21st century.

Learning Activities: Web Virtual Lecture 1.50 hour(s), Web Electronic Discussion 1.50 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 020 – Geology of California (2 units)

Course Description: The geologic history of California, the origin of rocks and the environments in which they were formed, the structure of the rocks and the interpretation of their structural history, mineral resources, and appreciation of the California landscape. Offered in alternate years.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

GEL 025 – Geology of National Parks (3 units)

Course Description: Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 025V – Geology of National Parks (3 units)

Course Description: Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): No credit for students who have completed GEL 025.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 028 – Astrobiology (3 units)

Course Description: Origin, evolution and distribution of life in our solar system and the Universe. Detecting habitable worlds, Drake equations, necessities and raw materials for life, philosophical implications of the search for life elsewhere.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 030 – Fractals, Chaos & Complexity (3 units)

This version has ended; see updated course, below.

Course Description: Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years.

Prerequisite(s): MAT 016A or MAT 017A or MAT 021A.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: PHY 030.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

GEL 030 – Fractals, Chaos & Complexity (3 units)

Course Description: Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years.

Prerequisite(s): MAT 016A or MAT 017A or MAT 019A or MAT 021A.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: PHY 030.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

This course version is effective from, and including: Fall Quarter 2024.

GEL 032 – Volcanoes (3 units)

Course Description: Role of eruptions, and eruptive products of volcanoes in shaping the planet's surface, influencing its environment, and providing essential human resources.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 035 – Rivers (3 units)

Course Description: Introduction to geomorphology, climate and geology of rivers and watersheds, with case examples from California. Assessment of impacts of logging, agriculture, mining, urbanization and water supply on river processes. Optional river field trips.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 036 – The Solar System (4 units)

Course Description: Nature of the sun, moon, and planets as determined by recent manned and unmanned exploration of the solar system. Comparison of terrestrial, lunar, and planetary geological processes. Search for life on other planets. Origin and evolution of the solar system. (Former course GEL 113 & GEL 113G.)

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL); Writing Experience (WE).

GEL 050 – Physical Geology (3 units)

Course Description: The Earth, its materials, its internal and external processes, its development through time by sea-floor spreading and global plate tectonics.

Prerequisite(s): High school physics and chemistry.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Students with credit for GEL 001 or the equivalent may receive only 2 units for GEL 050.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 050L – Physical Geology Laboratory (2 units)

Course Description: Introduction to classification and recognition of minerals and rocks and to interpretation of topographic and geologic maps and aerial photographs.

Prerequisite(s): GEL 050 (can be concurrent).

Learning Activities: Laboratory 6 hour(s).

Credit Limitation(s): Students with credit for GEL 001L or the equivalent may receive only 1 unit for GEL 050L.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 053 – Introduction to Geobiology (3 units)

Course Description: Introduction to interactions between Earth and life with an emphasis on how metabolism, cellular processes, evolution and ecology emerged within natural environments and have changed Earth's surface.

Prerequisite(s): GEL 001 or GEL 002 or GEL 050.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 055 – Introduction to Geochemistry (3 units)

Course Description: Introduction to key geochemical principles in Earth & Planetary Sciences; chemical bonding, geochemical affinity of elements, redox & acid base equilibria in geological systems, radioactive decay, isotopic fractionation and paleoclimate records.

Prerequisite(s): (GEL 001 or GEL 002 or GEL 050); (CHE 002A or CHE 002AH); (CHE 002B or CHE 002BH).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 056 – Introduction to Geophysics (4 units)

Course Description: Introduction to geophysical topics essential to all aspects of Earth and planetary sciences: theory of plate tectonics, gravitational field of planets, diffusion, rheology, seismology, and earthquakes.

Prerequisite(s): (GEL 001 or GEL 050); (PHY 007A or PHY 009A); (PHY 007B or PHY 009B).

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 060 – Earth Materials: Introduction (4 units)

Course Description: Physical and chemical properties of Earth materials; structure, chemical composition, and identification of rock-forming minerals; mineral-rock associations, and their origin from silicate liquids, aqueous fluids, and solid state transformations.

Prerequisite(s): (CHE 002A or CHE 002AH or CHE 004A); (CHE 002B or CHE 002BH or CHE 004B); (MAT 016A or MAT 017A or MAT 019A or MAT 021A); (GEL 001 or GEL 050); GEL 050L.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 062 – Optical Mineralogy (2 units)

Course Description: Optical properties of inorganic crystals; techniques of mineral identification using the polarizing microscope; strategies for studying rocks in thin section.

Prerequisite(s): GEL 060 (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 081 – Learning in Science & Mathematics (2 units)

Course Description: Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 2 hour(s).

Enrollment Restriction(s): Limited to 26 students per section.

Cross Listing: EDU 081.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS); Visual Literacy (VL); Writing Experience (WE).

GEL 092 – Internship (1-12 units)

Course Description: Work-learn experience on and off campus in all subject areas offered by the department. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

GEL 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated 3 time(s) when content differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

GEL 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

GEL 101 – Structural Geology (3 units)

Course Description: Study of processes and products of rock deformation. Introduction to structural geology through a survey of the features and geometries of faults and folds, techniques of strain analysis, and continuum mechanics of rock deformation.

Prerequisite(s): GEL 050; GEL 050L; (PHY 007A or PHY 009A); (MAT 016A or MAT 017A or MAT 019A or MAT 021A); consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Limited to 35 students.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 101L – Structural Geology Lab (2 units)

Course Description: Laboratory study of the processes and products of rock deformation. Introduction to the practice of structural geology through observations and analysis of rock deformation, including field measurement techniques and geologic mapping.

Prerequisite(s): GEL 050; GEL 050L; (PHY 007A or PHY 009A); GEL 101 (can be concurrent); consent of instructor.

Learning Activities: Laboratory 6 hour(s), Fieldwork 2 hour(s).

Enrollment Restriction(s): Limited to 15 students per session.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

GEL 103 – Field Geology (4 units)

Course Description: Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. Seven-eight days for field trips will occur on weekends during the quarter.

Prerequisite(s): GEL 101; GEL 101L.

Learning Activities: Lecture 1 hour(s), Fieldwork 6 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

GEL 105 – Earth Materials: Igneous Rocks (4 units)

Course Description: Origin and occurrence of igneous rocks. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section.

Prerequisite(s): GEL 060; (MAT 016A or MAT 017A or MAT 019A or MAT 021A); CHE 002B (can be concurrent).

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

GEL 106 – Earth Materials: Metamorphic Rocks (4 units)

Course Description: Physical and chemical properties of metamorphic rocks; interpretation of metamorphic environments. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section.

Prerequisite(s): GEL 105.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 107 – Earth History: Paleobiology (3 units)

Course Description: Evolution and ecological structure of the biosphere from the origin of life to the present.

Prerequisite(s): GEL 003 or GEL 053 or BIS 002A or BIS 002B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 107L – Earth History: Paleobiology Laboratory (2 units)

Course Description: Exercises in determining the ecological functions and evolution of individuals, populations, and communities of fossil organisms in field and laboratory.

Prerequisite(s): GEL 107 (can be concurrent).

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 108 – Earth History: Paleoclimates (3 units)

Course Description: Geological and environmental factors controlling climate change, the greenhouse effect with a detailed analysis of the history of Earth's climate fluctuations over the last 600 million years. Past and present climate records are used to examine potential future climatic scenarios.

Prerequisite(s): (GEL 001 or GEL 050 or GEL 116N or ESP 116N); CHE 002A; consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

GEL 109 – Earth History: Sediments & Strata (3 units)

Course Description: Sediment formation, transport, and deposition.

Interpretations of sedimentary processes across landscapes and through time in the context of environmental and geological problems. Reconstruction of ancient environmental change from sedimentary rocks.

Prerequisite(s): GEL 001 or GEL 050.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 109L – Earth History: Sediments & Strata Laboratory (2 units)

Course Description: Methods of stratigraphic and sedimentologic analysis of modern and ancient sediments. Identification of major sediment and sedimentary rock types. Outcrop and subsurface analysis of sedimentary basins. GE credit with concurrent enrollment in GEL 109. Includes four one-day field trips.

Prerequisite(s): GEL 050L; GEL 109 (can be concurrent).

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

GEL 110A – Summer Field Geology: Structures & Neotectonics (4 units)

Course Description: Advanced application of geologic field methods to the study of deformed rocks and their interpretation in terms of tectonic processes. Includes development and interpretation of geologic maps, cross sections and stratigraphic sections. Six days/week for three weeks in an off-campus location.

Prerequisite(s): GEL 103; GEL 060 recommended.

Learning Activities: Fieldwork 40 hour(s).

Credit Limitation(s): Not open for credit to students who have taken GEL 110.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

GEL 110B – Summer Field Geology: Volcanology (4 units)

Course Description: Advanced application of geologic field methods to the study of volcanic and plutonic rocks and their interpretation in terms of igneous processes. Includes development and interpretation of geologic maps, cross sections, stratigraphic sections, and outcrop scale observations. Six days/week for three weeks in an off-campus location.

Prerequisite(s): GEL 105; GEL 109.

Learning Activities: Fieldwork 40 hour(s).

Credit Limitation(s): Not open for credit to students who have taken GEL 110.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

GEL 110C – Summer Field Geology: Special Projects (4 units)

Course Description: Advanced application of geologic field methods to a special project location and the interpretation of field observations in terms of its geologic processes and geologic history. Variable field location and specific activities. Six days/week for three weeks in an off-campus location.

Prerequisite(s): Consent of instructor.

Learning Activities: Fieldwork 40 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

GEL 115 – Earth Science, History, & People (4 units)

Course Description: Study of interplay between the Earth and its human inhabitants through history, including consideration of acute events such as earthquakes and eruptions as well as the geology of resources, topography, and water.

Prerequisite(s): GEL 001 or GEL 050.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Writing Experience (WE).

GEL 116N – Oceanography (3 units)

Course Description: Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip.

Prerequisite(s): GEL 001 or GEL 002 or GEL 016 or GEL 016V or GEL 050.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s), Fieldwork.

Cross Listing: ESP 116N.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 120 – Origins: From the Big Bang to Today (3 units)

Course Description: Long-term and large-scale perspectives on the origins of the universe, stars and planets, life, human evolution, the rise of civilization and the modern world. Multi-disciplinary approach to "Big History" involving cosmology, astronomy, geology, climatology, biology, anthropology, archeology and traditional history.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 130 – Non-Renewable Natural Resources (3 units)

Course Description: Origin, occurrence, and distribution of non-renewable resources, including metallic, nonmetallic, and energy-producing materials. Problems of discovery, production, and management. Estimations and limitations of reserves, and their sociological, political, and economic effects.

Prerequisite(s): GEL 001 or GEL 050.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 131 – Risk: Natural Hazards & Related Phenomena (3 units)

Course Description: Risk, prediction, prevention and response for earthquakes, volcanic eruptions, landslides, floods, storms, fires, impacts, global warming.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 132 – Introductory Inorganic Geochemistry (3 units)

Course Description: Nucleosynthesis of chemical elements, physical and chemical properties of elements, ionic substitution, elemental partition, distribution and transport among planetary materials, basic thermodynamics and phase diagrams, isotopic geochronometers, stable isotope fractionation, mixing and dilution, advection and diffusion, geochemical cycles.

Prerequisite(s): GEL 060 (can be concurrent); CHE 002B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

GEL 133 – Environmental Geochemistry (3 units)

Course Description: Introduction to Earth surface processes with a focus on topics of current environmental interest such as nuclear power and waste disposal, acid mine drainage, carbon sequestration, history of polar ice sheets and sea level change.

Prerequisite(s): CHE 002A; CHE 002B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

GEL 134 – Environmental Geology & Land Use Planning (3 units)

Course Description: Geologic aspects of land use and development planning. Geologic problems concerning volcanic and earthquake hazards, land stability, floods, erosion, coastal hazards, non-renewable resource extraction, waste disposal, water resources.

Prerequisite(s): GEL 001 or GEL 050; consent of instructor.; one course in Geology (GEL).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

GEL 136 – Ecogeomorphology of Rivers & Streams (5 units)

Course Description: Integrative multidisciplinary field analysis of streams. Class project examines hydrology, geomorphology, water quality and aquatic and riparian ecology of degraded and pristine stream systems. Includes cooperative two-week field survey in remote wilderness settings with students from diverse scientific backgrounds.

Prerequisite(s): Consent of instructor. Upper division or graduate standing in any physical science, biological science, or engineering.

Learning Activities: Lecture 1 hour(s), Discussion/Laboratory 2 hour(s), Fieldwork, Term Paper.

Enrollment Restriction(s): Restricted to advanced students in the physical sciences, biological sciences, or engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

GEL 138 – Introductory Volcanology (4 units)

Course Description: Principles of physical and chemical volcanology. Taught in a volcanically active setting (e.g., Hawaii) with a strong field component.

Prerequisite(s): GEL 060; GEL 109; consent of instructor.

Learning Activities: Lecture 2 hour(s), Fieldwork 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 139 – Rivers: Form, Function & Management (4 units)

Course Description: Analysis of river form and processes, emphasis on fluvial geomorphology, and river and stream restoration; case studies to illustrate concepts and applications. Two weekend field trips required. Offered irregularly.

Prerequisite(s): GEL 050 or GEL 050L; MAT 016B or MAT 017B or MAT 019B or MAT 021B recommended.

Learning Activities: Lecture 3 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 140 – Introduction to Process Geomorphology (4 units)

Course Description: Quantitative description and interpretation of landscapes with emphasis on the relationships between physical processes, mass conservation, and landform evolution. Topics covered include physical & chemical weathering, hillslopes, debris flows, fluvial systems, alluvial fans, pedogenesis, eolian transport, glaciation and Quaternary geochronology.

Prerequisite(s): (GEL 001 or GEL 050); (MAT 016B or MAT 017B or MAT 019B or MAT 021B).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

GEL 141 – Evolutionary History of Vertebrates (3 units)

Course Description: Evolutionary history of vertebrates; fossil record and phylogeny; timing of major evolutionary events; appearance of major vertebrate groups; physical constraints in vertebrate evolution; paleobiogeography of vertebrates; effect of continental movement on vertebrate evolution; dinosaurs and other strange vertebrates. Offered in alternate years.

Prerequisite(s): GEL 003 or GEL 053 or BIS 002A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 141L – Evolutionary History of Vertebrates Laboratory (1 unit)

Course Description: Augments lecture GEL 141 through handling of specimens enabling in-person examination of three dimensional features observed in vertebrate skeletons, both fossil and living. Offered in alternate years.

Prerequisite(s): GEL 141 (can be concurrent).

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 142 – Basin Analysis (3 units)

Course Description: Analysis of sedimentary basins from initiation to maturity, including controls on sedimentary fill, subsidence analysis, sequence stratigraphy, core logs, and applications to petroleum exploration and hydrology. One two-day field trip. Offered irregularly.

Prerequisite(s): GEL 050; GEL 050L; GEL 109.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

GEL 143 – Advanced Igneous Petrology (5 units)

Course Description: Physical and chemical properties of magmatic environments and processes of igneous rock formation. Laboratory study of representative igneous rocks. Offered irregularly.

Prerequisite(s): GEL 105; (MAT 016C or MAT 017C or MAT 019C or MAT 021C); (CHE 002C or GEL 055).

Learning Activities: Lecture 3 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 144 – Historical Ecology (3 units)

Course Description: Ancient ecosystems and the factors that caused them to change. Species, expansion, evolution of new modes of life, geologically induced variations in resource supply, and extinction provide historical perspective on the biosphere of future.

Prerequisite(s): Upper division course in environmental science or ecology, or an introductory course in paleobiology.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

GEL 145 – Advanced Metamorphic Petrology (5 units)

Course Description: Metamorphic processes and the origin of metamorphic rocks. Laboratory study of representative rock suites. Offered irregularly.

Prerequisite(s): GEL 106; (HYD 134 or CHE 002C or GEL 055); (MAT 016C or MAT 017C or MAT 019C or MAT 021C).

Learning Activities: Lecture 3 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 146 – Radiogenic Isotope Geochemistry & Cosmochemistry (3 units)

Course Description: Basic principles of nuclear chemistry and physics applied to geology to determine the ages of terrestrial rocks, meteorites, archeological objects, age of the Earth, to trace geological/environmental processes, and explain formation of the chemical elements in the Universe. Offered irregularly.

Prerequisite(s): (CHE 002C or GEL 055); (PHY 007C or PHY 009C or GEL 056); (MAT 016C or MAT 017C or MAT 019C or MAT 021C).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

GEL 147 – Geology of Ore Deposits (4 units)

Course Description: Tectonic, lithologic and geochemical setting of major metallic ore deposit types emphasizing ore deposit genesis, water/rock interaction and the environmental effects of mining. Offered irregularly.

Prerequisite(s): (CHE 002C or GEL 055 or HYD 134); GEL 060; GEL 105.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 148 – Stable Isotopes & Geochemical Tracers (3 units)

Course Description: Use of oxygen and hydrogen isotopes in defining hydrologic processes; carbon, nitrogen, and sulfur isotopes as indicators of exchange between the lithosphere, hydrosphere, atmosphere and biosphere. Radiogenic, cosmogenic, and noble gas isotope tracers. Offered irregularly.

Prerequisite(s): (CHE 002C or GEL 055 or HYD 134); GEL 050; GEL 050L; GEL 060.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

GEL 149 – Geothermal Systems (3 units)

Course Description: Geology, geochemistry, and geophysics of geothermal systems, including electrical power generation and direct use applications. Includes one day field trip on a weekend during the quarter. Offered irregularly.

Prerequisite(s): GEL 050; GEL 050L; CHE 002B.

Learning Activities: Lecture 3 hour(s), Fieldwork.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 150A – Physical & Chemical Oceanography (4 units)

Course Description: Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles.

Prerequisite(s): (ESP 116N or GEL 116N); (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 019C or MAT 021C); (CHE 002C or GEL 055); consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ESP 150A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

GEL 150B – Geological Oceanography (3 units)

Course Description: Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory.

Prerequisite(s): GEL 050 or (GEL 116N or ESP 116N).

Learning Activities: Lecture 3 hour(s).

Cross Listing: ESP 150B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 150C – Biological Oceanography (4 units)

Course Description: Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. One weekend field trip required.

Prerequisite(s): BIS 002A; consent of instructor; a course in general ecology.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Fieldwork.

Cross Listing: ESP 150C.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 152 – Paleobiology of Protista (4 units)

Course Description: Morphology, systematics, evolution, and ecology of single-celled organisms that are preserved in the fossil record. Offered irregularly.

Prerequisite(s): GEL 107 or BIS 002A; consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 156 – Hydrogeology & Contaminant Transport (5 units)

Course Description: Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models.

Prerequisite(s): HYD 144 or ECI 144; or the equivalent.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Term Paper 1 hour(s).

Cross Listing: HYD 146.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 160 – Geological Data Analysis (3 units)

Course Description: Introduction to quantitative methods in analyzing geological data including basic principles of statistics and probability, error analysis, hypothesis testing, inverse theory, time series analysis and directional data analyses.

Prerequisite(s): (MAT 016A (can be concurrent) or MAT 017A (can be concurrent) or MAT 019A { can be concurrent } or MAT 021A (can be concurrent)); GEL 056; or prior introductory level programming in Python, Matlab, or R.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

GEL 161 – Geophysical Field Methods (3 units)

Course Description: Geophysical methods applied to determining subsurface structure in tectonics, hydrogeology, geotechnical engineering, and hydrocarbon & mineral exploration. Theory, survey design & interpretation of gravity, electrical resistivity, electromagnetic, reflection & refraction seismology, and ground-penetrating radar measurements.

Prerequisite(s): (GEL 001 C- or better or GEL 050 C- or better); (MAT 016C C- or better or MAT 017C C- or better or MAT 019C C- or better or MAT 021C C- or better); (PHY 007A C- or better or PHY 009A C- or better); (PHY 007B C- or better or PHY 009B C- or better); (GEL 056 C- or better or PHY 007C C- or better or PHY 009C C- or better).

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Quantitative Literacy (QL); Science & Engineering (SE); Scientific Literacy (SL).

GEL 162 – Geophysics of the Solid Earth (3 units)

Course Description: Theory and use of physics in the study of the solid earth. Gravity, magnetism, paleomagnetism, and heat flow. Application to the interpretation of the regional and large-scale structure of the earth and to plate tectonics. Offered irregularly.

Prerequisite(s): (MAT 016C or MAT 017C or MAT 019C or MAT 021C); (GEL 056 or PHY 007C or PHY 009C).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

GEL 163 – Planetary Geology & Geophysics (3 units)

Course Description: Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft.

Prerequisite(s): (GEL 001 or GEL 002 or GEL 028 or GEL 036 or GEL 050 or AST 010G or AST 010L or AST 010S or AST 025); (MAT 016A or MAT 017A or MAT 019A or MAT 021A); (PHY 007A or PHY 009A); (PHY 007B or PHY 009B); (GEL 056 or PHY 007C or PHY 009C).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

GEL 175 – Advanced Field Geology (3 units)

Course Description: Advanced field studies of selected geologic terrains, interpretation and discussion of field observations. Offered irregularly.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 3 hour(s), Fieldwork 6 hour(s).

Repeat Credit: May be repeated 2 time(s) when instructors differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

GEL 181 – Teaching in Science & Mathematics (2 units)

Course Description: Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms.

Prerequisite(s): Consent of instructor; major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus. *Learning Activities:* Lecture/Discussion 2 hour(s), Fieldwork 2 hour(s).

Enrollment Restriction(s): Limited to 40 students per section.

Cross Listing: EDU 181.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS); Writing Experience (WE).

GEL 182 – Field Studies in Marine Geochemistry (2-8 units)

Course Description: Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. Offered irregularly.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 1-3 hour(s), Fieldwork 6-40 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

GEL 183 – Teaching High School Mathematics & Science (3 units)

Course Description: Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms.

Prerequisite(s): Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork.

Enrollment Restriction(s): Limited to 40 students per section.

Cross Listing: EDU 183.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

GEL 185A – Conceptual Integrated Science for Non-Science Majors: The Physical World (2 units)

Course Description: Conceptual, inquiry-based integrated science course. Topics in the Next Generation Science Standards. Elementary school level teaching practice. Physics, chemistry, and science inquiry.

Learning Activities: Lecture 1 hour(s), Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 185B – Conceptual Integrated Science for Non-Science Majors: Earth System Science (2 units)

Course Description: Conceptual, inquiry-based integrated science course. Topics in the Next Generation Science Standards. Elementary school level teaching practice. Earth, space and environmental science, and science inquiry.

Learning Activities: Lecture 1 hour(s), Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

GEL 186 – Facilitating Learning in STEM Classrooms (1 unit)

Course Description: STEM Learning Assistant Seminar. Theoretical and practical issues of effective teaching in discussion/labs: student-centered, active, cooperative learning environments, responsive teaching, and differentiated classroom instruction.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

GEL 190 – Seminar in Geology (1 unit)

Course Description: Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. Written abstracts.

Learning Activities: Discussion 1 hour(s), Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

GEL 192 – Internship in Geology (1-12 units)

Course Description: Supervised work experience in geology.

Prerequisite(s): Upper division standing; project approval prior to internship.

Learning Activities: Internship.

Repeat Credit: May be repeated 10 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

GEL 194A – Senior Thesis (3 units)

Course Description: Guided independent study of a selected topic, leading to the writing of a senior thesis.

Prerequisite(s): Open to Geology majors who have completed 135 units and who do not qualify for the Honors Program.

Learning Activities: Variable.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

GEL 194B – Senior Thesis (3 units)

Course Description: Guided independent study of a selected topic, leading to the writing of a senior thesis.

Prerequisite(s): Open to Geology majors who have completed 135 units and who do not qualify for the Honors Program.

Learning Activities: Variable.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

GEL 194HA – Senior Honors Project (3 units)

Course Description: Guided independent study of a selected topic, leading to the writing of an honors thesis.

Prerequisite(s): Open to Geology majors who have completed 135 units and who qualify for the Honors Program.

Learning Activities: Independent Study 9 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

GEL 194HB – Senior Honors Project (3 units)

Course Description: Guided independent study of a selected topic, leading to the writing of an honors thesis.

Prerequisite(s): Open to Geology majors who have completed 135 units and who qualify for the Honors Program.

Learning Activities: Independent Study 9 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

GEL 198 – Directed Group Study (1-5 units)

Course Description: Group study focused on topics in Geology.

Prerequisite(s): Senior standing in Geology or consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

GEL 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

GEL 205 – Advanced Field Stratigraphy (3 units)

Course Description: Fieldwork over spring break. Application of stratigraphic techniques to research problems. Collection, compilation, and interpretation of field data. Integration of data with models for deposition and interpretations of Earth history. Topics will vary. Offered irregularly.

Prerequisite(s): GEL 109; GEL 110; or consent of instructor; GEL 206 recommended.

Learning Activities: Lecture 1 hour(s), Fieldwork 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

GEL 206 – Stratigraphic Analysis (3 units)

Course Description: Topics in advanced methods of stratigraphic analysis, regional stratigraphy and sedimentation, and sedimentary basin analysis. Emphasis on techniques used to interpret stratigraphic record and on current issues in stratigraphy and sedimentation. Offered irregularly.

Prerequisite(s): GEL 109; GEL 109L; or consent of instructor; GEL 144 recommended.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

GEL 214 – Active Tectonics (3 units)

Course Description: Active deformation associated with faults, landslides, and volcanoes. Geodetic measurement techniques such as triangulation, trilateration, leveling, Global Positioning System (GPS), and radar interferometry. GPS data acquisition and analysis. Inversion of geodetic data and mechanical models of crustal deformation. Offered irregularly.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

GEL 216 – Tectonics (3 units)

Course Description: Nature and evolution of tectonic features of the Earth. Causes, consequences, and evolution of plate motion, with selected examples from the Earth's deformed belts. Offered irregularly.

Prerequisite(s): GEL 101; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

GEL 217 – Topics in Geophysics (3 units)

Course Description: Discussion and evaluation of current research in a given area of geophysics. Topic will change from year to year. Offered in alternate years.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s), Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

GEL 218 – Analysis of Structures in Deformed Rocks (3 units)

Course Description: Recent advances in the understanding and analysis of structures in brittlely and ductilely deformed rocks. Detailed investigation of the characteristics of the structures, models for their formation, and applications to inferring the kinematics of larger scale tectonics. Offered irregularly.

Prerequisite(s): GEL 101; GEL 101L; or consent of instructor.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

GEL 219 – Fracture & Flow of Rocks (3 units)

Course Description: Origins of those structures in rocks associated with brittle and ductile deformation. Theoretical analysis, using continuum mechanics, and experimental evidence for the origin of the structures with emphasis on deformational processes in the earth. Offered irregularly.

Prerequisite(s): GEL 101; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

GEL 220 – Mechanics of Geologic Structures (3 units)

Course Description: Development in tensor notation of the balance laws of continuum mechanics, and constitutive theories of elasticity, viscosity, and plasticity and their application to understanding development of geologic structures such as fractures, faults, dikes, folds, foliations, and boudinage. Offered irregularly.

Prerequisite(s): PHY 009A; MAT 021C; or consent of instructor; MAT 021D and (MAT 022A or MAT 027A or BIS 027A recommended.)

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

GEL 226 – Advanced Sedimentary Petrology (3 units)

Course Description: Advanced petrography and geochemistry of sediments and sedimentary rocks. Geochemical, textural and mineralogical evolution of sedimentary rocks reflecting depositional or burial processes. Laboratory work emphasizes thin section study of rocks. Offered irregularly.

Prerequisite(s): GEL 144; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

GEL 227 – Stable Isotopes Biogeochemistry (4 units)

Course Description: Discussion and application of stable isotope techniques for scientific research problems. Emphasizes carbon, oxygen, nitrogen, hydrogen and sulfur isotopes. Laboratory develops basic skills of cryogenic gas extraction and specific techniques for individual research using stable isotopes. Offered irregularly.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

GEL 228 – Topics in Paleoceanography (3 units)

Course Description: Critical discussion and review of selected topics in paleoceanography and paleoclimatology relating to the history of the processes controlling and affecting climate change and ocean circulation throughout the geologic record. Topics vary. Offered irregularly.

Prerequisite(s): GEL 108; GEL 150A; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

GEL 230 – Geomorphology & River Management (3 units)

Course Description: Impacts of management and land use activities on the geomorphology of rivers and streams. Evaluation and use of analytical tools for river assessment. Assessment of river and stream restoration strategies and emerging issues in river management.

Prerequisite(s): GEL 139; or equivalent; graduate standing.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

GEL 232 – Oceans & Climate Change (3 units)

Course Description: Modern climate change and linkages between the ocean-atmosphere-cryosphere-terrestrial climate system. Importance of the ocean in forcing climate change, and the impacts of anthropogenic processes on the ocean. Topics vary. Offered irregularly.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Letter.

GEL 235 – Surface Processes (3 units)

Course Description: Recent advances in the analysis of landforms and their evolution. Detailed investigation of the tools used to document surface processes. Evaluation of concepts and processes that govern landscape evolution. Offered irregularly.

Prerequisite(s): GEL 050; GEL 050L; MAT 016B or MAT 017B or MAT 019B or MAT 021B recommended.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

GEL 236 – Inverse Theory in Geology & Geophysics (3 units)

Course Description: Inversion of data for model parameters. Evaluation of parameter uncertainties. Linear and nonlinear problems for discrete and continuous models. Bakus-Gilbert inversion. Offered irregularly.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

GEL 238 – Theoretical Seismology (3 units)

Course Description: Elastodynamic wave equation. Greens functions and source representations. Ray theory. Plane and spherical waves and boundary conditions. Elastic wave propagation in stratified media.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Pass/Fail only.

GEL 240 – Geophysics of the Earth (3 units)

Course Description: Physics of the earth's crust, mantle, and core. Laplace's equation and spherical harmonic expression of gravity and magnetic fields. Elastic wave equation in geologic media. Body and surface seismic waves. Equations of state, thermal structure of the earth. Offered irregularly.

Prerequisite(s): PHY 009B; (MAT 022B or MAT 027B or BIS 027B).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

GEL 241 – Geomagnetism (3 units)

Course Description: Nature and origin of the Earth's magnetic field. Present field and recent secular variation. Spherical harmonic analysis. Paleosecular variation. Polarity transitions and geomagnetic excursions. Statistics of polarity intervals. Dynamo theory. Planetary magnetism. Offered irregularly.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

GEL 242 – Paleomagnetism (3 units)

Course Description: Principles and applications of paleomagnetism. Physical basis of rock and mineral magnetism. Field and laboratory techniques. Instrumentation. Analysis of paleomagnetic data. Statistical methods. Rock magnetic properties. Geological and geophysical applications. Offered irregularly.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

GEL 246 – Physical Chemistry of Metamorphic Processes (3 units)

Course Description: Physiochemical principles of metamorphic mineral assemblages and methods of interpreting the paragenesis of metamorphic rocks. Offered irregularly.

Prerequisite(s): GEL 145; CHE 110A; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

GEL 247 – Metamorphic Petrology Seminar (3 units)

Course Description: Selected topics in metamorphic petrology (e.g., mass transport processes, tectonic settings, geothermometry, thermal structure of metamorphic belts, regional studies). Offered irregularly.

Prerequisite(s): GEL 145; or consent of instructor; GEL 246 recommended.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 250 – Advanced Geochemistry Seminar (3 units)

Course Description: Critical review of selected topics in geochemistry including: ore genesis, hydrothermal and geothermal fluids, recent and ancient sediments, isotope geology, origin and chemistry of the oceans. Subject varies yearly depending on student interest.

Prerequisite(s): GEL 146; or consent of instructor.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

GEL 251 – Advanced Topics in Isotope Geochemistry & Cosmochemistry (3 units)

Course Description: Astrophysical context on origin of Solar System, synthesis of chemical elements, condensation sequence, star and planet formation, cosmochronology, building blocks of planets, development on planets' layered structure, atmosphere and hydrosphere and the role of comets/asteroids for volatile delivery. Offered irregularly.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) when topics differs.

Grade Mode: Letter.

GEL 253 – Current Topics in Igneous Petrology (3 units)

Course Description: Topical seminar designed to help graduate students develop and maintain familiarity with current and past literature related to igneous rock petrogenesis.

Prerequisite(s): GEL 143; or consent of instructor; graduate standing in Geology.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 254 – Physical Chemistry of Igneous Processes (3 units)

Course Description: Introduction of modern concepts in chemical thermodynamics and kinetics, and fluid dynamics of magmatic systems for graduate students in petrology. Offered irregularly.

Prerequisite(s): CHE 110A; GEL 143; and consent of instructor; GEL 143 or consent of instructor; CHE 110B and CHE 110C recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

GEL 255 – Experimental Petrology (3 units)

Course Description: Introduction to techniques and methods of design and executing experiments on Earth-forming minerals and rocks. Problems and examples from igneous and metamorphic petrology will be utilized. Offered irregularly.

Prerequisite(s): GEL 143; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

GEL 260 – Paleontology (3 units)

Course Description: Selected problems in paleontology. Subject to be studied will be decided at an organizational meeting. Offered irregularly.

Prerequisite(s): Graduate standing in geology or a biological science.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

GEL 261 – Paleobiology Graduate Seminar 1: Evolutionary Aspects (3 units)

Course Description: Treat one or more of several topics in paleobiology from a phylogenetic perspective, including major patterns in evolution, building the tree of life, extinction & phylogeny, phylogeny of major phyla, and the relation between taxonomy & phylogeny.

Prerequisite(s): Graduate standing in Geology or a biological science; qualified undergraduates will be accepted on an exception-only basis.

Learning Activities: Lecture 1 hour(s), Seminar 2 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

GEL 262 – Paleobiology Graduate Seminar: Methodological Aspects (3 units)

Course Description: One or more major methods used in the study of fossils: Morphometrics and three-dimensional reconstruction of fossils, phylogenetic methodology, the application of geochemical techniques, and electron microscopy.

Learning Activities: Lecture 1 hour(s), Seminar 2 hour(s).

Repeat Credit: May be repeated 4 time(s) when topic differs.

Grade Mode: Letter.

GEL 281N – Instrumental Techniques for Earth Scientists (3 units)

Course Description: Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research.

Prerequisite(s): (MAT 016A or MAT 017A or MAT 019A or MAT 021A); (MAT 016B or MAT 017B or MAT 019B or MAT 021B); (MAT 016C or MAT 017C or MAT 019C or MAT 021C); ((PHY 007A or PHY 009A); (PHY 007B or PHY 009B); (PHY 007C or PHY 009C)); or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

GEL 285 – Field Studies in Marine Geochemistry (2-8 units)

Course Description: Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of seafloor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 1-3 hour(s), Fieldwork 6-40 hour(s).

Grade Mode: Letter.

GEL 290 – Seminar in Geology (1 unit)

Course Description: Presentation and discussion of current topics in geology by visiting lecturers, staff, and students.

Learning Activities: Seminar 1 hour(s), Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 291 – Geology of the Sierra Nevada (1 unit)

Course Description: Short oral presentations by students and faculty concerning results of their past work and plans for future work in the Sierra. A written abstract is required following the format required at professional meetings. Offered irregularly.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 292 – River Forum (1 unit)

Course Description: Review and discussion of latest research and fundamental issues surrounding riverine systems, with emphasis on physical processes. Topics vary. Offered irregularly.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 293 – Geologic Event of the Week (1 unit)

Course Description: Seminar/discussion group to review and discuss recent earthquakes, volcanic eruptions, and other significant geologic events. The focus is on understanding the available observations, the physical processes behind each event, the geological setting, and societal consequences. Offered irregularly.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 0.50 hour(s), Discussion 0.50 hour(s).

Repeat Credit: May be repeated 3 time(s) up to 3 units.

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 294 – Structure/Tectonics Forum (1 unit)

Course Description: Seminar/discussion group to review and discuss latest research in structural geology and tectonics, and on-going research of participants. Topics will vary each quarter depending on the interests of the group. Occasional field trips to areas of current interest.

Prerequisite(s): Graduate student in geology or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 295 – Geophysics Forum (1 unit)

Course Description: Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. Offered irregularly.

Prerequisite(s): GEL 101; or consent of instructor.

Learning Activities: Seminar 0.50 hour(s), Discussion 0.50 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 296 – Advanced Problems in Tectonics (3 units)

Course Description: Seminar dealing with current problems in tectonics of selected regions. Topics will change from year to year. Emphasis on study of recent literature. Offered irregularly.

Prerequisite(s): GEL 101; consent of instructor.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 297 – Geophysics Forum (1 unit)

Course Description: Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. Offered irregularly.

Prerequisite(s): Graduate student status in the Geology Department, or consent of instructor.

Learning Activities: Seminar 0.50 hour(s), Discussion 0.50 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Letter.

GEL 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 390 – Methods of Teaching Geology (2 units)

Course Description: Introduction to graduate-level writing and undergraduate-level teaching skills in geology. Persuasive (proposal) writing workshop; discussions on campus teaching resources, presenting information, managing classroom dynamics, evaluating student performance. Participation in teaching program required for Ph.D. in Geology.

Prerequisite(s): Graduate student standing in Geology.

Learning Activities: Extensive Writing/Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 391 – Ethical Issues in Earth Science (1 unit)

Course Description: Reading and discussion of ethical issues arising in the earth sciences. Topics include scientific misconduct, gender equity in science, authorship of scientific papers, establishing priorities in research, and related issues. Offered irregularly.

Prerequisite(s): Graduate standing in Geology or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

GEL 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

German (GER)

College of Letters & Science

GER 001 – Elementary German (5 units)

Course Description: Introduction to German grammar and development of all language skills in a cultural context with special emphasis on communication.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Not open to students who have taken GER 001A.

Credit Limitation(s): Students who have successfully completed GER 002 or GER 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

GER 001A – Accelerated Intensive Elementary German (15 units)

Course Description: Special 12-week accelerated, intensive summer session course that combines the work of GER 001, GER 002, and GER 003. Introduction to German grammar and development of all language skills in a cultural context with emphasis on communication.

Learning Activities: Lecture/Discussion 12.50 hour(s).

Credit Limitation(s): Not open to students who have completed GER 001, GER 002, or GER 003.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

GER 002 – Elementary German (5 units)

Course Description: Continuation of GER 001 in areas of grammar and basic language skills.

Prerequisite(s): GER 001.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken GER 001A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

GER 003 – Elementary German (5 units)

Course Description: Completion of grammar sequence and continuing practice of all language skills through cultural texts.

Prerequisite(s): GER 002.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken GER 001A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

GER 010 – German Fairy Tales from the Grimms to Disney (4 units)

Course Description: Introduction to the genre of fairy tale with a focus on the Brothers Grimm and Hans Christian Andersen in their respective political/cultural contexts. Discusses filmic adaptations by Disney, the East German DEFA and Hollywood.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

GER 011 – Travel & the Modern World (4 units)

Course Description: Examination of travel as an essential human activity and experience of global modernity and cross-cultural encounters from the 18th to the 21st century with an emphasis on German-speaking culture. Travelogues, literature, art, memoirs, and films in English translation.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Cross Listing: COM 011.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

GER 020 – Intermediate German (4 units)

Course Description: Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts.

Prerequisite(s): GER 003; can be concurrent with GER 006.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

GER 021 – Intermediate German (4 units)

Course Description: Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts; addresses social relations and cultural practices in Germany; discusses history of Germany.

Prerequisite(s): GER 020.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

GER 022 – Intermediate German (4 units)

Course Description: Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts.

Prerequisite(s): GER 021.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

GER 040 – Great German Short Stories (in English) (4 units)

Course Description: Major German short stories from Goethe at the end of the 18th century to Thomas Mann at the beginning of the 20th century.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

GER 041 – Melodrama from Mozart to Lion King (4 units)

Course Description: Melodrama as a major dramatic genre from Mozart's music dramas in the 18th century to films in the 21st century. Tragic psychological effects of death, war destruction, and the demonic, melodramatic expressions of political oppression, economic exploitation, and revolution, issues of race, gender, and class, capitalism and modernity, transnational and trans-generic adaptations.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing/Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

GER 045 – Vampires & Other Horrors in Film & Media (4 units)

Course Description: History of representations of vampires and horror generally from the 19th-21st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice, medicine, modernity.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing 3 hour(s).

Cross Listing: FMS 045.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

GER 048 – Myth & Saga in the Germanic Cultures (4 units)

Course Description: Knowledge of German not required. English translation from the Norse Eddas, the Volsung and Sigurd-Siegfried cycles, and the Gudrun lays; literary mythology in German Romanticism culminating in Wagner's "total art-work" concept and The Ring of the Nibelung cycle. May not be counted toward major in German.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

GER 049 – Freshman Colloquium (2 units)

Starting Fall Quarter 2024, this course is no longer offered.

Course Description: Readings, discussion and written projects treating topics such as communist-capitalist tension in German literary culture; masculine "versus" feminine authorial consciousness; disintegration and reconstitution of language reflecting cultural transformation; exorcising post-Holocaust national guilt and individual frustration-Germany's new European "mission."

Prerequisite(s): Open only to students who have completed 40 or fewer quarter units of transferable college level work.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

GER 092 – Field Work in German (1-12 units)

Course Description: Total immersion program in Germany or a German speaking setting in the U.S. to further develop students' proficiency in the German language.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Enrollment Restriction(s): Restricted to lower division standing.

Grade Mode: Pass/No Pass only.

GER 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

GER 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

GER 101A – Survey of German Literature, 800-1800 (4 units)

Course Description: German literature from the Middle Ages to Classicism (800-1800) with an overview of major movements and authors.

Prerequisite(s): GER 022; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

GER 101B – Survey of German Literature, 1800-Present (4 units)

Course Description: German literature from the Age of Romanticism (1800) to the present with an overview of major movements and authors.

Prerequisite(s): GER 022.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

GER 103 – Writing Skills in German (4 units)

Course Description: Practice in different kinds of writing, such as abstracts, correspondence, lecture summaries, analysis of or response to short literary texts.

Prerequisite(s): GER 022; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Writing 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

GER 104 – Translation (4 units)

Course Description: Exercises in German-to-English, English-to-German translation using texts from the areas of culture and commerce.

Prerequisite(s): GER 022; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have completed GER 104A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

GER 105 – The Modern German Language (4 units)

Course Description: Introduction to the linguistic analysis of contemporary German, including its phonology, morphology, syntax and semantics, as well as sociolinguistic considerations.

Prerequisite(s): GER 022; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

GER 109A – Business German (4 units)

Course Description: Specialized language course using business-oriented information and publications as the basis for discussions, roleplay, reports, compositions and translations.

Prerequisite(s): GER 022; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

GER 109B – Advanced Business German (4 units)

Starting Fall Quarter 2024, this course is no longer offered.

Course Description: Specialized advanced language course providing in-depth study of major business topics with the help of authentic texts and videos.

Prerequisite(s): GER 022; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

GER 112 – Topics in German Literature (4 units)

Course Description: Knowledge of German not required. Investigation of significant themes and issues within their European context.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

Required of new teaching assistants.*Prerequisite(s):* Graduate standing or consent of instructor.*Learning Activities:* Lecture 2 hour(s).*Grade Mode:* Satisfactory/Unsatisfactory only.**GER 390C – The Teaching of German (2 units)***Course Description:* Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants.*Prerequisite(s):* Graduate standing or consent of instructor.*Learning Activities:* Lecture 2 hour(s).*Grade Mode:* Satisfactory/Unsatisfactory only.**GER 396 – Teaching Assistant Training Practicum (1-4 units)***Course Description:* Teaching assistant training.*Prerequisite(s):* Graduate standing.*Learning Activities:* Variable.*Repeat Credit:* May be repeated.*Grade Mode:* Pass/No Pass only.**GER 400 – Tutorial & Instructional Internship (1-3 units)***Course Description:* Apprentice training in ongoing undergraduate literature courses taught by regular staff, with supplementary weekly critique sessions; intern leadership of discussion sections under staff supervision.*Prerequisite(s):* Graduate standing.*Learning Activities:* Discussion 1-3 hour(s).*Repeat Credit:* May be repeated.*Grade Mode:* Letter.**Global Disease Biology (GDB)****College of Agricultural & Environmental Sciences****GDB 090 – Introduction to Global Disease Biology (1 unit)***Course Description:* Introduction to the Global Disease Biology major, research and internship opportunities, and potential career paths in human, animal, and plant health. Communication, ethics and the nature of science.*Prerequisite(s):* Open to GDB majors only, or consent of instructor.*Learning Activities:* Seminar 1 hour(s).*Enrollment Restriction(s):* Open to Global Disease Biology majors only.*Grade Mode:* Pass/No Pass only.**GDB 101 – Epidemiology (4 units)***Course Description:* Principles and practice of epidemiology as applied to human, animal, and plant populations and the environment in which these populations co-exist. Quantitative analysis of both infectious and non-infectious disease. Inter-dependence between epidemiological analysis, decision-making and policy formulation will be highlighted.*Prerequisite(s):* SAS 013; BIS 002A; BIS 002B; BIS 002C; ((STA 013 or STA 013Y) or (STA 100 or PLS 120)).*Learning Activities:* Lecture 2 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).*Enrollment Restriction(s):* Pass One restricted to Global Disease Biology majors only.*Grade Mode:* Letter.*General Education:* Science & Engineering (SE); Quantitative Literacy (QL).**GDB 102 – Disease Intervention & Policy (4 units)***Course Description:* Examination of the prevention and treatment of diseases affecting humans, animals, and plants. Case studies illustrate the merits of a unified approach to promoting health at local, regional, and global scales.*Prerequisite(s):* GDB 101; SAS 013; BIS 002A; BIS 002B; BIS 002C; PMI 129Y; VME 158.*Learning Activities:* Lecture 3 hour(s), Discussion 1 hour(s), Project.*Enrollment Restriction(s):* Pass One restricted to Global Disease Biology majors only.*Grade Mode:* Letter.*General Education:* Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL).**GDB 103 – Microbiome of People, Animals, & Plants (3 units)***Course Description:* Examination of the structure and function of microbial communities that live inside and on host organisms. Introduction to general concepts of the microbiome and microbiota, and their relationship to host health and disease.*Prerequisite(s):* BIS 002A; BIS 002B; BIS 002C.*Learning Activities:* Lecture 3 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE); Scientific Literacy (SL).

GDB 106 – Geographies of Health (4 units)

Course Description: Multiple geographies of health, including how both physical environmental systems and human social, economic & political systems impact health and disease. Global, comparative geographical approach emphasizes the benefits of integrated multidisciplinary analyses for planetary health success.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

GDB 187 – Global Disease Biology Seminar (3 units)

Course Description: Seminar leading to development of the research proposal and academic plan for the Global Disease Biology major.

Prerequisite(s): GDB 090; SAS 013.

Learning Activities: Seminar 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to junior standing; Global Disease Biology majors.

Grade Mode: Letter.

GDB 189 – Global Disease Biology Senior Research (3 units)

Course Description: Capstone research experience for the Global Disease Biology major. Project may be experimental, library research, or some other creative activity.

Prerequisite(s): GDB 090; GDB 187; SAS 013.

Learning Activities: Independent Study 3 hour(s).

Enrollment Restriction(s): Restricted to senior standing; Global Disease Biology majors only.

Repeat Credit: May be repeated 1 time(s) for student research conducted over two quarters; second quarter used to finish writing the research paper.

Grade Mode: Pass/No Pass only.

GDB 189D – Global Disease Biology Research Discussion (1 unit)

Course Description: Prevent or solve problems during the students' research activity. Independent advising and assistance on research proposal.

Prerequisite(s): GDB 090; GDB 187; SAS 013; GDB 189; or consent of instructor.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to junior standing; Global Disease Biology majors only.

Grade Mode: Pass/No Pass only.

Global Studies (GLO)

College of Letters & Science

GLO 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Not Passed only.

GLO 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special Study for Undergraduates.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: Passed/Not Passed only.

GLO 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Passed/Not Passed only.

GLO 199 – Special Study for Undergraduates (1-5 units)

Course Description: Special Study for Undergraduates.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Passed/Not Passed only.

Graduate Education (GRD)

Graduate Studies

GRD 198 – Directed Group Study (1-5 units)

Course Description: Preparation of undergraduate students in identified graduate school pipeline programs (e.g. McNair scholars) for graduate education. Emphasis on educating and training undergraduates on key skills and competencies needed for the development of a successful graduate school applicant and future graduate scholar. Topics will vary.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1.50-6 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

GRD 298 – Directed Group Study (1-5 units)

Course Description: Training and preparation of graduate students for successful scholarship and future careers. Emphasis on development of written and verbal communication, professional development, leadership, and mentoring. Topics will vary.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1.50-6 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

GRD 299 – Research (1-12 units)

Course Description: Special study or research for graduate students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

GRD 390 – Teaching in Higher Education (1-2 units)

Course Description: Selected topics related to preparation for teaching in higher education, leadership in academic institutions, job opportunities and career pathways for graduate students pursuing careers in teaching and education.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1.50-3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

GRD 398 – Directed Group Study (1-5 units)

Course Description: Preparation of graduate students for careers as teachers and educators in higher education. Emphasis on the development of clear written and verbal communication skills as well as leadership practices applicable to teaching in academic institutions.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1.50-6 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

Greek (GRK)

College of Letters & Science

GRK 001 – Elementary Greek (5 units)

Course Description: Introduction to the basic grammar and vocabulary of Classical and New Testament Greek. Development of translation skills with emphasis on Greek-English.

Learning Activities: Lecture 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

GRK 002 – Elementary Greek (5 units)

Course Description: Continuation of GRK 001.

Prerequisite(s): GRK 001; or the equivalent.

Learning Activities: Lecture 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

GRK 002NT – Elementary New Testament Greek (1 unit)

Course Description: Supplementary study of New Testament Greek.

Prerequisite(s): GRK 002 (can be concurrent); concurrent attendance required.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

GRK 003 – Intermediate Greek (5 units)

Course Description: Continuation of GRK 002. Selected readings from Greek authors.

Prerequisite(s): GRK 002; or the equivalent.

Learning Activities: Lecture 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

GRK 003NT – Elementary New Testament Greek (1 unit)

Course Description: Supplementary study of New Testament Greek.

Prerequisite(s): GRK 003 (can be concurrent); or consent of instructor; concurrent attendance required.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

GRK 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

GRK 100 – Readings in Greek Prose (4 units)

Course Description: Review of Greek morphology, syntax, and vocabulary. Readings in Greek prose authors, including Xenophon.

Prerequisite(s): GRK 003; or equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

GRK 101 – Plato (4 units)

Course Description: Study of Plato and his works.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 102 – Euripides (4 units)

Course Description: Study of Euripides and his works.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 103A – Homer: Iliad (4 units)

Course Description: Selected readings from Homer's Iliad.

Prerequisite(s): GRK 003.

Learning Activities: Recitation 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 103B – Homer: Odyssey (4 units)

Course Description: Selected readings from Homer's Odyssey.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Recitation 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 104 – Menander (4 units)

Course Description: Study of Menander and his works.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 105 – Attic Orators (4 units)

Course Description: Selected readings from the orators of 4th- and 5th-century Athens.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) with consent of instructor and when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

GRK 106 – Greek Hexameter Poetry (4 units)

Course Description: Selected readings from ancient Greek hexameter poetry. Wisdom poetry, hymns, epyllia, idylls, epic, natural history and other texts from the hexameter tradition.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

GRK 110 – Readings in the Greek Novel (4 units)

Course Description: Selected readings from Greek prose fiction of the late classical, Hellenistic and imperial periods.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) with consent of instructor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 111 – Sophocles (4 units)

Course Description: Study of Sophocles and his works.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 112 – Aristophanes (4 units)

Course Description: Study of Aristophanes and his works.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 113 – Thucydides (4 units)

Course Description: Study of Thucydides and his works.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 114 – Lyric Poetry (4 units)

Course Description: Study of lyric poetry.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 115 – Aeschylus (4 units)

Course Description: Study of Aeschylus and his works.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 116 – Herodotus (4 units)

Course Description: Study of Herodotus and his works.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 121 – Greek Prose Composition (4 units)

Course Description: Intensive grammar and vocabulary review through exercises in Greek prose composition.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

GRK 130 – Readings in Later Greek (4 units)

Course Description: Translation and discussion of selected readings from Hellenistic to Byzantine Greek literature.

Prerequisite(s): GRK 100; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

GRK 131 – Readings in Ancient Greek Philosophy & Science (4 units)

Course Description: Selected readings from ancient Greek philosophical and scientific writers. Texts on logical truth and empirical sense data, material and social contexts of ancient Greek philosophy and science.

Prerequisite(s): GRK 100 (can be concurrent); or consent of instructor.

Learning Activities: Extensive Writing, Lecture/Discussion 3 hour(s).

Repeat Credit: May be repeated when topics differ.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

GRK 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

GRK 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

Health Informatics (MHI)**Graduate Studies****MHI 202 – Computer-Based Patient Records (4 units)**

Course Description: Introduction and overview of computer-based clinical record systems. Topics include data modeling, health system standards and terminologies; security, privacy and confidentiality; workflow modeling; data visualization; legal; decision support; public health; and evidence-based practice.

Prerequisite(s): Current enrollment within the Health Informatics Graduate Program or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MHI 207 – Decision Support Systems (4 units)

Course Description: Explores decision support systems for medical application. Topics include medical decision making, uncertainty, review of existing decision support systems, knowledge engineering, data mining, and knowledge based systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

MHI 208 – Medical Informatics in Web-Based Enterprise Computing (4 units)

Course Description: Introduction to the decision making processes and technologies that are involved in developing web-based distributed enterprise applications in medicine. Focus on the Informatician's role as a team member.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

MHI 209 – Data Acquisition & Analysis (4 units)

Course Description: Examines the nature, acquisition, and analysis of medical data. Data ranges from signals of electrical potentials, sounds, text, images (still and motion), and data from nucleic acid and protein expression and sequencing instruments.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

MHI 209N – Consumer Digital Health (4 units)

Course Description: Landscape, technologies, and policies involved in data acquisition, storage and analysis in digital and connected health and consumer health informatics. Models of digital health data monitoring, including clinical, mobile health and telehealth, and theories relevant to health and information behavior by consumers and patients. Design, acquisition and analysis of data in the personal and consumer health ecosystem.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MHI 210 – Introduction to Health Informatics (4 units)

Course Description: Overview provides broad exposure to the field of Health Informatics. Topics covered include, but are not limited to, networking, information systems, coding, HL7, Security, and HIPPA.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MHI 212 – Computer Security in Health Informatics (4 units)

Course Description: Critical thinking about basic concepts in computer security and privacy. How the computer security and privacy impact health informatics, ranging from electronic health records to telemedicine to remote, virtual surgery.

Prerequisite(s): MHI 210; MHI 202; MHI 209.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

MHI 289A – Special Topics in Medical Informatics: Data Acquisition (1-5 units)

Course Description: Special topics in Data Acquisition.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s), Laboratory 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

MHI 289B – Special Topics in Health Informatics: Seminars in Clinical Translational Informatics (1 unit)

Course Description: Seminars in current clinical translational informatics research topics. Guest presenters and faculty led discussions.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Letter.

MHI 289E – Clinical Knowledge for the Health Informaticist (3 units)

Course Description: Basic clinical knowledge for health informatics students. Human systems, disease states and conditions, treatments and prognosis.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

MHI 289F – Database & Knowledge Management (4 units)

Course Description: Objectives include understanding the informatics techniques for data capture, information management, and knowledge generation that a student will use throughout their career.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

MHI 289G – Special Topics in Health Informatics: Biostatistics (4 units)

Course Description: Special topics in Biostatistics. Evaluation Methods and Statistics in Biomedical Informatics. Research design and analysis with special emphasis on Biomedical Informatics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

MHI 289H – Modeling Biological Systems (4 units)

Course Description: Create awareness of how modern computer graphics have led to VR-Sim-Rob applications, and how they are modifying the teaching of medicine and in some cases the diagnosis and treatment of patients.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Limited to 20 students.

Grade Mode: Letter.

MHI 289I – Programming in Health Informatics (3 units)

Course Description: Basics of computer programming essential to the study of informatics. Impacts on systems within healthcare, public health, nursing, research, and others.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

MHI 290 – Seminar in Medical Informatics (1 unit)

Course Description: Discussion of current graduate research and topics in Medical Informatics. Oral presentations of individual study.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Restricted to 20 students.

Grade Mode: Satisfactory/Unsatisfactory only.

MHI 298 – Group Study in Health Informatics (1-5 units)

Course Description: Directed reading and discussion on select topics.

Prerequisite(s): Consent of instructor; graduate student in good academic standing.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

MHI 299 – Research in Health Informatics (1-12 units)

Course Description: Independent research in Health Informatics.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Hebrew (HEB)

College of Letters & Science

HEB 001 – Elementary Hebrew (5 units)

Course Description: Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

HEB 001A – Accelerated Intensive Elementary Hebrew (15 units)

Course Description: Special 12-week accelerated, intensive summer session course that combines the work of HEB 001, HEB 002, and HEB 003. Introduction to Hebrew grammar and development of language skills in a cultural context with emphasis on communication.

Learning Activities: Lecture/Discussion 15 hour(s).

Credit Limitation(s): Not open to students who have completed HEB 001, HEB 002, or HEB 003.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HEB 002 – Elementary Hebrew (5 units)

Course Description: Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew.

Prerequisite(s): HEB 001; or the equivalent.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

HEB 003 – Elementary Hebrew (5 units)

Course Description: Speaking, listening comprehension, reading and writing fundamentals of modern Hebrew.

Prerequisite(s): HEB 002; or the equivalent.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

HEB 010 – Introduction to Biblical Hebrew (3 units)

Course Description: Introduction to the Hebrew Alphabet and basic grammar rules of the biblical language. Students will learn to read most any biblical text and learn how to find the meaning of words by their roots and morphological structure.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HEB 011 – Introduction to Biblical Hebrew (3 units)

Course Description: Continuation of HEB 010. Biblical text reading, simple/literal translation, verb and noun patterns, compounding of prepositions and nouns.

Prerequisite(s): HEB 010.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HEB 012 – Introduction to Biblical Hebrew (3 units)

Course Description: Continuation of HEB 011. Biblical text reading, simple/literal translation, verb and noun patterns, compounding of prepositions and nouns.

Prerequisite(s): HEB 011.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HEB 021 – Intermediate Modern Hebrew I (4 units)

Course Description: Development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language.

Prerequisite(s): HEB 003; consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open to students who have taken HEB 100 or HEB 100A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

HEB 022 – Intermediate Modern Hebrew II (4 units)

Course Description: Continued development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language.

Prerequisite(s): HEB 021; consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open to students who have taken HEB 101 or HEB 100B.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

HEB 023 – Intermediate Modern Hebrew III (4 units)

Course Description: Continued development of grammar, composition, language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Further development of writing and translating skills.

Prerequisite(s): HEB 022; consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open to students who have taken HEB 100C or HEB 102.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

HEB 097T – Tutoring in Hebrew (1-5 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): HEB 023 B or better; consent of Program Director required.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: P/NP only.

HEB 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HEB 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HEB 100AN – Advanced Modern Hebrew I (4 units)

Course Description: Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing.

Prerequisite(s): HEB 023; or consent of instructor; students who took HEB 100A as second-year Hebrew may take HEB 100AN.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

HEB 100BN – Advanced Modern Hebrew II (4 units)

Course Description: Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing.

Prerequisite(s): HEB 100AN; or consent of instructor; students who took HEB 100B as second-year Hebrew may take HEB 100BN.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

HEB 100CN – Advanced Modern Hebrew III (4 units)

Course Description: Third-year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing.

Prerequisite(s): HEB 100BN; students who have taken HEB 100C as second-year Hebrew may take HEB 100CN.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

HEB 197T – Tutoring in Hebrew (1-5 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): HEB 023 B or better; consent of Program Director required.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: P/NP only.

Hematology & Oncology (HON)**School of Medicine****HON 199 – Research in Hematology-Oncology (1-5 units)**

Course Description: Experience in laboratory research.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Laboratory.

Grade Mode: Pass/No Pass only.

HON 298 – Topics in Hematology (1-4 units)

Course Description: Basic concepts of the physiology of the hematopoietic organ, the pathophysiology of hematopoietic disease, and concepts of therapeutics will be offered for study. The specific topics to be dictated by the interest and background of the students.

Prerequisite(s): One year of graduate work and/or consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

HON 299 – Research (1-12 units)

Course Description: Laboratory investigation contributing to the dissertation for a graduate degree.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

HON 420 – Oncology (4 units)

Course Description: Covers the principles of oncology and the pathophysiology of specific, common cancers correlated with organ systems pathophysiology and systemic pathology courses.

Prerequisite(s): Approval by the SOM Committee on Student Promotions.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to Medical student only; students must pass all Year 1 SOM courses.

Grade Mode: Pass/Fail only.

HON 460 – Hematology-Oncology Consult Clerkship (6-18 units)

Course Description: Acting intern on inpatient hematology/oncology ward service.

Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

HON 461 – Hematology-Oncology Consult Clerkship (6-12 units)

Course Description: Student is an integral member of the inpatient hematology and oncology consult service, the bone marrow service, and will attend all conferences sponsored by the Division.

Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

HON 462 – Hematology-Oncology Ambulatory Clerkship (3-18 units)

Course Description: Outpatient rotations in related clinics. Participation with members of the subspecialty service in the initial clinical evaluation, work-up, management and follow-up of the patient with hematologic or oncologic disorders.

Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.

Learning Activities: Clinical Activity 30 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

HON 493 – Cancer as a Process (1-6 units)

Course Description: Covers cancer as a process, beginning with risks and prevention, preneoplasia, microinvasion, treatment options, metastases and systemic therapy, pain medicine and palliative care, and cancer communication. Format includes traditional lectures, student-led case discussions, and problem-based learning.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 10 hour(s), Clinical Activity 14 hour(s), Auto Tutorial 6 hour(s), Independent Study 10 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

HON 499 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

Hindi/Urdu (HIN)

College of Letters & Science

HIN 001 – Elementary Hindi/Urdu I (5 units)

Course Description: Introduction to Devanagari Script through development of all language skills in a cultural context with emphasis on communicative proficiency.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HIN 001A – Accelerated Intensive Elementary Hindi (15 units)

Course Description: Special 12-week accelerated, intensive summer session course that combines the work of HIN 001, HIN 002, and HIN 003. Introduction to Devnagari Script through development of all language skills in cultural context with emphasis on communicative proficiency.

Learning Activities: Lecture/Discussion 15 hour(s).

Credit Limitation(s): Not open for credit to students who have completed HIN 001, HIN 002 or HIN 003.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HIN 002 – Elementary Hindi/Urdu II (5 units)

Course Description: Continuation of HIN 001. Devanagari Script through development of all language skills in a cultural context with emphasis on communicative proficiency.

Prerequisite(s): HIN 001.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HIN 003 – Elementary Hindi/Urdu III (5 units)

Course Description: Introduction to listening, speaking, reading, and writing skills in Hindi using the Devanagari script and brief introduction to basic literacy in Urdu using the Nasataliq script.

Prerequisite(s): HIN 002.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HIN 021 – Intermediate Hindi/Urdu I (4 units)

Course Description: Intermediate level course for students who have completed Elementary Hindi/Urdu or the equivalent. Students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu.

Prerequisite(s): HIN 003.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

HIN 022 – Intermediate Hindi/Urdu II (4 units)

Course Description: Intermediate level course where students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu.

Prerequisite(s): HIN 021.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

HIN 023 – Intermediate Hindi/Urdu III (4 units)

Course Description: Intermediate level course where students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu.

Prerequisite(s): HIN 022.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

HIN 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HIN 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HIN 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching practicum.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated 18 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

History (HIS)

College of Letters & Science

HIS 001 – Introduction to History (2 units)

Course Description: Introduction to history, its key methodologies, writing tasks, and research practices. Examination of the development of history as an academic discipline; ethics in historical research. Topical focus changes regularly.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 002 – Introduction to the History of Science & Technology (4 units)

Course Description: Introduction to topics and methods of the history of science and technology. Emphasis on understanding the role of science and technology in the modern world through a long-term historical perspective.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: STS 002.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Scientific Literacy (SL); World Cultures (WC); Writing Experience (WE).

HIS 002Y – Introduction to the History of Science & Technology (4 units)

Course Description: Introduction to topics and methods of the history of science and technology. Emphasis on understanding the role of science and technology in the modern world through a long-term historical perspective.

Learning Activities: Lecture 2 hour(s); Discussion 1 hour(s); Web Virtual Lecture 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken HIS 002 or STS 002.

Cross Listing: STS 002Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Scientific Literacy (SL); World Cultures (WC); Writing Experience (WE).

HIS 003 – Cities: A Survey of World Cultures (4 units)

Course Description: Survey of urban world cultures, focusing on up to ten cities selected by the instructor.

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

HIS 004A – History of Western Civilization (4 units)

Course Description: Growth of western civilization from late antiquity to the Renaissance.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 004B – History of Western Civilization (4 units)

Course Description: History of western civilization from the Renaissance to the 18th century.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HIS 004C – History of Western Civilization (4 units)

Course Description: Development of Western Civilization from the 18th century to the present.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 005 – Modernist Culture (2 units)

Course Description: Modernist culture in global perspective. Introduction to early 20th-century innovations in visual arts, music, literature, film, and architecture in Europe, the Americas, Asia, and Africa.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

HIS 006 – Introduction to the Middle East (4 units)

Course Description: Survey of the major social, economic, political and cultural transformations in the Middle East from the rise of Islam (c.600A.D.) to the present, emphasizing themes in religion and culture, politics and society.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 007A – History of Latin America to 1700 (4 units)

Course Description: Introduction to the history of Spanish and Portuguese America from the late pre-Columbian period through the initial phase and consolidation of a colonial regime (circa 1700). Topics include conquest, colonialism, racial mixture, gender, and labor systems.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 007B – History of Latin America, 1700-1900 (4 units)

Course Description: Latin America from colony to republic. The nature of Iberian colonialism, the causes for independence, the creation of nation states, the difficulties in consolidating these nations, and the rise of Liberalism and export economies in the 19th century.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 007C – History of Latin America 1900-present (4 units)

Course Description: Latin America since the beginning of the 20th century. Themes include export economies, oligarchic rule, crises of depression and war, corporatism, populism, revolution and reform movements, cultural and ethnic issues, U.S.-Latin American relations, neo-liberal restructuring.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 008 – History of Indian Civilization (4 units)

Course Description: Survey of Indian civilization from the rise of cities (ca. 2000 B.C.) to the present, emphasizing themes in religion, social and political organization, and art and literature that reflect cultural interaction and change.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 009A – History of East Asian Civilization (4 units)

Course Description: Surveys traditional Chinese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary China are provided.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 009B – History of East Asian Civilization (4 units)

Course Description: Surveys traditional Japanese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary Japan are provided.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 009C – Korean Culture & Society: From Ancient Three Kingdoms to the Global K-Pop (4 units)

Course Description: Evolution of Korean society from Three Kingdoms period (B.C.E 57 to C.E. 676) to the contemporary era emphasizing the perseverance and transformations of traditional social and cultural patterns.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: EAS 088.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HIS 010A – World History to 1350 (4 units)

Course Description: Historical examination of the changing relationship of human societies to one another and to their natural settings through the year 1350, with particular attention to long-term trends and to periodic crises that reshaped the links of culture and nature on a global scale.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 010B – World History, c. 1350-1850 (4 units)

Course Description: Major topics in world history from the 14th century to the beginning of the 19th century. Topics will vary but may include: oceans as systems of human communication and conflict; the global consequences of "Industrious revolutions" in Europe and Asia, etc.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 010C – World History III (4 units)

Course Description: Major topics from world history of the 19th and 20th centuries, emphasizing the rise and fall of Western colonial empires; Cold War and the superpowers; the spread of the nation-states; and process of globalization.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 011 – History of the Jewish People in the Modern World (4 units)

Course Description: Histories and cultures of the Jews since 1492. Topics include: the making of Jewish diasporas, roots of antisemitism, the Holocaust in images and texts, changing ideas of the self, Jews in America, contemporary visions of the Jewish past.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HIS 012 – Food & History (4 units)

Course Description: Survey of the ways humans have fed themselves from the dawn of humanity to the present. Transformation of plants and animals into food, cooking into cuisine, and ceremony into etiquette.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HIS 013 – Global Sexualities (4 units)

Course Description: Global history of sexualities, including comparative study of gender, marriage, and fertility before 1800, followed by the modern history of sexualities worldwide as it intersects with imperialism, race, population control, law, and globalization.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC).

HIS 014 – History of Global Capitalism (4 units)

Course Description: History of institutions, workers, commodity chains, and the social and cultural context of capitalism around the world from 1500-present. Emphasis on transnational and comparative histories of political economies and individual human lives.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD); World Cultures (WC).

HIS 015A – Africa to 1900 (4 units)

Course Description: Introduction to African history to 1900. Origins and impact of early human history, precolonial states and societies, slavery and the slave trade, religious and cultural movements, and the foundations of European colonialism.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

HIS 015B – Africa Today (4 units)

Course Description: Survey of major themes in colonial and postcolonial sub-Saharan African history, including colonialism, decolonization, nationalism and politics, economic history and labor, urbanization, popular culture, gender, marriage, and family life.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

HIS 016 – Sex, Science, & Society (4 units)

Course Description: Survey of the relationship between sex, science, and society in the history of the modern world. Emphasis on the development of scientific ideas about the human body against broader social, cultural, and political trends and from a global viewpoint.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: STS 016.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Scientific Literacy (SL); World Cultures (WC); Writing Experience (WE).

HIS 017A – History of the United States (4 units)

Course Description: The experience of the American people from the Colonial Era to the Civil War.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 017B – History of the United States (4 units)

Course Description: The experience of the American people from the Civil War to the end of the Cold War.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed HIS 017C.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 018A – Race in America to 1865 (4 units)

Course Description: Introduction to history of race and racial formation in the United States to the Civil War through a comparative approach. Examines the experiences of African Americans, Asian Americans, Native American, Mexican Americans and other Latino/a groups.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Only one unit of credit to students who have previously completed HIS 178A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

HIS 018B – Race in the United States Since 1865 (4 units)

Course Description: Introduction to the history of race and racial formation in America since 1865 though a comparative approach that examines the experiences of African Americans, Asian Americans, Native American and Mexican Americans and other Latino/a groups.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

HIS 019 – Migration & Borders in Global History (4 units)

Course Description: Introduction to global migration history from 1800 to the present; labor migration systems; border governance; undocumented migrants; partition, displacement, and refugee regimes; race, class, and gender in migration law.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 020 – The Vietnam War (4 units)

Course Description: A history of the Vietnam War, including its origins, fighting, and repercussions.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HIS 072A – Women & Gender in America, to 1865 (4 units)

Course Description: History of women and gender in America through 1865, emphasizing intersections of gender, race, class, and sexuality. Topics include interracial marriage, slavery, witchcraft, meanings of motherhood, war, domestic labor, moral reform, women's rights, migrations, the effects of commercialization and industrialization.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 072B – Women & Gender in America, 1865-Present (4 units)

Course Description: History of women and gender in America since 1865, emphasizing intersections of gender, race, class, and sexuality. Covers emancipation, migration, immigration, war, media, same-sex and opposite-sex relationships, and the birth control, suffrage, labor, civil rights, feminist, and anti-feminist movements.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 080 – The History of the United States in the Middle East (2 units)

Course Description: History of the United States in the Middle East from 1900 to the present. Examination of U.S. foreign relations toward the Middle East, their regional ramifications and domestic repercussions.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); World Cultures (WC).

HIS 080W – The History of the United States in the Middle East (2 units)

Course Description: History of the United States in the Middle East from 1900 to the present. Examination of U.S. foreign relations toward the Middle East, their regional ramifications and domestic repercussions with extensive writing.

Learning Activities: Lecture/Discussion 1 hour(s), Extensive Writing.

Enrollment Restriction(s): Must enroll in HIS 080 concurrently.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

HIS 085 – Nature, Man, & the Machine in America (4 units)

Course Description: History of the attitudes and behavior of Americans toward their natural environment and their technology, from colonial times to the present. No final examination.

Learning Activities: Seminar 4 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

HIS 090 – Research in History (4 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Emphasis on primary sources and archival research.

Learning Activities: Seminar 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

HIS 092 – Internship in History (1-12 units)

Course Description: Supervised internship and study as a historian, archivist, curator, or an in another history-related capacity, in an approved organization or institution.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 1-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HIS 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HIS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HIS 100 – Selected Topics in History (4 units)

Course Description: Selected Topics in History may be organized around a particular geography (e.g., the Balkans), a chronological framework (e.g., the 1960s around the world) or a thematic approach (e.g., the rise of ethnic or racial identities in a particular region).

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

HIS 101 – Introduction to Historical Thought & Writing (5 units)

Course Description: Study of the history of historical thought and writing, analysis of critical and speculative philosophies of history and evaluation of modes of organization, interpretation, and style in historical writing.

Learning Activities: Lecture/Discussion 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102A – Undergraduate Proseminar in History: Ancient (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Ancient.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102B – Undergraduate Proseminar in History: Medieval (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Medieval.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102D – Undergraduate Proseminar in History: Modern Europe to 1815 (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Modern Europe to 1815.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102E – Undergraduate Proseminar in History: Europe Since 1815 (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Europe since 1815.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102F – Undergraduate Proseminar in History: Russia (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Russia.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102G – Undergraduate Proseminar in History: China to 1800 (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. China to 1800.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102H – Undergraduate Proseminar in History: China Since 1800 (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. China since 1800.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102I – Undergraduate Proseminar in History: Britain (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Britain.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102J – Undergraduate Proseminar in History: Latin America Since 1810 (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Latin America since 1810.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102K – Undergraduate Proseminar in History: American History to 1787 (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. American History to 1787.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102L – Undergraduate Proseminar in History: United States, 1787-1896 (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. United States, 1787-1896.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102M – Undergraduate Proseminar in History: United States Since 1896 (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. United States since 1896.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102N – Undergraduate Proseminar in History: Japan (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Japan.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102O – Undergraduate Proseminar in History: Africa (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Africa.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102P – Undergraduate Proseminar in History: Christianity & Culture in Europe, 50-1850 (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Christianity and Culture in Europe, 50-1850.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102Q – Undergraduate Proseminar in History: India (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. India.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102R – Undergraduate Proseminar in History: Muslim Societies (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Muslim Societies.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 102S – Undergraduate Proseminar in History: Education Abroad Program (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Education Abroad Program; may be taught abroad.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

HIS 102X – Undergraduate Proseminar in History: Comparative History (5 units)

Course Description: Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Comparative History, selected topics in cultural, political, economic, and social history that deal comparatively with more than one geographic field.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 103 – Topics in Historical Research (4 units)

Course Description: Individual research resulting in a research paper on a specific topic in one of various fields of history. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 104A – Introduction to Historical Research & Interpretation (4 units)

Course Description: Directed reading and research aimed at preparing students to select appropriate topics and methodologies for a senior honors essay and to situate their topics within a meaningful, broad context of historical interpretations.

Prerequisite(s): Acceptance into History Department Honors Program.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 104B – Honors Thesis (4 units)

Course Description: Research in preparation of a senior honors thesis under the direction of a faculty advisor.

Prerequisite(s): HIS 104A.

Learning Activities: Tutorial 4 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 104C – Honors Thesis (4 units)

Course Description: Completion of a senior honors thesis under the direction of a faculty advisor.

Prerequisite(s): HIS 104A; HIS 104B.

Learning Activities: Tutorial 4 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

HIS 105 – Teaching History (4 units)

Course Description: Teaching of American and world history at the K-12 level. Emphasis on introducing college students to the multiple ways in which history is taught, and on understanding how history education is determined.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 107 – Medicine's Histories: Human & Veterinary Medicine from the Ancient World to One Health (4 units)

Course Description: Global, comparative study of the related histories of human and veterinary medicine from the ancient world to today's interdisciplinary One Health. Emphasis on reintegration of human and veterinary medicine to meet the biggest health challenges today.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

HIS 108 – Global Environmental History (4 units)

Course Description: Global, comparative study of how environmental change, human perceptions of nature, and manipulations of nature have changed over time. Primary focus post-1500, emphasis on critically analyzing many common ideas of environmental change.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Credit Limitation(s): Not open for credit to students who have taken HIS 109A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

HIS 109 – Environmental Change, Disease & Public Health (4 units)

Course Description: Analysis of environmental changes from pre-history to the present and their influence on disease distribution, virulence and public health. Focus on critical study of many human-driven environmental changes and the accelerated transformation/spread of pathogens under globalization.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Credit Limitation(s): Not open for credit to students who have taken HIS 109B.

Cross Listing: SAS 109.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL); World Cultures (WC).

HIS 110 – Themes in World History (4 units)

Course Description: Topics will emphasize the interaction of diverse regions of the world as well as common patterns of historical change.

Prerequisite(s): Upper division standing recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated when instructor and/or topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 110A – Colonialism & the Making of the Modern World (4 units)

Course Description: History of the modern world, focusing on struggles between Europeans and colonized peoples; the global formation of capitalism; the creation of nation-states; and the constitution of bourgeois bodies and racial selves in modern societies.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HIS 111A – Ancient History (4 units)

Course Description: History of ancient empires of the Near East and of their historical legacy to the Western world.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 111B – Ancient History (4 units)

Course Description: Political, cultural and intellectual study of the Greek world from Minoan-Mycenaean period to end of Hellenistic Age.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 111C – Ancient History (4 units)

Course Description: Development of Rome from earliest times. Rise and fall of the Roman Republic; the Empire to 476 A.D.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 112A – Topics in Pre-Modern Jewish History (4 units)

Course Description: Topics in the history of Jews from the Biblical era to the eras of Jewish emancipation. Topics can be framed chronologically (eg., medieval Jewry) or thematically (eg., trade and Jewish communities). May be repeated once for credit.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 112B – Topics in Modern Jewish History (4 units)

Course Description: Topics in the history of Jews from the era of Jewish emancipation to the present. Topics can be framed chronologically or thematically (eg. Zionism, assimilation, the post Holocaust Diaspora). May be repeated once for credit.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 112C – History of Jews in the Muslim World (4 units)

Course Description: History of Jewish communities in the lands of Islam from the time of the Prophet Muhammad to the present day.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 113 – History of Modern Palestine/Israel (4 units)

Course Description: Cultural, social, and political histories of Palestine and Israel from the Ottoman Empire to the present. Topics include Zionist and Palestinian national movements; colonialism and the British Mandate; immigration, settlement, and refugees; the development of modern Israeli cultures; questions of statehood and multiculturalism; conflict and regional minority populations.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 114 – Histories of 20th Century Partition (4 units)

Course Description: Politics of territorial separation in Ireland; Greece/Turkey; India/Pakistan; Palestine/Israel; the U.S./Mexico border, etc.

Partition as a focus area in international governance; on refugee migration; race; problems of national citizenship; and the politics of hard borders.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have previously completed an upper division history course in histories of 20th Century Partition.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 115A – History of West Africa (4 units)

Course Description: West and Central Africa from 1500 to the present. Origins and impact of precolonial states and societies, the trans-Atlantic slave trade, colonialism, decolonization, nationalism, and changes in religions, politics, economics, gender, and culture.

Prerequisite(s): HIS 015 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HIS 115B – History of East Africa & the Indian Ocean (4 units)

Course Description: Eastern Africa and the Indian Ocean world from 1500 to the present. Origins and impact of precolonial states and societies, slavery, trade, colonialism, decolonization, nationalism, and changes in religions, politics, economics, gender, and culture.

Prerequisite(s): HIS 015 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HIS 115C – History of Southern Africa from Exploration to the Rainbow Nation (4 units)

Course Description: Southern Africa from 1500 to the present. Origins and impact of precolonial states and societies, European colonization, industrialization, urbanization, nationalism, apartheid, and changes in religions, politics, economics, gender, and culture.

Prerequisite(s): HIS 015 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HIS 115D – Postcolonial Africa (4 units)

Course Description: Survey of social, political, cultural and economic change in African societies since the ending of European colonial rule in the 20th century. Themes include development, health and medicine, war and conflict, urbanization, global and inter-continental migration, and family and gender.

Prerequisite(s): HIS 015 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 115E – Slavery, Africa, & the Atlantic World (4 units)

Course Description: History of the African Slave trades, from the early Egyptian and Saharan trades in the pre-modern period to the trans-Atlantic trade (15th-19th century) and the contemporary trafficking of humans.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 115F – History of Modern North Africa, 1800 to the Present (4 units)

Course Description: History of Morocco, Algeria, Tunisia and Libya (the Maghrib), 1800 to the present. Topics include conquest and pacification, reform movements, the rise of nationalism, decolonization, state capitalism, economic liberalization, Islamism, democratization and human rights, the interplay of history and memory.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 116 – African History: Special Themes (4 units)

Course Description: Themes of African history, such as African states and empires, slave trade, relationship of Egypt to rest of Africa, Bantu origins and migrations, and French policy of Assimilation and Association.

Prerequisite(s): HIS 015 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 119 – World War I (4 units)

Course Description: The First World War and the settlement that followed from 1914-1919. Causes, conduct, and consequences of the war including military, political, economic, social, and cultural factors, with special emphasis on connections between the home front and the battlefield.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 120 – World War II (4 units)

Course Description: The Second World War from 1931 to 1945 in all of its theaters. Causes, conduct, and consequences of the war including military, political, economic, social, and cultural factors, with special emphasis on battlefield strategy and mobilization of the home front.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 121A – Medieval History (4 units)

Course Description: European history from "the fall of the Roman Empire" to the 8th century.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 121B – Medieval History (4 units)

Course Description: European history from Charlemagne to the 12th century.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 121C – Medieval History (4 units)

Course Description: European history from the Crusades to the Renaissance.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 122 – Selected Themes in Medieval History (4 units)

Course Description: Each offering will focus on single major theme, such as medieval agrarian history, feudalism, the family, medieval Italy, or the Crusades. Readings include original sources in English translation and modern works. May be repeated for credit.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 125 – Topics in Early Modern European History (4 units)

Course Description: Social and cultural history, 1300-1800. Topics such as medieval and Renaissance Italy, early modern Italy, Ancient Regime France, family and sexuality, and material culture and daily life. May be repeated for credit.

Learning Activities: Discussion/Laboratory 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 126Y – The History of Human Rights in Europe (4 units)

Course Description: History of the origins, development, and state of international humanitarian law (IHL) and international human rights law (IHRL) in Europe. Emphasis on Enlightenment-era and modern theories of the source, utility, and limits of human rights.

Learning Activities: Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Cross Listing: HMR 162Y.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

HIS 127A – Popular Culture in Early Modern Europe (4 units)

Course Description: Popular culture in 15th-18th century Europe. Topics may include food and festivals, literacy and religious beliefs, jokes and stereotypes, death and magic, as means of examining social status, gender, race, state power, local and national communities, religious change and conflict.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HIS 130A – Christianity & Culture in Europe: 50-1450 (4 units)

Course Description: History of the ideas and institutions of Christianity and their impact on the late Roman Empire and medieval Europe in terms of outlook on life, art, politics and economics.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 130B – Christianity & Culture in Europe: 1450-1600 (4 units)

Course Description: History of the Lutheran, Zwinglian-Calvinist, Radical, Anglican, and Catholic Reformations as foundation stones of a new culture in Europe, with special attention to the interconnections between the revival of antiquity and the different reform movements.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 130C – Christianity & Culture in Europe: 1600-1850 (4 units)

Course Description: Survey of the intellectual, cultural and political reorientation of European society in the aftermath of the Wars of Religion. "Secularization" will be discussed in the context of the Enlightenment and Romanticism.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 131A – Early Modern European History (4 units)

Course Description: Western European history from about 1350 to about 1500.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 131B – European History During the Renaissance & Reformation (4 units)

Course Description: Survey of European society, politics, and culture from the late 15th through the early 17th centuries, with particular focus on the Italian and Northern Renaissance, on the Protestant Reformation, and the Catholic Counter Reformation.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 131C – The Old Regime: Absolution, Enlightenment & Revolution in Europe (4 units)

Course Description: Survey of European society, politics, and culture in the 17th and 18th centuries, focusing on religious warfare, absolutism, Scientific Revolution, Enlightenment and the growth of religious tolerance, the French Revolution and the collapse of the old regime.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 132 – Crime & Punishment in Early Modern Europe (4 units)

Course Description: Deviance and crime in early modern Europe, contrasting imaginary crimes, e.g. witchcraft, with "real" crimes such as highway robbery and infanticide. Examines impact of gender, sexual orientation, ethnicity, and class in processes of criminalization.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 133 – European Thought & Culture from the Renaissance to the Enlightenment (4 units)

Course Description: History of European thought on politics, society, science, and religion from 1400 to 1800. Cultural impact of printing press, Protestant Reformation, wars, exploration, and empire.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

HIS 134A – The Age of Revolution (4 units)

Course Description: Ideas and institutions during the French Revolution and the Napoleonic era.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

HIS 135A – History of Science to the 18th Century (4 units)

Course Description: Survey of the historical development of science, technology, and medicine from the ancient world to the 18th century, with special emphasis on Isaac Newton as the culmination of the 17th-century scientific revolution.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 135B – History of Science, 18th to 20th Centuries (4 units)

Course Description: Survey of the historical development of scientific thought in geology, biology, chemistry, physics, and cosmology from the 18th to the 20th century, with special emphasis on emergence of broad explanatory principles that serve more than one science.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 136 – Scientific Revolution (4 units)

Course Description: Rise of modern science in Europe, 1500–1750. Transformation of ideas about nature, knowledge, medicine, and technology in the age of Copernicus, Vesalius, Galileo, Descartes, and Newton.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: STS 136.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

HIS 138A – The Rise of the Russian Empire, 1304-1825 (4 units)

Course Description: Expansion of the Russian state in Muscovite and imperial era. Emphasis on autocratic rule, the incorporation of non-Russian peoples, and emergence of Russia as a Great Power.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Only 2 units of credit will be allowed to students who have completed former HIS 137B.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 138B – Reform & Revolution in Tsarist Russia, 1825-1917 (4 units)

Course Description: Processes of state reform and social change in the 19th century; failure of reform and collapse of the Russian Empire; the revolutions of 1917.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 138C – Russian History: The Rise & Fall of the Soviet Union, 1917 to Present (4 units)

Course Description: Emergence of the Soviet Union as a socialist system and a Great Power; the decline and collapse of the Soviet Union and the formation of independent nation states in its place.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have completed former HIS 137C.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 139A – Medieval & Renaissance Medicine (4 units)

Course Description: History of medicine, circa 1000-1700. Revival of ancient medicine; role of the universities; development of anatomy, chemistry and natural history; ideas about the body; cultural understanding of disease; hospital and the public health system.

Learning Activities: Discussion/Laboratory 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 139B – Medicine, Society, & Culture in Modern Europe (4 units)

Course Description: History of European medicine, 18th to 20th centuries, by examining the development of medical knowledge in epidemiology and anatomy; function of this knowledge, how it changed with technological breakthroughs and professionalization; and role of medicine in attitudes toward poverty, women, race, disease.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 140 – The Rise of Capitalism in Europe (4 units)

Course Description: Comparative analysis of major interpretations of the rise of merchant capitalism during the Middle Ages and Renaissance; European expansion overseas, 1450-1815; the transition to modern capitalism via industrial revolution. Interplay of social, political, cultural, and economic history.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 141 – France Since 1815 (4 units)

Course Description: France since 1815.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 142A – History of the Holocaust (4 units)

Course Description: Topics include comparative genocide, medieval and modern antisemitism, modern German history, the rise of Nazism, Jewish life in Europe before the Nazi period, and the fate of the Jewish communities and other persecuted groups in Europe from 1933-1945.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 142B – The Memory of the Holocaust (4 units)

Course Description: Examination of the literary, philosophical, theological and artistic responses to the Holocaust of the European Jews.

Exploration of how memory is constructed, by whom and for what purposes.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 143 – History of Eastern Europe & the Balkans (4 units)

Course Description: History of the Baltic, Danubian, and Balkan lands since the Middle Ages. National cultures and conflicts in the Polish Commonwealth and the Habsburg and Ottoman Empires; nationalist movements, 1789-1914; the 20th century, including an analysis of the contemporary scene.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 144A – History of Germany, 1450 to 1789 (4 units)

Course Description: Survey of early modern Germany, 1450 to 1789, covering the theology and social history of the Reformation, the Peasants War of 1525, religious warfare, state building and absolutism, the rise of Prussia, Austro-Prussian dualism, and the German Enlightenment.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 144B – History of Germany since 1789 (4 units)

Course Description: History of the German lands in the age of the French Revolution; 19th-century liberalism, nationalism, and industrialization; the World Wars, National Socialism, and the Holocaust; east and west Germany in the Cold War; the post-reunification scene.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have completed former HIS 144.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 145 – War & Revolution in Europe: 1789-1918 (4 units)

Course Description: Survey of revolutionary movements, international crises, and wars in Europe from the French Revolution to World War I.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 146A – Europe in the 20th Century (4 units)

Course Description: Survey of the history of Europe from 1919 to 1939.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 146B – Europe in the 20th Century (4 units)

Course Description: Survey of the history of Europe since 1939.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 147A – European Intellectual History: 1800-1870 (4 units)

Course Description: European thought in the early industrial era. Shifting cultural frameworks, from romanticism to scientism; liberal and socialist reactions to social change. Focus on the work of Goethe, Hegel, J.S. Mill, Marx, Darwin and Flaubert.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 147B – European Intellectual History: 1870-1920 (4 units)

Course Description: Cultural and intellectual watershed of the late-19th and early-20th centuries. Emergence of modern art and literature; psychoanalysis and the new social sciences. Focus on the work of Baudelaire, Wagner, Nietzsche, Freud, Weber and Kafka.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 147C – European Intellectual History: 1920-1970 (4 units)

Course Description: European thought and culture since World War I.

Coverage includes: literature and politics; Communism and Western Marxism; Fascism; Existentialism; Structuralism; Feminism. Particular attention to Lenin, Brecht, Hitler, Sartre, Camus, Beckett, Marcuse, Foucault, Woolf and de Beauvoir.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 148A – Women & Society in Europe: 1500-1789 (4 units)

Course Description: Roles and perceptions of women from the Renaissance to the French Revolution. Emphasis on social and economic factors as well as on discussions of women in the writings of political theorists and social commentators.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 148B – Women & Society in Europe: 1789-1920 (4 units)

Course Description: Roles and perceptions of women from the French Revolution to World War I, primarily in France and England. Emphasis on social and economic developments within a loosely chronological and comparative framework.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 148C – Women in Society in Europe: 1914-Present (4 units)

Course Description: History of 20th-century Europe from the perspective of women and the family, and of sexual and gender relations. Emphasis on the impact on women of major events and movements, such as World War I, fascism, Soviet communism, World War II, the welfare state, feminism, and mass culture.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 149 – Comparative Cultural History of Modern Britain & France, 1880-1914 (4 units)

Course Description: Cultural comparison of the histories of Britain and France during the fin de siecle. Addresses cultural debates of the period (including gender, race, class) and the practices of cultural history.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 151A – England: The Middle Ages (4 units)

Course Description: Origins of England to the accession of the Lancastrians. Survey includes: impact of Norman Conquest on Anglo-Saxon institutions; rise of the Church, common law, parliament, and the economy; thought, arts, and literature to the age of Chaucer and Wyclif.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 151B – England: The Early Modern Centuries (4 units)

Course Description: From Lancaster and York to the Glorious Revolution. Includes growth of the Church of England; beginnings of modern worldwide economy; rise of the gentry and parliament; thought, arts, and literature in the times of More, Shakespeare, Hobbes, Wren, and Newton.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 151C – 18th-Century England (4 units)

Course Description: English history from the Glorious Revolution to the French Revolution. Examination of the transformation of one of Europe's most politically unstable kingdoms into the firmly established constitutional monarchy which provided an environment fit to engender the industrial revolution.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 151D – Industrial England (4 units)

Course Description: English history from Waterloo to the Battle of Britain; the rise and continuance of the first industrial nation, examining the transformation of landed to class society, oligarchy to democracy and bureaucracy, Bentham to Bloomsbury, empire to commonwealth.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 156 – Latin American Migration History (4 units)

Course Description: Migrations to, from, and within Latin America, with a focus on the period from independence to the present day. The historical development of settler colonialism, inter-regional migrations, rural-to-urban migration, migration promotion, restriction laws, naturalization, and sanctuary across Latin American scenarios. Research paper required.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have previously completed an upper division history course in latin american migration history.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 157 – Business, Biomes & Knowledge: Latin American Environmental History (4 units)

Course Description: Introduction to the geography, political ecology, environmental movements of Latin America and the Caribbean, regional biomes, commodity markets, and the relationships between non-human ecosystems and Latin American societies. Development of extractive processes, land law, agricultural practices, scientific knowledge, and environmental conservation in neotropical forests, Sonoran Desert, the Amazon, Andes and Pampas, among other ecologies.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 158 – Special Topics in Latin American History (4 units)

Course Description: Topics in the history of Latin America. Topics may be framed geographically (e.g., Central America), chronologically (e.g., The Cold War) or thematically (e.g., environmental history).

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HIS 159 – Women & Gender in Latin American History (4 units)

Course Description: Roles of women and men in the history of Latin America, with an emphasis on the intersection of gender with racial and class categories. Introduction to the theoretical premises of women's and gender history.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 160 – Spain & America in the 16th Century (4 units)

Course Description: Atlantic world in the 16th century, particularly the transcultural and reciprocal social and economic relations between Spain and America in the course of colonization.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 161 – Human Rights in Latin America (4 units)

Course Description: History of the origins, denial and protection of Human Rights in Latin America. Emphasis on dictatorships, political violence, social resistance, democracy, justice, accountability, truth commissions, memory.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: HMR 161.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HIS 162 – History of the Andean Region (4 units)

Course Description: History of the Andean region, the area that now comprises modern Peru, Bolivia, and Chile, from the beginning of human settlement to the present. May be taught abroad.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 163A – History of Brazil (4 units)

Course Description: The history of colonial and imperial Brazil from 1500 to 1889. Written reports.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 163B – History of Brazil (4 units)

Course Description: The history of the Brazilian republic from 1889 to the present.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 164 – History of Chile (4 units)

Course Description: Emphasis on the history of Chilean political economy from 1930 to the present. Various strategies of development (modernization, Marxism, Neo-Liberalism); the rise of mass politics; the course of foreign relations; and the richness of Chilean literature.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 165 – Latin American Social Revolutions (4 units)

Course Description: Major social upheavals since 1900 in selected Latin American nations; similarities and differences in cause, course, and consequence. May be taught abroad.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 166A – History of Mexico to 1848 (4 units)

Course Description: Political, economic, and social development of pre-Columbian, colonial and national Mexico to 1848.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 166B – History of Mexico since 1848 (4 units)

Course Description: History of Mexico from 1848 to the present.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 167 – Modern Latin American Cultural & Intellectual History (4 units)

Course Description: Introduce to the cultural and intellectual history of modern Latin America including architecture, cinema, painting, music and literature.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 168 – History of Inter-American Relations (4 units)

Course Description: Diplomatic history of Latin America since independence, intra-Latin American relations, relations with the United States, participation in international organizations, and communism in Latin America.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 169A – Mexican-American History (4 units)

Course Description: Economic, social, religious, cultural and political development of the Spanish-speaking population of the Southwestern United States from about 1800 to 1910.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 169B – Mexican-American History (4 units)

Course Description: Role of the Mexican and Mexican-American or Chicano in the economy, politics, religion, culture and society of the Southwestern United States since 1910.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 170A – Colonial America (4 units)

Course Description: Colonial society from 1607 to the American Revolution, with emphasis on European expansion, political, social and economic foundations, colonial thought and culture, and imperial rivalry.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 170B – The American Revolution (4 units)

Course Description: Analysis of the Revolutionary epoch with emphasis on the structure of British colonial policy, the rise of revolutionary movements, the War for Independence and its consequences, and the Confederation period.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 170C – The Early National Period, 1789-1815 (4 units)

Course Description: Political and social history of the American republic from the adoption of the Constitution through the War of 1812 and its consequences.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 171A – Slavery, Society & Expansion in the Early U.S. (4 units)

Course Description: Political, social, economic history of early-19th century U.S. emphasizing slavery and expansion. The internal slave trade, the settlement of the Mississippi Valley and Far West, transformed economic and social relations, new reform movements.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 171B – Civil War Era (4 units)

Course Description: Examination of the political and social history of the United States from the Compromise of 1850 to the end of the Civil War in 1865. Causes of the war the war itself and the problems of reconstruction after the war.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 171BF – The Civil War in American Film (1 unit)

Course Description: Viewing and discussion of films with short writing assignments.

Prerequisite(s): HIS 171B required concurrently.

Learning Activities: Discussion 1 hour(s), Film Viewing.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

HIS 171C – Reconstruction, America's Second Founding (4 units)

Course Description: After the U.S. Civil War, from 1865 to 1876. Emphasis on end of slavery; expansion of civil rights, voting rights, and birthright citizenship; overthrow of biracial Southern governments; segregation and disfranchisement; culture of reconciliation.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH).

HIS 171D – Selected Themes in 19th-Century American History (4 units)

Course Description: Interpretative overview of a single topic in the history of the United States in the 19th century. Sample topics include social history, the 1850s, and southern history.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 172 – American Environmental History (4 units)

Course Description: American history through connections between people and nature, pre-Columbus to climate change. Native America; conquest; epidemics; extinctions; industrialization; pollution; environmentalism; climate change and global warming; ideas of nature.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 173 – Becoming an American: Immigration & American Culture (4 units)

Course Description: Introduction to the wide range of immigrant experiences and cycles of nativism that have shaped American culture in the 20th century. From novels, memoirs and films, students will explore how external and internal immigration has created a multicultural society.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 174A – The Gilded Age & Progressive Era: United States, 1876-1917 (4 units)

Course Description: US history and the construction of modern America from the end of Reconstruction to US entry into World War I. Includes Southern redemption, Western incorporation, electoral corruption, labor movements, Populism, Progressivism, women's suffrage, US imperial expansion, and immigration restriction.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 174AD – Emergence of Modern America: Discussion (1 unit)

Course Description: Intensive discussion of topics and readings for HIS 174A.

Prerequisite(s): HIS 174A required concurrently.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

HIS 174B – War, Prosperity, & Depression: United States, 1917-1945 (4 units)

Course Description: America's emergence as a world power, the business culture of the 1920s, the New Deal and World War II. Emphasis on such issues as government regulation of the economy, welfare capitalism, and class, racial, ethnic, and gender conflicts.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 174BD – America in War, Prosperity & Depression: Discussion (1 unit)

Course Description: Intensive discussion of topics and readings for HIS 174B.

Prerequisite(s): HIS 174B required concurrently.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

HIS 174C – The United States Since World War II, 1945 to the Present (4 units)

Course Description: America's struggle to respond to new complexities in foreign relations, social tensions, family changes and media. Emphasis on such topics as: Cold War; anticommunist crusade; civil rights, feminist and environmentalist movement; New Left; counterculture; Vietnam; Watergate; and the moral majority.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 174CD – The United States Since World War II: Discussion (1 unit)

Course Description: Intensive discussion of topics and readings for HIS 174C.

Prerequisite(s): HIS 174C required concurrently.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

HIS 174D – Selected Themes in 20th-Century American History (4 units)

Course Description: Interpretive overview of a single topic in the history of the United States in the 20th century with attention to the phases and processes of historical change.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 174DD – Selected Themes in 20th-Century American History: Discussion (1 unit)

Course Description: Intensive discussion of topics and readings for HIS 174D.

Prerequisite(s): HIS 174D required concurrently.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HIS 175 – American Intellectual History (4 units)

Course Description: Exploration of the ideas that have shaped politics and society in the United States from colonial times to the present. Topics include American liberalism, republicanism, democracy, constitutionalism, communitarianism, utopianism, pragmatism, feminism, Darwinism, nationalism, conservatism, and economics.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 176A – Cultural & Social History of United States (4 units)

Course Description: Study of social and cultural forces in American society in the 19th century with emphasis on social structure, work and leisure, socialization and the family, social reform movements and changes in cultural values.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 176B – Cultural & Social History of United States (4 units)

Course Description: Study of social and cultural forces in American society in the 20th century with emphasis on social structure, work and leisure, socialization and the family, social reform movements and changes in cultural values.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 177A – History of Black People & American Race Relations: 1450-1860 (4 units)

Course Description: History of black people in the United States from the African background to Reconstruction.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 177B – History of Black People & American Race Relations: 1860-Present (4 units)

Course Description: History of black people and race relations from 1860-present. Emphasis on Civil War, Reconstruction, Segregation, Age of Accommodation, black nationalism, urbanization, civil rights, and changing ideology of race relations.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 178 – Water in the West: Environment & Politics in America's Arid Lands (4 units)

Course Description: Politics and environmental consequences of water development in the arid western United States since 1848, with emphasis on California and western rivers, including the Colorado, Columbia, Missouri, and Mississippi. Irrigated settlement, the making of state and federal water law and bureaucracy, urban vs. rural competition, Native water rights, growth of irrigation technologies, groundwater overdraft, wildlife impacts. One half-day field trip required.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 179 – Asian American History, 1850-Present (4 units)

Course Description: Historical experience of people of Asian ancestry in the United States from the mid-19th century to the present. Migration, labor, community formation, race relations, women and gender, popular culture.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 180AN – American Political History, 1789-1896 (4 units)

Course Description: Growth of American politics from the birth of the republic to the end of the 19th century. Development of political parties, the expanding electorate, and how social issues such as slavery shaped the political process.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have completed HIS 180A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 180BN – American Political History, 1896-present (4 units)

Course Description: Politics in the United States from 1896 to the present. Topics include race and partisan politics; communism and anti-communism; the New Deal and the centralization of government; and the rise of the imperial presidency.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have taken HIS 180A or HIS 180C.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 180C – The Fight for the Right to Vote (4 units)

Course Description: History of the struggle for voting rights from the colonial period to the present. Emphasis on the struggle for inclusion by African Americans, women, Latinos, and other groups.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH).

HIS 181 – Religion in American History to 1890 (4 units)

Course Description: American religious history from colonization through the Gilded Age. Topics include religious diversity in America; native American religion; Protestant evangelism; gender and religion; religion and bigotry; African American religion; religion in the Civil War; and religion's response to modernization.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 182 – Gender & Justice in American History (4 units)

Course Description: Intersection of gender and law in North America from the colonial period through the 20th century. Topics include witchcraft, suffrage, child custody, protective labor laws, regulation of sexuality. Analysis of legal change, trials, and cultural influences.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 183A – The Frontier Experience: Trans-Mississippi West (4 units)

Course Description: The fur trade, western exploration and transportation, the Oregon Country, the Greater Southwest and the Mexican War, the Mormons, mining discovery, and the West during the Civil War.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 183B – The Frontier Experience: Trans-Mississippi West (4 units)

Course Description: Spread of the mining kingdom, the range cattle industry, Indian-military affairs, settlement of the Great Plains and Rocky Mountain Regions and political organization of the West.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HIS 184 – History of Sexuality in America (4 units)

Course Description: History of sexuality in America from pre-European through the late-20th century. Topics include birth control, marriage, sexual violence, prostitution, inter-racial relationships, heterosexuality and homosexuality, the feminist, gay, and lesbian liberation movements, AIDS, commercialization of sexuality.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 185A – History of Science in America (4 units)

Course Description: Survey of the European background. Study of American scientific institutions, ideas, personalities, creative processes in science, and of relationships between society and science from colonial times to present.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

HIS 185B – History of Technology in America (4 units)

Course Description: Study of American technology, emphasizing biographical approach to historical understanding of technological change, creative processes, institutions, ideas, and relationships between technology and society from colonial times to present.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

HIS 186 – History of Alcoholic Beverages in the United States (4 units)

Course Description: History of intoxicating drink in the lands that became the United States from the period before European settlement to the present, including agriculture, manufacture, distribution, and consumption, focusing on culture and politics of alcoholic beverages such as beer, wine, and spirits.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH).

HIS 187 – History of US Foreign Relations in the 20th Century (4 units)

Course Description: Rise of the U.S. to superpower standing during the 20th century, from colonialism to the war on terror, including political, diplomatic, cultural, and economic activities of both US government and private American agencies beyond U.S. borders.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

HIS 188 – America in the 1960s (4 units)

Course Description: Tumult and upheaval in American politics, culture, and society 1961-1969. Civil rights; Vietnam, the draft and the anti-war movement; rock and roll and the counterculture; modern feminism; modern conservatism; student movements; urban unrest and insurrection.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 189 – California History (4 units)

Course Description: California history from the pre-colonial period to the present including dispossession of California's Indians, political economy of the Spanish and Mexican periods, Gold Rush effects, industrialization, Hollywood, water politics, World War II, Proposition 13, and the emergence of Silicon Valley.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have completed two of HIS 189A, HIS 189B, HIS 189C.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

HIS 190A – Middle Eastern History I: The Rise of Islam, 600-1000 (4 units)

Course Description: Middle Eastern history from the rise of Islam to the disintegration of the Abbasid Caliphate; the formative centuries of a civilization. Politics and religion, conquest and conversion, arts and sciences, Christians, Jews and Muslims, gender and sexuality, orthodoxy and heterodoxy.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 190B – Middle Eastern History II: The Age of the Crusades, 1001-1400 (4 units)

Course Description: Middle Eastern history during the age of the Crusades and Mongol invasions. The idea of holy war, the Crusades, the Mongols as the bearers of Chinese arts, nomads and sedentary life, feudalism, mysticism, slavery, women in the medieval Middle East.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 190C – Middle Eastern History III: The Ottomans, 1401-1730 (4 units)

Course Description: Middle Eastern history from the foundation of the Ottoman Empire on the borderlands of Byzantine Anatolia through its expansion into Europe, Asia, and Africa, creating a new cultural synthesis including the Arab, Greek, Islamic, Mongol, Persian, Slavic, and Turkish traditions.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 190D – Middle Eastern History IV: Safavids Iran, 1300-1720 (4 units)

Course Description: Middle Eastern history focusing on Safavid Empire (present-day Iran, Iraq, Afghanistan, up to Georgia), beginning with the origins of the dynasty as a powerful religious family, to the establishment of the Empire, focusing on Social, Religious, Economic, and Political History.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 191A – Classical China (4 units)

Course Description: History of Chinese civilization from its origins through the establishment of city states and the flowering of classical philosophy, to the rise and fall of the First Empire.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 191B – High Imperial China (4 units)

Course Description: Political disunion and the influx of Buddhism; reunification under the great dynasties of T'ang, Sung, and Ming with analysis of society, culture and thought.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 191C – Late Imperial China (4 units)

Course Description: Patterns and problems of Chinese life traced through the Ming and Ching dynasties (c.1500-1800), prior to the confrontation with the West in the Opium War. Readings include primary sources and novels portraying elite ethos as well as popular culture.

Prerequisite(s): HIS 009A or upper division standing recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 191D – 19th-Century China: The Empire Confronts the West (4 units)

Course Description: Decline and fall of the Chinese Empire, with particular attention to the social and political crises of the 19th century, and the response of government officials, intellectuals, and ordinary people to the increasing pressures of Western imperialism.

Prerequisite(s): HIS 009A or upper division standing recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 191E – The Chinese Revolution (4 units)

Course Description: Analysis of China's cultural and political transformation from Confucian empire into Communist state. Emphasis on emergence and triumph of peasant revolutionary strategy (to 1949), with some attention to its implications for post-revolutionary culture and politics.

Prerequisite(s): Upper division standing recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 191F – History of the People's Republic of China (4 units)

Course Description: Comprehensive analysis of recent Chinese history, including land reform, the Cultural Revolution, the post-Mao era, and the consequences of the new economic policies of the 1980s.

Prerequisite(s): Upper division standing recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have completed HIS 190C.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 191G – Special Topics in Chinese History to 1800 (4 units)

Course Description: Topics in the history of China from the beginning of the imperial period through the high Qing dynasty. Topics may be framed chronologically (e.g., the Ming Dynasty) or thematically (e.g., Trade in early Chinese history).

Prerequisite(s): HIS 009A recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HIS 191H – Special Topics in Chinese History after 1800 (4 units)

Course Description: Topics in the history of China since 1800. Topics may be framed chronologically (e.g., The Republican Period (1911-1948)) or thematically (e.g., The Modern Evolution of Chinese Law).

Prerequisite(s): HIS 009A recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s) when topics differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HIS 191J – Sex & Society in Modern Chinese History (4 units)

Course Description: Role of sex, gender, and family relations in the development of Chinese politics, society, and personal life in the modern period, 1900-present.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HIS 192 – Internship in History (1-12 units)

Course Description: Supervised internship and study as historian, archivist, curator, or in another history-related capacity, in an approved organization or institution.

Prerequisite(s): Consent of instructor; enrollment dependent on availability of intern positions, with priority to History majors.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HIS 193A – History of the Modern Middle East, 1750-1914 (4 units)

Course Description: State and society within the Middle East from 1750 to 1914 under pressure of the changing world economy and European imperialism. Themes: colonialism, Orientalism, intellectual renaissance, Islamic reform, state-formation, role of subaltern groups.

Prerequisite(s): HIS 006 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HIS 193B – History of the Modern Middle East, From 1914 (4 units)

Course Description: Middle East from the turn of the 20th century to the present. Themes include the legacy of imperialism, cultural renaissance, the World Wars, nationalism, Palestine/Israel, Islamic revival, gender, revolutionary movements, politics of oil and war, cultural modernism, exile and diaspora.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HIS 193C – The Middle East Environment: Historical Change & Current Challenges (4 units)

Course Description: Examines Middle East environment and human use of nature over last 10,000 years. Introduction to desert ecology, environmental history and current environmental problems. Case Studies of Egypt, Maghreb countries, Arabian peninsula/Gulf countries, desertification, water, indigenous knowledge, and national parks.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

HIS 193D – History of Modern Iran, From 1850 to Present (4 units)

Course Description: Modern Iran from the mid 19th century to the present. Themes include the legacy of imperialism, cultural renaissance, the World Wars, nationalism, modernization, Islamic revival, gender, revolutionary movements, politics of oil and war.

Prerequisite(s): HIS 006 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HIS 194A – Aristocratic & Feudal Japan (4 units)

Course Description: Broad survey of the cultural, social, religious, and political aspects of Japanese history from mythological times through the 16th century emphasizing comparison of the organizations, values, and beliefs associated with the aristocratic and feudal periods.

Learning Activities: Lecture 3 hour(s), Term Paper, Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 194B – Early Modern Japan (4 units)

Course Description: Survey of the cultural, social, economic, and political aspects of Japanese history from the 17th through the 19th centuries emphasizing the development of those patterns of thought and political organization with which Japan met the challenge of the nineteenth-century Western expansionism.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 194C – Modern Japan (4 units)

Course Description: Survey of the cultural, social, economic, and political aspects of Japanese history in the 20th century emphasizing labor and social movements, militarism and the Pacific war, and the emergence of Japan as a major economic power.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 194D – Business & Labor in Modern Japan (4 units)

Course Description: Survey of labor and management relations in Japan from the mid-18th century to the present.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 194E – Education & Technology in Modern Japan (4 units)

Course Description: Survey of education and technology in Japan from the mid-18th century to the present.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 195B – History of Modern Korea (4 units)

Course Description: History of Modern Korea, from Yi dynasty period to 1990s. Covers the political and socioeconomic changes in 19th century, modernization under Japanese colonialism, postwar economic growth and effects of the Cold War.

Prerequisite(s): Upper division standing recommended.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 195C – A History of Vietnam (4 units)

Course Description: Overview of Vietnamese history: early state formation in Southeast Asia; expansion/contention in the 17th and 18th centuries; colonial period; war with the US; and post-war developments (with an emphasis on relations with China and the US).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 196A – Medieval India (4 units)

Course Description: Survey of history of India in the millennium preceding arrival of British in the 18th century, focusing on interaction of the civilizations of Hinduism and Islam and on the changing nature of the state.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 196B – Modern India (4 units)

Course Description: Survey of cultural, social, economic, and political aspects of South Asian history from arrival of the British in the 18th century to formation of new independent states-India, Bangladesh, and Pakistan in the 20th century.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HIS 197T – Tutoring in History (1-5 units)

Course Description: Tutoring of students in lower division courses.

Weekly meeting with instructors in charge of courses. Written reports on methods and materials required. No final examination.

Prerequisite(s): Enrolled as a History major with senior standing and consent of department chairperson.

Learning Activities: Discussion 1 hour(s), Laboratory 3 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Pass/No Pass only.

HIS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HIS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HIS 200A – First Year Research Seminar (4 units)

Course Description: Preparation for higher degrees in History. Individual research and analysis resulting in a substantial research paper of publishable quality. Completion required of all Ph.D. candidates. HIS 200A and HIS 200B must be taken in continuous sequence, ordinarily during the first year.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Tutorial 1 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

HIS 200B – First Year Research Seminar (4 units)

Course Description: Preparation for higher degrees in History. Individual research and analysis resulting in a substantial research paper of publishable quality. Completion required of all Ph.D. candidates. HIS 200A and HIS 200B must be taken in continuous sequence, ordinarily during the first year.

Prerequisite(s): HIS 200A; consent of instructor.

Learning Activities: Seminar 3 hour(s), Tutorial 1 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

HIS 201A – Sources & General Literature of History: Ancient (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. Ancient.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201B – Sources & General Literature of History: Medieval (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. Medieval.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201C – Sources & General Literature of History: Renaissance & Reformation (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. Renaissance & Reformation.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201D – Sources & General Literature of History: Early Modern Europe (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. Early Modern Europe.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201E – Sources & General Literature of History: Europe Since 1815 (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. (E) Europe since 1815.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201F – Sources & General Literature of History: China to 1880 (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. China to 1880.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201G – Sources & General Literature of History: China Since 1880 (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. China since 1880.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201H – Sources & General Literature of History: Britain (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. Britain.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201I – Sources & General Literature of History: Latin America Since 1810 (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. Latin America since 1810.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201J – Sources & General Literature of History: American History to 1787 (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. American History to 1787.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201K – Sources & General Literature of History: United States, 1787-1896 (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. United States, 1787-1896.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201L – Sources & General Literature of History: United States Since 1896 (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. United States since 1896.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201M – Sources & General Literature of History: Middle East (4 units)

Course Description: Addresses various theoretical and methodological approaches to the study of the Modern Middle East. Survey Modern Middle East historiography in light of theoretical innovations such as post-Orientalism, World Systems theory, and postcolonial theory.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201N – Sources & General Literature of History: Modern Japan (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. Modern Japan.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201P – Sources & General Literature of History: African Historiography (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. African Historiography.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201Q – Sources & General Literature of History: Cross-Cultural Women's History (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. Cross-Cultural Women's History.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201S – Sources & General Literature of History: History of Science & Medicine (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. History of Science and Medicine.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201T – Sources & General Literature of History: Jewish History (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. Jewish History.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201W – Sources & General Literature of History: Advanced Topics in World History (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. Advanced Topics in World History.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 201X – Sources & General Literature of History: World History (4 units)

Course Description: Designed primarily for students preparing for higher degrees in history. (X) World History.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 202A – Major Issues in Historical Interpretation: Ancient (4 units)

Course Description: Fundamental issues and debates in the study of history. Ancient. Readings, papers, and class reports.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 202B – Major Issues in Historical Interpretation: Medieval Europe (4 units)

Course Description: Fundamental issues and debates in the study of history. Medieval Europe. Readings, papers, and class reports.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 202C – Major Issues in Historical Interpretation: Modern Europe (4 units)

Course Description: Fundamental issues and debates in the study of history. Modern Europe. Readings, papers, and class reports.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 202D – Major Issues in Historical Interpretation: India (4 units)

Course Description: Fundamental issues and debates in the study of history. India. Readings, papers, and class reports.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 202E – Major Issues in Historical Interpretation: India (4 units)

Course Description: Fundamental issues and debates in the study of history. Africa. Readings, papers, and class reports.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 202F – Major Issues in Historical Interpretation: China (4 units)

Course Description: Fundamental issues and debates in the study of history. China. Readings, papers, and class reports.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 202G – Major Issues in Historical Interpretation: Japan (4 units)

Course Description: Fundamental issues and debates in the study of history. Japan. Readings, papers, and class reports.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 202H – Major Issues in Historical Interpretation: United States (4 units)

Course Description: Fundamental issues and debates in the study of history. United States. Readings, papers, and class reports.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 202I – Major Issues in Historical Interpretation: Latin America (4 units)

Course Description: Fundamental issues and debates in the study of history. Latin America. Readings, papers, and class reports.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when subject differs.

Grade Mode: Letter.

HIS 203A – Research Seminar (4 units)

This version has ended; see updated course, below.

Course Description: Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year.

Learning Activities: Seminar 3 hour(s), Tutorial 1 hour(s).

Grade Mode: Letter.

HIS 203A – Second-Year Research Seminar (4 units)

Course Description: Prepare for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. HIS 203A & HIS 203B must be taken in continuous sequence, ordinarily during second year..

Learning Activities: Seminar 3 hour(s), Tutorial 1 hour(s).

Enrollment Restriction(s): Open to graduate students.

Grade Mode: Letter.

This course version is effective from, and including: Fall Quarter 2024.

HIS 203B – Research Seminar (4 units)

This version has ended; see updated course, below.

Course Description: Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year.

Prerequisite(s): HIS 203A.

Learning Activities: Seminar 3 hour(s), Tutorial 1 hour(s).

Grade Mode: Letter.

HIS 203B – Second-Year Research Seminar (4 units)

Course Description: Prepare for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. HIS 203A & HIS 203B must be taken in continuous sequence, ordinarily during second year..

Prerequisite(s): HIS 203A.

Learning Activities: Seminar 3 hour(s), Tutorial 1 hour(s).

Enrollment Restriction(s): Open to graduate students.

Grade Mode: Letter.

This course version is effective from, and including: Fall Quarter 2024.

HIS 203C – Research Seminar (4 units)

Starting Summer Session 1 2025, this course is no longer offered.

Course Description: Designed for students preparing for higher degrees in History. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year.

Prerequisite(s): HIS 203A.

Learning Activities: Seminar 3 hour(s), Tutorial 1 hour(s).

Grade Mode: Letter.

HIS 204 – Historiography (4 units)

Course Description: Major issues in the philosophy and methodology of history.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

HIS 221 – Medieval History (4 units)

Course Description: Topics in the history of medieval and early Renaissance Europe.

Prerequisite(s): HIS 121A, HIS 121B, HIS 121C recommended.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

HIS 245 – Modern European History (4 units)

Course Description: Primary sources and research methodologies in the history of modern France and Germany. May be repeated once for credit.

Prerequisite(s): HIS 201E.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

HIS 261 – Latin American History (4 units)

Course Description: Latin American history.

Prerequisite(s): Two courses in Latin American history; reading knowledge of Spanish or Portuguese.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

HIS 271A – United States History (4 units)

Course Description: Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter.

Prerequisite(s): (HIS 201J, HIS 201K, HIS 201L) or HIS 202H.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

HIS 271B – United States History (4 units)

Course Description: Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter.

Prerequisite(s): (HIS 201J, HIS 201K, HIS 201L) or HIS 202H.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

HIS 291A – Chinese History (4 units)

Course Description: Research on topics to be chosen by the students for the purpose of writing article-length papers.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

HIS 291B – Chinese History (4 units)

Course Description: Completion of article-length papers on topics chosen by students.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

HIS 291C – Methods & Issues in Chinese History (4 units)

Course Description: Readings in Chinese historical materials. Training in the use of Chinese reference works (including on-line resources).

Prerequisite(s): Consent of instructor. Reading knowledge of Chinese.

Learning Activities: Seminar 2 hour(s), Tutorial 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

HIS 292 – College Teaching Internship (4 units)

Course Description: Student prepares and teaches one lower division history course in a nearby community college under the supervision of a UC Davis instructor and a community college instructor.

Prerequisite(s): HIS 300 (may be taken concurrently).

Learning Activities: Internship 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

HIS 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Letter

HIS 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

HIS 299D – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

HIS 389 – Introductory Seminar for Teaching Assistants (1 unit)

Course Description: An introduction to the broad comparative and theoretical issues of teaching methods and techniques in history.

Prerequisite(s): HIS 390 required concurrently.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

HIS 390 – Teaching History in College (2 units)

Course Description: Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Honors Challenge (HNR)

College of Letters & Science

HNR 090X – Honors Discussion Section (1 unit)

Course Description: Examination of special topics in selected lower division courses through additional readings, discussions, term papers, collaborative work, or special activities, including projects, field and laboratory experiences, computer simulations, creative works.

Prerequisite(s): Open only to students in the Davis Honors Challenge.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

HNR 092 – Internship (1-12 units)

Course Description: Supervised work experience under the auspices of the Davis Honors Challenge.

Prerequisite(s): Consent of instructor; open only to students in the Davis Honors Challenge.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

HNR 094 – Honors Seminar (4 units)

Course Description: Collaborative, multidisciplinary exploration of complex contemporary problem. Focus on critical thinking and analytical interpretation, on oral and written communication, and on the use of electronic media in gathering information.

Learning Activities: Seminar 4 hour(s).

Enrollment Restriction(s): Open to students in the Davis Honors Challenge.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HNR 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; open to students in the Davis Honors Challenge.

Learning Activities: Discussion 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HNR 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor; student in the Davis Honors Challenge.

Learning Activities: Independent Study 1-5 hour(s).

Grade Mode: Pass/No Pass only.

HNR 190X – Honors Contract (1 unit)

Course Description: In-depth examination of material in an upper division course as defined in an Honors Contract Proposal submitted by the student. Contract must be approved by the instructor and the Honors Council of the Academic Senate.

Prerequisite(s): Open only to students in the Davis Honors Challenge.

Learning Activities: Independent Study, Discussion.

Repeat Credit: May be repeated.

Grade Mode: Letter.

HNR 192 – Internship (1-12 units)

Course Description: Supervised work experience under the auspices of the Davis Honors Challenge.

Prerequisite(s): Consent of instructor; open only to students in the Davis Honors Challenge.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

HNR 194 – Honors Seminar (3 units)

Course Description: Team-based work on actual problems drawn from the public or private sector. Focus on critical thinking and analytic interpretation, oral and written communication skills, and development of practical solutions to real-world problems.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open only to students in the Davis Honors Challenge.

Repeat Credit: May be repeated.

Grade Mode: Letter.

HNR 195 – Honors Thesis/Honors Project (1-3 units)

Course Description: Guided independent study of a selected topic leading to the presentation of an honors thesis/honors project.

Prerequisite(s): Open only to students in the Davis Honors Challenge.

Learning Activities: Independent Study 3-9 hour(s).

Repeat Credit: May be repeated 9 unit(s).

Grade Mode: Letter.

HNR 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; open only to students in the Davis Honors Challenge.

Learning Activities: Discussion 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HNR 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Open only to students in the Davis Honors Challenge.

Learning Activities: Independent Study 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Horticulture (HRT)**Graduate Studies****HRT 200A – Horticulture & Agronomy: Principles (4 units)**

Course Description: Core course to introduce students to the principles that are of general importance in horticultural and agronomic research, including agroecology, plant developmental physiology, crop improvement, and biotechnology. Generally taken in the first year of the graduate program.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

HRT 200B – Horticulture & Agronomy: Practices (4 units)

Course Description: Introduction to horticultural and agronomic cropping systems. Covers current applied research within agroecology, crop improvement, crop production, postharvest biology.

Prerequisite(s): HRT 200A recommended; graduate standing.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 3 hour(s), Seminar 3 hour(s).

Grade Mode: Letter.

HRT 203 – Research Perspectives in Horticulture (3 units)

Course Description: Following lectures/discussions of scientific methodology, students develop research proposals aided by classroom discussions and individual interactions with instructors. Lectures and critiques of classical papers provide a sense of the evolution of the current concepts in perennial plant biology.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 1 hour(s), Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

HRT 211 – Current Topics in Root Biology (3 units)

Course Description: How roots grow and interact with their environment, from embryonic roots to large tree roots. Analysis of recent literature related to the impact of internal controls on root growth and root system development (e.g., developmental signaling, carbohydrate availability, water status), and the impacts of the external environment on root physiology, root system development, and individual root growth (e.g., soil structure, soil microbial, water, nutrients).

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

HRT 290 – Seminar (1 unit)

Course Description: Seminars presented by invited speakers, students, or faculty on selected topics in horticulture.

Prerequisite(s): Graduate standing at UC Davis.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

HRT 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

HRT 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Human Development (HDE)

College of Agricultural & Environmental Sciences

HDE 012 – Human Sexuality (3 units)

Course Description: Vocabulary, structure/function of reproductive system; sexual response; pre-natal development; pregnancy and childbirth; development of sexuality; rape and sexual assault; birth control; sexually transmitted diseases; homosexuality; establishing/maintaining intimacy; sexual dysfunctions; communication; enhancing sexual interaction, cultural differences in attitudes towards sexuality. May be taught abroad.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

HDE 092 – Internship (1-12 units)

Course Description: Supervised internship, off campus and on campus, in community and institutional setting. Involves progressively greater (supervised) participation in program delivery or assessment.

Prerequisite(s): Consent of instructor; field work experience or at least one course related to fieldwork assignment (e.g. HDE 100A, HDE 100B, HDE 140 or HDE 140L).

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

HDE 098 – Directed Group Study for Undergraduates (1-5 units)

Course Description: Directed group study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HDE 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HDE 100A – Infancy & Early Childhood (4 units)

Course Description: Biological, social, and cultural influences in the psychological growth and development of children, prenatal through age six. Two observations of preschool children required.

Prerequisite(s): (PSC 001 or PSC 001Y); (BIS 002A or BIS 010 or BIS 001A or BIS 010V) or MCB 010 or NPB 010 or NPB 012 or MIC 010.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Human Development majors.

Grade Mode: Letter.

HDE 100AV – Infancy & Early Childhood (4 units)

Course Description: Biological, social, and cultural influences in the psychological growth and development of children, prenatal through age six. Two observations of preschool children required.

Prerequisite(s): (PSC 001 or PSC 001Y); (BIS 002A or BIS 010 or BIS 001A or BIS 010V or MCB 010 or NPB 010 or NPB 012 or MIC 010).

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Human Development majors.

Grade Mode: Letter.

HDE 100B – Middle Childhood & Adolescence (4 units)

Course Description: Interplay of biological and social-cultural factors in the emotional, cognitive and social development from middle childhood through adolescence.

Prerequisite(s): (HDE 100A or HDE 100AV or PSC 140 or PSC 140Y or PSC 140V); (PSC 001 or PSC 001Y).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

HDE 100C – Adulthood & Aging (4 units)

Course Description: Development during early, middle, and late adulthood; biological, cognitive, and psycho-social aspects of adult development.

Emphasis on normative patterns of development which characterize "successful aging."

Prerequisite(s): PSC 001 or PSC 001Y.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

HDE 101 – Cognitive Development (4 units)

Course Description: Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language.

Prerequisite(s): HDE 100A or HDE 100AV or HDE 100B or PSC 140 or PSC 140Y or PSC 140V.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One restricted to Human Development majors.

Credit Limitation(s): Not open for credit to students who have taken PSC 141.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HDE 102 – Social & Personality Development (4 units)

Course Description: Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors.

Prerequisite(s): HDE 100A or HDE 100AV or HDE 100B.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Human Development majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

HDE 104 – Children in Families, Schools, Communities (4 units)

Course Description: Children's social contexts (e.g., family, peers, school, neighborhood, community culture), development, and environmental challenges (e.g., poverty, maltreatment) from birth through adolescence.

Prerequisite(s): HDE 100A or HDE 100AV or HDE 100B or PSC 140 or PSC 140Y or PSC 140V.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Pass One restricted to HDE majors.

Grade Mode: Letter.

HDE 110 – Families in Communities (4 units)

Course Description: Family member's roles, interactions, and development, and how families are impacted by the larger community and society in which they live. Relevant topics/issues include: gender, race/ethnicity, parenting, marriage, grandparents, divorce, acculturation, migration, and policies relevant to family well-being.

Prerequisite(s): PSC 001 or PSC 001Y or CRD 001 or CRD 002 or SOC 001 or SOC 002.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One restricted to HDE students.

Credit Limitation(s): Not open for credit to students who have taken HDE 110V.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

HDE 110V – Families in Communities (4 units)

Course Description: Family members' roles, interactions, and development, and how families are impacted by the larger community and society in which they live. Relevant topics/issues include: gender, race/ethnicity, parenting, marriage, grandparents, divorce, acculturation, migration, and policies relevant to family well-being.

Prerequisite(s): CRD 001 or CRD 002 or PSC 001 or PSC 001Y or SOC 001 or SOC 002.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Human Development majors.

Credit Limitation(s): Not open for credit to students who have taken HDE 110.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

HDE 111 – Family Stress & Resilience (4 units)

Course Description: Theories and research associated with stressors affecting family functioning throughout the lifespan. Normative transitions and non-normative stressors, family services and family based policies and interventions.

Prerequisite(s): HDE 110 or HDE 110V.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Pass One restricted to Human Development majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD); Writing Experience (WE).

HDE 112 – Social Relationships Across the Lifespan (4 units)

Course Description: Spectrum of relationships across the lifespan; e.g., families, friends, members from the broader social network. Major theories and research among social relationships and development.

Prerequisite(s): HDE 100A or HDE 100AV or HDE 100B or HDE 100C.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Human Development majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

HDE 117 – Longevity (4 units)

Course Description: Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper 1 hour(s).

Cross Listing: ENT 117.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

HDE 120 – Research Methods in Human Development (5 units)

Course Description: Scientific process, research designs, and experimental controls; APA manuscript style and scientific writing; statistical analysis and interpretation of results. Laboratory exercises to collect data, analyze and interpret results, and write scientific papers.

Prerequisite(s): STA 013 or STA 013Y or STA 013V or STA 100 or EDU 114 or PSC 041 or (SOC 046A, SOC 046B).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

HDE 121 – Psychological Assessment (4 units)

Course Description: Current issues and methodology related to the process of psychological assessment with children.

Prerequisite(s): (HDE 100A or HDE 100AV or HDE 100B); (STA 013 or STA 013Y or PSC 041 or (SOC 046A, SOC 046B)).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

HDE 130 – Developmental Psychopathology (4 units)

Course Description: Foundational principles and current issues in developmental psychopathology, the study of mental health problems and disorders that originate in childhood and adolescence (e.g., disruptive behavior, mood and anxiety disorders).

Prerequisite(s): (HDE 100A, HDE 100B) or (PSC 140 or PSC 140Y or PSC 140V); consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

HDE 131 – Thriving Across the Lifespan (4 units)

Course Description: Positive developmental trajectories from womb to tomb. Developmental process of thriving (e.g., happiness, life satisfaction, wisdom) and the factors that support thriving.

Prerequisite(s): HDE 100A or HDE 100AV or HDE 100B or HDE 100C.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

HDE 131V – Thriving Across the Lifespan (4 units)

Course Description: Positive developmental trajectories from womb to tomb. Developmental process of thriving (e.g., happiness, life satisfaction, wisdom) and the factors that support thriving.

Prerequisite(s): HDE 100A or HDE 100B or HDE 100C.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Human Development majors.

Grade Mode: Letter.

General Education: Social Sciences (SS).

HDE 132 – Individual Differences in Cognition (4 units)

Course Description: Individual differences in cognition, including learning disabilities and giftedness. Education implications and neurodevelopmental substrates of individual differences in cognition.

Prerequisite(s): (PSC 001 or PSC 001Y); (HDE 100A or HDE 100AV or HDE 100B).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

HDE 133 – Stress, Adversity & Resilience (4 units)

Course Description: Short and long term biobehavioral responses to stress and adversity. The biological, psychological, social, and cultural factors of resilience. Interventions promoting resilience. Developmental perspective of stress and resilience across the lifespan.

Prerequisite(s): HDE 100A or HDE 100B or HDE 100C.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Pass One restricted to Human Development majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD); Writing Experience (WE).

HDE 133V – Stress, Adversity & Resilience (4 units)

Course Description: Short and long term biobehavioral responses to stress and adversity. The biological, psychological, social, and cultural factors of resilience. Interventions promoting resilience. Developmental perspective of stress and resilience across the lifespan.

Prerequisite(s): HDE 100A or HDE 100AV or HDE 100B or HDE 100C.

Learning Activities: Web Virtual Lecture 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Pass One restricted to Human Development majors.

Grade Mode: Letter.

General Education: Diversity Literacy (DL), Social Sciences (SS), Writing Experience (WE).

HDE 134 – Disparities & Inequalities in Health & Wellbeing (4 units)

Course Description: Biological, psychosocial, environmental, historical, and political factors on disparities and inequalities. Individual differences in risk exposures. Developmental and intergenerational processes. Policy applications of disparities research.

Prerequisite(s): HDE 100A or HDE 100AV or HDE 100B or HDE 100C.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to HDE majors only.

Credit Limitation(s): Only two units of credit for student who have previously taken SPH 113; only two units of credit for student who have previously taken SOC 163.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

HDE 135 – Health Behaviors Across the Lifespan (4 units)

Course Description: Development of health-related behaviors and physical and mental health outcomes across the lifespan. Coping strategies and behaviors such as nutrition, physical activity, technology, substance use/abuse, and social and cognitive engagement, as related to developmental stage.

Prerequisite(s): NPB 011 or NUT 010 or NUT 010V or NUT 010Y or SAS 013 or HDE 100A or HDE 100AV or HDE 100B or HDE 100C.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Social Sciences (SS).

HDE 137 – Contextual Determinants of Health (4 units)

Course Description: Community, cultural, political, and physical environment influences on health and well-being. Developmental approach. Unique contextual determinants of health from womb to tomb. *Prerequisite(s):* HDE 100A or HDE 100AV or HDE 100B or HDE 100C.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One restricted with Human Development majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

HDE 140L – Laboratory in Early Childhood (4 units)

Course Description: Application of theories of learning and development to interaction with infants, toddlers, and preschoolers at Early Childhood Laboratory. Applied skills in communication, guidance and curriculum.

Prerequisite(s): HDE 100A or HDE 100AV; consent of instructor; to enroll, students must contact the Internship Coordinator in 1303 Hart Hall.

Learning Activities: Laboratory 7 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

HDE 141 – Field Study With Children & Adolescents (4-6 units)

Course Description: Study of children's affective, cognitive and social development within the context of family/school environments, hospitals and foster group homes.

Prerequisite(s): HDE 100A or HDE 100AV or HDE 100B; and consent of instructor.

Learning Activities: Discussion 2 hour(s), Fieldwork 6-12 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Letter.

HDE 142 – Field Study with Emotionally Distressed Children & Adolescents (4-6 units)

Course Description: Field study with children who are identified as emotionally distressed, including those with internalizing and externalizing behavioral problems.

Prerequisite(s): HDE 130 (can be concurrent); and consent of instructor.

Learning Activities: Discussion 1.50 hour(s), Fieldwork 6-12 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Letter.

HDE 143 – Field Studies of the Elderly (4-6 units)

Course Description: Apply theory and research on adult development and aging, work with older adults in a variety of settings, and develop skills relevant to that application. Develop a small research project.

Prerequisite(s): HDE 100C or HDE 160 (can be concurrent); and consent of instructor.

Learning Activities: Discussion 2 hour(s), Fieldwork 6 hour(s), Variable 4-6 hour(s).

Grade Mode: Letter.

HDE 160 – Social Aspects of Aging (4 units)

Course Description: How the social context affects adult development and aging. Emphasis on demography, social policy, culture, and adaptation.

Oral histories as class projects.

Prerequisite(s): HDE 100C.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

HDE 161 – Technology Use, Health, & Aging (4 units)

Course Description: Principles from gerontology applied to older adults' use of technology to support health and well-being across a variety of domains (e.g., cognitive and physical fitness, social engagement) and contexts (assisted living, aging in place). Cognitive, sensory, and physical changes in later life that impact technology use.

Prerequisite(s): (PSC 001 or PSC 001Y); HDE 100C; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

HDE 163 – Cognitive Neuropsychology in Adulthood & Aging (4 units)

Course Description: Theories, methods, and findings concerning the relationship between cognitive processes and brain functioning. Readings, lectures, and in-class discussions cover research on normal younger and older adults, neuropsychological case studies, and selected patient groups (e.g., amnesia, schizophrenia, Alzheimer's disease).

Prerequisite(s): (PSC 001 or PSC 001Y); HDE 100C recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

HDE 180 – Special Topics in Human Development (4 units)

Course Description: In-depth examination into selected topics in the field of human development (e.g., brain development, parenting, nutrition).

Content varies from quarter to quarter.

Prerequisite(s): Four upper division courses in Human Development (HDE).

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Restricted to HDE students with junior or senior class standing; priority given to students who have not received HDE 180 units previously.

Repeat Credit: May be repeated 1 time(s) when the topic differs.

Grade Mode: Letter.

HDE 190C – Introductory Research Conference (1 unit)

Course Description: Instructors lead discussions with undergraduate students who involve themselves in a research project. Research papers are reviewed and aspects of project proposals developed out of class are presented and evaluated.

Prerequisite(s): Involvement in ongoing research; consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HDE 192 – Internship (1-12 units)

Course Description: Supervised internship off and on campus, in community, and institutional settings.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

HDE 197T – Peer Tutoring in Human Development (1-5 units)

Course Description: Assist the instructor of a Human Development course by tutoring individual students or small groups of students, leading voluntary discussion groups, or organizing other voluntary activities.

Prerequisite(s): Consent of instructor; upper division standing completion of course to be tutored.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated 10 unit(s) with consent of instructor.

Grade Mode: Pass/No Pass only.

HDE 198 – Directed Group Study (1-5 units)

Course Description: May be taught abroad.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HDE 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HDE 200A – Early Development (4 units)

Course Description: Theory and research on the biological, social, cognitive, and cultural aspects of development from conception to the age of five years.

Prerequisite(s): Graduate standing; basic biology or physiology; one upper division course in psychology or a related field; one upper division or graduate course in developmental psychology (can be concurrent).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

HDE 200B – Middle Childhood & Adolescence (4 units)

Course Description: Theory and research on biological, cognitive, social, and cultural influences on behavioral development from age five years until late adolescence.

Prerequisite(s): Graduate standing; basic biology or physiology, and at least two upper division or graduate level courses in psychology or related fields.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

HDE 200C – Development in Adulthood (4 units)

Course Description: Theory and research focusing on social, personality, cognitive, and biological development from early to late adulthood. Emphasis is on theory development and continuity and change.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

HDE 203 – Adolescent Behavioral & Emotional Development (4 units)

Course Description: Analysis of recent theories, research methods, and major findings on adolescent behavioral and emotional development, including contextual and genetic influences on adolescence, pubertal transitions, and social/family contexts and processes. Emphasis on multi-level mechanisms underlying adolescent behavioral and emotional development.

Prerequisite(s): HDE 200B.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

HDE 204 – Developmental Neuroscience & Adolescent Psychopathology (4 units)

Course Description: Introduction to human developmental neuroscience. Understanding of adolescence and its characterization as a time of risky and unhealthy behavior and vulnerability to onset of mental disorder as well as issues around plasticity of the adolescent brain and prevention/intervention.

Prerequisite(s): Graduate standing in Human Development, Psychology, Education, Neuroscience or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

HDE 205 – Longitudinal Data Analysis (4 units)

Course Description: Introduction to longitudinal data manipulation, organization, description, and modeling in the multilevel modeling and structural equation modeling frameworks.

Prerequisite(s): PSC 204B; or equivalent graduate courses in statistics or consent of instructor; familiarity with multiple regression and the basics of matrix algebra.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

HDE 207 – Topics in Technology Use, Health & Aging (4 units)

Course Description: Principles from gerontology applied to older adults' use of technology to support health and well-being across a variety of domains (e.g., cognitive and physical fitness, social engagement) and contexts (assisted living, aging in place). Cognitive, sensory, and physical changes in later life that impact technology use.

Prerequisite(s): Graduate standing in one of the following Graduate Groups: Human Development, Psychology, Communication, Education, and Nursing Science and Healthcare Leadership, or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

HDE 210 – Theories of Behavioral Development (3 units)

Course Description: Consideration of enduring issues in theories of behavioral development; analysis of adequacy of major theoretical schools (e.g., social learning, Piagetian) as scientific theories.

Prerequisite(s): Graduate standing in behavioral sciences.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

HDE 211 – Physiological Correlates of Behavioral Development (4 units)

Course Description: An overview of mechanisms of organismic development and the implications of developmental biology for the analysis of behavioral ontogeny; consideration of parallels between processes of organismic development and behavioral development in children and infra-human mammals.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

HDE 220 – Research Methods in Human Growth & Development (4 units)

Course Description: Overview of qualitative and quantitative approaches to empirical inquiry in the social sciences, with a focus on theory and research methods in biological growth and cognitive and social/emotional development from prenatal period to death.

Prerequisite(s): STA 013 or STA 013Y; or the equivalent and at least two upper division courses in Human Biology or Developmental Psychology.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

HDE 232 – Cognition & Aging (3 units)

Course Description: Manner in which cognitive processes are affected by aging as well as an understanding of the changes in the central nervous system occurring with aging.

Prerequisite(s): HDE 200C.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

HDE 234 – Children's Learning & Thinking (3 units)

Course Description: Analysis of theories, research methods, and major findings of children's higher-order cognition, including origins of knowledge, development of problem-solving skills, reasoning strategies, and scientific concepts, with an emphasis on the underlying mechanism involved in children's thinking and learning processes.

Prerequisite(s): HDE 200A or PSC 212 recommended.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

HDE 238 – The Context of Individual Development (3 units)

Course Description: Analysis of human development within the context of daily life. Contextualizing theories and methods of developmental psychology will be distinguished from contextual theories and methods. Developmental psychology models will be distinguished from child psychology models.

Prerequisite(s): Graduate standing in Human Development, Child Development, Education, Psychology, Anthropology, Sociology, or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

HDE 239 – Developmental Psychopathology (4 units)

Course Description: Theories, current issues, and empirical studies of atypical development from infancy to adulthood that integrate multiple system levels from genes, neurobiology, cognition, emotion, family and peer dynamics to community and cultural contexts.

Prerequisite(s): Graduate standing in Human Development, Psychology, Sociology, a related social science, or consent of instructor.

Learning Activities: Discussion/Laboratory 3 hour(s), Term Paper.

Grade Mode: Letter.

HDE 240 – Peer Relationships during Adolescence (4 units)

Course Description: Examines the role of peer relationships in adolescent development including forms and functions at the individual, dyadic and group levels. Ethnicity and cross cultural research will be discussed. Emphasis on methodology, including surveys, peer nominations/sociometrics, experimental, and observational designs.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Graduate standing in Human Development, Psychology, Education, or consent of instructor.

Grade Mode: Letter.

HDE 250 – Current Research on Family Relationships (4 units)

Course Description: Discussion of theories, methods, and current research on the nature and development of sibling, romantic, and parent-child relationships across the lifespan. Emphasis on interpersonal and family processes examined in ethnic/cultural contexts. Implications for individual development will be addressed.

Learning Activities: Discussion/Laboratory 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing in Human Development, Graduate Group, Psychology, Sociology, a related social science, or consent of instructor.

Grade Mode: Letter.

HDE 252 – Family Research, Programs & Policy (4 units)

Course Description: Examines the competing interests of research, policy, and service on current issues of family functioning and individual well being. Considers communication barriers between researchers, practitioners, and policy makers.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Graduate standing in Human Development, Psychology, Sociology, related social sciences, or consent of instructor.

Grade Mode: Letter.

HDE 290 – Seminar (3 units)

Course Description: Discussion and evaluation of theories, research, and issues in human development. Different topics each quarter.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

HDE 290C – Research Conference (1 unit)

Course Description: Supervising instructors lead research discussions with their graduate students. Research papers are reviewed and project proposals are presented and evaluated.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

HDE 291 – Research Issues in Human Development (4 units)

Course Description: In-depth presentations of research issues in particular areas of behavioral development.

Prerequisite(s): Graduate Standing in the behavioral sciences.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

HDE 292 – Graduate Internship (1-12 units)

Course Description: Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor.

Prerequisite(s): Consent of faculty (internship sponsor) and satisfactory completion of placement relevant course work, for example: EDU 213, EDU 216; HDE 222, HDE 242; LAW 272, LAW 273.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s) with justified skill acquisition and promise of informing evaluation research.

Grade Mode: Satisfactory/Unsatisfactory only.

HDE 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Letter.

HDE 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

HDE 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Human Physiology (HPH)

School of Medicine

HPH 098F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

HPH 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Grade Mode: Pass/No Pass only.

HPH 115 – Cannabis & Cannabinoids in Physiology & Medicine (3 units)

Course Description: In-depth scientific analysis of cannabis and cannabinoids, topics include biochemical, physiological, behavioral, pharmacological, social and therapeutic aspects of cannabinoids, with emphasis on the physiological impacts on major organ systems in humans and animals, and the potential medicinal uses.

Prerequisite(s): NPB 100 or NPB 101 or NPB 110B; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

HPH 157 – Advanced Physiology of Animal/Human Disease (3 units)

Course Description: Centers on fundamental mechanisms and pathophysiological basis for animal and human diseases. Case-based and uses animal and human diseases to help exemplify the physiological consequences of organ dysfunction.

Prerequisite(s): NPB 101 B+ or better or NPB 110C B+ or better; consent of instructor.

Learning Activities: Lecture 1 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Limited to 35 students initially.

Cross Listing: NPB 157.

Grade Mode: Letter.

HPH 192 – Internship in Human Physiology (1-12 units)

Course Description: Supervised work experience in physiology and related fields.

Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

HPH 198 – Directed Group Study (1-5 units)

Course Description: Directed reading, discussion and/or laboratory experience on selected topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HPH 198F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for upper division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

HPH 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor. Senior standing in biology, chemistry, physics, psychology, or engineering.

Learning Activities: Laboratory 3-15 hour(s).

Grade Mode: Pass/No Pass only.

HPH 199FA – Student Facilitated Course Development (1-4 units)

Course Description: Under the supervision of a faculty member, an undergraduate student plans and develops the course they will teach under 098F/198F.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

HPH 199FB – Student Facilitated Teaching (1-4 units)

Course Description: Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HPH 210A – Advanced Physiology (5 units)

Course Description: Advanced course on fundamental principles of cell physiology, transport physiology, signal transduction, physiology of excitable cells, and muscle physiology.

Prerequisite(s): Physiology Ph.D. program or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): HPH 210A (or MCP 210A) is a required core course for the MCIP graduate group; course contains thermodynamics discussions and requires substantial math and physics background in order to succeed; approval for registering from Co-IRs is required to get CRN.

Cross Listing: MCP 210A.

Grade Mode: Letter.

HPH 234 – Advances in Computational Physiology & Pharmacology (2 units)

Course Description: Multi-scale biomedical modeling methodologies and applications, with emphasis on ion channel structure-function, computer-aided drug design, and membrane excitability. State-of-the-art techniques used for multi-scale modeling of biomedical systems and their applications.

Prerequisite(s): No formal requirements; basic knowledge of mathematics, physics, chemistry, and biology helpful.

Learning Activities: Lecture 2 hour(s).

Cross Listing: PHA 234.

Grade Mode: Letter.

HPH 298 – Group Study (1-5 units)

Course Description: For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

HPH 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

HPH 400 – Human Physiology (6 units)

Course Description: General and cellular physiology of neurons, muscle, and epithelial cells and systemic physiology of cardiovascular, respiratory, gastrointestinal, and renal systems.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Medical student only.

Grade Mode: Pass/Fail only.

HPH 403 – Medical Neuroanatomy (5 units)

Course Description: Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving.

Prerequisite(s): HPH 400; Block 1.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to medical students only.

Cross Listing: CHA 403.

Grade Mode: Pass/Fail only.

HPH 440 – Cannabis & Cannabinoids in Physiology & Medicine (3 units)

Course Description: Provides an in-depth scientific analysis of current knowledge on cannabis and cannabinoids pertaining to human physiology and potential medicinal uses.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

HPH 493 – Physiological Principles in SICU SSM (6 units)

Course Description: Special Study Module, a four-week course on the topic: Care of the Critically Ill Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems.

Prerequisite(s): Consent of instructor; restricted to UC Davis School of Medicine students only.

Learning Activities: Lecture 5 hour(s), Lecture/Lab 10 hour(s), Laboratory 16 hour(s), Clinical Activity 4 hour(s).

Cross Listing: SUR 493C.

Grade Mode: Honors/Pass/Fail.

HPH 497T – Tutoring in Human Physiology (1-5 units)

Course Description: Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine.

Prerequisite(s): Advanced standing or consent of instructor.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

HPH 498 – Directed Reading & Group Study (1-4 units)

Course Description: Directed reading and discussion on selected topics in human physiology.

Prerequisite(s): Consent of instructor; medical students.

Learning Activities: Discussion 2-8 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

HPH 499 – Research (1-6 units)

Course Description: Laboratory investigation on selected topics.

Prerequisite(s): Consent of instructor; medical students.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Human Rights (HMR)

College of Letters & Science

HMR 001 – Human Wrongs/Human Rights (4 units)

Course Description: Introduction to Human Rights and the problems they seek to address. Using key episodes of inhumanity like slavery, genocide, and racism. Examines how international movements for social justice led to the emergence of the international Human Rights system.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HMR 120A – Art, Architecture, & Human Rights (4 units)

Course Description: Study of human rights as they relate to art, architecture, and cultural heritage. Examines museums, art collections, and cultural-heritage management, their relation to the cultural prerogatives of communities and indigenous groups, and protection of cultural heritage during war and conflict.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: AHI 120A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HMR 130 – Special Topics in Human Rights (4 units)

Course Description: Thematic study of human rights. Topics may include contemporary or historical issues in the promotion, protection, and violation of human rights; human rights and the arts, religion, literature are possible topical areas.

Prerequisite(s): HMR 134 or RST 134 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HMR 131 – Genocide (4 units)

Course Description: Comparative and critical study of the modern phenomenon of genocide from religious, ethical and historical perspectives.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HMR 132 – Human Rights & the Refugee (4 units)

Course Description: Comparative, historical, global and theoretical study of the human rights of refugees and the concept of the refugee; analysis of refugee protection, resettlement and integration; study of United Nations, intergovernmental and non-governmental organizations and refugees.

Prerequisite(s): Junior standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

HMR 134 – Human Rights (4 units)

Course Description: Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion 1 hour(s).

Credit Limitation(s): No credit for students who have completed RST 090.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HMR 135 – Human Rights Tools For Advocacy & Practice (4 units)

Course Description: Practices in the field of human rights leading to improvements in people's lives; recent political developments in the global application of human rights and strategic tools used to promote the realization of human rights standards. Key international and local NGOs and their work promoting the capacities of rights holder to claim and enjoy their rights and in persuading duty bearers to fulfill their human rights obligations.

Prerequisite(s): HMR 134 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

HMR 136 – Human Rights in the Middle East (4 units)

Course Description: Study of the experience of Human Rights in the modern Middle East, with special attention to the Human Rights issues raised by events of Arab Spring; Palestine-Israel conflict; history of genocide, mass killing and totalitarianism in the region.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HMR 137 – The Black Human Rights Tradition (4 units)

Course Description: Key figures and frameworks in the Black human rights tradition. Significance of Black intellectuals and activists in social movements toward an expanded human rights tradition. Analysis and application of Black studies methods to contemporary social issues.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: AAS 103.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); World Cultures (WC).

HMR 138 – Human Rights, Gender, & Sexuality (4 units)

Course Description: Gender and sexuality in the context of human rights. Topics include women's participation in the public sphere, the right to change gender, the right for family privacy, and the right to marriage.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HMR 140A – Human Rights & the Popular Imagination (4 units)

Course Description: Arts, music, literature, film and television in the rise of human rights movements and the protection, promotion and violation of human rights. Topics may include: human rights & science fiction; human rights & the graphic novel; human rights & contemporary cinema; human rights & rock and roll.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HMR 140B – Art & Politics of Memory: Truth, Justice, Reconciliation & Human Rights (4 units)

Course Description: Critical exploration of the role of art and memory in the dictatorships, authoritarian societies, civil conflicts, and genocides of the late 20th and early 21st centuries. Case studies focus on the violation of massive human rights and political and cultural conflict for truth, justice, and reconciliation in the aftermath of those violations. Emphasis on how memory is constructed and contested by states, artists, writers, historians and different ethnic and political communities.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when subject matter differs; e.g., when taught by a different instructor or focusing on a different region or era.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HMR 160 – Human Rights & Indigenous Peoples (4 units)

Course Description: Interdisciplinary, global, and comparative study of human rights and the history, struggles, revitalization, and current status of indigenous peoples. Topics include the UN Declaration on the Rights of Indigenous People, settler colonialism, genocide, indigenous rights movements, and efforts towards justice, recognition, and restitution.

Prerequisite(s): HMR 001 or HMR 134 or HMR 161 or NAS 001 recommended; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Writing Experience (WE).

HMR 161 – Human Rights in Latin America (4 units)

Course Description: History of the origins, denial and protection of Human Rights in Latin America. Emphasis on dictatorships, political violence, social resistance, democracy, justice, accountability, truth commissions, memory.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: HIS 161.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HMR 162Y – The History of Human Rights in Europe (4 units)

Course Description: History of the origins, development, and state of international humanitarian law (IHL) and international human rights law (IHRL) in Europe. Emphasis on Enlightenment-era and modern theories of the source, utility, and limits of human rights.

Learning Activities: Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Cross Listing: HIS 126Y.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

HMR 165 – Human Rights in Film & Television (4 units)

Course Description: Human rights depictions in film and on television, including topics: genocide (Rwanda, Armenia, Indonesia), political persecution (Guatemala), carceral abuses (U.S.), human trafficking (Europe), persecution for sexual preference (Cuba). Documenting abuse as well as remedying it.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing 2.5 hour(s), Term Paper.

Cross Listing: CDM 165L.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

HMR 190 – Seminar (4 units)

Course Description: Emphasis on current scholarly debate about the methods for analyzing and comparing diverse human rights issues with the intention of integrating disciplined study of the field.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

HMR 190G – Advanced Study of Genocide & Mass Atrocity (4 units)

Course Description: New and emerging scholarship on genocide and mass atrocity; development of independent research on the subjects of genocide and mass atrocity; career opportunities in genocide and mass atrocity study and prevention.

Prerequisite(s): HMR 131; HMR 134; consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

HMR 192 – Human Rights Internship (1-12 units)

Course Description: Participation in community service, Human Rights Studies outreach, collaboration with community groups locally, nationally or internationally culminating in an analytical term paper on a topic approved by the sponsoring instructor. Students will work with faculty to develop, plan and implement an internship with a local non-profit organization, government organization, or similar institution with the purpose of exploring the practical implementation of human rights.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: P/NP only.

HMR 193 – Seminar in Global Human Rights (4 units)

Course Description: Advanced seminar in major global contemporary and historical human rights issues; new and emerging challenges to human rights; new methods and approaches to human rights advocacy in a global context; exploration of career and post-graduate opportunities in human rights practice, advocacy and public/international service.

Prerequisite(s): HMR 134; HMR 135; consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to Human Rights Studies majors and minors only.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

HMR 198 – Directed Group Study (1-4 units)

Course Description: Group study on focused topics in human rights. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HMR 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Opportunity for advanced undergraduate students to work with a faculty member in a focused manner on a topic or topics of human rights.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HMR 200A – History, Theory & Criticism of Human Rights (4 units)

Course Description: Introduces the advanced study of Human Rights and the theoretical and practical elaboration of the international Human Rights system. Seminar engages with criticism of Human Rights and develops research and teaching within disciplinary and interdisciplinary frameworks.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Cross Listing: REL 231E.

Grade Mode: Letter.

HMR 200B – Memory, Culture, & Human Rights (4 units)

Course Description: Explores the multiple convergences among memory, culture, and human rights. Discusses diverse approaches to how societal actors in different historical, cultural, and national settings, construct meanings of past political violence, inter-group conflicts, and human rights struggles.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Cross Listing: CST 210.

Grade Mode: Letter.

HMR 298 – Group Study (1-4 units)

Course Description: Group study on focused topics in human rights. Four-unit courses may serve as electives for the Designated Emphasis in Human Rights.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated 16 unit(s) when topic differs.

Grade Mode: Letter.

HMR 299 – Individual Study (1-12 units)

Course Description: Individual study for the designated emphasis in human rights.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-12 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

HMR 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching Assistant Training Practicum.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable 1-4 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Humanities (HUM)**College of Letters & Science****HUM 001 – Humanities Forum (2 units)**

Course Description: Reading and discussion of a single work representative of a particular culture, historical period, or genre and significant for its ongoing cultural impact in the humanities, sciences, social sciences, technology, and popular arenas. Attention to provocative implications for contemporary society.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Concurrent enrollment in HUM 001D for an additional 2 units.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

HUM 001D – Issues & Concepts in the Humanities (2 units)

Course Description: Small group discussions and preparation of short papers for HUM 001.

Prerequisite(s): HUM 001 (can be concurrent); HUM 001 required concurrently.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Concurrent enrollment in HUM 001 required.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

HUM 002A – Global Humanities Forum (4 units)

Course Description: Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in world arts and literatures, with emphasis on relationships between history, society, and culture.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HUM 002B – American Humanities Forum (4 units)

Course Description: Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in American arts and literatures, with emphasis on relationships between history, society, and culture.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

HUM 003 – Medicine & Humanities (4 units)

Course Description: Evolution of the "medical arts" into the "science of medicine." Culture of medicine in the context of society, medical ethics.

Prerequisite(s): Satisfaction of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

HUM 004 – Animals & Human Culture (2 units)

Course Description: Meaning of human relations with animals studied across a variety of historical periods and cultures and from a variety of humanistic perspectives.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

HUM 004D – Animals & Human Culture: Discussion (2 units)

Course Description: Small group discussions and preparation of short papers for HUM 004.

Prerequisite(s): HUM 004 (can be concurrent); HUM 004 required concurrently.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

HUM 007 – Travel & Travel Literature (4 units)

Course Description: History of travel from the age of exploration to the modern era. Contemporary trends in travel, including mas tourism, adventure travel, and ecotravel. Social, economic, and cultural issues related to modern trends in travel. Analysis of literary representations of travel.

Prerequisite(s): Satisfaction of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HUM 008 – Introduction to Perspectives on Narrative (4 units)

Course Description: Interdisciplinary approach to the use of story across time, culture, and discipline. How the telling and retelling of particular stories reflect the values, concerns, and assumptions of their original audiences and genres.

Prerequisite(s): Satisfaction of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

HUM 009 – Don Quixote & the Modern World (2 units)

Course Description: Reading Don Quixote as emblem of modernity in the West. Issues of reality versus illusion, heroism, freedom and self-fulfillment, racial tolerance and love. Don Quixote in other cultural and popular media: film, dance, art, musical drama, and television. GE credit with concurrent enrollment in HUM 009D: ArtHum, Wrt.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HUM 009D – Don Quixote & the Modern World Discussion (2 units)

Course Description: Small group discussions and preparation of short papers for HUM 009.

Prerequisite(s): HUM 009 required concurrently.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HUM 010 – How to be a Critic: Understanding Cultural Products & Practices (2 units)

Course Description: Introduction to key topics and methodologies of interest to humanists. Series uses a variety of critical approaches to examine the cultural significance of subjects such as: fashion, film, architecture, music, food, dance.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

HUM 010D – How to be a Critic: Discussion (2 units)

Course Description: Optional discussion section can be taken concurrently with HUM 10. Small group discussions and preparation of short papers.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Concurrent enrollment in HUM 010 required.

Grade Mode: Letter.

General Education: Writing Experience (WE).

HUM 013 – Witches: Myth & Historical Reality (4 units)

Course Description: Examines the historical construction of the witch. Four areas covered are: European pagan religions and the spread of Christianity; the "Burning' Times" in early modern Europe; 17th-century New England and the Salem witch trials; and fairy tales.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

HUM 015 – Language & Identity (4 units)

Course Description: Introduction to topics related to the construction of identity through language use, including geographical and social factors affecting language groups. Language ideology affecting linguistic groups, including bilinguals and non-native speakers of English.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

HUM 060 – Narrative & Argumentative Approaches to Major Current Issues in the Media, Culture, & Society (4 units)

Course Description: Interdisciplinary approach to contemporary issues (abortion, AIDS, civil rights, war and peace, welfare state) around which individuals, communities and institutions define themselves in American society, by applying principles of narrative theory to the narratives where those issues are embedded.

Prerequisite(s): English A or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

HUM 092 – Internship (1-12 units)

Course Description: Internships in fields where students can practice their skills.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HUM 144 – Marx, Nietzsche, Freud (4 units)

Course Description: Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual's relation to society.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: GER 144.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

HUM 180 – Topics in the Humanities (4 units)

Course Description: Analysis of interdisciplinary issues in the Humanities. Topics vary. May be taught abroad.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

HUM 192 – Internship (1-12 units)

Course Description: Internships in fields where students can practice their skills.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HUM 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HUM 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HUM 250 – Topics in the Humanities (4 units)

Course Description: Topics in the humanities, selected by the instructor.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

HUM 292 – Graduate Internship (1-15 units)

Course Description: Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated 15 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

HUM 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

HUM 299 – Individual Research (1-4 units)

Course Description: Individual research in the humanities resulting in a formal written research report.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

HUM 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Hydrologic Science (HYD)

College of Agricultural & Environmental Sciences

HYD 010 – Water, Power, Society (3 units)

Course Description: Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Cross Listing: SAS 010.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL).

HYD 092 – Hydrologic Science Internship (1-12 units)

Course Description: Work experience off and on campus in Hydrologic Science. Internship supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division student.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

HYD 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

HYD 103N – Fluid Mechanics Fundamentals (4 units)

Course Description: Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macroscopic balances to solve a range of practical problems.

Prerequisite(s): PHY 009B.

Learning Activities: Lecture 4 hour(s).

Cross Listing: EBS 103.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

HYD 110 – Irrigation Systems & Water Management (4 units)

Course Description: Soil and plant aspects of irrigation and drainage. Soil-water principles including water storage and movement, plant response to irrigation, water use by crops, irrigation systems (i.e., micro-irrigation, sprinkler irrigation and surface irrigation), and related salinity and water quality impacts.

Prerequisite(s): PHY 007A; SSC 100 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: ABT 110, ESM 110.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

HYD 118 – Evapotranspiration Principles, Measurement & Modeling (4 units)

Course Description: Estimation of evapotranspiration (ET) for irrigation management and water resources planning; including the basic principles and key factors controlling evaporation and ET rates, methods of measuring these factors in the field and remotely, and determination of likely water requirements for crops and various landscape conditions as needed for water resources planning.

Prerequisite(s): HYD 124 C or better; consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: ESM 118; EBS 148.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

HYD 124 – Plant-Water-Soil Relationships (4 units)

Course Description: Principles of plant interactions with soil and atmospheric water environments and practical applications to crop management (e.g., irrigation) and plant eco-physiology (e.g., drought).

Prerequisite(s): (SSC 100 (can be concurrent) or SSC 107 (can be concurrent)); (PLS 100A (can be concurrent) or PLB 111 (can be concurrent)); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed WSC 104.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

HYD 134 – Aqueous Geochemistry (5 units)

Course Description: Chemistry of natural waters; dielectric properties of water; thermodynamic and mass-action relations; metal hydrolysis; acid-base equilibria; metal-coordination chemistry; solubility calculations; electron-exchange reactions; sorptive partitioning; ion exchange; and dissolved organic matter.

Prerequisite(s): CHE 002B.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

HYD 141 – Physical Hydrology (4 units)

Course Description: Introduction to the processes that constitute the hydrologic cycle. Special emphasis on a quantitative description of the following processes: precipitation, infiltration, evaporation, transpiration, surface runoff, and groundwater runoff.

Prerequisite(s): PHY 009B; MAT 021B; HYD 100 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

HYD 142 – Systems Hydrology (4 units)

Course Description: General course considering hydrologic processes from a systems or statistical model perspective. General probability concepts are applied to frequency, time series and spatial data analysis. Linear systems are also considered in conjunction with Kalman filter techniques.

Prerequisite(s): HYD 141 or ECI 142.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL).

HYD 143 – Ecohydrology (4 units)

Course Description: Movement and storage of water in individual ecosystems and the integrated functioning of water and biota at the watershed scale.

Prerequisite(s): HYD 010 or HYD 141 or ESP 001 or ESM 100 or ESM 108 or ESM 120 or GEL 001 or GEL 050 or SSC 100; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL).

HYD 144 – Groundwater Hydrology (4 units)

Course Description: Global role of groundwater resources in society; groundwater in the hydrologic cycle; geology of groundwater; global, US, and California geography of groundwater; physical measures of groundwater occurrence and flow; water balance; modeling groundwater flow; principles of well construction; aquifer tests; groundwater quality; contaminant transport and monitoring; groundwater law, water quality regulations, and sustainable management.

Prerequisite(s): MAT 012 (can be concurrent) or MAT 016B (can be concurrent) or MAT 021A (can be concurrent).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: EBS 144.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

HYD 145 – Water Science & Design (4 units)

Course Description: Introduction to watershed engineering, storm water management, design of hydraulic systems. Topics include hydrological risk analysis, flood routing, design storms, open channel flow, pipes, culverts, spillways, and detention basins. Class project and field trips will apply theory to real-life problems.

Prerequisite(s): (HYD 141 or ESM 100); (MAT 016B or MAT 021B); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Writing Experience (WE).

HYD 146 – Hydrogeology & Contaminant Transport (5 units)

Course Description: Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models.

Prerequisite(s): HYD 144 or ECI 144; or the equivalent.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s), Term Paper 1 hour(s).

Cross Listing: GEL 156.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

HYD 147 – Runoff, Erosion & Water Quality Management (3 units)

Course Description: Practical hydrology and runoff water quality management from disturbed watersheds. Development of hillslope and soils restoration concepts and practice, modeling and application.

Prerequisite(s): (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 021C); (ECI 142 or HYD 141 or ESM 100); or equivalent.

Learning Activities: Lecture/Lab 3 hour(s), Fieldwork.

Cross Listing: EBS 147.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

HYD 150 – Water Law (3 units)

Course Description: Principles and issues of California Water Law. Types of water rights, groundwater rights and management, and protection of instream uses. Water projects, role of federal government and federal/state relations. Basic water quality acts, endangered species act, water transfers and current water issues.

Prerequisite(s): Consent of instructor or upper division standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH).

HYD 151 – Field Methods in Hydrology (4 units)

Course Description: Measurement methods and data analysis for evaluation of water storage, movement and contamination in the field. Equipment such as data loggers, water and sediment samplers, pressure transducers, weather stations, surveying equipment, and flow meters will be used.

Prerequisite(s): ERS 100 or HYD 141.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

HYD 182 – Environmental Analysis using GIS (4 units)

Course Description: Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS.

Prerequisite(s): ABT 150 or LDA 150; or equivalent GIS experience and skills; general biology and/or ecology courses are recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Cross Listing: ABT 182.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

HYD 192 – Hydrologic Science Internship (1-12 units)

Course Description: Work experience off and on campus in water science. Internship supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-40 hour(s).

Grade Mode: Pass/No Pass only.

HYD 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.
Learning Activities: Variable.
Grade Mode: Pass/No Pass only.

HYD 199 – Special Study for Advanced Undergraduate (1-5 units)

Course Description: Special study for advanced undergraduates.
Prerequisite(s): Senior standing.
Learning Activities: Variable.
Grade Mode: Pass/No Pass only.

HYD 201A – Hydrologic Sciences Core Survey (3 units)

Course Description: Considers the primary sub-disciplines while reviewing the fundamental scientific concepts/processes of the hydrologic sciences research community, and includes a basic writing component.
Learning Activities: Lecture/Discussion 2 hour(s), Project.
Grade Mode: Letter.

HYD 201B – Hydrologic Sciences Core Seminar (1 unit)

Course Description: Exposes students to the research underway in the Hydrologic Sciences Graduate Group as well as provide them the opportunity to present and refine their research through interaction with other students in the Graduate Group.
Learning Activities: Seminar 2 hour(s).
Repeat Credit: May be repeated 2 time(s).
Grade Mode: Pass/No Pass only.

HYD 210 – Vadose Modeling & Characterization (3 units)

Course Description: Principles and modeling of water flow and chemical transport in the vadose zone, with specific applications to soils. Topics include hydraulic properties, finite difference application to unsaturated water flow, parameter optimization, diffusive and convective transport in gaseous and liquid phases.

Prerequisite(s): SSC 107; or consent of instructor.

Learning Activities: Lecture 1.50 hour(s), Laboratory 3 hour(s), Discussion 0.50 hour(s).

Grade Mode: Letter.

HYD 241 – Precision Irrigation Systems & Management (3 units)

Course Description: Advanced irrigation science and engineering for agricultural, horticultural, engineering, and hydrology graduate students. Precision irrigation techniques for application of water to meet specific requirements of individual plants or management units and maximum economic benefits of crop production.

Prerequisite(s): ABT 110; SSC 100; HYD 110; EBS 145.

Learning Activities: Lecture 3 hour(s).

Cross Listing: EBS 241.

Grade Mode: Letter.

HYD 242 – Hydrology & Sustainability of Irrigated Lands (3 units)

Course Description: Impact of irrigated agricultural on groundwater depletion, surface water and groundwater quality, soil salinization, downstream ecosystems, and seawater intrusion. Exploration of efficient resource use, and policies adopted in California to enhance sustainability of irrigated crop production.

Prerequisite(s): ABT 110 or ESM 110 or HYD 110 or EBS 145.

Learning Activities: Lecture 3 hour(s).

Cross Listing: EBS 242.

Grade Mode: Letter.

HYD 243 – Water Resource Planning & Management (3 units)

Course Description: Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models.

Prerequisite(s): HYD 141 or ECI 142.

Learning Activities: Lecture 3 hour(s).

Cross Listing: EBS 243.

Grade Mode: Letter.

HYD 245 – Climate Change, Water & Society (4 units)

This version has ended; see updated course, below.

Course Description: Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Limited to 25 students.

Cross Listing: ATM 245, ECL 245.

Grade Mode: Letter.

HYD 245 – Climate Change Science & Impacts (4 units)

Course Description: Overview of climate change science with a focus on climate change communication. Impacts of climate change on water, agriculture, energy, health, infrastructure, ecosystem services, tribal and indigenous communities. Climate justice, political, societal, and economic dimensions of these issues.

Learning Activities: Lecture 3 hour(s), Project.

Cross Listing: ATM 245, ECL 245.

Grade Mode: Letter.

This course version is effective from, and including: Fall Quarter 2024.

HYD 252 – Hillslope Geomorphology & Sediment Budgets (4 units)

Course Description: Exploration of theoretical and empirical foundations of sediment production on hillslopes using computer models and field experiments to promote an understanding of how watersheds evolve naturally and with human impacts.

Prerequisite(s): HYD 141 or GEL 035 or ECI 142; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

HYD 254Y – Ecohydraulics (3 units)

Course Description: Use of 2D hydrodynamic modeling to perform instream flow assessment by exploring flow-dependent hydraulic patterns at multiple spatial scales and extrapolating results with empirical and analytical functions to evaluate geomorphic resilience and ecological functions.

Learning Activities: Web Virtual Lecture 1 hour(s), Discussion 1 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

HYD 256 – Geomorphology of Estuaries & Deltas (4 units)

Course Description: Survey of the processes and landforms associated with sediment deposition in the coastal zone. Application of geomorphic principles to coastal management issues.

Prerequisite(s): HYD 141 or GEL 035; or ECI 042 or consent of instructor.

Learning Activities: Lecture 3 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

HYD 264 – Modeling of Hydrologic Processes (3 units)

Course Description: Techniques used to model the spatio-temporal structure of rainfall and runoff are introduced. Procedures studied include those based on stochastic point processes, chaos theory, fractal geometry, and fractional noises.

Prerequisite(s): HYD 141; STA 102; or the equivalents.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

HYD 269 – Numerical Modeling of Groundwater Systems (3 units)

Course Description: Finite difference and finite element techniques in modeling groundwater flow and transport. Fundamentals of constructing and calibrating models with hands-on applications. Methods and limitations of numerical solution of transport equations. Model interpretation and ethics.

Prerequisite(s): MAT 022B; (ECI 144; or HYD 145A); HYD 145B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

HYD 273 – Introduction to Geostatistics (4 units)

Course Description: Statistical treatment of spatial data with hydrologic emphasis. Topics: theory of random functions, variogram analysis, Kriging/co-Kriging, indicator geostatistics, and stochastic simulation of spatial variability. Geostatistical software use.

Prerequisite(s): STA 130A; STA 130B; or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

HYD 274 – Practice of Groundwater Flow & Transport Modeling (3 units)

Course Description: Selecting and building groundwater flow and transport models. Planning, preparation, execution, presentation, and review of modeling projects. Review of methods, assumptions, and limitations of groundwater models; practicing with MODFLOW, MT3D, associated GUI, and with other groundwater modeling software of choice.

Learning Activities: Lecture 2 hour(s), Lecture/Lab 0.50 hour(s), Lecture/Discussion 0.50 hour(s).

Grade Mode: Letter.

HYD 275 – Analysis of Spatial Processes (3 units)

Course Description: Characterization of homogeneous random fields; extremes and spectral parameters; geometry of excursions, local averaging; scale of fluctuation; non-Gaussian and irregular random fields; geostatistical applications.

Prerequisite(s): STA 102; or the equivalent; HYD 273 or STA 273A recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

HYD 286 – Selected Topics in Environmental Remote Sensing (3 units)

Course Description: In depth investigation of advanced topics in remote sensing applications, measurements, and theory.

Prerequisite(s): ERS 186; consent of instructor, or equivalent; ERS 186L recommended.

Learning Activities: Discussion 2 hour(s), Lecture 1 hour(s), Project.

Repeat Credit: May be repeated.

Cross Listing: GEO 286.

Grade Mode: Letter.

HYD 290 – Seminar in Hydrologic Science (1 unit)

Course Description: Seminars and critical review of problems, issues, and research in hydrologic sciences. Oral presentations of research. Topics vary.

Prerequisite(s): Consent of instructor. Graduate standing and background in Hydrologic Science.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

HYD 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

HYD 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

HYD 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

HYD 440 – Hazardous Waste Operations Training (3 units)

Course Description: Forty-hour course designed to meet the requirements of Federal OSHA regulation CFR 1910.120. Covers the health, regulatory, processing and safe handling issues/problems associated with working with hazardous materials.

Prerequisite(s): Upper division standing in College of Agricultural and Environmental Sciences.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

Immunology (IMM)

Graduate Studies

IMM 201 – Introductory Immunology (4 units)

Course Description: Comprehensive introduction to the principles of immunology.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Enrollment limited to 30 students.

Grade Mode: Letter.

IMM 201L – Advanced Immunology Laboratory Rotations (4 units)

Course Description: Laboratory assignment in two research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. Student writes a project outline and gives oral presentation.

Learning Activities: Discussion/Laboratory 12 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

IMM 202L – Advanced Immunology Laboratory Rotations (5 units)

Course Description: One four-week and one six week assignment in immunology research laboratories. Individual research problems with an emphasis on methodological/procedural experience and experimental design.

Learning Activities: Discussion/Laboratory 15 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

IMM 203 – Cancer Immunology (2 units)

Course Description: Covers concepts in cancer biology, progression and immune evasion. It will also cover topics such as: immune surveillance, immune effector mechanisms and current concepts in immune therapy.

Learning Activities: Lecture 1 hour(s), Term Paper 1 hour(s).

Grade Mode: Letter.

IMM 204 – Topics in Innate Immunity (2 units)

Course Description: Covers current topics in the field of innate immunity through student seminar presentations and critical evaluation of the literature. Concepts include: pathogen recognition, intercellular communication, specialized cellular function and effector/signaling molecules.

Prerequisite(s): IMM 201; or equivalent; IMM 293 preferred.

Learning Activities: Extensive Writing/Discussion 1 hour(s), Performance Instruction 1 hour(s).

Enrollment Restriction(s): Restricted to first- or second-year GGI and MGG students; others with permission of instructor; enrollment limited to 18 students.

Grade Mode: Letter.

IMM 210 – Topics on Neuroimmunology & Neuroinflammation (2 units)

Course Description: Topics will include a broad range of frontiers in neuroimmunology and neuroinflammation. Research articles in current literature will serve to guide in-depth discussions of experimental approaches, technical aspects of experimental techniques, data interpretation, and other relevant aspects of each topic.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

IMM 291 – Introduction to Critical Analysis of Immunology Research Literature (2 units)

Course Description: Introduction to critical reading of primary research papers in Immunology. Guided discussions on recent primary research papers provided to students before each class.

Prerequisite(s): IMM 201 (can be concurrent); or consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

IMM 292 – Immunotoxicology Seminar (2 units)

Course Description: Seminar presentations dealing with principles of xenobiotic effects on immune system functions and specific examples of drugs and environmental chemicals exerting toxic effects on the immune system.

Prerequisite(s): Graduate standing in Pharmacology/Toxicology, Immunology, Physiology, or Biochemistry.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

IMM 293 – Current Concepts in Immunology (4 units)

Course Description: Innate and acquired immunity as defense mechanisms against disease. Mechanisms regulating the distinct cell types driving these responses and current concepts in the literature.

Prerequisite(s): PMI 126; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

IMM 294 – Comparative Clinical Immunology (2 units)

Course Description: Innate and adaptive immunity as related to clinical medicine and therapeutics. Topics may include chronic inflammation, leukocyte adhesion deficiency, cytokine-mediated toxic shock syndrome and septic shock, allergy and hypersensitivity, tolerance and autoimmune disease, primary biliary cirrhosis, rheumatoid arthritis, multiple sclerosis, systemic lupus erythematosus, biologics and immune-engineered therapeutics.

Prerequisite(s): IMM 201 or PMI 270; or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed IMM 294A.

Grade Mode: Letter.

IMM 295 – Cytokines (3 units)

Course Description: Cytokines and their involvement in human and animal physiology/disease, molecular mechanisms and receptor signaling. Immune and non-immune actions. Overlapping/redundant functions (referred to as the "cytokine network").

Prerequisite(s): IMM 293; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

IMM 296 – Advanced Topics in Immunology (1 unit)

Course Description: Presentation and discussion of faculty research topics in Immunology

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

IMM 297 – Mucosal Immunology (2 units)

Course Description: Basic concepts and current research topics in the field of mucosal immunology, with an emphasis on human immunology. Major emphases include innate and adaptive mucosal immunity, the gastrointestinal tract, the lung, lymphocyte trafficking, and mucosal vaccination.

Prerequisite(s): IMM 201; or equivalent.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

Infectious Diseases (IDI)

School of Medicine

IDI 141 – Infectious Diseases of Humans (1 unit)

Course Description: Integrates information on biological and molecular nature of the causative organism, modern diagnostics, treatment and prevention strategies, and the role of infectious diseases in contemporary society and throughout human history.

Prerequisite(s): Introductory knowledge in biology and chemistry recommended.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Pass/No Pass only.

IDI 192 – Research Internship in Internal Medicine (1-12 units)

Course Description: Supervised work experience in the division of Infectious Diseases. Undergraduates will have an opportunity to acquire research experience in clinical settings.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

IDI 199 – Infectious Diseases Research (1-5 units)

Course Description: Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results will be reviewed at intervals with instructor and via seminar presentation.

Prerequisite(s): Consent of instructor; chemistry through organic chemistry (in addition, physical and biochemistry preferred), biology through basic bacteriology (in addition, microbiology and immunology preferred).

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

IDI 211 – Epidemiology & Prevention of Infectious Diseases (3 units)

Course Description: Infectious disease epidemiology and prevention, with equal emphasis on human and veterinary diseases. Major categories of infectious diseases by mode of transmission.

Prerequisite(s): EPI 205B; (EPI 207; or IMD 421).

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

IDI 299 – Research in Infectious Diseases (1-12 units)

Course Description: Laboratory investigation contributing to the dissertation for a graduate degree.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

IDI 440 – Introduction to AIDS & Related Disorders (1.5-6 units)

Course Description: Familiarizes students with the diagnosis and treatment of individuals infected with the human immunodeficiency virus. Interview patients, observe patient care and participate in ongoing clinic research as well as examine alternative lifestyles.

Prerequisite(s): First- and second-year medical students in good academic standing; consent of instructor.

Learning Activities: Clinical Activity 30 hour(s), Discussion 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IDI 450 – Joan Viteri Memorial Clinic (1-6 units)

Course Description: Lecture and guided clinical practice in a supervised clinical setting, focusing on the social and medical aspects of health care for injection drug users.

Prerequisite(s): Consent of instructor; first- and second-year medical students in good academic standing.

Learning Activities: Lecture 1 hour(s), Clinical Activity 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IDI 460 – Infectious Diseases Clinical Clerkship (3-6 units)

Course Description: Patients ill with infectious diseases, including AIDS, will be evaluated and presented at rounds and case conferences. Patients are also seen in the Infectious Diseases Clinic. Instruction in clinical microbiology and the proper use of the laboratory will be provided.

Prerequisite(s): Successful completion of two years of study in an accredited medical school.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment with priority to fourth-year medical students.

Grade Mode: Honors/Pass/Fail.

IDI 470 – Outbreak Investigation & Infection Prevention (3-9 units)

Course Description: Outbreak investigation is a central aspect of infectious disease epidemiology. Gathering of clinical data and its analysis for surveillance underpins outbreak identification, response and control. Focuses on understanding routine and unusual outbreak and the application of methods for detection, investigation and control in both inpatient and outpatient settings as well as local and global environments.

Learning Activities: Lecture.

Grade Mode: Pass/Fail only.

IDI 493 – Correctional Medicine SSM; Evaluation of HIV & Hepatitis C Patients (6 units)

Course Description: Primary agenda focuses on the evaluation of treatment of HIV and Hepatitis C patients in the correctional environment.

Learning Activities: Clinical Activity 30 hour(s), Discussion 5 hour(s).

Grade Mode: Honors/Pass/Fail.

IDI 499 – Research Topics in Infectious Disease (2-12 units)

Course Description: Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results to be reviewed at intervals with instructor and via seminar presentation.

Prerequisite(s): Successful completion of the first-year of study in School of Medicine; graduate students (approved for graduate credit); and/or consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

Integrated Studies (IST)

College of Letters & Science

IST 008 – Colloquium (1 unit)

Course Description: Lectures, films, and readings on the interrelation between the arts and sciences.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

IST 008A – Special Topics in Natural Science & Mathematics (4 units)

Course Description: Group study of a special topic in natural sciences and mathematics. Varies with topic offered.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

IST 008B – Special Topics in Humanities (4 units)

Course Description: Group study of a special topic in humanities. Varies with topic offered.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

IST 008C – Special Topics in the Social Sciences (4 units)

Course Description: Group study of a special topic in the Social Sciences. Varies with topic offered.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Social Sciences (SS).

IST 009 – Seminar (1 unit)

Course Description: Preparation of a research report. Normally taken with IST 008.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

IST 090 – Seminar (1 unit)

Course Description: Interrelation between the arts and sciences, focusing on a special topic.

Prerequisite(s): IST 009; consent of instructor; completion of 45 units with a minimum GPA of 3.250.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Enrollment limited to sophomores who participated in the Integrated Studies Honors Program during their freshman year and transfer students by consent of instructor.

Grade Mode: Pass/No Pass only.

IST 094 – Introduction to Undergraduate Research (1 unit)

Course Description: The nature of research at the undergraduate level.

Prerequisite(s): IST 009; consent of instructor; completion of 45 units with a minimum GPA of 3.500.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Restricted to sophomores who participated in the Integrated Studies Honors Program during their freshman year and other students by consent of instructor.

Grade Mode: Pass/No Pass only.

IST 190 – Topics in Integrated Studies (1 unit)

Course Description: Discussion of the integration of the arts and sciences, focusing on a special topic.

Prerequisite(s): IST 009; consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Pass/No Pass only.

IST 194HA – Special Study for Honors Students (4 units)

Course Description: A program of research culminating in the writing of a junior honors thesis under the direction of a faculty advisor.

Prerequisite(s): IST 009; consent of instructor; completion of 90 units with a minimum GPA of 3.500.

Learning Activities: Independent Study 3 hour(s), Seminar 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

IST 194HB – Special Study for Honors Students (4 units)

Course Description: A program of research culminating in the writing of a junior honors thesis under the direction of a faculty advisor.

Prerequisite(s): IST 009; consent of instructor; completion of 90 units with a minimum GPA of 3.500.

Learning Activities: Independent Study 3 hour(s), Seminar 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

IST 197T – Tutoring in Integrated Studies (1-4 units)

Course Description: Tutoring in Integrated Studies courses, usually in small discussion groups. Weekly discussions with the instructor on the subject matter of the course being tutored and on the art and craft of teaching.

Prerequisite(s): Consent of Director of Integrated Studies.

Learning Activities: Tutorial 1 hour(s).

Enrollment Restriction(s): Open to students in the Integrated Studies Program only.

Repeat Credit: May be repeated 8 time(s).

Grade Mode: Pass/No Pass only.

Internal Medicine (IMD)

School of Medicine

IMD 090 – Seminar in Medical Ethics (1 unit)

Course Description: Seminar Series covering the current topics in Medical Ethics.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Pass/No Pass only.

IMD 092 – Internship (1-4 units)

Course Description: Supervised internship in internal medicine and related fields.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-12 hour(s).

Grade Mode: Pass/No Pass only.

IMD 098 – Directed Group Study (1-2 units)

Course Description: Directed group study in medicine and related fields.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Seminar 1-2 hour(s).

Grade Mode: Pass/Fail only.

IMD 099 – Undergraduate Research in Medicine: Molecular & Cell Biology (1-3 units)

Course Description: Undergraduate research in medicine, focusing on molecular & cellular biology.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

IMD 164 – Practicum in Community Health Clinic: Bayanihan Clinic (1 unit)

Course Description: Through active participation in the medical aspects of community health clinics, the undergraduate student gains knowledge of the organization, administration, and problem-solving capabilities.

Learning Activities: Clinical Activity 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

IMD 192 – Internship in Internal Medicine (1-12 units)

Course Description: Supervised work experience in internal medicine and related fields.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/Fail only.

IMD 194 – Practicum in Community Health Clinics (1-3 units)

Course Description: The undergraduate student, through active participation in the medical aspects of community health clinics, gains knowledge of the organization, administration, and problem-solving capabilities of these primary care facilities.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 5-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

IMD 198 – Directed Group Study (1-3 units)

Course Description: Directed group study in medicine and related fields.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1-2 hour(s), Extensive Problem Solving 2 hour(s).

Grade Mode: Pass/No Pass only.

IMD 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

IMD 214 – Topics in Medical Ethics (1 unit)

Course Description: The complex moral, legal and ethical dilemmas that patients, families, and health care providers face in today's clinics.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

IMD 220D – Cardiovascular System (2.5 units)

Course Description: Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system.

Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders.

Prerequisite(s): HPH 200; consent of instructor; graduate student status.

Learning Activities: Lecture/Discussion 5.50 hour(s).

Grade Mode: Letter.

IMD 250 – Medicine & the Law (3 units)

Course Description: Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues.

Learning Activities: Lecture/Discussion 2 hour(s), Project 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

IMD 414 – One Health: A Course on Global Health (1 unit)

Course Description: Global health problems are complex and require culturally-sensitive, socially-acceptable, and action-oriented approaches to create practical and cost-effective solutions. Will examine major health problems created by the convergence of human, animal, and environmental influences.

Learning Activities: Conference 8 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

IMD 416 – Summer Institute on Race & Health (6 units)

Course Description: Using field trips, media, readings, and clinical experiences, eight-ten first-year medical students explore issues of race, health disparities and related issues in a four-week institute during the summer break.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 30 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/Fail only.

IMD 420A – Hematology (2 units)

Course Description: Malignant disorders of blood cells and transfusion therapy. Covers acute leukemia, myelodysplasia, myeloproliferative disorders, lymphoma, and myeloma.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Pass/Fail only.

IMD 420B – Gastrointestinal System (2.5 units)

Course Description: Basic pathophysiologic principles of digestive diseases on which clinical concepts and judgments can be developed. Emphasis on pathophysiologic basis of gastroenterological and hepatic disorders with discussion of major disorders and their diagnosis and management.

Prerequisite(s): Approval of Committee on Student Progress.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Pass/Fail only.

IMD 420C – Pulmonary & Critical Care Medicine (2.5 units)

Course Description: Clinical aspects of respiratory anatomy, physiology, and pathology. Diagnostic procedures and a description of the major pulmonary diseases & disorders, and critical care medicine.

Prerequisite(s): Approval of SOM's Committee on Student Promotions.

Learning Activities: Lecture/Discussion 5.50 hour(s).

Enrollment Restriction(s): Restricted to Medical students only; student must pass all SOM Year 1 courses.

Grade Mode: Pass/Fail only.

IMD 420D – Cardiovascular System (2.5 units)

Course Description: Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders.

Prerequisite(s): Approval of the School of Medicine Committee on Student Promotions.

Learning Activities: Lecture/Discussion 5.50 hour(s).

Enrollment Restriction(s): Restricted to Medical students only; student must pass all SOM Year 1 courses.

Grade Mode: Pass/Fail only.

IMD 420E – Nephrology (2 units)

Course Description: Fundamental aspects of disorders of body water, electrolytes and acid/base balance; major categories and mechanisms of parenchymal renal diseases; urinary tract infections.

Prerequisite(s): Approval of Student Progress Committee.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s), Laboratory 2 hour(s).

Grade Mode: Pass/Fail only.

IMD 430 – Medicine Clerkship (3-12 units)

Course Description: Clerkship is divided into two, four-week blocks, one each at UCDMC and at Kaiser Hospitals. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

IMD 430FA – SJVP Longitudinal Medicine Clerkship (1.5-6 units)

Course Description: Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 430FB – SJVP Longitudinal Medicine Clerkship (1.5-6 units)

Course Description: Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 430FC – SJVP Longitudinal Medicine Clerkship (1.5-6 units)

Course Description: Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 430FD – SJVP Longitudinal Medicine Clerkship (1.5-6 units)

Course Description: Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 430R – Rural PRIME Internal Medicine Longitudinal Clerkship (2 units)

Course Description: Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

IMD 430RA – Rural PRIME Internal Medicine Longitudinal Clerkship (3 units)

Course Description: Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

IMD 430RB – Rural PRIME Internal Medicine Longitudinal Clerkship (3 units)

Course Description: Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

IMD 430RC – Rural PRIME Internal Medicine Longitudinal Clerkship (3 units)

Course Description: Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

IMD 430RD – Rural PRIME Internal Medicine Longitudinal Clerkship (1 unit)

Course Description: Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

IMD 430TA – TeachMS Longitudinal Medicine Clerkship (A) (4 units)

Course Description: Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 430TB – TeachMS Longitudinal Medicine Clerkship (B) (6 units)

Course Description: Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 430TC – TeachMS Longitudinal Medicine Clerkship (C) (2 units)

Course Description: Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 439D – Directed Clinical Studies in Internal Medicine (1-12 units)

Course Description: Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

IMD 439R – Directed Studies in Internal Medicine (1-12 units)

Course Description: Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s), Independent Study 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

IMD 440 – TEACH-MS Outpatient Internal Medicine (3 units)

Course Description: Two-week rotation. Participate in the clinical care of patients from underserved communities, working with outpatient Internal Medicine preceptors who are primarily based at the Sacramento County Health Center. Rotate through a variety of different outpatient clinics including: Primary Care, Same Day Access Clinic, Homeless Outreach Clinic, and Chronic Disease Management.

Learning Activities: Clinical Activity.

Grade Mode: Pass/Fail only.

IMD 450A – Medicine & the Law (1.5 units)

Course Description: Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Honors/Pass/Fail.

IMD 450B – Medicine & the Law (1.5 units)

Course Description: Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Honors/Pass/Fail.

IMD 458Y – Climate Change: Implications for Clinical Practice & Population Health (3-9 units)

Course Description: Climate change and its associated environmental and social disruptions are and will increasingly lead to clinical and population health consequences for which clinicians, and health systems, will need to be prepared to best care for their patients and the populations they serve. Draws from the Global Consortium on Climate and Health Education's set of Core Climate and Health Competencies for Health Professionals and places an emphasis on climate change and clinical practice.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

IMD 459 – Oncology: Research & Treatment of Cancer (2 units)

Course Description: Comprehensive review of current treatment practices of cancer and state-of-the-art research impacting treatment and prevention of cancer. Emphasis on epidemiology, molecular biology, and pharmacology.

Prerequisite(s): Second-, third-, or fourth-year medical student and/or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Honors/Pass/Fail.

IMD 460 – Correctional Health Care Clerkship (1-12 units)

Course Description: Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities.

Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

IMD 461 – Mather VA Internal Medicine AI (3-6 units)

Course Description: Acting Internship in Internal Medicine for qualified 4th year Medical Students from the UC Davis School of Medicine at the Sacramento VA Hospital. Experiences will somewhat mirror those of AIs at UCDMC.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 462 – Medicine Wards AI (6 units)

Course Description: Assume role of acting intern and be primary physician on medical ward under direction of medical resident and staff. Teams I-V take call every fifth night. Emphasis on evidence-based inpatient care.

Prerequisite(s): MDS 431; consent of instructor; demonstrated ability to accept responsibility.

Learning Activities: Clinical Activity 40 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 463 – Acting Internship in Medicine Intensive Care Unit (MICU) (3-6 units)

Course Description: At UCDMC, student functions as acting intern on MICU service under direction of medical resident and staff. Responsibility for patients admitted to MICU. On call in hospital every fourth night.

Prerequisite(s): Completion of third-year in medical school; consent of Director of MICU.

Learning Activities: Clinical Activity 40 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 464 – Bayanihan Primary Care Clinic (1-12 units)

Course Description: Under the guidance and supervision of a physician, learn patient history taking, medical documentation, counseling, diagnosis and treatment of patients with chronic and acute disease. Provides exposure to the special needs of various ethnic and socioeconomic groups.

Learning Activities: Clinical Activity 0.60 hour(s).

Enrollment Restriction(s): Restricted to medical students in all four years of medical school.

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

IMD 465 – Medicos-Global Health Sciences (9 units)

Course Description: Travel to foreign country for four weeks to collaborate with faculty from local universities and work in urban and rural environments, including hands-on experience with clinic patients. Cultural exchange and awareness of global health care.

Prerequisite(s): Consent of instructor; medical students only.

Learning Activities: Lecture 5 hour(s), Clinical Activity 25 hour(s),

Fieldwork 5 hour(s), Project (Term Project) 5 hour(s).

Grade Mode: Pass/Fail only.

IMD 466 – Medical Spanish for Providers (3 units)

Course Description: Provides ample experience in Spanish patient interviews, supervision of interview styles and Spanish-language skills, discussion of common diagnoses, procedural consent, management/treatment plans, and patient education in Spanish to empower medical students to practice medicine with the nationally growing monolingual Spanish-speaking patient population. Curriculum adapted with permission from the Medical Spanish Taskforce.

Learning Activities: Lecture 40 hour(s).

Grade Mode: Pass/Fail only.

IMD 467 – TEACH-MS Outpatient Internal Medicine Advanced Clinical Clerkship (3 units)

Course Description: Two-week rotation with participation in the clinical care of patients from underserved communities, working with outpatient Internal Medicine preceptors who are primarily based at the Sacramento County Health Center.

Learning Activities: Clinical Activity.

Grade Mode: Pass/Fail only.

IMD 468 – Ambulatory Internal Medicine Externship (3-18 units)

Course Description: Hands-on primary care clinical experience in the ambulatory setting supervised by a general internist. Emphasis on evidence-based outpatient care.

Prerequisite(s): IMD 430; consent of instructor; demonstrated ability to accept responsibility.

Learning Activities: Clinical Activity 40 hour(s), Variable 12-40 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

IMD 469 – Acting Internship in Medicine Intensive Care Unit (MICU) (4-8 units)

Course Description: At UCDMC, student functions as acting intern on MICU service under direction of medical resident and staff. Responsibility for patients admitted to MICU.

Learning Activities: Variable.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Honors/Pass/Fail Only.

IMD 470 – Critical Evaluation of Landmark Studies in Evidence-Based Medicine (3 units)

Course Description: Primary objective is to prepare future physicians to effectively integrate evidence-based medicine into their clinical practice. While this course has an Internal Medicine emphasis, the skills the course aims to impart—formulating focused clinical questions, searching the medical literature, evaluating the quality of research, and integrating evidence into clinical practice, giving effective article presentations)—apply to all future clinicians, regardless of their specialty.

Prerequisite(s): Fourth-year medical student.

Learning Activities: Seminar.

Grade Mode: Pass/Fail only.

IMD 480 – Person Centered Assessment (1 unit)

Course Description: Person-centered assessment modalities and diagnostic approaches with regards to Internal Medicine and its different subspecialties.

Prerequisite(s): Open to all medical students.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Pass/Fail only.

IMD 490 – Medical Care for Underserved & Marginalized Communities (3 units)

Course Description: Review the evidence about health outcomes for marginalized communities, to use the frameworks of 'structural competency' and 'implicit bias' to understand phenomena that drive disparities, to study the cases of several underserved communities in the Sacramento area, experience first-hand community organizations that are providing care to marginalized communities and practice how to identify in the clinical setting unmet social needs and their impact on health.

Learning Activities: Lecture/Discussion 24 hour(s).

Grade Mode: Pass/Fail only.

IMD 493 – Palliative Care: Essentials in Communication, Pain & Symptom Management (6 units)

Course Description: Spend one week with the inpatient palliative care service, one week with the inpatient pain pharmacy service, and two weeks with Snowline Hospice.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 24 hour(s), Discussion 4 hour(s), Independent Study 2 hour(s).

Grade Mode: Pass/Fail only.

IMD 494 – Practicum in Community Health Clinics (1-12 units)

Course Description: Assigned to clinical settings that demonstrate ethnic, urban/rural, or other related aspects of clinical community health. Through active participation in health care delivery, learn to relate conceptual with practical aspects of primary health care.

Prerequisite(s): Medical student with consent of instructor.

Learning Activities: Clinical Activity 15-40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

IMD 495 – Palliative Care: Essentials in Communication, Pain & Symptom Management (3-6 units)

Course Description: Mix of didactic sessions and clinical time. Exposure to management of nociceptive pain, neuropathic pain and mixed pain syndromes. Introduction to the pathophysiology of pain, pharmacology of opioids and non-opioids medications, and management of pain, titration and equianalgesic conversion of pain medications.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

IMD 496 – Integrative Geriatric Medicine (3 units)

Course Description: Provides a two-week clinical experience for fourth-year medical students. Introduces medical students to the care elements for older adults in the inpatient and outpatient settings.

Learning Activities: Clinical Activity.

Grade Mode: Pass/Fail only.

IMD 497 – Medicine, Bioethics & the Holocaust (3 units)

Course Description: Concept of "evil" and the role of collaborators, bystanders and participants exemplified by the holocaust and compared to problems physicians face in practice today. Demonstration that evil emerges incrementally until taken for granted.

Prerequisite(s): Consent of instructor; medical students only.

Learning Activities: Lecture/Discussion 10 hour(s).

Grade Mode: Pass/Fail only.

IMD 498 – Group Study in Internal Medicine (1-18 units)

Course Description: Special study for medical students which may involve laboratory or library research, ambulatory or inpatient care responsibility on campus, at UCDMC or off campus by specific arrangement.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

IMD 499 – General Medicine Research (1-18 units)

Course Description: General medicine research.

Learning Activities: Independent Study 20 hour(s).

Grade Mode: Honors/Pass/Fail.

International Agricultural Development (IAD)

College of Agricultural & Environmental Sciences

IAD 010 – Introduction to International Agricultural Development (4 units)

Course Description: Theories, practices and institutions relating to agricultural development; the interaction of changing social, cultural and economic organization through successive stages of economic development; impact of new agricultural technology on underdeveloped regions.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

IAD 092 – Internship (1-12 units)

Course Description: Supervised internship, off and on campus, in community and institutional settings.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

IAD 103 – Social Change & Agricultural Development (4 units)

Course Description: How social and cultural factors influence technological change in agriculture; theories of diffusion of innovations; social impact analysis and technology assessment.

Prerequisite(s): Introductory social science course (Anthropology (ANT), Sociology (SOC), Economics (ECN), International Agricultural Development (IAD)).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

IAD 142 – Equipment & Technology for Small Farms (2 units)

Course Description: Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Cross Listing: ABT 142.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

IAD 160 – Agroforestry: Global & Local Perspectives (3 units)

Course Description: Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; (PLS 142 or PLS 150 or BIS 002B); or general ecology course in lieu of PLS 142 or PLS 150 or BIS 002B.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken previously taken AMR 160. (Former AMR 160.)

Cross Listing: PLS 160.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

IAD 170 – Program Development for International Agriculture (4 units)

Course Description: Principles of leadership and management for international agricultural development. Organizations and organizational behavior, and the implications for planning and administering organizations involved in the global development effort.

Prerequisite(s): IAD 010.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

IAD 190 – Proseminar in International Agricultural Development (1 unit)

Course Description: Presentation and discussion of current topics in international agricultural development by visiting lecturers, staff and students.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Pass One is restricted to International Agricultural Development majors only.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

IAD 192 – Internship (1-12 units)

Course Description: Supervised internship, off and on campus, in community and institutional settings.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

IAD 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

IAD 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

IAD 200N – Philosophy & Practice of Agricultural Development (5 units)

Course Description: Introduces key elements of philosophy and practice of agricultural development in less developed countries; major paradigms of development; historical context within which these paradigms operate; various development techniques and initiatives emerging from agricultural production to institutional capacity building and management.

Learning Activities: Lecture/Discussion 5 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have completed former IAD 202.

Grade Mode: Letter.

IAD 201 – Economics of Small Farms & Farming Systems (4 units)

Course Description: Economic perspective on small farm development. Establishes a basis for predicting farmers' responses to changes in the economic environment, and for proposing government policies to increase small farm production and improve farmer and national welfare.

Prerequisite(s): ARE 100A or ECN 100; or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

IAD 202N – Analysis & Determinants of Farming Systems (4 units)

Course Description: Unifying concepts of cropping systems in temperate and tropical climatic zones; agroecosystems stability, diversity and sustainability; management strategies, resource use efficiency and their interactions; role of animals, their impact on energy use efficiency, nutrient cycling, and providing food and power.

Prerequisite(s): PLS 110C or PLS 111; or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed former IAD 200.

Grade Mode: Letter.

IAD 203N – Project Planning & Evaluation (4 units)

Course Description: Interdisciplinary setting for application of student skills and specialization to a "real world" development project. Focus on team-building and effective interdisciplinary problem-solving methods, with the objective of producing a project document and presentation within a specified deadline.

Prerequisite(s): IAD 200N; or consent of instructor.

Learning Activities: Discussion 1 hour(s), Workshop 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed former IAD 203.

Grade Mode: Letter.

IAD 290 – Seminar in International Agricultural Development (1-2 units)

Course Description: Discussion and critical evaluation of advanced topics and issues in international agricultural development.

Learning Activities: Seminar 1-2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

IAD 291 – Topics in International Agricultural Development (1-3 units)

Course Description: Selected topics dealing with current issues in agricultural development in lesser developed nations. Variable content.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1-3 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

IAD 292 – Graduate Internship (1-12 units)

Course Description: Individually designed supervised internship, off or on campus, in community, business or institutional setting. Developed with advice of faculty mentor and Humphrey Coordinator.

Prerequisite(s): Participation in H. Humphrey Fellow Program or consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

IAD 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

IAD 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

IAD 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

International Commercial Law (ICL)

School of Law

ICL 201 – Orientation in United States Law (7 units)

Course Description: Investigation of the Common Law System of the United States. Includes structure of the U.S. government, Constitutional law, contracts, torts, real property, consumer law, securities law, intellectual property, antitrust, taxation, labor law, environmental law, ethics, remedies, legal research and trial practice.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 201A – Fundamentals in United States Law (4 units)

Course Description: Investigation of the Common Law System of the U.S. Includes the American constitutional system, the American judiciary, the American civil trial, and foundational substantive and procedural law such as real property, torts, criminal law and procedure, civil procedure, and contracts.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 201B – Advanced Topics in United States Law (3 units)

Course Description: Orientation to advanced topics in U.S. law: Intellectual Property (including copyright and trademarks), Commercial and Consumer Law, Advanced Contracts, Antitrust, Taxation, Remedies, Labor Law, Environmental Law, Dispute Resolution, Remedies and introduction to trial techniques and legal research/writing.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 202 – Introduction to Contracts (4 units)

Course Description: Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 202A – Introduction to Contracts Formation (2 units)

Course Description: Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 202AS – Introduction to Contracts Formation (2 units)

Course Description: Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 202B – Contracts Performance (2 units)

Course Description: Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 202BS – Contract Performance (2 units)

Course Description: Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.

Prerequisite(s): ICL 202A; or equivalent; Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 203 – Civil Procedure (2 units)

Course Description: Study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 204 – International Joint Ventures (3 units)

Course Description: International and U.S. business and legal transactions. Legal planning, problem solving, decision making and negotiations related to the break-up and dissolution of a major international joint venture. U.S. laws including finance, tax, bankruptcy, labor, antitrust, environmental, corporate structures and intellectual property. Offered every three years.

Prerequisite(s): ICL 201; Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 205 – Introduction to Constitutional Law (4 units)

Course Description: Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 205A – Overview of US Constitutional Law (2 units)

Course Description: Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 205AS – Overview of US Constitutional Law (2 units)

Course Description: Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 205B – Constitutional Law–Protection of Individual Rights (2 units)

Course Description: Principles, doctrines and controversies regarding the U.S. Constitution Bill of Rights, including due process of law, equal protection, freedom of expression, freedom of religion, state action, and congressional legislation in aid of civil rights and liberties.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 211 – Negotiations & Alternative Dispute Resolution (1 unit)

Course Description: Mechanisms for resolving disputes including the alternatives to litigation such as negotiation, mediation, and arbitration. Advantages and disadvantages of each approach. Offered every three years.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 10 hour(s).

Grade Mode: Letter.

ICL 212 – Introduction to Negotiation (2 units)

Course Description: Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 212S – Introduction to Negotiation (2 units)

Course Description: Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 214 – Advanced Negotiation (2 units)

Course Description: Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 214S – Advanced Negotiation (2 units)

Course Description: Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 215 – Business Associations (4 units)

Course Description: Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 215S – Business Associations (4 units)

Course Description: Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 216 – International Business Transactions (2 units)

Course Description: Legal problems arising from international business transactions. Focus on international sales contracts, choice of law, forum selection clauses, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, repatriation of profits, foreign exchange problems, and national efforts to control imports.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 217 – Alternative Dispute Resolution (2 units)

Course Description: Introduces students to a wide variety of alternative dispute resolution procedures, with an in-depth emphasis on negotiation, mediation and arbitration.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 219 – Advanced Writing Project (4 units)

Course Description: The completion of a written research project under the active supervision of a faculty member in satisfaction of the research-writing requirement.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Project.

Grade Mode: Satisfactory/Unsatisfactory only.

ICL 220 – United States Taxation of Multinational Investments (2 units)

Course Description: An analysis of the United States taxation of multinational investments including jurisdiction of tax, the U.S. tax system, foreign tax credits, treaties, and transfer pricing.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 227 – Criminal Procedure (2 units)

Course Description: Federal constitutional limits on government authority to gather evidence and investigate crime. Includes Fourth Amendment limits on search, seizure, and arrest; Fifth Amendment privilege against self-incrimination; Sixth Amendment right to counsel.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 228A – Mergers & Acquisitions Law (2 units)

Course Description: Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 228AS – Mergers & Acquisitions Law (2 units)

Course Description: Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 236 – United States Securities Law & Regulation (2 units)

Course Description: Structural and jurisdictional issues associated with securities practice. Topics include the regulation of public offerings, transactions by corporate insiders, regulation of corporate disclosure and conduct, and the liabilities of corporations and individuals under anti-fraud provisions.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 239 – Mediation (2 units)

Course Description: Introduction to the mediation process. Development of communication skills, the ability to analyze disputes, to understand why mediations succeed or fail, and understand the advantages and limitations of mediation as a method of resolving disputes.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 242 – Private International Law (2 units)

Course Description: Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities; other national laws.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 242S – Private International Law (2 units)

Course Description: Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities; other national laws.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 247 – Banking Law (1 unit)

Course Description: Institutional features of international banking transactions, the structure of a large financial deal, and the mechanics of overseeing large loans. Emphasis on negotiable instruments such as bills of lading, letters of credit, standby letters of credit, and interbank transactions. Offered every three years.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 10 hour(s).

Grade Mode: Letter.

ICL 249 – Comparative Law (1 unit)

Course Description: A comparative study of the development of schools of legal thought, chiefly Common law systems and Civil law traditions. Attention to the historical reasons for their divergence, contemporary approaches to universal problems such as succession, torts, and contracts, the cross-fertilization of laws and difficulties commonly associated with importing foreign law into new territory.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 10 hour(s).

Grade Mode: Letter.

ICL 250 – International Trade Law (3 units)

Course Description: An investigation of global trading systems including international trade in goods and services, e-commerce, international intellectual property, international tax planning and investment. Includes substantive and procedural provisions of the World Trade Organization (WTO) and the North American Free Trade Agreement (NAFTA). Offered every three years.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 251 – United States Litigation Issues (1 unit)

Course Description: Prevention and resolution of disputes in international commerce. Emphasis on preparing for a trial in the United States. Includes the study of pre-trial motions, jury selection, opening statements, rules of evidence, closing arguments, and the selection of appropriate strategies. Offered every three years.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 10 hour(s).

Grade Mode: Letter.

ICL 262 – Antitrust (1 unit)

Course Description: Historical and institutional background of Antitrust law in the United States. The statutory framework including price fixing, limits on distribution, monopolization and mergers, and reporting requirements.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 10 hour(s).

Grade Mode: Letter.

ICL 270 – Financing International Transactions (3 units)

Course Description: How capital is raised in international markets.

Investment strategies for U.S. markets. Taxation of financial investments, international currency regulation, and assessing rates of return on international investments. Offered every three years.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 274 – Intellectual Property (2 units)

Course Description: Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 274S – Intellectual Property (2 units)

Course Description: Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition.

Prerequisite(s): ICL 201; Law school education or the equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 283 – Contract Remedies (2 units)

Course Description: Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 283S – Contract Remedies (2 units)

Course Description: Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II.

Prerequisite(s): ICL 202A; ICL 202B; or equivalent; Law School education or equivalent.

Learning Activities: Discussion/Laboratory 20 hour(s).

Grade Mode: Letter.

ICL 285 – Environmental Law (2 units)

Course Description: Introduction to federal and state environmental law. Historical development of environmental law; the role of courts, the legislature and the executive branch in the development and implementation of environmental policy. Review of major statutes.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 289 – Licensing Academy in Intellectual Property & Technology Commercialization (4 units)

Course Description: Intellectual property as it relates to current forms of legal protection and how new innovations fit into these models, including public-private technology transfer, patents, institutional objectives, technology transfer offices, startups, and licenses.

Prerequisite(s): ICL 201; Law School education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Letter.

ICL 290 – American Legal System Research Seminar (1 unit)

Course Description: American legal system and its structure. Legal research methodologies and presentation with attention to analysis, synthesis, organization, and editing techniques common to legal writing.

Prerequisite(s): ICL 201; Law School education or equivalent.

Learning Activities: Seminar 5 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

ICL 291C – International Commercial Law Seminar (4 units)

Course Description: Advanced seminar on a current topic in International Commercial Law. Offered at the University of Cologne in Cologne, Germany for two weeks each summer.

Prerequisite(s): ICL 201; Law School education or equivalent.

Learning Activities: Seminar 20 hour(s).

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

ICL 292 – International Commercial Law Seminar (1-4 units)

Course Description: Advanced seminar in a current topic in International Commercial Law. Topic changes each year course is offered.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

ICL 292S – International Commercial Law Seminar (1-4 units)

Course Description: Advanced seminar in a current topic in International Commercial Law. Topic changes each year course is offered.

Prerequisite(s): Law school education or equivalent.

Learning Activities: Lecture/Discussion 20 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

ICL 299 – Advanced Research in Legal Problems (1-4 units)

Course Description: Student individualized research projects under faculty supervision.

Prerequisite(s): ICL 201; Law School education or equivalent.

Learning Activities: Variable 3-40 hour(s).

Enrollment Restriction(s): Permission of supervising instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

International Relations (IRE)

College of Letters & Science

IRE 001 – Global Interdependence (4 units)

Course Description: Development of the concept of global interdependence along its political, economic, demographic, cultural, technological, and environmental dimensions. Focus on the ways societies and states interact. Provides the foundation for upper division multidisciplinary work in international relations.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

IRE 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

IRE 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

IRE 104 – The Political Economy of International Migration (4 units)

Course Description: Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation.

Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Cross Listing: SOC 104.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

IRE 190 – Topics in International Relations (4 units)

Course Description: Selected topics in international relations. Variable content.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Writing Experience (WE).

IRE 192 – International Relations Internship (1-12 units)

Course Description: Work experience in international relations, with term paper summarizing the practical experience of the student.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS); Writing Experience (WE).

IRE 194HA – Special Study for Honors Students (4 units)

Course Description: Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty advisor.

Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program.

Learning Activities: Seminar 2 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

IRE 194HB – Special Study for Honors Students (4 units)

Course Description: Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty advisor.

Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program.

Learning Activities: Seminar 2 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

IRE 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

IRE 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

Italian (ITA)

College of Letters & Science

ITA 001 – Elementary Italian (5 units)

Course Description: Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Students who have successfully completed ITA 002 or ITA 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed; not open for credit to students who have taken ITA 001A or ITA 001S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ITA 001A – Accelerated Intensive Elementary Italian (15 units)

Course Description: Special 12-week accelerated, intensive summer session course that combines the work of ITA 001, ITA 002, and ITA 003. Introduction to Italian grammar and development of all language skills in a cultural context with emphasis on communicative ability.

Learning Activities: Lecture/Discussion 15 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ITA 001, ITA 002, or ITA 003.

Grade Mode: Letter.

ITA 001S – Elementary Italian (5 units)

Course Description: Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. May be taught abroad.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Students who have successfully completed ITA 002 or ITA 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed; not open for credit to students who have taken ITA 001 or ITA 001A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ITA 002 – Elementary Italian (5 units)

Course Description: Continuation of ITA 001 or ITA 001S. Review of grammar and vocabulary, and practice of all language skills through cultural texts.

Prerequisite(s): ITA 001 or ITA 001S.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ITA 001A or ITA 002S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ITA 002S – Elementary Italian (5 units)

Course Description: Continuation of ITA 001 or ITA 001S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. May be taught abroad.

Prerequisite(s): ITA 001 or ITA 001S.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ITA 001A or ITA 002.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ITA 003 – Elementary Italian (5 units)

Course Description: Continuation of ITA 002 or ITA 002S. Review of grammar and vocabulary, and practice of all language skills through cultural texts.

Prerequisite(s): ITA 002 or ITA 002S.

Learning Activities: Lecture/Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ITA 001A or ITA 003S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ITA 003S – Elementary Italian (5 units)

Course Description: Continuation of ITA 002 or ITA 002S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. May be taught abroad.

Prerequisite(s): ITA 002 or ITA 002S.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ITA 001A or ITA 003.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

ITA 008A – Italian Conversation (3 units)

Course Description: Italian conversation with peers in classroom setting.

Prerequisite(s): ITA 003; or the equivalent.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL); World Cultures (WC).

ITA 008AS – Italian Conversation (3 units)

Course Description: Italian conversation in local context outside United States. May be taught abroad.

Prerequisite(s): ITA 003; or the equivalent.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL); World Cultures (WC).

ITA 008B – Italian Conversation (3 units)

Course Description: Italian conversation with peers in a classroom setting.

Prerequisite(s): ITA 008A.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

General Education: World Cultures (WC).

ITA 008BS – Italian Conversation (3 units)

Course Description: Italian conversation in local context outside United States. May be taught abroad.

Prerequisite(s): ITA 008A.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL); World Cultures (WC).

ITA 021 – Intermediate Italian (5 units)

Course Description: Continued development of grammatical structures and vocabulary. Emphasis on reading and writing in Italian.

Prerequisite(s): ITA 003 or ITA 003S or ITA 032 or ITA 032Y.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

ITA 021S – Intermediate Italian (5 units)

Course Description: Continued development of grammatical structures and vocabulary. Emphasis on reading and writing in Italian.

Prerequisite(s): ITA 003 or ITA 003S or ITA 032 or ITA 032Y.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory.

Enrollment Restriction(s): Not open to students who have taken ITA 004, ITA 004S, ITA 021.

Credit Limitation(s): Not open to students who have taken ITA 004, ITA 004S, ITA 021.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

ITA 022 – Intermediate Italian (5 units)

Course Description: Continued development of grammatical structures and vocabulary. Emphasis on reading and writing in Italian.

Prerequisite(s): ITA 021 or ITA 021S.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

ITA 022S – Intermediate Italian (5 units)

Course Description: Continued development of grammatical structures and vocabulary. Emphasis on reading and writing in Italian.

Prerequisite(s): ITA 021 or ITA 021S.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory.

Credit Limitation(s): Not open for credit to students who have taken ITA 005 or ITA 005S or ITA 022.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

ITA 023 – Intermediate Italian (5 units)

Course Description: Continued development of grammatical structures and vocabulary. Emphasis on reading and writing in Italian.

Prerequisite(s): ITA 022 or ITA 022S.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

ITA 023S – Intermediate Italian (5 units)

Course Description: Continued development of grammatical structures and vocabulary. Emphasis on reading and writing in Italian.

Prerequisite(s): ITA 022 or ITA 022S.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory.

Enrollment Restriction(s): Not open to students who have taken ITA 009 or ITA 009S or ITA 023.

Credit Limitation(s): No credit if taken ITA 009 or ITA 009S or ITA 023.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

ITA 031 – Beginning Italian for Spanish Speakers (5 units)

Course Description: Intensive introductory course on Italian language with emphasis on structural similarities between Italian and Spanish.

Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; or two years of high school Spanish or native or heritage speaker of Spanish.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ITA 001, ITA 001A, ITA 001S, ITA 002, ITA 002S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ITA 031Y – Beginning Italian for Spanish Speakers (5 units)

Course Description: Intensive Introductory course on Italian language with emphasis on structural similarities between Italian and Spanish.

Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; consent of instructor. SPA 003 or two years of high school Spanish or native or heritage speaker of Spanish.

Learning Activities: Lecture/Discussion 3 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ITA 001, ITA 001A, ITA 001S, ITA 002, ITA 002S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

ITA 032 – Beginning Italian for Spanish Speakers (5 units)

Course Description: Continuation of ITA 031. Intensive introductory course to Italian language and grammar with emphasis on oral and written communication. Highlights the structural similarities between Italian and Spanish.

Prerequisite(s): ITA 031 or ITA 031Y; or consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s).

ITA 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.
Prerequisite(s): Consent of instructor.
Learning Activities: Variable.
Grade Mode: Pass/No Pass only.

ITA 199S – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Opportunity for a faculty member to work with an advanced undergraduate student in a focused manner on a topic or topics of mutual research/creative interest. May be taught abroad.
Prerequisite(s): Consent of instructor.
Learning Activities: Variable.
Repeat Credit: May be repeated when topic differs.
Grade Mode: Pass/No Pass only.

ITA 297 – Individual Study (1-5 units)

Course Description: Individual study.
Prerequisite(s): Graduate standing or consent of instructor.
Learning Activities: Variable.
Repeat Credit: May be repeated.
Grade Mode: Letter.

ITA 298 – Group Study (1-5 units)

Course Description: Group study.
Prerequisite(s): Graduate standing or consent of instructor.
Learning Activities: Variable.
Grade Mode: Letter.

ITA 299 – Research (1-12 units)

Course Description: Research.
Prerequisite(s): Graduate standing or consent of instructor.
Learning Activities: Variable.
Grade Mode: Satisfactory/Unsatisfactory only.

ITA 299D – Dissertation Research (1-12 units)

Course Description: Dissertation research.
Prerequisite(s): Graduate standing or consent of instructor.
Learning Activities: Variable.
Repeat Credit: May be repeated.
Grade Mode: Satisfactory/Unsatisfactory only.

ITA 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.
Prerequisite(s): Consent of instructor; graduate standing.
Learning Activities: Variable 3-12 hour(s).
Repeat Credit: May be repeated.
Grade Mode: Satisfactory/Unsatisfactory only.

Japanese (JPN)

College of Letters & Science

JPN 001 – Elementary Japanese (5 units)

Course Description: Introduction to spoken and written Japanese in cultural contexts, with emphasis on communication.
Learning Activities: Lecture/Discussion 5 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

JPN 001A – Accelerated Intensive Elementary Japanese (15 units)

Course Description: Special 12-week accelerated, intensive summer session course that combines the work of JPN 001, JPN 002 and JPN 003. Introduction to Japanese grammar and development of all language skills in a cultural context with emphasis on communication.
Learning Activities: Lecture/Discussion 15 hour(s).
Credit Limitation(s): not open for credit to students who have completed JPN 001, JPN 002, or JPN 003.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

JPN 001AS – Intensive Elementary Japanese (15 units)

Course Description: Intensive course taught combining the work of JPN 001, JPN 002 and JPN 003. Introduction to Japanese grammar and development of all language skills in a cultural context with emphasis on communication. Taught abroad in Japan.
Learning Activities: Lecture/Discussion 15 hour(s).
Credit Limitation(s): Not open for credit to students who have taken JPN 001, JPN 002, or JPN 003.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

JPN 002 – Elementary Japanese (5 units)

Course Description: Continuation of training in basic Japanese spoken and written skills.
Prerequisite(s): JPN 001 C- or better; or the equivalent language proficiency.
Learning Activities: Lecture/Discussion 5 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

JPN 003 – Elementary Japanese (5 units)

Course Description: Continuation of training in basic spoken and written skills in Japanese language. May be taught abroad.

Prerequisite(s): JPN 002 C- or better; or the equivalent language proficiency.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

JPN 004 – Intermediate Japanese (5 units)

Course Description: Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in JPN 003.

Prerequisite(s): JPN 003 C- or better; or the equivalent language proficiency.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

JPN 005 – Intermediate Japanese (5 units)

Course Description: Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in JPN 004.

Prerequisite(s): JPN 004 C- or better; or the equivalent language proficiency.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

JPN 006 – Intermediate Japanese (5 units)

Course Description: Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in JPN 005. May be taught abroad.

Prerequisite(s): JPN 005 C- or better; or the equivalent language proficiency.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

JPN 007S – Intensive Intermediate Japanese (20 units)

Course Description: Special intensive course that combines the work of JPN 003, JPN 004, JPN 005, and JPN 006. Introduction to Japanese grammar and development of all language skills in a cultural context with emphasis on communication. Taught abroad in Japan.

Prerequisite(s): JPN 002 C- or better; or the equivalent language proficiency. consent of instructor.

Learning Activities: Lecture/Discussion 20 hour(s).

Credit Limitation(s): Credit limit may apply to students who have taken JPN 003, 004, 005, or 006.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

JPN 010 – Masterworks of Japanese Literature (in English) (4 units)

Course Description: Introduction to Japanese literature: readings and discussion in English of important works from earliest times to the present.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

JPN 197T – Tutoring in Japanese (1-5 units)

Course Description: Leading of small voluntary discussion groups affiliated with one of the Program’s regular courses.

Prerequisite(s): Consent of Department Chairperson.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

JPN 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); World Cultures (WC).

JPN 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); World Cultures (WC).

JPN 291 – Seminar in Modern Japanese Literature: Major Writers (4 units)

Course Description: In-depth reading and critical analyses of major works by and critical literature on one or two prominent modern or contemporary writers such as Natsume Soseki, Mori Ogai, Shimazaki Toson, Akutagawa Ryunosuke, Tanizaki Junichiro, Abe Kobo and Oe Kenzaburo.

Prerequisite(s): JPN 130 or JPN 131 or JPN 132 or JPN 133 or JPN 134 or JPN 135 or JPN 136 or JPN 137 or JPN 138; or the equivalent language proficiency.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

JPN 297 – Directed Independent Study (4 units)

Course Description: Directed independent study on a topic culminating in a term paper. Independent Studies may only be arranged with consent of the instructor and when graduate seminars are unavailable.

Prerequisite(s): Consent of instructor.

Learning Activities: Conference 1 hour(s), Term Paper, Independent Study.

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated 5 time(s) when no seminars are available and topic differs.

Grade Mode: Letter.

JPN 299 – Research (1-12 units)

Course Description: Description:

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Jewish Studies (JST)

College of Letters & Science

JST 010 – Introduction to Jewish Cultures (4 units)

Course Description: Diverse Jewish cultures created over the past 2,000 years using examples from less-familiar communities such as India, China, and Ethiopia. Topics include the tensions between homeland/diaspora and questions of identity (race, nationality, culture, or religion).

Learning Activities: Lecture 3 hour(s), Term Paper 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

JST 101 – Topics in Jewish Thought (4 units)

Course Description: Selected themes in Jewish thought in historical and social perspective. Traces the historical development of topics in Jewish thought such as Messianism, or focuses on one specific historical period, such as modern Jewish thought.

Prerequisite(s): JST 010 or RST 023; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

JST 110 – Selected Topics in Jewish Literature (4 units)

Course Description: Literature written about the Jewish experience, treated in its historical and social context. Examines literature written in one language, such as English, Hebrew, or Yiddish, or a theme, such as gender or modern identities, as expressed in different literary traditions.

Prerequisite(s): One lower division literature or Jewish Studies (JST) course or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

JST 111 – Israeli Writing Since 1960 (4 units)

Course Description: Contemporary Hebrew literature, in translation, in relation to post-independence debates about religious, social, and political identity of the Jewish state; literary reflections of Israeli ethnic diversity and changing gender relations; modern Hebrew poetry and postmodern experiments in fiction.

Prerequisite(s): One course in American or European literature.

Learning Activities: Lecture/Lab 3 hour(s), Extensive Writing 1 hour(s).

Credit Limitation(s): No credit will be given to students who have completed HUM 119.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

JST 112 – Readings in Jewish Writing & Thought in German Culture (4 units)

Course Description: Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German speaking world; what it means to be "other" in the mainstream culture.

Prerequisite(s): RST 023; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper 1 hour(s).

Credit Limitation(s): No credit will be given to students who have completed HUM 121.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

JST 116 – Readings in Jewish Writing & Thought in German Culture (4 units)

Course Description: Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German speaking world; what it means to be "other" in the mainstream culture.

Prerequisite(s): RST 023; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Credit Limitation(s): No credit will be given to students who have completed HUM 121.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Cross Listing: GER 116.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

JST 120 – Cinema & the American Jewish Experience (4 units)

Course Description: Examination of American cinema to reveal how Jewish identity is expressed and submerged, tracing the relations between religion, identity, race, politics, and art.

Prerequisite(s): JST 010 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed HUM 122.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

JST 121 – Oral History & Jewish Life (4 units)

Course Description: Oral history methodologies and application to an in-depth oral history interview about Jewish life. Topics include oral history practices and ethics, immigration, migration, religious practice, ethnic relations, and community organization structures.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper 1 hour(s).

Credit Limitation(s): No credit given to students who have completed HUM 123.

Grade Mode: Letter.

General Education: Social Sciences (SS).

Landscape Architecture (LDA)

College of Agricultural & Environmental Sciences

LDA 001 – Introduction to Environmental Design (4 units)

Course Description: Introduction to the role of design professionals in contributing to the built environment at a range of scales. Introduction to basic methods used by design professionals to evaluate, design, plan, and manage landscapes and the built environment.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE) or Social Sciences (SS); Domestic Diversity (DD); Visual Literacy (VL).

LDA 002 – Place, Culture & Community (4 units)

Course Description: Social dimensions of landscapes and everyday environments, including concepts of place, culture and community. Urban and rural environments including wilderness, parks, sacred space, agricultural sites, workplaces, transportation networks, housing, recreation, and military sites. Application of course concepts and methods for interpreting cultural landscapes through archival and field research.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Visual Literacy (VL); Writing Experience (WE).

LDA 003 – Sustainable Development: Theory & Practice (4 units)

Course Description: Origins, theoretical perspectives, and practical applications of the concept of sustainable development across scales (site, building, neighborhood, city, region, and nation) through lectures, sketch exercises, student projects, walking tours.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Visual Literacy (VL); Writing Experience (WE).

LDA 010 – World Regional Geography (3 units)

Course Description: Major geographic regions of the world; physical and human geography of each region; interactions between the people and the environment; culture and landscape; major resources; physical environments; population distribution and major cities.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

LDA 021 – Landscape Representation I (4 units)

Course Description: Introduction to landscape architectural representation techniques. Fundamentals of orthographic drafting, freehand drawing, photography, and basic digital representation.

Prerequisite(s): LDA 001 (can be concurrent); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Pre-Landscape Architecture and Sustainable Environmental Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

LDA 030 – History of Environmental Design (4 units)

Course Description: History of Environmental Design across disciplines, including landscape architecture, architecture, planning, and urban design.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

LDA 050 – Site Ecology (4 units)

Course Description: Introduction to ecological concepts, including nutrient dynamics, population regulation, community structure, ecosystem function. Principles will be applied to human activities such as biological conservation, ecological restoration, landscape planning, and management. Weekly lab devoted to field exercises in local ecosystems.

Prerequisite(s): BIS 002B.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Pre-Landscape Architecture and Sustainable Environmental Design majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL); Writing Experience (WE).

LDA 060 – Landform & Grading Studio (6 units)

Course Description: Introduction of landform and topography as landscape medium and utilization of grading and drainage to design meaningful and functional spaces. Intro to site analysis and site planning, with specific attention to topography.

Prerequisite(s): LDA 070.

Learning Activities: Studio 8 hour(s), Extensive Problem Solving, Project.

Enrollment Restriction(s): Pass One restricted to Pre-Landscape Architecture majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Oral Skills (OL); Visual Literacy (VL).

LDA 070 – Introduction to Spacemaking (4 units)

Course Description: Introduction to basic principles of design towards the creation of space. Design methodologies and skills to define, manipulate, and represent the built environment. Workshops in 3D physical modeling for spacemaking.

Prerequisite(s): LDA 021; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Pre-Landscape Architecture and Sustainable Environmental Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

LDA 098 – Directed Group Study in Landscape Architecture (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

LDA 099 – Special Study for Undergraduates in Landscape Architecture (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

LDA 101 – Advanced Theory in Environmental Design (3 units)

Course Description: Provides exploration of contemporary theories and philosophies impacting design of landscapes and the built environment. Includes exploring competing definitions of "landscape," "nature," and "culture."

Prerequisite(s): LDA 070 (can be concurrent); or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to Landscape Architecture and Sustainable Environmental Design majors only.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LDA 102 – Methods in Design & Landscape Research (3 units)

Course Description: Research, design, and planning methods employed in landscape architecture. Exercises allow students to design independent landscape research. Lectures provide a historical overview of research methodology.

Prerequisite(s): LDA 171; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to Landscape Architecture majors only.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

LDA 119 – Landscape Representation II (4 units)

Course Description: Methods to explore and communicate environmental design intentions through digital media.

Prerequisite(s): LDA 021; or consent of instructor.

Learning Activities: Studio 6 hour(s),

Enrollment Restriction(s): Fall quarter restricted to Landscape Architecture majors; spring quarter restricted to Sustainable Environmental Design majors.

Credit Limitation(s): No credit if student has taken LDA 023.

Grade Mode: Letter.

LDA 120 – Landscape Representation III (4 units)

Course Description: Studio to explore advanced representation and modeling skills. Digital drawing applied as an analytical research method, generative design technique and presentation tool.

Prerequisite(s): LDA 023; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Enrollment Restriction(s): Restricted to Landscape Architecture majors.

Grade Mode: Letter.

LDA 140 – Green Building, Design, & Materials (4 units)

Course Description: Sustainable design and construction techniques at site and building scales. Emphasizes real-world case studies, analysis of opportunities for actual sites, and application of LEED and Sustainable Sites green rating systems.

Prerequisite(s): LDA 050; LDA 070.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Sustainable Environmental Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Visual Literacy (VL).

LDA 141 – Community Participation & Design (4 units)

Course Description: Introduction to community participation and design. Incorporates social and cultural factors, public and community processes, theories and practices related to human-environment behavior; community involvement in design, social analysis, community engagement, accessibility, diversity and politics of place.

Prerequisite(s): LDA 021; LDA 030; LDA 050; LDA 070.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Enrollment Restriction(s): Open to Landscape Architecture and Sustainable Environmental Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL).

LDA 142 – Applying Sustainable Strategies (6 units)

Course Description: Capstone class examines case studies and techniques of sustainable development. Student teams will develop detailed proposals for real-world sites.

Prerequisite(s): LDA 140; LDA 141.

Learning Activities: Lecture 3 hour(s), Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to Sustainable Environmental Design Majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE) or Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

LDA 150 – Introduction to Geographic Information Systems (4 units)

Course Description: Basic concepts, principles, and methods of GIS are presented. Data structures, database design, GIS data creation, GPS, and spatial analysis. May be taught abroad.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Landscape Architecture and Sustainable Environmental Design majors.

Credit Limitation(s): Not open to credit for students who have completed ABT 180, PLS 180, ABT 181N.

Cross Listing: ABT 150.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

LDA 152 – Conservation Planning & Design (4 units)

Course Description: Theories and practice of conservation planning and design. Relationships between ecological theory, conservation principles, reserve design and policy. Applications to real-world conservation planning problems are presented in discussion/lab.

Prerequisite(s): BIS 002B; LDA 150 D or better or ABT 150 D or better.

Learning Activities: Lecture 3 hour(s); Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

LDA 160 – Design & Build Studio (6 units)

Course Description: Introduction to the spatial design and construction of small-scale projects. Hands-on approach to learning and understanding materials (including wood, concrete, and stone) and methods in landscape construction, and the application of technical skills (including detailing, cost estimation, and specifications).

Prerequisite(s): LDA 001; LDA 002; LDA 003; LDA 021; LDA 030; LDA 050; LDA 070.

Learning Activities: Studio 8 hour(s), Extensive Problem Solving, Fieldwork.

Enrollment Restriction(s): Restricted to Landscape Architecture majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

LDA 161 – Professional Practice & Construction Documents (6 units)

Course Description: Legal and professional aspects of landscape architecture, including the development of construction documents (drawings and specifications), proposal writing, fee calculations, project management, cost estimation, and insurance.

Prerequisite(s): LDA 171.

Learning Activities: Studio 8 hour(s), Project, Fieldwork.

Enrollment Restriction(s): Open to Landscape Architecture majors only.

Grade Mode: Letter.

LDA 170 – Site Planning & Design Studio (6 units)

Course Description: Application of place-making and problem-solving skills to local landscape sites. Analysis of social and environmental conditions in the field. Lectures link design projects to contemporary theories and practices.

Prerequisite(s): LDA 160.

Learning Activities: Studio 8 hour(s), Fieldwork.

Enrollment Restriction(s): Open to Landscape Architecture majors only.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

LDA 171 – Urban Design & Planning Studio (6 units)

Course Description: Studio designing large-scale landscapes at regional, sub-regional, and neighborhood scales. Focuses on understanding complex social, economic, and environmental factors, developing sustainability priorities and strategies, and applying them through design and policy.

Prerequisite(s): LDA 170.

Learning Activities: Studio 8 hour(s).

Enrollment Restriction(s): Restricted to Landscape Architecture majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Oral Skills (OL); Visual Literacy (VL).

LDA 172 – Architectural Design (4 units)

Course Description: Conceptual design process as practiced by the discipline of architecture. Concepts of program, massing, structure, building systems and materials. Hand and computer aided drawing and physical model building.

Prerequisite(s): LDA 070 C or better; or consent of Instructor.

Learning Activities: Lecture/Lab 4 hour(s).

Enrollment Restriction(s): Pass One restricted to Sustainable Environmental Design majors.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE) or Social Sciences (SS).

LDA 180 – Advanced Design & Planning Studio (6 units)

Course Description: Application of advanced theories and methods of design and planning to real-world projects.

Prerequisite(s): LDA 060; LDA 160; LDA 170; LDA 171; LDA 172.

Learning Activities: Studio 8 hour(s), Fieldwork, Extensive Problem Solving.

Enrollment Restriction(s): Restricted to Landscape Architecture majors or consent of instructor.

Repeat Credit: May be repeated 18 unit(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL).

LDA 182 – Advanced Landscape Architecture Studio I (6 units)

Course Description: Landscape architecture studio featuring advanced studies and applications of creative work, design, technology and/or theory. One day-long field trip required.

Prerequisite(s): LDA 171.

Learning Activities: Studio 8 hour(s).

Enrollment Restriction(s): Restricted to Landscape Architecture majors or consent of instructor.

Grade Mode: Letter.

LDA 183 – Advanced Landscape Architecture Studio II (6 units)

Course Description: Landscape architecture studio featuring advanced studies and applications of creative work, design, technology and/or theory. One day-long field trip required.

Prerequisite(s): LDA 182.

Learning Activities: Studio 8 hour(s).

Enrollment Restriction(s): Restricted to Landscape Architecture majors or consent of instructor.

Grade Mode: Letter.

LDA 184 – Capstone Landscape Architecture Studio (6 units)

Course Description: Capstone studio that synthesizes learning objectives within the senior-level Landscape Architecture studio sequence. Students required to apply creative problem solving, design theory, technology, and representation skills towards a design approach that addresses complex, real-world environmental design problems.

Prerequisite(s): LDA 183.

Learning Activities: Studio 8 hour(s).

Enrollment Restriction(s): Restricted to Landscape Architecture majors or consent of instructor.

Grade Mode: Letter.

LDA 190 – Proseminar in Landscape Architecture (1 unit)

Course Description: Lectures and discussion of critical issues in landscape architecture.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

LDA 191 – Landscape Architecture Planning & Design Studio (2-12 units)

Course Description: Faculty initiated workshops featuring advanced studies and applications of original work in landscape architecture. May be taught abroad.

Prerequisite(s): LDA 001; LDA 070; LDA 170; or consent of instructor.

Learning Activities: Seminar 1 hour(s), Workshop 3 hour(s).

Enrollment Restriction(s): Priority to Landscape Architecture majors.

Repeat Credit: May be repeated 20 unit(s).

Grade Mode: Letter.

LDA 192 – Internship in Landscape Architecture (1-12 units)

Course Description: Professional field experience in landscape architecture.

Prerequisite(s): Consent of instructor; senior standing in Landscape Architecture.

Learning Activities: Internship.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

LDA 193A – Senior Project in Landscape Architecture (3 units)

Course Description: Projects will focus on a critical area of landscape architectural design, planning, planning, analysis, communication, or research. Required of all Landscape Architecture majors.

Prerequisite(s): Senior standing in Landscape Architecture.

Learning Activities: Studio 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

LDA 193B – Senior Project in Landscape Architecture (4 units)

Course Description: Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Required of all Landscape Architecture majors.

Prerequisite(s): LDA 193A; senior standing in Landscape Architecture.

Learning Activities: Studio 8 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Pass/No Pass only.

LDA 197T – Tutoring in Landscape Architecture (1-5 units)

Course Description: Tutoring in Landscape Architecture courses.

Prerequisite(s): Consent of instructor.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: Pass/No Pass only.

LDA 198 – Directed Group Study in Landscape Architecture (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

LDA 199 – Special Study for Advanced Undergraduates in Landscape Architecture (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

LDA 200 – Citizenship, Democracy, & Public Space (4 units)

Course Description: Introduction to seminal works in political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of critical perspective regarding restructuring of public space in a pluralistic and global culture; discussion of contemporary case studies.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Cross Listing: GEO 230.

Grade Mode: Letter.

LDA 201 – Theory & Philosophy of the Designed Environment (4 units)

Course Description: Examines the major theories of environmental design. Epistemology of design serves as framework to examine modern landscape architecture, architecture, urban design and planning. Normative theories of design are reviewed along with the social and environmental sciences.

Prerequisite(s): LDA 140; or the equivalent; graduate standing or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

LDA 202 – Methods in Design & Landscape Research (4 units)

Course Description: Explores many of the research and advanced design and planning methods employed in landscape architecture. Exercises provide the student with a vehicle for designing independent landscape research and creative activities. Lectures provide an historical overview of research methodology.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

LDA 204 – Case Studies in Landscape Design & Research (4 units)

Course Description: Real-world designed environment situations where creative activity and/or basic research is the primary product.

Prerequisite(s): Graduate standing in Landscape Architecture, Ecology, Geography or Community Development or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Letter.

LDA 205 – Urban Planning & Design (4 units)

Course Description: Regulation, design, and development of the built landscape, planning and land development processes, zoning and subdivision regulation, site planning, urban design goals and methods, public participation strategies, creatively designing landscapes to meet community and ecological goals.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Limited to graduate students.

Cross Listing: GEO 233.

Grade Mode: Letter.

LDA 210 – Advanced Landscape Architecture Studio (4 units)

Course Description: Exposes students to real-world, designed-environment situations where creative activity and/or basic research is the primary product. Advanced landscape problems will be utilized at the site, urban or rural scale.

Prerequisite(s): LDA 113 or the equivalent; graduate standing or consent of instructor.

Learning Activities: Laboratory 8 hour(s).

Grade Mode: Letter.

LDA 215 – What is Infrastructure: Critical Infrastructure Studies (3 units)

Course Description: Introduction to interdisciplinary scholarship and design on expanding conceptions of infrastructure, that include social, technical, ecological, political and aesthetic dimensions of the medium. Focus on application of theory to case studies and thinking through landscape as infrastructure.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to graduate students or consent of instructor.

Cross Listing: GEO 215.

Grade Mode: Letter.

LDA 216 – Food & the City (4 units)

Course Description: Exploration of theory and practice related to the design and planning of alternative and resilient food systems, including urban agriculture, agrihoods, and agri-/rural tourism. Includes investigation of urban-rural connections and case-studies of regional urban agriculture projects.

Learning Activities: Seminar 4 hour(s).

Enrollment Restriction(s): Open to graduate standing or consent of instructor.

Grade Mode: Letter.

LDA 270 – Environment & Behavior (4 units)

Course Description: Factors that influence human's interaction with their surroundings and the mechanisms used for recognizing and addressing general and specific human needs in community design and development decisions.

Prerequisite(s): Graduate standing or consent of instructor; PSC 144 recommended.

Learning Activities: Seminar 3 hour(s), Tutorial 1 hour(s).

Grade Mode: Letter.

LDA 280 – Landscape Conservation (3 units)

Course Description: Focus is on land planning, design, and management techniques to further the goal of resource preservation. Examines current critical theory in the establishment and management of conservation areas.

Prerequisite(s): Contact department for prerequisite courses; graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

LDA 290 – Graduate Seminar in Landscape Architecture (2 units)

Course Description: Seminar on selected topics in landscape architecture research, analysis, planning, design, communication, or education.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

LDA 297 – Practicum in Landscape Architecture (1-10 units)

Course Description: Opportunity for students to work directly in the field with academics at other institutions or with professionals in an office setting. Gives experience beyond the confines of campus and allows direct interaction with the community.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Independent Study 1-10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

LDA 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

LDA 299 – Directed Individual Research for Graduate Students (1-12 units)

Course Description: Research.

Learning Activities: Independent Study.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

LDA 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Latin (LAT)

College of Letters & Science

LAT 001 – Elementary Latin (5 units)

Course Description: Introduction to basic grammar and vocabulary and development of translation skills with emphasis on Latin to English.

Learning Activities: Lecture 5 hour(s).

Credit Limitation(s): Students who have successfully completed LAT 002 or LAT 003 in the 10th grade or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LAT 002 – Elementary Latin (5 units)

Course Description: Continuation of LAT 001.

Prerequisite(s): LAT 001; or equivalent.

Learning Activities: Lecture 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LAT 003 – Intermediate Latin (5 units)

Course Description: Continuation of LAT 002. Selected readings from Latin authors.

Prerequisite(s): LAT 002; or equivalent.

Learning Activities: Lecture 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LAT 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

LAT 100 – Readings in Latin Prose (4 units)

Course Description: Review of Latin morphology, grammar, and vocabulary.

Readings in prose authors, including Julius Caesar.

Prerequisite(s): LAT 003; or equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LAT 101 – Livy (4 units)

Course Description: Livy.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 102 – Roman Comedy (5 units)

Course Description: Roman comedy.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 103 – Vergil: Aeneid (4 units)

Course Description: Vergil: Aeneid.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 104 – Sallust (4 units)

Course Description: Sallust.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 105 – Catullus (4 units)

Course Description: Catullus.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 106 – Horace: Odes & Epodes (4 units)

Course Description: Horace: Odes & Epodes.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 108 – Horace: Satires & Epistles (4 units)

Course Description: Horace: Satires & Epistles.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 109 – Roman Elegy (4 units)

Course Description: Roman elegy.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 110 – Ovid (4 units)

Course Description: Translation and discussion of selected readings from the works of Ovid.

Prerequisite(s): LAT 100; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) with consent of instructor and when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

LAT 112 – Cicero (4 units)

Course Description: Translation and discussion of selected readings from the works of Cicero.

Prerequisite(s): LAT 100; or equivalent.

Learning Activities: Recitation 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) with consent of instructor and when readings differ.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 115 – Lucretius (4 units)

Course Description: Lucretius.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 116 – Vergil: Eclogues & Georgics (4 units)

Course Description: Vergil: Eclogues & Georgics.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 118 – Roman Historians (4 units)

Course Description: Readings in Latin from one or more of the major Roman historians and biographers. Authors may include Sallust, Nepos, Livy, Tacitus, Suetonius, and Ammianus Marcellinus.

Prerequisite(s): LAT 100; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

LAT 119 – Readings in Republican Latin Literature (4 units)

Course Description: Translation and discussion of selected readings from Republican Latin literature.

Prerequisite(s): LAT 100; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

LAT 120 – Readings in Imperial Latin Literature (4 units)

Course Description: Readings in Imperial Latin literature.

Prerequisite(s): LAT 100; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

LAT 121 – Latin Prose Composition (4 units)

Course Description: Intensive grammar and vocabulary review through exercises in Latin prose composition.

Prerequisite(s): LAT 100; or equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LAT 122 – Early Christian Writers (4 units)

Course Description: Latin style of selected early Christian writers. Topics may include: Latin translations of Greek and Hebrew scriptures, Christian Latin, with focus on North Africa, Palestine, or Spain; High literary Christian Latin; Christian Latin oratorical style.

Prerequisite(s): LAT 100 (can be concurrent); or consent of instructor.

Learning Activities: Extensive Writing, Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

LAT 124 – Post-Vergilian Latin Epic (4 units)

Course Description: Readings from Post-Vergilian Latin epic. Study of Lucan's Bellum Civile, Silius Italicus' Punica, Valerius Flaccus' Argonautica, and/or Statius' Thebaid and Achilleid.

Prerequisite(s): LAT 100 (can be concurrent); or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s); Extensive Writing.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

LAT 125 – Medieval Latin (4 units)

Course Description: Selected readings from the Vulgate and various medieval authors provide an introduction to the developments in the Latin Language and literature from the 4th to the 15th centuries.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

LAT 130 – Readings in Late Latin (4 units)

Course Description: Translation and discussion of selected readings from late imperial-early medieval Christian and pagan literature.

Prerequisite(s): LAT 100; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

LAT 135 – Themes in Latin Literature (4 units)

Course Description: Readings in Latin that trace a theme across times, genres, and authors.

Prerequisite(s): LAT 100 (can be concurrent); or consent of instructor.

Learning Activities: Extensive Writing, Lecture/Discussion 3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

LAT 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

LAT 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

Law (LAW)**School of Law****LAW 200 – Introduction to Law (1 unit)**

Course Description: Introduction to basic concepts of the law, the historical roots of common law and equity, the precedent system in its practical operation, the modes of reasoning used by courts and attorneys, and the fundamentals of statutory interpretation.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 200A – U.S. Legal System Seminar (LL.M.) (2 units)

Course Description: History and fundamental principles of the United States legal system. Important current legal issues, developments and trends. Required for LL.M. students who have not attended a U.S. law school. Fall semester only.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 200D – American Legal Concepts I (LL.M.) (3 units)

Course Description: Designed to provide basic skills necessary to succeed in both law school and legal practice.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture.

Enrollment Restriction(s): Restricted to LL.M. students.

Grade Mode: Letter.

LAW 200E – American Legal Concepts II (LL.M.) (3 units)

Course Description: Designed to provide basic skills necessary to succeed in both law school and legal practice.

Learning Activities: Lecture.

Enrollment Restriction(s): Restricted to LL.M. students.

Grade Mode: Letter.

LAW 200L – Lawyering Process Lab (0 units)

Course Description: Lab which accompanies Lawyering Skills course for first-year law students.

Learning Activities: Laboratory.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 200S – Lawyering Process (2 units)

Course Description: Hone interactive lawyering skills needed for effective transactional and litigation work, including client interviewing and negotiation. Learn the role that interpersonal skills play in effective lawyering and contemplate the professional identity they wish to cultivate.

Learning Activities: Discussion.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 201 – Property (4 units)

Course Description: Study of doctrines and concepts of property law with primary emphasis on real property. Coverage includes: the estates in land system; the landlord-tenant relationship, conveyancing, and private and public land use control.

Prerequisite(s): AAS 010; LAW 200A; or consent of instructor.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

LAW 202 – Contracts (4 units)

Course Description: Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts or fails to adjust to changing social demands.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

LAW 203 – Civil Procedure (5 units)

Course Description: Study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes.

Learning Activities: Discussion 5 hour(s).

Grade Mode: Letter.

LAW 204 – Torts (4 units)

Course Description: Familiarizes students with legal rules, concepts and approaches pertinent to the recovery for personal injuries, property damages and harm done to intangible interests.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

LAW 205 – Constitutional Law I (4 units)

Course Description: Principles, doctrines and controversies regarding the basic structure of and division of powers in American government. Specific topics include judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among the branches of the federal government.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

LAW 206 – Criminal Law (3 units)

Course Description: Study of the bases and limits of criminal liability. Coverage of the constitutional, statutory, and case law rules which define, limit, and provide defenses to individual liability for the major criminal offenses.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 207 – Legal Research & Writing I (2 units)

Course Description: Integrated legal research and writing skills course taught by Wydick Fellowship Program faculty. Basic legal research resources and strategies are introduced and practiced. Fall semester.

Learning Activities: Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

LAW 207A – Legal Research (LL.M.) (1 unit)

Course Description: Description of the evolution and use of sources of law and secondary authority.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to LL.M. students only.

Grade Mode: Letter.

LAW 207B – Advanced Legal Research (2 units)

Course Description: Introduction to advanced legal research tools and techniques used in practice.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to 35 students.

Grade Mode: Letter.

LAW 207C – California Civil Procedure Research (1 unit)

Course Description: Includes lectures and in-class exercises working with print, and electronic, legal research materials to prepare responses to various fact patterns. Extensive use of real-world case scenarios to mimic conditions likely encountered by legal practitioners. Half of the course time is lecture; half is in-class practical assignments or discussion designed to enhance the students' understanding of the concepts introduced.

Prerequisite(s): LAW 207; LAW 208.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 207D – Intellectual Property Research (1 unit)

Course Description: Includes lectures and in-class exercises working with print, and electronic, legal research materials to prepare responses to various fact patterns. Extensive use of real-world case scenarios to mimic conditions likely encountered by legal practitioners working in the intellectual property legal practice.

Prerequisite(s): LAW 207; LAW 208.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 207E – Transactional Law Research (1 unit)

Course Description: Introduction to tools and research strategies needed for the practice of transactional law. Learn the methods, databases, and specialized materials available for transactional law research..

Learning Activities: Practice 1 hour(s).

Grade Mode: Letter.

LAW 208 – Legal Research & Writing II (2 units)

Course Description: Focuses on persuasive writing and oral advocacy. Complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief, with oral arguments by all students.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 208A – Legal Research & Writing II (LL.M.) (2 units)

Course Description: Persuasive writing and oral advocacy. LL.M. students complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief with oral arguments.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 208E – Introduction to U.S. Legal Methods A (3 units)

Course Description: Designed to provide foreign students with background skills at a more basic level than U.S. Legal Methods A and B. Audit carefully selected courses in the regular curriculum and complete assignments related to those courses.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture.

Enrollment Restriction(s): Restricted to LL.M. students.

Grade Mode: Letter.

LAW 208F – Introduction to U.S. Legal Methods B (LLM) (3 units)

Course Description: Designed to provide foreign students with background skills at a more basic level than U.S. Legal Methods A and B. Audit carefully selected courses in the regular curriculum and complete assignments related to those courses.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar.

Enrollment Restriction(s): Restricted to LL.M. students.

Grade Mode: Letter.

LAW 208G – U.S. Legal Methods A (LL.M.) (3 units)

Course Description: Designed to provide foreign and other students with background skills necessary to succeed in both law school and legal practice.

Learning Activities: Lecture.

Enrollment Restriction(s): Restricted to LL.M. students.

Grade Mode: Letter.

LAW 208H – U.S. Legal Methods B (LL.M.) (3 units)

Course Description: Description of the evolution and use of sources of law and secondary authority.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 208M – LL.M. Legal Essay Writing A (2 units)

Course Description: Improve legal writing skills with a focus on law school essay exams. Focuses on the following skills: 1) how to understand the goals of a US law school exam and the expectations of the professor; 2) how to structure an answer logically; 3) how to write clearly; 4) how to explain reasoning and discuss complex legal issues. Experiential class.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 208N – LL.M Legal Essay Writing B (2 units)

Course Description: Improve legal writing skills with a focus on bar essay exams. Focuses on the following skills: 1) How to understand the goals of a US bar; 2) How to structure an answer logically; 3) How to write clearly; 4) How to explain reasoning and discuss complex legal issues. Experiential class.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 209A – Patent Law (3 units)

Course Description: Covers all essential aspects of patent law, including: prosecution, post-grant proceedings, patentable subject matter, utility, enablement & description, novelty, statutory bars, nonobviousness, infringement, and remedies.

Prerequisite(s): LAW 274; or consent of instructor.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 209B – Patent Prosecution & Practice (2 units)

Course Description: Examines core requirements and strategies for drafting and prosecuting a patent application before the U.S. Patent & Trademark Office. Interact with real inventors and US PTO examiners to gain the experience of getting a patent issued.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 209BP – Patent Prosecution Practicum (2 units)

Course Description: Analyze if an invention is directed to patentable subject matter, identify prior art, analyze patentability, and draft and electronically file a provisional patent application with the US Patent & Trademark office.

Prerequisite(s): Patent Law as pre-requisite or co-requisite.

Learning Activities: Lecture/Laboratory.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

LAW 209C – Patentable Subject Matter: Genes, Methods, & Software (2 units)

Course Description: In-depth look at recent cases and debates behind genetic patenting, software; business models; diagnostic methods, and others. Reviews the crucial and rapidly evolving field of patent law which affects some of the most important hi-tech industries.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 209DT – Innovation Law (2 units)

Course Description: Explores range of legal issues that innovation lawyers face, from establishing a start-up to high stakes technology mergers & acquisitions, to data protection and privacy, protecting intellectual property through strategic patent litigation.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 209E – Patent Litigation (1 unit)

Course Description: Introduces the basics of Patent Law and examines the U.S. patent enforcement system. Learn how a patent litigation proceeds, focusing on both pre- and post-trial proceedings and examines substantive patent laws.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

LAW 209G – Privacy, Technology, & the Law (2 units)

Course Description: Seminar evaluates the privacy law issues that arise from technological advancements and data trade transactions. Likely topics that the course will cover include the Internet of Things and legal responses to privacy related problems, such as the European General Data Protection Regulation and the California Consumer Privacy Act of 2018.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 209T – Innovation & Technology Transfer Seminar (2 units)

Course Description: From biomedicine to cleantech, public institutions are playing leading roles in developing cutting-edge technologies. Explores the law and policy of publicly-supported innovation and technology transfer.

Prerequisite(s): LAW 209A or LAW 274, recommended but not required.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to 15 students.

Grade Mode: Letter.

LAW 210 – Reforming the Police & Criminal Justice (2 units)

Course Description: Focus on major current issues: policing ethnic neighborhoods; use of deadly force; modernizing the work of prosecutors and defense counsel.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited to 25 students.

Grade Mode: Letter.

LAW 210A – Privatization of Criminal Justice Seminar (2 units)

Course Description: Analyze the legal, historical, and sociological aspects of the growing private sector provision of criminal justice services traditionally assumed by government, including prisons, policing, and adjudication.

Prerequisite(s): Prior social theory or criminal procedure knowledge not required; completion of LAW 227A strongly recommended.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to 10 students.

Grade Mode: Letter.

LAW 210B – Law of Policing (2 units)

Course Description: What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police sometimes intrude upon interests considered fundamental to free societies.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 210C – Sexual Assault & the Law (2 units)

Course Description: Criminal law of sexual assault, traditional and modern offenses, and proposals for reform. Discussion of procedural developments, victim's counsel, evidentiary reform, and ADR. Implications for civil law, tort liability, Title VI, Title IX, and civil liability of perpetrators.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 210D – Comparative Criminal Justice (2 units)

Course Description: Explores ways political units in different countries attempt to maintain social order and advance criminal justice.

Examine people, policies, and institutions responsible for adjudicating alleged criminal law violations around the globe, learning how rules of professional responsibility and legal ethics guide the behavior of institutional actors who participate in criminal processes. Engage in research, formal presentations, and produce a publishable final paper.

Prerequisite(s): LAW 227A recommended, but not required.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 210DT – Wrongful Convictions (2 units)

Course Description: Explore the magnitude and complexity of the wrongful convictions, their causes and remedies under existing law, and possible fixes (reforms). Emphasizes relevant legal rules (Criminal Procedure, Evidence, Post-Conviction Review).

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 210ET – Race, Mass Incarceration & Policing (2 units)

Course Description: Explores key issues in the historical development and the current state of modern American imprisonment, policing structures, and the criminal justice system in relation to race.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 210F – Restorative Justice (2 units)

Course Description: Explore both the theory and practice of restorative justice as an alternative approach to the retributive justice model of our current criminal law system and many other institutions.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 210FA – Aoki Center Restorative Justice Practicum I (2 units)

Course Description: Part one of a two-part practicum. Learn about restorative justice principles and practices, receive training in restorative justice facilitation, and participate in and lead restorative justice circles in Davis & Sacramento schools, Yolo County Juvenile Hall, and other venues.

Learning Activities: Seminar.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 210FB – Aoki Center Restorative Justice Practicum II (2 units)

Course Description: Part two of a two-part practicum. Learn the principles and practices of restorative justice, receive training in restorative justice facilitation, participate in & conduct restorative justice circles with young people in Davis & Sacramento schools and the Yolo County Juvenile Hall.

Learning Activities: Seminar.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 210G – Aoki Center Restorative Justice Practicum (2 units)

Course Description: Learn about restorative justice principles and practices, receive training in restorative justice facilitation, and participate in and lead restorative justice circles in Davis & Sacramento schools, Yolo County Juvenile Hall, and other venues.

Learning Activities: Fieldwork.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 210H – Aoki Federal Court Amicus Project (3 units)

Course Description: Work on actual federal criminal cases in the Ninth Circuit Court of Appeals and United States Supreme Court. File briefs amicus curiae on critical issues, and develop research, writing, and oral advocacy skills.

Prerequisite(s): LAW 219; LAW 227A; both required or consent of instructor.

Learning Activities: Project.

Grade Mode: Letter.

LAW 210J – Best Practices for Justice Seminar: Advocates Working to Improve the Criminal Justice System (2 units)

Course Description: The Criminal Justice System continues to evolve as perceptions regarding judges, police officers and criminal attorneys change. Analyzes how our sense of justice is formed and what it looks like in the actual practice of criminal law.

Prerequisite(s): LAW 206; LAW 227A (can be concurrent).

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 210K – Sexual Assaults in the Criminal Justice System (2 units)

Course Description: Focuses on the criminal prosecution and defense of sexual assaults, from reporting to sentencing, through examination of pertinent criminal statutes, evidence code sections, jury instructions, court documents and specific case studies.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 210M – Criminal Justice in the Era of Prison Downsizing (2 units)

Course Description: Learn about how different parts of the criminal justice system work and to consider practical solutions to addressing crime in a context where the emphasis on incarceration is declining.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 210N – Aoki Conviction & Sentence Integrity Practicum (3 units)

Course Description: Review individual cases for District Attorney offices for possible Prosecutor-Initiated Resentencing (PIR), a post-conviction remedy designed to address excessive sentences, reduce mass incarceration, and advance racial justice.

Learning Activities: Fieldwork.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Letter.

LAW 210P – Post-Conviction Practicum (3 units)

Course Description: King Hall Post-Conviction Practicum students learn to effectively represent indigent and incarcerated individuals in the post-conviction process, with an emphasis on direct appeals in the California Court of Appeal and/or the California Supreme Court.

Learning Activities: Lecture/Laboratory.

Grade Mode: Letter.

LAW 210Q – Advanced Aoki Criminal Justice Practicum (3 units)

Course Description: Students who completed one semester of the Criminal Justice Practicum will work on claims of innocence, wrongful conviction, and other miscarriages of justice. Students will draft papers for prosecutors' offices, will make formal internal presentations, and possibly appear in court.

Prerequisite(s): LAW 210N.

Learning Activities: Practice.

Grade Mode: Letter.

LAW 211 – Negotiations (2 units)

Course Description: Skills course teaches theoretical and empirical approaches to negotiation strategy for the purposes of making deals and resolving disputes. Participate in simulations to hone their negotiation skills, and write analytical papers.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 211A – Advanced Negotiations Strategy & Client Counseling (3 units)

Course Description: Understand the dynamics of interviewing and counseling process. Designed to be relevant to a broad spectrum of negotiation problems that are faced by legal professionals.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 3 hour(s).

Enrollment Restriction(s): Application course; must apply and secure professor approval to enroll; will involve participating in discussions and a series of simulations; your classmates will be counting on you to actively participate and be well prepared for every simulation; do not apply to take this course unless you are willing and able to participate fully and can accept constructive feedback; if you anticipate missing more than two class sessions, do not apply to take this course.

Grade Mode: Letter.

LAW 211B – International Business Negotiations (3 units)

Course Description: Structured around a simulated negotiation exercise with students from a similar class at Stanford Law School. Experience the development of a business transaction over an extended negotiation in a context that replicates actual legal practice.

Prerequisite(s): LAW 215 (can be concurrent); prior or concurrent enrollment in Business Associations (LAW 215) required; prior enrollment in Negotiations (LAW 211) and/or International Business Transactions (LAW 270) preferred.

Learning Activities: Lecture/Discussion.

Grade Mode: Letter.

LAW 211C – Negotiating Joint Ventures (2 units)

Course Description: Business negotiation and dispute resolution strategies through simulations, reading, and writing assignments.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 211D – Treatymaking: International Agreement Negotiations (3 units)

Course Description: Negotiation simulation intended to produce a multinational convention on a subject to be determined that is timely and meaningfully contributes to the real-world discourse. Begins with lectures/discussions of the fundamentals of treaty law. Followed by the class seeking Circular-175 authorization to enter into negotiations, and a variety of written and oral exercises/simulations leading to eventual conclusion of a multinational instrument.

Learning Activities: Lecture/Discussion.

Grade Mode: Letter.

LAW 212A – Medical Liability Law & Policy (2 units)

Course Description: Considers the many ways in which society seeks to establish and maintain quality in patient care.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 213A – Transnational Criminal Law (3 units)

Course Description: Examines the laws responses to a particular aspect of globalization, transnational crime. Explore the phenomenon of transnationality and how it affects the power of nation-states, acting alone or together, to prosecute certain crimes.

Prerequisite(s): LAW 205; LAW 206.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 213T – Terrorism & International Law (2 units)

Course Description: International terrorism remains a pressing concern. Devising effective remedies for responding to it within the bounds of the law is critical. The new generation of international lawyers needs to be familiar with the relevant law and standards.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 214 – Tax Issues Related to Estate Planning (2 units)

Course Description: Tax issues Related to estate planning.

Prerequisite(s): LAW 221 recommended.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 214A – Migration, Work, & Taxation (2 units)

Course Description: Explores workers' and prospective workers' choices to move from one place to another, both across and within national borders. In particular, explores how tax policy and broader economic forces shape those choices.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 215 – Business Associations (4 units)

Course Description: Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms.

Learning Activities: Discussion 4 hour(s).

Enrollment Restriction(s): Not open to students who have previously taken LAW 215C.

Grade Mode: Letter.

LAW 215A – The Law of Corporate Governance Seminar (2 units)

Course Description: Advanced issues in the governance of publicly held corporations. Separation of ownership and control and how the law has addressed this issue at the theoretical level and in the context of topics such as the duties of corporate directors, shareholder voting rights, and competition among states to attract corporate charters.

Prerequisite(s): LAW 215.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 215B – Corporate Integrity & Responsibility (2 units)

Course Description: Equips future business lawyers with the legal knowledge and technical skills to better understand, the U.S., European and Asian (select jurisdictions) regulatory responses to ethical and socially responsible corporate governance practices. Instruction seeks to re-define the aim of corporate governance as a tool to address efficiency, reduce agency costs and improve access to capital, as well as an emerging anti-corruption tool and a means to ensure more ethical corporate behavior.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 215C – Business Associations (3 units)

Course Description: Provides a broad survey of the legal rules and concepts applicable to business associations, both public and closely held. Principal attention given to the corporate form of organization, although partnerships and other associational forms are also treated briefly.

Learning Activities: Lecture.

Enrollment Restriction(s): Students who take this course are ineligible for LAW 215.

Grade Mode: Letter.

LAW 215D – Business in Society (3 units)

Course Description: The pandemic, racial injustice, income inequality, and climate change have heightened the demands for companies to minimize their negative externalities. Explore how these stakeholder demands are shifting business practices, and transforming corporate law.

Prerequisite(s): LAW 215 (can be concurrent).

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

LAW 215E – Business Law & Climate Change (3 units)

Course Description: Climate change is redefining corporate law. Through case studies of the business and investment community, we will explore the intersection of business law and climate risk and discuss and debate how the climate crisis is impacting traditional corporate law paradigms.

Prerequisite(s): LAW 215 (can be concurrent); or LAW 215C (can be concurrent).

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

LAW 215F – Comparative Corporate Governance (3 units)

Course Description: Fundamentals of corporate governance. 2023 version of the G20/OECD Principles of Corporate Governance. Anglo-American, European, Asia Pacific, African, Latin American, and Emerging Countries systems. Global challenges and corporate governance.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

LAW 215G – Modern Topics in Business Law: Business Law Seminar (2 units)

Course Description: Exposure to recent developments in business law, with a focus on key developments in corporate law, securities, and antitrust. The subjects of inquiry will draw from issues at both the frontier of academic research and legal practice.

Prerequisite(s): LAW 215 or LAW 215C.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 215H – Corporate Risk Management & Compliance (2 units)

Course Description: Introduction into governance, risk management and compliance in business organization. Focuses on common legal and regulatory frameworks underpinning compliance programs and will use recent case studies to examine effective and failed compliance programs.

Prerequisite(s): LAW 215 (can be concurrent)

Learning Activities: Discussion, Seminar.

Grade Mode: Letter.

LAW 215S – Special Session Business Associations (4 units)

Course Description: Provides a broad survey of the legal rules and concepts applicable to business associations, both public and closely held.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

LAW 216A – Law & Religion (2 units)

Course Description: Federal constitutional law relating to religion; the interpretation and application of the Free Exercise Clause and the Establishment Clause of the First Amendment.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to 20 students.

Grade Mode: Letter.

LAW 217 – Insurance Law (2 units)

Course Description: Covers the following topics: I. Insurance Law and Society, II. The Impact of Insurance, III. Contract Law Foundations, IV. First-Party Insurance, V. Liability Insurance: Coverage Issues, VI. Liability Insurance: Relationship Issues.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 217A – Comparative Telecommunications Law (2 units)

Course Description: Explores the key issues facing policy-makers in designing telecommunications regulatory systems (e.g. licensing, universal service, economic regulation, relationship with antitrust law), and the various ways in which different jurisdictions have chosen to address these issues.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 218 – Constitutional Law II (4 units)

Course Description: Principally covers the First Amendment and the Equal Protection Clause.

Learning Activities: Discussion 4 hour(s).

Enrollment Restriction(s): Not open to students who have completed LAW 218A or LAW 218B.

Grade Mode: Letter.

LAW 218A – Constitutional Law II: Equal Protection (2 units)

Course Description: Focuses on the Equal Protection Clause of the Fourteenth Amendment.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Not open to students who have previously taken LAW 218, or who plan to take LAW 218 for 4 units; students enrolled in LAW 218A given priority registration in LAW 218B.

Grade Mode: Letter.

LAW 218B – Constitutional Law II: First Amendment (3 units)

Course Description: Covers the Free Speech, Free Exercise, and Establishment Clauses of the First Amendment. It will examine permissible limits on free speech, the government's obligation to accommodate religious exercise, and the separation of church and state.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Not open to students who have previously taken LAW 218, or who plan to take LAW 218 for 4 units.

Grade Mode: Letter.

LAW 218C – Critical Perspectives on Equal Protection (1 unit)

Course Description: Discussion-based course focusing on academic articles, drawn from critical race and critical gender traditions, that examine the doctrine covered in LAW 218A. Choice and sequence of readings are tied to those assigned in LAW 218A.

Prerequisite(s): Must be taken concurrently with LAW 218A; or consent of instructor if previously taken LAW 218 or LAW 218A.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

LAW 218D – Constitutional Theory Seminar (2 units)

Course Description: Provides students with a broad understanding of the shape of modern constitutional theory, and the ability to understand the implications of that theory for concrete historical and modern constitutional disputes.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 218E – Direct Democracy in California (3 units)

Course Description: Study initiative, referendum, and recall, their impact on law and policy in California, and how they can be improved. While learning how they work in practice, examine significant initiatives and recent attempts at recalling elected officials.

Prerequisite(s): LAW 205.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 218ET – California Constitutional Law (2 units)

Course Description: Reviews, interpretive meta-rules for constitutional construction, structure and institutions of state government, civil liberties under the Declaration of Rights, the impact of race in California society, and criminal law.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 218F – Implicit Bias & the Law: Modern Forms of Discrimination (2 units)

Course Description: Provides an opportunity to analyze modern forms of discrimination, learn about cutting edge developments in this area, and explore effective ways to address these issues through the law.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 218T – Selected Topics in Constitutional Law (2 units)

Course Description: Examines two core themes of Constitutional Law I and Federal Jurisdiction: federalism and separation of powers. Concentrates on habeas corpus and the Eleventh Amendment as vehicles for examining the constitutional themes in greater depth.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 218TA – Separation of Powers (2 units)

Course Description: Study of the separation of powers in our federal government by focusing on certain historical events and their impact on constitutional law.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 218TB – Law of War (3 units)

Course Description: Surveys the law of armed conflict as it applies to today's battlefields.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 218TC – Antidiscrimination Law (4 units)

Course Description: Offers an overview of federal constitutional and statutory anti-discrimination law in the United States.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

LAW 219 – Evidence (4 units)

Course Description: Rules regarding the admissibility of testimonial and documentary proof during the trial of civil and criminal cases.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

LAW 219A – Advanced Evidence (3 units)

Course Description: Public interest lawyers often spend much time in the courtroom. Prosecution, defender, and legal aid offices usually don't have resources to train lawyers in trial work. Seeks to help remedy this deficiency by helping develop witness interrogation skills.

Prerequisite(s): LAW 219.

Learning Activities: Discussion 3 hour(s).

Enrollment Restriction(s): Limited to six students; selected by professor. Interested students complete an application form; available in the Law Registrar's Office. Credit is contingent on attending all classes and participating in all exercises. Participation is crucial to the success of the course, as students will be working in teams of three. Do not take this course unless you are willing and able to participate fully and can accept criticism.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 219B – E-Discovery & Digital Evidence (2 units)

Course Description: Examines the interplay between the significant e-discovery rules and case law, and the process of electronic discovery, beginning with the duty to preserve electronically stored information (ESI), to the search, identification, collection, review and production of ESI in litigation.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 219C – Evidence (4 units)

Course Description: Covers rules regarding the admissibility of proof during civil & criminal cases, including rules governing relevancy, hearsay, the examination & impeachment of witnesses, expert opinion, and constitutional & statutory privileges.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

LAW 220 – Federal Income Taxation (4 units)

Course Description: Surveys the federal income tax system, with consideration of the nature of income, when and to whom income is taxable, exclusions from the tax base, deductions and credits, and tax consequences of property ownership and disposition.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 220A – State & Local Taxation (3 units)

Course Description: Introduction to fundamentals of state and local taxation. Beginning with historical and constitutional aspects, analyze recent developments in state and local taxation and their impact on client representation.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 220B – Tax & Distributive Justice (3 units)

Course Description: Explores tax policy as public finance, politics, special interests, and a reflection of society's biases and priorities. Underscores that tax is constructed and contingent, and exposes students to a generation of "critical tax" scholarship.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 220BT – Law of Banking & Financial Institutions (2 units)

Course Description: Guide to dual regulatory system, and an understanding of banks and other financial institutions, such as thrifts, credit unions, industrial banks, finance companies, and money transmitters, as well as large versus community banks.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 220C – Tax Controversy & Procedure (2 units)

Course Description: Focuses on the practical and procedural aspects of tax controversy before state and federal tax authorities.

Prerequisite(s): LAW 220 recommended.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 221 – Trusts, Wills & Estates (3 units)

Course Description: Basics of intestate succession and the creation and interpretation of wills and trusts under the Uniform Probate Code and the California Probate Code.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 221A – Practical Skills in Will & Trust Drafting & Administration (2 units)

Course Description: Provides the skills to practice law in the area of estate planning and probate/trust administration. Follow an estate planning client and draft actual estate plan documents. A series of related topics will be explored.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 222 – Critical Race Theory Seminar (3 units)

Course Description: Examines race relations and racial discrimination in America through the perspectives of proponents of the Critical Race Theory (CRT) movement, a collection of legal scholars who challenge both conservative and liberal political orthodoxies.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 222A – Latinos & the Law (2 units)

Course Description: Explores how the U.S. legal system has treated Latinos in areas such as education, immigration, employment and voting rights.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 222B – Asian Pacific Americans & Law (3 units)

Course Description: Examines how American Law has shaped Asian Pacific American demographics, experiences, and status in American society.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 222CT – Anti-Corruption Law in India (2 units)

Course Description: Addresses the impact of large corruption scandals on long term social trust, in light of Indian coal block and 2G spectrum allocation scandals.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 222D – Race & Law (2-3 units)

Course Description: Examines major cases, statutes and events in U.S. law dealing with non-whites, including African Americans, Asian Pacific Americans, Indigenous People, and Latinx People, and the present effects of discrimination.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

LAW 223 – Estate Planning Seminar (2 units)

Course Description: Selected topics in the estates and trusts area. Content varies with instructor.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 224 – Animal Law Seminar (2 units)

Course Description: An introduction to legal principles affecting animals and their use.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 225 – California Community Property (2 units)

Course Description: Covers the California community property system, including the property rights of marital and registered domestic partners during the ongoing relationship, and upon the end of the relationship by death or divorce.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 226 – Disability Rights Law (3 units)

Course Description: Examines disability law and theory. Devoted to the Americans with Disabilities Act (particularly Titles I, II, and III) as it applies to employment, education, public accommodations, and government services and programs.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 226ET – Mental Disability Law (3 units)

Course Description: Examine the civil and constitutional bases of mental disability law, as well as its history, and explore the role of mental disability in the policing and criminal trial process.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

LAW 227A – Criminal Procedure (3 units)

Course Description: Federal constitutional limits on government authority to gather evidence and investigate crime. Topics include Fourth Amendment limits on search, seizure, and arrest; the Fifth Amendment privilege against self-incrimination; and the Sixth Amendment right to counsel.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 227B – Advanced Criminal Procedure (3 units)

Course Description: Examines a range of issues, including bail, charging decisions, preliminary hearings, discovery, statute of limitations, venue, joinder and severance, pleas, plea bargaining, assistance of counsel, trial, double jeopardy, sentencing, appeal and collateral remedies.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 227C – Topics in California Criminal Practice (2 units)

Course Description: Advanced criminal law and procedure class aimed at students planning to practice criminal law in California, either as an extern or summer clerk, or after graduation.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 228 – Startups & Venture Capital (3 units)

Course Description: Introduction to the various legal and business considerations involved in forming and operating an emerging growth business.

Prerequisite(s): LAW 215; must be completed, prerequisite will not be waived.

Learning Activities: Lecture/Discussion.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 228A – Mergers & Acquisitions (3 units)

Course Description: Practical approach to mergers and acquisitions, with an in-depth look at the planning, negotiation, documentation and completion of mergers and acquisitions.

Prerequisite(s): LAW 215.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 228B – Accounting for Lawyers (2 units)

Course Description: Exposure to basic principles of accounting, from the perspective of the practicing attorney.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 228C – Law & Statistics (3 units)

Course Description: Introduction to fundamentals of statistical analysis and how statistical analysis is used in the law and public policy. Goal is to assist in becoming excellent consumers of statistical information and evidence.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 229 – Scientific Evidence (3 units)

Course Description: In addition to examining the evidence law governing the admission of scientific testimony, considers trial advocacy in presenting and attacking such testimony.

Prerequisite(s): LAW 219.

Learning Activities: Discussion 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 230 – International Environmental Law (3 units)

Course Description: Considers the challenge of addressing global environmental problems in a system characterized by multiple sovereign governments, the regulatory limitations of U.S. law, and the basic structure and principles of international environmental law.

Prerequisite(s): Prior course work in environmental law and/or international law is helpful.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 230A – Wine & the Law (1 unit)

Course Description: Surveys the legal landscape of this multi-billion dollar industry, focusing on contemporary debates and developments in judicial, legislative, and administrative arenas.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 230B – Sustainability Law (2 units)

Course Description: Covers research and practice of "environmental law" to show it is too narrow to adequately address 21st century needs.

"Environmental law" often emphasizes public governance interventions without addressing pollution reducing opportunities that lay with private environmental governance. Explores how the legal profession can accelerate progress in addressing the climate crisis by expanding the study of "environmental law" into the broader and more applicable "sustainability law".

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 230C – California Environmental Cases & Places (3 units)

Course Description: Focuses on a four-day trip to world-class teaching locations throughout California. Approaches the locations from two distinctly different perspectives: law and environmental science. Learn hands-on water, environmental, and public lands law.

Learning Activities: Fieldwork.

Grade Mode: Letter.

LAW 230T – Free Trade & the Environment (2 units)

Course Description: Examines the relationship between legal rules relating to trade and rules for the protection of the environment.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 231 – Race, Gender & Inequality Seminar (2 units)

Course Description: Examines gender and race and how they are constructed, contested, and regulated within legal, legislative, and juridical frameworks. Includes interdisciplinary theoretical perspectives across legal, sociolegal, and feminist studies. Topics include education, criminal justice, political representation, health and reproductive rights, privacy, civil rights.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 231A – Gender, Sexuality, & the Law (3 units)

Course Description: Examines the legal and social regulation of sexuality and gender.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 231B – Military Justice and Social Change: Race, Gender, and SOGI (2 units)

Course Description: The U.S. military has laws tailored to the mission. As society changes, these laws can limit or promote change. Explore race, gender, and LGBTQ identity through military law and analyze where the military promoted and hindered change.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 231C – Gender & Name Change Practicum (2 units)

Course Description: Preparation to participate in Gender & Name Change Project. Assist clients with the legal name and gender change process under attorney supervision. Includes skills building and discussion of the ways that law impacts gender identity.

Prerequisite(s): LAW 231A recommended.

Learning Activities: Clinical Activity 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

LAW 232 – Real Estate Finance (2 units)

Course Description: Examination of the problems involved in the acquisition, financing, and development of real estate, and of lender remedies and debtor protections in the event of debtor default. Stresses the practical application of California legal doctrines.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 232AT – Real Estate Transactions (2 units)

Course Description: Review of legal issues in the purchase, sale, financing of residential real estate in US, with non-exclusive focus on California. Roles of parties involved, mechanisms of financing and security, survey of remedies, and role of mortgage lending beginning in 2008.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 232T – Property Law & Race (2 units)

Course Description: Seminar explores the extent to which property law (common law, federal, state, and local statutes, and administration regulations) historically impacted and currently shapes conceptions of race, racial groups, and racial relations.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 233 – Asylum & Refugee Law (3 units)

Course Description: Seminar covers some of the bedrock legal principles that have informed U.S. asylum and refugee laws, policies and practices in the last 50 years.

Prerequisite(s): LAW 235 LAW 292 recommended.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 233B – Comparative Forced Displacement (2 units)

Course Description: Focuses on five case studies involving the plight of five people who have been forced to flee their homes either due to civil or international wars or based on significant internal human rights violations or climate change.

Prerequisite(s): LAW 233 and human rights law are recommended.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 234 – Drug Law & Policy (2 units)

Course Description: Engage with the wide variety of policy and legal issues presented in the area of drug law and policy with a particular focus on one of the fastest-evolving fields in drug policy: marijuana law and policy.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 235 – Administrative Law (3 units)

Course Description: Examines how the U.S. Constitution and the federal Administrative Procedure Act constrain and regulate decision making by government agencies and officials.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 235B – Counseling & Legal Strategy in the Digital Age (2 units)

Course Description: Explores the complex challenges that entrepreneurs, businesses, and other organizations face when trying to address legal issues relating to technology. Approach is both practical and multidisciplinary. Encourages exploring the roles of a wide range of stakeholders (including lawyers, policy advocates and policymakers, businesspersons, and technologists) in developing legal and business strategies.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 235C – Advanced Topics in Administrative Law (2 units)

Course Description: Explore several topics in administrative law (e.g., nondelegation, deference, and judicial vacatur) that have faced increased scrutiny from members of the Supreme Court in recent years, and will assess the arguments for and against revisiting them.

Prerequisite(s): Recommended that students complete LAW 235 Administrative Law before enrolling in this seminar.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 236 – Securities Regulations (3 units)

Course Description: Regulation of the distribution of securities under the Securities Act of 1933 and SEC Rules adopted there under, registration and reporting provisions of the 1934 Securities Exchange Act.

Prerequisite(s): LAW 215 (can be concurrent) or LAW 215C (can be concurrent) recommended.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 236A – Securities Regulation I (2 units)

Course Description: Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms.

Prerequisite(s): LAW 215; or consent of instructor.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 236B – Securities Regulation II (2 units)

Course Description: Securities Exchange Act of 1934 and the regulation of securities markets. Topics covered include regulation of securities markets and securities professionals, responsibilities of securities lawyers, continuous reporting, transnational securities fraud, and enforcement of the securities acts.

Prerequisite(s): LAW 215; or consent of instructor; LAW 236A recommended.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 236C – Securities Enforcement (3 units)

Course Description: Examines the civil and criminal enforcement of the securities laws by both the Securities and Exchange Commission and Justice Department. Surveys the administrative rules and investigative procedures that govern the SEC and the substantive related crimes.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 237 – Legal History (2 units)

Course Description: Traces the development of the common law from its origins in medieval England through the 20th century.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 237B – Special Topics in Legal Theory: Ancient Athenian Law (2 units)

Course Description: Athenian legal system was different from our own and was far less formal. How did it work? Why did it work? Why have political and legal theorists misunderstood Athens for so long and what can we learn from that failure?

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 239 – Mediation (3 units)

Course Description: Interactive focus on attorney representation of clients in mediation.

Learning Activities: Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Restricted to 24 students.

Grade Mode: Letter.

LAW 239A – Federal Court Mediation (2 units)

Course Description: Fundamental mediation skills through both lectures and hands-on simulation practice. Students will consider the challenges of working with sophisticated parties with entrenched positions, and will consider the role of irrationality.

Learning Activities: Practice 2 hour(s).

Grade Mode: Letter.

LAW 240 – Reforming Campaign Finance Law & the Initiative Process (2 units)

Course Description: Recent elections exposed many campaign finance and initiative issues. Focuses on reforms as well as current law.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Limited to 25 students.

Grade Mode: Letter.

LAW 240A – Law of the Political Process (3 units)

Course Description: Covers many of the foundational issues in the "law of democracy," as that body of statutory and constitutional law has developed in the United States.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 241 – Voting Rights Seminar (2 units)

Course Description: Seminar explores the right to vote under the U.S. Constitution.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 241A – Election Law: Voting Rights (2 units)

Course Description: Investigate the right to vote as a matter of constitutional and statutory law. Covers the Warren Court cases that established the right to vote as a fundamental right under the Equal Protection clause; the emergence and transformation of the right of racial minorities to an "undiluted" vote under the Equal Protection clause and the federal Voting Rights Act; and the limits of the non-dilution principle, as reflected in partisan gerrymandering cases.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 241B – Election Law: Campaign Finance, Political Speech, & Rights of Political Association (2 units)

Course Description: Investigate constitutional and statutory frameworks that channel and regulate the efforts of individuals, corporate & nonprofits, and political groups to convey their ideas to the electorate, to mobilize voter turnout, and to get their preferred candidates on the ballot and elected to office. Examine the legal status of contributions and expenditures of money and other goods. Consider political groups' "internal" affairs, the selection of nominees, and the ballot.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 241C – Presidential Elections & the Constitution (2 units)

Course Description: Examines the process of selecting Presidents of the United States within the structure created by the U.S. Constitution and federal and state law. Explore cases, statutes, academic commentary and reform proposals, among other things.

Prerequisite(s): LAW 205; LAW 218 recommended.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 242 – Conflict of Laws (2 units)

Course Description: Study of how law operates across state and national borders. Topics include choice of applicable law in transactions involving multiple jurisdictions, recognition of judgments, and the exercise of jurisdiction.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 243 – Commercial & Bankruptcy Law (4 units)

Course Description: Remedies available to creditors to force payment, along with devices that creditors may use to give themselves priority against limited assets. Bankruptcy both as a means for providing funds for creditors and as a device for maximizing asset value.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

LAW 243A – Secured Transactions (2 units)

Course Description: Covers secured transactions (where a lender takes an interest in the debtor's property as "collateral," or security, for repayment of a loan) in personal property, such as auto loans and bank loans against business inventory.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 243B – Bankruptcy (3 units)

Course Description: Introduction to essentials of U.S. law governing bankruptcy of consumers and businesses. Addresses bankruptcy under Chapter 7, Chapter 11, and Chapter 13.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 243C – Advanced Bankruptcy Practice: Corporate Reorganization (2 units)

Course Description: Corporate chapter 11 bankruptcy under the Federal Bankruptcy Code and alternatives to corporate bankruptcy. Selection of venue. Formation of strategic objectives. Analysis of different professionals' roles.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 245 – Corporate & White Collar Crime (2 units)

Course Description: Covers the law of conspiracy, corporate criminal liability, mail & wire fraud, the Hobbs Act, RICO, money laundering, obstruction of justice, and other white collar crimes and their associated defenses.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 245A – Corporate Responsibility: Case Studies in (Un)Ethical Leadership (2 units)

Course Description: Explores corporate responsibility and leadership through case studies of contemporary scandals. Reviews business forms and the consequences of an institution failing to comply with legal & ethical duties to employees, shareholders, and the public.

Prerequisite(s): LAW 215 (can be concurrent).

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 245B – Death Penalty Seminar (2 units)

Course Description: Offers overview of the constitutional law governing the death penalty in the United States.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 245C – White Collar Investigations & Prosecutions (2 units)

Course Description: Explore a fictional white-collar crime, learning how to establish probable cause through cooperative witnesses; search warrants, the utilization of informants, and indemnity agreements will be analyzed. Learn about indictments, complaints, laws surrounding arrests, bail hearings, evidentiary suppression motions, and grand jury indictments.

Prerequisite(s): LAW 227A recommended.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 246 – Federal Jurisdiction (3 units)

Course Description: Study of subject-matter jurisdiction of federal courts.

Prerequisite(s): LAW 205.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 246A – California Civil Procedure: A Practical Approach (2 units)

Course Description: Provides a practical, hands-on approach to California Civil Procedure through case studies, drafting of common litigation documents, and studying the application of the Code of Civil Procedure to practical case scenarios. Issues of general civil litigation emphasizing bar exam topics are included.

Prerequisite(s): LAW 203.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 247 – Taxation of Partnerships & LLCs (3 units)

Course Description: Study of the federal income tax treatment of partnerships and partners; including entities classified as partnerships.

Prerequisite(s): LAW 220.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

LAW 247A – International Taxation (3 units)

Course Description: Major topics include worldwide taxation as applied to individuals (immigrants); source of income definitions in American tax law; concepts in inbound taxation, e.g., U.S. taxation of foreign persons; outbound taxation, e.g., U.S. taxation of foreign income.

Prerequisite(s): LAW 220 (can be concurrent); completion or current enrollment in a course covering the domestic taxation of corporations is suggested but not required; LAW 247B can be concurrent.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 247B – Corporate Tax (3 units)

Course Description: Examination of the federal income tax relationship between corporations and their owners. Covers the transfer of funds into a corporation on formation and the re-transfer of money and property from the corporation to its shareholders.

Learning Activities: Discussion/Laboratory.

Grade Mode: Letter.

LAW 247C – Taxation of Business Entities (4 units)

Course Description: Introduction to federal income taxation of business entities.

Prerequisite(s): LAW 220; prerequisite will not be waived.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

LAW 248 – International Law (3 units)

Course Description: Fundamentals of public international law in the context of contemporary world affairs, and vice versa. Provides an essential foundation for further study or for practice in any area of international law or transnational law.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 248A – Jurisdiction in Cyberspace Seminar (2 units)

Course Description: Review concepts in international law, conflicts of law, cyberlaw, and federal jurisdiction to address the growing multi-jurisdictional conflicts created by the Internet. Examine European efforts at crafting intra-Europe jurisdictional rules, as well as other international jurisdiction treaty projects such as those at the Hague.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 248B – Human Rights in Context (2 units)

Course Description: Overview of the theory and practice of human rights law. Requirements include weekly discussion responses, a seminar paper, and active class participation.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 248C – Business & Human Rights (2 units)

Course Description: Explores the human rights responsibilities of businesses from legal, ethical, historical, and comparative perspectives.

Equips students with the tools to be sensitive to human rights considerations as legal practitioners or in other fields of endeavor.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 248CA – United Nations Human Rights Practicum I (2-3 units)

Course Description: Opportunity to work in support of the mandate of the United Nations Special Rapporteur in the field of cultural rights.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

LAW 248CB – United Nations Human Rights Practicum II (2-3 units)

Course Description: Build on the knowledge of the workings of the United Nations human rights system they gained in Practicum I, and gain further advanced experience working with UN documents, with individual cases in the field and with thematic reports.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

LAW 248D – Globalization & the Law (3 units)

Course Description: Globalization of people, finance, goods, services, and information puts pressure on the nation-state form. In a world of diasporas and multinational corporations, what does citizenship mean?

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 248ET – Transitional Justice & Memory Politics in the Asia-Pacific (2 units)

Course Description: Transitional justice (legal responses to wrongdoings of repressive predecessor regimes) can help resolve "memory politics" that plague the relations and societies of many Asia-Pacific states. Examine relevant roles of governments, novel institutions, the judiciary, and civil society.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 248G – Legal Spanish for U.S. Lawyers (2 units)

Course Description: Designed for law students who are native Spanish-speakers or who have achieved proficiency in Spanish through study or experiences in a Spanish-speaking country.

Prerequisite(s): Must satisfy one of the following: undergraduate degree in Spanish; a minor in Spanish with experience living in a Spanish-speaking country; grew up in a Spanish-speaking household and achieved proficiency; able to pass an informal assessment by the instructor.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 248T – Advanced International Law (2 units)

Course Description: Review books of international law; Hugo Grotius and Judge Rosalyn Higgins. Themes include peaceful resolutions of dispute, law of war and peace, and international legal process.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 248TA – Human Rights in Post Soviet Central Asia: Legal Tools For Repression & Redress (2 units)

Course Description: Provides a historical context for the current political and human rights situation in Central Asia.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 248TC – International Economics Law (3 units)

Course Description: Examine the architecture of the international economic system, with a focus on both trade and investment.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 248TT – Theories of International Law (2 units)

Course Description: International law, once critiqued as powerless and ineffective, is now challenged as a threat to American democracy.

Introduction to competing theories of international law, including natural law, positivism, realism, liberalism, constructivism, fairness, legal process, and world public order.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 249 – Comparative Law (2 units)

Course Description: Uses of comparative method, principal differences between common law and civil law and the styles of legal reasoning that prevail in these two great legal cultures. Topics include the evolution of the civil law, the phenomenon of codification, the structure of European civil codes and the interpretation of their provisions, the respective roles of counsel, judges and law teachers, civil law procedure, and the analysis of selected areas of substantive law. Knowledge of a foreign language is not required.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 249A – First Gen Experience in Scholarly & Popular Literature (3 units)

Course Description: Provides an opportunity for students who are first in their family to go to college, or first in their family to go to law school, to reflect on their own educational journeys and to see how their trajectory of formal education is similar to and/or different from the journeys of famous First Gen lawyers, e.g., Barack Obama and Sonia Sotomayor. Principles of memoir writing used to guide student writing.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 250 – Jurisprudence Seminar (3 units)

Course Description: Deals principally with the question of how judges should decide "hard cases," where the content of the law is in doubt and competent arguments have or could be offered for mutually inconsistent decisions in favor of either party.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 250A – Aoki Legal Scholarship Seminar (3 units)

Course Description: For students participating in the Aoki Center for Race and Nation Studies' Immigration Law Journal. Research, and write a note on a topic related to immigration. Expectation is production of papers of publishable quality.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 250B – Advanced Writing Workshop (1 unit)

Course Description: Second- and third-year students produce a piece of academic writing that satisfies the King Hall writing requirement and is of publishable quality. Receive feedback both from the instructor and from one another in a workshop setting.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 250T – Asian American Jurisprudence (3 units)

Course Description: Legal, social, and political discourse on race relations has traditionally been framed in Black-White terms. Disrupts the traditional view by taking Asian Americans seriously.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 251 – Labor Law (3 units)

Course Description: Survey of the legislative, administrative, and judicial regulation of labor relations under federal law. Historical development of labor law, the scope of national legislation, unions, strikes, picketing, and collective bargaining agreements.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 251B – Labor Law Practicum (1-2 units)

Course Description: Develop a theoretical and practical understanding of the labor movement, and the ways in which lawyers support and interact with the movement. Placed in labor organizations, labor-related law firms, and non-profits, students gain experience with different aspects of labor organizing, labor campaigns, and collective bargaining.

Prerequisite(s): LAW 251 (can be concurrent).

Learning Activities: Practice 2 hour(s).

Grade Mode: Letter.

LAW 252 – International Litigation & Arbitration (3 units)

Course Description: Current developments in international law, conflict of laws, civil procedure, arbitration, and comparative law in the context of transactions and disputes that cut across national boundaries.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 252A – Introduction to Criminal Litigation; Pre-Trial (2 units)

Course Description: Utilizes experiential learning techniques to teach advocacy skills during the life of a criminal case and simulates critical stages of the proceedings by conducting mock hearings throughout the semester.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 253 – Policy Advocacy (2 units)

Course Description: In-depth examination of the legislative process both within the California Legislature and from the advocates' perspective.

Train in key policy advocacy skills by legislative leaders and social justice advocates.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 253A – Community Lawyering (3 units)

Course Description: Study the need for community lawyering including the structural inequalities and privileges embedded in the legal system and society. Skills necessary for community lawyering as well as sites and models for practice will be examined.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 253B – International Public Interest Law and Advocacy (3 units)

Course Description: Simulation course introduction to the applied legal and policy skills necessary to become effective lawyers and advocates in the international public interest/nongovernmental organization community.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 254 – Housing Law (2 units)

Course Description: Survey course covers legal and policy issues related to developing, protecting and preserving affordable, safe and accessible housing and sustaining viable, diverse communities.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 254A – Law & Rural Livelihoods (3 units)

Course Description: Seminar considers rural manifestations of various legal, social and economic issues. Survey various subfields of legal study; e.g., criminal justice, poverty, environment and land use, local government, family, constitutional, agricultural, access to justice, as they relate to the rural-urban continuum. Debate rurality as an aspect of identity and consider its intersections with race, gender, sexuality, (dis)ability and other identity variables.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 254B – Access to Justice (2 units)

Course Description: Study of a variety of barriers that impede the access of unrepresented litigants to the courts—including poverty, racial bias, limited English proficiency and the digital divide—and critically examine existing solutions. Opportunity to develop and propose student's own solution to an access barrier.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 254C – White Working Class & the Law (2 units)

Course Description: Considers the social, cultural, economic, and legal situation of low-income and/or low-education whites in contemporary U.S. society.

Learning Activities: Seminar.

Enrollment Restriction(s): Students who have taken LAW 254A previously are not eligible for this course.

Grade Mode: Letter.

LAW 255 – Pension & Employee Benefits Law (3 units)

Course Description: Federal regulation and taxation of private pensions and employee benefits. Covers the Employee Retirement Income Security Act (ERISA) and Internal Revenue Code issues.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 256 – Land Use (2 units)

Course Description: Local agencies, developers, environmental interest groups, and others who regularly deal with the administrative and legislative applications of land use planning and development laws.

Topics include zoning, general plans, local government land use regulation, and related areas of litigation. Expanding role of the California Environmental Quality Act.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 257 – Legislative Process (2 units)

Course Description: Fundamental elements of the legislative process, including legislative procedure; the legislature as an institution; lobbying; statutory interpretation, legislative-executive relations; and the legislature's constitutional powers and limitations.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 257A – Legislative Intent Seminar (2 units)

Course Description: Theories and principles of statutory and constitutional interpretation. Original intent vs. living constitution; permissible kinds of evidence for determining legislative intent; canons of construction; extent to which initiatives should be interpreted similarly to legislative enactments.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 257B – Statutory Interpretation (3 units)

Course Description: Elective course for Environmental Law Certificate Program. Provides an introduction to the theory and practice of statutory interpretation.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 257C – Applied Statutory Interpretation: California's Housing-Framework Legislation (3 units)

Course Description: Theory and practice of statutory interpretation, taught using California statutes that address local barriers to housing supply. Writing intensive.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 257D – Legislative Drafting (2 units)

Course Description: Legislative Drafting provides practical experience in researching, analyzing, and drafting all legislative measures in the State of California, including bills, resolutions, and constitutional amendments.

Prerequisite(s): LAW 257 recommended.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 258 – Professional Responsibility (3 units)

Course Description: The ABA's Model Rules of Professional Conduct and the Code of Judicial Conduct, which are tested on the MPRE, and the California Rules of Professional Conduct, which are tested on the California Bar Examination.

Learning Activities: Discussion.

Enrollment Restriction(s): Closed to students who have taken LAW 258A.

Grade Mode: Letter.

LAW 258A – Legal Ethics & Organizational Practice (3 units)

Course Description: Explores ethics rules governing the legal profession, including state Rules of Professional Conduct (RPCs) and the ABA Model Rules of Professional Conduct. Discern how the various RPCs differ, and we apply them to real-life situations.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Closed to students who have taken LAW 258 or 258H.

Grade Mode: Letter.

LAW 258B – Mindfulness & the Law (2 units)

Course Description: Reviews the American Bar Association's Model Rules of Professional Conduct and the Code of Judicial Conduct, as tested on the Multistate Professional Responsibility Examination, and covers California Rules of Professional Conduct, which are tested on the California Bar Examination.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 258C – Conscious Lawyering (1 unit)

Course Description: Introductions to the practice of conscious lawyering. Includes concepts in professional and personal identity, self-awareness, focus, emotional intelligence, cultural and personal values, mindfulness, meditation, and mind-body connection.

Learning Activities: Practice 2 hour(s).

Grade Mode: S/U only.

LAW 258CT – The Business of Lawyering (2 units)

Course Description: Desired outcome is a thorough understanding of the business side of law practice and to promote an understanding of the relationship and balance between legal skills, business requirements of a practice, client needs and a work-life balance.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 258D – Starting & Managing a Small Law Practice (2 units)

Course Description: Using real practice examples, in this discussion/simulation-based course learn how to open and successfully run a small law practice. Included topics: structure and organization, office set-up, billing, fees, time management, client handling, overseeing office staff, trust accounting, and ethical rules.

Learning Activities: Discussion.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 258DT – Setting Up & Maintaining Solo Law Practice (1 unit)

Course Description: Introduction/overview of how to start a successful solo practice.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

LAW 258E – Utility of Law School & Careers in the Law (1 unit)

Course Description: Despite improvements in the economy, some observers continue to question whether law school is a viable option for college graduates. Considers the controversy and expose students to the variety of careers in the legal profession.

Learning Activities: Lecture.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 258F – Practice Ready Seminar (2 units)

Course Description: Includes a discussion and review of the role of the junior attorney within a law firm/legal department, professional goal-setting, strategies for effective communication and work within teams, delegation and resource management, organization and time management, an introduction to common junior-level assignments and how to complete them efficiently and effectively, building a professional network, and an introduction to business development, among other topics.

Learning Activities: Seminar.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 258G – Business Fundamentals for Lawyers (3 units)

Course Description: Surveys accounting and financial statements, basic financial concepts (e.g., time value of money), business valuation, capital markets, and major transaction types. Should help with other business law courses and be useful for communicating with business clients.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 258H – Professional Responsibility (2 units)

Course Description: Ethical duties of lawyers in a variety of different contexts. Examines topics such as client control over the major decisions in a case, the duty of zealous advocacy, representation of organizations, and the unique role of government attorneys. Covers the American Bar Association's Model Rules of Professional Conduct and the California Rules of Professional Conduct, which are tested (respectively) on the MPRE and the California Bar Exam.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Students who take this course are ineligible for Law 258 and Law 258A.

Grade Mode: Letter.

LAW 259 – Feminist Legal Theory (2 units)

Course Description: Provides an overview of feminist legal theory and considers how its various strands inform legislative and judicial law making. Satisfies Advanced Writing Requirement.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 259A – Women, Islam & the Law (2 units)

Course Description: Study legal and religious reform movements for women's rights within Muslim communities in the context of current scholarly and political debates about fundamentalism, democracy, equality, secularism, universalism, and multiculturalism.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment seminar.

Grade Mode: Letter.

LAW 259B – Women's Human Rights (2 units)

Course Description: Overview of international legal and institutional system for the protection of women's human rights from an academic perspective and the view of the practitioner. Includes the (CEDAW), violence against women, sexual and reproductive rights, economic rights, and more.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 259P – Women & the Law Practicum (1 unit)

Course Description: Complements the content of the feminist legal theory course by providing the opportunity to consider how feminist theory may be used to inform law-making.

Prerequisite(s): LAW 259 (can be concurrent).

Learning Activities: Discussion/Laboratory.

Grade Mode: Letter.

LAW 260 – Employment Discrimination (3 units)

Course Description: Examination of federal laws prohibiting employment discrimination.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 260A – Employment Law (3 units)

Course Description: Covers the rights of individual employees other than those covered in the Employment Discrimination or Labor Law courses.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 261 – Judicial Process (2 units)

Course Description: Examines a variety of issues concerning the judicial process. Focus is on judge's role in the legal process, the administration of justice, ethical issues, decision making, bias, and critical examination of the strengths and weaknesses in our current judicial system.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 261A – Comparative Judicial Process (2 units)

Course Description: Comparative law course focused on judicial institutions and judicial decision-making around the world.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

LAW 262 – Antitrust (3 units)

Course Description: Focus on the federal antitrust laws, concentrating on basic substantive areas of the Sherman and Clayton Acts.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 262AT – US Antitrust Law & Indian Competition**Law: A Comparative Perspective (2 units)**

Course Description: Fundamental principles of Indian Competition Law and US Antitrust Law in a comparative perspective. Helps American students, interested in future corporate law careers, to develop effective strategies for better managing cross border deals in India.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

LAW 262B – Regulated Industries (2 units)

Course Description: Examines regulation of business in sectors, traditionally described as "common carrier" and "utility" industries, where because of market failures normal competitive mechanism will not protect consumers from exercises of market power.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 262C – Antitrust & Intellectual Property (1 unit)

Course Description: Explores the challenges antitrust law faces in protecting the innovation incentives of dynamic technology-led market competition, motivating and incentivizing companies to innovate and allowing them to retain the profits of such market growth.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 263 – Criminal Trials: Theory & Practice (3 units)

Course Description: Trial advocacy centered on client relationship building, preparation for trial, and courtroom practice.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 263A – Trial Practice (3 units)

Course Description: Introduction to the preparation and trial of cases, featuring lectures, videotapes, demonstrations, assigned readings and forensic drills. Laboratory held on Tuesday, Wednesday, and Thursday evening.

Prerequisite(s): LAW 219 (can be concurrent).

Learning Activities: Discussion 2 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 263B – Advanced Trial Practice (2 units)

Course Description: Train on the organization and presentation of a complex trial, including pretrial preparation, jury selection, strategy considerations, evidentiary issues, and effective handling of plaintiff and defense cases through verdict.

Prerequisite(s): LAW 219; LAW 263A.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Class limited to 40 students.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 263C – Voir Dire: Theory & Practice (1 unit)

Course Description: Teaches (1) the law that restricts and supports jury selection in criminal law trials, (2) the most effective methods of engaging in jury selection, (3) how to think critically and strategically about voir dire questioning and juror challenges.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: S/U only.

LAW 264 – Water Law (3 units)

Course Description: Property rights in surface waters, including riparian rights, prior appropriation, and public rights use of water bodies; environmental constraints on exercise of water rights; groundwater rights and management; federal allocation and control of water resources; legal aspects of interstate allocation.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 264A – Ocean & Coastal Law (3 units)

Course Description: Introduction to the goals and challenges of coastal and ocean policy; the complicated web of public and private interests in coastal lands and ocean waters; regulation of coastal development; domestic and international fisheries management; and preservation of ocean resources.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 265 – Natural Resources Law Seminar (2 units)

Course Description: In-depth coverage of two foundational principles of natural resources law: public trust doctrine and private property rights protected under the Takings Clause of the U.S. and many state constitutions.

Prerequisite(s): LAW 285 or LAW 256 recommended, but not required.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to 15 students.

Grade Mode: Letter.

LAW 266 – Commercial Law (3 units)

Course Description: Survey of commercial transactions law under the Uniform Commercial Code (UCC). Covers a number of topics under Articles 2, 3, & 9 of the UCC. Topics include attachment and perfection of security interests in personal property and general principles of negotiability. Primary goals are to provide a foundational knowledge and understanding of several articles of the UCC and improve problem-solving skills in this area.

Prerequisite(s): LAW 202.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 266A – Cyberlaw (2 units)

Course Description: Examines from a globalized perspective a broad range of internet governance issues, ranging from free speech, hate speech, defamation, copyright, intermediary liability, administrative censorship online, online anonymity, privacy, data protection, etc.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

LAW 266B – Artificial Intelligence & the Law (1 unit)

Course Description: Looks at AI's seemingly infinite possibilities and discusses where should the legal boundaries begin and end. Core lecturing centers on the NIST AI Risk Management Framework and the proposed EU AI Regulation requirements.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Letter.

LAW 267 – Civil Rights Law (2 units)

Course Description: Civil remedies for civil rights violations under the primary United States civil rights statute. Specifically, covers actions for constitutional and statutory violations under 42 USC §1983, affirmative defenses, and abstention doctrines.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 267C – DFEH Civil Rights Practicum (4-7 units)

Course Description: Yearlong practicum (4-7 units/semester) has (1) weekly two-hour in-class lectures and case review, and (2) student participation in DFEH investigations (fall) and mediations (spring). Gain experience analyzing and applying the Fair Employment and Housing Act (FEHA).

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 268A – Blockchain & the Law: Introduction for Lawyers (2 units)

Course Description: Student-led review of blockchain/distributed ledger technology (dlt) and its impact on law and transactions, from the basic functioning of a blockchain to the implication of smart contracts in areas such as cryptocurrencies, decentralized autonomous organizations, and self-sovereign identity.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 268T – Suing the Government: Civil Rights, Torts, Takings, & More (2 units)

Course Description: Explores the basic requirements of suing government, including sovereign immunity, particular schemes for litigating against government (Federal Tort Claims Act, APA, False Claims Act, etc.), direct constitutional claims and the procedural pitfalls and remedies available against government.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 269 – Basic Finance for Lawyers (2 units)

Course Description: Basic techniques of analysis that are part of the core curriculum in a good business school. Gives background necessary for understanding and advising your clients and for understanding other business-related law school courses.

Prerequisite(s): Students with a non-law basic finance course will not be admitted, except with consent of instructor.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 269AT – The Financial Crisis: Law & Policy & Inequality (2 units)

Course Description: Examines the regulation of financial intermediaries. Stated goal of regulation is to ensure systemic stability and to pursue consumer protection. Question asked whether there is an imbalance between systematic stability and consumer protection before the crisis of 2008.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 269B – Consumer Protection & Financial Regulation (3 units)

Course Description: Examines laws seeking a “fair” financial marketplace, including markets for consumer credit, residential mortgages, and student lending through Consumer Financial Protection Bureau; disclosure; and prohibitions on unfair, deceptive, and abusive acts.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 269C – Corporate Finance (3 units)

Course Description: Focus on how corporations raise money, stocks and bonds, etc.; how deals are structured and why corporations use one strategy instead of another.

Prerequisite(s): LAW 215 or concurrent enrollment recommended.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 269D – Seminar on Financial Regulation (2 units)

Course Description: Introduction to the legal and regulatory issues presented by contemporary capital markets.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 269E – Public Finance (2 units)

Course Description: Introduction to the basic concepts of public finance, the underlying law governing public finance: in particular state law, federal tax law and federal securities law.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 269F – Fintech Innovation & Financial Inclusion (2 units)

Course Description: Focuses on fintech innovation and financial inclusion. Explores how fintech is transforming traditional financial services and providing new opportunities and challenges for financial inclusion.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 270 – International Business Transactions (2 units)

Course Description: Select legal problems arising from international business transactions.

Learning Activities: Lecture/Discussion.

Grade Mode: Letter.

LAW 270A – Life-Cycle Transactions & Drafting (2 units)

Course Description: Focuses on analysis of contract drafting design for various types of transactions and actual transactional documents typically encountered.

Prerequisite(s): Business Associations and/or Trusts, Wills Estates are recommended for enhanced comprehension.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 270B – Technology Transactions (2 units)

Course Description: Practical overview of technology transactions, including licensing. In addition to substantive lectures, instruction via hypotheticals and scenarios to illustrate key issues in these transactions, drafting exercises, negotiation exercises, and group presentation exercises.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 270C – Contract Drafting & Development (3 units)

Course Description: Complete complex contracts. Learn various approaches to completing contracts (from term sheet to final document) and complete exercises and assignments to hone contract skills. Build a “contract skills toolbox” with the tools needed for completing and drafting contracts.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 270D – Transactional Lawyering Skills: Contract Drafting for Tech (2 units)

Course Description: Skills-based course applies legal concepts to client counselling and drafting of effective business documents with emphasis on the tech industry. Solve problems, analyze risk, and draft contracts in a real-world context.

Learning Activities: Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

LAW 271 – Nonprofit Organizations & Drafting (4 units)

Course Description: Learn special legal rules and concepts applicable to non-profit organizations; particularly IRC 501(c)(3) nonprofits. Combination skills class and lecture class.

Prerequisite(s): LAW 215; or consent of instructor.

Learning Activities: Extensive Writing/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to 13 students.

Grade Mode: Letter.

LAW 271A – NonProfit Organizations: State & Local Governance Issues (2 units)

Course Description: Focuses on the state and local laws applicable to nonprofit organizations; i.e., public interest, cultural, religious, educational and other not-for-profit entities.

Prerequisite(s): LAW 215 (can be concurrent); or consent of instructor.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 271B – Nonprofit Organizations: Tax Exemptions & Taxation Focus (2 units)

Course Description: Focuses on the conceptual basis and substantive law criteria for the federal and state income tax exemption of nonprofit organizations.

Prerequisite(s): LAW 215; or consent of instructor; LAW 220 recommended.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 271T – Nonprofit Organizations-Key Legal Topics (2 units)

Course Description: Legal issues raised in operating and governing a nonprofit organization, primarily a public charity.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 272 – Family Law (3 units)

Course Description: Introduction to the legal regulation of the family.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 273A – Education Policy & the Law (3 units)

Course Description: Education law and policy, focusing in particular on efforts to use the law and policy to improve educational outcomes for disadvantaged children.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 273B – Special Education Law & Policy (2 units)

Course Description: Introduction to the law of special education including the Individuals with Disabilities in Education Act (IDEA), Section 504 of the Rehabilitation Act, and federal regulations governing special education law.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 274 – Intellectual Property (3 units)

Course Description: Provides a broad survey of intellectual property law. Areas covered include trade secrets, patents, copyrights, and trademarks. Examines legal doctrine as well as the theories and policies animating the intellectual property system.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 274A – International Intellectual Property & Development (2 units)

Course Description: Examines international trade law, national customs law, intermediary liability rules, claims for rights in traditional knowledge and genetic resources, protections for geographical indications, technology transfer, and intellectual property piracy.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 274B – Trade Secrets (2 units)

Course Description: Focuses on the law of trade secrets, including the DTSA, the UTSA, current case law developments, and the overlap between trade secret laws and employment laws. No technical background required.

Prerequisite(s): LAW 274; or consent or instructor; prior coursework in property, torts, evidence, and contracts recommended.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 274CT – Knowledge Commons, Collaborative Authorship, Open Access (2 units)

Course Description: Focuses on the increasingly global diffusion and success of collaborative forms of cultural and technoscientific production rooted in copyright-based licenses.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 274D – Intellectual Property in Historical Context Seminar (2 units)

Course Description: How the legal system has adapted to earlier periods of rapid change by creating, delimiting, and expanding intellectual property rights (IPRs). Required paper satisfies advanced writing requirement.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 274ET – Intellectual Property, Human Rights & Social Justice (2 units)

Course Description: Examine the implications of copyright and patents for a broad set of social justice values, with particular emphasis on the interaction between intellectual property law and human rights law on the global stage.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 274FT – Censorship in the Global Age (2 units)

Course Description: Examines from a globalized perspective a broad range of censorship issues, drawing from established cases and practices. This seminar attempts to identify a globally consistent set of theories that have gained traction in relevant regional or international debates.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 274GT – Race, National Identity & Intellectual Properties (2 units)

Course Description: Drawing upon methods taken from critical race theory, critical/cultural studies, and rhetoric this course addresses the relationships between intellectual properties and processes racial/national identity formation in the US, particularly as exemplified in legal, popular cultural, and political texts.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 274H – Theory & History of Intellectual Property (2 units)

Course Description: Seminar traces development of intellectual property law in the U.S. and Europe because it is not possible to understand the logic and shape of current Intellectual Property concepts outside of their messy history.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 274J – Current Controversies in Intellectual Property Law (2 units)

Course Description: Examine controversial topics in intellectual property law and policy across a wide range of issues, from technology to the arts, to social justice, in their national and international dimensions.

Learning Activities: Seminar.

Grade Mode: Letter.

Course Description: Examines the international regulation of intellectual property rights and explores the place of the United States in the international IP community. Discusses international treaties and legal harmonization efforts, legislation and case law from different jurisdictions, and the role of technology.

Prerequisite(s): Completion or simultaneous enrollment in Copyright and/or Intellectual Property.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 275 – Complex Litigation in a Civil Rights Context (2 units)

Course Description: Study of the issues that frequently arise in large complex litigation involving multiple parties and multiple claims.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 275B – Federal Courts for Civil Rights Litigators (2 units)

Course Description: Tackles the complex strategic questions facing civil rights litigators. Evaluated cases include Floyd v. City of New York, Dukes v. Wal-Mart, and others. includes guest speakers involved in these cases.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 275TA – Intellectual Property Agreement Drafting for Biotech & Pharma (2 units)

Course Description: Covers the negotiation and drafting of intellectual property agreements common in the biotechnology and pharmaceutical arena.

Prerequisite(s): Upper division Business Law course or Intellectual Property course; priority given to students that have completed LAW 274.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 276 – Juvenile Justice Process (2 units)

Course Description: Legal and philosophical bases of a separate juvenile justice process for crimes committed by minors. The role of counsel at each phase of the process is examined.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

LAW 276A – Child Welfare & the Law (2 units)

Course Description: Focuses on the welfare and legal rights of children, especially the most at risk in society, including those in foster care and victims of crime and civil torts. Learn the substantive law of juvenile dependency and the special duties of lawyers representing children in dependency and civil cases, as well as child witnesses in criminal cases.

Prerequisite(s): Constitutional Law I (required); Family Law (recommended); Juvenile Justice (recommended).

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 276B – Children & the Law (3 units)

Course Description: Examines the unique status of children in our legal system, focusing on the juvenile legal system and the child welfare system. Additional topics include the rights of children, psychology of adolescence, representing children, international perspective.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

LAW 277 – Federal Indian Law (3 units)

Course Description: Focuses on legal relations between Native American tribes and the federal and state governments.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 277A – Tribal Justice (2 units)

Course Description: Examines the administration of justice within tribal governments and courts and the efforts of advocates to achieve justice for tribes through litigation, policy advocacy, public education, organizing, and inter-governmental collaboration.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 277T – Indian Gaming Law Seminar (2 units)

Course Description: Examines unique historical, political and legal context in which Indian tribes operate casinos, including impacts on tribal sovereignty, relations between tribes, states and local governments and changing relationships among the tribes themselves members, with particular reference to experience of California.

Learning Activities: Seminar 20 hour(s).

Grade Mode: Letter.

LAW 278 – Pretrial Skills (2 units)

Course Description: Sharpen pretrial lawyering skills through readings, discussion, role-playing exercises, videotaped simulations, and related projects. Emphasis on client interviewing, witness interviewing and depositions. Some simulations conducted outside class sessions.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 279 – Legal Analysis (2 units)

Course Description: Focus on skills critical to law school success, and ultimately, bar exam success; skills include effective case reading, briefing, outlining, and exam writing. Receive individualized feedback on each of their written assignments.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to second-year law students only.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 280 – Advanced Legal Writing: Analytical & Persuasive Writing (2 units)

Course Description: Develop essay writing skills typically employed on the bar examination. Receive feedback on written work and learn analytical and persuasive writing skills transferable to the bar exam and legal practice.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to third-year Law students only.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 280B – Problem Solving & Analysis (2 units)

Course Description: Skills focused on the development of legal analytical and organizational methods essential to successful completion of the Performance Test component of the California Bar Exam (and other states), and, by extension, to success in the practice of law.

Learning Activities: Lecture.

Enrollment Restriction(s): Restricted to third-year Law students only.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 281 – State & Local Government Law (3 units)

Course Description: Introduction to the law governing the relations between local governments and states.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 282 – Energy Law (2 units)

Course Description: Explores the history, law, and public policy of energy regulation in the United States, emphasizing economic and environmental regulation. Competitive restructuring of the natural gas and electric utility industries is emphasized. Basic regulatory schemes for other energy sources—hydroelectric power, coal, oil, and nuclear power—are explored depending on class interest.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

LAW 282A – Renewable Energy Seminar (2 units)

Course Description: Provides a broad overview of renewable energy law and policy with a particular focus on the California policy context. Topics include renewable electricity, California's renewable portfolio standard, and project development.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 283 – Remedies (2 units)

Course Description: Survey of modern American civil remedies law in both private and public law contexts. Topics include equitable remedies, equitable defenses, contempt power, injunctive relief, restitution, and money damages in torts and contracts.

Learning Activities: Lecture/Discussion.

Grade Mode: Letter.

LAW 284 – Law & Economics (3 units)

Course Description: Introduction to the economic analysis of law. Prior study of economics is not required.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 285 – Environmental Law (4 units)

Course Description: Introduction to environmental law, focusing primarily on federal law.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

LAW 285A – California Environmental Issues (2 units)

Course Description: The "Nation-state" of California has for many years been a national and global leader in environmental law and policy. Survey of key California environmental law and policy issues.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 285B – Environmental Practice (3 units)

Course Description: Examines underlying theory and practice in securing compliance with our major environmental laws.

Prerequisite(s): LAW 285 recommended.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 285BT – Food Justice (2 units)

Course Description: Focus on the law and policy of the emerging "food justice movement," which combines the goals and principles of the environmental justice movement with some of the policy initiatives involved in "ethical consumption" and "sustainable agriculture" movements.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 285C – Food Systems Law & the Environment (2 units)

Course Description: Explores the various legal structures surrounding the governance of our food system; we will cover environmental regulation (or lack thereof), food safety laws, trade laws, and labor laws.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 285D – Farmworkers & the Law (2 units)

Course Description: Provides an overview of California and federal laws impacting farmworkers and how such laws have been applied to regulate working conditions in agriculture.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 285E – Climate Change Law & Policy (3 units)

Course Description: Addresses the legal and public policy dimensions of climate change, perhaps the most important environmental issue of our time.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 285F – Environmental Justice (2 units)

Course Description: Introduction to the field of environmental justice.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 285H – Comparative Environmental Law (2 units)

Course Description: Focus on Pacific Rim, examining factors, similarities/differences in countries environmental regulation and success of environmental law. Including information and market-based regulatory approaches; compliance and enforcement gaps; citizen and community mobilization; the role of legal institutions; variations in regulatory style.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 285J – Drafting a Solar Farm Bill Practicum (2 units)

Course Description: Drafting a Solar Farm Bill is a practicum in which the class acts as an advisory law firm for its client, a solar farm bill solution and its facilitator, the educational non-profit Climate Solutions Advocacy Institute (CSAI). The class objective is to provide the client with a white paper that can advise CSAI in its development of a massive solar farm bill, financed by green bonds.

Prerequisite(s): LAW 285 recommended (can be concurrent).

Learning Activities: Discussion 2 hour(s).

Grade Mode: S/U only.

LAW 285K – Biodiversity Law (2 units)

Course Description: Covers the law of biodiversity, with a focus on the laws of the United States, including both science and federal, state, and local policies. Graded based on short response papers and participation in class discussions.

Prerequisite(s): LAW 285 recommended.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Letter.

LAW 285TA – Environmental Law Seminar: Emerging Technologies & the Environment (2 units)

Course Description: Examines legal regimes that might apply to various emerging technologies and consider governance mechanisms and reforms that might enable more foresighted and participatory development and management of technology.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 286 – Health Care Law (3 units)

Course Description: Law and policy issues in health care financing and access to health care. Use current events as well as cases, statutes and regulations. Contextualize issues to surface role of structural, institutional, and cultural inequalities.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 286A – Topical Issues in Health Law (2 units)

Course Description: Focuses on four-six issues at the interface of law, medicine, bioethics, and health policy that are currently the subject of major litigation, legislation, and/or contentious debate in the domains of bioethics and public policy.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 286B – Public Health Law (2 units)

Course Description: Public health law, seen broadly, is the government's power and responsibility to ensure the conditions for the population's health.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to 15 students.

Grade Mode: Letter.

LAW 286C – Bioethics (3 units)

Course Description: Ethical, legal, and social issues that arise from biomedical technologies. Topics may include human subject research, end-of-life care, assisted reproductive technologies, genetic testing and modification, and tissue transplantation.

Learning Activities: Discussion.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 286D – Legal Psychology Seminar (2 units)

Course Description: Examines how psychological theory and research can be used to shape laws and policies to make them better reflect what we know empirically about how individuals process information, make decisions and behave.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 286E – Reproductive Rights, Law, & Policy (3 units)

Course Description: Addresses a variety of laws and practices that affect reproductive health and procreative decision making.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 286F – Neuroscience & the Law (2 units)

Course Description: Explore current topics at the crossroads of neuroscience and the law. Cover topics including neuroscience evidence at sentencing, brain-based lie detection, tort liability for brain injuries, brain based enhancement and the boundaries between life and death.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 286G – Representing Life Science Companies (2 units)

Course Description: Biotechnology and Pharmaceuticals are two of the fastest-growing industries in the U.S., and the legal issues that arise in connection with representing them are complex and evolving. Seminar focuses on the transactional, intellectual property, and regulatory legal issues that challenge lawyers working with clients in these industries.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 286H – Mental Health & the Law (2 units)

Course Description: Explores how those with mental health needs interact with law enforcement and the justice system, including pre-arrest intervention, court diversion, serious crime prosecution, and re-entry after incarceration.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 287 – Public Land & Natural Resources Law (3 units)

Course Description: Covers the legal aspects of managing national parks, national forests, national wildlife refuges, and other lands owned and managed by the federal government.

Prerequisite(s): LAW 235 or LAW 285 recommended.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 287A – Poverty Law (2 units)

Course Description: Explore the theory and practice of law pertaining to the enactment and enforcement of laws regulating or aiding the poor and other disadvantaged persons.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 287T – Law & Society Seminar (2 units)

Course Description: Study of law and society challenges traditional legal scholarship by exploring multiple ways in which law both shapes and is shaped by societies and social interactions. Seminar introduction to important literature and debates in the field.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 288 – Advanced Constitutional Law Seminar (2 units)

Course Description: Seminar explores in-depth selected topics or problems in constitutional law and theory. The current focus will include diverse topics including abortion rights, the development of Second Amendment jurisprudence, and other subject areas.

Prerequisite(s): LAW 218 (can be concurrent) or LAW 218A (can be concurrent).

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 288A – Presidential Powers Seminar (2 units)

Course Description: Explores the Constitutional powers of the President in Article II and how they intersect with Congressional power. Emphasis on executive and legislative power, executive orders, appointment and removal powers, executive privilege and immunity, pardons, impeachment, Congressional investigations, independent and special counsels, and the 25th Amendment.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 288B – Supreme Court Simulation Seminar (3 units)

Course Description: Take on the role of Justices of, and advocates before, the Supreme Court of the United States.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Course may satisfy the Advanced Writing Requirement or the Professional Skills Requirement. Students must choose one.

Grade Mode: Letter.

LAW 288C – National Security Law (2 units)

Course Description: Examines the allocation of national security powers among the three branches of government, and the laws & policies that govern military operations, the collection & use of intelligence, homeland security, and other current national security issues.

Prerequisite(s): LAW 205.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 288CS – National Security Law: Crisis Simulation Seminar (3 units)

Course Description: Explore Constitutional allocation of national security powers among three branches of government, and the vital role lawyers play in national security decision-making. Conduct deep dives on national security law case studies.

Prerequisite(s): Constitutional Law I; Public International Law (recommended).

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 289A – Biotechnology Law & Policy (2 units)

Course Description: Coverage includes the regulation of biotechnology research, including restrictions on cloning and fetal stem cell research; regulation of the products of biotechnology to protect human health or the environment, including restrictions on use or distribution of genetically modified organisms; the availability and scope of intellectual property protection for biotechnology products, including genes and engineered organisms; and the international law governing access to the natural resources that provide the starting materials for biotechnology and trade in bioengineered organisms or their products.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 290 – International Trade Law (3 units)

Course Description: China has become factory to the world, India its back office, and the US its information intermediary. Trade law affects goods, safety of foods, and conditions under which clothes are produced. Reviews trade regulation from the World Trade Organization to regional organizations such as NAFTA. Considers the implications for developing economies and analyze strengths and weaknesses of the current international trade order.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 290AT – Privacy, Surveillance, & “Sousveillance” (3 units)

Course Description: Issues of privacy and surveillance are important to businesses, governments and citizens. Surveillance raises issues of autonomy and the abuse of power. “Sousveillance,” (citizen holds the camera), is a mechanism for rooting out corruption and exposing individuals to societal scrutiny.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 290BT – Surveillance & States (3 units)

Course Description: Examines the tensions between democracy and the rise of government power entailed by the growth of state surveillance, United States surveillance law and practice, and surveillance law and practice across the world. Considers international legal constraints on government surveillance.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

LAW 290C – Information Privacy Law (2 units)

Course Description: Examine several topics that arise in field of information privacy law, with a special emphasis on law enforcement access to this information.

Prerequisite(s): Criminal Procedure strongly recommended.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory Only.

LAW 290D – Comparative Privacy Law (3 units)

Course Description: Compares regulatory privacy framework. Core lecturing focuses on the EU General Data Protection Regulation (GDPR) and how it compares with U.S. law. Core concepts include controller/processor, personal data/personal information, data subject/consumer, etc.

Prerequisite(s): Recommended passing one of the IAPP certifications or Privacy Law Seminar.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

LAW 291A – International Finance (4 units)

Course Description: Money makes the world go round. We will try to follow that money, learning how a framework of national and international laws and institutions regulates (or perhaps fails to regulate) its flow.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

LAW 291B – International Investment Dispute Seminar (2 units)

Course Description: This seminar will examine the law of investor-State dispute resolution.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 291T – International Arbitration & Investment Law (2 units)

Course Description: Covers international arbitration involving States, individuals, and corporations; including: the parties; the agreement to arbitrate; the arbitrators; the arbitral proceeding; and, the arbitral award.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 292 – Immigration Law & Procedure (3 units)

Course Description: Surveys the history of U.S. immigration law and policy.

Prerequisite(s): Law 235 recommended.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 292A – Advanced Topics in Immigration & Citizenship Law Seminar (2 units)

Course Description: Conducts a closer examination of various topics and subject matters that relate to immigration and citizenship law.

Prerequisite(s): LAW 292; may be waived by the professor.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 292B – Immigration Crimes (2 units)

Course Description: Every year, tens of thousands of people are charged with immigration-related crimes in the federal court system; almost all of the people prosecuted in these cases come from Spanish-speaking countries to the south of the United States. Examine the history of such immigration-related prosecutions, explores how they are currently conducted, and looks in particular at the streamlined proceedings that happen in districts along the southern border.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 292C – Humanizing Deportation (2 units)

Course Description: Focus on student's investigation, research, interviewing and client counseling skills. Review the stories in the UC Humanizing Deportation archive, research possible forms of immigration relief for deported individuals, and identify possible candidates for legal screening. After in-depth training, students travel to Tijuana, Mexico to provide know-your-rights and educational workshops with deported individuals.

Learning Activities: Clinical Activity.

Grade Mode: Letter.

LAW 293 – Public Interest Law (2 units)

Course Description: This class will examine the issues and problems associated with providing civil legal services to persons and interests in American society that typically have been unable to afford or otherwise obtain representation from the private bar.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 293AT – Contemporary Issues in Economic Justice (2 units)

Course Description: Provides an introduction to the social justice critique of free markets.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 293B – Representing Spanish-Speaking Clients: Language, Culture, & Emotional Intelligence (1 unit)

Course Description: Goal is to prepare future attorneys to effectively represent Spanish-speaking clients through various key tools, including litigation tools, language, culture, and emotional intelligence.

Prerequisite(s): Spanish proficiency or consent of instructor.

Learning Activities: Lecture.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 293T – Public Interest Lawyering, Civil Rights & Employment Law (2 units)

Course Description: Advanced course covers employment law issues through the lens of public interest lawyers and their constituencies.

Prerequisite(s): LAW 260; LAW 260AT.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 294A – Law & Popular Culture (2 units)

Course Description: Examines works of popular culture, films, and legal texts. Each session focuses on a particular film and its cultural implications, particular problem or problems of law, law practice, legal ethics, traditional ethics, or public policy.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 294B – Video Game Law (2 units)

Course Description: Focuses primarily on intellectual property law through the lens of video game-related litigation, and addresses the ways in which video games and the video game industry shape law and society. Addresses the video game business, the structure and form of video-game-related legal transactions, and other current legal issues surrounding video games.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 294C – Business of Professional Sports (2 units)

Course Description: Provides a basic understanding of how sports teams are legally structured; diversification of business lines, e.g., real estate, hospitality, non-profits, venture capital, marketing; role, structure, and importance of arena/facility as the modern community campfire; legal areas of focus, e.g., contracts, IP, finance, legislation, administrative law, risk management, construction; cutting edge legal issues, e.g., music license rights on social media, gambling, equal pay, eSports.

Prerequisite(s): LAW 215.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 295A – Trademark & Unfair Competition Law (2 units)

Course Description: Intensive look at selected issues in Trademark Law, including the concepts of trademarks & unfair competition, acquisition & loss of trademark rights, infringement, trademarks as speech, and international aspects of trademark protection.

Prerequisite(s): LAW 274 recommended, not required.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 295B – University Brands (3 units)

Course Description: Universities gain from developing brands, to draw donors and students and lend prestige to a range of activities—merchandise, publishing, technology transfer, continuing education, hospitals, distance learning, etc. Whether private, public, elitist, or inclusive, the university can no longer avoid to brand itself. Discusses the role of trademarks in the university and changes affecting it.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 295T – Brands (3 units)

Course Description: Takes a close, interdisciplinary look at branding. Preparation to understand modern branding strategies and the challenges such strategies may pose to traditional trademark law and policy. Topics include merchandising rights, unfair competition, and counterfeits.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

LAW 296 – Copyright (3 units)

Course Description: Thorough examination of the law of copyright, including its application to literature, music, films, television, art, computer programs, and the Internet.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 296B – Entertainment Law (2 units)

Course Description: Provides a working knowledge of legal issues in the entertainment industry with general and more specialized knowledge in established media, including film, literature, music and television, as well as emerging online media and video games.

Learning Activities: Discussion.

Grade Mode: Letter.

LAW 296C – Fictional Characters & Real People (2 units)

Course Description: Celebrities and fictional characters both have a powerful hold on the human imagination and are important parts of our modern myths. Examines legal protection available for each.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 296D – Art Law (3 units)

Course Description: Selected issues in Art Law, including meaning of art, how to represent artists, copyright, publicity, first amendment rights, censorship, street art, government regulation, art markets, international protection of art and cultural property; and more.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

LAW 296E – Art & Cultural Heritage Law (3 units)

Course Description: Exploration of the law relevant to art and cultural heritage, including copyright, cultural property, and cultural heritage laws in international and comparative perspective. Studied issues include creativity, artists' moral rights, forgery, and repatriation.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

LAW 297 – Alternative Dispute Resolution (2 units)

Course Description: Introduction to a wide variety of alternative dispute resolution procedures, with an emphasis on negotiation, mediation, and arbitration. Discussion of skills/strategies, with a focus on laws/policies that affect how ADR procedures are conducted.

Learning Activities: Discussion 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 297A – Federal Arbitration Act Seminar (2 units)

Course Description: Trace the development of commercial arbitration law, with a special emphasis on hot-button contemporary issues like consumer and employment arbitration, the separability doctrine, preemption of state law, and the arbitrability of statutory claims.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 297BT – International Arbitration (2 units)

Course Description: Introduction to international arbitration; the preferred method of dispute resolution in international business. Discuss both commercial arbitration (between private parties) and investor-state arbitration (between private parties & sovereign states).

Prerequisite(s): LAW 202 highly recommended.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

LAW 298 – Sociology of the Legal Profession Seminar (2 units)

Course Description: Comprehensive look at the organization, operation, and ideology of the legal profession.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LAW 298A – Leadership & the Law (1 unit)

Course Description: Prepare for responsible leadership and service in the roles that lawyers perform in legal practice, and as social change agents.

Learning Activities: Lecture.

Grade Mode: Letter.

LAW 298B – Trauma-Informed Lawyering (2 units)

Course Description: Equip students with knowledge and skills to navigate the landscape of trauma. Explore the science of trauma, and develop strategies for working with trauma in clients, ourselves, and others.

Learning Activities: Seminar.

Grade Mode: Letter.

LAW 298C – Empirical Legal Studies (2 units)

Course Description: Learn how to read and critique Empirical Legal Studies (ELS); e.g., legal writing that relies upon data as one of its primary sources of evidence. Write a data-focused research prospectus on a topic of the student's choosing.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

LAW 400A – Study Abroad: University College Dublin, Ireland (12 units)

Course Description: Semester away study abroad at the University College Dublin, Ireland. Enhance knowledge of international legal regimes and obtain a global legal educational experience. Taught abroad.

Learning Activities: Independent Study.

Enrollment Restriction(s): Students must apply and be accepted into the International Study Abroad Program.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 400B – Study Abroad: University of Copenhagen, Denmark (12 units)

Course Description: Semester study abroad at the University of Copenhagen, Denmark. Enhance knowledge of international legal regimes and obtain a global legal educational experience. Taught abroad.

Learning Activities: Independent Study.

Enrollment Restriction(s): Students must apply and be accepted into the International Study Abroad Program.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 400C – Study Abroad: China University of Political Science & Law (12 units)

Course Description: Semester-away study abroad at the China University of Political Science and Law. Enhance knowledge of international legal regimes and obtain a global legal educational experience. Taught abroad.

Learning Activities: Independent Study.

Enrollment Restriction(s): Student must apply and be accepted in the International Study Abroad Program.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 400D – Study Abroad: University of Lausanne, Switzerland (12 units)

Course Description: Semester-away study abroad at the University of Lausanne, Switzerland. Enhance knowledge of international legal regimes and obtain a global legal educational experience. Taught abroad.

Learning Activities: Independent Study.

Enrollment Restriction(s): Student must apply and be accepted in the International Study Abroad Program.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 400E – Study Abroad: Comillas Pontifical University Madrid, Spain (12 units)

Course Description: Semester-away study abroad at the Comillas Pontifical University in Madrid, Spain. Enhance knowledge of international legal regimes and obtain a global legal educational experience. Taught abroad.

Learning Activities: Independent Study.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 400F – Study Abroad: Université Paris Nanterre, Paris (12 units)

Course Description: Semester-away study abroad at the Université Paris Nanterre, Paris. Enhance knowledge of international legal regimes and obtain a global legal educational experience. Taught abroad.

Learning Activities: Seminar.

Enrollment Restriction(s): Student must apply and be accepted in the International Study Abroad Program.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 400G – Study Abroad: Newcastle University, U.K. (12 units)

Course Description: Semester-away study abroad at Newcastle University, U.K. Enhance knowledge of international legal regimes and obtain a global legal educational experience.

Learning Activities: Independent Study.

Grade Mode: S/U only.

LAW 408 – Community Education Seminar (3 units)

Course Description: Trains students to educate the community about basic legal rights and responsibilities. Students attend an initial four-hour orientation, followed by weekly seminars that will prepare students to teach in a local high school at least two times per week.

Learning Activities: Seminar 3 hour(s), Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 409 – Environmental Law Moot Court (1 unit)

Course Description: During the first eight weeks of fall semester, students research and submit briefs as appellants, respondents, or third parties on a problem of environmental law that is prepared by the National Environmental Law Moot Court Board.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 410A – Appellate Advocacy I (2 units)

Course Description: Basic appellate practice and procedure. Beginning instruction in oral advocacy skills and an opportunity to practice these skills in front of a moot court.

Learning Activities: Discussion/Laboratory.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 410B – Appellate Advocacy II (Moot Court) (2 units)

Course Description: Continuation of LAW 410A. Focuses on the development of effective appellate brief writing skills and the refinement of oral advocacy skills.

Learning Activities: Practice 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 411A – Journal of International Law & Policy (1-2 units)

Course Description: The UC Davis Journal of International Law & Policy publishes semi-annually and strives to contribute pertinent and interesting scholarly works to the field of international law.

Learning Activities: Variable 1-2 hour(s).

Repeat Credit: May be repeated 5 time(s) allowing participation in the journal for more than one term.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 411B – Social Justice Law Review (1-2 units)

Course Description: The Social Justice Law Review is a publication of the UC Davis School of Law that addresses the unique concerns of social justice in the American legal system.

Learning Activities: Independent Study 1-2 hour(s).

Repeat Credit: May be repeated 5 time(s) allowing participation in the journal for more than one term.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 411C – UC Davis Business Law Journal (1-2 units)

Course Description: The UC Davis Business Law Journal is run by dedicated law students who are committed to providing current and valuable legal and business analysis.

Learning Activities: Independent Study 1 hour(s).

Repeat Credit: May be repeated 5 time(s) allowing participation in the journal for more than one term.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 411D – Immigration & Nationality Law Review (1-2 units)

Course Description: The Immigration & Nationality Law Review (INLR) is in part a reprint journal and serves as an anthology of seminal articles on immigration, nationality, and citizenship law. INLR also creates space for student Notes.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study.

Repeat Credit: May be repeated 5 time(s) allowing participation in the journal for more than one term.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 412 – Carr Intraschool Trial Advocacy Competition (1 unit)

Course Description: Named after the late Justice Frances Carr, this competition is open to second and third-year students. A preliminary round is followed by quarter-finals, semi-finals, and a final round. Students participate in mock trials presided over by judges and critiqued by experienced litigators.

Learning Activities: Variable.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 413 – Interschool Competition (1-3 units)

Course Description: Participation in interschool moot court and lawyering skills competitions. Competition must be authorized by the appropriate faculty advisor. Faculty advisor may condition the award of academic credit for any particular competition on the performance of such additional work as may be reasonable to justify the credit. May satisfy advanced legal writing requirement.

Prerequisite(s): Consent of appropriate faculty advisor.

Learning Activities: Variable.

Enrollment Restriction(s): Limited to students actually representing the School in the interschool competitions.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 414 – Moot Court Board (1 unit)

Course Description: Members of Moot Court Board may receive 1 unit for each semester of service on the board; maximum of 2 units. Credit awarded only after certification by Moot Court Board and approval of the faculty advisors to Moot Court Board.

Prerequisite(s): LAW 410A; LAW 410B.

Learning Activities: Variable.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 414A – Negotiations Board (1 unit)

Course Description: Members of the King Hall Negotiations Board assist in the administration of the King Hall Negotiation Team by performing a variety of tasks under the supervision of the course instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Credit Limitation(s): Only 1 unit of credit for each semester of service on the board; up to a maximum of 2 units per academic year (4 units maximum); credit awarded only after approval by the instructor.

Grade Mode: S/U only.

LAW 415 – Trial Practice Honors Board (1 unit)

Course Description: Members of the Trial Practice Honors Board administer the Frances Carr competition. Members are nominated by their individual Trial Practice I adjuncts.

Learning Activities: Variable.

Credit Limitation(s): Receive 1 unit for serving on the Board; awarded upon approval of the faculty advisor.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 416 – Law Review Writer (1-2 units)

Course Description: Writing of a law review article under the editorial supervision of editors of the UC Davis Law Review. Office hours (including but not limited to Bluebooking and cite-checking) are required. 1 or 2 units.

Learning Activities: Variable 1-2 hour(s).

Credit Limitation(s): In the spring semester, credit is obtained only upon achieving status as a member of the UC Davis Law Review, which requires that the student has made substantial progress towards completing an editorship article; credit is awarded only after certification by the editor in chief and approval of the faculty advisors; 1 unit of credit is earned the first semester; 2 units are earned the second semester upon nomination and acceptance of nomination to the Editorial Board; 1 unit is earned second semester if only a membership draft and office hours are completed.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 417A – Law Review Editor (1-2 units)

Course Description: Editors must have completed an editorship article and must perform editorial duties (a substantial time commitment). Credit is awarded only after completion of both semesters.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 417B – Law Review Editor (1-2 units)

Course Description: Editors must have completed an editorship article and must perform editorial duties (a substantial time commitment). Credit is awarded only after completion of both semesters.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 418 – Environmental Law & Policy Journal (1-2 units)

Course Description: Enviros is a biannual environmental law and policy journal that provides an open forum for the discussion of current environmental issues, particularly those pertaining to the state of California.

Learning Activities: Independent Study.

Repeat Credit: May be repeated 5 time(s) allowing the student to participate in the journal for more than one term.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 419 – Advanced Writing Project (1-4 units)

Course Description: Completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. Writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. Project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). Advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. Number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 419A – Advanced Writing Project (1-4 units)

Course Description: Completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. Writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. Project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). Advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. Number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 420 – Civil Rights Clinic (2-6 units)

Course Description: Clinic provides practical experience in providing legal services to indigent clients who have filed civil rights actions in state and federal trial and appellate courts. Students work on clinic cases under the supervision of the clinic director.

Prerequisite(s): LAW 219 (can be concurrent); and consent of instructor. Priority given to students enrolled in or have taken LAW 267.

Learning Activities: Clinical Activity 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

LAW 423 – Corporate Counsel Externship (2-6 units)

Course Description: Earn academic credit for field placements in a corporate counsel office, working under attorney supervision.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 424 – Professional Development Seminar (1 unit)

Course Description: Create strategic goals for their placement, focus on professionalism and professional identity issues in seminar meetings and with their small section coaches, and engage in reflection on what they are learning through discussion and written assignments.

Learning Activities: Seminar.

Enrollment Restriction(s): Only for students enrolled in an externship.

Repeat Credit: Students repeating a placement will have the option to enroll in the seminar in the spring.

Grade Mode: Satisfactory/Unsatisfactory Only.

LAW 425 – Judicial Clinical (2-12 units)

Course Description: Students may arrange judicial clerkship clinical programs with an approved list of state and federal judges through the Clinical office and under the sponsorship of the faculty member in charge. All students must complete weekly time records and bi-weekly journals.

Prerequisite(s): LAW 261; Required for full-time clinical students and recommended for part-time clinical students.

Learning Activities: Clinical Activity.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 430 – Taxation Externship (2-6 units)

Course Description: Opportunity to work with the Internal Revenue Service or other governmental tax agency. Journals and attendance at group meetings required.

Prerequisite(s): LAW 220; consent of instructor.

Learning Activities: Clinical Activity 2-12 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 435 – Domestic & Sexual Violence Law Clinic (4 units)

Course Description: Provide civil legal assistance to victims of gender-based violence.

Prerequisite(s): LAW 203; LAW 219 (can be concurrent); LAW 272
LAW 263A recommended.

Learning Activities: Clinical Activity 2 hour(s).

Enrollment Restriction(s): Required enrollment for two semesters, receiving 4 units each semester totaling 8 units; may satisfy the Advanced Writing Requirement or count towards the Professional Skills Requirement, student must choose one.

Repeat Credit: May be repeated 4 time(s).

Grade Mode: Letter.

LAW 440 – Immigration Law Clinic (4 units)

Course Description: Provides legal representation to indigent non-citizens in removal proceedings before U.S. Immigration Courts, the Board of Immigration Appeals, and federal courts, including the Ninth Circuit Court of Appeals.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 8 hour(s).

Enrollment Restriction(s): Prior or concurrent enrollment in LAW 292 and LAW 219, recommended, not required.

Repeat Credit: May be repeated 4 time(s).

Grade Mode: Letter.

LAW 445 – Legislative Process Externship (2-5 units)

Course Description: Practical experience in the operation of the office of a legislator or a legislative committee. The major thrust of the program is to enable students to become familiar with the give and take realities of making laws, as contracted with their interpretation and enforcement. Journals are required.

Prerequisite(s): LAW 240 (can be concurrent); or consent of instructor.

Learning Activities: Clinical Activity.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 445A – Aoki Water Justice Clinic (3-5 units)

Course Description: Work with drinking water providers to address the need for clean, affordable drinking water. Advise clients on potential governance structures and draft corporate documents, property agreements, and consolidation agreements.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

LAW 445B – Advanced Aoki Water Justice Clinic (2-5 units)

Course Description: The Advanced Aoki Water Justice Clinic allows students to leverage their legal research and practical lawyering skills to advance policies that ensure that low-income, California communities receive safe, clean, and affordable drinking water.

Learning Activities: Variable.

Grade Mode: Letter.

LAW 446 – UC Davis Capital Law Scholars Externship Program (2-12 units)

Course Description: Program is designed to provide students with hands-on lawyering experience in a legislative office, with a legislative committee, or with a government/nonprofit office engaged in legislative and policy work. Grading is on a S/U basis.

Learning Activities: Fieldwork.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 446A – UC Davis Capital Law Scholars Seminar (1 unit)

Course Description: May be required for students enrolled in Capital Law Scholars Externship. Covers issues related to lawyering in California's state capital, and help students maximize educational and professional experience in their externship placements.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Letter.

LAW 450 – Environmental Law Externship (2-6 units)

Course Description: Practical experience in environmental law. Students will work in an approved government, non-profit or private law office engaged in some form of environmental law work for a minimum of eight hours per week. Students must prepare a journal describing and reflecting upon their clinical experience, and meet periodically with the instructor.

Prerequisite(s): LAW 285; or consent of instructor.

Learning Activities: Clinical Activity.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 455 – Employment Relations Externship (2-6 units)

Course Description: Practical experience in employment relations, including employment discrimination and public sector labor law. Work under the direct supervision of a government lawyer. Opportunity to participate in a range of with emphasis on observation and participation in actual investigation, interviewing, drafting pleading, and attendance at hearings.

Prerequisite(s): LAW 251 or LAW 260 (can be concurrent).

Learning Activities: Clinical Activity.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 460 – Public Interest Law Externship (2-6 units)

Course Description: Opportunity to work with a public interest practitioner in a nonprofit organization. Journals and attendance at two group meetings required. Students must complete an evaluative final paper of approximately eight pages. Hours completed in public interest setting may be applied toward the practicum requirement for the Public interest Law Program.

Prerequisite(s): Prior or concurrent enrollment in LAW 293 recommended.

Learning Activities: Clinical Activity 2-6 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 465 – Intellectual Property Externship (2-6 units)

Course Description: Opportunity to work for government, academic, and nonprofit entities.

Prerequisite(s): LAW 293 and Comparative Public Services recommended.

Learning Activities: Clinical Activity 2-6 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 470 – Administration of Criminal Justice Externship (2-12 units)

Course Description: Gain practical experience working full or part time in a District Attorney's or Public Defender's office in one of several surrounding counties or in a federal Public Defender or U.S. Attorney's office. Participate in the many activities associated with the office for which they extern: observation, interviewing, research, counseling, motion practice, and trials under State Bar rules.

Prerequisite(s): LAW 219 (can be concurrent); LAW 227 (can be concurrent); completion of or concurrent enrollment in LAW 219 and LAW 227; LAW 263A recommended.

Learning Activities: Clinical Activity 2-12 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 475 – Washington UC-DC Law Program (2-10 units)

Course Description: Uniquely collaborative externship program in Washington, D.C., combining weekly seminars with full-time field placement offering an unparalleled opportunity to learn how federal statutes, regulations, and policies are made, changed, and understood in the nation's capital. Taught in Washington, D.C.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Open to 2L & 3L students.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 475A – Law Making & Law Changing in the Nation's Capital (3 units)

Course Description: Companion seminar to the Washington UC-DC Externship. Designed to enhance the externship experience in three principal ways. Taught in Washington, D.C.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

LAW 475B – Law & Lawyering in the Nation's Capital (1 unit)

Course Description: Companion seminar to a remote/part-time externship where the organization or the supervisor is based in Washington DC.

Designed to enhance a part-time/remote Washington D.C. experience.

Prerequisite(s): LAW 475 (concurrent enrollment required).

Learning Activities: Seminar 1 hour(s).

Grade Mode: Letter.

LAW 475P – Washington UC-DC Law Program (3-6 units)

Course Description: Uniquely collaborative externship program in Washington, D.C., Combines weekly seminars with part-time remote field placement offering an unparalleled opportunity to learn how federal statutes, regulations, and policies are made, changed, and understood in the nation's capital.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Restricted to second and third year law students.

Grade Mode: S/U only.

LAW 480 – Clinical Program in Prison Law (2-6 units)

Course Description: Provides practical experience in providing legal services to real clients who have various problems related to their incarceration in state prison. The services require analysis and application of Constitutional Law, state statutory law, agency regulations, and the rules of professional responsibility.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 2 hour(s).

Grade Mode: Letter.

LAW 485 – California Supreme Court Clinic (6 units)

Course Description: California Supreme Court Clinic provides students with an immersive experience in litigating cases before the state's highest court.

Learning Activities: Clinical Activity 6 hour(s).

Enrollment Restriction(s): Limited to 6 students.

Grade Mode: Letter.

LAW 490T – Aoki Federal Public Defender Clinic (4 units)

Course Description: Outgrowth of the work of the Aoki Center on Race and Nation. As part of its work, the Aoki Center provides educational opportunities to students interested in critical race perspectives in practice.

Learning Activities: Clinical Activity 4 hour(s).

Enrollment Restriction(s): Students submit applications for the course.

Grade Mode: Letter.

LAW 498 – Group Study (1-4 units)

Course Description: Groups of students with common interest in studying a stated legal problem may plan and conduct their own research and seminar program under the direction of faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Enrollment Restriction(s): Limited to no fewer than 4 or more than 10 students.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 498A – Group Study (1-4 units)

Course Description: Groups of students with common interest in studying a stated legal problem may plan and conduct their own research and seminar program under the direction of faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

LAW 499 – Independent Research Project (1-4 units)

Course Description: Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than 5 students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 499A – Independent Research Project (1-4 units)

Course Description: Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than 5 students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. Grading is on a Satisfactory/Unsatisfactory basis unless a request for letter grading has been made in advance.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 499B – Law Students Study Away (10 units)

Course Description: Students studying away from UC Davis, School of Law.

Taught abroad or off campus.

Learning Activities: Independent Study.

Grade Mode: Satisfactory/Unsatisfactory only.

LAW 499C – Joint Degree Student-GSM (10 units)

Course Description: Joint degree course for graduate School of Management students.

Learning Activities: Internship.

Grade Mode: Satisfactory/Unsatisfactory only.

Linguistics (LIN)

College of Letters & Science

LIN 001 – Introduction to Linguistics (4 units)

Course Description: Introduction to the study of language; its nature, diversity, and structure.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

LIN 001Y – Introduction to Linguistics (4 units)

Course Description: Introduction to the study of language; its nature, diversity, and structure.

Learning Activities: Web Virtual Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Students may not take both LIN 001 and LIN 001Y for credit.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

LIN 003 – Language & the Body (4 units)

Course Description: Perspectives on the role of language in issues about bodies. Language-related disabilities. Social implications of language use in discussing body-related conditions.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Open to all students regardless of major.

Enrollment will be restricted to 80-100 students.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL).

LIN 005 – Global English & Communication (4 units)

Course Description: English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative competence for a globalized world.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Cross Listing: CMN 005.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); World Cultures (WC).

LIN 006 – Language & Society (4 units)

Course Description: Language as a social phenomenon. Topics include linguistic diversity, language policy, language and identity, language and social structure, speech communities and social networks, the effect of social factors on language variation, linguistic consequences of language contact.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

LIN 015 – Academic Oral Communication (3 units)

Course Description: Structure of oral communication, critical thinking, and persuasion in classroom discourse in American English and in cross-cultural perspective.

Learning Activities: Lecture 1 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL).

LIN 096 – Directed Group Study in English as a Second Language (1-5 units)

Course Description: Directed group study of topic in English as a Second Language (ESL).

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1.50-1.50 hour(s).

Repeat Credit: May be repeated with consent of the ESL coordinator.

Grade Mode: Pass/No Pass only.

LIN 098 – Directed Group Study (1-5 units)

Course Description: Intended for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

LIN 099 – Special Study for Undergraduates (1-5 units)

Course Description: Intended for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

LIN 103A – Linguistic Analysis I: Phonetics, Phonology, Morphology (4 units)

Course Description: Introduction to fundamental methods and concepts used in linguistic analysis, focusing on phonetic, phonological, and morphological phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages.

Prerequisite(s): LIN 001 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed LIN 139.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LIN 103B – Linguistic Analysis II: Morphology, Syntax, Semantics (4 units)

Course Description: Introduction to fundamental methods and concepts used in linguistic analysis, focusing on morphological, syntactic, and semantic phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages.

Prerequisite(s): LIN 001 or LIN 001Y recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed LIN 140.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LIN 105 – Topics in Language & Linguistics (4 units)

Course Description: Detailed examination of a major contemporary linguistic theory, a major contemporary issue or related set of issues in linguistics, or the structure of a particular language or language family.

Prerequisite(s): Consent of instructor; LIN 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

LIN 106 – English Grammar (4 units)

Course Description: Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English.

Prerequisite(s): LIN 001 or LIN 001Y or ENG 003 or UWP 001 or UWP 001V or UWP 001Y; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ENL 106, UWP 106.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LIN 111 – Introduction to Phonological Theory (4 units)

Course Description: Modern approaches to phonological theory with emphasis on considering a broad range of theoretical perspective in accounting for variation across and within languages.

Prerequisite(s): LIN 001 or LIN 001Y or LIN 103A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LIN 112 – Phonetics (4 units)

Course Description: Detailed examination of articulatory and acoustic phonetics.

Prerequisite(s): LIN 001 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

LIN 121 – Morphology (4 units)

Course Description: Introduction to the analysis of word structure and the relation of word structure to the lexicon and other grammatical components.

Prerequisite(s): LIN 103A, 103B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LIN 127 – Text Processing & Corpus Linguistics (4 units)

Course Description: Investigation of the lexical organization of human languages through corpus linguistics. Application of principles of linguistic analysis, automatic text processing, and statistical research to solving problems of textual evaluation and classification, as well as information retrieval and extraction.

Prerequisite(s): LIN 001, LIN 005, LIN 006, or ANT 004 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Quantitative Literacy (QL).

LIN 131 – Introduction to Syntactic Theory (4 units)

Course Description: Introduction to syntactic theory, primarily through the examination of a major theory of syntax, emphasizing theoretical reasoning, argumentation, and problems of theory building in syntax.

Prerequisite(s): LIN 103B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LIN 141 – Semantics (4 units)

Course Description: Linguistic study of meanings of words and phrases, meanings expressed by lexical items and compositional structures. Truth-conditional models of semantics, evaluated in context and against social conventions.

Prerequisite(s): LIN 103B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LIN 150 – Languages of the World (4 units)

Course Description: Survey of the world's languages, their geographical distribution and classification, both genetic and typological. Illustrative descriptions of several major languages from different geographical areas; pidgins and creoles, lingua francas and other languages of widespread use.

Prerequisite(s): LIN 001 or ANT 004 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed LIN 050.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

LIN 151 – Historical Linguistics (4 units)

Course Description: Description and methods of the historical study of language, including the comparative method and internal reconstruction; sound change, morphological change, syntactic change, semantic change.

Prerequisite(s): LIN 103A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LIN 152 – Language Universals & Typology (4 units)

Course Description: Investigation into common features of all human languages and the classification of languages in terms of their structural features. Theories of universal grammar. Detailed discussion of non-Indo-European languages and comparison with English.

Prerequisite(s): LIN 103B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

LIN 160 – American Voices (4 units)

Course Description: Explores the forms of American English: traditional notions of regional dialects and increasingly important social dialects, reflecting age, class, gender, race, ethnicity, and sexual orientation.

Influence of language attitudes on perception of dialect speakers; dialect in media, education, and literature.

Prerequisite(s): LIN 001 or LIN 001Y or ANT 004; or upper division standing recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

LIN 161 – Global Sociolinguistics (4 units)

Course Description: Overview of key sociolinguistic concepts from a global perspective, focusing on language variation, language use and language policy. Processes of language maintenance, shift and change; the construction of identities in interactions through the use of dialects, styles, and registers. Cross-cultural communication and politeness.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to LIN majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

LIN 163 – Language, Gender, & Society (4 units)

Course Description: Investigation of real and putative (stereotyped) gender-linked differences in language structure and usage, with a consideration of some social and psychological consequences of such differences. Focus is on English, but other languages are also discussed.

Prerequisite(s): LIN 001 or ANT 004 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

LIN 164 – Discourse Analysis (4 units)

Course Description: Methods of analyzing spoken and written chunks of language as they happen in various contexts, including doctor's offices, classrooms, sports arenas, news media, etc.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

LIN 165 – Introduction to Applied Linguistics (4 units)

Course Description: Applications of linguistic principles and the analysis of language-related issues in the world. Exploration of a range of language-related problems including issues related to language learning and teaching to issues concerning language and gender, race, class and the media.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

LIN 166 – The Spanish Language in the United States (4 units)

Course Description: Linguistic features of the varieties of the Spanish language spoken throughout the United States; phonology, morphology, syntax, vocabulary. Focus on the relationship between United States Spanish and other world varieties of Spanish, within a historical framework.

Prerequisite(s): LIN 001 or LIN 001Y or SPA 111N; SPA 023; or equivalent to SPA 023 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS).

LIN 171 – Introduction to Psycholinguistics (4 units)

Course Description: Introduction to psychological issues relating to the implementation of language and linguistic structure during speech production and comprehension and to the implications of research in psychology and related fields for linguistic theory.

Prerequisite(s): (LIN 001 or LIN 001Y); LIN 103A, LIN 103B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

LIN 173 – Language Development (4 units)

Course Description: Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories.

Prerequisite(s): (LIN 001 or LIN 001Y); or consent of instructor; LIN 103A, 103B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: EDU 173.

Grade Mode: Letter.

General Education: Social Sciences (SS).

LIN 175 – Biological Basis of Language (4 units)

Course Description: Overview of issues in the field of neurolinguistics and techniques used to explore representation of language in the human brain.

Prerequisite(s): Consent of instructor; LIN 001 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

LIN 177 – Computational Linguistics (4 units)

Course Description: Understanding the nature of language through computer modeling of linguistic abilities. Relationships between human cognition and computer representations of cognitive processing.

Prerequisite(s): Consent of instructor; LIN 001 or LIN 001Y recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken LIN 007.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

LIN 180 – Second Language Learning & Teaching (4 units)

Course Description: Psycholinguistic and sociolinguistic theories of second language learning. Connections between theoretical perspectives and pedagogical practices in formal and informal second language settings, with focus on tutoring. Impact of sociocontextual factors (e.g., gender, ethnicity). Fieldwork requirement.

Prerequisite(s): LIN 001 or LIN 001Y; or equivalent recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

LIN 182 – Multilingualism (4 units)

Course Description: Issues in multilingualism from a global perspective: e.g., multilingual communities; multilingualism and identity (gender, ethnicity, nationality); language ideologies and educational and sociopolitical policies surrounding multilingualism; acquisition of multilingualism; discursive practices of multilinguals.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

LIN 192 – Internship in Linguistics (1-12 units)

Course Description: Internship applying linguistic-related skills to a fieldwork project in areas such as media, law, or industry, in approved organizations or institutions. Maximum of 4 units applicable toward major.

Prerequisite(s): LIN 001 or LIN 001Y; or equivalent course; consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

LIN 194H – Special Study for Honors Students (1-5 units)

Course Description: Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis.

Prerequisite(s): Consent of instructor; open only to linguistics majors of senior standing who qualify for Honors Program.

Learning Activities: Independent Study 1-5 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

LIN 197T – Tutoring in Linguistics (1-4 units)

Course Description: Leading of small voluntary discussion groups affiliated with one of the department's regular courses.

Prerequisite(s): Consent of instructor. Upper division standing and consent of department chairperson.

Learning Activities: Discussion 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

LIN 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

LIN 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

LIN 200A – Foundations of Linguistics I (4 units)

Course Description: Survey of fundamental issues raised by pre-generative linguistics in the 20th century, with emphasis on issues crucial to applications of linguistics.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have completed LIN 203A.

Grade Mode: Letter.

LIN 200B – Foundations of Linguistics II (4 units)

Course Description: Survey of fundamental issues raised by orthodox generative linguistics, with emphasis on issues crucial to applications of linguistics.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have completed LIN 203B.

Grade Mode: Letter.

LIN 200C – Foundations of Linguistics III (4 units)

Course Description: Survey of fundamental issues raised by contemporary linguistic theories lying outside the generative grammar orthodoxy, with emphasis on issues crucial to applications of linguistics.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

LIN 201 – Proseminar (1 unit)

Course Description: Introduction to research activity of faculty in the Graduate Group in Linguistics and guest speakers.
Learning Activities: Seminar 1 hour(s).
Repeat Credit: May be repeated 4 unit(s).
Grade Mode: Satisfactory/Unsatisfactory only.

LIN 205A – Topics in Linguistic Theory & Methods (4 units)

Course Description: Advanced study of current problems in linguistic theory and methodology.
Prerequisite(s): Consent of instructor.
Learning Activities: Seminar 3 hour(s), Term Paper.
Repeat Credit: May be repeated when topic differs.
Grade Mode: Letter.

LIN 205B – Topics in Linguistic Theory & Methods (4 units)

Course Description: Advanced study of current problems in linguistic theory and methodology.
Prerequisite(s): Consent of instructor.
Learning Activities: Seminar 3 hour(s), Term Paper.
Repeat Credit: May be repeated when topic differs.
Grade Mode: Letter.

LIN 205C – Topics in Linguistic Theory & Methods (4 units)

Course Description: Advanced study of current problems in linguistic theory and methodology.
Prerequisite(s): Consent of instructor.
Learning Activities: Seminar 3 hour(s), Term Paper.
Repeat Credit: May be repeated when topic differs.
Grade Mode: Letter.

LIN 205D – Topics in Linguistic Theory & Methods (4 units)

Course Description: Advanced study of current problems in linguistic theory and methodology.
Prerequisite(s): Consent of instructor.
Learning Activities: Seminar 3 hour(s), Term Paper.
Repeat Credit: May be repeated when topic differs.
Grade Mode: Letter.

LIN 211 – Advanced Phonological Theory & Analysis (4 units)

Course Description: Critical examination of current phonological theories.
Prerequisite(s): LIN 111.
Learning Activities: Lecture 3 hour(s), Term Paper.
Grade Mode: Letter.

LIN 212 – Advanced Phonetics (4 units)

Course Description: Advanced investigation of the physiological basis of speech articulation and acoustic phonetics.
Prerequisite(s): LIN 112.
Learning Activities: Lecture 3 hour(s), Term Paper.
Grade Mode: Letter.

LIN 231 – Advanced Syntactic Theory & Analysis (4 units)

Course Description: Critical survey of contemporary theories of syntax.
Prerequisite(s): LIN 131.
Learning Activities: Lecture 3 hour(s), Term Paper.
Grade Mode: Letter.

LIN 241 – Advanced Syntactic Theory & Analysis (4 units)

Course Description: Advanced critical exploration of contemporary theories of linguistic semantics.
Prerequisite(s): LIN 141; or consent of instructor.
Learning Activities: Lecture 3 hour(s), Term Paper.
Grade Mode: Letter.

LIN 250 – Principles of Typological Linguistics (4 units)

Course Description: Cross-linguistic comparison and typology, including word order, morphological typology, complex clauses, semantic categories and their grammaticalization, and applications of typology to language acquisition.

Learning Activities: Seminar 3 hour(s), Term Paper.
Grade Mode: Letter.

LIN 251 – Principles of Historical Linguistics (4 units)

Course Description: Advanced analysis of the theory and methods of historical linguistics.
Prerequisite(s): LIN 151.
Learning Activities: Lecture 3 hour(s), Term Paper.
Grade Mode: Letter.

LIN 252 – Romance Linguistics (4 units)

Course Description: Examination of the development of the Romance languages from Proto-Romance to the modern era. Application and critical examination of methods of historical and comparative linguistics in particular areas of structural change in Romance.

Prerequisite(s): LIN 151.
Learning Activities: Lecture 3 hour(s), Term Paper.
Grade Mode: Letter.

LIN 253 – Speech Perception (4 units)

Course Description: Investigation into how listeners map a continuous and variable acoustic signal to a linguistic interpretation. Phonetic context, variation, linguistic knowledge, and sociolinguistics as factors in perceiving speech.
Learning Activities: Discussion 3 hour(s), Extensive Writing.
Grade Mode: Letter.

LIN 260 – Variation in Speech Communities (4 units)

Course Description: Linguistic variability in time, space, and society. Theoretical issues related to social and linguistic constraints in variation; issues and methods in the quantitative analysis of variation. Speech community, quantitative analytic methods, and the scope of sociolinguistic competence.
Prerequisite(s): LIN 281; or consent of instructor.
Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.
Grade Mode: Letter.

LIN 263 – Discourse Analysis: Text in Context (4 units)

Course Description: Introduction to and application of leading theoretical approaches to the analysis of discourse. Approaches to the analysis of (spoken and written) text in context, tools for analyzing different types of texts (narration, conversation, etc.). Theme/rheme, given/new, anaphora, discourse markers, and other lexical/grammatical features.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

LIN 264 – Current Issues in Language & Gender (4 units)

Course Description: Exploration of the construction and performance of gender through language in cross-cultural perspective and in a variety of contexts: informal conversations, narratives, workplaces, schools, households, the mass media. Special topics may include: language acquisition; multilingualism; ecofeminism; queer theory.

Prerequisite(s): Graduate standing; prior coursework in Linguistics, Gender Studies, or Cultural Studies is desirable; no expectation of bilingual proficiency.

Learning Activities: Seminar 3 hour(s), Term Paper, Project.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

LIN 265 – Language, Performance, & Power (4 units)

Course Description: Exploration of the intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate standing or consent of instructor.

Cross Listing: ANT 265.

Grade Mode: Letter.

LIN 272 – Computational Psycholinguistics (3 units)

Course Description: Probabilistic models of psycholinguistic phenomena. Introduction to probability theory and Bayesian modeling. Linguistic phenomena covered include speech processing, sentence processing, pragmatics, and acquisition.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to Graduate students only.

Grade Mode: Letter.

LIN 275 – Neurobiology of Language (4 units)

Course Description: Survey of historical and modern conceptions of the neurobiology of language. Aphasia, functional neuroimaging, functional neuroanatomy of human language.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

LIN 280 – Theories of Second Language Acquisition (4 units)

Course Description: Covers theoretical perspectives that direct or have directed research in second language acquisition; explores the relationship between linguistics and language teaching and deals with the individual variables that influence second language learning.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

LIN 281 – Research Methods in TESOL/SLD (4 units)

Course Description: Students will study a variety of research methods in second language research; evaluate research designs and methods of analyses, formulate research questions and hypotheses and design a study of their own, think about various kinds of data they can collect.

Prerequisite(s): LIN 280.

Learning Activities: Lecture 3 hour(s), Term Paper 1 hour(s).

Grade Mode: Letter.

LIN 282 – Individual & Social Aspects of Bilingualism (4 units)

Course Description: Broad overview of bi-and multilingualism, with focus on theoretical and descriptive research; topics covered range from language processing in bilinguals to code-switching to language as political issue in multilingual states.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

LIN 283 – Politics of Bi & Multilingual Literacies (4 units)

Course Description: Anthropological, psycho-social, political, and educational perspectives on bi- and multi-lingualism. Power, colonialism, "native/non-native" speakers, and varieties and the unequal distribution of social goods. Analysis of how competing factors keep peoples disenfranchised.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

LIN 289 – Pedagogical Applications of Second Language Acquisition Theory (4 units)

Course Description: Pedagogical implications of various theories of second language acquisition, facilitation of language acquisition in classroom settings, and techniques for conducting classroom-based research in language learning.

Prerequisite(s): LIN 280.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

LIN 297T – English as a Second Language Teaching/Tutoring (1-4 units)

Course Description: Teaching classes for ESL graduate students. Aiding the ESL undergraduate composition classes; tutoring foreign graduate student Teaching Assistants in pronunciation. Does not fulfill requirement toward the M.A. degree.

Prerequisite(s): LIN 300 or LIN 301 or LIN 302 (can be concurrent); consent of instructor.

Learning Activities: Tutorial 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

LIN 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

LIN 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

LIN 300 – Language Pedagogy (4 units)

Course Description: Methods of teaching second languages to nonnative speakers, stressing particularly recent linguistic methodology and techniques, as related to teaching and tutoring in the UC Davis ESL program.

Prerequisite(s): Graduate standing in Linguistics or consent of instructor; concurrent enrollment in LIN 297T recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

LIN 301 – Teaching Academic Literacy (4 units)

Course Description: Methods of teaching advanced academic literacy in a second language, with a focus on ESL composition. Lesson development, teaching and tutoring in the UC Davis ESL program.

Prerequisite(s): LIN 300; or consent of instructor; graduate standing.

Learning Activities: Seminar 3 hour(s), Tutorial 14 hour(s), Project, Practice.

Grade Mode: Letter.

LIN 302 – Recent Research & Special Projects in TESOL (4 units)

Course Description: Review of recent research in second language acquisition and the teaching of English to speakers of other languages. Continued teaching and tutoring in the UC Davis ESL clinic. Each student designs and reports on a classroom research project.

Prerequisite(s): LIN 300; LIN 301.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

LIN 305 – Second Language Literacy & Technology (4 units)

Course Description: Exploration of literacy theory and critical pedagogy in relation to new instructional and communication technologies.

Practicum experience in teaching second language literacy; reflection on connections between theory and practice. Fieldwork requirement.

Prerequisite(s): LIN 002 or equivalent coursework/experience in second language pedagogy; consent of instructor; graduate students only.

Learning Activities: Lecture/Discussion 1.50 hour(s), Web Electronic Discussion 1.50 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

LIN 310 – Language Pedagogy for Teacher Educators (4 units)

Course Description: Current issues in second language pedagogy, with a focus on communicative methodology, participatory curriculum design, academic literacy, and the social contexts of teaching. Emphasis on reflective teaching and action research. Mentoring of new language teachers.

Prerequisite(s): Admission to Ph.D. program in Linguistics or Foreign Languages, or permission of instructor; significant language teaching experience.

Learning Activities: Seminar 3 hour(s), Tutorial, Project, Fieldwork.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Letter.

LIN 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Management (MGT)

Graduate School of Management

MGT 011A – Elementary Accounting (4 units)

Course Description: Basic concepts of accounting; interpreting and using financial statements; understanding accounting principles.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

MGT 011B – Elementary Accounting (4 units)

Course Description: Theory of product costing; Analyzing the role and impact of accounting information on decision making; planning and performance evaluation.

Prerequisite(s): MGT 011A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

MGT 012Y – Navigating Life's Financial Decisions (3 units)

Course Description: Survey of major life financial decisions (e.g., career choice, consumption v. saving, investments, mortgages, insurance) and how decision-making biases (e.g., overconfidence, present bias, limited attention) can lead to suboptimal choice. Draws on research from economics, psychology, and sociology.

Learning Activities: Lecture 2 hour(s), Web Virtual Lecture 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

MGT 098 – Directed Group Study (1-5 units)

Course Description: Open to all undergraduates, but is primarily intended for lower division students.

Learning Activities: Seminar 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MGT 100 – Introduction to Financial Accounting (3 units)

Course Description: Introduction to the concepts, methods, and uses of accounting and financial reporting.

Prerequisite(s): MGT 011A.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to all upper division undergraduate and graduate students, except those in the Graduate School of Management.

Grade Mode: Letter.

MGT 101 – Sources & Uses of Accounting Information (4 units)

Course Description: Develops an understanding of the supply and demand of accounting information. Topics include the generation and processing of accounting information, the examination of accounting information by auditors, and the use of accounting information by capital markets and tax authorities.

Prerequisite(s): MGT 011A C- or better; MGT 011B C- or better; must have C- or better in all prerequisite courses.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MGT 103 – Intermediate Financial Accounting I (4 units)

Course Description: Begin to develop expertise in the accounting for assets and introduce analysis of financial statements.

Prerequisite(s): MGT 011A; MGT 011B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MGT 105 – Intermediate Financial Accounting II (4 units)

Course Description: Continue to develop expertise in the preparation of financial statements by studying the accounting for liabilities and stockholders' equity. Examines the accounting for contracts that can have significant effects on firms' financial statements.

Prerequisite(s): MGT 103.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MGT 107 – Intermediate Financial Accounting III (4 units)

Course Description: Finishes the Intermediate Financial Accounting series by examining in depth the accounting for contracts related to pensions and leases. Preparation of the statement of cash flows and footnote disclosures.

Prerequisite(s): MGT 105.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MGT 120 – Managing & Using Information Technology (4 units)

Course Description: Develop an analytical framework to manage and monitor business systems concerned with operational, human, and organizational interactions. Introduction to computer hardware, systems software, and information systems. Management of information technology and the impact of information systems on modern management.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

MGT 140 – Marketing for the Technology-Based Enterprise (4 units)

Course Description: Quantitative analysis of needs in a product (technology-based) economy, with emphasis on how scientists, engineers, and business people interact to develop and market products and services.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

MGT 150 – Technology Management (4 units)

Course Description: Management of firms in high technology industries such as software development and biotechnology research. Motivating and managing workers, organizing for innovation, and making decisions.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

MGT 151 – Management of Innovation & Entrepreneurship (4 units)

Course Description: Innovation and entrepreneurship in established companies or new ventures. Knowledge, skills, and hands-on experiences in creative problem-solving, decision-making, building new ventures, and innovation strategy.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

MGT 160 – Financing New Business Ventures (4 units)

Course Description: Concepts/methods used to structure and finance new business ventures. Topics include evaluating the net social (financial) benefit of new investment projects; raising venture capital; the role of the venture capitalist; and the choice of organizational structure in new ventures.

Prerequisite(s): MGT 011A; (STA 013 or STA 013Y).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

MGT 170 – Management Accounting & Control (4 units)

Course Description: Covers the design of cost accounting systems, the preparation of financial budgets and forecasts, cost analysis, and the use of cost and other financial data to motivate and evaluate the performance of business units and managers.

Prerequisite(s): MGT 011A; MGT 011B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

MGT 180 – Supply Chain Planning & Management (4 units)

Course Description: Develops key concepts and relationships between supply chain design and business models and strategies. Much of the focus is on quantitative techniques for analysis & management of the production and delivery of goods & services by an organization.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

MGT 190 – Special Topics in Accounting (4 units)

Course Description: Seminar in the theory and practice of advanced or emerging areas related to the practice of professional accountancy. Specific topics will vary according to the interests of the instructor or students.

Prerequisite(s): MGT 011A; MGT 011B; MGT 101.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

MGT 198 – Directed Group Study (1-5 units)

Course Description: Open to all undergraduates, but primarily intended for upper division students.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated 6 unit(s) when topic differs.

Grade Mode: Pass/No Pass only.

MGT 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special Study for Advanced Undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MGT 200A – Financial Accounting (3 units)

Course Description: Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 200B – Managerial Accounting (3 units)

Course Description: Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations.

Prerequisite(s): MGT 200A or MGB 200A or MGP 200A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 201A – The Individual & Group Dynamics (3 units)

Course Description: Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 201B – Organizational Strategy & Structure (3 units)

Course Description: Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.

Prerequisite(s): Completion of first year courses in Graduate School of Management or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to MBA students only.

Grade Mode: Letter.

MGT 202A – Markets & the Firm (3 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 202B – Business, Government, & the International Economy (3 units)

Course Description: Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance.

Prerequisite(s): MGT 202A or MGV 202AV or MGP 202A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 203A – Data Analysis for Managers (3 units)

Course Description: Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.

Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 203B – Forecasting & Managerial Research Methods (3 units)

Course Description: Practical statistical methods for managerial decision making covers regression analysis, time series analysis and forecasting, design and analysis of experiments in managerial research and contingency table analysis. Application of these methods to marketing, finance, accounting, production, operations, and public policy.

Prerequisite(s): MGT 203A or MGB 203A or MGP 203A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 204 – Marketing Management (3 units)

Course Description: Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 205 – Financial Theory & Policy (3 units)

Course Description: Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 206 – Decision Making & Management Science (3 units)

Course Description: Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasizes how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment.

Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 207 – Management Information Systems (3 units)

Course Description: Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security.

Prerequisite(s): Graduate student or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 215 – Business Law (3 units)

Course Description: Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law.

Prerequisite(s): Completion of administration core requirements or petition with consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 216 – Managing Professionals, Budgets, Controls & Ethics (3 units)

Course Description: Performance measures, budgetary controls and ethical pressures which occur at middle management levels in service-type operations. Addresses such organizations as engineering, medical groups, law offices, management consultants.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 220 – Management of Social Networks (3 units)

Course Description: Principles and applications of social network theory: coordinating divergent interests to create value for individuals and organizations. Emphasis on conceptual models, web-based diagnostic tools, and practical applications.

Prerequisite(s): MGT 201A.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to MBA students only.

Grade Mode: Letter.

MGT 223 – Power & Influence in Management (3 units)

Course Description: Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics.

Prerequisite(s): MGT 201A or MGB 201A or MGP 201A; consent of instructor.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

MGT 224 – Managing People in High-Performance Organizations (3 units)

Course Description: Strategic approach to the management of people within organization. Analyze employment systems' fit with firms' environments and strategies. Explore consequences of choices firms make in managing people; decisions as to selection, performance evaluation, compensation, and other management policies and practices.

Prerequisite(s): MGT 201A or MGB 201A or MGP 201A.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Credit Limitation(s): Not open to students who have taken MGB 224 or MGP 224.

Grade Mode: Letter.

MGT 234 – Pricing (3 units)

Course Description: Combines lectures, cases and homework to teach students tools and skills necessary to analyze pricing situations, make pricing decisions, and implement them, in a systematic manner.

Prerequisite(s): MGB 204 or MGP 204 or MGT 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGT 239 – Digital Marketing (3 units)

Course Description: Equips students for a career in digital marketing and social media. Topics include online advertising, search engine optimization, interactive mktg, online privacy issues, e-commerce, social influence, social network theory, measurement of social influence and integrating social and traditional media.

Prerequisite(s): MGT 204 or MGB 204 or MGP 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

MGT 240 – Management Policy & Strategy (3 units)

Course Description: Examines the scope of missions, objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Real client organizations, in the private and public sectors, are assigned to student teams as the subjects of study.

Prerequisite(s): First-year core courses of M.B.A. program.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 240A – Intergrated Management Project (3 units)

Course Description: Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product.

Prerequisite(s): First-year core courses of MBA program.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to full-time MBA students.

Grade Mode: Letter.

MGT 241 – New Product Development (3 units)

Course Description: State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems.

Prerequisite(s): MGT 204 or MGB 204 or MGP 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to graduate students in the Graduate School of Management.

Grade Mode: Letter.

MGT 242 – Marketing Communications (3 units)

Course Description: Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising, consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 243 – Customer Relationship Management (3 units)

Course Description: Customer Relationship Management (CRM) is a management approach under which marketing activities are organized and measured around customers (rather than around brands.) This approach is appealing because customers, not brands, are those who make buying decisions.

Prerequisite(s): MGT 204 or MGB 204 or MGP 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to MBA students only.

Grade Mode: Letter.

MGT 244 – New & Small Business Ventures (3 units)

Course Description: Student teams develop complete business plans for their own start-up ventures. Process includes: elevator pitch, business strategy, comprehensive bottoms-up financial projections, capital requirements, product differentiation, competitive, alliance, and go-to-market strategy development, investor presentation, and comprehensive written business plan.

Prerequisite(s): MGT 204 or MGB 204 or MGP 204.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 245 – Business Writing (3 units)

Course Description: Techniques for sharpening writing skills are introduced, along with grammatical structure, word choice, and punctuation. Learn to develop styles that are pitch-perfect for given situations and to think strategically about each communication challenge in a management setting.

Prerequisite(s): Completion of first-year core courses at the Graduate School of Management or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to MBA students only.

Grade Mode: Letter.

MGT 246 – Negotiation & Team Building (3 units)

Course Description: Basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier.

Prerequisite(s): MGT 205; MGT 202.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

MGT 247 – Customer Service as a Marketing Tool (3 units)

Course Description: Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 248 – Marketing Strategies (3 units)

Course Description: Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing.

Prerequisite(s): (MGT 202A or MGV 202AV or MGP 202A); (MGP 204 or MGB 204 or MGT 204).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 249 – Marketing Research (3 units)

Course Description: Addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications.

Prerequisite(s): (MGT 202A or MGV 202AV or MGP 202A); (MGP 203A or MGB 203A or MGT 203A); (MGT 204 or MGB 204 or MGP 204).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 250 – Technology, Competition & Strategy (3 units)

Course Description: Why is software typically so defective? Why do many firms in the IT industry give away their best products free? Helps analyze questions like these by modeling competition and strategy in the network, technology and information industries.

Prerequisite(s): (MGT 202A or MGV 202AV or MGP 202A); (MGP 203A or MGT 203A or MGB 203A).

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGT 251 – Management of Innovation (3 units)

Course Description: Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics.

Prerequisite(s): MGT 201A or MGB 201A or MGP 201A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 252 – Managing for Operational Excellence (3 units)

Course Description: Explores the management of operations as applied to manufacturing as well as services provided both inside and outside the organization. Develop an understanding of how uncertainty affects planning and delivery by looking at fundamental models of operations.

Prerequisite(s): MGT 203A or MGB 203A or MGP 203A.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to students in the Graduate School of Management.

Grade Mode: Letter.

MGT 253 – Corporate Social Responsibility (3 units)

Course Description: Develop a thought process and approach to corporate social responsibility that students will be able to build on during their post-school leadership roles, whether as corporate executives, entrepreneurs, or NGO leaders.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 255 – Entrepreneurship & Venture Investment Clinic (3 units)

Course Description: Provides the necessary analytical and design tools to create business ideas and refine business models based on emerging technologies. Students learn to work closely in small teams to synthesize technical, strategic, and marketing needs into designs for new ventures.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Limited to 30 students.

Grade Mode: Letter.

MGT 258 – Mergers & Acquisitions (3 units)

Course Description: Focuses on the market for corporate acquisitions and restructuring activity. Topics include: sources of value creation; takeovers; anti-takeover provisions; bidding strategies; use of leverage in buyouts; regulatory risk and hurdles; and, valuation approaches for highly leveraged transactions.

Prerequisite(s): MGT 205.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 259 – Banking & the Financial System (3 units)

Course Description: Analyzes the role of financial markets and institutions in allocating capital. Focuses on: bank lending; debt securities; financial market innovations; regulation; functions of commercial banks and other financial intermediaries. Utilizes case studies.

Prerequisite(s): MGB 205 or MGP 205; consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 260 – Corporate Finance (3 units)

Course Description: Focuses on planning, acquiring, and managing a company's financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure.

Prerequisite(s): (MGT 200A or MGB 200A or MGP 200A); (MGP 202A or MGV 202AV or MGT 202A); (MGT 205 or MGP 205 or MGB 205).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 261 – Investment Analysis (3 units)

Course Description: Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance.

Prerequisite(s): (MGT 203A or MGB 203A or MGP 203A); (MGP 205 or MGT 205 or MGB 205).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 262 – Money & Security Markets (3 units)

Course Description: Examines how money and securities markets are organized; how public agencies, businesses, others obtain and invest funds in those markets. Relationship between interest rates, monetary policy, government's role in improving capital markets, approaches to assessing changes in regulation of specific markets.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 263 – Derivative Securities (3 units)

Course Description: Behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods.

Prerequisite(s): (MGT 203A or MGB 203A or MGP 203A); (MGP 205 or MGT 205 or MGB 205).

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Grade Mode: Letter.

MGT 264 – Business Taxation (3 units)

Course Description: Analysis of the impact of business taxation on investment, production, and finance decisions. Discussion of the relationship between business organization and tax liability. Not intended for tax specialists.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 265 – Technology Finance & Valuation (3 units)

Course Description: Venture capital finance and the related practice of research and development finance. Application of finance tools and framework to the world of venture capital and financing of projects in high-growth industries.

Prerequisite(s): MGT 205 or MGP 205 or MGB 205.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program; not open to students who have taken MGV 265V.

Grade Mode: Letter.

MGT 266 – International Finance (3 units)

Course Description: Studies fixed and floating exchange-rate systems. Topics include determinants of a nation's balance of international payments; macroeconomic interdependence of nations under various exchange-rate regimes and its implications for domestic stabilization policies; and the international coordination of monetary and stabilization policies.

Prerequisite(s): MGB 205 or MGT 205 or MGP 205; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 267 – Teams & Technology (3 units)

Course Description: Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; imparting interpersonal skills for implementing effective strategies; understanding how technological change affects team processes.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to working professional MBA students.

Grade Mode: Letter.

MGT 268 – Articulation & Critical Thinking (3 units)

Course Description: Commitment to this course, become competent public speakers, write well at a level expected in business, think efficiently and critically about business challenges and have a useful personal code of ethics to shape their actions and decisions. No student may repeat course for credit.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

MGT 270 – Corporate Financial Reporting (3 units)

Course Description: Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymakers.

Prerequisite(s): MGT 200A or MGP 200A or MGB 200A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 271 – Strategic Cost Management (3 units)

Course Description: Theoretical frameworks and associated techniques for using organizational design and cost management to achieve a sustainable, profitable cost structure. Topics include: target costing, process design for low cost, total cost of ownership, cost of customers, implementing structural change, and incentives.

Prerequisite(s): MGT 202A or MGP 202A or MGV 202AV.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGT 272 – Evaluation of Financial Information (3 units)

Course Description: Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed.

Prerequisite(s): MGT 200A or MGP 200A or MGB 200A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 273 – Accounting & Reporting for Government Nonprofit Entities (3 units)

Course Description: Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. Introduction to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agencies.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 274 – Corporate Governance (3 units)

Course Description: Discusses how corporations can better operate in the interests of shareholders and public. Directly relevant to managers, consultants in compensation and incentives, staff working on mergers and acquisitions, corporate regulators, shareholder rights activists, and board members.

Prerequisite(s): Full-time MBA students or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 276 – Real Estate, Finance & Development (3 units)

Course Description: Focus on single family, attached, detached, multi-family, and light commercial development. Students will study factors which make up successful real estate developments. Considers financial aspects involved in land acquisition, land development, construction, and project lending.

Prerequisite(s): (MGP 205 or MGT 205 or MGB 205); (MGP 201A or MGB 201A or MGT 201A).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 281 – Systems Analysis & Design (3 units)

Course Description: Design and specification of computer-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 282 – Supply Chain Management (3 units)

Course Description: Matching supply with demand is a primary challenge for a firm: excess supply is too costly, inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive.

Prerequisite(s): MGT 203A or MGP 203A or MGB 203A.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGT 284 – Applied Linear Models for Management (3 units)

Course Description: Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy problems.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 285 – Time Series Analysis & Forecasting (3 units)

Course Description: Considers application of time series methods to evaluation and forecasting problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process control.

Prerequisite(s): MGT 203B or MGP 203B or MGP 203B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 286 – Telecommunications & Computer Networks (3 units)

Course Description: Communication system components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks.

Prerequisite(s): MGT 280.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 287 – Business Database & Database Marketing (3 units)

Course Description: Practical introduction to fundamental principles of database management systems and database marketing. Database design. SQL queries. Concepts of database marketing, data warehouse, data visualization and big data analytics.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 288 – Special Topics in Management of Information Systems (3 units)

Course Description: Managerial aspects of information systems. Topics stressing applications in organizations chosen from: economics of computers and information systems, decision support systems, management of computer-based information systems, office automation.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 290 – Topics in General Management (3 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in MGT 201A and MGT 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 291 – Topics in Organizational Behavior (3 units)

Course Description: Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in MGT 201A and MGT 201B, or current business interest topics in fields of organization design, strategy, development, or workplace processes.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 292 – Topics in Finance (3 units)

Course Description: Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 293 – Topics in Marketing (3 units)

Course Description: Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hitech marketing, advertising, sales promotions, marketing through the Web.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 294 – Topics in Accounting (3 units)

Course Description: Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 295 – Topics in Information Technology (3 units)

Course Description: Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 296 – Topics in Technology Management (3 units)

Course Description: Cyclical nature of innovation and technological change, features of innovative firms and industries, national innovation systems, and impact of information technologies on innovation processes.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 297 – Topics in International Management (3 units)

Course Description: Broader environment in which U.S. firms and their foreign competitors operate. Integration of material from other topics courses (marketing, strategy, finance, accounting, information technology, technology management) into the international setting.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MGT 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MGT 400A – Financial Accounting (4 units)

Course Description: Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program only.

Credit Limitation(s): Not available for credit for students who have taken MGT 200A, MGP 200A, MGB 200A, MGV 200AV or MGV 400AV.

Grade Mode: Letter.

MGT 401A – The Individual & Group Dynamics (4 units)

Course Description: Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 201A, MGP 201A, MGB 201A or MGV 201AV.

Grade Mode: Letter.

MGT 401B – Organizational Strategy & Structure (4 units)

Course Description: Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 201B, MGP 201B, MGB 201B or MGV 201BV.

Grade Mode: Letter.

MGT 402A – Markets & the Firm (4 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 202A, MGP 202A, MGB 202A or MGV 202AV.

Grade Mode: Letter.

MGT 402AV – Markets & The Firm (4 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Learning Activities: Web Virtual Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGB 202A, MGP 202A, MGT 202A, MGV 202AV, MGB 402A, MGP 402A, MGT 402A, MGB 402AV, MGP 402AV, MGT 402AV.

Grade Mode: Letter.

MGT 403A – Data Analysis for Managers (4 units)

Course Description: Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit for students who have taken MGT 203A, MGP 203A, MGB 203A or MGV 403AV.

Grade Mode: Letter.

MGT 404 – Marketing Management (4 units)

Course Description: Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 204, MGP 204, MGB 204 or MGV 204V.

Grade Mode: Letter.

MGT 405 – Financial Theory & Policy (4 units)

Course Description: Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 205, MGP 205, MGB 205 or MGV 205V.

Grade Mode: Letter.

MGT 406A – Decision Analytics: Spreadsheet Based (2 units)

Course Description: Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not available for credit for students who have taken MGT 206, MGP 206, MGB 206 or MGV 206V.

Grade Mode: Letter.

MGT 406B – Decision Analytics: Scalable (2 units)

Course Description: Builds on concepts learned in 406A to develop techniques for describing and implementing models that can scale in all dimensions.

Prerequisite(s): MGT 406A or MGP 406A or MGB 406A.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not available for credit for students who have taken MGT 206, MGP 206, MGB 206 or MGV 206V.

Grade Mode: Letter.

MGT 407 – Storytelling for Leadership (1 unit)

Course Description: Internalize the fundamental principles behind stories that educate, influence, motivate, inspire, persuade and connect.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGT 408 – The Business of the Media (1 unit)

Course Description: Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media, both news and entertainment.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGT 408V – The Business of the Media (1 unit)

Course Description: Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media, both news and entertainment.

Learning Activities: Web Virtual Lecture 1 hour(s).

Grade Mode: Letter.

MGT 409 – Managing Multi-Asset Class Investment Portfolios (1 unit)

Course Description: Examines top down management of multi-asset class portfolios. Topics include bonds, hedge funds, private equity, real estate, commodities, endowments, return generation, performance analysis, credit cycles, financial crises, manager selection, investment policy, and investment careers. Student teams present endowment portfolio recommendations.

Prerequisite(s): MGT 202A; MGT 203A; MGT 205.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGT 412 – International Marketing (1 unit)

Course Description: Basic concepts of international marketing. Understanding and managing heterogeneous, dynamic, and interdependent environments across countries. How to develop and implement an international marketing strategy: where and how to compete, how to adapt your marketing mix.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGT 414 – Multi-Channel Marketing (1 unit)

Course Description: Multi-channel marketing strategies empower managers to create value for different customer segments. Covers the necessary concepts to evaluate and select go-to market strategies in order to capitalize on the ubiquity of modern customers.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGT 415 – Climate Risks & Opportunities (1 unit)

Course Description: Provide a working knowledge of the risks and opportunities arising from climate change and climate policy for businesses.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGT 415V – Business Law (3 units)

Course Description: Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Not available for credit for students who have taken MGT 215, MGP 215, or MGB 215.

Grade Mode: Letter.

MGT 416 – Topics in Private Equity and Mergers & Acquisitions (2 units)

Course Description: Focuses on the finance principles related to the risk and return of the private equity (PE) industry, valuation of PE target companies, the structuring of leveraged buyouts (LBOs), and the management of portfolio companies.

Prerequisite(s): MGT 205 (can be concurrent) or MGB 205 (can be concurrent) or MGP 205 (can be concurrent).

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGT 419 – Business Strategy Consulting Skills (1 unit)

Course Description: Students will learn practical business consulting skills which will help apply strategy theories in the workplace. Students will learn and practice tools to frame and analyze problems, conduct research, communicate findings and navigate client relationships.

Learning Activities: Lecture 5 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Grade Mode: Letter.

MGT 419V – Business Strategy Consulting Skills (1 unit)

Course Description: Students will learn practical business consulting skills which will help apply strategy theories in the workplace. Students will learn and practice tools to frame and analyze problems, conduct research, communicate findings and navigate client relationships.

Learning Activities: Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit for students who have taken MGT 419, MGP 419, or MGB 419.

Grade Mode: Letter.

MGT 423 – Leader as Coach: An Introduction to Coaching Skills for Leaders (1 unit)

Course Description: Introduces the fundamental coaching skills and coaching models that leaders can apply in everyday interactions with their team and colleagues in order to build trust, overcome challenges and help others discover their own full potential.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Grade Mode: Letter.

MGT 423V – Power & Influence in Management (3 units)

Course Description: Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics.

Prerequisite(s): MGT 201A or MGP 201A or MGB 201A.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 223, MGP 223, MGB 223, or MGV 223V.

Grade Mode: Letter.

MGT 426 – The Business of Healthcare (1 unit)

Course Description: Intended to provide an overall understanding of the unique business aspects of the healthcare industry.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program (Business Administration-Working Professional, Business Administration-Bay Area, Business Administration-Full-Time).

Grade Mode: Letter.

MGT 429 – Detection & Prevention of Asset Misappropriation Fraud in the Workplace (1 unit)

Course Description: Discusses the fundamentals of fraud detection and prevention in the workplace. Learn the major schemes involving workplace fraud, how management can detect fraud and what policies and procedures can be implemented to prevent fraud.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Grade Mode: Letter.

MGT 431 – Project Management (1 unit)

Course Description: Students learn project management; including project scope, project planning, milestones and project closing. Important themes include leadership, team dynamics, storytelling/creating a narrative, communication, and conflict management.

Learning Activities: Lecture 10 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Grade Mode: Letter.

MGT 432 – Project Management with Applications in Healthcare (1 unit)

Course Description: Focuses on the heart of healthcare administration and how project management can be applied as a key lever to increase efficiency, decrease costs and improve the patient experience.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGT 432V – Project Management with Applications in Healthcare (1 unit)

Course Description: Focuses on the heart of healthcare administration and how project management can be applied as a key lever to increase efficiency, decrease costs and improve the patient experience.

Learning Activities: Web Virtual Lecture 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 432, MGP 432, or MGB 432.

Grade Mode: Letter.

MGT 433 – Corporate Social Responsibility (1 unit)

Course Description: Learn practical information that will help students understand the basics of designing, managing and evaluating an effective CSR program. Expose students to a basic set of CSR issues in the context of cross-purpose business challenges and then focus on the analysis and critical decisions that managers must make to move their business and their social agenda forward.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGT 435 – Data Wrangling (1 unit)

Course Description: Develop practical skills to pre-process data. Tidied raw data can then be used for downstream data analysis, modeling, and visualization.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGT 436 – Introduction to Derivative Securities (1 unit)

Course Description: Introduction to derivative securities and other forms of financial innovations.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGT 437 – Healthcare Analytics (1 unit)

Course Description: Introduction to advanced analytics framework, key Artificial Intelligence & Machine Learning concepts, and modeling techniques towards solving high-value and high-impact healthcare business problems.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program only.

Grade Mode: Letter.

MGT 437V – Healthcare Analytics (1 unit)

Course Description: Introduction to advanced analytics framework, key Artificial Intelligence & Machine Learning concepts, and modeling techniques towards solving high-value and high-impact healthcare business problems.

Learning Activities: Web Virtual Lecture 1 hour(s).

Credit Limitation(s): Not open to students who have taken MGT 437, MGP 437, or MGB 437.

Grade Mode: Letter.

MGT 440 – Integrated Management Project (6 units)

Course Description: Applies classroom learning to solve complex business challenges for real-world clients. Students learn practical consulting skills while their clients benefit from the student's experience, insights, and work product.

Prerequisite(s): First-year core courses of MBA program.

Learning Activities: Project 3 hour(s).

Enrollment Restriction(s): Open to students in the MBA Program (SMBE, SMBB, SMBA).

Grade Mode: Letter.

MGT 440A – Integrated Management Project (6 units)

Course Description: Applies classroom learning to solve complex business challenges for international business clients. Learn practical consulting skills while clients benefit from the student's experience, insights, and work product.

Prerequisite(s): First-year core courses of MBA program.

Learning Activities: Lecture/Discussion 6 hour(s).

Enrollment Restriction(s): Restricted to full-time (day) MBA students.

Grade Mode: Letter.

MGT 440B – Integrated Management Project (3 units)

Course Description: Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product.

Prerequisite(s): First-year core courses of MBA program.

Learning Activities: Project 3 hour(s).

Enrollment Restriction(s): Restricted to full-time (day) MBA students.

Grade Mode: Letter.

MGT 440C – Integrated Management Project Team Lead (1 unit)

Course Description: Integrated Management Project Team leader.

Learning Activities: Project 1 hour(s).

Grade Mode: Letter.

MGT 440S – Integrated Management Simulation (4 units)

Course Description: Apply theory and concepts from marketing, finance, organizational behavior, accounting, and strategy in order to manage a simulated corporation.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MGT 441V – New Product Development (3 units)

Course Description: State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems.

Prerequisite(s): MGT 204 or MGP 204 or MGB 204.

Learning Activities: Web Virtual Lecture 3 hour(s).

Grade Mode: Letter.

MGT 443 – Customer Analytics (3 units)

Course Description: Teaches how to use customer analytics to learn about and market to individual customers. Examines the different types of data analytics and how they fit into the customer relationship management world.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): No open for credit for students who have taken MGT 443V, MGP 443V or MGB 443V.

Grade Mode: Letter.

MGT 443V – Customer Analytics (3 units)

Course Description: Teaches students how to use customer analytics to learn about and market to individual customers. Examines the different types of data analytics and how they fit into the customer relationship management world.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): No open for credit for students who have taken MGT 443, MGP 443 or MGB 443.

Grade Mode: Letter.

MGT 444 – Strategic Branding (3 units)

Course Description: Provides a comprehensive understanding of branding strategies and implementation.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGT 445 – Product Management (4 units)

Course Description: Overview of the requirements, issues, and tools involved in marketing of products and services via lectures, case studies, and a hands-on, quarter-long competitive simulation.

Prerequisite(s): MGT 404 or MGP 404 or MGB 404.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Not open to students who have taken MGB 445Y or MGP 445Y or MGT 445Y or MGV 445V.

Grade Mode: Letter.

MGT 445Y – Product Management (4 units)

Course Description: Overview of the requirements, issues, and tools involved in marketing of products and services via lectures, case studies, and a hands-on, quarter-long competitive simulation.

Prerequisite(s): MGT 404 or MGP 404 or MGB 404.

Learning Activities: Web Virtual Lecture 2 hour(s), Lecture 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGV 445V.

Grade Mode: Letter.

MGT 448 – Practicum for Marketing Strategies (1 unit)

Course Description: Provides opportunities to apply the concepts covered in the Marketing Strategies class through a group project involving the analysis of strategic marketing decisions based on business-related issues, simulation and modeling.

Prerequisite(s): MGT 248.

Learning Activities: Project 1 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGT 448V – Marketing Strategies (3 units)

Course Description: Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing.

Prerequisite(s): (MGT 202A or MGP 202A or MGB 202A); (MGT 204 or MGP 204 or MGB 204).

Learning Activities: Web Virtual Lecture 3 hour(s).

Repeat Credit: Not open for credit to students who have taken MGT 248, MGP 248, MGB 248, or MGV 248V.

Grade Mode: Letter.

MGT 450 – Technology Competition & Strategy (4 units)

Course Description: Provides a framework for thinking about technology competition and strategy.

Prerequisite(s): (MGT 402A or MGP 402A or MGB 402A); (MGT 403A or MGP 403A or MGB 403A).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MGT 450Y – Technology Competition & Strategy (4 units)

Course Description: Provides a framework for thinking about technology competition and strategy.

Prerequisite(s): (MGT 402A or MGP 402A or MGB 402A); (MGT 403A or MGP 403A or MGB 403A).

Learning Activities: Web Virtual Lecture 1 hour(s), Lecture 3 hour(s).

Grade Mode: Letter.

MGT 452 – Managing for Operational Excellence (4 units)

Course Description: Explore the management of operations as applied to manufacturing, as well as services provided both inside & outside the organization. Develop an understanding of how uncertainty affects planning & delivery by looking at fundamental models of operations.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 252, MGP 252, MGB 252 or MGV 252V.

Grade Mode: Letter.

MGT 454A – Causal Inference and Statistical Experiments (2 units)

Course Description: Surveys causal inference methods with applications in business settings, especially marketing. Covers both primary data approaches such as A/B testing and secondary data approaches such as difference-in-differences.

Prerequisite(s): MGT 403A or MGP 403A or MGB 403A.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MGT 454B – Marketing Analytics (2 units)

Course Description: Surveys a variety of marketing analytics applications, training students to identify (i) what questions data can answer, and, conversely, (ii) what data is needed to answer a question.

Prerequisite(s): MGT 454A or MGP 454A or MGB 454A.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MGT 460A – Corporate Finance: Fundamentals (2 units)

Course Description: Study valuation techniques in applied settings, study a variety of investment decisions, and analyze how capital structure considerations play a role in firm's investment policies.

Prerequisite(s): MGT 205 or MGP 205 or MGB 205.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 260, MGP 260 or MGB 260.

Grade Mode: Letter.

MGT 460B – Corporate Finance: Advanced Topics (2 units)

Course Description: Advanced course in corporate finance that builds on 460A, with an aim to extend knowledge of the theory and practice of corporate finance.

Prerequisite(s): MGT 460A or MGB 460A; MGP 460A.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 260, MGP 260 or MGB 260.

Grade Mode: Letter.

MGT 466 – Leading Teams (2 units)

Course Description: Advanced topics in group management and behavior to lead teams and work effectively. Provide conceptual guidelines for analyzing and diagnosing group dynamics, understand how technological change affects team processes in organizations, and impart practical interpersonal skills for implementing effective strategies for group situations.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MGT 467 – Practicum for Teams & Technology (1 unit)

Course Description: Groups investigate the performance, creativity, conflict, information sharing, and leadership behaviors of a real world team. Provide consulting advice to the team, which not only gives analytic skills, but also builds presentation skills.

Prerequisite(s): MGT 267.

Learning Activities: Project 1 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGT 467V – Teams & Technology (3 units)

Course Description: Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; imparting interpersonal skills for implementing effective strategies; understanding how technological change affects team processes.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 267, MGP 267, MGB 267, or MGV 267V.

Grade Mode: Letter.

MGT 468 – Articulation & Critical Thinking (4 units)

Course Description: Public speaking, business writing, efficient and critical thinking about business challenges, and defining a personal code of ethics to shape actions and decisions.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 268, MGP 268, MGB 268 or MGV 268V.

Grade Mode: Letter.

MGT 469 – Machine Learning with Python (4 units)

Course Description: Introduction to machine learning methods covering association rules, clustering, classification, and numeric prediction. Hands-on machine learning skills with Python. Big data technologies. Business applications.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to students in MBA program; exemptions may be granted upon request from students enrolled in the online MBA program.

Credit Limitation(s): No credit to students who have taken MGV 469V, MGB 269, MGP 269, MGT 269.

Grade Mode: Letter. Letter.

MGT 473 – Managerial Cost Accounting (2 units)

Course Description: Covers in-depth the cost and management accounting concepts enabling students to make decisions, including interpreting business situations, identifying available options, interpreting impacts on financial statements and stakeholders, and clearly and articulately recommending a course of action.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Grade Mode: Letter.

MGT 474 – Managerial Budgeting (2 units)

Course Description: Covers in-depth the management accounting budgeting concepts enabling students to make decisions, including interpreting business situations, identifying available options, interpreting impacts on financial statements and stakeholders, and clearly and articulately recommending a course of action.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Grade Mode: Letter.

MGT 474V – Managerial Budgeting (2 units)

Course Description: Covers in-depth the management accounting budgeting concepts enabling students to make decisions, including interpreting business situations, identifying available options, interpreting impacts on financial statements and stakeholders, and clearly and articulately recommending a course of action.

Learning Activities: Web Virtual Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Grade Mode: Letter.

MGT 480 – Professional English for Multilingual Business Students (2 units)

Course Description: Workshop-style course hones English writing and presentation skills. Learn techniques to improve professional communication, and practice with weekly assignments.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to Graduate School of Management professional students.

Grade Mode: S/U only.

MGT 480V – Professional English for Multilingual Business Students (2 units)

Course Description: Workshop-style course hones English writing and presentation skills. Learn techniques to improve professional communication, and practice with weekly assignments.

Learning Activities: Web Virtual Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to Graduate School of Management professional students.

Grade Mode: S/U only.

MGT 490 – Topics in Business (1 unit)

Course Description: Provides opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses.

Prerequisite(s): Consent of instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to students in the MBA Program (SMBA, SMBB, SMBE).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 490A – Topics in Management (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MGT 490B – Topics in General Management-Extended (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such business writing, management, organizational behavior, business communications, development, finance and workplace processes.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 490BV – Topics in Management (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Web Virtual Lecture 2 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: Letter.

MGT 490V – Topics in General Management (3 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in MGT 201A and MGT 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes.

Learning Activities: Web Virtual Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 491V – Advanced Topics in Management (1 unit)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

MGT 492V – Topics in Finance (2 units)

Course Description: Contemporary and emerging issues in finance.

Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques.

Learning Activities: Web Virtual Lecture 2 hour(s).

Repeat Credit: May be repeated for credit when the topic differs; students can take this course repeatedly.

Grade Mode: Letter.

MGT 493V – Topics in Marketing (3 units)

Course Description: Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hi-tech marketing, advertising, sales promotions, marketing through the Web.

Learning Activities: Web Virtual Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGT 498 – Directed Group Study Management Practicum (1-12 units)

Course Description: Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses.

Prerequisite(s): Consent of instructor. Sponsorship of a GSM Academic Senate faculty member, and approval of graduate advisor.

Learning Activities: Project.

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

MGT 499 – Directed Individual Study Management Practicum (1-12 units)

Course Description: Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other Graduate School of Management courses.

Prerequisite(s): Consent of instructor. Sponsorship of a Graduate School of Management Academic Senate faculty member and approval of graduate advisor.

Learning Activities: Project.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Management; Online (MGV)

Graduate School of Management

MGV 200AV – Financial Accounting (4 units)

Course Description: Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA program only; do not enroll if Financial Accounting 200A or 400AV has been taken.

Credit Limitation(s): Not open for credit for students who have taken MGT 200A, MGP200A, or MGB 200A.

Grade Mode: Letter.

MGV 200BV – Managerial Accounting (4 units)

Course Description: Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 200B, MGP 200B, or MGB 200B.

Grade Mode: Letter.

MGV 201AV – The Individual & Group Dynamics (4 units)

Course Description: Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 201A, MGP 201A or MGB 201A.

Grade Mode: Letter.

MGV 201BV – Organizational Strategy & Structure (4 units)

Course Description: Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 201B, MGP 201B, or MGB 201B.

Grade Mode: Letter.

MGV 202AV – Markets & the Firm (4 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 202A, MGP 202A or MGB 202A.

Grade Mode: Letter.

MGV 203AV – Data Analysis for Managers (4 units)

Course Description: Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA program only; do not enroll if Data Analysis for Managers 203A or 403AV has been taken.

Credit Limitation(s): Not open for credit to students who have taken MGT 203A, MGP 203A, or MGB 203A.

Grade Mode: Letter.

MGV 203BV – Forecasting & Managerial Research Methods (4 units)

Course Description: Influence of government and international factors on business. Distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance.

Prerequisite(s): MGV 203AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA program only.

Credit Limitation(s): Not open for students who have taken MGT 203B, MGP 203B, or MGB 203B.

Grade Mode: Letter.

MGV 204V – Marketing Management (4 units)

Course Description: Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 204, MGP 204, or MGB 204.

Grade Mode: Letter.

MGV 205V – Financial Theory & Policy (4 units)

Course Description: Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 205, MGP 205, or MGB 205.

Grade Mode: Letter.

MGV 206V – Decision Analytics (4 units)

Course Description: Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasis on how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGB 206, MGP 206, or MGT 206.

Grade Mode: Letter.

MGV 207V – Management Information Systems (4 units)

Course Description: Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 207, MGP 207, or MGB 207.

Grade Mode: Letter.

MGV 215V – Business Law (4 units)

Course Description: Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law.

Learning Activities: Web Virtual Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 215, MGP 215, or MGB 215.

Grade Mode: Letter.

MGV 223V – Power & Influence (4 units)

Course Description: Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics.

Prerequisite(s): MGV 201AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 223, MGP 223, or MGB 223.

Grade Mode: Letter.

MGV 224V – Managing People in High-Performance Organizations (4 units)

Course Description: Explore choices firms make in managing workers—decisions as to wages, benefits, working conditions, and other management policies and practices. Analyze employment systems' fit with firms' environments and strategies, and the consequences of choices managers make regarding policies and practices.

Prerequisite(s): MGV 201AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 224, MGP 224, or MGB 224.

Grade Mode: Letter.

MGV 226V – The Causes of Organizational Wrongdoing (4 units)

Course Description: Explores the reasons why otherwise ethical, socially responsible, and law-abiding people become involved in wrongful courses of action in organizations.

Prerequisite(s): MGV 201AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Grade Mode: Letter.

MGV 234V – Pricing (4 units)

Course Description: Combines lectures, cases and homework to teach students tools and skills necessary to analyze pricing situations, make pricing decisions, and implement them, in a systematic manner.

Prerequisite(s): MGV 202AV; MGV 203BV; MGV 204V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 234, MGP 234, or MGB 234.

Grade Mode: Letter.

MGV 239V – Digital Marketing (4 units)

Course Description: Equips students for a career in digital marketing and social media. Topics include online advertising, search engine optimization, interactive marketing, online privacy issues, e-commerce, social influence, social network theory, measurement of social influence and integrating social and traditional media.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 239, MGP 239 or MGB 239.

Grade Mode: Letter.

MGV 241V – New Product Development (4 units)

Course Description: State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 241, MGP 241, or MGB 241.

Grade Mode: Letter.

MGV 243V – Customer Relationship Management (4 units)

Course Description: Customer Relationship Management (CRM) is a management approach under which marketing activities are organized and measured around customers (rather than around brands.) This approach is appealing because customers, not brands, are those who make buying decisions.

Prerequisite(s): MGV 204V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 243, MGP 243, or MGB 243.

Grade Mode: Letter.

MGV 244V – New & Small Business Ventures (4 units)

Course Description: Teams develop complete business plans for their own start-up ventures. Process includes: elevator pitch, business strategy, comprehensive bottoms-up financial projections, capital requirements, product differentiation, competitive, alliance, and go-to-market strategy development, investor presentation, and comprehensive written business plan.

Prerequisite(s): MGV 201AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 244, MGP 244, or MGB 244.

Grade Mode: Letter.

MGV 246V – Negotiations in Organizations (4 units)

Course Description: Basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 246, MGP 246, or MGB 246.

Grade Mode: Letter.

MGV 248V – Marketing Strategy (4 units)

Course Description: Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing.

Prerequisite(s): MGV 204V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 248, MGP 248, or MGB 248.

Grade Mode: Letter.

MGV 249V – Marketing Research (4 units)

Course Description: Addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications.

Prerequisite(s): MGV 202AV; MGV 203AV; MGV 204V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 249, MGP 249, or MGB 249.

Grade Mode: Letter.

MGV 250V – Technology Competition & Strategy (4 units)

Course Description: Covers business strategies for firms that make technology products. Looks at distinctive economic forces affecting supply, demand, and markets, asks: How do these forces impact market outcomes? And how should firms shape their competitive strategy?

Prerequisite(s): MGV 202AV; MGV 203AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA program.

Credit Limitation(s): Not open for credit for students who have taken MGT 250, MGP 250 or MGB 250.

Grade Mode: Letter.

MGV 251V – Management of Innovation (4 units)

Course Description: Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics.

Prerequisite(s): MGV 201AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 251, MGP 251 or MGB 251.

Grade Mode: Letter.

MGV 252V – Managing for Operational Excellence (4 units)

Course Description: Explore the management of operations as applied to manufacturing, as well as services provided both inside & outside the organization. Develop an understanding of how uncertainty affects planning & delivery by looking at fundamental models of operations.

Prerequisite(s): MGV 203AV or MGV 403AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 252, MGP 252, or MGB 252.

Grade Mode: Letter.

MGV 253V – Corporate Social Responsibility (4 units)

Course Description: Develop a thought process and approach to corporate social responsibility that students will be able to build on during their post-school leadership roles, whether as corporate executives, entrepreneurs, or NGO leaders.

Learning Activities: Web Virtual Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 253, MGP 253 or MGB 253.

Grade Mode: Letter.

MGV 254V – Marketing Analytics (4 units)

Course Description: Several econometric models commonly used in marketing practice. How data and models can be used to answer questions, generate forecasts, and make decisions.

Prerequisite(s): MGV 203AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Grade Mode: Letter.

MGV 255V – Entrepreneurship Clinic (4 units)

Course Description: Provides the necessary analytical and design tools to create business ideas and refine business models based on emerging technologies. Students learn to work closely in small teams to synthesize technical, strategic, and marketing needs into designs for new ventures.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 255, MGP 255, or MGB 255.

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGV 258V – Mergers & Acquisitions (4 units)

Course Description: Focuses on the market for corporate acquisitions and restructuring activity. Topics include: sources of value creation; takeovers; anti-takeover provisions; bidding strategies; use of leverage in buyouts; regulatory risk and hurdles; and, valuation approaches for highly leveraged transactions.

Prerequisite(s): MGV 205V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 258, MGP 258, or MGB 258.

Grade Mode: Letter.

MGV 259V – Banking & the Financial System (4 units)

Course Description: Analyzes the role of financial markets and institutions in allocating capital. Focuses on: bank lending; debt securities; financial market innovations; regulation; functions of commercial banks and other financial intermediaries. Utilizes case studies.

Prerequisite(s): MGV 205V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 259, MGP 259, or MGB 259.

Grade Mode: Letter.

MGV 260V – Corporate Finance (4 units)

Course Description: Planning, acquiring, and managing a company's financial resources. Financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure.

Prerequisite(s): MGV 200AV or MGV 202AV or MGV 205V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 260, MGP 260 or MGB 260.

Grade Mode: Letter.

MGV 261V – Investment Analysis (4 units)

Course Description: Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance.

Prerequisite(s): MGV 203AV; MGV 205V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 261, MGP 261, or MGB 261.

Grade Mode: Letter.

MGV 263V – Derivative Securities (4 units)

Course Description: Behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods.

Prerequisite(s): MGV 203AV; MGV 205V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 263, MGP 263, or MGB 263.

Grade Mode: Letter.

MGV 264V – Business Taxation (4 units)

Course Description: Analysis of the impact of business taxation on investment, production, and finance decisions. Relationship between business organization and tax liability. Not intended for tax specialists.

Prerequisite(s): MGV 200AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 264, MGP 264 or MGB 264.

Grade Mode: Letter.

MGV 265V – Technology Finance & Valuation (4 units)

Course Description: Examines venture capital finance and the related practice of R&D finance. Goal is to apply finance tools and framework to the world of venture capital and financing of projects in high-growth industries.

Prerequisite(s): MGV 205V (can be concurrent).

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for students who have previously taken MGT 265, MGB 265, or MGP 265.

Grade Mode: Letter.

MGV 267V – Teams & Technology (4 units)

Course Description: Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager, imparting interpersonal skills for implementing effective strategies, understanding how technological change affects team processes.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 267, MGP 267, or MGB 267.

Grade Mode: Letter.

MGV 268V – Articulation & Critical Thinking (4 units)

Course Description: Public speaking, business writing, efficient and critical thinking about business challenges, and defining a personal code of ethics to shape actions and decisions.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 268, MGP 268, or MGB 268.

Grade Mode: Letter.

MGV 269V – Data Mining (4 units)

Course Description: Descriptive and Predictive Data mining methods covering association rules, clustering, classification, text mining, etc. Big data Technologies. Business applications. Hands-on data mining skills. Business intelligence for managerial decision making.

Prerequisite(s): MGV 203BV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 269, MGB 269 or MGP 269.

Grade Mode: Letter.

MGV 270V – Corporate Financial Reporting (4 units)

Course Description: Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymakers.

Prerequisite(s): MGV 200AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 270, MGP 270, or MGB 270.

Grade Mode: Letter.

MGV 272V – Evaluation of Financial Information (4 units)

Course Description: Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed.

Prerequisite(s): MGV 200AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 272, MGP 272, or MGB 272.

Grade Mode: Letter.

MGV 276V – Real Estate, Finance & Development (4 units)

Course Description: Focus on single family, attached, detached, multi-family, and light commercial development. Study factors that make up successful real estate developments. Consider financial aspects involved in land acquisition, land development, construction, and project lending.

Prerequisite(s): MGV 205V; MGV 201AV.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 276, MGP 276 or MGB 276.

Grade Mode: Letter.

MGV 282V – Supply Chain Management (4 units)

Course Description: Matching supply with demand is a primary challenge for a firm: excess supply is too costly, inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive.

Prerequisite(s): MGV 204V.

Learning Activities: Web Electronic Discussion 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 282, MGP 282, or MGB 282.

Grade Mode: Letter.

MGV 285V – Time Series Analysis & Forecasting (4 units)

Course Description: Consider application of time series methods to evaluation & forecasting problems. Covers univariate & multivariate ARIMA models and transfer function models. Applications in such areas as economics, finance, budgeting, program evaluation, and industrial process control.

Learning Activities: Web Electronic Discussion 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 285, MGP 285, or MGB 285.

Grade Mode: Letter.

MGV 287V – Business Database & Database Marketing (4 units)

Course Description: Practical introduction to fundamental principles of database management systems and database marketing. Database design. SQL queries. Concepts of database marketing, data warehouse, data visualization and big data analytics.

Prerequisite(s): Graduate standing in the Graduate School of Management or consent of instructor required.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit for students who have taken MGT 287, MGP 287, or MGB 287.

Grade Mode: Letter.

MGV 290V – Topics in General Management (4 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in MGV 201AV and MGV 201BV, or current business interest topics in fields of business writing, business communications, development, or workplace processes.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

MGV 297V – Topics in International Management (4 units)

Course Description: International environment in which U.S. firms and their foreign competitors operate. May integrate topics in marketing, strategy, finance, accounting, information technology, or technology management in an international context.

Prerequisite(s): Graduate standing in the Graduate School of Management or consent of instructor required.

Learning Activities: Web Virtual Lecture 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

MGV 400AV – Financial Accounting (4 units)

Course Description: Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.

Prerequisite(s): MGV 438V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA program only.

Grade Mode: Letter.

MGV 401AV – The Individual & Group Dynamics (4 units)

Course Description: Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 201A, MGP 201A, MGB 201A, MGV 201AV, MGT 401A, MGP 401A, or MGB 401A.

Grade Mode: Letter.

MGV 401BV – Organizational Strategy & Structure (4 units)

Course Description: Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 201B, MGP 201B, MGB 201B, MGV 201BV, MGT 401B, MGP 401B or MGB 401B.

Grade Mode: Letter.

MGV 402AV – Markets & The Firm (4 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 202A, MGP 202A, MGB 202A, MGV 202AV, MGT 402A, MGP 402A or MGB 402A.

Grade Mode: Letter.

MGV 403AV – Data Analysis for Managers (4 units)

Course Description: Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.

Prerequisite(s): MGV 438V.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA program only.

Grade Mode: Letter.

MGV 404V – Marketing Management (4 units)

Course Description: Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 204, MGP 204, MGB 204, MGV 204V, MGT 404, MGP 404 or MGB 404.

Grade Mode: Letter.

MGV 405V – Financial Theory & Policy (4 units)

Course Description: Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit for students who have taken MGT 205, MGP 205, MGB 205, MGV 205V, MGT 405, MGP 405 or MGB 405.

Grade Mode: Letter.

MGV 406AV – Decision Analytics: Spreadsheet Based (2 units)

Course Description: Develop decision-making and problem-solving skills in conjunction with a quantitative model-building approach.

Learning Activities: Web Virtual Lecture 2 hour(s).

Credit Limitation(s): No credit if student has taken MGT 206, MGP 206, MGB 206, MGV 206V, or MGV 406AV.

Grade Mode: Letter.

MGV 406BV – Decision Analytics: Scalable (2 units)

Course Description: Build on concepts learned in MGV 406AV to develop techniques for describing and implementing models that can scale in all dimensions.

Prerequisite(s): MGV 406AV.

Learning Activities: Web Virtual Lecture 2 hour(s).

Credit Limitation(s): No credit if student has taken MGT 206, MGP 206, MGB 206, MGV 206V, MGT 406B, MGP 406B, or MGP 406B.

Grade Mode: Letter.

MGV 438V – Quantitative Tools for Business (4 units)

Course Description: Quantitative analysis and business storytelling through practical quantitative frameworks, descriptive procedures and real life case studies.

Learning Activities: Web Electronic Discussion 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA program.

Grade Mode: Letter.

MGV 440V – Integrated Management Project (4 units)

Course Description: Examines the scope of missions, objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Simulated organizations in the private and public sectors, are assigned to student teams as the subjects of study.

Prerequisite(s): First-year core courses of online MBA program.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA Program only.

Credit Limitation(s): Not open for credit to students who have taken MGT 240, MGP 240, MGB 240 or MGT 440, MGP 440, MGB 440.

Grade Mode: Letter.

MGV 445V – Product Management (4 units)

Course Description: Overview of the requirements, issues, and tools involved in marketing of products and services via lectures, case studies, and a hands-on, quarter-long competitive simulation.

Prerequisite(s): MGV 204V.

Learning Activities: Web Virtual Lecture 3 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA program only.

Grade Mode: Letter.

MGV 452V – Managing for Operational Excellence (4 units)

Course Description: Explore the management of operations as applied to manufacturing, as well as services provided both inside & outside the organization. Develop an understanding of how uncertainty affects planning & delivery by looking at fundamental models of operations.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 252, MGP 252, MGB 252, MGV 252V, MGT 452, MGP 452 or MGB 452.

Grade Mode: Letter.

MGV 468V – Articulation & Critical Thinking (4 units)

Course Description: Public speaking, business writing, efficient and critical thinking about business challenges, and defining a personal code of ethics to shape actions and decisions.

Learning Activities: Web Virtual Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 268, MGP 268, MGB 268, MGV 268V, MGT 468, MGP 468, or MGB 468.

Grade Mode: Letter.

MGV 469V – Machine Learning with Python (4 units)

Course Description: Introduction to Machine Learning methods covering association rules, clustering, classification, and numeric prediction. Hands-on Machine Learning skills with Python. Big data technologies. Business applications.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students in the Online MBA program; exemptions may be granted upon request for students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 269, MGP 269 or MGB 269.

Grade Mode: Letter.

MGV 475V – R & SQL for Business Analytics (4 units)

Course Description: Introduces programming concepts and how they can be applied to derive insights from data and make management decisions.

Learning Activities: Web Virtual Lecture 4 hour(s).

Grade Mode: Letter.

MGV 490A – Topics in Management (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such as business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA program only.

Repeat Credit: May be repeated for credit when topic differs; can be taken for credit more than once.

Grade Mode: Satisfactory/Unsatisfactory only.

MGV 490AV – Topics in Management (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such as business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Web Virtual Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Online MBA program only.

Repeat Credit: May be repeated when topic differs; can be taken for credit more than once.

Grade Mode: Satisfactory/Unsatisfactory only.

MGV 490BV – Topics in Management–Extended (4 units)

Course Description: Extended topics in general management. Varied topics to cover more extensively; management, organizational behavior, finance, marketing, accounting and business analytics.

Learning Activities: Web Virtual Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the online MBA program only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

Management; Working Professional (MGP)

Graduate School of Management

MGP 200A – Financial Accounting (3 units)

Course Description: Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 200B – Managerial Accounting (3 units)

Course Description: Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations.

Prerequisite(s): MGT 200A or MGB 200A or MGP 200A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 201A – The Individual & Group Dynamics (3 units)

Course Description: Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 201B – Organizational Strategy & Structure (3 units)

Course Description: Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.

Prerequisite(s): Completion of first year courses in Graduate School of Management or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to MBA students only.

Grade Mode: Letter.

MGP 202A – Markets & the Firm (3 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 202B – Business, Government, & the International Economy (3 units)

Course Description: Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance.

Prerequisite(s): MGP 202A or MGT 202A or MGV 202AV.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 203A – Data Analysis for Managers (3 units)

Course Description: Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.

Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 203B – Forecasting & Managerial Research Methods (3 units)

Course Description: Practical statistical methods for managerial decision making covers regression analysis, time series analysis and forecasting, design and analysis of experiments in managerial research and contingency table analysis. Application of these methods to marketing, finance, accounting, production, operations, and public policy.

Prerequisite(s): MGP 203A or MGT 203A or MGB 203A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 204 – Marketing Management (3 units)

Course Description: Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 205 – Financial Theory & Policy (3 units)

Course Description: Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 206 – Decision Making & Management Science (3 units)

Course Description: Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasizes how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment.

Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 207 – Management Information Systems (3 units)

Course Description: Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security.

Prerequisite(s): Graduate student or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 215 – Business Law (3 units)

Course Description: Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law.

Prerequisite(s): Completion of administration core requirements or petition with consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 216 – Managing Professionals, Budgets, Controls & Ethics (3 units)

Course Description: Performance measures, budgetary controls and ethical pressures which occur at middle management levels in service-type operations. Addresses such organizations as engineering, medical groups, law offices, management consultants.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 220 – Management of Social Networks (3 units)

Course Description: Principles and applications of social network theory: coordinating divergent interests to create value for individuals and organizations. Emphasis on conceptual models, web-based diagnostic tools, and practical applications.

Prerequisite(s): MGP 201A.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to MBA students only.

Grade Mode: Letter.

MGP 223 – Power & Influence in Management (3 units)

Course Description: Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics.

Prerequisite(s): MGT 201A or MGB 201A or MGP 201A; consent of instructor.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

MGP 224 – Managing People in High-Performance Organizations (3 units)

Course Description: Strategic approach to the management of people within organization. Analyze employment systems' fit with firms' environments and strategies. Explore consequences of choices firms make in managing people; decisions as to selection, performance evaluation, compensation, and other management policies and practices.

Prerequisite(s): MGT 201A or MGB 201A or MGP 201A.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Credit Limitation(s): Not open to students who have taken MGB 224 or MGT 224.

Grade Mode: Letter.

MGP 234 – Pricing (3 units)

Course Description: Combines lectures, cases and homework to teach students tools and skills necessary to analyze pricing situations, make pricing decisions, and implement them, in a systematic manner.

Prerequisite(s): MGT 204 or MGB 204 or MGP 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA Program.

Grade Mode: Letter.

MGP 239 – Digital Marketing (3 units)

Course Description: Equips students for a career in digital marketing and social media. Topics include online advertising, search engine optimization, interactive mktg, online privacy issues, e-commerce, social influence, social network theory, measurement of social influence, integrating social and traditional media.

Prerequisite(s): MGP 204 or MGT 204 or MGB 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

MGP 240 – Management Policy & Strategy (3 units)

Course Description: Examines the scope of missions, objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Real client organizations, in the private and public sectors, are assigned to student teams as the subjects of study.

Prerequisite(s): First-year core courses of M.B.A. program.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 241 – New Product Development (3 units)

Course Description: State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems.

Prerequisite(s): MGT 204 or MGB 204 or MGP 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to students in the MBA Program for Working Professionals.

Grade Mode: Letter.

MGP 242 – Marketing Communications (3 units)

Course Description: Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising, consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 243 – Customer Relationship Management (3 units)

Course Description: Customer Relationship Management (CRM) is a management approach under which marketing activities are organized and measured around customers (rather than around brands.) This approach is appealing because customers, not brands, are those who make buying decisions.

Prerequisite(s): MGT 204 or MGP 204 or MGB 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to MBA students only.

Grade Mode: Letter.

MGP 244 – New & Small Business Ventures (3 units)

Course Description: Student teams develop complete business plans for their own start-up ventures. Process includes: elevator pitch, business strategy, comprehensive bottoms-up financial projections, capital requirements, product differentiation, competitive, alliance, and go-to-market strategy development, investor presentation, and comprehensive written business plan.

Prerequisite(s): MGT 204 or MGB 204 or MGP 204.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 245 – Business Writing (3 units)

Course Description: Techniques for sharpening writing skills are introduced, along with grammatical structure, word choice, and punctuation. Learn to develop styles that are pitch-perfect for given situations and to think strategically about each communication challenge in a management setting.

Prerequisite(s): Completion of first-year core courses at the Graduate School of Management or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to MBA students only.

Grade Mode: Letter.

MGP 246 – Negotiation & Team Building (3 units)

Course Description: Basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier.

Prerequisite(s): MGP 205; MGP 202.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

MGP 247 – Customer Service as a Marketing Tool (3 units)

Course Description: Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 248 – Marketing Strategies (3 units)

Course Description: Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing.

Prerequisite(s): (MGT 202A or MGV 202AV or MGP 202A); (MGP 204 or MGB 204 or MGT 204).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 249 – Marketing Research (3 units)

Course Description: Addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications.

Prerequisite(s): (MGT 202A or MGV 202AV or MGP 202A); (MGP 203A or MGB 203A or MGT 203A); (MGT 204 or MGB 204 or MGP 204).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 250 – Technology, Competition & Strategy (3 units)

Course Description: Why is software typically so defective? Why do many firms in the IT industry give away their best products free? Helps analyze questions like these by modeling competition and strategy in the network, technology and information industries.

Prerequisite(s): (MGT 202A or MGV 202AV or MGP 202A); (MGP 203A or MGB 203A or MGT 203A).

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGP 251 – Management of Innovation (3 units)

Course Description: Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics.

Prerequisite(s): MGT 201A or MGB 201A or MGP 201A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 252 – Managing for Operational Excellence (3 units)

Course Description: Explores the management of operations as applied to manufacturing as well as services provided both inside and outside the organization. Develop an understanding of how uncertainty affects planning and delivery by looking at fundamental models of operations.

Prerequisite(s): MGP 203A or MGB 203A or MGT 203A.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to students in the Graduate School of Management.

Grade Mode: Letter.

MGP 253 – Corporate Social Responsibility (3 units)

Course Description: Develop a thought process and approach to corporate social responsibility that students will be able to build on during their post-school leadership roles, whether as corporate executives, entrepreneurs, or NGO leaders.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 255 – Entrepreneurship & Venture Investment Clinic (3 units)

Course Description: Provides the necessary analytical and design tools to create business ideas and refine business models based on emerging technologies. Students learn to work closely in small teams to synthesize technical, strategic, and marketing needs into designs for new ventures.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Limited to 30 students.

Grade Mode: Letter.

MGP 258 – Mergers & Acquisitions (3 units)

Course Description: Focuses on the market for corporate acquisitions and restructuring activity. Topics include: sources of value creation; takeovers; anti-takeover provisions; bidding strategies; use of leverage in buyouts; regulatory risk and hurdles; and, valuation approaches for highly leveraged transactions.

Prerequisite(s): MGP 205 or MGT 205 or MGB 205.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 259 – Banking & the Financial System (3 units)

Course Description: Analyzes the role of financial markets and institutions in allocating capital. Focuses on: bank lending; debt securities; financial market innovations; regulation; functions of commercial banks and other financial intermediaries. Utilizes case studies.

Prerequisite(s): MGB 205 or MGT 205; consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 260 – Corporate Finance (3 units)

Course Description: Focuses on planning, acquiring, and managing a company's financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure.

Prerequisite(s): (MGT 200A or MGB 200A or MGP 200A); (MGP 202A or MGV 202AV or MGT 202A); (MGT 205 or MGB 205 or MGP 205).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 261 – Investment Analysis (3 units)

Course Description: Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance.

Prerequisite(s): (MGT 203A or MGP 203A or MGB 203A); (MGB 205 or MGT 205 or MGP 205).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Pass/No Pass only.

MGP 262 – Money & Security Markets (3 units)

Course Description: Examines how money and securities markets are organized; how public agencies, businesses, others obtain and invest funds in those markets. Relationship between interest rates, monetary policy, government's role in improving capital markets, approaches to assessing changes in regulation of specific markets.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 263 – Derivative Securities (3 units)

Course Description: Behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods.

Prerequisite(s): (MGT 205 or MGP 205 or MGB 205); (MGT 203A or MGP 203A or MGB 203A).

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Grade Mode: Letter.

MGP 264 – Business Taxation (3 units)

Course Description: Analysis of the impact of business taxation on investment, production, and finance decisions. Discussion of the relationship between business organization and tax liability. Not intended for tax specialists.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 265 – Technology Finance & Valuation (3 units)

Course Description: Venture capital finance and the related practice of research and development finance. Application of finance tools and framework to the world of venture capital and financing of projects in high-growth industries.

Prerequisite(s): MGB 205 or MGP 205 or MGT 205.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program; not open to students who have taken MGV 265V.

Grade Mode: Letter.

MGP 266 – International Finance (3 units)

Course Description: Studies fixed and floating exchange-rate systems. Topics include determinants of a nation's balance of international payments; macroeconomic interdependence of nations under various exchange-rate regimes and its implications for domestic stabilization policies; and the international coordination of monetary and stabilization policies.

Prerequisite(s): MGT 205 or MGB 205 or MGP 205; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 267 – Teams & Technology (3 units)

Course Description: Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; imparting interpersonal skills for implementing effective strategies; understanding how technological change affects team processes.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to working professional MBA students.

Grade Mode: Letter.

MGP 268 – Articulation & Critical Thinking (3 units)

Course Description: With commitment to this course, students will become competent public speakers, write well at a level expected in business, think efficiently and critically about business challenges and have a useful personal code of ethics to shape their actions and decisions. No student may repeat course for credit.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

MGP 270 – Corporate Financial Reporting (3 units)

Course Description: Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymakers.

Prerequisite(s): MGT 200A or MGP 200A or MGB 200A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 271 – Strategic Cost Management (3 units)

Course Description: Theoretical frameworks and associated techniques for using organizational design and cost management to achieve a sustainable, profitable cost structure. Topics include: target costing, process design for low cost, total cost of ownership, cost of customers, implementing structural change, and incentives.

Prerequisite(s): MGT 202A or MGP 202A or MGV 202AV.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGP 272 – Evaluation of Financial Information (3 units)

Course Description: Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed.

Prerequisite(s): MGT 200A or MGB 200A or MGP 200A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 273 – Accounting & Reporting for Government Nonprofit Entities (3 units)

Course Description: Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. Introduction to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agencies.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 274 – Corporate Governance (3 units)

Course Description: Discusses how corporations can better operate in the interests of shareholders and public. Directly relevant to managers, consultants in compensation and incentives, staff working on mergers and acquisitions, corporate regulators, shareholders rights activists, and board members.

Prerequisite(s): Full-time MBA students or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 276 – Real Estate, Finance & Development (3 units)

Course Description: Focus on single family, attached, detached, multi-family, and light commercial development. Study factors that make up successful real estate developments. Consider financial aspects involved in land acquisition, land development, construction, and project lending.

Prerequisite(s): (MGT 205 or MGB 205 or MGP 205); (MGP 201A or MGB 201A or MGT 201A).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 281 – Systems Analysis & Design (3 units)

Course Description: Design and specification of computer-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 282 – Supply Chain Management (3 units)

Course Description: Matching supply with demand is a primary challenge for a firm: excess supply is too costly, inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive.

Prerequisite(s): MGT 203A or MGB 203A or MGP 203A.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGP 284 – Applied Linear Models for Management (3 units)

Course Description: Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy problems.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 285 – Time Series Analysis & Forecasting (3 units)

Course Description: Considers application of time series methods to evaluation and forecasting problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process control.

Prerequisite(s): MGP 203B or MGT 203B or MGB 203B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 286 – Telecommunications & Computer Networks (3 units)

Course Description: Communication system components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks.

Prerequisite(s): MGP 280.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 287 – Business Database & Database Marketing (3 units)

Course Description: Practical introduction to fundamental principles of database management systems and database marketing. Database design. SQL queries. Concepts of database marketing, data warehouse, data visualization and big data analytics.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 290 – Topics in General Management (3 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in MGT 201A and MGT 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 291 – Topics in Organizational Behavior (3 units)

Course Description: Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in MGP 201A and MGP 201B, or current business interest topics in fields of organization design, strategy, development, or workplace processes.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 292 – Topics in Finance (3 units)

Course Description: Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 293 – Topics in Marketing (3 units)

Course Description: Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hitech marketing, advertising, sales promotions, marketing through the Web.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 294 – Topics in Accounting (3 units)

Course Description: Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 295 – Topics in Information Technology (3 units)

Course Description: Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 296 – Topics in Technology Management (3 units)

Course Description: Cyclical nature of innovation and technological change, features of innovative firms and industries, national innovation systems, and impact of information technologies on innovation processes.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 297 – Topics in International Management (3 units)

Course Description: Broader environment in which U.S. firms and their foreign competitors operate. Integration of material from other topics courses (marketing, strategy, finance, accounting, information technology, technology management) into the international setting.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MGP 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MGP 400A – Financial Accounting (4 units)

Course Description: Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program only.

Credit Limitation(s): Not available for credit for students who have taken MGT 200A, MGP 200A, MGB 200A, MGV 200AV or MGV 400AV.

Grade Mode: Letter.

MGP 400AY – Financial Accounting (4 units)

Course Description: Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program only.

Credit Limitation(s): Not available for credit for students who have taken MGT 200A, MGP 200A, MGB 200A, MGV 200AV, MGV 400AV, MGT 400A, MGP 400A or MGB 400A.

Grade Mode: Letter.

MGP 401A – The Individual & Group Dynamics (4 units)

Course Description: Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 201A, MGP 201A, MGB 201A or MGV 201AV.

Grade Mode: Letter.

MGP 401AY – Individual & Group Dynamics (4 units)

Course Description: Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Only open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 201A, MGP 201A, MGB 201A, MGV 201AV, MGT 401A, MGP 401A or MGB 401A.

Grade Mode: Letter.

MGP 401B – Organizational Strategy & Structure (4 units)

Course Description: Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 201B, MGP 201B, MGB 201B or MGV 201BV.

Grade Mode: Letter.

MGP 401BY – Organizational Strategy & Structure (4 units)

Course Description: Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 201B, MGP 201B, MGB 201B, MGV 201BV, MGT 401B, MGP 401B or MGB 401B.

Grade Mode: Letter.

MGP 402A – Markets & the Firm (4 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 202A, MGP 202A, MGB 202A or MGV 202AV.

Grade Mode: Letter.

MGP 402AV – Markets & The Firm (4 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Learning Activities: Web Virtual Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGB 202A, MGP 202A, MGT 202A, MGV 202AV, MGB 402A, MGP 402A, MGT 402A, MGB 402AV, MGP 402AV, MGT 402AV.

Grade Mode: Letter.

MGP 402AY – Markets & the Firm (4 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to MBA students only.

Credit Limitation(s): Not open for credit to students who have taken MGT 202A, MGP 202A, MGB 202A, MGV 202AV, MGT 402A, MGP 402A or MGB 402A.

Grade Mode: Letter.

MGP 403A – Data Analysis for Managers (4 units)

Course Description: Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit for students who have taken MGT 203A, MGP 203A, MGB 203A or MGV 403AV.

Grade Mode: Letter.

MGP 403AY – Data Analysis for Managers (4 units)

Course Description: Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit for students who have taken MGT 203A, MGP 203A, MGB 203A, MGV 403AV, MGT 403A, MGP 403A or MGB 403A.

Grade Mode: Letter.

MGP 404 – Marketing Management (4 units)

Course Description: Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 204, MGP 204, MGB 204 or MGV 204V.

Grade Mode: Letter.

MGP 404Y – Marketing Management (4 units)

Course Description: Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 204, MGP 204, MGB 204, MGV 204V, MGT 404, MGP 404 or MGB 404.

Grade Mode: Letter.

MGP 405 – Financial Theory & Policy (4 units)

Course Description: Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit for students who have taken MGT 205, MGP 205, MGB 205 or MGV 205V.

Grade Mode: Letter.

MGP 405Y – Financial Theory & Policy (4 units)

Course Description: Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit for students who have taken MGT 205, MGP 205, MGB 205, MGV 205V, MGT 405, MGP 405 or MGB 405.

Grade Mode: Letter.

MGP 406A – Decision Analytics: Spreadsheet Based (2 units)

Course Description: Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not available for credit for students who have taken MGT 206, MGP 206, MGB 206 or MGV 206V.

Grade Mode: Letter.

MGP 406B – Decision Analytics: Scalable (2 units)

Course Description: Builds on concepts learned in 406A to develop techniques for describing and implementing models that can scale in all dimensions.

Prerequisite(s): MGT 406A or MGP 406A or MGB 406A.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not available for credit for students who have taken MGT 206, MGP 206, MGB 206 or MGV 206V.

Grade Mode: Letter.

MGP 407 – Storytelling for Leadership (1 unit)

Course Description: Internalize the fundamental principles behind stories that educate, influence, motivate, inspire, persuade and connect.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGP 408 – The Business of the Media (1 unit)

Course Description: Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media, both news and entertainment.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGP 408V – The Business of the Media (1 unit)

Course Description: Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media, both news and entertainment.

Learning Activities: Web Virtual Lecture 1 hour(s).

Grade Mode: Letter.

MGP 409 – Managing Multi-Asset Class Investment Portfolios (1 unit)

Course Description: Examines top down management of multi-asset class portfolios. Topics include bonds, hedge funds, private equity, real estate, commodities, endowments, return generation, performance analysis, credit cycles, financial crises, manager selection, investment policy, and investment careers. Student teams present endowment portfolio recommendations.

Prerequisite(s): MGP 202A; MGP 203A; MGP 205.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGP 412 – International Marketing (1 unit)

Course Description: Basic concepts of international marketing.

Understanding and managing heterogeneous, dynamic, and interdependent environments across countries. How to develop and implement an international marketing strategy: where and how to compete, how to adapt to your marketing mix.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGP 414 – Multi-Channel Marketing (1 unit)

Course Description: Multi-channel marketing strategies empower managers to create value for different customer segments. Covers the necessary concepts to evaluate and select go-to market strategies in order to capitalize on the ubiquity of modern customers.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGP 415 – Climate Risks & Opportunities (1 unit)

Course Description: Provide a working knowledge of the risks and opportunities arising from climate change and climate policy for businesses.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGP 415V – Business Law (3 units)

Course Description: Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Not available for credit for students who have taken MGT 215, MGP 215, or MGB 215.

Grade Mode: Letter.

MGP 416 – Topics in Private Equity and Mergers & Acquisitions (2 units)

Course Description: Focuses on the finance principles related to the risk and return of the private equity (PE) industry, valuation of PE target companies, the structuring of leveraged buyouts (LBOs), and the management of portfolio companies.

Prerequisite(s): MGP 205 (can be concurrent) or MGT 205 (can be concurrent) or MGB 205 (can be concurrent).

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGP 419 – Business Strategy Consulting Skills (1 unit)

Course Description: Students will learn practical business consulting skills which will help apply strategy theories in the workplace. Students will learn and practice tools to frame and analyze problems, conduct research, communicate findings and navigate client relationships.

Learning Activities: Lecture 5 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Grade Mode: Letter.

MGP 419V – Business Strategy Consulting Skills (1 unit)

Course Description: Students will learn practical business consulting skills which will help apply strategy theories in the workplace. Students will learn and practice tools to frame and analyze problems, conduct research, communicate findings and navigate client relationships.

Learning Activities: Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit for students who have taken MGT 419, MGP 419, or MGB 419.

Grade Mode: Letter.

MGP 423 – Leader as Coach: An Introduction to Coaching Skills for Leaders (1 unit)

Course Description: Introduces the fundamental coaching skills and coaching models that leaders can apply in everyday interactions with their team and colleagues in order to build trust, overcome challenges and help others discover their own full potential.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Grade Mode: Letter.

MGP 423V – Power & Influence in Management (3 units)

Course Description: Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics.

Prerequisite(s): MGT 201A or MGP 201A or MGB 201A.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 223, MGP 223, MGB 223, or MGV 223V.

Grade Mode: Letter.

MGP 426 – The Business of Healthcare (1 unit)

Course Description: Intended to provide an overall understanding of the unique business aspects of the healthcare industry.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program (Business Administration-Working Professional, Business Administration-Bay Area, Business Administration-Full-Time).

Grade Mode: Letter.

MGP 429 – Detection & Prevention of Asset Misappropriation Fraud in the Workplace (1 unit)

Course Description: Discusses the fundamentals of fraud detection and prevention in the workplace. Learn the major schemes involving workplace fraud, how management can detect fraud and what policies and procedures can be implemented to prevent fraud.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Grade Mode: Letter.

MGP 431 – Project Management (1 unit)

Course Description: Students learn project management; including project scope, project planning, milestones and project closing. Important themes include leadership, team dynamics, storytelling/creating a narrative, communication, and conflict management.

Learning Activities: Lecture 10 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Grade Mode: Letter.

MGP 432 – Project Management with Applications in Healthcare (1 unit)

Course Description: Focuses on the heart of healthcare administration and how project management can be applied as a key lever to increase efficiency, decrease costs and improve the patient experience.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGP 432V – Project Management with Applications in Healthcare (1 unit)

Course Description: Focuses on the heart of healthcare administration and how project management can be applied as a key lever to increase efficiency, decrease costs and improve the patient experience.

Learning Activities: Web Virtual Lecture 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 432, MGP 432, or MGB 432.

Grade Mode: Letter.

MGP 433 – Corporate Social Responsibility (1 unit)

Course Description: Learn practical information that will help students understand the basics of designing, managing and evaluating an effective CSR program. Expose students to a basic set of CSR issues in the context of cross-purpose business challenges and then focus on the analysis and critical decisions that managers must make to move their business and their social agenda forward.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGP 435 – Data Wrangling (1 unit)

Course Description: Develop practical skills to pre-process data. Tidied raw data can then be used for downstream data analysis, modeling, and visualization.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGP 436 – Introduction to Derivative Securities (1 unit)

Course Description: Introduction to derivative securities and other forms of financial innovations.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGP 437 – Healthcare Analytics (1 unit)

Course Description: Introduction to advanced analytics framework, key Artificial Intelligence & Machine Learning concepts, and modeling techniques towards solving high-value and high-impact healthcare business problems.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program only.

Grade Mode: Letter.

MGP 437V – Healthcare Analytics (1 unit)

Course Description: Introduction to advanced analytics framework, key Artificial Intelligence & Machine Learning concepts, and modeling techniques towards solving high-value and high-impact healthcare business problems.

Learning Activities: Web Virtual Lecture 1 hour(s).

Credit Limitation(s): Not open to students who have taken MGT 437, MGP 437, or MGB 437.

Grade Mode: Letter.

MGP 440 – Integrated Management Project (6 units)

Course Description: Applies classroom learning to solve complex business challenges for real-world clients. Students learn practical consulting skills while their clients benefit from the student's experience, insights, and work product.

Prerequisite(s): First-year core courses of MBA program.

Learning Activities: Project 3 hour(s).

Enrollment Restriction(s): Open to students in the MBA Program (SMBE, SMBB, SMBA).

Grade Mode: Letter.

MGP 440A – Integrated Management Project (6 units)

Course Description: Applies classroom learning to solve complex business challenges for international business clients. Learn practical consulting skills while clients benefit from the student's experience, insights, and work product.

Prerequisite(s): First-year core courses of MBA program.

Learning Activities: Lecture/Discussion 6 hour(s).

Enrollment Restriction(s): Restricted to full-time MBA students.

Grade Mode: Letter.

MGP 440B – Integrated Management Project (3 units)

Course Description: Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product.

Prerequisite(s): First-year core courses of MBA program.

Learning Activities: Project 3 hour(s).

Enrollment Restriction(s): Restricted to full-time MBA students.

Grade Mode: Letter.

MGP 440C – Integrated Management Project Lead (1 unit)

Course Description: Integrated Management Project Team leader.

Learning Activities: Project 1 hour(s).

Grade Mode: Letter.

MGP 440S – Integrated Management Simulation (4 units)

Course Description: Apply theory and concepts from marketing, finance, organizational behavior, accounting, and strategy in order to manage a simulated corporation.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MGP 441V – New Product Development (3 units)

Course Description: State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems.

Prerequisite(s): MGT 204 or MGP 204 or MGB 204.

Learning Activities: Web Virtual Lecture 3 hour(s).

Grade Mode: Letter.

MGP 443 – Customer Analytics (3 units)

Course Description: Teaches how to use customer analytics to learn about and market to individual customers. Examines the different types of data analytics and how they fit into the customer relationship management world.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): No open for credit for students who have taken MGT 443V, MGP 443V or MGB 443V.

Grade Mode: Letter.

MGP 443V – Customer Analytics (3 units)

Course Description: Teaches students how to use customer analytics to learn about and market to individual customers. Examines the different types of data analytics and how they fit into the customer relationship management world.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): No open for credit for students who have taken MGT 443, MGP 443 or MGB 443.

Grade Mode: Letter.

MGP 444 – Strategic Branding (3 units)

Course Description: Provides a comprehensive understanding of branding strategies and implementation.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGP 445 – Product Management (4 units)

Course Description: Overview of the requirements, issues, and tools involved in marketing of products and services via lectures, case studies, and a hands-on, quarter-long competitive simulation.

Prerequisite(s): MGT 404 or MGP 404 or MGB 404.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Not open to students who have taken MGP 445Y or MGB 445Y or MGT 445Y or MGV 445V.

Grade Mode: Letter.

MGP 445Y – Product Management (4 units)

Course Description: Overview of the requirements, issues, and tools involved in marketing of products and services via lectures, case studies, and a hands-on, quarter-long competitive simulation.

Prerequisite(s): MGT 404 or MGP 404 or MGB 404.

Learning Activities: Web Virtual Lecture 2 hour(s), Lecture 2 hour(s).

Credit Limitation(s): Not open for students who have taken MGV 445V.

Grade Mode: Letter.

MGP 448 – Practicum for Marketing Strategies (1 unit)

Course Description: Provides opportunities to apply the concepts covered in the Marketing Strategies class through a group project involving the analysis of strategic marketing decisions based on business-related issues, simulation and modeling.

Prerequisite(s): MGP 248.

Learning Activities: Project 1 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGP 448V – Marketing Strategies (3 units)

Course Description: Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing.

Prerequisite(s): (MGT 202A or MGP 202A or MGB 202A); (MGT 204 or MGP 204 or MGB 204).

Learning Activities: Web Virtual Lecture 3 hour(s).

Repeat Credit: Not open for credit to students who have taken MGT 248, MGP 248, MGB 248, or MGV 248V.

Grade Mode: Letter.

MGP 450 – Technology Competition & Strategy (4 units)

Course Description: Provides a framework for thinking about technology competition and strategy.

Prerequisite(s): (MGT 402A or MGP 402A or MGB 402A); (MGT 403A or MGP 403A or MGB 403A).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MGP 450Y – Technology Competition & Strategy (4 units)

Course Description: Provides a framework for thinking about technology competition and strategy.

Prerequisite(s): (MGT 402A or MGP 402A or MGB 402A); (MGT 403A or MGP 403A or MGB 403A).

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Grade Mode: Letter.

MGP 452 – Managing for Operational Excellence (4 units)

Course Description: Explore the management of operations as applied to manufacturing, as well as services provided both inside & outside the organization. Develop an understanding of how uncertainty affects planning & delivery by looking at fundamental models of operations.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 252, MGP 252, MGB 252 or MGV 252V.

Grade Mode: Letter.

MGP 452Y – Managing for Operational Excellence (4 units)

Course Description: Explore the management of operations as applied to manufacturing, as well as services provided both inside & outside the organization. Develop an understanding of how uncertainty affects planning & delivery by looking at fundamental models of operations.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 252, MGP 252, MGB 252, MGV 252V, MGT 452, MGP 452 or MGB 452.

Grade Mode: Letter.

MGP 454A – Causal Inference and Statistical Experiments (2 units)

Course Description: Surveys causal inference methods with applications in business settings, especially marketing. Covers both primary data approaches such as A/B testing and secondary data approaches such as difference-in-differences.

Prerequisite(s): MGT 403A or MGP 403A or MGB 403A.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MGP 454B – Marketing Analytics (2 units)

Course Description: Surveys a variety of marketing analytics applications, training students to identify (i) what questions data can answer, and, conversely, (ii) what data is needed to answer a question.

Prerequisite(s): MGT 454A or MGP 454A or MGB 454A.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MGP 460A – Corporate Finance: Fundamentals (2 units)

Course Description: Study valuation techniques in applied settings, study a variety of investment decisions, and analyze how capital structure considerations play a role in firm's investment policies.

Prerequisite(s): MGT 205 or MGP 205 or MGB 205.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 260, MGP 260 or MGB 260.

Grade Mode: Letter.

MGP 460B – Corporate Finance: Advanced Topics (2 units)

Course Description: Advanced course in corporate finance that builds on 460A, with an aim to extend knowledge of the theory and practice of corporate finance.

Prerequisite(s): MGT 460A or MGP 460A or MGB 460A.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not open for students who have taken MGT, MGP or MGB 260.

Grade Mode: Letter.

MGP 466 – Leading Teams (2 units)

Course Description: Advanced topics in group management and behavior to lead teams and work effectively. Provide conceptual guidelines for analyzing and diagnosing group dynamics, understand how technological change affects team processes in organizations, and impart practical interpersonal skills for implementing effective strategies for group situations.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MGP 467 – Practicum for Teams & Technology (1 unit)

Course Description: Groups investigate the performance, creativity, conflict, information sharing, and leadership behaviors of a real world team. Provide consulting advice to the team, which not only gives analytic skills, but also builds presentation skills.

Prerequisite(s): MGP 267.

Learning Activities: Project 1 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGP 467V – Teams & Technology (3 units)

Course Description: Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; imparting interpersonal skills for implementing effective strategies; understanding how technological change affects team processes.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 267, MGP 267, MGB 267, or MGV 267V.

Grade Mode: Letter.

MGP 468 – Articulation & Critical Thinking (4 units)

Course Description: Public speaking, business writing, efficient and critical thinking about business challenges, and defining a personal code of ethics to shape actions and decisions.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 268, MGP 268, MGB 268 or MGV 268V.

Grade Mode: Letter.

MGP 468Y – Articulation & Critical Thinking (4 units)

Course Description: Public speaking, business writing, efficient and critical thinking about business challenges, and defining a personal code of ethics to shape actions and decisions.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 268, MGP 268, MGB 268, MGV 268V, MGT 468, MGP 468 or MGB 468.

Grade Mode: Letter.

MGP 469 – Machine Learning with Python (4 units)

Course Description: Introduction to machine learning methods covering association rules, clustering, classification, and numeric prediction. Hands-on machine learning skills with Python. Big data technologies. Business applications.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to students in MBA program; exemptions may be granted upon request from students enrolled in the online MBA program.

Credit Limitation(s): No credit to students who have taken MGV 469V, MGB 269, MGP 269, MGT 269.

Grade Mode: Letter. Letter.

MGP 473 – Managerial Cost Accounting (2 units)

Course Description: Covers in-depth the cost and management accounting concepts enabling students to make decisions, including interpreting business situations, identifying available options, interpreting impacts on financial statements and stakeholders, and clearly and articulately recommending a course of action.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Grade Mode: Letter.

MGP 474 – Managerial Budgeting (2 units)

Course Description: Covers in-depth the management accounting budgeting concepts enabling students to make decisions, including interpreting business situations, identifying available options, interpreting impacts on financial statements and stakeholders, and clearly and articulately recommending a course of action.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Grade Mode: Letter.

MGP 474V – Managerial Budgeting (2 units)

Course Description: Covers in-depth the management accounting budgeting concepts enabling students to make decisions, including interpreting business situations, identifying available options, interpreting impacts on financial statements and stakeholders, and clearly and articulately recommending a course of action.

Learning Activities: Web Virtual Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Grade Mode: Letter.

MGP 480 – Professional English for Multilingual Business Students (2 units)

Course Description: Workshop-style course hones English writing and presentation skills. Learn techniques to improve professional communication, and practice with weekly assignments.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to Graduate School of Management professional students.

Grade Mode: S/U only.

MGP 480V – Professional English for Multilingual Business Students (2 units)

Course Description: Workshop-style course hones English writing and presentation skills. Learn techniques to improve professional communication, and practice with weekly assignments.

Learning Activities: Web Virtual Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to Graduate School of Management professional students.

Grade Mode: S/U only.

MGP 490 – Topics in Business (1 unit)

Course Description: Provides opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses.

Prerequisite(s): Consent of instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to students in the MBA Program (SMBA, SMBB, SMBE).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 490A – Topics in Management (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such as business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MGP 490B – Topics in General Management-Extended (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such business writing, management, organizational behavior, business communications, development, finance and workplace processes.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 490BV – Topics in Management (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Web Virtual Lecture 2 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: Letter.

MGP 490V – Topics in General Management (3 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in MGT 201A and MGT 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes.

Learning Activities: Web Virtual Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 491V – Advanced Topics in Management (1 unit)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

MGP 492V – Topics in Finance (2 units)

Course Description: Contemporary and emerging issues in finance.

Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques.

Learning Activities: Web Virtual Lecture 2 hour(s).

Repeat Credit: May be repeated for credit when the topic differs; students can take this course repeatedly.

Grade Mode: Letter.

MGP 493V – Topics in Marketing (3 units)

Course Description: Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hi-tech marketing, advertising, sales promotions, marketing through the Web.

Learning Activities: Web Virtual Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGP 498 – Directed Group Study Management Practicum (1-12 units)

Course Description: Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses.

Prerequisite(s): Consent of instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor.

Learning Activities: Project.

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

MGP 499 – Directed Individual Study Management Practicum (1-12 units)

Course Description: Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other Graduate School of Management courses.

Prerequisite(s): Consent of instructor. Sponsorship of a Graduate School of Management Academic Senate faculty member; approval of graduate advisor.

Learning Activities: Project.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Management; Working Professional Bay Area (MGB)

Graduate School of Management

MGB 200A – Financial Accounting (3 units)

Course Description: Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 200B – Managerial Accounting (3 units)

Course Description: Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations.

Prerequisite(s): MGT 200A or MGB 200A or MGP 200A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 201A – The Individual & Group Dynamics (3 units)

Course Description: Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 201B – Organizational Strategy & Structure (3 units)

Course Description: Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.

Prerequisite(s): Completion of first year courses in Graduate School of Management or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to MBA students only.

Grade Mode: Letter.

MGB 202A – Markets & The Firm (3 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 202B – Business, Government, & the International Economy (3 units)

Course Description: Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance.

Prerequisite(s): MGV 202AV or MGT 202A or MGP 202A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 203A – Data Analysis for Managers (3 units)

Course Description: Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.

Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 203B – Forecasting & Managerial Research Methods (3 units)

Course Description: Practical statistical methods for managerial decision making covers regression analysis, time series analysis and forecasting, design and analysis of experiments in managerial research and contingency table analysis. Application of these methods to marketing, finance, accounting, production, operations, and public policy.

Prerequisite(s): MGT 203A or MGP 203A or MGB 203A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 204 – Marketing Management (3 units)

Course Description: Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 205 – Financial Theory & Policy (3 units)

Course Description: Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.

Prerequisite(s): Graduate student in the Graduate School of Management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 206 – Decision Making & Management Science (3 units)

Course Description: Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasizes how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment.

Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 207 – Management Information Systems (3 units)

Course Description: Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security.

Prerequisite(s): Graduate Student or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 215 – Business Law (3 units)

Course Description: Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law.

Prerequisite(s): Completion of administration core requirements or petition with consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 216 – Managing Professionals, Budgets, Controls & Ethics (3 units)

Course Description: Performance measures, budgetary controls and ethical pressures which occur at middle management levels in service-type operations. Addresses such organizations as engineering, medical groups, law offices, management consultants.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 220 – Management of Social Networks (3 units)

Course Description: Principles and applications of social network theory: coordinating divergent interests to create value for individuals and organizations. Emphasis on conceptual models, web-based diagnostic tools, and practical applications.

Prerequisite(s): MGB 201A.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to MBA students only.

Grade Mode: Letter.

MGB 223 – Power & Influence in Management (3 units)

Course Description: Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics.

Prerequisite(s): MGT 201A or MGB 201A or MGP 201A; consent of instructor.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

MGB 224 – Managing People in High-Performance Organizations (3 units)

Course Description: Strategic approach to the management of people within organization. Analyze employment systems' fit with firms' environments and strategies. Explore consequences of choices firms make in managing people; decisions as to selection, performance evaluation, compensation, and other management policies and practices.

Prerequisite(s): MGT 201A or MGB 201A or MGP 201A.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Credit Limitation(s): Not open to students who have taken MGT 224 or MGP 224.

Grade Mode: Letter.

MGB 234 – Pricing (3 units)

Course Description: Combines lectures, cases and homework to teach students tools and skills necessary to analyze pricing situations, make pricing decisions, and implement them, in a systematic manner.

Prerequisite(s): MGT 204 or MGB 204 or MGP 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGB 239 – Digital Marketing (3 units)

Course Description: Equips students for a career in digital marketing and social media. Topics include online advertising, search engine optimization, interactive mktg, online privacy issues, e-commerce, social influence, social network theory, measurement of social influence, integrating social and traditional media.

Prerequisite(s): MGB 204 or MGT 204 or MGP 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

MGB 240 – Management Policy & Strategy (3 units)

Course Description: Examines the scope of missions, objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Real client organizations, in the private and public sectors, are assigned to student teams as the subjects of study.

Prerequisite(s): First-year core courses of M.B.A. program.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 241 – New Product Development (3 units)

Course Description: State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems.

Prerequisite(s): MGT 204 or MGB 204 or MGP 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to graduate students in the Graduate School of Management.

Grade Mode: Letter.

MGB 242 – Marketing Communications (3 units)

Course Description: Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising, consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 243 – Customer Relationship Management (3 units)

Course Description: Customer Relationship Management (CRM) is a management approach under which marketing activities are organized and measured around customers (rather than around brands.) This approach is appealing because customers, not brands, are those who make buying decisions.

Prerequisite(s): MGT 204 or MGB 204 or MGP 204.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to MBA students only.

Grade Mode: Letter.

MGB 244 – New & Small Business Ventures (3 units)

Course Description: Student teams develop complete business plans for their own start-up ventures. Process includes: elevator pitch, business strategy, comprehensive bottoms-up financial projections, capital requirements, product differentiation, competitive, alliance, and go-to-market strategy development, investor presentation, and comprehensive written business plan.

Prerequisite(s): MGT 204 or MGP 204 or MGB 204.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 245 – Business Writing (3 units)

Course Description: Techniques for sharpening writing skills are introduced, along with grammatical structure, word choice, and punctuation. Learn to develop styles that are pitch-perfect for given situations and to think strategically about each communication challenge in a management setting.

Prerequisite(s): Completion of first-year core courses at the Graduate School of Management or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to MBA students only.

Grade Mode: Letter.

MGB 246 – Negotiation & Team Building (3 units)

Course Description: Basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier.

Prerequisite(s): MGB 205; MGB 202.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

MGB 247 – Customer Service as a Marketing Tool (3 units)

Course Description: Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 248 – Marketing Strategies (3 units)

Course Description: Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing.

Prerequisite(s): (MGT 202A or MGV 202AV or MGP 202A); (MGP 204 or MGT 204 or MGB 204).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 249 – Marketing Research (3 units)

Course Description: Addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications.

Prerequisite(s): (MGT 202A or MGV 202AV or MGP 202A); (MGP 203A or MGB 203A or MGT 203A); (MGT 204 or MGB 204 or MGP 204).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 250 – Technology Competition & Strategy (3 units)

Course Description: Why is software typically so defective? Why do many firms in the IT industry give away their best products free? Helps analyze questions like these by modeling competition and strategy in the network, technology and information industries.

Prerequisite(s): (MGT 202A or MGV 202AV or MGP 202A); (MGP 203A or MGB 203A or MGT 203A).

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGB 251 – Management of Innovation (3 units)

Course Description: Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics.

Prerequisite(s): MGT 201A or MGB 201A or MGP 201A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 252 – Managing for Operational Excellence (3 units)

Course Description: Explores the management of operations as applied to manufacturing as well as services provided both inside and outside the organization. Develop an understanding of how uncertainty affects planning and delivery by looking at fundamental models of operations.

Prerequisite(s): MGB 203A or MGP 203A or MGT 203A.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to students in the Graduate School of Management.

Grade Mode: Letter.

MGB 253 – Corporate Social Responsibility (3 units)

Course Description: Develop a thought process and approach to corporate social responsibility that students will be able to build on during their post-school leadership roles, whether as corporate executives, entrepreneurs, or NGO leaders.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 255 – Entrepreneurship & Venture Investment Clinic (3 units)

Course Description: Provides the necessary analytical and design tools to create business ideas and refine business models based on emerging technologies. Students learn to work closely in small teams to synthesize technical, strategic, and marketing needs into designs for new ventures.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Limited to 30 students.

Grade Mode: Letter.

MGB 258 – Mergers & Acquisitions (3 units)

Course Description: Focuses on the market for corporate acquisitions and restructuring activity. Topics include: sources of value creation; takeovers; anti-takeover provisions; bidding strategies; use of leverage in buyouts; regulatory risk and hurdles; and, valuation approaches for highly leveraged transactions.

Prerequisite(s): MGB 205.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 259 – Banking & the Financial System (3 units)

Course Description: Analyzes the role of financial markets and institutions in allocating capital. Focuses on: bank lending; debt securities; financial market innovations; regulation; functions of commercial banks and other financial intermediaries. Utilizes case studies.

Prerequisite(s): MGP 205 or MGT 205; consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 260 – Corporate Finance (3 units)

Course Description: Focuses on planning, acquiring, and managing a company's financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure.

Prerequisite(s): (MGT 200A or MGB 200A or MGP 200A); (MGP 202A or MGV 202AV or MGT 202A); (MGT 205 or MGB 205 or MGP 205).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 261 – Investment Analysis (3 units)

Course Description: Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance.

Prerequisite(s): (MGT 203A or MGB 203A or MGP 203A); (MGP 205 or MGT 205 or MGB 205).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 262 – Money & Security Markets (3 units)

Course Description: Examines how money and securities markets are organized; how public agencies, businesses, others obtain and invest funds in those markets. Relationship between interest rates, monetary policy, government's role in improving capital markets, approaches to assessing changes in regulation of specific markets.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 263 – Derivative Securities (3 units)

Course Description: Behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods.

Prerequisite(s): (MGT 203A or MGB 203A or MGP 203A); (MGP 205 or MGT 205 or MGB 205).

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Grade Mode: Letter.

MGB 264 – Business Taxation (3 units)

Course Description: Analysis of the impact of business taxation on investment, production, and finance decisions. Discussion of the relationship between business organization and tax liability. Not intended for tax specialists.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 265 – Technology Finance & Valuation (3 units)

Course Description: Venture capital finance and the related practice of research and development finance. Application of finance tools and framework to the world of venture capital and financing of projects in high-growth industries.

Prerequisite(s): MGT 205 or MGB 205 or MGP 205.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program; not open to students who have taken MGV 265V.

Grade Mode: Letter.

MGB 266 – International Finance (3 units)

Course Description: Studies fixed and floating exchange-rate systems. Topics include determinants of a nation's balance of international payments; macroeconomic interdependence of nations under various exchange-rate regimes and its implications for domestic stabilization policies; and the international coordination of monetary and stabilization policies.

Prerequisite(s): MGT 205 or MGB 205 or MGP 205; Or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 267 – Teams & Technology (3 units)

Course Description: Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; imparting interpersonal skills for implementing effective strategies; understanding how technological change affects team processes.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to working professional MBA students.

Grade Mode: Letter.

MGB 268 – Articulation & Critical Thinking (3 units)

Course Description: With commitment to this course, students will become competent public speakers, write well at a level expected in business, think efficiently and critically about business challenges and have a useful personal code of ethics to shape their actions and decisions. No student may repeat course for credit.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

MGB 270 – Corporate Financial Reporting (3 units)

Course Description: Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymakers.

Prerequisite(s): MGT 200A or MGP 200A or MGB 200A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 271 – Strategic Cost Management (3 units)

Course Description: Theoretical frameworks and associated techniques for using organizational design and cost management to achieve a sustainable, profitable cost structure. Topics include: target costing, process design for low cost, total cost of ownership, cost of customers, implementing structural change, and incentives.

Prerequisite(s): MGT 202A or MGP 202A or MGV 202AV.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGB 272 – Evaluation of Financial Information (3 units)

Course Description: Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed.

Prerequisite(s): MGT 200A or MGP 200A or MGB 200A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 273 – Accounting & Reporting for Government Nonprofit Entities (3 units)

Course Description: Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. Introduction to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agencies.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 274 – Corporate Governance (3 units)

Course Description: Discusses how corporations can better operate in the interests of shareholders and public. Directly relevant to managers, consultants in compensation and incentives, staff working on mergers and acquisitions, corporate regulators, shareholder rights activists, and board members.

Prerequisite(s): Full-time MBA students or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 276 – Real Estate, Finance & Development (3 units)

Course Description: Focus on single family, attached, detached, multi-family, and light commercial development. Study factors that make up successful real estate developments. Consider financial aspects involved in land acquisition, land development, construction, and project lending.

Prerequisite(s): (MGT 205 or MGP 205 or MGB 205); (MGT 201A or MGB 201A or MGP 201A).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 281 – Systems Analysis & Design (3 units)

Course Description: Design and specification of computer-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 282 – Supply Chain Management (3 units)

Course Description: Matching supply with demand is a primary challenge for a firm: excess supply is too costly, inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive.

Prerequisite(s): MGT 203A or MGB 203A or MGP 203A.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGB 284 – Applied Linear Models for Management (3 units)

Course Description: Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy problems.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 285 – Time Series Analysis & Forecasting (3 units)

Course Description: Considers application of time series methods to evaluation and forecasting problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process control.

Prerequisite(s): MGB 203B or MGT 203B or MGP 203B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 286 – Telecommunications & Computer Networks (3 units)

Course Description: Communication system components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks.

Prerequisite(s): MGB 280.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 287 – Business Database & Database Marketing (3 units)

Course Description: Practical introduction to fundamental principles of database management systems and database marketing. Database design. SQL queries. Concepts of database marketing, data warehouse, data visualization and big data analytics.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 290 – Topics in General Management (3 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in MGB 201A and MGB 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 291 – Topics in Organizational Behavior (3 units)

Course Description: Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in MGB 201A and MGB 201B, or current business interest topics in fields of organization design, strategy, development, or workplace processes.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 292 – Topics in Finance (3 units)

Course Description: Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 293 – Topics in Marketing (3 units)

Course Description: Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hitech marketing, advertising, sales promotions, marketing through the Web.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 294 – Topics in Accounting (3 units)

Course Description: Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 295 – Topics in Information Technology (3 units)

Course Description: Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 296 – Topics in Technology Management (3 units)

Course Description: Cyclical nature of innovation and technological change, features of innovative firms and industries, national innovation systems, and impact of information technologies on innovation processes.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 297 – Topics in International Management (3 units)

Course Description: Broader environment in which U.S. firms and their foreign competitors operate. Integration of material from other topics courses (marketing, strategy, finance, accounting, information technology, technology management) into the international setting.

Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MGB 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MGB 400A – Financial Accounting (4 units)

Course Description: Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program only.

Credit Limitation(s): Not available for credit for students who have taken MGT 200A, MGP 200A, MGB 200A, MGV 200AV or MGV 400AV.

Grade Mode: Letter.

MGB 400AY – Financial Accounting (4 units)

Course Description: Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program only.

Credit Limitation(s): Not available for credit for students who have taken MGT 200A, MGP 200A, MGB 200A, MGV 200AV, MGV 400AV, MGT 400A, MGP 400A or MGB 400A.

Grade Mode: Letter.

MGB 401A – The Individual & Group Dynamics (4 units)

Course Description: Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 201A, MGP 201A, MGB 201A or MGV 201AV.

Grade Mode: Letter.

MGB 401AY – Individual & Group Dynamics (4 units)

Course Description: Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Only open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 201A, MGP 201A, MGB 201A, MGV 201AV, MGT 401A, MGP 401A or MGB 401A.

Grade Mode: Letter.

MGB 401B – Organizational Strategy & Structure (4 units)

Course Description: Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 201B, MGP 201B, MGB 201B or MGV 201BV.

Grade Mode: Letter.

MGB 401BY – Organizational Strategy & Structure (4 units)

Course Description: Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 201B, MGP 201B, MGB 201B, MGV 201BV, MGT 401B, MGP 401B or MGB 401B.

Grade Mode: Letter.

MGB 402A – Markets & the Firm (4 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 202A, MGP 202A, MGB 202A or MGV 202AV.

Grade Mode: Letter.

MGB 402AV – Markets & The Firm (4 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Learning Activities: Web Virtual Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGB 202A, MGP 202A, MGT 202A, MGV 202AV, MGB 402A, MGP 402A, MGT 402A, MGB 402AV, MGP 402AV, MGT 402AV.

Grade Mode: Letter.

MGB 402AY – Markets & the Firm (4 units)

Course Description: Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to MBA students only.

Credit Limitation(s): Not open for credit to students who have taken MGT 202A, MGP 202A, MGB 202A, MGV 202AV, MGT 402A, MGP 402A or MGB 402A.

Grade Mode: Letter.

MGB 403A – Data Analysis for Managers (4 units)

Course Description: Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit for students who have taken MGT 203A, MGP 203A, MGB 203A or MGV 403AV.

Grade Mode: Letter.

MGB 403AY – Data Analysis for Managers (4 units)

Course Description: Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit for students who have taken MGT 203A, MGP 203A, MGB 203A, MGV 403AV, MGT 403A, MGP 403A or MGB 403A.

Grade Mode: Letter.

MGB 404 – Marketing Management (4 units)

Course Description: Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 204, MGP 204, MGB 204 or MGV 204V.

Grade Mode: Letter.

MGB 404Y – Marketing Management (4 units)

Course Description: Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 204, MGP 204, MGB 204, MGV 204V, MGT 404, MGP 404 or MGB 404.

Grade Mode: Letter.

MGB 405 – Financial Theory & Policy (4 units)

Course Description: Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 205, MGP 205, MGB 205 or MGV 205V.

Grade Mode: Letter.

MGB 405Y – Financial Theory & Policy (4 units)

Course Description: Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 205, MGP 205, MGB 205, MGV 205V, MGT 405, MGP 405 or MGB 405.

Grade Mode: Letter.

MGB 406A – Decision Analytics: Spreadsheet Based (2 units)

Course Description: Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not available for credit for students who have taken MGT 206, MGP 206, MGB 206 or MGV 206V.

Grade Mode: Letter.

MGB 406B – Decision Analytics: Scalable (2 units)

Course Description: Builds on concepts learned in 406A to develop techniques for describing and implementing models that can scale in all dimensions.

Prerequisite(s): MGT 406A or MGP 406A or MGB 406A.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not available for credit for students who have taken MGT 206, MGP 206, MGB 206 or MGV 206V.

Grade Mode: Letter.

MGB 407 – Storytelling for Leadership (1 unit)

Course Description: Internalize the fundamental principles behind stories that educate, influence, motivate, inspire, persuade and connect.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGB 408 – The Business of the Media (1 unit)

Course Description: Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media, both news and entertainment.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGB 408V – The Business of the Media (1 unit)

Course Description: Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media, both news and entertainment.

Learning Activities: Web Virtual Lecture 1 hour(s).

Grade Mode: Letter.

MGB 409 – Managing Multi-Asset Class Investment Portfolios (1 unit)

Course Description: Examines top down management of multi-asset class portfolios. Topics include bonds, hedge funds, private equity, real estate, commodities, endowments, return generation, performance analysis, credit cycles, financial crises, manager selection, investment policy, and investment careers. Student teams present endowment portfolio recommendations.

Prerequisite(s): MGV 202AV; MGB 203A; MGB 205.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGB 412 – International Marketing (1 unit)

Course Description: Basic concepts of international marketing.

Understanding and managing heterogeneous, dynamic, and interdependent environments across countries. How to develop and implement an international marketing strategy: where and how to compete, how to adapt your marketing mix.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGB 414 – Multi-Channel Marketing (1 unit)

Course Description: Multi-channel marketing strategies empower managers to create value for different customer segments. Covers the necessary concepts to evaluate and select go-to market strategies in order to capitalize on the ubiquity of modern customers.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGB 415 – Climate Risks & Opportunities (1 unit)

Course Description: Provide a working knowledge of the risks and opportunities arising from climate change and climate policy for businesses.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MGB 415V – Business Law (3 units)

Course Description: Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Not available for credit for students who have taken MGT 215, MGP 215, MGB 215.

Grade Mode: Letter.

MGB 416 – Topics in Private Equity and Mergers & Acquisitions (2 units)

Course Description: Focuses on the finance principles related to the risk and return of the private equity (PE) industry, valuation of PE target companies, the structuring of leveraged buyouts (LBOs), and the management of portfolio companies.

Prerequisite(s): MGB 205 (can be concurrent) or MGP 205 (can be concurrent) or MGT 205 (can be concurrent).

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGB 419 – Business Strategy Consulting Skills (1 unit)

Course Description: Students will learn practical business consulting skills which will help apply strategy theories in the workplace. Students will learn and practice tools to frame and analyze problems, conduct research, communicate findings and navigate client relationships.

Learning Activities: Lecture 5 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Grade Mode: Letter.

MGB 419V – Business Strategy Consulting Skills (1 unit)

Course Description: Students will learn practical business consulting skills which will help apply strategy theories in the workplace. Students will learn and practice tools to frame and analyze problems, conduct research, communicate findings and navigate client relationships.

Learning Activities: Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit for students who have taken MGT 419, MGP 419, or MGB 419.

Grade Mode: Letter.

MGB 423 – Leader as Coach: An Introduction to Coaching Skills for Leaders (1 unit)

Course Description: Introduces the fundamental coaching skills and coaching models that leaders can apply in everyday interactions with their team and colleagues in order to build trust, overcome challenges and help others discover their own full potential.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Grade Mode: Letter.

MGB 423V – Power & Influence in Management (3 units)

Course Description: Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics.

Prerequisite(s): MGT 201A or MGP 201A or MGB 201A.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 223, MGP 223, MGB 223, or MGV 223V.

Grade Mode: Letter.

MGB 426 – The Business of Healthcare (1 unit)

Course Description: Intended to provide an overall understanding of the unique business aspects of the healthcare industry.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program (Business Administration-Working Professional, Business Administration-Bay Area, Business Administration-Full-Time).

Grade Mode: Letter.

MGB 429 – Detection & Prevention of Asset Misappropriation Fraud in the Workplace (1 unit)

Course Description: Discusses the fundamentals of fraud detection and prevention in the workplace. Learn the major schemes involving workplace fraud, how management can detect fraud and what policies and procedures can be implemented to prevent fraud.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MBA program.

Grade Mode: Letter.

MGB 431 – Project Management (1 unit)

Course Description: Students learn project management; including project scope, project planning, milestones and project closing. Important themes include leadership, team dynamics, storytelling/creating a narrative, communication, and conflict management.

Learning Activities: Lecture 10 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Grade Mode: Letter.

MGB 432 – Project Management with Applications in Healthcare (1 unit)

Course Description: Focuses on the heart of healthcare administration and how project management can be applied as a key lever to increase efficiency, decrease costs and improve the patient experience.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGB 432V – Project Management with Applications in Healthcare (1 unit)

Course Description: Focuses on the heart of healthcare administration and how project management can be applied as a key lever to increase efficiency, decrease costs and improve the patient experience.

Learning Activities: Web Virtual Lecture 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 432, MGP 432, or MGB 432.

Grade Mode: Letter.

MGB 433 – Corporate Social Responsibility (1 unit)

Course Description: Learn practical information that will help students understand the basics of designing, managing and evaluating an effective CSR program. Expose students to a basic set of CSR issues in the context of cross-purpose business challenges and then focus on the analysis and critical decisions that managers must make to move their business and their social agenda forward.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGB 435 – Data Wrangling (1 unit)

Course Description: Develop practical skills to pre-process data. Tidied raw data can then be used for downstream data analysis, modeling, and visualization.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGB 436 – Introduction to Derivative Securities (1 unit)

Course Description: Introduction to derivative securities and other forms of financial innovations.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MGB 437 – Healthcare Analytics (1 unit)

Course Description: Introduction to advanced analytics framework, key Artificial Intelligence & Machine Learning concepts, and modeling techniques towards solving high-value and high-impact healthcare business problems.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program only.

Grade Mode: Letter.

MGB 437V – Healthcare Analytics (1 unit)

Course Description: Introduction to advanced analytics framework, key Artificial Intelligence & Machine Learning concepts, and modeling techniques towards solving high-value and high-impact healthcare business problems.

Learning Activities: Web Virtual Lecture 1 hour(s).

Credit Limitation(s): Not open to students who have taken MGT 437, MGP 437, or MGB 437.

Grade Mode: Letter.

MGB 440 – Integrated Management Project (6 units)

Course Description: Applies classroom learning to solve complex business challenges for real-world clients. Students learn practical consulting skills while their clients benefit from the student's experience, insights, and work product.

Prerequisite(s): First-year core courses of MBA program.

Learning Activities: Project 3 hour(s).

Enrollment Restriction(s): Open to students in the MBA Program (SMBE, SMBB, SMBA).

Grade Mode: Letter.

MGB 440A – Integrated Management Project (6 units)

Course Description: Applies classroom learning to solve complex business challenges for international business clients. Learn practical consulting skills while clients benefit from the student's experience, insights, and work product.

Prerequisite(s): First-year core courses of MBA program.

Learning Activities: Lecture/Discussion 6 hour(s).

Enrollment Restriction(s): Restricted to full-time MBA students.

Grade Mode: Letter.

MGB 440B – Integrated Management Project (3 units)

Course Description: Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product.

Prerequisite(s): First-year core courses of MBA program.

Learning Activities: Project 3 hour(s).

Enrollment Restriction(s): Restricted to full-time MBA students.

Grade Mode: Letter.

MGB 440C – Integrated Management Project Lead (1 unit)

Course Description: Integrated Management Project Team leader.

Learning Activities: Project 1 hour(s).

Grade Mode: Letter.

MGB 440S – Integrated Management Simulation (4 units)

Course Description: Apply theory and concepts from marketing, finance, organizational behavior, accounting, and strategy in order to manage a simulated corporation.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MGB 441V – New Product Development (3 units)

Course Description: State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems.

Prerequisite(s): MGT 204 or MGP 204 or MGB 204.

Learning Activities: Web Virtual Lecture 3 hour(s).

Grade Mode: Letter.

MGB 443 – Customer Analytics (3 units)

Course Description: Teaches how to use customer analytics to learn about and market to individual customers. Examines the different types of data analytics and how they fit into the customer relationship management world.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): No open for credit for students who have taken MGT 443V, MGP 443V or MGB 443V.

Grade Mode: Letter.

MGB 443V – Customer Analytics (3 units)

Course Description: Teaches students how to use customer analytics to learn about and market to individual customers. Examines the different types of data analytics and how they fit into the customer relationship management world.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): No open for credit for students who have taken MGT 443, MGP 443 or MGB 443.

Grade Mode: Letter.

MGB 444 – Strategic Branding (3 units)

Course Description: Provides a comprehensive understanding of branding strategies and implementation.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MGB 445 – Product Management (4 units)

Course Description: Overview of the requirements, issues, and tools involved in marketing of products and services via lectures, case studies, and a hands-on, quarter-long competitive simulation.

Prerequisite(s): MGT 404 or MGP 404 or MGB 404.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Not open to students who have taken MGB 445Y or MGP 445Y or MGT 445Y or MGV 445V.

Grade Mode: Letter.

MGB 445Y – Product Management (4 units)

Course Description: Overview of the requirements, issues, and tools involved in marketing of products and services via lectures, case studies, and a hands-on, quarter-long competitive simulation.

Prerequisite(s): MGT 404 or MGP 404 or MGB 404.

Learning Activities: Web Virtual Lecture 2 hour(s), Lecture 2 hour(s).

Credit Limitation(s): Not open for students who have taken MGV 445V.

Grade Mode: Letter.

MGB 448 – Practicum for Marketing Strategies (1 unit)

Course Description: Provides opportunities to apply the concepts covered in the Marketing Strategies class through a group project involving the analysis of strategic marketing decisions based on business-related issues, simulation and modeling.

Prerequisite(s): MGB 248.

Learning Activities: Project 1 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGB 448V – Marketing Strategies (3 units)

Course Description: Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function.

Applications to problems in private and public sector marketing.

Prerequisite(s): (MGT 202A or MGP 202A or MGB 202A); (MGT 204 or MGP 204 or MGB 204).

Learning Activities: Web Virtual Lecture 3 hour(s).

Repeat Credit: Not open for credit to students who have taken MGT 248, MGP 248, MGB 248, or MGV 248V.

Grade Mode: Letter.

MGB 450 – Technology Competition & Strategy (4 units)

Course Description: Provides a framework for thinking about technology competition and strategy.

Prerequisite(s): (MGT 402A or MGP 402A or MGB 402A); (MGT 403A or MGP 403A or MGB 403A).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MGB 450Y – Technology Competition & Strategy (4 units)

Course Description: Provides a framework for thinking about technology competition and strategy.

Prerequisite(s): (MGT 402A or MGP 402A or MGB 402A); (MGT 403A or MGP 403A or MGB 403A).

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Grade Mode: Letter.

MGB 452 – Managing for Operational Excellence (4 units)

Course Description: Explore the management of operations as applied to manufacturing, as well as services provided both inside & outside the organization. Develop an understanding of how uncertainty affects planning & delivery by looking at fundamental models of operations.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 252, MGP 252, MGB 252 or MGV 252V.

Grade Mode: Letter.

MGB 452Y – Managing for Operational Excellence (4 units)

Course Description: Explore the management of operations as applied to manufacturing, as well as services provided both inside & outside the organization. Develop an understanding of how uncertainty affects planning & delivery by looking at fundamental models of operations.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 252, MGP 252, MGB 252, MGV 252V, MGT 452, MGP 452 or MGB 452.

Grade Mode: Letter.

MGB 454A – Causal Inference and Statistical Experiments (2 units)

Course Description: Surveys causal inference methods with applications in business settings, especially marketing. Covers both primary data approaches such as A/B testing and secondary data approaches such as difference-in-differences.

Prerequisite(s): MGT 403A or MGP 403A or MGB 403A.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MGB 454B – Marketing Analytics (2 units)

Course Description: Surveys a variety of marketing analytics applications, training students to identify (i) what questions data can answer, and, conversely, (ii) what data is needed to answer a question.

Prerequisite(s): MGT 454A or MGP 454A or MGB 454A.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MGB 460A – Corporate Finance: Fundamentals (2 units)

Course Description: Course will study valuation techniques in applied settings, study a variety of investment decisions, and analyze how capital structure considerations play a role in firm's investment policies.

Prerequisite(s): MGT 205 or MGP 205 or MGB 205.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 260, MGP 260 or MGB 260.

Grade Mode: Letter.

MGB 460B – Corporate Finance: Advanced Topics (2 units)

Course Description: Advanced course in corporate finance that builds on 460A, with an aim to extend knowledge of the theory and practice of corporate finance.

Prerequisite(s): MGT 460A or MGP 460A or MGB 460A.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not open for students who have taken MGT 260, MGP 260 or MGB 260.

Grade Mode: Letter.

MGB 466 – Leading Teams (2 units)

Course Description: Advanced topics in group management and behavior to lead teams and work effectively. Provide conceptual guidelines for analyzing and diagnosing group dynamics, understand how technological change affects team processes in organizations, and impart practical interpersonal skills for implementing effective strategies for group situations.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MGB 467 – Practicum for Teams & Technology (1 unit)

Course Description: Groups investigate the performance, creativity, conflict, information sharing, and leadership behaviors of a real world team. Provide consulting advice to the team, which not only gives analytic skills, but also builds presentation skills.

Prerequisite(s): MGB 267.

Learning Activities: Project 1 hour(s).

Enrollment Restriction(s): Restricted to students in the MBA program.

Grade Mode: Letter.

MGB 467V – Teams & Technology (3 units)

Course Description: Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; imparting interpersonal skills for implementing effective strategies; understanding how technological change affects team processes.

Learning Activities: Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 267, MGP 267, MGB 267, or MGV 267V.

Grade Mode: Letter.

MGB 468 – Articulation & Critical Thinking (4 units)

Course Description: Public speaking, business writing, efficient and critical thinking about business challenges, and defining a personal code of ethics to shape actions and decisions.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MGT 268, MGP 268, MGB 268 or MGV 268V.

Grade Mode: Letter.

MGB 468Y – Articulation & Critical Thinking (4 units)

Course Description: Public speaking, business writing, efficient and critical thinking about business challenges, and defining a personal code of ethics to shape actions and decisions.

Learning Activities: Lecture 3 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the MBA program.

Credit Limitation(s): Not open for credit to students who have taken MGT 268, MGP 268, MGB 268, MGV 268V, MGT 468, MGP 468 or MGB 468.

Grade Mode: Letter.

MGB 469 – Machine Learning with Python (4 units)

Course Description: Introduction to machine learning methods covering association rules, clustering, classification, and numeric prediction. Hands-on machine learning skills with Python. Big data technologies. Business applications.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to students in MBA program; exemptions may be granted upon request from students enrolled in the online MBA program.

Credit Limitation(s): No credit to students who have taken MGV 469V, MGB 269, MGP 269, MGT 269.

Grade Mode: Letter. Letter.

MGB 473 – Managerial Cost Accounting (2 units)

Course Description: Covers in-depth the cost and management accounting concepts that will enable students to make decisions, including interpreting business situations, identifying available options, interpreting impacts on financial statements and stakeholders, and clearly and articulately recommending a course of action.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the Full time or Part time MBA program.

Grade Mode: Letter.

MGB 474 – Managerial Budgeting (2 units)

Course Description: Covers in-depth the management accounting budgeting concepts enabling students to make decisions, including interpreting business situations, identifying available options, interpreting impacts on financial statements and stakeholders, and clearly and articulately recommending a course of action.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Grade Mode: Letter.

MGB 474V – Managerial Budgeting (2 units)

Course Description: Covers in-depth the management accounting budgeting concepts enabling students to make decisions, including interpreting business situations, identifying available options, interpreting impacts on financial statements and stakeholders, and clearly and articulately recommending a course of action.

Learning Activities: Web Virtual Lecture 2 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Grade Mode: Letter.

MGB 480 – Professional English for Multilingual Business Students (2 units)

Course Description: Workshop-style course hones English writing and presentation skills. Learn techniques to improve professional communication, and practice with weekly assignments.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to Graduate School of Management professional students.

Grade Mode: S/U only.

MGB 480V – Professional English for Multilingual Business Students (2 units)

Course Description: Workshop-style course hones English writing and presentation skills. Learn techniques to improve professional communication, and practice with weekly assignments.

Learning Activities: Web Virtual Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to Graduate School of Management professional students.

Grade Mode: S/U only.

MGB 490 – Topics in Business (1 unit)

Course Description: Provides opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses.

Prerequisite(s): Consent of instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to students in the MBA Program (SMBA, SMBB, SMBE).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 490A – Topics in Management (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such as business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MGB 490B – Topics in General Management-Extended (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such business writing, management, organizational behavior, business communications, development, finance and workplace processes.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 490BV – Topics in Management (2 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Web Virtual Lecture 2 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: Letter.

MGB 490V – Topics in General Management (3 units)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in MGT 201A and MGT 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes.

Learning Activities: Web Virtual Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 491V – Advanced Topics in Management (1 unit)

Course Description: Advanced topics in general management. Varied topics to cover more extensively issues discussed in the MBA core such business writing, management, organizational behavior, business communications, development, and workplace processes.

Learning Activities: Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in the full-time or part-time MBA program.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

MGB 492V – Topics in Finance (2 units)

Course Description: Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques.

Learning Activities: Web Virtual Lecture 2 hour(s).

Repeat Credit: May be repeated for credit when the topic differs; students can take this course repeatedly.

Grade Mode: Letter.

MGB 493V – Topics in Marketing (3 units)

Course Description: Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hi-tech marketing, advertising, sales promotions, marketing through the Web.

Learning Activities: Web Virtual Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MGB 498 – Directed Group Study Management Practicum (1-12 units)

Course Description: Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses.

Prerequisite(s): Consent of instructor. Sponsorship of a GSM Academic Senate faculty member, and approval of graduate advisor.

Learning Activities: Project.

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

MGB 499 – Directed Individual Study Management Practicum (1-12 units)

Course Description: Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other Graduate School of Management courses.

Prerequisite(s): Consent of instructor. Sponsorship of a Graduate School of Management Academic Senate faculty member and approval of graduate advisor.

Learning Activities: Project.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Masters Preventive Veterinary Medicine (MPM)

School of Veterinary Medicine

MPM 200 – Introduction to Information Management for Epidemiologists (1 unit)

Course Description: Introduction to practical application of epidemiological methods to solve problems involving population health data. Emphasis on using worksheet/database software tools for organizing, analyzing, reporting, and interpreting data. Ten, three-hour sessions.

Learning Activities: Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to students in the Master of Preventive Veterinary Medicine program.

Grade Mode: Letter.

MPM 201 – Emerging Issues at the Interface of Animal, Human, & Ecosystem Health (2.5 units)

Course Description: Introduce one health topics emphasizing relationships between environmental, animal and human health. Topics include ecosystem change and impacts on animals and humans, cross-species disease transmission and approaches for addressing critical data gaps to inform ecosystem health and disease prevention.

Learning Activities: Lecture 1 hour(s), Discussion 1.50 hour(s).

Enrollment Restriction(s): Limited to 35 students.

Grade Mode: Letter.

MPM 202 – Medical Statistics I (4 units)

Course Description: Basic statistics in clinical, laboratory and population medicine: descriptive statistics; probability; binomial, Poisson, normal, t-, F-, and Chi-square distributions; sampling distributions; parameter estimation; hypothesis testing; elementary nonparametric methods, simple linear regression and correlation; life table construction and analysis.

Prerequisite(s): MPVM or MPH standing or consent of instructor.

Learning Activities: Lecture 15 hour(s), Laboratory 10 hour(s).

Enrollment Restriction(s): Restricted to 80 students.

Grade Mode: Letter.

MPM 203 – Medical Statistics II (4 units)

Course Description: Continuation of MPM 202. Analysis of variance in biomedical sciences; nonparametric methods; multiple regression; unconditional logistic regression; biomedical applications of statistical methods. Microcomputer applications in population medicine to reinforce principles that are taught in lecture. Required for students in the Preventive Veterinary Program Graduate Group (PVM) and the Masters of Public Health Program (MPH).

Prerequisite(s): MPM 202; or consent of instructor, or equivalent.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

MPM 204 – Medical Statistics III (4 units)

Course Description: Continuation of MPM 203. Selecting the best regression equation, conditional logistic regression, Poisson regression, survival analysis, analysis of time dependent variation and trends. Microcomputer applications in population medicine to reinforce principles that are taught in lecture.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

MPM 205 – Principles of Epidemiology (4 units)

Course Description: Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance.

Prerequisite(s): MPM 202; or consent of instructor; an introductory statistics course.

Learning Activities: Lecture 4 hour(s).

Cross Listing: EPI 205.

Grade Mode: Letter.

MPM 206 – Epidemiologic Study Design (4 units)

Course Description: Builds on concepts presented in MPM 205. Concepts of epidemiologic study design (clinical trials, observational cohort studies, case control studies) introduced in MPM 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies.

Prerequisite(s): MPM 205; or consent of instructor.

Learning Activities: Lecture 30 hour(s), Discussion 9 hour(s), Laboratory 2 hour(s).

Cross Listing: EPI 206.

Grade Mode: Letter.

MPM 207 – Applied Epidemiologic Problem Solving (1 unit)

Course Description: Integration of epidemiologic and statistical methodology in a problem-solving approach to contemporary animal population health issues. Data validation and manipulation.

Learning Activities: Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

MPM 208 – Research Planning & Reporting I (2 units)

Course Description: Identify and implement research questions through hypothesis construction, articulation of aims, acquiring permits, working as a team, and all other techniques needed to develop a successful research program.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): MPVM standing or consent of instructor.

Credit Limitation(s): Not open for credit to students who have previously taken MPM 408B.

Grade Mode: Letter.

MPM 209 – Research Planning & Reporting II (1 unit)

Course Description: Concepts and skills in effective scientific writing for publication in a peer-reviewed journal in animal health or biomedicine. Includes developing an argument, organizing and writing a manuscript, improving readability, and responding to peer review.

Prerequisite(s): MPM 208.

Learning Activities: Lecture/Discussion.

Grade Mode: Letter.

MPM 210 – Advanced Health Leadership (1.5 units)

Course Description: Develop skills for effective scientific leadership, including: project management and collaboration, conflict resolution, communication with the public, dynamic distribution of health information, and evidence-based policy influence.

Learning Activities: Lecture, Discussion.

Enrollment Restriction(s): Limited to 35 students.

Grade Mode: Letter.

MPM 212 – Concepts & Methods in Infectious Disease Surveillance & Control (3 units)

Course Description: Basic and advanced level of conceptual and methodological foundations in infectious disease epidemiology necessary for veterinarians to develop and evaluate programs for detection, prevention, and control of infectious diseases in animal populations.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

Materials Science Engineering (EMS)

College of Engineering

EMS 002 – Materials Marvels: The Science of Superheroes (3 units)

Course Description: Introduction to science and technology of materials as key engineering ingredients. Explores the relationship between art and materials, and how superheroes are both products and resources of ideas for new materials' technologies.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

EMS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates with lower division standing.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Pass/No Pass only.

EMS 147 – Principles of Polymer Materials Science (3 units)

Course Description: Basic principles of polymer science presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing.

Prerequisite(s): CHE 002A; CHE 002B; ((CHE 008A, CHE 008B) or (ENG 045 or ENG 045Y)); introductory physics.

Learning Activities: Lecture 3 hour(s).

Cross Listing: FPS 100.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

EMS 160 – Thermodynamics of Materials (4 units)

Course Description: Review of thermodynamic principles of interest to materials scientists and engineers. Application of thermodynamics to material processing, phase stability, corrosion.

Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); PHY 009B C- or better; MAT 022B C- or better; CHE 002C recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

EMS 162 – Structure & Characterization of Engineering Materials (4 units)

Course Description: Description of the structure of engineering materials on the atomic scale by exploring the fundamentals of crystallography. Importance of this structure to materials' properties. Description of experimental determination using x-ray diffraction techniques.

Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); MAT 022A C- or better; PHY 009B C- or better.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

EMS 162L – Structure & Characterization of Materials Laboratory (3 units)

Course Description: Experimental investigations of structure of solid materials are combined with techniques for characterization of materials. Laboratory exercises emphasize methods used to study structure of solids at the atomic and microstructural levels. Methods focus on optical, x-ray and electron techniques.

Prerequisite(s): EMS 162 (can be concurrent); concurrent enrollment in EMS 162 recommended.

Learning Activities: Laboratory 3 hour(s), Discussion 1 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

EMS 164 – Kinetics of Materials (4 units)

Course Description: Basic kinetic laws and the principles governing phase transformations. Applications in diffusion, oxidation, nucleation, growth and spinodal transformations.

Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); EMS 160; (ECH 060 or ENG 006).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

EMS 170 – Sustainable Energy Technologies: Batteries, Fuel Cells, & Photovoltaic Cells (4 units)

Course Description: Basic principles of future energy devices such as lithium batteries, fuel cells, and photovoltaic cells. Examines the current status of these energy technologies and analyze challenges that still must be overcome.

Prerequisite(s): ENG 045 or ENG 045Y.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to students in Engineering or related fields.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EMS 170L – Sustainable Energy Technologies Laboratory (3 units)

Course Description: Fundamentals of manufacturing and characterization of energy devices, such as lithium batteries, fuel cells and photovoltaic cells. Discussion on limiting factors in the performance of the devices.

Prerequisite(s): (ENG 045 or ENG 045Y); EMS 170 (can be concurrent); EMS 172 (recommended).

Learning Activities: Laboratory 3 hour(s), Extensive Writing, Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EMS 172 – Smart Materials (4 units)

Course Description: Electronic, optical, and magnetic properties of materials as related to structure and processing of solid state materials. Physical principles for understanding the properties of metals, semiconductors, ceramics, and amorphous solids and the applications of these materials in engineering.

Prerequisite(s): CHE 110A or PHY 009D; ENG 006 or ECH 060 or equivalent recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

EMS 172L – Smart Materials Laboratory (3 units)

Course Description: Experimental investigation of electronic, optical and magnetic properties of engineering materials, emphasizing the fundamental relationship between microstructure and properties as well as the influence of rate processes on the evolution of the microstructure and properties.

Prerequisite(s): EMS 172 (can be concurrent); concurrent enrollment in EMS 172 recommended.

Learning Activities: Laboratory 3 hour(s), Discussion 1 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

EMS 174 – Mechanical Behavior of Materials (4 units)

Course Description: Microscopic and macroscopic aspects of the mechanical behavior of engineering materials, with emphasis on recent development in materials characterization by nondestructive testing. Fundamental aspects of plasticity in engineering materials, strengthening mechanisms and mechanical failure modes of materials systems.

Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); EMS 162 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

EMS 174L – Mechanical Behavior Laboratory (3 units)

Course Description: Experimental investigation of mechanical behavior of engineering materials. Laboratory exercises emphasize the fundamental relationship between microstructure and mechanical properties, and the evolution of the microstructure as a consequence of rate process.

Prerequisite(s): EMS 174 (can be concurrent); concurrent enrollment recommended.

Learning Activities: Laboratory 3 hour(s), Discussion 1 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

EMS 180 – Materials in Engineering Design (4 units)

Course Description: Quantitative treatment of materials selection for engineering applications. Discussion of design & material selection strategy; process & process selection strategy; process economics; life-cycle thinking & eco-design. Use of materials selection software.

Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better.

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to students with upper division standing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL); Visual Literacy (VL).

EMS 181 – Manufacturing of 3D & Composite Materials (4 units)

Course Description: Fundamental physical and chemical principles underlying various processing techniques, used in manufacturing processes for bulk (3D) and composite structural and functional materials. Effects of processing variables on structure-property relationships.

Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 105 or ECH 152B or EEC 140A or EEC 140AV or EMS 164).

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EMS 182 – Failure Analysis (4 units)

Course Description: Analysis of the way materials fail. Effects of temperature, mechanical deformation and corrosion on the properties of materials. forensics and methodologies for investigating failures of materials including optical microscopy, x-ray analysis and scanning electron microscopy. Investigation of practical problems.

Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better; EMS 174 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

EMS 183 – Processing of 2D & Nanomaterials (4 units)

Course Description: Fundamentals of processing methods for two-dimensional materials, including thin films and graphene-like materials; as well as nanomaterials, including nanoparticles, nanowires, and quantum dots.

Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 105 or ECH 152B or EEC 140A or EEC 140AV or EMS 164).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EMS 186A – Materials Design Project (2 units)

Course Description: Advanced materials design including examination of materials synthesis, processing, fabrication, and their practical applications. Rigorous evaluation of economic, manufacturing, and ethical limitations. Incorporation of diverse principles from the field of materials science into a collaborative design project.

Prerequisite(s): EMS 160; EMS 162; EMS 164; EMS 172; EMS 174.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EMS 186B – Materials Design Project (3 units)

Course Description: Advanced materials design including examination of materials synthesis, processing, fabrication, and their practical applications. Rigorous evaluation of economic, manufacturing, and ethical limitations. Incorporation of diverse principles from the field of materials science into a collaborative design project.

Prerequisite(s): EMS 186A.

Learning Activities: Lecture/Discussion 2 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EMS 186C – Materials Design Project (3 units)

Course Description: Advanced materials design including examination of materials synthesis, processing, fabrication, and their practical applications. Rigorous evaluation of economic, manufacturing, and ethical limitations. Incorporation of diverse principles from the field of materials science into a collaborative design project.

Prerequisite(s): EMS 186B.

Learning Activities: Lecture/Discussion 2 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EMS 188A – Materials Design Project (4 units)

Starting Fall Quarter 2024, this course is no longer offered.

Course Description: Major materials design experience involving analysis of real materials synthesis/processing/fabrication and technological applications including critical assessments of economic, manufacturing, and ethical constraints. Various principles of materials science are integrated into a culminating team design project.

Prerequisite(s): EMS 160; EMS 162; EMS 164; EMS 172; EMS 174.

Learning Activities: Laboratory 4 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EMS 188AH – Honors Materials Design (1 unit)

Course Description: Examination of special topics covered in the materials design course through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations.

Prerequisite(s): Enrollment in the Materials Science Engineering Honors Program.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open only to students in the Materials Science & Engineering Honors Program.

Grade Mode: Letter.

EMS 188B – Materials Design Project (4 units)

Starting Fall Quarter 2024, this course is no longer offered.

Course Description: Major materials design experience involving analysis of real materials synthesis/processing/fabrication and technological applications including critical assessments of economic, manufacturing, and ethical constraints. Various principles of materials science are integrated into a culminating team design project.

Prerequisite(s): EMS 188A.

Learning Activities: Laboratory 4 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

EMS 188BH – Honors Materials Design (1 unit)

Course Description: Examination of special topics covered in the materials design course through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations.

Prerequisite(s): Enrollment in the Materials Science Engineering Honors Program.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open only to students in the Materials Science & Engineering Honors Program.

Grade Mode: Letter.

EMS 190C – Research Group Conference (1 unit)

Course Description: Individual and/or group conference on problems, progress and techniques in materials research.

Prerequisite(s): Consent of instructor. Upper division standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EMS 192 – Internship in Materials Science & Engineering (1-5 units)

Course Description: Supervised work experience in the Materials Science & Engineering field.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-15 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Pass/No Pass only.

EMS 197T – Tutoring in Materials Science & Engineering (1-5 units)

Course Description: Tutoring of students in courses taught by instructors in the Department of Materials Science & Engineering. Tutor responsibilities may include attending class, assisting an instructor or TA in laboratory sections or group discussions, or providing non-graded feedback on assignments. Weekly meeting with the instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Tutorial 1-5 hour(s).

Grade Mode: P/NP only.

EMS 198 – Directed Group Study (1-5 units)

Course Description: Group study of selected topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1-5 hour(s).

Grade Mode: Pass/No Pass only.

EMS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EMS 200 – Preparing for Graduate Student Success (1 unit)

Course Description: Introduction to the soft-skills and campus resources needed to succeed in graduate school. Emphasis on the student-mentor relationship and the process of selecting a research mentor.

Learning Activities: Seminar 1.50 hour(s).

Enrollment Restriction(s): Restricted to graduate students in Materials Science & Engineering.

Cross Listing: ECH 200.

Grade Mode: Satisfactory/Unsatisfactory only.

EMS 230 – Fundamentals of Electron Microscopy (3 units)

Course Description: Principles and techniques of scanning and transmission of electron microscopy used in the study of materials will be described. Emphasis upon practical applications.

Prerequisite(s): EMS 162.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

EMS 230L – Laboratory for Electron Microscopy (2 units)

Course Description: Practical application of techniques of electron scanning and transmission microscopy including x-ray microanalysis.

Prerequisite(s): EMS 230 (can be concurrent); EMS 230 required concurrently.

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

EMS 244 – Interaction of Materials & their Environment (3 units)

Course Description: Thermodynamic and kinetic foundations of the corrosion and oxidation processes. Practical aspects of corrosion control and prevention. Stress-corrosion and gas-embrittlement phenomena.

Special topics in corrosion; microbiological and atmospheric corrosion.

Prerequisite(s): (ENG 045 or ENG 045Y); ENG 105A recommended; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EMS 245 – Micro- & Nano-Technology in Life Sciences (4 units)

Course Description: Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: EEC 245, ECH 245, MAE 245.

Grade Mode: Letter.

EMS 246 – Photovoltaics & Solar Cells (3 units)

Course Description: Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation.

Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns.

Prerequisite(s): EEC 140B; or consent of instructor, or equivalent.

Learning Activities: Lecture 3 hour(s).

Cross Listing: EEC 248.

Grade Mode: Letter.

EMS 248 – Fracture of Engineering Materials (3 units)

Course Description: Description of the failure of materials by crack propagation. Topics include the stress fields about elastic cracks, the Griffith-Irwin analysis, descriptions of plastic zones, fracture toughness testing, microstructural aspects of fracture and failure at elevated temperatures.

Prerequisite(s): EMS 174.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EMS 249 – Mechanisms of Fatigue (3 units)

Course Description: Microstructural description of the mechanisms of fatigue in metals. Topics include a phenomenological treatment of cyclic deformation, dislocation processes in cyclic deformation, fatigue crack nucleation, Stage I growth, threshold effects and high temperature cyclic deformation.

Prerequisite(s): EMS 174; or consent of instructor. EMS 248 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

EMS 250A – Special Topics in Polymer & Fiber Science (3 units)

Course Description: Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered.

Prerequisite(s): EMS 147; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Cross Listing: FPS 250A.

Grade Mode: Letter.

EMS 250B – Special Topics in Polymer & Fiber Science (3 units)

Course Description: Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered.

Prerequisite(s): EMS 147; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Cross Listing: FPS 250B.

Grade Mode: Letter.

EMS 250E – Special Topics in Polymer & Fiber Science (3 units)

Course Description: Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered.

Prerequisite(s): EMS 147; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Cross Listing: FPS 250E.

Grade Mode: Letter.

EMS 260 – Advanced Thermodynamics of Solids (4 units)

Course Description: Thermodynamic principles, formalism and their application to solid materials. Statistical mechanics and the relations between microscopic and macroscopic properties. Prediction of phase diagrams and phase stability, particularly for solids.

Prerequisite(s): EMS 160.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

EMS 262 – Advanced Topics in Structure of Materials (4 units)

Course Description: Electronic structure and crystal structure of engineering materials on the atomic scale with a detailed discussion of crystallography. Types of bonding, distinction between band structures of metals, semiconductors, and insulators. Symmetry elements, point and space groups, and common crystal structures.

Prerequisite(s): EMS 162; EMS 174 recommended; graduate standing in Engineering or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EMS 264 – Transport Phenomena in Materials Processes (4 units)

Course Description: Thermodynamic driving forces and atomic-scale mechanisms underlying diffusive mass transport and interface motion in materials. Nucleation, growth and coarsening dynamics of phase transformations.

Prerequisite(s): Graduate standing in Engineering.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who previously completed former course EMS 240.

Grade Mode: Letter.

EMS 268 – Advanced Materials Characterization (4 units)

Course Description: Fundamental working principles for characterization methods used in structural and compositional analysis of engineering materials. Topics include x-ray, electron, ion, and neutron interactions with materials and techniques include diffraction, spectroscopy, and imaging methods.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students in Chemistry, Physics, and Engineering.

Grade Mode: Letter.

EMS 272 – Advanced Functional Properties of Materials (4 units)

Course Description: Fundamental physical properties of solid materials important to solid state devices, specifically electronic, magnetic, and optical properties. Topics include band structures, metals, superconductors, semiconductors, dielectrics, optical properties, and magnetic properties and implementation of these properties into devices.

Prerequisite(s): Graduate standing in Physics, Chemistry, and Engineering.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

EMS 274 – Advanced Mechanical Properties of Materials (4 units)

Course Description: Comprehensive study of mechanical properties of materials, with special attention to dislocations and deformation and fracture control mechanisms. Mechanical properties of conventional engineering materials as well as advanced materials such as nanocrystalline solids and thin films are considered.

Prerequisite(s): EMS 174.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EMS 280A – Graduate Capstone Project (4 units)

Course Description: Advanced materials design experience involving analysis of engineering applications of materials, including synthesis, processing, and fabrication. Additional consideration of critical assessments of economics, manufacturing, and ethical constraints. Fundamental principles of materials science are integrated into a culminating capstone project.

Prerequisite(s): Graduate standing in an engineering discipline.

Learning Activities: Laboratory 4 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EMS 280B – Graduate Capstone Project (4 units)

Course Description: Advanced materials design experience involving analysis of engineering applications of materials, including synthesis, processing and fabrication. Additional consideration of critical assessments of economics, manufacturing, and ethical constraints. Fundamental principles of materials science are integrated into a culminating capstone project.

Prerequisite(s): EMS 280A.

Learning Activities: Discussion 1 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

EMS 282 – Glass: Science & Technology (3 units)

Course Description: Modern paradigms in glass science and their applications to technologies. Relation of macroscopic properties of glasses and glass-forming liquids to atomic-level structures, including principles of formation, relaxation, transport phenomena, nucleation, crystallization and phase separation in glasses.

Prerequisite(s): Graduate standing in Chemistry, Physics or Engineering, or consent of instructor.

Learning Activities: Lecture 2 hour(s), Extensive Writing 1 hour(s).

Grade Mode: Letter.

EMS 285 – Advanced Computational Materials Science (3 units)

Course Description: Capabilities and limitations of modern approaches in computational materials science. Implementation and use of these approaches. Molecular dynamics, cellular automata, and phase field techniques.

Prerequisite(s): Prior numerical programming experience and familiarity with control flow statements is recommended.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

EMS 288 – Living Matter: Physical Biology of the Cell (3 units)

Course Description: Introduction to the origin, maintenance, and regulation of the dynamic architecture of the cell, including cellular modes of organization, dynamics and energy dissipation, molecular transport, motility, regulation, and adaptability.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to any student possessing general background in any disciplines of physical or biological sciences and engineering.

Cross Listing: BIM 288, BPH 288.

Grade Mode: Letter.

EMS 289A – Special Topics in Materials Science (1-5 units)

Course Description: Special topics in the discipline of Materials Science & Engineering. Topics will vary by instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EMS 290 – Materials Science & Engineering Seminar (1 unit)

Course Description: Selected topics of current interest in Materials Science & Engineering. Subjects covered vary from year to year and are announced at the beginning of each quarter.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EMS 290C – Graduate Research Conference (1 unit)

Course Description: Individual and/or group conference on problems, progress, and techniques in Materials Science & Engineering research.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EMS 292 – Materials Science & Engineering Internship (1-12 units)

Course Description: Work or lab experience in industry or off-campus lab focusing on Materials Science & Engineering applications at the graduate level.

Prerequisite(s): Consent of instructor. Graduate level standing.

Learning Activities: Internship.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

EMS 294 – Materials Science Seminar (1 unit)

Course Description: Current literature and developments in materials science with presentations by individual students.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

EMS 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Letter.

EMS 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

EMS 390 – The Teaching of Materials Science (1 unit)

Course Description: Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports.

Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Materials Science Engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Maternal & Child Nutrition (MCN)

College of Agricultural & Environmental Sciences

MCN 260 – Nutrition During Pregnancy (6 units)

Course Description: Overview of the anatomical, physiological and biochemical changes that occur during pregnancy and early development. Discussion and evaluation of nutritional/lifestyle factors associated with pregnancy outcomes and nutrition programs/interventions for pregnant women.

Prerequisite(s): Acceptance into Master of Advanced Studies in Maternal Child Nutrition or Graduate Group in Nutritional Biology; other students by consent of instructor.

Learning Activities: Lecture 5 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate students.

Grade Mode: Letter.

MCN 261 – Lactation & Infant Nutrition (6 units)

Course Description: Overview of the physiological and biochemical processes underlying human lactation and nutritional needs of both mother and infant. Development of skills in assessment, nutrition counseling, education and support of new mothers and their families.

Prerequisite(s): MCN 260; graduate standing.

Learning Activities: Lecture 5 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to students enrolled in the MAS program; other graduate students by consent of instructor.

Grade Mode: Letter.

MCN 262 – Child & Adolescent Nutrition (6 units)

Course Description: Relationships among nutrition, growth, and development during childhood and adolescence. Nutritional assessment for normal and high risk groups; psychological, social, and economic factors contributing to nutritional status. Nutritional needs and interventions for special groups, including obese children/adolescents, athletes, and eating disordered.

Prerequisite(s): MCN 261; graduate standing.

Learning Activities: Lecture 5 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to students enrolled in the MAS program; other graduate students by consent of instructor.

Grade Mode: Letter.

MCN 263 – Applied Research Methods in Maternal & Child Nutrition (4 units)

Course Description: Application of epidemiological principles to the study of maternal and child nutrition. Topics include quantitative & qualitative study procedures, including study design, data collection, and related analytical techniques.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MAS program; other graduate students by consent of instructor.

Grade Mode: Letter.

MCN 264A – Current Topics in Maternal & Child Nutrition: Principles of Adult Education (2 units)

Course Description: Current scientific literature related to Maternal & Child Nutrition in adult education settings. Topics include methods and theories of adult education and critical thinking skills related to research evaluation.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MAS program; other graduate students by consent of instructor.

Grade Mode: Letter.

MCN 264B – Current Topics in Maternal & Child Nutrition: Epidemiology & Evidence-Based Practice (2 units)

Course Description: Current scientific literature related to Maternal & Child Nutrition. Topics include epidemiology, evidence-based practice, breastfeeding promotion, and nutritional assessment of populations.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MAS program; other graduate students by consent of instructor.

Grade Mode: Letter.

MCN 264C – Current Topics in Maternal & Child Nutrition: Public Policy Development & Implementation (2 units)

Course Description: Current scientific literature related to Maternal & Child Nutrition. Topics include nutrition surveillance and monitoring, as well as public policy development and implementation.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the MAS program; other graduate students by consent of instructor.

Grade Mode: Letter.

Mathematics (MAT)**College of Letters & Science****MAT 000B – Elementary Algebra (no credit) (0 units)**

Course Description: Basic concepts of algebra, including polynomials, factoring, equations, graphs, and inequalities. Offered only if sufficient number of students enroll.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Not open to concurrent student enrollment.

Grade Mode: Pass/No Pass only.

MAT 000C – Trigonometry (no credit) (0 units)

Course Description: Basic concepts of trigonometry, including trigonometric functions, identities, inverse functions, and applications. Offered only if sufficient number of students enroll.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Not open to concurrent student enrollment.

Grade Mode: Pass/No Pass only.

MAT 000D – Intermediate Algebra (no credit) (0 units)

Course Description: Basic concepts of algebra, prepares student for college work in mathematics, such as MAT 016A or MAT 021A. Functions, equations, graphs, logarithms, and systems of equations. Offered only if sufficient number of students enroll.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Not open to concurrent student enrollment.

Grade Mode: Pass/No Pass only.

MAT 012 – Precalculus (3 units)

Course Description: Topics selected for their use in calculus, including functions and their graphs, slope, zeroes of polynomials, exponential, logarithmic and trigonometric functions, sketching surfaces and solids. *Prerequisite(s):* Two years of high school algebra, plane geometry, plane trigonometry; and obtaining required score on the Precalculus Diagnostic Examination.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed any of MAT 016A, MAT 016B, MAT 016C, MAT 017A, MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C with a C- or better.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 016A – Short Calculus (3 units)

Course Description: Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems.

Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 017A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 016B – Short Calculus (3 units)

Course Description: Integration; calculus for trigonometric, exponential, and logarithmic functions; applications.

Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 017C, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 017B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 016C – Short Calculus (3 units)

Course Description: Differential equations; partial derivatives; double integrals; applications; series.

Prerequisite(s): MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better or MAT 021BH C- or better.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 021C; only 2 units of credit to students who have completed MAT 017C.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 017A – Calculus for Biology & Medicine (4 units)

Course Description: Introduction to differential calculus via applications in biology and medicine. Limits, derivatives of polynomials, trigonometric, and exponential functions, graphing, applications of the derivative to biology and medicine.

Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 016A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 017B – Calculus for Biology & Medicine (4 units)

Course Description: Introduction to integral calculus and elementary differential equations via applications to biology and medicine.

Fundamental theorem of calculus, techniques of integration including integral tables and numerical methods, improper integrals, elementary first order differential equations, applications in biology and medicine.

Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 016C, MAT 021B, or MAT 021C; only 2 units of credit for students who have completed MAT 016B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 017C – Calculus for Biology & Medicine (4 units)

Course Description: Matrix algebra, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine.

Prerequisite(s): MAT 017B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 021C; only 2 units of credit to students who have completed MAT 016C.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

MAT 019A – Calculus for Data-Driven Applications (4 units)

Course Description: Calculus and other mathematical methods necessary in data driven analysis in the sciences, technology and the humanities.

Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 016A, MAT 016B, MAT 016C, MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 017A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 019B – Calculus for Data-Driven Applications (4 units)

Course Description: Calculus and other mathematical methods necessary in data driven analysis in the sciences, technology, and the humanities.

Prerequisite(s): MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better or MAT 019A C- or better.

Learning Activities: Lecture 3 hour(s); Laboratory 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 016B, 016C, MAT 017C, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 017B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 019C – Calculus for Data-Driven Applications (4 units)

Course Description: Calculus and other mathematical methods necessary in data-driven analysis in the sciences, technology and the humanities.

Multivariable calculus, differential equations, partial derivatives.

Prerequisite(s): MAT 019B C- or better or MAT 017B C- or better or MAT 021B C- or better or MAT 021BH C- or better.

Learning Activities: Lecture 3 hour(s); Laboratory 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 016C or MAT 021C; only 2 units of credit to students who have completed MAT 017C.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 021A – Calculus (4 units)

Course Description: Functions, limits, continuity. Slope and derivative.

Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials. L'Hopital's rule.

Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 017B, or MAT 017C; only 2 units of credit to students who have completed MAT 016A or MAT 017A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 021AH – Honors Calculus (4 units)

Course Description: More intensive treatment of material covered in MAT 021A.

Prerequisite(s): A Precalculus Diagnostic Examination score significantly higher than the minimum for MAT 021A is required.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 021AL – Emerging Scholars Program Calculus Workshop (2 units)

Course Description: Functions, limits, continuity. Slope and derivative.

Same course content as MAT 021A. Enrollment for students in the Emerging Scholars Program by instructor's invitation only.

Prerequisite(s): MAT 021A required concurrently.

Learning Activities: Workshop 6 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MAT 021B – Calculus (4 units)

Course Description: Continuation of MAT 021A. Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area, volume, arc length, average of a function, improper integral, surface of revolution. May be taught abroad.

Prerequisite(s): (MAT 021A C- or better or MAT 021AH C- or better) or MAT 017A B or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Only 2 units of credit to students who have completed MAT 016B, MAT 016C, MAT 017B, or MAT 017C.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 021BH – Honors Calculus (4 units)

Course Description: More intensive treatment of material covered in MAT 021B. Students completing MAT 021BH can continue with MAT 021CH or the regular MAT 021C.

Prerequisite(s): MAT 021A B or better or MAT 021AH B or better.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 021BL – Emerging Scholars Program Calculus Workshop (2 units)

Course Description: Continuation of MAT 021A. Same course content as MAT 021B. Enrollment for students in the Emerging Scholars Program by instructor's invitation only.

Prerequisite(s): MAT 021B required concurrently.

Learning Activities: Workshop 6 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MAT 021C – Calculus (4 units)

Course Description: Continuation of MAT 021B. Sequences, series, tests for convergence, Taylor expansions. Vector algebra, vector calculus, scalar and vector fields. Partial derivatives, total differentials. Applications to maximum and minimum problems in two or more variables. Applications to physical systems.

Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021B C- or better or MAT 021BH C- or better or MAT 017B B or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 021CH – Honors Calculus (4 units)

Course Description: More intensive treatment of material covered in MAT 021C.

Prerequisite(s): MAT 021B B or better or MAT 021BH B or better.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 021CL – Emerging Scholars Program Calculus Workshop (2 units)

Course Description: Continuation of MAT 021B. Same course content as MAT 021C. Enrollment for students in the Emerging Scholars Program by instructor's invitation only.

Prerequisite(s): MAT 021C required concurrently.

Learning Activities: Workshop 6 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MAT 021D – Vector Analysis (4 units)

Course Description: Continuation of MAT 021C. Definite integrals over plane and solid regions in various coordinate systems. Line and surface integrals. Green's theorem, Stoke's theorem, divergence theorem.

Prerequisite(s): (MAT 021C C- or better or MAT 021CH C- or better) or MAT 017C B or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 021M – Accelerated Calculus (5 units)

Course Description: Accelerated treatment of material from MAT 021A and MAT 021B, with detailed presentation of theory, definitions, and proofs, and treatment of computational aspects of calculus at a condensed but sophisticated level.

Prerequisite(s): Grade of B or higher in both semesters of high school calculus or a score of 4 or higher on the Advanced Placement Calculus AB exam, and obtaining the required score on the Precalculus Diagnostic Examination and its trigonometric component.

Learning Activities: Lecture/Discussion 4 hour(s), Discussion/Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 021A or MAT 021B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 022A – Linear Algebra (3 units)

Course Description: Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization.

Prerequisite(s): (MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better); (ENG 006 or EME 005 or ECH 060 or MAT 022AL (can be concurrent)).

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 067.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 022AL – Linear Algebra Computer Laboratory (1 unit)

Course Description: Introduction to MATLAB and its use in linear algebra.

Prerequisite(s): MAT 016C or MAT 017C or MAT 021C or MAT 021CH.

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 022B – Differential Equations (3 units)

Course Description: Solutions of elementary differential equations.

Prerequisite(s): (MAT 022A C- or better or MAT 027A C- or better or BIS 027A C- or better or MAT 067 C- or better).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 027A – Linear Algebra with Applications to Biology (4 units)

Course Description: Introduction to linear algebra with biological, medical, and bioengineering applications. Matrix algebra, vector spaces, orthogonality, determinants, eigenvalues, eigenvectors, principal component analysis, singular value decomposition, and linear transformations. Computer labs cover mathematical and computational techniques for modeling biological systems.

Prerequisite(s): MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Only 1 unit of credit for students who have completed MAT 022A.

Cross Listing: BIS 027A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 027B – Differential Equations with Applications to Biology (4 units)

Course Description: Solutions of differential equations with biological, medical, and bioengineering applications. First and second order linear equations, phase plane analysis, nonlinear dynamics, Laplace transforms, and the diffusion equation. Computer labs cover mathematical and numerical techniques for modeling biological systems.

Prerequisite(s): (MAT 027A C- or better or BIS 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or ECS 032A C- or better or ECS 036A C- or better or ECH 060 C- or better or EME 005 C- or better)).

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Only 1 unit of credit for students who have completed MAT 022B.

Cross Listing: BIS 027B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 036 – Fundamentals of Mathematics (3 units)

Course Description: Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the primes, the fundamental theorems of arithmetic, properties of the rationals and irrationals, binary and other number systems.

Prerequisite(s): Satisfaction of the Mathematics Placement Requirement.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken MAT 108.

Grade Mode: Letter.

MAT 067 – Modern Linear Algebra (4 units)

Course Description: Rigorous treatment of linear algebra; topics include vector spaces, bases and dimensions, orthogonal projections, eigenvalues and eigenvectors, similarity transformations, singular value decomposition and positive definiteness.

Prerequisite(s): MAT 021C C- or better or MAT 021CH C- or better.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Only 1 unit of credit to students who have completed MAT 022A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 071A – Explorations in Elementary Mathematics (3 units)

Course Description: Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration.

Prerequisite(s): Two years of high school mathematics.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

MAT 071B – Explorations in Elementary Mathematics (3 units)

Course Description: Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration.

Prerequisite(s): Two years of high school mathematics.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

MAT 089 – Elementary Problem Solving (1 unit)

Course Description: Solve and present solutions to challenging and interesting problems in elementary mathematics.

Prerequisite(s): High school mathematics through precalculus.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Pass/No Pass only.

MAT 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MAT 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MAT 107 – Probability & Stochastic Processes with Applications to Biology (4 units)

Course Description: Introduction to probability theory and stochastic processes with biological, medical, and bioengineering applications. Combinatorics, discrete and continuous random variables, Bayes' formula, conditional probability, Markov chains, Poisson processes, and Brownian motion. Computer labs cover mathematical and computational modeling techniques.

Prerequisite(s): (MAT 027A C- or better or BIS 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or ECS 032A C- or better or ECS 036A C- or better or ECH 060 C- or better or EME 005 C- or better)).

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Only 2 units of credit for students who have completed MAT 135A or STA 131A.

Cross Listing: BIS 107.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 108 – Introduction to Abstract Mathematics (4 units)

Course Description: Rigorous treatment of mathematical concepts with emphasis on developing the ability to understand abstract mathematical ideas, to read and write mathematical concepts, and to prove theorems. Designed to serve as preparation for the more rigorous upper division courses.

Prerequisite(s): MAT 021B.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 111 – History of Mathematics (4 units)

Course Description: History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics.

Prerequisite(s): MAT 127A or MAT 067 or MAT 108 or MAT 114 or MAT 115A or MAT 141 or MAT 145; 8 units of upper division Mathematics.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 114 – Convex Geometry (4 units)

Course Description: Topics selected from the theory of convex bodies, convex functions, geometric inequalities, combinatorial geometry, and integral geometry. Designed to serve as preparation for the more rigorous upper division courses.

Prerequisite(s): MAT 021C; (MAT 022A or BIS 027A or MAT 067).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 115A – Number Theory (4 units)

Course Description: Divisibility and related topics, diophantine equations, selected topics from the theory of prime numbers. Designed to serve as preparation for the more rigorous upper division courses.

Prerequisite(s): MAT 021B.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 115B – Number Theory (4 units)

Course Description: Euler function, Moebius function, congruences, primitive roots, quadratic reciprocity law.

Prerequisite(s): MAT 115A; (MAT 022A or MAT 027A or MAT 067 or BIS 027A).

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 116 – Differential Geometry (4 units)

Course Description: Vector analysis, curves, and surfaces in three dimensions.

Prerequisite(s): MAT 021D; (MAT 022A or MAT 027A or MAT 067 or BIS 027A); (MAT 022B or MAT 027B or BIS 027B).

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 118A – Partial Differential Equations: Elementary Methods (4 units)

Course Description: Derivation of partial differential equations; separation of variables; equilibrium solutions and Laplace's equation; Fourier series; method of characteristics for the one dimensional wave equation. Solution of nonhomogeneous equations.

Prerequisite(s): MAT 021D; (MAT 022A or MAT 027A or MAT 067 or BIS 027A); (MAT 022B or MAT 027B or BIS 027B).

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Enrollment Restriction(s): Pass One open to Applied Mathematics, Mathematics, Mathematics & Scientific Computation, Mathematical Analytics & Operations Research.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 118B – Partial Differential Equations: Eigenfunction Expansions (4 units)

Course Description: Sturm-Liouville Theory; selfadjoint operators; mixed boundary conditions; partial differential equations in two and three dimensions; Eigenvalue problems in circular domains; nonhomogeneous problems and the method of eigenfunction expansions; Poisson's Equations.

Prerequisite(s): MAT 118A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 118C – Partial Differential Equations: Green's Functions & Transforms (4 units)

Course Description: Green's functions for one-dimensional problems and Poisson's equation; Fourier transforms; Green's Functions for time dependent problems; Laplace transform and solution of partial differential equations.

Prerequisite(s): MAT 118B.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 119A – Ordinary Differential Equations (4 units)

Course Description: Scalar and planar autonomous systems; nonlinear systems and linearization; existence and uniqueness of solutions; matrix solution of linear systems; phase plane analysis; stability analysis; bifurcation theory; Liapunov's method; limit cycles; Poincare Bendixon theory.

Prerequisite(s): MAT 021D; (MAT 022A or MAT 027A or MAT 067 or BIS 027A); (MAT 022B or MAT 027B or BIS 027B).

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 119B – Ordinary Differential Equations (4 units)

Course Description: Lorentz equations; Poincare maps; center manifolds and normal forms; scalar and planar maps; phase space analysis for iterated maps; period-doubling bifurcation; Lyapunov exponent; chaos and symbolic dynamics; strange attractors; fractals.

Prerequisite(s): MAT 119A.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 124 – Mathematical Biology (4 units)

Course Description: Methods of mathematical modeling of biological systems including difference equations, ordinary differential equations, stochastic and dynamic programming models. Computer simulation methods applied to biological systems. Applications to population growth, cell biology, physiology, evolutionary ecology and protein clustering. MATLAB programming required.

Prerequisite(s): (MAT 022A or MAT 027A or MAT 067 or BIS 027A); (MAT 022B or MAT 027B or BIS 027B).

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 127A – Real Analysis (4 units)

Course Description: Real numbers, sequences, series, and continuous functions.

Prerequisite(s): (MAT 021C or MAT 021CH); (MAT 067 or (MAT 022A or MAT 027A or BIS 027A), MAT 108).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAT 127B – Real Analysis (4 units)

Course Description: Derivatives, integrals, sequences of functions, and power series.

Prerequisite(s): MAT 127A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAT 127C – Real Analysis (4 units)

Course Description: Metric spaces and multi-variable calculus.

Prerequisite(s): MAT 127B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAT 128A – Numerical Analysis (4 units)

Course Description: Error analysis, approximation, interpolation, numerical differentiation and integration. Programming in language such as Pascal, Fortran, or BASIC required.

Prerequisite(s): MAT 021C; (ECS 032A or ENG 006 or EME 005 or ECS 030).

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 128B – Numerical Analysis in Solution of Equations (4 units)

Course Description: Solution of nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear equations. Eigenvalue problems. Linear programming.

Programming in language such as Pascal, Fortran, or BASIC required.

Prerequisite(s): (MAT 022A or MAT 027A or MAT 067 or BIS 027A); (ECS 032A or ENG 006 or EME 005 or ECS 030).

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 128C – Numerical Analysis in Differential Equations (4 units)

Course Description: Difference equations, operators, numerical solutions of ordinary and partial differential equations. Programming in language such as Pascal, Fortran, or BASIC required.

Prerequisite(s): (ECS 032A or ENG 006 or EME 005 or ECS 030); (MAT 022A or MAT 027A or MAT 067 or BIS 027A); (MAT 022B or MAT 027B or BIS 027B).

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 129 – Fourier Analysis (4 units)

Course Description: Fourier series and integrals, orthogonal sets of functions. Topics selected from trigonometric approximation, orthogonal polynomials, applications to signal and image processing, numerical analysis, and differential equations.

Prerequisite(s): MAT 021D; MAT 127A; (MAT 022A or MAT 027A or MAT 067 or BIS 027A); (MAT 022B or MAT 027B or BIS 027B);

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 133 – Mathematical Finance (4 units)

Course Description: Analysis and evaluation of deterministic and random cash flow streams, yield and pricing of basic financial instruments, interest rate theory, mean-variance portfolio theory, capital asset pricing models, utility functions and general principles. MATLAB programming required.

Prerequisite(s): (MAT 067 or MAT 022A or MAT 027A or BIS 027A); MAT 108; MAT 135A

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MAT 135A – Probability (4 units)

Course Description: Probability space; discrete probability, combinatorial analysis; independence, conditional probability; random variables, discrete and continuous distributions, probability mass function, joint and marginal density functions; expectation, moments, variance, Chebyshev inequality; sums of random variables, random walk, large number law, central limit theorem.

Prerequisite(s): MAT 021C; (MAT 108 or MAT 067).

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed former MAT 131.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 135B – Stochastic Processes (4 units)

Course Description: Generating functions, branching processes, characteristic function; Markov chains; convergence of random variables, law of iterated logarithm; random processes, Brownian motion, stationary processes, renewal processes, queueing theory, martingales.

Prerequisite(s): MAT 135A; (MAT 022A or MAT 027A or MAT 067 or BIS 027A).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 141 – Euclidean Geometry (4 units)

Course Description: Axiomatic and analytic examination of Euclidean geometry from an advanced point of view. In particular, a discussion of its relation to other geometries. Designed to serve as preparation for the more rigorous upper division courses.

Prerequisite(s): MAT 021B; (MAT 022A or MAT 027A or MAT 067 or BIS 027A).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 145 – Combinatorics (4 units)

Course Description: Combinatorial methods using basic graph theory, counting methods, generating functions, and recurrence relations. Designed to serve as preparation for the more rigorous upper division courses.

Prerequisite(s): MAT 021C.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 146 – Algebraic Combinatorics (4 units)

Course Description: Enumeration, Polya theory, generating functions, current topics in algebraic combinatorics.

Prerequisite(s): ((MAT 022A or MAT 027A or BIS 027A, MAT 108) or MAT 067); MAT 145.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed former MAT 149A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 147 – Topology (4 units)

Course Description: Basic notions of point-set and combinatorial topology.

Prerequisite(s): MAT 127A.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 148 – Discrete Mathematics (4 units)

Course Description: Coding theory, error correcting codes, finite fields and the algebraic concepts needed in their development.

Prerequisite(s): MAT 067 or (MAT 022A or MAT 027A or BIS 027A, MAT 108).

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed former MAT 149B.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 150A – Modern Algebra (4 units)

Course Description: Basic concepts of groups, symmetries of the plane.

Emphasis on the techniques used in the proof of the ideas (Lemmas, Theorems, etc.) developing these concepts. Precise thinking, proof writing, and the ability to deal with abstraction.

Prerequisite(s): MAT 067 or (MAT 022A or MAT 027A or BIS 027A, MAT 108).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 150B – Modern Algebra (4 units)

Course Description: Bilinear forms, rings, factorization, modules.

Prerequisite(s): MAT 150A.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 150C – Modern Algebra (4 units)

Course Description: Group representations, fields, Galois theory.

Prerequisite(s): MAT 150B.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 165 – Mathematics & Computers (4 units)

Course Description: Introduction to computational mathematics, symbolic computation, and computer generated/verified proofs in algebra, analysis and geometry. Investigation of rigorous new mathematics developed in conjunction with modern computational questions and the role that computers play in mathematical conjecture and experimentation.

Prerequisite(s): (MAT 127A or MAT 108 or MAT 114 or MAT 115A or MAT 145); (MAT 022A or MAT 027A or MAT 067 or BIS 027A).

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 167 – Applied Linear Algebra (4 units)

Course Description: Applications of linear algebra; LU and QR matrix factorizations, eigenvalue and singular value matrix decompositions.

Prerequisite(s): MAT 022A or MAT 027A or BIS 027A or MAT 067.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 168 – Optimization (4 units)

Course Description: Linear programming, simplex method. Basic properties of unconstrained nonlinear problems, descent methods, conjugate direction method. Constrained minimization. Programming language required.

Prerequisite(s): MAT 021C; ((MAT 022A or MAT 027A or BIS 027A, MAT 108) or MAT 067)).

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MAT 170 – Mathematics for Data Analytics & Decision Making (4 units)

Course Description: Relational model; relational algebra, relational calculus, normal forms, functional and multivalued dependencies, separability. Cost benefit analysis of physical database design and reorganization. Performance via analytical modeling, simulation, and queueing theory. Block accesses; buffering; operating system contention; CPU intensive operations.

Prerequisite(s): MAT 167 or MAT 128B or ECS 130.

Learning Activities: Lecture 3 hour(s), Project.

Enrollment Restriction(s): Pass One open to Applied Mathematics, Mathematics, Mathematics & Scientific Computation, Mathematical Analytics & Operations Research and Statistics Majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 180 – Special Topics (3 units)

Course Description: Special topics from various fields of modern, pure, and applied mathematics. Some recent topics include Knot Theory, General Relativity, and Fuzzy Sets.

Prerequisite(s): (MAT 067 or (MAT 022A or MAT 027A or BIS 027A, MAT 108)), MAT 127A.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 185A – Complex Analysis (4 units)

Course Description: Complex number system, analyticity and the Cauchy-Riemann equations, elementary functions, complex integration, power and Laurent series expansions, residue theory.

Prerequisite(s): (MAT 067 or (MAT 022A or MAT 027A or BIS 027A, MAT 108)), MAT 127B.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 185B – Complex Analysis (4 units)

Course Description: Analytical functions, elementary functions and their mapping properties, applications of Cauchy's integral theorem, conformal mapping and applications to heat flow and fluid mechanics.

Prerequisite(s): MAT 185A.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MAT 189 – Advanced Problem Solving (3 units)

Course Description: Solution and presentation of advanced problem solving techniques. Solve and present interesting and challenging problems of all areas of mathematics.

Prerequisite(s): ((MAT 022A, MAT 027A or BIS 027A, MAT 108) or MAT 067); MAT 127A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Writing Experience (WE).

MAT 192 – Internship in Applied Mathematics (1-3 units)

Course Description: Supervised work experience in applied mathematics. Final report.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship.

Repeat Credit: May be repeated 10 unit(s).

Grade Mode: Pass/No Pass only.

MAT 194 – Undergraduate Thesis (3 units)

Course Description: Independent research under supervision of a faculty member. Student will submit written report in thesis form.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study.

Repeat Credit: May be repeated with consent of Vice Chairperson.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MAT 197TC – Tutoring Mathematics in the Community (1-5 units)

Course Description: Special projects in mathematical education developing techniques for mathematics instruction and tutoring on an individual or small group basis.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1-2 hour(s), Laboratory 2-6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MAT 198 – Directed Group Study (1-5 units)

Course Description: May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MAT 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MAT 200 – Problem-Solving in Analysis (3 units)

Course Description: Problem-solving in graduate analysis: continuous functions, metric spaces, Banach & Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series & transforms, L_p spaces, Sobolev spaces.

Prerequisite(s): MAT 201A (can be concurrent); MAT 201B (can be concurrent).

Learning Activities: Lecture 1 hour(s), Extensive Problem Solving.

Grade Mode: Satisfactory/Unsatisfactory only.

MAT 201A – Analysis (4 units)

Course Description: Metric and normed spaces. Continuous functions. Topological, Hilbert, and Banach spaces. Fourier series. Spectrum of bounded and compact linear operators. Linear differential operators and Green's functions. Distributions. Fourier transform. Measure theory. L_p and Sobolev spaces. Differential calculus and variational methods.

Prerequisite(s): Graduate standing in Mathematics or Applied Mathematics, or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 201B – Analysis (4 units)

Course Description: Metric and normed spaces. Continuous functions. Topological, Hilbert, and Banach spaces. Fourier series. Spectrum of bounded and compact linear operators. Linear differential operators and Green's functions. Distributions. Fourier transform. Measure theory. L_p and Sobolev spaces. Differential calculus and variational methods.

Prerequisite(s): Graduate standing in Mathematics or Applied Mathematics, or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 201C – Analysis (4 units)

Course Description: Metric and normed spaces. Continuous functions. Topological, Hilbert, and Banach spaces. Fourier series. Spectrum of bounded and compact linear operators. Linear differential operators and Green's functions. Distributions. Fourier transform. Measure theory. L_p and Sobolev spaces. Differential calculus and variational methods.

Prerequisite(s): Graduate standing in Mathematics or Applied Mathematics, or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 202 – Functional Analysis (4 units)

Course Description: Hahn-Banach, Open mapping, Closed graph, Banach-Steinhaus, and Krein-Milman. Subspaces and quotient spaces. Projections. Weak and weak-star topologies. Compact and adjoint operators in Banach spaces. Fredholm theory. Functions of operators. Spectral theory of self-adjoint operators.

Prerequisite(s): MAT 201A; MAT 201B.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

MAT 205 – Complex Analysis (4 units)

Course Description: Analytic continuation, Riemann surfaces, conformal mappings, Riemann mapping theorem, entire functions, special functions, elliptic functions.

Prerequisite(s): MAT 185A; or equivalent to MAT 185A, or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 205A – Complex Analysis (4 units)

Course Description: Cauchy's theorem, Cauchy's integral formulas, meromorphic functions, complex logarithm, entire functions, Weierstrass infinite product formula, the gamma and zeta functions, and prime number theorem.

Prerequisite(s): MAT 185A; or equivalent to MAT 185A, or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Credit Limitation(s): No credit given to students who have completed MAT 205.

Grade Mode: Letter.

MAT 205B – Complex Analysis (4 units)

Course Description: Conformal mappings, the Schwarz lemma, analytic automorphisms, the Riemann mapping theorem, elliptic functions, Eisenstein series, the Jacobi theta functions, asymptotics, Bessel functions, the Airy function, topics on special functions and Riemann surfaces.

Prerequisite(s): MAT 205A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

MAT 206 – Measure Theory (4 units)

Course Description: Introduction to measure theory. The study of lengths, surface areas, and volumes in general spaces, as related to integration theory.

Prerequisite(s): MAT 125B.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

MAT 207A – Methods of Applied Mathematics (4 units)

Course Description: Ordinary differential equations and dynamical systems. Variational principles. Eigenfunctions, integral equations and Green's functions. Complex analysis and contour integration. Laplace's equation. Diffusion equations. Wave phenomena. Dimensional analysis and scaling. Asymptotic expansions and perturbation theory. Stochastic processes and Brownian motion.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 207B – Methods of Applied Mathematics (4 units)

Course Description: Ordinary differential equations and dynamical systems. Variational principles. Eigenfunctions, integral equations and Green's functions. Complex analysis and contour integration. Laplace's equation. Diffusion equations. Wave phenomena. Dimensional analysis and scaling. Asymptotic expansions and perturbation theory. Stochastic processes and Brownian motion.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 207C – Methods of Applied Mathematics (4 units)

Course Description: Ordinary differential equations and dynamical systems. Variational principles. Eigenfunctions, integral equations and Green's functions. Complex analysis and contour integration. Laplace's equation. Diffusion equations. Wave phenomena. Dimensional analysis and scaling. Asymptotic expansions and perturbation theory. Stochastic processes and Brownian motion.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 215A – Topology (4 units)

Course Description: Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 215B – Topology (4 units)

Course Description: Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 215C – Topology (4 units)

Course Description: Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 216 – Geometric Topology (4 units)

Course Description: Topology of two- and three-dimensional manifolds. Surfaces and their diffeomorphisms. Dehn twists. Heegaard surfaces. Theory of 3-dimensional manifolds. Knots and knot theory. Hyperbolic manifolds and geometric structures.

Prerequisite(s): MAT 215A.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

MAT 218A – Partial Differential Equations (4 units)

Course Description: Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness.

Prerequisite(s): MAT 201A; MAT 201B; MAT 201C; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 218B – Partial Differential Equations (4 units)

Course Description: Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness.

Prerequisite(s): MAT 218A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 218C – Partial Differential Equations (4 units)

Course Description: Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness.

Prerequisite(s): MAT 218B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 221A – Mathematical Fluid Dynamics (4 units)

Course Description: Kinematics and dynamics of fluids. The Euler and Navier-Stokes equations. Vorticity dynamics. Irrotational flow. Low Reynolds number flows and the Stokes equations. High Reynolds number flows and boundary layers. Compressible fluids. Shock waves.

Prerequisite(s): MAT 118B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 221B – Mathematical Fluid Dynamics (4 units)

Course Description: Kinematics and dynamics of fluids. The Euler and Navier-Stokes equations. Vorticity dynamics. Irrotational flow. Low Reynolds number flows and the Stokes equations. High Reynolds number flows and boundary layers. Compressible fluids. Shock waves.

Prerequisite(s): MAT 118B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 226A – Numerical Methods: Fundamentals (4 units)

Course Description: Fundamental principles and methods in numerical analysis, including the concepts of stability of algorithms and conditioning of numerical problems, numerical methods for interpolation and integration, eigenvalue problems, singular value decomposition and its applications.

Prerequisite(s): MAT 128A; MAT 128B; or equivalent, or consent of instructor; familiarity with some programming language.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 226B – Numerical Methods: Large-Scale Matrix Computations (4 units)

Course Description: Numerical methods for large-scale matrix computations, including direct and iterative methods for the solution of linear systems, the computation of eigenvalues and singular values, the solution of least-squares problems, matrix compression, methods for the solution of linear programs.

Prerequisite(s): MAT 167; or equivalent, or consent of instructor; familiarity with some programming language.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 226C – Numerical Methods: Ordinary Differential Equations (4 units)

Course Description: Numerical methods for the solution of ordinary differential equations, including methods for initial-value problems and two-point boundary-value problems, theory of and methods for differential algebraic equations, dimension reduction of large-scale dynamical systems.

Prerequisite(s): MAT 022B; or equivalent, or consent of instructor; familiarity with some programming language.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 227 – Mathematical Biology (4 units)

Course Description: Nonlinear ordinary and partial differential equations and stochastic processes of cell and molecular biology. Scaling, qualitative, and numerical analysis of mathematical models. Applications to nerve impulse, chemotaxis, muscle contraction, and morphogenesis.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 228A – Numerical Solution of Differential Equations (4 units)

Course Description: Numerical solutions of initial-value, eigenvalue and boundary-value problems for ordinary differential equations. Numerical solution of parabolic and hyperbolic partial differential equations.

Prerequisite(s): MAT 128C.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s), Discussion.

Grade Mode: Letter.

MAT 228B – Numerical Solution of Differential Equations (4 units)

Course Description: Numerical solutions of initial-value, eigenvalue and boundary-value problems for ordinary differential equations. Numerical solution of parabolic and hyperbolic partial differential equations.

Prerequisite(s): MAT 128C.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s), Discussion.

Grade Mode: Letter.

MAT 228C – Numerical Solution of Differential Equations (4 units)

Course Description: Numerical solutions of initial-value, eigenvalue and boundary-value problems for ordinary differential equations. Numerical solution of parabolic and hyperbolic partial differential equations.

Prerequisite(s): MAT 128C.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s), Discussion.

Grade Mode: Letter.

MAT 235A – Probability Theory (4 units)

Course Description: Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory.

Prerequisite(s): MAT 125B; (MAT 135A or STA 131A); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Cross Listing: STA 235A.

Grade Mode: Letter.

MAT 235B – Probability Theory (4 units)

Course Description: Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory.

Prerequisite(s): MAT 235A or STA 235A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Cross Listing: STA 235B.

Grade Mode: Letter.

MAT 235C – Probability Theory (4 units)

Course Description: Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory.

Prerequisite(s): MAT 235B or STA 235B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Cross Listing: STA 235C.

Grade Mode: Letter.

MAT 236A – Stochastic Dynamics & Applications (4 units)

Course Description: Stochastic processes, Brownian motion, Stochastic integration, martingales, stochastic differential equations. Diffusions, connections with partial differential equations, mathematical finance.

Prerequisite(s): MAT 201C or (MAT 235B or STA 235B); MAT 235A, MAT 235B, MAT 235C/STA 235A, STA 235B, STA 235C recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 236B – Stochastic Dynamics & Applications (4 units)

Course Description: Stochastic processes, Brownian motion, Stochastic integration, martingales, stochastic differential equations. Diffusions, connections with partial differential equations, mathematical finance.

Prerequisite(s): MAT 201C or (MAT 235B or STA 235B); MAT 235A, MAT 235B, MAT 235C/STA 235A, STA 235B, STA 235C recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 239 – Differential Topology (4 units)

Course Description: Differentiable manifolds, vector fields, transverse intersections, Sard's Theorem, orientations, intersection theory, the index of a vector field, differential forms, integration on manifolds, Stokes' Theorem, deRham cohomology, Morse functions, the Morse lemma, and the index of critical points.

Prerequisite(s): MAT 201A; or consent of instructor; Vector calculus, point-set topology; MAT 250A MAT 250B highly recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAT 240A – Differential Geometry (4 units)

Course Description: Riemannian metrics, connections, geodesics, Gauss lemma, convex neighborhoods, curvature tensor, Ricci and scalar curvature, connections and curvature on vector bundles.

Prerequisite(s): MAT 201A; MAT 239; MAT 250A MAT 250B highly recommended; intended primarily for second-year graduate students.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 240B – Differential Geometry (4 units)

Course Description: Jacobi fields, conjugate points, completeness, Hopf-Rinow theorem, Cartan-Hadamard theorem, energy, variation theorems and their applications, Rauch comparison theorem and its applications.

Prerequisite(s): MAT 240A; Intended primarily for second-year graduate students.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 245 – Enumerative Combinatorics (4 units)

Course Description: Introduction to modern combinatorics and its applications. Emphasis on enumerative aspects of combinatorial theory.

Prerequisite(s): MAT 145; MAT 150; or the equivalent, or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

MAT 246 – Algebraic Combinatorics (4 units)

Course Description: Algebraic and geometric aspects of combinatorics. The use of structures such as groups, polytopes, rings, and simplicial complexes to solve combinatorial problems.

Prerequisite(s): MAT 245; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

MAT 248A – Algebraic Geometry (4 units)

Course Description: Affine varieties and radical ideals. Projective varieties. Abstract varieties. Morphisms and rational maps. Smoothness. Algebraic curves and the Riemann-Roch theorem. Special topics.

Prerequisite(s): MAT 250A; MAT 250B; MAT 250C.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

MAT 248B – Algebraic Geometry (4 units)

Course Description: Complex varieties and the analytic topology.

Sheaves and schemes. Fiber products. Separatedness and properness.

Applications of scheme theory.

Prerequisite(s): MAT 248A.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

MAT 249 – Problem-Solving in Algebra (3 units)

Course Description: Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra.

Prerequisite(s): MAT 250A (can be concurrent); MAT 250B (can be concurrent).

Learning Activities: Lecture 1 hour(s), Extensive Problem Solving.

Grade Mode: Satisfactory/Unsatisfactory only.

MAT 250A – Algebra (4 units)

Course Description: Group and rings. Sylow theorems, abelian groups, Jordan-Hölder theorem. Rings, unique factorization. Algebras, and modules. Fields and vector spaces over fields. Field extensions.

Commutative rings. Representation theory and its applications.

Prerequisite(s): Graduate standing in mathematics or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 250B – Algebra (4 units)

Course Description: Group and rings. Sylow theorems, abelian groups, Jordan-Hölder theorem. Rings, unique factorization. Algebras, and modules. Fields and vector spaces over fields. Field extensions.

Commutative rings. Representation theory and its applications.

Prerequisite(s): Graduate standing in mathematics or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 250C – Algebra (4 units)

Course Description: Group and rings. Sylow theorems, abelian groups, Jordan-Hölder theorem. Rings, unique factorization. Algebras, and modules. Fields and vector spaces over fields. Field extensions.

Commutative rings. Representation theory and its applications.

Prerequisite(s): Graduate standing in mathematics or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 258A – Numerical Optimization (4 units)

Course Description: Numerical methods for infinite dimensional optimization problems. Newton and Quasi-Newton methods, linear and sequential quadratic programming, barrier methods; large-scale optimization; theory of approximations; infinite and semi-infinite programming; applications to optimal control, stochastic optimization and distributed systems.

Prerequisite(s): MAT 025; MAT 167.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 258B – Discrete & Mixed-Integer Optimization (4 units)

Course Description: Combinatorial, integer, and mixed-integer linear optimization problems. Ideal and strong formulations, cutting planes, branch and cut, decomposition methods.

Prerequisite(s): MAT 025; MAT 167; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 261 – Lie Groups & Lie Algebras (4 units)

Course Description: Lie groups, examples and topological properties. Lie algebras and representation theory, and semisimple Lie algebras.

Prerequisite(s): MAT 147 and MAT 150A strongly encouraged; or equivalent; MAT 250A and MAT 215A and MAT 239 (can be concurrent) recommended.

Learning Activities: Lecture 3 hour(s); Extensive Problem Solving.

Enrollment Restriction(s): Open to graduate students only; or consent of instructor.

Grade Mode: Letter.

MAT 265 – Mathematical Quantum Mechanics (4 units)

Course Description: Mathematical foundations of quantum mechanics: the Hilbert space and Operator Algebra formulations; the Schrödinger and Heisenberg equations, symmetry in quantum mechanics, basics of spectral theory and perturbation theory. Applications to atoms and molecules. The Dirac equation.

Prerequisite(s): MAT 201; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

MAT 266 – Mathematical Statistical Mechanics & Quantum Field Theory (4 units)

Course Description: Mathematical principles of statistical mechanics and quantum field theory. Topics include classical and quantum lattice systems, variational principles, spontaneous symmetry breaking and phase transitions, second quantization and Fock space, and fundamentals of quantum field theory.

Prerequisite(s): MAT 265; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

MAT 267 – Quantum Information Theory (4 units)

Course Description: Axioms of quantum information, quantum states and observables, Bell non-locality, quantum channels, quantum entropy, quantum error correction, quantum circuits, examples of quantum algorithms.

Prerequisite(s): MAT 201B or MAT 250B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Enrollment Restriction(s): Restricted to Graduate Students;

Undergraduates with written consent of instructor.

Grade Mode: Letter.

MAT 270 – Mathematics of Data Science (4 units)

Course Description: Mathematical methods and algorithms that are fundamental to a variety of data science applications. Theoretical foundations and inner workings of popular algorithms used in data science, machine learning, and artificial intelligence. Implementation and application of these algorithms to real-world data sets.

Prerequisite(s): MAT 127A; MAT 167; MAT 135A.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Enrollment Restriction(s): Open to Graduate Students; undergraduate students obtain consent of instructor.

Grade Mode: Letter.

MAT 271 – Applied & Computational Harmonic Analysis (4 units)

Course Description: Introduction to mathematical basic building blocks (wavelets, local Fourier basis, and their relatives) useful for diverse fields (signal and image processing, numerical analysis, and statistics). Emphasis on the connection between the continuum and the discrete worlds.

Prerequisite(s): (MAT 125B or MAT 201C); (MAT 128B or MAT 167); MAT 129; or the equivalent, or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

MAT 280 – Topics in Pure & Applied Mathematics (3 units)

Course Description: Special topics in various fields of pure and applied mathematics. Topics selected based on the mutual interests of students and faculty.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

MAT 290 – Seminar (1-6 units)

Course Description: Advanced study in various fields of mathematics, including analysis, applied mathematics, discrete mathematics, geometry, mathematical biology, mathematical physics, optimization, partial differential equations, probability, and topology.

Learning Activities: Seminar 1-6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MAT 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Letter.

MAT 299 – Individual Study (1-12 units)

Course Description: Individual study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MAT 299D – Dissertation Research (1-12 units)

Course Description: Dissertation research.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MAT 301A – Mathematics Teaching Practicum (3 units)

Course Description: Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education.

Prerequisite(s): MAT 302A (can be concurrent); MAT 303A (can be concurrent); MAT 302A MAT 303A required concurrently or consent of instructor.

Learning Activities: Fieldwork 5 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

MAT 301B – Mathematics Teaching Practicum (3 units)

Course Description: Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education.

Prerequisite(s): MAT 302B (can be concurrent); MAT 303B (can be concurrent); MAT 302B MAT 303B required concurrently or consent of instructor.

Learning Activities: Fieldwork 5 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

MAT 301C – Mathematics Teaching Practicum (3 units)

Course Description: Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education.

Prerequisite(s): MAT 302C (can be concurrent); MAT 303B (can be concurrent); MAT 302C MAT 303C required concurrently or consent of instructor.

Learning Activities: Fieldwork 5 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

MAT 302A – Curriculum Development in Mathematics (1 unit)

Course Description: Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education.

Prerequisite(s): MAT 303A required concurrently or consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

MAT 302B – Curriculum Development in Mathematics (1 unit)

Course Description: Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education.

Prerequisite(s): MAT 303B required concurrently or consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

MAT 302C – Curriculum Development in Mathematics (1 unit)

Course Description: Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education.

Prerequisite(s): MAT 303C required concurrently or consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MAT 303A – Mathematics Pedagogy (1 unit)

Course Description: An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development.

Prerequisite(s): MAT 302A or MAT 210AL required concurrently or consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

MAT 303B – Mathematics Pedagogy (1 unit)

Course Description: An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development.

Prerequisite(s): MAT 302A or MAT 210AL required concurrently or consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

MAT 303C – Mathematics Pedagogy (1 unit)

Course Description: An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development.

Prerequisite(s): MAT 302C or MAT 210CL required concurrently or consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

MAT 390 – Teaching Assistantship Training (3 units)

Course Description: Experience in methods of assisting and teaching of mathematics at the university level. Includes discussion of lecturing techniques, running discussion sessions, holding office hours, preparing and grading of examinations, student-teacher interaction, and related topics. Required of departmental teaching assistants.

Prerequisite(s): Graduate standing in the Department of Mathematics.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

MAT 399 – Individual Study (2-4 units)

Course Description: Individual study of some aspect of mathematics education or a focused work on a curriculum design project under supervision of a faculty member in mathematics.

Learning Activities: Independent Study 2-3 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Mechanical & Aeronautical Engineering (MAE)

College of Engineering

MAE 207 – Engineering Experimentation & Uncertainty Analysis (4 units)

Course Description: Design and analysis of engineering experiments with emphasis on measurement standards, data analysis, regressions and general and detailed uncertainty analysis, including statistical treatment of experimental data intervals, propagation of bias and precision errors, correlated bias approximations, and using jitter programs.

Prerequisite(s): EME 108; EME 109.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Graduate students.

Grade Mode: Letter.

MAE 210A – Advanced Fluid Mechanics & Heat Transfer (4 units)

Course Description: Development of differential equations governing continuity, momentum and energy transfer. Solutions in laminar flow for exact cases, low and high Reynolds numbers and lubrication theory. Dynamics of inviscid flow.

Prerequisite(s): ENG 103; ENG 105; EME 165.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 210B – Advanced Fluid Mechanics & Heat Transfer (4 units)

Course Description: Study of stability and transition to turbulence. Introduction to the physics of turbulence. Modeling of turbulence for numerical determination of momentum and heat transfer.

Prerequisite(s): MAE 210A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 211 – Fluid Flow & Heat Transfer (4 units)

Course Description: Design aspects of selected topics such as: heat conduction, fins; heat transport in ducts, boundary layers and separated flows; heat exchangers.

Prerequisite(s): ENG 103; ENG 105; EME 165; or equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 212 – Biomedical Heat & Mass Transport Processes (4 units)

Course Description: Application of principles of heat and mass transfer to biomedical systems related to heat exchange between the biomedical system and its environment, mass transfer across cell membranes and the design and analysis of artificial human organs.

Prerequisite(s): EME 165; EBS 125; ECH 153; or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: BIM 212.

Grade Mode: Letter.

MAE 216 – Advanced Thermodynamics (4 units)

Course Description: Study of topics important to energy conversion systems, propulsion and other systems using high temperature gases. Classical thermodynamics and quantum statistical mechanics of nonreacting and chemically reacting gases, gas mixtures, and other substances.

Prerequisite(s): ENG 105.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 217 – Combustion (4 units)

Course Description: Review of chemical thermodynamics and chemical kinetics. Discussion of reacting flows, their governing equations and transport phenomena; detonations; laminar flame structure and turbulent combustion.

Prerequisite(s): ENG 103; ENG 105; EME 106.

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

MAE 218 – Advanced Energy Systems (4 units)

Course Description: Review of options available for advanced power generation. Detailed study of basic power balances, component efficiencies, and overall powerplant performance for one advanced concept such as a fusion, magnetohydrodynamic, or solar electric powerplant.

Prerequisite(s): ENG 103; ENG 105; or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 219 – Introduction to Scientific Computing in Solid & Fluid Dynamics (4 units)

Course Description: Scientific calculations with finite element and finite difference methods for multi-dimensional problems in solid and fluid dynamics are performed with examples in C, C++, FORTRAN, and MATLAB script files. Derivation of the basic equations of motion in finite volume form with applications to elasticity, waves.

Prerequisite(s): ENG 103; ENG 104.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

MAE 220 – Mechanical Vibrations (4 units)

Course Description: Multiple degrees of freedom; damping measures; Rayleigh's method; vibration absorbers; eigenvalues and modeshapes; modal coordinates; forced vibrations; random processes and vibrations; autocorrelation; spectral density; first passage and fatigue failure; nonlinear systems; phase plane.

Prerequisite(s): ENG 122.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MAE 222 – Advanced Dynamics (4 units)

Course Description: Dynamics of particles, rigid bodies and distributed systems with engineering applications; generalized coordinates; Hamilton's principle; Lagrange's equations; Hamilton-Jacobi theory; modal dynamics orthogonality; wave dynamics; dispersion.

Prerequisite(s): ENG 102.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MAE 223 – Multibody Dynamics (4 units)

Course Description: Coupled rigid-body kinematics/dynamics; reference frames; vector differentiation; configuration and motion constraints; holonomicity; generalized speeds; partial velocities; mass; inertia tensor/theorems; angular momentum; generalized forces; comparing Newton/Euler, Lagrange's, Kane's methods; computer-aided equation derivation; orientation; Euler; Rodrigues parameters.

Prerequisite(s): ENG 102.

Learning Activities: Lecture 4 hour(s).

Cross Listing: BIM 223.

Grade Mode: Letter.

MAE 225 – Spatial Kinematics & Robotics (4 units)

Course Description: Spatial kinematics, screw theory, spatial mechanisms analysis and synthesis, robot kinematics and dynamics, robot workspace, path planning, robot programming, real-time architecture and software implementation.

Prerequisite(s): MAE 222; C Language.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: BIM 225.

Grade Mode: Letter.

MAE 226 – Acoustics & Noise Control (4 units)

Course Description: Description of sound using normal modes and waves; interaction between vibrating solids and sound fields; sound absorption in enclosed spaces; sound transmission through barriers; applications in design, acoustic enclosures and sound walls, room acoustics, design of quiet machinery.

Prerequisite(s): ENG 122.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MAE 228 – Introduction to BioMEMS (4 units)

Course Description: Ideal for beginning graduate or advanced undergraduate students interested in microelectromechanical systems (MEMS) topics related to biological applications. Covers topics from various disciplines related to BioMEMS: mechanical, electrical, biomedical, chemical engineering, and materials science.

Prerequisite(s): B.S. engineering discipline or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 229 – Design & Analysis of Micro-Electromechanical Systems (4 units)

Course Description: Mechanical design of micro-electromechanical systems (MEMS). Device modeling: lumped parameter models; energy methods; nonlinearities; electrical and mechanical noise sources. Actuation and measurement methods: capacitive, piezoresistive, thermal, piezoelectric, and optical techniques. Review of basic electronics: bridge circuits, amplitude modulation; lock-in detection.

Prerequisite(s): (ENG 045 or ENG 045Y); ENG 100; ENG 104; and consent of instructor. ENG 122 recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MAE 232 – Skeletal Tissue Mechanics (3 units)

Course Description: Overview of the mechanical properties of the various tissues in the musculoskeletal system, the relationship of these properties to anatomic and histologic structure, and the changes in these properties caused by aging and disease. Tissues covered include bone, cartilage and synovial fluid, ligament and tendon.

Prerequisite(s): ENG 104B.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Cross Listing: BIM 232.

Grade Mode: Letter.

MAE 234 – Design & Dynamics of Road Vehicles (4 units)

Course Description: Analysis and numerical simulation of road vehicles with on design applications.

Prerequisite(s): EME 134.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MAE 235 – Rotorcraft Aerodynamics (4 units)

Course Description: Introduction to vertical take-off and landing (VTOL) aircraft; momentum theory; hover, axial, and forward flights; blade element momentum theory; blade motion and rotor control; performance aerodynamic design; rotorcraft noise and vibration; dynamic stall and unsteady aerodynamics; eVTOL and advanced air mobility.

Prerequisite(s): EAE 127 C- or better.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

MAE 237 – Analysis & Design of Composite Structures (4 units)

Course Description: Modeling and analysis methodology for composite structures including response and failure. Laminated plate bending theory. Introduction to failure processes. Includes discussion of aerospace structural analysis.

Prerequisite(s): ENG 104; or equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 239 – Advanced Finite Elements & Optimization (4 units)

Course Description: Introduction to advanced finite elements and design optimization methods, with application to modeling of complex mechanical, aerospace and biomedical systems. Application of states of the art in finite elements in optimum design of components under realistic loading conditions and constraints.

Prerequisite(s): ENG 180 or EAD 115 or MAT 128C.

Learning Activities: Lecture 4 hour(s).

Cross Listing: BIM 239.

Grade Mode: Letter.

MAE 240 – Computational Methods in Nonlinear Mechanics (4 units)

Course Description: Deformation of solids and the motion of fluids treated with state-of-the-art computational methods. Numerical treatment of nonlinear dynamics; classification of coupled problems; applications of finite element methods to mechanical, aeronautical, and biological systems.

Prerequisite(s): EAD 115 or MAT 128B or ENG 180.

Learning Activities: Lecture 4 hour(s).

Cross Listing: BIM 240.

Grade Mode: Letter.

MAE 245 – Micro- & Nano-Technology in Life Sciences (4 units)

Course Description: Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: ECH 245, EMS 245, EEC 245.

Grade Mode: Letter.

MAE 248 – Advanced Turbomachinery (4 units)

Course Description: Preliminary aerodynamic design of axial and radial flow compressors and turbines. Design of diffusers. Selection of turbomachine and configurations and approximations to optimum dimensions and flow angles. Introduction to through flow analysis. Rotating stall and surge, and aeromechanical considerations.

Prerequisite(s): ENG 103; ENG 105.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 250A – Advanced Methods in Mechanical Design (4 units)

Course Description: Applications of advanced techniques of solid mechanics to mechanical design problems. Coverage of advanced topics in stress analysis and static failure theories with emphasis in design of machine elements. Design projects emphasizing advanced analysis tools for life cycle evaluation.

Prerequisite(s): EME 150A; EME 150B; or the equivalents or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MAE 250B – Advanced Methods in Mechanical Design (4 units)

Course Description: Applications of advanced techniques of solid mechanics to mechanical design problems. Advanced topics in variational methods of mechanics with emphasis in design of machine elements. Design projects emphasizing advanced analysis tools.

Prerequisite(s): MAE 250A.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MAE 250C – Mechanical Performance of Materials (4 units)

Course Description: Occurrence, mechanisms, and prediction of fatigue and fracture phenomenon. Use of stress and strain to predict crack initiation. Use of fracture mechanics to predict failure and crack propagation. Effects of stress concentration, manufacturing, load sequence, irregular loading, and multi-axial loading.

Prerequisite(s): Undergraduate course in stress analysis and mechanical behavior of materials.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MAE 252 – Information Processing for Autonomous Robotics (4 units)

Course Description: Computational principles for sensing, reasoning, and navigation for autonomous robots.

Prerequisite(s): EME 154; EME 171; ENG 006; EME 005; or equivalent programming experience to ENG 006 EME 005; MAE 154, MAE 171, or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 253 – Network Theory & Applications (4 units)

Course Description: Develops the mathematical theory underlying growth, structure and function of networks with applications to physical, social, biological and engineered systems. Topics include network growth, resilience, epidemiology, phase transitions, software and algorithms, routing and search control, cascading failures.

Prerequisite(s): MAT 022A; MAT 022B; (STA 013 or STA 013Y or STA 120); Experience with computer software, or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: ECS 253.

Grade Mode: Letter.

MAE 254 – Engineering Software Design (4 units)

Course Description: Principle and design of engineering software.

Advanced topics in engineering software design, applications of object-oriented programming, very high-level languages, real-time multi-thread computing and sensor fusion, Web-based network computing, graphics, and GUI in engineering.

Prerequisite(s): EME 005; ENG 180.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

MAE 255 – Computer Aided Design & Manufacturing (4 units)

Course Description: Representation and processing of geometrical information in design and manufacturing. Numeric and symbolic computations. Coordinate systems and transformations. Bezier and B-spline curves and surfaces. Interpolation and approximation methods. Intersections, offsets, and blends. Path planning for machining, inspection, and robotics applications.

Prerequisite(s): Proficiency in a high level programming language such as Fortran, Pascal or C.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

MAE 256 – Sustainable Manufacturing & Design (4 units)

Course Description: Definitions, methods, and dimensions of sustainability in manufacturing and product design. Emphasis on resource efficiency and life cycle engineering in the context of the production environment.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students; undergraduate students allowed only with consent of instructor.

Grade Mode: Letter.

MAE 258 – Hybrid Electric Vehicle System Theory & Design (4 units)

Course Description: Advanced vehicle design for fuel economy, performance, and low emissions, considering regulations, societal demands and manufacturability. Analysis and verification of computer design and control of vehicle systems in real vehicle tests. Advanced engine concepts.

Prerequisite(s): EME 150B; graduate standing in Mechanical and Aeronautical Engineering.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

MAE 259 – Modern Manufacturing Technologies (4 units)

Course Description: Review of manufacturing processes, simulation methods, quality control, and machine tool design. Design for manufacturing and assembly and operation management are also introduced.

Prerequisite(s): EME 050 or equivalent is recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

MAE 262 – Advanced Aerodynamics (4 units)

Course Description: Study of invicid and viscous flows about aerodynamic shapes at subsonic, transonic and supersonic conditions. Application of aerodynamic theory to design for reduced drag and increased lift.

Prerequisite(s): EAE 126.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 263 – Introduction to Computational Aerodynamics & Fluid Dynamics (4 units)

Course Description: Introduction to numerical methods for solution of fluid flow problems. Discretization techniques and solution algorithms. Finite difference solutions to classical model equations pertinent to wave phenomena, diffusion phenomena, or equilibrium. Application to the incompressible and compressible Navier-Stokes equations.

Prerequisite(s): ENG 103; ENG 105; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students.

Grade Mode: Letter.

MAE 265 – Aeroacoustics (4 units)

Course Description: Introduction to acoustics, Fourier transform and sound pressure level, Green's function, Lighthill's acoustic analogy and jet noise, tailored Green's function and acoustic scattering, Ffowcs Williams and Hawkings equation and rotocraft noise, turbulence for aeroacoustics and leading-edge noise, trailing-edge noise and wind turbine noise, duct acoustics and aircraft engine noise.

Prerequisite(s): ENG 103.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

MAE 269 – Fuel Cell Systems (4 units)

Course Description: Basics of electrochemistry and fuel cell engines in mobile and stationary applications. Aspects of fuel cell energy converters and their subsystems including practice with existing fuel cell and hydrogen systems on campus.

Prerequisite(s): EME 106; EME 109; EME 165; or equivalent courses, or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Graduate or junior/senior undergraduate as a technical elective.

Grade Mode: Letter.

MAE 271 – Advanced Modeling & Simulation of Mechatronic Systems (4 units)

Course Description: Multiport models of mechanical, electrical, hydraulic, and thermal devices; bond graphs, block diagrams and state space equations; modeling of multiple energy domain systems; three-dimensional mechanics; digital simulation laboratory.

Prerequisite(s): EME 172; or equivalent.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

MAE 272 – Theory & Design of Control Systems (4 units)

Course Description: Mathematical representations of linear dynamical systems. Feedback principles; benefits and cost of feedback. Analysis and design of control systems based on classical and modern approaches, with emphasis on applications to mechanical and aeronautical systems.

Prerequisite(s): EME 172; or the equivalent.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

MAE 273A – Single Input Single Output (SISO) Optimal Robust Control (4 units)

Course Description: Analysis and design of SISO (Single Input Single Output) feedback control systems utilizing Youla Parameterization technique. Optimal control concepts (controllability, observability, Linear Quadratic Regulator) and an introduction to Kalman filtering and robust optimal control theory for designing H₂/LQG and H_{inf} controllers.

Prerequisite(s): EME 172; MAE 272; or consent of instructor. EEC 250 recommended.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to Graduate Students.

Grade Mode: Letter.

MAE 273B – Multiple Input Multiple Output (MIMO) Optimal Robust Control (4 units)

Course Description: Analysis and design of MIMO (Multiple Input Multiple Output) feedback control systems utilizing Youla Parameterization technique. Uncertainty modeling and MIMO feedback control system design using loop shaping with H_{inf}/H₂ system norm optimization techniques.

Prerequisite(s): MAE 272; MAE 273A; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to Graduate Students.

Grade Mode: Letter.

MAE 275 – Guidance & Control of Unmanned Aerial Systems (4 units)

Course Description: Introduction to Unmanned Aerial Systems (UAS). Challenges in guiding and controlling limited-payload small and miniature aircraft systems. Coordinate frames, kinematics and dynamics, linear design models, autopilot design, sensor models, state estimation, design model for guidance, straight-line and orbit following, and path planning.

Prerequisite(s): ENG 102; EME 172; or consent of instructor. Familiarity with simulation tools, such as Matlab/Simulink, expected.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to Graduate Students.

Grade Mode: Letter.

MAE 276 – Data Acquisition & Analysis (4 units)

Course Description: Application of computers for data acquisition and control. Topics include computer architecture, characteristics of transducers, hardware for laboratory applications of computers, fundamentals of interfaces between computers and experimental equipment, programming techniques for data acquisition and control, basic data analysis.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MAE 290C – Graduate Research Conference (1 unit)

Course Description: Individual and/or group conference on problems, progress, and techniques in mechanical and aeronautical engineering research.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MAE 297 – SEMINAR (1 unit)

Course Description: Current topics in engineering including developments in mechanical and aeronautical engineering with presentations by students, faculty, and visitors.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MAE 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Letter.

MAE 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MAE 390 – Teaching of Aeronautical Science & Engineering (1 unit)

Course Description: Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports.

Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Aeronautical Science and Engineering.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MAE 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Mechanical Engineering (EME)

College of Engineering

EME 001 – Mechanical Engineering (1 unit)

Course Description: Description of the field of mechanical engineering with examples taken from industrial applications, discussions of the practice with respect to engineering principles, ethics, and responsibilities.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Pass/No Pass only.

EME 050 – Manufacturing Processes (4 units)

Course Description: Modern manufacturing methods, safety, manufacturing instructions, computer-aided manufacturing and their role in the engineering design and development process.

Prerequisite(s): ENG 004 C- or better; PHY 009A C- or better.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering and Mechanical Engineering/Materials Science Engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 092 – Internship in Mechanical Engineering (1-5 units)

Course Description: Supervised work-study experience in engineering.

Prerequisite(s): Lower division standing; approval of project prior to period of internship.

Learning Activities: Internship.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EME 097TC – Mentoring & Tutoring Engineering in the Community (1-4 units)

Course Description: Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EME 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor. Lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EME 106 – Thermo-Fluid Dynamics (4 units)

Course Description: Inviscid incompressible flow, compressible flow, ideal gas mixtures, psychrometrics, reacting mixtures and combustion.

Prerequisite(s): ENG 103 C- or better; ENG 105 C- or better.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, and Mechanical Engineering/Materials Science Engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 108 – Measurement Systems (4 units)

Course Description: Experiments to illustrate principles of mechanical systems. Signal analysis; Demonstration of basic sensors for mechanical systems; Experimental project design; Experiments involving voltage measurement; strain gauges, dynamic systems of 1st order.

Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better; ENG 104 recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering and Mechanical/Materials Science & Engineering.

Credit Limitation(s): Only 3 units of credit for students who have previously taken BIM 111; 2 units of credit for students who have previously taken EBS 165; 1 unit of credit allowed for students who have completed EME 107B (former version of EME 108).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

EME 109 – Experimental Methods for Thermal Fluids (4 units)

Course Description: Experiments illustrating principles of thermal-fluid systems and related measurement devices. Statistical design of experiments and uncertainty analysis of data; thermodynamic cycles, combustion, compressible and incompressible flows.

Prerequisite(s): EME 106 C- or better.

Learning Activities: Lecture 2 hour(s), Laboratory 1.50 hour(s), Discussion 1 hour(s), Extensive Writing.

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering and Mechanical/Materials Science Engineering Majors.

Credit Limitation(s): Only 3 units of credit for students who have previously taken ECH 155A; 2 units of credit for students who have previously taken ECH 155B; 3 units of credit for students who have previously taken ECI 141L; 1 unit of credit for students who have already completed EME 107A (former version of EME 109).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 115 – Introduction to Numerical Analysis & Methods (4 units)

Course Description: Number representation, Taylor expansions, error and stability analysis, roots of nonlinear equations, sets of linear equations, numerical integration, ordinary differential equations.

Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better or ECS 032A C- or better or ECS 036A C- or better or ECH 060 C- or better or ECM 006 C- or better); ((MAT 021A C- or better, MAT 021B C- or better, MAT 021C C- or better, MAT 021D C- or better, (MAT 022A C- or better or MAT 027A C- or better), (MAT 022B C- or better or MAT 027B C- or better)), (PHY 009A C- or better, PHY 009B C- or better, PHY 009C C- or better).

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken EAD 115.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 121 – Engineering Applications of Dynamics (4 units)

Course Description: Technical elective that revisits dynamic principles with emphasis on engineering applications; Equations of motion are derived and put into a format for computer solution; There is a computer laboratory where real engineering systems are simulated.

Prerequisite(s): ENG 102 C- or better; (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, and Mechanical Engineering/Materials Science Engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 134 – Vehicle Stability (4 units)

Course Description: Analytical and experimental studies of the dynamics, stability and control of vehicles such as cars, trailers, airplanes, motorcycles, bicycles and rail cars.

Prerequisite(s): ENG 102 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, and Mechanical Engineering/Materials Science Engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 139 – Stability of Flexible Dynamic Systems (4 units)

Course Description: Stability of flexible systems. Introduction to fluid-structure interaction. Mechanical vibrations. Design of mechanical subsystems or systems under constraints. Dynamic instabilities. Flutter. Control effectiveness. Energy extraction from fluid-structure interactions. Design applications to aerospace, mechanical and biomedical systems.

Prerequisite(s): ENG 102 C- or better; ENG 103 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): No credit for students who have completed former course EAE 139.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 150A – Mechanical Design (4 units)

Course Description: Principles of mechanics applied to design.

Deformation and stress analysis. Structural integrity under static and fluctuating loads. Projects demonstrate progression from concept to engineering analysis, with emphasis on strength and durability.

Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 104 C- or better, EME 050 C- or better (can be concurrent)).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

EME 150B – Mechanical Design (4 units)

Course Description: Principles of engineering mechanics applied to the design and selection of mechanical components. Design projects, which concentrate on conceptual design, engineering analysis, methods of manufacture, material selection, and cost.

Prerequisite(s): EME 150A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 151 – Statistical Methods in Design & Manufacturing (4 units)

Course Description: Methods of statistical analysis with emphasis on applications in mechanical design and manufacturing. Applications include product evaluation and decision making, probabilistic design, systems reliability, and fatigue under random loading.

Prerequisite(s): EME 150A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 152 – Computer-Aided Mechanism Design (4 units)

Course Description: Principles of computer-aided mechanism design. Computer-aided kinematic, static, and dynamic analysis and design of planar mechanisms such as multiple-loop linkages and geared linkages. Introduction to kinematic synthesis of mechanisms.

Prerequisite(s): ENG 102 C- or better; (EME 005 C- or better or ENG 006 C- or better or ECS 030 C- or better).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 154 – Mechatronics (4 units)

Course Description: Overview of mechatronics system and control system design concepts, control software architecture, control hardware architecture, microcontroller and interface technology for mechatronics control, sensor for mechatronics systems, actuator drives.

Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better; EME 050 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 161 – Combustion & the Environment (4 units)

Course Description: Introduction to combustion kinetics; premixed and diffusion flames; turbulent combustion; pollutant formation; examples of combustion devices such as internal combustion engines, gas turbines, furnaces and incinerators; alternative fuels.

Prerequisite(s): EME 106 C- or better.

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 163 – Internal Combustion Engines & Future Alternatives (4 units)

Course Description: Fundamentals of internal combustion engine design and performance. Future needs to adapt to environmental concerns, and the feasibility of better alternatives in the future.

Prerequisite(s): EME 050 C- or better; EME 106 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 164 – Introduction to Heating, Ventilation & Air Conditioning Systems (4 units)

Course Description: Introduction to basic mechanisms and processes associated with heating, ventilation and air conditioning (HVAC), including equipment and systems used for HVAC in residential and commercial buildings.

Prerequisite(s): EME 106 C- or better; EME 165 C- or better.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Only 2 units for students who have completed ECI 125.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 165 – Heat Transfer (4 units)

Course Description: Conduction, convection, and radiation heat transfer. Computational modeling of heat transfer in engineering. Applications to engineering equipment with the use of digital computers.

Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better); ENG 103 C- or better; ENG 105 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 171 – Analysis, Simulation & Design of Mechatronic Systems (4 units)

Course Description: Modeling of dynamic engineering systems in various energy domains. Analysis and design of dynamic systems. Response of linear systems. Digital computer simulation and physical experiments.

Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 172 – Automatic Control of Engineering Systems (4 units)

Course Description: Classical feedback control systems; block diagrams; performance specifications; steady state errors; rise and settling times; root locus; PID controllers; Bode and Nyquist plots; stability; phase and gain margins; advanced topics as time allows.

Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 185A – Mechanical Engineering Systems Design Project (4 units)

Course Description: Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints.

Prerequisite(s): EME 050 C- or better; EME 150A C- or better; EME 165 C- or better (can be concurrent); ENG 003, CMN 001 or CMN 003 recommended; upper division composition recommended.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to Senior standing in Mechanical Engineering (EMEC).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Visual Literacy (VL).

EME 185B – Mechanical Engineering Systems Design Project (4 units)

Course Description: Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints.

Prerequisite(s): EME 185A; senior standing in the Department of Mechanical and Aerospace Engineering.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 189A – Selected Topics in Mechanical Engineering: Energy Systems & the Environment (1 unit)

Course Description: Directed group study in Energy Systems & the Environment.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 189B – Selected Topics in Mechanical Engineering: Engineering Controls (1-5 units)

Course Description: Directed group study in Engineering Controls.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

EME 189C – Selected Topics in Mechanical Engineering: Engineering Dynamics (1-5 units)

Course Description: Directed group study in Engineering Dynamics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 189D – Selected Topics in Mechanical Engineering: Biomechanics (1-5 units)

Course Description: Directed group study in Biomechanics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 189E – Selected Topics in Mechanical Engineering: Fluid Mechanics (1-5 units)

Course Description: Directed group study in Fluid Mechanics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 189F – Selected Topics in Mechanical Engineering: Manufacturing Engineering (1-5 units)

Course Description: Directed group study in Manufacturing Engineering.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 189G – Selected Topics in Mechanical Engineering: Mechanical Engineering & Product Design (1-5 units)

Course Description: Directed group study in Mechanical Engineering & Product Design.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 189H – Selected Topics in Mechanical Engineering: Mechatronics Systems (1-5 units)

Course Description: Directed group study in Mechatronics Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 189I – Selected Topics in Mechanical Engineering: MEMS/Nanotechnology (1-5 units)

Course Description: Directed group study in MEMS/Nanotechnology.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 189J – Selected Topics in Mechanical Engineering: Solid & Structural Mechanics (1-5 units)

Course Description: Directed group study in Solid & Structural Mechanics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 189K – Selected Topics in Mechanical Engineering: Thermodynamics (1-5 units)

Course Description: Directed group study in Thermodynamics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 189L – Selected Topics in Mechanical Engineering: Vehicle & Transportation Systems (1-5 units)

Course Description: Directed group study in Vehicle & Transportation Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

EME 192 – Internship in Engineering (1-5 units)

Course Description: Supervised work experience in mechanical engineering.

Prerequisite(s): Upper division standing; approval of project prior to period of internship.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EME 197TC – Mentoring & Tutoring Engineering in the Community (1-4 units)

Course Description: Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics.

Prerequisite(s): Consent of instructor. Upper division standing.

Learning Activities: Variable 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

EME 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EME 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

Medical Microbiology (MMI)

School of Medicine

MMI 098 – Directed Group Study (1-5 units)

Course Description: Group Study in Medical Microbiology and Immunology; primarily for lower division students. Directed reading and discussion on selected topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

MMI 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Enrollment Restriction(s): Restricted to lower division standing.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MMI 130 – Medical Mycology (2 units)

Course Description: Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. Course offered in alternate years.

Prerequisite(s): Consent of instructor; a course in pathogenic microbiology.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MMI 177 – Human Virology (3 units)

Course Description: Covers viruses that cause diseases in humans, the structure and classification of medically-important viruses, methods of transmission and replication strategies. Viruses that are important human pathogens and epidemiology, immune response, detection, diagnosis and treatment of human viral infections. Discussion of clinical cases, cellular pathology, cancer and emerging and reemerging human viral diseases including Coronaviruses, vaccines, antivirals, and use of viruses in medicine.

Prerequisite(s): BIS 102 or BIS 101 or BIS 103 or BIS 104 or BIS 105.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MMI 188A – Human Immunology (3 units)

Course Description: Understand the human immune system, the nomenclature and functional significance of the tissues, cells, proteins and genes, as well as the normal regulatory mechanisms and pathologic outcomes related to the immune response.

Prerequisite(s): Undergraduate level introductory Biology course.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Student cannot enroll in this course if already taken MMI 188 or MMI 188B.

Grade Mode: Letter.

MMI 188B – Human Immunology (4 units)

Course Description: Understand the human immune system, the nomenclature and functional significance of the tissues, cells, proteins and genes, as well as the normal regulatory mechanisms and pathologic outcomes related to the immune response.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Not open to students who have taken MMI 188 or MMI 188A.

Grade Mode: Letter.

MMI 192 – Internship in Medical Microbiology (1-12 units)

Course Description: Supervised work experience in medical microbiology and related fields.

Prerequisite(s): Upper division standing; approval of project prior to period of internship.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

MMI 194H – Senior Honors Project in Medical Microbiology & Immunology (5 units)

Course Description: Project in research related to immunology of medically important viruses. Development of a hypothesis-driven project, performance of experimental protocols and preparation of graphical representation of original data. Requires oral and written presentation of research results.

Prerequisite(s): MMI 199; consent of instructor.

Learning Activities: Independent Study 15 hour(s).

Repeat Credit: May be repeated 3 time(s) with consent of instructor.

Grade Mode: Pass/No Pass only.

MMI 198 – Group Study in Medical Microbiology (1-5 units)

Course Description: Directed reading and discussion and/or laboratory investigation on selected topics.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MMI 199 – Research in Medical Microbiology (1-5 units)

Course Description: Individual research.

Prerequisite(s): Consent of instructor. Upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MMI 200D – Mechanisms for Microbial Interactions with Hosts (3 units)

Course Description: Study of mechanisms involved in microbial interactions within a host environment. The following principles are basic to understanding these interactions: host recognition, invasion, competition and growth, and host defense.

Prerequisite(s): MIB 200A; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

MMI 210A – Critical Analysis of Contemporary Research on Animal Models of Human Infectious Disease (1 unit)

Course Description: Topics will include diverse vertebrate and invertebrate models of human infectious diseases.

Prerequisite(s): Consent of instructor; students funded by the Animal Models of Infectious Diseases Training Grant.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MMI 210B – Comparative Analysis of Animal Models of Human Infectious Diseases (1 unit)

Course Description: Compares the major vertebrate and invertebrate animal models that are used most commonly to study human infectious disease, including mouse, non-human primate, *Caenorhabditis elegans*, and *drosophila*.

Prerequisite(s): Students funded by the Animal Models of Infectious Diseases Training Grant; others by consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MMI 215 – Medical Parasitology (3 units)

Course Description: Epidemiology, pathogenesis, diagnostic methods and current literature discussion of protozoa, helminths and arthropods of medical importance.

Prerequisite(s): Graduate student with consent of instructor.

Learning Activities: Lecture 1.50 hour(s), Discussion 1.50 hour(s).

Grade Mode: Letter.

MMI 280 – The Endogenous Microbiota in Health & Disease (3 units)

Course Description: Recent insights into the microbial communities inhabiting mucosal surfaces, and will discuss how the composition of these communities contributes to normal development, metabolism, education of the immune system, and disease susceptibility. Offered in spring quarter; even years.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MMI 291 – Seminar in Microbiology & Immunology (1 unit)

Course Description: Research seminars on current topics in microbiology and immunology.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Restricted to students with upper division or graduate standing.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

MMI 298 – Group Study in Medical Microbiology & Immunology (1-5 units)

Course Description: Directed reading and discussion and/or laboratory investigation on selected topics. Sections 1, 2, 4, 5 are S/U grading only.

Prerequisite(s): Consent of instructor; open to graduate students.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MMI 299 – Research (1-12 units)

Course Description: Laboratory investigation contributing to the dissertation for a graduate degree.

Prerequisite(s): Consent of instructor; open to graduate students.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MMI 410 – Physician Scientist Molecular Medicine Journal Club (1 unit)

Course Description: Weekly seminars by students on research articles in current literature. Topics/articles to be selected by instructors to include a broad range of frontiers in biomedical literature.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

MMI 480A – Medical Immunology (2.5 units)

Course Description: Helping to understand the immune system, the nomenclature and functional significance of the tissues, cells, proteins and genes of the immune system, as well as the normal regulatory mechanisms and pathologic outcomes related to the immune response.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 0.50 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Pass/Fail only.

MMI 480B – Medical Microbiology (5.5 units)

Course Description: Discussion of the diseases caused by infectious agents includes their pathogenesis, clinical manifestations, diagnosis, treatment epidemiology and prevention. Covers the general properties of and diagnostic techniques for bacteria, fungi and viruses.

Learning Activities: Lecture 2.75 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Pass/Fail only.

MMI 480D – Medical Microbiology D (1 unit)

Course Description: Continuation of longitudinal medical microbiology course series.

Learning Activities: Lecture/Lab 1 hour(s).

Grade Mode: Pass/Fail only.

MMI 497T – Tutoring in Medical Microbiology (1-5 units)

Course Description: Assist instructor by tutoring medical students in one of the departmental courses that is a component of the required curriculum of the School of Medicine.

Prerequisite(s): Consent of instructor; appropriate preparation in subject matter.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: Honors/Pass/Fail.

MMI 498 – Group Study in Medical Microbiology & Immunology (1-5 units)

Course Description: Directed reading and discussion and/or laboratory investigation on selected topics.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

MMI 499 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Medical Pharmacology & Toxicology (PHA)

School of Medicine

PHA 092 – Internship in Pharmacology (1-12 units)

Course Description: Supervised work experience in pharmacology and related fields.

Prerequisite(s): Lower division student with good academic standing; approval of project prior to period of internship.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

PHA 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PHA 192 – Internship in Pharmacology (1-12 units)

Course Description: Supervised work experience in pharmacology and related fields.

Prerequisite(s): Consent of instructor; upper division standing; approval of project prior to period of internship.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

PHA 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PHA 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

PHA 205 – Problem Solving in Pharmacology (1 unit)

Course Description: Introduction to a current biomedical problem that would benefit from a developing drug and will develop an experimental strategy for addressing the issue. Develop model systems for testing various classic and recent pharmacological approaches.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Graduate Students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students may be accepted with consent of instructor.

Repeat Credit: May be repeated 12 time(s) as subject changes every quarter; each course is unique and may be taken as often as desirable; certain students (Trainees of the Training Program in Pharmacological Sciences) must take course for at least three years.

Grade Mode: Letter.

PHA 207 – Drug Discovery & Development (3 units)

Course Description: Survey of the process by which a drug is discovered, developed and made available to the public. Topics include drug identification and optimization, safety testing, clinical evaluation, regulatory issues, intellectual property, formulation, and the global pharmaceutical industry.

Prerequisite(s): An equivalent course in general pharmacology, or knowledge of basic pharmacology.

Learning Activities: Lecture/Discussion 2 hour(s), Extensive Writing 1 hour(s).

Enrollment Restriction(s): Intended for graduate students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students, including undergraduates, may be accepted with consent of instructors.

Repeat Credit: May be repeated.

Grade Mode: Letter.

PHA 208 – Advanced Cardiac Physiology & Pharmacology (3 units)

Course Description: Detailed characterization of the mechanisms involved in cardiac excitation–contraction coupling, alterations that occur in heart disease and pharmacological interventions. Topics include cardiac contractile apparatus, action potential, Ca cycling, excitation–transcription coupling, cardiac inotropy, heart failure and arrhythmias.

Prerequisite(s): An equivalent course in general pharmacology or physiology (example, BIM 204), or knowledge of basic pharmacology/physiology.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students from the Pharmacology and Toxicology, Molecular, Cellular and Integrated Physiology, Biomedical Engineering and Clinical Research Graduate Groups; other students (including undergraduates) may be accepted upon consultation with the instructors.

Grade Mode: Letter.

PHA 225 – Gene & Cellular Therapies (3 units)

Course Description: Gene therapy from basic concepts to clinical applications. Topics include the human genome and genetic variation, genetic diseases, methods to manipulate gene expression, viral and non-viral delivery vectors, history and progress of gene therapy, case studies, and ethical issues.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: GGG 225.

Grade Mode: Letter.

PHA 234 – Advances in Computational Physiology & Pharmacology (2 units)

Course Description: Multi-scale biomedical modeling methodologies and applications, with emphasis on ion channel structure-function, computer-aided drug design, and membrane excitability. State-of-the-art techniques used for multi-scale modeling of biomedical systems and their applications.

Prerequisite(s): No formal requirements; basic knowledge of mathematics, physics, chemistry, and biology helpful.

Learning Activities: Lecture 2 hour(s).

Cross Listing: HPH 234.

Grade Mode: Letter.

PHA 291 – Pharmacology Research Seminar Series (1 unit)

Course Description: Research seminars on current topics in Pharmacology.

Prerequisite(s): Consent of instructor; upper division or graduate standing.

Learning Activities: Seminar 1 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

PHA 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

PHA 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PHA 400A – Pharmacology (2 units)

Course Description: Principles in pharmacology, including pharmacokinetics, drug metabolism and the actions, uses and toxicities of the major classes of drugs.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Lecture 1 hour(s), Discussion/Laboratory 0.30 hour(s).

Enrollment Restriction(s): Restricted to Medical student only.

Grade Mode: Pass/Fail only.

PHA 400B – Pharmacology (1.5 units)

Course Description: Principles in pharmacology, including autonomic pharmacology, general anesthetics, neuropharmacology and sedative/hypnotics.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress; medical students only.

Learning Activities: Lecture 1 hour(s), Discussion 0.25 hour(s).

Grade Mode: Pass/Fail only.

PHA 400C – Pharmacology (3.5 units)

Course Description: Treatment of respiratory and cardiovascular disease, central nervous system drugs, GI, Toxicology and chemotherapy.

Specific topics include: asthma, chronic obstructive pulmonary disease, hypertension, congestive heart failure, and the treatment of arrhythmias. Pain Management, depression, psychosis, acid reflux, IBS and toxicology.

Prerequisite(s): PHA 400A; PHA 400B; approval by School of Medicine Committee on Student Progress; medical students only.

Learning Activities: Lecture 2 hour(s), Discussion 0.50 hour(s).

Grade Mode: Pass/Fail only.

PHA 445 – Introduction to Integrative Medicine (1 unit)

Course Description: Basic principles of alternative medical systems (e.g., traditional Chinese, Ayurvedic, Tibetan), alternative practices (e.g., chiropractic, osteopathy, naturopathy, homeopathy, herbalism, guided imagery/meditation, massage therapy), and mind/body connection are presented as introduction to integrating alternative treatments into traditional medicinal practice.

Prerequisite(s): Medical student in good standing.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Honors/Pass/Fail.

PHA 490 – Seminar in Pharmacology for Medical Students (1 unit)

Course Description: Seminar in pharmacology for medical students.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Honors/Pass/Fail.

PHA 497T – Tutoring in Pharmacology (1-5 units)

Course Description: Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine.

Prerequisite(s): Advanced standing or consent of instructor.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: Honors/Pass/Fail.

PHA 498 – Special Study for Medical Students (1-5 units)

Course Description: Special study in pharmacology for medical students.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Discussion.

Grade Mode: Honors/Pass/Fail.

PHA 499 – Directed Research for Medical Students (1-12 units)

Course Description: Directed research in pharmacology for medical students.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Medical Sciences (MDS)

School of Medicine

MDS 099 – Special Study in Medicine for Undergraduates (1-5 units)

Course Description: Participate in research projects relating to medicine with faculty in the School of Medicine.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 3-15 hour(s).

Grade Mode: Pass/No Pass only.

MDS 192 – Medical Education Internship for Advanced Undergraduates (1-12 units)

Course Description: Participate in projects related to curriculum development in support of curriculum for M.D. degree. Gain work experience and appreciation for innovative approaches to learning in basic and clinical sciences of medical education.

Prerequisite(s): Consent of instructor; competency with computers.

Learning Activities: Internship 3-36 hour(s).

Enrollment Restriction(s): Enrollment dependent on availability of intern positions.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

MDS 400 – Summer Pre-Matriculation Program (2 units)

Course Description: Two-week program provides students from diverse backgrounds an early introduction to learning skills that will facilitate success in medical school.

Prerequisite(s): Consent of instructor.

Learning Activities: PE Activity 7 hour(s), Independent Study 15 hour(s), Lecture 14 hour(s).

Grade Mode: Pass/Fail only.

MDS 401 – Applications of Computers to Medical Practice (2 units)

Course Description: Proficiency in computer applications relative to practice of medicine, with emphasis on email, literature searching, file transfer, and hospital information services. Given online, at home or in lab; time and place determined by student.

Prerequisite(s): Enrollment in medical school.

Learning Activities: Auto Tutorial 2 hour(s).

Grade Mode: Honors/Pass/Fail.

MDS 402 – Clinical & Cultural Spanish (1-6 units)

Course Description: Fluent Spanish-speaking medical students, nursing students and physician assistants students learn a comprehensive set of medical vocabulary and cultural aspects related to the treatment of Spanish speaking patients.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s), Practice 1 hour(s), Independent Study 4 hour(s).

Grade Mode: Pass/Fail only.

MDS 403 – Science & Practice of Mindfulness & Compassion (1 unit)

Course Description: Examines current scientific evidence for the effects of different mindfulness and compassion meditation practices in both healthy and clinical samples.

Learning Activities: Lecture/Discussion 10 hour(s), Independent Study 20 hour(s).

Grade Mode: Pass/Fail only.

MDS 406 – Endocrinology, Nutrition, Reproduction & Genetics (9.5 units)

Course Description: Basic and pathophysiologic processes involved in human reproductive and endocrine control systems, nutritional regulation, and foundational genetics across the lifespan. Integrate information across these systems and use clinical reasoning process to identify and understand relevant perturbations and diseases.

Prerequisite(s): BCM 410A; HPH 400; consent of instructor.

Learning Activities: Lecture 3.80 hour(s), Discussion/Laboratory 2.80 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/Fail only.

MDS 410 – Advancing Student-Run Clinics at UC Davis (1 unit)

Course Description: Introduction to resources, applied clinical skills, and program-building for medical students who volunteer at student-run free clinics, with the goal to improve care for the patients served. Introduce and review application of basic clinical skills needed to care for common diseases. Connect students to resources from state and national organizations. Create sustainability of student-run clinics through program-building and training.

Learning Activities: Seminar.

Grade Mode: Pass/Fail only.

MDS 411 – Doctoring 1 (7 units)

Course Description: Small group training in patient communication, interviewing techniques, physical exam and clinical identification. Outpatient clinical experiences and didactic presentations also included.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s), Clinical Activity 1 hour(s), Lecture 1 hour(s).

Grade Mode: Pass/Fail only.

MDS 411B – Doctoring 1 (5 units)

Course Description: Small, case-based learning groups with training in patient communication and interviewing techniques, clinical identification and problem solving, applications of social, psychological, cultural, bioethical, and basic science concepts to patient case scenarios, outpatient clinical experiences and didactic presentations.

Learning Activities: Discussion 1.50 hour(s), Clinical Activity 1.50 hour(s), Lecture/Discussion 1.80 hour(s).

Enrollment Restriction(s): Medical students only.

Grade Mode: Pass/Fail only.

MDS 411KA – ACE-PC Program Doctoring 1 (8 units)

Course Description: Small case-based learning groups with training in patient communication and interviewing techniques clinical identification and problem solving applications of social psychological cultural bioethical and basic science concepts to patient case scenarios outpatient clinical experiences and didactic presentations.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 5 hour(s), Lecture/Discussion 6 hour(s).

Grade Mode: Pass/Fail only.

MDS 411KB – ACE-PC Program Doctoring 1 (5 units)

Course Description: Application of multidisciplinary basic, social and clinical science to clinical cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 4 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Pass/Fail only.

MDS 412 – ACE-PC Clinical Skills Foundation (6-12 units)

Course Description: Application of multidisciplinary basic, social and clinical science to clinical cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. Includes small case-based learning groups with training in patient communication and interviewing techniques.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

MDS 415A – Population Health & Evidence-Based Medicine (2 units)

Course Description: Introduces the fundamental concepts and tools of population health, evidence-based medicine, and system science.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 12 hour(s), Discussion 4 hour(s).

Grade Mode: Pass/Fail only.

MDS 415B – Critical Appraisal of Topics in Population Health (0.5 units)

Course Description: Apply foundational skills to explore critical issues in 21st-century public health, including tobacco control, firearm violence, and obesity. In a series of small-group discussions “interpreting the medical literature,” key concepts from epidemiology and biostatistics are reinforced while students are armed with specific strategies for addressing high-risk behaviors in the context of population health.

Learning Activities: Discussion 6 hour(s).

Grade Mode: Pass/Fail only.

MDS 415C – Population Health & System Science (1.5 units)

Course Description: Addresses the social, economic, cultural, policy-related, and environmental factors that affect the health of populations and individuals, and the role of health care systems (locally, regionally, nationally, and globally) in moderating the effects of these factors. Content builds on MDS 415A & MDS 415B, the TeamPEACE (Teamwork for Professionalism, Ethics, and Cultural Enrichment) curriculum in Doctoring 1, and students’ lived experience in UC Davis free clinics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion 6 hour(s), Fieldwork 3 hour(s).

Grade Mode: Pass/Fail only.

MDS 416 – Advanced Clinc Skills (1-6 units)

Course Description: Longitudinal clinic component of the second year of the ACE-PC Program. Start with a four-week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

MDS 416A – Clinical Skills (7 units)

Course Description: First in a series of courses that span across the pre-clerkship curriculum designed to integrate the clinical teaching within the pre-clerkship curriculum at the UC Davis School of Medicine. In year 1, students acquire the foundational knowledge, skills, and attitudes to succeed in medical training, including: history taking, physical exam, and interpersonal communication skills.

Learning Activities: Lecture/Discussion 1 hour(s), Clinical Activity 1 hour(s), Discussion 1 hour(s).

Grade Mode: Pass/Fail only.

MDS 416B – Clinical Skills B (7 units)

Course Description: Second in a series of courses designed to integrate the clinical teaching within the pre-clerkship curriculum at the UC Davis School of Medicine. In year 2, students build upon the foundation in clinical skills and professional behavior set out in year 1. The year 2 clinical skills course involves applying clinical skills to the caring for patients who present with active medical issues requiring further diagnostic investigation and therapeutic management.

Learning Activities: Discussion 1 hour(s), Lecture 1 hour(s), Clinical Activity 1 hour(s).

Grade Mode: Pass/Fail only.

MDS 417A – Clinical Experiences A (1 unit)

Course Description: Clinical Experiences longitudinal thread is designed to provide continued clinical exposure throughout the pre-clerkship curriculum at the UC Davis School of Medicine. In Year 1, students apply the basic physical exam and history taking skills to real-life patients in outpatient clinical settings.

Learning Activities: Clinical Activity 0.50 hour(s).

Grade Mode: Pass/Fail only.

MDS 417B – Clinical Experiences B (1.5 units)

Course Description: Clinical Experiences longitudinal thread is designed to provide continued clinical exposure throughout the pre-clerkship curriculum at the UC Davis School of Medicine. In year 2, students use their growing knowledge and skill set to complete supervised encounters with real patients in the inpatient setting. In addition to practicing their physical exam and history taking skills, students apply their presentation and counseling skills in real-life encounters.

Learning Activities: Clinical Activity 0.50 hour(s).

Grade Mode: Pass/Fail only.

MDS 418A – Health & Humanity A (2 units)

Course Description: Health and Humanity longitudinal thread is designed to integrate wellness, professionalism, and the behavioral sciences within the pre-clerkship curriculum at the UC Davis School of Medicine. Throughout Year 1, students acquire the foundational knowledge surrounding the social determinants of health, implicit bias, and cultural humility.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Pass/Fail only.

MDS 420 – Multisystem Clinical Presentations (0.5 units)

Course Description: Capstone course integrates coursework, knowledge, skills and experiential learning to enable the student to demonstrate a broad mastery of learning across the curriculum.

Prerequisite(s): Consent of instructor; completion of Pathophysiology Block.

Learning Activities: Extensive Problem Solving 15 hour(s), Independent Study 6 hour(s).

Grade Mode: Pass/Fail only.

MDS 421A – Doctoring 2 (6 units)

Course Description: Application of multidisciplinary basic, social and clinical science to clinical cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine.

Prerequisite(s): Approval by the School of Medicine Committee on Student Progress; medical students only.

Learning Activities: Discussion 1 hour(s), Lecture/Discussion 1 hour(s), Internship 0.50 hour(s).

Grade Mode: Pass/Fail only.

MDS 421B – Doctoring 2 (6 units)

Course Description: Application of multidisciplinary basic, social & clinical science concepts to cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality, and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine.

Prerequisite(s): Approval by the School of Medicine on Student Progress; medical students only.

Learning Activities: Discussion 1 hour(s), Lecture/Discussion 1 hour(s), Internship 0.50 hour(s).

Grade Mode: Pass/Fail only.

MDS 421C – Doctoring 2 (6 units)

Course Description: Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine.

Prerequisite(s): Approval by the School of Medicine Committee on Student Progress; medical students only.

Learning Activities: Discussion 1 hour(s), Lecture/Discussion 1 hour(s), Internship 0.50 hour(s).

Grade Mode: Pass/Fail only.

MDS 421KA – ACE-PC Program Doctoring 2 (6 units)

Course Description: MDS 421KA-C are a year-long series of courses.

Objectives and assessments have been accelerated to accommodate the students enrolled in the ACEPC Program. Participate in all aspects of Doctoring 2, other than what was done in MDS 411KA & MDS 411KB.

Prerequisite(s): MDS 411KA; MDS 411KB; admission into ACE-PC.

Learning Activities: Discussion 1 hour(s), Lecture/Discussion 1 hour(s), Internship 0.50 hour(s).

Grade Mode: Pass/Fail only.

MDS 421KB – ACE-PC Program Doctoring 2 (6 units)

Course Description: MDS 421KA-C are a year-long series of courses. Objectives and assessments have been accelerated to accommodate the students enrolled in the ACEPC Program. Participate in all aspects of Doctoring 2, other than what was done in MDS 411KA & MDS 411KB.
Prerequisite(s): Approval by the School of Medicine on Student Progress; medical students only.
Learning Activities: Discussion 1 hour(s), Lecture/Discussion 1 hour(s), Internship 0.50 hour(s).
Grade Mode: Pass/Fail only.

MDS 421KC – ACE--PC Program Doctoring 2 (6 units)

Course Description: MDS 421KA-C are a year-long series of courses. Objectives and assessments have been accelerated to accommodate the students enrolled in the ACEPC Program. Participate in all aspects of Doctoring 2, other than what was done in MDS 411KA & MDS 411KB.
Prerequisite(s): Approval by the School of Medicine Committee on Student Progress; medical students only.
Learning Activities: Discussion 1 hour(s), Lecture/Discussion 1 hour(s), Internship 0.50 hour(s).
Grade Mode: Pass/Fail only.

MDS 428 – Foundations of Bioethics (1 unit)

Course Description: Exposure to core content in bioethics and the law and introduce a framework for ethical decision-making, while emphasizing relationships between bioethics and clinical care.
Prerequisite(s): Consent of instructor.
Learning Activities: Discussion 3 hour(s), Lecture/Discussion 3 hour(s), Independent Study 16.50 hour(s), Web Virtual Lecture 1 hour(s).
Grade Mode: Pass/Fail only.

MDS 429 – Transition to Clerkships (1-6 units)

Course Description: Incoming third-year medical students participate in a variety of educational experiences designed to prepare them to begin their clerkship curriculum. Content disseminated in large and small group settings.
Learning Activities: Discussion/Laboratory 12 hour(s), Workshop 13 hour(s), Discussion 7 hour(s), Independent Study 2 hour(s).
Grade Mode: Pass/Fail only.

MDS 430 – Introduction to Doctoring 3 (1 unit)

Course Description: Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine.
Prerequisite(s): Approval by SOM Committee on Student Progress.
Learning Activities: Discussion/Laboratory 2 hour(s).
Enrollment Restriction(s): Restricted to Medical students only.
Grade Mode: Honors/Pass/Fail.

MDS 430A – Doctoring 3 (1 unit)

Course Description: Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine.
Prerequisite(s): Approval by SOM Committee on Student Progress.
Learning Activities: Discussion 3 hour(s).
Enrollment Restriction(s): Restricted to Medical students only.
Grade Mode: Honors/Pass/Fail.

MDS 430B – Doctoring 3 (1 unit)

Course Description: Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine.
Prerequisite(s): Approval by SOM Committee on Student Progress.
Learning Activities: Discussion 2 hour(s).
Enrollment Restriction(s): Restricted to Medical students only.
Grade Mode: Honors/Pass/Fail.

MDS 430C – Doctoring 3 (1 unit)

Course Description: Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine.
Prerequisite(s): Approval by SOM Committee on Student Progress.
Learning Activities: Discussion 2 hour(s).
Enrollment Restriction(s): Restricted to Medical students only.
Grade Mode: Honors/Pass/Fail.

MDS 430D – Doctoring 3 (1 unit)

Course Description: Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine.
Prerequisite(s): Approval by SOM Committee on Student Progress.
Learning Activities: Discussion 2 hour(s).
Enrollment Restriction(s): Restricted to Medical students only.
Grade Mode: Honors/Pass/Fail.

MDS 435KA – ACE-PC Longitudinal Integrated Clerkship A (18 units)

Course Description: Longitudinal Clerkship will combine the Internal Medicine, OBGYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program.
Prerequisite(s): Consent of instructor.
Learning Activities: Clinical Activity 45 hour(s), Independent Study 6 hour(s), Discussion 4 hour(s).
Grade Mode: Honors/Pass/Fail.

MDS 435KB – ACE-PC Longitudinal Integrated Clerkship B (21 units)

Course Description: Longitudinal Clerkship will combine the Internal Medicine, OBGYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program.
Prerequisite(s): Consent of instructor.
Learning Activities: Clinical Activity 45 hour(s), Independent Study 6 hour(s), Discussion 4 hour(s).
Grade Mode: Honors/Pass/Fail.

MDS 435KC – ACE-PC Longitudinal Integrated Clerkship C (18 units)

Course Description: Longitudinal Clerkship will combine the Internal Medicine, OBGYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program.
Prerequisite(s): Consent of instructor.
Learning Activities: Clinical Activity 45 hour(s), Independent Study 6 hour(s), Discussion 4 hour(s).
Grade Mode: Honors/Pass/Fail.

MDS 440 – Doctoring 4 Teaching Fellowship (3-6 units)

Course Description: Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside.

Prerequisite(s): MDS 430A; MDS 430B; MDS 430C; MDS 430D; consent of instructor.

Learning Activities: Discussion 0.50 hour(s), Seminar 0.25 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Pass/Fail only.

MDS 441 – Combined Ophthalmology & Otolaryngology Clerkship (6 units)

Course Description: Fundamental knowledge of ophthalmology and otolaryngology for the treatment of eye, ear, nose and throat problems at a level of training of general physicians, including when to refer patients to a specialist.

Prerequisite(s): Approval by Committee on Student Promotion and Evaluation.

Learning Activities: Clinical Activity 4 hour(s).

Grade Mode: Honors/Pass/Fail.

MDS 442 – Enhancing Quality Improvement & Patient Safety ASC (3-6 units)

Course Description: Participate in a project contributing to healthcare improvement by partnering with a faculty member to identify, design, implement, and evaluate a quality improvement/patient safety initiative or synthesizing and interpreting existing evidence in quality improvement/patient safety by preparing a narrative review of the literature, commentary, or perspective paper. Share work at the UC Davis Health Quality Forum, or as a publication.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

MDS 443 – Global Health ASC (3-6 units)

Course Description: Aimed at furthering student experience with global health. An important step toward addressing global health is to drive learning toward consistent One Health core competencies in medical education and other health sciences.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

MDS 445 – Race & Health in the United States (3-6 units)

Course Description: Interprofessional course facilitates the professional and personal developmental of medical students and other health professions students who think they would like to be leaders in securing equity in population health and work environments.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Pass/Fail only.

MDS 446 – Medical Education ASC (3-6 units)

Course Description: Acquire advanced knowledge in Medical Education through understanding of psychological safety, and effective learning and teaching strategies.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

MDS 447 – Health Policy & Advocacy ASC (3-6 units)

Course Description: Develop, implement, and evaluate a scholarly project contributing to Health Policy & Advocacy under the guidance of faculty knowledgeable in the field.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

MDS 448 – Research ASC (3-6 units)

Course Description: Acquire advanced knowledge in research methodology and be able to demonstrate advanced knowledge in research methodology. Culminates in the creation of a manuscript for publication based on research under the guidance of faculty knowledgeable in the field.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

MDS 449 – Transition to Residency (3-6 units)

Course Description: Transition to Residency program addresses the graduating medical students need to improve clinical skills necessary for the first six months of residency and unmet graduation competencies in our competency-based curriculum.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity.

Grade Mode: Pass/Fail only.

MDS 450 – Introduction to UC Davis Medical Center (1 unit)

Course Description: Designed to assist medical student in transition from classroom to hospital setting.

Prerequisite(s): Second-year medical student.

Learning Activities: Seminar.

Grade Mode: Honors/Pass/Fail.

MDS 455 – Student Run Clinics (1-12 units)

Course Description: Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Meet all requirements and prerequisites of the particular clinic within which they work.

Learning Activities: Clinical Activity 3-9 hour(s).

Enrollment Restriction(s): Open to medical students in good standing.

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

MDS 459 – Entry to ARC-MD (2 units)

Course Description: Designed to orient ARC-MD and PSTP students to research opportunities at UC Davis, provide a structure for group engagement, expose them to hearing and asking critical research questions, and provide a foundation for the five-year research experience linked to the SOM curriculum.

Learning Activities: Lecture/Discussion 4 hour(s), Laboratory 25 hour(s).

Grade Mode: Pass/Fail only.

MDS 460CR – Introduction to Clinical Research (2 units)

Course Description: Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project.

Learning Activities: Lecture 2 hour(s), Independent Study 3 hour(s).

Enrollment Restriction(s): Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program.

Grade Mode: Pass/Fail only.

MDS 461CR – Strategies for Grant Writing (2 units)

Course Description: Practical skills and strategies to create successful grant proposals in the NIH style and format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program.

Grade Mode: Satisfactory/Unsatisfactory only.

MDS 462CR – Introduction to Clinical Epidemiology & Study Design (3 units)

Course Description: Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research.

Learning Activities: Lecture 25 hour(s), Discussion 10 hour(s).

Enrollment Restriction(s): Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program.

Grade Mode: Satisfactory/Unsatisfactory only.

MDS 463CR – Methods in Clinical Research (5 units)

Course Description: Overview of major approaches to clinical research, including health services research techniques, informatics, the GCRC, and preclinical methodologies to enhance clinical projects. Overview of UC Davis clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program.

Grade Mode: Satisfactory/Unsatisfactory only.

MDS 464CR – Responsible Conduct of Research (3 units)

Course Description: The nine NIH-mandated modules: Data Acquisition and Reporting, Mentor Training, Publication Practices and Authorship, Peer Review/Grant Process, Collaborative Science, Human Subjects, Research with Animals, Conflict of Interest, Research Misconduct, and Entrepreneurship/Industry Collaborations/Intellectual Property/Technology Transfer.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program.

Grade Mode: Satisfactory/Unsatisfactory only.

MDS 465CR – Introduction to Medical Statistics (4 units)

Course Description: Biomedical applications of statistical methods in clinical, laboratory and population medicine. Graphical/tabular data presentation, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression/correlation, life tables. Microcomputer applications of statistical procedures in population medicine.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program.

Grade Mode: Satisfactory/Unsatisfactory only.

MDS 468C – International Clinical Preceptorship (1-12 units)

Course Description: Multidisciplinary preceptorship in a foreign country. Clinical credit will be awarded using this course, once approval has been received from the appropriate governing committee.

Prerequisite(s): Consent of instructor; medical students.

Learning Activities: Clinical Activity 30 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

MDS 468D – International Elective (1-12 units)

Course Description: Multidisciplinary preceptorship in a foreign country. Used to award non-clinical credit for international experiences which have been approved by the appropriate governing committee.

Prerequisite(s): Consent of instructor; medical students.

Learning Activities: Independent Study 20 hour(s), Clinical Activity 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

MDS 469 – Rx One Health SSM (6 units)

Course Description: Field course in epidemiology and public health leadership.

Learning Activities: Clinical Activity 30 hour(s), Independent Study 8 hour(s), Lecture 10 hour(s).

Grade Mode: Pass/Fail only.

MDS 471 – Human Architecture & Function (12 units)

Course Description: First course of the pre-clerkship phase curriculum of the I-EXPLORE; runs eight weeks from August-September. Disciplines include gross anatomy, microscopic anatomy (normal histology), clinical history & physical examination skills, and health systems science.

Learning Activities: Lecture.

Grade Mode: Pass/Fail only.

MDS 472 – Molecular & Cellular Medicine (12 units)

Course Description: Second course of the pre-clerkship phase curriculum of the I-EXPLORE. Run six weeks from late September to early November.

Learning Activities: Clinical Activity.

Grade Mode: Pass/Fail only.

MDS 473 – Pathogens & Host Defense (7.5 units)

Course Description: Third course of the pre-clerkship phase curriculum of the I-EXPLORE. Runs five weeks from November-December.

Learning Activities: Clinical Activity.

Grade Mode: Pass/Fail only.

MDS 474 – Cardiovascular, Pulmonary, & Renal Systems (15 units)

Course Description: Fourth course of the pre-clerkship phase curriculum of the I-EXPLORE. Runs 19 weeks from January-May.

Learning Activities: Clinical Activity.

Grade Mode: Pass/Fail only.

MDS 475 – Endocrinology, Reproduction, & Gastrointestinal Systems (12 units)

Course Description: Endocrinology, Gastroenterology, & Reproduction is the fifth course of the pre-clerkship phase of the I-EXPLORE curriculum and will run 16 weeks from July through November.

Learning Activities: Clinical Activity.

Grade Mode: Pass/Fail only.

MDS 476 – Dermatology & Musculoskeletal Systems (4.5 units)

Course Description: Sixth course of the pre-clerkship phase of the I-EXPLORE curriculum. Runs three weeks from November through December.

Learning Activities: Discussion 28 hour(s), Clinical Activity 8 hour(s), Web Virtual Lecture 20 hour(s).

Grade Mode: Pass/Fail only.

MDS 477 – Brain & Behavior (12 units)

Course Description: Seventh course of the pre-clerkship phase of the I-EXPLORE curriculum. Run eight weeks from January through February.

Learning Activities: Discussion 60 hour(s), Clinical Activity 30 hour(s), Web Virtual Lecture 61 hour(s).

Grade Mode: Pass/Fail only.

MDS 478 – I-RESTORE (Pre-Clerkship Intersession) (12 units)

Course Description: Presents additional integration of the biomedical, clinical and health systems sciences, support for professional identity formation and wellness. Held longitudinally throughout the pre-clerkship phase.

Learning Activities: Seminar.

Grade Mode: Pass/Fail only.

MDS 478B – I-RESTORE (Pre-Clerkship Intersession) (12 units)

Course Description: Presents additional integration of the biomedical, clinical and health systems sciences, support for professional identity formation and wellness. Held longitudinally throughout the pre-clerkship phase.

Learning Activities: Seminar.

Grade Mode: Pass/Fail only.

MDS 479 – Clerkship Intersession Course (1.5-4 units)

Course Description: Longitudinal experience to supplement and support the clerkships in their efforts to facilitate students' acquisition of the graduation competencies; to ensure biomedical science and health systems science are taught and learned in the context of the clinical science-focused clerkship year; to support students' professional identity formation and wellness, and provide time for enrichment activities and scholarly work.

Learning Activities: Clinical Activity 18 hour(s).

Grade Mode: Pass/Fail only.

MDS 480 – Insights in Clinical Research (1 unit)

Course Description: Seminars on research presented by Medical School faculty; overview of pertinent issues, including medical ethics, human subjects protocols, case control methods, etc.

Prerequisite(s): Medical student in good standing.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

MDS 481 – Insights into Clinical Specialties (1 unit)

Course Description: Exposure to various medical specialties, their residency programs and ways in which medical students can prepare for and improve their candidacy for such programs.

Prerequisite(s): Medical student in good standing.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

MDS 482 – Lecture Series in Reproductive Health (1 unit)

Course Description: Psychosocial and public health aspects of providing quality reproductive health care and application in student-run free clinics and in 3rd year clerkships.

Learning Activities: Lecture 1 hour(s).

Credit Limitation(s): Only medical students may enroll for credit; undergraduates may audit the course.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Pass/Fail only.

MDS 483 – Insights in Political, Legal & Business Aspects of Medicine (1 unit)

Course Description: Practical aspects of a medical career.

Prerequisite(s): Medical students in good standing.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Restricted to Medical student only.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Pass/Fail only.

MDS 484 – First Aid for Health Policy (1 unit)

Course Description: Introduces the fundamental concepts and tools of health policy which are becoming necessary for students and physicians to become invested and active participants in healthcare. Focuses on the basic principles of health policy—the structure of government, how a bill becomes a law, the role of legislative visits, the role of healthcare foundations in California, the role of non-profits in California, our current healthcare system after the Affordable Care Act.

Learning Activities: Lecture.

Grade Mode: Pass/Fail only.

MDS 485 – Health Policy Lecture Series (1 unit)

Course Description: Lecture series provides an overview of local, state, national and international health policy. The current challenges health care reform implementation is facing provides how medical students can successfully advocate for changes in health policy.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

MDS 486 – Topics in Health Care Improvement (0.5 units)

Course Description: Lecture series will cover major topics in health care improvement, presented by guest speakers who are leaders in the field.

Learning Activities: Lecture/Discussion 15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

MDS 487 – History & Ethics of Medicine (1 unit)

Course Description: Introduction to ethical problems and events in health care in both modern and historical contexts. Eight one-hour and fifteen-minute interactive sessions designed to introduce students to historical topics in medicine and medical ethics.

Learning Activities: Lecture 1.25 hour(s).

Grade Mode: Pass/Fail only.

MDS 488 – Community Health Scholars ASC (6 units)

Course Description: Regularly present work-in-progress and receive peer and faculty feedback throughout medical school, with a final capstone project presentation at the end of their fourth year prior to graduation. Submit a final written summary of their project and outcomes prior to graduation.

Learning Activities: Discussion 5 hour(s), Clinical Activity, Project.

Grade Mode: Pass/Fail only.

MDS 489 – Directed Studies (1-9 units)

Course Description: Independent studies to accommodate modified curriculums, prepare for taking USMLE exams and for remediation course work directed by the Committee on Student Progress.

Prerequisite(s): Consent of instructor; individual directed studies in extended preparation for modified curriculum, USMLE exams, and/or as required by Committee on Student Progress.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

MDS 489C – Clinical Reintroduction Experience (1-9 units)

Course Description: Learn and practice basic clinical skills in a supervised clinical setting. Skills include patient interviewing, history, physical examination, diagnostic and clinical reasoning, case presentation, and medical records documentation. Direct observation and individual feedback on clinical skills development is provided.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 20 hour(s).

Grade Mode: Pass/Fail only.

MDS 489R – USMLE Directed Remedial Studies (1-9 units)

Course Description: Independent studies to accommodate remediation for taking USMLE exams directed by the Committee on Student Progress.

Prerequisite(s): Recommendation by Committee on Student Progress.

Learning Activities: Independent Study 20 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

MDS 490 – Reimagining Education to Advance Central California Health (REACH) Selective (3-9 units)

Course Description: Third-year REACH students participate in the clinical care of patients at Kaiser Central Valley and associated partners in Central California within specialties of internal medicine, family medicine, pediatrics, surgery, or obstetrics/gynecology. Rotate through outpatient clinics, inpatient wards, and consult services, and may be introduced to organizations that provide health education, patient navigation services, and other resources who care for the same people.

Learning Activities: Clinical Activity 12-24 hour(s).

Grade Mode: Pass/Fail only.

MDS 490A – Community Health Scholars Seminar A (1 unit)

Course Description: Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

MDS 490B – Community Health Scholars Seminar B (0.5 units)

Course Description: Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

MDS 490C – Community Health Scholars Seminar C (0.5 units)

Course Description: Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

MDS 490D – Community Health Scholars Seminar D (0.5 units)

Course Description: Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

MDS 491 – TEACH-MS Pediatric Advocacy & Community Health Elective (3 units)

Course Description: Through this elective, third- or fourth- year students gain understanding in the importance of community partnerships by directly engaging with community organizations that provide health education, patient navigation services, and other resources that they may refer their patients to. Students who complete this elective will develop key skills necessary for educating the public and lobbying key decision-makers in government.

Learning Activities: Clinical Activity, Web Virtual Lecture.

Grade Mode: Pass/Fail only.

MDS 492 – Interpretive Electrophysiology & Applied Cardiology–SSM (6 units)

Course Description: Four-week special study module teaches and provides a basis for systemic interpretation of the EKG as well as cardiology management with the underserved populations in the Central Valley. Addresses underlying normal cardiac structure/function and cardiac abnormalities as reflected in the EKG and tie in the underlying basic science principles of cardiac electrophysiology.

Learning Activities: Lecture/Discussion 12 hour(s), Clinical Activity 20 hour(s).

Grade Mode: Pass/Fail only.

MDS 493 – Independent Special Study Module (3-12 units)

Course Description: Student developed alternative to the SSM/SPO Requirement. Approval by FYOC is required.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 20 hour(s).

Enrollment Restriction(s): FYOC approval required.

Grade Mode: Honors/Pass/Fail.

MDS 493A – International & Comparative Health Care: SSM (6 units)

Course Description: Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. SSM Component.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 20 hour(s), Lecture 10 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

MDS 493B – International & Comparative Health Care: Clinical (3-9 units)

Course Description: Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. Clinical Component.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

MDS 493D – Teaching the Basic Sciences SSM (6 units)

Course Description: Special Studies Module, a yearlong in progress court to teach lecture and discussion education technique and theory.

Prerequisite(s): MDS 440 required concurrently; consent of instructor.

Learning Activities: Lecture 6 hour(s), Lecture/Lab 8 hour(s), Laboratory 30 hour(s), Tutorial 10 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

MDS 493Q – Improving Quality in Health Care (6 units)

Course Description: Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 8 hour(s), Discussion/Laboratory 10 hour(s), Project 10 hour(s).

Grade Mode: Honors/Pass/Fail.

MDS 493QA – Improving Quality in Health Care (3 units)

Course Description: Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 8 hour(s), Discussion/Laboratory 10 hour(s), Project 10 hour(s).

Grade Mode: Honors/Pass/Fail.

MDS 493QB – Improving Quality in Health Care (3 units)

Course Description: Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 8 hour(s), Discussion/Laboratory 10 hour(s), Project 10 hour(s).

Grade Mode: Honors/Pass/Fail.

MDS 493QC – Enhancing Patient Safety in Health Care (6 units)

Course Description: Inter-professional module is designed to explore the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for interprofessional educational experience.

Prerequisite(s): Consent of instructor; fourth-year Medical student.

Learning Activities: Seminar 6 hour(s), Clinical Activity 8 hour(s), Discussion 6 hour(s).

Grade Mode: Honors/Pass/Fail.

MDS 494 – Non-Clinical Medical Student Externship (3-9 units)

Course Description: Generic course for awarding externship credit for medical student rotations that are not primarily focused on patient care.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 20 hour(s), Clinical Activity 10 hour(s).

Enrollment Restriction(s): Restricted to students with approval of credit by the Fourth Year Oversight Committee.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

MDS 495 – Medicine Literature Review (1-9 units)

Course Description: Independent study: topics for selection include, but are not restricted to, medical ethics, economics and jurisprudence, culture and medicine, ethnicity and medicine, gender and medicine, history of medicine, health manpower, and medical education. A prepared paper on the selected topic will be required.

Prerequisite(s): Medical student in good academic standing and permission of the Associate Dean of Curricular Affairs.

Learning Activities: Discussion 3-27 hour(s).

Grade Mode: Pass/Fail only.

MDS 496 – California Oregon Medical Partnership to Address Disparities in Rural Education & Health (COMPADRE) (3-6 units)

Course Description: Third- or fourth-year students enrolled in COMPADRE participate in the clinical care of patients from rural, underserved, or indigenous communities. Students may rotate through outpatient clinics, inpatient wards, and consult services, and may also be introduced to local community organizations that provide health education, patient navigation services, and other resources that they may refer their patients to.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

MDS 497 – Scholarly Project (6 units)

Course Description: Develop a research project on a focused topic area, implements the research, writes a publishable paper, and presents an oral summary of the project.

Prerequisite(s): Consent of instructor; project proposal must be accepted by the Scholarly Project Executive Committee (SPEC).

Learning Activities: Seminar 0.25 hour(s), Independent Study 0.50 hour(s).

Enrollment Restriction(s): Restricted to 4th year medical school students only.

Grade Mode: Honors/Pass/Fail.

MDS 498 – Scholarly Project Selective (1-12 units)

Course Description: Individual, scholarly project, approved by mentor. Includes scientific inquiry, development of a testable hypothesis or clinical research and concludes with written report and public, oral, presentation, taking place during Clerkship curriculum phase.

Learning Activities: Variable, Clinical Activity.

Grade Mode: Pass/Fail only.

MDS 499 – Medical Student Research Fellowship (1-9 units)

Course Description: Independent research project as part of the Medical Student Research Fellowship.

Prerequisite(s): Medical students in good standing; competency with computers.

Learning Activities: Independent Study 10-36 hour(s).

Grade Mode: Honors/Pass/Fail.

Medicine & Epidemiology (VME)

School of Veterinary Medicine

VME 057V – Global Population, Health, & Environment (4 units)

Course Description: Students critically examine multi-scale processes involving human, animal, and ecosystem health. Online team and independent work engage local and global topics around population pressures on environments and environmental pressures on populations.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Grade Mode: Letter.

VME 125 – Knights Landing One Health Center (1 unit)

Course Description: Internship at Knights Landing One Health Center (KLOHC) for undergraduate pre-veterinary student. Application of veterinary and One Health concepts to their work at the center.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated 2 time(s); students can enroll in each quarter (fall, winter, spring) once.

Grade Mode: Pass/No Pass only.

VME 125L – Knights Landing One Health Center Lab (1 unit)

Course Description: Internship at Knights Landing One Health Center (KLOHC) for undergraduate pre-veterinary students. Interns may offer technical help, assist with patient registration and records, animal handling, and foreign language interpretation.

Prerequisite(s): VME 125 (can be concurrent); and consent of instructor.

Learning Activities: Laboratory 1.50 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

VME 158 – Infectious Disease in Ecology & Conservation (3 units)

Course Description: Introduction to the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Basic epidemiological models and application to field data. Scientists' role in developing disease control policies.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C; or equivalent. EVE 100 is recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

VME 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

VME 199 – Special Studies for Advanced Undergraduates (1-5 units)

Course Description: Special studies for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

VME 217 – Evaluation & Use of Diagnostic Tests (2 units)

Course Description: Clinical and epidemiologic properties and application of diagnostic tests for disease, with emphasis on selecting tests; validating, evaluating, and interpreting new tests individually and in aggregate; determining cutoff values; and developing testing strategies.

Prerequisite(s): MPM 205 or EPI 205; consent of instructor.

Learning Activities: Lecture 14 hour(s), Laboratory 6 hour(s), Discussion 3 hour(s).

Enrollment Restriction(s): Limited to 30 students.

Grade Mode: Letter.

VME 225 – Viral Pathogenesis Seminar/Journal Club (1 unit)

Course Description: Participatory seminar addressing the mechanisms of retroviral pathogenesis in a journal club format. Focus on the review of current scientific journal papers concerning viral pathogenesis, immunology and virology with a special focus on retroviruses.

Prerequisite(s): Consent of instructor; graduate student status in the Comparative Pathology, Microbiology or Immunology graduate groups.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated 12 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VME 258 – Infectious Disease in Ecology & Conservation (1 unit)

Course Description: Presentation, analysis and discussion of primary literature on the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Multidisciplinary approach combines perspectives of ecology and veterinary medicine.

Prerequisite(s): VME 158 must be taken concurrently.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Letter.

VME 298 – Group Study (1-5 units)

Course Description: Group study in selected areas of the clinical sciences.

Prerequisite(s): Student in School of Veterinary Medicine or consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

VME 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MST 020A – Early Medieval Culture (4 units)

Course Description: Readings (in translation) in medieval culture, such as Codes of Justinian, Confessions of Saint Augustine, Beowulf, the Nibelungenlied, The Song of Roland, the Summa Theologica of Thomas Aquinas, the Chronicles of Froissart, Chaucer's Canterbury Tales, and Dante's Divine Comedy.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

MST 020B – The Culture of the High Middle Ages (4 units)

Course Description: Great transformations that created the modern world: Constitutional Government, the Hundred Years War, the Black Death, and the Peasants Revolts, the Renaissance, Reformation and Counter-Reformation, and the Baroque.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

MST 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MST 098F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

MST 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MST 130A – Special Themes in Medieval Cultures (4 units)

Course Description: Each offering concentrates on an interdisciplinary aspect of medieval culture in the Middle East and Europe: the idea of the hero, mysticism, urban development. Extensive readings focused on medieval source material.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

Medieval Studies (MST)

College of Letters & Science

MST 130B – Special Themes in Renaissance Culture (4 units)

Course Description: Each theme illuminates an interdisciplinary aspect of Renaissance culture in the eastern and western hemispheres: exploration, medical pathology, daily life, baroque culture. Immersion in source material from 1500-1650.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

MST 131 – Cross-Cultural Relations in the Medieval and/or Early Modern World (4 units)

Course Description: Medieval and/or Renaissance aspects of cross culturalism. Relations between Christians, Jews, and Muslims: Europeans, Africans, and Asians; Old World and New World.

Prerequisite(s): MST 020A or MST 020B; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: World Cultures (WC); Writing Experience (WE).

MST 189 – Seminar in Medieval & Early Modern Culture (4 units)

Course Description: Focus on a particular problem or issue in the Medieval or Early Modern periods. Seminar topics might include (but not limited to) monasticism, origins of the university, chivalry, exploration, the role of women in the Medieval and Early Modern world.

Prerequisite(s): MST 020A or MST 020B; or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Writing Experience (WE).

MST 190 – Senior Thesis (4 units)

Course Description: Preparation of a research paper dealing with a selected aspect of remodern (from Late Antique to Early Modern) culture, under supervision with a designated Supervisor and second reader.

Prerequisite(s): Senior standing and major in Medieval Early Modern Studies.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MST 197T – Tutoring in Medieval Studies (1-5 units)

Course Description: Tutoring in MST 020A & MST 020B, including leadership in small discussion groups affiliated with the course.

Prerequisite(s): MST 020A; MST 020B; upper division standing; consent of instructor and chairperson of curriculum committee.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

MST 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MST 198F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for upper division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

MST 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MST 199FA – Student Facilitated Course Development (1-4 units)

Course Description: Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 098F/198F.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

MST 199FB – Student Facilitated Teaching (1-4 units)

Course Description: Student facilitated. Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

MST 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching Assistant training practicum.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3 hour(s).

Enrollment Restriction(s): Graduate standing.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Microbiology & Molecular Genetics (MMG)

College of Biological Sciences

Undergraduate-level Microbiology (MIC) (p. 1147) courses are being discontinued & replaced by Microbiology & Molecular Genetics (MMG) courses.

For more information, contact your advisor.

MMG 115 – Recombinant DNA Cloning & Analysis (3 units)

Course Description: Cloning and analysis of recombinant DNA, with emphasis on Escherichia coli host-vector systems. DNA-modifying enzymes; vectors and their use; manipulation and expression of insert DNA; polymerase chain reaction; and sequence annotation. Graduate students see MIC 215.

Prerequisite(s): BIS 101 C- or better; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): No credit if student has taken MIC 115.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MMG 162 – General Virology (3 units)

Course Description: Integrated presentation of the nature of animal, bacterial, and plant viruses, including their structure, replication and genetics.

Prerequisite(s): BIS 101 C- or better; BIS 102 or BIS 105 recommended.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Only 2 units of credit for students who have taken PMI 128 or MMI 177 or MMI 177; no credit if student has taken MIC 162.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

Microbiology (MIB)

Graduate Studies

Graduate-level Microbiology (MIC) courses are being discontinued & replaced by Microbiology (MIB) (p. 1147) courses.

For more information, contact your advisor.

MIB 200A – Microbial Biology (3 units)

Course Description: Designed to provide an overview of various aspects of microbiology and microbial processes. Topics will include microbial genetics and genomics, microbial metabolism, signaling, and adaptations.

Prerequisite(s): MIC 102; or equivalent; prior coursework in Microbiology.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MIB 201L – Advanced Microbiology Laboratory

Rotations (5 units)

Course Description: Two five-week assignments in microbiology research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design.

Learning Activities: Laboratory 15 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

MIB 210 – Microbial Interactions (2 units)

Course Description: Analysis at the molecular level of the interactions of microbes with the environment, microbes with other microbes, and microbes in symbiotic and/or pathogenic associations with eukaryotic hosts. Topics discussed will vary.

Prerequisite(s): MIB 200A; or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

MIB 290C – Advanced Research Conference (1 unit)

Course Description: Presentation and critical discussion of staff research activities. Designed for advanced graduate students.

Prerequisite(s): Graduate standing and/or consent of instructor.

Learning Activities: Discussion 1 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MIB 298 – Group Study (1-5 units)

Course Description: Directed reading and discussion on select topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

MIB 299 – Research (1-12 units)

Course Description: Research under the guidance of dissertation committee.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Microbiology (MIC)

College of Biological Sciences

Undergraduate-level Microbiology (MIC) courses are being discontinued & replaced by Microbiology & Molecular Genetics (MMG) (p. 1146) courses.

Graduate-level Microbiology (MIC) courses are being discontinued & replaced by Microbiology (MIB) (p. 1147) courses.

For more information, contact your advisor.

MIC 010 – Natural History of Infectious Diseases (3 units)

Course Description: Topics in the natural history of infectious diseases principally affecting humans. Introduction to infectious microbial agents, ecology, epidemiology, and induction of disease. Focus on diseases of a contemporary nature.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MIC 101, MIC 102, or MIC 104.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MIC 091 – Introduction to Research (1 unit)

Course Description: Discussion of faculty research focusing on the biochemistry, genetics, and cell biology of microorganisms, along with ways undergraduates can participate in research projects of faculty members.

Prerequisite(s): BIS 002A; or equivalent.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Restricted to lower division standing.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MIC 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MIC 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MIC 102 – Introductory Microbiology (3 units)

Course Description: Essentials of microbial biology, emphasizing phylogeny, physiology, genetics, ecology, and pathogenesis. Interactions with other microbes, humans, and the biosphere. Uses of microbes in agriculture and biotechnology. May be taught abroad.

Prerequisite(s): (BIS 001A or BIS 002A); CHE 002B (can be concurrent).

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MIC 101 or MIC 104.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MIC 103L – Introductory Microbiology Laboratory (2 units)

Course Description: Introduction to principles and laboratory methods employed in working with microorganisms. Designed for students requiring microbiology for professional school admission. May be taught abroad.

Prerequisite(s): MIC 102 C- or better; CHE 002B.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open to students who completed MIC 101 before spring 2016, or who have completed MIC 102L or MIC 104L.

Grade Mode: Letter.

MIC 104L – General Microbiology Laboratory (3 units)

Course Description: Principles and laboratory methods employed in working with microorganisms. Designed for students continuing in microbiology, genetics, or biochemistry.

Prerequisite(s): MIC 102 C or better; (CHE 008B or CHE 118B or CHE 129A); and consent of instructor.

Learning Activities: Lecture 1 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Students must complete a petition for consideration of enrollment; petition available on department of Microbiology and Molecular Genetics website.

Credit Limitation(s): Only 2 units of credit for students who completed MIC 101 before spring 2016, or who have completed MIC 103L; not open to students who have completed MIC 102L.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

MIC 105 – Microbial Diversity (3 units)

Course Description: Survey of the major groups of microorganisms emphasizing diversity of energy metabolism, morphology, evolution, and natural history.

Prerequisite(s): MIC 102 or MIC 104; BIS 101; BIS 103 or BIS 105 strongly recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MIC 105L – Microbial Diversity Laboratory (3 units)

Course Description: Classical enrichments for the isolation of metabolically diverse microbes; modern molecular methods for the identification of isolates; cultivation independent analysis of microbial communities from local environmental samples.

Prerequisite(s): (MIC 102 or MIC 104); (MIC 102L or MIC 104L); MIC 105 (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

MIC 111 – Human Microbiology (3 units)

Course Description: Biology of microorganisms that form commensal, mutualistic, and pathogenic relationships with human beings, emphasizing their phylogeny, physiology, genetics, and ecology. Effects on human nutrition, development and physiology. Mechanisms of pathogenesis, immune response evasion, antibiotic action, and antibiotic resistance.

Prerequisite(s): MIC 102; BIS 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MIC 115 – Recombinant DNA Cloning & Analysis (3 units)

Starting Winter Quarter 2025, this course is no longer offered.

Course Description: Cloning and analysis of recombinant DNA, with emphasis on Escherichia coli host-vector systems. DNA-modifying enzymes; vectors and their use; manipulation and expression of insert DNA; polymerase chain reaction; and sequence annotation. Graduate students see MIC 215.

Prerequisite(s): BIS 101; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MIC 120 – Microbial Ecology (3 units)

Course Description: Interactions between non-pathogenic microorganisms and their environment, emphasizing physiological and metabolic characteristics of various groups and their adaptation to and modification of specific habitats.

Prerequisite(s): MIC 105; (BIS 102 or BIS 105).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MIC 150 – Genomes of Pathogenic Bacteria (3 units)

Course Description: Molecular genetics and comparative genomics of representative pathogenic bacteria. Roles of mobile genetic elements, lateral gene transfer, and genome rearrangements in pathogen evolution. Mutation, recombination, and complementation as tools for genetic analysis. Content includes close examination of primary research articles.

Prerequisite(s): MIC 102; BIS 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MIC 162 – General Virology (3 units)

Starting Fall Quarter 2024, this course is no longer offered.

Course Description: Integrated presentation of the nature of animal, bacterial, and plant viruses, including their structure, replication and genetics.

Prerequisite(s): BIS 101; BIS 102 or BIS 105 recommended.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Only 2 units of credit for students who have taken PMI 128.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MIC 170 – Yeast Molecular Genetics (3 units)

Course Description: Survey of the genetics, cell biology and technologies in yeasts and related lower eukaryotes. Topics include diversity of yeasts; cell structure; metabolism; cell cycle; genetic approaches and genomics; gene expression; yeasts as models to study higher eukaryotes; and contemporary techniques.

Prerequisite(s): BIS 101; MIC 102 or MIC 105 strongly recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MIC 172 – Host-Parasite Interactions (3 units)

Course Description: Exploration of host-parasite interactions at multiple levels, with an emphasis on global health and medically important human parasites.

Prerequisite(s): MIC 102 or MIC 101 or MIC 104; BIS 101; Biological Sciences 102 or 105 strongly recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

MIC 175 – Cancer Biology (3 units)

Course Description: Exploration of the causes and treatments of cancer at multiple levels: molecular/cell biology, clinical manifestations, epidemiology and prevention.

Prerequisite(s): BIS 101; (BIS 102 or BIS 105).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

MIC 190C – Undergraduates Research Conference (1 unit)

Course Description: Presentation and critical discussion of staff research activities: designed for advanced undergraduate students.

Prerequisite(s): MIC 199 (can be concurrent); and consent of instructor; upper division standing; MIC 199 required concurrently.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MIC 191 – Introduction to Research for Advanced Undergraduates (1 unit)

Course Description: Discussion of faculty research focusing on the biochemistry, genetics, and cell biology of microorganisms, along with ways undergraduates can participate in research projects of faculty members.

Prerequisite(s): BIS 002A; or equivalent.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MIC 192 – Internship (1-12 units)

Course Description: Technical and/or professional experience on or off campus. Supervised by a member of the Microbiology Section faculty.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

MIC 194H – Microbiology Honors Research (2 units)

Course Description: Continuation of an individual microbiological research project culminating in writing of a senior thesis under a faculty director.

Prerequisite(s): Senior standing; eligibility for college honors; completion of 6 units of MIC 199; consent of section.

Learning Activities: Independent Study 6 hour(s).

Grade Mode: Pass/No Pass only.

MIC 197T – Tutoring in Microbiology (1-12 units)

Course Description: Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MIC 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MIC 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MIC 200B – Advanced Bacteriology (3 units)

Course Description: Intended for first-year graduate students in Microbiology and closely-related fields. Advanced topics in phylogeny, physiology and diversity of bacteria.

Prerequisite(s): MIB 200A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MIC 215 – Recombinant DNA (3 units)

Course Description: Application of recombinant DNA technology to modern problems in biology, biochemistry, and genetics, emphasizing molecular cloning strategies, choice of vectors, preparation of insert DNA, and selection procedures.

Prerequisite(s): BIS 101; BIS 102; BIS 103; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MIC 217 – Analysis of Molecular Genetic Circuits (4 units)

Course Description: Project-based course focused on problem-solving strategies in biology. Emphasis on testing hypotheses by translating real-world problems into an appropriate mathematical model and translating the results into real-world understanding.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Only 2 units of credit for students who have previously taken BIM 117 or MIC 117.

Grade Mode: Letter.

MIC 262 – Advanced General & Molecular Virology (3 units)

Course Description: Advanced integrated presentation of animal, bacterial, and plant viruses, including their structure, modes of regulation, expression and replication, and effects on host cells and organisms.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MIC 263 – Principles of Protein-Nucleic Acid Interactions (3 units)

Course Description: Physical basis of protein-nucleic acid interaction.

Topics include nucleic acid recognition by proteins, thermodynamics of protein-nucleic acid stability, and kinetics of binding process for both non-specific and sequence-specific nucleic acid binding proteins. Emphasis on systems that represent paradigms in protein-nucleic acid interactions.

Prerequisite(s): Advanced graduate standing and completion of one year of basic graduate course work in biochemistry, biophysics, chemistry, genetics, microbiology, or molecular biology.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MIC 274 – Seminar in Genetic Recombination (1 unit)

Course Description: Biochemical and genetic aspects of genetic recombination in prokaryotes and eukaryotes. Mechanisms of recombination and biochemical and genetic characteristics of recombination proteins. Proteins include DNA strand exchange, DNA helicases, and Holliday junction resolving proteins.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MIC 275 – Seminar in DNA Repair & Recombination (1 unit)

Course Description: Review and discussion of current research and literature in DNA repair and recombination with presentations by individual students and invited speakers.

Prerequisite(s): Consent of instructor; graduate standing in Microbiology or closely-related field.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MIC 276 – Advanced Concepts in DNA Metabolism (3 units)

Course Description: DNA damage checkpoints, homologous recombination, and meiotic recombination. An advanced treatment of the clinical and current literature to discuss emerging principles and current models in these research areas.

Prerequisite(s): MCB 221C or GGG 201C or equivalent course recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MIC 290C – Advanced Research Conference (1 unit)

Course Description: Presentation and critical discussion of staff research activities. Designed for advanced graduate students.

Prerequisite(s): Graduate standing and/or consent of instructor.

Learning Activities: Discussion 1 hour(s), Conference 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MIC 291 – Selected Topics in Microbiology (1 unit)

Course Description: Current progress in microbiology and cellular and molecular biology.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MIC 292 – Seminar in Bacterial Physiology & Genetics (1 unit)

Course Description: Review and discussion of current research and literature in bacterial physiology and genetics, with presentations by individual students.

Prerequisite(s): Consent of instructor; graduate standing in Microbiology or closely-related field.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

MIC 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MIC 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MIC 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Middle East/South Asian Studies (MSA)

College of Letters & Science

MSA 092 – Internship (1-12 units)

Course Description: Supervised internship on and off campus in the area of Middle East & South Asia Studies.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

MSA 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MSA 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MSA 100 – Middle East & South Asia: Comparative Perspectives (4 units)

Course Description: Ethnographic and historical points of intersection and divergence in various aspects of the Middle East and South Asia in precolonial, colonial, and postcolonial societies. Anthropological, historical, and theoretical debates surrounding the region.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

MSA 111A – Great Cities of Arab Middle East & South Asia (4 units)

Course Description: In-depth examination of the great cities of North Africa, the Middle East and South Asia as cultural and historical artifacts. Topics include: the concept of the Islamic city, processes of modernity, and representations that reinforce imagination, memory and personal identity.

Prerequisite(s): Consent of instructor; some knowledge of Islamic/Middle Eastern history is very useful.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

MSA 112 – History of South Asian Islam (4 units)

Course Description: Comparative study of Muslim communities of South Asia. Commonalities in cultural identity and historical experience. Rise and spread of Islam, comparative history of Islamic Empires, colonial rule, and post-colonial nationalism.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MSA 115B – Global South Asia Diaspora (4 units)

Course Description: The migration of the diverse peoples from South Asia (including India, Bangladesh, Pakistan, Afghanistan, Nepal, and Sri Lanka) around the world from 1800 to the present.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

MSA 121A – Shahnameh: The Persian Book of Kings (4 units)

Course Description: In-depth analysis of the Persian Book of Kings (Shahnameh) by Abu al-Qasim Ferdowsi (d. 1020 CE) in its historical context with a comparative perspective on the role of this work in Persian and world literature.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: COM 175.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

MSA 121C – A Story for a Life: The Arabian Nights (4 units)

Course Description: In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: COM 172, ARB 140.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

MSA 122A – Themes in the Arabic Novel (4 units)

Course Description: Select modern Arabic fiction (novels and short stories) in translation. Thematically connected readings supplemented by non-fictional writings when appropriate.

Learning Activities: Lecture/Discussion 3 hour(s), Independent Study, Extensive Writing.

Enrollment Restriction(s): Limited to 30 students.

Repeat Credit: May be repeated 2 time(s) when texts/theme of required course readings sufficiently change.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

MSA 131A – Modern Iranian Cinema (4 units)

Course Description: Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf, Bahram Beizaie are included. Knowledge of Persian not required.

Prerequisite(s): Upper division standing, or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: CTS 146A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

MSA 131B – Modern South Asia Cinema (4 units)

Course Description: South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: CTS 146B, ANT 147.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

MSA 131C – Religion & Media in Arab World (4 units)

Course Description: Exploration of the role and experience of media technologies in the Arab world. Study of digital and electronic media as well as alternative media practices. Investigation of new trends in political activism and identity formation.

Learning Activities: Lecture 4 hour(s).

Cross Listing: RST 166.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

MSA 150 – Women & Islamic Discourses (4 units)

Course Description: Introduction to the debates/discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East & South Asia. Comparative study of debates/discourses on family, work, law, sexuality, religion, comportment, human rights, feminist and religious movements.

Prerequisite(s): GSW 050; or comparable course.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: GSW 185.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

MSA 151A – Iranian Society & Culture (4 units)

Course Description: In-depth investigation of modern Iranian society and culture. Exploration of structures of Iranian society: family, gender, religion, minorities, economy, politics, and state. Iran's role in the globalizing world, and the role of Iranian diasporas.

Learning Activities: Lecture 2 hour(s), Term Paper, Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

MSA 180 – Topics in Middle East & South Asian Studies (4 units)

Course Description: Comparative perspective on the Middle East and South Asia. Topics may include: modernity, religious traditions, colonialism, subalternity and social movements, gender and sexuality, history and memory, science and development, ritual and performance, public culture, diasporas.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

MSA 181A – Topics in Regional ME/SA Studies (4 units)

Course Description: Iran & Persian topics for students specializing in region-specific Middle East & South Asia Studies.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

MSA 181B – Topics in Regional ME/SA Studies (4 units)

Course Description: Indian/South Asia topics for students specializing in region-specific Middle East & South Asia Studies.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

MSA 181C – Topics in Regional ME/SA Studies: Arab Studies (4 units)

Course Description: Arab Studies topics.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) when topics and themes differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

MSA 182A – Undergraduate Seminar in Iranian & Persianate Studies (4 units)

Course Description: Interdisciplinary perspective on one topic in the history and ethnography, literature and culture, religious and philosophical traditions, art and architecture, or media and society in Iranian and Persianate Studies.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

MSA 182B – Undergraduate Seminar in South Asian Studies (4 units)

Course Description: In-depth and interdisciplinary perspective on one topic in the history and ethnography, literature and culture, religious and philosophical traditions, art and architecture, or media and society in South Asian Studies.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

MSA 182C – Undergraduate Proseminar in Middle East/ South Asia: Arab Studies Seminar (4 units)

Course Description: Seminar in Arab Studies topics.

Prerequisite(s): MSA 100 recommended.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 15 students.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

MSA 192 – Internship (1-12 units)

Course Description: Supervised internship on and off campus in the area of Middle East & South Asia Studies.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

MSA 194H – Special Study for Honors Students (1-5 units)

Course Description: Independent study of a problem in Middle East/South Asian studies involving the writing of an honors thesis.

Prerequisite(s): Consent of instructor; open only to majors of senior standing who qualify for honors program.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Letter.

MSA 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MSA 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Military Science (MSC)

College of Letters & Science

MSC 011 – U.S. Army Leadership & Personal Development (1 unit)

Course Description: United States Army, its organization, customs, courtesies, and rank structure. Surveys personal development skills needed for effective leadership such as critical thinking, time management, and health and fitness. Familiarization with the Army ROTC program.

Prerequisite(s): Lower division standing.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MSC 012 – Introduction to Tactical Military Leadership (1 unit)

Course Description: Military leadership fundamentals to include setting direction, problem-solving, presenting briefs, and using effective writing skills. Basic military tactics, orienteering and land navigation. Dimensions of leadership values, attributes, skills, and actions.

Prerequisite(s): Lower division standing.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MSC 013 – Introduction to Basic Military Operations (1 unit)

Course Description: Basic military tactical theories and their application at the individual and squad level. Military tactical operations and basic military first aid.

Prerequisite(s): Lower division standing.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Letter.

MSC 014A – Introduction to Military Leadership Skills (0.5 units)

Course Description: Personal and organizational leadership skills introduced in leadership laboratory. Extensive supervised leadership experiences conducted in a military environment. Basic military skills necessary to function in a leadership role.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 014B – Introduction to Military Leadership Skills (0.5 units)

Course Description: Continuation of development of leadership and military skills introduced in MSC 014A. Emphasis on the role of the individual, the basic organizational element of the Army, the squad. Supervisory controls reduced as students gain capabilities.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 014C – Introduction to Military Leadership Skills (0.5 units)

Course Description: Development of skills required for promotion to junior non-commissioned officer level. Chain of command from company through individual levels. Interrelationship of squad and platoon organizations.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 021 – Military History, Study of Battles (2 units)

Course Description: Application of the nine Principles of War to key battles in American and World history. Tactics on a strategic and operational level. Evaluation of leadership and decision-making processes of key leaders.

Prerequisite(s): MSC 022B; or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MSC 022A – Innovative Team Leadership (2 units)

Course Description: Leadership values, attributes and theories. Use of basic military skills such as land navigation and squad operations to enhance understanding of the Army. Types of military briefings. Practice in interpersonal skills. Presentation of a briefing.

Prerequisite(s): Lower division standing or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MSC 022B – Foundations of Tactical Leadership (2 units)

Course Description: Leadership of tactical teams in complex operating environment. Self-assessment of leadership style. Basic military skills: terrain analysis, patrolling and operations orders. Dynamics of adaptive leadership in the context of military operations.

Prerequisite(s): MSC 022A; or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MSC 024A – Individual Military Leadership Skills (0.5 units)

Course Description: Develop and practice personal military leadership skills in extensive supervised leadership labs. Cadets perform basic military skills, improve on troop leading procedures and lead subordinates in tactical situations. Begin with drill and ceremony, land navigation and individual movement techniques.

Prerequisite(s): MSC 014A; MSC 014B; MSC 014C; MSC 022A (can be concurrent); or consent of instructor. MSC 022A required concurrently.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 024B – Individual Military Leadership Skills (0.5 units)

Course Description: Development and practice of personal military leadership skills in extensive supervised leadership labs. Performance of basic military skills, improvement on troop-leading procedures, leadership of subordinates in tactical situations.

Prerequisite(s): MSC 014A; MSC 014B; MSC 014C; MSC 022B (can be concurrent); or consent of instructor. MSC 022B required concurrently.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 024C – Individual Military Leadership Skills (0.5 units)

Course Description: Develop and practice personal military leadership skills in extensive supervised leadership labs. Begin with drill and ceremony, land navigation and individual movement techniques. Cadets perform basic military skills, improve on troop leading procedures and lead subordinates in tactical situations.

Prerequisite(s): MSC 014A; MSC 014B; MSC 014C; MSC 021 (can be concurrent); or consent of instructor; MSC 021 required concurrently.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 131 – Military Leadership & Management (2 units)

Course Description: Leadership and management in organizational context. Team dynamics, leadership styles, professional ethics, development of a leadership framework. Management skills for planning, decision making, and organizing developed through definition of problems, development of courses of action, implementation of solutions.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MSC 132A – Advanced Military Operations (2 units)

Course Description: Military small unit tactical theory as the basis for leadership development. Principles of war, contemporary operating environment, Geneva Law of Land Warfare, military offensive and defensive operations. Emphasis on development of critical thinking, problem solving, and communication skills.

Prerequisite(s): MSC 131; or consent of instructor; upper division standing.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MSC 132B – Applied Leadership (2 units)

Course Description: Military small unit tactical theory and application as basis for leadership development. Application of leadership styles and skills to complete problem-solving exercises and the development of an adaptable framework applicable to a variety of shifting environments and situations.

Prerequisite(s): MSC 132A; or consent of instructor; upper division standing.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MSC 134A – Adaptive Tactical Leadership (0.5 units)

Course Description: Small unit tactical operations serve as the basis for enhancement of leadership performance through tactical application. Assessment of leadership attributes, skills, and actions through participation in a variety of leadership roles in problem-solving exercises.

Prerequisite(s): MSC 131; or consent of instructor; upper division standing.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 134B – Adaptive Tactical Leadership (0.5 units)

Course Description: Small unit tactical operations as the basis for enhancement of leadership performance through tactical application. Assessment of leadership attributes, skills, and actions through participation in a variety of leadership roles in problem-solving exercises.

Prerequisite(s): MSC 132A; or consent of instructor; upper division standing.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 134C – Adaptive Tactical Leadership (0.5 units)

Course Description: Small unit tactical operations are taught, serve as basis for students exploration, development. Serve in variety of leadership roles in which leadership attributes, skills, actions are closely assessed and developed while they are faced with series of problem solving exercises.

Prerequisite(s): MSC 132B; or consent of instructor; upper division standing.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 141 – Ethical Leadership (2 units)

Course Description: Direct influence of leaders on individual motivation and group processes. The complexities of balancing moral, legal, and ethical obligations while applying fundamental business principles in determining the best possible outcome from competing solutions.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MSC 142 – Military Law (2 units)

Course Description: The United States Constitution and the Military Justice System. Basic law of war, with an emphasis on issues that might arise on the battlefield or during a national emergency.

Prerequisite(s): MSC 141; or consent of instructor; upper division standing.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MSC 143 – U.S. Army Management Systems (2 units)

Course Description: Leadership and management, focusing on four management systems: planning, organizing, leading and controlling. Practical methodologies for assessing management decisions while balancing competing ethical, economic, infrastructure and future growth trade-offs.

Prerequisite(s): MSC 142; or consent of instructor; upper division standing.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

MSC 144A – Military Training Leadership Skills (0.5 units)

Course Description: Enhancement of student leadership performance through practical application. Small unit military tactical operations as the basis for the student exploration and development.

Prerequisite(s): MSC 141; or consent of instructor; upper division standing.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 144B – Military Training Leadership Skills (0.5 units)

Course Description: Enhancement of student leadership performance through practical application. Small unit military tactical operations serve as the basis for student exploration and development.

Prerequisite(s): MSC 142; or consent of instructor; upper division standing.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 144C – Military Training Leadership Skills (0.5 units)

Course Description: Enhancement of student leadership performance through practical application. Small unit military tactical operations as the basis for student exploration and development.

Prerequisite(s): MSC 143; or consent of instructor; upper division standing.

Learning Activities: Laboratory 2 hour(s).

Grade Mode: Pass/No Pass only.

MSC 191 – Special Studies in Military Science (2 units)

Course Description: Intensive examination of one or more special problems in military science. Possible areas of study include leadership dimensions, principles of war, air-land battle imperatives, military strategy, the operational art and professional ethics.

Prerequisite(s): MSC 131; MSC 132A; MSC 132B; MSC 141; MSC 142; MSC 143; consent of department chair.

Learning Activities: Independent Study 6 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Pass/No Pass only.

Molecular & Cellular Biology (MCB)

College of Biological Sciences

MCB 010 – Introduction to Human Heredity (4 units)

Course Description: Topics in human heredity and human gene structure and function, including the genetic basis of human development, causes of birth defects, mental retardation, genetic diseases, sexual determination, development, and behavior.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MCB 023 – Biography of Cancer: Past, Present & Future (3 units)

Course Description: Historical account of the progression of cancer treatment, prevention, and human understanding of the biological basis of cancer. Past, present and future social implications of cancer treatment and prevention. May be taught abroad.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Scientific Literacy (SL); Writing Experience (WE).

MCB 099 – Special Study (1-5 units)

Course Description: Special study.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 3-15 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MCB 110Y – iBioseminars in Cell & Molecular Biology (3 units)

Course Description: Hybrid course in Cellular & Molecular Biology for senior level (1) Biochemistry/Molecular Biology; (2) Genetics; or (3) Cell Biology majors. Face-to-face instruction combined with online lectures available at iBioseminars website delivered by leading researchers in Cellular & Molecular Biology.

Prerequisite(s): BIS 101; BIS 102; (BIS 103 or BIS 105); BIS 104.

Learning Activities: Web Virtual Lecture 1.50 hour(s), Web Electronic Discussion 1.50 hour(s), Lecture/Discussion 2 hour(s).

Credit Limitation(s): Students who have previously taken MCB 110V cannot receive credit for MCB 110Y.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

MCB 112 – Communicating Research in the Biological Sciences (3 units)

Course Description: Writing and communicating research concepts in the biological sciences for scientific audiences. Refining brief, informal, oral descriptions of research, writing documents required for graduate school applications, preparing conference posters, and drafting proposals for scientific fellowships.

Prerequisite(s): Consent of instructor; open to students with senior status and currently involved in laboratory research.

Learning Activities: Extensive Writing/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MCB 120 – Molecular Biology & Biochemistry Laboratory Associated Lecture (3 units)

Course Description: Introduction to laboratory methods and procedures employed in studying molecular biology and biochemical processes. Lecture component for MCB 120L.

Prerequisite(s): BIS 102; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Pass One restricted to upper division

Biochemistry & Molecular Biology majors; concurrent enrollment in MCB 120L required; on-time attendance for first lecture is mandatory.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

MCB 120L – Molecular Biology & Biochemistry Laboratory (3 units)

Course Description: Introduction to laboratory methods and procedures employed in studying molecular biology and biochemical processes. Designed for students who need experience in use of molecular biology and biochemical techniques as research and analytical tools.

Prerequisite(s): BIS 102; or consent of instructor; must be taken concurrently with MCB 120.

Learning Activities: Laboratory 10 hour(s).

Enrollment Restriction(s): Pass One restricted to upper division Biochemistry & Molecular Biology majors; concurrent enrollment in MCB 120 required; on-time attendance for first lab is mandatory.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

MCB 121 – Advanced Molecular Biology (3 units)

Course Description: Structure, expression, and regulation of eukaryotic genes. Chromosome structure and replication; gene structure, transcription, and RNA processing; protein synthesis and translation control; development, immune system, and oncogenes.

Prerequisite(s): BIS 101; (BIS 102 (can be concurrent) or BIS 105 (can be concurrent) or ABI 102 (can be concurrent)); BIS 102 or BIS 105 or ABI 102 can be concurrent although prior completion is recommended.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MCB 161.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MCB 123 – Behavior & Analysis of Enzyme & Receptor Systems (3 units)

Course Description: Introduction to the principles of enzyme kinetics and receptor-ligand interactions with emphasis on metabolic regulation and data analysis. Topics include simultaneous equilibria, chemical and steady-state kinetics, allosteric enzymes, multireactant systems, enzyme assays, membrane transport and computer-assisted simulations and analyses.

Prerequisite(s): BIS 103.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MCB 124 – Macromolecular Structure & Function (4 units)

Course Description: In-depth investigation into protein and nucleic acid structure and thermodynamics and how these properties influence their biological functions. Key examples of important functional classes of these molecules are examined.

Prerequisite(s): BIS 102 C- or better; BIS 101.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed CHE 108.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MCB 126 – Plant Biochemistry (3 units)

Course Description: The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants.

Prerequisite(s): BIS 103 or BIS 105.

Learning Activities: Lecture 3 hour(s).

Cross Listing: PLB 126.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

MCB 138 – Undergraduate Seminar in Biochemistry (1 unit)

Course Description: Discussion of the historical developments of modern biochemistry or current major research problems.

Prerequisite(s): BIS 103.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL).

MCB 139 – Undergraduate Seminar in Biochemistry (2 units)

Course Description: Discussion of the historical developments of modern biochemistry or current major research problems.

Prerequisite(s): BIS 103.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL).

MCB 140 – Cell Biology Laboratory Associated Lecture (3 units)

Course Description: Lectures illustrating the principles of cell biology with emphasis on light microscopy. Accompanies MCB 140L.

Prerequisite(s): BIS 104; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Pass One restricted to upper division Cell Biology majors; concurrent enrollment in MCB 140L required; on-time attendance for first lecture is mandatory.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL); Writing Experience (WE).

MCB 140L – Cell Biology Laboratory (5 units)

Course Description: Exercises illustrating the principles of cell biology with emphasis on light microscopy.

Prerequisite(s): BIS 104 (can be concurrent).

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL);

Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

MCB 142 – Advanced Cell Biology: Contractile & Motile Systems (4 units)

Course Description: Advanced cell biology with emphasis on molecular, biophysical and cellular properties of contractile and motile systems.

Prerequisite(s): BIS 102; BIS 104 (can be concurrent); (MAT 016B or MAT 019B).

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MCB 143 – Cell & Molecular Biophysics (3 units)

Course Description: Physical chemical principles by which molecules form living, moving, reproducing cells. Physical nature of cytoplasm; molecular structure/bonding in macromolecules, macromolecular assemblies and protein machines. Physical techniques and modeling of cytoskeletal polymer-motor dynamics and function during intracellular transport, mitosis and motility.

Prerequisite(s): BIS 101; BIS 102; BIS 103; BIS 104 strongly recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

MCB 144 – Mechanisms of Cell Division (3 units)

Course Description: The molecules and mechanisms that allow eukaryotic cells to coordinate cell growth, DNA replication, segregation of chromosomes and cell division.

Prerequisite(s): BIS 101; BIS 102; BIS 104.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

MCB 145 – Assembly & Function of Cell Signaling Machinery (3 units)

Course Description: Molecular basis of cell signaling, including positioning of cellular machinery, components of various signaling pathways, and downstream effects of signaling on cell adhesion, cell differentiation, and programmed cell death.

Prerequisite(s): BIS 101; BIS 102; BIS 104.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MCB 148 – Undergraduate Seminar in Cell Biology (2 units)

Course Description: Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included.

Prerequisite(s): Upper division standing in the biological sciences or a related discipline.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL).

MCB 150 – Developmental Biology (4 units)

Course Description: Analysis of the mechanistic basis for animal development with a focus on experimental evidence and the relevant fundamental experimental strategies. Fertilization and early development, morphogenesis and patterning, cell differentiation, regulation of cell proliferation and tissue growth.

Prerequisite(s): BIS 101.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

MCB 158 – Undergraduate Seminar in Developmental Biology (2 units)

Course Description: Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included.

Prerequisite(s): Upper division standing in the biological sciences or a related discipline.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL).

MCB 160 – Genetics Laboratory Associated Lecture (3 units)

Course Description: Lecture instruction in the theoretical basis of laboratory techniques in transmission and molecular genetics, discussion of lab results and experiment interpretation.

Prerequisite(s): BIS 101; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Pass One restricted to upper division Genetics and Genomics majors; concurrent enrollment in MCB 160L required; on-time attendance for first lecture is mandatory.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Writing Experience (WE).

MCB 160L – Principles of Genetics Laboratory (5 units)

Course Description: Laboratory work in basic and molecular genetics including gene mapping, isolation and characterization of mutants in eukaryotic model systems, reverse genetics, gel electrophoresis, recombinant DNA techniques, and PCR.

Prerequisite(s): BIS 101.

Learning Activities: Laboratory 6 hour(s), Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

MCB 162 – Human Genetics & Genomics (3 units)

Course Description: Human genome and genetic variation in human populations, molecular and genomic approaches in the practice of human genetics, epigenetic gene regulation, personal genetics and genomic medicine.

Prerequisite(s): BIS 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

MCB 163 – Developmental Genetics (3 units)

Course Description: Current aspects of developmental genetics. Historical background and current genetic approaches to the study of development of higher animals.

Prerequisite(s): MCB 121 (can be concurrent).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MCB 164 – Advanced Eukaryotic Genetics (3 units)

Course Description: Principles and logic of modern genetic analysis to understand mechanisms governing Mendelian and epigenetic inheritance, with a focus on model organisms. Molecular basis of human genetic diseases and cancers explored through reading primary literature.

Prerequisite(s): MCB 121.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MCB 178 – Undergraduate Seminar in Molecular Genetics (1 unit)

Course Description: Discussion of current topics in molecular genetics to show advanced applications of basic principles and to highlight professional career opportunities.

Prerequisite(s): BIS 101; MCB 121 (can be concurrent); upper division standing, and completion or concurrent enrollment in MCB 121.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL).

MCB 182 – Principles of Genomics (3 units)

Course Description: Fundamentals of genomics, including structural genomics, functional genomics, proteomics, and bioinformatics, focusing on the impact of these disciplines on research in the biological sciences. Social impacts of genomic research.

Prerequisite(s): BIS 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MCB 185 – Computer Programming for Biologists (3 units)

Course Description: Introduction to computer programming specifically for biology majors. Programming projects have molecular biology and bioinformatic themes.

Prerequisite(s): BIS 101 C- or better.

Learning Activities: Lecture/Lab 3 hour(s).

Enrollment Restriction(s): Pass One restricted to all undergraduate majors in the College of Biological Sciences.

Credit Limitation(s): Only two units of credit for students who have previously taken ECS 012, ECS 032A or ENG 006.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

MCB 190C – Undergraduate Research Conference (1 unit)

Course Description: Presentation and discussion of current research by faculty and students.

Prerequisite(s): MCB 193 (can be concurrent) or MCB 199 (can be concurrent); and consent of instructor; upper division standing; MCB 193 or MCB 199 required concurrently.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MCB 191 – Introduction to Research (1 unit)

Course Description: Various topics in molecular and cellular biology including biochemistry, genetics, and cell biology will be discussed, along with ways undergraduates can participate in research projects of faculty members.

Prerequisite(s): BIS 102 (can be concurrent); or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MCB 192 – Internship (1-12 units)

Course Description: Technical and/or practical experience on and off campus, supervised by a member of the Section of Molecular and Cellular Biology faculty.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MCB 193 – Advanced Research (3 units)

Course Description: Research project carried out under the supervision of a faculty sponsor. Discussion and analysis of results and proposed experiments on a weekly basis with faculty sponsor. May include presentation of a seminar to a research group.

Prerequisite(s): Consent of instructor; upper division standing; completion of an upper division Molecular Cellular Biology (MCB) laboratory course.

Learning Activities: Laboratory 6 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MCB 194 – Thesis Research (3 units)

Course Description: Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar.

Prerequisite(s): Consent of instructor; 6 units of MCB 193 and/or MCB 199 with faculty director; senior standing.

Learning Activities: Independent Study 9 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL); Writing Experience (WE).

MCB 194H – Research Honors (3 units)

Course Description: Honors project. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar.

Prerequisite(s): Consent of instructor; 6 units of MCB 193 and/or MCB 199 with faculty director; senior standing; GPA of at least 3.250.

Learning Activities: Independent Study 9 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL); Writing Experience (WE).

MCB 197T – Tutoring in Molecular & Cellular Biology**(1-5 units)**

Course Description: Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities.

Prerequisite(s): Consent of instructor; upper division standing, completion of course to be tutored.

Learning Activities: Tutorial 2-6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MCB 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MCB 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 3-15 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

MCB 248 – Seminar in Cell Biology (2 units)

Course Description: Discussion of recent literature on the physical and chemical aspects of organization and function of living systems, topics of current interest in ultrastructure and function of cells. Organizational and functional properties of the molecular and cellular levels of biological systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MCB 258 – Seminar in Development (2 units)

Course Description: Reports and discussion on embryology, morphogenesis, and developmental mechanisms.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MCB 259 – Literature in Developmental Biology (1 unit)

Course Description: Critical presentation and analysis of recent journal articles in developmental biology.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MCB 282 – Biotechnology Internship (7-12 units)

Course Description: Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of 3 months as part of the Designated Emphasis in Biotechnology Program.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Internship 21-36 hour(s).

Enrollment Restriction(s): Open only to students participating in the Designated Emphasis in Biotechnology program.

Grade Mode: Satisfactory/Unsatisfactory only.

MCB 290C – Research Conference (1 unit)

Course Description: Presentations and critical discussions of faculty and graduate student research in molecular and cellular biology including biochemistry, genetics, and cell biology.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MCB 291 – Current Progress in Molecular & Cellular Biology (1 unit)

Course Description: Seminars presented by guest lecturers on subject of their own research activities.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MCB 295 – Literature in Molecular & Cellular Biology (1 unit)

Course Description: Critical reading and evaluation of current literature in molecular and cellular biology disciplines. Papers presented and discussed in detail.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

MCB 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

MCB 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Independent Study 3-36 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

MCB 390 – Methods of Teaching (1 unit)

Course Description: Practical experience in the methods and problems of teaching biochemistry/genetics/cell biology. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion and laboratory sections, formulating examinations under supervision of instructor. Participating in the teaching program required for Ph.D.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Molecular Biosciences (VMB)

School of Veterinary Medicine

VMB 092 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

VMB 101V – Principles of Pharmacology & Toxicology (3 units)

Course Description: Online course provides training in core concepts of pharmacological and toxicological sciences and prepares to develop higher-order problem solving and critical thinking skills. Designed for advanced undergraduate students with interests in pursuing graduate degrees in pharmacology, toxicology, physiological sciences, and for students with an interest in pursuing D.V.M., M.D., Pharmacy, Dentistry and Nursing professional degrees. Students who pursue careers in environmental sciences, public health management, and epidemiology may also benefit from the subject matter presented in this course.

Prerequisite(s): Consent of instructor; upper division standing in a science major; chemistry through organic chemistry, general biology, or consent of instructor; good standing with the university; computing capability (use MS Word®, Excel®, PowerPoint®, menu driven software programs, Course LMS); own a computer or have ready access to a computer with broadband Internet access; NPB 101 and BIS 104 recommended.

Learning Activities: Web Virtual Lecture 0.25 hour(s), Web Electronic Discussion 1.50 hour(s), Project 1.50 hour(s), Auto Tutorial 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL).

VMB 101Y – Principles of Pharmacology & Toxicology (3 units)

Course Description: Hybrid course provides training in core concepts of pharmacological and toxicological sciences. Develop higher-order problem solving and critical thinking skills.

Prerequisite(s): Upper division standing in a science major; chemistry through organic chemistry and general biology, or consent from instructor; good standing with university; computing capability using MS Word®, Excel®, PowerPoint®, menu driven software programs, SmartSite; computer, or ready access to a computer, with broadband Internet access.

Learning Activities: Discussion/Laboratory 1.50 hour(s), Web Virtual Lecture 1 hour(s), Web Electronic Discussion 0.50 hour(s), Auto Tutorial 5 hour(s).

Enrollment Restriction(s): Restricted to upper division undergraduate students in good standing with school and fulfill course prerequisites.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL).

VMB 192 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered by the Department of Molecular Biosciences. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

VMB 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

VMB 220 – Oxidative Stress & Free Radical Signaling (2 units)

Course Description: Nature of nitrogen and oxygen radicals, their role in health, disease, medicine, toxicology, pharmacology, and related disciplines. Free radicals, antioxidants, and biological pathways. Clinical cases of increased oxidative stress.

Prerequisite(s): Advanced undergraduates, graduates, and professional students with a solid background in biochemistry and physiology.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

VMB 234 – Current Topics in Neurotoxicology (3 units)

Course Description: General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases.

Prerequisite(s): Core courses in one of the following graduate programs: Pharmacology Toxicology (PTX), Agricultural Environmental Chemistry (AGC), Biochemistry Molecular Biology (BMB), Cell Developmental Biology (CDB), Immunology (IMM), Molecular Cellular Integrative Physiology (MCP) or Neuroscience (NSC).

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to upper level undergraduate students must obtain permission from the course coordinator.

Cross Listing: ETX 234, MCP 234.

Grade Mode: Letter.

VMB 253 – Metabolism of Toxicants & Drugs (2 units)

Course Description: Significance/chemical pathways of toxicants and drug metabolism, enzymology and molecular aspects of P450 and flavin monooxygenases, hydrolases and phase 2 transferases and experimental approaches for metabolism studies.

Prerequisite(s): PTX 201; PTX 202; PTX 203; general biochemistry or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

VMB 254 – Toxicology of the Respiratory System (3 units)

Course Description: Survey of structure and function of the respiratory system, the pathophysiology of major lung diseases, the interactions of toxicants with the lung and response of this organ to injury.

Prerequisite(s): PTX 201; PTX 202; PTX 203; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion.

Grade Mode: Letter.

VMB 255 – Pharmacokinetics & Biopharmaceuticals (2 units)

Course Description: In-depth study of pharmacokinetics, including the fundamentals of pharmacokinetics, how to design a pharmacokinetic study and how to use both compartmental and non-compartmental analysis to interpret the data.

Learning Activities: Lecture 16 hour(s), Discussion 4 hour(s).

Grade Mode: Letter.

VMB 290 – Seminar (1 unit)

Course Description: Topics in nutrition, pharmacology/toxicology, and biochemistry.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

VMB 297T – Tutoring in Graduate Molecular Biosciences (1-5 units)

Course Description: Assist in preparation and teaching of courses in Nutrition, Pharmacology and Toxicology, or other courses offered by the department under direct supervision of the instructor. Designed for graduate or professional students who desire teaching experience in graduate courses.

Prerequisite(s): Consent of instructor; graduate or professional student standing.

Learning Activities: Practice 1-5 hour(s).

Repeat Credit: May be repeated 5 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VMB 298 – Group Study (1-5 units)

Course Description: Description:

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

VMB 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Molecular, Cellular, & Integrative Physiology (MCP)

Graduate Studies

MCP 200L – Animal Cell Culture Laboratory (4 units)

Course Description: Techniques of cell culture, with emphases on cell physiology and the actions of drugs and toxicants on cultured somatic cells. Design, performance and interpretation of experiments with animal cells in vitro.

Prerequisite(s): Courses in undergraduate Biochemistry, Cell Biology, or General Physiology, or consent of instructor.

Learning Activities: Discussion 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

MCP 210A – Advanced Physiology (5 units)

Course Description: Advanced course on fundamental principles of cell physiology, transport physiology, signal transduction, physiology of excitable cells, and muscle physiology.

Prerequisite(s): Physiology Ph.D. program or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): MCP 210A (or HPH 210A) is a required core course for the Molecular, Cellular, & Integrative Physiology graduate group; course contains thermodynamics discussions and requires substantial math and physics background in order to succeed; approval for registering from Co-IRs is required to get CRN.

Cross Listing: HPH 210A.

Grade Mode: Letter.

MCP 210B – Advanced Physiology (6 units)

Course Description: Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology.

Prerequisite(s): Physiology Ph.D. program, or consent of instructor.

Learning Activities: Lecture 5 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MCP 210C – Advanced Physiology (5 units)

Course Description: Graduate level instruction in the general principles of physiology and the neural and humoral control of the cardiovascular, renal, respiratory, gastrointestinal, sensory, musculoskeletal, and reproductive systems.

Prerequisite(s): Doctoral student in the Molecular, Cellular, Integrative Physiology graduate group, or consent of instructor.

Learning Activities: Lecture 5 hour(s).

Grade Mode: Letter.

MCP 210L – Physiology Laboratory Rotations (5 units)

Course Description: One mandatory rotation and up-to two voluntary rotations. Students learn techniques and perform experiments related to particular research problems. At the end of the rotations students give a short talk and hand in a research paper.

Learning Activities: Laboratory 15 hour(s).

Enrollment Restriction(s): Restricted to Molecular, Cellular, & Integrative Physiology graduate students.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

MCP 211B – Animal Models in Physiology Research (2 units)

Course Description: Use of animal models in research, types of models available, selection criteria and limitations, alternative approaches. Principles of basic and systemic physiology. Student presentations promote critical independent thinking, public speaking skills, conception of a scientific hypothesis, and scientific rigor in developed experimental plans.

Prerequisite(s): MCP 210A; MCP 210B (can be concurrent).

Learning Activities: Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

MCP 215 – Electrophysiology Techniques & Applications (3 units)

Course Description: Broad scope of topics in electrophysiology techniques and applications.

Learning Activities: Lecture 1.50 hour(s), Discussion 1.50 hour(s).

Cross Listing: PTX 215.

Grade Mode: Satisfactory/Unsatisfactory only.

MCP 216 – Neurophysiology Literature (3 units)

Course Description: Lectures covering experimental and theoretical methods in studying cell membrane ion channels and the resulting characterization of the physiological functions and structure/function relationships of some of the most important channel types. Discussion of classical and current original papers.

Learning Activities: Lecture 1 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

MCP 219 – Muscle Growth & Development (3 units)

Course Description: Integration of growth and development of skeletal muscle; morphology, biochemistry, neural control mechanisms, circulatory and nutritional factors. Prenatal and neonatal differentiation of fiber types. Experimental and hereditary myopathies.

Prerequisite(s): BIS 103; (BIS 104 or MCB 150); or consent of instructor.

Learning Activities: Lecture 2 hour(s), Seminar 1 hour(s).

Grade Mode: Letter.

MCP 220 – General & Comparative Physiology of Reproduction (3 units)

Course Description: Basic phenomena of sexual and asexual reproduction and comparisons of processes in a wide variety of animals; gamete formation, structure, and metabolism; fertilization; neuroendocrine mechanisms in maturation and reproductive cycles; behavioral aspects.

Prerequisite(s): BIS 101; BIS 103; NPB 110; NPB 110L.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MCP 222 – Mammalian Gametogenesis & Fertilization (3 units)

Course Description: Emphasizes our current understanding of events in mammalian gametogenesis and the fertilization process. Published results, conclusions drawn from these results, and their contribution to our understanding are discussed.

Prerequisite(s): NPB 121; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MCP 230 – Advanced Endocrinology (2 units)

Course Description: Focus on timely topic of endocrine research. Critical review of current literature and discussion of future research strategies in the area.

Prerequisite(s): NPB 130; or the equivalent, and graduate standing.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

MCP 231 – Neuroendocrinology (3 units)

Course Description: Neural-endocrine interactions; neural regulation of the endocrine system, especially in relation to reproduction; the role of hormones and growth factors in sexual differentiation of the brain.

Prerequisite(s): NPB 130; or the equivalent course in endocrinology; NPB 110 or the equivalent course in systemic physiology.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

MCP 234 – Current Topics in Neurotoxicology (3 units)

Course Description: General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases.

Prerequisite(s): Core courses in one of the following graduate programs: Pharmacology Toxicology (PTX), Agricultural Environmental Chemistry (AGC), Biochemistry Molecular Biology (BMB), Cell Developmental Biology (CDB), Immunology (IMM), Molecular Cellular Integrative Physiology (MCP) or Neuroscience (NSC).

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to upper level undergraduate students must obtain permission from the course coordinator.

Cross Listing: ETX 234, VMB 234.

Grade Mode: Letter.

MCP 242 – Biological Rhythms (3 units)

Course Description: General aspects and basic mechanisms of biological rhythms; the importance of rhythm desynchronization in areas of pharmacology and space medicine; telemetry; mathematical methods; chronometry; daily, reproductive, and annual periods; shift-work, jet lag and sleep disorders.

Prerequisite(s): NPB 110 or the equivalent.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

MCP 255 – Physiology of the Stress Response (2 units)

Course Description: Definition of Stress; Physiological mechanisms of adaptation to stress; Hormonal control of the systemic stress response; Mechanisms of the cellular stress response; Discussion of current trends in stress physiology and current methods for studying the stress response.

Prerequisite(s): Graduate Student Status.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: ABG 255.

Grade Mode: Letter.

MCP 261A – Topics in Vision: Eyes & Retinal Mechanisms (2 units)

Course Description: Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing.

Prerequisite(s): NPB 100 or NPB 112; or the equivalent; graduate standing.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NSC 261A, NPB 261A.

Grade Mode: Satisfactory/Unsatisfactory only.

MCP 261B – Topics in Vision: Systems, Psychophysics, Computational Models (2 units)

Course Description: Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system.

Prerequisite(s): Consent of instructor; MCP 261A recommended.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NSC 261B, NPB 261B.

Grade Mode: Satisfactory/Unsatisfactory only.

MCP 261C – Topics in Vision: Clinical Vision Science (2 units)

Course Description: Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease.

Prerequisite(s): MCP 261A; MCP 261B; or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NSC 261C, NPB 261C.

Grade Mode: Satisfactory/Unsatisfactory only.

MCP 275 – Neurohumoral Regulatory Mechanisms of Thermogenesis (3 units)

Course Description: Designed for graduate and advanced undergraduate students, examines thermogenic systems in homeotherms (primarily mammals) with respect to regulation (hormonal and central nervous control) and effector mechanisms (basis of heat generation at the target cell).

Prerequisite(s): BIS 104; BIS 102; or equivalent courses, and consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

MCP 290 – Seminar (1 unit)

Course Description: Discussion and critical evaluation of advanced topics and current trends in research.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Pass/No Pass only.

MCP 290C – Research Conference in Physiology (1 unit)

Course Description: Presentation and discussion of faculty and graduate student research in physiology.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MCP 291B – Seminar in Cellular Mechanisms of Adaptation (1 unit)

Course Description: Review and evaluation of current literature and research in cellular adaptations to the environment.

Prerequisite(s): BIS 103; NPB 100B; consent of instructor.

Learning Activities: Discussion 0.50 hour(s), Seminar 0.50 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

MCP 291D – Research Approaches in Physiology (2 units)

Course Description: Current research in physiology. Overall design of experiments and particular research areas.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Pass/No Pass only.

MCP 293 – Current Progress in Physiology (1 unit)

Course Description: Seminars presented by guest lecturers describing their current research activities.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

MCP 298 – Group Study (1-5 units)*Course Description:* Group study.*Learning Activities:* Variable.*Grade Mode:* Letter.**MCP 299 – Research (1-12 units)***Course Description:* Research.*Learning Activities:* Variable.*Grade Mode:* Satisfactory/Unsatisfactory only.**MCP 300A – Pedagogical Aspects of Physiology in Higher Education (3 units)***Course Description:* Participation as a teaching assistant for one quarter in a designated physiology course. Instruction in methods of leading discussion groups, leading laboratory sections, writing and grading quizzes, operation and use of laboratory equipment, and reading and grading laboratory reports. Meets teaching requirements for Ph.D. program in Physiology.*Prerequisite(s):* Meet qualifications for teaching assistant in physiology.*Learning Activities:* Lecture, Discussion, Laboratory.*Grade Mode:* Pass/No Pass only.**MCP 300B – Pedagogical Aspects of Physiology in Higher Education (3 units)***Course Description:* Participation as a teaching assistant for one quarter in a designated physiology course. Instruction in methods of leading discussion groups, leading laboratory sections, writing and grading quizzes, operation and use of laboratory equipment, and reading and grading laboratory reports. Meets teaching requirements for Ph.D. program in Physiology.*Prerequisite(s):* Meet qualifications for teaching assistant in physiology.*Learning Activities:* Lecture, Discussion, Laboratory.*Grade Mode:* Pass/No Pass only.**MCP 390 – The Teaching of Physiology (1 unit)***Course Description:* Practical experience in methods and problems of teaching physiology lecture courses. May include analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion sessions, and formulation of topics and questions for examinations under supervision of instructor.*Prerequisite(s):* Consent of instructor; Teaching Assistant assignment to a physiology lecture course.*Learning Activities:* Discussion 1 hour(s).*Repeat Credit:* May be repeated.*Grade Mode:* Pass/No Pass only.

Music (MUS)

College of Letters & Science**MUS 002A – Keyboard Competence, Part 1 (2 units)***Course Description:* Training to meet the minimum piano requirements for the major in music. Scales and simple harmonic progressions in twelve keys, both major and minor.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Performance Instruction 2 hour(s).*Grade Mode:* Pass/No Pass only.*General Education:* Arts & Humanities (AH).**MUS 002B – Keyboard Competence, Part 2 (2 units)***Course Description:* Training to meet the minimum piano requirements for the major in music. Harmonic progressions, modulations and score reading at the piano.*Prerequisite(s):* MUS 002A; consent of instructor; completion of MUS 002A or demonstration of required keyboard proficiency level on diagnostic exam.*Learning Activities:* Performance Instruction 2 hour(s).*Grade Mode:* Pass/No Pass only.*General Education:* Arts & Humanities (AH).**MUS 002C – Keyboard Competence, Part 3 (2 units)***Course Description:* Training to meet the minimum piano requirements for the major in music. Harmonic progressions, figured bass realization, sight reading and keyboard repertory.*Prerequisite(s):* MUS 002B; consent of instructor; completion of MUS 002B or demonstration of required keyboard proficiency level on diagnostic exam.*Learning Activities:* Performance Instruction 2 hour(s).*Grade Mode:* Pass/No Pass only.*General Education:* Arts & Humanities (AH).**MUS 003A – Introduction to Music Theory, Part 1 (4 units)***Course Description:* Fundamentals of music theory, ear-training, harmony, counterpoint, and analysis directed toward the development of listening and writing techniques. Intended for the general student.*Learning Activities:* Lecture 2 hour(s), Discussion 2 hour(s).*Grade Mode:* Letter.*General Education:* Arts & Humanities (AH).**MUS 003B – Introduction to Music Theory, Part 2 (4 units)***Course Description:* Continuation of MUS 003A. Development of melodic and harmonic writing skills. Basic analysis training. Intended for the general student.*Prerequisite(s):* MUS 003A; or consent of instructor.*Learning Activities:* Lecture 1 hour(s), Recitation 3 hour(s).*Grade Mode:* Letter.*General Education:* Arts & Humanities (AH).**MUS 006A – Elementary Theory, Part 1 (3 units)***Course Description:* Development of music writing and listening skills through the study of music fundamentals, species counterpoint, harmony, analysis of repertory. Intended primarily for music majors.*Learning Activities:* Lecture 3 hour(s).*Grade Mode:* Letter.*General Education:* Arts & Humanities (AH).**MUS 006B – Elementary Theory, Part 2 (3 units)***Course Description:* Continuation of MUS 006A.*Prerequisite(s):* MUS 016B (can be concurrent); required concurrently; completion of MUS 006A or demonstration of required proficiency level on diagnostic exam.*Learning Activities:* Lecture 3 hour(s).*Grade Mode:* Letter.*General Education:* Arts & Humanities (AH).

MUS 007A – Intermediate Theory, Part 1 (3 units)

Course Description: Homophonic music of the Classical era with a focus on analysis of music by Haydn, Mozart, and Beethoven. Composition of pieces in the homophonic forms such as minuet and trio, theme and variations, rondo and sonata. Intended for music majors.

Prerequisite(s): (MUS 006B; MUS 017A (can be concurrent)); or consent of instructor; students can place into MUS 007A based on the results of a diagnostic test given at the beginning of fall term.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 007B – Intermediate Theory, Part 2 (3 units)

Course Description: Harmony and voice of the 19th century leading through the music of the Romantic era. Focus on analysis of music by Chopin, Schumann, Brahms, Wagner, and Wolf. Composition of character pieces and songs. Intended for Music majors.

Prerequisite(s): MUS 007A; MUS 017B (can be concurrent).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 007C – Intermediate Theory, Part 3 (3 units)

Course Description: Music of the first thirty years of the 20th century and various analytical tools pertaining to it. Works of Debussy, Stravinsky, Schoenberg, Berg, and others. Composition of small pieces for solo instruments, voice and piano. Intended for music majors.

Prerequisite(s): MUS 007B; MUS 017C (can be concurrent).

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 010 – Introduction to Musical Literature (4 units)

Course Description: Introduction to composers and major styles of Western music. Lectures, listening sections, and selected readings. For non-majors.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

MUS 011 – Musics of the World (4 units)

Course Description: Survey of selected art, folk, and popular music cultures from different parts of the world. Emphasis on understanding relationship of musical style, aesthetic principles, and performance practice to wider cultural contexts.

Learning Activities: Lecture 3 hour(s), Listening 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

MUS 013 – Introduction to Musicianship, Part 1 (2 units)

Course Description: Melodic and rhythmic materials of Western music. Includes drills, explanations, sight singing, and listening analysis.

Prerequisite(s): Placement test at start of fall quarter; for more details, see Music Department website.

Learning Activities: Lecture/Lab 2 hour(s).

Credit Limitation(s): No credit to students who have previously completed MUS 016A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 016A – Elementary Musicianship, Part 1 (2 units)

Course Description: Melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis.

Prerequisite(s): MUS 006A (can be concurrent).

Learning Activities: Lecture/Lab 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 016B – Elementary Musicianship, Part 2 (2 units)

Course Description: Melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis.

Prerequisite(s): MUS 016A; MUS 006B (can be concurrent); completion of MUS 016A or demonstration of required proficiency level on diagnostic exam.

Learning Activities: Lecture/Lab 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 017A – Intermediate Musicianship, Part 1 (2 units)

Course Description: Melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis.

Prerequisite(s): MUS 007A (can be concurrent); or demonstrate required proficiency level on diagnostic exam.

Learning Activities: Lecture/Lab 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 017B – Intermediate Musicianship, Part 2 (2 units)

Course Description: Melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis.

Prerequisite(s): MUS 017A; (MUS 007B (can be concurrent); MUS 007B required concurrently). Completion of MUS 017A or demonstration of required proficiency level on diagnostic exam.

Learning Activities: Lecture/Lab 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 017C – Intermediate Musicianship, Part 3 (2 units)

Course Description: The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis.

Prerequisite(s): MUS 017B; completion of MUS 017B or demonstration of required proficiency level on diagnostic exam; MUS 007C required concurrently.

Learning Activities: Lecture/Lab 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 024A – History of Western Music: Baroque & Classic Eras (4 units)

Course Description: History of western music in the baroque and classic eras, roughly 1600-1800. Intended primarily for majors in music.

Prerequisite(s): MUS 006A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Listening.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

MUS 024B – History of Western Music: Romantic Era (4 units)

Course Description: History of music from the romantic period, roughly 1800-1900. Intended primarily for music majors.

Prerequisite(s): MUS 024A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Listening.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

MUS 028 – Introduction to African American Music (4 units)

Course Description: Survey of African American music, such as spirituals, blues, ragtime, jazz, theater, gospel, R&B, rap, and art music. Emphasis on historical and sociocultural contexts, as well as African roots.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion 1 hour(s), Listening, Project.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); Writing Experience (WE).

MUS 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 101A – Advanced Theory, Part 1 (4 units)

Course Description: Music of the 20th century from 1930 through 1950 and the various analytical tools pertaining to it. Works of Copland, Sessions, Schoenberg, Bartók, and Stravinsky. Composition of small pieces for piano and voice.

Prerequisite(s): MUS 007C.

Learning Activities: Lecture 3 hour(s), Lecture/Lab 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 101B – Advanced Theory, Part 2 (4 units)

Course Description: Music from 1950 to the present and the analytical tools pertaining to it. Works of Babbit, Carter, Dallapiccola, Ligeti, Messiaen, Reich and others. Composition of small pieces for ensemble.

Prerequisite(s): MUS 101A.

Learning Activities: Lecture 3 hour(s), Lecture/Lab 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 102 – Tonal Counterpoint (4 units)

Course Description: Imitative tonal counterpoint with an analytical focus on the Two-Part Inventions and fugues from The Well-Tempered Klavier by J. S. Bach. Composition of exercises and short pieces using contrapuntal techniques. Intended for music majors.

Prerequisite(s): MUS 006B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Practice 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 103 – Workshop in Composition (3 units)

Course Description: Workshop in musical composition for undergraduates who are interested in pursuing serious compositional studies and intending to follow the composition track of the major. Explores the techniques and materials of musical composition.

Prerequisite(s): MUS 006B; or consent of instructor.

Learning Activities: Workshop 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 105 – History & Analysis of Jazz (4 units)

Course Description: Jazz and the evolution of jazz styles in historical and cultural context. For non-majors.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

MUS 106 – History of Rock Music (4 units)

Course Description: Rock and the evolution of rock styles in historical and cultural context. For non-majors.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Visual Literacy (VL); Writing Experience (WE).

MUS 107A – Introduction to Electronic Music (4 units)

Course Description: Basics of electronic music history, techniques, and composition. Fixed media creation using field recordings. Focus on history, theory and techniques of musique concrète, elektronische musik, and related repertoire.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Limited enrollment. Pass One restricted to Music and Cinema and Digital Media undergraduate students.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 107B – Handmade Electronic Music (4 units)

Course Description: Hacking, bending, and creating electronic circuits to make sound. Learning to read circuit diagrams, to build prototypes, and to solder components together. Repertoire study.

Prerequisite(s): MUS 107A; consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 107C – Computer Music (4 units)

Course Description: Making electronic music in an open source programming environment. Intermediate synthesis, physical controllers, and algorithmic music. Overview of history, aesthetics, and techniques of digital sonic art. Three composition projects.

Prerequisite(s): MUS 107A.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 108A – Orchestration (2 units)

Course Description: Techniques of orchestration from study of basic instrumental techniques to analysis of orchestral scores and scoring for various instrumental combinations.

Prerequisite(s): MUS 006B; or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

MUS 108B – Orchestration (2 units)

Course Description: Techniques of orchestration from study of basic instrumental techniques to analysis of orchestral scores and scoring for various instrumental combinations.

Prerequisite(s): MUS 108A; or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL).

MUS 110A – The Musical World of Beethoven (4 units)

Course Description: Work of Beethoven will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

MUS 110B – The Musical World of a 20th-Century Composer (4 units)

Course Description: Overview of concert music by a significant twentieth-century composer outside the United States (for example: Igor Stravinsky, Claude Debussy, Gustav Mahler, Arnold Schoenberg, Bela Bartok, Dmitri Shostakovich, Benjamin Britten, Olivier Messiaen, Osvaldo Golijov, Tan Dun, Kaija Saariaho). Lectures, discussion/guided listening sections, and selected readings. For non-majors.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

MUS 110C – The Musical World of J. S. Bach (4 units)

Course Description: Work of J. S. Bach will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

MUS 110D – The Musical World of Mozart (4 units)

Course Description: Work of Mozart will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

MUS 110E – The Musical World of an 18th-Century Composer (4 units)

Course Description: Overview of concert music by a significant European eighteenth-century composer other than Mozart, Beethoven, or J. S. Bach (for example: Franz Joseph Haydn, George Frideric Handel, Antonio Vivaldi). Lectures, discussion/guided listening sections, and selected readings. For non-majors.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

MUS 110F – The Musical World of an American Composer (4 units)

Course Description: Overview of American concert music by a significant American composer (for example: Aaron Copland, George Gershwin, Ruth Crawford, Charles Ives, Duke Ellington, Leonard Bernstein, John Cage, John Adams). Lectures, discussion/guided listening sections, and selected readings. For non-majors.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

MUS 112A – Jazz Fundamentals (2 units)

Course Description: Fundamentals of Jazz music theory, ear training, harmony and composition techniques. Designed to complement participation in Jazz Combo or Jazz Band. First of a three-course sequence.

Prerequisite(s): MUS 003A C- or better; or consent of instructor.

Learning Activities: Lecture/Lab 2 hour(s).

Enrollment Restriction(s): Concurrent enrollment with MUS 140 or MUS 146 required.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 112B – Jazz Theory (2 units)

Course Description: Intermediate level Jazz music theory, ear training, harmony, and composition techniques including improvisation. Designed to complement participation in Jazz Combo or Jazz Band. Second of a three-course sequence.

Prerequisite(s): MUS 112A C- or better; consent of instructor.

Learning Activities: Lecture/Lab 2 hour(s).

Enrollment Restriction(s): Concurrent enrollment in MUS 140 or MUS 146 required.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 112C – Jazz Composition (2 units)

Course Description: Jazz compositions and arranging in different styles using techniques of Jazz theory, harmony and improvisation. Third of a three-course sequence.

Prerequisite(s): MUS 112B C- or better; consent of instructor.

Learning Activities: Lecture/Lab 2 hour(s).

Enrollment Restriction(s): Concurrent enrollment in MUS 140 required.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 113 – Introduction to Conducting (2 units)

Course Description: Principles and techniques of conducting as they apply to both choral and instrumental ensembles.

Prerequisite(s): MUS 006B; or consent of instructor.

Learning Activities: Lecture 1 hour(s), Performance Instruction 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 114 – Intermediate Conducting (2 units)

Course Description: Intermediate conducting with a continued focus on principles and techniques as they apply to both choral and instrumental ensembles.

Prerequisite(s): MUS 113; or consent of instructor.

Learning Activities: Lecture 1 hour(s), Performance Instruction 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 115 – History of Film Music (4 units)

Course Description: Film music from silent films to movies of the past decade. How music supports and shapes film narrative and structure. Use of jazz, rock and classical music in film.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

MUS 116 – Introduction to the Music of The Beatles (4 units)

Course Description: Survey of music of The Beatles, focusing on the songs of Lennon and McCartney. Emphasis on understanding their evolution as musicians, composers and cultural figures. Discussion of their musical influences in wider cultural contexts.

Learning Activities: Lecture 3 hour(s), Listening 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

MUS 117 – The Broadway Musical (4 units)

Course Description: Exploration of a variety of Broadway and film musicals from different time periods, and how musicals reflect and help create social reality, and the different aspects of the creative process as manifested through music, dance, scenery, and acting.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL).

MUS 118 – Music & Nature (4 units)

Course Description: Changing conceptions of music and nature from the 18th to 21st centuries. Relationships between musicians and global environments. Interactions between natural and musical sound. Ecology of instrument making. Representation of nature in classical and popular music. Artistic integration of human and animal song. New music related to climate change.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

MUS 121 – Topics in Music Scholarship (4 units)

Course Description: Sources and problems of a historical period or musical style selected by the instructor and announced in advance.

Prerequisite(s): MUS 006B; MUS 024B; or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL).

MUS 122 – Topics in Analysis & Theory (4 units)

Course Description: Analysis of works of a composer or musical style selected by the instructor and announced in advance. Consideration of theoretical issues.

Prerequisite(s): MUS 006B; MUS 024B; or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL).

MUS 123 – Music as Culture (4 units)

Course Description: Introduction to the study of music in cross-cultural perspective. Basic theories and frameworks of ethnomusicology; in-depth case studies of three musical traditions from around the world. Intended for music majors.

Prerequisite(s): MUS 024B; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Listening.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

MUS 124C – History of Western Music: 20th Century to the Present (4 units)

Course Description: History of Western Music from 1900 to the present. Intended primarily for music majors.

Prerequisite(s): MUS 024B; or consent of instructor.

Learning Activities: Lecture 3 hour(s); Listening.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

MUS 124D – History of Western Music: Middle Ages & Renaissance (4 units)

Course Description: History of Western Music in the Middle Ages and Renaissance, roughly 800-1600. Intended primarily for music majors.

Learning Activities: Lecture 3 hour(s); Listening.

Prerequisite(s): MUS 024C or MUS 124C; or consent of instructor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

MUS 126 – American Music (4 units)

Course Description: Introductory survey of American musics, including Native American music, Hispanic polyphony, New England psalmody, and selected 20th-century composers and styles.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Listening 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

MUS 127 – Music from Latin America (4 units)

Course Description: Examination of music from Latin America.

Characteristic music (i.e., tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres.

Taught in English or Spanish depending on instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken SPA 171S or MUS 127S.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Cross Listing: SPA 171.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

MUS 127S – Music from Latin America (4 units)

Course Description: Examination of music from Latin America.

Characteristic music (i.e. tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres.

Taught abroad in Spanish or English depending on instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken SPA 171 or MUS 127.

Repeat Credit: May be repeated 1 time(s) when content differs.

Cross Listing: SPA 171S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

MUS 129A – Musics of the Americas (4 units)

Course Description: Survey of music cultures from North, Central, and South America, including the Caribbean, with emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

MUS 129B – Musics of Africa, Middle East, Indian Subcontinent (4 units)

Course Description: Survey of music cultures with special emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

MUS 129C – Musics of East & Southeast Asia (4 units)

Course Description: Survey of music cultures from Japan, China, Korea, Vietnam, and Indonesia, with special emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

MUS 129D – Folk Musics of Europe (4 units)

Course Description: Survey of folk musics from all of Europe, with emphasis on the role of music in society and on the elements of music (instruments, genres, form, etc.). Introduction to ethnomusicological theory, methods, approaches.

Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

MUS 130A – Applied Study of Music: Advanced; Voice (1 unit)

Course Description: Class instruction, arranged by section; Voice. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130B – Applied Study of Music: Advanced; Piano (1 unit)

Course Description: Class instruction, arranged by section; Piano. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130C – Applied Study of Music: Advanced; Harpsichord (1 unit)

Course Description: Class instruction, arranged by section; Harpsichord. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130D – Applied Study of Music: Advanced; Organ (1 unit)

Course Description: Class instruction, arranged by section; Organ. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130E – Applied Study of Music: Advanced; Violin (1 unit)

Course Description: Class instruction, arranged by section; Violin. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130F – Applied Study of Music: Advanced; Viola (1 unit)

Course Description: Class instruction, arranged by section; Viola. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130G – Applied Study of Music: Advanced; Cello (1 unit)

Course Description: Class instruction, arranged by section; Cello. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130H – Applied Study of Music: Advanced; Double Bass (1 unit)

Course Description: Class instruction, arranged by section; Double Bass. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130I – Applied Study of Music: Advanced; Flute (1 unit)

Course Description: Class instruction, arranged by section; Flute. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130J – Applied Study of Music: Advanced; Oboe (1 unit)

Course Description: Class instruction, arranged by section; Oboe. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130K – Applied Study of Music: Advanced; Clarinet (1 unit)

Course Description: Class instruction, arranged by section; Clarinet.

Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130L – Applied Study of Music: Advanced; Bassoon (1 unit)

Course Description: Class instruction, arranged by section; Bassoon.

Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130M – Applied Study of Music: Advanced; French Horn (1 unit)

Course Description: Class instruction, arranged by section; French Horn.

Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130N – Applied Study of Music: Advanced; Trumpet (1 unit)

Course Description: Class instruction, arranged by section; Trumpet.

Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130O – Applied Study of Music: Advanced; Trombone (1 unit)

Course Description: Class instruction, arranged by section; Trombone.

Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130P – Applied Study of Music: Advanced; Tuba (1 unit)

Course Description: Class instruction, arranged by section; Tuba. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130Q – Applied Study of Music: Advanced; Percussion (1 unit)

Course Description: Class instruction, arranged by section; Percussion.

Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 130R – Applied Study of Music: Advanced; Classical Guitar (1 unit)

Course Description: Class instruction, arranged by section. Offered as demand indicates.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131A – Applied Study of Music: Advanced (Individual) (2 units)

Course Description: Individual instruction in voice.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131B – Applied Study of Music: Advanced (Individual); Piano (2 units)

Course Description: Individual instruction in Piano.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131C – Applied Study of Music: Advanced (Individual); Harpsichord (2 units)

Course Description: Individual instruction in Harpsichord.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131D – Applied Study of Music: Advanced (Individual); Organ (2 units)

Course Description: Individual instruction in Organ.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131E – Applied Study of Music: Advanced (Individual); Violin (2 units)

Course Description: Individual instruction in Violin.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131F – Applied Study of Music: Advanced (Individual); Viola (2 units)

Course Description: Individual instruction in Viola.

Prerequisite(s): Consent of instructor; open to Music majors only; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131G – Applied Study of Music: Advanced (Individual); Cello (2 units)

Course Description: Individual instruction in Cello.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131H – Applied Study of Music: Advanced (Individual); Double Bass (2 units)

Course Description: Individual instruction in Double Bass.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131I – Applied Study of Music: Advanced (Individual); Flute (2 units)

Course Description: Individual instruction in Flute.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131J – Applied Study of Music: Advanced (Individual); Oboe (2 units)

Course Description: Individual instruction in Oboe.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131K – Applied Study of Music: Advanced (Individual); Clarinet (2 units)

Course Description: Individual instruction in Clarinet.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131L – Applied Study of Music: Advanced (Individual); Bassoon (2 units)

Course Description: Individual instruction in Bassoon.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131M – Applied Study of Music: Advanced (Individual); French Horn (2 units)

Course Description: Individual instruction in French Horn.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131N – Applied Study of Music: Advanced (Individual); Trumpet (2 units)

Course Description: Individual instruction in Trumpet.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131O – Applied Study of Music: Advanced (Individual); Trombone (2 units)

Course Description: Individual instruction in Trombone.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131P – Applied Study of Music: Advanced (Individual); Tuba (2 units)

Course Description: Individual instruction in Tuba.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131Q – Applied Study of Music: Advanced (Individual); Percussion (2 units)

Course Description: Individual instruction in Percussion.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131R – Applied Study of Music: Advanced (Individual); Classical Guitar (2 units)

Course Description: Individual instruction in Classical Guitar.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131U – Applied Study of Music: Advanced (Individual); Saxophone (2 units)

Course Description: Individual instruction in Saxophone.

Prerequisite(s): Consent of instructor.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Enrollment Restriction(s): Open to Music majors only; admission by audition.

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 131W – Applied Study of Music: Advanced (Individual); Harp (2 units)

Course Description: Individual instruction in Harp.

Prerequisite(s): Consent of instructor; admitted by audition.

Learning Activities: Performance Instruction 0.50 hour(s), Independent Study 5 hour(s).

Enrollment Restriction(s): Priority to Music majors.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 132 – Singing for Actors (1 unit)

Course Description: Elements of basic singing techniques, through selected exercises, vocalises, and songs.

Prerequisite(s): Consent of instructor.

Learning Activities: Performance Instruction 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 140 – University Jazz Band (2 units)

Course Description: Rehearsal, study, and performance of jazz band music and a full variety of jazz band styles, including swing, be-bop, and contemporary jazz styles.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Rehearsal 4 hour(s), Practice.

Enrollment Restriction(s): Open to students in any major.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 141 – University Symphony (2 units)

Course Description: Open to any student in the University whose proficiency meets the requirements of concert performance. Sight-reading, rehearsal and performance of music from the orchestral literature.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Rehearsal 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 142 – University Chamber Singers (2 units)

Course Description: Rehearsal and performance of works for small choral group.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Rehearsal 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 143 – University Concert Band (2 units)

Course Description: Rehearsal and performance of music for band.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Rehearsal 4 hour(s).

Enrollment Restriction(s): Open to any student in the University whose proficiency meets the requirements of concert performance.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 144 – University Chorus (2 units)

Course Description: Rehearsal and performance of choral music.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Rehearsal 4 hour(s).

Enrollment Restriction(s): Open to any student in the University.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 145 – Early Music Ensemble (2 units)

Course Description: Rehearsal and performance of Medieval, Renaissance, and Baroque music for vocal ensemble and historical instruments.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Rehearsal 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 146 – Chamber Music Ensemble (1 unit)

Course Description: Open to any student in the University whose proficiency meets the requirements of concert performance. Study, rehearsal, and performance of ensemble music for strings, winds, voice, piano, harpsichord, and organ.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Rehearsal 2 hour(s), Practice 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 147 – University Wind Ensemble (2 units)

Course Description: Rehearsal, study, and performance of a full variety of wind ensemble music; and to have students share their work in public performances.

Prerequisite(s): Consent of instructor.

Learning Activities: Rehearsal 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 148 – Hindustani Vocal Ensemble (2 units)

Course Description: Basics of Hindustani music through theory and practice. Fundamentals of raga (mode) and tala (rhythms) with special emphasis on improvisation, a central feature of khyl (singing style). Five ragas each quarter.

Prerequisite(s): Consent of instructor.

Learning Activities: Rehearsal 2 hour(s).

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 149 – Indonesian Gamelan Ensemble (2 units)

Course Description: Indonesian music practice. Basic instrumental technique and repertory. Focus on two styles of Sundanese gamelan (tuned percussion orchestras): salendro and degung.

Prerequisite(s): Consent of instructor.

Learning Activities: Rehearsal 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 150 – Brazilian Samba School (2 units)

Course Description: Practice of Brazilian music. Basic instrumental technique and repertory. Focus on the percussion traditions of Rio de Janeiro and Bahia.

Prerequisite(s): Consent of instructor.

Learning Activities: Performance Instruction 2 hour(s).

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 151 – Korean Percussion Ensemble (2 units)

Course Description: Practice of Korean percussion styles. Basic instrumental technique and repertory. Focus on the percussion traditions of samulnori and basic concepts of p'ungmul.

Prerequisite(s): Consent of instructor.

Learning Activities: Rehearsal 2 hour(s), Listening 2 hour(s), Practice 2 hour(s).

Enrollment Restriction(s): Limited to 20 students.

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 152 – Afro-Cuban Ensemble (2 units)

Course Description: Performance of African derived folkloric music of Cuba. Basic instrumental technique and repertory. Focus on percussion and song traditions from Havana, Matacas and Santiago, Cuba.

Prerequisite(s): Consent of instructor.

Learning Activities: Performance Instruction 2 hour(s).

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 153 – Brazilian Capoeira Ensemble (2 units)

Course Description: Basic instrumental techniques, songs, and dance movements of Capoeira Angola. Protocols of a Capoeira Angola performance and the meanings of Capoeira in Brazil with its connections to Afro-Brazilian culture.

Prerequisite(s): Consent of instructor.

Learning Activities: Rehearsal 4 hour(s), Listening, Practice.

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 155 – Percussion Ensemble (2 units)

Course Description: Study and rehearsal of percussion chamber music from the 20th and 21st centuries. Study of standard and extended techniques for a broad range of percussion instruments. Public performance of significant works for percussion ensemble.

Prerequisite(s): Consent of instructor; admission by audition.

Learning Activities: Rehearsal 2 hour(s), Listening, Practice.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 156 – Mariachi Ensemble (2 units)

Course Description: Rehearsal and performance of traditional and contemporary mariachi repertoire.

Prerequisite(s): Consent of instructor.

Learning Activities: Rehearsal 4 hour(s); Practice.

Repeat Credit: May be repeated for credit.

Grade Mode: P/NP only.

General Education: Arts & Humanities (AH).

MUS 157 – Bluegrass & Old Time String Band (2 units)

Course Description: Performance of bluegrass and Appalachian old time music. Practice of instrumental and vocal techniques and repertory in vernacular American string band idioms.

Learning Activities: Rehearsal 4 hour(s), Practice.

Repeat Credit: May be repeated for credit.

Grade Mode: P/NP only.

General Education: Arts & Humanities (AH).

MUS 192 – Internship in Music (1-4 units)

Course Description: Internship outside the university related to music.

Prerequisite(s): Consent of instructor or academic advisor.

Learning Activities: Internship 3-12 hour(s).

Enrollment Restriction(s): Student must submit a written proposal to an appropriate Music Department instructor.

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 194HA – Special Study for Honors Students (2-4 units)

Course Description: Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of music.

Prerequisite(s): MUS 007C; MUS 123; consent of instructor.

Learning Activities: Independent Study 6-12 hour(s).

Enrollment Restriction(s): Open only to students who qualify for the honors program and admission to music Senior Honors Program.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 194HB – Special Study for Honors Students (2-4 units)

Course Description: Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of music.

Prerequisite(s): MUS 194HA; consent of instructor.

Learning Activities: Independent Study 6-12 hour(s).

Enrollment Restriction(s): Open only to students who qualify for honors program and admission to Music Senior Honors Program.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 195 – Senior Project (2 units)

Course Description: Preparation of a senior project in music composition (public presentation of a new work), in music performance (a public recital), or in music history and theory (public presentation of research results).

Prerequisite(s): MUS 007C; MUS 123; consent of instructor.

Learning Activities: Project 6 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

MUS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

MUS 202 – Notation (4 units)

Course Description: Study of musical notation; investigation of techniques for editing Medieval and Renaissance music.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate students in Music; advanced undergraduates with consent of instructor.

Grade Mode: Letter.

MUS 203 – Music Composition (4 units)

Course Description: Technical projects that explore compositional problems, the skill and techniques with which to solve them, and free composition.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate students in Music; advanced undergraduates with consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 204 – Advanced Conducting (3 units)

Course Description: Technical aspects of conducting and the broader issues in music history and analysis that conductors must face before leading a rehearsal or performance.

Prerequisite(s): Consent of instructor.

Learning Activities: Tutorial 2 hour(s), Practice.

Enrollment Restriction(s): Open to graduate students in conducting.

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 207 – Advanced Electronic & Computer Music (4 units)

Course Description: Advanced composition of computer and electronic music.

Prerequisite(s): MUS 107A; MUS 107B; MUS 107C; consent of instructor.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

MUS 210A – Proseminar in Music: Theory & Analysis (4 units)

Course Description: Voice-leading analysis of tonal music derived from Schenker and pitchclass set theory. Recent work on compositional design, generalizations of the concept of interval, psychologically oriented music theory, and theories of durational structure and timbre.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate students in Music; advanced undergraduates with consent of instructor.

Grade Mode: Letter.

MUS 210B – Proseminar in Music: Musicology & Criticism (4 units)

Course Description: Issues and concepts of music history, including performance practice questions for specific repertoires and periods; principles, aims, and methods of archival study; historical theory; evolution of musical styles; philosophical debates about goals and aims of the discipline in general.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate students in Music; advanced undergraduates with consent of instructor.

Grade Mode: Letter.

MUS 210C – Proseminar in Music: Ethnomusicology (4 units)

Course Description: Introduction to ethnomusicology through its intellectual history, theoretical approaches, analytical techniques, and methodologies.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate students in Music; advanced undergraduates with consent of instructor.

Grade Mode: Letter.

MUS 212 – Ethics of Musical Ethnography (4 units)

Course Description: Role, methodology, perception, and assumptions of the ethnomusicologist in ethnographic scholarship. Examination of complex ethical and political questions in relation to practical fieldwork techniques.

Learning Activities: Seminar 3 hour(s), Fieldwork.

Enrollment Restriction(s): Open to graduate students in Music; advanced undergraduates with consent of instructor.

Grade Mode: Letter.

MUS 213 – Transcription & Notation (4 units)

Course Description: Practical instruction in the transcription and analysis of primarily non-Western musics. Analytical and theoretical issues, the politics of representation, and the cultural values and ideologies implicit in notation.

Learning Activities: Seminar 3 hour(s), Project.

Enrollment Restriction(s): Open to graduate students in Music; advanced undergraduates with consent of instructor.

Grade Mode: Letter.

MUS 214 – Recent Issues in Ethnomusicology (4 units)

Course Description: Issues, schools of thought, and basic literature in ethnomusicology from the 1980s to present. Emphasis on theory and methodology.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate students in Music; advanced undergraduates with consent of instructor.

Grade Mode: Letter.

MUS 221 – Topics in Music History (4 units)

Course Description: Studies in selected areas of music history and theory.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to graduate students in Music; advanced undergraduates with consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 222 – Techniques of Analysis (4 units)

Course Description: Analysis and analytical techniques as applied to music of all historical style periods.

Learning Activities: Seminar 3 hour(s).

Enrollment Restriction(s): Open to graduate students in Music; advanced undergraduates with consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 223 – Topics in Ethnomusicology (4 units)

Course Description: In-depth ethnomusicological studies of selected cultures and their musics; study of historical, theoretical, contextual, and cultural features.

Learning Activities: Seminar 4 hour(s).

Enrollment Restriction(s): Open to graduate students in music; advanced undergraduates & Anthropology students with consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Letter.

MUS 298 – Directed Group Study (1-5 units)

Course Description: Directed Group Study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated for credit when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

General Education: Arts & Humanities (AH).

MUS 299 – Individual Study (1-12 units)

Course Description: Individual study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

MUS 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching Assistant Training Practicum.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Native American Studies (NAS)

College of Letters & Science

NAS 001 – Introduction to Native American Studies (4 units)

Course Description: Introduction to Native American Studies with emphasis upon basic concepts relating to Native American historical and political development.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

NAS 005 – Introduction to Native American Literature (4 units)

Course Description: Intensive focus on analysis of Native American literary texts, with frequent writing assignments to develop critical thinking and composition skills.

Prerequisite(s): Completion of Subject A requirement.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

NAS 005A – Writer's Workshop (2 units)

Course Description: Disciplinary writing support course focuses on the development of writing and revision strategies, exploring ways to understand a writing task, to develop appropriate content for a writing task, to revise content to reflect competence as a communicator.

Learning Activities: Discussion 2 hour(s).

Enrollment Restriction(s): Concurrent enrollment in a lower division writing course required, preferably NAS 005; if necessary, based upon demand and academic advisor approval, students may concurrently enroll in an equivalent course (ENL 003 or UWP 001), instead.

Grade Mode: Letter.

NAS 007 – Indigenous & Minority Languages (4 units)

Course Description: Survey of the status of indigenous, immigrant, and other minority languages in the Americas and around the world. Topics include linguistic diversity, language endangerment & revitalization, heritage language maintenance in immigrant communities, and language change due to transcultural interactions.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

NAS 010 – Native American Experience (4 units)

Course Description: Introduction to the diverse cultures of Native American peoples from North, Central, and South America. Emphasis on Native American voices in the expression of cultural views and in the experience of conflicting values.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

NAS 012 – Native American/Indigenous Film (4 units)

Course Description: Survey and analysis of the visual colonization of Native American peoples and the contemporary responses by Native American/Indigenous filmmakers claiming visual sovereignty. Examines a range of filmic genres including documentary, features, shorts, festivals, TV and Internet screening.

Learning Activities: Lecture 3 hour(s), Film Viewing, Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

NAS 032 – Native American Music & Dance (4 units)

Course Description: Introduction to the music and dance of Indigenous peoples across the Americas. Indigenous music and dance from comparative, interdisciplinary, and global perspectives in order to learn about historic and contemporary issues (e.g., social, cultural, economic, technical, and aesthetic) facing Indigenous communities, and the ways in which the issues are expressed through music and dance practices.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Visual Literacy (VL).

NAS 033 – Introduction to Native American Art (4 units)

Course Description: Introduction to Native American Art from throughout North America, inclusive of traditional forms, techniques and designs in a range of media including ceramics, basketry, fiberwork, carving, painting, sculpture and photography within a context of social and political history.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

NAS 034 – Native American Art Studio (4 units)

Course Description: Studio projects to be influenced by contemporary and traditional Native American arts. Examples of designs and media presented in lectures will be of indigenous origin. Introduction and familiarized with various materials and techniques.

Learning Activities: Lecture 2 hour(s), Studio 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC).

NAS 093 – Powwow Internship (1-4 units)

Course Description: Supervised internship for the annual UC Davis Powwow.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-12 hour(s).

Repeat Credit: May be repeated 12 unit(s) including course 189 and other internships taken in other departments and institutions.

Grade Mode: Pass/No Pass only.

NAS 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

NAS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NAS 101 – Contemporary Native American Art (4 units)

Course Description: Examination of contemporary artworks by selected Native American and Indigenous Master artists, in a wide range of media, including ceramics, metal arts, photography, video, painting, installation and performance within a context of political and social histories.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

NAS 107 – Learning Native American Languages (4 units)

Course Description: Self-directed study of a Native American language using revitalization strategies. Origins of language endangerment and the importance of language for cultural reclamation.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated when in a different language or undertaking more advanced work on a language previously studied.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Oral Skills (OL); World Cultures (WC).

NAS 108 – Indigenous Languages of California (4 units)

Course Description: Survey of the indigenous languages of the California region: linguistic prehistory, languages at first European contact, subsequent language loss, current efforts at language and cultural revitalization, indigenous languages of recent immigrants to California.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

NAS 109 – Native American Language Spotlight (4 units)

Course Description: In-depth examination of the history, structure, and sociolinguistics of a particular Native American language or language family. Different language studied each time the course is offered. Oral proficiency component included in some years.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated when language/language family differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

NAS 110A – Quechua Language & Society: Beginning Level 1 (4 units)

Course Description: Quechua language and society emphasizing the practical use of the language. Provides some basic Quechua communication skills and with an initial knowledge about contemporary Andean society and the status of Quechua language today.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Not open to students who took NAS 107 in the fall quarter of 2007.

Grade Mode: Letter.

General Education: Social Sciences (SS).

NAS 110B – Quechua Language & Society: Beginning Level 2 (4 units)

Course Description: Second Level of the teaching of Quechua language and society. Emphasis on development of conversational and reading skills. Continuation of the study of aspects of contemporary Andean society and the status of Quechua language today.

Prerequisite(s): NAS 110A.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

NAS 110C – Quechua Language & Society: Intermediate Level 1 (4 units)

Course Description: Third level of the teaching of Quechua language and society. Emphasis on development of conversational and reading skills. Introduction to more complex grammatical structures. Continuing the study of contemporary Andean society and the status of Quechua language today.

Prerequisite(s): NAS 110A; NAS 110B.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

NAS 110D – Quechua Language & Society: Intermediate Level 2 (4 units)

Course Description: Fourth level of the teaching of Quechua language and society. Emphasis on complex structural patterns while emphasizing conversational skills and improving reading competence. Study of different sociopolitical processes that have affected Andean identity and the status of Quechua language.

Prerequisite(s): NAS 110A; NAS 110B; NAS 110C.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

NAS 115 – Native Americans in the Contemporary World (4 units)

Course Description: Important issues facing Native Americans in the contemporary world. Focus primarily on the diverse ways of life, histories and realities of indigenous people throughout the Americas as they develop their own cultural and political institutions.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

NAS 116 – Native American Traditional Governments (4 units)

Course Description: Study of selected Native American Tribal Governments, confederations, leagues, and alliance systems.

Prerequisite(s): NAS 001; ANT 002.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

NAS 117 – Native American Governmental Decision Making (4 units)

Course Description: Native American governmental and community decision making with emphasis on federal and state programs, tribal sovereignty, current political trends and funding for tribal services.

Prerequisite(s): NAS 116; POL 002; ANT 123 recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

NAS 118 – Native American Politics (4 units)

Course Description: Examination of the various interest groups and movements found among Native people and how they relate to the determination of Indian affairs. Study of political action available to Native groups, and local communities, along with relevant theory relating to underdevelopment.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

NAS 119 – Introduction to Federal Indian Law (4 units)

Course Description: Introduction to the foundational cases and statutes of federal Indian law, from European Contact through the 20th century.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

NAS 120 – Ethnopolitics of South American Indians (4 units)

Course Description: Social, political, cultural movements of indigenous South Americans in response to establishment, expansion of European colonialism, post-colonial nation-states. Ethnopolitical processes developed through interactions between Indians, Euroamericans. Socioethnographic analysis of main indigenous areas and the development of national societies. May be taught abroad.

Prerequisite(s): NAS 001; (NAS 010 or NAS 055).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

NAS 121 – Corporate Colonialism (4 units)

Course Description: Price of progress and modernity for native and non-native people. History of the corporation and neoliberalism, military and intelligence agencies, debt, Taylorism, education institutions, media, and law. Discussion of alternatives advocated by contemporary and indigenous social movements.

Prerequisite(s): NAS 001, NAS 010 or NAS 012 encouraged, but not required.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

NAS 122 – Native American Community Development (4 units)

Course Description: Application of community development theory and techniques to the development problems of Native American communities.

Prerequisite(s): NAS 001 or NAS 010.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

NAS 123 – Native Foods & Farming of the Americas (4 units)

Course Description: Crop domestication, agrodiversity, and cuisines of the Americas. Cultural and social history of native American foods like maize, potatoes, quinoa, chocolate, peppers, beans, avocados, etc. Discussion of socio-economic, environmental, legal challenges facing indigenous and peasant farmers today.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Domestic Diversity (DD); Oral Skills (OL); World Cultures (WC).

NAS 125 – Performance & Culture Among Native Americans (4 units)

Course Description: Interdisciplinary study of public expressive forms among Native Americans. Comparison and analysis of music, dances, rituals, and dramas from throughout North, Central, and South America in their social and cultural contexts. Extensive film viewing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MUS 125.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

NAS 130A – Native American Ethno-Historical Development (4 units)

Course Description: Study of Native American ethno-history in North America before 1770s.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

NAS 130B – Native American Ethno-Historical Development (4 units)

Course Description: Study of Native American ethno-history in North America, 1770-1890.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

NAS 130C – Native American Ethno-Historical Development (4 units)

Course Description: Study of Native American ethno-history in North America after 1890.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

NAS 133 – Ethnohistory of Native People of Mexico & Central America (4 units)

Course Description: Ethnohistorical development of pre-colonial, colonial, post-colonial Mexican and Central American indigenous people; the impact of economic and political factors on the process of cultural adaptation. Attention is given to the questions of nation-building, forced assimilation, indigenous resistance, organized political responses.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

NAS 133A – Ethnohistory of Native Peoples of Mexico & Central America to 1500 (4 units)

Course Description: Ethnohistorical development of the indigenous peoples of Mexico and Central America up to and including the earliest period of European contact. Focus is on indigenous written historical records of the Maya, Mixtec, and Nahuatl peoples.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

NAS 133B – Ethnohistory of Native Peoples of Mexico & Central America 1500 to 2000 (4 units)

Course Description: Ethnohistory of indigenous peoples of Mexico and Central America from 1500 to contemporary times. Focus on social and cultural dynamics, particularly the role of indigenous people in the process of nation-state building in Mexico and Central America.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

NAS 134 – Race, Culture, & Nation (4 units)

Course Description: Exploration of complexities of Native American racial, cultural and national identities and alliances. Study of tribal and federal citizenship, mixed descent and diasporic people(s), claims to resources, ethnic fraud and contemporary movements of cultural resurgence and political sovereignty and self-determination.

Prerequisite(s): Upper division standing or consent of instructor; NAS 001 or NAS 010 encouraged, but not required.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

NAS 135 – Gender Construction in Native Societies (4 units)

Course Description: Historical and traditional Native American constructions of feminine, masculine, and non-binary genders with attention to culture- and place-based gender roles and statuses.

Analysis of problems with contemporary terminologies and impacts of colonization on contemporary constructions of gender identities.

Prerequisite(s): Upper division standing or consent of instructor; NAS 001 or NAS 010 encouraged, but not required.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

NAS 146 – Orientation to Research in Native American Studies (4 units)

Course Description: Introduction to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis on learning to use documentary resources or other collections of data. Students will carry out individual projects.

Prerequisite(s): Consent of instructor; Native American Studies major or minor, or consent of instructor; NAS 001 or NAS 010 encouraged, but not required.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Writing Experience (WE).

NAS 157 – Native American Religion & Philosophy (4 units)

Course Description: Religious and philosophical traditions of Native American/indigenous peoples of the Americas.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Writing Experience (WE).

NAS 161 – California Indian Environmental Policy I (4 units)

Course Description: Contemporary California Indian environmental policy issues, with a focus on water, minerals, contamination, and alliance-building. Issues will be placed within historical and political context, drawing on theories of Native environmental ethics, environmental justice, and Federal Indian law.

Learning Activities: Lecture/Discussion 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

NAS 162 – California Indian Environmental Policy II (4 units)

Course Description: Contemporary California Indian environmental policy issues, with a focus on planning, site protection, and collaborative structures. Issues will be placed within historical and political context, drawing on theories of Native environmental ethics, environmental justice, and Federal Indian law.

Learning Activities: Lecture/Discussion 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

NAS 165 – Keepers of the Flame: Native American Cultural Burning & Land Stewardship in California (4 units)

Course Description: Use of fire by California Indian tribes to maintain ecosystems that sustain their economic, cultural, and spiritual well being. Guests include Native American cultural practitioners and prescribed fire professionals.

Prerequisite(s): consent of instructor; course involves regular field days working with cultural burn practitioners.

Learning Activities: Lecture/Discussion 1.5 hour(s), Fieldwork.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

NAS 175V – Hemispheric Indigenous Connections (4 units)

Course Description: Indigenous worlds in motion in the Americas, 1491-present. Comparative Indigenous experiences of colonialism and neocolonialism, plus histories of resistance, cultural survival, and transnational grassroots organizing with an emphasis on environmental justice movements.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to UC Davis students.

Grade Mode: Letter.

General Education: Social Sciences (SS); Visual Literacy (VL); World Cultures (WC).

NAS 180 – Native American Women (4 units)

Course Description: Native American women's life experiences, cross-cultural comparisons of gender roles, and Native women's contemporary feminist thought. Utilizes texts from literature, social science, and autobiography/biography.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

NAS 181A – Native American Literature (4 units)

Course Description: Works of fiction (short story, novel) by contemporary Native American authors, with an emphasis on writers from the United States.

Prerequisite(s): NAS 005 or ENG 003 or COM 001 or COM 002 or COM 003.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

NAS 181B – Native American Literature (4 units)

Course Description: Works by or about Native Americans including non-fiction novels, biographies and autobiographies. Explore ways Native Americans create and recreate their culture through the creative process in literature. Examine from a critical perspective autobiographies and testimonial literature.

Prerequisite(s): NAS 005 or ENG 003 or COM 001 or COM 002 or COM 003.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

NAS 181C – Contemporary Native American Poetry (4 units)

Course Description: Works of poetry by contemporary Native American/indigenous poets, with some attention to traditional cultural poetic expressions.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

NAS 184 – Contemporary Indigenous Literature of Mexico (4 units)

Course Description: Contemporary indigenous literature of Mexico, with a focus on the genres (poetry, fiction, drama, essay); analysis of cultural, historical, and spiritual themes, imagery, styles and performances; biographies of and influences on the Native writers themselves.

Prerequisite(s): NAS 001 or NAS 010; NAS 181A or NAS 181C recommended; reading knowledge of Spanish required.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); World Cultures (WC).

NAS 185 – Native American Literature in Performance (4 units)

Course Description: Performance of contemporary Native American literature onstage, through adaptations of selected literature as well as the creation of original pieces.

Prerequisite(s): Consent of instructor.

Learning Activities: Performance Instruction 4 hour(s).

Repeat Credit: May be repeated 4 unit(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Oral Skills (OL); World Cultures (WC).

NAS 188 – Special Topics in Native American Literary Studies (4 units)

Course Description: Special topics drawn from Native American literature.

Prerequisite(s): Upper division standing and one of the following recommended: NAS 005, NAS 010, NAS 181A, NAS 181C.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

NAS 189 – Powwow Internship (1-4 units)

Course Description: Supervised internship for the annual UC Davis Powwow.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-12 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Repeat Credit: May be repeated 12 unit(s) including course 189 and other internships taken in other departments and institutions.

Grade Mode: Pass/No Pass only.

NAS 190 – Seminar in Native American Studies (2 units)

Course Description: Seminar of critical issues faced by Native American people.

Prerequisite(s): Senior Standing.

Learning Activities: Discussion 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

NAS 191 – Topics in Native American Studies (4 units)

Course Description: Selected topics in Native American Studies related to indigenous knowledges and worldviews from a historical, cultural, hemispheric perspective.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated when instructor and/or topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

NAS 192 – Internship (1-12 units)

Course Description: Supervised internship in the CN Gorman Museum, community, and institutional settings related to Native American concerns.

Prerequisite(s): Consent of instructor; enrollment dependent on availability of intern position in Native American Studies or the CN Gorman Museum, with priority to Native American Studies minors/majors.

Learning Activities: Internship 1 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Repeat Credit: May be repeated 12 unit(s) including course 192 and other internships taken in other departments and institutions.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

NAS 194HA – Special Studies for Honors Students (4 units)

Course Description: Directed reading, research and writing culminating in the completion of a senior honors thesis or project under direction of faculty advisor.

Prerequisite(s): Senior qualifying for honors.

Learning Activities: Independent Study 12 hour(s).

Grade Mode: Letter.

NAS 194HB – Special Studies for Honors Students (4 units)

Course Description: Directed reading, research and writing culminating in the completion of a senior honors thesis or project under direction of faculty advisor.

Prerequisite(s): Senior qualifying for honors.

Learning Activities: Independent Study 12 hour(s).

Grade Mode: Letter.

NAS 195 – Field Experience in Native American Studies (12 units)

Course Description: Field work with governmental and community groups, under supervision of faculty advisor and sponsor. Knowledge acquired in other courses to be applied in field work.

Prerequisite(s): NAS 161; senior standing and major in Native American Studies, completion of lower division major requirements.

Learning Activities: Fieldwork 36 hour(s).

Grade Mode: Pass/No Pass only.

NAS 196 – Senior Project in Native American Studies (4 units)

Course Description: Guided research project that enables student to apply the theory and research principles from major course work. Final product is to be a major senior project or thesis.

Prerequisite(s): NAS 195 (can be concurrent); and consent of instructor; senior standing and major in Native American Studies.

Learning Activities: Discussion 1 hour(s), Independent Study 3 hour(s).

Grade Mode: Pass/No Pass only.

NAS 197TC – Community Tutoring in Native American Studies (1-5 units)

Course Description: Supervise tutoring in community.

Prerequisite(s): Consent of major committee; upper division standing with major in Native American Studies.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: Pass/No Pass only.

NAS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NAS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NAS 200 – Basic Concepts in Native American Studies (4 units)

Course Description: Analysis of characteristics of the discipline of Native American Studies. Concentration of traditional and contemporary native scholarship and thought as well as theoretical and methodological consequences derived from application of these ideas.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated 3 time(s) when instructor differs.

Grade Mode: Letter.

NAS 202 – Advanced Topics in Native American Studies (4 units)

Course Description: Advanced study of selected topics or themes relevant to the field of Native American studies. Topics will be announced at the time of offering.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

NAS 207 – Leadership Skills & Strategies in California Language Documentation & Revitalization (4 units)

Course Description: Introduction to the indigenous languages of the Americas, with a focus on California; an examination of how contemporary Native communities document and revitalize their heritage languages. Learn to assist and administer language programs.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

NAS 208 – Advanced Study of Native American Languages (4 units)

Course Description: Advanced study of Native American languages. Development of proficiency in a particular language in order to incorporate language into Native American Studies research and argumentation. Engagement with theoretical perspectives on social, cultural, and structural dimensions of language to guide language study. *Prerequisite(s):* NAS 107 or equivalent background with a Native American language.

Learning Activities: Seminar 3 hour(s), Practice, Term Paper.

Grade Mode: Letter.

NAS 212 – Community Development for Sovereignty & Autonomy (4 units)

Course Description: Examines a sample of contemporary indigenous communities from south, central and north America with the goal of understanding and evaluating the strategies adopted by Native American communities to develop and implement forms of sovereignty or autonomous self-management.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

NAS 213 – Native Criminality & Deviance (4 units)

Course Description: Examination of "deviance" in Native communities with focus on Native criminality in North America. Analysis of the concept of deviance from several different world views. Readings from a range of theories to incorporate varying theoretical perspective on criminality and deviance.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

NAS 217 – Public Law 83-280: Colonial Termination (4 units)

Course Description: Examination of the signature law of the Termination Era, Public Law 83-280. Discussions to include termination, societal conformity, political consent, jurisdiction, self-determination & decolonization, and colonial relationship between Native Peoples and the United States.

Prerequisite(s): Graduate standing, including school of law students.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

NAS 220 – Colonialism, Neoliberalism, & Indigenous Self-Determination (4 units)

Course Description: History, political economy and legacies of imperial/colonial systems. Continuities and discontinuities with corporate globalization and neoliberalism. Focus on resistance and self-determination of indigenous peoples, but with comparison to other groups.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

NAS 224 – Performance in the Americas (4 units)

Course Description: Ethnomusicological and anthropological approaches to study of public performance in the Americas. New ways of looking at music, dance, rituals and other forms of public expressive forms normally called "folklore" or "popular culture."

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have completed MUS 224. (Former MUS 224.).

Grade Mode: Letter.

NAS 233 – Visual Sovereignty (4 units)

Course Description: Extensively examine the field of contemporary Native American and Indigenous photography, film and performance through research of artworks, writings by artists, theorists, and material in museum collections.

Learning Activities: Seminar 3 hour(s), Film Viewing 2 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

NAS 237 – Native American Art Collections & Museums (4 units)

Course Description: Research and examination of regional Native American art held in museums and other public institutions, as well as privately-held collections. Includes onsite viewing and research of museum collections and archives.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

NAS 240 – Native American Public Health: Topics & Issues (4 units)

Course Description: Introduction to Native American public health issues and contributing causal factors (including environmental justice and historical trauma); the dimensions of cultural competency in diagnosis and service provision; the structure of Native health care institutions; and debates in Native treatment modalities.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

NAS 246 – Native American/Indigenous Research Methodologies (4 units)

Course Description: Introduction to advanced methodologies currently influencing research in Native American Studies and among Indigenous communities. Develop an original project and course assignments will guide them through the process of research design and implementation.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

NAS 250 – Indigenous Critique of Classic Maya Ethnographies (4 units)

Course Description: Construction of the Maya world through ethnographic writing during the present century. Deconstruction of ethnographies about the Mayans considering the modern theories and social/anthropological critiques of modern ethnographies.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

NAS 254 – Native American Literature (4 units)

Course Description: Introduction to the field of Native American Literature, creative works (fiction, poetry, memoir, personal essay), literary studies.

Learning Activities: Seminar 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to graduate students only.

Repeat Credit: May be repeated 1 time(s) when readings content is completely distinct from the course previously taken.

Grade Mode: Letter.

NAS 257 – Indigenous Religious Traditions in the Americas (4 units)

Course Description: Religious/spiritual traditions, belief-systems, and world-views of Native American/indigenous peoples in the Americas. Land, ecological knowledge, sacred sites, the role of tricksters, language (revitalization), gender, ethics of representation, cultural revitalization, renewed ancient knowledge and practices, ceremonial (and daily) performance of the sacred, music, the arts, the worlds of the sacred, the rules of the sacred, freedom of religion.

Learning Activities: Seminar 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Graduate student enrollment only.

Repeat Credit: May be repeated 1 time(s) when readings content is completely distinct from the course previously taken.

Grade Mode: Letter.

NAS 280 – Ethnohistorical Theory & Method (4 units)

Course Description: Discussion of the ethnohistorical method; the utilization of diverse types of data, especially documentary sources, to reconstruct socio-cultural history. Particular attention to the applied area of ethnohistory in the solution of contemporary social problems.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

NAS 298 – Group Study for Graduate Students (1-5 units)

Course Description: Group study for graduate students.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

NAS 299 – Special Study for Graduate Students (1-12 units)

Course Description: Special study for graduate students.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

NAS 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Internship.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Nematology (NEM)

College of Agricultural & Environmental Sciences

NEM 010V – General Biology (4 units)

Course Description: Concepts and issues in biology. Emphasis on composition and structure of organisms; regulation and signaling; heredity, evolution and the interaction and interdependence among life forms and their environments. Designed for students not specializing in biology.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed BIS 002A or BIS 002B or BIS 002C or BIS 010 or equivalent.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

NEM 100 – Plant Nematology (4 units)

Course Description: Plant-parasitic nematodes. Cellular, biochemical, and molecular aspects of plant-nematode interaction.

Learning Activities: Lecture 1 hour(s), Discussion/Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Entomology, Global Disease Biology, Microbiology, and Biochemistry & Molecular Biology majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NEM 110 – Introduction to Nematology (2 units)

Course Description: Relationship of nematodes to the human environment. Classification, morphology, ecology, distribution, and importance of nematodes occurring in water and soil as parasites of plants and animals.

Prerequisite(s): BIS 002B; or consent of instructor.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

NEM 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NEM 201 – Molecular & Physiological Plant Nematology (2 units)

Course Description: Molecular biology and physiology of nematodes using *Caenorhabditis elegans* as a model, but with emphasis on plant-parasitic species. Plant responses to nematodes. Discussion of current literature emphasized.

Prerequisite(s): BIS 101; PLP 120; (NEM 100 or NEM 110).

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

NEM 203 – Ecology of Parasitic Nematodes (2 units)

Course Description: Major concepts in population and community ecology of animal- and plant-parasitic nematodes. Current advances in techniques, theory, and basic information about nematode-host dynamics, and application to management of nematode diseases.

Prerequisite(s): (NEM 100 or NEM 110 or ENT 156); (EVE 101 or PLB 117).

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

NEM 204 – Management of Plant-Parasitic Nematodes (2 units)

Course Description: Theory, foundation, principles and practices of nematode management. Techniques and equipment used to manage nematodes and methods used to analyze their effectiveness.

Prerequisite(s): NEM 100 or NEM 110.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

NEM 205 – Insect Nematology & Biological Control (2 units)

Course Description: Biology of insect-parasitic nematodes, their effect on the host, and their potential as biological control agents of insect and other invertebrate pests. Application of ecological theory in classical and augmentative biological control.

Prerequisite(s): NEM 100; NEM 110; (ENT 100 or ENT 110).

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

NEM 206 – Nematode Systematics & Evolution (2 units)

Course Description: Nematode diversity as revealed by morphological and molecular evidence. Laboratory experience focuses on structural features used in taxonomy. Phylogenetic relationships based on morphological and molecular data used to consider patterns of character change among taxa.

Prerequisite(s): NEM 100 or NEM 110 or ENT 156; EVE 100 recommended.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

NEM 210 – Molecular Phylogenetic Analysis (3 units)

Course Description: Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Cross Listing: EVE 210.

Grade Mode: Letter.

NEM 245 – Field Nematology (1 unit)

Course Description: Six-day demonstration and field study in applied nematology including diagnosis and prediction of nematode field problem strategies for control field plot design, and establishment in association with diverse California crops.

Prerequisite(s): NEM 100.

Learning Activities: Fieldwork.

Grade Mode: Satisfactory/Unsatisfactory only.

NEM 290 – Seminar (1 unit)

Course Description: Seminar.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

NEM 290C – Advanced Research Conference (1 unit)

Course Description: Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group.

Prerequisite(s): Graduate standing and consent of instructor.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

NEM 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

NEM 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Nephrology (NEP)

School of Medicine

NEP 192 – Internship in Nephrology (1-12 units)

Course Description: Supervised work experience in nephrology.

Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

NEP 299 – Nephrology Research (1-12 units)

Course Description: Research topics in Nephrology.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NEP 444 – Curriculum Design for Doctoring (1 unit)

Course Description: Design of Doctoring curriculum for medical students in focused topic areas to be announced annually. Students design sessions, consider resource needs, and work with IORs to initiate the curriculum.

Prerequisite(s): Consent of instructor; second-year standing in School of Medicine.

Learning Activities: Project 2 hour(s), Seminar 1 hour(s).

Grade Mode: Pass/Fail only.

NEP 460 – Nephrology & Fluid Balance (3-6 units)

Course Description: Active participation in all inpatient/outpatient clinical activities, attendance at specific lectures and conferences at UC Davis Medical Center covering the field of nephrology and fluid-electrolyte disorders.

Prerequisite(s): Consent of instructor; completion of third-year medical school; completion of Medicine Core Clerkship.

Learning Activities: Clinical Activity 4 hour(s), Lecture/Discussion 10 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 1 time(s) with consent of instructor.

Grade Mode: Honors/Pass/Fail.

NEP 499 – Research in Nephrology (3-18 units)

Course Description: Independent laboratory research on a specific problem related to biochemical or immunologic causes of renal disease and/or uremic disorders in humans or animals.

Prerequisite(s): Consent of instructor; individual arrangement.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Neurobiology, Physiology, & Behavior (NPB)

College of Biological Sciences

NPB 010 – Elementary Human Physiology (3 units)

Course Description: Introduction to physiology for non-science majors. Includes basic cell physiology and survey of major organ systems and how they function in homeostasis and human health.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed NPB 101.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 011 – Exercise & Fitness: Principles & Practice (3 units)

Course Description: Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken EXB 010 or an upper division EXB or NPB course.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

NPB 012 – The Human Brain & Disease (3 units)

Course Description: Normal function and diseases of the human brain and nervous system. Diseases discussed include Parkinson's, Alzheimer's, leprosy, amnesia and schizophrenia. Intended for non-science majors.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed NPB 100, NPB 101, NPB 112, or PSC 121.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

NPB 013 – Extreme Animal Athletes (3 units)

Course Description: Overview of biomechanics, focusing on animal locomotion. Physical principles underlying traits such as speed, maneuverability, endurance, and precision. Comparisons of animals and human athletes performing similar feats, with animals often outperforming humans by a wide margin. Biomechanical concepts through hands-on exercises, problem sets, and readings from the scientific literature.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NPB 014 – Illusions: Fooling the Brain (3 units)

Course Description: Introduction to perceptual processing in the human nervous system; illusions.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

NPB 015 – The Biology & Physiology of Aging (4 units)

Course Description: Broad examination of age-associated changes in body functions. Includes basic cell physiology, a survey of major organ systems and the age-induced alterations in system function. Some age-associated diseases will also be examined. Intended for non-science majors.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed NPB 015V.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 015V – The Biology & Physiology of Aging (4 units)

Course Description: Broad examination of the biological and physiological basis of aging in animals and plants. Concepts in demographic, evolutionary, genetic, and cell aging. Major human organ systems, age-related alterations in system function, and age-related diseases. Intended for non-science majors.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed NPB 015.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 017 – The Path to Cyborgs: Introduction to Prostheses & Human Machine Interfaces (3 units)

Course Description: Interface of biology and technology. Mind-controlled prosthetic limbs, artificial organs, and implantable devices. Emphasis on basic physiological functions and how they can be replaced by devices. Suitable for majors and non-majors.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

NPB 018 – Biological Science for Social Justice (3 units)

Course Description: Broad survey of the many ways one can use the biological sciences to better the lives of others and break down barriers that have restricted social mobility.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Domestic Diversity (DD); Scientific Literacy (SL).

NPB 068 – Biology of Drug Addiction & Abuse (3 units)

Course Description: Broad examination of addictive substances and their use/abuse. Topics include historical perspective, physiological effects, etiology, neurobiology of addiction and the impact of drugs on contemporary society. Intended for non-science majors.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students having completed NPB 168.

Grade Mode: Letter.

NPB 090C – Current Issues in Animal Behavior (2 units)

Course Description: The mechanisms and outcomes of sexual selection (mate choice and mate competition). Theory, current models and evidence that supports or refutes the models.

Prerequisite(s): Lower division standing.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

NPB 090F – Visual Impairment & Blindness: A World Wide Problem (2 units)

Course Description: Examination of various abnormalities of the eye and the important geographic and cultural factors that influence the epidemiology of those abnormalities.

Prerequisite(s): Lower division standing.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

NPB 091C – Research Conference (1 unit)

Course Description: Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students.

Prerequisite(s): NPB 099 (can be concurrent); and consent of instructor; lower division standing in Neurobiology, Physiology and Behavior or related biological science; NPB 099 required concurrently.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to lower division students.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

NPB 092 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the Department of Neurobiology, Physiology, and Behavior. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

NPB 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NPB 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor. Lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NPB 100 – Neurobiology (4 units)

Course Description: Brains and nervous systems, neurons and neural circuits. Coordination of movement. Development of nervous systems. Vision, hearing, and feature extraction by the central nervous system. The cell biology of learning and memory. Perception, cognition, and disorders of the brain.

Prerequisite(s): BIS 002A; PHY 009A, PHY 009B or PHY 007A, PHY 007B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed NPB 110B, NPB 112, NPB 160, NPB 161 or NPB 162, or NSC 221 or NSC 222.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

NPB 100L – Neurobiology Laboratory (3 units)

Course Description: Experimental basis of neurobiology principles discussed in NPB 100. Topics include neurophysiology, sensory systems, motor systems, cellular neuroscience, cognitive neuroscience, and quantitative data analysis and modeling techniques.

Prerequisite(s): NPB 100 (can be concurrent) or NPB 110B (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s), Extensive Writing/Discussion.

Enrollment Restriction(s): Pass One restricted to Seniors.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 100Q – Quantitative Foundations of Neurobiology (1 unit)

Course Description: Computational methods and mathematical models used to study phenomena in neurobiology.

Prerequisite(s): NPB 100 (can be concurrent).

Learning Activities: Auto Tutorial 1.5 hour(s), Extensive Problem Solving 1.5 hour(s).

Grade Mode: Letter.

NPB 101 – Systemic Physiology (5 units)

Course Description: Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions.

Prerequisite(s): BIS 002A; (CHE 002B or CHE 002BH); PHY 001B or PHY 007C strongly recommended.

Learning Activities: Lecture 5 hour(s).

Credit Limitation(s): Not open for credit to students who have completed NPB 110C.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 101D – Systemic Physiology Discussion (1.5 units)

Course Description: Discussion and problem solving related to fundamental principles of systemic physiology as presented in NPB 101.

Prerequisite(s): NPB 101 (can be concurrent); consent of instructor.

Learning Activities: Discussion 1.50 hour(s).

Grade Mode: Pass/No Pass only.

NPB 101L – Systemic Physiology Laboratory (3 units)

Course Description: Selected experiments to illustrate functional characteristics of organ systems discussed in NPB 101.

Prerequisite(s): ANS 100 or NPB 101 or NPB 110C.

Learning Activities: Laboratory 3 hour(s), Discussion 2 hour(s), Term Paper.

Enrollment Restriction(s): Pass One restricted to seniors in BBIS, ACNU, BHUB, ANSC, and BNPB.

Grade Mode: Letter.

NPB 102 – Animal Behavior (3 units)

Course Description: Basic principles of behavioral organization in vertebrate and invertebrate animals. Underlying physiological and ethological mechanisms. The evolution of behavior, with special emphasis on behavior under natural conditions.

Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C).

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed NPB 155. (Former NPB 155.)

Grade Mode: Letter.

General Education: Scientific Literacy (SL).

NPB 102Q – Quantitative Topics in Animal Behavior (1 unit)

Course Description: Study of the quantitative concepts and exemplar models used in animal behavior.

Prerequisite(s): MAT 016B; NPB 102 (can be concurrent).

Learning Activities: Auto Tutorial 1.50 hour(s), Extensive Problem Solving 1.50 hour(s).

Grade Mode: Letter.

NPB 103 – Cellular Physiology/Neurobiology (3 units)

Course Description: Cellular physiology with emphasis on membrane transport processes and neuronal physiology. Fundamental physical-chemical and biological mechanisms of membrane transport will be considered in relation to cytoplasmic homeostasis, communication between cells, and the cellular mechanisms of sensory and motor transduction.

Prerequisite(s): (BIS 103 or BIS 105); BIS 104; PHY 007C recommended.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed NPB 100B. (Former NPB 100B.)

Grade Mode: Letter.

NPB 104L – Cellular Physiology/Neurobiology Laboratory (4 units)

Course Description: Experiments in the physical and chemical processes of cells and tissues.

Prerequisite(s): NPB 101L; (BIS 103 or BIS 105).

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

NPB 106 – Experiments in Neurobiology, Physiology, & Behavior: Design & Execution (3 units)

Course Description: Design and execution of experiments in neurobiology, physiology, and/or behavior. Choose and design a project in consultation with the sponsoring faculty member.

Prerequisite(s): (NPB 110A or NPB 100 or NPB 101 or NPB 102); NPB 199; and consent of instructor.

Learning Activities: Laboratory 7.50 hour(s), Discussion 0.50 hour(s).

Repeat Credit: May be repeated 1 time(s) to complete project; with consent of instructor.

Grade Mode: Pass/No Pass only.

General Education: Oral Skills (OL); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

NPB 107 – Cell Signaling in Health & Disease (3 units)

Course Description: Basics of cell signaling pathways, their disruption in disease, and their current utility and future potential as therapeutic targets. Focus is on signaling pathways specific to nervous, endocrine and immune systems, and those fundamental to all cells.

Prerequisite(s): BIS 102 or BIS 105.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Scientific Literacy (SL).

NPB 108Y – Animal Behavior Laboratory (3 units)

Course Description: Hybrid course, consisting of limited in-person lectures and the rest laboratory exercises. Laboratory exercises are online, and require students to view and score videos of animal behavior in order to test behavioral hypotheses.

Learning Activities: Lecture 3 hour(s), Web Electronic Discussion 12 hour(s).

Grade Mode: Letter.

NPB 109 – Kinesiology: Analysis & Control of Human Movement (4 units)

Course Description: Functional anatomy, motor control, and biomechanics of human movement understood in the context of body structures, basic principles of physics, and functional characteristics of muscle.

Prerequisite(s): PHY 007A; PHY 007B; NPB 101 or NPB 110C recommended; CHA 101 CHA 101L (same as EXB 106 EXB 106L) or equivalent recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 110A – Foundations 1: From Molecules to Individuals (5 units)

Course Description: Major concepts in cell biology with special emphasis on connections between cell biology and behavior. Includes: cellular metabolism, cellular sensing and signaling, membrane structure-function, molecular switches, electrical and chemical signaling, endocrine signaling, cell cycle and differentiation, cytoskeleton, and integrative examples. May be taught abroad.

Prerequisite(s): (BIS 002A, BIS 002B); (CHE 002B or CHE 003A); PHY 007A and PHY 007B recommended; BIS 002C recommended.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to majors in Neurobiology, Physiology and Behavior.

Credit Limitation(s): Credit limited to 3 units for students who have taken BIS 104.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 110B – Foundations 2: Neurobiology (5 units)

Course Description: Core concepts of neurobiology including single-neuron biophysics, synapses and transmitters, neuronal development, motor systems, central pattern generation, neuronal circuits, intracellular signal transduction, sensory processing, multisensory integration, autonomic nervous system, neuromodulation, learning and memory, and higher cognition and disease.

Prerequisite(s): NPB 110A C- or better; PHY 007A and PHY 007B recommended.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to declared NPB majors only.

Credit Limitation(s): Credit limited to 2 units for students who have taken NPB 100.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 110C – Foundations 3: Physiology (5 units)

Course Description: Focuses on the structure, function, and interactions of human and other animal organ systems in homeostasis and reproduction, and the response to perturbations of homeostasis; neural and endocrine signaling; skeletal muscle and movement; cardiovascular and respiratory systems; renal, digestive, immune, and reproductive physiology.

Prerequisite(s): NPB 110A C- or better; PHY 007A; PHY 007B and PHY 007C recommended.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to declared NPB majors only.

Credit Limitation(s): Only 2 units for students who have taken NPB 101.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 111L – Advanced Systemic Physiology Laboratory (4 units)

Course Description: Selected comprehensive experiments in the autonomic nervous system and the cardiovascular, respiratory, and neuromuscular systems. Emphasis on conceptual and methodological approaches in demonstrating the physiology of organ systems.

Prerequisite(s): NPB 101L.

Learning Activities: Lecture 1 hour(s), Discussion 2 hour(s), Laboratory 6 hour(s), Term Paper.

Grade Mode: Letter.

NPB 113 – Cardiovascular, Respiratory, & Renal Physiology (4 units)

Course Description: Intense and advanced presentation of concepts in cardiovascular, respiratory, and renal physiology including discussion of acid-base balance.

Prerequisite(s): (NPB 110C or NPB 101); CHE 008B, PHY 007B and PHY 007C recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

NPB 114 – Gastrointestinal Physiology (3 units)

Course Description: Gastrointestinal anatomy and physiology. Digestion, secretion, absorption, motility, comparative physiology and pathology. Strong emphasis on neural and hormonal regulation and on cellular mechanisms of secretion and absorption.

Prerequisite(s): (NPB 110C or NPB 101); BIS 105 or BIS 103 recommended, BIS 105 preferred.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NPB 116 – Stress Physiology in Health & Disease (3 units)

Course Description: Adaptive and maladaptive physiological responses to acute and chronic stress in mammals, with emphasis on humans. Role of endocrine and autonomic nervous system in stress response. Prenatal and postnatal effects of stress on cognitive and affective development. Wellness interventions.

Prerequisite(s): BIS 002A C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NPB 117 – Avian Physiology (3 units)

Course Description: Physiology of the various systems of birds with emphasis on digestion, respiration, excretion, and endocrine systems.

Prerequisite(s): (BIS 002A, BIS 002B); CHE 002B; NPB 101 or NPB 110C strongly recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NPB 118 – Comparative Biomechanics (3 units)

Course Description: Comparative biomechanics, exploring how animals and other organisms interact with their physical environment. Animal locomotion, form and function of morphological traits, mechanical properties of biological materials, and rules for fluid flow and structural design. Biomechanical concepts through hands-on exercises, quantitative problem sets, and readings from the scientific literature.

Prerequisite(s): (MAT 012 or MAT 016A or MAT 017A or MAT 021A or MAT 021AH or MAT 021M); (PHY 001A or PHY 007A or PHY 009A); (BIS 002A or BIS 002B or BIS 002C or BIS 010); or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

NPB 119 – Physiology of Aging & Senescence (3 units)

Course Description: Molecular and genetic basis of aging and senescence in various model organisms, from yeast to mammals. Organ and system level changes that take place as organisms age and their impact on their fitness and outcomes. The role of inflammation as a key contributor to aging. Mechanisms of common diseases of aging including: Alzheimer's, arthritis, atherosclerosis, osteoporosis. Theories of Aging. Ageism in modern society. Course is based on reading and evaluating primary literature.

Prerequisite(s): NPB 101 or NPB 110C or ANS 100.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 121 – Physiology of Reproduction (4 units)

Course Description: Physiological mechanisms related to reproduction, breeding efficiency and fertility, with special reference to domestic animals.

Prerequisite(s): NPB 101 or NPB 110C or ANS 100.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Quantitative Literacy (QL); Scientific Literacy (SL).

NPB 121L – Physiology of Reproduction Laboratory (1 unit)

Course Description: Experiments on the reproductive systems of domestic animals including male and female gametes.

Prerequisite(s): NPB 121 (can be concurrent).

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Letter.

NPB 122 – Developmental Endocrinology (3 units)

Course Description: Hormonal control of development, maturation and senescence from the cellular to organismal level, with emphasis on the human. Prenatal and neonatal life, childhood and adolescence, adulthood and pregnancy, as well as the endocrinology of aging.

Prerequisite(s): NPB 101.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

NPB 123 – Comparative Vertebrate Organology (4 units)

Course Description: Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions.

Prerequisite(s): (BIS 001A, BIS 001B) or (BIS 002A, BIS 002B).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: APC 100.

Grade Mode: Letter.

NPB 124 – Comparative Neuroanatomy (3 units)

Course Description: Overview of the neuroanatomy in mammalian vertebrates, focusing on the cerebral cortex and experimental techniques. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations.

Prerequisite(s): NPB 101 or NPB 100 or NPB 110B or PSC 121.

Learning Activities: Lecture 3 hour(s).

Cross Listing: PSC 124.

Grade Mode: Letter.

NPB 124L – Comparative Neuroanatomy Laboratory (2 units)

Course Description: Comparative neuroanatomy laboratory illustrating modern neuroanatomical techniques in determining neural connections within the mammalian brain. Includes experimentation and presentation of results.

Prerequisite(s): NPB 124 (can be concurrent).

Learning Activities: Laboratory 6 hour(s).

Enrollment Restriction(s): Pass One restricted to PSC and NPB majors; must be concurrently enrolled in NPB 124.

Cross Listing: PSC 124L.

Grade Mode: Letter.

NPB 126 – Comparative Physiology: Sensory Systems (3 units)

Course Description: Basic physiological mechanisms involved in sensory systems. Comparative approach to considerations of mechanosensitive systems (audition, lateral lines, touch, echolocation, equilibrium), chemosensitive systems (olfaction, taste, pheromones), photosensitive systems (vision, infrared detection, UV detection), electroreception, and pain. Emphasis on receptors.

Prerequisite(s): NPB 100 or NPB 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NPB 128 – Comparative Physiology: Endocrinology (3 units)

Course Description: Comparison of physiological functions in the animal kingdom: animal hormones and their functions.

Prerequisite(s): NPB 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NPB 130 – Physiology of the Endocrine Glands (4 units)

Course Description: Advanced presentation of concepts in endocrinology with emphasis on the role of hormones in reproduction, metabolism, and disease.

Prerequisite(s): (ANS 100 or NPB 101 or NPB 110C).

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Visual Literacy (VL).

NPB 132 – Nature vs. Nurture: Physiological Interactions Among Genes, Nutrients & Health (3 units)

Course Description: Biochemical, physiological, genetic, and nutritional causes of important medical problems such as obesity, anorexia, heart disease and diabetes.

Prerequisite(s): BIS 001A or BIS 002A; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Only 1 unit of credit allowed to students who have completed NPB 131.

Grade Mode: Letter.

NPB 133 – Genes & the Brain (4 units)

Course Description: Genetic contributions to brain evolution, development and disorders. Topics include evolution of genomic programs of neurodevelopment and the role of genetics in autism, intellectual disability, and schizophrenia.

Prerequisite(s): NPB 110B or NPB 100; or consent of instructor. BIS 101 recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 134 – General Immunology for Physiologists (3 units)

Course Description: Immunology for undergrads interested in physiology aimed at understanding the physiological role of immune responses.

Illustrated with examples of human diseases including diabetes, allergies and asthma, and emerging diseases such as Ebola and Zika.

Prerequisite(s): NPB 101 C- or better or NPB 110C C- or better; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 136 – Neural Networks & Machine Learning in Biology (4 units)

Course Description: Neural networks as models of brain function and as powerful tools in machine learning. How neuroscience and machine learning have shaped each other. Applications of machine learning tools to biological research and health.

Prerequisite(s): MAT 017C C or better or MAT 021B C or better; or consent of Instructor; some background in neuroscience, cognitive science or programming (any one of the three) is recommended.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 139 – Frontiers in Physiology (3 units)

Course Description: Lectures by leading authorities and discussion of the latest research in newly emerging areas in physiology. Offered every fourth year.

Prerequisite(s): NPB 100; NPB 101; NPB 102 (can be concurrent).

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

NPB 140 – Principles of Environmental Physiology (3 units)

Course Description: Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables.

Prerequisite(s): NPB 101 or NPB 110C; BIS 102 recommended.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed NPB 148. (Former NPB 148.)

Grade Mode: Letter.

General Education: Writing Experience (WE).

NPB 143 – Neurobiology & Pathophysiology of Mental Illness (3 units)

Course Description: Comparison of the neurobiology and physiology of mental health to the pathophysiology of mental illness. Causative factors of mental illness (e.g., genetic, social, environmental) through a neurobiology and pathophysiology lens (e.g., neurotransmission, neuroimmunology, nervous system malfunction).

Prerequisite(s): NPB 100 C- or better; or NPB 110B C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 150 – Advanced Animal Behavior (4 units)

Course Description: Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals.

Prerequisite(s): NPB 102 or PSC 101; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Cross Listing: PSC 122.

Grade Mode: Letter.

NPB 152 – Hormones & Behavior (3 units)

Course Description: Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress.

Prerequisite(s): (NPB 101 or NPB 110C); (NPB 102 or PSC 101).

Learning Activities: Lecture 3 hour(s).

Cross Listing: PSC 123.

Grade Mode: Letter.

NPB 154 – Diabetes: Physiology & Management (4 units)

Course Description: Normal regulation of blood glucose contrasted with dysfunction in diabetes. Types of diabetes, physiological consequences of diabetes, as well as current and future medications and treatments.

Prerequisite(s): NPB 110C or NPB 101.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

NPB 157 – Advanced Physiology of Animal/Human Disease (3 units)

Course Description: Centers on fundamental mechanisms and pathophysiological basis for animal and human diseases. Case-based and uses animal and human diseases to help exemplify the physiological consequences of organ dysfunction.

Prerequisite(s): NPB 101 B+ or better or NPB 110C B+ or better; consent of instructor.

Learning Activities: Lecture 1 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Limited to 35 students initially.

Cross Listing: HPH 157.

Grade Mode: Letter.

NPB 159 – Frontiers in Behavior (3 units)

Course Description: Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year.

Prerequisite(s): (NPB 100, NPB 101, NPB 102) or (NPB 110A, NPB 110B, NPB 110C).

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

NPB 161 – Developmental Neurobiology (3 units)

Course Description: Issues, theoretical concepts, and methodologies in developmental neurobiology. Topics include prenatal and postnatal differentiation of neurons, and plasticity in the mature and aging brain. Integration of neurochemical, structural, physiological and behavioral perspectives.

Prerequisite(s): NPB 100 or NPB 101 or NPB 110B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 162 – Neural Mechanisms of Behavior (3 units)

Course Description: Relationship between brain and behavior.

Identification and analysis of the relevant neural circuits involved.

Examples of systems to be considered are birdsong, locomotion, echolocation.

Prerequisite(s): NPB 100 or NPB 101 or NPB 110B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NPB 163 – Systems Neuroscience (4 units)

Course Description: Concepts and techniques in systems neuroscience: e.g., measuring and manipulating neural activity, structure of neocortex, sensory processing, motor control, storage of information, neural codes, neural mechanisms underlying cognitive functions.

Prerequisite(s): NPB 100 or NPB 110B; or equivalent basic neuroscience training with consent of instructor.

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 164 – Mammalian Vision (4 units)

Course Description: Structure and function of the mammalian visual system, from the formation of images on the retina through visually guided behavior and perception. Emphasis on biological mechanisms underlying vision.

Prerequisite(s): NPB 100 or NPB 110B or PSC 101.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

NPB 165 – Neurobiology of Speech Perception (3 units)

Course Description: Interdisciplinary approach to speech perception with emphasis on functional neuroanatomy and behavior. Topics include auditory processing in time and space, intelligibility in noisy environments, visual speech, evolution of vocal communication, models of speech perception, development, and hearing impairment.

Prerequisite(s): NPB 110B or NPB 100 or NPB 101; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Scientific Literacy (SL).

NPB 166 – Math Tools for Neuroscience (4 units)

Course Description: Introduction to mathematics techniques used in neuroscience. Applications to neuroscience of differential equations, linear algebra, Fourier transforms, correlation and convolution, and probability theory.

Prerequisite(s): (NPB 100 or NPB 110B); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C); or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

NPB 167 – Computational Neuroscience (5 units)

Course Description: Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB.

Prerequisite(s): (NPB 100 or NPB 110B); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C); or consent of instructor; PHY 007A, PHY 007B or equivalent recommended.

Learning Activities: Lecture 4 hour(s), Lecture/Lab 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 168 – Neurobiology of Addictive Drugs (4 units)

Course Description: Neurobiological basis for the effects and mechanisms of action of drugs with addictive potential, including opiates (morphine, heroin, methadone), amphetamines, cocaine, nicotine, marijuana (cannabinoids), alcohol, caffeine, and mind-altering drugs such as LSD and antidepressants.

Prerequisite(s): NPB 100 or NPB 110B or NPB 110C or NPB 101; or equivalents.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Scientific Literacy (SL); Visual Literacy (VL).

NPB 169 – Frontiers in Neurobiology (3 units)

Course Description: Lectures by leading authorities and discussion of the latest research in newly emerging areas in neurobiology. Offered every fourth year.

Prerequisite(s): NPB 100 or NPB 110A.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

NPB 171 – Physiology of Neuroimmune Interactions (4 units)

Course Description: Explores the complex interactions of the nervous and immune systems, and examine how the systems function together to serve homeostasis, behavior, and disease (such as Alzheimer's, autism, and multiple sclerosis).

Prerequisite(s): BIS 002A; (NPB 012 (can be concurrent) or NPB 100 (can be concurrent) or NPB 110B (can be concurrent)); or consent of instructor; completion of PMI 126 or MMI 188 recommended prior to this course.

Learning Activities: Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Scientific Literacy (SL).

NPB 172 – Map Formation in the Brain (3 units)

Course Description: Topographic map connection is a fundamental principle for establishing neural network in the brain. Provides comprehensive understanding of the current concepts of map formation in various sensory and motor nervous systems.

Prerequisite(s): NPB 100 C- or better or NPB 110B C- or better; or equivalent basic neuroscience training with consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NPB 173 – Neurobiology of Brain Disorders (3 units)

Course Description: Examination of brain disorders from a basic science perspective to gain insights into the mechanisms of their action. Genetic, molecular, cellular, circuit, and environmental basis of a variety of brain disorders. How insights about underlying mechanisms may lead to the development of improved therapies.

Prerequisite(s): NPB 110B or NPB 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NPB 190C – Research Conference (1 unit)

Course Description: Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students.

Prerequisite(s): NPB 199 (can be concurrent); and consent of instructor; upper division standing in Neurobiology, Physiology, and Behavior or related biological science; NPB 199 required concurrently.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

NPB 192 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in neurobiology, physiology, & behavior.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

NPB 194HA – Neurobiology, Physiology, & Behavior: Honors (1 unit)

Course Description: Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. Project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project.

Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor.

Learning Activities: Laboratory 12 hour(s).

Grade Mode: Pass/No Pass only.

NPB 194HB – Neurobiology, Physiology & Behavior: Honors (4 units)

Course Description: Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. Project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project.

Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor.

Learning Activities: Laboratory 12 hour(s).

Grade Mode: Pass/No Pass only.

NPB 194HC – Neurobiology, Physiology, & Behavior: Honors (2 units)

Course Description: Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. Project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project.

Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor.

Learning Activities: Laboratory 12 hour(s).

Grade Mode: Pass/No Pass only.

NPB 197T – Tutoring in Neurobiology, Physiology, & Behavior (1-5 units)

Course Description: Assisting the instructor by tutoring students in one of the Department's regular courses.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Discussion 2-6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

NPB 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NPB 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NPB 211 – Advanced Topics in Neuroimaging (3 units)

Course Description: Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG.

Prerequisite(s): PSC 210; or consent of instructor.

Learning Activities: Seminar 2 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to 16 students.

Repeat Credit: May be repeated when topic differs.

Cross Listing: NSC 211, PSC 211.

Grade Mode: Satisfactory/Unsatisfactory only.

NPB 212 – Light & Fluorescence Microscopy (3 units)

Course Description: Theory and practical application of light and fluorescence microscopy in the biological sciences. Laboratory component focuses on an optics bench, where we build simple compound and confocal microscopes on an optical rail.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to 16 students.

Grade Mode: Letter.

NPB 217 – Advanced Avian Physiology (1 unit)

Course Description: Study in depth of a topic in avian physiology through development of a lecture with associated instructional materials such as lesson plan, readings, presentation, and evaluation aids.

Prerequisite(s): NPB 117 required concurrently; and consent of instructor; graduate standing.

Learning Activities: Project 1 hour(s).

Grade Mode: Letter.

NPB 221 – Cellular Neuroscience (4 units)

Course Description: Advanced course on cellular and subcellular organization of the nervous system. Membrane channels, sensory transduction, synaptic transmission and cellular aspects of development and learning.

Learning Activities: Lecture 3 hour(s), Discussion 1.50 hour(s).

Grade Mode: Letter.

NPB 222 – Systems Neuroscience (5 units)

Course Description: Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Cross Listing: NSC 222.

Grade Mode: Letter.

NPB 245 – Computational Models of Cellular Signaling (3 units)

Course Description: Computational and mathematical techniques in modeling of regulatory and signaling phenomena in neurobiology and cell physiology, focusing on linear and nonlinear ordinary differential equation models. Applications include ion channel kinetics, electrical activity, signal transduction, calcium oscillations, and simple neural circuits.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NPB 247 – Topics in Functional Neurogenomics (2 units)

Course Description: The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Cross Listing: NSC 247.

Grade Mode: Letter.

NPB 261A – Topics in Vision: Eyes & Retinal Mechanisms (2 units)

Course Description: Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing.

Prerequisite(s): NPB 100 or NPB 112; or the equivalent; graduate standing.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NSC 261A, MCP 261A.

Grade Mode: Satisfactory/Unsatisfactory only.

NPB 261B – Topics in Vision: Systems, Psychophysics, Computational Models (2 units)

Course Description: Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system.

Prerequisite(s): Consent of instructor; NPB 261A recommended.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NSC 261B, MCP 261B.

Grade Mode: Satisfactory/Unsatisfactory only.

NPB 261C – Topics in Vision: Clinical Vision Science (2 units)

Course Description: Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease.

Prerequisite(s): NPB 261A; NPB 261B; or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NSC 261C, MCP 261C.

Grade Mode: Satisfactory/Unsatisfactory only.

NPB 263 – Modeling in Systems Neuroscience (4 units)

Course Description: Modeling as a tool in systems neuroscience.

Mathematical techniques will be introduced and used to explore advanced topics in echolocation, sound localization, electroreception, communications, and motor systems. Other topics include transforms, modeling assumptions, scales and linearity.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Lecture/Lab 1 hour(s).

Grade Mode: Letter.

NPB 267 – Computational Neuroscience (5 units)

Course Description: Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB.

Prerequisite(s): One course in general Neuroscience at the level of NPB 100 or NPB 110B; one year college-level Calculus at the level of MAT 016A, MAT 016B, MAT 016C or higher; one year Physics at the level of PHY 007A, PHY 007B, PHY 007C recommended; or consent of instructor.

Learning Activities: Lecture 4 hour(s), Lecture/Lab 3 hour(s).

Cross Listing: NSC 267.

Grade Mode: Letter.

NPB 270 – How to Write a Fundable Grant Proposal in the Biomedical Sciences (2 units)

Course Description: Teaches the do's and don'ts of writing grants in the biomedical sciences and the mechanisms of the review process.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to members of the Neuroscience and BMCDB graduate groups; graduate students in other biomedical programs may enroll with instructor permission.

Repeat Credit: May be repeated.

Cross Listing: NSC 270.

Grade Mode: Letter.

NPB 271A – Core Concepts & Methods in Learning, Memory, & Plasticity (2 units)

Course Description: Core concepts and methods used in studies of learning, memory and plasticity. Behavioral paradigms and measurement approaches in human and animal studies of learning and plasticity, as well as a consideration of the functional, anatomical and neuronal mechanisms underlying brain plasticity.

Prerequisite(s): Graduate Standing or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: PSC 271A, NSC 271A.

Grade Mode: Satisfactory/Unsatisfactory only.

NPB 271B – Core Concepts & Methods in Learning, Memory, & Plasticity (2 units)

Course Description: Core concepts and detailed survey methods used in studies of learning, memory and plasticity, from the cellular and molecular level to the level of neural circuits. Areas of learning, memory, and plasticity research where recent progress has been made in linking across these levels of analysis.

Prerequisite(s): NPB 271A or NSC 271A or PSC 271A.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: PSC 271B, NSC 271B.

Grade Mode: Satisfactory/Unsatisfactory only.

NPB 271C – Translational Approaches to Learning, Memory, & Plasticity Disorders (2 units)

Course Description: Neurological disorders, the effect of these disorders on learning, memory and plasticity, approved therapeutic options and current research designed to improve understanding and treatment of these diseases: (i) the clinical presentation, diagnostic criteria, and existing therapies, (ii) mechanistic studies in humans and animal models, and (iii) molecular pathways involved in the disease and approaches for drug discovery.

Prerequisite(s): NPB 271B or NSC 271B or PSC 271B.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: PSC 271C, NSC 271C.

Grade Mode: Satisfactory/Unsatisfactory only.

NPB 285 – Literature in Visual Neuroscience (2 units)

Course Description: Literature in visual Neuroscience.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Cross Listing: NSC 285.

Grade Mode: Satisfactory/Unsatisfactory only.

NPB 287A – Topics in Theoretical Neuroscience (2 units)

Course Description: In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Repeat Credit: May be repeated.

Cross Listing: NSC 287A.

Grade Mode: Satisfactory/Unsatisfactory only.

NPB 287B – Topics in Theoretical Neuroscience (2 units)

Course Description: In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Cross Listing: NSC 287B.

Grade Mode: Satisfactory/Unsatisfactory only.

NPB 291 – Auditory Neuroscience (1 unit)

Course Description: Exploration of various important aspects of auditory physiology, behavior and psychophysics through review of original literature. New topic each quarter.

Prerequisite(s): NPB 100 or NPB 112 or NSC 222; or the equivalent.

Learning Activities: Seminar 0.50 hour(s), Discussion 0.50 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

Neurology (NEU)

School of Medicine

NEU 103 – Human Clinical Neuroanatomy (4 units)

Course Description: Clinically relevant anatomy of the normal human nervous system, including external and internal anatomy of the brain, spinal cord, and cranial nerves. Blood supply to the brain and spinal cord. Functional neuroanatomy of motor, sensory, and cognitive systems. Application of neuroanatomical principles relevant to clinical problem solving for students entering health care professions.

Prerequisite(s): CHA 101; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to upper division students.

Cross Listing: CHA 103.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NEU 199 – Individual Special Study & Research (1-4 units)

Course Description: Individual special study in neurophysiology and biomedical engineering is offered to qualified students. Studies on psychophysics, single-unit electrophysiology and instrumentation are offered in Davis.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NEU 298 – Group Study (1-5 units)

Course Description: For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

NEU 299 – Individual Special Study & Research (1-12 units)

Course Description: Individual special study and research in Neurophysiology and Biomedical engineering is offered at both Davis and Sacramento Medical Center.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 3-36 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

NEU 420 – Clinical Neurosciences (2 units)

Course Description: Pathophysiology underlying neurological disorders, including disorders of development, muscle, nerve, cerebral circulation, metabolism, myelin, cortical function, movement, cerebrospinal fluid, autonomic function and special senses. Anatomical basis of clinical testing, nervous system infection, neoplasia and trauma.

Learning Activities: Lecture/Discussion 1 hour(s), Lecture 1.50 hour(s).

Enrollment Restriction(s): Restricted to Medical Students only.

Grade Mode: Pass/Fail only.

NEU 440 – Where Drugs Come From: How They are Discovered, Developed, Regulated, & Marketed (3-6 units)

Course Description: Includes the following topics: Overview of the Drug Discovery Process; Drug Regulation in the United States; Patents and Other Forms of Exclusivity; Drug Targets and Pharmacology; Identification of Lead Candidates; Preclinical Assessment; ADME Including Basic Pharmacokinetic Principles; Principles of Drug Toxicity; Principles of Drug Safety; Clinical Trials; Generic Drugs; Pharmaceutical Industry; Drug Distribution and Marketing; Dietary Supplements; Controlled Substances.

Learning Activities: Lecture.

Grade Mode: Honors/Pass/Fail.

NEU 450 – Clinical Neurology Clerkship (3-6 units)

Course Description: Critical elements of neurological clinical skills (history & exam) and basic and clinical neurological concepts expected for general residency preparation. Active, didactic, experiential and independent learning to encourage maturation of general professional competencies.

Prerequisite(s): Open to all fourth-year medical students; third-year medical students with consent of instructor.

Learning Activities: Clinical Activity 24 hour(s), Conference 12 hour(s), Seminar 4 hour(s), Independent Study 10 hour(s).

Enrollment Restriction(s): Restricted to six students per rotation.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

NEU 452 – Advanced Clinical Neurology (6 units)

Course Description: Teaches the principles and skills necessary to recognize and manage the neurologic diseases a general medical practitioner is most likely to encounter in practice. Gain clinical experience in both inpatient and outpatient settings, and learn how to interview patients and their caregivers to obtain a complete and reliable neurologic history and perform a reliable neurologic examination.

Prerequisite(s): Consent of instructor; completion of four-week Neurology selective.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

NEU 455 – Child Neurology (1-12 units)

Course Description: Exposure to children with disorders of the nervous system, both in outpatient and inpatient services. Cases presented to a member of full-time faculty who will discuss clinical findings, differential diagnosis, management and therapy. Satisfies fourth-year neuroscience requirement.

Prerequisite(s): IMD 430; OBG 430; PED 430; consent of instructor.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

NEU 460 – Externship in Neurology (3-6 units)

Course Description: Externship course for Neurology rotations not meeting the qualifications to be an Acting Internship.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

NEU 462 – Externship in Advanced Neurology (3-6 units)

Course Description: Away rotation in Neurology where coursework meets the standards to be counted as an Acting Internship.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

NEU 493F – Issues in Geriatric Care (6 units)

Course Description: Four-week module teaches an approach to common problems in the elderly through history and exam, with an emphasis on integration of underlying anatomy, physiology, and pathophysiology in common geriatric presentations.

Learning Activities: Seminar.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

NEU 498NE – Group Study in Neurology (1-6 units)

Course Description: Directed readings and discussions with a comprehensive written examination at the end of course.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Variable 3-5 hour(s).

Grade Mode: Pass/Fail only.

NEU 499 – Research (1-12 units)

Course Description: Approved for graduate degree credit. Laboratory investigation on selected topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 2-24 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Neuroscience (NSC)**Graduate Studies****NSC 200LA – Laboratory Methods in Neurobiology (6 units)**

Course Description: Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design.

Prerequisite(s): Graduate standing in the Neuroscience Graduate Group.

Learning Activities: Laboratory 18 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 200LB – Laboratory Methods in Neurobiology (3 units)

Course Description: Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design.

Prerequisite(s): Graduate standing in the Neuroscience Graduate Group.

Learning Activities: Laboratory 9 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 201 – Neuroanatomy (3 units)

Course Description: Mix of lectures, demonstrations, and dissections, emphasizing functional significance of neuroanatomy from a biological perspective, with comparisons between human and non-human brains. Emphasis placed on functional anatomy of the nervous system, integrated with cellular, molecular, cognitive, and developmental concepts.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

NSC 211 – Advanced Topics in Neuroimaging (3 units)

Course Description: Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG.

Prerequisite(s): PSC 210; or consent of instructor.

Learning Activities: Seminar 2 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to 16 students.

Repeat Credit: May be repeated when topic differs.

Cross Listing: NPB 211, PSC 211.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 219 – Design to Data: Statistics for Modern Neuroscience (4 units)

Course Description: Statistical methods and applications for neuroscience. Quantitative foundations covering key concepts, methods, and applications, from descriptive analysis through data science. Statistical considerations in experimental design, analysis and statistical testing in hypothesis and data-driven contexts, and responsible conduct of research in the acquisition, storage, analysis, and presentation of scientific data.

Prerequisite(s): Graduate student standing in neuroscience or related discipline or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

NSC 220 – How to Give a Scientific Seminar (3 units)

Course Description: Presentation of effective seminars. Student presentations of selected neuroscience topics in seminar format. Must be taken in two consecutive quarters.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

NSC 221 – Cellular Neurophysiology (4 units)

Course Description: Physiological aspects of cellular and subcellular organization of the nervous system. Neuronal cell biology, the structure and function of ion channels, electrical excitability, signaling cascades, sensory transduction and, mechanisms of synaptic transmission, and the cellular basis of learning and memory.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 4.50 hour(s).

Grade Mode: Letter.

NSC 222 – Systems Neuroscience (5 units)

Course Description: Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Cross Listing: NPB 222.

Grade Mode: Letter.

NSC 223 – Cognitive Neuroscience (4 units)

Course Description: Graduate core course for neuroscience.

Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence.

Prerequisite(s): Graduate student standing in Psychology or Neuroscience or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: PSC 261.

Grade Mode: Letter.

NSC 224A – Molecular & Developmental Neurobiology (2 units)

Course Description: Key issues in developmental and molecular neurobiology. Discussion emphasis on critical evaluation of the experiments and methods described in research papers. Readings of seminal, primary research papers, reviews, and book chapters. Reading materials will be distributed one week in advance.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

NSC 224B – Molecular & Developmental Neurobiology (2 units)

Course Description: Continuation of NSC 224A. Key issues in developmental and molecular neurobiology, focusing on developmental topics. Discussion emphasis on critical evaluation of experiments and methods described in associated literature.

Prerequisite(s): NSC 224A; or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

NSC 225 – Translational Research in the Neurobiology of Disease (2 units)

Course Description: Provides an overview of major neuropsychiatric and neurological disorders from both the clinical and fundamental science perspectives.

Prerequisite(s): NSC 221 (can be concurrent); NSC 222 (can be concurrent); NSC 223 (can be concurrent); or consent of instructor; past or concurrent enrollment in NSC 221 NSC 222 NSC 223.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

NSC 226 – Molecular & Developmental Neurobiology (4 units)

Course Description: Key issues in developmental and molecular neurobiology. Topics include neural induction and patterning, neurogenesis, axon guidance, synapse development and remodeling. Discussion emphasis on critical evaluation of the experiments and methods described in primary seminal research papers and current literature.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

NSC 243 – Topics in Cellular & Behavioral Neurobiology (2 units)

Course Description: An advanced examination of several current problems in neurobiology. Topics vary in different years.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s), Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 247 – Topics in Functional Neurogenomics (2 units)

Course Description: The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Cross Listing: NPB 247.

Grade Mode: Letter.

NSC 250 – Biology of Neuroglia (2 units)

Course Description: The properties and functions of non-neuronal or neuroglial cells in the mammalian central nervous system with relevance to neuronal development, physiology and injury response.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1.50 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 261A – Topics in Vision: Eyes & Retinal Mechanisms (2 units)

Course Description: Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing.

Prerequisite(s): NPB 100 or NPB 112; or the equivalent; graduate standing.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NPB 261A, MCP 261A.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 261B – Topics in Vision: Systems, Psychophysics, Computational Models (2 units)

Course Description: Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system.

Prerequisite(s): Consent of instructor; NSC 261A recommended.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NPB 261B, MCP 261B.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 261C – Topics in Vision: Clinical Vision Science (2 units)

Course Description: Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease.

Prerequisite(s): NSC 261A; NSC 261B; or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NPB 261C, MCP 261C.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 267 – Computational Neuroscience (5 units)

Course Description: Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB.

Prerequisite(s): Consent of instructor; one course in general Neuroscience at the level of NSC 100; or NPB 110B; one year college-level Calculus at level of MAT 016A, MAT 016B, MAT 016C or higher; one year Physics at the level of PHY 007A, PHY 007B, PHY 007C, recommended; or consent of instructor.

Learning Activities: Lecture 4 hour(s), Lecture/Lab 3 hour(s).

Cross Listing: NPB 267.

Grade Mode: Letter.

NSC 270 – How to Write a Fundable Grant Proposal in the Biomedical Sciences (2 units)

Course Description: Teaches the do's and don'ts of writing grants in the biomedical sciences and the mechanisms of the review process.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to members of the Neuroscience and BMCDB graduate groups; graduate students in other biomedical programs may enroll with instructor permission.

Repeat Credit: May be repeated.

Cross Listing: NPB 270.

Grade Mode: Letter.

NSC 271A – Core Concepts & Methods in Learning, Memory, & Plasticity (2 units)

Course Description: Core concepts and methods used in studies of learning, memory and plasticity. Behavioral paradigms and measurement approaches in human and animal studies of learning and plasticity, as well as a consideration of the functional, anatomical and neuronal mechanisms underlying brain plasticity.

Prerequisite(s): Graduate Standing or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: PSC 271A, NPB 271A.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 271B – Core Concepts & Methods in Learning, Memory, & Plasticity (2 units)

Course Description: Core concepts and detailed survey methods used in studies of learning, memory and plasticity, from the cellular and molecular level to the level of neural circuits. Areas of learning, memory, and plasticity research where recent progress has been made in linking across these levels of analysis.

Prerequisite(s): NSC 271A or NPB 271A or PSC 271A.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: PSC 271B, NPB 271B.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 271C – Translational Approaches to Learning, Memory, & Plasticity Disorders (2 units)

Course Description: Neurological disorders, the effect of these disorders on learning, memory and plasticity, approved therapeutic options and current research designed to improve understanding and treatment of these diseases: (i) the clinical presentation, diagnostic criteria, and existing therapies, (ii) mechanistic studies in humans and animal models, and (iii) molecular pathways involved in the disease and approaches for drug discovery.

Prerequisite(s): NSC 271B or NPB 271B or PSC 271B.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: PSC 271C, NPB 271C.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 283 – Neurobiological Literature (1 unit)

Course Description: Critical presentation and analysis of recent journal articles in neurobiology.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 284 – Development of Sensory Systems (1 unit)

Course Description: Presentation and discussion of recent literature on the development of sensory systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 285 – Literature in Visual Neuroscience (2 units)

Course Description: Critical presentation and discussion of current literature in visual neuroscience.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated when topic differs.

Cross Listing: NPB 285.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 286 – Frontiers in Biology of Glia (1 unit)

Course Description: Frontiers of glial biology. Research articles in current literature on experimental approaches, technical aspects of experimental techniques, data interpretation, and other topics.

Prerequisite(s): Consent of instructor

Learning Activities: Seminar 3 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 287A – Topics in Theoretical Neuroscience (2 units)

Course Description: In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Repeat Credit: May be repeated.

Cross Listing: NPB 287A.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 287B – Topics in Theoretical Neuroscience (2 units)

Course Description: In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Cross Listing: NPB 287B.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 289 – Topics in Molecular & Developmental Neurobiology (2 units)

Course Description: Analysis and discussion of seminal and current research papers in molecular and developmental neurobiology. Different topics will be covered each quarter. In the past topics have included, "Synaptic vesicle dynamics," "Neuronal polarity," and "Glutamate receptors."

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 10 time(s) when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 290C – Research Conference in Neurobiology (1 unit)

Course Description: Presentation and discussion of faculty and graduate student research in neurobiology.

Prerequisite(s): NSC 299 required concurrently; graduate standing in Neuroscience or consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 292 – Cortical Plasticity & Perception (2 units)

Course Description: Examination of research articles on cortical plasticity and changes in perception. Examples drawn from studies of the somatosensory, visual, auditory, and motor cortex.

Prerequisite(s): NPB 100 or NPB 112; or equivalent or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 295 – Literature in Neuroengineering (2 units)

Course Description: Critical presentation and discussion of current literature in neuroengineering.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Repeat Credit: May be repeated.

Cross Listing: BIM 295.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

NSC 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Neurosurgery (NSU)

School of Medicine

NSU 199 – Special Study in Neurosurgery for Advanced Undergraduates (1-5 units)

Course Description: Students may participate in ongoing neurosurgical projects or may pursue and design independent projects.

Prerequisite(s): Advanced undergraduate standing with consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NSU 299 – Neurosurgery Research (3-12 units)

Course Description: Student may participate in ongoing neurosurgical projects or may pursue and design independent projects.

Prerequisite(s): Graduate student with consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

NSU 451 – Neurosurgical Critical Care Clerkship (3 units)

Course Description: Students participate in the care of neurosurgical patients in the NSICU and in the admission and surgical management of patients admitted through the Emergency Room.

Prerequisite(s): Third- or fourth-year medical student having completed a neurosurgical clerkship or consent of instructor.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

NSU 455 – Clinical Pediatric Neurosurgery (6 units)

Course Description: Admission and follow-up of pediatric patients.

Neurological history, examination, and diagnostic procedures are emphasized. Students will participate in surgical procedures and are required to attend all pediatric neurosurgery conferences.

Prerequisite(s): NSU 460; consent of instructor; third- or fourth-year medical students.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

NSU 460 – Clinical Neurosurgery (3-18 units)

Course Description: Approved for graduate degree credit. Admission and follow-up of patients. Neurological history, examination, and further diagnostic procedures emphasized. Participate in meaningful aspects of surgical procedures and attend listed conferences, rounds, and seminars.

Prerequisite(s): Consent of instructor; third- and fourth-year medical students.

Learning Activities: Variable, Clinical Activity.

Grade Mode: Honors/Pass/Fail.

NSU 464 – Externship (3-9 units)

Course Description: Clerkship in neurosurgery to be arranged at another institution with accredited residency program in neurosurgery under proper supervision.

Prerequisite(s): Fourth-year medical student having completed a neurosurgical clerkship or consent of instructor.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

NSU 465 – Neurocritical Care (6-18 units)

Course Description: In this Acting Internship, learn and practice how to safely assess and manage acutely ill patients with life-threatening neurologic and neurosurgical disease or life-threatening neurologic manifestations of systemic disease as part of our multidisciplinary neurocritical care team.

Learning Activities: Internship.

Grade Mode: Honors/Pass/Fail.

NSU 466 – Neurocritical Care (NSICU) (3-8 units)

Course Description: Participate in the care of neurosurgical patients in the NSICU and in the admission and surgical management of patients admitted through the Emergency Room.

Learning Activities: Variable.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Honors/Pass/Fail Only.

NSU 470 – Advanced Clinical Neurosurgery (6-18 units)

Course Description: Student will function as acting intern on neurosurgery service. Admission and management of patients. Neurological history, examination, diagnostic procedures, and surgical management are emphasized. Students participate in meaningful aspects of surgical procedures and attend required conferences and rounds.

Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

NSU 474 – Away Acting Internship in Neurosurgery (6-18 units)

Course Description: Away acting internship in Neurosurgery.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

NSU 480 – Insights in Neurosurgery (1-3 units)

Course Description: Observation of neurosurgical care in emergency room, operating room and hospital floors, including manner of treatment of a variety of chronic and acute neurological diseases.

Prerequisite(s): Consent of instructor; first- and second-year medical students in good academic standing.

Learning Activities: Clinical Activity 3-9 hour(s).

Grade Mode: Honors/Pass/Fail.

NSU 499 – Neurosurgery Research (1-18 units)

Course Description: Student may participate in ongoing neurosurgical projects or may pursue and design independent projects.

Prerequisite(s): Medical student with consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Nursing (NRS)**Graduate Studies****NRS 200AY – Quantitative Design & Data Collection in Nursing & Healthcare (3 units)**

Course Description: Introduction to quantitative study designs, common methods for sampling, data collection, and instrument selection.

Implications of various design and methods choices on causal inference, internal and external validity, and ethical considerations.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s); Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 200BY – Quantitative Research Methods in Nursing & Healthcare (3 units)

Course Description: Foundational approaches to describing and analyzing quantitative data. Assumptions and appropriate selection of basic descriptive and inferential statistics, and interpreting and communicating the results.

Prerequisite(s): NRS 200AY B- or better; or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s); Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 200CY – Applied Quantitative Analysis in Nursing & Healthcare (3 units)

Course Description: Practice of quantitative data analysis. Develop research questions using quantitative methods, identify appropriate datasets, prepare data, conduct secondary analysis, and report results.

Prerequisite(s): NRS 200BY B- or better; or consent of Instructor.

Learning Activities: Lecture/Discussion 2 hour(s); Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 201 – Health Status & Care Systems (4 units)

Course Description: Comparative health status data, major current health issues globally, nationally, regionally. Theoretical perspectives on social, political, economic determinants of health. Health-care systems examined, linked to data, and evaluated in regards to outcomes. Aging, rural, ethnic minority populations highlighted.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion/Laboratory, Project.

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 202 – Implementation Science (4 units)

Course Description: Change processes in health care from political, historic, economic and sociologic frameworks. Historic and current examples of transformative change in the health-care system. Skills for system transformation through health policy, practice, research and education are emphasized.

Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 203 – Leadership in Health Care (4 units)

Course Description: Critical examination of leadership from a variety of theoretical and philosophical perspectives and focuses on specific challenges in health care and leadership at various levels, e.g., patient, organizational, and policy levels.

Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork.

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 204 – Research Skills for Nursing Science & Health-Care Leadership (4 units)

Course Description: Foundation for analyzing research, health, and systems data to answer clinical, systems, or policy questions. Use and examine multiple sources of data and information as a basis for planned change and transformation in health care.

Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 205 – Research Design in Nursing & Health Care (4 units)

Course Description: Major types of quantitative and qualitative research design and their application to nursing and health-care research.

Implications of choosing alternative research designs and critical analysis of philosophical underpinnings. Evaluation of control and validity, sampling, instruments to measure health concepts.

Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 205A – Overview of Research in Nursing Science & Health Care (2 units)

Course Description: Provides an overview of quantitative and qualitative paradigms in scientific inquiry and the major designs related to each paradigm. First of a three-course series on research design and methods in nursing science and healthcare research.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 205B – Quantitative Research in Nursing Science & Health Care (4 units)

Course Description: Introduces principles of quantitative data collection and analysis as applied to major study designs in nursing and health-care research. Provides a basic foundation for producing, interpreting, and applying quantitative research findings to answer clinical, system, and policy questions.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 205C – Qualitative Research in Nursing Science & Health Care (4 units)

Course Description: Introduces principles of qualitative data collection and analysis as applied to major study designs in nursing and health-care research. Provides a basic foundation for producing, interpreting, and applying qualitative research findings to answer clinical, system, and policy questions.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 206 – Community Connections (2-5 units)

Course Description: Community-based learning and experiences including community participation, assessment, data collection and analysis using multiple approaches, community health improvement projects, collaborative leadership practice, all with the guidance of community members and nursing faculty.

Learning Activities: Variable 6 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NRS 207AY – Introduction to Qualitative Design in Nursing & Healthcare (3 units)

Course Description: Introduction to qualitative principles, epistemology, grounded theory, ethnography, and phenomenology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s); Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 207BY – Intermediate Qualitative Research Methods in Nursing & Healthcare (3 units)

Course Description: Ways to frame qualitative research questions. Data to address important knowledge gaps in the health sciences. Interactive exercises for considering independent research.

Prerequisite(s): NRS 207AY B- or better; or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s); Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to students enrolled in Nursing Science & Health-Care Leadership graduate program; or consent of instructor.

Grade Mode: Letter.

NRS 207CY – Advanced Qualitative Research Methods in Nursing & Healthcare (3 units)

Course Description: Practice of qualitative research. Select design, data collection and analytical techniques.

Prerequisite(s): NRS 207BY B- or better; or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s); Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 208AY – Philosophy of Science & History of PhD/Nursing Science (3 units)

Course Description: Introduction to thinking like a scientist, history of nursing research and philosophy of science. Debates about scientific research that coincided with the founding of Nursing Science in the middle of the 20th century.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 208BY – Logic & Scientific Inference (3 units)

Course Description: Concepts used in scientific research, critical thinking skills to examine the association between concepts and empirical evidence. Identifying new concepts that can be the analytic foundations of new research questions.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 208CY – Theoretical & Conceptual Frameworks in Nursing & Healthcare (3 units)

Course Description: Applied approach to introduce common theoretical and conceptual frameworks used in nursing and health sciences.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 209Y – Research Methods in Health Informatics (3 units)

Course Description: Introduction to empirical methods applicable to health informatics. Delineates planning, development and evaluation in health informatics research.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 210Y – Applied Health Informatics (4 units)

Course Description: Within the conceptual framework of the Foundation of Knowledge model, integrates nursing science, information science, computer science and cognitive science to acquire, process, generate and disseminate knowledge.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Web Virtual Lecture 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 211Y – Rural Health (2-3 units)

Course Description: Interprofessional graduate course provides an introduction to rural health theory, research, policy, and practice, with an emphasis on rural health assets and disparities.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 212 – Technology & Innovations in Health Care (2 units)

Course Description: Multidisciplinary approach to stimulate new thinking in the practice, process, and delivery of health care. Focus on improving overall health outcomes.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 213 – Race & Health in the United States (3 units)

Course Description: Race as a social construct and unequal health care distribution in the United States. Practical health care leadership to end racial inequalities in health.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 7.50 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 215Y – Leadership in Nursing & Healthcare Research (3 units)

Course Description: Healthcare leadership from a variety of theoretical and philosophical perspectives and specific challenges at various healthcare levels, e.g., patient, organizational, and policy levels.

Learning Activities: Web Virtual Lecture 1 hour(s), Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 220 – Social, Cultural, & Behavioral Determinants of Health (3 units)

Course Description: Effects of globalization, political systems, local and global economies, culture, race, class, gender, and sexuality on population health.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 221 – Biophysical Concepts in Nursing (3 units)

Course Description: Pathophysiological processes that contribute to different disease states across the lifespan; case studies; selective clinical decisions using current, reliable sources of pathophysiology information.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 222A – Research Quality Improvement & Evidence Based Practice (2 units)

Course Description: Introduction to providing safe, competent and compassionate care in a highly technical and digital environment. Emphasis on safety, quality and research to clinical practice. Accessing and analyzing reliable sources of evidence for integration in care-plan.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 222B – Research Quality Improvement & Evidence Based Practice (2 units)

Course Description: Introduction to providing safe, competent and compassionate care in a highly technical and digital environment. Emphasis on safety, quality and research to clinical practice. Accessing and analyzing reliable sources of evidence for integration in care-plan.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 223 – Quality & Safety Education in Health Care (3 units)

Course Description: Implementing best practices alongside technological tools and continuous quality improvement. Providing safe, competent care in a highly technical and digital environment. Building capacity to apply concepts related to safety, quality and research to clinical practice. *Prerequisite(s):* Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 224 – Developing Future Nurse Leaders (3 units)

Course Description: Effective decision-making, fiscal and environmental stewardship, initiating and maintaining effective working relationships, mutually respectful communication and collaboration, care coordination, delegation and supervision. Conflict resolution, leadership and interprofessional teamwork.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 225 – Professional Nursing Role Formation (3 units)

Course Description: Transition from nursing student to professional nurse. Focus on ethical comportment, professional values of social justice, autonomy, advocacy, altruism, human dignity, and integrity. Students must pass a mastery exit examination and complete a capstone project.

Prerequisite(s): NRS 202; NRS 203; NRS 212; NRS 220; NRS 221; NRS 222A; NRS 222B; NRS 223; NRS 224; NRS 272; NRS 273; NRS 420; NRS 421; NRS 422; NRS 423; NRS 424; NRS 425; NRS 426; NRS 427; NRS 429A; NRS 429B; NRS 429C; NRS 429D; NRS 429E; consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 233V – Leadership & Innovation in Healthcare (3 units)

Course Description: Critical examination of leadership from a variety of theoretical and philosophical perspectives. Specific challenges in health care and leadership at various levels; e.g., patient, organizational, and policy levels.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Credit Limitation(s): No credit to students who have previously completed NRS 203.

Grade Mode: Letter.

NRS 234V – Research & Evidence-Based Practice for Healthcare (3 units)

Course Description: Foundation for doctoral-level RNs to analyze research, health, and systems data to answer clinical, systems, or policy questions. Use and examine multiple sources of data and information as a basis for planned change and transformation in health care.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Credit Limitation(s): No credit to students who have previously completed NRS 204.

Grade Mode: Letter.

NRS 240V – Applied Health Informatics (3 units)

Course Description: Foundational knowledge about the health informatics field and practical applications that health professionals are likely to encounter in practice or in development and management of health programs.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Credit Limitation(s): No credit to students who have previously completed NRS 210Y.

Grade Mode: Letter.

NRS 242A – Implementation Science for Clinicians (2 units)

Course Description: Focuses on identification of relevant research or improvement questions specific to patient care and evaluating the pertinent research literature related to the implementation of evidence based care. First of a three-course series.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 242B – Implementation Science for Clinicians (2 units)

Course Description: Continuation of NRS 242A. Implementation Science for Clinicians, with a focus on implementing and evaluating a change.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 242C – Implementation Science for Clinicians (2 units)

Course Description: Advanced skills in application of implementation science into systems based practice and incorporating quality improvement and patient safety knowledge with particular focus on prevention of medical errors.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 243A – Leadership in Professional Practice (2 units)

Course Description: Critical examination of leadership using theoretical and philosophical perspectives with an applied approach applicable to clinical practice. Three-course series conducted across the first, third and eighth quarters.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 243B – Leadership in Professional Practice (1 unit)

Course Description: Introduces professional role topics including history of the profession, the role in interprofessional teams and the health care system, transitioning to the role from other health professions, scope of practice, certification and licensure and professional organizations.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 243C – Leadership in Professional Practice (1 unit)

Course Description: Expands upon the leadership role as it relates to their clinical practice and professional role. Professional role topics including: transitioning from student to practicing professional, scope of practice, the physician relationship, and more advanced concepts in ethics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 250 – Foundations of Primary Health Care (7 units)

Course Description: Designed to promote the understanding and clinical application of human anatomy, physiology, histology, immunology and pathology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 6 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 251A – Primary Health Care (8 units)

Course Description: Introduction to primary health care concepts essential to the care of common medical problems seen in primary care settings.

Module content will focus on various organ systems and specialty areas.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 8 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 251B – Foundations of Primary Health Care (8 units)

Course Description: Introduction to primary health care concepts essential to the care of common medical problems seen in primary care settings.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 8 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 251C – Primary Heath Care (8 units)

Course Description: Introduction to primary health care concepts essential to the care of common medical problems seen in primary care settings.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 8 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 251D – Primary Heath Care (6 units)

Course Description: Introduction to primary health care concepts essential to the care of common medical problems seen in primary care settings.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 6 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 260 – Foundations of Behavioral Health (1 unit)

Course Description: Focuses on the spectrum of normal psychological development over the lifespan for children, adults and elders. Theories of stress and coping mechanism are presented as a framework for the assessment of individuals.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 270 – Foundations of Pharmacology (2 units)

Course Description: Introduction to the major concepts in pharmacology and relevant human physiology related to pharmacotherapeutics and toxicology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 271A – Pharmacology (2 units)

Course Description: Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 271B – Pharmacology (2 units)

Course Description: Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 271C – Pharmacology (2 units)

Course Description: Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor.

Grade Mode: Letter.

NRS 272 – Foundations of Pharmacology (2 units)

Course Description: Theoretical background to providing safe and effective care related to drugs and natural products.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 273 – Pharmacology Concepts in Nursing (2 units)

Course Description: Application of principles for safe and effective use of medications and natural products; use of current, reliable information to make clinical decisions.

Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 275V – Advanced Pharmacology I (3 units)

Course Description: Principles of pharmacokinetics, pharmacodynamics, molecular pharmacology, and antimicrobial therapy. Scientific foundation for the courses that follow in pharmacology/pharmacotherapy.

Prerequisite(s): NRS 279V C or better; consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 276V – Advanced Pharmacology II (3 units)

Course Description: Pharmacotherapeutics for common, acute and chronic health conditions across the lifespan according to specialty areas of practice. Treatments for a variety of behavioral disorders, pediatrics, and women's health to monitor the physical and behavioral approaches to pharmacological interventions.

Prerequisite(s): NRS 275V C or better; NRS 277V C or better; NRS 278V C or better; consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 277V – Advanced Assessment Across the Lifespan (3 units)

Course Description: Advanced physical assessment skills and concepts necessary to care for patients in the context of family and community. Thorough health history and performing a complete head to toe physical exam. Instruction and practice utilize cognitive, effective, and behavioral objectives based on five domains: patient care, clinical knowledge, communication skills, professionalism, and life-long learning.

Prerequisite(s): NRS 279V C or better; consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 278V – Advanced Pathophysiology (4 units)

Course Description: Understanding and clinical application of human anatomy, physiology and pathophysiology. General pathophysiological concepts: cell injury, necrosis, inflammation, immunity, infection, tissue and healing processes, stress response, and neoplasia. System-based approach to human anatomy and investigated based on underlying biochemical, cellular and molecular genetic perturbations in homeostasis that result in human disease.

Prerequisite(s): NRS 279V C or better; consent of instructor.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 279V – Concepts of Behavioral Health (2 units)

Course Description: Fundamentals of social and behavioral science, with a focus on theoretical underpinnings of evidence-based communication skills and interventions. Health behaviors through the lens of human development and health behavior change theory, using theories of stress and coping mechanisms and the bio-psychological model as a framework for the assessment of individual, and including the impact of social determinants of health.

Prerequisite(s): Consent of instructor.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 280V – Professional Practice in Health Care (2 units)

Course Description: Transitions to the advanced practice health care provider role with emphasis on developing and enacting new functions; interpreting legal and professional requirements and regulations; exerting leadership; and examining the ethics, values, beliefs, and norms of decision-making in an interdisciplinary, collaborative practice.

Prerequisite(s): NRS 281DV C or better; NRS 282DY C or better; NRS 283DV C or better.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 281AV – APRN Family Practice A (3 units)

Course Description: Primary care services to individuals and families across populations. Advanced health assessment skills to manage common patient-reported problems or conditions. Course series varies by quarter to include different populations across the lifespan.

Prerequisite(s): NRS 276V C or better; NRS 409Y C or better; NRS 355V C or better; consent of Instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 281BV – APRN Family Practice B (3 units)

Course Description: Primary care services to individuals and families across populations. Advanced health assessment skills to manage common patient-reported problems or conditions. Course series varies by quarter to include different populations across the lifespan.

Prerequisite(s): NRS 281AV C or better; NRS 282AY C or better; NRS 283AV C or better; consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 281CV – APRN Family Practice C (3 units)

Course Description: Primary care services to individuals and families across populations. Advanced health assessment skills to manage common patient-reported problems or conditions. Course series varies by quarter to include different populations across the lifespan.

Prerequisite(s): NRS 281BV C or better; NRS 282BY C or better; NRS 283BV C or better; consent of Instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 281DV – APRN Family Practice D (3 units)

Course Description: Primary care services to individuals and families across populations. Advanced health assessment skills to manage common patient-reported problems or conditions. Course series varies by quarter to include different populations across the lifespan.

Prerequisite(s): NRS 281CV C or better; NRS 282CY C or better; NRS 283CV C or better; consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 282AY – Clinical A (5 units)

Course Description: Advanced health assessment skills to manage common patient-reported problems or conditions. Integrating health maintenance and promotion along with assessment, diagnosis, and management of frequently encountered acute and chronic conditions in primary care. Course series will vary by quarter to prepare family nurse practitioners (FNPs) to deliver primary care services to individuals and families and across the lifespan.

Prerequisite(s): NRS 276V C or better; NRS 279V C or better; NRS 409Y C or better.

Learning Activities: Clinical Activity 14 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 282BY – Clinical B (5 units)

Course Description: Advanced health assessment skills to manage common patient-reported problems or conditions. Integrating health maintenance and promotion along with assessment, diagnosis, and management of frequently encountered acute and chronic conditions in primary care. Course series will vary by quarter to prepare family nurse practitioners (FNPs) to deliver primary care services to individuals and families and across the lifespan.

Prerequisite(s): NRS 281AV C or better; NRS 282AY C or better; NRS 283AV C or better.

Learning Activities: Clinical Activity 14 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 282CY – Clinical C (5 units)

Course Description: Advanced health assessment skills to manage common patient-reported problems or conditions. Integrating health maintenance and promotion along with assessment, diagnosis, and management of frequently encountered acute and chronic conditions in primary care. Course series will vary by quarter to prepare family nurse practitioners (FNPs) to deliver primary care services to individuals and families and across the lifespan.

Prerequisite(s): NRS 281BV C or better; NRS 282BY C or better; NRS 283BV C or better.

Learning Activities: Clinical Activity 14 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 282DY – Clinical D (5 units)

Course Description: Advanced health assessment skills to manage common patient-reported problems or conditions. Integrating health maintenance and promotion along with assessment, diagnosis, and management of frequently encountered acute and chronic conditions in primary care. Course series will vary by quarter to prepare family nurse practitioners (FNPs) to deliver primary care services to individuals and families and across the lifespan.

Prerequisite(s): NRS 281CV C or better; NRS 282CY C or better; NRS 283CV C or better.

Learning Activities: Clinical Activity 14 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 282EY – Clinical E (3 units)

Course Description: Advanced health assessment skills to manage common patient-reported problems or conditions. Integrating health maintenance and promotion along with assessment, diagnosis, and management of frequently encountered acute and chronic conditions in primary care. Varies by quarter to prepare family nurse practitioners (FNPs) to deliver primary care services to individuals and families and across the lifespan.

Prerequisite(s): NRS 281DV C or better; NRS 282DY C or better; NRS 283DV C or better; or consent of instructor.

Learning Activities: Clinical Activity 8 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 282FY – Clinical F (3 units)

Course Description: Advanced health assessment skills to manage common patient-reported problems or conditions. Integrating health maintenance and promotion along with assessment, diagnosis, and management of frequently encountered acute and chronic conditions in primary care. Course series varies by quarter to prepare family nurse practitioners (FNPs) to deliver primary care services to individuals and families and across the lifespan.

Prerequisite(s): NRS 280V C or better; NRS 282EY C or better; or consent of instructor.

Learning Activities: Clinical Activity 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 283AV – Diagnostic Reasoning A (1 unit)

Course Description: Diagnosis and provide appropriate and safe treatment. Synthesize clinical data across practice environments to effectively enhance clinical reasoning. Clinical cases vary by quarter.

Prerequisite(s): NRS 276V C or better; NRS 409Y C or better; NRS 355V C or better; consent of instructor.

Learning Activities: Web Virtual Lecture 0.5 hour(s), Web Electronic Discussion 1.5 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 283BV – Diagnostic Reasoning B (1 unit)

Course Description: Diagnosis and provide appropriate and safe treatment. Synthesize clinical data across practice environments to effectively enhance clinical reasoning. Clinical cases vary by quarter.
Prerequisite(s): NRS 281AV C or better; NRS 282AY C or better; NRS 283AV C or better; consent of Instructor.
Learning Activities: Web Virtual Lecture 0.5 hour(s), Web Electronic Discussion 0.5 hour(s).
Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.
Grade Mode: Letter.

NRS 283CV – Diagnostic Reasoning C (1 unit)

Course Description: Diagnosis and provide appropriate and safe treatment. Synthesize clinical data across practice environments to effectively enhance clinical reasoning. Clinical cases vary by quarter.
Prerequisite(s): NRS 281BV C or better; NRS 282BY C or better; NRS 283BV C or better; consent of instructor.
Learning Activities: Web Virtual Lecture 0.5 hour(s), Web Electronic Discussion 0.5 hour(s).
Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.
Grade Mode: Letter.

NRS 283DV – Diagnostic Reasoning D (1 unit)

Course Description: Diagnosis and provide appropriate and safe treatment. Synthesize clinical data across practice environments to effectively enhance clinical reasoning. Clinical cases vary by quarter.
Prerequisite(s): NRS 281CV C or better; NRS 282CY C or better; NRS 283CV C or better; consent of instructor.
Learning Activities: Web Virtual Lecture 0.5 hour(s), Web Electronic Discussion 0.5 hour(s).
Enrollment Restriction(s): Current enrollment in the Nursing Science & Health-Care Leadership graduate program or consent of instructor.
Grade Mode: Letter.

NRS 290 – Master's Seminar (2 units)

Course Description: Subject varies from quarter to quarter. Current knowledge and issues relevant to one of two fields of emphasis: population health or health systems.
Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor.
Learning Activities: Discussion 2 hour(s).
Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.
Repeat Credit: May be repeated 10 time(s).
Grade Mode: Letter.

NRS 291 – Doctoral Seminar (2 units)

Course Description: Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, critique and synthesis of classic and cutting-edge research in nursing and health care.
Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor.
Learning Activities: Discussion 2 hour(s).
Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.
Repeat Credit: May be repeated 10 time(s).
Grade Mode: Letter.

NRS 291D – Doctoral Seminar (2 units)

Course Description: Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, critique and synthesis of classic and cutting-edge research in nursing and health care.
Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Enrollment Restriction(s) Open to graduate students in School of Nursing programs, or consent of instructor:
Learning Activities: Discussion 2 hour(s).
Repeat Credit: May be repeated 10 time(s).
Grade Mode: Satisfactory/Unsatisfactory only.

NRS 293DY – Dissertation Seminar (2 units)

Course Description: Preparation of final dissertation research. Peer review of presentation plan for dissertation results, IRB application and manuscripts in progress.
Prerequisite(s): Consent of instructor.
Learning Activities: Seminar 1 hour(s), Web Virtual Lecture 1 hour(s).
Enrollment Restriction(s): Current enrollment in the Nursing Science & Health-Care Leadership graduate program or consent of instructor.
Repeat Credit: Students are expected to take this course every quarter in year three and four in this PhD program. The topics will vary by quarter.
Grade Mode: Satisfactory/Unsatisfactory only.

NRS 293Y – Proposal Development Seminar (1 unit)

Course Description: Reading, critique and synthesis of classic and cutting-edge research in nursing and health care.
Prerequisite(s): Consent of instructor.
Learning Activities: Seminar 0.5 hour(s), Web Virtual Lecture 0.5 hour(s).
Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.
Repeat Credit: Students are expected to take this course every quarter in year one and two in this PhD program. The topics will vary by quarter.
Grade Mode: Satisfactory/Unsatisfactory only.

NRS 298 – Special Topics in Nursing Science & Health-Care Leadership (1-4 units)

Course Description: In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of science, or other related areas, with year to year variation.
Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor.
Learning Activities: Lecture/Discussion 1-2 hour(s), Variable 1-3 hour(s).
Repeat Credit: May be repeated.
Grade Mode: Letter.

NRS 298V – Online Special Topics in Nursing Science & Health-Care Leadership (1-4 units)

Course Description: In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of science, or other related areas, with year to year variation.
Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor.
Learning Activities: Web Virtual Lecture 1-4 hour(s), Web Electronic Discussion 1-4 hour(s).
Repeat Credit: May be repeated.
Grade Mode: Letter.

NRS 299 – Research & Writing (1-12 units)

Course Description: Conduct research and writing under the supervision of a faculty member.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Enrollment Restriction(s): Open to Graduate students in Nursing Sci Health-Care (DNP, PHD); Nursing (MSN); Nursing Sci-FNP (MS); PHYS ASST STUDY (MHS); or consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NRS 299D – Dissertation Research & Writing (1-12 units)

Course Description: Conduct dissertation research and writing under the supervision of a faculty member.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Enrollment Restriction(s): Open to Graduate students in Nursing Sci Health-Care (DNP, PHD); Nursing (MSN); Nursing Sci-FNP (MS); PHYS ASST STUDY (MHS); or consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NRS 301 – Learner Centered Teaching (3-4 units)

Course Description: Students will explore best practices in learner-centered teaching, performance-based curriculum models, instructional design, and assessing/evaluating student learning. Students will have experience in planning learner-centered activities that are engaging and effective in achieving desired student performance.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Practice 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 302 – Teaching Methods–Use of Emerging Technologies to Improve Student Learning (4 units)

Course Description: Students will examine, design and develop instructional strategies that use innovative and emerging technologies to promote motivation, performance and learning in health professions education. Research findings associated with use of various emerging technologies will be examined.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Practice 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 303 – Professional Role Formation (2-4 units)

Course Description: Exploration of the educator role. Topics include Role Expectations, Legal and Regulatory Issues, Professional Ethics, Educational Scholarship, Individual Differences, Learning Environments, and Lifelong Learning. Placements for the optional practicum are arranged in a wide variety of settings.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 305AY – DNP Immersion A (2 units)

Course Description: Three-course immersion series designed to augment the DNP student's online education in face to face sessions conducted at the Betty Irene Moore School of Nursing in Sacramento. Constructed to provide insight into the health system and the challenges faced by underserved populations thereby contributing to the student's ability to become a leader in clinical practice.

Learning Activities: Web Virtual Lecture 1 hour(s), Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 305BY – DNP Immersion B (2 units)

Course Description: Three-course immersion series designed to augment the DNP student's online education in face to face sessions conducted at the Betty Irene Moore School of Nursing in Sacramento. Constructed to provide insight into the health system and the challenges faced by underserved populations thereby contributing to the student's ability to become a leader in clinical practice.

Learning Activities: Web Virtual Lecture 1 hour(s), Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 305CY – DNP Immersion C (2 units)

Course Description: Three-course immersion series designed to augment the DNP student's online education in face to face sessions conducted at the Betty Irene Moore School of Nursing in Sacramento. Constructed to provide insight into the health system and the challenges faced by underserved populations thereby contributing to the student's ability to become a leader in clinical practice.

Learning Activities: Web Virtual Lecture 1 hour(s), Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 306 – Nature of Caregiving (4 units)

Course Description: Explores theoretical and conceptual frameworks to enable clinicians to understand the nature of family caregiving. Students examine and apply frameworks in order to conduct comprehensive person and family based assessments and interventions incorporating various dimensions of family caregiving.

Prerequisite(s): Consent of instructor. *Enrollment Restriction(s):* Open to graduate students in School of Nursing programs, or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

NRS 307 – Family Centered Communication & Shared Decision Making (4 units)

Course Description: Incorporates shared decision-making principles and group communication to address family centered care planning and challenging clinical discussions. Targets competencies needed by health professionals to partner effectively to enhance the caregiving experience and reduce negative sequelae over the caregiving trajectory.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 308 – Patient & Family Centered Care Plan Development (4 units)

Course Description: Synthesizes assessment data and analyzes impact of technology, individual, family, sociocultural, health care system, and illness-related variables in specific family care-giving situations. Co-create comprehensive evidence based plan to facilitate the health and well-being of the family unit through shared decision-making.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 309V – Political Determinants of Health & Health Equity (4 units)

Course Description: Introduction to historical and current laws and policies contributing to inequities in population health. Emphasis on theoretical models, strategies, and practices used to advance health equity.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor. Priority given to students enrolled in the Advancing Health Equity Series (AHES) Graduate Academic Unit Certificate (GAUC).

Grade Mode: Letter.

NRS 310V – Race & Health in the United States (4 units)

Course Description: Race as a social construct and unequal health care distribution in the United States. Practical health care leadership to end racial inequalities in health.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 311V – Trauma Informed Practice (4 units)

Course Description: Introduction to manifestations of trauma and their impact on health and educational outcomes. Emphasis on trauma assessment and trauma-informed approaches in clinical practice, teaching and research.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 320V – Clinical Reasoning & Psychopathology (3 units)

Course Description: Foundational course for science, epidemiology, etiology, and development of mental disorders across the lifespan. Appraise mental disorders in the context of social determinants of health.

Prerequisite(s): Consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program; or consent of instructor.

Grade Mode: Letter.

NRS 321AY – PMHNP Role Development & Clinical Decision Making (2 units)

Course Description: First course for foundational knowledge and skills for PMHNP role development. Self-reflective practice and principles of psychotherapeutic care. In-class simulations, techniques for establishing and maintaining a therapeutic alliance. Three to four day in-person weekend immersion.

Prerequisite(s): Consent of instructor.

Learning Activities: Practice 6 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program; or consent of instructor.

Grade Mode: Letter.

NRS 321BY – PMHNP Role Development & Clinical Decision Making (1 unit)

Course Description: Second course for foundational knowledge and skills for PMHNP role development. Self-reflective practice and principles of psychotherapeutic care. In-class simulations, techniques for establishing and maintaining a therapeutic alliance. Three to four day in-person weekend immersion.

Prerequisite(s): NRS 321AY C+ or better; consent of instructor.

Learning Activities: Practice 3 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program; or consent of instructor.

Grade Mode: Letter.

NRS 321CY – PMHNP Role Development & Clinical Decision Making (3 units)

Course Description: Third course for foundational knowledge and skills for PMHNP role development. Assessment and treatment planning for complex cases with multiple comorbidities, including substance use and trauma-related disorders. Structural barriers and system-level approaches to caring for patients with complex needs. Transition to practice competency as an entry-level PMHNP. Three to four day in-person weekend immersion.

Prerequisite(s): NRS 321BY C+ or better; or consent of instructor.

Learning Activities: Practice 9 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program; or consent of instructor.

Grade Mode: Letter.

NRS 322AV – Psychopharmacology Across the Lifespan: Foundations (3 units)

Course Description: First course for PMHNP students for the prescription of somatic therapies to treat mental disorders in individuals across the lifespan. Foundational knowledge of major classes of psychotropic medication as well as common neuromodulatory therapies for the purpose of safe prescribing.

Prerequisite(s): Consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program; or consent of instructor.

Grade Mode: Letter.

NRS 322BV – Psychopharmacology Across the Lifespan: Application (3 units)

Course Description: Apply and evaluate evidence-based therapies to individuals and special populations across the lifespan. Examine stigma and sociocultural factors that affect individual's ability to access and engage in health care. Eligible for the Data 2000 X-wavier license.

Prerequisite(s): NRS 322AV C+ or better; or consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program; or consent of instructor.

Grade Mode: Letter.

NRS 322CV – Psychopharmacology Across the Lifespan: Complex Cases (3 units)

Course Description: Complex cases in psychopharmacology and evaluate use of evidence-based therapies for individuals and special populations across the lifespan. Examine stigma and structural barriers that affect individual's ability to access and engage in health care.

Prerequisite(s): NRS 322BV C+ or better; or consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program; or consent of instructor.

Grade Mode: Letter.

NRS 323AV – Psychotherapeutic Interventions Across the Lifespan I (3 units)

Course Description: First course for theory, principles, and application of individual, family, and group psychotherapies across the lifespan. Cognitive-behavioral, interpersonal, motivational, dialectical, and psychodynamic approaches to psychotherapeutic intervention.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program; or consent of instructor.

Grade Mode: Letter.

NRS 323BV – Psychotherapeutic Interventions Across the Lifespan II (3 units)

Course Description: Group therapies, family systems, attachment and developmental approaches to psychotherapeutic intervention.

Clinical case materials for assessment, engagement, and evaluation of psychotherapeutic interventions within the context of PMHNP practice.

Prerequisite(s): NRS 323AV C+ or better; or consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program; or consent of instructor.

Grade Mode: Letter.

NRS 323CV – Psychotherapeutic Interventions Across the Lifespan III (3 units)

Course Description: Harm reduction, cognitive-behavioral, and interpersonal approaches to psychotherapeutic intervention. Application of each therapy to PMHNP clinical practice, identifying and evaluating specific therapeutic skills for patient engagement, interviewing, treatment planning, referral and/or intervention.

Prerequisite(s): NRS 323BV C+ or better; or consent of instructor.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program; or consent of instructor.

Grade Mode: Letter.

NRS 351V – Health Policy for Health-Care Professionals (3 units)

Course Description: Addresses current major health policy issues and the institutions, processes and forces that shape them. Discusses health care policy in terms of legislative and executive processes at the state and federal levels; key forces involved in policy-making, including economic, social, ethical and political factors; and the central players involved in policy-making, including elected officials, interest groups, the press and legislative staff.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 352V – Organizational & System Change Through Leadership, Research, & Practice (3 units)

Course Description: Deepens the critical understanding and analysis of leadership theory as related to healthcare systems. Apply leadership principles and theory within the context of building successful organizations and engaging in health policy, practice, research and education arenas. Address change processes in healthcare from political, historic, economic and sociological frameworks, learning from both historic and current examples of transformative change.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 353V – Improving Patient & Population Health (3 units)

Course Description: Highlights the health outcomes of groups with a focus on reducing health inequities among populations by exploring factors such as the environment, social structures, and resource distribution. Introduces the principles of public health as well as epidemiology and evidence-based public health.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 354V – Ensuring Quality and Safety in Healthcare (4 units)

Course Description: Provides the knowledge and skills necessary for students to understand the fundamentals of conducting research and quality improvement. Explore the relationship and be able to differentiate between quality improvement and research and the appropriate application of both processes. Specific attention paid to different types of data, research levels of evidence, quality improvement techniques, and basics of measurement.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 355V – Health Promotion & Disease Prevention Across the Lifespan (2 units)

Course Description: Health promotion and disease prevention examined using population-based and multidisciplinary approaches. Focuses on developing increased knowledge, skills and appreciation for the promotion of health and prevention of disease among culturally diverse communities. Epidemiological, psychosocial and environmental principles discussed as a basis for focusing upon factors related to the reduction of health disparities among vulnerable populations.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 356V – Clinical Ethics (2 units)

Course Description: Emphasis on exploration of ethical knowledge development with a focus on clarification, analysis and justification relevant to advanced nursing practice; examination and development of learners' moral understanding; and distinguishing between moral and other professional responsibilities. Includes pertinent topics on how ethical and legal standards intersect and how this impacts health professionals and health care systems.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 357V – Business Essentials for Health Care (3 units)

Course Description: Interprofessional online course on business essentials in healthcare establishes a foundational understanding of healthcare business basics including finance, human resources, management and physical resources. Develop leadership-level thinking to provide quality cost-effective care and to participate in the implementation of care.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 358AV – Applied Nursing Biostatistics (1 unit)

Course Description: Principles of statistical reasoning and quantitative skills for analyzing health data. Descriptive and inferential statistics. Multivariate parametric and non-parametric statistical methods to answer nursing-related questions. Interpretation of statistical results in advanced practice nursing clinical decision making rather than computation.

Learning Activities: Web Virtual Lecture 0.5 hour(s), Web Electronic Discussion 0.5 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 358BV – Applied Biostatistics in Healthcare (2 units)

Course Description: Epidemiologic methods and techniques. Epidemiological study designs in clinical nursing scenarios. Causality and risk in clinical nursing situations. Screening and diagnostic tests used in advanced practice. Common mistakes and pitfalls in the interpretation of the scientific literature impacting patient outcomes.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 400 – Basic Clinical Skills (1-4 units)

Course Description: Instruction and practice of the fundamental clinical skills necessary for patient care comprise this course with a primary focus on principles of effective communication in establishing the therapeutic provider-patient relationship.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 401 – Basic Clinical Skills (1-4 units)

Course Description: Continuation of focus on history taking and physical examination skills with advanced/specialized content.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 402V – Introduction to the Scholarly Project (1 unit)

Course Description: Introduces DNP students to the Scholarly Project to assist them in developing an outline for their project in preparation for the course series NRS 411A-C. Potential clinical rotation sites discussed, and the requirements of a scholarly project delineated.

Learning Activities: Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 409Y – Advanced Health Assessment & Clinical Skills (3 units)

Course Description: Comprehensive clinical application of advanced health assessment skills, advanced clinical procedures, and critical-decision scenarios through on-site simulation and interactive-case based learning. Student remediation and faculty one-on-one mentorship to prepare for clinical rotations the following quarter.

Prerequisite(s): NRS 275V C or better; NRS 277V C or better; NRS 278V C or better; consent of instructor.

Learning Activities: Clinical Activity 6 hour(s), Web Virtual Lecture 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 410A – Advanced Clinical Skills (1-4 units)

Course Description: Continuation of focus on history taking and physical examination skills with advanced/specialized content.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 410B – Advanced Clinical Skills (1-4 units)

Course Description: Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 410C – Advanced Clinical Skills (1-4 units)

Course Description: Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 410D – Advanced Clinical Skills (1-4 units)

Course Description: Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 410E – Advanced Clinical Skills (1-4 units)

Course Description: Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 410F – Advanced Clinical Skills (1-4 units)

Course Description: Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified specialty systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 410G – Advanced Clinical Skills (1-4 units)

Course Description: Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified specialty systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 1-4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 411AV – Scholarly Project A (2 units)

Course Description: Three-course series must be taken in sequence.

Seminar provides the opportunity to discuss and conceptualize the conduct of the scholarly project with student colleagues and the seminar course professor. Independent scholarly project involves a systematic, evidence-based approach to enhance identified, health-related outcomes to be completed over the course of three quarters.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 411BV – Scholarly Project B (2 units)

Course Description: Three-course series must be taken in sequence. Seminar provides the opportunity to discuss and conceptualize the conduct of the scholarly project with student colleagues and the seminar course professor. Independent scholarly project involves a systematic, evidence-based approach to enhance identified, health-related outcomes to be completed over the course of three quarters.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 411CV – Scholarly Project C (2 units)

Course Description: Three-course series must be taken in sequence. Seminar provides the opportunity to discuss and conceptualize the conduct of the scholarly project with student colleagues and the seminar course professor. Independent scholarly project involves a systematic, evidence-based approach to enhance identified, health-related outcomes to be completed over the course of three quarters.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 412AY – Applied Project Practicum A (7 units)

Course Description: Doctor of Nursing Practice supervised clinical practice course focuses on enhancing clinical leadership skills within the role of an Advanced Practice Nurse and integrates advanced practice with the scholarly project. Collaborate with a course professor and clinical preceptor to meet individualized learning objectives.

Learning Activities: Clinical Activity 21 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 412BY – Applied Project Practicum B (7 units)

Course Description: Doctor of Nursing Practice supervised clinical practice course focuses on enhancing clinical leadership skills within the role of an Advanced Practice Nurse and integrates advanced practice with the scholarly project. Collaborate with a course professor and clinical preceptor to meet individualized learning objectives.

Learning Activities: Clinical Activity 21 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 415Y – PMHNP Clinical Residency (4-6 units)

Course Description: Integrate scientific knowledge and clinical practice to develop diagnostic, clinical decision-making, and direct care of individuals, groups, and families across the lifespan. Application/integration of research, consultation, and clinical leadership as appropriate.

Learning Activities: Web Electronic Discussion 1 hour(s), Clinical Activity 9 hour(s).

Enrollment Restriction(s): Enrolled in Nursing Science & Health-Care Leadership graduate group UC PMHNP Certificate Program or consent of instructor.

Repeat Credit: May be repeated 4 time(s).

Grade Mode: Letter.

NRS 420 – Foundations of Clinical Nursing Practice (5 units)

Course Description: Foundational course introduction to core concepts of clinical nursing, including clinical reasoning, professional ethics, therapeutic communication and activities of daily living. Develop skills for the provision of safe, high quality, culturally-sensitive, person-centered care across the lifespan.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 4 hour(s), Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 421 – Health Assessment Across the Lifespan (3 units)

Course Description: Preparation to conduct a health history assessment using developmentally and culturally appropriate approaches for individuals across the lifespan. Acquire the knowledge, understanding, and skills needed to perform, interpret and communicate a health history.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Clinical Activity 6 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 422 – Care of Adults with Chronic Conditions (6 units)

Course Description: Learn concepts central to the effective management of a variety of common chronic illness and disabling conditions across the lifespan in a variety of different settings. Practice conducting in-depth health assessments of individuals with chronic conditions.

Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Clinical Activity 9 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 423 – Psychosocial Wellness & Illness (5 units)

Course Description: Explore the biological, psychological, cultural, societal, and environmental factors that affect psychological wellness and illness. Practice providing care to individuals and families experiencing disruptions in mental health secondary to physical or psychiatric illness, trauma or loss.

Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Clinical Activity 6 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 424 – Nursing Care of Older Adults (3 units)

Course Description: Build skills for situations involving older adults, such as in the management of complex clinical and administering and interpreting standardized assessment tools. Develop plans of care for older adults experiencing a variety of geriatric syndromes.

Prerequisite(s): NRS 221; NRS 223; NRS 272; NRS 273; NRS 420; NRS 421; NRS 422; NRS 423; NRS 425; NRS 426; consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 425 – Family Focused Nursing (9 units)

Course Description: Focuses on family as the unit of nursing and interprofessional care. Includes influences of family on health and illness, reproductive and gender/sexuality issues, pregnancy, birth and child-rearing, and the health and illness in children and youth.

Prerequisite(s): NRS 221; NRS 272; NRS 273; NRS 420; NRS 421; NRS 422; NRS 423; consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s), Clinical Activity 12 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 426 – Nursing Care of Adults with Complex Illness or Injury (8 units)

Course Description: Prepares students to provide comprehensive, patient-centered nursing care for patients with acute or complex illness and injury. Theory portion focuses on concepts associated with complex physiological alterations.

Prerequisite(s): NRS 221; NRS 272; NRS 273; NRS 420; NRS 421; NRS 422; NRS 423; NRS 425; consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Clinical Activity 12 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 427 – Fostering Healthy Communities (7 units)

Course Description: Focuses on populations & communities, and emphasizes working with diverse communities in providing health promotion, chronic disease management, transitional support and crisis intervention. Develop skills to critically analyze and shape health policy and develop accessible community resources.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Clinical Activity 9 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 428 – Capstone Clinical Nursing Practicum (9 units)

Course Description: Practicum experience to facilitate transition to professional practice. Assignment of clinical practice area of interest and to work with a preceptor with expertise in that area.

Prerequisite(s): NRS 424 C or better; NRS 427 C or better; NRS 429E C or better.

Learning Activities: Clinical Activity 24 hour(s), Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to grad students in Nursing Sci Health-Care (DNP, PhD) Nursing (MSN); Nursing Sci-FNP (MS); Phys Asst Stdy (MHS), or consent of instructor.

Grade Mode: Letter.

NRS 429A – Collaborative Practice A (1 unit)

Course Description: Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 429B – Collaborative Practice B (1 unit)

Course Description: Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 429C – Collaborative Practice C (1 unit)

Course Description: Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 429D – Collaborative Practice D (1 unit)

Course Description: Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 429E – Collaborative Practice E (1 unit)

Course Description: Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 429F – Collaborative Practice F (1 unit)

Course Description: Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 440 – Preparation for Clinical Practice (1-3 units)

Course Description: Students are placed in clinical settings and/or clinical simulation laboratories to observe and practice the integration of clinical skills with direct supervision by faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 3-9 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 450A – Supervised Clinical Practice-Primary Health Care (1-16 units)

Course Description: Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 450B – Supervised Clinical Practice-Primary Health Care (1-16 units)

Course Description: Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 450C – Supervised Clinical Practice-Primary Health Care (1-16 units)

Course Description: Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 450D – Supervised Clinical Practice-Primary Health Care (1-16 units)

Course Description: Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 450E – Supervised Clinical Practice-Primary Health Care (1-16 units)

Course Description: Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 451 – Supervised Clinical Practice-Pediatrics (1-16 units)

Course Description: Four-week clinical rotation under the supervision of an appropriate community-based Pediatric Medicine provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 452 – Supervised Clinical Practice-Women's Health (1-16 units)

Course Description: Four-week clinical rotation under the supervision of an appropriate community-based women's health and prenatal care provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 453 – Supervised Clinical Practice-Mental Health (1-16 units)

Course Description: Four-week clinical rotation under the supervision of an appropriate community-based psychiatrist, psychiatric/mental health provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 454 – Supervised Clinical Practice-Emergency Medicine (1-16 units)

Course Description: Four-week clinical rotation under the supervision of an appropriate Emergency Medicine provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 455 – Supervised Clinical Practice-Inpatient Surgery (1-16 units)

Course Description: Four-week clinical experience under the supervision of an appropriate surgical provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 456 – Supervised Clinical Practice-Inpatient Medicine (1-16 units)

Course Description: Four-week clinical rotation under the supervision of an appropriate inpatient provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 459 – Supervised Clinical Practice-Other Specialties (1-16 units)

Course Description: Two four-week selective rotations are available to accommodate student interest and/or accommodate a student's clinical deficits identified by the program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 470 – Health Care Ethics (3-9 units)

Course Description: Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Cross Listing: GMD 470.

Grade Mode: Satisfactory/Unsatisfactory only.

NRS 471 – Supervised Clinical Practice-Geriatrics (1-16 units)

Course Description: Four-week clinical rotation under the supervision of an appropriate community-based Geriatric Medicine provider per accreditation requirements.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 475 – Supervised Clinical Practice-Acute Care (1-16 units)

Course Description: Two- to four-week rotation focus on providing acute care in inpatient settings. Students will work directly with specific inpatient units.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 480 – Supervised Clinical Practice-Rural Health (1-16 units)

Course Description: Rural health rotations focus on providing care in medically underserved rural sites. Students will experience care across the continuum in ambulatory, inpatient, and community based settings.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 490 – Supervised Clinical Practice: Quality & Safety (1-16 units)

Course Description: Clinical rotation that allow students to work directly with patient safety and quality improvement committees in various organizations.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 48 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

NRS 493A – Improving Quality in Health Care (4 units)

Course Description: Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 493B – Improving Quality in Health Care (4 units)

Course Description: Working in interdisciplinary teams, will explore advanced theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience.

Prerequisite(s): NRS 493A; consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 493C – Enhancing Patient Safety in Health Care (4 units)

Course Description: Inter-professional module is designed to explore the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for inter-professional educational experience.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

NRS 494AV – Enhancing Patient Safety Systems (4 units)

Course Description: Patient safety systems in healthcare. Problem identification, root cause analysis, human factor examination, and systems level intervention development to reduce harm.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Priority given to current DNP-FNP, PhD, MEPN or PA programs within the Nursing Science & Health-Care Leadership Graduate Group at Betty Irene Moore School of Nursing who are enrolled in the EPSQIH-GAUC; students enrolled in other graduate degree programs or other UC Davis health-related programs and are interested in quality and safety may be accepted on a space available basis and only by consent of the EPSQIH-GAUC chair; students enrolled in the EPSQIH-GAUC must take all courses in the NRS 494AV-NRS 494CY series in sequence; students not enrolled in the EPSQIH-GAUC may take courses (based on availability) NRS 494AV & NRS 494BV individually and do not need to be taken in sequence.

Grade Mode: Letter.

NRS 494BV – Improving Healthcare Quality Through Teamwork (4 units)

Course Description: Healthcare quality improvement, theory and practical application methods. Healthcare systems improvement and patient care outcomes.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Priority given to current DNP-FNP, PhD, MEPN or PA programs within the Nursing Science & Health-Care Leadership Graduate Group at Betty Irene Moore School of Nursing who are enrolled in the EPSQIH-GAUC; students enrolled in other graduate degree programs or other UC Davis health-related programs and are interested in quality and safety may be accepted on a space available basis and only by consent of the EPSQIH-GAUC chair; students enrolled in the EPSQIH-GAUC must take all courses in the NRS 494AV-NRS 494CY series in sequence; students not enrolled in the EPSQIH-GAUC may take courses (based on availability) NRS 494AV & NRS 494BV individually and do not need to be taken in sequence.

Grade Mode: Letter.

NRS 494CY – Quality & Safety Practicum (4 units)

Course Description: Application of quality improvement knowledge and skills in real healthcare settings. One quarter-long practicum experience required.

Learning Activities: Practice 3 hour(s), Web Virtual Lecture 3 hour(s).

Credit Limitation(s): Priority given to current DNP-FNP, PhD, MEPN or PA programs within the Nursing Science & Health-Care Leadership Graduate Group at Betty Irene Moore School of Nursing who are enrolled in the EPSQIH-GAUC; students enrolled in other graduate degree programs or other UC Davis health-related programs and are interested in quality and safety may be accepted on a space available basis and only by consent of the EPSQIH-GAUC chair; students enrolled in the EPSQIH-GAUC must take all courses in the NRS 494AV- NRS 494CY series in sequence; students not enrolled in the EPSQIH-GAUC may take courses (based on availability) NRS 494AV & NRS 494BV individually and do not need to be taken in sequence.

Grade Mode: Letter.

Nutrition (NUT)

College of Agricultural & Environmental Sciences

NUT 010 – Discoveries & Concepts in Nutrition (3 units)

Course Description: Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods.

Learning Activities: Lecture 3 hour(s), Project.

Credit Limitation(s): No credit will be granted to students who have completed NUT 010Y or NUT 010V or an upper division Nutrition (NUT) course.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

NUT 010V – Discoveries & Concepts in Nutrition (3 units)

Course Description: Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods.

Learning Activities: Web Virtual Lecture 3 hour(s), Project.

Credit Limitation(s): No credit will be granted to students who have completed NUT 010 or NUT 010Y or an upper division Nutrition (NUT) course.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

NUT 010Y – Discoveries & Concepts in Nutrition (3 units)

Course Description: Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods.

Learning Activities: Web Virtual Lecture 3 hour(s), Project.

Credit Limitation(s): No credit granted to students who have completed NUT 010 or NUT 010V or an upper division Nutrition (NUT) course.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

NUT 011 – Current Topics & Controversies in Nutrition (2 units)

Course Description: Exploration of current applications and controversies in nutrition. Read scientific journal articles and write summaries, as well as give brief oral presentations. Topics change to reflect current interests and issues.

Learning Activities: Discussion 1.50 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Writing Experience (WE).

NUT 099 – Individual Study for Undergraduates (1-5 units)

Course Description: Individual study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

NUT 104 – Environmental & Nutritional Factors in Cellular Regulation & Nutritional Toxicants (4 units)

Course Description: Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism.

Prerequisite(s): BIS 101; (BIS 103 or ABI 103).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ETX 104.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL).

NUT 105 – Nutrition through the Life Cycle (3 units)

Course Description: Unique nutrient needs of people in different stages of the life cycle, including pregnant and lactating women, infants, children, adolescents, adults and the elderly. Physiological changes and conditions that influence nutrient needs, factors that influence food choices and appropriate dietary recommendations, and recent research are discussed.

Prerequisite(s): (BIS 103 or ABI 103); NUT 111AY; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NUT 106 – Food Chemistry for Clinical Nutrition (5 units)

Course Description: Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition.

Prerequisite(s): CHE 008B C- or better or CHE 118B C- or better or CHE 128B C- or better; concurrent with FST 100A recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Only open to Clinical Nutrition majors.

Credit Limitation(s): Not open to students who have completed FST 101A and/or FST 101B.

Cross Listing: FST 106.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

NUT 111AY – Introduction to Nutrition & Metabolism (3 units)

Course Description: Introduction to metabolism of protein, fat and carbohydrate: the biological role of vitamins and minerals; nutrient requirements during the life cycle; assessment of dietary intake and nutritional status.

Prerequisite(s): CHE 008B; NPB 101; or the equivalent of NPB 101.

Learning Activities: Web Virtual Lecture 2 hour(s), Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to upper division or graduate level students only.

Credit Limitation(s): Not open for credit to students who have completed NUT 101 or NUT 111AV.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NUT 111B – Recommendations & Standards for Human Nutrition (2 units)

Course Description: Critical analysis of the development of nutritional recommendations for humans. Topics include: history of modern recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations; introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition recommendations in other countries and cultures.

Prerequisite(s): (CHE 008B or CHE 118B or CHE 128B); NUT 111AY; NPB 101 recommended.

Learning Activities: Lecture 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed NUT 111.

Grade Mode: Letter.

NUT 112 – Nutritional Assessment (4 units)

Course Description: Methods of human nutritional assessment, including dietary, anthropometric, biochemical methods. Principles of precision, accuracy, and interpretation of results for individuals and populations.

Prerequisite(s): ((ABI 102, ABI 103) or (BIS 102, BIS 103)); NUT 111AY; (STA 013 or STA 013Y or PLS 120).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to upper division or graduate level Nutrition students only.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

NUT 113 – Principles of Epidemiology in Nutrition (4 units)

Course Description: Introduction to epidemiology as it relates to the field of nutrition, including study design, principles of epidemiologic inference, criteria for causality, and interpreting measures of disease risk.

Prerequisite(s): STA 013 or STA 013Y or PLS 120 or STA 100.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

NUT 114 – Developmental Nutrition (4 units)

Course Description: Role of nutritional factors in embryonic and postnatal development.

Prerequisite(s): (ABI 102 or BIS 102); (ABI 103 or BIS 103); NUT 111AY; NUT 111B.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NUT 115 – Animal Nutrition (4 units)

Course Description: Comparative differences among animals in digestion and metabolism of nutrients. Nutrient composition of feeds, digestive systems, digestion, absorption, feeding strategies.

Prerequisite(s): CHE 008B or CHE 118B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

NUT 116A – Clinical Nutrition (3 units)

Course Description: Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions.

Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; NPB 101; or the equivalent to NPB 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NUT 116AL – Clinical Nutrition Practicum (3 units)

Course Description: Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116A.

Prerequisite(s): NUT 116A (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NUT 116B – Clinical Nutrition (3 units)

Course Description: Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions.

Prerequisite(s): NUT 111AY; NUT 111B; NUT 112; NUT 116A; NPB 101; or the equivalent to NPB 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NUT 116BL – Clinical Nutrition Practicum (3 units)

Course Description: Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in NUT 116B. Continuation of NUT 116AL.

Prerequisite(s): NUT 116AL; NUT 116B (can be concurrent).

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NUT 116BY – Clinical Nutrition (3 units)

Course Description: Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions.

Prerequisite(s): NUT 111AY; NUT 111B; NUT 112; NUT 116A; (NPB 101 or the equivalent to NPB 101).

Learning Activities: Web Virtual Lecture 2 hour(s), Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NUT 117 – Experimental Nutrition (6 units)

Course Description: Methods of assessing nutritional status. Application of chemical, microbiological, chromatographic and enzymatic techniques to current problems in nutrition.

Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; BIS 102; BIS 103; MCB 120L or other laboratory course in biochemistry is recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 6 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

NUT 118 – Community Nutrition (4 units)

Course Description: Nutrition problems in contemporary communities and of selected target groups in the United States and in developing countries. Nutrition programs and policy, principles of nutrition education.

Prerequisite(s): NUT 116A; (NUT 111AV or NUT 111AY); NUT 111B.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

NUT 119A – Global Nutrition (3 units)

Course Description: Global prevalence, etiology, and consequences of nutrition problems, ranging from under nutrition and food insecurity to overweight and associated chronic diseases; underlying social, environmental, and behavioral factors that contribute to malnutrition; strategies to improve nutritional status, with emphasis on low- and middle-income countries.

Prerequisite(s): NUT 111AY; NUT 111B; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

NUT 119B – International, Community-Based Nutritional Assessment (6 units)

Course Description: A six-week summer course in Peru. Implementation of a community-based nutritional assessment survey, including development of the survey instrument, selection. Taught abroad.

Prerequisite(s): NUT 119A; and consent of instructor.

Learning Activities: Lecture 2 hour(s), Fieldwork 12 hour(s).

Enrollment Restriction(s): Restricted to upper division students in Clinical Nutrition, Community Nutrition, Dietetics, and Nutrition Science.

Grade Mode: Letter.

NUT 120AN – Nutritional Anthropology (4 units)

Course Description: Nutritional anthropology from historical and contemporary perspectives; the anthropological approach to food and diet; field work methods; case histories that explore food patterns and their nutritional implications.

Prerequisite(s): (NUT 010 or NUT 010Y or NUT 010V); (ANT 002 or SOC 001 or SOC 003); upper-division standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

NUT 120BN – Nutritional Geography (4 units)

Course Description: Nutritional geography from historical and contemporary perspectives; the geographical approach to food and diet; cultural and environmental factors that influence dietary practices; food-related landscapes and patterns.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

NUT 124 – Nutrition & Feeding of Finfishes (3 units)

Course Description: Principles of nutrition and feeding of fishes under commercial situations; implication of fish nutrition to the environment and conservation of endangered species.

Prerequisite(s): BIS 103 or ABI 103.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

NUT 127 – Environmental Stress & Development in Marine Organisms (10 units)

Course Description: Taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods.

Prerequisite(s): ETX 101 or BIS 102 or BIS 104; or equivalent course; ETX 114A or NUT 114 recommended.

Learning Activities: Lecture 4 hour(s), Laboratory 12 hour(s), Discussion 2 hour(s).

Cross Listing: ETX 127.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

NUT 129 – Journalistic Practicum in Nutrition (3 units)

Course Description: Critical analysis and discussion of current, controversial issues in nutrition; use of journalistic techniques to interpret scientific findings for the lay public. Students required to write several articles for campus media.

Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; or consent of instructor; a course in written or oral expression.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL); Writing Experience (WE).

NUT 130 – Experiments in Nutrition: Design & Execution (2 units)

Course Description: Experiments in current nutritional problems.

Experimental design: students choose project and, independently or in groups of two-three, design a protocol, complete the project, and report findings.

Prerequisite(s): Consent of instructor; NUT 111AV, NUT 111AY, NUT 111B or NUT 114 recommended.

Learning Activities: Laboratory 6 hour(s).

Repeat Credit: May be repeated 6 time(s) with consent of instructor (limit of three times per instructor).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

NUT 141 – Comparative Animal Nutrition & Metabolism (4 units)

Course Description: Foundational principles of nutrition, nutrient composition of feed ingredients, digestive systems of domestic and exotic animals, nutrient digestibility and absorption, nutrient metabolism.

Prerequisite(s): ABI 103; (NUT 115 or NUT 116A or NUT 116B); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

NUT 142 – Companion Animal Nutrition (4 units)

Course Description: Applied companion animal nutrition, focused primarily on dogs and cats. Nutritional considerations specifically related to health and longevity of companion animals. Evaluation of commercial and prescription-type diets with an emphasis on functional ingredients. Impact of physiological status and disease on nutrient requirements of the animal and nutrient utilization in the body.

Prerequisite(s): ABI 102; NUT 115; recommend ANS 042.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

NUT 190 – Proseminar in Nutrition (1 unit)

Course Description: Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and dietetic problems of community, national and international scope.

Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Restricted to senior standing.

Repeat Credit: May be repeated 2 time(s) with consent of instructor.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Visual Literacy (VL).

NUT 190C – Nutrition Research Conference (1 unit)

Course Description: Introduction to research findings and methods in nutrition. Presentation and discussion of research by faculty and students.

Prerequisite(s): Consent of instructor; upper division standing in Nutrition or related biological science.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

NUT 192 – Internship (1-12 units)

Course Description: Work experience on or off campus in practical application of nutrition, supervised by a faculty member.

Prerequisite(s): Consent of instructor; one upper division course in nutrition.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

NUT 197T – Tutoring in Nutrition (1-2 units)

Course Description: Tutoring of students in nutrition courses, assistance with discussion groups or laboratory sections, weekly conference with instructor in charge of course: written evaluations.

Prerequisite(s): Consent of instructor; Nutrition Science, Clinical Nutrition or related major.

Learning Activities: Discussion/Laboratory 3-6 hour(s).

Repeat Credit: May be repeated when tutoring a different course.

Grade Mode: Pass/No Pass only.

NUT 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

NUT 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

NUT 219A – International Nutrition (3 units)

Course Description: Epidemiology, etiology, and consequences of undernutrition, with particular focus on the nutritional problems of children and women in low income populations.

Prerequisite(s): NUT 111AV; NUT 111AY; graduate standing; undergraduates only admitted with consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NUT 219B – International Nutrition (3 units)

Course Description: Intervention programs to prevent or ameliorate nutritional problems in low-income populations. Planning, implementing, and evaluating nutrition intervention programs.

Prerequisite(s): NUT 219A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NUT 230 – Experiments in Nutrition: Design & Execution (2 units)

Course Description: Student-selected projects to enhance laboratory skills. Independently, or in groups of two-three students, design a protocol, carry out the project, analyze the results and report the findings.

Prerequisite(s): Consent of instructor; NUT 201, NUT 202, NUT 203, NUT 204, or the equivalent recommended.

Learning Activities: Laboratory 6 hour(s).

Repeat Credit: May be repeated 6 time(s) with consent of instructor (limit of three times per instructor).

Grade Mode: Letter.

NUT 250 – Metabolic Homeostasis (3 units)

Course Description: Regulatory mechanisms of carbohydrate, lipid, and protein homeostasis; mechanisms of metabolic enzyme regulation and of the metabolic hormones; homeostatic mechanisms and interactions; fuel-fuel interactions; nutrition-energy balance.

Prerequisite(s): Passing the Nutrition Graduate Group Preliminary Examination or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1.50 hour(s).

Enrollment Restriction(s): Preference given to students in advanced standing in the Nutrition Graduate Group.

Grade Mode: Letter.

NUT 251 – Nutrition & Immunity (2 units)

Course Description: Cellular and molecular mechanisms underlying interactions of nutrition and immune function, including modulation of immunocompetence by diet and effects of immune responses on nutritional needs. Lectures and discussion explore implications for resistance to infection, autoimmunity and cancer.

Prerequisite(s): PMI 126; ABI 102; MMI 107; or the equivalent to MMI 107.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

NUT 252 – Nutrition & Development (3 units)

Course Description: Relationship of nutrition to prenatal and early postnatal development.

Prerequisite(s): NUB 210A, NUB 210B, and NUB 210C recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

NUT 253 – Control of Energy Balance & Body Weight (3 units)

Course Description: Comprehensive study of the biochemical, nutritional and physiological mechanisms controlling food intake, body composition and energy expenditure. Subject matter will be approached through lectures and discussions where students and staff will critically evaluate the literature.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

NUT 254 – Applications of Systems Analysis in Nutrition (3 units)

Course Description: Quantitative aspects of digestion and metabolism; principles of systems analysis. Evolution of models of energy metabolism as applied in current feeding systems. Critical evaluations of mechanistic models used analytically in support of nutritional research.

Prerequisite(s): NUT 202; or the equivalent.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

NUT 258 – Field Research Methods in International Nutrition (3 units)

Course Description: Issues and problems related to implementation of nutrition field research in less-developed countries, including ethics; relationships with local governments, communities, and scientists; data collection techniques and quality assurance; field logistics; research budgets; and other administrative and personal issues.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

NUT 259 – Nutrition & Aging (2 units)

Course Description: Interaction between nutrition and aging. Topics include physiological/biochemical basis of aging, age-related changes affecting nutritional requirements, nutrition and mortality rate, assessment of nutritional status in the elderly, and relationship between developmental nutrition and the rate of aging.

Prerequisite(s): NUT 201; NUT 202; NUT 203; NUT 204; three of the four courses.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

NUT 270 – Scientific Ethics in Biomedical Studies: Emphasis on Nutrition (3 units)

Course Description: Scientific ethics in biomedical studies, especially nutrition. Discussion and case study presentations on scientific integrity, fraud, misconduct, conflict of interest, human and animal research protections.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate standing or consent of instructor.

Credit Limitation(s): Not open for credit to students who have completed NUT 492B.

Grade Mode: Letter.

NUT 290 – Beginning Nutrition Seminar (2 units)

Course Description: Discussion and critical evaluation of topics in nutrition with emphasis on literature review and evaluation in this field. Students give oral presentations on relevant topics.

Prerequisite(s): First-year graduate standing.

Learning Activities: Lecture/Discussion 1 hour(s), Seminar 1 hour(s).

Grade Mode: Letter.

NUT 290C – Research Conference (1 unit)

Course Description: Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion style.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

NUT 291 – Advanced Nutrition Seminar (1 unit)

Course Description: Advanced topics in nutrition research. Multiple sections may be taken concurrently for credit.

Prerequisite(s): Second-year graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NUT 293A – Current Topics in Obesity, Food Intake & Energy Balance (3 units)

Course Description: Current research and its evaluation. Principles of experimental design and scientific background for given article. Articles summarized for posting on Internet for use by healthcare professionals.

Prerequisite(s): NUT 129; or graduate standing; undergraduates with upper division standing with at least one writing course may enroll with consent of instructor.

Learning Activities: Lecture 1 hour(s), Seminar 1 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

NUT 293B – Current Topics in Obesity, Food Intake, & Energy Balance with Special Topics (3 units)

Course Description: Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. A continuation of NUT 293A, with additional special topics.

Prerequisite(s): NUT 129; Graduate standing.

Learning Activities: Lecture 1 hour(s), Seminar 1 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 3 time(s) with consent of instructor.

Grade Mode: Letter.

NUT 294A – Current Topics in Developmental Nutrition (2 units)

Course Description: Effects of nutrition on embryology, morphogenesis, and developmental mechanisms.

Prerequisite(s): NUT 114 or NUT 252; or consent of instructor.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to graduate standing or consent of instructor.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

NUT 297T – Supervised Teaching in Nutrition (1-3 units)

Course Description: Practical experience in teaching nutrition at the university level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work.

Prerequisite(s): Graduate standing in nutrition or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NUT 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

NUT 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

NUT 492A – Professionalism: An Academic Perspective (2 units)

Course Description: For graduate students in their initial quarter of residence. Professionalism topics are presented and examples drawn from both the biological and social sciences.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

NUT 492C – Grant Writing (3 units)

Course Description: Preparation of grants for governmental agencies (particularly NIH and USDA) and private foundations. Students will write a research grant or fellowship application.

Prerequisite(s): Graduate standing in Nutrition or consent of instructor.

Learning Activities: Lecture 1.50 hour(s), Discussion 1.50 hour(s).

Repeat Credit: May be repeated 1 time(s) with consent of instructor.

Grade Mode: Letter.

Nutritional Biology (NUB)

Graduate Studies

NUB 210A – Advanced Nutrition I: Nutrition & Metabolism, Macronutrients (5 units)

Course Description: Advanced general nutritional concepts. Integrating nutrition with biological systems, population nutrition issues, and research approaches. Advanced concepts on lipid and protein metabolism.

Prerequisite(s): Admission to the Nutritional Biology Graduate Group or consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 30 students.

Grade Mode: Letter.

NUB 210B – Advanced Nutrition II: Nutrition & Cell Biology, Micronutrients (5 units)

Course Description: Effects of nutrients at the cellular level. Principles of cell signaling and signaling modulation by nutrients. Advanced concepts of mineral and vitamin metabolism. Mineral and vitamin deficiencies and associated pathologies.

Prerequisite(s): Admission to the Nutritional Biology Graduate Group or consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 30 students.

Grade Mode: Letter.

NUB 210C – Advanced Nutrition III: Nutrition in Health & Disease (5 units)

Course Description: Integration of biochemical, physiological, and genetic aspects of nutrition in the context of clinical and epidemiological observations related to health and disease, including obesity and diabetes, cancer, vascular and neurodegenerative diseases, osteoporosis, and birth defects. Review and consideration of governmental.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

NUB 290C – Research Group Conference (1 unit)

Course Description: Weekly conference on research problems, progress and techniques in animal sciences.

Prerequisite(s): Graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

NUB 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Graduate standing in Nutritional Biology Graduate Group or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated 3 time(s) when topics differs and consent of instructor.

Grade Mode: Letter.

NUB 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Obstetrics & Gynecology (OBG)

School of Medicine

OBG 192 – Shifa Clinic Student Volunteer (1 unit)

Course Description: Supervised work experience in Obstetrics & Gynecology.

Learning Activities: Conference 2 hour(s), Clinical Activity 8 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Open to undergraduates only.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

OBG 194 – Shifa Clinic Student Volunteer (1 unit)

Course Description: Attend clinic every third Sunday performing duties of receptionist, intake, translation, monitor. Students attend a meeting immediately after end of clinic. There is a mandatory Monday meeting with Clinic co-directors. Students are expected to participate on various committees.

Prerequisite(s): Consent of instructor; applications will be available for students; selection of students will be made by selection committee of medical students coordinators and the instructor of record.

Learning Activities: Conference 1 hour(s), Clinical Activity 6 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

OBG 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

OBG 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

OBG 220 – Genetics of Reproduction (3 units)

Course Description: Introduction to genetics of mammalian reproduction for domestic species, species used in research, and the human.

Mendelian and non-Mendelian modes of inheritance. Research paper.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

OBG 290 – Current Topics in Research (1 unit)

Course Description: Selected topics in reproductive biology.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

OBG 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Letter.

OBG 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

OBG 430 – Obstetrics & Gynecology Clerkship (3-12 units)

Course Description: Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCDMC and affiliated sites. Rounds, conferences, interactive student presentations and seminars ongoing.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 430F – SJVP OBGYN Clerkship at UCSF (6-12 units)

Course Description: Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCSF Fresno. Rounds, conferences, interactive student presentations and seminars ongoing.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 430R – Rural PRIME OBGYN Longitudinal Clerkship (2 units)

Course Description: Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 430RA – Rural PRIME OBGYN Longitudinal Clerkship (3 units)

Course Description: Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 430RB – Rural PRIME OBGYN Longitudinal Clerkship (3 units)

Course Description: Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 430RC – Rural PRIME OBGYN Longitudinal Clerkship (3 units)

Course Description: Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 430RD – Rural PRIME OBGYN Longitudinal Clerkship (1 unit)

Course Description: Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 439D – Directed Clinical Studies in OBGYN (1-12 units)

Course Description: Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

OBG 439R – Directed Studies in OBGYN (1-12 units)

Course Description: Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s), Independent Study 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

OBG 460 – Away Clinical Elective in OBGYN (3-18 units)

Course Description: Active participation in inpatient and outpatient care. Attendance at specified conferences; student-faculty member informal conferences.

Prerequisite(s): OBG 430; or the equivalent, and consent of instructor; third- or fourth-year medical student.

Learning Activities: Clinical Activity 30 hour(s), Variable 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

OBG 465 – Away Acting Internship in OBGYN (3-18 units)

Course Description: Work at the level of a sub intern in Inpatient and/or Outpatient settings. Students are expected to provide direct patient management.

Prerequisite(s): OBG 430; and consent of instructor; other third-year core clerkships.

Learning Activities: Clinical Activity 40 hour(s), Variable 10 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 470 – Gynecologic Oncology Acting Internship (3-18 units)

Course Description: Four week elective primarily involves direct inpatient management of women on the UCDMC Gyn/Onc service. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings.

Prerequisite(s): OBG 430; consent of instructor; the third-year core clerkships.

Learning Activities: Clinical Activity 40 hour(s), Variable 10 hour(s).

Repeat Credit: May be repeated 99 unit(s).

Grade Mode: Honors/Pass/Fail.

OBG 471 – Ambulatory Gynecology & Obstetrics Elective (3-18 units)

Course Description: Conduct examinations, present patients and discuss treatment regimens at the following ambulatory clinics: General Obstetrics & Gynecology, New and Return Obstetrics (including Post-Partum), High-Risk Obstetrics, Pre-Operative Clinic, and other sub-specialty clinics as assigned.

Prerequisite(s): OBG 430; and consent of instructor. Third- or fourth-year Medical Student.

Learning Activities: Clinical Activity 35 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

OBG 472 – Family Planning & Reproductive Health (1-9 units)

Course Description: Elective focuses on the Gynecologic Subspecialty of Family Planning. Counseling and provision of contraceptive methods, experience with pelvic ultrasounds, management of spontaneous, inevitable and induced abortion and post-abortion care by both surgical and medical techniques are included.

Prerequisite(s): OBG 430; consent of instructor.

Learning Activities: Clinical Activity 30 hour(s), Seminar 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

OBG 475 – Labor & Delivery Acting Internship (3-18 units)

Course Description: Four week elective primarily involves direct inpatient management of women on the UCDMC L&D unit. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings.

Prerequisite(s): OBG 430; consent of instructor; the third-year core clerkships.

Learning Activities: Clinical Activity 40 hour(s), Variable 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

OBG 480 – The Birthing Process (1 unit)

Course Description: Open only to UC Davis medical students. Training to assist in the birthing process as a Doula. Topics not covered in the summer course.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

OBG 493 – Gender Specific Medicine SSM (6 units)

Course Description: Special Studies Module, a four-week course on the topic: Basic Science Principles Relating to Gender Specific Medicine.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Lecture/Lab 10 hour(s), Laboratory 16 hour(s), Clinical Activity 4 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Cross Listing: CAR 493.

Grade Mode: Honors/Pass/Fail.

OBG 494 – Shifa Clinic (1-12 units)

Course Description: Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population.

Prerequisite(s): Medical student in good standing.

Learning Activities: Clinical Activity 8 hour(s).

Enrollment Restriction(s): Restricted to Medical student only.

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

OBG 494A – Shifa Clinic (1 unit)

Course Description: Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population.

Prerequisite(s): Consent of instructor; medical student in good standing.

Learning Activities: Clinical Activity 8 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 494B – Shifa Clinic (1 unit)

Course Description: Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population.

Prerequisite(s): Consent of instructor; medical student in good standing.

Learning Activities: Clinical Activity 8 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 494C – Shifa Clinic (1 unit)

Course Description: Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population.

Prerequisite(s): Consent of instructor; medical student in good standing.

Learning Activities: Clinical Activity 8 hour(s).

Grade Mode: Honors/Pass/Fail.

OBG 498 – Group Study (1-5 units)

Course Description: Explore particular topics in-depth in Obstetrics and Gynecology. Extensive contact with and oversight by instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

OBG 499 – Research in Obstetrics & Gynecology (2-12 units)

Course Description: Research in Obstetrics and Gynecology arranged with instructor.

Prerequisite(s): Consent of instructor; fourth-year medical student.

Learning Activities: Clinical Activity, Variable.

Repeat Credit: May be repeated 8 time(s).

Grade Mode: Honors/Pass/Fail.

Ophthalmology (OPT)

School of Medicine

OPT 192 – Research Internship (1-12 units)

Course Description: Supervised work experience in ophthalmology research. Research staff in Ophthalmology have programs in cell biology, electron microscopy, biochemistry, immunology and visual psychophysics.

Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

OPT 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

OPT 299 – Basic Research in Visual Science (1-12 units)

Course Description: Basic research in visual science.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

OPT 442 – Introduction to Ophthalmology (3 units)

Course Description: Ocular disease diagnosis and management relevant to the clinical practice of future primary care physicians and others.

Prerequisite(s): Third- or fourth-year Medical Student with consent of instructor; consent of advisor; completion of third-year clerkships in Medicine and Surgery; consult Course Coordinator.

Learning Activities: Clinical Activity 40 hour(s).

Grade Mode: Honors/Pass/Fail.

OPT 465 – Advanced Subspecialty Ophthalmology (3-6 units)

Course Description: Participation in disciplines of neuro-ophthalmology/pediatric ophthalmology, diseases of the cornea and external eye, glaucoma and retina.

Prerequisite(s): IMD 430; consent of instructor; medical students in third or fourth year.

Learning Activities: Clinical Activity 40 hour(s), Variable 40 hour(s).

Grade Mode: Honors/Pass/Fail.

OPT 498 – Group Study (1-3 units)

Course Description: Directed reading and discussion.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

OPT 499 – Research in Ophthalmology (1-12 units)

Course Description: Individual research on selected topics in optics and visual physiology, cornea and external disease.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Orthopaedic Surgery (OSU)

School of Medicine

OSU 099 – Special Studies for Undergraduates (1-5 units)

Course Description: Special studies for undergraduates.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

OSU 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

OSU 421 – The Musculoskeletal System (2.5 units)

Course Description: Basic and clinical science of orthopaedic surgery and rheumatology.

Prerequisite(s): Consent of committee on student progress.

Learning Activities: Lecture/Discussion 4 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Pass/No Pass only.

OSU 428 – Ambulatory & Emergency Room Orthopaedics (3-6 units)

Course Description: Introduction to general orthopaedic problems and trauma and their management in an outpatient environment, including the emergency room. Conduct orthopaedic examinations, present patients to staff rotating through trauma, hand, pediatrics, adult and foot clinics.

Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

OSU 462 – Community Preceptorship (3-6 units)

Course Description: Acquaints student with private practice of orthopaedics in the community setting. Opportunity to observe and assist private practitioners in office, emergency room, operating room and inpatient environment. Student must provide own transportation.

Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing; consent of instructor.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

OSU 464 – Acting Internship (6 units)

Course Description: Rotation designed to increase basic knowledge of musculoskeletal abnormalities at clinical level. Attention focused on selective case material. For those students who demonstrate proficiency, responsibility will be similar to that of intern.

Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.

Learning Activities: Clinical Activity.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

OSU 465 – Externship in Advanced Orthopaedics (3-6 units)

Course Description: Advanced Orthopaedic rotation done at an approved institution. Topics may include Trauma, Sports, Spine, Pediatrics, Joint and/or Foot/Ankle. Students are expected to perform at the level of an Intern.

Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

OSU 466 – Away Clerkship in Orthopaedics (3-9 units)

Course Description: Orthopaedic advanced clerkship at an approved institution.

Learning Activities: Clinical Activity 40 hour(s).

Grade Mode: Honors/Pass/Fail.

OSU 480 – Insights in Orthopaedic Surgery (1-3 units)

Course Description: Exposure to aims, methods and procedures in orthopaedic surgery via attendance at grand rounds, patient care conferences, and group discussions.

Prerequisite(s): Consent of instructor; first- and second-year medical students in good academic standing.

Learning Activities: Clinical Activity 3-9 hour(s).

Grade Mode: Honors/Pass/Fail.

OSU 481 – History of Medicine for Medical Students (1.5 units)

Course Description: Overview of the history of medicine throughout the world to introduce medical students to landmark accomplishments and key figures in the development of health care and to provide an expanded philosophical perspective on the everchanging field of modern medicine.

Prerequisite(s): Third- or fourth-year students in the School of Medicine or second-year students with consent of instructor.

Learning Activities: Lecture/Discussion 2.50 hour(s).

Grade Mode: Honors/Pass/Fail.

OSU 499 – Orthopaedics Research (1-12 units)

Course Description: Laboratory or clinical investigation on selected topics.

Prerequisite(s): Consent of instructor; third- or fourth-year medical student in good academic standing.

Learning Activities: Clinical Activity.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Otolaryngology (OTO)

School of Medicine

OTO 192 – Internship in Otolaryngology (1-12 units)

Course Description: Supervised work experience in otolaryngology and related fields. Final project report.

Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

OTO 199 – Special Study in Otolaryngology for Advanced Undergraduates (1-5 units)

Course Description: Special study in Otolaryngology for advanced undergraduates.

Prerequisite(s): Advanced undergraduate with consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

OTO 290C – Research Conference in Otolaryngology (1 unit)

Course Description: Presentation and discussion of faculty and student research in otolaryngology.

Prerequisite(s): Graduate students; medical students; advanced undergraduates with consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

OTO 291 – Principles of Speech, Hearing & Equilibrium (3 units)

Course Description: Presentations by faculty and guest lecturers on anatomy, physiology, and behaviors involved in speech production, hearing, and equilibrium. Each student expected to make one class presentation.

Prerequisite(s): Graduate students; medical students; advanced undergraduates with consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

OTO 299 – Individual Study in Otolaryngology for Advanced Graduate Students (1-12 units)

Course Description: Individual study in Otolaryngology for advanced graduate students.

Prerequisite(s): Advanced graduate student with consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

OTO 403 – Basic Principles of Reconstructive Surgery (1 unit)

Course Description: Formal presentations covering basic principles of reconstructive surgery, including wound healing, treatment of lacerations, skin and bone grafts, flaps, Z-plasties and revision of scars. Laboratory session utilizing animal tissues.

Prerequisite(s): Third- or fourth-year medical student with consent of instructor.

Learning Activities: Lecture.

Grade Mode: Letter.

OTO 440 – Otolaryngology Required Clerkship (3-9 units)

Course Description: Provide fundamental knowledge of otorhinolaryngologic diagnosis and principles, develop facility with basic ENT instruments, provide an understanding of treatment for ear, nose and throat problems and provide knowledge of what patients should be referred for otorhinolaryngologic care.

Prerequisite(s): Consent by Committee on Student Evaluation and Promotion.

Learning Activities: Clinical Activity 30 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

OTO 450 – Fourth Year Otolaryngology Elective (6 units)

Course Description: Participation in Otolaryngology Clinic and operating room. Evaluation and management of common Otolaryngologic diseases.

Prerequisite(s): Consent of instructor; third- or fourth-year Medical Students.

Learning Activities: Clinical Activity 35 hour(s), Lecture 2 hour(s), Film Viewing 0.25 hour(s), Discussion 1 hour(s).

Grade Mode: Honors/Pass/Fail.

OTO 460 – Clinical Otolaryngology Elective (3-18 units)

Course Description: Approved for graduate degree credit. Total involvement in clinical activities of the department.

Prerequisite(s): Third- and fourth-year medical students with consent of instructor; open to graduate students.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

OTO 465 – Away Acting Internship in Otolaryngology (3-6 units)

Course Description: Externship rotation for Acting Internships in Otolaryngology.

Learning Activities: Clinical Activity.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

OTO 490 – Journal Seminar (1 unit)

Course Description: Approved for graduate degree credit. Monthly review of current otolaryngologic and related literature and recent advances.

Prerequisite(s): Fourth-year medical students with consent of instructor; open to graduate students.

Learning Activities: Lecture/Discussion 10 hour(s).

Grade Mode: Honors/Pass/Fail.

OTO 498 – Individual or Group Study (1-5 units)

Course Description: Introduction to basic research in Otolaryngology.

Lectures, discussion and laboratory study of sensory and motor systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1-2 hour(s), Laboratory 1-4 hour(s).

Grade Mode: Honors/Pass/Fail.

OTO 499 – Research (1-12 units)

Course Description: Approved for graduate degree credit. Participation in ongoing projects.

Prerequisite(s): Medical students with consent of instructor; open to graduate students.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Pathology (PMD)

School of Law

PMD 192 – Internship in Human Pathology (1-12 units)

Course Description: Supervised work experience in pathology and related fields.

Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

PMD 199 – Special Study in Pathology for Advanced Undergraduates (1-5 units)

Course Description: Special study in Pathology for advanced undergraduates.

Prerequisite(s): Consent of instructor; advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PMD 290C – Research Group Conferences (1 unit)

Course Description: Focused around the mechanisms of function of the central nervous system under normal and pathogenic conditions. Seminars lead by various speakers from UC Davis and other Institutions, both domestic and international.

Prerequisite(s): Graduate level standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PMD 296 – Neurodevelopment Group Study (1-6 units)

Course Description: Explore mechanisms that impact perinatal development of the cerebral cortex, and other cortical structures, under normal and pathological conditions.

Learning Activities: Variable 1-6 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PMD 298 – Advanced Group Study (1-5 units)

Course Description: Group Study provides the opportunity for a faculty member to work with students in a focused manner.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PMD 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PMD 405 – Brain Cutting Conference (1-4 units)

Course Description: Current specimens are sectioned, discussed, and clinical correlations proposed.

Prerequisite(s): Third- and fourth-year medical students or consent of instructor.

Learning Activities: Seminar 1-4 hour(s).

Grade Mode: Honors/Pass/Fail.

PMD 407 – Advanced Neuropathology (3-18 units)

Course Description: Presents an integrated introduction to mechanisms of the central and peripheral nervous system injury. Gain an understanding of pathological mechanisms underlying disease, the anatomic and molecular manifestations of pathologic processes of the CNS and PNS.

Prerequisite(s): Consent of instructor; third- or fourth-year medical student.

Learning Activities: Lecture/Discussion 40 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Honors/Pass/Fail.

PMD 410A – General & Endocrine Pathology (2.5 units)

Course Description: Pathologic mechanisms of human disease. Concepts of general pathologic processes, i.e., cell death, inflammation and neoplasia. Endocrine pathology in the context of clinical human disease. Emphasis on integration of clinical practice with gross and histologic images emphasizing team-based learning.

Learning Activities: Lecture 4 hour(s), Discussion/Laboratory 4.50 hour(s).

Enrollment Restriction(s): Restricted to medical students only.

Grade Mode: Pass/Fail only.

PMD 410B – Systemic Pathology (1 unit)

Course Description: Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include hematopathology and neuropathology.

Prerequisite(s): Approval by SOM Committee on Student progress.

Learning Activities: Lecture 1 hour(s), Discussion/Laboratory 0.50 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Pass/Fail only.

PMD 410C – Systemic Pathology (2 units)

Course Description: Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include pulmonary pathology, cardiovascular pathology, hematopathology, oncologic pathology, and nephropathology.

Prerequisite(s): Approval by SOM Committee on Student progress.

Learning Activities: Lecture 1 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Pass/Fail only.

PMD 410D – Systemic Pathology (2.5 units)

Course Description: Anatomic and clinical pathology of organ system human disease with emphasis on integration with clinical medicine. Content parallels concurrent clinical courses with integration of lectures and discussions. Topics include gastrointestinal and gynecologic pathology, hepatopathology, oncologic pathology and musculoskeletal pathology.

Prerequisite(s): Approval by SOM Committee on Student progress.

Learning Activities: Lecture 1 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Pass/Fail only.

PMD 435 – Clinical Patient Care in Pathology (3-9 units)

Course Description: Four-week course is designed to give the third-year medical student an exposure to the diverse roles that pathologists have in clinical patient care.

Prerequisite(s): Consent of instructor; completed one of the following 3rd year clerkships: Family Medicine, Internal Medicine, Surgery, OBGYN or Pediatrics.

Learning Activities: Clinical Activity 24 hour(s), Independent Study 7 hour(s), Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PMD 440 – Surgery-Pathology-Radiology (SPR) Research Laboratory (2 units)

Course Description: Provide future clinicians and scientists with basic clinical and bioengineering laboratory skills to prepare for careers in translational research.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Discussion/Laboratory 2 hour(s).

Grade Mode: Pass/Fail only.

PMD 460 – Diagnostic Medicine: Pathology in Practice (3 units)

Course Description: Asynchronous learning course bridges the gap between foundational pathophysiology learned in pre-clerkship curriculum and the utilization of pathology and laboratory medicine studies in clinical practice.

Learning Activities: Lecture.

Grade Mode: Pass/Fail only.

PMD 464 – Anatomic Pathology (3-6 units)

Course Description: Anatomic pathology with an emphasis on autopsy and surgical pathology with application to clinical practice. Specimen grossing, frozen sections, microscopic sign-out and conferences. Exposure to cytopathology, hematopathology, and clinical pathology is available.

Prerequisite(s): Consent of instructor; fourth-year medical students.

Learning Activities: Clinical Activity 40 hour(s), Variable.

Enrollment Restriction(s): Restricted to Medical Students only.

Grade Mode: Honors/Pass/Fail.

PMD 465 – Applied Clinical Laboratory Medicine (3-6 units)

Course Description: Emphasis upon laboratory techniques, procedures, and interpretation of laboratory results. Students will be expected to participate fully and in all laboratory operations including bench techniques, laboratory management, and quality control.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PMD 470 – Sub-Specialty in Didactic Pathology (3-16 units)

Course Description: Externship provides in-depth exposure to one of a variety of sub-specialties in Pathology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 25 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PMD 474 – Anatomic Pathology Acting Internship (3-9 units)

Course Description: Anatomic Pathology AI will permit students to gain skills needed for first year Pathology Residency. Students will perform autopsies and take full responsibility for a variety of surgical pathology cases. A mix of outpatient and inpatient cases is expected.

Prerequisite(s): Fourth-year medical student or consent of instructor.

Learning Activities: Clinical Activity 40-80 hour(s).

Enrollment Restriction(s): Restricted to medical students only.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PMD 475 – Anatomic Pathology Acting Internship (3-9 units)

Course Description: Year four level course designed to provide a concentrated experience in Surgical Pathology and Cytolopathology. Rotate on the surgical and cytopathology sub-specialty teams and assume responsibility for patient cases.

Prerequisite(s): PMD 410A; PMD 410B; PMD 410C; PMD 410D; or equivalent, and consent of instructor. Successful completion of third-year clinical rotations.

Learning Activities: Clinical Activity 40-80 hour(s).

Enrollment Restriction(s): Restricted to Medical Students only.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PMD 493 – Interdisciplinary Study of Gastrointestinal Cancer (6 units)

Course Description: In-depth study of gastrointestinal, hepatic and pancreatic cancer. Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Clinical Activity 12 hour(s), Laboratory 3 hour(s), Discussion/Laboratory 20 hour(s).

Cross Listing: SUR 493D.

Grade Mode: Honors/Pass/Fail.

PMD 497T – Tutoring in Pathology (1-5 units)

Course Description: Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine.

Prerequisite(s): Advanced standing or consent of instructor.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: Honors/Pass/Fail.

PMD 498 – Advanced Group Study (1-5 units)

Course Description: Group study in variety of advanced topics in general, special, experimental, or comparative pathology.

Prerequisite(s): Consent of instructor; medical student.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

PMD 499 – Research (1-18 units)

Course Description: Research in experimental, molecular, comparative, and applied pathology.

Prerequisite(s): Medical student with consent of instructor.

Learning Activities: Variable.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Pathology, Microbiology, & Immunology (PMI)

School of Veterinary Medicine

PMI 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PMI 126 – Fundamentals of Immunology (3 units)

Course Description: Overview of immunology including components of the immune system, initiation and regulation of the immune response, infection and immunity, hypersensitivity and immune dysfunction. Clinical immunologic techniques, immunodeficiency, and vaccinology.

Prerequisite(s): BIS 102; or equivalent, or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PMI 126L – Immunology Laboratory (2 units)

Course Description: Laboratory procedures in clinical immunology. Cells of the innate and adaptive systems. Quantitative and qualitative characterization of the immune response.

Prerequisite(s): PMI 126 (can be concurrent); or equivalent.

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

PMI 127 – Medical Bacteria & Fungi (3 units)

Course Description: Introduction to the bacterial and mycotic pathogens of man and animals, with emphasis on pathogenic mechanisms and ecologic aspects of infectious disease.

Prerequisite(s): Any Microbiology course with lab; Immunology strongly recommended.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Pass One open to Microbiology majors.

Grade Mode: Letter.

PMI 128 – Biology of Animal Viruses (3 units)

Course Description: Fundamental physical and chemical properties of animal viruses; methods of propagation, purification and assay.

Mechanisms of viral replication and pathogenesis of viral infections in man and animals. Immunity to virus diseases and oncogenic properties of animal viruses.

Prerequisite(s): BIS 102.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Only 2 units of credit given if completed MIC 162.

Grade Mode: Letter.

PMI 129Y – One Health: Human, Animal & Environment Interfaces (3 units)

Course Description: Introduction to fundamentals, challenges, and opportunities in One Health using local and global health case studies. Animal, human, and environmental health problems, along with tools and transdisciplinary approaches, will be introduced to foster innovative thinking that addresses complex issues.

Learning Activities: Lecture/Discussion 3 hour(s), Web Electronic Discussion.

Enrollment Restriction(s): Limited to upper division undergraduate students in good standing and who fulfill the course prerequisites; limited to 100 students/term.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Oral Skills (OL); Scientific Literacy (SL).

PMI 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 3-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PMI 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PMI 200 – Research Foundations (1 unit)

Course Description: Introduction to key components of graduate school success including mentor/mentee relationship issues, avoiding plagiarism, hypothesis development and experimental design, demystifying the grant writing process, understanding the NIH administrative structure, preparing for a non-academic career, and strategies to maintain a work-life balance.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PMI 201 – Integrative Pathobiology Core I (5 units)

Course Description: Overview of molecular biology techniques, tissue structure and function, cell membrane pathology and cellular mechanisms of disease including cellular responses and adaptations to stress, cell cycle, cell death, cell biomechanics, vascular disturbances, and mechanisms of neoplasia and tumorigenesis.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

PMI 202 – Integrative Pathobiology Core II (4 units)

Course Description: The second required core course in the graduate group with topics in inflammation, host-pathogen interaction, regenerative medicine, integrative pathology and population and ecosystem health.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

PMI 203 – Experimental Design & Data Analysis in Pathobiology (2 units)

Course Description: Follows two required core courses, PMI 201 & PMI 202, for Ph.D. and M.S. students. Goal is to bridge gap between statistics and real-world pathobiology to increase students' skills and independence in experiment design and data analysis.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s), Lecture/Lab 2 hour(s).

Grade Mode: Letter.

PMI 214 – Vector-borne Infectious Diseases: Changing Patterns (2 units)

Course Description: Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement.

Prerequisite(s): Open to graduate students, MPVM and MPH students, DVM and medical students with second- or third-year standing; open to upper division undergraduate students with consent of instructor(s).

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

PMI 221 – Topics in Virus Research (1 unit)

Course Description: Discussion-based seminar covering graduate student virology research. Informal presentations and discussion of technical problems in research design and experimentation are encouraged.

Current stage of the research project is not important.

Prerequisite(s): Graduate student standing (Ph.D. or M.S.).

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to 10 students.

Repeat Credit: May be repeated 4 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PMI 270 – Advanced Immunology (3 units)

Course Description: Current concepts of immunology with an emphasis on interactions between the host, the environment and the pathogen. These interactions will include those that are protective and successful for the host as well as those that are deleterious.

Prerequisite(s): Introductory course in Immunology.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to graduate student status in the Comparative Pathology Graduate Group; all other students require consent of instructor.

Grade Mode: Letter.

PMI 290 – Seminar (1 unit)

Course Description: Topics in pathology, microbiology or immunology.

Prerequisite(s): Graduate level standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PMI 293A – Seminar in Infectious Diseases (1 unit)

Course Description: Discussion of current topics and cases of infectious diseases.

Prerequisite(s): Current enrollment in health science professional school or graduate standing in biological sciences.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

PMI 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PMI 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Pediatrics (PED)

School of Medicine

PED 199 – Special Study in Pediatric Research (1-5 units)

Course Description: Special study for Pediatric research.

Prerequisite(s): Undergraduate student with consent of instructor based upon adequate preparation as determined by instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PED 299 – Pediatric Research (1-12 units)

Course Description: Pediatric research.

Prerequisite(s): Consent of instructor. Graduate students who are candidates for a degree in some area of biology or behavioral sciences.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PED 401 – Preceptorship in Pediatrics (2 units)

Course Description: Opportunity to observe and participate in primary medical care in a practicing pediatricians office. Participation in history-taking and physical examination will be at discretion of preceptor and dependent on students experience. Evaluation by student.

Prerequisite(s): Second-year medical student or first-year medical student with consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

PED 402 – Clinical Experience in Private Practice (1-18 units)

Course Description: Opportunity to participate in practice of preceptor, performing such tasks as history taking, physical examination, and patient management.

Prerequisite(s): PED 430; third-or fourth-year medical student; consent of preceptor and Chairperson.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

PED 405 – Pediatrics Lecture Series (0.5 units)

Course Description: Lecture series covers major topics in pediatrics with case presentations and panels from pediatric subspecialists. Topics include, but are not limited to: cardiology, pulmonology, nephrology, gastroenterology, critical care, and primary care pediatrics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

PED 415 – Fetal & Neonatal Physiology (1 unit)

Course Description: Elective is designed to combine for study a variety of aspects of the physiology, anatomy and biochemistry of the fetus and newborn with relevant clinical examples of disorders in each of the 10 topics that will be discussed.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Independent Study 4 hour(s).

Grade Mode: Pass/Fail only.

PED 430 – Pediatric Clerkship (3-12 units)

Course Description: Eight week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCDMC and affiliated clinical sites. Rounds, conferences, student presentations ongoing.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Pass/Fail only.

PED 430F – SJVP Pediatric Clerkship at UCSF (12 units)

Course Description: Eight-week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCSF Fresno. Rounds, conferences, student presentations ongoing.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Enrollment Restriction(s): Restricted to Medical students only.

Grade Mode: Honors/Pass/Fail.

PED 430FA – SJVP Longitudinal Pediatrics Clerkship (1.5-6 units)

Course Description: Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40-60 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430FB – SJVP Longitudinal Pediatrics Clerkship (1.5-6 units)

Course Description: Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40-60 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430FC – SJVP Longitudinal Pediatrics Clerkship (1.5-6 units)

Course Description: Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40-60 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430FD – SJVP Longitudinal Pediatrics Clerkship (1.5-6 units)

Course Description: Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40-60 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430R – Rural PRIME Pediatrics Longitudinal Clerkship (2 units)

Course Description: Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430RA – Rural PRIME Pediatrics Longitudinal Clerkship (3 units)

Course Description: Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430RB – Rural PRIME Pediatrics Longitudinal Clerkship (3 units)

Course Description: Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430RC – Rural PRIME Pediatrics Longitudinal Clerkship (3 units)

Course Description: Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430RD – Rural PRIME Pediatrics Longitudinal Clerkship (1 unit)

Course Description: Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430TA – TeachMS Longitudinal Pediatrics Clerkship (A) (4 units)

Course Description: Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430TB – TeachMS Longitudinal Pediatrics Clerkship (B) (6 units)

Course Description: Longitudinal clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 430TC – TeachMS Longitudinal Pediatrics Clerkship (C) (2 units)

Course Description: Longitudinal clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 439D – Directed Clinical Studies in Pediatrics (1-12 units)

Course Description: Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

PED 439R – Directed Studies in Pediatrics (1-12 units)

Course Description: Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s), Independent Study 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

PED 440 – Pediatrics for the Differentiated Student (3-6 units)

Course Description: One goal is to facilitate the development and reinforcement of the knowledge, skills and attitudes needed as an intern caring for children. Provides a bridge between student experiences in the pre-clerkship phase, the Pediatric clerkship, their Pediatric acting internships and varied Pediatric electives and the Transition to Residency course.

Learning Activities: Lecture/Discussion 20 hour(s).

Grade Mode: Pass/Fail only.

PED 460A – General Inpatient Pediatric Acting Internship (3-18 units)

Course Description: The Ward Acting Intern functions in a manner similar to that of a pediatric intern. The Acting Intern takes admissions in the regular sequence and is expected to take night call.

Prerequisite(s): PED 430 B or better; and consent of instructor; letter of recommendation from Pediatrics faculty member.

Learning Activities: Internship.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

PED 460B – Acting Internship: Outpatient Pediatrics (3-18 units)

Course Description: Supervised experience in pediatric care on outpatient service at UCDMC. Student functions as Acting Intern with appropriate supervision by residents and attending faculty.

Prerequisite(s): PED 430 B or better; and consent of instructor; letter of recommendation from Pediatrics faculty member.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

PED 461 – Pediatric Inpatient AI in Hematology/Oncology (6 units)

Course Description: Inpatient and outpatient experience in diagnosis and management of oncologic and hematologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged.

Prerequisite(s): PED 430; consent of instructor; satisfactory completed.

Learning Activities: Clinical Activity 37.50 hour(s), Lecture 7.50 hour(s).

Enrollment Restriction(s): Limited Enrollment.

Grade Mode: Honors/Pass/Fail.

PED 462 – Elective in Pediatric Endocrinology (3-18 units)

Course Description: Inpatient and outpatient experience in diagnosis and management of endocrine disorders in children. Laboratory experience and participation in clinical investigation may be arranged.

Prerequisite(s): Consent of instructor; completion of second-year study or the equivalent.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

PED 463 – Medical & Mental Health Evaluation of Children at Risk for Maltreatment (3-9 units)

Course Description: Elective for fourth-year medical students covers basic areas of knowledge needed for child abuse prevention and consultation. Rotation includes legal cases, abuse exams, child and parent interactive therapy and visits to community organizations.

Learning Activities: Clinical Activity 30 hour(s), Discussion 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PED 464 – Acting Internship in Neonatology (3-12 units)

Course Description: Diagnostic and therapeutic aspect of the medical and surgical high-risk neonate. Student expected to take night call.

Prerequisite(s): PED 430 B or better; consent of instructor; letter of recommendation from Pediatrics faculty member.

Learning Activities: Clinical Activity 60 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PED 465 – Pediatrics Specialty Elective (3-18 units)

Course Description: Supervised experience in a variety of pediatric subspecialties at a local or away site.

Prerequisite(s): PED 430; consent of instructor.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

PED 466 – Elective in Pediatric Cardiology (3-18 units)

Course Description: Inpatient and outpatient experience in diagnosis and management of cardiologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged.

Prerequisite(s): PED 430; satisfactory completed.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

PED 467 – Elective in Pulmonary Medicine (3-18 units)

Course Description: Inpatient and outpatient management of pediatric patients with pulmonary diseases. These will include but will not be limited to cystic fibrosis, asthma, and other forms of chronic pulmonary diseases as well as congenital abnormalities.

Prerequisite(s): Pediatric clerkship.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

PED 468 – Elective in Pediatrics Nephrology (3-18 units)

Course Description: Inpatient and outpatient experience in diagnosis and management of renal disorders in children. Laboratory experience and participation in clinical investigation may be arranged.

Prerequisite(s): PED 430; consent of instructor; satisfactory completed.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

PED 469 – Elective in Pediatric Infectious Disease (3-18 units)

Course Description: Inpatient and outpatient experience in diagnosis and treatment of infectious disease of infants and children. Laboratory and clinical investigation may be arranged.

Prerequisite(s): PED 430; consent of instructor; satisfactory completed.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

PED 470 – Elective in Pediatric Neurology (3-18 units)

Course Description: Inpatient and outpatient experience in diagnosis and management of neurological disorders in children. Students will also participate in other pediatric subspecialty clinics which serve children with neurological disorders. Does not satisfy the fourth-year neurology requirement.

Prerequisite(s): PED 430; IMD 430; OBG 430; consent of instructor; all courses satisfactory completed.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

PED 471 – Elective in Pediatric Gastroenterology (3-18 units)

Course Description: Inpatient and outpatient experience in diagnosis and management of gastroenterology disorders in children. Laboratory experience and participation in clinical investigation may be arranged.

Prerequisite(s): PED 430; consent of instructor; satisfactory completed.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

PED 472 – Clinical Rotation in Adolescent Medicine (3-9 units)

Course Description: Under supervision, students will see patients in the UC Davis clinic and at a number of community-based sites. Emphasis on the socially-mediated problems that face adolescents, including substance abuse, STD's, pregnancy, depression and suicide. One hour of lecture each week.

Prerequisite(s): Consent of instructor; fourth-year Medical Student.

Learning Activities: Clinical Activity 39 hour(s), Lecture 1 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 473 – Away Acting Internship in Pediatrics (4.5-18 units)

Course Description: Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management.

Prerequisite(s): Consent of instructor; satisfactory completion of Pediatrics Clerkship.

Learning Activities: Clinical Activity 40 hour(s), Lecture 6 hour(s), Variable.

Grade Mode: Honors/Pass/Fail.

PED 474 – Neonatal (ICU) (4-8 units)

Course Description: The Pediatric ICU at UC Davis Children's Hospital is a 24 bed ICU on Davis 10 that provides care for critically ill pediatric patients. These patients are usually younger than 18 years of age and can have either primary medical or surgical issues.

Learning Activities: Variable.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Honors/Pass/Fail Only.

PED 476 – Acting Internship in Pediatric Intensive Care (3-18 units)

Course Description: Evaluation and support of critically ill infants and children. In general, student expected to take night call every third night during rotation.

Prerequisite(s): PED 430 A is required; or consent of instructor; letter of recommendation from Pediatrics faculty member.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PED 477 – Pediatric Intensive Care Unit (4-8 units)

Course Description: Evaluation and support of critically ill infants and children. In general, student expected to take night call every third night during rotation.

Learning Activities: Variable.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Honors/Pass/Fail Only.

PED 493 – Ethical, Legal & Social Issues in Clinical Genetics (6 units)

Course Description: Develop advanced knowledge, communication skills and attitudes necessary to provide compassionate, knowledgeable, and expert care to patients who may be at increased genetic risk for disease. Seminars cover ethical and legal principles, epidemiology, and genetics.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 12 hour(s), Clinical Activity 18 hour(s), Auto Tutorial 8 hour(s), Independent Study 2 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

PED 493B – Living with Intellectual & Developmental Disability in the Community (1-6 units)

Course Description: In-depth experience with Intellectual & Developmental Disability across the lifespan.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 4 hour(s), Lecture 10 hour(s),

Fieldwork 4 hour(s), Seminar 4 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 493C – Fetal & Neonatal Physiology SSM (6 units)

Course Description: Elective is available for students interested in exploring the fascinating world of the fetus and neonate. Designed to combine the basic sciences with relevant clinical examples of disorders.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 24 hour(s), Clinical Activity 8 hour(s).

Grade Mode: Honors/Pass/Fail.

PED 494 – Intellectual & Developmental Disability in the Community (3-6 units)

Course Description: In-depth experience with Intellectual & Developmental Disability across the lifespan.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

PED 495 – Fetal & Neonatal Physiology (3-6 units)

Course Description: Didactic is available for students interested in exploring the fascinating world of the fetus and neonate. Designed to combine the basic sciences with relevant clinical examples of disorders.

Learning Activities: Independent Study; Discussion 1-3 hour(s).

Grade Mode: Pass/Fail only.

PED 498 – Directed Group Study (1-5 units)

Course Description: Explore in-depth various topics in Pediatrics. Extensive contact with and oversight by instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PED 499 – Research Topics in Pediatrics (1-18 units)

Course Description: Individual research project in pediatric subspecialty areas (cardiology, endocrinology, hematology, metabolism, newborn physiology and others) may be arranged with faculty member.

Independent research by student will be emphasized and long-term projects are possible.

Prerequisite(s): Student in Medical School with consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Performance Studies (PFS)

Graduate Studies

PFS 200 – Methods & Materials in Theatre Research (4 units)

Course Description: Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

PFS 259 – Topics in Contemporary Theatre & Performance (4 units)

Course Description: Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship; e.g., "Brecht and After," "British Theater," "Race and Gender in Performance."

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

PFS 265A – Performance Studies: Modes of Production (4 units)

Course Description: Introduction to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetorical and political theory.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

PFS 265B – Performance Studies: Signification & the Body (4 units)

Course Description: Introduction to analysis of the body in performance, drawing on theoretical models from several fields.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

PFS 265C – Performance Studies: Performance & Society (4 units)

Course Description: Introduction to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

PFS 265D – Performance Studies: Theory, History, Criticism (4 units)

Course Description: Introduction to the theory, history and criticism, informing performance studies.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

PFS 270A – Individually Guided Research in Performance Studies (4 units)

Course Description: Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus.

Prerequisite(s): PFS 200; (PFS 265A or PFS 265B or PFS 265C or PFS 265D); and consent of instructor.

Learning Activities: Discussion 1 hour(s), Independent Study, Extensive Writing.

Enrollment Restriction(s): Restricted to students in the Graduate Group Ph.D. in Performance Studies.

Grade Mode: Letter.

PFS 270B – Individually Guided Research in Performance Studies (4 units)

Course Description: Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project, to produce a dissertation prospectus.

Prerequisite(s): PFS 200; (PFS 265A or PFS 265B or PFS 265C or PFS 265D); and consent of instructor.

Learning Activities: Discussion 1 hour(s), Independent Study, Extensive Writing.

Enrollment Restriction(s): Restricted to students in the Graduate Group Ph.D. in Performance Studies.

Grade Mode: Letter.

PFS 270C – Individually Guided Research in Performance Studies (4 units)

Course Description: Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus.

Prerequisite(s): PFS 200; (PFS 265A or PFS 265B or PFS 265C or PFS 265D); and consent of instructor.

Learning Activities: Discussion/Laboratory 2 hour(s), Fieldwork 2 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to students in the Graduate Group Ph.D. in Performance Studies.

Grade Mode: Letter.

PFS 280 – Practice as Research Laboratory (1-6 units)

Course Description: Individual, collective or collaborative practice as research. Discussion and exploration of examples, portfolio development and documentation strategies.

Prerequisite(s): Completion or concurrent enrollment of PFS 200 recommended; consent of instructor.

Learning Activities: Discussion/Laboratory 1-6 hour(s).

Repeat Credit: May be repeated 36 units with consent of instructor.

Grade Mode: Letter.

PFS 290 – Colloquia in Performance Studies (4 units)

Course Description: Designed to provide cohort identity and faculty exchange. Opportunity to present papers, hear guest lecturers, and see faculty presentations, gather for organizational and administrative new, exchange of information and make announcements. Must be taken every year that a Performance Studies graduate is registered, prior to taking the Qualifying Examination.

Prerequisite(s): Registration in Performance Studies Graduate Group and prior to Qualifying Examination.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion/Laboratory 1 hour(s), Term Paper.

Credit Limitation(s): Limited to 4 units per year.

Repeat Credit: May be repeated 4 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PFS 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 1-5 hour(s).

Grade Mode: Letter.

PFS 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PFS 299D – Dissertation Research (1-12 units)

Course Description: Dissertation research.

Prerequisite(s): Consent of instructor; advancement to Candidacy.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PFS 459 – Approaches to Theatre & Dance (4 units)

Course Description: Work on approaches to theatre, dance, film/video, design and performance, with a focus on methodology and professional development.

Prerequisite(s): Consent of instructor; advanced graduate students.

Learning Activities: Seminar 3 hour(s), Term Paper, Project.

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Letter.

Persian (PER)

College of Letters & Science

PER 001 – Elementary Persian (5 units)

Course Description: Introduction to listening, speaking, reading and writing skills in Persian and to Persian culture.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

PER 002 – Elementary Persian (5 units)

Course Description: Continuation of PER 001. Introduction to listening, speaking, reading and writing skills in Persian and to Persian culture.

Prerequisite(s): PER 001; or consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

PER 003 – Elementary Persian (5 units)

Course Description: Continuation of PER 002. Introduction to listening, speaking, reading and writing skills in Persian and to Persian culture.

Prerequisite(s): PER 002; or consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

PER 021 – Intermediate Persian (4 units)

Course Description: Integrated presentation of listening, speaking, reading and writing skills as well as cultural topics in intermediate Persian.

Prerequisite(s): PER 003; or the equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

PER 022 – Intermediate Persian (4 units)

Course Description: Integrated presentation of listening, speaking, reading and writing as well as cultural topics in Intermediate Persian.

Prerequisite(s): PER 021; or the equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

PER 023 – Intermediate Persian (4 units)

Course Description: Integrated presentation of listening, speaking, reading and writing skills as well as cultural topics in Intermediate Persian.

Prerequisite(s): PER 022; or equivalent knowledge of Persian.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

PER 097T – Tutoring in Persian (1-5 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): PER 023 B or better; consent of Program Director required.

Learning Activities: Tutoring 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: P/NP only.

PER 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PER 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PER 101 – Advanced Persian: Topics in Modern Persian Culture 1900-Present (4 units)

Course Description: Integrated work on reading, listening, discussion and writing about modern Persian cultural production using fiction and poetry as well as cinema and theory.

Prerequisite(s): PER 023; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

PER 103 – Advanced Persian: Topics in Medieval Persian Culture 900-1500 (4 units)

Course Description: Integrated work on reading, listening, discussion, writing about medieval Persian culture with a focus on lyric and narrative poetry and representative selections of literary prose, rhetoric, biography, history, religious and philosophical discourse.

Prerequisite(s): PER 023; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

PER 121 – Advanced Persian (4 units)

Course Description: Review, refinement, and development of skills learned in intermediate Persian through work with texts, video, and audio on cultural and social issues. Integrated approach to reading, writing, listening, speaking Persian.

Prerequisite(s): PER 023; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

PER 122 – Advanced Persian (4 units)

Course Description: Continuation of PER 121. Further development of advanced skills in reading, listening, writing, and speaking modern Persian through work with texts, video, and audio on cultural and social issues.

Prerequisite(s): PER 121; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

PER 123 – Advanced Persian (4 units)

Course Description: Continuation of PER 122. Further development of advanced skills in reading, listening, writing, and speaking modern Persian through work with texts, video, and audio on cultural and social issues.

Prerequisite(s): PER 122; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

PER 197T – Tutoring in Persian (1-5 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): PER 023 B or better; consent of Program Director required.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: P/NP only.

PER 297 – Directed Independent Study (1-5 units)

Course Description: Directed graduate independent study on a topic culminating in a term paper. Independent Study may only be arranged with consent of the instructor when graduate seminars are unavailable.

Topic varies by instructor.

Learning Activities: Variable 1-5 hour(s),

Grade Mode: S/U only.

PER 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching practicum.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated 18 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Pharmacology & Toxicology (PTX)

College of Agricultural & Environmental Sciences

PTX 201 – Principles of Pharmacology & Toxicology I (5 units)

Course Description: First of three courses presenting fundamental principles of pharmacology and toxicology. Introductory overview of basic concepts in pharmacology/toxicology, followed by in-depth blocks on fate processes of chemicals in the body, fate processes in tissue selective responses, selective toxicity employed therapeutically.

Prerequisite(s): BIS 102; NPB 101.

Learning Activities: Lecture 5 hour(s).

Grade Mode: Letter.

PTX 202 – Principles of Pharmacology & Toxicology II (4 units)

Course Description: Second of three courses presenting fundamental principles of pharmacology and toxicology. Principles of pharmacodynamics and mechanisms of drug/toxicant actions.

Prerequisite(s): PTX 201.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

PTX 203 – Principles of Pharmacology & Toxicology III (4 units)

Course Description: Integrated physiological systems, cardiovascular and nervous systems and how drugs and toxicants act to perturb function.

Prerequisite(s): PTX 201; PTX 202.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

PTX 215 – Electrophysiology Techniques & Applications (3 units)

Course Description: Broad scope of topics in electrophysiology techniques and applications.

Learning Activities: Lecture 1.50 hour(s), Discussion 1.50 hour(s).

Cross Listing: MCP 215.

Grade Mode: Satisfactory/Unsatisfactory only.

PTX 230 – Advanced Topics in Pharmacology & Toxicology (1-3 units)

Course Description: In-depth coverage of selected topics for graduate students in Pharmacology-Toxicology and related disciplines. Topics determined by instructor in charge for each quarter.

Prerequisite(s): PTX 201; and consent of instructor.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s), Seminar 1 hour(s).

Grade Mode: Letter.

PTX 277 – Molecular Mechanisms in Cancer & other Diseases (3 units)

Course Description: Exploration of cutting edge investigations on the underlying mechanisms of cancer biology, cancer therapy and other diseases. Current medical research in cancer and other diseases, as it spans the bench to bedside.

Prerequisite(s): MCB 121 or MCB 122; undergraduate or graduate introductory course in cell biology (such as BIS 104), and general biochemistry (MCB 121 or MCB 122) required; PTX 202 recommended.

Learning Activities: Lecture/Discussion 2 hour(s), Project.

Enrollment Restriction(s): Restricted to graduate standing or consent of instructor.

Grade Mode: Letter.

PTX 290 – Seminar (1 unit)

Course Description: Current topics in pharmacology and toxicology.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PTX 290C – Advanced Research Conference (1 unit)

Course Description: Provide credit for participation in and attendance at research conferences.

Learning Activities: Lecture/Discussion.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PTX 299 – Research (1-12 units)

Course Description: Research with a faculty member in the Pharmacology & Toxicology Graduate Group.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Philosophy (PHI)

College of Letters & Science

PHI 001 – Introduction to Philosophy (4 units)

Course Description: Problems of philosophy through major writings from various periods. Problems are drawn from political, aesthetic, religious, metaphysical, and epistemological concerns of philosophy.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 005 – Critical Reasoning (4 units)

Course Description: Criteria of good reasoning in everyday life and in science. Topics to be covered may include basic principles of deduction and induction; fallacies in reasoning; techniques and aids to reasoning; principles of scientific investigation; aids to clarity.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PHI 006.

Grade Mode: Letter.

General Education: Writing Experience (WE).

PHI 007 – Philosophical Perspectives on Sexuality (3 units)

Course Description: Philosophical issues related to sexuality, including, but not limited to, ethical and social issues regarding sexual practice, orientation, classification and identity.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD).

PHI 007Y – Philosophical Perspectives on Sexuality (3 units)

Course Description: Philosophical issues related to sexuality, including, but not limited to, ethical and social issues regarding sexual practice, orientation, classification and identity.

Learning Activities: Web Virtual Lecture 1.50 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PHI 007.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD).

PHI 010 – Introduction to Cognitive Science (4 units)

Course Description: Introduction to the interdisciplinary cognitive scientific approach to the study of mind, drawing concepts and methods from psychology, philosophy, linguistics, artificial intelligence, and other disciplines.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Cognitive Science majors only.

Cross Listing: CGS 001.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

PHI 011 – Asian Philosophy (4 units)

Course Description: Survey of the main philosophical systems of south and east Asia: Hinduism, Buddhism, Confucianism, and Taoism. Topics include the nature of reality, including God, the universe and the human self, human knowledge, and the proper conduct of human life.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

PHI 012 – Introduction to Symbolic Logic (4 units)

Course Description: Syntax and semantics of the symbolic language sentence logic. Symbols of sentence logic. Translation between sentence logic and English. Truth table interpretation of sentence logic. Proof techniques. Application of truth tables and proof techniques to arguments in English.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken PHI 112, PHI 113, PHI 134, or PHI 135 and passed with a grade of C or better.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

PHI 013 – Minds, Brains, & Computers (3 units)

Course Description: Computational theories of the nature of the mind. Mind as a computer process. Possibility of machine intelligence, consciousness, and mentality.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit for students who have completed PHI 013G.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL).

PHI 013G – Minds, Brains, & Computers with Discussion (4 units)

Course Description: Computational theories of the nature of the mind. Mind as a computer process. Possibility of machine intelligence, consciousness, and mentality.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit for students who have completed PHI 013.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

PHI 014 – Ethical & Social Problems in Contemporary Society (4 units)

Course Description: Philosophical issues and positions involved in contemporary moral and social problems. Possible topics include civil disobedience and revolution, racial and sex discrimination, environment, population control, technology and human values, sexual morality, freedom in society.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 015 – Introduction to Bioethics (4 units)

Course Description: Critical analysis of normative issues raised by contemporary medicine and biology. Possible topics include euthanasia, reproductive technologies, genetic engineering, informed consent and patient autonomy, experimentation on human subjects and non-human animals.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 016 – Philosophical Foundations of American Democracy (4 units)

Course Description: The philosophical underpinnings of democratic government and the tension between the goals of providing security and of preserving democracy and civil liberties. Illustration of the tension through focus on issues related to war and terrorism.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

PHI 017 – Language, Thought, & World (4 units)

Course Description: Puzzles in the philosophy of language, such as what language is, how language conveys thoughts, whether we each speak our own private language, and what we can learn about the world by studying language.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

PHI 021 – Philosophical Classics of the Ancient Era (4 units)

Course Description: Survey of ancient Western philosophy with special attention to the Pre-Socratics, Plato, Aristotle, and the Sceptics.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 022 – Philosophical Classics of the Modern Era (4 units)

Course Description: Survey of modern Western philosophy, including Descartes, Locke, Hume, and Kant.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 024 – Introduction to Ethics (4 units)

Course Description: Reading of historical and contemporary philosophical works in ethics. Topics include the nature of morality, the justification of moral claims, and major ethical theories, such as consequentialist, deontological, and virtue theories.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 030 – Introduction to Philosophy of Science (4 units)

Course Description: Basic problems in the philosophy of science, common to the physical, biological, and social sciences. Analysis of explanation, confirmation theory, observational and theoretical terms, the nature of theories, operationalism and behaviorism, realism, reduction.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

PHI 031 – Appraising Scientific Reasoning (4 units)

Course Description: Introduction to scientific hypotheses and the kinds of reasoning used to justify such hypotheses. Emphasis on adequate justification, criteria, and strategies for distinguishing scientific from pseudoscientific theories. Concrete historical and contemporary cases.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

PHI 032 – Understanding Scientific Change (4 units)

Course Description: Concepts of scientific change in historical and philosophical perspective. Survey of models of growth of knowledge, 17th century to present. Relationship between logic of theories and theory choice. Kuhns revolution model. Examples from various sciences.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Writing Experience (WE).

PHI 038 – Introduction to Philosophy of Biology (4 units)

Course Description: Non-technical introduction to philosophical, social, and scientific ideas, methods and technologies in contemporary biological fields such as evolution, genetics, molecular biology, ecology, behavior. Philosophical consideration of determinism, reductionism, explanation, theory, modeling, observation, experimentation. Evaluation of scientific explanations of human nature.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

PHI 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PHI 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PHI 101 – Metaphysics (4 units)

Course Description: Theories of being. Such topics as reality, substance, universals, space, time, causality, becoming, body, experience, persons, freedom, and determinism. Views of the nature and method of metaphysics. Anti-metaphysical arguments.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 102 – Theory of Knowledge (4 units)

Course Description: Analysis of the concept of knowledge. The relation between knowledge, belief and truth. Development of foundationalist, coherentist and externalist theories of justified belief. Examination of skepticism.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing, Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 103 – Philosophy on Mind (4 units)

Course Description: The relation between mind and body, our knowledge of other minds, and the explanation of mental acts. Discussion of such concepts as action, intention, and causation.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 104 – The Evolution of Mind (4 units)

Course Description: Interpretation of human thought and behavior through the lens of evolutionary theory. Topics include the nature/nurture debate concerning cognitive and other mental capacities and traits, and the interaction between evolution, learning and development.

Prerequisite(s): One previous course in Philosophy recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

PHI 105 – Philosophy of Religion (4 units)

Course Description: Logical, metaphysical, epistemological, and existential aspects of selected religious concepts and problems.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 107 – Philosophy of the Physical Sciences (4 units)

Course Description: Nature of testability and confirmation of scientific hypotheses; nature of scientific laws, theories, explanations, and models. Problems of causality, determinism, induction, and probability; the structure of scientific revolutions.

Prerequisite(s): One Philosophy course or a science background recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Writing Experience (WE).

PHI 108 – Philosophy of the Biological Sciences (4 units)

Course Description: Scientific method in biology. Nature of biological theories, explanations, and models. Problems of evolutionary theory, ecology, genetics, and sociobiology. Science and human values.

Prerequisite(s): One course in Biology or one course in Philosophy recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

PHI 109 – Philosophy of the Social Sciences (4 units)

Course Description: The nature of the social sciences, their subject matter and methods. Similarities to and differences from natural and life sciences. Predicting and explaining human behavior. Behaviorism. Reduction, holism, and individualism. Related moral issues. The social sciences and philosophy.

Prerequisite(s): One course in Philosophy or a social science recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

PHI 111 – Philosophy of Space & Time (4 units)

Course Description: Philosophical problems of space and time.

Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include the nature of geometry, conventionalism, absolutist versus relationist views of space and time, philosophical impact of relativity theory.

Prerequisite(s): One upper division Philosophy course recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 112 – Intermediate Symbolic Logic (4 units)

Course Description: Predicate logic syntax and semantics. Transcription between predicate logic and English. Models, truth-trees, and derivations. Identity, functions, and definite descriptions. Introduction to concepts of metatheory.

Prerequisite(s): PHI 012 C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

PHI 113 – Metalogic (4 units)

Course Description: The metalogic of classical propositional and first-order predicate logic. Consistency, soundness and completeness of both propositional and predicate logic. The Löwenheim-Skolem theorem for predicate logic. Undecidability of predicate logic.

Prerequisite(s): PHI 112; MAT 108; or the equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

PHI 114 – History of Ethics (4 units)

Course Description: Study of some classic texts from the history of philosophical writing on central problems of ethics, taking the form either of a survey or concentrated examination of selected historical figures.

Readings from such philosophers as Aristotle, Butler, Hume, Kant, Mill.

Prerequisite(s): One previous Philosophy course recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 115 – Problems in Normative Ethics (4 units)

Course Description: Moral philosophy studied through examination of moral problems and the moral principles and common sense intuitions that bear on them. Problems discussed may include: animal rights, fetal rights, euthanasia, justice and health care, war, nuclear deterrence, world hunger, environmental protection.

Prerequisite(s): One previous course in Philosophy recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 116 – Ethical Theories (4 units)

Course Description: Study of fundamental concepts and problems in ethical theory through an examination of classical and contemporary philosophical theories of ethics. Among the theories that may be discussed are utilitarianism, virtue theory, theories of natural rights, Kantian ethical theory, and contractarianism.

Prerequisite(s): One course in ethics recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 117 – Foundations of Ethics (4 units)

Course Description: Advanced investigation of questions about the nature and foundations of morality. Among the topics that may be discussed are moral realism and anti-realism, cognitivism and non-cognitivism, types of relativism, moral skepticism, normative language and normative belief.

Prerequisite(s): PHI 114, 115, 116, 101, or 137 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 118 – Political Philosophy (4 units)

Course Description: Intensive examination of some central concepts of political thought such as the state, sovereignty, rights, obligation, freedom, law, authority, and responsibility.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

PHI 119 – Philosophy of Law (4 units)

Course Description: Philosophical theories of the nature of law, legal obligation, the relation of law and morals. Problems for law involving liberty and justice: freedom of expression, privacy, rights, discrimination and fairness, responsibility, and punishment.

Prerequisite(s): Consent of instructor; one course in Philosophy recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

PHI 120 – Environmental Ethics (4 units)

Course Description: Conceptual and ethical issues concerning the environment. Extension of ethical theory to animals, all life, and ecosystem wholes. Topics may include contemporary environmental issues such as global warming, sustainability and biodiversity.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit for students who have completed PHI 115 prior to fall 2011.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 121 – Bioethics (4 units)

Course Description: In-depth coverage of topics in bioethics including resource allocation, measures of health and disease/disability, public health, and ethical issues related to research on human subjects and emerging technologies.

Prerequisite(s): PHI 015 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 122 – Philosophy of Race (4 units)

Course Description: Core issues in the philosophy of race, including investigation of the nature and reality of race, use of race in science and medicine, nature of racial identity, and ethical responses to racial injustice.

Prerequisite(s): One previous course in Philosophy recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 123 – Aesthetics (4 units)

Course Description: Nature of art, of artistic creation, of the work of art, and of aesthetic experience; nature and validity of criticism; relations of art to its environment.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 125 – Theory of Action (4 units)

Course Description: Survey of prominent contemporary approaches to leading problems in action theory. Problems include issues about the nature of intentional action and the conceptual character of explanations of actions in terms of the agent's reasons.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 128 – Rationality (4 units)

Course Description: Philosophical issues concerning rationality in its various forms. Focus is on theoretical and practical reasoning and conditions for rational belief, choice, and action. Possible additional topics include rationality and human limitations; paradoxes of rationality; varieties of irrationality; rationality and objectivity.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

PHI 129 – Knowledge & the A Priori (4 units)

Course Description: Self-evidence, intuition, the (in)fallibility and (in)defeasibility of a priori methods. Analytic, formalist and Kantian accounts of how knowledge can be acquired through reasoning and intuition alone, without recourse to empirical methods.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 131 – Philosophy of Logic & Mathematics (4 units)

Course Description: Nature of formal systems and mathematical theories. Selected topics include logical and semantical paradoxes; foundations of mathematics; set theory, type theory, and intuitionistic theory; philosophy of geometry; philosophical implications of Gödels incompleteness results.

Prerequisite(s): PHI 012 or one course for credit in mathematics.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 133 – Logic, Probability, & Artificial Intelligence (4 units)

Course Description: Introduction to theoretical artificial intelligence with a focus on nonmonotonic logic, Bayesian networks, and learning theory.

Prerequisite(s): PHI 012; (PHI 112 or STA 013).

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 134 – Modal Logic (4 units)

Course Description: Survey of the main systems of modal logic, including Lewis systems S4 and S5. Possible worlds semantics and formal proofs. Applications to epistemology, ethics, or temporality.

Prerequisite(s): PHI 112 or MAT 108; or the equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 135 – Alternative Logics (4 units)

Course Description: Alternatives to standard truth-functional logic, including many-valued logics, intuitionist logics, relevance logics, and non-monotonic logics.

Prerequisite(s): PHI 012 or MAT 108; or the equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 136 – Formal Epistemology (4 units)

Course Description: Formal (mathematical) approaches to belief revision, knowledge and deduction, meta-knowledge, (multi-agent) epistemic logic, Bayesian confirmation, Bayes nets, epistemic and probabilistic paradoxes.

Prerequisite(s): PHI 012.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

PHI 137A – Philosophy of Language: Theory of Reference (4 units)

Course Description: Survey of issues and views concerning reference, or how words refer to things. Topics include names and descriptions, the distinction between sense and reference, the puzzle of non-referring terms, causal theories of reference, and possibility and necessity.

Prerequisite(s): One course in Philosophy or Linguistics recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 137B – Philosophy of Language: Truth & Meaning (4 units)

Course Description: Comparative treatment of theories about the relationship between truth and meaning. Topics include: the identification of meaning with truth conditions, the nature of propositions, theories of linguistic understanding, the roles of mind and world in determining meaning.

Prerequisite(s): One course in Philosophy or Linguistics recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 137C – Philosophy of Language: Semantics & Pragmatics (4 units)

Course Description: Philosophical issues and positions concerning the meaning and use of language. Topics include the distinction between meaning and implication, the roles of context and convention in language use, speaker meaning versus linguistic meaning and speech act theory.

Prerequisite(s): One course in Philosophy or Linguistics recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 141 – Socrates & the Socratic Dialogue (4 units)

Course Description: Philosophy of Socrates as found in the Socratic dialogues of Plato. Topics include the Socratic practice of refutation, its method, epistemological foundation, and moral purpose; Socratic eudaimonism and Socratic virtue theory; the paradoxes of Socratic intellectualism.

Prerequisite(s): PHI 021 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 143 – Hellenistic Philosophy (4 units)

Course Description: Positions and arguments of the major philosophical schools of the Hellenistic period: Stoicism, Epicureanism, and Scepticism. Focus is on ethical, epistemological and metaphysical questions and their interconnectedness.

Prerequisite(s): PHI 021 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 145 – Christian, Islamic, & Jewish Philosophers of the Middle Ages (4 units)

Course Description: Major Christian, Islamic, and Jewish philosophers of the Middle Ages.

Prerequisite(s): PHI 021 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

PHI 151 – 19th-Century European Philosophy (4 units)

Course Description: Survey of the main movements in 19th-century philosophy on the European continent. Idealism in Schopenhauer and Hegel, dialectical materialism in Marx, irrationalism in Kierkegaard, Nietzsche and Dostoevsky.

Prerequisite(s): PHI 022 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 156 – Contemporary Analytic Philosophy (4 units)

Course Description: Consideration of central issues such as meaning/reference, analytic/synthetic, reductionism, formal and ordinary language, essential properties, ontological commitment, possible world semantics; influential works by philosophers such as Russell, Moore, Wittgenstein, Austin, Carnap, Quine, Putnam, Kripke, van Fraassen.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 157 – 20th-Century European Philosophy (4 units)

Course Description: Survey of the main movements in 20th-century philosophy on the European continent, including phenomenology, existentialism, post-structuralism and post-modernism. Philosophers covered are Husserl, Heidegger, Sartre, Foucault, Derrida.

Prerequisite(s): One course in Philosophy recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 160 – Pre-Socratics (4 units)

Course Description: Study of the metaphysical views of such pre-Socratic figures as the Milesians, the Pythagoreans, Heraclitus, Parmenides, Empedocles, Anaxagoras, and the atomists.

Prerequisite(s): PHI 021 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 161 – Plato (4 units)

Course Description: Examines Platos most important contributions in metaphysics, epistemology, psychology, cosmology, ethics and political philosophy. Dialogues will be selected from Platos middle and later writings.

Prerequisite(s): PHI 021 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 162 – Aristotle (4 units)

Course Description: Overview of Aristotles most central and influential writings. Topics selected from fields such as metaphysics, physics, ethics, logic, and psychology.

Prerequisite(s): PHI 021 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 168 – Descartes (4 units)

Course Description: Philosophical writings of René Descartes. Topics include the refutation of skepticism, the nature and existence of mind and body, the existence of God, and the foundations of science.

Prerequisite(s): PHI 022 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 170 – Spinoza & Leibniz (4 units)

Course Description: Philosophical writings of Spinoza and Leibniz in the 17th century. Topics drawn from both philosophers include: the nature and existence of God, the nature of mind, the relation between mind and body, human freedom, metaphysical monism vs. pluralism.

Prerequisite(s): PHI 022 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 171 – Reimagining Early Modern Philosophy (4 units)

Course Description: Historically underrepresented figures and topics in early modern philosophy. Early modern women philosophers, such as Margaret Cavendish, Elisabeth of Bohemia, and Anne Conway. African philosophers or freed slaves such as Anton Wilhelm Amo and Olaudah Equiano. Topics may include the relation between the mind and the body, human nature, human diversity, equality, the ethics of slavery, and the nature of race and gender.

Prerequisite(s): PHI 022 recommended.

Learning Activities: Lecture/Discussion 3 hour(s); Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 172 – Locke & Berkeley (4 units)

Course Description: Principal metaphysical works of John Locke and George Berkeley. Topics include abstract ideas, existence of matter, primary and secondary qualities, essence, substance, the existence of God, and the nature of scientific knowledge.

Prerequisite(s): PHI 022 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 174 – Hume (4 units)

Course Description: David Hume's Treatise of Human Nature and related writings. Topics include empiricism, space, causality, belief, skepticism, the passions, and morality.

Prerequisite(s): PHI 022 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 175 – Kant (4 units)

Course Description: Immanuel Kant's Critique of Pure Reason and related writings. Topics include the nature of human cognition, space and time, a priori concepts, substance, causality, human freedom, and the existence of God.

Prerequisite(s): PHI 022 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 178 – Frege (4 units)

Course Description: Development of Gottlob Frege's views about language and logic. Formulation of his grand mathematical idea known as logicism and how it led to the philosophy of language.

Prerequisite(s): Consent of instructor; one upper division course in Philosophy recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 189A – Special Topics in Philosophy: History of Philosophy (4 units)

Course Description: Special topics in History of Philosophy.

Prerequisite(s): One course in the area of the special topic recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 189B – Special Topics in Philosophy: Metaphysics (4 units)

Course Description: Special topics in Metaphysics.

Prerequisite(s): One course in the area of the special topic recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 189C – Special Topics in Philosophy: Theory of Knowledge (4 units)

Course Description: Special topics in Theory of Knowledge.
Prerequisite(s): One course in the area of the special topic recommended.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Repeat Credit: May be repeated 8 unit(s).
Grade Mode: Letter.
General Education: Writing Experience (WE).

PHI 189D – Special Topics in Philosophy: Ethics (4 units)

Course Description: Special topics in Ethics.
Prerequisite(s): One course in the area of the special topic recommended.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Repeat Credit: May be repeated 8 unit(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 189E – Special Topics in Philosophy: Political Philosophy (4 units)

Course Description: Special topics in Political Philosophy.
Prerequisite(s): One course in the area of the special topic recommended.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Repeat Credit: May be repeated 8 unit(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 189F – Special Topics in Philosophy: Philosophy of Law (4 units)

Course Description: Special topics in Philosophy of Law.
Prerequisite(s): One course in the area of the special topic recommended.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Repeat Credit: May be repeated 8 unit(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 189G – Special Topics in Philosophy: Aesthetics (4 units)

Course Description: Special topics in Aesthetics.
Prerequisite(s): One course in the area of the special topic recommended.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Repeat Credit: May be repeated 8 unit(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 189H – Special Topics in Philosophy: Philosophy of Mind (4 units)

Course Description: Special topics in Philosophy of Mind.
Prerequisite(s): One course in the area of the special topic recommended.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Repeat Credit: May be repeated 8 unit(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Writing Experience (WE).

PHI 189I – Special Topics in Philosophy: Philosophy of Science (4 units)

Course Description: Special Topics in Philosophy of Science.
Prerequisite(s): One course in the area of the special topic recommended.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Repeat Credit: May be repeated 8 unit(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH) or Science & Engineering (SE); Writing Experience (WE).

PHI 189J – Special Topics in Philosophy: Philosophy of Language (4 units)

Course Description: Special topics in Philosophy of Language.
Prerequisite(s): One course in the area of the special topic recommended.
Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.
Repeat Credit: May be repeated 8 unit(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH).

PHI 189K – Special Topics in Philosophy: Logic (4 units)

Course Description: Special topics in Logic.
Prerequisite(s): One course in the area of the special topic recommended.
Learning Activities: Lecture/Discussion 4 hour(s).
Repeat Credit: May be repeated 8 unit(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH).

PHI 194HA – Honors Research Project (4 units)

Course Description: Completion of honors research project under direction of an instructor. Consult departmental major advisor for list of instructors available in a given quarter.
Prerequisite(s): Consent of instructor; open to students who are members of the honors program in Philosophy.
Learning Activities: Tutorial 3 hour(s), Term Paper.
Grade Mode: Letter.

PHI 194HB – Research Project (4 units)

Course Description: Completion of honors research project under direction of an instructor. Consult departmental major advisor for list of instructors available in a given quarter.
Prerequisite(s): Consent of instructor; open to students who are members of the honors program in Philosophy.
Learning Activities: Tutorial 3 hour(s), Term Paper.
Grade Mode: Letter.

PHI 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.
Prerequisite(s): Consent of instructor.
Learning Activities: Variable.
Grade Mode: Pass/No Pass only.

PHI 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.
Prerequisite(s): Consent of instructor.
Learning Activities: Variable.
Grade Mode: Pass/No Pass only.

PHI 200A – Proseminar I (4 units)

Course Description: Intensive study of core works in a selected area of philosophy. Intensive experience in philosophical writing, discussion, and presentation of written work.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open only to students in their first quarter of the Philosophy Ph.D. program.

Grade Mode: Letter.

PHI 200B – Proseminar II (4 units)

Course Description: Intensive study of core works in a selected area of philosophy. Intensive experience in philosophical writing, discussion, and presentation of written work.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open only to students in their first quarter of the Philosophy Ph.D. program.

Grade Mode: Letter.

PHI 201 – Metaphysics (4 units)

Course Description: Topics vary from quarter to quarter and may include the following: What are things? Do names refer to things? If so, how? Do things have essential properties? What is the nature of necessity?

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated when topic differs and with consent of instructor.

Grade Mode: Letter.

PHI 202 – Theory of Knowledge (4 units)

Course Description: Topics vary from quarter to quarter. Sample topics include belief, skepticism, justification, externalism, naturalized epistemology.

Prerequisite(s): Graduate standing in Philosophy or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated when topic differs and with consent of instructor.

Grade Mode: Letter.

PHI 203 – Philosophy of Mind (4 units)

Course Description: Topics in the philosophy of mind, such as the mind-body problem, mental representation, consciousness, intentionality.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

PHI 203P – Philosophy of Mind Practicum (4 units)

Course Description: Specific research conducted and prepared for publication by advanced students in a team setting. Topics include knowledge representation and learning in neural networks, the nature and formal properties of mental representation.

Prerequisite(s): Consent of instructor.

Learning Activities: Practice 12 hour(s).

Repeat Credit: May be repeated when topic differs and consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

PHI 207 – Philosophy of Physics (4 units)

Course Description: Intensive treatment of one (or more) topic(s) in the philosophy of physics, such as foundations of spacetime theories, the interpretation of quantum mechanics, or foundations of statistical mechanics.

Prerequisite(s): Graduate standing in Philosophy or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs and consent of instructor.

Grade Mode: Letter.

PHI 208 – Philosophy of Biology (4 units)

Course Description: Intensive treatment of one (or more) topic(s) in the philosophy of biology, such as foundations of evolutionary theories, reductionism in biology, sociobiology and cultural evolution.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs and consent of instructor.

Grade Mode: Letter.

PHI 210 – Philosophy of Science (4 units)

Course Description: Treatment of one or more general topics of current interest in philosophy of science. Topics may include scientific explanation, theories of confirmation, scientific realism, reduction in physics and biology.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs and consent of instructor.

Grade Mode: Letter.

PHI 212 – Philosophy of Logic & Mathematics (4 units)

Course Description: Philosophical issues in logic and math. Topics may include nature of logical and mathematical truth or knowledge, correctness of logical systems, foundations of mathematics, metaphysical and epistemological presuppositions, applications to philosophical problems and formalization of philosophical theories.

Prerequisite(s): PHI 112 or PHI 113 or MAT 108; or MAT 125 or the equivalent.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs and consent of instructor.

Grade Mode: Letter.

PHI 213 – Advanced Logic for Graduate Students (4 units)

Course Description: Intensive study of advanced logic, including set theory, metatheory of predicate logic, and modal logic.

Prerequisite(s): Graduate standing in Philosophy.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Problem Solving.

Enrollment Restriction(s): Enrollment in the Philosophy Ph.D. program.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

PHI 214 – Ethics (4 units)

Course Description: Topics may include morality and motivation, objectivity in ethics, the relationship between the factual and the moral. Topics vary from quarter to quarter.

Prerequisite(s): Graduate standing in Philosophy or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs and consent of instructor.

Grade Mode: Letter.

PHI 217 – Political Philosophy (4 units)

Course Description: Advanced studies in political philosophy. Topics vary but may include distributive justice, enforcement of morality by the state, equality, obligation to obey the law, social contract theory.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs and consent of instructor.

Grade Mode: Letter.

PHI 220 – Environmental Ethics (4 units)

Course Description: Intensive treatment of one or more topic(s) in environmental ethics, such as biodiversity, sustainability, composition of the moral community, invasive species, endangered species, applications of ethical theories to contemporary environmental issues.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

PHI 237 – Philosophy of Language (4 units)

Course Description: Study of philosophical issues raised by language, such as the nature of semantic content, proper semantics for verbs of propositional attitude, feasibility and limitations of formal semantics and pragmatics for natural languages.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated when topic differs and consent of instructor.

Grade Mode: Letter.

PHI 238 – Philosophy of Language Workshop (4 units)

Course Description: Discussion of recently published, unpublished and in-progress research in philosophy of language, including work on the relation of language and mind, of language and logic, and linguistic theory.

Learning Activities: Seminar 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to graduate students only.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

PHI 261 – Plato (4 units)

Course Description: Advanced seminar designed for analysis of arguments, doctrines, and texts from Plato's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

PHI 262 – Aristotle (4 units)

Course Description: Advanced seminar designed for analysis of arguments, doctrines, and texts from Aristotle's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

PHI 275 – Kant (4 units)

Course Description: Intensive study of a topic in the philosophy of Kant, in such areas as metaphysics, theory of knowledge, ethics.

Prerequisite(s): Graduate standing in Philosophy or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

PHI 290 – History of Philosophy (4 units)

Course Description: Topics in the history of philosophy. Topics vary according to instructor from quarter to quarter.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs and with consent of instructor.

Grade Mode: Letter.

PHI 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Letter.

PHI 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PHI 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Physical Medicine & Rehabilitation (PMR)

School of Medicine

PMR 100 – Research Approaches to Disability & Rehabilitation (2 units)

Course Description: Discussion and evaluation of research approaches to medical rehabilitation, community integration, and quality of life of disabled persons, with a focus on the progressive disabilities associated with neuromuscular diseases. Intent is to encourage interest in professions that serve the disabled community and increase awareness of rehabilitation goals.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

PMR 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; advanced standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PMR 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor; advanced standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PMR 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PMR 405 – Healthy Living: Leading by Example (1.5 units)

Course Description: Improve the physical and mental health of participating students while supplementing their medical education with specific concepts.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion 2 hour(s), Laboratory 4 hour(s), Clinical Activity 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

PMR 405A – Healthy Living: Leading by Example (1 unit)

Course Description: Improve the physical and mental health of participating students while supplementing their medical education with specific concepts.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion 2 hour(s), Laboratory 4 hour(s), Clinical Activity 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

PMR 405B – Healthy Living: Leading by Example (0.5 units)

Course Description: Improve the physical and mental health of participating students while supplementing their medical education with specific concepts.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion 2 hour(s), Laboratory 4 hour(s), Clinical Activity 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

PMR 421 – Introduction to Sports Medicine (1 unit)

Course Description: Introduction to basic concepts of Sports Medicine in Physical Medicine & Rehabilitation. Students attend afternoon clinic with Sports Medicine attending; attend lectures focusing on Sports Medicine topics. Students also eligible to cover sporting events with attending physicians where available.

Learning Activities: Lecture 1 hour(s), Clinical Activity 4 hour(s), Fieldwork.

Grade Mode: Pass/Fail only.

PMR 440 – Introduction to Rehabilitation Medicine (3 units)

Course Description: Rehabilitation and comprehensive care of physically disabled and physical medicine management of neurologic, neuromuscular and musculoskeletal disorders. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries and neuromuscular disease. Additional emphasis on inpatient rehabilitation, pediatrics, spine or sports possible.

Prerequisite(s): IMD 430; SUR 430; consent of instructor.

Learning Activities: Clinical Activity 36 hour(s), Lecture/Discussion 4 hour(s).

Grade Mode: Honors/Pass/Fail.

PMR 461 – Comprehensive Rehabilitation Medicine (6 units)

Course Description: Four-week rotation designed as broad overview of Physical Medicine & Rehabilitation practice for students interested in residency training in the specialty. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries, neuromuscular disease, neurological and non-operative orthopedic problems requiring rehabilitative management.

Prerequisite(s): IMD 430; SUR 430; consent of instructor.

Learning Activities: Clinical Activity 36 hour(s), Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: Honors/Pass/Fail.

PMR 462 – Rehabilitation Medicine Clinical Elective (5-18 units)

Course Description: Emphasis on evaluation of patients with neurological or orthopaedic problems requiring rehabilitative techniques for their management. Introduction to management of such patients. Physical Medicine & Rehabilitation at off-campus facility must be approved by Chairperson.

Prerequisite(s): IMD 430; SUR 430; and consent of instructor; completion of third-year in Medical School.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

PMR 463 – Pediatric Rehabilitation Medicine: Caring for Developmental Disabilities (3 units)

Course Description: Clerkship. Participate in the outpatient clinical care of children with a wide variety of medical conditions at Shriner's Hospitals for Children. Rotate through a variety of different outpatient clinics including cerebral palsy, neuromuscular disease, limb difference, spinal cord injury, spina bifida, brachial plexus, and sports medicine.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

PMR 470 – Away Acting Internship in Physical Medicine & Rehabilitation (3-6 units)

Course Description: AI Externship option for PM&R rotations at other institutions.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PMR 493 – Applied Musculoskeletal Anatomy: Sports & Spine SSM (6 units)

Course Description: This four-week module will review the anatomy and biomechanics of the musculoskeletal system as well as its associated pathology. The students will be instructed on appropriate musculoskeletal exam techniques and logical approach to the patient in the clinical setting.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Lecture/Lab 10 hour(s), Laboratory 16 hour(s), Clinical Activity 4 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

PMR 494 – Applied Musculoskeletal Anatomy: Sports & Spine (3-6 units)

Course Description: Review of the anatomy and biomechanics of the musculoskeletal system as well as its associated pathology. Instruction on appropriate musculoskeletal exam techniques and logical approach to the patient in the clinical setting.

Learning Activities: Variable.

Grade Mode: Pass/Fail only.

PMR 498 – Advanced Group Study (1-5 units)

Course Description: Study and experience for medical students in any of a number of areas in physical medicine and rehabilitation.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

PMR 499 – Research for Medical Students (1-12 units)

Course Description: Research on any of a variety of topics in physical medicine and rehabilitation.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PAS 243A – Professional Practice in Healthcare 1 (2 units)

Course Description: Role of the Physician Assistant in the context of healthcare system. Physician Assistant topics in practice of healthcare delivery within interprofessional team.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 243B – Professional Practice in Healthcare 2 (2 units)

Course Description: Current trends for Physician Assistants in U.S. healthcare system; delivery of healthcare; health outcomes; and PA profession. Specific requirements for graduate PA entering professional clinical practice.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 250 – Foundations of Primary Health Care (8 units)

Course Description: Foundational primary health care concepts essential to the care of common medical and surgical conditions. Foundational content in anatomy, physiology, pathophysiology and clinical reasoning organized by organ system.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 8 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 251A – Primary Health Care (8 units)

Course Description: Introduction to primary health care concepts essential to the care of common medical and surgical conditions. Various organ systems and specialty areas each quarter: Ophthalmology, Pulmonology, Renal, Genitourinary and Hematology/Oncology.

Prerequisite(s): PAS 250 C or better; PAS 270 C or better; PAS 400 C or better; consent of instructor.

Learning Activities: Lecture/Discussion 8 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 251B – Primary Health Care (8 units)

Course Description: Introduction to primary health care concepts essential to the care of common medical and surgical conditions. Various organ systems and specialty areas each quarter: Cardiology, Ophthalmology, GI and Endocrinology.

Prerequisite(s): PAS 251A C or better; PAS 260 C or better; PAS 271A C or better; PAS 410A C or better; or consent of Instructor.

Learning Activities: Lecture/Discussion 8 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

Physician Assistant Studies (PAS)

Graduate Studies

PAS 251C – Primary Health Care (7 units)

Course Description: Introduction to primary health care concepts essential to the care of common medical and surgical conditions. Various organ systems and specialty areas each quarter: Musculoskeletal medicine, Rheumatology, Neurology and Psychiatry.

Prerequisite(s): PAS 251B C or better; PAS 271B C or better; PAS 410B C or better; consent of instructor.

Learning Activities: Lecture/Discussion 7 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 251D – Gender and Transgender Health (4 units)

Course Description: Health care concepts specific and essential to the care of men, women, and transgender populations. Unique aspects of preventive care and treatment of conditions specific to these populations.

Prerequisite(s): PAS 251B C or better; PAS 271B C or better; PAS 410B C or better; consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 251E – Surgery & Emergency Medicine (4 units)

Course Description: Concepts essential to the care of common urgent and emergent medical conditions, as well as chronic, urgent, and emergent surgical conditions. Epidemiology, presentation, evaluation and management of these conditions.

Prerequisite(s): PAS 251D C or better; PAS 251C C or better; PAS 271C C or better; PAS 410C C or better; consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 251F – Pediatrics & Gerontology (Special Populations) (4 units)

Course Description: Health care concepts essential to care of special populations at earliest and latest stages of life. Unique aspects of both pediatric and geriatric patients.

Prerequisite(s): PAS 410C C or better; PAS 251C C or better; PAS 271C C or better; PAS 251D C or better; consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 260 – Foundations of Behavioral Health (2 units)

Course Description: Spectrum of normal psychological development over the lifespan for children, adults and elders. Theories of stress and coping mechanism as a framework for the assessment of individuals.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 270 – Foundations of Pharmacology (3 units)

Course Description: Introduction to major concepts in foundational pharmacology including pharmacokinetics, pharmacodynamics, pharmacogenetics, and other molecular mechanisms of health and disease.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 271A – Advanced Pharmacology (2 units)

Course Description: Pharmacology series aligned with pathophysiology and physical exam skills courses. Variable content each quarter. Different organ systems and specialty areas across the lifespan.

Prerequisite(s): PAS 270 C or better; PAS 250 C or better; PAS 400 C or better; consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 271B – Advanced Pharmacology (2 units)

Course Description: Pharmacology series aligned with pathophysiology and physical exam skills courses. Variable content each quarter. Different organ systems and specialty areas across the lifespan.

Prerequisite(s): PAS 271A C or better; PAS 251A C or better; PAS 410A C or better; or consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 271C – Advanced Pharmacology (2 units)

Course Description: Pharmacology series aligned with pathophysiology and physical exam skills courses. Variable content each quarter. Different organ systems and specialty areas across the lifespan.

Prerequisite(s): PAS 271B C or better; PAS 251B C or better; PAS 410B C or better; consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 299 – Research & Writing (1-4 units)

Course Description: Nursing Science and Health-Care Leadership graduate program students conduct research and writing under the supervision of a faculty member.

Prerequisite(s): Consent of instructor.

Learning Activities: Extensive Writing/Discussion 3-12 hour(s).

Enrollment Restriction(s): Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor.

Repeat Credit: May be repeated in different quarters, depending on the length of their program of study to complete their Master's Degree.

Grade Mode: Satisfactory/Unsatisfactory only.

PAS 400 – Basic Clinical Skills (5 units)

Course Description: Fundamental clinical skills for patient care. Principles of effective communication in establishing the therapeutic provider-patient relationship.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Lab 5 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 401 – Basic Clinical Skills (1-4 units)

Course Description: Continuation of focus on history taking and physical examination skills with advanced/specialized content.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1-4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 410A – Advanced Clinical Skills (4 units)

Course Description: History taking and physical examination skills with advanced/specialized content. Organ system focus varies by quarter.

Prerequisite(s): PAS 400 C or better; PAS 250 C or better; PAS 270 C or better; consent of instructor.

Learning Activities: Lecture/Lab 4 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 410B – Advanced Clinical Skills (3 units)

Course Description: History taking and physical examination skills with advanced/specialized content. Organ system focus varies by quarter.

Prerequisite(s): PAS 410A C or better; PAS 251A C or better; PAS 271A C or better; consent of instructor.

Learning Activities: Lecture/Lab 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 410C – Advanced Clinical Skills (3 units)

Course Description: History taking and physical examination skills with advanced/specialized content. Organ system focus varies by quarter.

Prerequisite(s): PAS 410B C or better; PAS 251B C or better; PAS 271B C or better; consent of instructor.

Learning Activities: Lecture/Lab 3hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 410D – Advanced Clinical Skills (3 units)

Course Description: History taking and physical examination skills with advanced/specialized content. Organ system focus varies by quarter.

Prerequisite(s): PAS 410C C or better; PAS 251C C or better; PAS 271C C or better; PAS 251D C or better; consent of instructor.

Learning Activities: Lecture/Lab 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 410E – Advanced Clinical Skills (1 unit)

Course Description: History taking and physical examination skills with advanced/specialized content. Organ system focus varies by quarter.

Prerequisite(s): PAS 410D C or better; PAS 251E C or better; PAS 251F C or better; consent of instructor.

Learning Activities: Lecture/Lab 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 410F – Advanced Clinical Skills (1 unit)

Course Description: History taking and physical examination skills with advanced/specialized content. Organ system focus varies by quarter.

Prerequisite(s): PAS 410E C or better; consent of instructor.

Learning Activities: Lecture/Lab 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 410G – Advanced Clinical Skills (1 unit)

Course Description: History taking and physical examination skills with advanced/specialized content. Organ system focus varies by quarter.

Prerequisite(s): PAS 410F C or better; consent of instructor.

Learning Activities: Lecture/Lab 1 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 440 – Preparation for Clinical Practice (1-3 units)

Course Description: Students are placed in clinical settings and/or clinical simulation laboratories to observe and practice the integration of clinical skills with direct supervision by faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 36 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 450 – Supervised Clinical Practice Experience - Family Medicine (1-16 units)

Course Description: Five-week clinical rotation under the supervision of an appropriate community-based family medicine provider per accreditation requirements.

Prerequisite(s): PAS 251E C+ or better; PAS 251F C+ or better; PAS 410D C + or better; or consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 451 – Supervised Clinical Practice Experience - Pediatrics (1-16 units)

Course Description: Five-week clinical rotation under the supervision of an appropriate community-based pediatric medicine provider per accreditation requirements.

Prerequisite(s): PAS 251E C+ or better; PAS 251F C+ or better; PAS 410D C + or better; or consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 452 – Supervised Clinical Practice Experience - Women's Health (1-16 units)

Course Description: Five-week clinical rotation under the supervision of an appropriate community-based women's health and prenatal care provider per accreditation requirements.

Prerequisite(s): PAS 251E C+ or better; PAS 251F C+ or better; PAS 410D C+ or better; or consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 453 – Supervised Clinical Practice Experience - Mental Health (1-16 units)

Course Description: Five-week clinical rotation under the supervision of an appropriate community-based psychiatrist, psychiatric/mental health provider per accreditation requirements.

Prerequisite(s): PAS 251E C+ or better; PAS 251F C+ or better; PAS 410D C+ or better; or consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 454 – Supervised Clinical Practice Experience - Emergency Medicine (1-16 units)

Course Description: Five-week clinical rotation under the supervision of an appropriate emergency medicine provider per accreditation requirements.

Prerequisite(s): PAS 251E C+ or better; PAS 251F C+ or better; PAS 410D C+ or better; or consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 455 – Supervised Clinical Practice Experience - Inpatient Surgery (1-16 units)

Course Description: Five-week clinical experience under the supervision of an appropriate surgical provider per accreditation requirements.

Prerequisite(s): PAS 251E C+ or better; PAS 251F C+ or better; PAS 410D C+ or better; or consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 456 – Supervised Clinical Practice Experience - Internal Medicine (1-16 units)

Course Description: Five-week clinical rotation under the supervision of an appropriate internal medicine provider per accreditation requirements.

Prerequisite(s): PAS 251E C+ or better; PAS 251F C+ or better; PAS 410D C+ or better; or consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Grade Mode: Letter.

PAS 459 – Supervised Clinical Practice Experience - Other Specialties (1-16 units)

Course Description: Five-week selective rotations available to accommodate student interest and/or accommodate a student's clinical deficits identified by the program.

Prerequisite(s): PAS 251E C+ or better; PAS 251F C+ or better; PAS 410D C+ or better; or consent of instructor.

Learning Activities: Clinical Activity 3 hour(s).

Enrollment Restriction(s): Open to graduate students in School of Nursing programs, or consent of instructor.

Repeat Credit: May be repeated for credit.

Grade Mode: Letter.

Physics (PHY)

College of Letters & Science

PHY 001A – Principles of Physics (3 units)

Course Description: Mechanics. Introduction to general principles and analytical methods used in physics with emphasis on applications in applied agricultural and biological sciences and in physical education.

Prerequisite(s): Trigonometry or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open to students who have received credit for PHY 007B or PHY 009A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 001B – Principles of Physics (3 units)

Course Description: Continuation of PHY 001A. Heat, optics, electricity, modern physics.

Prerequisite(s): PHY 001A or PHY 009A.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have received credit for PHY 007A, PHY 007B, PHY 007C, PHY 009B, PHY 009C, or PHY 009D.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 007A – General Physics (4 units)

Course Description: Introduction to general principles and analytical methods used in physics for students majoring in a biological science.

Prerequisite(s): MAT 016B (can be concurrent) or MAT 017B (can be concurrent) or MAT 021B (can be concurrent); completion or concurrent enrollment in MAT 016B or MAT 017B or MAT 021B.

Learning Activities: Lecture 1.50 hour(s), Discussion/Laboratory 5 hour(s).

Credit Limitation(s): Only 2 units of credit allowed to students who have completed PHY 001B or PHY 009B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 007B – General Physics (4 units)

Course Description: Continuation of PHY 007A.

Prerequisite(s): PHY 007A.

Learning Activities: Lecture 1.50 hour(s), Discussion/Laboratory 5 hour(s).

Credit Limitation(s): Only 2 units of credit allowed to students who have completed PHY 001A or PHY 009A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 007C – General Physics (4 units)

Course Description: Continuation of PHY 007B.

Prerequisite(s): PHY 007B.

Learning Activities: Lecture 1.50 hour(s), Discussion/Laboratory 5 hour(s).

Credit Limitation(s): Only 2 units of credit allowed to students who have completed PHY 009C or PHY 005C.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 009A – Classical Physics (5 units)

Course Description: Introduction to general principles and analytical methods used in physics for physical science and engineering majors.

Classical mechanics.

Prerequisite(s): MAT 021B or MAT 021M; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 2.50 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Only 2 units of credit for students who have completed PHY 001A or PHY 007B; not open for credit to students who have completed PHY 009HA.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 009B – Classical Physics (5 units)

Course Description: Continuation of PHY 009A. Fluid mechanics, thermodynamics, wave phenomena, optics.

Prerequisite(s): PHY 009A; MAT 021C; MAT 021D (can be concurrent).

Learning Activities: Lecture 3 hour(s), Laboratory 2.50 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Only 2 units of credit for students who have completed PHY 007A; not open for credit to students who have completed PHY 009HB, PHY 009HC, or ENG 105.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 009C – Classical Physics (5 units)

Course Description: Electricity and magnetism including circuits and Maxwell's equations.

Prerequisite(s): PHY 009B; MAT 021D; (MAT 022A or MAT 027A (can be concurrent)).

Learning Activities: Lecture 3 hour(s), Laboratory 2.50 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Only 3 units of credit for students who have completed PHY 007C; not open for credit to students who have completed PHY 009HD.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 009D – Modern Physics (4 units)

Course Description: Introduction to physics concepts developed since 1900. Special relativity, quantum mechanics, atoms, molecules, condensed matter, nuclear and particle physics.

Prerequisite(s): PHY 009C; (MAT 022A or MAT 027A); MAT 022B or MAT 27B recommended (may be taken concurrently).

Learning Activities: Lecture 3 hour(s), Discussion 1.50 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 009HA – Honors Physics (5 units)

Course Description: Classical mechanics. Same material as PHY 009A in greater depth. For students in physical sciences, mathematics, and engineering.

Prerequisite(s): MAT 021B (can be concurrent); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Only 2 units of credit for students who have completed PHY 007B; not open for credit to students who have completed PHY 009A.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 009HB – Honors Physics (5 units)

Course Description: Special relativity, thermal physics. Continuation of PHY 009HA.

Prerequisite(s): (PHY 009HA or PHY 009A); MAT 021C (can be concurrent).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Only 2 units of credit for students who have completed PHY 007A; not open for credit to students who have completed PHY 009B or PHY 009D.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 009HC – Honors Physics (5 units)

Course Description: Waves, sound, optics, quantum physics. Continuation of Physics 9HB.

Prerequisite(s): PHY 009HB; MAT 021D (can be concurrent).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Only 2 units of credit for students who have completed PHY 007C; not open for credit to students who have completed PHY 009B or PHY 009D.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 009HD – Honors Physics (5 units)

Course Description: Electricity and magnetism. Continuation of Physics 9HC.

Prerequisite(s): PHY 009HC; MAT 021D.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PHY 009C.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 009HE – Honors Physics (5 units)

Course Description: Application of quantum mechanics.

Prerequisite(s): PHY 009HD; (MAT 022B or MAT 027B (can be concurrent)).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PHY 009D.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 010 – Topics in Physics for Nonscientists (4 units)

Course Description: Emphasis varies: survey of basic principles or a deeper exploration of some particular branch. Past topics included black holes, space time, and relativity; physics of music; history and philosophy; energy and the environment; and natural phenomena.

Prerequisite(s): High school algebra.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): No units of credit allowed if taken after any other PHY course.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 010C – Physics of California (3 units)

Course Description: Atmospheric phenomena common in CA, local weather patterns and microclimes. Applications to CA energy, water, and resource management policies. Physics underlying regional sports in CA.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed any quarter of PHY 009 or PHY 009H, or any upper division PHY course.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

PHY 010CY – Physics of California (3 units)

Course Description: Conceptual understanding of the physics underlying regional sports in CA. Focus on skiing, surfing, and scuba diving.

Atmospheric phenomena common in CA, local weather patterns and microclimes, applications to CA energy, and water are also discussed.

Learning Activities: Web Virtual Lecture 1 hour(s), Web Electronic Discussion 0.50 hour(s), Discussion 1.50 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PHY 010C, any quarter of PHY 009A, PHY 009B, PHY 009C, PHY 009D, PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, or PHY 009HE, or any upper division PHY course.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

PHY 012 – Visualization in Science (3 units)

Course Description: Production, interpretation, and use of images in physics, astronomy, biology, and chemistry as scientific evidence and for communication of research results.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL).

PHY 030 – Fractals, Chaos & Complexity (3 units)

This version has ended; see updated course, below.

Course Description: Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture.

Prerequisite(s): MAT 016A or MAT 017A or MAT 021A.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: GEL 030.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

PHY 030 – Fractals, Chaos & Complexity (3 units)

Course Description: Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture.

Prerequisite(s): MAT 016A or MAT 017A or MAT 019A or MAT 021A.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: GEL 030.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL). This course version is effective from, and including: Fall Quarter 2024.

PHY 040 – Introduction to Computational Physics (3 units)

Course Description: Introduction to programming with examples from numerical analysis and computational physics. Introduction to modern tools used for scientific analysis and computer algebra.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 045 – Computational Physics (4 units)

Course Description: Algorithms and programming techniques of computational physics with applications from introductory physics.

Prerequisite(s): PHY 040; PHY 009C or PHY 009HD.

Learning Activities: Lecture 3 hour(s); Laboratory 3 hour(s).

Credit Limitation(s): No credit if PHY 104B was taken prior to Fall 2022; 2 units of credit if student has taken PHY 102.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 049 – Supplementary Work in Lower Division Physics (1-3 units)

Course Description: With consent of instructor, students with partial credit in lower division physics courses may complete the credit under this heading.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 080 – Experimental Techniques (4 units)

Course Description: Experimental techniques. Design of circuits. Data analysis, sources of noise, statistical and systematic uncertainties. Light sources, detection, and measurement in basic optical systems.

Prerequisite(s): PHY 009D or PHY 009HD.

Learning Activities: Lecture 2 hour(s), Laboratory 5 hour(s).

Enrollment Restriction(s): Open to Physics and Applied Physics majors only.

Grade Mode: Letter.

PHY 090X – Lower Division Seminar (2 units)

Course Description: Examination of a special topic in Physics through shared readings, discussions, written assignments, or special activities such as laboratory work.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor. Primary for lower division students.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

PHY 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

PHY 102 – Computational Laboratory in Physics (1 unit)

Course Description: Introduction to computational physics and to the computational resources in the physics department. Preparation for brief programming assignments required in other upper division physics classes.

Prerequisite(s): (MAT 021D, (MAT 022A or MAT 027A), (MAT 022B or MAT 027B)), (PHY 009D or PHY 009HD), PHY 040, PHY 104A (can be concurrent).

Learning Activities: Laboratory 4 hour(s).

Credit Limitation(s): Not open to students who have completed PHY 104B or PHY 105AL.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 104A – Introduction to Mathematical Methods in Physics (4 units)

Course Description: Introduction to mathematics used in upper division physics courses, including applications of vector spaces, Fourier analysis, and partial differential equations.

Prerequisite(s): PHY 009C or PHY 009HD; MAT 022B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 104B – Computational Methods of Mathematical Physics (4 units)

Course Description: Introduction to the use of computational techniques to solve the mathematical problems that arise in advanced physics courses, complementing the analytical approaches emphasized in PHY 104A.

Prerequisite(s): PHY 104A C- or better; PHY 105AL; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 104C – Intermediate Methods of Mathematical Physics (4 units)

Course Description: Applications of complex analysis, conditional probability, integral transformations and other advanced topics.

Prerequisite(s): PHY 104A C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

PHY 105A – Classical Mechanics (4 units)

Course Description: Principles and applications of Newtonian mechanics. Introduction to Lagrangian and Hamiltonian mechanics.

Prerequisite(s): PHY 009C or PHY 009HD; MAT 022A; MAT 022B (can be concurrent).

Learning Activities: Lecture 3 hour(s); Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 105B – Analytical Mechanics (4 units)

Course Description: Principles and applications of Newtonian mechanics; introduction to Lagrange's and Hamilton's equations.

Prerequisite(s): PHY 104A C or better; PHY 105A C or better; or consent of department for any of the courses.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 105C – Continuum Mechanics (4 units)

Course Description: The continuum hypothesis and limitations, tensors, isotropic constitutive equations, and wave propagation. Applications such as elastic solids, heat flow, aerodynamics, and ocean waves.

Prerequisite(s): PHY 104A C- or better; PHY 105A C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 108 – Optics (3 units)

Course Description: The phenomena of diffraction, interference, and polarization of light, with applications to current problems in astrophysics, material science, and atmospheric science. Study of modern optical instrumentation. Open to non-majors.

Prerequisite(s): ((PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 007A, PHY 007B, PHY 007C) or (PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, PHY 009HE)); (MAT 021A, MAT 021B, MAT 021C, MAT 021D); or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 108L – Optics Laboratory (1 unit)

Course Description: The laboratory will consist of one major project pursued throughout the quarter, based on modern applications of optical techniques.

Prerequisite(s): PHY 108 (can be concurrent); PHY 108 required concurrently.

Learning Activities: Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 110A – Electricity & Magnetism (4 units)

Course Description: Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves.

Prerequisite(s): (PHY 009B C- or better, PHY 009C C- or better, PHY 009D C- or better) or (PHY 009HB C- or better, PHY 009HC C- or better, PHY 009HD C- or better, PHY 009HE C- or better); MAT 021D C- or better; (MAT 022A C- or better or MAT 027A C- or better); (MAT 022B C- or better or MAT 027B C- or better); PHY 104A; PHY 105A; or consent of department.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 110B – Electricity & Magnetism (4 units)

Course Description: Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves.

Prerequisite(s): PHY 110A C- or better; PHY 104A C- or better; or consent of department.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 110C – Electricity & Magnetism (4 units)

Course Description: Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves.

Prerequisite(s): PHY 110B C- or better; or consent of department.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 110L – Computational Physics Lab for Electricity & Magnetism (1 unit)

Course Description: Applications of computational physics to problems from electricity and magnetism.

Prerequisite(s): PHY 045 or ECS 036B; PHY 110B (can be concurrent).

Learning Activities: Lecture/Lab 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 112 – Thermodynamics & Statistical Mechanics (4 units)

Course Description: Introduction to classical and quantum statistical mechanics and their connections with thermodynamics. Theory is developed for the ideal gas model and simple magnetic models and then extended to studies of solids, quantum fluids, and chemical equilibria.

Prerequisite(s): PHY 115A; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 112L – Computational Physics Lab for Statistical Mechanics (1 unit)

Course Description: Applications of computational physics to problems from statistical mechanics.

Prerequisite(s): PHY 045 or ECS 036B; PHY 112 (can be concurrent).

Learning Activities: Lecture/Lab 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 115A – Foundation of Quantum Mechanics (4 units)

Course Description: Introduction to the methods of quantum mechanics with applications to atomic, molecular, solid state, nuclear and elementary particle physics. Extensive problem solving.

Prerequisite(s): PHY 104A C- or better; PHY 105A C- or better; or consent of department.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 115B – Applications of Quantum Mechanics (4 units)

Course Description: Angular momentum and spin; hydrogen atom and atomic spectra; perturbation theory; scattering theory.

Prerequisite(s): PHY 115A C- or better; or consent of department.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 115L – Computational Physics Lab for Quantum Mechanics (1 unit)

Course Description: Applications of computational physics to problems from Classical and Quantum Mechanics.

Prerequisite(s): PHY 045 or ECS 036B; PHY 115A.

Learning Activities: Lecture/Lab 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 116A – Electronic Instrumentation (4 units)

Course Description: Experimental and theoretical study of important analog electronic circuits. Linear circuits, transmission lines, input impedance, feedback, amplifiers, oscillators, noise.

Prerequisite(s): (PHY 009C or PHY 009HD); (MAT 022B or MAT 027B); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

PHY 116B – Electronic Instrumentation (4 units)

Course Description: Continuation of PHY 116A. Introduction to the use of digital electronics and microcomputers in experimental physics. Nonlinear electronics, integrated circuits, analog-to-digital and digital-to-analog converters, transducers, actuators.

Prerequisite(s): PHY 009C or PHY 009HD; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 116C – Introduction to Computer-Based Experiments in Physics (4 units)

Course Description: Introduction to techniques for making physical measurements using computer-based instrumentation.

Prerequisite(s): (PHY 009D or PHY 009HD); PHY 116B; MAT 022B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

PHY 117 – Physics Instrumentation with Analog & Digital Electronics (4 units)

Course Description: Experimental and theoretical study of important electronic circuits involving analog and digital components. Feedback, amplifiers, oscillators, noise, integrated circuits, digital logic, timers, analog-to-digital and digital-to-analog converters.

Prerequisite(s): PHY 080.

Learning Activities: Lecture 3 hour(s); Laboratory 3 hour(s).

Credit Limitation(s): 2 units of credit if student has taken PHY 116A; no credit if student has taken PHY 116B.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 118 – Physics Instrumentation for Data Acquisition (4 units)

Course Description: Experimental application of modern high-density integrated circuits. Automated data acquisition, microprocessors, field programmable gate arrays.

Prerequisite(s): PHY 080; PHY 045 or ECS 036B.

Learning Activities: Lecture 3 hour(s); Laboratory 3 hour(s).

Credit Limitation(s): 2 units of credit if student has taken PHY 116B; no credit if student has taken PHY 116C.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 122A – Advanced Laboratory in Condensed Matter Physics (4 units)

Course Description: Experimental techniques and measurements in solid-state physics. Three-six experiments performed depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required.

Prerequisite(s): PHY 104A; PHY 105A; PHY 110B; PHY 115A; PHY 112 (can be concurrent); PHY 080; or consent of the department.

Learning Activities: Laboratory 8 hour(s).

Enrollment Restriction(s): Registration by Permission to Add (PTA) number only; priority given to graduating PHY and APP majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

PHY 122B – Advanced Laboratory in Particle Physics (4 units)

Course Description: Experimental techniques and measurements in nuclear and particle physics. Students perform three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required.

Prerequisite(s): PHY 104A; PHY 105A; PHY 110B; PHY 115A; PHY 112 (can be concurrent); PHY 080; or consent of the department.

Learning Activities: Laboratory 8 hour(s).

Enrollment Restriction(s): Registration by Permission to Add (PTA) number only; priority given to graduating PHY and APP majors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

PHY 123 – Signals & Noise in Physics (4 units)

Course Description: Techniques of measurement and analysis designed to avoid systematic error and maximize signal/noise ratio. Illustrative examples of optimal filters ranging from condensed matter to cosmology.

Prerequisite(s): (PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, PHY 009HE); PHY 104A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project 1 hour(s).

Enrollment Restriction(s): Not open to students who have taken this course previously as PHY 198 with the Signals & Noise in Physics topic.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 129A – Introduction to Nuclear Physics (4 units)

Course Description: Survey of basic nuclear properties and concepts requiring introductory knowledge of quantum mechanics: nuclear models and forces, radioactive decay and detecting nuclear radiation and nuclear reaction products, alpha, beta and gamma decay.

Prerequisite(s): PHY 115A C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 129B – Nuclear Physics, Extensions & Applications (4 units)

Course Description: Continuation of PHY 129A. Nuclear reactions, neutrons, fission, fusion accelerators, introduction to meson and particle physics, nuclear astrophysics, and applications of nuclear physics and techniques to mass spectrometry, nuclear medicine, trace element analysis.

Prerequisite(s): PHY 129A.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 130A – Elementary Particle Physics (4 units)

Course Description: Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus.

Prerequisite(s): PHY 115A C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 130B – Elementary Particle Physics (4 units)

Course Description: Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus.

Prerequisite(s): PHY 115A C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 140A – Introduction to Solid State Physics (4 units)

Course Description: Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity.

Prerequisite(s): PHY 115A C- or better; or equivalent course passed with C- or better, or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 140B – Introduction to Solid State Physics (4 units)

Course Description: Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity.

Prerequisite(s): PHY 115A C- or better; or equivalent course passed with C- or better, or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 150 – Special Topics in Physics (4 units)

Course Description: Topics vary, covering areas of contemporary research in physics.

Prerequisite(s): (PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, PHY 009HE); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 151 – Stellar Structure & Evolution (4 units)

Course Description: Chemical composition, structure, energy sources and evolutionary history of stars, with equal emphasis on both the observational data and theoretical models, including black holes, neutron stars and white dwarfs and the formation of substellar masses.

Prerequisite(s): (PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, PHY 009HE); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 152 – Galactic Structure & the Interstellar Medium (4 units)

Course Description: Structure, contents, and formation of our Milky Way galaxy, viz. its shape and size, the nature of the interstellar medium, stellar populations, rotation curves, mass determination and evidence of dark matter.

Prerequisite(s): ((PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, PHY 009HE)); PHY 105A (can be concurrent); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 153 – Extragalactic Astrophysics (4 units)

Course Description: Structure and evolution of galaxies and clusters of galaxies, including distance and mass determination, galaxy types and environments, active galactic nuclei and quasars, gravitational lensing and dark matter, global cosmological properties.

Prerequisite(s): ((PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, PHY 009HE)); PHY 104A; PHY 105A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Credit Limitation(s): Not open to students who have taken PHY 127.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 154 – Astrophysical Applications of Physics (4 units)

Course Description: Applications of classical and quantum mechanics, thermodynamics, statistical mechanics, and electricity and magnetism to astrophysical settings such as the Big Bang, degenerate white dwarf and neutron stars, and solar neutrinos.

Prerequisite(s): PHY 105A; PHY 105B; PHY 110B (can be concurrent); PHY 115A (can be concurrent); PHY 112; PHY 112 or consent of instructor; PHY 110B and PHY 115A required concurrently.

Learning Activities: Lecture 3 hour(s), Project.

Enrollment Restriction(s): Not open to students who have taken this course previously as PHY 198.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 155 – General Relativity (4 units)

Course Description: Definition of the mathematical frame work for the description of the gravitational field, introduction of the dynamical equations of Einstein governing its evolution and review of the key solutions, including black holes and expanding universes.

Prerequisite(s): PHY 104A; PHY 105A; PHY 105B; PHY 110A; PHY 105B and PHY 110A or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 156 – Introduction to Cosmology (4 units)

Course Description: Contemporary knowledge regarding the origin of the universe, including the Big Bang and nucleosynthesis, microwave background radiation, formation of cosmic structure, cosmic inflation, cosmic acceleration and dark energy.

Prerequisite(s): ((PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, PHY 009HE)); PHY 105A (can be concurrent); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Credit Limitation(s): Not open to students who have completed PHY 126.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 157 – Astronomy Instrumentation & Data Analysis Laboratory (4 units)

Course Description: Experimental techniques, data acquisition and analysis involving laboratory astrophysics plus stellar, nebular and galaxy digital imaging, photometry and/or spectroscopy. Students perform three experiments. Individual work stressed. Minimum 10-15 page journal style articles of two experiments are required.

Prerequisite(s): PHY 080; PHY 104A; PHY 105A; PHY 110A; PHY 110B (can be concurrent); PHY 115A (can be concurrent); and consent of department.

Learning Activities: Laboratory 8 hour(s).

Enrollment Restriction(s): Registration by Permission to Add (PTA) number only; priority given to graduating PHY astrophysics emphasis seniors.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

PHY 158 – Formation of Galaxies & Cosmic Structures (4 units)

Course Description: Formation of the cosmic web, including dark-matter halos and galaxies within them. Components of the Universe (dark matter, gas, stars) and their dynamical evolution. Gravitational collapse and virialization. Gas dynamics, heating, and cooling. Galactic star formation and stellar dynamics. Emphasis on theoretical concepts, computational methods, and simulations.

Prerequisite(s): (PHY 009A or PHY 009HA C- or better); (PHY 009B or PHY 009HB C- or better); (PHY 009C or PHY 009HC C- or better); (PHY 009D or PHY 009HD C- or better); PHY 104A C- or better; PHY 105A C- or better; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

PHY 160 – Environmental Physics & Society (3 units)

Course Description: Impact of humankind on the environment are discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications are considered.

Prerequisite(s): (PHY 009D or PHY 007C); (PHY 010 or PHY 001B); MAT 016B; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Cross Listing: ENG 160.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

PHY 185 – Alumni Seminar Series (1 unit)

Course Description: Weekly guest speakers (usually a physics alumnus or alumna) tell students about their careers. Speakers use their experience to give students valuable perspectives on life after a degree in physics.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

PHY 190 – Careers in Physics (1 unit)

Course Description: Overview of important research areas in physics, discussions of research opportunities and internships, strategies for graduate school and industrial careers, the fellowship and assistantship selection process, preparation of resumes, personal statements, and letters of recommendation.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Restricted to Physics and Applied Physics majors only.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

PHY 192 – Internship in Physics (1-12 units)

Course Description: Supervised work experience requiring the application of physics principles and techniques in a professional setting, including but not limited to industry and national laboratories.

Prerequisite(s): Consent of instructor/Physics Internship Director.

Learning Activities: Internship 3-36 hour(s).

Enrollment Restriction(s): Enrollment dependent on availability of intern positions; open to Physics majors only.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

PHY 194HA – Special Study for Honors Students (4 units)

Course Description: Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 12 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 194HB – Special Study for Honors Students (4 units)

Course Description: Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 12 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 195 – Senior Thesis (5 units)

Course Description: Open only to Physics and Applied Physics majors with senior standing. Preparation of a senior thesis on a topic selected by the student with approval of the department.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 15 hour(s).

Repeat Credit: May be repeated 15 unit(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PHY 197T – Tutoring in Physics & Astronomy (1-5 units)

Course Description: Tutoring of students in lower division courses.

Leading of small voluntary discussion groups affiliated with one of the department's regular courses. Weekly meeting with instructor.

Learning Activities: Tutorial.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

PHY 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

PHY 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

PHY 200A – Theory of Mechanics & Electromagnetics (4 units)

Course Description: Theoretical approaches in classical mechanics including the use of generalized coordinates and virtual work; variational calculus; Lagrange equations; symmetries, conservation laws, and Noether theorem; Lagrangian density; Hamilton formalism; canonical transformations; Poisson brackets; and Hamilton-Jacobi equations.

Prerequisite(s): PHY 204A (can be concurrent); PHY 104B; PHY 105B; PHY 110C; or equivalent to PHY 110C; PHY 204A required concurrently.

Learning Activities: Lecture 3 hour(s), Independent Study 1 hour(s).

Grade Mode: Letter.

PHY 200B – Theory of Mechanics & Electromagnetics (4 units)

Course Description: Theoretical approaches in electromagnetics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magnetohydrodynamics; diffraction theory; radiating systems; and special relativity.

Prerequisite(s): PHY 200A; PHY 204B (can be concurrent); PHY 204B concurrently.

Learning Activities: Lecture 3 hour(s), Independent Study 1 hour(s).

Grade Mode: Letter.

PHY 200C – Theory of Mechanics & Electromagnetics (4 units)

Course Description: Theoretical approaches in electromagnetics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magnetohydrodynamics; diffraction theory; radiating systems; and special relativity.

Prerequisite(s): PHY 200A; PHY 204B (can be concurrent); PHY 204B concurrently.

Learning Activities: Lecture 3 hour(s), Independent Study 1 hour(s).

Grade Mode: Letter.

PHY 204A – Methods of Mathematical Physics (4 units)

Course Description: Linear vector spaces, operators and their spectral analysis, complete sets of functions, complex variables, functional analysis, Greens functions, calculus of variations, introduction to numerical analysis.

Prerequisite(s): PHY 104A; or the equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Grade Mode: Letter.

PHY 204B – Methods of Mathematical Physics (4 units)

Course Description: Linear vector spaces, operators and their spectral analysis, complete sets of functions, complex variables, functional analysis, Green's functions, calculus of variations, introduction to numerical analysis.

Prerequisite(s): PHY 104A; PHY 104B; or the equivalent.

Learning Activities: Lecture 3 hour(s), Independent Study 1 hour(s).

Grade Mode: Letter.

PHY 210 – Computational Physics (3 units)

Course Description: Analytic techniques to solve differential equations and eigenvalue problems. Physics content of course will be self-contained, and adjusted according to background of students.

Prerequisite(s): Knowledge of Fortran or C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 215A – Quantum Mechanics (4 units)

Course Description: Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation.

Prerequisite(s): PHY 115B; or the equivalent.

Learning Activities: Lecture 3 hour(s), Independent Study 1 hour(s).

Grade Mode: Letter.

PHY 215B – Quantum Mechanics (4 units)

Course Description: Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation.

Prerequisite(s): PHY 115B; or the equivalent.

Learning Activities: Lecture 3 hour(s), Independent Study 1 hour(s).

Grade Mode: Letter.

PHY 215C – Quantum Mechanics (4 units)

Course Description: Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation.

Prerequisite(s): PHY 215B; or the equivalent.

Learning Activities: Lecture 3 hour(s), Independent Study 1 hour(s).

Grade Mode: Letter.

PHY 219A – Statistical Mechanics (4 units)

Course Description: Foundations of thermodynamics and classical and quantum statistical mechanics with simple applications to properties of solids, real gases, nuclear matter, etc. and a brief introduction to phase transitions.

Prerequisite(s): PHY 215B; or equivalent.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving 1 hour(s).

Grade Mode: Letter.

PHY 219B – Statistical Mechanics (4 units)

Course Description: Further applications of thermodynamics and classical and quantum statistical mechanics. The modern theory of fluctuations about the equilibrium state, phase transitions and critical phenomena.

Prerequisite(s): PHY 219A.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving 1 hour(s).

Grade Mode: Letter.

PHY 223A – Group Theoretical Methods of Physics-Condensed Matter (3 units)

Course Description: Theory of groups and their representations with applications in condensed matter.

Prerequisite(s): PHY 215A; PHY 215B; PHY 215C (can be concurrent); or consent of instructor. PHY 215C required concurrently.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 223B – Group Theoretical Methods of Physics-Elementary Particles (3 units)

Course Description: Theory of groups and their representations with applications in elementary particle physics.

Prerequisite(s): PHY 215A; PHY 215B; PHY 215C (can be concurrent); or consent of instructor. PHY 215C required concurrently.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 224A – Nuclear Physics (3 units)

Course Description: Comprehensive study of the nucleon-nucleon interaction including the deuteron, nucleon-nucleon scattering, polarization, determination of real parameters of S-matrix, and related topics.

Prerequisite(s): PHY 215B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 224B – Nuclear Physics (3 units)

Course Description: Study of nuclear models, including shell model, collective model, unified model. Energy level spectra, static momenta, and electromagnetic transition rates.

Prerequisite(s): PHY 224A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 224C – Nuclear Physics (3 units)

Course Description: Study of nuclear scattering and reactions including the optical model and direct interactions. Beta decay and an introduction to weak interactions.

Prerequisite(s): PHY 224B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 229A – Advanced Nuclear Theory (3 units)

Course Description: Advanced topics in nuclear theory; theory of quantum-mechanical scattering processes. Exact formal theory and models for two-body scattering.

Prerequisite(s): PHY 224C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 229B – Advanced Nuclear Theory (3 units)

Course Description: Advanced topics in nuclear theory; theory of quantum-mechanical scattering processes. Exact formal theory and models for three-body scattering.

Prerequisite(s): PHY 229A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 230A – Quantum Theory of Fields (3 units)

Course Description: Relativistic quantum mechanics of particles; techniques and applications of second quantization; Feynman diagrams; renormalization.

Prerequisite(s): PHY 215C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 230B – Quantum Theory of Fields (3 units)

Course Description: Continuation of 230A, with selected advanced topics, such as S-matrix theory, dispersion relations, axiomatic formulations.

Prerequisite(s): PHY 230A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 230C – Quantum Theory of Fields (3 units)

Course Description: Renormalization theory and applications, including dimensional regularization, Ward identities, renormalization group equations, coupling constant unification, and precision electroweak calculations.

Prerequisite(s): PHY 230A; PHY 230B; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

PHY 232 – Topics in String Theory (3 units)

Course Description: Current research trends in string theory, with topics ranging from perturbative worldsheet methods, nonperturbative aspects and dualities, AdS/CFT correspondence, string field theory, etc.

Prerequisite(s): Graduate standing in Physics or consent of instructor; PHY 230A, PHY 230B, PHY 230C or PHY 260 or equivalent are strongly recommended.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

PHY 233 – Advanced Topics in Geometry & Physics (3 units)

Course Description: Modern geometric methods in theoretical physics, with topics ranging from pseudo-Riemannian differential geometry and topology with application to general relativity, black holes, and string theory.

Prerequisite(s): PHY 230A, PHY 230B, PHY 230C, PHY 260 or equivalent strongly recommended.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Graduate standing in Physics or consent of instructor required.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

PHY 240A – Condensed Matter Physics A (3 units)

Course Description: Topics in condensed matter physics: Crystal structure; one-electron theory; transport and optical properties of semiconductors; phonons, electron-phonon scattering.

Prerequisite(s): PHY 215C; PHY 219A; PHY 140A; PHY 140B or equivalent recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 240B – Condensed Matter Physics B (3 units)

Course Description: Topics in condensed matter physics: transport and optical properties of metals and quantum structures; experimental measurement the Fermi surface and of phonon spectra.

Prerequisite(s): PHY 240A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 240C – Condensed Matter Physics (3 units)

Course Description: Review of second quantization. Interacting electron gas, electron-phonon interaction and effects, including instabilities of electronic systems. Topics in the theory of superconductivity and magnetism.

Prerequisite(s): PHY 240A; PHY 240B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 241 – Advanced Topics in Magnetism (3 units)

Course Description: Topics chosen from areas of current research interest.

Prerequisite(s): PHY 240A; PHY 240B; PHY 240C; PHY 240D; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 242 – Advanced Topics in Superconductivity (3 units)

Course Description: Topics chosen from areas of current research interest.

Prerequisite(s): PHY 240A; PHY 240B; PHY 240C; PHY 240D; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 243A – Surface Physics of Materials (3 units)

Course Description: Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes.

Prerequisite(s): PHY 140A; PHY 140B; PHY 115A; PHY 115B; or the equivalent to any; PHY 215A, PHY 240A, or the equivalents recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 243B – Surface Physics of Materials (3 units)

Course Description: Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes.

Prerequisite(s): PHY 140A; PHY 140B; PHY 115A; PHY 115B; or the equivalent to any; PHY 215A, PHY 240A, or the equivalents recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 243C – Surface Physics of Materials (3 units)

Course Description: Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes.

Prerequisite(s): PHY 140A; PHY 140B; PHY 115A; PHY 115B; or the equivalent to any; PHY 215A, PHY 240A, or equivalents recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 245A – High-Energy Physics (3 units)

Course Description: Phenomenology and systematics of strong, electromagnetic, and weak interactions of hadrons and leptons; determination of quantum numbers; quarks and quarkonia; deep inelastic scattering; the quark parton model; experiments at hadron colliders and electron-positron colliders.

Prerequisite(s): PHY 230A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 245B – High-Energy Physics (3 units)

Course Description: Electroweak interactions; phenomenology of the Standard Model of SU(2)LxU(1); weak interaction experiments; properties of and experiments with W and Z vector bosons; Glashow-Weinberg-Salam model and the Higgs boson; introduction to supersymmetry and other speculations.

Prerequisite(s): PHY 245A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 245C – Collider Physics (3 units)

Course Description: Collider physics. Topics include quark and gluon distribution functions and the computation of cross sections; Large Hadron Collider and International Linear Collider phenomenology; collider and detector characteristics; extracting models from data; software tools for analyzing experimental data.

Prerequisite(s): PHY 245A; PHY 252B (can be concurrent); or consent of instructor; PHY 252B taken previously or concurrently.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

PHY 246 – Supersymmetry: Theory & Phenomenology (3 units)

Course Description: Construction of supersymmetric models of particle physics; superfields; supersymmetry breaking the minimal supersymmetric standard model; supergravity. Collider phenomenology of supersymmetry. Dark matter phenomenology.

Prerequisite(s): PHY 230A, PHY 230B, PHY 245A, PHY 245B recommended, or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 246A – Supersymmetry: Theory & Phenomenology (3 units)

Course Description: Construction of supersymmetric models of particle physics; superfields; supersymmetry breaking the minimal supersymmetric standard model; supergravity. Collider phenomenology of supersymmetry. Dark matter phenomenology. Not offered every year.

Prerequisite(s): PHY 230A; PHY 230B; PHY 245A, PHY 245B recommended or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 246B – Advanced Supersymmetry (3 units)

Course Description: Advanced topics in supersymmetry. Topics include holomorphy, the Affleck-Dine-Seiberg superpotential, Seiberg duality for SUSY QCD, dynamical SUSY breaking, Seiberg-Witten theory, superconformal field theories, supergravity, anomaly and gaugino mediation, and the AdS/CFT correspondence.

Prerequisite(s): PHY 246A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 250 – Special Topics in Physics (3 units)

Course Description: Topic varies.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

PHY 252A – Techniques of Experimental Physics (3 units)

Course Description: Introduction to techniques and methods of designing and executing experiments. Problems and examples from condensed matter research will be utilized.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 252B – Techniques of Experimental Physics (3 units)

Course Description: Introduction to techniques and methods of designing and executing experiments. Problems and examples from nuclear and particle research will be utilized.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 252C – Statistics & Data Analysis for Particle Physics (3 units)

Course Description: Introduction to statistical data analysis methods in particle physics. Theoretical lectures combined with practical computer laboratory work.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 253 – Signals & Noise in Physics (3 units)

Course Description: Techniques for extracting signals from noise, systematic error.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 255 – Econophysics (4 units)

Course Description: Application of ideas from statistical mechanics to the financial markets. Market dynamics from a physics and systems perspective, including the statistical distributions of returns, the dynamics of prices, and models for the markets.

Prerequisite(s): Knowledge of Python, R, Excel, Matlab, or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Grade Mode: Letter.

PHY 256A – Physics of Information (4 units)

Course Description: Nonlinear dynamics, deterministic chaos, bifurcations, pattern formation, symbolic dynamics, measurement theory, stochastic processes, elementary information theory, information in complex systems, computational laboratory.

Prerequisite(s): Consent of instructor; advanced undergraduate or introductory graduate differential equations, applied linear algebra, and probability theory; e.g., MAT 119A/MAT 119B or MAT 207A, MAT 167 or MAT 226A, and MAT 135A/MAT 135B or MAT 235A, respectively; or in PHY 104A/PHY 104B/PHY 104C or PHY 204A/PHY 204B.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Enrollment Restriction(s): Limited to 30 students.

Grade Mode: Letter.

PHY 256B – Physics of Computation (4 units)

Course Description: Structural complexity, computational mechanics, information measures, causal inference, applications to complex materials, quantum dynamics, and nonequilibrium thermodynamics, computational laboratory.

Prerequisite(s): PHY 256A; consent of instructor; advanced undergraduate or introductory graduate differential equations, applied linear algebra, and probability theory; e.g., MAT 119A/MAT 119B or MAT 207A, MAT 167 or MAT 226A, and MAT 135A/MAT 135B or MAT 235A, respectively; or in PHY 104A/PHY 104B/PHY 104C or PHY 204A/PHY 204B.

Learning Activities: Lecture 3 hour(s), Extensive Problem Solving.

Enrollment Restriction(s): Limited to 30 students.

Grade Mode: Letter.

PHY 260 – Introduction to General Relativity (3 units)

Course Description: An introduction to general relativity. Differential geometry and curved spacetime; the Einstein field equations; gravitational fields of stars and black holes; weak fields and gravitational radiation; experimental tests; Big Bang cosmology.

Prerequisite(s): PHY 200A; PHY 200B.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 262 – Early Universe Cosmology (3 units)

Course Description: Introduction to early universe cosmology: the Big Bang, inflation, primordial nucleosynthesis, dark matter, dark energy, and other topics of current interest.

Prerequisite(s): Second year standing in Physics Graduate Program or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 263 – Cosmic Structure Formation (3 units)

Course Description: Growth of structure from small density inhomogeneities in the early universe to the diverse structures observable today. Use of observable properties (cosmic microwave background, gravitational lensing, peculiar velocities, number density, etc.) to constrain models of structure formation and fundamental physics.

Prerequisite(s): PHY 260.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 265 – High Energy Astrophysics & Radiative Processes (3 units)

Course Description: Survey covering galactic and extragalactic X-ray and gamma-ray astronomy, radiative processes, and techniques of high-energy astrophysics.

Prerequisite(s): Graduate standing in Physics or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 266 – Data Analysis for Astrophysics (3 units)

Course Description: Survey covering measurement and signal analysis techniques for astrophysics and cosmology throughout the electromagnetic spectrum.

Prerequisite(s): Graduate standing in Physics or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 267 – Observational Extragalactic Astronomy & Cosmology (3 units)

Course Description: Survey covering current areas of research on extragalactic objects, their physical properties, origin, evolution, and distribution in space.

Prerequisite(s): Graduate standing in Physics or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 268 – Research Methods in Astrophysics (3 units)

Course Description: Introduction to research methods in astrophysics and cosmology. Problems and examples from observational and theoretical work will be included.

Prerequisite(s): PHY 204A, PHY 204B and PHY 215A recommended.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Graduate standing in Physics or consent of instructor.

Grade Mode: Letter.

PHY 269 – Stellar Structure & Evolution (3 units)

Course Description: Underlying physics of stars as the building blocks of the Universe. Reasons for their existence, mechanisms behind their function, their evolution and ultimate fate. Structure of self-gravitating objects, energy transport in stars, nuclear fusion in stars, stellar evolution, and the birth of compact objects.

Prerequisite(s): PHY 200A, PHY 200B, and PHY 215A recommended; graduate standing in Physics; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PHY 270 – Current Topics in Physics Research (3 units)

Course Description: Reading and discussion to help physics graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas.

Prerequisite(s): Graduate standing in Physics or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 285 – Careers in Physics (1 unit)

Course Description: Designed to give Physics graduate students an in-depth appreciation of career opportunities with a graduate degree in physics. Professional physicists, mainly from outside academia, will give seminars describing both research and career insights.

Prerequisite(s): Graduate standing in Physics.

Learning Activities: Seminar 1.50 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 290 – Seminar in Physics (1 unit)

Course Description: Presentation and discussion of topics of current research interest in physics. Topics will vary weekly and will cover a broad spectrum of the active fields of physics research at a level accessible to all physics graduate students.

Prerequisite(s): Graduate standing in Physics or consent of instructor.

Learning Activities: Seminar.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 291 – Seminar in Nuclear Physics (1 unit)

Course Description: Presentation and discussion of topics of current research interest in nuclear physics.

Prerequisite(s): Graduate standing in Physics or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 292A – Seminar in Elementary Particle Physics (1 unit)

Course Description: Presentation and discussion of topics of current research interest in elementary particle physics.

Prerequisite(s): Graduate standing in Physics or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 292B – High Energy Frontier Initiative & Cosmology Theory Seminar (1 unit)

Course Description: Weekly seminar on current issues in Particle physics and Cosmology.

Prerequisite(s): Physics graduate students.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 293 – Seminar in Condensed Matter Physics (1 unit)

Course Description: Presentation and discussion of topics of current research interest in condensed matter physics.

Prerequisite(s): Graduate standing in Physics or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 294 – Seminar in Cosmology (1 unit)

Course Description: Presentation and discussion of topics of current research interest in Cosmology.

Prerequisite(s): Graduate standing in Physics or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 295 – Introduction to Departmental Research (1 unit)

Course Description: Seminar to introduce first- and second-year physics graduate students to the fields of specialty and research of the Physics staff.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 296 – Field, Strings, & Gravity Seminar (1 unit)

Course Description: Presentation and discussion of topics of current research interest in the areas of quantum field theory, string theory and gravity.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1.50 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 297 – Research on the Teaching & Learning of Physics (3 units)

Course Description: Discussion and analysis of recent research in how students construct understanding of physics and other science concepts and the implications of this research for instruction.

Prerequisite(s): Graduate standing in Physics or consent of instructor.

Learning Activities: Seminar 3 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

PHY 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 371 – Teaching in an Active-Engagement Physics Discussion/Lab Setting (1 unit)

Course Description: Analysis of recent research on science/physics teaching and learning and its implications for teaching labs, discussions, and discussion/labs with an emphasis on differences between conventional and active-engagement instructional settings. The appropriate role of the instructor in specific instructional settings.

Prerequisite(s): PHY 009D; or equivalent.

Learning Activities: Lecture/Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

PHY 390 – Methods of Teaching Physics (1 unit)

Course Description: Practical experience in methods and problems related to teaching physics laboratories at the university level, including discussion of teaching techniques, analysis of quizzes and laboratory reports and related topics. Required of all Physics Teaching Assistants.

Prerequisite(s): Consent of instructor; graduate standing in Physics.

Learning Activities: Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PHY 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Plant Biology (Graduate Group) (PBI)

Graduate Studies

PBI 200A – PBGG Core Course Series–Fall quarter (5 units)

Course Description: The first of three PBGG graduate core courses. Coverage includes (1) plant genes, (2) biotechnology, (3) genomes and gene flow, (4) principles of plant systematics, and (5) the evolution of flowering plants.

Prerequisite(s): Graduate standing; a broad background of undergraduate level coursework in Plant Biology is recommended.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

PBI 200B – PBGG Core Course Series–Winter quarter (5 units)

Course Description: The second of three PBGG graduate core courses. Coverage includes (1) embryo development, (2) cytoskeleton and vesicle trafficking, (3) cell walls, (4) cell growth, (5) secondary metabolism, (6) plastids and (7) senescence.

Prerequisite(s): PBI 200A.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

PBI 200C – PBGG Core Course Series–Spring quarter (5 units)

Course Description: The third of three PBGG graduate core courses. Coverage includes (1) plant water relations, (2) cellular & long distance transport processes, (3) mineral nutrition, (4) environmental impacts on growth & development, (5) stress perception & responses, (6) canopy processes, and (7) plant interactions with other organisms.

Prerequisite(s): PBI 200A; PBI 200B.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

PBI 203N – Biology of the Plant Cell (4 units)

Course Description: Recent progresses in plant cell biology. Intracellular motility in plant cells. Common techniques associated with the progress of plant cell biology.

Prerequisite(s): PLB 111 or BIS 104; or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Open to senior undergraduate students in Plant Biology major.

Grade Mode: Letter.

PBI 210 – Plant Ecophysiology (3 units)

Course Description: Study of the mechanisms of physiological adaptation of plants to their environment.

Prerequisite(s): PLB 111; PLB 112; PLB 117.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PBI 212 – Physiology of Herbicidal Action (3 units)

Course Description: Study of the fundamental processes involved in the physiological action of herbicides. Detailed consideration of the fate of herbicides in plants.

Prerequisite(s): PLB 112.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PBI 214 – Higher Plant Cell Walls (3 units)

Course Description: Lectures focus on the structure, analysis, synthesis, and development-related metabolism of cell walls. Discussions center on analysis of scientific papers related to lecture topics.

Prerequisite(s): PLB 112; A course in Biochemistry.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

PBI 220 – Plant Developmental Biology (4 units)

Course Description: A survey of the concepts of plant development and organization. Examines plant cells, tissues, and organs with special emphasis on experimental evidence for mechanisms regulating developmental processes.

Prerequisite(s): Plant Anatomy, Physiology, and Biochemistry.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

PBI 223 – Special Topics in Scientific Method (2 units)

Course Description: Examine the historical and philosophical background of the scientific method. Analyze the rational, perceptual, causal, creative and social aspects of scientific knowledge. Clarify the roles of reason, experimentation and creativity in scientific research.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PBI 227 – Plant Molecular Biology (4 units)

Course Description: Molecular aspects of higher plant biology with emphasis on gene expression. Plant nuclear and organelle genome organization, gene structure, mechanisms of gene regulation, gene transfer, and special topics related to development and response to biological and environmental stimuli.

Prerequisite(s): MCB 121 or MCB 161.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

PBI 229 – Molecular Biology of Plant Reproduction (3 units)

Course Description: Molecular genetic basis of plant reproduction. Emphasis on understanding developmentally regulated gene expression as it relates to the major changes that occur during plant reproduction and on the genetic control of flowering.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PBI 290A – Faculty Seminar (1 unit)

Course Description: Discussion of research area of seminar speakers in Plant Biology Graduate Group Seminar Series.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Plant Biology (PBGG) graduate students.

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PBI 290B – Seminar (1 unit)

Course Description: Seminars presented by visiting scientists on research topics of current interest.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PBI 290C – Research Conference in Botany (1 unit)

Course Description: Presentation and discussion by faculty and graduate students of research projects in botany.

Prerequisite(s): Graduate standing and/or consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PBI 291 – Graduate Student Seminar in Plant Biology (1 unit)

Course Description: Student-given seminars on topics in plant biology, with critiques by instructor and peers. How to give a seminar, including preparation of visual and other teaching aids. Topic determined by instructor in charge.

Prerequisite(s): Graduate student standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PBI 292 – Seminars in Plants Biology (1 unit)

Course Description: Review of current literature in botanical disciplines. Disciplines and special subjects to be announced quarterly. Present and analyze assigned topics.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PBI 293 – Seminar in Postharvest Biology (1 unit)

Course Description: Intensive study of selected topics in the postharvest biology of fruits, vegetables, and ornamentals.

Prerequisite(s): Consent of instructor. Open to advanced undergraduates.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PBI 297T – Tutoring in Plant Biology (1-5 units)

Course Description: Offers graduate students, particularly those not serving as teaching assistants, the opportunity to gain teaching experience.

Learning Activities: Tutorial 3-15 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PBI 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Repeat Credit: May be repeated 4 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PBI 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PBI 390 – The Teaching of Plant Biology (2 units)

Course Description: Consideration of the problems of teaching botany, especially of preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations.

Prerequisite(s): Graduate standing; concurrent appointment as a teaching assistant in Plant Biology.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Plant Biology (PLB)

College of Biological Sciences

PLB 010 – Plant Biology (3 units)

Course Description: The social and natural science of plants. Cultural history and socioeconomic importance of plants. Biology of plants reproduction, including flowers, seeds and fruits. Historical, cultural, religious and medicinal uses of plants. Plants in the visual arts, music and literature.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

PLB 090X – Plant Science Seminar (1-4 units)

Course Description: Examination of a special topic in a small group setting.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Credit Limitation(s): Not open for credit to students who have completed PLS 090X.

Grade Mode: Letter.

PLB 092 – Internship (1-12 units)

Course Description: Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

PLB 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PLB 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PLB 105 – Developmental Plant Anatomy (5 units)

Course Description: Structural anatomy of vascular plants. Training in basic tissue sectioning, staining, and use of the compound microscope.

Prerequisite(s): BIS 002C; or other similar preparation in plant biology.

Learning Activities: Lecture 3 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Restricted to 50 students; split equally into two lab groups.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLB 111 – Plant Physiology (3 units)

Course Description: Plant cell as a functional unit. The processes of absorption, movement, and utilization of water and minerals. Water loss, translocation, photosynthesis, respiration.

Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (CHE 008B (can be concurrent) or CHE 118B (can be concurrent)); PHY 007C (can be concurrent); PLB 105 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PLB 111D – Problems in Plant Physiology (1 unit)

Course Description: Discussion of problems and applications relating to principles presented in PHY 111. Problems assigned weekly showing novel applications of principles described in PHY 111; reprepare answers to be delivered orally during the class period.

Prerequisite(s): PLB 111 required concurrently.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

PLB 112 – Plant Growth & Development (3 units)

Course Description: Introduction to the mechanisms and control systems that govern plant growth and development and the responses of plants to the environment. Strong emphasis on vegetative development of flowering plants.

Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (CHE 008B or CHE 118B); BIS 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLB 112D – Problems in Plant Growth & Development (1 unit)

Course Description: Discussion of problems and applications relating to principles presented in PLB 112. Students will be assigned problems each week showing novel applications of the principles described in PLB 112 and will prepare answers to be delivered orally during class period.

Prerequisite(s): PLB 112 required concurrently.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

PLB 113 – Molecular & Cellular Biology of Plants (3 units)

Course Description: Molecular and cellular aspects of the growth and development of plants and their response to biological and environmental stresses. Primary focus on processes unique to plants. Experimental approaches will be emphasized.

Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); BIS 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

PLB 113D – Problems in Molecular & Cellular Biology of Plants (1 unit)

Course Description: Discussion of topics and applications related to principles presented in PLB 113. Assigned topics each week show novel applications of the principles described in PLB 113; discussion of topics during class period.

Prerequisite(s): PLB 113 required concurrently.

Learning Activities: Discussion 1 hour(s).

Grade Mode: Pass/No Pass only.

PLB 116 – Plant Morphology & Evolution (5 units)

Course Description: Structure and evolution of terrestrial plants.

Evolutionary and developmental origins and adaptive significance of both reproductive and vegetative structures, in the context of current understanding of phylogenetic relationships.

Prerequisite(s): Introductory Plant Biology; e.g., BIS 002C, PLS 002.

Learning Activities: Lecture 3 hour(s), Laboratory 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLS 116.

Cross Listing: PLS 116.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLB 117 – Plant Ecology (4 units)

Course Description: The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required.

Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); PLB 111 recommended.

Learning Activities: Lecture 3 hour(s), Fieldwork 3 hour(s).

Cross Listing: EVE 117.

Grade Mode: Letter.

PLB 119 – Population Biology of Invasive Plants & Weeds (3 units)

Course Description: Origin and evolution of invasive plant species and weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions between invasive species, native species, and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species.

Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); introductory statistics recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Cross Listing: EVE 119.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLB 123 – Plant-Virus-Vector Interaction (3 units)

Course Description: Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement.

Prerequisite(s): BIS 002A; BIS 101; PLB 105, PLP 120, and ENT 100 recommended.

Learning Activities: Lecture 3 hour(s).

Cross Listing: ENT 123, PLP 123.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

PLB 126 – Plant Biochemistry (3 units)

Course Description: The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants.

Prerequisite(s): BIS 103 or BIS 105.

Learning Activities: Lecture 3 hour(s).

Cross Listing: MCB 126.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

PLB 127 – Systematics of Vascular Plants (5 units)

Course Description: Diversity, phylogeny, and taxonomy of lycophytes, ferns, and seed plants (gymnosperms and angiosperms), emphasizing relationships and distinguishing characteristics of families and genera represented in the California flora. Principles and methods of phylogeny reconstruction, classification, and plant nomenclature. Practice identifying plants to species using taxonomic keys.

Prerequisite(s): BIS 002C or PLS 002; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 6 hour(s).

Credit Limitation(s): No credit if student has taken PLB/PLS 102 or EVE/PLB 108.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

PLB 143 – Evolution of Crop Plants (4 units)

Course Description: Origins of crops and agriculture, including main methodological approaches, centers of crop biodiversity, dispersal of crops, genetic and physiological differences between crops and their wild progenitors, agriculture practiced by other organisms, and role and ownership of crop biodiversity.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL); Writing Experience (WE).

PLB 148 – Introductory Mycology (4 units)

Course Description: Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Cross Listing: PLP 148.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLB 189 – Experiments in Plant Biology: Design & Execution (3 units)

Course Description: Provides an opportunity for undergraduate students to formulate experimental approaches to current questions in plant biology and to carry out their proposed experiments.

Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); or the equivalent courses in Plant Sciences, and consent of instructor.

Learning Activities: Discussion/Laboratory 6 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

PLB 190C – Research Conference in Plant Biology (1 unit)

Course Description: Introduction to research methods in plant biology. Design of field or laboratory research projects, survey of appropriate literature, and discussion of research by faculty and students.

Prerequisite(s): Consent of instructor; upper division standing in Plant Biology or related discipline.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PLB 192 – Internship (1-12 units)

Course Description: Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology Department faculty.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PLB 194H – Special Study for Honors Students (1-5 units)

Course Description: Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis.

Prerequisite(s): Consent of instructor; open only to majors of senior standing on honors list.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PLB 197T – Tutoring in Plant Biology (1-5 units)

Course Description: Assisting the instructor by tutoring students in one of the Department's regular courses.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Discussion 2-6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PLB 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PLB 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PLB 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Practical experience in acting as teaching assistant in Plant Biology courses. Learning activity: hands on experience in preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable 3-20 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Plant Pathology (PLP)

College of Agricultural & Environmental Sciences

PLP 040 – Edible Mushroom Cultivation (2 units)

Course Description: Principles and practices of growing edible mushrooms, including culture maintenance, basic mushroom substrate preparation, composting, spawn generation techniques, inoculation methods, harvesting, and pests and pest management.

Prerequisite(s): BIS 010 or MIC 020 recommended.

Learning Activities: Lecture 1 hour(s), Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

PLP 100 – Biology of Plant Pathogens (3 units)

Course Description: Behavior, pathology, ecology, and evolution of plant pathogens with global impact on food security and environmental health. Bacteria, fungi, viruses, and other pathogens that infect plants.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C.

Learning Activities: Lecture 1.5 hour(s), Discussion 1.5 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL); Scientific Literacy (SL).

PLP 120 – Introduction to Plant Pathology (4 units)

Course Description: The nature, cause, and control of plant diseases.

Prerequisite(s): BIS 002C; or consent of instructor; MIC 102 recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

PLP 123 – Plant-Virus-Vector Interaction (3 units)

Course Description: Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement.

Prerequisite(s): BIS 002A; BIS 101; PLB 105, PLP 120, and ENT 100 recommended.

Learning Activities: Lecture 3 hour(s).

Cross Listing: ENT 123, PLB 123.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

PLP 130 – Fungal Biology & Disease (3 units)

Course Description: Physiology, cell biology and biochemistry of fungi.

Pathobiology of the diseases that fungi or their metabolites cause on plants, animals and humans. Control of fungal pathogens using fungicides.

Prerequisite(s): BIS 002A (can be concurrent); BIS 002B (can be concurrent); BIS 002C (can be concurrent); or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PLP 135 – Field Identification of Mushrooms (1 unit)

Course Description: Collection and identification of mushrooms and other fleshy fungi based on macro and microscopic features.

Prerequisite(s): Introductory course in Biological Sciences; course in mycology recommended.

Learning Activities: Fieldwork.

Grade Mode: Pass/No Pass only.

PLP 148 – Introductory Mycology (4 units)

Course Description: Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Cross Listing: PLB 148.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLP 150 – Fungal Ecology (3 units)

Course Description: Ecological roles of fungi as saprobes, mutualists and parasites in native and managed ecosystems. Physiological and reproductive strategies associated with adaptations to diverse habitats.

Prerequisite(s): BIS 002C; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PLP 185 – Advanced Mushroom Taxonomy (2 units)

Course Description: Microscopic and molecular methods used in the identification of mushroom species; molecular characterization including PCR-amplification of ribosomal nuclear DNA, digestion of the product with restriction enzymes, and DNA sequencing; a one-day field trip is required.

Prerequisite(s): (PLP 135 or PLP 148); BIS 101; or the equivalent to BIS 101.

Learning Activities: Discussion/Laboratory 3 hour(s), Fieldwork 1 hour(s).

Enrollment Restriction(s): Limited to 12 students.

Grade Mode: Letter.

PLP 192 – Internship (1-12 units)

Course Description: Work experience off and on campus, supervised by a member of the faculty.

Prerequisite(s): PLP 120; and consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

PLP 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PLP 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PLP 201A – Impacts, Mechanisms & Control of Plant Disease (4 units)

Course Description: Case-studies approach to analysis of plant diseases caused by bacteria, fungi, oomycetes, and viruses, including impacts, etiology, pathogen taxonomy and epidemiology, biochemical and genetic aspects of pathogen-host interactions, virulence and resistance, and approaches to disease control.

Prerequisite(s): PLP 120; graduate student status in the Plant Pathology Graduate Program or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

PLP 201B – Impacts, Mechanisms & Control of Plant Disease (3 units)

Course Description: Case-studies approach to analysis of plant diseases, including emerging diseases, caused by bacteria, fungi, nematodes, and oomycetes: impacts, etiology, pathogen taxonomy, epidemiology, biochemical and genetic aspects of pathogen-host interactions, virulence, resistance, disease control and statistical analysis.

Prerequisite(s): PLP 120; PLP 201A; graduate student status in the Plant Pathology Graduate Program or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

PLP 202A – Applied Plant Pathology - Field Biology, Diagnosis, Management, & Outreach (5 units)

Course Description: Field biology, economic impacts, diagnosis, epidemiology, and management of disease in agricultural crops. Plant disease in agricultural settings at different production stages (nursery, field, processing, post-harvest).

Prerequisite(s): PLP 201A or PLP 201B; or consent of instructor.

Learning Activities: Lecture 2 hour(s); Laboratory 3 hour(s); Fieldwork 6 hour(s).

Grade Mode: Letter.

PLP 202B – Applied Plant Pathology - Field Trip (1 unit)

Course Description: Continuation of PLP 202A. Four-day field trip investigating diseases of agricultural crops and forest trees.

Prerequisite(s): PLP 202A; or consent of instructor.

Learning Activities: Fieldwork.

Grade Mode: S/U only.

PLP 210 – Biochemistry & Molecular Biology of Plant-Microbe Interaction (4 units)

Course Description: Discussion of plantmicrobe interactions, focused on the underlying cellular, biochemical, and molecular events that determine the diseased state.

Prerequisite(s): BIS 101; BIS 102; BIS 103; BIS 104; or the equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

PLP 217 – Molecular Genetics of Fungi (3 units)

Course Description: Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; plant pathogenesis; secretion; control of reproduction; reproduction; molecular evolution; transformation; and gene manipulation.

Prerequisite(s): BIS 101; BIS 103; MCB 161; PLB 119; PLP 130; PLP 215X; graduate standing in a Biological Science; MIC 215 recommended.

Learning Activities: Lecture 3 hour(s).

Cross Listing: BCM 217.

Grade Mode: Letter.

PLP 224 – Advanced Mycology (3 units)

Course Description: Physiology, cell biology and biochemistry of fungi. Topics include mycotoxins, epidemiology and nature of emerging and re-emerging fungal diseases, fungicides, and fungicide resistance.

Prerequisite(s): (PLP 148 or PLB 148); PLP 120; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PLP 228 – Plant Bacteriology (3 units)

Course Description: Study of plant pathogenic microorganisms including taxonomy, biology, molecular mechanisms of disease, and plant disease management. Topics include quorum sensing, rhizosphere biology, genomics, virulence factors, and host plant resistance genes.

Prerequisite(s): PLP 120; or equivalent or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

PLP 230 – Plant Virology (3 units)

Course Description: Viruses as causal agents of plant disease and as tools for manipulating plants; structures of virus particles; mechanisms of transmission, replication, and spread in the plant; cytology and molecular biology in susceptible and resistant reactions to virus infection; virus disease control.

Prerequisite(s): Upper division or graduate course in Molecular Biology or graduate student in Plant Pathology.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Only 2 units of credit to students who complete MIC 262; not open for credit to students who have completed PLP 226.

Grade Mode: Letter.

PLP 290 – Seminar (1 unit)

Course Description: Review and evaluation of current research in plant pathology.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PLP 290C – Advanced Research Conference (1 unit)

Course Description: Presentation, evaluation, and critical discussions of research activities in the area of advanced plant pathology; primarily designed for graduate students.

Prerequisite(s): PLP 120; or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PLP 291 – Seminar in Molecular Plant Pathology (1 unit)

Course Description: Review and evaluation of current literature and research in biochemistry and molecular biology of plant microbe interactions.

Prerequisite(s): PLP 120; or consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PLP 295 – Seminar in Mycology (1 unit)

Course Description: Review and evaluation of current literature and research in mycology.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PLP 298 – Special Group Study (1-5 units)

Course Description: Special group study.

Learning Activities: Variable.

Grade Mode: Letter.

PLP 299 – Research (1-12 units)*Course Description:* Research.*Learning Activities:* Variable.*Grade Mode:* Satisfactory/Unsatisfactory only.**Plant Science (PLS)****College of Agricultural & Environmental Sciences****PLS 001 – Agriculture, Nature & Society (3 units)***Starting Summer Session 1 2025, this course is no longer offered.**Course Description:* Multiple perspectives and connections between natural sciences, social sciences, and agriculture. Emphasizes agriculture's central position between nature and society and its key role in our search for a productive, lasting and hospitable environment. Several full-period field trips provide hands-on learning.*Learning Activities:* Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).*Credit Limitation(s):* Not open for credit to students who have completed AMR 001. (Former AMR 001.)*Grade Mode:* Letter.*General Education:* Science & Engineering (SE).**PLS 002 – Botany & Physiology of Cultivated Plants (4 units)***Course Description:* Holistic introduction to the underlying botanical and physiological principles of cultivated plants and their response to the environment. Includes concepts behind plant selection, cultivation, and utilization. Laboratories include discussion and interactive demonstrations.*Prerequisite(s):* High school course in biology and chemistry recommended.*Learning Activities:* Lecture 3 hour(s), Discussion/Laboratory 3 hour(s).*Credit Limitation(s):* Not open for credit to students who have complete AMR 002. (Former AMR 002.)*Grade Mode:* Letter.*General Education:* Science & Engineering (SE); Scientific Literacy (SL).**PLS 003 – Seminar: Overview of the Plant Sciences Major (1 unit)***Course Description:* Introduction to topics covered in the core courses and areas of specialization within the Plant Sciences major. Research and internship opportunities and potential career paths in plant breeding, crop management and ecology, horticulture, precision agriculture, crop quality and safety, ecosystem management and restoration, and related fields.*Learning Activities:* Seminar 1.5 hour(s).*Grade Mode:* Pass/Not Passed only.**PLS 006 – Flower Power; Art & Science of Flowers & Their Uses (2 units)***Course Description:* Introduction to the art and science of using and growing flowers to harness the power that is represented by their aesthetic beauty. Handling, production, arranging, breeding and marketing of flowers. Emphasis on potted plants and cut-flowers.*Prerequisite(s):* High school biology.*Learning Activities:* Lecture/Discussion 2 hour(s).*Grade Mode:* Pass/No Pass only.*General Education:* Arts & Humanities (AH) or Science & Engineering (SE).**PLS 006V – Flower Power; Art & Science of Flowers & Their Uses (2 units)***Course Description:* Introduction to the art and science of using and growing flowers to harness the power that is represented by their aesthetic beauty. Handling, production, arranging, breeding and marketing of flowers. Emphasis on potted plants and cut-flowers.*Prerequisite(s):* High school biology.*Learning Activities:* Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s).*Grade Mode:* P/NP only.*General Education:* Arts & Humanities (AH) or Science & Engineering (SE).**PLS 007 – Just Coffee: The Biology, Ecology & Socioeconomic Impacts of the World's Favorite Drink (4 units)***Course Description:* Coffee used as a case study to examine biological, ecological and social factors influencing sustainability of farming systems and how food production systems impact human well-being.*Learning Activities:* Lecture 3 hour(s), Discussion 1 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE) or Social Sciences (SS); Writing Experience (WE).**PLS 007V – Just Coffee: The Biology, Ecology & Socioeconomic Impacts of the World's Favorite Drink (4 units)***Course Description:* Coffee used as a case study to examine biological, ecological and social factors influencing sustainability of farming systems and how food production systems impact human well-being.*Learning Activities:* Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE) or Social Sciences (SS); Writing Experience (WE).**PLS 012 – Plants & Society (4 units)***Course Description:* Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food production, raw materials, bioenergy, and environmental conservation. Global population growth and future food supplies.*Prerequisite(s):* High school biology.*Learning Activities:* Lecture 3 hour(s), Extensive Writing 3 hour(s).*Credit Limitation(s):* Not open for credit to students who have complete PLB 012. (Former PLB 012.)*Cross Listing:* SAS 012.*Grade Mode:* Letter.*General Education:* Science & Engineering (SE) or Social Sciences (SS); Writing Experience (WE).**PLS 013 – Chocolate, Covered: The Past, Present, & Future of Cacao (3 units)***Course Description:* Multidisciplinary perspectives on the crop that gives us chocolate. History, genetics, agronomy, sensory science, and economics of cacao production.*Prerequisite(s):* High school biology.*Learning Activities:* Lecture 2 hour(s), Discussion 1 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE); Scientific Literacy (SL).

PLS 015 – Introduction to Sustainable Agriculture (4 units)

Course Description: Multidisciplinary introduction to agricultural sustainability with a natural sciences emphasis. Sustainability concepts and perspectives. Agricultural evolution, history, resources and functions. Diverse agricultural systems and practices and their relative sustainability. Laboratories provide direct experience with selected agricultural practices and systems.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 021 – Application of Computers in Technology (3 units)

Course Description: Concepts of computing and applications using personal computers, spreadsheets, database management, word processing and communications.

Prerequisite(s): High school algebra.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Not open for students who have completed PLS 021V or AMR 021. (Former AMR 021.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

PLS 021V – Application of Computers in Technology (3 units)

Course Description: Concepts of computing and applications using personal computers, spreadsheets, database management, word processing and communications.

Prerequisite(s): High school algebra.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Enrollment Restriction(s): Not open for students who have taken PLS 021.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

PLS 022 – Introductory Plant Biophysics (4 units)

Course Description: Introduction to quantitative and physico-chemical principles of importance in the plant sciences.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

PLS 049 – Organic Crop Production Practices (3 units)

Course Description: Principles and practices of organic production of annual crops. Including organic crops, soil, and pest management, cover cropping, composting, seeding, transplanting, irrigation, harvesting and marketing.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed AMR 049. (Former AMR 049.)

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

PLS 092 – Internship (1-12 units)

Course Description: Work experience on or off campus in subject areas pertaining to plant and environmental sciences. Internship supervised by a faculty member.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PLS 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; primarily for lower division students.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PLS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor; primarily for lower division students.

Learning Activities: Variable 3-15 hour(s).

Grade Mode: Pass/No Pass only.

PLS 100A – Metabolic Processes of Cultivated Plants (3 units)

Course Description: Principles of energy capture and photosynthesis, water use, and nutrient cycling. Conversion of these resources into products (carbohydrates, proteins, lipids, and other chemicals) by plants. Emphasis on the relationships between environmental resources, plant metabolism and plant growth.

Prerequisite(s): PLS 002 or BIS 002C; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 100AL – Metabolic Processes of Cultivated Plants Laboratory (2 units)

Course Description: Techniques and instruments used to study plant metabolic processes, including water relations, respiration, photosynthesis, enzyme kinetics, microscopy, immunochemistry, and nitrogen fixation. Quantitative methods, problem solving, and practical applications are emphasized.

Prerequisite(s): PLS 100A (can be concurrent); or the equivalent.

Learning Activities: Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 100B – Growth & Yield of Cultivated Plants (3 units)

Course Description: Principles of the cellular mechanisms and hormonal regulation underlying plant growth, development, and reproduction. Emphasis on how these processes contribute to the harvestable yield of cultivated plants and can be managed to increase crop productivity and quality.

Prerequisite(s): PLS 100A; or the equivalent of PLS 100A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 100BL – Growth & Yield of Cultivated Plants Laboratory (2 units)

Course Description: Laboratory exercises in plant growth and development and their regulation, including photomorphogenesis, plant growth regulators, plant anatomy, seed germination, fruit ripening and senescence. Includes field trips to illustrate relationships to cropping and marketing systems.

Prerequisite(s): PLS 100B (can be concurrent); or equivalent.

Learning Activities: Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 100C – Environmental Interactions of Cultivated Plants (3 units)

Course Description: Principles of plant interactions with their physical and biological environments and their acquisition of the resources needed for growth and reproduction. Emphasis on how management practices and environmental conditions affect crop productivity.

Prerequisite(s): PLS 100A; or the equivalent of PLS 100A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 100CL – Environmental Interactions of Cultivated Plants Laboratory (2 units)

Course Description: Techniques and instruments used to study plant interactions with their physical and biological environments, including light responses, transpiration, microclimatology, nutrient availability and utilization, biomass accumulation. Quantitative methods and modeling are emphasized.

Prerequisite(s): PLS 100C (can be concurrent).

Learning Activities: Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 101 – Agriculture & the Environment (3 units)

Course Description: Focus on the interaction between agriculture and the environment to address the principles required to analyze conflict and develop solutions to complex problems facing society.

Prerequisite(s): PLS 002; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed AMR 101. (Former AMR 101.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

PLS 105 – Concepts in Pest Management (3 units)

Course Description: Introduction to the ecological principles of integrated pest management, biology of different classes of pests and the types of losses they cause, population assessment, evaluation of advantages and disadvantages of different techniques used for pest management, IPM programs.

Prerequisite(s): CHE 008B; (PLS 002 or BIS 002B or BIS 002C).

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed AMR 105. (Former AMR 105.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 110 – Crop Management Systems for Vegetable Production (4 units)

Course Description: Horticultural principles applied to production and management systems for vegetable crops. Laboratory and discussion illustrate efficient field management and resource use practices.

Prerequisite(s): PLS 002 or (BIS 002A, BIS 002B, BIS 002C).

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLS 110C. (Former PLS 110C.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 111 – Principles of Agronomic Crop Production Systems (4 units)

Course Description: Principles, practices and technologies of agronomic cropping systems, including crop systematics, physiology, agroecology, equipment, and management. Cropping systems analysis and integration of economic and ecological decision-making considerations involved in crop production. One weekend field trip required.

Prerequisite(s): PLS 002 or (BIS 002A, BIS 002B, BIS 002C).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLS 110A. (Former PLS 110A.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 112 – Forage Crop Production (3 units)

Course Description: Forages as a world resource in food production.

Ecological principles governing the adaptation, establishment, growth and management of perennial and annual forages, including pastures, rangelands and hay; aspects of forage quality which affect feeding value to livestock.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed AMR 112. (Former AMR 112.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 113 – Biological Applications in Fruit Tree Management (2 units)

Course Description: Physiology, growth, development and environmental requirements of fruit trees and the cultural practices used to maintain them. Emphasis on the application of biological principles in the culture of commercially important temperate zone fruit tree species.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; or equivalent.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students that have completed PLB 173. (Former PLB 173.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 114 – Biological Applications in Fruit Production (2 units)

Course Description: Reproductive biology of tree crop species. Biological principles of fruit production, tree nutrition and orchard management for optimizing cropping. Laboratories emphasize hands-on work with orchard tree systems that are done specifically to produce the crop.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; PLS 113 recommended.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 174. (Former PLB 174.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 116 – Plant Morphology & Evolution (5 units)

Course Description: Structure and evolution of terrestrial plants.

Evolutionary and developmental origins and adaptive significance of both reproductive and vegetative structures, in the context of current understanding of phylogenetic relationships.

Prerequisite(s): Introductory Plant Biology; e.g., BIS 002C, PLS 002.

Learning Activities: Lecture 3 hour(s), Laboratory 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 116.

Cross Listing: PLB 116.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 120 – Applied Statistics in Agricultural Sciences (4 units)

Course Description: Application of statistical methods to design and analysis of research trials for plant, animal, behavioral, nutritional, and consumer sciences. Basic concepts and statistical methods are presented in lectures, laboratories emphasize data processing techniques, problem solving, and interpretation in specialized fields.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit for students who have completed AMR 120. (Former AMR 120.)

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

PLS 123 – Introduction to Plant & Crop Systems Modeling (3 units)

Course Description: Modeling approaches commonly used in plant and crop applications. Fundamentals of how plant/crop models are developed and considerations regarding their limitations. Example model applications include degree-day and radiation-use-efficiency models of growth and yield, phenological models, and crop coefficients.

Prerequisite(s): college algebra/precalculus college physics recommended.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to upper division and graduate students.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

PLS 124 – Introduction to Digital Agriculture (3 units)

Course Description: Introduction to quantitative approaches for collecting, analyzing, and interpreting environmental data used in plant sciences research. Remote sensing data for estimating plant structure, function and water status, spatial and temporal aspects of data, data science and machine learning, synthesizing complex, high-dimensional data.

Prerequisite(s): PLS 021 C or better (can be concurrent) or PLS 021 C or better (can be concurrent); PLS 120 C or better; PHY 007A; PHY 007B; PHY 007C; or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s); Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 125 – Proximal & Remote Sensing of Plants (3 units)

Course Description: Quantitative approaches for collecting, analyzing and interpreting remote sensing data at scales from the leaf to the satellite in plant sciences research. Hands-on experience collecting, processing, and analyzing leaf and canopy-level remote sensing data.

Prerequisite(s): PLS 124 C or better (can be concurrent); PLS 021 C or better (can be concurrent or PLS 021V C or better (can be concurrent)); PHY 007A; PHY 007B; PHY 007C; PLS 120 C or better; or consent of instructor.

Learning Activities: Lecture 1 hour(s); Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 127 – Systematics of Vascular Plants (5 units)

Course Description: Diversity, phylogeny, and taxonomy of lycophytes, ferns, and seed plants (gymnosperms and angiosperms), emphasizing relationships and distinguishing characteristics of families and genera represented in the California flora. Principles and methods of phylogeny reconstruction, classification, and plant nomenclature. Practice identifying plants to species using taxonomic keys.

Prerequisite(s): BIS 002C or PLS 002; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 6 hour(s).

Credit Limitation(s): No credit if student has taken PLB/PLS 102 or EVE/PLB 108.

Cross Listing: EVE 127, PLB 127.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

PLS 130 – Grassland Ecology (3 units)

Course Description: Comprehensive survey of grassland ecology including distributions of major grassland types; systematics; morphology, physiology, and diversity of grassland species; population, community, and ecosystem processes occurring in grasslands; the role of grazing, fire, and drought in grasslands; management and conservation.

Prerequisite(s): PLS 002 or BIS 002B or BIS 002C; or consent of instructor; upper division standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 141 – Ethnobotany (4 units)

Course Description: Relationships and interactions between plants and people, including human perceptions, management, and uses of plants, influences of plants on human cultures, and effects of human activity on plant ecology and evolution. Concepts, questions, methods, and ethical considerations in ethnobotanical research.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 141. (Former PLB 141.)

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

PLS 144 – Trees & Forests (4 units)

Course Description: Biological structure and function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life histories, dormancy, forest biodiversity, and agroforestry.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 144 or ENH 144 or ERS 144. (Formerly PLB 144, ENH 144, ERS 144.)

Cross Listing: ESM 144.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

PLS 147 – California Plant Communities (3 units)

Course Description: Ecology, distribution, and species of California's plant communities. Environmental forces that determine these communities, the threats they face, and their conservation and restoration opportunities.

Prerequisite(s): PLS 002 or BIS 002C.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 147. (Former PLB 147.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

PLS 147L – California Plant Communities Field Study (1 unit)

Course Description: Visits to many of northern California's plant communities, from the north coast to the Central Valley to the Sierras. Discussion of community ecology and hands-on identification of species. Two Saturday and two three-day field trips required.

Prerequisite(s): (PLS 002 or BIS 002C); concurrent or previous enrollment in PLS 147.

Learning Activities: Discussion/Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 147. (Former PLB 147.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

PLS 148 – Field Course: Flora of Northern California's Mountains (3 units)

Course Description: Diversity, taxonomy, ecology, evolution, and traditional cultural importance of the flora of the Cascade and Klamath mountain ranges. Conservation and management issues. Legal and ethical responsibilities of field botanists. Hands-on botanical field methods including plant identification, characterization of vegetation types, and rare plant surveys. Field course offered the last two weeks of July, based at Lassen Volcanic National Park.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 5 hour(s), Laboratory 5 hour(s), Fieldwork 25 hour(s).

Grade Mode: Letter.

PLS 150 – Sustainability & Agroecosystem Management (4 units)

Course Description: Interdisciplinary analysis of agricultural production and food systems with primary emphasis on biophysical processes. General concepts governing the functioning of temperate and tropical agroecosystems in relation to resource availability, ecological sustainability, and socio-economic viability. Comparative ecological analyses of agroecosystems.

Prerequisite(s): SSC 010; CHE 002A; (PLS 002 or BIS 001C or BIS 002C).

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed AMR 150. (Former AMR 150.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Scientific Literacy (SL).

PLS 152 – Plant Genetics (4 units)

Course Description: Basic principles of transmission genetics, cytogenetics, population and quantitative genetics, and molecular genetics. Practical aspects of genetic crosses and analysis of segregating populations.

Prerequisite(s): BIS 001A or BIS 002A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Credit Limitation(s): Not open to students who have completed PLB 152. (Former PLB 152.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 153 – Plant, Cell, Tissue & Organ Culture (4 units)

Course Description: Basic and applied aspects of plant tissue culture including media preparation, micropropagation, organogenesis, embryogenesis, anther culture, protoplast culture and transformation.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 153. (Former PLB 153.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 154 – Introduction to Plant Breeding (4 units)

Course Description: Principles, methods and applications of plant breeding and genetics to the improvement of crop plants. Illustration of how plant breeding is a dynamic, multidisciplinary, constantly-evolving science. Laboratory emphasizes hands-on experience in the basics of breeding through experiments.

Prerequisite(s): PLS 152 or BIS 101; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 154. (Former PLB 154.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 157 – Physiology of Environmental Stresses in Plants (4 units)

Course Description: Stress concepts and principles; molecular, physiological, developmental and morphological characteristics enabling plants to avoid or tolerate environmental stresses; stress acclimation and adaptation processes; responses of wild and cultivated species to drought, flooding, nutrient deficiencies, salinity, toxic ions, extreme temperatures, etc.

Prerequisite(s): PLS 100C or PLB 111 or PLB 112 or ENH 102 or VEN 110.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 157. (Former PLB 157.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 158 – Mineral Nutrition of Plants (4 units)

Course Description: Evolution and scope of plant nutrition; essential elements; mechanisms of absorption and membrane transporters; translocation and allocation processes; mineral metabolism; deficiencies and toxicities; genetic variation in plant nutrition; applications to management and understanding ecological effects of nutrient availability or deficiency.

Prerequisite(s): PLS 100A or PLB 111 or ENH 102 or VEN 110.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 158. (Former PLB 158.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 160 – Agroforestry: Global & Local Perspectives (3 units)

Course Description: Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices.

Prerequisite(s): (PLS 002 or BIS 001C or BIS 002C); (PLS 142 or PLS 150 or BIS 002B); or general ecology course in lieu of PLS 142 or PLS 150 or BIS 002B.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): Not open for credit to students who have previously taken AMR 160. (Former AMR 160.)

Cross Listing: IAD 160.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 162 – Urban Ecology (3 units)

Course Description: Application of fundamental concepts and approaches in landscape and ecosystem ecology to urban ecosystems. Ecological and social drivers and responses. Landscape heterogeneity, nutrient dynamics, invasive species, altered hydrology and climate, and pollution. Discussion of primary literature.

Prerequisite(s): ECL 200AN C- or better or ECL 200BN C- or better or ENH 160 C- or better or ESM 144 C- or better or ESP 100 C- or better or ESP 110 C- or better or ESP 121 C- or better or EVE 101 C- or better or EVE 104 C- or better or EVE 117 C- or better or EVE 120 C- or better or EVE 181 C- or better or PLB 117 C- or better or PLS 130 C- or better or PLS 144 C- or better or PLS 163 C- or better or SSC 112 C- or better; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

PLS 163 – Ecosystem & Landscape Ecology (4 units)

Course Description: Integration of concepts to understand and manage ecosystems in a complex and changing world. Emphasis on interactions among biotic, abiotic & human factors and changes over space/time. Local to global controls over water, carbon and nutrients across ecosystems/landscapes.

Prerequisite(s): ENH 160 C- or better or ESM 144 C- or better or ESP 100 C- or better or ESP 155 C- or better or EVE 101 C- or better or EVE 117 C- or better or PLB 117 C- or better or PLS 130 C- or better or PLS 144 C- or better or PLS 147 C- or better or PLS 150 C- or better or PLS 162 C- or better or SSC 100 C- or better or SSC 102 C- or better or SSC 109 C- or better or SSC 112 C- or better or HYD 124 C- or better or ECL 200AN C- or better or ECL 200BN (can be concurrent); or similar class with consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Project 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed ECL 201.

Grade Mode: Letter.

PLS 170A – Fruit & Nut Cropping Systems (2 units)

Course Description: Overview of production and handling systems of major pomological crops, analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing.

Prerequisite(s): PLS 002 or BIS 002C; or consent of instructor.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed AMR 170A. (Former AMR 170A.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 170B – Fruit & Nut Cropping Systems (2 units)

Course Description: Overview of production and handling systems of major pomological crops, including analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing.

Prerequisite(s): PLS 002 or BIS 002C; or consent of instructor.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed AMR 170B. (Former AMR 170B.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 171 – Principles & Practices of Plant Propagation (4 units)

Course Description: Principles and practices of propagating plants covering anatomical, physiological, and practical aspects.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 171. (Former PLB 171.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 172 – Biology and Quality of Harvested Crops (4 units)

Course Description: Overview of physiological and molecular processes related to the quality and safety of harvested crop products. Targeted approaches and technologies to improve/maintain crop quality and limit crop losses after harvest. Socioeconomic aspects of crop losses and food waste.

Prerequisite(s): BIS 002A; PLS 002; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 174 – Microbiology & Safety of Fresh Fruits & Vegetables (3 units)

Course Description: Overview of microorganisms on fresh produce, pre- and postharvest factors influencing risk of microbial contamination, attachment of microorganisms to produce, multiplication during postharvest handling and storage, and methods of detection. Mock outbreak trial and presentation of science-based forensic discovery.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 176 – Introduction to Weed Science (4 units)

Course Description: Weed biology and ecology, methods of weed management, biological control, herbicides and herbicide resistance. Weed control in managed and natural ecosystems; invasive species. Laws and regulations. Application of herbicides. Sight and software-assisted identification of common weeds.

Prerequisite(s): PLS 002 or BIS 001C or BIS 002C.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 176. (Former PLB 176.)

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

PLS 178 – Biology & Management of Aquatic Plants (3 units)

Course Description: Brief survey of common and invasive freshwater plants and macroalgae, their reproductive modes, physiology, growth (photosynthesis, nutrient utilization), development (hormonal interactions), ecology, modes and impacts of invasion, and management. Two Saturday field trips required.

Prerequisite(s): (PLS 002 or BIS 001C or BIS 002C); (CHE 008B or CHE 118B); PLS 100C, PLB 111, ENH 102, or HYD 122 recommended.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed former PLB 178. (Former PLB 178.)

Grade Mode: Letter.

General Education: Science & Engineering (SE).

PLS 188 – Undergraduate Research Proposal (3 units)

Course Description: Preparation and review of a scientific proposal.

Problem definition, identification of objectives, literature survey, hypothesis generation, design of experiments, data analysis planning, proposal outline and preparation.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: BIT 188.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

PLS 189L – Laboratory Research in Plant Sciences (2-5 units)

Course Description: Formulating experimental approaches to current questions in plant science; performance of proposed experiments.

Prerequisite(s): PLS 188; and consent of instructor.

Learning Activities: Laboratory 3-12 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

PLS 190 – Seminar on Alternatives in Agriculture (2 units)

Course Description: Seminar on topics related to alternative theories, practices and systems of agriculture and the relationship of agriculture to the environment and society. Scientific, technological, social, political and economic perspectives.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Seminar 1 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 2 time(s) for a total of three times.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

PLS 190C – Research Group Conference (1 unit)

Course Description: Weekly conference on research problems, progress and techniques in the plant sciences.

Prerequisite(s): Consent of instructor; advanced standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PLS 192 – Internship (1-12 units)

Course Description: Work experience on or off campus in subject areas pertaining to plant and environmental sciences. Internship supervised by a faculty member.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PLS 193 – Garden & Farm-Based Experiential Education Methods (2 units)

Course Description: Methods of teaching children and youth about fruit and vegetable production and consumption. Lesson and activity planning for garden and farm field trips. Basic biology, ecology, plant science, and crop management practices. Mentorship in experiential learning.

Preparation of garden site.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Oral Skills (OL).

PLS 194H – Senior Honors Thesis (1-2 units)

Course Description: Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis.

Prerequisite(s): Senior standing; overall GPA of 3.250 or higher and consent of master advisor.

Learning Activities: Independent Study 3-6 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE); Writing Experience (WE).

PLS 197T – Tutoring in Plant Sciences (1-5 units)

Course Description: Leading small voluntary discussion or lab groups affiliated with one of the department's regular courses.

Prerequisite(s): Consent of instructor; upper division standing, completion of course being tutored or the equivalent.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Pass/No Pass only.

PLS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PLS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PLS 205 – Experimental Design & Analysis (5 units)

Course Description: Introduction to the research process and statistical methods to plan, conduct and interpret experiments.

Prerequisite(s): PLS 120; or equivalent.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed AGR 205. (Former AGR 205.)

Grade Mode: Letter.

PLS 206 – Applied Multivariate Modeling in Agricultural & Environmental Sciences (4 units)

Course Description: Multivariate linear and nonlinear models. Model selection and parameter estimation. Analysis of manipulative and observational agroecological experiments. Discriminant, principal component, and path analyses. Logistic and biased regression.

Bootstrapping. Exercises based on actual research by UC Davis students.

Prerequisite(s): PLS 120; (STA 106 or STA 108 or PLS 205).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have complete AGR 206. (Former AGR 206.)

Grade Mode: Letter.

PLS 207 – Applied Statistical Modeling for the Environmental Sciences (3 units)

Course Description: Introduction to building statistical models in classical and Bayesian frameworks, model fitting methods, introduction to hierarchical Bayes, regularization and priors, applications of hierarchical Bayesian models to important kinds of problems of environmental data analysis.

Prerequisite(s): PLS 205 (can be concurrent); PLS 206 (can be concurrent); or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PLS 212 – Postharvest Biology & Biotechnology of Fruits & Nuts (3 units)

Course Description: Review of postharvest biology of fruits and nuts and biotechnological approaches to address postharvest challenges. Morphology, biology and postharvest handling of fruits and nuts are presented along with current research, including biotechnology, and discussion of future research needs and approaches.

Prerequisite(s): PLS 172.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed POM 212.

Grade Mode: Letter.

PLS 213 – Postharvest Physiology of Vegetables (3 units)

Course Description: Comparative physiology of harvest vegetables; emphasis on maturation, senescence, compositional changes, physiological disorders and effects of environmental factors. Concepts and research procedures.

Prerequisite(s): PLS 172 or PLS 100B or PLB 112.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed VCR 212. (Former VCR 212.)

Grade Mode: Letter.

PLS 217 – Field Techniques in Plant Physiology (3 units)

Course Description: Hands-on practice applying a wide range of field-oriented plant physiology equipment and techniques. Use of water relations techniques, gas exchange devices, and image analysis, with extensive focus on dataloggers and sensing. Training in field-based plant physiology techniques intended to help students design research projects and appreciate the value and limitations of new equipment.

Prerequisite(s): Prior coursework in plant physiology such as PLS 100A, PLS 100CL, PLS 157, PLS 210, PLB 111 or similar.

Learning Activities: Discussion/Laboratory 2.50 hour(s), Extensive Problem Solving 1 hour(s).

Grade Mode: Letter.

PLS 220 – Genomics & Biotechnology of Plant Improvement (3 units)

Course Description: Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits.

Prerequisite(s): BIS 101; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed VCR 220. (Former VCR 220.)

Cross Listing: GGG 220.

Grade Mode: Letter.

PLS 221 – Genomics & Breeding of Vegetable Crops (3 units)

Course Description: Preview of genome structure, mapping, gene tagging and development of other genetic resources applied to improvement of major vegetables. For graduate students contemplating a career in modern vegetable breeding and biotechnology.

Prerequisite(s): BIS 101; or equivalent.

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed VCR 221. (Former VCR 221.)

Grade Mode: Letter.

PLS 222 – Advanced Plant Breeding (4 units)

Course Description: Philosophy, methods, and problems in developing improved plant species. Topics include: inbreeding, heterosis, progeny testing, breeding methodology, index selection, germplasm conservation, and breeding for stress resistance. Laboratories include tours of breeding facilities and calculation and interpretation of quantitative data.

Prerequisite(s): PLS 154; PLS 205; GGG 201D or ANG 107 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

PLS 225 – Quantitative Genetics (4 units)

Course Description: Introduction to the principles of quantitative genetics including the study and analysis of quantitative variation, concepts of heritability and genetic gain from artificial selection, and application of classic and genome-informed approaches in breeding.

Prerequisite(s): PLS 205; GGG 201D; or consent of instructor; graduate standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

PLS 240 – Extension Education, Outreach & Science Communication (4 units)

Course Description: History, theory, and current practice of extension education. Role and skills needed of the extension educator. Pluralistic nature of extension education. Development of skills to create lasting change through outreach and communication in an extension education program.

Prerequisite(s): Graduate standing; or consent of instructor.

Learning Activities: Lecture 3 hour(s); Discussion 1 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

PLS 290 – Seminar (1-2 units)

Course Description: Topics of current interest related to Plant Sciences.

Learning Activities: Seminar 1-2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PLS 290C – Research Conference (1 unit)

Course Description: Research conference.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PLS 297T – Tutoring in Plant Sciences (1-5 units)

Course Description: Designed for graduate students who desire teaching experience but are not teaching assistants.

Prerequisite(s): Consent of instructor; graduate standing; completion of course to be tutored or the equivalent.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated 5 unit(s) and same course may not be tutored more than once.

Grade Mode: Satisfactory/Unsatisfactory only.

PLS 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Letter.

PLS 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PLS 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable 3-12 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Plastic Surgery (PSU)

School of Medicine

PSU 460 – Clinical Plastic Surgery Elective (1-18 units)

Course Description: Total involvement in patient care involving surgical preparation, treatment, operative care, and follow-up. Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included. Student rotation.
Prerequisite(s): SUR 430; and consent of instructor; third- or fourth-year medical students.
Learning Activities: Clinical Activity.
Grade Mode: Honors/Pass/Fail.

Political Science (POL)

College of Letters & Science

POL 001 – American National Government (4 units)

Course Description: Survey of American national government, including the constitutional system, political culture, parties, elections, the presidency, Congress, and the courts.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 001Y – American National Government (4 units)

Course Description: Survey of American national government, including the constitutional system, political culture, parties, elections, the presidency, Congress, and the courts.
Learning Activities: Web Virtual Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 002 – Introduction to Comparative Politics (4 units)

Course Description: Introduction to basic concepts in political analysis and application of them in comparative studies of selected countries. Coverage is given to cultural and other informal dimensions of politics as well as to more formal political and governmental structures.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 003 – International Relations (4 units)

Course Description: International conflict and cooperation, including the Cold War, nuclear weapons, and new techniques for understanding international politics.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 004 – Basic Concepts in Political Theory (4 units)

Course Description: Analysis of such concepts as the individual, community, liberty, equality, justice, and natural law as developed in the works of the major political philosophers.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 005 – Contemporary Problems of the American Political System (4 units)

Course Description: In-depth treatment of selected problems and issues of American politics, governmental institutions, and policies.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 007 – Contemporary Issues in Law & Politics (4 units)

Course Description: Seminar focusing on the political dimensions of American law and institutions. Examines the role of courts in resolving contemporary issues of law and politics including abortion, capital punishment, and civil rights.
Learning Activities: Seminar 4 hour(s).
Enrollment Restriction(s): Limited enrollment; open to students having no more than 40.1 units.
Grade Mode: Letter.
General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 011A – America Decides: Who Will Win This Year's Election? (4 units)

Course Description: Current election events against backdrop of research-based exploration of factors influencing elections. Candidate nominations, campaign strategy, campaign finance, media coverage, and voter decision-making.
Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL).

POL 011AV – America Decides: Who Will Win This Year's Election? (4 units)

Course Description: Current election events against backdrop of research-based exploration of factors influencing elections. Candidate nominations, campaign strategy, campaign finance, media coverage, and voter decision-making.
Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).
Grade Mode: Letter.
General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL).

POL 011B – Citizen Lawmaking: Direct Democracy, Public Policy & Political Representation in America (4 units)

Course Description: Analysis of direct participation by citizens in the lawmaking process.
Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 011C – Politics & Film (4 units)

Course Description: Survey of portrayals of politics and policy issues in moving pictures. Analysis of political processes, policy development, social mores, and historical periods as highlighted in Hollywood movies, television, and/or documentary films.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Visual Literacy (VL); Writing Experience (WE).

POL 011D – Political Persuasion (4 units)

Course Description: Examination of political influence and persuasion.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 012A – Politics & Sports (4 units)

Course Description: Core issues in American and world politics through the lens of sports and the athletes who play them. Introduction of American civil rights movement, the Cold War, Middle East Tensions, and democratization.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 012B – Climate Change & Politics (4 units)

Course Description: Analysis of political institutions' response and adaptation to climate change.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 012Y – Data Visualization in the Social Sciences (4 units)

Course Description: Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations.

Learning Activities: Lecture 2 hour(s), Laboratory 1.50 hour(s), Web Virtual Lecture 1.50 hour(s).

Cross Listing: CMN 012Y, SOC 012Y, PSC 012Y.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL); Visual Literacy (VL).

POL 051 – Scientific Study of Politics (4 units)

Course Description: Introduction to the basic principles of the scientific study of politics. Research design and empirical analysis of data with applications to different methodological approaches and different substantive areas in political science.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE) or Social Sciences (SS); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

POL 090X – Lower Division Seminar (4 units)

Course Description: Examines fundamental issues and concepts that shape the study and practice of politics. Students will read, discuss and write about some of the most significant texts in political science in order to develop a foundation for the study of politics.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Seminar 4 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

POL 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

POL 100 – Local Government & Politics (4 units)

Course Description: Politics and government of local communities in the United States, including cities, counties and special districts. Emphasizes sources and varieties of community conflict, legislative and executive patterns, expertise, decision making and the politics of structure.

Observation of local governing boards.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 102 – Urban Public Policy (4 units)

Course Description: Political and economic relationships among central cities, suburbs, and regional, state, and federal governments. Focuses upon policy areas such as poverty, transportation, welfare, and housing, and upon who governs and who benefits from the policies in these areas.

Prerequisite(s): Consent of instructor; POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Quantitative Literacy (QL); Writing Experience (WE).

POL 104 – California State Government & Politics (4 units)

Course Description: California political system. Political culture, constitution, elections and parties, direct democracy, legislature, governor, executive branch, courts, finances, state-local relations and policy issues.

Prerequisite(s): Consent of instructor; POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 105 – The Legislative Process (4 units)

Course Description: Legislative process with emphasis on the United States Congress; legislative organization and procedures, legislative leadership and policy making, legislators and constituents, relations between Congress and other agencies.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 106 – The Presidency (4 units)

Course Description: American presidencies origins and development; presidential power and influence as manifest in relationships with Congress, courts, parties, and the public in the formulation and administration of foreign and domestic policy; nominations, campaigns, and elections.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 107 – Environmental Politics & Administration (4 units)

Course Description: Environment as a political issue in the United States. Development of administrative mechanisms for handling environmental problems. Changing role of Congress, the presidency, the bureaucracy and the courts in environmental policy formulation and implementation.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL); Writing Experience (WE).

POL 108 – Policy Making in the Public Sector (4 units)

Course Description: Theoretical rationale for governmental activity, program evaluation, PPBS, positive theories of policy making, the quantitative study of policy determinants, implementation, and proposals for improved decision making.

Prerequisite(s): Consent of instructor; POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL); Writing Experience (WE).

POL 109 – Public Policy & the Governmental Process (4 units)

Course Description: Processes of formulating public policy, including individual and collective decision making, political exchange, competition, bargaining, coalition formation and the allocation of public goods, resources and opportunities.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Quantitative Literacy (QL); Writing Experience (WE).

POL 110 – The Strategy of Politics (4 units)

Course Description: Introduction to game theory. Explanation of the behavior of individuals in strategic interaction. Rational and behavioral approaches. Applications to political science and other fields.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

POL 112 – Contemporary Democratic Theory (4 units)

Course Description: Major contemporary attempts to reformulate traditional democratic theory, attempts to replace traditional theory by conceptual models derived from modern social science findings.

Prerequisite(s): POL 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

POL 113 – American Political Thought (4 units)

Course Description: Origins and nature of American political thought. Principles of American thought as they emerge from the founding period to the present.

Prerequisite(s): POL 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 114 – Quantitative Analysis of Political Data (4 units)

Course Description: Logic and methods of analyzing quantitative political data. Topics covered include central tendency, probability, correlation, and non-parametric statistics. Particular emphasis will be placed on understanding the use of statistics in political science research.

Prerequisite(s): POL 051 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE) or Social Sciences (SS); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

POL 115 – Medieval Political Thought (4 units)

Course Description: Examination of the ideas central to medieval political thinking. Emphasis will be upon the thoughts of the major political thinkers of the period, rather than upon political history.

Prerequisite(s): POL 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

POL 116 – Foundations of Political Thought (4 units)

Course Description: Analysis and evaluation of the seminal works of a major political philosopher or of a major problem in political philosophy.

Prerequisite(s): POL 004 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 117 – Topics in the History of Political Thought (4 units)

Course Description: Political thought of a specific historical period. Topics may include: Ancient Athens, the Italian Renaissance, the Enlightenment, or 19th-century Germany.

Prerequisite(s): POL 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 118A – History of Political Theory: Ancient (4 units)

Course Description: Critical analyses of classical and medieval political philosophers such as Plato, Aristotle, Cicero and St. Thomas.

Prerequisite(s): POL 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 118B – History of Political Theory: Early Modern (4 units)

Course Description: Critical analysis of the works of early modern political philosophers such as Machiavelli, Montaigne, Hobbes, Locke and Hume.

Prerequisite(s): POL 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 118C – History of Political Theory: Late Modern (4 units)

Course Description: Critical analyses of the works of late modern political philosophers such as Rousseau, Kant, Hegel, Tocqueville, Mill, Marx and Nietzsche.

Prerequisite(s): POL 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 119 – Contemporary Political Thought (4 units)

Course Description: Contemporary political thought from the end of the 19th century to the present. Emphasis upon an individual philosopher, concept, or philosophical movement; e.g., Nietzsche, Continental political thought, Rawls and critics, theories of distributive justice, feminist theory.

Prerequisite(s): POL 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 120 – Theories of International Politics (4 units)

Course Description: Major contemporary approaches to the study of international politics, including balance of power, game theory, Marxist-Leninist theory, systems theory, and decision-making analysis.

Prerequisite(s): Consent of instructor; POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 121 – Scientific Study of War (4 units)

Course Description: Analysis of political processes involved in the initiation, conduct and termination of modern interstate warfare.

Prerequisite(s): POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

POL 122 – International Law (4 units)

Course Description: Selected topics in international law; territory, sovereign immunity, responsibility, the peaceful settlement or nonsettlement of international disputes.

Prerequisite(s): POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 123 – The Politics of Interdependence (4 units)

Course Description: In the past several decades, growing economic interdependence has generated new problems in international relations. Deals with difficulties in managing complex interdependence and its implication on national policies and politics.

Prerequisite(s): Consent of instructor; POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 124 – The Politics of Global Inequality (4 units)

Course Description: Analysis of current economic and political international relations resulting from a long standing division of the global system into rich and poor regions.

Prerequisite(s): POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 126 – Ethnic Self-Determination & International Conflict (4 units)

Course Description: Compares the claims of the state and ethnic peoples in countries undergoing internal conflicts; e.g., South Africa, Northern Ireland. Analyzes the role of the international community in facilitating the peaceful resolution of conflicts.

Prerequisite(s): POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 129 – Special Studies in International Politics (4 units)

Course Description: Intensive examination of one or more special problems in international politics. May be taught abroad.

Prerequisite(s): POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 130 – Recent U.S. Foreign Policy (4 units)

Course Description: Broad survey of the development of U.S. foreign policy in 20th century with emphasis on transformation of policy during and after World War II, and the introduction to analytic tools and concepts useful for understanding of current foreign policy issues.

Prerequisite(s): Consent of instructor; POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 131 – Analysis of U.S. Foreign Policy (4 units)

Course Description: Detailed presentation and examination of the formulation of execution of U.S. foreign policy. Survey of numerous factors influencing policy outcomes and how such determinants vary according to policy issue areas.

Prerequisite(s): Consent of instructor; POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 132 – National Security Policy (4 units)

Course Description: Development of national security policies since 1945. Analysis of deterrence and assumptions upon which it is based. Effects of nuclear weapons upon conduct of war, alliance systems, and the international system. Prospects of security and stability through arms control.

Prerequisite(s): POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 134 – Africa & U.S. Foreign Policy (4 units)

Course Description: Overview of American foreign policy toward Africa. Relationship to global adversaries. Legacies of colonialism. Challenge of national self-determination and white racism. Policies on non-alignment, producer cartels, multinational corporations, continental integration and trade and aid relations.

Prerequisite(s): Consent of instructor; POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

POL 135 – International Politics of the Middle East (4 units)

Course Description: International politics of the Middle East as a microcosm of world politics. The Middle East as a regional system. Domestic and International Politics in the Middle East. Changing Political Structures in the Middle East. Superpower involvement in the Middle East.

Prerequisite(s): Consent of instructor; POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 136 – The Arab-Israeli Conflict (4 units)

Course Description: Causes, course, and implications of Arab-Israeli conflict. Competing Israeli and Arab narratives, politics of force, diplomacy. Domestic politics and A-I conflict, the superpowers and the A-I conflict, A-I conflict and world politics, potential solutions.

Prerequisite(s): POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 137 – International Relations in Western Europe (4 units)

Course Description: Analysis of European unity, problems of the Atlantic alliance, Atlantic political economy, East-West relations, communism in Western Europe and the relationship between domestic politics and foreign policy. May be taught abroad.

Prerequisite(s): POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 139 – Special Studies in Foreign Policy (4 units)

Course Description: Extensive examination of one or more special problems in foreign policy.

Prerequisite(s): Consent of instructor; POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

POL 140A – Comparative Political Institutions: Electoral Systems (4 units)

Course Description: Workings of electoral institutions, focusing on systems used to elect presidents and assemblies, pass laws, and generally make decisions. Examples from systems throughout the world, including cases from both the advanced industrial and developing worlds.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

POL 140B – Comparative Political Institutions: Parties (4 units)

Course Description: Factors shaping political parties and their role in democratic representation.

Prerequisite(s): Consent of instructor; POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 140C – Comparative Political Institutions: Legislatures (4 units)

Course Description: Examination of legislatures from a comparative perspective.

Prerequisite(s): Consent of instructor; POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 140D – When Institutions Fail (4 units)

Course Description: Examination of factors contributing to the success and failure of political institutions.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

POL 140E – Policy-Making Processes (4 units)

Course Description: Comparative analysis of policy-making in the U.S. and other countries.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

POL 140F – Experiments in Social Change (4 units)

Course Description: Concept and practice of randomized policy experiments. Applications in comparative politics. Practical exercises in cleaning, analyzing, visualizing, and interpreting data from experiments.

Prerequisite(s): POL 002; POL 051 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

POL 142A – Comparative Development: Political Development in Modernizing Societies (4 units)

Course Description: Nature and sequence of political development; its economic and social concomitants; role of elites, military, bureaucracy, and party systems; social stratification and group politics; social mobilization and political participation; instability, violence, and the politics of integration.

Prerequisite(s): Consent of instructor; POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 142B – Comparative Development: Politics & Inequality (4 units)

Course Description: Linkages between politics and the distribution of social and economic goods. Impact of civil rights legislation, the politics of welfare states, and the effects of political participation on the distribution of goods.

Prerequisite(s): Consent of instructor; POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 142C – Comparative Political Development: Democracy & Democratization (4 units)

Course Description: Examination of conditions promoting democratization and democratic stability.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 143A – Latin American Politics (4 units)

Course Description: Issues related to democratic consolidation in Latin America, with a regional focus on South America. Topics include transitions to democracy, the role of the military, political economy, and political behavior.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 143B – Mexican Politics (4 units)

Course Description: Introduction to the politics of contemporary Mexico. Focus on rise, fall, and aftermath of Mexico's one-party dominant system.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 144A – Politics of Post-Communist Countries: East European Politics (4 units)

Course Description: Post-war democratization, state-building and economic reform in East European states.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 144B – Politics of Post-Communist Countries: Russia (4 units)

Course Description: Democratization, state-building and economic reform; creation of new institutions; impacts of Soviet rule.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 145B – Politics in Israel (4 units)

Course Description: Introduction to the domestic politics of Israel in comparative perspective, including issues of internal cultural diversity, religion and politics, fragmentation of the political party system, and coalition governance.

Learning Activities: Term Paper, Lecture 3 hour(s).

Enrollment Restriction(s): Pass One restricted to Political Science, Political Science-Public Service, and International Relations majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

POL 146A – Politics of Africa: Issues in Contemporary African Politics (4 units)

Course Description: African politics since the end of the Cold War. Topics include: Strategic Security Approach, Democratization, Human Rights, HIV/AIDS, African Peacekeeping, Terrorism, Religious and Ethnic Conflict, Debt and Stalled Development.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 146B – Politics of Africa: Development in Africa (4 units)

Course Description: Political and economic development within Sub-Saharan Africa. States and institutions, democracy, party systems, military coups/rule, bureaucracy/corruption, race/ethnicity, national/regional integrations, trade unions, economic development strategies, class formation, and women's roles and ideology.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 147A – West European Politics (4 units)

Course Description: Evolution, politics, and contemporary problems of selected political systems of Western Europe. May be taught abroad.

Prerequisite(s): Consent of instructor; POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 147B – West European Politics: British Politics (4 units)

Course Description: Evolution, politics, and contemporary problems of Britain's political system.

Prerequisite(s): Consent of instructor; POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 147C – West European Politics: French Politics (4 units)

Course Description: Evolution, politics and contemporary problems of France's political system.

Prerequisite(s): Consent of instructor; POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 147D – West European Politics: German Politics (4 units)

Course Description: Evolution, politics and contemporary problems of Germany's political system.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 148A – Government & Politics of East Asia: China (4 units)

Course Description: Evolution of political institutions and political culture in China with emphasis on the post-1949 period. Primary attention to nationalism, modernization and political efficacy.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 148B – Government & Politics in East Asia: Japan (4 units)

Course Description: Japanese politics, with an emphasis on the postwar period. Particular emphasis on political parties, elections, political economy, and social problems.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 148C – Government & Politics in East Asia: Southeast Asia (4 units)

Course Description: Evolution of political institutions and economy of selected nations in Southeast Asia. Emphasis on imperialist legacy, nation building in multi-ethnic communities, and contrasts in economic performance.

Prerequisite(s): POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

POL 150 – Judicial Politics & Constitutional Interpretation (4 units)

Course Description: Politics of judicial policy making, issues surrounding constitutional interpretation and decision making, prerequisite for courses on the politics of constitutional law.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

POL 151 – Constitutional Politics of the First Amendment & the Right to Privacy. (4 units)

Course Description: Constitutional politics surrounding such issues as the right to free expression, associational rights, the right to free exercise of religious beliefs and the right to privacy.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

POL 152 – The Constitutional Politics of the Equality (4 units)

Course Description: Constitutional politics of equality in the American political system; issues surrounding constitutional doctrine and judicial policymaking; special attention on racial and sexual equality.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

POL 153 – The Constitutional Politics of the Justice System (4 units)

Course Description: Constitutional politics of the American criminal justice system. Issues surrounding constitutional doctrine and judicial policymaking on issues such as search and seizure. Arrest, trial, incarceration and other issues of due process.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

POL 154 – Legal Philosophy (4 units)

Course Description: Analysis of the nature and functions of law; law as an instrument of social control and the relationship between law and morality.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 155 – Judicial Process & Behavior (4 units)

Course Description: Analysis of the behavior of judges and courts in the political process. Techniques of judicial decision making. Relationships among courts and other decision-making bodies.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 160 – American Political Parties (4 units)

Course Description: Analysis of the structured operations of the party system in the United States; party functions and organizations, nomination processes, campaigns and elections, party trends and reforms.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Quantitative Literacy (QL); Writing Experience (WE).

POL 161 – Ballots, Bucks, & Maps: The Rules of the Electoral Game in American Politics (4 units)

Course Description: Analysis of laws and court cases on the organization and administration of elections in the United States. Topics include campaign finance, redistricting, voting rights, race & representation, and comparisons with other democracies.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

POL 162 – Elections & Voting Behavior (4 units)

Course Description: Analysis of American elections and partisan behavior; political socialization, political participation, partisanship and individual and group determinants of voting.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

POL 163 – Group Politics (4 units)

Course Description: Groups, institutions and individuals, especially in American politics. Historical and analytical treatment of group theories as applied to interest groups (especially labor, business, agriculture, science, military); to racial, ethnic and sectional groups; to parties, public and legislative groups, bureaucracies.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

POL 164 – Public Opinion (4 units)

Course Description: Nature of public opinion in America as it is supposed to be and as it is. Distribution of opinions among different publics and the significance of that distribution for system stability and institutions. Opinion polling and its problems.

Prerequisite(s): Consent of instructor; POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

POL 165 – Mass Media & Politics (4 units)

Course Description: Organization of and decision making within the media; media audiences and the effect of the media on attitudes and behavior; the relationship of the government to the media (censorship, secrecy, freedom of the press, government regulation); the media in election campaigns.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Enrollment Restriction(s): Pass One only open to students in Political Science majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 165V – Mass Media & Politics (4 units)

Course Description: Organization of and decision making within the media; media audiences and the effect of the media on attitudes and behavior; the relationship of the government to the media (censorship, secrecy, freedom of the press, government regulation); the media in election campaigns.

Prerequisite(s): POL 001 recommended.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to students in Political Science majors only.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 166 – Women in Politics (4 units)

Course Description: Role of women in American politics. Historical experiences; contemporary organizations and strategies; areas of legislative concern; the impact of differences in social class, race, and ethnicity upon the involvement of women in politics.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Seminar 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

POL 168 – Latino Politics (4 units)

Course Description: Political aspects of Latino life in America; examines the political role of Latinos as it has been historically defined by different groups in society and the responses of Latinos to their political environment.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

POL 170 – Political Psychology (4 units)

Course Description: Overview to the growing literature on political psychology. Introduction to how psychological concepts (personality, attitudes, stereotypes, heuristics, affect, identity, group dynamics) help us understand how citizens think about politics.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 171 – The Politics of Energy (4 units)

Course Description: Nature and performance of political processes for making energy choices at the international, national and state levels. Interaction of energy policy with other political goals and the ability of governmental institutions to overcome constraints on policy innovation.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 172 – American Political Development (4 units)

Course Description: Systematic analysis of contemporary issues in American political development: historical determinants of political change; the timing and character of institutional development; conditions for successful political action. Democratization, cultural change, party formation, state-building, constitutionalism, race relations.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

POL 174 – Government & the Economy (4 units)

Course Description: Political basis of economic policy (taxation, spending and regulation); impact of prices, employment and growth on political demands; elite responses to economic conditions; policy alternatives and the public interest.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 175 – Science, Technology, & Policy (4 units)

Course Description: Analysis of policymaking for science and the use of scientific expertise for making decisions about technology. Topics include funding of basic research, relationship of science to technological development, science and military policy, technological risks, technology assessment and scientists and politics.

Prerequisite(s): Consent of instructor; POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Writing Experience (WE).

POL 176 – Racial Politics (4 units)

Course Description: Race, racial attitudes and racial policies in the United States with a specific emphasis on African Americans.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

POL 179 – Special Studies in Comparative Politics (4 units)

Course Description: Intensive examination of one or more special problems appropriate to comparative politics. Coverage is given to formal and informal political institutions, economically developing and developed countries, and non-democratic, democratic, and democratizing countries.

Prerequisite(s): Consent of instructor; POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 180 – Bureaucracy in Modern Society (4 units)

Course Description: Role of bureaucracy in a complex society, with emphasis upon changing relationships between government and the economy; consequences of rapid technological and social change for bureaucratic structures and processes; the problems of reconciling expertise and democracy and increasing the responsiveness of public bureaucracy.

Prerequisite(s): Consent of instructor; POL 001 or POL 002 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 183 – Administrative Behavior (4 units)

Course Description: Implications for American public administration of evolving concepts about behavior in organizations.

Prerequisite(s): POL 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 187 – Administrative Theory (4 units)

Course Description: Historical and critical analysis of the principal theories of organization and management of public agencies in light of such concepts as decision making, bureaucracy, authority and power, communication and control; examination of role of government bureaucracies in the total society.

Prerequisite(s): POL 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 190 – International Relations (4 units)

Course Description: Analysis and evaluation of substantive issues in contemporary international relations. Readings drawn from current academic and non-academic periodicals. May be taught abroad.

Prerequisite(s): Consent of instructor; POL 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 192A – Internship in Public Affairs (3-6 units)

Course Description: Supervised internship and study in political, governmental, or related organizations.

Prerequisite(s): Consent of Instructor; highest priority assigned to students with Political Science Public Service major; upper division standing required.

Learning Activities: Internship.

Enrollment Restriction(s): Open to Political Science, Political Science-Public Service and International Relations majors only.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS).

POL 192B – Internship in Public Affairs (1-5 units)

Course Description: Supervised internship and study in political, governmental, or related organizations.

Prerequisite(s): POL 192A; consent of instructor; highest priority assigned to students with Political Science-Public Service major; upper division standing.

Learning Activities: Internship.

Enrollment Restriction(s): Open to Political Science, Political Science-Public Service and International Relations majors only.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS).

POL 193 – Research in Practical Politics (2 units)

Course Description: Supervised preparation of an extensive paper relating internship experience to concepts, literature, and theory of political science.

Prerequisite(s): POL 192A; POL 192B; open only to Political Science-Public Service majors, for whom it is required.

Learning Activities: Project 6 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 193W – Washington Center Research Seminar (4 units)

Course Description: Core academic component of Washington Program offered every quarter. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper.

Prerequisite(s): WAS 192W (can be concurrent).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion.

Repeat Credit: May be repeated 2 time(s).

Cross Listing: WAS 193.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 194HA – Special Study for Honors Students (4 units)

Course Description: Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty advisor.

Prerequisite(s): Major in Political Science with upper division standing and a GPA of 3.500 in the major.

Learning Activities: Seminar 2 hour(s), Independent Study 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

POL 194HB – Special Study for Honors Students (4 units)

Course Description: Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty advisor.

Prerequisite(s): Major in Political Science with upper division standing and a GPA of 3.500 in the major.

Learning Activities: Seminar 2 hour(s), Independent Study 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

POL 195 – Special Studies in American Politics (4 units)

Course Description: Intensive examination of one or more special problems appropriate to American politics.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 196A – Seminar in American Politics (4 units)

Course Description: Intensive reading, discussion, research, writing in American politics. Topics may include Congress, the Presidency, the Supreme Court, federalism, voting behavior, interest groups, ethnic groups or other topics with a more specialized content than normal course offerings.

Prerequisite(s): Upper division Political Science majors or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

POL 196B – Seminar in Comparative Politics (4 units)

Course Description: Intensive reading, discussion, research, writing in comparative politics. Topics may include one country or geographical area, political institutions or behavior across countries, political development, or other topics that are more specialized than normal course offerings.

Prerequisite(s): Upper division Political Science majors or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 196C – Seminar in International Relations (4 units)

Course Description: Intensive reading, discussion, research, writing in international relations including study of international political institutions (UN, EU, or NATO) or interstate relations (war, trade, immigration) and other topics with more specialized content than normal course offerings.

Prerequisite(s): Upper division Political Science majors or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 196D – Seminar in Political Theory (4 units)

Course Description: Intensive reading, discussion, research, writing in political theory. Topics may include study of a single political thinker, a group of related thinkers, development of political concepts, or other topics with more specialized content than normal course offerings.

Prerequisite(s): Upper division Political Science majors or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

POL 196E – Seminar in Research Methods (4 units)

Course Description: Intensive reading, discussion, research, and writing in selected topics in Research Methods such as research design, statistics, game theory, etc.

Prerequisite(s): Upper division Political Science majors or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

POL 197T – Tutoring in Political Science (1-5 units)

Course Description: Tutor responsibilities such as attending class, offering a guest lecture on a select topic, assisting in group discussions, hosting consultation or review sessions, or assisting instructor with assignments (though not grading).

Prerequisite(s): Consent of instructor.

Learning Activities: Tutorial.

Enrollment Restriction(s): Restricted to POL, PPS, and IRE majors only.

Repeat Credit: May be repeated 10 unit(s) with consent of instructor.

Grade Mode: Passed/Not Passed Only.

General Education: Social Sciences (SS).

POL 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Enrollment Restriction(s): Open to Political Science, Political Science-Public Service and International Relations majors only.

Repeat Credit: May be repeated for credit when topic differs or with consent of instructor.

Grade Mode: Pass/No Pass only.

POL 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of Instructor; upper division standing.

Learning Activities: Variable.

Enrollment Restriction(s): Open to POL, PPS, and IRE majors only.

Repeat Credit: May be repeated for 15 unit(s), when topic differs or with consent of instructor.

Grade Mode: Pass/No Pass only.

POL 201 – Urban Government & Politics (4 units)

Course Description: Survey and analysis of the literature in the field of local government and politics in the United States. Approaches to the study of political reform, local autonomy, community power, representation, expertise, service delivery, policy making and political change.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

POL 202 – American State Government & Politics (4 units)

Course Description: Survey and analysis of the literature in the field of state government, politics, and policy. Approaches to the study of the American states as political systems, including their governing institutions and processes and their role in the Federal system.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

POL 203A – American Government: The Presidency (4 units)

Course Description: Thorough overview of the current research on political executives, with particular emphasis on the American presidency.

Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students only.

Grade Mode: Letter.

POL 203B – American Government: Congress (4 units)

Course Description: Thorough overview of the current research on Congress, with particular emphasis on political representation.

Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students only.

Grade Mode: Letter.

POL 203C – American Government: Courts (4 units)

Course Description: Survey and analysis of the literature in the field of American government with a focus on courts. Emphasis on the development and testing of theories of behavior and processes.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

POL 207 – Environmental Public Policy (4 units)

Course Description: Analysis of the interface between the world of academic reflection about ecological and environmental problems and the world of political action. Evaluation of alternative approaches to policy analysis and recommendation. Individual research, including field research, will parallel discussion of the literature.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

POL 208 – Policy Analysis (4 units)

Course Description: Social science techniques applied to public policy formation and evaluation.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

POL 209 – The American Political System (4 units)

Course Description: Analysis of selected theoretical and empirical issues posed by contemporary research in American government and politics.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students only.

Grade Mode: Letter.

POL 210 – Research Design in Political Science (4 units)

Course Description: Introduction to philosophy of science and research design for political science. Topics include: logic of empirical research, overview of research design approaches for political science research.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

POL 211 – Research Methods in Political Science (4 units)

Course Description: Introductory seminar on the foundations of probability theory and mathematical statistics that are critical to empirical investigations in political science.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Pass One open to graduate majors; Pass Two open to graduate students.

Grade Mode: Letter.

POL 212 – Quantitative Analysis in Political Science I (4 units)

Course Description: Seminar provides an introduction to the linear regression model. Will obtain a working knowledge of basic regression techniques and problems.

Prerequisite(s): POL 211.

Learning Activities: Seminar 3 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Pass One open to graduate majors; Pass Two open to graduate students.

Grade Mode: Letter.

POL 213 – Quantitative Analysis in Political Science II (4 units)

Course Description: More advanced topics in the use of statistical methods, with emphasis on political applications. Topics include: properties of least squares estimates, problems in multiple regression, and advanced topics (probit analysis, simultaneous models, time-series analysis, etc.).

Prerequisite(s): POL 211; POL 212.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to graduate majors; pass 2 open to graduate students.

Grade Mode: Letter.

POL 214A – Research in Political Science (4 units)

Course Description: Research seminar sequence required of all PhD students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality.

Prerequisite(s): POL 213.

Learning Activities: Discussion 2 hour(s), Lecture 1 hour(s), Term Paper.

Enrollment Restriction(s): Advanced level graduate students in the Department of Political Science only.

Grade Mode: Letter.

POL 214B – Research in Political Science (4 units)

Course Description: Research seminar sequence required of all PhD students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality.

Prerequisite(s): POL 212; POL 214A.

Learning Activities: Discussion 2 hour(s), Lecture 1 hour(s), Term Paper.

Enrollment Restriction(s): Advanced level graduate students in the Department of Political Science only.

Grade Mode: Letter.

POL 215 – Introduction to Modeling Political Behavior (4 units)

Course Description: Introduction to formal and game theoretic analyses of politics. Students will learn basic game theory and modeling skills. We examine the benefits of modeling, and look at examples of formal analysis in a variety of political science sub-fields.

Prerequisite(s): POL 211; POL 212.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to graduate majors; pass 2 open to graduate students.

Grade Mode: Letter.

POL 216 – Qualitative Research Methods (4 units)

Course Description: Methodology for utilizing theoretically-oriented case studies and controlled comparison of a small number of cases to develop and test theories. Examination of how the case study method complements experimental, statistical and deductive modes of research.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Grade Mode: Letter.

POL 217 – Social Choice Theory & Spatial Modeling (4 units)

Course Description: Introduction to social choice theory and formal spatial modeling including Arrow's Theorem, the paradox of voting, cycling and agenda control. Focus on mastering modeling techniques as well as interpretation of classic works.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

POL 218 – Topics in Political Theory (4 units)

Course Description: Topics vary and may be the work of a single theorist, time period, or political concept, such as justice.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

POL 219A – Political Theory Sequence (4 units)

Course Description: Survey of the great works in ancient and medieval political theory including such writers as Plato, Aristotle, Cicero, St. Augustine, Aquinas, Alfarabi and Marsilius. Discussions of various interpretations of these authors.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

POL 219B – Political Theory Sequence (4 units)

Course Description: Survey of the great works in early modern to contemporary political theory including such writers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, Nietzsche, and Rawls. Discussion of various interpretations of these authors.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

POL 219C – Contemporary Political Theory (4 units)

Course Description: Survey of important works in contemporary political theory including such writers as Nietzsche, Heidegger, Arendt, Rawls, Nozick, Sandel.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

POL 220 – Seminar in Political Theory (4 units)

Course Description: Introduction to political theory and current debates over its study. Readings from and textual interpretations of political theory including the Federalist Papers and major works by thinkers such as Plato, Aristotle, Machiavelli, Hobbes, Locke, Rousseau, and Rawls. Other readings addressing issues of textual interpretation.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

POL 223 – International Relations (4 units)

Course Description: International relations.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

POL 224 – International Security (4 units)

Course Description: Contemporary scholarship on issues related to international conflict and political violence, with particular emphasis on how current trends in globalization and governance affect global security.

Prerequisite(s): POL 223; consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper

Grade Mode: Letter.

POL 225 – The International System (4 units)

Course Description: Analysis of the international system by means of theory formulation and integration; critique of research designs; use of various techniques of data generation and analysis.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

POL 226 – Seminar in International Political Economy (4 units)

Course Description: Research in international political economy. Structure of the global economy, as well as specific dimensions of international economic relations, including trade, capital flows, global production structures, and migration.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

POL 230 – American Foreign Policy (4 units)

Course Description: American foreign policy.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

POL 231 – U.S. Political Culture & Foreign Relations (4 units)

Course Description: Relates U.S. political culture to formulation of foreign policy. Analyzes American ideological preferences in historical perspective, contemporary public opinion, decision making and implementation. Concludes by examining linkages between foreign policy behavior and democratic process.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

POL 241 – Communist Political Systems (4 units)

Course Description: Systematic analysis of selected topics dealing with the political process of communist political systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

POL 242 – Seminar in Comparative Politics (4 units)

Course Description: Systematic survey of theories and methods used in the study of comparative politics.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

POL 243 – Comparative Institutional Change (4 units)

Course Description: Comparison of institutional changes in countries of the former Soviet Union and Eastern Europe during the period of transition to democracy. Special attention to institutions of mass representation; electoral and party systems and national legislatures.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

POL 246 – Policymaking in Third-World Societies (4 units)

Course Description: Included in an analysis of policymaking process in Third-World countries are such topics as political resources, institutional resources, decision making, resource allocations, planning, and budgeting, implementation, and distribution of world resources.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

POL 250 – Policy Development & Impact in U.S. Courts (4 units)

Course Description: Thorough overview of the literature regarding courts as policymaking institutions of government, with emphasis on the formation and implementation of judicial policy. Differences and similarities across the judicial, congressional, and executive branch policy processes.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

POL 260 – Political Parties (4 units)

Course Description: Survey of selected topics in American and comparative parties.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

POL 261 – Political Behavior (4 units)

Course Description: Survey of selected topics in political behavior and public opinion.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

POL 274 – Political Economy (4 units)

Course Description: Politics of economic policy as reflected in taxation, spending and regulation; impact of prices, employment, and growth on political demands; government responses to economic conditions; electoral politics and the political business cycle.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

POL 279 – Political Networks: Methods & Applications (4 units)

Course Description: Structure of political networks, socio-matrices and affiliation networks; general networks characteristics: density, centralization, polarization, interdependence, dyadic and triadic characteristics: structural and role equivalence; subsets of networks: cliques, blocks and bloc modeling; characteristics of individuals in networks: centrality and prestige.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

POL 280 – Bayesian Methods: for Social & Behavioral Sciences (4 units)

Course Description: Methodology seminar introducing Bayesian quantitative methods to issues and problems in political science and other social and behavioral sciences.

Prerequisite(s): POL 212; or equivalent to course.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to graduate majors only; Pass Two open to graduate students.

Grade Mode: Letter.

POL 281 – Statistical Computing Issues in Political Science (4 units)

Course Description: Methodology seminar introducing computing issues in empirical models for political science and other social and behavioral sciences.

Prerequisite(s): POL 213; or equivalent to course.

Learning Activities: Seminar 3 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to graduate standing.

Grade Mode: Letter.

POL 282 – Advanced Modeling of Political Behavior (4 units)

Course Description: Applications of formal theory to political science. Review of relevant contributions in other social sciences. Consideration of advanced techniques in game theory. Rational and behavioral approaches.

Prerequisite(s): POL 215; or equivalent to course.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Enrollment Restriction(s): Restricted to graduate standing or with instructors permission.

Grade Mode: Letter.

POL 283 – Organizational Behavior (4 units)

Course Description: Organizational behavior as it relates to public sector decision making.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

POL 284 – Advanced Network Analysis (4 units)

Course Description: Exponential Random Graph Models (ERGMS) of networks, game theoretic models of network formation and network dynamics, diffusion processes, shocks and network collapse, percolation, cross-network spillover processes, social and political applications of advanced network models.

Prerequisite(s): POL 211; POL 212; POL 279.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

POL 285 – Statistics of Causal Inference in Political Science (4 units)

Course Description: Approaches to causal inference using the potential outcomes framework, with political science applications using observational and experimental data. Covers several prominent causal research designs used for studying politics.

Prerequisite(s): POL 211; POL 212; POL 213.

Learning Activities: Lecture 3 hour(s); Term Paper.

Grade Mode: Letter.

POL 290A – Research in American Government & Public Policy (4 units)

Course Description: Special research seminar on problems and issues in the study of American government and public policy.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated 6 time(s) when topic differs.

Grade Mode: Letter.

POL 290B – Research in Political Theory (4 units)

Course Description: Special research seminar on problems and issues in the study of political theory.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students only.

Repeat Credit: May be repeated 6 time(s) when topic differs.

Grade Mode: Letter.

POL 290C – Research in International Relations (4 units)

Course Description: Special research seminar on select problems and issues in the study of international relations.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students only.

Repeat Credit: May be repeated 6 time(s) when topic differs.

Grade Mode: Letter.

POL 290D – Research in Judicial Politics (4 units)

Course Description: Contemporary research on judicial politics, judicial institutions, jurisprudence, and judicial behavior.

Prerequisite(s): Graduate standing in Political Science or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

POL 290E – Research in Political Parties, Politics, & Political Behavior (4 units)

Course Description: Special research seminar on selected problems and issues in the study of political parties, politics, and political behavior.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

POL 290F – Research in Comparative Government & Policy (4 units)

Course Description: Special research seminar on select problems and issues in the study of comparative government and policy.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students only.

Repeat Credit: May be repeated 6 time(s) when topic differs.

Grade Mode: Letter.

POL 290G – Research in Methodology (4 units)

Course Description: Special research seminar on selected problems and issues in methods in political science.

Prerequisite(s): POL 212.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) when topic differs.

Grade Mode: Letter.

POL 297 – Internships in Political Science (2 units)

Course Description: Application and evaluation of theoretical concepts through work experience or systematic observation in public and political agencies.

Prerequisite(s): Open only to persons who have internships or other positions in governmental agencies, political parties, etc.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

POL 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

POL 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

POL 299D – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

POL 390 – The Teaching of Political Science (1 unit)

Course Description: Methods and problems of teaching political science at the undergraduate level.

Prerequisite(s): Graduate student standing in Political Science.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

POL 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Population Biology (PBG)

Graduate Studies**PBG 200A – Principles of Population Biology (5 units)**

Course Description: Principles of single-species ecology and evolution. Topics include ecology of individuals, population growth models, structured populations, life history strategies, stochastic populations, basic population genetics theory, deleterious alleles in natural populations, and molecular population genetics.

Prerequisite(s): PBG 231 required concurrently; and consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

PBG 200B – Principles of Population Biology (6 units)

Course Description: Principles of multi-species communities. Topics include competition, mutualism, metapopulations, food webs and trophic cascades, interactions between simple ecological communities, island biogeography, succession, and large-scale patterns.

Prerequisite(s): PBG 200A; PBG 231.

Learning Activities: Lecture 5 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

PBG 200C – Principles of Population Biology (6 units)

Course Description: Principles of microevolution and macroevolution. Topics include evolutionary quantitative genetics, analysis of hybrid zones, speciation, the fossil record, biogeography, and phylogeny reconstruction.

Prerequisite(s): PBG 200B.

Learning Activities: Lecture 5 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

PBG 203 – Advanced Evolution (3 units)

Course Description: Adaptation and speciation, and biochemical and morphological evolution in plants and animals with emphasis on the appropriateness of different methods of analysis.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 1 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

PBG 206 – Ecology of Insect Parasitoids (4 units)

Course Description: Insect parasitoids will be investigated as model systems to address current topics in behavioral, population, and evolutionary ecology. Theory will be synthesized and critical empirical tests of ecological hypotheses emphasized.

Prerequisite(s): Introductory animal ecology or behavior.

Learning Activities: Lecture 3 hour(s), Seminar 1 hour(s).

Grade Mode: Letter.

PBG 207 – Plant Population Biology (3 units)

Course Description: Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological and genetic approaches to plant population biology.

Prerequisite(s): Advanced undergraduate ecology course (e.g., ESP 100, EVE 101, ENT 104, PLB 117), and advanced undergraduate course in genetics and/or evolution (e.g., BIS 101 or EVE 100).

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: ECL 207.

Grade Mode: Letter.

PBG 212 – Topics in Invertebrate Evolution (2 units)

Course Description: Advanced seminar that critically examines problems relevant to evolutionary patterns among the invertebrates.

Prerequisite(s): Graduate standing or consent of instructor; courses in evolutionary biology, systematics, and ecology highly recommended.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 221 – Animal Behavior, Ecology & Evolution (3 units)

Course Description: Interface between animal behavior, ecology and evolution. New developments in behavioral ecology development and testing of hypotheses in this discipline.

Prerequisite(s): NPB 102; EVE 100; EVE 101; or the equivalent, and consent of instructor, graduate standing.

Learning Activities: Lecture 3 hour(s).

Cross Listing: ANB 221.

Grade Mode: Letter.

PBG 224 – Field Reconnaissance for Population Biologists (2 units)

Course Description: Biweekly field trips to acquaint students with plant and animal communities, biodiversity, and ecological and evolutionary research opportunities in northern and central California.

Prerequisite(s): Graduate student in Population Biology, or consent of instructor.

Learning Activities: Fieldwork 6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 225 – Terrestrial Field Ecology (4 units)

Course Description: Field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results are stressed.

Prerequisite(s): Introductory ecology and introductory statistics, or consent of instructor.

Learning Activities: Seminar 1 hour(s), Fieldwork 12 hour(s).

Cross Listing: ECL 225, ENT 225.

Grade Mode: Letter.

PBG 231 – Mathematical Methods in Population Biology (3 units)

Course Description: Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed.

Prerequisite(s): MAT 016C or MAT 021C; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Cross Listing: ECL 231.

Grade Mode: Letter.

PBG 233 – Computational Methods in Population Biology (3 units)

Course Description: Numerical methods for simulating population dynamics using the computational software package R. Emphasis placed on model formulation and development, theoretical concepts and philosophical principles to guide simulation efforts, model parameterization, and implementing simulations with R.

Prerequisite(s): A course in theoretical ecology (e.g., ECL 231 or an equivalent to ESP 121 from your undergraduate institution) or consent of instructor; no programming experience required.

Learning Activities: Lecture/Lab 2 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: ECL 233.

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 250A – Interdisciplinary Approaches to Biological Invasions (4 units)

Course Description: An integrative consideration of biological invasions, including an overview of concepts from ecology, ecological theory, evolution, genetics, philosophy, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem-solving.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

PBG 250B – Interdisciplinary Approaches to Biological Invasions (4 units)

Course Description: An integrative consideration of biological invasions, including an overview of concepts from history, sociology, communications, law, policy, management, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem-solving.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

PBG 251 – Collaborative Project in Biological Invasions (3 units)

Course Description: A year-long interdisciplinary collaborative project focusing on biological invasions, resulting in a paper or other suitable product presented at a symposium at the conclusion of the project.

Prerequisite(s): PBG 250A; PBG 250B; or equivalent courses, and consent of instructor.

Learning Activities: Project, Discussion 1 hour(s).

Repeat Credit: May be repeated 5 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 270 – Research Conference in Evolutionary Biology (1 unit)

Course Description: Critical presentation and evaluation of current literature and ongoing research in evolutionary biology.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 271 – Research Conference in Ecology (1 unit)

Course Description: Critical presentation and evaluation of current literature and ongoing research in ecology. Requirements include active participation in weekly discussions and the presentation of a paper or chapter once per quarter.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Cross Listing: ECL 271.

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 287 – Advanced Animal Behavior (2 units)

Course Description: Reading, reports and discussion on current topics in animal behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution.

Prerequisite(s): NPB 102; EVE 100; or the equivalents; graduate standing; consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 2 time(s).

Cross Listing: ANB 287.

Grade Mode: Letter.

PBG 290 – Seminar (1 unit)

Course Description: Seminars presented by visiting lecturers, UC Davis graduate students and faculty.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 290C – Research Conference in Population Biology (1 unit)

Course Description: Presentation and discussion of faculty and graduate student research in population biology.

Prerequisite(s): PBG 299 (can be concurrent); and consent of instructor. Graduate standing; PBG 299 required concurrently.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 292 – Topics in Ecology & Evolution (1 unit)

Course Description: Seminar presented by visiting lecturers, UC Davis faculty and graduate students.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Cross Listing: ECL 296.

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 296 – Seminar in Geographical Ecology (2 units)

Course Description: Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics.

Prerequisite(s): EVE 100 or EVE 101; or consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Cross Listing: GEO 214.

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PBG 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Population Health & Reproduction (PHR)

School of Veterinary Medicine

PHR 092 – Internship in Veterinary Science (1-4 units)

Course Description: Supervised work experience in reproduction.

Prerequisite(s): Approval of project prior to period of internship by faculty sponsor.

Learning Activities: Discussion/Laboratory 1-4 hour(s), Clinical Activity 3-36 hour(s).

Grade Mode: Pass/No Pass only.

PHR 106 – Human-Animal Interactions: Benefits & Issues (2 units)

Course Description: Contributions of animals to human society, including historic, anthropologic, developmental, human health and therapeutic perspectives, as well as effects of humans on animals. One field trip required.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 18 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

PHR 192 – Internship in Veterinary Science (1-12 units)

Course Description: Supervised work experience in Reproduction.

Prerequisite(s): Upper division standing; approval of project prior to period of internship.

Learning Activities: Discussion/Laboratory 1-12 hour(s), Clinical Activity 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PHR 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PHR 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

MPM 200 – Introduction to Information Management for Epidemiologists (1 unit)

Course Description: Introduction to practical application of epidemiological methods to solve problems involving population health data. Emphasis on using worksheet/database software tools for organizing, analyzing, reporting, and interpreting data. Ten, three-hour sessions.

Learning Activities: Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to students in the Master of Preventive Veterinary Medicine program.

Grade Mode: Letter.

MPM 201 – Emerging Issues at the Interface of Animal, Human, & Ecosystem Health (2.5 units)

Course Description: Introduce one health topics emphasizing relationships between environmental, animal and human health. Topics include ecosystem change and impacts on animals and humans, cross-species disease transmission and approaches for addressing critical data gaps to inform ecosystem health and disease prevention.

Learning Activities: Lecture 1 hour(s), Discussion 1.50 hour(s).

Enrollment Restriction(s): Limited to 35 students.

Grade Mode: Letter.

MPM 202 – Medical Statistics I (4 units)

Course Description: Basic statistics in clinical, laboratory and population medicine: descriptive statistics; probability; binomial, Poisson, normal, t-, F-, and Chi-square distributions; sampling distributions; parameter estimation; hypothesis testing; elementary nonparametric methods, simple linear regression and correlation; life table construction and analysis.

Prerequisite(s): MPVM or MPH standing or consent of instructor.

Learning Activities: Lecture 15 hour(s), Laboratory 10 hour(s).

Enrollment Restriction(s): Restricted to 80 students.

Grade Mode: Letter.

MPM 203 – Medical Statistics II (4 units)

Course Description: Continuation of MPM 202. Analysis of variance in biomedical sciences; nonparametric methods; multiple regression; unconditional logistic regression; biomedical applications of statistical methods. Microcomputer applications in population medicine to reinforce principles that are taught in lecture. Required for students in the Preventive Veterinary Program Graduate Group (PVM) and the Masters of Public Health Program (MPH).

Prerequisite(s): MPM 202; or consent of instructor, or equivalent.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

MPM 204 – Medical Statistics III (4 units)

Course Description: Continuation of MPM 203. Selecting the best regression equation, conditional logistic regression, Poisson regression, survival analysis, analysis of time dependent variation and trends. Microcomputer applications in population medicine to reinforce principles that are taught in lecture.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

MPM 205 – Principles of Epidemiology (4 units)

Course Description: Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance.

Prerequisite(s): MPM 202; or consent of instructor; an introductory statistics course.

Learning Activities: Lecture 4 hour(s).

Cross Listing: EPI 205.

Grade Mode: Letter.

MPM 206 – Epidemiologic Study Design (4 units)

Course Description: Builds on concepts presented in MPM 205. Concepts of epidemiologic study design (clinical trials, observational cohort studies, case control studies) introduced in MPM 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies.

Prerequisite(s): MPM 205; or consent of instructor.

Learning Activities: Lecture 30 hour(s), Discussion 9 hour(s), Laboratory 2 hour(s).

Cross Listing: EPI 206.

Grade Mode: Letter.

MPM 207 – Applied Epidemiologic Problem Solving (1 unit)

Course Description: Integration of epidemiologic and statistical methodology in a problem-solving approach to contemporary animal population health issues. Data validation and manipulation.

Learning Activities: Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

MPM 208 – Research Planning & Reporting I (2 units)

Course Description: Identify and implement research questions through hypothesis construction, articulation of aims, acquiring permits, working as a team, and all other techniques needed to develop a successful research program.

Learning Activities: Lecture/Discussion 2 hour(s).

Enrollment Restriction(s): MPVM standing or consent of instructor.

Credit Limitation(s): Not open for credit to students who have previously taken MPM 408B.

Grade Mode: Letter.

MPM 209 – Research Planning & Reporting II (1 unit)

Course Description: Concepts and skills in effective scientific writing for publication in a peer-reviewed journal in animal health or biomedicine. Includes developing an argument, organizing and writing a manuscript, improving readability, and responding to peer review.

Prerequisite(s): MPM 208.

Learning Activities: Lecture/Discussion.

Grade Mode: Letter.

MPM 210 – Advanced Health Leadership (1.5 units)

Course Description: Develop skills for effective scientific leadership, including: project management and collaboration, conflict resolution, communication with the public, dynamic distribution of health information, and evidence-based policy influence.

Learning Activities: Lecture, Discussion.

Enrollment Restriction(s): Limited to 35 students.

Grade Mode: Letter.

MPM 212 – Concepts & Methods in Infectious Disease Surveillance & Control (3 units)

Course Description: Basic and advanced level of conceptual and methodological foundations in infectious disease epidemiology necessary for veterinarians to develop and evaluate programs for detection, prevention, and control of infectious diseases in animal populations.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

Portuguese (POR)

College of Letters & Science

POR 001 – Elementary Portuguese (5 units)

Course Description: Introduction to Portuguese grammar and development of all language skills in a cultural context with special emphasis on communication.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Students who have successfully completed POR 002 or POR 003 in the 10th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

POR 001A – Accelerated Intensive Elementary Portuguese (15 units)

Course Description: Intended for students who wish to complete three quarters of Portuguese 1, 2, and 3.

Learning Activities: Lecture/Discussion 15 hour(s).

Credit Limitation(s): Not open to students who have completed POR 001, POR 002 or POR 003.

Grade Mode: Letter.

General Education: World Cultures (WC).

POR 002 – Elementary Portuguese (5 units)

Course Description: Continuation of POR 001 in the areas of grammar and development of all basic language skills in cultural context with special emphasis on communication.

Prerequisite(s): POR 001.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

POR 003 – Elementary Portuguese (5 units)

Course Description: Continuation of POR 002 in the areas of grammar and development of all basic language skills in cultural context with special emphasis on communication.

Prerequisite(s): POR 002.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

POR 008 – Elementary Portuguese Conversation (2 units)

Course Description: Designed to develop oral communication skills. Emphasis on increasing vocabulary, improving listening comprehension, pronunciation, accuracy and grammar control. Practice of everyday situations.

Prerequisite(s): POR 003.

Learning Activities: Discussion 3 hour(s).

Enrollment Restriction(s): Not open to native speakers or upper division students.

Grade Mode: Letter.

General Education: World Cultures (WC).

POR 021 – Intermediate Portuguese (5 units)

Course Description: Review and develop the grammar, vocabulary, and composition acquired in first year Portuguese through exercises and reading of modern texts.

Prerequisite(s): POR 003.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

POR 022 – Intermediate Portuguese (5 units)

Course Description: Continuation of POR 021. Focus on more difficult grammar concepts and further composition practice. Development of all language skills through exercises and reading of modern texts.

Prerequisite(s): POR 021.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

POR 023 – Portuguese Composition I (4 units)

Course Description: Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Class activities include composition, journals, letters, individual and group projects.

Prerequisite(s): POR 022.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

POR 028 – Intermediate Portuguese Conversation (2 units)

Course Description: Continuation of POR 008. Designed to develop oral communication skills at a more advanced level. Practice in more complex situations.

Prerequisite(s): POR 008.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

POR 031 – Intermediate Portuguese for Spanish Speakers (4 units)

Course Description: Development of linguistic and learning skills required for Spanish-speaking students in upper division courses in Portuguese.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

POR 031G – Portuguese for Spanish-Speaking Graduate Students (4 units)

Course Description: Intensive review of grammar and composition. Development of all language skills, but with emphasis on reading of modern texts, presentation/discussion, and writing on academic topics. Development on the following writing skills: analytical, argumentative, and creative.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to graduate students only.

Grade Mode: Letter.

POR 098 – Directed Group Study (1-5 units)

Course Description: Directed group study primarily for lower division students.

Prerequisite(s): Consent of instructor and department chairperson.

Learning Activities: Variable 2 hour(s).

Grade Mode: Pass/No Pass only.

POR 100 – Principles of Luso-Brazilian Literature & Criticism (4 units)

Course Description: Principles of literary criticism applied to the study of fiction, poetry, and essays of major literary writers of the Luso-Brazilian world.

Prerequisite(s): POR 022 or POR 023; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

POR 111 – Structure of Portuguese: Sounds & Words (3 units)

Course Description: Linguistic description of sound patterns of Portuguese and how those sounds can be used to form larger units, such as morphemes and words. Theoretical and practical comparisons with English and with other Romance languages.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

POR 130 – Survey of Luso-Brazilian Literature: 1500-1800 (4 units)

Course Description: Overview of Luso-Brazilian literature, covering three major literary periods: Renaissance, Baroque, and Enlightenment.

Attention to the concept of imitation and nativism.

Prerequisite(s): POR 100; (POR 022 or POR 023).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

POR 132 – Portuguese Literature: Medieval & Renaissance (4 units)

Course Description: Overview of the origins of the Portuguese literature, spanning from the 13th century to the 16th century. Studies of lyrical and epic poetry, drama, and travel narratives.

Prerequisite(s): POR 100; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

POR 134 – Luis de Camões (4 units)

Course Description: Overview of the greatest Renaissance Portuguese poet, Luis de Camões. Study his famous epic poem, Os Lusiadas, and a series of sonnets written by him.

Prerequisite(s): POR 100; (POR 022 or POR 031).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

POR 141 – Introduction to Luso-Brazilian Culture (4 units)

Course Description: Introduction to history, geography, and culture of Portugal and Brazil. Art, history of ideas, and everyday cultural manifestations. Introduction to critical reading and textual analysis. Taught in Portuguese.

Prerequisite(s): POR 023 or POR 022.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

POR 159 – Special Topics in Luso-Brazilian Literature & Culture (4 units)

Course Description: Special topics in the study of Luso-Brazilian literature and culture.

Prerequisite(s): POR 100; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

POR 161 – Luso-Brazilian Literature & Culture (4 units)

Course Description: Colonial Brazilian literature survey. Readings include 16th-18th centuries manuscripts and books of cultural importance in a society dominated by censorship and with no printing presses. Study of the role literary Academies played in the so called "culture of manuscripts."

Prerequisite(s): POR 100; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

POR 162 – Introduction to Brazilian Literature (4 units)

Course Description: Narrative and poetic texts of the 19th and 20th centuries in Brazil. In-depth and comparative study of Romantic and (Neo)Naturalist movements as a forum for discussion about literary tradition and modernity in Latin America.

Prerequisite(s): POR 003; (POR 031 or POR 031G).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

POR 163 – 20th C Masters in Brazilian Literature (4 units)

Course Description: Overview of modern Brazilian literature from early 20th C to the poetry by João Cabral de Melo Neto and the Concretists (1960s), including European avant-garde movements and literary and cultural manifestos leading to a revolutionary body of literature.

Prerequisite(s): POR 100; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

POR 197T – Tutoring in Portuguese (1-4 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): Consent of instructor.

Learning Activities: Tutorial 3-12 hour(s).

Repeat Credit: May be repeated for 8 unit(s).

Grade Mode: Passed/Not Passed only.

POR 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor and Department Chairperson.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

POR 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Independent study with professor for advanced undergraduate students, or honor thesis students.

Learning Activities: Variable 2 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

Professional Accountancy (ACC)**Graduate Studies****ACC 201 – Financial Reporting (4 units)**

Course Description: Coverage includes the fundamentals of accounting and reporting economic events and transactions. Emphasizes the preparation of balance sheets, income statements, statements of cash flow, and statements of stockholders' equity.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Master of Professional Accountancy graduate students.

Credit Limitation(s): Not open for credit to students who have taken MGB 200A or MGP 200A or MGT 200A.

Grade Mode: Letter.

ACC 203 – Intermediate Financial Reporting (4 units)

Course Description: Focuses on the preparation of complex financial statements. Topics include accounting recognition, measurement, and disclosure, as well as the theoretical foundations of and motivations for financial reporting choices.

Prerequisite(s): ACC 201 or (MGB 200A or MGP 200A or MGT 200A).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the Master of Professional Accountancy degree program.

Credit Limitation(s): Not open for credit to students who have taken MGB 200A or MGP 200A or MGT 200A.

Grade Mode: Letter.

ACC 205 – Advanced Financial Reporting (4 units)

Course Description: Advanced treatment of recognition, measurement, and disclosure including pensions, accounting for income taxes, mergers and acquisitions, consolidations, special-purpose entities, and foreign subsidiaries. Includes accounting for governmental and nonprofit entities, as well as advanced treatment of international accounting standards.

Prerequisite(s): ACC 203.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students in Graduate School of Management.

Grade Mode: Letter.

ACC 211 – Tax Reporting & Analysis (4 units)

Course Description: Introduction to the taxation of business entities and their related transactions, with an emphasis on the details of tax law and tax reporting requirements. Topics include individual, partnership, and corporate taxation, as well as tax theory.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Master of Professional Accountancy graduate students.

Credit Limitation(s): Not open for credit to students who have completed MGB 264 or MGP 264 or MGT 264.

Grade Mode: Letter.

ACC 213 – Intermediate Tax Reporting & Analysis (4 units)

Course Description: Detailed analysis of federal taxation of individuals. Topics include the timing of income recognition, deductions and credits for tax purposes, as well as the basics of property transactions.

Prerequisite(s): ACC 211; (MGB 264 or MGP 264 or MGT 264).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students in the Graduate School of Management.

Grade Mode: Letter.

ACC 215 – Advanced Tax Reporting & Analysis (4 units)

Course Description: Advanced treatment of complex tax transactions and entities. Topics include aspects of federal taxation of entities and the applicable impact upon individual taxpayers. Coverage includes basis analysis as applicable to pass through entities and an introduction to professional responsibilities.

Prerequisite(s): ACC 213.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students in Graduate School of Management.

Grade Mode: Letter.

ACC 217 – Taxation of Individuals, Property, & Estates (4 units)

Course Description: In-depth analysis of individual income tax issues and property transactions including non-taxable exchanges, compensation, gifts, and transfer taxes. Expanded analysis of multistate tax issues. Emphasis is on the interrelationships of complex individual transactions as well as planning techniques.

Prerequisite(s): ACC 213.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students in Graduate School of Management.

Grade Mode: Letter.

ACC 219 – Taxation of Business Entities (4 units)

Course Description: Analysis of detailed business entity tax issues including basis calculations, alternative minimum taxation, multistate and multinational taxation, stock transactions, and mergers and acquisitions. Tax planning for entities and relationships between business entities and their owners.

Prerequisite(s): ACC 213.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students in Graduate School of Management.

Grade Mode: Letter.

ACC 231 – Analysis & Use of Accounting Reports (4 units)

Course Description: Evaluation of complex financial accounting reports by managers and persons outside the firm, such as investors, creditors, and financial analysts. Topics include cash flow vs. income measurement, ratio and valuation analysis, and the effects of international accounting standards.

Prerequisite(s): ACC 203.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to students enrolled in the Master of Professional Accountancy degree program.

Credit Limitation(s): Not open for credit to students who have completed MGB 272 or MGP 272 or MGT 272.

Grade Mode: Letter.

ACC 241 – Auditing & the Accounting Profession (4 units)

Course Description: Introduction to the audit environment, professional standards, the accounting profession, and the professional responsibilities of accountants. Integrate audit topics across the areas of financial, cost, tax and systems accounting.

Prerequisite(s): ACC 201; (MGB 200A or MGP 200A or MGT 200A).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Graduate School of Management students.

Grade Mode: Satisfactory/Unsatisfactory only.

ACC 243 – Auditing & Attestation Services (4 units)

Course Description: Advanced treatment of the audit process and environment. Topics include audit planning and performance, evidence, internal controls, professional standards, and audit reports. Reviews, compilations and attestation services are examined, as are governmental agency audits.

Prerequisite(s): ACC 241.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students in Graduate School of Management.

Grade Mode: Letter.

ACC 251 – Managerial Accounting & Controls (4 units)

Course Description: Analysis of management accounting systems including cost accounting, performance measurement, and compensation and reward systems. Focuses on the production of information useful for managerial decision-making, as well as the design of these systems.

Prerequisite(s): ACC 201; (MGT 200A or MGP 200A or MGB 200A).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students in the Graduate School of Management.

Credit Limitation(s): Not open for credit to students who have completed MGB 271 or MGP 271 or MGT 271.

Grade Mode: Letter.

ACC 253 – Accounting Information & Control Systems (4 units)

Course Description: Analysis of information systems used for accounting, recordkeeping, and control. Topics include the regulatory requirements of accounting control systems as well as their implementation and auditing considerations.

Prerequisite(s): ACC 201; (MGT 200A or MGP 200A or MGB 200A).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students in Graduate School of Management.

Credit Limitation(s): Not open for credit to students who have taken MGB 271 or MGP 271 or MGT 271.

Grade Mode: Letter.

ACC 261 – Communications for Professional Accountants (4 units)

Course Description: Overview of written and oral professional communications with an emphasis on structuring and documenting audits and reports, understanding audiences (investors, creditors, regulators, and other stakeholders), and consideration of ethical and regulatory responsibilities.

Prerequisite(s): ACC 201; (MGT 200A or MGB 200A or MGP 200A).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students in the Graduate School of Management.

Credit Limitation(s): Not open for credit to students who have taken any MGB 268 or MGP 268 or MGT 268.

Grade Mode: Letter.

ACC 271 – Accounting Ethics (4 units)

Course Description: Analysis of accountants' professional responsibilities and ethics. Topics include the behavioral foundations of ethics in a business environment, how those elements affect accountants' integrity, objectivity, and independence. Professional standards related to accountants' conduct are also covered.

Prerequisite(s): ACC 201; (MGT 200A or MGP 200A or MGB 200A).

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to Graduate School of Management students.

Grade Mode: Letter.

ACC 455 – Audit Data Analytics (4 units)

Course Description: Analytical techniques and methods as related to the practice of financial statement auditing. Combines theory and the application of auditing professional standards including diagnosing problems and issues, analyzing relevant information, and reporting decision results and recommendations.

Prerequisite(s): ACC 253.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

ACC 490 – Topics in Accounting (1-4 units)

Course Description: Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques.

Learning Activities: Lecture 1-4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

Psychiatry (PSY)

College of Letters & Science

PSY 092 – Willow Clinic (1-2 units)

Course Description: Student run clinic for undergraduate students interested in learning about and meeting the unique health care needs for the homeless population.

Learning Activities: Clinical Activity 2-6 hour(s), Seminar 1-2 hour(s), Variable.

Enrollment Restriction(s): Open to lower division undergraduate students.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PSY 192 – Willow Clinic (1-2 units)

Course Description: Student run clinic for upper division students interested in learning about and meeting the unique health care needs for the homeless population.

Prerequisite(s): Consent of instructor. UC Davis enrollment; upper division standing.

Learning Activities: Clinical Activity 2-6 hour(s), Seminar 1-2 hour(s), Lecture 1-2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

PSY 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; advanced standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PSY 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor; advanced standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PSY 298 – Directed Group Study for Graduate Students (1-5 units)

Course Description: Directed group study for graduate students.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Letter.

PSY 299 – Special Study for Graduate Students (1-12 units)

Course Description: Special study for graduate students.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PSY 403 – Fundamentals of Clinical Psychiatry (3 units)

Course Description: Psychiatric interviewing, Mental Status Exam and diagnosis. Major child and adult disorders, including substance abuse and dependence. Weekly student interviews of psychiatric patients in small group format.

Prerequisite(s): Approval of SOM Committee on Student Progress.

Learning Activities: Clinical Activity 1 hour(s), Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to medical student only.

Grade Mode: Pass/Fail only.

PSY 410 – Klingenstein Summer Elective (2.5 units)

Course Description: During this "mini-clerkship," fellows will attend clinics, in-patient settings, and clinicians' offices. They will meet weekly to present cases and review current literature, and will complete a summary narrative at the end of their experience.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 20 hour(s).

Grade Mode: Pass/Fail only.

PSY 410L – Klingenstein Longitudinal Elective (2 units)

Course Description: Year-long mentoring program provides clinical exposure to child and adolescent psychiatric healthcare during a medical student's pre-clinical years.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 5 hour(s), Discussion/Laboratory 10 hour(s), Discussion 2 hour(s).

Grade Mode: Pass/Fail only.

PSY 412 – Psychiatry Grand Rounds (1 unit)

Course Description: Weekly conference at UCDMC for presentation of selected clinical cases, presentation of lecture and research reports.

Prerequisite(s): Medical students or staff or other qualified mental health professionals with consent of instructor.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 413 – Outpatient Psychiatry Clerkship (6 units)

Course Description: Experience in clinical management/treatment of adult outpatients with psychiatric and substance abuse disorders; crisis management/intervention, evaluation/development of diagnosis and treatment plan; emphasis on outpatient psychopharmacology/brief psychotherapy; observation of group therapy. Individual supervision by faculty/residents.

Prerequisite(s): PSY 430; and/or consent of coordinator.

Learning Activities: Clinical Activity 36 hour(s), Conference 2 hour(s), Lecture 2 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 414 – Psychosomatic Medicine Clerkship (3-12 units)

Course Description: A large university hospital service in which the student functions as a member of the team in evaluation, management and psychiatric liaison with other medical specialties. Intensive supervision from senior staff and psychiatric residents.

Prerequisite(s): Psychiatry Clerkship or consent of instructor; medical students only.

Learning Activities: Clinical Activity 32 hour(s), Discussion 8 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Honors/Pass/Fail.

PSY 415 – Telemedicine Clinical Elective (3-9 units)

Course Description: Fourth-year medical student elective in Telemedicine focusing on psychiatric issues. Align with University, School and Center for Health and Technology mission of rural outreach and public health, particularly in primary care.

Prerequisite(s): Fourth-year medical student with consent of instructor.

Learning Activities: Clinical Activity 20 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PSY 416 – Child Psychiatry Clerkship (6 units)

Course Description: Didactic and clinical inpatient, outpatient, and consultation-liaison experiences with children, adolescents and families. Clinical observations, diagnostic assessment, and treatment will be undertaken with close supervision. Literature review and case conferences presented on a regular basis.

Prerequisite(s): PSY 430; and/or consent of coordinator.

Learning Activities: Clinical Activity 36 hour(s), Lecture/Discussion 2 hour(s), Conference 2 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 417 – Jail Psychiatric Clerkship (3-6 units)

Course Description: Gain experience, under close faculty supervision, assessing acute and chronic mentally ill inmates in both inpatient and clinic settings.

Prerequisite(s): PSY 430; and/or consent of course coordinator.

Learning Activities: Clinical Activity 28 hour(s), Conference 8 hour(s), Lecture 4 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 418 – Off-Campus Clinical Experience (3-9 units)

Course Description: Clinical or research elective in off-campus medical school or mental health setting. To be arranged with advance approval of instructor and individual in charge of off-campus setting.

Prerequisite(s): Consent of instructor; fourth-year medical students.

Learning Activities: Clinical Activity 20-40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PSY 419 – Combined Family Medicine-Psychiatry Clerkship (3-6 units)

Course Description: Students rotate through the county Primary Care Clinic under the supervision of dual-boarded Psychiatry and Family Practice Faculty to provide medical care of indigent and uninsured patients as well as primary care for psychiatry patients.

Learning Activities: Clinical Activity 32 hour(s), Discussion 8 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PSY 420 – Acting Internship in Psychiatry (3-6 units)

Course Description: Acting intern position with close faculty supervision with emphasis on biological psychiatry, psychopharmacology and psychodynamic aspects appropriate to diagnostic and long-term patient management.

Prerequisite(s): PSY 430; and/or consent of course coordinator.

Learning Activities: Clinical Activity 40 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 421 – Combined Internal Medicine-Psychiatry Clerkship (3-6 units)

Course Description: Students rotate through the county Primary Care Clinic under the supervision of dual-boarded Psychiatry and Internal Medicine Faculty to provide medical care of indigent and uninsured patients as well as primary care for psychiatry patients.

Prerequisite(s): Psychiatry Clerkship or consent of instructor; medical students only.

Learning Activities: Clinical Activity 32 hour(s), Discussion 8 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PSY 422 – Readings in Psychiatry (1-3 units)

Course Description: Independent reading of a selected topic in psychiatry. Supervision and discussion with a psychiatry faculty member.

Learning Activities: Discussion.

Grade Mode: Honors/Pass/Fail.

PSY 423 – Willow Clinic (1-12 units)

Course Description: Student-run clinic for medical students interested in learning about and meeting the unique healthcare needs of the homeless population.

Learning Activities: Variable 4-10 hour(s).

Enrollment Restriction(s): Open to medical students in all four years of medical school.

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

PSY 424 – Functional Genomics (2 units)

Course Description: The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430 – Psychiatry Clinical Clerkship (3-12 units)

Course Description: Assigned to clinical settings, students build upon the skills gained in preclinical years; emphasis on diagnostic, therapeutic and interpersonal skills. Areas of focus; patient management, interviewing skills, mental status exam, differential diagnosis, basic psychopharmacology, crisis assessment, intervention and case.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430FA – SJVP Longitudinal Psychiatry Clerkship (1.5-6 units)

Course Description: Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430FB – SJVP Longitudinal Psychiatry Clerkship (1.5-6 units)

Course Description: Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430FC – SJVP Longitudinal Psychiatry Clerkship (1.5-6 units)

Course Description: Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430FD – SJVP Longitudinal Psychiatry Clerkship (1.5-6 units)

Course Description: Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430R – Rural PRIME Psychiatry Longitudinal Clerkship (2 units)

Course Description: Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430RA – Rural PRIME Psychiatry Longitudinal Clerkship (3 units)

Course Description: Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430RB – Rural PRIME Psychiatry Longitudinal Clerkship (3 units)

Course Description: Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430RC – Rural PRIME Psychiatry Longitudinal Clerkship (3 units)

Course Description: Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430RD – Rural PRIME Psychiatry Longitudinal Clerkship (1 unit)

Course Description: Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 430TA – TeachMS Longitudinal Psychiatry Clerkship (A) (4 units)

Course Description: Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Promotions.

Learning Activities: Clinical Activity 45 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PSY 430TB – TeachMS Longitudinal Psychiatry Clerkship (B) (6 units)

Course Description: Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Promotions.

Learning Activities: Clinical Activity 45 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PSY 430TC – TeachMS Longitudinal Psychiatry Clerkship (C) (2 units)

Course Description: Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

Prerequisite(s): Consent of instructor; approval by School of Medicine Committee on Student Promotions.

Learning Activities: Clinical Activity 45 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PSY 439D – Directed Clinical Studies in Psychiatry (1-12 units)

Course Description: Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

PSY 439R – Directed Studies in Psychiatry (1-12 units)

Course Description: Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s), Independent Study 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

PSY 480 – Insights in Psychiatry (1-3 units)

Course Description: On individual basis, student provided with an opportunity for gaining insight into various clinical activities in the practice of psychiatry.

Prerequisite(s): Consent of instructor; first- or second-year medical student in good academic standing.

Learning Activities: Clinical Activity 3-9 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 488 – Acting Internship in Inpatient Psychiatry, Away Rotation (6 units)

Course Description: Inpatient acting internship at approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with a smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients.

Prerequisite(s): Psychiatry Clerkship and/or consent of course coordinator.

Learning Activities: Clinical Activity 40 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 489 – Acting Internship in Ambulatory Psychiatry, Away Rotation (6 units)

Course Description: Outpatient acting internship at an approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients.

Prerequisite(s): Psychiatry Clerkship and/or consent of course coordinator.

Learning Activities: Clinical Activity 40 hour(s).

Grade Mode: Honors/Pass/Fail.

PSY 493 – Social Justice & Medicine (3 units)

Course Description: Employ readings, videos and guest presentations to explore how historical injustices have resulted in structural inequities and barriers to wellbeing for marginalized communities. Looks at how socio-political, economic and historical forces create illness in specific groups, and how models of structural competency and cultural humility can be used to explore a path towards equity.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar.

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Grade Mode: Pass/Fail only.

PSY 498 – Directed Group Study (1-9 units)

Course Description: Approved for graduate degree credit. Medical students desiring to explore particular topics in depth.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

PSY 499 – Research (1-12 units)

Course Description: Approved for graduate degree credit. Individual research on selected topics or research projects.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Psychology (PSC)

College of Letters & Science

PSC 001 – General Psychology (4 units)

Course Description: Introduction to empirical approaches. Focus on perception, cognition, personality and social psychology, and biological aspects of behavior.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

PSC 001V – General Psychology (4 units)

Course Description: Introduction to empirical approaches. Focus on perception, cognition, personality and social psychology, and biological aspects of behavior.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

PSC 001Y – General Psychology (4 units)

Course Description: Introduction to empirical approaches. Focus on perception, cognition, personality and social psychology, and biological aspects of behavior.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s), Web Virtual Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

PSC 012Y – Data Visualization in the Social Sciences (4 units)

Course Description: Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations.

Learning Activities: Lecture 2 hour(s), Laboratory 1.50 hour(s), Web Virtual Lecture 1.50 hour(s).

Cross Listing: CMN 012Y, SOC 012Y, POL 012Y.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL); Visual Literacy (VL).

PSC 020 – Freshman Psychology Seminar (4 units)

Course Description: Instructor will acquaint students with his or her program of research, the development of scientific questions from the literature, and the application of research methods to examine these questions. Critical thinking will be encouraged via expository writing and brief presentations.

Prerequisite(s): Freshman standing.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

PSC 041 – Research Methods in Psychology (4 units)

Course Description: Introduction to experimental design, interviews, questionnaires, field and observational methods, reliability, and statistical inference.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 012Y, STA 013, or STA 100 strongly recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

PSC 061 – Mindreading: Understanding Other Minds (4 units)

Course Description: Psychological perspectives on the process of understanding other people's minds. Integration of social-cognitive theories with empirical evidence to explore the human ability to make sense of others' thoughts, feelings, and behaviors.

Prerequisite(s): (PSC 001 or PSC 001Y); (SOC 001 or PHI 010).

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Social Sciences (SS).

PSC 090X – Lower Division Seminar (1-2 units)

Course Description: Examination of a special topic in Psychology through shared readings, discussions, written assignments, or special activities such as fieldwork or laboratory work.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Seminar 1-2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

PSC 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PSC 099 – Special Study for Lower Division Students (1-5 units)

Course Description: Special study for lower division students.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PSC 100 – Introduction to Cognitive Psychology (4 units)

Course Description: Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed former PSC 136.

Grade Mode: Letter.

PSC 100Y – Introduction to Cognitive Psychology (4 units)

Course Description: Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Web Virtual Lecture 4 hour(s), Discussion 1 hour(s), Lecture 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed former PSC 136 or current PSC 100.

Grade Mode: Letter.

PSC 101 – Introduction to Biological Psychology (4 units)

Course Description: Survey and integration of the relationships between behavior and biological processes, including physiology, genes, development, ecology, and evolution. May be taught abroad.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to majors.

Credit Limitation(s): Only 2 units of credit for those students who have completed NPB 100.

Grade Mode: Letter.

PSC 103A – Statistical Analysis of Psychological Data (5 units)

Course Description: Design and statistical analysis of psychological investigations and the interpretation of quantitative data in psychology.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (STA 013 or STA 013Y or STA 032 or STA 100 or STA 102).

Learning Activities: Lecture 4 hour(s), Laboratory 2 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Psychology Majors.

Credit Limitation(s): Not open for credit to students who have completed PSC 103.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

PSC 103B – Statistical Analysis of Psychological Data (5 units)

Course Description: Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Simple regression analysis, multiple regression analysis, non-parametric statistics, introduction to multivariate statistics, with applications in psychology.

Prerequisite(s): PSC 103A.

Learning Activities: Lecture 4 hour(s), Laboratory 2 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed PSC 105.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

PSC 104 – Applied Psychometrics: An Introduction to Measurement Theory (4 units)

Course Description: Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis and latent trait theory.

Prerequisite(s): PSC 041; PSC 103A; (STA 013 or STA 013Y); upper division standing in Psychology.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

PSC 107 – Questionnaire & Survey Research Methods (4 units)

Course Description: Introduction to survey and questionnaire research methods with emphasis on how to ask questions. Social and psychological factors that influence survey response. Practical aspects of fielding survey and questionnaire research.

Prerequisite(s): PSC 001 or PSC 001Y; and consent of instructor; PSC 041 or an equivalent course on social or behavioral research methods or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

PSC 113 – Developmental Psychobiology (4 units)

Course Description: The biology of behavioral development; survey and integration of the organismic and environmental processes that regulate the development of behavior.

Prerequisite(s): PSC 101.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

PSC 120 – Agent-Based Modeling (4 units)

Course Description: Introduction to agent-based computer simulation and analysis with emphasis on learning how to model animals, including humans, to achieve insight into social and group behavior.

Prerequisite(s): PSC 100 and/or PSC 101 recommended.

Learning Activities: Lecture/Lab 4 hour(s).

Enrollment Restriction(s): Limited to 24 students.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

PSC 121 – Physiological Psychology (4 units)

Course Description: Relationship of brain structure and function to behavior, motivation, emotion, language, and learning in humans and other animals. An introduction to the methodology of physiological psychology and neuroscience.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; PSC 101.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 108.

Grade Mode: Letter.

PSC 122 – Advanced Animal Behavior (4 units)

Course Description: Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals

Prerequisite(s): PSC 101 or NPB 102.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 150.

Cross Listing: NPB 150.

Grade Mode: Letter.

PSC 123 – Hormones & Behavior (3 units)

Course Description: Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress.

Prerequisite(s): NPB 101; (PSC 101 or NPB 102).

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 152.

Cross Listing: NPB 152.

Grade Mode: Letter.

PSC 124 – Comparative Neuroanatomy (3 units)

Course Description: Overview of the neuroanatomy in mammalian vertebrates, focusing on the cerebral cortex and experimental techniques. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations.

Prerequisite(s): NPB 100 or NPB 101 or NPB 110B or PSC 121.

Learning Activities: Lecture 3 hour(s).

Cross Listing: NPB 124.

Grade Mode: Letter.

PSC 124L – Comparative Neuroanatomy Laboratory (2 units)

Course Description: Comparative neuroanatomy laboratory illustrating modern neuroanatomical techniques in determining neural connections within the mammalian brain. Includes experimentation and presentation of results.

Prerequisite(s): PSC 124 (can be concurrent).

Learning Activities: Laboratory 6 hour(s).

Enrollment Restriction(s): Pass One restricted to PSC and NPB majors; must be concurrently enrolled in PSC 124.

Cross Listing: NPB 124L.

Grade Mode: Letter.

PSC 125 – Behavioral Epigenetics (4 units)

Course Description: Review of basic principles in genetics and epigenetics with emphasis on behavior. Introduction to the use of modern molecular methods in understanding the complex relationships between genes, environment, and behavior.

Prerequisite(s): PSC 101.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

PSC 126 – Health Psychology (4 units)

Course Description: Psychological factors influencing health and illness. Topics include stress and coping, personality and health, symptom perception and reporting, heart disease, cancer, compliance, and health maintenance and promotion.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; PSC 101 recommended.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 160.

Grade Mode: Letter.

PSC 130 – Human Learning & Memory (4 units)

Course Description: Consideration of major theories of human learning and memory with critical examination of relevant experimental data.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 012Y or STA 013 or STA 013Y or STA 100); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

PSC 131 – Perception (4 units)

Course Description: Cognitive organizations related to measurable physical energy changes mediated through sensory channels. Perception of objects, space, motion, events.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 100Y or PSC 135).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

PSC 132 – Language & Cognition (4 units)

Course Description: Introduction to the cognitive processes involved in language comprehension and production. Topics include the biological foundations of language, speech perception, word recognition, syntax, reading ability, and pragmatics.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 100Y or PSC 135); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Writing Experience (WE).

PSC 133 – Neuroeconomics/Reinforcement Learning & Decision Making (4 units)

Course Description: Theoretical and empirical approaches to neuroeconomics (neuroscience of decision making) from psychology, neuroscience, economics, and computer science. Neuroscience of judgment and decision making, behavioral economics, and reinforcement learning.

Prerequisite(s): (PSC 100 or PSC 100Y or PSC 135 or ARE 100A or ECN 100A or NPB 162 or NPB 163); (STA 013 or STA 013Y or STA 100 or PSC 103A); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: ECN 107, CGS 107.

Grade Mode: Letter.

General Education: Social Sciences (SS); Scientific Literacy (SL).

PSC 134 – Computational Cognitive Neuroscience (4 units)

Course Description: Explorations of how brain secretes mind, via computer simulations that are manipulated and probed to investigate how neurons produce perception, attention, memory, language, and cognitive control.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 100 or PSC 101 or PSC 135 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 2 hour(s).

Cross Listing: CGS 134.

Grade Mode: Letter.

PSC 135 – Cognitive Neuroscience: The Biological Foundations of the Mind (4 units)

Course Description: Neuroscientific foundations of higher mental processes including attention, memory, language, higher-level perceptual and motor processes, and consciousness. Emphasis on the neural mechanisms which form the substrates of human cognition and the relationship of mind to brain. May be taught abroad.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; or consent of instructor; PSC 101 or PSC 121 recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

PSC 136 – Psychology of Music (4 units)

Course Description: Introduction to the mental and neural representations of musical structures and processes involved in perceiving, remembering, and performing music. Music and emotion.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 100Y or PSC 135 or MUS 006C); or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Writing Experience (WE).

PSC 137 – Neurobiology of Learning & Memory (4 units)

Course Description: Overview of the neural basis of learning and memory focusing on modern behavioral neuroscience research with animals.

Topics include consolidation, neural plasticity, cellular competition for memory storage, and the role of neurogenesis in learning.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; PSC 101.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

PSC 138 – Consciousness & Cognition (4 units)

Course Description: Current theoretical and empirical evidence in the study of cognition and consciousness. Theories of consciousness, psychological and neural basis of conscious and unconscious processes such as attention, intentionality, and dreams.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 100Y or PSC 135).

Learning Activities: Lecture 4 hour(s).

Cross Listing: CGS 138.

Grade Mode: Letter.

PSC 139 – Advanced Cognitive Neuroscience (4 units)

Course Description: Advanced integrative survey of cognitive neuroscience, including perception, attention, memory, and navigation. Emphasis on reviewing literature in psychology, neuroscience, and statistics; understanding methods in cognition; and presentation skills.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; PSC 135; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Scientific Literacy (SL).

PSC 140 – Developmental Psychology (4 units)

Course Description: An ontogenetic account of human behavior through adolescence with emphasis on motor skills, mental abilities, motivation, and social interaction.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Only 2 units of credit allowed to students who have completed HDE 100A or HDE 100B; not open for credit to students who have completed PSC 112. (Former PSC 112.)

Grade Mode: Letter.

PSC 140V – Developmental Psychology (4 units)

Course Description: Ontogenetic account of human behavior through adolescence with emphasis on motor skills, mental abilities, motivation, and social interaction.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Only 2 units of credit allowed to students who have completed HDE 100A or HDE 100B; not open for credit to students who have completed PSC 112. (Former PSC 112.)

Grade Mode: Letter.

PSC 140Y – Developmental Psychology (4 units)

Course Description: Ontogenetic account of human behavior through adolescence with emphasis on motor skills, mental abilities, motivation, and social interaction.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Discussion 1 hour(s), Lecture 1.50 hour(s), Web Virtual Lecture.

Enrollment Restriction(s): Pass One open to Psychology Majors.

Credit Limitation(s): Only 2 units of credit allowed to students who have completed HDE 100A or HDE 100B; not open for credit to students who have completed PSC 112. (Former PSC 112.)

Grade Mode: Letter.

PSC 141 – Cognitive Development (4 units)

Course Description: Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language.

Prerequisite(s): PSC 140 or PSC 140Y or PSC 140V or HDE 100B or HDE 100A or HDE 100AV.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have taken HDE 101.

Grade Mode: Letter.

General Education: Writing Experience (WE).

PSC 142 – Social & Personality Development (4 units)

Course Description: Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors.

Prerequisite(s): PSC 140 or PSC 140Y or PSC 140V or HDE 100A or HDE 100AV or HDE 100B.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Psychology majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

PSC 143 – Infant Development (4 units)

Course Description: Psychological development in infancy. Topics include physical and motor development, sensory and nervous system development, and memory and cognitive development. Emphasis will be on evaluating theories, empirical research, and experimental methods for understanding infant development.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 140 or PSC 140Y or PSC 140V or HDE 100A or HDE 100AV).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

PSC 145 – Developmental Cognitive Neuroscience (4 units)

Course Description: Neuroscientific theories and methods (EEG, ERP, fNIRS, fMRI) that inform an understanding of behavioral and cognitive development over infancy and childhood. Neurodevelopmental correlates of perception, action, language, and social cognition; value of the neuroscientific perspective; limitations and challenges of neuroscientific research in the developmental context.

Prerequisite(s): PSC 135 or ((PSC 140 or PSC 140Y or PSC 140V or HDE 100A or HDE 100B); (PSC 101 or PSC 121 or NPB 161 or HDE 163)); PSC 141 recommended.

Learning Activities: Lecture 2.50 hour(s), Discussion 1.50 hour(s).

Enrollment Restriction(s): Pass One open to Psychology and Cognitive Science Majors.

Grade Mode: Letter.

General Education: Scientific Literacy (SL).

PSC 146 – The Development of Memory (4 units)

This version has ended; see updated course, below.

Course Description: Theory and research on memory development with focus on infancy and childhood.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; and any Psychology upper division course from Core Group A or D.

Learning Activities: Lecture 3 hour(s), Term Paper 1 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 133.

Grade Mode: Letter.

General Education: Writing Experience (WE).

PSC 146 – The Development of Memory (4 units)

Course Description: Theory and research on memory development with focus on infancy and childhood.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 140 or PSC 140Y or PSC 140V or PSC 141 or PSC 142 or PSC 100 or PSC 130).

Learning Activities: Lecture 3 hour(s), Term Paper 1 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 133.

Grade Mode: Letter.

General Education: Writing Experience (WE).

This course version is effective from, and including: Fall Quarter 2024.

PSC 148 – Developmental Disorders (4 units)

Course Description: Current scientific knowledge of the influences of biological, cognitive, and environmental factors on the emergence of disorders with onset in childhood. Examples include autism spectrum, ADD/ADHD, dyslexia and dyscalculia. Emphasis placed on understanding these disorders, their causes and their treatments.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 140 or PSC 140Y or PSC 141 or HDE 100A or HDE 100AV or HDE 100B).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

PSC 150 – Relationship Science: Lust, Love, & Evolution (4 units)

Course Description: Evolutionary perspectives on attraction and close relationships. Integrating social psychological and evolutionary theories with empirical evidence pertaining to human mating.

Prerequisite(s): PSC 001 or PSC 001Y; PSC 041 recommended.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PSC 051.

Grade Mode: Letter.

General Education: Social Sciences (SS) or Science & Engineering (SE).

PSC 150V – Relationship Science: Lust, Love, & Evolution (4 units)

Course Description: Evolutionary perspectives on attraction and close relationships. Integrating social psychological and evolutionary theories with empirical evidence pertaining to human mating.

Prerequisite(s): PSC 001 or PSC 001Y; PSC 041 recommended.

Learning Activities: Web Virtual Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PSC 051.

Grade Mode: Letter.

General Education: Social Sciences (SS) or Science & Engineering (SE).

PSC 151 – Social Psychology (4 units)

Course Description: Behavior of the individual in the group. Examination of basic psychological processes in social situations, surveying various problems of social interaction: group tensions, norm-development, attitudes, values, public opinion, status.

Prerequisite(s): PSC 001 or PSC 001Y, PSC 041 recommended.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 145.

Grade Mode: Letter.

General Education: Domestic Diversity (DD).

PSC 151V – Social Psychology (4 units)

Course Description: Behavior of the individual in the group. Examination of basic psychological processes in social situations, surveying various problems of social interaction: group tensions, norm-development, attitudes, values, public opinion, status.

Prerequisite(s): PSC 001 or PSC 001Y and PSC 041 recommended.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 145.

Grade Mode: Letter.

General Education: Domestic Diversity (DD).

PSC 152 – Social Cognition (4 units)

Course Description: Examines how social factors influence how we attend to, encode, and process information and how these mental processes affect subsequent judgments and behavior.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

PSC 153 – Psychology & Law (4 units)

Course Description: Current theoretical and empirical issues in the study of psychology and law. Topics include eyewitness testimony, child abuse, jury decision making, juvenile delinquency and criminology, prediction of violence, insanity defense, and memory for traumatic events.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 115.

Grade Mode: Letter.

PSC 154 – Psychology of Emotion (4 units)

Course Description: Introduction to current theories and research on emotion and bodily feelings with special reference to self-knowledge.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Grade Mode: Letter.

PSC 154V – Psychology of Emotion (4 units)

Course Description: Introduction to current theories and research on emotion and bodily feelings with special reference to self-knowledge.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 1 hour(s).

Grade Mode: Letter.

PSC 157 – Stereotyping, Prejudice, & Stigma (4 units)

Course Description: Social psychological underpinnings of stereotyping, prejudice, and stigma from sociocultural, motivational, and cognitive perspectives. Topics include: origins, maintenance, change, effects on person perception and memory, and the automaticity/controllability of stereotyping and prejudice.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Domestic Diversity (DD).

PSC 158 – Sexual Orientation & Prejudice (4 units)

Course Description: Current scientific knowledge about sexual orientation and prejudice based on sexual orientation. Emphasis is placed on learning the skills necessary for a critical understanding of science and public policy issues relevant to sexuality.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

PSC 159 – Gender & Human Reproduction (4 units)

Course Description: Psychology of reproduction. Reproductive events over the course of an individual's life, including sexual development, mate choice, relationships, and reproduction. Biological and social psychological explanations at the levels of mechanism and evolutionary function.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 149. (Former PSC 149.)

Grade Mode: Letter.

PSC 161 – Psychology of the Self (4 units)

Course Description: Psychological theory and research on the self. Topics include: self-knowledge, self-esteem, self-regulation, self-presentation, cognitive and emotional aspects of the self, and the role of the self in shaping social interaction.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

PSC 162 – Introduction to Personality Psychology (4 units)

Course Description: Scientific study of personality. Methods of personality research. Overview of current research and theory in the field of personality psychology. May be taught abroad.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed former PSC 147.

Grade Mode: Letter.

General Education: Social Sciences (SS).

PSC 165 – Introduction to Clinical Psychology (4 units)

Course Description: Major theoretical formulations in the history of clinical psychology, from classical psychoanalysis to contemporary existentialism and behavior modification. Survey based on lectures, films, and tapes, of what clinical psychologists do, including methods of appraisal, professional roles, and approaches to treatment.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

PSC 168 – Mental Health, Mental Illness, & Problems in Living (4 units)

Course Description: Overview of psychological disorders and psychological conditions that lead to problems in daily living, with consideration of causes, classification systems, and treatment.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

PSC 169 – The Science of Multi-Cultural Psychology (4 units)

Course Description: Effects of culture and ethnicity on psychological processes, such as social cognition, emotion, motivation, personality, self-concept, and interpersonal behavior (i.e., how culture makes who you are). Individuals' construction of multicultural identity and experiences.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Domestic Diversity (DD).

PSC 170 – Psychology of Religion (4 units)

Course Description: Major theories, issues, data, and research methodologies of the psychology of religion. Religious experience and expression; religious development in childhood, adolescence, and adulthood; conversion; religious influences on physical and mental health; cross-cultural perspectives.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

PSC 175 – Genius, Creativity, & Leadership (4 units)

Course Description: Phenomenon of genius is examined from a diversity of theoretical, methodological, and disciplinary perspectives, with an emphasis on outstanding creativity and leadership in art, music, literature, philosophy, science, war, and politics.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; or equivalents, or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

PSC 180A – Research in Cognitive & Perceptual Psychology (4 units)

Course Description: Empirical research on selected topics in general experimental psychology (general research design and analysis, perception, cognition, cognitive development, etc.). Specific content will vary from quarter to quarter.

Prerequisite(s): PSC 041; four upper division Psychology courses and consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

PSC 180B – Research in Psychobiology (4 units)

Course Description: Empirical research on selected topics in psychobiology (animal learning, animal behavior, physiological and sensory psychology, developmental psychobiology, computer modeling of neural systems). Content varies.

Prerequisite(s): PSC 101; three additional upper division Psychology courses and consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

PSC 180C – Research in Personality & Social Psychology (4 units)

Course Description: Empirical research on selected topics in personality and social psychology (personality, social psychology, organizational psychology, etc.). Content will vary from quarter to quarter.

Prerequisite(s): PSC 041; four upper division Psychology courses and consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

PSC 180D – Research in Developmental Psychology (4 units)

Course Description: Empirical research on selected topics in developmental psychology (research design and analysis, development, cognitive development, social and personality development etc.).

Prerequisite(s): PSC 041; consent of instructor; Four upper division Psychology courses.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

PSC 182 – Methods in Laboratory Research (4 units)

Course Description: Training in specific lab-based research methods coupled with hands-on experience in a research lab. Students assessed on their ability report and interpret research findings. Content varies from quarter to quarter.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 4 hour(s).

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

PSC 185 – History of Psychology (4 units)

Course Description: Development of psychological thought and research in context of history of philosophy and science.

Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One open to Psychology majors.

Credit Limitation(s): Not open for credit to students who have completed PSC 120. (Former PSC 120.)

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

PSC 190 – Seminar in Psychology (4 units)

Course Description: Intensive treatment of a special topic or problem of psychological interest.

Prerequisite(s): Junior or senior standing; major in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

PSC 190X – Upper Division Seminar (1-2 units)

Course Description: In-depth examination at an upper division level of a special topic in Psychology. Emphasis on student participation in learning. May not be repeated for credit.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Seminar 1-2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

PSC 192 – Fieldwork in Psychology (1-6 units)

Course Description: Supervised internship off and on campus, in community and institutional settings. Maximum of 6 units may be used towards satisfaction of upper division major requirement.

Prerequisite(s): Consent of instructor; upper division standing in Psychology.

Learning Activities: Fieldwork 1-6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 1 time(s) per internship site.

Grade Mode: Pass/No Pass only.

PSC 194HA – Special Study for Honors Students (3 units)

Course Description: Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor.

Prerequisite(s): Consent of instructor; senior standing in Psychology and qualifications for admission into college honors program; at least one course from PSC 180A, PSC 180B, PSC 180C or PSC 199 strongly recommended.

Learning Activities: Independent Study 9 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

PSC 194HB – Special Study for Honors Students (3 units)

Course Description: Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor.

Prerequisite(s): PSC 194HA; consent of instructor; senior standing in Psychology and qualifications for admission into college honors program; completion of PSC 194HA required.

Learning Activities: Independent Study 9 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

PSC 197T – Tutoring in Psychology (1-3 units)

Course Description: Intended for advanced undergraduate students who will lead discussion sections in Psychology courses.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Tutorial 1-3 hour(s).

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Pass/No Pass only.

PSC 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PSC 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

PSC 200 – Proseminar in Psychology (3 units)

Course Description: Introduces matriculating graduate students to research activities of departmental faculty.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 2 hour(s), Independent Study 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 201 – Research Preceptorship (4 units)

Course Description: Research preceptorship.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory 4 hour(s), Discussion 5 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 202 – Research Seminar (1 unit)

Course Description: Presentation of graduate research to program faculty and graduate students.

Prerequisite(s): Graduate standing in Psychology.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 204A – Statistical Analysis of Psychological Experiments (5 units)

Course Description: Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Analysis of variance, factorial and repeated measures, and tests of trends.

Prerequisite(s): STA 102; or equivalent; graduate standing in Psychology or consent of instructor.

Learning Activities: Lecture 4 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PSC 206.

Grade Mode: Letter.

PSC 204B – Causal Modeling of Correlational Data (5 units)

Course Description: Examination of how to make causal inferences from correlational data in the behavioral sciences. Emphasis is on testing rival causal models using correlations among observed variables. Beginning with multiple regression analysis, discussion advances to path analysis and related techniques.

Prerequisite(s): PSC 204A; or the equivalent course and graduate standing in Psychology or consent of instructor.

Learning Activities: Lecture 4 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PSC 207A.

Grade Mode: Letter.

PSC 204D – Advanced Statistical Inference from Psychological Experiments (5 units)

Course Description: Advanced topics in statistical inference, which may include probability theory, sampling distributions, statistical inference and hypothesis testing, nonparametric statistics, Bayesian approaches, and advanced issues in analysis of variance.

Prerequisite(s): PSC 204A; or the equivalent; graduate standing in Psychology or consent of instructor.

Learning Activities: Lecture 4 hour(s), Laboratory 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PSC 205.

Grade Mode: Letter.

PSC 205A – Applied Multivariate Analysis of Psychological Data (4 units)

Course Description: Review of the major methods of multivariate data analysis for psychological data. Students will program statistical routines using a linear algebra-based computing language. Topics will include multivariate analysis of variance, discriminant analysis, canonical analysis, factor analysis, and component analysis.

Prerequisite(s): PSC 204A; PSC 204B; PSC 204D; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PSC 207B. (Former PSC 207B.)

Grade Mode: Letter.

PSC 205B – Factor Analysis (4 units)

Course Description: Theory and methods of factor analysis, including exploratory factor analysis, confirmatory factor analysis, and principal component analysis.

Prerequisite(s): PSC 204A; PSC 204B; or equivalent courses, or consent of instructor; graduate standing.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

PSC 205C – Structural Equation Modeling (4 units)

Course Description: Theory and methods of structural equation modeling, including path analysis, confirmatory factor analysis, multiple-group modeling and latent growth curve modeling.

Prerequisite(s): PSC 204A; PSC 204B; or equivalent courses, or consent of instructor; graduate standing.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

PSC 205D – Multilevel Models (4 units)

Course Description: Introduction to statistical techniques for the analysis of normal, hierarchically structured data, such as cross-sectional clustered data or repeated-measures data. Topics include hierarchical linear models, latent growth curve models, and how these methods handle unbalanced and/or missing data.

Prerequisite(s): PSC 204A; graduate standing or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

PSC 205E – Applied Psychometrics & Measurement Theory (4 units)

Course Description: Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis, and latent trait theory.

Prerequisite(s): PSC 204A; graduate standing in Psychology or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PSC 204 or PSC 204C.

Grade Mode: Letter.

PSC 205F – Item Response Theory (4 units)

Course Description: Item response theory allows for the creation of precise measurement instruments in psychological testing. Review Classical Test Theory, and then cover basic IRT models through advanced applications.

Prerequisite(s): PSC 204A; or the equivalent; graduate standing in Psychology or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

PSC 205G – Applied Longitudinal Data Analysis (4 units)

Course Description: Modeling and understanding of intraindividual change and interindividual differences in change. Reviews conventional methods and introduces contemporary techniques for modeling intraindividual change.

Prerequisite(s): PSC 204A; graduate standing in Psychology or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

PSC 205H – Applied Bayesian Statistics for Social Scientists (3 units)

Course Description: Bayesian methodology and inference for social scientists. Basics of probability theory, Bayes' theorem, inference and model checking, discussion of common distributions, sampling approaches, Bayes factors for hypothesis testing and introduction to dedicated software.

Prerequisite(s): PSC 204B; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

PSC 206A – Theoretical Foundations: Research Methods in Psychology (4 units)

Course Description: Examines the philosophy and research practices underlying experimental psychology. Topics to be covered include philosophy of science/epistemology, research design, inference and bias in research, theory development, validity, the social context of research, and critical thinking about research.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate student status.

Grade Mode: Letter.

PSC 206B – Research Methods in Psychology: Applications in Social-Personality Research (4 units)

Course Description: Overview of the research designs, assessment methods, and statistical procedure used by social-personality psychologists. Focus on the practical issues that arise when using each method in specific research contexts.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate student status.

Grade Mode: Letter.

PSC 207 – Survey & Questionnaire Research Methods (4 units)

Course Description: Survey and questionnaire research methods with emphasis on how to ask questions. Cognitive, motivational, and social processes that influence how respondents answer questions; sampling techniques; Internet resources; practical aspects of fielding survey and questionnaire research.

Prerequisite(s): Completion of a course on social or behavioral research methods; graduate standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

PSC 208 – Physiological Psychology (4 units)

Course Description: A conceptual analysis of the contributions of neuroanatomy, neurophysiology and neurochemistry to an understanding of animal and human behavior.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

PSC 208A – Fundamentals of Human Electrophysiology (4 units)

Course Description: In-depth introduction and hands-on experience with the event-related potential (ERP) method in the study of attention, executive control, memory, language and social cognitive neuroscience.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1.50 hour(s), Laboratory 3 hour(s), Extensive Problem Solving 1.50 hour(s), Project (Term Project) 3 hour(s).

Enrollment Restriction(s): Restricted to 15 students.

Grade Mode: Letter.

PSC 209A – Introduction to Programming: Matlab (4 units)

Course Description: The Matlab programming environment as a means of organizing, analyzing, and visualizing scientific data. Basic programming concepts such as variables, loops, conditional branching, and efficient programming techniques will be emphasized.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Lab 3 hour(s).

Grade Mode: Letter.

PSC 210 – Fundamentals of Cognitive Neuroimaging (3 units)

Course Description: Introduction to empirical foundations and methodology of neuroimaging, emphasizing pragmatics of functional magnetic resonance imaging (fMRI) to study cognition. Topics include MR physics, the relationship between neural activity and the BOLD response, experimental design, and analysis of fMRI data.

Prerequisite(s): Basic knowledge of inferential statistics and experimental Psychology.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

PSC 211 – Advanced Topics in Neuroimaging (3 units)

Course Description: Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG.

Prerequisite(s): PSC 210; or consent of instructor.

Learning Activities: Seminar 2 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to 16 students.

Repeat Credit: May be repeated when topics differ.

Cross Listing: NSC 211, NPB 211.

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 212A – Developmental Psychology: Cognitive & Perceptual Development (4 units)

Course Description: Theories and empirical findings concerning human cognitive and perceptual development. Development of perception, memory, concepts (e.g., theory of mind, concepts about number), problem solving, and language from infancy to adolescence.

Prerequisite(s): Graduate standing or consent of instructor; completion of an undergraduate or graduate course on developmental psychology or human development.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

PSC 212B – Developmental Psychology: Social, Emotional, & Personality Development (4 units)

Course Description: Theories and empirical findings concerning human social, emotional, and personality development. Development of emotions, moral reasoning and behavior, personality, self-concept, and social cognition from infancy to adolescence (may include adulthood).

Prerequisite(s): Graduate standing or consent of instructor; completion of an undergraduate or graduate course on developmental psychology or human development.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

PSC 217 – Behavioral Genetics (4 units)

Course Description: Review basic principles in genetics and select topics in molecular genetics with emphasis on behavior. Use of modern molecular methods to outline complex relationships between genes, environment, and behavior.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to 20 students.

Credit Limitation(s): Not open for credit to students who have completed PSC 251.

Grade Mode: Letter.

PSC 218A – Fundamentals of Animal Behavior (5 units)

Course Description: Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science.

Prerequisite(s): Consent of instructor; upper division undergraduate introduction to the biology of behavior, such as PSC 101, PSC 122, PSC 123, NPB 102, NPB 150, NPB 152, WFC 141, ENT 104, or ANS 105.

Learning Activities: Lecture/Discussion 4 hour(s), Discussion 1 hour(s).

Cross Listing: ANB 218A.

Grade Mode: Letter.

PSC 218B – Fundamentals of Animal Behavior (5 units)

Course Description: Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science.

Prerequisite(s): PSC 209A; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s), Discussion 1 hour(s).

Cross Listing: ANB 218B.

Grade Mode: Letter.

PSC 220 – History of Psychology (4 units)

Course Description: A lecture-seminar on the history of psychology and on the applicability of early psychological theory and research to contemporary investigations.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Lecture 2 hour(s), Seminar 2 hour(s).

Grade Mode: Letter.

PSC 221 – Academic Writing in Psychology (4 units)

Course Description: Strategies for developing and honing academic writing skills and writing productivity, with a particular focus on how to write a clear and compelling empirical journal article in psychology.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) with consent of instructor when focus is on a substantially different writing project.

Grade Mode: Letter.

PSC 230 – Cognitive Psychology (4 units)

Course Description: Analysis of the mental processes by which knowledge is acquired, manipulated, stored, retrieved and used.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

PSC 231 – Sensation & Perception (4 units)

Course Description: Analysis of the role of sensory processes and perception in experience and their effects on behavior.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

PSC 241 – Attitudes & Social Influence (4 units)

Course Description: Survey of theory and research in the field of attitudes and social influence. Topics include attitude definition and measurement, major theories of attitude formation and change, the relationship between attitudes and behavior, and recent directions and controversies.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

PSC 242 – Attraction & Close Relationships (4 units)

Course Description: Social psychological theory and research on attraction and close relationships, with a particular emphasis on romantic relationships. Covers attachment theory, interdependence theory, and evolutionary psychological perspectives.

Prerequisite(s): Graduate standing in Psychology, Sociology, Human Development, a related social science, or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

PSC 243 – Social Cognition (4 units)

Course Description: Processes underlying the perception, memory, and judgment of social stimuli, the effects of social and affective factors on cognition, and the interpersonal consequences of those processes. Topics include automaticity/control, motivated cognition, person perception, stereotyping, attitudes, and persuasion.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

PSC 244 – Stereotyping, Prejudice, & Stigma (4 units)

Course Description: Examines the social psychological underpinnings of stereotyping, prejudice, and stigma, including sociocultural, motivational, and cognitive factors.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

PSC 245 – Social Psychology (4 units)

Course Description: Theory and research in social psychology.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

PSC 247 – Personality (4 units)

Course Description: Theory and research in human personality.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

PSC 251 – Topics in Genetic Correlates of Behavior (4 units)

Course Description: Theory and experiment in the genetic contributions to animal and human behavior.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

PSC 252 – Topics in Psychobiology (4 units)

Course Description: Critical study in a selected area of psychobiology.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

PSC 261 – Cognitive Neuroscience (4 units)

Course Description: Graduate core course for neuroscience.

Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence.

Prerequisite(s): Graduate student standing in Psychology or Neuroscience or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: NSC 223.

Grade Mode: Letter.

PSC 263 – Topics in Cognitive Psychology (4 units)

Course Description: Selected topics in language processing, memory, perception, problem solving, and thinking, with an emphasis on the common underlying cognitive processes.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

PSC 264 – Topics in Psycholinguistics (4 units)

Course Description: Discussion of fundamental issues in the psychology of language.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

PSC 270 – Topics in Personality & Social Psychology (4 units)

Course Description: Critical study of a selected area of personality or social psychology.

Prerequisite(s): Graduate student standing or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated when content differs.

Grade Mode: Letter.

PSC 271A – Core Concepts & Methods in Learning, Memory, & Plasticity (2 units)

Course Description: Core concepts and methods used in studies of learning, memory and plasticity. Behavioral paradigms and measurement approaches in human and animal studies of learning and plasticity, as well as a consideration of the functional, anatomical and neuronal mechanisms underlying brain plasticity.

Prerequisite(s): Graduate Standing or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NSC 271A, NPB 271A.

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 271B – Core Concepts & Methods in Learning, Memory, & Plasticity (2 units)

Course Description: Core concepts and detailed survey methods used in studies of learning, memory and plasticity, from the cellular and molecular level to the level of neural circuits. Areas of learning, memory, and plasticity research where recent progress has been made in linking across these levels of analysis.

Prerequisite(s): PSC 271A or NPB 271A or NSC 271A.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NSC 271B, NPB 271B.

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 271C – Translational Approaches to Learning, Memory, & Plasticity Disorders (2 units)

Course Description: Neurological disorders, the effect of these disorders on learning, memory and plasticity, approved therapeutic options and current research designed to improve understanding and treatment of these diseases: (i) the clinical presentation, diagnostic criteria, and existing therapies, (ii) mechanistic studies in humans and animal models, and (iii) molecular pathways involved in the disease and approaches for drug discovery.

Prerequisite(s): PSC 271B or NPB 271B or NSC 271B.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: NSC 271C, NPB 271C.

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 272 – Topics in Developmental Psychology (4 units)

Course Description: Selected topics in developmental psychology, including developmental neuroscience, memory development, infancy, cognitive development, social development, child maltreatment, children and law, perceptual development, emotional development, children at risk, and adolescence, with emphasis on developmental processes and developmental theory.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

PSC 289A – Current Research in Psychology (2 units)

Course Description: Contemporary theory and empirical research in specialized topics in psychology. Topics include developmental attachment, social neuroscience, mental health, emotion, sexual orientation and identity.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

PSC 289B – Current Research in Psychology (2 units)

Course Description: Intensive examination of contemporary theory and empirical research on a specialized topic in psychology. Sample topics include developmental attachment, social neuroscience, culture and mental health, electrophysiology and cognitive neuroscience, emotion, implicit cognitive processes, sexual orientation and identity, and attention.

Prerequisite(s): PSC 289A; graduate standing in Psychology or consent of instructor.

Learning Activities: Discussion 2 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

PSC 290 – Seminar (4 units)

Course Description: Seminar devoted to a highly specific research topic in any area of basic psychology. Special topic selected for a quarter will vary depending on interests of instructor and students.

Prerequisite(s): Graduate standing in Psychology or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

PSC 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 299D – Dissertation Research (1-12 units)

Course Description: Dissertation research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 390 – The Teaching of Psychology (4 units)

Course Description: Methods and techniques of teaching undergraduate psychology. Integration of learning outcomes with effective evaluation. Practical experience in the application of pedagogical principles.

Prerequisite(s): Consent of instructor; advanced graduate standing in Psychology or a closely related discipline.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 390A – The Teaching of Psychology (6 units)

Course Description: Methods and problems of teaching psychology at the undergraduate and graduate levels; curriculum design and evaluation. Practical experience in the preparation and presentation of material.

Prerequisite(s): Consent of instructor; advanced graduate standing in Psychology or a closely related discipline.

Learning Activities: Lecture 6 hour(s), Discussion 6 hour(s), Practice 6 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 390B – The Teaching of Psychology (4 units)

Course Description: Methods and problems of teaching psychology at the undergraduate and graduate levels; curriculum design and evaluation.

Practical experience in the preparation and presentation of material.

Prerequisite(s): Consent of instructor; advanced graduate standing in Psychology or a closely related discipline.

Learning Activities: Discussion 6 hour(s), Lecture 4 hour(s), Practice 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 391 – Teaching of Psychology Practicum (4 units)

Course Description: Supervised teaching in undergraduate classrooms.

Techniques for delivering content through lectures, discussions, or labs; course administration; communications; assessment of student learning; solving ethical problems; instructional technology.

Prerequisite(s): PSC 390; or consent of instructor.

Learning Activities: Seminar 1 hour(s), Fieldwork.

Grade Mode: Satisfactory/Unsatisfactory only.

PSC 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Public Health Sciences (SPH)**School of Medicine****SPH 092 – Internship in Community Health (1-12 units)**

Course Description: Students apply theory and concepts learned in the classroom through field work in a community health agency.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

SPH 099 – Research in Community & International Health (1-12 units)

Course Description: Work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics.

Prerequisite(s): Consent of instructor; undergraduate standing.

Learning Activities: Variable 3-35 hour(s).

Repeat Credit: May be repeated 12 unit(s) with consent of instructor.

Grade Mode: Pass/No Pass only.

SPH 101 – Introduction to Public Health (3 units)

Course Description: Provide basic concepts and controversies in public health, basic science of public health, social and behavioral factors in health and disease, environmental and occupational health issues, the relationship of public health to the medical care system and health care reform.

Prerequisite(s): Undergraduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

SPH 102 – Introduction to Human Epidemiology (4 units)

Course Description: Practice of epidemiology as it relates to human populations. Content is fundamental to the Public Health minor and a required core course.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SPH 103 – Introduction to Health Economics, Services, Policy, Administration & Management (3 units)

Course Description: American health care system and how public health leaders, administrators, and researchers can make effective contributions to the populations served.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Pass One restricted to undergraduates in senior standing.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

SPH 104 – Globalization & Health: Evidence & Policies (3 units)

Course Description: Provides an overview of the evidence on the multiple effects of globalization policies on health.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

SPH 106 – Intermediate Human Epidemiology (4 units)

Course Description: Principles of epidemiological methods including causal inference, sources of bias such as confounding, effect measure modification, screening, and interpreting statistical tests of significance. Ethics and history of epidemiology.

Prerequisite(s): NUT 113 C or better or GDB 101 C or better or SPH 102 C or better.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SPH 107V – Foundations of Epidemiology (4 units)

Course Description: Foundations of epidemiology. Distribution and determinants of disease and injury in populations. Practice of epidemiology as it relates to human populations. Relationship of epidemiology to public health.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open to students who took SPH 102 or equivalent course from their institution.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SPH 108 – Introduction to Program Planning & Evaluation (3 units)

Course Description: Appropriate techniques of community assessment, planning strategies, data collection, data analysis & evidence-based decision-making.

Learning Activities: Learning/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SPH 109 – History of Epidemiology in Public Health (2 units)

Course Description: Historic events in public health and the epidemiology that paved the way for disease control and prevention.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Domestic Diversity (DD).

SPH 111 – Evaluation & Research Methods in Public Health (3 units)

Course Description: Evaluation of programs for professionals in the healthcare, social science, economic and business fields. Evaluations to be conducted for both internal and external purposes.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SPH 113 – Health Disparities in the U.S. (3 units)

Course Description: Introduction to the principles and practice of health disparities research.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

SPH 114 – Air Pollution & Chemicals in the Environment (3 units)

Course Description: Air pollution and chemicals in our environment, covering relevant tools through a series of case studies. Air pollution, environmental justice issues related to air pollution, including variability in exposure across cities, and the increased impacts of air pollution on individuals. Regulations, interventions to reduce exposure, estimating health burden, and the impacts of climate change.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Restricted to upper division students.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SPH 120 – Introduction to Health Informatics (3 units)

Course Description: Introduction to concepts of health informatics and the impacts of the field on healthcare, research and public health.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SPH 121 – Health Informatics Systems (3 units)

Course Description: Health Informatics with a focus on Information Technology. Data gathering, manipulating, storing, retrieving, and classifying.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 1.5 hour(s), Laboratory 1.5 hour(s), Project.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SPH 122 – Data Organization & Visualization in Health Informatics (3 units)

Course Description: Approaches to organizing and representing health data with a focus on visualization. Components of health data, visualization tools, methods and users for decision-making and analysis.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 1.5 hour(s), Laboratory 1.5 hour(s), Extensive Problem Solving, Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SPH 132 – Health Issues Confronting Asian Americans & Pacific Islanders (4 units)

Course Description: Health issues confronting Asian Americans & Pacific Islanders.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: ASA 132.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SPH 160 – General Health Education & Prevention (5 units)

Course Description: Topics include addiction, substance abuse/prevention, nutrition, stress management, physical fitness, body image, reproductive anatomy & physiology, contraceptive options, safer sex, sexual health, healthy relationships, and other general wellness/health promotion topics. Practice in peer counseling and outreach presentations.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to students in the internship program for the Health Education Program only; limited to 50 students.

Grade Mode: Pass/No Pass only.

SPH 161 – Campus Alcohol/Other Drug Abuse Prevention Program Peer Educator Training (4 units)

Course Description: Preparation for internship in campus and community substance abuse prevention and educational intervention. Addiction and other physiological responses to alcohol and other drugs. Harm-reduction strategies for individuals and target populations. Practice in peer counseling skills and outreach presentations to groups.

Prerequisite(s): SPH 160 (can be concurrent); and consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Practice 1 hour(s).

Grade Mode: Pass/No Pass only.

SPH 162 – Health Advocates Peer Educator Training (4 units)

Course Description: Preparation for internship in campus and community health promotion and risk reduction. Nutrition, stress management, physical fitness, body image and disordered eating, skin cancer prevention, and other general wellness/health promotion topics.

Prerequisite(s): SPH 160 (can be concurrent); and consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Practice 1 hour(s).

Grade Mode: Pass/No Pass only.

SPH 180 – Gun Violence: An Interdisciplinary Perspective (2 units)

Course Description: Interdisciplinary approach to understanding the causes, consequences and prevention of gun violence.

Prerequisite(s): Required to read and interpret quantitative studies; previous coursework involving research design or data analysis, such as ECN 102 or SPH 102, highly recommended.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SPH 190 – Topics in Public Health (1 unit)

Course Description: Seminar on key issues and current topics in public health.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Pass one restricted to undergraduate seniors.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SPH 190C – Research Conference in Community & International Health (1 unit)

Course Description: Weekly conference on research problems, progress, and techniques in Community and International Health. Critical discussion of recent journal articles.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SPH 192 – Internship in Community Health Practice (1-12 units)

Course Description: The student, through fieldwork in a community health agency, learns to apply theory and concepts learned in the classroom.

Prerequisite(s): Consent of instructor. Upper division and graduate students.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

SPH 198 – Study in Community & International Health (1-5 units)

Course Description: Study and experience for undergraduate students in any number of areas in community and international health.

Prerequisite(s): Consent of instructor; undergraduate standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SPH 199 – Research in Community & International Health (1-5 units)

Course Description: Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics.

Prerequisite(s): Consent of instructor; undergraduate standing.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

SPH 201 – Introduction to Public Health (3 units)

Course Description: Provides an overview of public health. Covers the history of public health in the U.S.; defines its major functions and constituencies; and, introduces fundamental principles of epidemiology, biostatistics, behavioral sciences, environmental health, infectious diseases, and reducing health disparities.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

SPH 202 – Public Health Issues in California's Central Valley (3 units)

Course Description: Public health issues in California's Central Valley, including the influences of migration, racial and ethnic diversity, the agricultural industry, environmental exposures, and rurality.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

SPH 203 – Learning & Teaching in Public Health Contexts (2 units)

Course Description: Aimed at current and future public health professionals interested in learning more about the educational potential for interactions with community members and other health professionals, all stakeholders in improving the health of communities.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

SPH 204 – Globalization & Health: Evidence & Policies (3 units)

Course Description: Provides an overview of the evidence on the multiple effects of globalization policies on health.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to graduate student standing.

Grade Mode: Letter.

SPH 205AY – Epidemiology for Health Professionals (4 units)

Course Description: Basic epidemiologic concepts and approaches to epidemiologic research, with examples from human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 2 hour(s), Web Virtual Lecture 2 hour(s).

Grade Mode: Letter.

SPH 207 – Advanced Epidemiologic Methodology (4 units)

Course Description: In-depth integration of advanced epidemiological concepts. Theory, methods, and applications for observational studies including random and systematic error, confounding, counterfactuals, causal inference, effect modification, internal and external validity, estimability, and interpretation of effect measures, and advanced study designs.

Prerequisite(s): EPI 206.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: EPI 207.

Grade Mode: Letter.

SPH 208 – Principles & Applications of Cancer Prevention & Control (2 units)

Course Description: Principles and applications of cancer prevention and control from a public health perspective.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

SPH 209 – History of Epidemiology in Public Health (2 units)

Course Description: Introduction to the history of epidemiology in solving major public health problems. Original historical articles will be read/discussed. Topics may include: infectious disease, accidents/adverse events, nutritional deficiencies, community vaccination trials, occupational exposures, cancer, birth defects, cardiovascular disease, and smoking.

Learning Activities: Lecture 0.50 hour(s), Discussion 1.50 hour(s).

Cross Listing: EPI 209.

Grade Mode: Letter.

SPH 210 – Public Health Informatics (2 units)

Course Description: Collection, verification, and utilization of data related to populations; infrastructure, functions, and tools used to generate public health knowledge supporting public health practices and policy development/dissemination.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Grade Mode: Letter.

SPH 212 – Migration & Health (3 units)

Course Description: Principles of migration and health. Topics will include demographics, public health invention programs, health care delivery, occupational health, and effects of international migration on the health in communities of origin, transit and destination. Guest presentations by outside experts.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

SPH 213 – Health Disparities in the U.S. (3 units)

Course Description: Introduction to the principles and practice of health disparities research.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Restricted to Graduate Students.

Grade Mode: Letter.

SPH 214 – Scientific Proposal Writing (3 units)

Course Description: Components and writing of research proposals for agencies such as the NIH and NSF.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 2.5 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to Public Health Ph.D. students.

Grade Mode: Satisfactory/Unsatisfactory Only.

SPH 215 – GIS for Public Health (3 units)

Course Description: Concepts and components of a geographic information system (GIS) and essential skills of operating a functional GIS through the use of ArcGIS software package. Operational processes of spatial data acquisition, editing and QA/QC, metadata development, geodatabase design, spatial query and display, spatial analysis and modeling, preliminary GIS application development, cartographic mapping and dynamic visualization, and GIS implementation basics.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

SPH 222 – Social & Behavioral Aspects of Public Health (3 units)

Course Description: Theories and strategies of health behavior change at the individual, group, community, and environmental levels. Examples include: transtheoretical model, social networks, and social marketing. Theories are applied to solve common public health problems (cancer, obesity, smoking, and HIV/AIDS).

Prerequisite(s): STA 102; STA 106; and consent of instructor; graduate standing.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

SPH 223 – Obesity Prevention in Community Settings (3 units)

Starting Spring Quarter 2025, this course is no longer offered.

Course Description: Look at causes of the obesity epidemic in the U.S.; identify and critically assess the research literature on various prevention strategies; understand, and apply evidence-based public health strategies to combat obesity; and translate the science to a general audience.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

SPH 232 – Health Communication (4 units)

Course Description: Health communication theories and research traditions. Topics include consumer health information seeking; physician-patient interaction; information, social marketing, "edutainment," and media advocacy campaigns; social networks and coping; media influences on health; and new communication technologies in health promotion and healthcare delivery.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Cross Listing: CMN 232.

Grade Mode: Letter.

SPH 233 – Persuasive Technologies for Health (4 units)

Course Description: Theorizing, designing and evaluating ethical technology-based health communication interventions. Uses of social media, mobile communication apps, wearable devices, computer-generated tailored messages, educational games, and computational approaches in health promotion and healthcare delivery.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: CMN 233.

Grade Mode: Letter.

SPH 235 – Health Communication Campaigns (4 units)

Course Description: Principles of health communication campaign planning, implementation and evaluation. Strategies for changing health behaviors, shaping policy, and improving healthcare organizations' relations with stakeholders.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Cross Listing: CMN 235.

Grade Mode: Letter.

SPH 244 – Introduction to Medical Statistics (4 units)

Course Description: Introduction to statistical methods and software in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Only 1 unit of credit for students who have completed STA 100 or MPM 402.

Cross Listing: CLH 244.

Grade Mode: Letter.

SPH 245 – Biostatistics for Biomedical Science (4 units)

Course Description: Analysis of data and design of experiments for laboratory data.

Prerequisite(s): CLH 244 or SPH 244; or an equivalent course and consent of instructor.

Learning Activities: Lecture 4 hour(s).

Cross Listing: CLH 245.

Grade Mode: Letter.

SPH 246 – Biostatistics for Clinical Research (4 units)

Course Description: Emphasizes critical biostatistics for clinical research and targets biomedical audience. Students will develop understanding for basic planning and analysis of clinical studies and learn to develop collaborations with biostatisticians.

Prerequisite(s): SPH 245 or CLH 245.

Learning Activities: Lecture 4 hour(s).

Repeat Credit: May be repeated.

Cross Listing: CLH 246.

Grade Mode: Letter.

SPH 247 – Statistical Analysis for Laboratory Data (4 units)

Course Description: Statistical methods for experimental design and analysis of laboratory data including gene expression arrays, RNA-Seq, and mass spec.

Prerequisite(s): CLH 245 or SPH 245.

Learning Activities: Lecture 4 hour(s).

Cross Listing: CLH 247.

Grade Mode: Letter.

SPH 252 – Social Epidemiology (2 units)

Course Description: Social determinants of health; psychosocial and physiological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social gradient in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants.

Prerequisite(s): EPI 205A; and consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Cross Listing: EPI 252.

Grade Mode: Letter.

SPH 255 – Human Reproductive Epidemiology (3 units)

Starting Fall Quarter 2024, this course is no longer offered.

Course Description: Human reproductive effects and risk of reproductive disorders, examined from macro- and micro-environmental exposures in community and occupational settings, epidemiologic study designs and analyses.

Prerequisite(s): MPM 405; MPM 406; PHY 220; PGG 222; or equivalents or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

SPH 262 – Principles of Environmental Health Science (3 units)

Course Description: Principles, approaches and issues related to environmental health. Recognizing, assessing, understanding and controlling the impact of people on their environment and the impact of the environment on the public.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

SPH 266 – Applied Analytic Epidemiology (3 units)

Course Description: Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression for cohort and case-control studies, Poisson regression, survival-time methods.

Prerequisite(s): MPM 404; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 2 hour(s).

Cross Listing: PHR 266.

Grade Mode: Letter.

SPH 273 – Health Services Administration (3 units)

Course Description: Structure and function of public and private medical care. Topics include categories and trends in national medical spending, predictors of patient use, causes of death, managed care, HMOs, Medicare, Medicaid, costs of technology, and medical care in other countries.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

SPH 274 – Economic Evaluation in Health Care (3 units)

Course Description: Cost-effectiveness/cost-benefit analysis (CE/CBA) methods among various economic evaluation methods. CE/CBA is increasingly used to evaluate alternative choices in public health and clinical practice and to enlighten and inform health policy determinations.

Prerequisite(s): At least one semester of graduate level Statistics or consent of instructor.

Learning Activities: Lecture/Lab 3 hour(s).

Grade Mode: Letter.

SPH 276 – Critical Assessment in Health Policy & Economics (2 units)

Course Description: Aims to develop critical reading skills of the health policy and health economics literature, mainly following the microeconomic paradigm and analytical techniques. Some basic concepts of micro economic theory will be explained.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

SPH 277 – Net Benefit Regression (3 units)

Course Description: Uses regression methods for cost-effectiveness analysis. Focus on methods that create and explain economic information in person-level data.

Prerequisite(s): STA 100 or SPH 244 or MPM 202; or consent of instructor. Graduate student standing.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to graduate students only.

Grade Mode: Letter.

SPH 280 – Introduction to SAS Programming (3 units)

Course Description: Introduction to SAS, an integrated software system for data retrieval and management, data manipulation and programming.

Prerequisite(s): Introductory statistics course; e.g., MPM 402, STA 102.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: EPI 280.

Grade Mode: Letter.

SPH 281 – Data Management in SAS (1 unit)

Course Description: SAS programming for graduate students in the public health sciences or other fields who plan to use SAS software for data analysis.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion/Laboratory 1.50 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

SPH 283 – Program Planning & Evaluation (3 units)

Course Description: Assessment of population needs, assets and capacities that affect communities' health. Design and selection of methods for evaluating a population-based program.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

SPH 290 – Topics in Public Health (1 unit)

Course Description: Key issues and current topics in public health. Begins in August summer session II. Must enroll in August, then Fall and Winter. Course is a series but grades and units are given at end of each quarter.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Restricted to Graduate Students.

Repeat Credit: May be repeated 10 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

SPH 291 – Public Health Sciences Doctoral Seminar (1 unit)

Course Description: Seminar to explore research on translational science and rural health; includes presentations of student research in progress.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 6 time(s) when topic differs; with consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

SPH 292A – Public Health Translational Science Rotation (1-7 units)

Course Description: Public Health Translational Science Rotation for Ph.D. students in Public Health Sciences.

Prerequisite(s): Ph.D. student in Public Health Sciences or consent of instructor.

Learning Activities: Variable 1-7 hour(s).

Repeat Credit: May be repeated 8 unit(s) with consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

SPH 292B – Public Health Translational Science Rotation (1-7 units)

Course Description: Public Health Translational Science Rotation for Ph.D. students in Public Health Sciences.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-3 hour(s).

Enrollment Restriction(s): Open to Ph.D. students in Public Health Sciences.

Repeat Credit: May be repeated 8 unit(s) with consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

SPH 295 – International Health (2 units)

Course Description: Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

SPH 297 – Public Health Practicum (1-16 units)

Course Description: Practical fieldwork experience in public health. Placement site will vary based on the interest and experience of each student.
Prerequisite(s): Consent of instructor; open to Master of Public Health students.
Learning Activities: Variable 3-32 hour(s).
Repeat Credit: May be repeated 4 time(s).
Grade Mode: Satisfactory/Unsatisfactory only.

SPH 298 – Study in Community & International Health (1-5 units)

Course Description: Study and experience for graduate students in any number of areas in community and international health.
Prerequisite(s): Consent of instructor; graduate student in good academic standing.
Learning Activities: Variable 3-15 hour(s).
Grade Mode: Satisfactory/Unsatisfactory only.

SPH 299 – Research in Community & International Health (1-12 units)

Course Description: Work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics.
Prerequisite(s): Consent of instructor; graduate standing.
Learning Activities: Variable 3-36 hour(s).
Grade Mode: Satisfactory/Unsatisfactory only.

SPH 402 – Introductory Medical Spanish (2 units)

Starting Fall Quarter 2024, this course is no longer offered.
Course Description: The vocabulary needed to conduct a basic history and physical examination in Spanish.
Prerequisite(s): Medical student or consent of instructor.
Learning Activities: Lecture 2 hour(s).
Grade Mode: Honors/Pass/Fail.

SPH 461 – Clerkship in Community Health Group Practice (3-9 units)

Course Description: Overview of local community health in group practice situations. Students participate in treatment at several clinic sites in Yolo County. Topics include primary care, environmental health, maternal and child health, jail health, and preventive health care for the aged.
Prerequisite(s): Third-or fourth-year medical student.
Learning Activities: Clinical Activity.
Grade Mode: Satisfactory/Unsatisfactory only.

SPH 465 – Community Health Preceptorship (3-18 units)

Course Description: Participate at state or county health department or other public health organization in on-going investigations into current public health problems, e.g., birth defects, cancer control, diabetes, hypertension, injury control, infectious diseases, aging, Alzheimer's disease, and smoking and tobacco use control.
Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.
Learning Activities: Clinical Activity 5-40 hour(s).
Grade Mode: Honors/Pass/Fail.

SPH 466 – Occupational & Environmental Medicine Elective (6-12 units)

Course Description: Participate in activities of Occupational and Environmental Health Unit. Major activity is involvement in an epidemiologic research project of the University. Participate in Occupational and Environmental Medicine Clinic at UC Davis Medical Center and other sites, as arranged.
Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.
Learning Activities: Clinical Activity, Laboratory, Variable 6-12 hour(s).
Grade Mode: Honors/Pass/Fail.

SPH 470 – Clinical Selective in Occupational & Environmental Medicine (3-6 units)

Course Description: Outpatient clinical experience in Occupational and Environmental Medicine at UCDMC and other sites, as arranged. Gain experience in evaluating occ/env medical conditions, use of medical literature resources, the worker's compensation system, and toxicological principles.
Prerequisite(s): Consent of instructor; fourth-year medical student in good academic standing.
Learning Activities: Clinical Activity 9-18 hour(s).
Credit Limitation(s): Students may take up to four weeks for 6 units.
Grade Mode: Honors/Pass/Fail.

SPH 480 – Insights in Occupational & Environmental Medicine (1-3 units)

Course Description: Observe and participate in research and clinical activities in occupational and environmental medicine which include conferences, occupational and environmental medicine clinical activities and field visits. Develop and present small individual research projects.
Prerequisite(s): Consent of instructor; first- or second-year medical student in good academic standing.
Learning Activities: Clinical Activity 3-9 hour(s).
Grade Mode: Pass/Fail only.

SPH 495 – International Health (2 units)

Course Description: Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings.
Prerequisite(s): Consent of instructor; medical student in good academic standing.
Learning Activities: Lecture/Discussion 2 hour(s).
Grade Mode: Honors/Pass/Fail.

SPH 496 – Current Issues in Public Health (1 unit)

Course Description: Topical issues in public health. Speakers from the local public health community address issues such as disease control programs, access to care.
Learning Activities: Lecture/Discussion 1 hour(s).
Repeat Credit: May be repeated 3 time(s).
Grade Mode: Pass/Fail only.

SPH 498 – Study in Public Health Sciences (1-6 units)

Course Description: Study and experience for medical students in areas in community and international health.

Prerequisite(s): Consent of instructor; medical student in good academic standing.

Learning Activities: Variable 3-18 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

SPH 499 – Research in Public Health Sciences (1-9 units)

Course Description: Work with faculty member in areas of research interest, including but not limited to public health, injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics.

Prerequisite(s): Medical students with consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Pulmonary Medicine (PUL)**School of Medicine****PUL 192 – Internship in Pulmonary Medicine (1-12 units)**

Course Description: Supervised work experience in pulmonary medicine.

Prerequisite(s): Consent of instructor; upper division standing; approval of project by preceptor prior to internship.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

PUL 299 – Pulmonary Disease Research (1-12 units)

Course Description: Pulmonary disease research activity with focus in inhalation toxicity, oxidants or lung biochemistry, and cell and molecular biology.

Prerequisite(s): Consent of instructor; by arrangement only.

Learning Activities: Laboratory.

Grade Mode: Satisfactory/Unsatisfactory only.

PUL 460 – Comprehensive Pulmonary Medicine Clerkship (3-6 units)

Course Description: Rotation intended to provide a comprehensive student education in Pulmonary Medicine. Students will participate in hands on clinical education, as well as completing an assigned curricula. Intended for students pursuing Internal Medicine & Primary Care careers.

Prerequisite(s): Completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PUL 461 – Critical Care Clinical Clerkship (3-6 units)

Course Description: Rotation intended to provide student education in the Critical Care Management of sub-specialty patients.

Prerequisite(s): Completion of second year of medical school and/or consent of instructor; completion of Internal Medicine and Surgical Clerkships.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PUL 462 – Pulmonary Consult Clerkship (3-6 units)

Course Description: Similar to PUL 460. Rotation designed for students interested in learning pulmonary medicine, but who desire more variety in their clerkships, and do not desire the comprehensive experience offered by a four-week pulmonary rotation.

Prerequisite(s): Completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship.

Learning Activities: Clinical Activity 35 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PUL 464 – Away Advanced Clerkship in Pulmonary Medicine (3-12 units)

Course Description: Away advanced clerkship in Pulmonary Medicine.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

PUL 470 – Practicum in Care of the Terminally Ill (3-6 units)

Course Description: Work with hospice interdisciplinary team. Direct experience in the care of patients with illnesses where no cure is possible. Emphasis on symptom relief, end of life issues, physician assisted suicide.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 35 hour(s), Seminar 5 hour(s), Variable 3-6 hour(s).

Enrollment Restriction(s): Restricted to fourth-year Medical students in good standing.

Grade Mode: Honors/Pass/Fail.

PUL 475 – Encounters in Ethics in the ICU (3-6 units)

Course Description: Care for critically ill adults with complex medical disease carries with it unique ethical roles and duties for the physician.

Prerequisite(s): Fourth-year Medical Student.

Learning Activities: Clinical Activity 12 hour(s), Lecture/Discussion 6 hour(s), Independent Study 6 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

PUL 480 – Pulmonary-Critical Care Medicine Insights (1-3 units)

Course Description: Attend respiratory outpatient clinics and in-patient pulmonary consultation rounds and medical intensive care rounds.

Introduction to diagnosis and treatment of common pulmonary problems.

Prerequisite(s): Consent of instructor; student in good academic standing.

Learning Activities: Clinical Activity 3-9 hour(s).

Grade Mode: Honors/Pass/Fail.

PUL 499 – Research (1-12 units)

Course Description: Research opportunity in Pulmonary Medicine.
Prerequisite(s): Consent of instructor.
Learning Activities: Variable.
Repeat Credit: May be repeated.
Grade Mode: Honors/Pass/Fail.

Punjabi (PUN)

College of Letters & Science

PUN 001 – Elementary Punjabi (5 units)

Course Description: Introduction to listening, speaking, reading, and writing skills in Punjabi and to Punjabi culture.
Learning Activities: Lecture/Discussion 5 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH).

PUN 001V – Elementary Punjabi (5 units)

Course Description: Introduction to listening, speaking, reading, and writing skills in Punjabi and to Punjabi culture.
Learning Activities: Web Electronic Discussion 5 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH).

PUN 002 – Elementary Punjabi (5 units)

Course Description: Continuation of PUN 001. Introduction to listening, speaking, reading, and writing skills in Punjabi and to Punjabi culture.
Prerequisite(s): PUN 001 or PUN 001V; or consent of instructor.
Learning Activities: Lecture/Discussion 5 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC).

PUN 002V – Elementary Punjabi (5 units)

Course Description: Continuation of PUN 001V. Introduction to listening, speaking, reading, and writing skills in Punjabi and to Punjabi culture.
Prerequisite(s): PUN 001 or PUN 001V; or consent of instructor.
Learning Activities: Web Electronic Discussion 5 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC).

PUN 003 – Elementary Punjabi (5 units)

Course Description: Continuation of PUN 002. Introduction to listening, speaking, reading, and writing skills in Punjabi and to Punjabi culture.
Prerequisite(s): PUN 002 or PUN 002V; or consent of instructor.
Learning Activities: Lecture/Discussion 5 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC).

PUN 003V – Elementary Punjabi (5 units)

Course Description: Continuation of PUN 002V. Introduction to listening, speaking, reading, and writing skills in Punjabi and to Punjabi culture.
Prerequisite(s): PUN 002 or PUN 002V; or consent of instructor.
Learning Activities: Web Electronic Discussion 5 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC).

PUN 021 – Intermediate Punjabi (4 units)

Course Description: Integrated listening, speaking, reading, and writing skills in formal and informal contexts in Intermediate Punjabi. Continuation of fluency acquisition through grammar, vocabulary, and meaningful verbal and written expressions in Punjabi. Short readings and essays in Punjabi literature and culture.
Prerequisite(s): PUN 003V; or consent of instructor.
Learning Activities: Lecture/Discussion 4 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC).

PUN 022 – Intermediate Punjabi (4 units)

Course Description: Integrated listening, speaking, reading, and writing skills in formal and informal contexts in Intermediate Punjabi. Continuation of fluency acquisition in grammar, vocabulary, and meaningful verbal and written expression in Punjabi. Short final essay about topics in Punjabi literature and culture.
Prerequisite(s): PUN 021; or consent of instructor.
Learning Activities: Lecture/Discussion 4 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Writing Experience (WE).

PUN 023 – Intermediate Punjabi (4 units)

Course Description: Integrated listening, speaking, reading, and writing skills in formal and informal contexts in Intermediate Punjabi. Greater comprehension and production of meaningful verbal and written expression in Punjabi. Final research project related to topics in Punjabi literature and culture.
Prerequisite(s): PUN 022; or consent of instructor.
Learning Activities: Lecture/Discussion 4 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC).

PUN 097T – Tutoring in Punjabi (1-5 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.
Prerequisite(s): PUN 023 B or better; consent of Program Director.
Learning Activities: Tutorial 3-15 hour(s).
Grade Mode: P/NP only.

PUN 197T – Tutoring in Punjabi (1-5 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.
Prerequisite(s): PUN 023 B or better; consent of Program Director.
Learning Activities: Tutorial 3-15 hour(s).
Grade Mode: P/NP only.

Radiation Oncology (RON)

School of Medicine

RON 199 – Special Study for Advanced Undergraduates: Research in Radiation Biology (1-5 units)

Course Description: Radiation Oncology is a unique discipline combining elements of clinical practice linked to complex physics based dosimetry and treatment planning. Included within this clinical environment is a strong basis in biology that underpins the clinical effectiveness of radiation treatment.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

RON 211 – Introduction to Radiation Oncology Physics (3-6 units)

Course Description: Introduction to radiation oncology physics. Overview of treatment methodologies. Medical physics equipment. Treatment machine dosimetry, including calibration. Machine quality assurance. Patient dosimetry. Treatment planning. Simulation and treatment. Treatment quality assurance, including calculation checks and chart checks. Brachytherapy.

Prerequisite(s): Consent of instructor; restricted to physics and engineering graduate students and senior undergraduate physics majors.

Learning Activities: Variable.

Enrollment Restriction(s): Limited to 3 students.

Grade Mode: Satisfactory/Unsatisfactory only.

RON 299 – Independent Study & Research (1-12 units)

Course Description: Research under supervision of Radiation Oncology faculty. Work must be appropriate to fulfill the requirements for the Ph.D. degree.

Prerequisite(s): Enrollment with a graduate group for Ph.D. candidacy and consent of group advisor and sponsor.

Learning Activities: Laboratory 3-40 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

RON 420 – Radiobiology Lecture Course (1 unit)

Course Description: Radiobiology lectures are designed to engage the physician residents, physics residents and medical students in learning Radiobiology principles and concepts during the year the Radiation Physics course is taught.

Prerequisite(s): BIS 001A; MAT 012; PHY 001A.

Learning Activities: Lecture 1 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Honors/Pass/Fail.

RON 463 – Radiation Oncology Clerkship (3-9 units)

Course Description: Introduction to radiation oncology. Students will participate in workup and treatment planning for radiation oncology patients and will be introduced to the concepts involved in clinical radiation oncology, radiation biology, and radiation physics.

Prerequisite(s): MDS 430; MDS 431; third-year clinical clerkship; consent of instructor required.

Learning Activities: Clinical Activity 30 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RON 464 – Radiation Oncology Away Clerkship (3-9 units)

Course Description: Away Advanced Clerkship in Radiation Oncology.

Learning Activities: Clinical Activity 30 hour(s).

Grade Mode: Honors/Pass/Fail.

RON 465 – Externship in Radiation Oncology (3-16 units)

Course Description: Externship provides in-depth exposure to the field of Radiation Oncology for students who rotate through an affiliated institution.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RON 499 – Independent Study & Research in Therapeutic Radiology (1-18 units)

Course Description: Advanced-level research seminar in clinical and/or translational radiation oncology. Work with the course instructor to generate a testable hypothesis.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Radiology-Diagnostic (RDI)

School of Medicine

RDI 413 – Radiological Diagnosis II (Physics of Diagnostic Radiology) (5 units)

Course Description: Physics of diagnostic imaging; x-ray production and interaction; image formation; modulation transfer function; fluoroscopy; cine fluoroscopy; stereoscopy; xeroradiography; computerized and geometrical tomography; magnetic resonance and ultrasound. Principles of radiation protection in imaging will be covered.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 49 hour(s), Laboratory 6 hour(s).

Grade Mode: Honors/Pass/Fail.

RDI 414 – Medical Radiation Biology (3 units)

Course Description: Medical radiation biology; molecular cellular and organ system response to acute and chronic irradiation; radiation carcinogenesis and genetic effects; radiation risk assessment; diagnostic ultrasound and magnetic resonance imaging health effects. Medical/legal considerations of radiation exposure.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 27 hour(s).

Grade Mode: Honors/Pass/Fail.

RDI 430 – Introduction to Clinical Radiology (3-9 units)

Course Description: Introduces students to common radiology tests, including limitations and risks by using ACR Appropriateness Criteria and incorporate patient specific clinical data into ordering and interpreting appropriate imaging tests.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

RDI 461 – Advanced Clinical Clerkship in Diagnostic Radiology (3-6 units)

Course Description: Work with clinical Radiologists in image interpretation fluoroscopy angiography image-guided intervention cardiac stress testing radionuclide therapy. Daily conferences in Radiology Diagnosis and Therapy Health Physics Radiation Safety. Prepare two clinical cases for in-class presentation. Assigned readings.

Prerequisite(s): Consent of instructor; satisfactory completion of second-year medical school curriculum and of third-year clerkships in Internal Medicine and General Surgery.

Learning Activities: Clinical Activity 35 hour(s), Conference 4 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Restricted to eight students per rotation; open to visiting medical students from accredited programs.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RDI 462 – Diagnostic Imaging of Acquired & Congenital Heart Disease (2 units)

Course Description: Main emphasis on radiology of acquired and congenital heart disease, but also on magnetic resonance, nuclear medicine, and echocardiography of heart diseases.

Prerequisite(s): RDI 461 (can be concurrent); fourth-year medical student in good academic standing.

Learning Activities: Lecture/Discussion 5 hour(s).

Grade Mode: Honors/Pass/Fail.

RDI 473 – Advanced Clinical Clerkship in Neuroradiology (3-6 units)

Course Description: Work with Neuroradiologists in image interpretation of CT, MRI, and fluoroscopy. Opportunity to participate in assessment of Neurointerventional patients, and to observe Neurointerventional procedures. Daily conferences in Neuroimaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings.

Prerequisite(s): Fourth-year medical student with interest in Diagnostic Radiology, Neuroradiology, Neurology, Neurosurgery, Psychiatry, Psychology, or related field; satisfactory completion of RDI 461, or the equivalent, is strongly encouraged.

Learning Activities: Clinical Activity 35 hour(s), Conference 4 hour(s), Independent Study 1 hour(s), Variable 9-18 hour(s).

Enrollment Restriction(s): Restricted to one student per two-week or four-week rotation.

Credit Limitation(s): Credit limited to 3 units for two weeks; 6 units for four weeks.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RDI 474 – Advanced Clinical Clerkship in Pediatric Radiology (3-6 units)

Course Description: Participation in the radiological care of Pediatric patients; evaluate the patient receiving the radiographic study, including pertinent historical/physical findings. Student expected to write up case files on interesting cases encountered during their rotation.

Prerequisite(s): Fourth-year medical students with interest in Radiology and/or Pediatrics; interested third-year medical students who have successfully completed Pediatrics clinical clerkships may enroll, given availability and consent of the instructor of record; prior completion of PDI 461, or the equivalent, encouraged.

Learning Activities: Clinical Activity 30 hour(s), Conference 5 hour(s), Film Viewing 3 hour(s), Independent Study 2 hour(s).

Enrollment Restriction(s): Restricted to two students per two-week or four-week rotation.

Credit Limitation(s): Credit limited to 3 units for two weeks; 6 units for four weeks.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RDI 475 – Advanced Clinical Clerkship in Musculoskeletal Radiology (MSK) (3-6 units)

Course Description: Work with Musculoskeletal Radiologists in interpretation of CT, MRI, radiography, and fluoroscopy. Opportunity to assess patients for, and to observe image-guided procedures. Daily conferences in Musculoskeletal Imaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings.

Prerequisite(s): Fourth-year medical student with interest in Musculoskeletal Radiology, Orthopedic Surgery, Sports Medicine, PMNR, or related field; satisfactory completion of RDI 461, or the equivalent, is strongly encouraged.

Learning Activities: Clinical Activity 35 hour(s), Conference 4 hour(s), Discussion/Laboratory 1 hour(s), Variable 9-18 hour(s).

Enrollment Restriction(s): Restricted to one student per two-week or four-week rotation.

Credit Limitation(s): Credit limited to 3 units for two weeks; 6 units for four weeks.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RDI 476 – Advanced Clinical Clerkship Vascular/Interventional Radiology (IR) (3-6 units)

Course Description: Medical student will work with Vascular/Interventional Radiologists in the evaluation of patients for interventional procedures. There will be opportunities to Daily conferences in Neuroimaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings.

Prerequisite(s): Fourth-year medical student with interest in Diagnostic Radiology, Vascular/Interventional Radiology, Cardiovascular Imaging, Cardiology, Cardiovascular Surgery, Surgical Oncology, General Surgery, or related field; satisfactory completion of RDI 461, or the equivalent, is strongly encouraged.

Learning Activities: Clinical Activity 35 hour(s), Conference 4 hour(s), Discussion/Laboratory 1 hour(s), Variable 9-18 hour(s).

Enrollment Restriction(s): Restricted to one student per two-week or four-week rotation.

Credit Limitation(s): Credit limited to 3 units for two weeks; 6 units for four weeks.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RDI 477 – Advanced Clinical Clerkship in Ultrasound Radiology (3-6 units)

Course Description: Participation as an active team member on a busy clinical ultrasound service.

Prerequisite(s): Fourth-year medical student with interest in Radiology, OB/GYN, or in other medical or surgical subspecialties employing ultrasound in their clinical practice; prior completion of RDI 461, or the equivalent, is encouraged.

Learning Activities: Clinical Activity 30 hour(s), Conference 5 hour(s), Film Viewing 3 hour(s), Variable 9-18 hour(s).

Enrollment Restriction(s): Restricted to two students per two-week or four-week rotation.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RDI 478 – Advanced Clinical Clerkship Abdominal Imaging (3-6 units)

Course Description: Work with clinical Radiologists on abdominal and pelvic CT, MR, ultrasound, digital radiography, gastrointestinal and genitourinary procedures, image-guided intervention. Offered as a two-week rotation for third-year medical students and a two/four-week rotation for fourth-year medical students.

Learning Activities: Clinical Activity 35 hour(s), Conference 4 hour(s), Discussion/Laboratory 1 hour(s), Variable 9-18 hour(s).

Enrollment Restriction(s): Restricted to one student per two-week or four-week rotation.

Credit Limitation(s): Credit limited to 3 units for two weeks; 6 units for four weeks.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RDI 479 – Specialty Externship in Radiology (3-16 units)

Course Description: Externship provides in-depth exposure to one of a variety of sub-specialties in Radiology.

Learning Activities: Clinical Activity 25 hour(s), Discussion 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RDI 480 – Away Acting Internship in Radiology (3-6 units)

Course Description: Away Acting Internship rotation for Radiology and Nuclear Medicine.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RDI 498 – Group Study in Diagnostic Radiology (1-12 units)

Course Description: Group study in diagnostic radiology.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

RDI 499 – Research in Diagnostic Radiology (1-12 units)

Course Description: Approved for graduate degree credit.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Radiology-Nuclear Medicine (RNU)

School of Medicine

RNU 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

RNU 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

RNU 299 – Research: Special Study for Graduate Students (1-12 units)

Course Description: Special study for graduate students.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

RNU 401 – Biomedical Radiochemistry (3 units)

Course Description: Approved for graduate degree credit. Designed to combine basic nuclear physics, chemistry, and biology into a comprehensive and vigorous lecture-laboratory experience in biomedical nuclear chemistry. Subjects include choice and purification of appropriate gamma & beta radioisotopes, compounding biological pharmacodynamics and radioimmunoassay.

Prerequisite(s): Consent of instructor; open to graduate and medical students.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s).

Grade Mode: Honors/Pass/Fail.

RNU 411 – Radiological Physics I (Physics of Nuclear Medicine) (5 units)

Course Description: Physics of diagnostic and therapeutic nuclear medicine, nuclear physics, radioactive decay; interaction of ionizing radiation; dosimeters; attenuation; internal and external dosimetry; health physics; radiation detection and imaging, scintillation cameras, computerized planar and tomographic imaging. Offered at UC Davis Medical Center.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 43 hour(s), Laboratory 12 hour(s).

Grade Mode: Honors/Pass/Fail.

RNU 463 – Clinical Clerkship in Nuclear Medicine (3-8 units)

Course Description: Clerkship correlates radioisotopic methods with clinical, pathophysiological, and other diagnostic aspects of the patients care. Each patient reviewed with student by faculty member. Reading assignments, informal projects, and research techniques available.
Prerequisite(s): Consent of instructor; satisfactory completion of second-year medical school; RDI 461 recommended.

Learning Activities: Clinical Activity.

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Honors/Pass/Fail.

RNU 498 – Group Study in Nuclear Medicine (1-12 units)

Course Description: Approved for graduate degree credit.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

RNU 499 – Research in Nuclear Medicine (1-12 units)

Course Description: Research in Nuclear Medicine.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Religious Studies (RST)

College of Letters & Science

RST 001 – Survey of Religion (4 units)

Course Description: Basic concepts introduced through readings of the primary religious literature. Discussion of central ideas (creation, history, law, prophecy, suffering, mysticism, asceticism, karma, reincarnation, moksha, etc.); readings from the Bible, Bhagavad Gita, the Koran, selections from Plato and early Buddhist writings.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

RST 001A – Pilgrimage (4 units)

Starting Fall Quarter 2024, this course is no longer offered.

Course Description: Introduction to comparative religion, focusing on the theme of pilgrimage in different religious traditions.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken RST 003A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 001B – Death & Afterlife (4 units)

Course Description: Introduction to comparative religion, focusing on the theme of death and the afterlife in different religious traditions.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken RST 003B.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 001C – Sacrifice (4 units)

Course Description: Introduction to comparative religion, focusing on the theme of sacrifice in different religious traditions.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken RST 003C.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 001D – Conversion (4 units)

Starting Fall Quarter 2024, this course is no longer offered.

Course Description: Introduction to comparative religion, focusing on the theme of conversion in different religious traditions.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken RST 003D.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 001E – Fundamentalism (4 units)

Course Description: Introduction to comparative religion, focusing on the idea of fundamentalism in different religious traditions.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): No credit given to students that have taken RST 003E.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

RST 001F – Religion Today (4 units)

Course Description: Introduction to comparative religion, focusing on different religious traditions in the contemporary world.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

RST 001G – Myth, Ritual, & Symbolism (4 units)

Course Description: Myths, rituals and religious symbols found in a variety of religious traditions including examples from ancient and contemporary religious life. Variety of religious phenomena; validity of different approaches to the study of religion.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken and received unit credit for RST 002.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 001H – Sex, Marriage, & Divorce in Medieval & Modern Society (4 units)

Course Description: Methods used in the study of religion, focusing on a particular theme in a number of religious traditions.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RST 001J – Music, Voice, & the Word (4 units)

Course Description: Exploration of relation between religion and musical traditions in various cultures. Investigation of ways music, vocal performance and sound production reflect and shape modern religious sensibilities. Special attention to gender, ethnicity, race, class, nationalism, secularism and mass media.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

RST 005 – Comparative Religion (2 units)

Course Description: Comparative Religion based on rotating topics such as Dreams and Revelations, Evil, Prophecy, Salvation, and Crime and Punishment.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

RST 006 – Introduction to Health Sciences & the Humanities (4 units)

Course Description: Humanities in the health sciences focusing on illness, the practice of medicine, and the role of culture in biomedical research.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

RST 008 – Healthcare & Religious Ethics (4 units)

Course Description: Ethical dilemmas in healthcare and religion. End of life, illness, responsibility for the common good, humanity's relationship to the natural world, growing up, birth, pregnancy, conception.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

RST 010 – Contemporary Ethical Issues (2 units)

Course Description: Presents challenging, contemporary ethical issues from a multi-cultural perspective. Rotating topics will include Ethical Eating, Capital Punishment, Euthanasia, Poverty, and Animal Rights.

Learning Activities: Lecture 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

RST 010A – Contemporary Ethical Issues (2 units)

Course Description: Discussion of the readings assigned for RST 010 and completion of a major research paper.

Prerequisite(s): RST 010 (can be concurrent); RST 010 required concurrently; GE topical breadth and diversity credit only with concurrent enrollment in RST 010.

Learning Activities: Discussion 1 hour(s), Extensive Writing.

Enrollment Restriction(s): Concurrent enrollment in RST 010 required.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

RST 011 – Ethical Eating (4 units)

Course Description: Introduction to the complex and varied ethical, religious, and cultural meanings that food has had across the centuries and globe.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 012 – Emergence of Judaism, Christianity & Islam (4 units)

Course Description: Historical origins, founding figures, and sacred texts of Judaism, Christianity, and Islam. Jewish, Christian, and Muslim beliefs about their own origins. Interpretations of scriptures. Development of traditions over time.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RST 015Y – Reading War/Fighting War (4 units)

Course Description: Introduction to both classic religious texts about war and a set of actual scenarios drawn from the experience and training of soldiers in recent military conflicts.

Learning Activities: Lecture 2 hour(s), Web Electronic Discussion 1 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 021 – The Bible & Its Interpreters (4 units)

Course Description: Introduction to the Hebrew Bible (Old Testament): key narratives and themes (creation, flood, prophecy, justice, sexuality, etc.); origins in Ancient Israel; diverse ways it has been interpreted in Jewish and Christian communities.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 023 – Introduction to Judaism (4 units)

Course Description: Introduction to the study of religion using examples from the rituals, art and holy texts of Judaism. No prior knowledge of either Judaism or the study of religion is necessary.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

RST 030 – Religions of South Asia (4 units)

Course Description: Introduction to South Asian religions, including Hinduism, Buddhism, Islam, Jainism and Sikhism. Traces historical developments from Vedic texts and their ascetic reformulation by sages such as Yajnavalkya, Siddhartha Gautama, and Mahavira into our global present.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 031 – Introduction to Jainism (4 units)

Course Description: Introduction to topics central to Jain tradition through critical, historical and ethical perspectives.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 032 – History of Yoga (4 units)

Course Description: History of yoga from antiquity to its most recent formulation in American popular and consumer culture.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

RST 033 – Magic & Demons in South Asia (4 units)

Course Description: Exploration of magic, demons, and other powers in South Asian religions from the ancient to the modern periods.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 034 – Introduction to Buddhism (4 units)

Course Description: Buddhism in its pan-Asian manifestations, from its beginning in India to its development in Sri Lanka and Southeast Asia, Central Asia, China and Japan; teachings and practices, socio-political and cultural impact.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 040 – New Testament (4 units)

Course Description: New Testament literature from critical, historical, and theological perspectives.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 042 – Religion & Science Fiction (4 units)

Course Description: Representations of actual and fictional religious movements in science fiction and fantasy writing and film. Examination of: the characteristics of religion and religiosity in fictional religious movements; the relationship between religion, science, and technology in modern speculative fiction.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

RST 045 – Christianity (4 units)

Course Description: Major concepts and practices in the Christian tradition. Survey of the history of Christianity and Christian expansion from antiquity to modern times. Pays particular attention to Christianity in China, India, Africa, the Middle East, and Latin America.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 060 – Introduction to Islam (4 units)

Course Description: Introduction to topics central to the Islamic tradition. Muhammad, the Qur'an, Islamic law, theology, philosophy, cosmology, worship, and mysticism. Race and gender in Islam, Islamic revival, and varying experiences of Islam in different historical and cultural settings.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

RST 062 – American Islam (4 units)

Course Description: Development of Islam in the United States of America. How Muslims have been integral to the making of the Americas and American identities for over four centuries. Musical and dance traditions, clothing and the ethics of material display, storytelling and poetry, and participation in struggles for civil and human rights.

Learning Activities: Lecture 3 hour(s); Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

RST 065C – The Qur'an & Its Interpretation (4 units)

Course Description: The Qur'an, its history, its various functions in the lives of Muslims, and its different interpretations. Quranic themes such as God and humankind, nature and revelation, eschatology and Satan. Islam and other religions; women, gender, and sexuality.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 066 – The Song of God: The Bhagavad Gita (4 units)

Course Description: The Bhagavad Gita, its history and reception, and its significance in the lives of Hindus. Themes explored include Hindu theories of god, self, war, peace, duty, and action.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RST 067 – Modern Hinduism (4 units)

Course Description: Historical survey of modern Hinduism from the early-19th century to the present. Topics include Rammohun Roy, Sir William Jones, and Mahatma Gandhi, nationalism, post-colonialism and diasporic religion.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 068 – Introduction to Hinduism (4 units)

Course Description: Survey of the diversity of Hindu traditions from ancient to the colonial period, including the development of temple worship, pilgrimage, goddess worship and regional festivals.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 069 – Introduction to Hindu Mythology (4 units)

Course Description: Survey of the major narrative traditions within Hinduism, including epic literature and local stories in oral, textual, visual and performative forms.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 070 – Religion & Language (4 units)

Course Description: Basic toolkit for studying religious discourse in a variety of traditions. Concentration on the sacred and profane, the wondrous and ordinary, and the mystical and reasonable.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 075 – Introduction to Chinese Philosophy (4 units)

Course Description: Introduction to Chinese philosophy from classical pre-modern times; emphasis on basic concepts and their impact on social conduct; the Age of Philosophers, the Han synthesis, the medieval Buddhist contribution.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

RST 080 – Religion, Gender, Sexuality (4 units)

Course Description: Constructions of gender and sexuality within one or more religious traditions, pre-modern and modern. Emphasis on the interaction between religious, medical, and ethical definitions of the human body and sexual behavior.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

RST 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; primarily for lower division students.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

RST 099 – Special Study for Lower Division Undergraduates (1-5 units)

Course Description: Special study for lower division undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

RST 100 – Study of Religion: Issues & Methods (4 units)

Course Description: Principal issues and methods of Religious Studies and associated fields.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

RST 102 – Christian Origins (4 units)

Course Description: Development of Christianity from the end of the 1st century through the major controversies of the 5th century. Emphasis on the relationship between the new religious movement and the Roman Empire, and issues of early Christian identity and diversity.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 103 – Medieval & Byzantine Christianity (4 units)

Course Description: Christianity in Europe and the Near East from the year 600 to 1450. Focus on the development of Catholic and Orthodox traditions in ritual, art, and thought, with attention to interactions between regional groups, and Christian interaction with Islam.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 104 – Christianity 1450-1700 (4 units)

Course Description: History of Reformation conflicts over the authority of scripture, the nature of man and the universe, and the basis of morality with the goal of understanding how these conflicts laid the foundation for the modern world.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

RST 105 – Christianity & Modernity, 1700-1920 (4 units)

Course Description: Reaction of Christian critics and apologists to the profound cultural and scientific transformations resulting from the Scientific Revolution, the Enlightenment, and the advent of the modern critical study of religion.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 106 – Christianity in the Contemporary World (4 units)

Course Description: Christianity in the 20th and 21st centuries. Relationship of Christianity to globalization, industrialization, mass media, and the contemporary secular state. Focus on Christianity in America and developing nations, and on the relationship of established Christian institutions to new Christian movements.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); World Cultures (WC); Writing Experience (WE).

RST 110 – Life, Meaning & Identity (4 units)

Course Description: Study of religious lives, the quest for meaning and for personal identity; how religions frame the problems of life; how cultural and personal crises affect youthful identity; the nature and structure of dreams, myths, and ideals.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

RST 111 – Persuasion & Conviction in Religious Tradition (4 units)

Course Description: Selected topics in religious argument. Familiarizes students with the discourse structures of religious persuasion and enables them to perform analysis of such texts. Covers argument styles and structures used in ethics, theology, and preaching.

Learning Activities: Lecture/Discussion 4 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RST 115 – Mysticism (4 units)

Course Description: Historical and descriptive analysis of selected key figures in mystical traditions and readings of representative mystical texts. Analytic term paper.

Prerequisite(s): One lower division Religious Studies course.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 120 – Religion, Magic & Science (4 units)

Course Description: Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Cross Listing: STS 120.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 122 – Studies in Biblical Texts (4 units)

Course Description: Study of a book from the Prophets or writings from critical, historical, and religious perspectives.

Prerequisite(s): RST 021.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

RST 123 – Sex & Gender in the Bible (4 units)

Course Description: Gender and sexuality in the Bible and its interpretation in Judaism and Christianity. Femininity and masculinity; gender roles; homosexuality; sexual violence. Historical origins in the ancient world; influence on contemporary views.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 124 – Topics in Judaism (4 units)

Course Description: Examination of selected aspects of Jewish life, religion, or literature. Potential topics include: Jewish Perspectives on Jesus; The Golem: History and Legend; Sexuality and Gender in Late Antique Judaism and Early Christianity.

Prerequisite(s): RST 023; RST 021.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

RST 125 – Dead Sea Scrolls, Apocrypha, & Pseudepigrapha (4 units)

Course Description: Survey of the Dead Sea Scrolls, apocryphal and pseudepigraphical writings of Judaism and Christianity and their historical, social, and religious importance.

Prerequisite(s): RST 021; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 126 – The Formation of the Rabbinic Tradition (4 units)

Course Description: Survey of the classical rabbinic Jewish texts such as the Talmud and of the social and historical contexts of their production in Palestine and Babylonia.

Prerequisite(s): RST 021; RST 023; (RST 040 or RST 125).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: World Cultures (WC).

RST 130 – Topics in Religious Studies (4 units)

Course Description: Thematic study of a phenomenon in more than one religious tradition or of the relationship between religion and another cultural phenomenon. Topics may include archeology and the Bible, women and religion, religion and violence.

Prerequisite(s): RST 001 or RST 002 or RST 003A or RST 003B or RST 003C; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: World Cultures (WC); Writing Experience (WE).

RST 132 – Topics in Mediterranean Ancient Religion (4 units)

Course Description: Thematic study of specific sociological, literary or theological theme across the religious traditions of the ancient Mediterranean/Near East: Greek and Roman religions, Judaism, Christianity, Zoroastrianism, Manichaeism, etc. Topics may include creation, sacrifice, priesthoods, prophecies, holy books, the afterlife.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 135 – The Bible & Film (4 units)

Course Description: Examination of the uses of the Judeo-Christian Scriptures in film. Topics include dramatic depictions of biblical stories, the tension between science and religion, allegorical treatments of biblical themes, and the problems of religious conviction.

Prerequisite(s): HUM 010 recommended.

Learning Activities: Lecture 2 hour(s), Term Paper, Film Viewing 3 hour(s).

Grade Mode: Letter.

RST 136 – Topics in Jainism (4 units)

Course Description: Thematic study of specific periods, literary movements, sects and important figures within Jainism from a range of disciplinary perspectives.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 12 unit(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 137 – Topics in Buddhism (4 units)

Course Description: Thematic exploration of historic developments, periods, regions and sects in Buddhism from an interdisciplinary perspective.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 12 unit(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 139 – Topics in Hinduism (4 units)

Course Description: Thematic study of specific periods, movements, leaders, regions, ethics or philosophies within Hinduism from an interdisciplinary perspective.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 12 unit(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 140 – Christian Theology (4 units)

Course Description: Historical and systematic introduction to Christian doctrine, with attention to divergent traditions and the problem of orthodoxy and heresy.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 141A – New Testament Literature: Synoptic Gospels (4 units)

Course Description: Life and thought of the early Church as reflected by the Synoptic Tradition; Matthew, Mark, Luke and Acts. Offered every third year to alternate with RST 141B, RST 141C.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 141B – New Testament Literature: John (4 units)

Course Description: Life and thought of the early Church as reflected by the Johannine Tradition; the Gospel and letters of John. Offered every third year to alternate with RST 141A, RST 141C.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 141C – New Testament Literature: Paul (4 units)

Course Description: Life and thought of the early Church as reflected by the Pauline tradition. The letters of Paul. Offered every third year to alternate with RST 141A, RST 141B.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 143 – New Testament Apocrypha (4 units)

Course Description: Extra-canonical Christian writings and their reception, from antiquity to the present. Emphasis on the importance of New Testament figures both as literary characters and as authors within different Christian traditions.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RST 144 – History of the Bible (4 units)

Course Description: History of the formation of the Christian biblical canon, with emphasis on differences between Christian traditions; survey of translations and adaptations of biblical narrative in Christianity, Judaism, and Islam, as well as in contemporary culture.

Prerequisite(s): RST 021 or RST 040.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 145 – Contemporary American Religion (4 units)

Course Description: Examination of several major movements and phenomena in 20th-century American religion.

Prerequisite(s): RST 040 and HIS 017B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

RST 150 – Religious Ethics (4 units)

Course Description: Study of the religious bases of ethics through examination of ethical problems that arise in different religious cultures around the world and in nations where multiple religious cultures face similar issues.

Prerequisite(s): RST 010 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 152 – Justice, Equity, & Privacy in Medical Humanities (4 units)

Course Description: Global issues of justice, equity, and fairness in healthcare and biomedical research. Emphasis on issues of race, gender, paternalism, and genetic privacy. Texts include scholarly articles, fiction, and film.

Learning Activities: Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

RST 153 – Religion & Medicine (4 units)

Course Description: Cross-cultural approach to the relationship between Religion and Medicine from earliest times to the present. How specific religious and philosophical worldviews have shaped and continue to shape attitudes toward physical and mental health.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

RST 154 – The Hindu Temple (4 units)

Course Description: Comparative history of architecture and symbolism of the Hindu Temple in India, Southeast Asia and the United States. Attention to the temple as expression of religious knowledge, political authority, and cultural heritage through the lens of colonialism and postcolonialism.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: AHI 154.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 155A – Bhakti: Indian Devotional Traditions to 1200 CE (4 units)

Course Description: Exploration of Indian devotional traditions through literary, visual, and performance culture. Emphasis on period up to 1200 CE in southern India.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 155B – Bhakti: Indian Devotional Traditions, 1200 CE to Present (4 units)

Course Description: Indian devotional traditions through literary, visual, and performance culture. Emphasis on period 1200 CE to the present.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 156 – Religion & the Performing Arts in India (4 units)

Course Description: Survey of religion and performing arts in India. Emphasis on the influence of colonialism, nationalism, and regionalism on the history of Indian performing arts.

Prerequisite(s): RST 030; RST 068; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 157 – Hindu Women & Goddesses (4 units)

Course Description: Hindu goddesses and the religious lives of Hindu women in India and the diaspora.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 158 – The Ramayana (4 units)

Course Description: Exploration of the Indian epic, Ramayana, through the lens of literature, performance, and visual art. Emphasis on the text's diversity and its contemporary global relevance. Topics include Ramayanas in Southeast Asia, and in various South Asian diaspora communities.

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: COM 156.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 159 – The Mahabharata (4 units)

Course Description: Survey of the Indian epic, the Mahabharata, through textual, oral, and visual culture.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 160 – Introduction to Islamic Thought (4 units)

Course Description: The development of Islamic thought from the first centuries of Islam to the 18th century. Theology, philosophy, ethics, Sufism, historiography, political theory, fundamentalism, al-Farabi, al-Ghazzali, Ibn Rushd, Tusi, Ibn al-Arabi, Rumi, Molla Sadra, Ibn Khaldun, Ibn Abd al-Wahhab.

Prerequisite(s): RST 060 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 161 – Modern Islam (4 units)

Course Description: Response of Islam to modernity: secularism, reformism, fundamentalism. Islam and imperialism, women, media and immigration. Islamic modernism, political Islam, Islam in Europe and America.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 161B – Modern Islam: Authority & Tradition In Process (4 units)

Course Description: Survey of Islamic thought, social organization, politics from 18th century through present. Focus on changing notations of moral authority and tradition. Concentration on Middle East and South Asia with sustained treatment of North American engagements with the Islamic world.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RST 162 – Introduction to Islamic Law (4 units)

Course Description: The development of Islamic law in the formative centuries of Islam, ca. 600-1000, as well as its adaptation to changing economic, social, and political conditions in subsequent periods. Legal schools, legal theory, the Shari'a, reformist movements, human rights.

Prerequisite(s): RST 060 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 163 – Social Life of Islam (4 units)

Course Description: Introduction to culture and social life in Muslim societies. Focus on the plurality of traditions in Muslim faith, reason, and everyday practice. Special attention to Muslim rituals, ethical values, verbal genres, family life, sexuality and veiling, and youth culture.

Prerequisite(s): RST 060 or HIS 006 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RST 165 – Islam in Asia (4 units)

Course Description: Islam as a lived religion in the Indian sub-continent, Central Asia, China, and Southeast Asia. Emphasis is on primary sources studied comparatively and historically.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 166 – Religion & Media in the Arab World (4 units)

Course Description: Exploration of the role and experience of media technologies in the Arab world. Study of digital and electronic media as well as alternative media practices. Investigation of new trends in political activism and identity formation.

Learning Activities: Lecture 4 hour(s).

Cross Listing: MSA 131C.

Grade Mode: Letter.

General Education: Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 169 – Topics in Islam (4 units)

Course Description: Thematic study of specific periods, movements, leaders, regions, ethics or philosophies within Islam from an interdisciplinary perspective.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: World Cultures (WC); Writing Experience (WE).

RST 171 – Buddhist Art (4 units)

Course Description: A historical survey of Buddhist art in relation to the development of Buddhist doctrine and philosophy.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: AHI 157.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 172 – Ch'an (Zen) Buddhism (4 units)

Course Description: Doctrines and methods of the Ch'an Buddhism, both ancient and modern. Review of ritual techniques, including meditation.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

RST 175A – Daoist Traditions (4 units)

Course Description: English-language survey of key Daoist texts and scholarship. Topics include Daoist concepts of the cosmos, the natural world, scripture, the body, and immortality; Daoist divinities; Daoism and the state.

Prerequisite(s): A course in Chinese history recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: CHN 100A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RST 180 – Popular Religious Art in India (4 units)

Course Description: Survey of Indian popular religious art in prints, trade labels, comics and photographs.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: AHI 158.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 181 – Hindu Gods & Hindu Symbols (4 units)

Course Description: A historical survey of the development of the language of symbolism and iconography in Hinduism.

Prerequisite(s): RST 068: Hinduism or RST 069: Hindu Mythology recommended, but not required.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: AHI 153.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 182 – Ramayana, Religion, & the Arts (4 units)

Course Description: Comparative exploration of the visual, theatrical, ritual, performative and religious lives of the Ramayana epic in South and Southeast Asia.

Prerequisite(s): Recommended but not required preparation: COM 156/ RST 158 or RST 181 or RST 068 or RST 069.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RST 189 – Senior Colloquium (4 units)

Course Description: Primarily for seniors in Religious Studies. Discussion in depth of a problem in religion which requires the methods of several disciplines and is important in the encounter between religions.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

RST 190 – Seminar (4 units)

Course Description: Allows majors to integrate their disciplined study of the field. Emphasis on current scholarly debate about the methods for analyzing and comparing diverse religious traditions.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated up to 1 time(s) when topic and faculty differ.

Grade Mode: Letter.

RST 194HA – Special Study for Honors Students (1-5 units)

Course Description: Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a religious studies topic.

Learning Activities: Independent Study.

Enrollment Restriction(s): Open only to majors of senior standing who qualify for honors program.

Grade Mode: Pass/No Pass only.

RST 194HB – Special Study for Honors Students (1-5 units)

Course Description: Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a religious studies topic.

Learning Activities: Independent Study.

Enrollment Restriction(s): Open only to majors of senior standing who qualify for honors program.

Grade Mode: Pass/No Pass only.

RST 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

RST 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

RST 201 – Methods & Issues in Religious Studies (4 units)

Course Description: Focuses on controversies in the study of comparative religion. How is religion best defined? Are there methods unique to the study of religion? What does the study of religion contribute to the study of society in general?

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

RST 205 – Religion & Media (4 units)

Course Description: Many communities are finding global media technologies useful for religious practice. Examines how religious revitalization is historically situated. Phenomenological approach will enable students to situate media and religion within the social and material world of practitioners.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

RST 210 – Religion & Postcoloniality, or Savages, Civilization, & Spirituality (4 units)

Course Description: Examines relations between religion and colonialisms. Using specific historical situations it explores some of our thorniest theoretical problems. Acquire a solid understanding of postcolonial theory and the historical tools to critically engage religion in the present.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

RST 212 – Religion & Violence (4 units)

Course Description: Comparative and critical study of the ideological, cultural, and theological relationship between forms of violence and religion and religious practice.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

RST 215 – Topics in the History of Christianity (4 units)

Course Description: Selected topics in the history of Christianity. Intended for graduate students seeking to do advanced work in the study of Christianity. May cover issues in Christian thought from antiquity, the middle ages, the early modern or modern period.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

RST 299 – Directed Research (1-12 units)

Course Description: Directed research.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

RST 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Rheumatology & Allergy (RAL)

School of Medicine

RAL 099 – Directed Research Immunology (1-5 units)

Course Description: Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory.

Grade Mode: Pass/No Pass only.

RAL 192 – Internship in Rheumatology-Allergy (1-12 units)

Course Description: Supervised work experience in rheumatology-allergy. *Prerequisite(s):* Upper division standing; approval of project by preceptor prior to internship.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

RAL 199 – Directed Research in Immunology (1-5 units)

Course Description: Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory.

Grade Mode: Pass/No Pass only.

RAL 209 – Current Topics in Immunology: From Presentations to Grants (3 units)

Course Description: Current developments in various aspects of immunology and their interrelationships. Focus on areas of immunology not currently covered in the basic and advanced immunology courses. Oral presentation, written review and grant preparation.

Prerequisite(s): IMM 201.

Learning Activities: Lecture 1 hour(s), Term Paper/Discussion 1 hour(s), Project 1 hour(s).

Grade Mode: Letter.

RAL 298 – Topics in Rheumatology & Clinical Immunology (1-4 units)

Course Description: Library and/or laboratory work as required.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory.

Grade Mode: Satisfactory/Unsatisfactory only.

RAL 299 – Research in Autoimmune Disease (1-18 units)

Course Description: Independent research will be encouraged in both animal models of human disease (including congenitally athymic [nude], asplenic, and New Zealand mice) and the cellular immune system of patients with systemic lupus erythematosus, Sjögren's syndrome, polymyositis and drug hypersensitivity.

Prerequisite(s): Consent of instructor.

Learning Activities: Laboratory.

Grade Mode: Satisfactory/Unsatisfactory only.

RAL 460 – Rheumatology Clinical Clerkship (1-18 units)

Course Description: Participation with members of the subspecialty service in the diagnosis and therapeutic management of patients with rheumatologic diseases.

Prerequisite(s): MDS 431 and consent of instructor.

Learning Activities: Clinical Activity 2-40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

RAL 461 – Allergy Clinical Clerkship (3-18 units)

Course Description: Student will work with practicing allergist in daily work with patients and participate in weekly allergy clinic and teaching conferences. Study of the literature. Will see patients with problems in clinical immunology, immunodeficiency, asthma, allergic rhinitis.

Prerequisite(s): Consent of instructor; completion of second year of medical school.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

RAL 465 – Business of Medicine – The Fundamentals (3 units)

Course Description: Fundamentals of business in healthcare, while introducing healthcare systems and historic perspective of healthcare evolution. Become familiar with types of clinical practice systems, operations and organizational fundamentals, their origin, differences, and develop knowledge of basics of healthcare finance and its broad applications.

Learning Activities: Independent Study 20 hour(s), Web Virtual Lecture 10 hour(s), Extensive Writing/Discussion 10 hour(s).

Grade Mode: Pass/Fail only.

RAL 480 – Insights in Rheumatology (1-3 units)

Course Description: Participation in rheumatology consultation rounds, rheumatic disease clinics and conferences with supervised readings in rheumatology.

Prerequisite(s): Consent of instructor; student in good academic standing.

Learning Activities: Clinical Activity 3-9 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

RAL 499 – Research (1-12 units)

Course Description: Part-time participation in active clinical and basic research projects which can involve both patient care and relevant laboratory procedures. Students can gain experience in clinical medicine and clinical investigation.

Prerequisite(s): Medical student with consent of instructor.

Learning Activities: Variable 2-40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Russian (RUS)

College of Letters & Science

RUS 001 – Elementary Russian (5 units)

Course Description: Introduction to Russian grammar and development of all language skills in a cultural context with special emphasis on communication.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

RUS 001A – Accelerated Intensive Elementary Russian (15 units)

Course Description: Special 12-week accelerated, summer session intensive combining the work of RUS 001, RUS 002, and RUS 003. Introduction to Russian grammar and development of all language skills in a cultural context with emphasis on communication.

Learning Activities: Lecture/Discussion 15 hour(s).

Credit Limitation(s): Not open to students who have completed RUS 001, RUS 002, or RUS 003.

Grade Mode: Letter.

RUS 002 – Elementary Russian (5 units)

Course Description: Continuation of grammar and language skills developed in RUS 001.

Prerequisite(s): RUS 001.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

RUS 003 – Elementary Russian (5 units)

Course Description: Continuation of grammar and language skills developed in RUS 002.

Prerequisite(s): RUS 002.

Learning Activities: Discussion 5 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

RUS 004 – Intermediate Russian (4 units)

Course Description: Grammar review and conversational practice in Russian.

Prerequisite(s): RUS 003.

Learning Activities: Discussion/Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

RUS 005 – Intermediate Russian (4 units)

Course Description: Grammar review. Introduction to literature in its sociopolitical context. Conversational practice.

Prerequisite(s): RUS 004.

Learning Activities: Discussion 4 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

RUS 006 – Intermediate Russian (4 units)

Course Description: Grammar review. Intermediate conversation and continued reading of literature. Social and cultural practices in contemporary Russia; introduction to Russian history.

Prerequisite(s): RUS 005.

Learning Activities: Discussion 4 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

RUS 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1-5 hour(s).

Grade Mode: Pass/No Pass only.

RUS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

RUS 101A – Advanced Russian (4 units)

Course Description: Topics in Russian. Grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversation exercises utilizing literary and colloquial variants of current Russian speech.

Prerequisite(s): RUS 006; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

RUS 101B – Advanced Russian (4 units)

Course Description: Continuation of RUS 101A. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech.

Prerequisite(s): RUS 101A; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

RUS 101C – Advanced Russian (4 units)

Course Description: Continuation of RUS 101B. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech.

Prerequisite(s): RUS 101B.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

RUS 102 – Russian Composition (4 units)

Course Description: Practice in writing Russian. One composition on a different topic each week. Topics include: history, geography, politics, and literature of Russia; comparison of Russian and American lifestyles; current events. Conducted in Russian.

Prerequisite(s): RUS 006; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Tutorial 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RUS 103 – Literary Translation (4 units)

Course Description: Translation of Russian literary texts into stylistically equivalent idiomatic English.

Prerequisite(s): RUS 101C.

Learning Activities: Discussion 3 hour(s).

Grade Mode: Letter.

RUS 105 – Advanced Russian Conversation (4 units)

Course Description: Intensive conversational practice and discussion based on current events and contemporary texts.

Prerequisite(s): RUS 006.

Learning Activities: Discussion 3 hour(s), Practice 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

RUS 120 – Topics in Russian Literature & Culture (4 units)

Course Description: Knowledge of Russian not required. Investigation of significant themes and issues of Russian literature and culture within their European context.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RUS 122 – 19th-Century Russian Literature (4 units)

Course Description: Study of Russian literature (prose fiction, drama, poetry) from the period between 1800 and the end of the 19th century. May include authors like Pushkin, Lermontov, Gogol, Turgenev, Dostoevsky, Tolstoy, Chekhov. Offered alternately in English or Russian.

Prerequisite(s): RUS 101C when offered in Russian; no prerequisite when offered in English.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Not open to students who have taken RUS 121 and RUS 127.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RUS 124 – 20th-Century Russian Literature (4 units)

Course Description: Study of Russian literature (prose, drama, poetry) from the period between 1900 and the end of the 20th century. Authors like Y. Olesha, M. Bulgakov, D. Kharms, and L. Petrushevskia. Taught in Russian.

Prerequisite(s): RUS 101C when offered in Russian; no prerequisite when offered in English (every other year).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Credit Limitation(s): Not open for credit to students who have taken RUS 123 or RUS 128.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RUS 126 – The Russian Theater (4 units)

Course Description: The main works of Russian dramatists from Fonvizin to the present, including Gogol, Turgenev, Tolstoy, Ostrovsky, Chekhov, Blok, Mayakovsky, Kharms. Conducted in Russian.

Prerequisite(s): RUS 101C; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RUS 129 – Russian Film (4 units)

Course Description: History of Russian film; film & social revolution, the cult of Stalin, dissident visions; film & the collapse of the Soviet empire; gender and the nation in Russian film. Taught in English; Russian films with English subtitles.

Prerequisite(s): Completion of Subject A requirements.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Cross Listing: FMS 129.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RUS 130 – Contemporary Russian Culture (4 units)

Course Description: Trends in Russian culture and the relationship between artists and the government. Topics: recent changes in the cultural scene, postmodernist trends in literature, visual art, film, and theater.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RUS 133 – Post-Soviet Literature (4 units)

Course Description: Major authors and trends in Russian literature in post-1991 period. Discussion of impact of economic, social, and cultural turmoil of post-Soviet period on literary marketplace. Analysis of development of literary postmodernism in Russia.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RUS 139 – Pushkin (4 units)

Course Description: Three major periods of Pushkin's poetical works: his early Lyceum verse; his poetry of the early 1820s; and the mature period. Further study of Pushkin's prose fiction, drama, and journalism.

Prerequisite(s): RUS 101C; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RUS 140 – Dostoevsky (in English) (4 units)

Course Description: Reading and analysis of Dostoevskys principal works such as Crime and Punishment, The Idiot, The Brothers Karamazov, and The Diary. Study of social and political views as reflected in Dostoevskys works.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RUS 141 – Tolstoy (in English) (4 units)

Course Description: Study of Leo Tolstoy's literary evolution and moral quest. Readings include his Confession, a major novel such as War and Peace or Anna Karenina, and representative shorter fiction.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Writing Experience (WE).

RUS 142 – Women in Russian Culture (4 units)

Course Description: Study of the representation of women in contemporary Russian fiction and film. Exploration of issues such as family dynamics/motherhood, sexuality, work, and women's relationship to the state. Offered in English.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RUS 143 – Chekhov (in English) (4 units)

Course Description: Examination of Chekhov's short stories and major plays, such as The Seagull, Uncle Vanya, The Three Sisters, The Cherry Orchard, and Ivanov, in the broader cultural context of European and Russian fin de siecle.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

RUS 150 – Russian Culture (4 units)

Course Description: Study of Russian culture in 19th and 20th centuries. Brief introduction of the beginnings up to 19th century. Russian art, music, philosophy, church, traditions, and daily life. Knowledge of Russian not required.

Learning Activities: Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

RUS 192 – Research Essay (2 units)

Course Description: Research essay, based on primary and secondary sources, dealing in depth with a topic arising from or related to the prerequisite literature course.

Prerequisite(s): A Russian literature course; may be taken concurrently.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

RUS 194H – Special Study for Honors Students (4 units)

Course Description: Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Russian studies.

Prerequisite(s): Open only to majors of senior standing who qualify for honors program.

Learning Activities: Independent Study 4 hour(s).

Grade Mode: Letter.

RUS 195H – Honors Thesis (4 units)

Course Description: Writing an honors thesis, under the direction of a faculty member, on a topic in Russian studies.

Prerequisite(s): RUS 194H.

Learning Activities: Independent Study 4 hour(s).

Grade Mode: Letter.

RUS 197T – Tutoring in Russian (1-4 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Seminar 1-2 hour(s), Laboratory 1-2 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

RUS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

RUS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

RUS 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Enrollment Restriction(s): Restricted to graduate students.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

RUS 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable 3-20 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

School of Veterinary Medicine (VET)**School of Veterinary Medicine****VET 299 – Research (1-15 units)**

Course Description: Research.

Prerequisite(s): First-, second- and third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 1-15 hour(s).

Repeat Credit: May be repeated 6 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 400 – Professional & Clinical Skills – Y1 (2-18 units)

Course Description: Outline expectations and skill set required to participate successfully in the DVM curriculum as well as providing learning opportunity in communication, team-building, leadership, conflict management, stress management, critical thinking, professional behaviors, history taking, physical examination skills and medical record keeping.

Prerequisite(s): First-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 401 – Basic Foundations (2-18 units)

Course Description: Essential basic information regarding histology, general pathology, biochemistry, pharmacology and population health that is foundational to all blocks.

Prerequisite(s): First-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 402 – Heme/Lymph/Coag (2-18 units)

Course Description: The lexicon, morphology, production, structure and function of peripheral blood cells, their bone marrow precursors and the lymphoid system, the process and regulation of hemostasis, and the laboratory evaluation of all of these in health and disease.

Prerequisite(s): First-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 403 – Musculoskeletal (2-18 units)

Course Description: Anatomy, histology, and physiology necessary for understanding form and function of the bones, joints, muscles, and tendons in producing locomotion; and the pathologic processes that produce typical responses to injury of musculoskeletal structures in domestic animals.

Prerequisite(s): First-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 404 – Neuroscience/Senses/Behavior (2-18 units)

Course Description: Establish a basis for clinical neurology, ophthalmology, and behavior by providing an integrated study of normal neurobiology, neuroanatomy, neurophysiology, neuropathology, neurpharmacology, neurotoxicology, ophthalmology and behavior.

Prerequisite(s): First-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 405 – Gastrointestinal/Metabolism (2-18 units)

Course Description: Examine interrelatedness and functions of the organs associated with the gastrointestinal tract. Applied problems in pharmacology, physical examination, diagnostic testing, and imaging are used to reinforce a basic understanding of organ anatomy, physiology, pathophysiology, and nutrition/metabolism.

Prerequisite(s): First-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 406 – Pharmacology/Nutrition/Toxicology (2-18 units)

Course Description: Basic principles of nutrition and toxicology as well as pathophysiologic changes, diagnostic procedures and treatments of nutritional diseases and intoxications of domestic animals and wildlife. Incorporate case examples and directed self-learning to reinforce important concepts.

Prerequisite(s): Consent of instructor; first-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 407 – Connections – Y1 (1.5 units)

Course Description: Integrate basic and preclinical material working with senior student in a clinical environment.

Prerequisite(s): First-year standing in the School of Veterinary Medicine.

Learning Activities: Clinical Activity 15 hour(s).

Grade Mode: S/U only.

VET 408 – Cardiology/Respiratory (2-18 units)

Course Description: Normal cardiovascular and respiratory system biology and the integrated response of those systems to injury or disease.

Prerequisite(s): Second-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 409 – Renal/Urinary (2-18 units)

Course Description: Examine and explore the normal morphology (gross and microscopic), physiology, pathology and imaging of the upper and lower urinary tract in multiple species.

Prerequisite(s): Second-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 410 – Endocrinology/Reproduction (2-18 units)

Course Description: Anatomy and histology of endocrine glands and reproductive systems in males and females. Understand the physiology and pathology at the molecular, cellular and organismal level.

Prerequisite(s): Second-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 411 – Skin (2-18 units)

Course Description: Structure and function of the skin and specialized keratinized structures in veterinary species. Review mechanisms by which skin responds to perturbations and discuss wound healing and skin pathology.

Prerequisite(s): Second-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 412 – Oncology (2-18 units)

Course Description: Basic mechanisms, etiology, causes and the approach to diagnosis and treatment of cancer with emphasis on veterinary patients.

Prerequisite(s): Second-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 413 – Immunology/Infectious Disease (2-18 units)

Course Description: Integrate immunology, microbiology, virology, parasitology of common infectious, zoonotic and foreign animal diseases.

Prerequisite(s): Second-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 414 – Population Health (2-18 units)

Course Description: Principles of evidence-based medicine, study design and inference, and disease transmission in populations. Topics include biostatistics, outbreak investigation and response, diagnostic tests, vaccine strategies, food safety, foreign animal diseases, and impact of environmental health on animals and humans.

Prerequisite(s): Second-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 415 – Clinical Foundations (2-18 units)

Course Description: Essential concepts that are shared across year three blocks to include foundational material in anesthesia, surgery and emergency medicine with cases that include interpretation of clinical pathology and imaging.

Prerequisite(s): Second-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 416 – Connections – Y2 (1.5 units)

Course Description: Integrate basic and preclinical material working with a senior student in a clinical environment.
Prerequisite(s): Enrollment Restrictions: Credit Limitation(s): Cross Listing: Repeat Credit: General Education: Grade Mode: S/U only.

Prerequisite(s): Second-year standing in the School of Veterinary Medicine.

Learning Activities: Description: Learning Activities: Clinical Activity 15 hour(s).

VET 417 – Professional & Clinical Skills – Y2 (2-18 units)

Course Description: Continue to build on foundations from freshman year in communication, history-taking, client interactions, team-building, conflict and stress management and professional behaviors.

Prerequisite(s): Second-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 430 – Core Stream (2-18 units)

Course Description: Longitudinal stream to include law, ethics, regulatory medicine, business, communication and disaster medicine.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 431 – Anesthesia & Surgical Stream (2-18 units)

Course Description: Introduction to surgical anatomy, operative and anesthetic skills.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 432A – Comparative Stream I (2-18 units)

Course Description: Approach commonly encountered diseases and medical problems across multiple species. Development of problem-solving skills related to the medical problems of all species from the level of individual animals to groups/herds/populations.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 432B – Comparative Stream II (2-18 units)

Course Description: Approach commonly encountered diseases and medical problems across multiple species. Development of problem-solving skills related to the medical problems of all species from the level of individual animals to groups/herds/populations.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 432C – Comparative Stream III (2-18 units)

Course Description: Approach commonly encountered diseases and medical problems across multiple species. Development of problem-solving skills related to the medical problems of all species from the level of individual animals to groups/herds/populations.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 433A – Small Animal Stream I (2-18 units)

Course Description: Clinical manifestations, diagnostic methods, and the medical and surgical approaches to the infectious, musculoskeletal, neurologic and ophthalmologic diseases of small animals.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 433B – Small Animal Stream II (2-18 units)

Course Description: Clinical manifestations, diagnostic methods, and the medical and surgical approaches to the dermatologic, dental, and gastrointestinal diseases of small animals as well as preventative medicine and nutrition.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 433C – Small Animal Stream III (2-18 units)

Course Description: Clinical manifestations, diagnostic methods, and the medical and surgical approaches to the cardiorespiratory, endocrine, and urinary medicine as well as diagnosis and therapy of oncologic diseases in small animals. Introduction to companion, avian, and exotic pet medicine and surgery.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 434A – Large Animal Stream I (2-18 units)

Course Description: Fundamentals of entry level large animal medicine and surgery to promote development of problem-solving skills for diagnosis, treatment and control of various disease conditions.

Prerequisite(s): Third- and/or fourth-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 434B – Large Animal Stream II (2-18 units)

Course Description: Continuation of fundamentals of entry level large animal medicine and surgery to promote development of problem-solving skills for diagnosis, treatment and control of various disease conditions.

Prerequisite(s): Third- and/or fourth-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 435A – Large Animal Stream—Equine Emphasis (2-18 units)

Course Description: Fundamental and advanced levels of equine medicine, surgery, lameness and reproduction. Focus on management of individual equids.

Prerequisite(s): Third- and/or fourth-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 435B – Large Animal Stream—Livestock Emphasis (2-18 units)

Course Description: Fundamental and advanced levels of livestock medicine and surgery of individual animals and population health. Focus on all livestock species including cattle, sheep, goats, pigs and poultry.

Prerequisite(s): Third- and/or fourth-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 435C – Large Animal Stream—Zoological Medicine Emphasis (2-18 units)

Course Description: Taxon- and topic-based approach to learning zoological medicine. Anatomy, physiology, nutrition, management, anesthesia, medicine, surgery and pathology on non-domestic free-ranging and captive species.

Prerequisite(s): Third- and/or fourth-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 436 – Companion Small Mammals (2-18 units)

Course Description: Fundamental understanding of the etiology, clinical presentation, diagnostic evaluation, treatment, prevention, and control of medical diseases of companion small exotic mammals.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 437 – Reptile & Avian Health (2-18 units)

Course Description: Organized by organ systems to present reptile and avian health issues. Overview of applied anatomy, physiology and clinical pathology of common species will be provided through laboratory opportunities and discussion of common diseases and treatments.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 438 – Poultry (2-18 units)

Course Description: Introduction to practical poultry medicine. Gross pathology, biosecurity and basic diagnostic tests. Visits to hatcheries, broiler, layer and turkey farms.

Prerequisite(s): Third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 439 – Laboratory Animal (2-18 units)

Course Description: Basics of laboratory animal medicine including diseases, medicine, and surgery and comparative biology of the most common species and introduction to regulations. Combination of lecture, wet labs, and projects.

Prerequisite(s): Consent of instructor; third-year standing in the School of Veterinary Medicine.

Learning Activities: Variable 2-18 hour(s).

Grade Mode: Letter.

VET 440 – Business & Communication (1.5 units)

Course Description: Develop professional communication and business skills that are directly applicable in veterinary clinical practice by actively participating in a wide variety of interactive learning opportunities.

Prerequisite(s): Third- and fourth year standing in the School of Veterinary Medicine.

Learning Activities: Discussion 1.50 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 441 – Clinical Pathology (1.5 units)

Course Description: Application of problem-solving and microscopy skills to laboratory data and laboratory specimens. Sections to include hematology, immunology, body fluids, exfoliative cytology, urinalysis, microbiology and clinical chemistry data and interpretation.

Prerequisite(s): Third- and fourth year standing in the School of Veterinary Medicine.

Learning Activities: Discussion 1.50 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VET 442 – Advanced Clinical Skills & Hospital Operations (3 units)

Course Description: Development of advanced clinical skills using skills learned in years 1–3 of the DVM curriculum as a foundation. Detailed orientation to the VMTH and VMACS, with a focus on global hospital operations that will prepare students for case management in year 4 of the DVM curriculum and for clinical practice following graduation. Some evenings and weekends required.

Prerequisite(s): Consent of instructor; third- and fourth-year standing in the School of Veterinary Medicine.

Learning Activities: Clinical Activity 10 hour(s).

Grade Mode: S/U only.

VET 492 – Internship (1-12 units)

Course Description: Internship experience off and on campus in the subject of veterinary science. Internships are supervised by a member of the faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3 to 36 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory only.

Science & Society (SAS)

College of Agricultural & Environmental Sciences

SAS 002 – Feeding the World: Influences on the Global Food Supply (3 units)

Course Description: Scientific principles and dynamic interactions involved in food production, food processing, nutrition, and agribusiness. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): Not open for credit to students who have taken SAS 002V.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL).

SAS 002V – Feeding the World: Influences on the Global Food Supply (3 units)

Course Description: Scientific principles and dynamic interactions involved in food production, food processing, nutrition, and agribusiness. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken SAS 002.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL).

SAS 003 – Science, Technology & Society (4 units)

Course Description: Impact of developments in science and technology on the individual in society and how economics, politics, culture and values affect technological development.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have completed former ABS 018.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

SAS 004Y – Water In Popular Culture (3 units)

Course Description: Analysis of the social construction of modern popular culture and its handling of the environment, focusing on water, as revealed through a survey of Hollywood and independent films.

Learning Activities: Film Viewing 3 hour(s), Discussion 1 hour(s), Web Virtual Lecture 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Scientific Literacy (SL); World Cultures (WC).

SAS 005 – Pathways to Discovery: Science & Society (3 units)

Course Description: Highlights a current issue and/or controversy found in contemporary society and looks at how this problem impacts and is affected by the physical, social and biological sciences. Topics vary.

Learning Activities: Lecture/Discussion 3 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

SAS 006A – Introduction to Career Discovery Groups (1 unit)

Course Description: Overview of campus resources for career exploration and professional development. Intended for first-year students in the College of Agricultural & Environmental Sciences.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Enrollment Restriction(s): Open to students entering College of Agricultural & Environmental Sciences in their first year of college only.

Grade Mode: Pass/No Pass only.

SAS 006B – Career Discovery Seminar (3 units)

Course Description: Overview of skills needed to find and secure career opportunities, including job searches, professional communication, participation in informational and job interviews as both interviewer and interviewee, preparation of resumes and cover letters. Exploration of diverse career options.

Prerequisite(s): SAS 006A; and consent of instructor.

Learning Activities: Lecture 1.50 hour(s), Discussion 1.50 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SAS 006C – Career Discovery in the Field (1 unit)

Course Description: Exploration of prospective careers through visits to businesses, institutions, and agencies and discussions with professionals who work there.

Prerequisite(s): SAS 006B.

Learning Activities: Fieldwork 2 hour(s).

Grade Mode: Pass/No Pass only.

SAS 008 – Water Quality at Risk (3 units)

Course Description: Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination. Decoding popular media coverage of water quality and water contamination.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Not open to students who have successfully completed ERS 008. (Formerly ERS 008.)

Cross Listing: ESM 008.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL); Writing Experience (WE).

SAS 009 – Crisis in the Environment (4 units)

Course Description: Exploration of contemporary environmental issues, including causes, effects, and solutions to a wide range of environmental problems facing the global ecosystem. Political, societal, and economic dimensions of these issues. Topics covered include climate change, air pollution, ocean exploitation, forest management and wildfire, and food and water insecurity.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Writing Experience (WE).

SAS 010 – Water, Power, Society (3 units)

Course Description: Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Cross Listing: HYD 010.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL).

SAS 012 – Plants & Society (4 units)

Course Description: Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food production, raw materials, bioenergy, and environmental conservation. Global population growth and future food supplies.

Prerequisite(s): High school biology.

Learning Activities: Lecture 3 hour(s), Extensive Writing 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed PLB 012. (Former PLB 012.)

Cross Listing: PLS 012.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Writing Experience (WE).

SAS 013 – Disease & Society (3 units)

Course Description: Introduction to the concept of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, and prevention.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL).

SAS 014 – Forests & Society (3 units)

Course Description: Sociology, natural history and current issues of the world's forests. Application of scientific principles in outdoor laboratories and on-campus field trips.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 120 students.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Oral Skills (OL); Scientific Literacy (SL); Writing Experience (WE).

SAS 016 – Soil, Water, & Civilizations (3 units)

Course Description: Exploring past civilizations and examining how management of soil, water, and natural resources allowed them to flourish, decline, or perhaps fail. Important issues include agricultural practices, deforestation, water quality, and land management.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL).

SAS 018 – GIS & Society (3 units)

Course Description: Geographic Information Systems (GIS) as a spatial technology and a tool for change in society. Evaluate physical, biological and social impact of GIS in the context of case studies such as land, water and community planning.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s), Term Paper/Discussion 0.30 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

SAS 020 – Genetics & Society (4 units)

Course Description: Basic concepts of genetics, modern methods of biotechnology, the process of scientific discovery and the public perception of the process; present and future impact of genetics on society.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed SAS 140.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Oral Skills (OL); Scientific Literacy (SL); Writing Experience (WE).

SAS 025 – Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (4 units)

Course Description: Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events. Complexity of global affairs. Decision making under uncertainty.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Tutorial 1 hour(s).

Credit Limitation(s): Students cannot take both SAS 025 & SAS 025V for credit.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

SAS 025V – Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (4 units)

Course Description: Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events. Complexity of global affairs. Decision making under uncertainty.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 1 hour(s), Auto Tutorial 1 hour(s).

Credit Limitation(s): Students cannot take both SAS 025 & SAS 025V for credit.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

SAS 030 – Mushrooms, Molds, & Society (3 units)

Course Description: Fungi as organisms with which humans interact daily, societal issues arising from these interactions. Fungi in medicine, religion, agriculture, and industry, as well as cultural perceptions of fungi.

Learning Activities: Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

SAS 035 – Germs: The Good, the Bad, & the Ugly (3 units)

Course Description: Impact of microorganisms on Earth, Humans and Society. Historical, scientific, and contemporary issues dealing with microbes on natural and built environments.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 60 students.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Writing Experience (WE).

SAS 040 – Photography: Bridging Art & Science (3 units)

Course Description: Photography is used to explore the common ground between art and science. Photographic processes, creativity and aesthetics, chaos and order, principles of space, time and light. Photographic interpretation and documentation of the natural world. Camera required.

Learning Activities: Lecture 2 hour(s), Studio 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

SAS 041 – Understanding Performance: Appreciation of Modern Theatre, Dance, Film & Performance Art (4 units)

Course Description: Relevance of theatre and performance to modern culture, science and society. Approaches to theatre/dance/media/ performance art, integrated into Mondavi Centre for the Arts and Theatre and Dance Department programs.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: DRA 005.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

SAS 042 – Earth, Water, Science, Song (3 units)

Course Description: Fusion of water and soil science with performing arts. Creative communication of scientific concepts and facts through exercises in song writing and poetry. Design, discuss and conduct public performances related to the functioning of the natural world.

Learning Activities: Lecture 2 hour(s), Studio 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Oral Skills (OL).

SAS 043 – Energy, Materials, & Design Over Time (4 units)

Course Description: Global history of design across time, viewed through the lens of the effects of the creation and discovery of new energy sources, processes, and materials on design.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: DES 040A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SAS 070A – Genetic Engineering in Medicine, Agriculture, & Law (5 units)

Course Description: Historical and scientific study of the impact of genetic engineering in medicine, agriculture, and law, including examination of social, ethical, and legal issues raised. Offered in a distance-learning format.

Learning Activities: Lecture 5 hour(s).

Enrollment Restriction(s): Not open to students who have completed BIS 002A, BIS 002B, BIS 002C.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL).

SAS 090A – Issues in Environmental & Resource Sciences (2 units)

Course Description: Discussion of historical and current issues in environmental and resource sciences. Lectures, reading and field trips will provide background for selected topics.

Prerequisite(s): Limited to lower division students.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

SAS 090B – Observing & Writing in Biology (2 units)

Course Description: Observe the interactions between microscopic organisms, conduct simple laboratory experiments, describe and analyze observations and discuss scientific observations and writing.

Learning Activities: Seminar 1 hour(s), Laboratory 1 hour(s), Term Paper.

Grade Mode: Letter.

SAS 090E – Biotechnology-a New Era, a New Struggle (2 units)

Course Description: Animal biotechnology and its applications. Discussion topics include potential societal impacts of various technologies, factors shaping public opinion, and ethical and moral questions arising from new biotechnology applications.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

SAS 090F – Food Distribution in a Hungry World (2 units)

Course Description: The biological, technological, environmental, and socioeconomic factors related to food distribution systems at local, regional, national, and international levels. The potential for increasing world food supply by reducing losses between harvest and consumption.

Learning Activities: Seminar 2 hour(s).

Enrollment Restriction(s): Limited to 15 students.

Grade Mode: Letter.

SAS 090G – Science, Society & the Environment (2 units)

Course Description: Contemporary environmental issues, scientific approaches to addressing these issues, and accompanying societal and ethical considerations.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Letter.

SAS 090X – Lower Division Seminar (1-4 units)

Course Description: Examination of a special topic in Science & Society through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Seminar 1-4 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Letter.

SAS 092 – Internship in Science & Society (1-12 units)

Course Description: Supervised internship on and off campus, in the community, or in institutional settings.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

SAS 097T – Tutoring in Science & Society (2-3 units)

Course Description: Tutoring in undergraduate Science & Society courses. Assisting with leading discussion groups under supervision of instructor(s) and teaching assistants. Acting as liaison between the students and course instructor(s) to foster effective communication and interaction.

Prerequisite(s): Consent of instructor. Lower division standing; completion of course being tutored.

Learning Activities: Discussion/Laboratory 6-9 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SAS 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SAS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Discussion 3-15 hour(s).

Grade Mode: Pass/No Pass only.

SAS 106 – Career Discovery Groups for Transfer Students (1 unit)

Course Description: Campus resources for career exploration and professional development. Skills needed to find and secure career opportunities, including job searches, professional communication, interviews, and preparation of resumes and cover letters. Intended for transfer students.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1.50 hour(s).

Enrollment Restriction(s): Open to transfer students entering the College of Agricultural and Environmental Sciences only.

Grade Mode: Pass/No Pass only.

SAS 109 – Environmental Change, Disease & Public Health (4 units)

Course Description: Analysis of environmental changes from pre-history to the present and their influence on disease distribution, virulence and public health. Focus on critical study of many human-driven environmental changes and the accelerated transformation/spread of pathogens under globalization.

Learning Activities: Lecture/Discussion 3 hour(s), Project.

Credit Limitation(s): Not open for credit to students who have taken HIS 109B.

Cross Listing: HIS 109.

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS); Scientific Literacy (SL); World Cultures (WC).

SAS 110 – Applications of Evolution in Medicine, Human Behavior, & Agriculture (4 units)

Course Description: Applications of evolutionary biology in medicine, human behavior, and agriculture. Examination of the imprint of evolution on the human life cycle from conception to death.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 60 students.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

SAS 120 – Science & Contemporary Societal Issues (3 units)

Course Description: Study of a contemporary societal issue/problem emphasizing critical thinking with information drawn from several disciplines. Multiple instructors illustrate the necessity of an interdisciplinary and cooperative approach in solving important issues. Topics will vary.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

SAS 121 – Global Poverty: Critical Thinking & Taking Action (4 units)

Course Description: Social science and engineering analysis of causes and effects of world poverty and of policies to reduce it via economic growth, foreign aid, and community-level interventions; e.g., in potable water, sanitation, lighting, small scale energy, irrigation, health and microfinance.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

SAS 130 – Contemporary Leadership (4 units)

Course Description: Leadership, including issues, skills, and practices as they relate to individuals, organizations, diverse social settings and communities. Written and verbal communications, personality styles for collaborative work, and ethics.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Seminar 1 hour(s).

Enrollment Restriction(s): Limited to 40 students.

Grade Mode: Letter.

General Education: Oral Skills (OL).

SAS 145 – Digital Communication in Agricultural, Environmental, & Human Sciences (3 units)

Course Description: Use digital media to communicate a succinct, compelling story. In lecture, discussion and activities, create storyboards and scripts, use video, audio, and editing technology, and produce a short media-rich video to effectively convey a message.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 1.50 hour(s), Studio 1.50 hour(s), Project.

Grade Mode: Letter.

General Education: Visual Literacy (VL).

SAS 190X – Science & Society Seminar (1-4 units)

Course Description: In-depth examination at an upper division level of a special topic in Science and Society. Emphasis upon student participation in learning.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Seminar 1 hour(s).

Enrollment Restriction(s): Limited to 20 students.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SAS 192 – Internship in Science & Society (1-12 units)

Course Description: Supervised internship on or off campus, in the community, or in institutional settings.

Prerequisite(s): Consent of instructor. Upper division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

SAS 197T – Tutoring in Science & Society (1-5 units)

Course Description: Tutoring of students in Science & Society courses. Assistance with discussion groups and laboratory sections under supervision of instructor.

Prerequisite(s): Consent of instructor. Upper division standing; completion of course being tutored or the equivalent.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated if tutoring another Science & Society course.

Grade Mode: Pass/No Pass only.

SAS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SAS 199 – Special Study in Science & Society (1-5 units)

Course Description: Special study in Science & Society.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SAS 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

SAS 299 – Graduate Research (1-12 units)

Course Description: Graduate research.

Prerequisite(s): Consent of instructor; graduate student.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

SAS 390 – Teaching Methods in Science & Society (1 unit)

Course Description: Practical experience in methods and problems related to teaching Science & Society courses. Discussion of critical pedagogies specific to teaching of science-societal issues, preparing for and conducting discussion sessions, analyses of texts and supporting material, formulation of assignments, exams.

Prerequisite(s): Consent of instructor; graduate level.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Science & Technology Studies (STS)

College of Letters & Science

STS 001 – Introduction to Science, Technology & Medicine Studies (4 units)

Course Description: History, philosophy, sociology, politics, and cultural studies of science, technology, and medicine. Emphasis on a broad range of perspectives.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

STS 002 – Introduction to the History of Science & Technology (4 units)

Course Description: Introduction to topics and methods of the history of science and technology. Emphasis on understanding the role of science and technology in the modern world through a long-term historical perspective.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: HIS 002.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Scientific Literacy (SL); World Cultures (WC); Writing Experience (WE).

STS 002Y – Introduction to the History of Science & Technology (4 units)

Course Description: Introduction to topics and methods of the history of science and technology. Emphasis on understanding the role of science and technology in the modern world through a long-term historical perspective.

Learning Activities: Lecture 2 hour(s); Discussion 1 hour(s); Web Virtual Lecture 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken HIS 002 or STS 002.

Cross Listing: HIS 002Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Scientific Literacy (SL); World Cultures (WC); Writing Experience (WE).

STS 009 – Beautiful Data (4 units)

Course Description: Data visualizations and the idea of beauty using historical and contemporary examples from around the world. Data visualizations as rhetorical tools, conceptions of beauty, attractiveness, and elegance. Interdisciplinary interpretation of visual data and information.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Visual Literacy (VL); Writing Experience (WE).

STS 010 – Art + Science: Intersections (4 units)

Course Description: Collaborations between artists and scientists. Roles of government, industry, and education in shaping collaborations in the 20th and 21st centuries. Interdisciplinary exploration of scientific and artistic ways of building knowledge, cultures, and infrastructures.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Scientific Literacy (SL); Visual Literacy (VL).

STS 011 – Science on Trial: Law, Science, & Technology in the United States (4 units)

Course Description: Relationships among law, technology, and science. Scientific evidence and testimony, biology education, patenting, and sterilization.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH).

STS 012 – Epidemics & Society (4 units)

Course Description: Epidemics in world history and the cultural impacts of contagious diseases. The roles of science, medicine, media, and the arts in shaping social conceptions of health and illness.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Scientific Literacy (SL); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

STS 016 – Sex, Science, & Society (4 units)

Course Description: Survey of the relationship between sex, science, and society in the history of the modern world. Emphasis on the development of scientific ideas about the human body against broader social, cultural, and political trends and from a global viewpoint.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: HIS 016.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD); Scientific Literacy (SL); World Cultures (WC); Writing Experience (WE).

STS 032 – Drugs, Science & Culture (4 units)

Course Description: Drugs, politics, science, society in a cultural perspective: emphasis on roles of science, government and the media in shifting attitudes toward alcohol, marijuana, Prozac and other pharmaceuticals; drug laws, war on drugs and global trade in sugar, opium, cocaine.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ANT 032.

Grade Mode: Letter.

General Education: Social Sciences (SS); Visual Literacy (VL); Writing Experience (WE).

STS 040A – Media History 1, Gutenberg to Oppenheimer (4 units)

Course Description: History of Media to 1945, with particular focus on mechanically reproduced mass media technologies including the printing press, the newspaper, photography, cinema, radio and early computing technology. Analysis of inter-related cultural and political topics.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Film Viewing 2 hour(s), Extensive Writing.

Cross Listing: CTS 040A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

STS 040B – Media History 2 1945-Present (4 units)

Course Description: History of media from 1945 to present, with particular focus on the development of the computer, digital network and Internet technologies in the context of other media infrastructures like radio, television and satellite networks. Analysis of inter-related cultural/political topics.

Prerequisite(s): STS 040A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Film Viewing 2 hour(s), Extensive Writing.

Cross Listing: CTS 040B.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

STS 050 – Ancient Science (4 units)

Course Description: Study of science in ancient Greece and Rome; consideration of its social context; concentration on the basic concepts of physics the world of medicine and biology the history of mathematics and the practices of astronomy astrology and meteorology.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: CLA 050.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

STS 051 – Ancient Medicine (4 units)

Course Description: Medicine in ancient Greece and Rome; physiological conceptions of the body within scientific and social frameworks; exploration of sanitation technology and health in antiquity; medical treatment of the female body; medicine and the economy.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: CLA 051.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

STS 092 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the program in Science & Technology Studies under the supervision of a member of the faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

STS 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

General Education: Social Sciences (SS).

STS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable 3-15 hour(s).

Grade Mode: Pass/No Pass only.

STS 100 – Methods in Science, Technology, & Medicine Studies (4 units)

Course Description: Methodological approaches for studying science, technology, and medicine in social context. Detailed case studies illustrate different historical, philosophical, sociological, ethical, rhetorical, and political methods of analysis.

Prerequisite(s): STS 001 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing/Discussion.

Credit Limitation(s): Only two units of credit for students who have previously taken STS 020.

Grade Mode: Letter.

General Education: Social Sciences (SS); Scientific Literacy (SL).

STS 101 – Data & Society (4 units)

Course Description: Basic concepts in data science from a socio-cultural perspective. Identifying data stakeholders and their biases, reading and evaluating data documentation, exploring data through analysis and visualization, identifying knowledge gaps, and assessing data ethics.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

STS 102 – Artificial Intelligence in Society (4 units)

Course Description: Artificial intelligence and machine learning in social context. Implications of AI for scientific, legal, educational, economic, and political systems. History of AI research and development. Debates about privacy, security, authenticity, and public policy in the era of AI, with focus on diversity, social justice, and ethical decision-making. Hands-on exercises and projects using AI that generates text and images.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

STS 108 – Intellectual Property in Science (4 units)

Course Description: Historical and conceptual framework for contemporary debates about intellectual property and science. Topics include U.S. patent system and copyright law, interaction between patents and industrial policy, credit in academic and industrial science, role of IP in global knowledge politics.

Prerequisite(s): STS 001; or other Social Science or Humanities writing course.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

STS 109 – Visualization in Science: A Critical Introduction (4 units)

Course Description: Anthropological approaches to scientific visualization techniques, informatics, simulations. Examination of different visualization techniques toward understanding the work involved in producing them, critical assessment of their power and limits, especially when visualizations are used socially to make claims.

Prerequisite(s): STS 001 or STS 020 or ANT 002 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Cross Listing: ANT 109.

Grade Mode: Letter.

General Education: Social Sciences (SS); Visual Literacy (VL); Writing Experience (WE).

STS 110 – Computing, Data, & Law in the United States (4 units)

Course Description: Introduction to the problems in American law and policy borne out of the creation and use of information technologies. Topics include intellectual property, corporate law, privacy, and emerging problems surrounding big data.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

STS 111 – Science & Race (4 units)

Course Description: Race and racial formations in science, technology, and medicine. History of racial thought in scientific and medical research; colonial and decolonial modes of knowledge production; the racialization of technology; intersectional approaches to technoscience, social justice, environmental justice, and health care equity.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ANT 111.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

STS 112 – Visualizing Society with Data (4 units)

Course Description: Analysis and visualization of historical and contemporary data about populations and societies using R. Critical exploration of visual communication of information about people over time and critical assessment of role of data collection and analysis in societies.

Learning Activities: Lecture/Lab 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD); Quantitative Literacy (QL).

STS 113 – Business & Technology in the United States: From Electricity to E-Commerce (4 units)

Course Description: Historical introduction to the joint development of business and technology in the United States from the late-19th century to the present day.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

STS 114 – The Global Information Age (4 units)

Course Description: Introduction to the global spread of information technologies like computers and smartphones. Special focus on their social, cultural, and commercial impact.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

STS 115 – Data Sense & Exploration: Critical Storytelling with Analysis (4 units)

Course Description: Data science and the communication of data insights through critical storytelling. Attention to the historical and social contexts of data analysis, emphasizing narrative, visualization, and exploration. Introduction to the R computing environment for data analysis.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL).

STS 120 – Religion, Magic & Science (4 units)

Course Description: Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Cross Listing: RST 120.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC).

STS 121 – Special Topics in Medical Anthropology (4 units)

Course Description: Introduction to critical medical anthropology. Topics include anthropological analysis of bio-medicine, psychiatry, systems of knowledge and healing, the body, emotions, and clinical encounters in a cross-cultural perspective.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: ANT 121.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

STS 122 – Health & Medical Technologies (4 units)

Course Description: Critical/historical examination of medical technologies: imaging, pharmaceuticals, genetics, implants/devices. Exploration of mutually constitutive relationship between health, medical technologies, social difference (race/gender/class/sexuality).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

STS 129 – Health & Medicine in a Global Context (4 units)

Course Description: Recent works in medical anthropology and the science studies of medicine dealing with social and cultural aspects of global health issues such as AIDS, pandemics, clinical trials, cultural differences in illnesses, diabetes, organ trafficking, medical technologies, illness narratives, and others.

Prerequisite(s): ANT 002 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: ANT 129.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

STS 130A – From Natural History to the History of Nature (4 units)

Course Description: Evolution and demise of natural history as a discipline from Aristotle to Linnaeus. Considers ancient views of nature and its Renaissance rediscovery; the emergence of biology, botany, geology, and zoology; the history of taxonomy and classification.

Prerequisite(s): HIS 135A recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Writing Experience (WE).

STS 130B – History of Modern Biology (4 units)

Course Description: Development of modern biology from pre-Darwinian roots to the present. Considers emergence of modern biological specialities and consolidation of biological theory around evolutionary ideas. History of allied fields such as genetics, paleontology, embryology, ecology, systematics and molecular biology.

Prerequisite(s): STS 130A recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Writing Experience (WE).

STS 131 – Darwin (4 units)

Course Description: Students will explore the life and times of Charles Darwin and will trace the development of evolutionary thinking before and after the Origin of Species to appreciate its place in Victorian society and in the corpus of Darwins thought.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Writing Experience (WE).

STS 136 – Scientific Revolution (4 units)

Course Description: Rise of modern science in Europe, 1500–1750.

Transformation of ideas about nature, knowledge, medicine, and technology in the age of Copernicus, Vesalius, Galileo, Descartes, and Newton.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Cross Listing: HIS 136.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); World Cultures (WC).

STS 140 – Science & Race (4 units)

Course Description: Race and racial formations in science, technology, and medicine. History of racial thought in scientific and medical research; colonial and decolonial modes of knowledge production; the racialization of technology; intersectional approaches to technoscience, social justice, environmental justice, and health care equity.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL).

STS 150 – Gender & Science (4 units)

Course Description: Interdisciplinary approach to the relations between gender and science. Topics include the biological and cultural construction of sexual difference, the role of women as practitioners of science, and feminist approaches to science.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

STS 151 – Media Theory (5 units)

Course Description: Critical and theoretical approaches to the emergence of new technologies since the invention of photography. Examine various approaches to media (formalist, semiotic, structuralist, Frankfurt School, cybernetics, visual and game theory).

Prerequisite(s): CDM 002 or CDM 003 recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Film Viewing 3 hour(s), Extensive Writing.

Cross Listing: CDM 151.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

STS 152 – Sounding Data: Critical Approaches to Sonification (4 units)

Course Description: Critical and creative approaches to auditory data and display in art, science, and technology. Practical introduction to sonification techniques through sound studies and sensory ethnography. Heuristic listening and collaborative sound design.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

STS 160 – Ghosts of the Machine: How Technology Rewires our Senses (4 units)

Course Description: Historical, aesthetic and critical approaches to how information technologies produced ghost effects or a sense of terror in response to new media like the photograph, gramophone, film, typewriter, computer, Turing Machine. Focus on technological media transforms sense perception.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Cross Listing: TCS 160.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Visual Literacy (VL); Writing Experience (WE).

STS 161 – Time: Mechanism & Measurement (4 units)

Course Description: Cultural concepts of time; units and instruments of time measurement; historical differences in the social organization of time; and time measurement in 20th-century science.

Prerequisite(s): STS 001.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

STS 162 – Surveillance Technologies & Social Media (4 units)

Course Description: Study of the ubiquitous presence of CCTV, face recognition software, global tracking systems, biosensors, and data mining practices that have made surveillance part of our daily life. Exploration of the boundary between security and control, information and spying.

Prerequisite(s): STS 020 or TCS 001.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s), Term Paper.

Cross Listing: CTS 162.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Oral Skills (OL); Visual Literacy (VL); Writing Experience (WE).

STS 163 – History of Communication Technologies (4 units)

Course Description: History of communication technologies from the late Middle Ages to the 20th century. Questions of technology, knowledge, power and culture. Particular attention to questions about information and truth.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

STS 164 – Writing Science (4 units)

Course Description: Texts and writing practices in the production of scientific knowledge. Surveys the literary structure of scientific arguments; history of scientific genres; rhetoric and semiotics in scientific culture; graphical systems in the experimental laboratory; narratives of science, including science fiction.

Prerequisite(s): STS 001 or ENL 003 or ENL 003V; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Cross Listing: ENL 164.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Scientific Literacy (SL); Writing Experience (WE).

STS 165 – Built Environments (4 units)

Course Description: Built environments, which are designed to support forms of life. Their role as carriers of cultural memory and in turning knowledge of nature into social assets. Historical constellations of knowledge, social order, and power.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Social Sciences (SS).

STS 172 – Video Games & Culture (4 units)

Course Description: Critical approaches to the study of video games, focusing on formal, historical, and cultural modes of analysis. History of software and hardware in North American and global contexts. Relations of games to society, politics, economics, media, etc.

Prerequisite(s): CDM 072 or ENL 072 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken CTS 172 (former course CTS 172).

Cross Listing: CDM 172, ENL 172.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Visual Literacy (VL); Writing Experience (WE).

STS 173 – Science Fiction (4 units)

Course Description: The literary modes and methods of science fiction. Representative texts, authors, and themes of the genre; e.g., time travel, alternative universes, and utopias. Relations of science fiction to science, philosophy, and culture.

Prerequisite(s): STS 001 or ENL 003 or ENL 003V; or equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Cross Listing: ENL 173.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

STS 175 – Laboratory Studies Lab (4 units)

Course Description: Hands-on training in Science & Technology Studies fieldwork, interviewing, archival research and data analysis. Review of laboratory studies literature, informed consent procedures, ethics, and care of the data. Individual and group projects possible.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Discussion/Laboratory 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

STS 176 – Sociology of Knowledge, Science, & Scientific Knowledge (4 units)

Course Description: Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Cross Listing: SOC 176.

Grade Mode: Letter.

General Education: Social Sciences (SS).

STS 180 – Topics in Science & Technology Studies (4 units)

Course Description: In-depth treatment of selected topics in anthropology, history, philosophy, and sociology of science and related fields. Possible topics include science and society, science and power, scientific explanation, technology and culture, theory testing.

Prerequisite(s): Course in Science Technology Studies (STS) or other course-work relevant to topic.

Learning Activities: Term Paper, Seminar 3 hour(s).

Repeat Credit: May be repeated when content varies.

Grade Mode: Letter.

General Education: Social Sciences (SS).

STS 190 – Seminar in Science, Technology & Medicine Studies (4 units)

Course Description: Intensive reading, discussion, research and writing by small groups in selected topics of science, technology, and medicine studies scholarship. Emphasis on individual research projects.

Prerequisite(s): Open to junior and senior Science Technology Studies majors only.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

STS 192 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the program in Science & Technology Studies under the supervision of a member of the faculty.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 3 time(s) up to 12 units.

Grade Mode: Pass/No Pass only.

STS 194A – Research in Science & Technology Studies (4 units)

Course Description: Directed reading and research in preparation for a thesis project.

Prerequisite(s): Consent of instructor; senior standing faculty approval recommended.

Learning Activities: Independent Study, Extensive Writing, Tutorial 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

STS 194B – Advanced Research in Science & Technology Studies (4 units)

Course Description: Development of a research thesis, supervised by a faculty member.

Prerequisite(s): STS 194A; consent of instructor; senior standing faculty approval recommended.

Learning Activities: Term Paper, Tutorial 3 hour(s), Independent Study.

Grade Mode: Letter.

General Education: Social Sciences (SS).

STS 195 – Research in Data Studies (4 units)

Course Description: Analysis of real-world data in the form of case studies engaging current issues. Emphasizes teamwork in the identification of problems and sources of relevant data; data cleaning, exploration, analysis, and visualization using R; and interpretation and presentation of results to a variety of stakeholders in oral, visual, and textual formats.

Prerequisite(s): STS 101; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

STS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

STS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

STS 200 – Theories & Methods in Science & Technology Studies (4 units)

Course Description: Theories and methods of Science & Technology Studies as a field of critical and empirical scholarship, and examination of various contexts in which STS has emerged worldwide.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) with consent of instructor.

Grade Mode: Letter.

STS 205 – Contemporary Issues in Science & Technology Studies (4 units)

Course Description: Recent topics, debates, and innovative methods in Science & Technology Studies. Issues may include the governance of technoscience, science and media, data studies, indigenous knowledge, science and globalization, citizen science, new and emerging technologies.

Learning Activities: Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

STS 210 – Digital Technologies: History & Theory (4 units)

Course Description: Introduction to the history and theory of digital technologies. Human-machine interaction, cybernetics, software studies, and global networking.

Learning Activities: Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

STS 250 – History & Philosophy of Science (4 units)

Course Description: Interdisciplinary seminar in the history and philosophy of science. Focuses on issues such as historiography, methodology, and the conceptual foundations of science.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

STS 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

STS 299 – Research (1-12 units)

Course Description: Research,

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

STS 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Social Theory & Comparative History (STH)

Graduate Studies

STH 250 – Research in Social Theory & Comparative History (4 units)

Course Description: Theoretically informed research in comparative history. Students read exemplary works and learn to frame their own research projects. Presentations include Center for History, Society, & Culture faculty and visitors discussing current research.

Prerequisite(s): Admission to Social Theory Comparative History Designated Emphasis.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

STH 290 – Advanced Topics in Social Theory & Comparative History (4 units)

Course Description: Interdisciplinary study of particular substantive problems in social theory and comparative history. Topics vary.

Prerequisite(s): HIS 204 or SOC 242A; and consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

STH 295 – Advanced Group Research in Social Theory & Comparative History (1 unit)

Course Description: Participation in research workshops sponsored by the Center for Comparative Research for History, Society, & Culture.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

STH 296 – Theory & Society Journal Editorial Workshop (1-4 units)

Course Description: Reading and offering workshop critiques of papers submitted for publication. Reading and discussion of other relevant work in history and the social science.

Learning Activities: Workshop 1 hour(s), Independent Study 3 hour(s).

Repeat Credit: May be repeated 36 unit(s) with consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

Sociology (SOC)

College of Letters & Science

SOC 001 – Introduction to Sociology (5 units)

Course Description: Principles and basic concepts of sociology. The study of groups, culture, collective behavior, classes and caste, community and ecology, role, status, and personality.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SOC 002 – Self & Society (4 units)

Course Description: Exploration of how self and identity are formed and transformed by socialization and social interaction in relation to roles, groups, institutions, power, and social change. Consideration of how people make decisions, fall in love, and come to blows.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SOC 003 – Social Problems (4 units)

Course Description: General sociological consideration of contemporary social problems in relation to sociocultural change and programs for improvement.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SOC 004 – Immigration & Opportunity (4 units)

Course Description: Social and demographic analysis of immigration: motives and experiences of immigrants; immigration and social mobility; immigration, assimilation, and social change; multicultural societies. Detailed study of immigration into the U.S., with comparative studies of Europe, Australia, and other host countries.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC).

SOC 005 – Global Social Change: An Introduction to Macrosociology (4 units)

Course Description: Introduction to change and diversity in world history, including the United States. Examines population and family, technological change and economic development, power and status, culture and identity.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); World Cultures (WC).

SOC 006 – Health & Illness (4 units)

Course Description: Introduction to the sociology of health and illness, including social determinants of health, social inequalities in health/health disparities, social construction of health, the organization of health care, and the politics of health care reform.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

SOC 007 – Race & Ethnicity (4 units)

Course Description: Introduction to the sociology of race and ethnicity in the U.S., including historical changes in racial and ethnic categories, mechanisms of racism, anti-racist social movements, the role of social policy in shaping patterns of racial inequality.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SOC 011 – Sociology of Labor & Employment (4 units)

Course Description: Labor and employment issues in the contemporary United States with some use of historical and comparative materials. Topics include strategies pursued by employers and employees, labor market discrimination and the role of social policies in shaping labor markets.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 012Y – Data Visualization in the Social Sciences (4 units)

Course Description: Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations.

Learning Activities: Lecture 2 hour(s), Laboratory 1.50 hour(s), Web Virtual Lecture 1.50 hour(s).

Cross Listing: CMN 012Y, PSC 12Y, POL 012Y.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL); Visual Literacy (VL).

SOC 025 – Sociology of Popular Culture (4 units)

Course Description: Social mechanisms that shape modern popular culture. High, folk, and mass culture: historical emergence of popular culture. Mass media, commercialization, ideology and cultural styles. Theories and methods for analyzing cultural expressions in pop music, street art, film, television, and advertising.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Visual Literacy (VL).

SOC 046 – Introduction to Social Research Methods (4 units)

Course Description: Examination of logic and methods of sociological research. Selection and definition of problems of investigation, data-gathering techniques, and sampling.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken SOC 046A.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 056 – Introduction to Social Statistics (5 units)

Course Description: Data-analysis techniques, measurement, scaling, multivariate analysis, and quantitative measures of association.

Prerequisite(s): SOC 046 recommended.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken SOC 046B.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

SOC 056Y – Introduction to Social Statistics (5 units)

Course Description: Data-analysis techniques, measurement, scaling, multivariate analysis, and quantitative measures of association.

Prerequisite(s): SOC 046 recommended.

Learning Activities: Lecture/Discussion 1.5 hour(s), Web Virtual Lecture 1.5 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken SOC 046B or SOC 056.

Grade Mode: Letter.

General Education: Quantitative Literacy (QL).

SOC 092 – Internship & Research Practicum (1-6 units)

Course Description: Supervised internship and study in an agency, organization, or institution; application of sociological concepts to the work experience.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-18 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Pass/No Pass only.

SOC 098 – Directed Group Study (1-5 units)

Course Description: Primarily intended for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SOC 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SOC 100 – Origins of Modern Sociological Theory (4 units)

Course Description: Origins of modern sociological thought. Special emphasis on three major theorists from the classical tradition of 19th-century European social thought: Karl Marx, Max Weber, and Emile Durkheim.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 103 – Evaluation Research Methods (4 units)

Course Description: Surveys applications of research methods to the evaluation of social programs, primarily emphasizing methodological issues, e.g., research design and data collection; uses of evaluation research are also discussed and placed in theoretical context.

Participation in an evaluation project.

Prerequisite(s): SOC 001 or SOC 002 or SOC 003 recommended; SOC 046A and SOC 046B recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Scientific Literacy (SL).

SOC 104 – The Political Economy of International Migration (4 units)

Course Description: Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation.

Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 004 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Cross Listing: IRE 104.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

SOC 106 – Intermediate Social Statistics (5 units)

Course Description: Intermediate level course in statistical analysis of social data, emphasizing the logic and use of statistical measures, procedures, and mathematical models especially relevant to sociological analysis.

Prerequisite(s): SOC 046B or SOC 056 or SOC 056Y; or consent of instructor.

Learning Activities: Lecture 4 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL);

Scientific Literacy (SL).

SOC 118 – Political Sociology (4 units)

Course Description: Relation of social cleavages and social cohesion to the functioning of political institutions; the social bases of local and national power structures; social sources of political movement, analysis of concepts of alienation, revolution, ideology, ruling class, and elite.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s), Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 120 – Deviance (4 units)

Course Description: Social structural sources, institutional practices and microprocesses associated with illegality, evil, disease, immorality, disability, racial and class differences, citizenship, and the body. Special emphasis on expert knowledge and the production and management of social difference.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 122 – Sociology of Adolescence (4 units)

Course Description: Chronological age and social status; analysis of social processes bearing upon the socialization of children and adolescents. The emergence of youth cultures. Generational succession as a cultural problem.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s), Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 124 – Education & Inequality in the U.S. (4 units)

Course Description: Functions of schooling in contemporary U.S. society. Racial, ethnic, social class, and gender inequalities in student outcomes. Consideration of classic and current controversies in the sociology of education and education policy.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 125 – Sociology of Culture (4 units)

Course Description: Sociological approaches to study of historical and contemporary culture and mass media, and their structuring in relation to social actors, institutions, stratification, power, the production of culture, audiences, and the significance of culture in processes of change.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 126 – Social Interaction (4 units)

Course Description: Everyday interaction in natural settings; ethnographic approaches to the understanding of social meanings, situations, personal identity and human relationships. Particular attention to the work of Erving Goffman and to principles of field observation and qualitative analysis.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 128 – Interracial Interpersonal Dynamics (4 units)

Course Description: Analysis of the influences of cultural differences and racial stratification on interpersonal interaction in instrumental settings (e.g., work, education, political action) and intimate settings (e.g., friendship, love, marriage, family). Minority/majority relationships.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 129 – Sociology of Black Experience in America (4 units)

Course Description: Survey of historical and contemporary theoretical sociological perspectives on the Black experience in United States. Emphasis on comparisons of Black sociological perspectives and mainstream perspectives of specific sociologists.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SOC 130 – Race Relations (4 units)

Course Description: Functions of the social definitions of race and racial groups. Analysis of racial conflict, oppression, and other forms of ethnic stratification. Models of ethnic interaction and social change. Emphasis on racial relationships within the U.S.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SOC 131 – The Family (4 units)

Course Description: Contemporary family life in historical and cross-cultural perspective. How different family forms arose, their significance today and prospects for further family change. Attention to power relations within and beyond the family and to the social implications of family transformation.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SOC 132 – The Sociology of Gender (4 units)

Course Description: Analysis of biological, psychological, cultural and structural conditions underlying the status and roles of men and women in contemporary society, drawing on a historical and comparative perspective.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SOC 133 – Sexual Stratification & Politics (4 units)

Course Description: Analysis of origins, dynamics, and social implications of sexual stratification. Examination of classical and contemporary theorists such as Engels, Freud, J.S. Mill, de Beauvoir, Juliet Mitchell, D. Dinnerstein. Attention to selected issues in social movements for and against sexual equality.

Prerequisite(s): Consent of instructor; SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 135 – Social Relationships (4 units)

Course Description: Social and cultural factors influencing friendships and intimate relationships. Topics include relationship development, relationship maintenance, and relationship loss.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 137 – African American Society & Culture 1790 to 1990 (4 units)

Course Description: Political and social transformations of African American communities between 1790 and 1990, as seen through film, literature, and music. Topics include: Black consciousness, Afro-Slave culture, The Harlem Renaissance, and contemporary Hip Hop.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SOC 138 – Economic Sociology (4 units)

Course Description: Overview of the rapidly growing field of economic sociology. Focus on variations in the ways that markets are organized. The relationship between individual and collective rationality will also be emphasized.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); World Cultures (WC).

SOC 139 – Corporations & Society (4 units)

Course Description: Study of the history and power of the modern corporation; corporate organization; politics, the state, and the corporation; labor unions and the labor process; competition, regulation and international markets; the multinational and conglomerate corporation; and mass markets and consumerism.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH).

SOC 140 – Social Stratification (4 units)

Course Description: Systems of social ranking, theories of stratification; power, prestige, culture, and styles of life of various social classes; social mobility and its consequences for social structure.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s), Project.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SOC 141 – Industrialization & Social Change (4 units)

Course Description: Selected technological and social factors.

Preconditions of economic development and industrialization. Social, political, and cultural issues at various levels of economic development. Major historical differences and major current trends. Emphasis either on highly industrialized countries or on less developed countries.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s), Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 143A – Urban Society (4 units)

Course Description: Theories of city origins. Analysis of the historic process of urbanization and of varying city types.

Comparison of American and European experience of metropolitanization, counterurbanization, and neighborhood change. Consideration of competing theories of urban growth and change and competing visions of the urban future.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper, Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 143B – Sociology of City Life (4 units)

Course Description: Critical dissection of the loss of community issue. Analysis of the organization of primary ties in the city, of the culture of urban public life and of the learning of city skills.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper, Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 144 – Agriculture & Society (4 units)

Course Description: Development of agriculture as a major enterprise in modern society with the concomitant reduction in the labor force and family farms. Analysis of issues including mechanization, migrant labor, corporate farming, and public resource policy.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 145A – Sociology of Third World Development (4 units)

Course Description: Introduction to theories and contemporary issues in the sociology of development. Topics such as urbanization, rural/agrarian change, class, status groups, international division of labor, sectoral shifts, international capital, informal economy, gender, and political processes are analyzed within a comparative-historical framework.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

SOC 145B – Gender & Rural Development in the Third World (4 units)

Course Description: Political-economic analysis of women and work during the process of socioeconomic change in the world with particular attention to the family/household context.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

SOC 146 – Sociology of Religion (4 units)

Course Description: Relationship between social structures and religions. The social setting of the major world religions. Religious innovators and institutionalization (churches, sects, cults). Secularization in the modern world and the rise of secular ideologies.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper, Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 147 – Sociological Perspectives on East Asia (4 units)

Course Description: Sociological theories and concepts applied toward understanding East Asian society. Emphasis on the political structure, stratification, and economy in China and Japan. Analysis of historical and contemporary similarities and differences.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper, Project.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

SOC 148 – Collective Behavior (4 units)

Course Description: Study of behavior of human crowds and masses in extraordinary circumstances, including crowd panics, mass scares, collective protests, riots, revolutionary situations, ecstatic and revivalist gatherings, crazes, fads, and fashions.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 150 – Criminology (4 units)

Course Description: Sociological analysis of criminal behavior in relation to social structure and the criminalization process.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s), Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 151 – The Criminal Justice System (4 units)

Course Description: Sociological analysis of the different components of the criminal justice system including the emergence and interpretation of criminal laws, the contemporary roles and functions of the police, criminal courts and correctional institutions.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 152 – Juvenile Delinquency (4 units)

Course Description: Study of juvenile delinquency in relation to the family, peer groups, community, and institutional structures. Consideration of processing of the delinquent by formal agencies of control.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s), Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 153 – The Sociology of Childhood (4 units)

Course Description: Contemporary childhood in historical, cross-cultural, and global perspectives. Examine changes in understanding of the nature of childhood and "best interests of the child" by class, race, gender, geographic region, and historical period.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC).

SOC 155 – Sociology of Law (4 units)

Course Description: Law considered as social control; relation of legal institutions to society as affecting judicial decision making and administration of justice. Lawyers as an occupational group. Legal reform.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 156 – Social Movements (4 units)

Course Description: Analysis of several aspects of social movements: mobilization, forms of organization, ideology, recruitment, leadership, strategies and tactics, development, effects. Frequent use of sound and film materials.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper, Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 157 – Social Conflict (4 units)

Course Description: Analysis of the causes, dynamics, and regulation of social conflict within and between various kinds of social groupings with particular reference to nonviolent methods of waging and regulating conflict.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper, Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 159 – Work, Employment, & Careers in the 21st Century (4 units)

Course Description: Historical and contemporary overview of employment, work, and occupations in American society. Study of authority and power relations, labor markets, control systems, stratification, and corporate structures, and how these factors shape work in diverse or organizational and employment setting.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 160 – Sociology of the Environment (4 units)

Course Description: Production, consumption, and urban expansion. Basic social logics surrounding current problems of resource scarcity (environmental extractions) and excess wastes (environmental additions). Ways that society can change and re-organize itself to become more environmentally conscious and hence ecologically sustainable.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC).

SOC 161 – The Civil Justice System (4 units)

Course Description: Empirical studies of the different aspects of the civil justice system in the United States and Global Society including the litigation, juries, civil rights, and international laws relating to trade, the environment, and human rights.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

SOC 162 – Society, Culture, & Health (4 units)

Course Description: Analysis of how socio-cultural factors shape illness experience. Evaluation of how certain conditions come to be understood as health conditions; illness identities and biographies; doctor-patient interactions; biomedical cultures; how race, ethnicity, and gender shape health practices.

Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 006 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

SOC 163 – Population Health: Social Determinants & Disparities in Health (4 units)

Course Description: Survey of the social determinants and disparities in health: measurement of population health; health transitions and global disparities; domestic disparities in health by class, race/ethnicity, nativity, gender, and sexual orientation; social determinants including social support, social stress, neighborhoods, and policy.

Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 006 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

SOC 164 – Health Policy & Politics (4 units)

Course Description: Introduction to health policy and politics, including health care access and delivery, and policies related to health inequalities, the social determinants of illness and health behaviors.

Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 006 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

SOC 165 – Death & Dying (4 units)

Course Description: Contemporary social dimensions of death, including cultural and historical variation. Social processes, organization, demographics, and cultural dimensions of death; social meanings of death and dying; medicalization; bereavement; hospice and funeral work; race, class, and gender.

Prerequisite(s): SOC 001, SOC 002, SOC 003 or SOC 006 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken SOC 127.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 170 – Population (4 units)

Course Description: Introduction to the study of human population, including theories and statistical measures; social causes and consequences of population trends; changes in population structure; geographical distribution, migration, sociopsychological factors affecting fertility.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper, Project.

Grade Mode: Letter.

General Education: Social Sciences (SS); Quantitative Literacy (QL).

SOC 171 – Sociology of Violence & Inequality (4 units)

Course Description: How systems of social inequality organize the practice of violence. Definitions of violence and issues affecting the social capacity for violence. Analysis and comparison of different forms of violence associated with race, class, gender relations and social organization.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 172 – Intersections of Race, Gender & Class (4 units)

Course Description: Sociological approaches to the intersections of race, class, gender and other forms of social difference. Theories of racism and racial identities. Application of intersectional analyses to historical and contemporary social problems and social movements.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion.

Grade Mode: Letter.

General Education: Social Sciences (SS); Domestic Diversity (DD).

SOC 173 – Sociology Through Literature (4 units)

Course Description: Introduction to analysis of literature as sociological data. Reading of numerous works on American and other societies by authors such as Steinbeck, Lewis, Dreiser, Schulberg, Orwell, etc.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper, Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 174 – American Jewish Identities & Communities (4 units)

Course Description: Sociology of Jewish life, analyzing challenges to Jewish identity and community in the diaspora. Diversity within the Jewish community, Americanization, women, new immigrants, post-Holocaust Jewish identity, and LGBT Jews.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 176 – Sociology of Knowledge, Science, & Scientific Knowledge (4 units)

Course Description: Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Cross Listing: STS 176.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 178 – Punishment & Corrections (4 units)

Course Description: Origins, characteristics, and consequences of various sanctions and punishment regimes including fines, banishment, incarceration, deportation, and execution.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 180A – Complex Organizations (4 units)

Course Description: Develops a sociological approach to organizations theory. Designed to introduce sociological concepts, address the alternative psychological and economic models, and involve students in the practice of organizational analysis.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper, Project.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 185 – Social Policy (4 units)

Course Description: Examination of social policies that affect the well-being of individuals, families and groups, including such policies as old-age pensions, health insurance, and aid to the poor.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

SOC 185Y – Social Policy (Hybrid Version) (4 units)

Course Description: Examination of social policies that affect the well-being of individuals, families and groups, including such policies as old-age pensions, health insurance, and aid to the poor.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Web Virtual Lecture 1.50 hour(s), Lecture 1.50 hour(s), Term Paper/Discussion 1 hour(s).

Credit Limitation(s): Students may not take both SOC 185 and SOC 185Y for credit.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

SOC 188 – Markets, Culture & Inequality in China (4 units)

Course Description: Economic and political systems and patterns of social interaction and inequality in China. State and corporate structures and practices, market and consumer behaviors, social mobility and stratification, protest and resistance.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC).

SOC 192 – Internship & Research Practicum (1-6 units)

Course Description: Supervised internship and study in an agency, organization, or institution; application of sociological concepts to the work experience. Maximum of 4 units may be counted toward the major.

Prerequisite(s): Consent of instructor; must have 84 units complete; faculty approval of proposed internship.

Learning Activities: Internship 3-18 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Pass/No Pass only.

SOC 193 – Workshop in Field Research (2 units)

Course Description: Overview of the process of collecting, recording, analyzing, and reporting qualitative social data. Emphasis on application of principles; each participant completes an original research project.

Prerequisite(s): SOC 046A; (SOC 192 (can be concurrent) or SOC 199 (can be concurrent)); SOC 192 or SOC 199 required concurrently for 2-4 units; senior standing.

Learning Activities: Lecture/Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have completed SOC 194HA.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

SOC 194HA – Special Study for Honors Students (4 units)

Course Description: Directed reading and researching in the preparation for writing a Senior Honors Thesis for SOC 194HB.

Prerequisite(s): Senior standing and admission to the Honors Program.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 194HB – Special Study for Honors Students (4 units)

Course Description: Under direction of faculty advisor, create a Senior Honors Thesis.

Prerequisite(s): SOC 194HA; senior standing and admissions to the Honors Program.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 195 – Special Topics in Sociological Analysis (4 units)

Course Description: In-depth examination of topics in sociology. Emphasis on student research and writing.

Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SOC 197T – Tutoring in Sociology (1-4 units)

Course Description: Activities vary depending on the nature of the course assignment. May include (but not limited to) tutoring on course material, advising on projects and papers, and leading discussion groups.

Prerequisite(s): Upper division standing; completion of appropriate course with distinction.

Learning Activities: Tutorial 3-12 hour(s).

Grade Mode: Pass/No Pass only.

SOC 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SOC 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study.

Prerequisite(s): Consent of instructor; must have 84 units complete and faculty approval.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SOC 201 – Social Research (4 units)

Course Description: Comparative survey of sociological inquiry, taught as a practicum. Philosophy of social science; values and research; research agendas and research problem formulations; research process; explanations; interpretation; study design; concept formation, measure, sampling, data acquisition, inference; rhetoric and presentation of findings.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper 1 hour(s).

Grade Mode: Letter.

SOC 206 – Quantitative Analysis in Sociology (4 units)

Course Description: Survey of the statistical models and methods that serve as a foundation for quantitative research in sociology, with an emphasis on multivariate regression analysis, as well as measurement theory and time series analysis.

Prerequisite(s): SOC 106.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

SOC 207A – Methods of Quantitative Research (4 units)

Course Description: Principles of study design, examination of measurement, survey research methods and multivariate analysis. Stresses actual practice of techniques. Carry out quantitative data analysis using packaged computer programs.

Prerequisite(s): SOC 106; or the equivalent.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 8 unit(s) with instructor approval.

Grade Mode: Letter.

SOC 208 – Topics in Advanced Quantitative Methods in Social Science (4 units)

Course Description: Analysis of the logic and application of an advanced statistical model; the particular model chosen may vary. Emphasis on the model's assumptions, its strengths and weaknesses, its application for social science inquiry, and the relationship between methods and social theory.

Prerequisite(s): SOC 206; or the equivalent and graduate standing; major graduate students.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Letter.

SOC 215 – Economy, Polity, & Society (4 units)

Course Description: Introduces students to topics and selected issues in the related fields of economic and political sociology and political economy.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate students in sociology & related disciplines.

Grade Mode: Letter.

SOC 220 – Deviance, Law, & Social Control (4 units)

Course Description: Report and discussions of literature on selected forms of deviance in relation to law and formal social control. Agency contacts and exploratory research projects.

Prerequisite(s): SOC 120; or consent of instructor.

Learning Activities: Seminar 3 hour(s), Project.

Grade Mode: Letter.

SOC 224 – Sociology of Education (4 units)

Course Description: Overview of sociological theories accounting for the form, role, and evolution of educational systems. Emphasis on empirical research on education and social stratification and application to educational policy.

Prerequisite(s): SOC 206 or equivalent recommended.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students or consent of instructor.

Grade Mode: Letter.

SOC 225 – Cultural Sociology (4 units)

Course Description: Explores the varied ways in which culture is understood in the social sciences and the research questions that follow from contrasting viewpoints. The approach is historically informed and focused on changing cultural forms in relation to industrialization and post-modernism.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SOC 226 – Sociological Social Psychology (4 units)

Course Description: Advanced study of the varying approaches, methods, issues and topical concerns of sociological social psychology. Analysis of central and representative historical and contemporary works.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Grade Mode: Letter.

SOC 227 – Sociology of Reproduction (4 units)

Course Description: Recent social science scholarship in such areas as teenage pregnancy, family planning, abortion, adoption, AIDS, and new reproductive technologies; focus on the current situation in the United States.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

SOC 230 – Ethnic (Race) Relations (4 units)

Course Description: Advanced study of the determinants of ethnic groupings and their interrelationships. Major theme will be the patterns of ethnic stratification and causes of ethnic conflict. Specific focus upon dominance and resistance to dominance. Influence of social science research.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

SOC 233 – Gender, Culture, & Local/Global Transformation (4 units)

Course Description: Focus on critical approach to women and development; analyze local transformations with global connections within specific cultural contexts. Covers theory, methodological issues, and relationship between theory and practice.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SOC 234 – Gender, Family, & Society (4 units)

Course Description: Major theoretical traditions and concerns in family sociology and sociology of gender. Analysis of selected classical and contemporary works representative of functionalist, Marxist, psychoanalytic, feminist and critical theoretical approaches to these subjects; e.g., Engels, Parsons, Freud, Horkheimer, Goode, Lasch, Mitchell. Emphasis on macro and historical questions.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SOC 242A – Methodologies of Sociohistorical Inquiries (4 units)

Course Description: Introduction to comparative and case methodological approaches to sociohistorical inquiry, theoretical and practical issues, and substantive research agendas ranging from study of large-scale social transformations to close microhistories, including research agendas being developed by students in the course.

Prerequisite(s): Consent of instructor not required for graduate students in the Social Sciences Division or the Humanities, Arts, and Cultural Studies Division; required for undergraduates and students from other divisions or colleges.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SOC 243 – Urban Society (4 units)

Course Description: Broad overview of the issues and concerns of the field of urban sociology. Special emphasis on the human experience of urban living in contemporary, cross-cultural or historical settings.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SOC 245 – Developing Societies (4 units)

Course Description: Analysis of social and economic problems of developing societies from the standpoint of theory and research on modernization and underdevelopment. Nature of third world dependency and interdependence in the global political economy.

Prerequisite(s): Graduate student status or familiarity with problems of developing societies.

Learning Activities: Seminar 3 hour(s), Term Paper, Project.

Grade Mode: Letter.

SOC 248 – Social Movements (4 units)

Course Description: Analysis of current issues in and contributions to the study of collective behavior and social movements; particular focus upon the strategies and tactics of social movements.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SOC 254 – Sociology of Health & Illness (4 units)

Course Description: Sociological perspectives and methods on the study of health and illness. Select topics for supervised research. Research paper required.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Open to graduate or professional students.

Grade Mode: Letter.

SOC 255 – Sociology of Law (4 units)

Course Description: Analysis of the nature of the legal process and its impact on social behavior. Will consider (1) nature and functions of law, (2) the organization and administration of law, and (3) the capacity of law to affect social behavior.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

SOC 265A – Classical Sociological Theory (4 units)

Course Description: Introduces graduate students to the work of the main classical thinkers in the tradition of social theory, such as Marx, Durkheim, Weber, Simmel, Freud, G.H. Mead, and Parsons, locating them within the historical, cultural, and philosophical milieu in which their ideas originated.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

SOC 265B – Theory in Contemporary Sociology (4 units)

Course Description: Explores the uses of theories in contemporary sociology by tracing their connections with classical sociological writings and their relations to broader theoretical concerns of contemporary social thought, with particular emphasis on relevance to the current historical, cultural and social milieu.

Prerequisite(s): SOC 265A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

SOC 270 – Social Demography (4 units)

Course Description: How social institutions affect and are affected by the level and variation of mortality, migration, and fertility. Special emphases on the determinants of fertility-related attitudes and behavior, on less-developed countries, and on contemporary empirical studies.

Prerequisite(s): SOC 170; or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

SOC 280 – Organizations & Institutions (4 units)

Course Description: Theory of formal organizations and bureaucracy. Methods of research in organizational and institutional studies. Historical and comparative analysis of political, religious, educational, military, and economic structure.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

SOC 288 – Integrative Research Practicum (4 units)

Course Description: Continuing training in field, quantitative, and/or comparative-historical methods. Emphasis on students' research projects and applications of principles related to research design, concept and theory construction causality and interpretation, and data and measurement. Completion of research paper is required.

Prerequisite(s): SOC 207A; SOC 242A; SOC 292A; consent of instructor.

Learning Activities: Seminar 6 hour(s), Extensive Writing, Term Paper.

Grade Mode: Letter.

SOC 290 – Seminar (4 units)

Course Description: Seminar.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Satisfactory/Unsatisfactory only.

SOC 292A – Field Research (4 units)

Course Description: Introduction to the logic, methods, and practices of field research, with particular emphasis on the ethnographic tradition of participant observation. Interviewing and other qualitative techniques will also be covered. Students will develop original research projects based on their own fieldwork.

Prerequisite(s): Graduate standing in Sociology or consent of instructor.

Learning Activities: Seminar 3 hour(s), Fieldwork.

Grade Mode: Letter.

SOC 293 – Proseminar in Sociology (2 units)

Course Description: Introduction to graduate training in sociology. A seminar designed to introduce students entering graduate work in the department to its ongoing research activities.

Prerequisite(s): First-year Sociology graduate students only.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

SOC 295 – Special Topics Seminar (4 units)

Course Description: Research topics in Sociology. Specific topic will vary according to faculty interest and student demand.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

SOC 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

SOC 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

SOC 390A – The Teaching of Sociology (2 units)

Course Description: Practical instruction in teaching methods for qualitative and quantitative courses. Pedagogical issues involved in critical sociological analysis.

Prerequisite(s): Graduate standing; required for first-time teaching assistants.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

SOC 390B – The Teaching of Sociology (2 units)

Course Description: Practical instruction in devising course syllabi, lectures and assignments for Associate-Instructors and others interested in college teaching. Discussion of pedagogical methods of teaching qualitative and quantitative courses.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 1 hour(s), Discussion 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

SOC 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SOC 466 – Research Paper Workshop (2 units)

Course Description: A workshop to assist advanced graduate students in the preparation of an original research paper. Students present their research papers and discuss issues in theory, research design, data, empirical inference, and verbal and written presentation of a professional research paper.

Prerequisite(s): Master of Arts standing.

Learning Activities: Workshop 1.50 hour(s), Discussion 0.50 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

Soil Science (SSC)

College of Agricultural & Environmental Sciences

SSC 010 – Soils in Our Environment (3 units)

Course Description: Soils in our global ecosystem; soils as natural bodies formed by interactive environmental processes; soil response to use and management; sustainable use of soil resources; role of soils in agricultural and environmental issues; role of soils in our daily lives.

Learning Activities: Lecture 3 hour(s), Independent Study.

Enrollment Restriction(s): Limited to 90 students.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

SSC 092 – Soil Science Internship (1-12 units)

Course Description: Work experience off and on campus in soil science.

Internship supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

SSC 100 – Principles of Soil Science (5 units)

Course Description: Soil as part of natural and managed ecosystems and landscapes. Solid, liquid, and gas phases and their interactions in the soil. Water, gas and heat movement in soil. Soil biology. Plant nutrient acquisition and use. Soil development, management and use.

Prerequisite(s): College-level courses in each of chemistry, physics, biology, and geology recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

SSC 102 – Environmental Soil Chemistry (3 units)

Course Description: Soil chemistry processes related to the fate and transport of contaminants in soil. Soil minerals, natural organic matter, surface charge, soil solution chemistry, redox reactions in soil, and sorption of inorganic and organic contaminants.

Prerequisite(s): General chemistry; SSC 100 or equivalent recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

SSC 105 – Field Studies of Soils in California Ecosystems (5 units)

Course Description: Field-based studies of soils in California ecosystems, away from campus, throughout California. Emphasis on description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes in soils on the landscape; and the role of soils in land use.

Prerequisite(s): SSC 100 and SSC 120 or equivalent recommended.

Learning Activities: Fieldwork.

Enrollment Restriction(s): Limited to a minimum of 10 students; maximum of 24.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

SSC 107 – Soil Physics (5 units)

Course Description: Physical properties of soil. Principles of water, gas, heat, and solute movement in soil with selected examples related to soil and water management. Influence of soil properties on transfer processes.

Prerequisite(s): SSC 100; ERS 100; MAT 016A; or the equivalent of MAT 016A.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SSC 109 – Sustainable Nutrient Management (4 units)

Course Description: Availability of nutrients in organic and conventional agricultural, vineyard, orchard and plantation forest soils; management of fertilizers, cover crops, compost, sewage sludge and manures for crop production and to prevent loss to the environment is emphasized.

Prerequisite(s): SSC 100; or the equivalent.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL); Writing Experience (WE).

SSC 111 – Soil Microbiology (4 units)

Course Description: Major groups of microorganisms in soil, their interrelationships, and their responses to environmental variables. Role of microorganisms in cycling of nutrients. Plant-microbe relationships. Transformations of organic and inorganic pollutants.

Prerequisite(s): BIS 002C recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Writing Experience (WE).

SSC 112 – Soil Ecology (3 units)

Course Description: Overview of living constituents of soils, their interactions, importance to, and impact on biogeochemical cycles, decomposition, and soil properties. Practical applications of soil biological diversity are emphasized.

Prerequisite(s): SSC 100 or equivalent recommended.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

SSC 118 – Soils in Land Use & the Environment (4 units)

Course Description: Soils are considered as elements in land use planning and environmental quality. Topics include: soil survey reports, remote sensing, land capability classification, soil erosion/conservation, waste disposal on soils and soil reclamation. One one-day field trip.

Prerequisite(s): Consent of instructor; SSC 100 or equivalent recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

SSC 120 – Soil Genesis, Morphology, & Classification (5 units)

Course Description: Recognition and description of soils; chemical, biological and physical processes of soil formation. Factors of soil formation. Interactions of soils with diverse ecosystems. Introduction to soil classification. Practice using soil taxonomy. Practical experience describing soil properties in the field.

Prerequisite(s): SSC 100; GEL 050 recommended.

Learning Activities: Lecture 4 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL); Visual Literacy (VL).

SSC 192 – Soil Science Internship (1-12 units)

Course Description: Work experience off and on campus in soil science. Internship supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

SSC 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SSC 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SSC 202 – Topics in Advanced Soil Chemistry (4 units)

Course Description: Reviews of current research in soil chemistry. Topics include double layer theory; clay mineral and oxide surface chemistry; adsorption on soil surfaces; speciation and modeling of solution ions; solubility and mineral stability diagrams.

Prerequisite(s): Consent of instructor; general chemistry; SSC 100 or equivalent recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to 18 students.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

SSC 205 – Field Studies of Soils in California Ecosystems (5 units)

Course Description: Field-based soil studies in California ecosystems. Description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes; their role in land use. Similar to SSC 105; requires additional work for graduate credit.

Prerequisite(s): SSC 100 and SSC 120 or equivalent recommended.

Learning Activities: Fieldwork 50 hour(s), Discussion 15 hour(s), Lecture 5 hour(s).

Enrollment Restriction(s): Limited to 24 students.

Repeat Credit: May be repeated 1 time(s) when geographic locale differs.

Grade Mode: Letter.

SSC 208 – Soil-Plant Interrelationships (3 units)

Course Description: Plant needs, occurrence and reactions of water and mineral nutrients in soils; root systems and their growth in soils; mass flow and diffusion mechanisms in nutrient acquisition; models relating nutrient uptake to soil and plant characteristics; nutrient assimilation and crop quality.

Prerequisite(s): SSC 100; PLB 111; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

SSC 211 – Advanced Soil Microbiology (3 units)

Course Description: Microbial metabolism of organic chemicals in soil, both natural and xenobiotic. Decomposition of organic matter. Kinetics of microbial processes in soil.

Prerequisite(s): CHE 008A; CHE 008B; SSC 111; BIS 102, BIS 103 or an equivalent course recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

SSC 219 – Ecosystem Biogeochemistry (4 units)

Course Description: Multidisciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies.

Prerequisite(s): Introductory courses in ecology/biology and soils recommended; undergraduates accepted with consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Cross Listing: ECL 219.

Grade Mode: Letter.

SSC 220 – Pedology (3 units)

Course Description: Topics selected from studies of soil-forming processes, soil-geomorphic relations, mineral weathering, new developments in soil classification, and development of pedologic theory. Topics vary from year to year.

Prerequisite(s): Consent of instructor; SSC 120 recommended.

Learning Activities: Lecture 3 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

SSC 222 – Global Carbon Cycle (3 units)

Course Description: Global carbon cycle from Phanerozoic epoch to modern times. Examination of long and short-term carbon cycles.

Transfer of carbon among ocean, land and life with emphasis on humic substance formation, methods of characterization, reactions with organics and soil carbon stabilization.

Prerequisite(s): CHE 008A; CHE 008B; MAT 016A; MAT 016B; SSC 100; or the equivalent of SSC 100.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

SSC 290 – Special Topics in Soil Science (1-4 units)

Course Description: Seminars and critical review of problems, issues, and research in soil science.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 1-4 hour(s), Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

SSC 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

SSC 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

SSC 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Spanish (SPA)

College of Letters & Science

SPA 001 – Elementary Spanish (5 units)

Course Description: Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent SPA 001S; students who have successfully completed SPA 002 or SPA 003 in the 10th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 001A – Accelerated Intensive Elementary Spanish (15 units)

Course Description: Introduction to Spanish grammar and development of all language skills in a cultural context with emphasis on communication. Special 12-week accelerated, intensive summer session combining the work of SPA 001, SPA 002 and SPA 003.

Learning Activities: Lecture/Discussion 15 hour(s).

Credit Limitation(s): Not open to students who have completed equivalent SPA 001, SPA 001S, SPA 002, SPA 002S, SPA 002V, SPA 002Y, SPA 003, SPA 003S, SPA 003V or SPA 003Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 001S – Elementary Spanish (5 units)

Course Description: Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. May be taught abroad in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit to students who have taken equivalent SPA 001.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 001V – Elementary Spanish (5 units)

Course Description: Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication.

Learning Activities: Web Virtual Lecture 1.5 hour(s), Web Electronic Discussion 1.5 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent SPA 001S, SPA 001Y, or SPA 001; students who have successfully completed SPA 002 or SPA 003 in the 10th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed.

Grade Mode: Letter. Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 001Y – Elementary Spanish (5 units)

Course Description: Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication.

Learning Activities: Lecture/Discussion 3 hour(s), Web Virtual Lecture 1 hour(s), Web Electronic Discussion 1 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent courses SPA 001 or SPA 001S; students who have completed SPA 002 or SPA 003 in the 10th grade of high school may receive unit credit for this course on a P/NP basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 002 – Elementary Spanish (5 units)

Course Description: Continuation of SPA 001 and SPA 001S in the areas of grammar and basic language skills.

Prerequisite(s): SPA 001 or SPA 001S or SPA 001V or SPA 001Y.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent SPA 002S, SPA 002V or SPA 002Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 002S – Elementary Spanish (5 units)

Course Description: Continuation of SPA 001 and SPA 001S in the areas of grammar and basic language skills. May be taught abroad in a Spanish speaking country under the supervision of UC Davis faculty/lecturer.

Prerequisite(s): SPA 001 or SPA 001S or SPA 001V or SPA 001Y.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit to students who have taken SPA 002, SPA 002V or SPA 002Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 002V – Elementary Spanish (5 units)

Course Description: Continuation of SPA 001, SPA 001S, or previous high school experience in the areas of grammar and basic language skills. Online format combining synchronous chatting with technologically based materials.

Prerequisite(s): SPA 001 or SPA 001S or SPA 001V or SPA 001Y.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken equivalent SPA 002, SPA 002S, SPA 002Y, or higher.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 002Y – Elementary Spanish (5 units)

Course Description: Continuation of SPA 001 or SPA 001Y or SPA 001S in the areas of grammar and basic language skills. Hybrid format combining classroom instruction with technologically based materials.

Prerequisite(s): SPA 001 or SPA 001Y or SPA 001V or SPA 001S.

Learning Activities: Lecture/Discussion 3 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken equivalent SPA 002, SPA 002S, or SPA 002V.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 003 – Elementary Spanish (5 units)

Course Description: Completion of grammar sequence and continuing practice of all language skills using cultural texts.

Prerequisite(s): SPA 002 or SPA 002S or SPA 002V or SPA 002Y.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent SPA 003S, SPA 003V or SPA 003Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 003S – Elementary Spanish (5 units)

Course Description: Completion of grammar sequence and continuing practice of all language skills using cultural texts. May be taught abroad in a Spanish speaking country under the supervision of UC Davis faculty.

Prerequisite(s): SPA 002 or SPA 002S or SPA 002V or SPA 002Y.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent SPA 003, SPA 003V or SPA 003Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 003V – Elementary Spanish (5 units)

Course Description: Continuation of SPA 002, SPA 002S, SPA 002V or SPA 002Y. Online format combining synchronous chatting with technologically based materials.

Prerequisite(s): SPA 002 or SPA 002S or SPA 002V or SPA 002Y.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open to students who have taken equivalent SPA 003, SPA 003S, SPA 003Y, or higher.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 003Y – Elementary Spanish (5 units)

Course Description: Completion of grammar sequence and continuing practice of all language skills using cultural texts. Hybrid format combining classroom instruction with technologically based materials.

Prerequisite(s): SPA 002 or SPA 002S or SPA 002V or SPA 002Y.

Learning Activities: Lecture/Discussion 3 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open to students who have taken equivalent SPA 003, SPA 003S, or SPA 003V.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 021 – Intermediate Spanish (5 units)

Course Description: Review and development of grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts.

Prerequisite(s): SPA 003 or SPA 003S or SPA 003V or SPA 003Y.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent SPA 021S, SPA 021V or SPA 021Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 021S – Intermediate Spanish (5 units)

Course Description: Review and development of the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. May be taught abroad.

Prerequisite(s): SPA 003 or SPA 003S or SPA 003V or SPA 003Y.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent SPA 021, SPA 021V or SPA 021Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 021V – Intermediate Spanish (5 units)

Course Description: Continuation of SPA 003, SPA 003V, SPA 003Y, SPA 003S, or previous high school experience in the areas of grammar and intermediate language skills. Online format combining synchronous chatting with technologically based materials.

Prerequisite(s): SPA 003 or SPA 003Y or SPA 003V; or the equivalent from previous high school language experience.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken equivalent SPA 021, SPA 021Y or SPA 021S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 021Y – Intermediate Spanish (5 units)

Course Description: Continuation of SPA 003, SPA 003S, SPA 003V and SPA 003Y in the areas of grammar and basic language skills. Hybrid format combining classroom instruction with technologically based materials where learning takes place both face-to-face and online.

Prerequisite(s): SPA 003 or SPA 003S or SPA 003V or SPA 003Y.

Learning Activities: Lecture/Discussion 3 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken equivalent SPA 021, SPA 021S or SPA 021V.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 022 – Intermediate Spanish (5 units)

Course Description: Development of all language skills through exercises and reading of modern texts. Development on more difficult grammar concepts and further practice on composition.

Prerequisite(s): SPA 021 or SPA 021S or SPA 021V or SPA 021Y.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent SPA 022S, SPA 022V or SPA 022Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 022S – Intermediate Spanish (5 units)

Course Description: Development of all language skills through exercises and reading of modern texts. Development of more difficult grammar concepts and further practice on composition. May be taught abroad.

Prerequisite(s): SPA 021 or SPA 021S or SPA 021V or SPA 021Y.

Learning Activities: Lecture/Discussion 5 hour(s).

Credit Limitation(s): Not open for credit for students who have completed equivalent SPA 022, SPA 022V or SPA 022Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 022V – Intermediate Spanish (5 units)

Course Description: Continuation of SPA 021, SPA 021V, SPA 021Y, SPA 022S, or previous high school experience in the areas of grammar and intermediate language skills. Online format combining synchronous chatting with technologically based materials.

Prerequisite(s): SPA 021 or SPA 021S or SPA 021V or SPA 021Y; or equivalent from previous high school language experience.

Learning Activities: Web Virtual Lecture 3 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken SPA 022, SPA 022Y, or SPA 022S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 022Y – Intermediate Spanish (5 units)

Course Description: Continuation of SPA 021, SPA 021S, or SPA 021V in the areas of grammar and basic language skills. Online format combining synchronous chatting with technologically based materials.

Prerequisite(s): SPA 021 or SPA 021S or SPA 021V or SPA 021Y.

Learning Activities: Lecture/Discussion 3 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open to students who have taken equivalent SPA 022, SPA 022S or SPA 022V.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 023 – Spanish Composition I (4 units)

Course Description: Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects.

Prerequisite(s): SPA 022 or SPA 022S or SPA 022V or SPA 022Y.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Credit Limitation(s): Not open for students who have completed equivalent SPA 023S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 023S – Spanish Composition I (4 units)

Course Description: Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects. May be taught abroad in Spanish speaking country.

Prerequisite(s): SPA 022 or SPA 022S or SPA 022V or SPA 022Y.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have completed equivalent SPA 023.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 024 – Spanish Composition II (4 units)

Course Description: Development of advanced level writing skills, with emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects.

Prerequisite(s): SPA 023 or SPA 023S.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit for students who have completed equivalent SPA 024S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 024S – Spanish Composition II (4 units)

Course Description: Development of advanced level writing skills, with emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects. May be taught abroad.

Prerequisite(s): SPA 023 or SPA 023S.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have completed equivalent SPA 024.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 031 – Spanish for Heritage Speakers I (5 units)

Course Description: Course one of a three quarter series providing bilingual students whose heritage language is Spanish with the linguistic and learning skills required for successfully completing upper division courses in Spanish. Oral presentations and compositions on themes relevant to the Latinx/Chicanx experience in the U.S.

Learning Activities: Lecture/Discussion 3 hour(s), Tutorial 1 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 032 – Spanish for Heritage Speakers II (5 units)

Course Description: Course two of a three quarter series providing bilingual students whose heritage language is Spanish with the linguistic and learning skills required for successfully completing upper division courses in Spanish. Oral presentations and compositions on themes relevant to the Latinx/Chicanx experience in the U.S.

Prerequisite(s): SPA 031; consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Tutorial 1 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

SPA 033 – Spanish for Heritage Speakers III (5 units)

Course Description: Course three of a three quarter series providing bilingual students whose heritage language is Spanish with the linguistic and learning skills required for successfully completing upper division courses in Spanish. Oral presentations and compositions on themes relevant to the Latinx/Chicanx experience in the U.S.

Prerequisite(s): SPA 032; consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Tutorial 1 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

SPA 098 – Directed Group Study (1-5 units)

Course Description: Primarily for lower division students. May be taught abroad.

Prerequisite(s): Consent of instructor and department chairperson.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SPA 098F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for lower division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

SPA 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SPA 100 – Principles of Hispanic Literature & Criticism (4 units)

Course Description: Principles of literary criticism applied to the study of fiction, drama, poetry, and essay of major literary writers of the Hispanic world.

Prerequisite(s): SPA 024 or SPA 024S or SPA 033.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken SPA 100S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

SPA 100S – Principles of Hispanic Literature & Criticism (4 units)

Course Description: Principles of literary criticism applied to the study of fiction, drama, poetry and essay of major literary writers of the Hispanic world. May be taught abroad in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer.

Prerequisite(s): SPA 024 or SPA 033.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken equivalent SPA 100.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

SPA 110 – Advanced Spanish Composition (4 units)

Course Description: Practice in expository writing with emphasis on clarity and idiomatic expression. Practical application and review of selected grammar topics. (Part of former SPA 110A & SPA 110B.)

Prerequisite(s): SPA 024 or SPA 033.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

SPA 111N – The Structure of Spanish: Sounds & Words (3 units)

Course Description: Linguistic description of the sound patterns of Spanish and how those sounds can be used to form larger units, such as morphemes and words. Theoretical and practical comparisons with English and with other Romance languages. (Former SPA 132.)

Prerequisite(s): (SPA 024 or SPA 033); or consent of instructor. LIN 001 recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SPA 112N – The Structure of Spanish: Words & Phrases (3 units)

Course Description: Study of Spanish word and phrase structure, with special emphasis on the constituent structure of noun and verb phrases. Theoretical and practical comparisons with English and with other Romance languages. (Former SPA 131.)

Prerequisite(s): SPA 111N; or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS).

SPA 113 – Spanish Pronunciation (4 units)

Course Description: Sound structure of modern Spanish; theoretical analysis of selected problems in pronunciation. Strongly recommended for prospective teachers of Spanish.

Prerequisite(s): (SPA 024 or SPA 033); LIN 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SPA 114N – Contrastive Analysis of English & Spanish (4 units)

Course Description: Contrastive analysis of English and Spanish, error analysis, introduction to structuralist and transformational linguistics. Individual and group conferences. (Former SPA 137.)

Prerequisite(s): SPA 024 or SPA 033; or consent of instructor. SPA 111N and SPA 112N recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SPA 115 – History of the Spanish Language (4 units)

Course Description: Spanish language from its roots in spoken Latin to modernity. Emphasis on the close relationship between historical events and language change, and the role that literature plays in language standardization.

Prerequisite(s): SPA 024 or SPA 033; or consent of instructor. LIN 001 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have completed equivalent SPA 115S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

SPA 115S – History of the Spanish Language (4 units)

Course Description: Spanish language from its roots in spoken Latin to modernity. Emphasis on the close relationship between historical events and language change, and the role that literature plays in language standardization. Taught abroad in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer.

Prerequisite(s): SPA 024 or SPA 033; or consent of instructor. LIN 001 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have completed equivalent SPA 115.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS).

SPA 116 – Applied Spanish Linguistics (4 units)

Course Description: Exploration of the major theoretical and practical issues concerning learning Spanish as a second language. For students interested in teaching Spanish as a career.

Prerequisite(s): SPA 024 or SPA 033; or consent of instructor; LIN 001 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken equivalent SPA 116S.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SPA 116S – Applied Spanish Linguistics (4 units)

Course Description: Exploration of the major theoretical and practical issues concerning learning Spanish as a second language. For students interested in teaching Spanish as a career. May be taught abroad in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty.

Prerequisite(s): SPA 024 or SPA 033; or consent of instructor. LIN 001 recommended.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken SPA 116.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SPA 117 – Teaching Spanish as a Native Tongue in the U.S.: Praxis & Theory (4 units)

Course Description: Designed for students interested in teaching Spanish to native speakers. Focus on cultural diversity of the Spanish speaking population in the United States; applied language teaching methodologies in the context of teaching Spanish to native speakers at different levels.

Prerequisite(s): SPA 024 or SPA 033; or consent of instructor. LIN 001 recommended.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Oral Skills (OL).

SPA 118 – Topics in Spanish Linguistics (4 units)

Course Description: Study of specialized topics in Spanish linguistics, for example: language and use; text and context; language and society; bilingualism; Spanish dialectology; syntax and semantics.

Prerequisite(s): SPA 111N; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Social Sciences (SS).

SPA 123 – Creative Writing in Spanish (4 units)

Course Description: Intensive writing of poetry or fiction in Spanish or in a bilingual (Spanish/English) format. Students will write both in prescribed forms and in experimental forms of their own choosing.

Prerequisite(s): SPA 024 or SPA 033; or consent of instructor.

Learning Activities: Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Writing Experience (WE).

SPA 130 – Survey of Spanish Literature to 1700 (4 units)

Course Description: Survey of Spanish literature (narrative, poetry and drama) to 1700, Emphasis on the multicultural birth of the Spanish culture, the formation and growth of the Spanish language and letters through its written records and the literature of the early period.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 131N – Survey of Spanish Literature: 1700 to Present (4 units)

Course Description: Survey of modern Spanish literature, providing an overview of main literary movements (romanticism, realism, naturalism, modernism, avantgarde). Emphasis on the philosophical and historical background and on the European context for modern Spanish literature. (Part of former SPA 104A & SPA 104B.)

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 132 – Golden Age Drama & Performance (4 units)

Course Description: Golden Age drama: text and performance. Study of Spanish Baroque drama as performance art. Close reading of plays and related aspects of 17th-century theater: theatrical spaces, staging, performance, actors, public, language, costumes. Final project is performance of a play.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 1.50 hour(s), Performance Instruction 1.50 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Visual Literacy (VL); World Cultures (WC).

SPA 133N – Golden Age Literature of Spain (4 units)

Course Description: Introduction to the study of the principal authors and literary movements of 16th- and 17th-century Spain and Spanish American colonial literature.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Repeat Credit: May be repeated 3 time(s) with consent of instructor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

SPA 134A – Don Quijote I (4 units)

Course Description: Critical interpretation of Don Quijote Part One by Cervantes. Focused study of key elements within the socio-cultural context of Golden Age Spain. Don Quijote as prototype for the modern novel.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 134B – Don Quijote II (4 units)

Course Description: Critical interpretation of Don Quijote Part Two by Cervantes. Focused study of key elements within the socio-cultural context of Golden Age Spain. Don Quijote as prototype for the modern novel.

Prerequisite(s): SPA 134A.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 135N – Spanish Romanticism (4 units)

Course Description: Romanticism as a philosophical concept, and as a literary movement in Spain, with emphasis on its distinctive, specific "romantic" qualities and its literary expression in five leading authors of the early-19th century. (Former SPA 114.)

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 136N – The Spanish Novel of the 19th Century (4 units)

Course Description: Literary realism in Spain, focusing on Leopoldo Alas (Clarín), Emilia Pardo Bazán and Benito Pérez Galdós unique characteristics of Spanish realism and its historical roots in Cervantes and the picaresque.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 137N – 20th-Century Spanish Fiction (4 units)

Course Description: Study of the main literary trends and authors of the modern Spanish novel and short story. Selected works by Unamuno, Valle-Inclán, Sender, Cela, Matute, Ayala and others.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 138N – Modern & Contemporary Spanish Poetry (4 units)

Course Description: Study of the main literary trends and authors of modern and contemporary Spanish poetry. Selected works by Machado, Juan Ramón Jiménez, García Lorca, Guillén, Aleixandre, Hernández Hierro and others. Offered in alternate years. (Former SPA 120C.)

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC).

SPA 139 – Modern Spanish Theater (4 units)

Course Description: Study of the main dramatic trends and playwrights of modern Spanish theater. Selected works by Valle Inclán, García-Lorca, Mihura, Buero-Vallejo, Arrabal and others. Offered in alternate years.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 140N – Modern Spanish Essay (4 units)

Course Description: Ortega, Unamuno and the modern Spanish essay. Their concept of Spain and their relations with other movements and thinkers.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 141 – Introduction to Spanish Culture (4 units)

Course Description: Introduction to history, geography and culture of Spain. Art, history of ideas, and everyday cultural manifestations. Introduction to critical reading and textual analysis.
Prerequisite(s): SPA 024 or SPA 024S or SPA 033.
Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).
Credit Limitation(s): Not open for students who have completed equivalent SPA 141S.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

SPA 141S – Introduction to Spanish Culture (4 units)

Course Description: Introduction to history, geography and culture of Spain. Art, history of ideas, and everyday cultural manifestations. Introduction to critical reading and textual analysis. May be taught abroad in a Spanish speaking country under the supervision of UC Davis faculty.
Prerequisite(s): SPA 024 or SPA 024S or SPA 033.
Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).
Credit Limitation(s): Not open to students who have taken equivalent SPA 141.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

SPA 142 – Special Topics in Spanish Cultural & Literary Studies (4 units)

Course Description: Special topics in the study of Spanish literature and culture. May be taught abroad.
Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.
Learning Activities: Lecture 3 hour(s), Term Paper.
Repeat Credit: May be repeated 2 time(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

SPA 148 – Cinema in the Spanish-Speaking World in Translation (4 units)

Course Description: Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles.
Prerequisite(s): SPA 024 or SPA 024S or SPA 033.
Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).
Credit Limitation(s): Not open for students who have completed equivalent SPA 148S.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

SPA 148S – Cinema in the Spanish-Speaking World in Translation (4 units)

Course Description: Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. May be taught abroad in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty.
Prerequisite(s): SPA 024 or SPA 033.
Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).
Credit Limitation(s): Not open to students who have taken equivalent SPA 148.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

SPA 149 – Latin-American Literature in Translation (4 units)

Course Description: Reading, lectures and discussions in English of works by Borges, Cortázar, Fuentes, García Márquez, Paz and others.
Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 150N – Survey of Latin American Literature to 1900 (4 units)

Course Description: Latin American literature from preconquest texts and the chronicles of the Conquest to romanticism and modernism. Reading selections include fiction, poetry, drama and essays.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 151 – Survey of Latin American Literature 1900 to Present (4 units)

Course Description: Latin American literature from 1900 to the present.

Reading selections include fiction, poetry, drama, essays, testimonio, etc.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 153 – Latin American Short Story (4 units)

Course Description: Evolution of the Latin American short story from the 19th century to the present. Emphasis on the contemporary period.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 154 – Latin American Novel (4 units)

Course Description: Evolution of the Latin American novel from the 19th century to the present. Emphasis on significant contemporary works.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 155 – Mexican Novel (4 units)

Course Description: Evolution of the Mexican novel from the 19th century to the present. Emphasis on the narrative of the Revolution and significant contemporary works.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 156 – Latin American Literature of the Turn of the 20th Century (4 units)

Course Description: Modernism as an authentic expression of Latin American literature and its influence on 20th-century poetry and prose. In depth analysis of the works of Darío and other major writers of the era. Offered in alternate years.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 157 – Great Works of Latin American Literature/Culture (4 units)

Course Description: Study of major works of Latin American literature/culture and their cultural and literary milieus. May include novels, poetry, film, etc. Works may be analyzed in terms of style, influence, cultural significance, political importance, and/or commercial success.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 158 – Latin American Poetry: From Vanguardism to Surrealism & Beyond (4 units)

Course Description: Study of vanguardism, surrealism, and more recent movements of Latin American poetry. An in-depth analysis of the works of such major poets as Neruda, Vallejo, and Paz.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 159 – Special Topics in Latin American Literature & Culture (4 units)

Course Description: Special topics in the study of Latin American literature and culture.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic or subject differs; students may take any SPA 159 course two times total in combination.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 159S – Special Topics in Latin American Literature & Culture (4 units)

Course Description: Special topics in the study of Latin American literature and culture. May be taught abroad in a Spanish speaking country under the supervision of UC Davis faculty.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic or subject differs; students may take any SPA 159 course two times total in combination.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 159Y – Special Topics in Latin American Literature & Culture (4 units)

Course Description: Special topics in the study of Latin American literature and culture. Hybrid format combining classroom instruction with technologically based materials.

Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S.

Learning Activities: Web Virtual Lecture 3 hour(s), Lecture/Discussion 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic or subject differs; students may take any SPA 159 course two times total in combination.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 160 – Latin American Women Writers in Translation (4 units)

Course Description: Latin American women writers from the 19th and 20th centuries. Recent theoretical approaches to literature by women in Latin America. Discussions in English of works by Matto de Turner, Avellaneda, Storni, Ocampo, Agustini, Mistral, Castellanos, and others.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 167 – Borders of the Spanish Speaking World (4 units)

Course Description: Analysis of cultural dynamics of border contexts (contact zones) in which Spanish speaking populations are prominent. Contexts may include one or more of the following: US-Mexico, US-Caribbean, Mexico-Central America, Dominican Republic-Haiti, Spain-Portugal, Colombia-Venezuela, Argentina-Brazil, among others.

Prerequisite(s): SPA 024 or SPA 024S or SPA 033; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); World Cultures (WC).

SPA 168 – Introduction to Latinx Culture (4 units)

Course Description: Introduction to histories and cultures of Latinx (Mexican American, Puerto Rican, Salvadoran American, Ecuadorian American, etc.) populations of the US. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical analysis across multiple genres of cultural production (literature, visual culture, media culture, etc.).

Prerequisite(s): SPA 024 or SPA 024S or SPA 033; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD);

Writing Experience (WE).

SPA 169 – Special Topics in Chicanx/Latinx Studies (4 units)

Course Description: Special topics in the study of Chicanx and/or Latinx literature and culture.

Prerequisite(s): SPA 024 or SPA 024S or SPA 033; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Project.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Domestic Diversity (DD).

SPA 170 – Introduction to Latin American Culture (4 units)

Course Description: Introduction to history, geography and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis.

Prerequisite(s): SPA 024 or SPA 024S or SPA 033.

Learning Activities: Lecture 3 hour(s), Term Paper.

Credit Limitation(s): Not open for students who have completed equivalent SPA 170S.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

SPA 170S – Introduction to Latin American Culture (4 units)

Course Description: Introduction to history, geography and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. May be taught abroad in a Spanish-speaking country.

Prerequisite(s): SPA 024 or SPA 024S or SPA 033.

Learning Activities: Lecture 3 hour(s), Project.

Credit Limitation(s): Not open for students who have completed equivalent SPA 170.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

SPA 171 – Music from Latin America (4 units)

Course Description: Examination of music from Latin America.

Characteristic music (i.e. tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres.

Taught in English or Spanish depending on instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open to students who have taken SPA 171S or MUS 127S.

Repeat Credit: May be repeated 1 time(s) when topic differs.

Cross Listing: MUS 127.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

SPA 171S – Music from Latin America (4 units)

Course Description: Examination of music from Latin America. Characteristic music (i.e. tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres. May be taught abroad in English or Spanish depending on instructor.
Prerequisite(s): Consent of instructor.
Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).
Credit Limitation(s): Not open to students who have taken SPA 171 or MUS 127.
Repeat Credit: May be repeated 1 time(s) when content differs.
Cross Listing: MUS 127S.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

SPA 172 – Mexican Culture (4 units)

Course Description: Study of Mexican culture through a diversity of cultural expression, including elite, popular and mass media culture. Focus on national icons and archetypes, multiculturalism, transnationalism.
Prerequisite(s): SPA 024 or SPA 024S or SPA 033.
Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).
Repeat Credit: May be repeated 1 time(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

SPA 173 – Cinema & Latin American Culture (4 units)

Course Description: Understanding Latin American cultures through cinema. History and critical analysis of Latin American film. Focus on a national cinematic tradition. Comparative experiences in different parts of Latin America and/or a particular era. Conducted entirely in Spanish.
Prerequisite(s): SPA 024 or SPA 024S or SPA 033.
Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).
Repeat Credit: May be repeated 1 time(s) when topic differs.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC).

SPA 174 – Chicano Culture (4 units)

Course Description: Interdisciplinary survey of Chicano culture. Topics include literature, art, folklore, oral tradition, music, politics, as well as everyday cultural manifestations. Conducted in Spanish. (Former SPA 124.)
Prerequisite(s): SPA 024 or SPA 033.
Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SPA 175 – Topics in Latin American Cultural Studies (4 units)

Course Description: Specific historical tendencies and issues in Latin American culture(s) from precolombian times to present. Studies of literature, film, art, journalism and performance. Focus on issues of aesthetics, politics, identity, and globalization. May be taught abroad.
Prerequisite(s): SPA 024 or SPA 024S or SPA 033.
Learning Activities: Lecture 3 hour(s), Project 1 hour(s).
Repeat Credit: May be repeated 1 time(s) when content differs.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

SPA 176 – Literature in Spanish Written in the United States (4 units)

Course Description: Survey of the literary and cultural contributions of the main Spanish-speaking populations present in the U.S.: Chicanos, Puerto Ricans, Cuban-Americans, Central Americans, and other Latinos.
Prerequisite(s): SPA 024 or SPA 033.
Learning Activities: Lecture 3 hour(s), Term Paper.
Grade Mode: Letter.
General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SPA 177 – California & Latin America (4 units)

Course Description: Interdisciplinary survey on the relationship between California and Latin America (1500s-present). Latin American representations of California and Californian representations of Latin America, as well as borderlands texts, with a special focus on Mexican-American perspectives. Conducted in Spanish.
Prerequisite(s): SPA 024 or SPA 024S or SPA 033.
Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).
Grade Mode: Letter.
General Education: American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

SPA 178A – Spanish for the Professions (4 units)

Course Description: For students with an advanced level of Spanish interested in the use of Spanish in the health care, legal and law enforcement and marketing and business professions. Field trips documenting the use of Spanish in the public context.
Prerequisite(s): SPA 024 or SPA 024S or SPA 033.
Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).
Grade Mode: Letter.
General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

SPA 179 – Science & Politics of the Human Body in the Spanish-Speaking World (4 units)

Course Description: Interaction between the interpretations of scientific ideas, philosophical issues, and politics concerning the human body in the Spanish-speaking world through different historical periods.
Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).
Credit Limitation(s): Not open to students who have taken equivalent SPA 179Y.
Grade Mode: Letter.
General Education: Arts & Humanities (AH) or Science & Engineering (SE) or Social Sciences (SS).

SPA 179Y – Science & Politics of the Human Body in the Spanish-Speaking World (4 units)

Course Description: Interaction between the interpretations of scientific ideas, philosophical issues, and politics concerning the human body in the Spanish-speaking world through different historical periods.

Learning Activities: Web Virtual Lecture 2 hour(s), Discussion 2 hour(s).

Credit Limitation(s): Not open for credit to students who have taken equivalent SPA 179.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE) or Social Sciences (SS).

SPA 180 – Senior Seminar in Spanish Linguistics (4 units)

Course Description: Group study of a special topic drawn from Spanish linguistics. Independent research project.

Prerequisite(s): Senior standing; a major in Spanish or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); Writing Experience (WE).

SPA 181 – Senior Seminar in Spanish Literature/Culture (4 units)

Course Description: Group study of a special topic drawn from Spanish literary or cultural studies. Independent research project.

Prerequisite(s): Senior standing; a major in Spanish or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); Writing Experience (WE).

SPA 182 – Senior Seminar in Latin American Literature/Culture (4 units)

Course Description: Group study of a special topic drawn from Latin American literary or cultural studies. Independent research project.

Prerequisite(s): Senior standing; a major in Spanish or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated 1 time(s) when content differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

SPA 192I – Internship in Spanish (1-12 units)

Course Description: Internships in fields where Spanish language skills can be used and perfected (teaching, counseling, translating-interpreting). May be taught abroad.

Prerequisite(s): SPA 023; and consent of instructor; junior standing; major in Spanish, Chicano Studies, or a related field.

Learning Activities: Independent Study 3-36 hour(s).

Repeat Credit: May be repeated 8 unit(s) however, units do not count toward the Spanish major.

Grade Mode: Pass/No Pass only.

SPA 194H – Special Study for Honors Students (1-5 units)

Course Description: Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Spanish literature, civilization, or language studies.

Prerequisite(s): Consent of instructor; senior standing and qualification for the Spanish honors program.

Learning Activities: Independent Study 3-15 hour(s).

Repeat Credit: May be repeated 8 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 197T – Tutoring in Spanish (1-4 units)

Course Description: Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): Upper division standing and permission of the chairperson.

Learning Activities: Tutorial 1-4 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

SPA 197TC – Tutoring in the Community (2-4 units)

Course Description: Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member.

Prerequisite(s): Upper division standing and permission of the chairperson.

Learning Activities: Tutorial 2-4 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

SPA 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor and department chairperson.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 198F – Student Facilitated Course (1-4 units)

Course Description: Student facilitated course intended primarily for upper division students.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Grade Mode: Pass/No Pass only.

SPA 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study of a topic or an author to be determined in consultation with an individual faculty member. May be taught abroad.

Learning Activities: Variable.

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); World Cultures (WC); Writing Experience (WE).

SPA 199FA – Student Facilitated Course Development (1-2 units)

Course Description: Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 098F/198F.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Enrollment Restriction(s): Open to upper division Spanish majors only.

Grade Mode: Pass/No Pass only.

SPA 199FB – Student Facilitated Teaching (1-4 units)

Course Description: Student-facilitated course under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F.

Prerequisite(s): SPA 199FA; consent of instructor.

Learning Activities: Variable 1-4 hour(s).

Enrollment Restriction(s): Must have completed SPA 199FA, and be teaching a SPA 098F or SPA 198F; open to upper division Spanish majors only.

Grade Mode: Pass/No Pass only.

SPA 201 – Literary Theory I (4 units)

Course Description: Basic theories and practical approaches to modern and contemporary Hispanic literature. Emphasis on formalism, poststructuralism, socio-cultural discourses, and ideologies.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

Course Description: Analyzes the sound patterns of Spanish from both linear and non-linear perspectives. Students will develop a clear understanding of what phonology is and the nature of Spanish phonology, as defined by modern linguistic analysis.

Prerequisite(s): Some knowledge of phonetics is required and consent of instructor; LIN 109 and LIN 139 highly recommended.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 206 – Spanish Syntax (4 units)

Course Description: An examination of Spanish word order within the framework of general linguistic theory. The student will investigate how to write a grammar of Spanish with particular attention to the structure of noun and verb clauses.

Prerequisite(s): LIN 165; LIN 140.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 207 – History of the Spanish Language (4 units)

Course Description: History of the Spanish language. (Former SPA 220A.)

Prerequisite(s): LAT 001.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 208 – Old Spanish Texts (4 units)

Course Description: An in-depth linguistic examination of Old Spanish texts from the 12th to the 15th centuries, with particular attention to the significance of orthographic changes.

Prerequisite(s): SPA 207.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 211 – Hispanic Dialectology (4 units)

Course Description: Descriptive and historical study of the distinctive features of Peninsular and American Spanish dialects. (Former SPA 221.)

Prerequisite(s): SPA 220; or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 212 – Applied Linguistics (4 units)

Course Description: Focuses on the relevant linguistic aspects of teaching Spanish. Designed for graduate students who have an interest in second-language learning and teaching.

Prerequisite(s): Graduate standing and SPA 215 and SPA 216 recommended.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 215 – Special Topics in Hispanic Linguistics (4 units)

Course Description: Specialized topics in Hispanic linguistics (e.g., pragmatics, sociolinguistics, topics in syntax, semantics, or diachronic studies). May be repeated for credit when topic differs.

Prerequisite(s): Consent of instructor. SPA 205 and SPA 206 recommended.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

SPA 217 – Sociolinguistics: Spanish of the United States (4 units)

Course Description: Descriptive and critical overview of the linguistic practices of the different Spanish-speaking communities in the United States. Sociohistorical migration patterns and settlements; bilingualism; linguistic characteristics of Spanish in contact with English, code-switching, Spanish/English language use and attitude patterns.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: S/U only.

SPA 220 – Catalan Language & Culture (4 units)

Course Description: Foundation for the acquisition of Catalan oral, reading and elementary writing level skills for students of Spanish (Iberianists or Hispanists), with the capacity to interpret educated written language. Emphasis on weekly review of grammar and all language skills.

Prerequisite(s): Consent of instructor; good command of Spanish, Portuguese, French or Italian and graduate level of studies in any of these languages.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 1 hour(s).

Enrollment Restriction(s): Open to advanced undergraduate students, with notions of Catalan, can be admitted with consent of instructor; designed for graduate students.

Grade Mode: Letter.

SPA 222 – Critical Approaches to Spanish Literature I: Prose & Essay (4 units)

Course Description: Critical approaches to Spanish narrative and essay.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

SPA 223 – Critical Approaches to Spanish Literature II: Poetry & Drama (4 units)

Course Description: Critical approaches to Spanish poetry and drama.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

SPA 224 – Studies of a Major Writer, Period, or Genre in Spanish Literature (4 units)

Course Description: Artistic development of a major Spanish writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit with consent of instructor.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated.

Grade Mode: Letter.

SPA 230 – Topics in Latin American Cultural Studies (4 units)

Course Description: Discussion of select contemporary theoretical debates in Latin American Cultural Studies. Application of critical questions to the analysis of cultural texts.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

SPA 231 – Interamerican Studies (4 units)

Course Description: Survey of methodologies of investigation for crosscultural or comparative projects in the geographical context of the Americas. Focus on particular problems of language, discipline, national definitions, and global hierarchies of knowledge that complicate such projects. Readings of interamerican cultural texts.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 232 – Topics in Latinx Cultural & Literary Studies (4 units)

Course Description: Discussion of select contemporary theoretical debates in Latinx Cultural and Literary Studies. Application of critical questions to the analysis of literary and cultural texts.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when content differs.

Grade Mode: Letter.

SPA 252 – Medieval Spanish Literature: Prose (4 units)

Course Description: An exploration of the major genres of Medieval Spanish prose from its origins to 1450.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 253 – Medieval Spanish Literature: Epic (4 units)

Course Description: Medieval Spanish epic narratives. Major theoretical perspectives on the genesis, diffusion, and character of the Medieval epic. Relationship of epic to ballad literature.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 254 – Medieval Hispanic Lyric (4 units)

Course Description: Analysis of the most representative lyric poetry in the various Peninsular languages and in provencal, troubadour poetry, kharjas, villancicos, cantigas de amigo, and courtly lyric.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 255 – Spanish Literature of the Early Renaissance (4 units)

Course Description: Spanish Literature, 1450-1550, with emphasis on La Celestina. (Former SPA 229.)

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

Course Description: Extensive critical study of the main currents of Renaissance and Baroque Spanish poetry through its language structures, styles (Culteranismo-Conceptismo), rhetorical devices, myths, and themes (love, death, time).

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 257 – Spanish Literature of the Renaissance & Golden Age: Drama (4 units)

Course Description: Exploration of major 16th and 17th century literary and cultural developments through the study of selected dramas.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 258 – Spanish Literature of the Renaissance & Golden Age: Prose (4 units)

Course Description: Origins and development of the Spanish novel during the Renaissance and the Spanish Golden Age.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 259 – Cervantes & the Novel (4 units)

Course Description: Narrative works of Miguel de Cervantes with special emphasis on Don Quijote.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 260 – Modern Spanish Literature (4 units)

Course Description: Topics of Spanish literature, from 1700-1920.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 261 – Contemporary Spanish Literature: Poetry (4 units)

Course Description: Critical analysis of modern Spanish poetry from a wide spectrum of poetic currents.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 262 – Contemporary Spanish Literature: Narrative (4 units)

Course Description: Study of the 20th-century novel and short story with emphasis on the avant-garde, existentialism, social realism, and postmodern trends.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when topic differs and with consent of instructor.

Grade Mode: Letter.

SPA 263 – Contemporary Spanish Literature: Drama (4 units)

Course Description: The Spanish theatrical production of the last 70 years.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 264 – Contemporary Spanish Literature: Essay (4 units)

Course Description: Major thinkers from Ganivet to Unamuno and Ortega y Gasset. Emphasis will be placed on the relationships between Spanish thought and European philosophical currents.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 265 – Women Writers of Spain (4 units)

Course Description: Introduction to the development of a feminine consciousness in the Spanish contemporary literary scene. Selected texts represent particularly innovative typologies of feminine discourse in the realm of the historical, psychoanalytical, and metafictional, erotic, and allegorical fiction.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 272 – Critical Approaches to Latin American Literature: Narrative (4 units)

Course Description: Development of Latin American literary periods and currents in narrative (novel, short story, and essay), from early colonial times to the present.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when material differs.

Grade Mode: Letter.

SPA 273 – Critical Approaches to Latin American Literature: Poetry & Drama (4 units)

Course Description: Development of Latin American literary periods and currents in poetry and drama, from early Colonial times to the present.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

SPA 274 – Studies of a Major Writer, Period, or Genre in Latin American Literature (4 units)

Course Description: Artistic development of a major Latin American writer and his/her intellectual and literary milieu or study of a special topic, period, or genre.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Letter.

SPA 275 – Colonial Literature (4 units)

Course Description: An examination of pre-Hispanic and Colonial narrative, poetry and theatre. Emphasis on historical, anthropological, and ethnographic approaches to Colonial discourse.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 276 – 20th-Century Latin American Drama (4 units)

Course Description: Major Latin American dramatists from Florencio

Sánchez to the present. (Former SPA 240.)

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 4 hour(s).

Grade Mode: Letter.

SPA 277 – Latin American Novel, 1900-1950 (4 units)

Course Description: Study of main trends and key authors in Latin America in the first half of the 20th century. (Former SPA 241A.)

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 278 – New Trends in Latin American Fiction (4 units)

Course Description: Recent developments in Latin American narrative.

Emphasis on innovative language and structure. (Former SPA 241B.)

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 279 – Mexican Narrative (4 units)

Course Description: Study of the evolution of Mexican narrative. Emphasis on the narrative of the Revolution and significant contemporary works.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 280 – Latin American Short Story (4 units)

Course Description: Works by major writers with emphasis on 20th-century authors such as Quiroga, Borges, García Márquez, Cortázar, and Rulfo. (Former SPA 243.)

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 281 – Latin American Women Writers (4 units)

Course Description: Study of feminist critical theories, gender construction, and self-representation within the history of socio-cultural changes in Latin America.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 282 – Darío & Modernism (4 units)

Course Description: Study of poetry and prose of Spanish-American Modernism (1880-1916). (Former SPA 245.) Offered in alternate years.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 283 – New Directions in Latin American Poetry (4 units)

Course Description: New trends in Latin American poetry.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 284 – The Latin American Essay (4 units)

Course Description: Major Latin American essayists from Sarmiento to contemporary essayists.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 285 – Multicultural Approaches to Cuban Literature & Culture (4 units)

Course Description: Study of main trends in Cuban literature. Emphasis on historical, geographic, social and cultural context (including music and film). Taught in English; some readings in Spanish.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

SPA 291 – Foreign Language Learning in the Classroom (4 units)

Course Description: Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages.

Learning Activities: Seminar 3 hour(s), Project.

Cross Listing: GER 291, FRE 291.

Grade Mode: Letter.

SPA 298 – Group Study (1-4 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

SPA 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

SPA 300 – The Teaching of Spanish (3 units)

Course Description: Teaching of Spanish.

Prerequisite(s): Senior or graduate standing; a major or minor in Spanish.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

SPA 390 – The Teaching of Spanish in College (4 units)

Course Description: Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of graduate teaching assistants.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

SPA 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Statistics (STA)

College of Letters & Science

STA 010 – Statistical Thinking (4 units)

Course Description: Statistics and probability in daily life. Examines principles of collecting, presenting and interpreting data in order to critically assess results reported in the media; emphasis is on understanding polls, unemployment rates, health studies; understanding probability, risk and odds.

Prerequisite(s): Two years of high school algebra.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Credit Limitation(s): No credit if student has taken STA 013 or STA 013Y or higher.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 012 – Introduction to Discrete Probability (4 units)

Course Description: Random experiments; countable sample spaces; elementary probability axioms; counting formulas; conditional probability; independence; Bayes theorem; expectation; gambling problems; binomial, hypergeometric, Poisson, geometric, negative binomial and multinomial models; limiting distributions; Markov chains. Applications in the social, biological, and engineering sciences.

Prerequisite(s): Two years of high school algebra.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 013 – Elementary Statistics (4 units)

Course Description: Descriptive statistics; basic probability concepts; binomial, normal, Student's t, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression.

Prerequisite(s): Two years of high school algebra or Mathematics D.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit for students who have completed STA 013V, or higher.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 013Y – Elementary Statistics (4 units)

Course Description: Descriptive statistics; basic probability concepts; binomial, normal, Student's t, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression.

Prerequisite(s): Two years of high school algebra or Mathematics D.

Learning Activities: Lecture 1 hour(s), Web Virtual Lecture 2 hour(s); Discussion 1 hour(s).

Credit Limitation(s): No credit if student has taken STA 013, or higher.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 015A – Introduction to Statistical Data Science I (4 units)

Course Description: Principles of descriptive statistics. Concepts of randomness, probability models, sampling variability, hypothesis tests and confidence interval.

Prerequisite(s): Two years of high school algebra or Mathematics D.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken STA 013 or STA 032 or STA 100.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 015B – Introduction to Statistical Data Science II (4 units)

Course Description: Programming in R; Summarization and visualization of different data types; Concepts of correlation, regression, classification and clustering.

Prerequisite(s): STA 015A C- or better or STA 013 C- or better or STA 032 C- or better or STA 100 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

STA 015C – Introduction to Statistical Data Science III (4 units)

Course Description: Classical and Bayesian inference procedures in parametric statistical models. Nonparametric methods; resampling techniques; missing data. Use of statistical software.

Prerequisite(s): STA 015B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 032 – Gateway to Statistical Data Science (4 units)

Course Description: Probability concepts; programming in R; exploratory data analysis; sampling distribution; estimation and inference; linear regression; simulations; resampling methods. Alternative to STA 013 for students with a background in calculus and programming.

Prerequisite(s): MAT 016B C- or better or MAT 021B C- or better or MAT 017B C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Only 2 units of credit allowed to students who have taken STA 013; not open for credit to students who have taken STA 100.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 035A – Statistical Data Science I (4 units)

Course Description: Principles of descriptive statistics; basic R programming; probability models; sampling variability; hypothesis tests; confidence intervals; statistical simulation.

Prerequisite(s): MAT 016A (can be concurrent) or MAT 017A (can be concurrent) or MAT 021A (can be concurrent).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken STA 032 or STA 100. Only 2 units credit for students who have taken STA 013.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 035B – Statistical Data Science II (4 units)

Course Description: Advanced programming and data manipulation in R. Principles of data visualization. Concepts of correlation, regression, analysis of variance, nonparametrics.

Prerequisite(s): (STA 013 C- or better or STA 013Y C- or better, ECS 032A C- or better) or (STA 035A C- or better or STA 032 C- or better or STA 100 C- or better); (MAT 016B (can be concurrent) or MAT 017B (can be concurrent) or MAT 021B (can be concurrent)).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

STA 035C – Statistical Data Science III (4 units)

Course Description: Introduction to statistical learning; Bayesian paradigm; model selection; simultaneous inference; bootstrap and cross validation; classification and clustering methods; PCA; nonparametric smoothing techniques.

Prerequisite(s): STA 035B C- or better; (MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

STA 090X – Seminar (1-2 units)

Course Description: Examination of a special topic in a small group setting.

Prerequisite(s): Consent of instructor; high school algebra.

Learning Activities: Seminar 1-2 hour(s).

Grade Mode: Letter.

STA 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

STA 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

STA 100 – Applied Statistics for Biological Sciences (4 units)

Course Description: Descriptive statistics, probability, sampling distributions, estimation, hypothesis testing, contingency tables, ANOVA, regression; implementation of statistical methods using computer package.

Prerequisite(s): MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Only 2 units credit allowed to students who have taken STA 013, STA 032 or 103; not open for credit to students who have taken STA 102.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 101 – Advanced Applied Statistics for the Biological Sciences (4 units)

Course Description: Basic experimental designs, two-factor ANOVA without interactions, repeated measures ANOVA, ANCOVA, random effects vs. fixed effects, multiple regression, basic model building, resampling methods, multiple comparisons, multivariate methods, generalized linear models, Monte Carlo simulations.

Prerequisite(s): STA 035B C- or better or STA 100 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 103 – Applied Statistics for Business & Economics (4 units)

Course Description: Descriptive statistics; probability; random variables; expectation; binomial, normal, Poisson, other univariate distributions; joint distributions; sampling distributions, central limit theorem; properties of estimators; linear combinations of random variables; testing and estimation; Minitab computing package. May be taught abroad.

Prerequisite(s): (STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better or STA 035B C- or better or STA 100 C- or better); (MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Only 2 units credit to students who have completed STA 100.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 104 – Applied Statistical Methods: Nonparametric Statistics (4 units)

Course Description: Sign and Wilcoxon tests, Walsh averages. Two-sample procedures. Inferences concerning scale. Kruskal-Wallis test. Measures of association. Chi square and Kolmogorov-Smirnov tests.

Prerequisite(s): STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better or STA 035B C- or better or STA 100 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 106 – Applied Statistical Methods: Analysis of Variance (4 units)

Course Description: Basics of experimental design. One-way and two-way fixed effects analysis of variance models. Randomized complete and incomplete block design. Multiple comparisons procedures. One-way random effects model.

Prerequisite(s): STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better or STA 035B C- or better or STA 100 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

STA 108 – Applied Statistical Methods: Regression Analysis (4 units)

Course Description: Simple linear regression, variable selection techniques, stepwise regression, analysis of covariance, influence measures, computing packages.

Prerequisite(s): STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better or STA 035B C- or better or STA 100 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Scientific Literacy (SL).

STA 109 – Fundamentals of Statistical Learning (4 units)

Course Description: Principles of supervised and unsupervised statistical learning. Regularization and cross validation; classification, clustering and dimension reduction techniques; nonparametric smoothing methods.

Prerequisite(s): STA 015C C- or better or STA 106 C- or better or STA 108 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have taken STA 142A or ECS 171; only 2 units credit for students who have taken STA 035C.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

STA 130A – Mathematical Statistics: Brief Course (4 units)

Course Description: Basic probability, densities and distributions, mean, variance, covariance, Chebyshev's inequality, some special distributions, sampling distributions, central limit theorem and law of large numbers, point estimation, some methods of estimation, interval estimation, confidence intervals for certain quantities, computing sample sizes.

Prerequisite(s): (MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better); (STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better or STA 035B C- or better or STA 100 C- or better).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Only 2 units of credit allowed to students who have taken STA 131A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 130B – Mathematical Statistics: Brief Course (4 units)

Course Description: Transformed random variables, large sample properties of estimates. Basic ideas of hypotheses testing, likelihood ratio tests, goodness-of-fit tests. General linear model, least squares estimates, Gauss-Markov theorem. Analysis of variance, F-test. Regression and correlation, multiple regression. Selected topics.

Prerequisite(s): STA 130A C- or better or STA 131A C- or better or MAT 135A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 131A – Introduction to Probability Theory (4 units)

Course Description: Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem.

Prerequisite(s): MAT 021C C- or better; (MAT 022A C- or better or MAT 027A C- or better or MAT 067 C- or better); MAT 021D strongly recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Not open for credit to students who have completed MAT 135A.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 131B – Introduction to Mathematical Statistics (4 units)

Course Description: Sampling, methods of estimation, bias-variance decomposition, sampling distributions, Fisher information, confidence intervals, and some elements of hypothesis testing.

Prerequisite(s): STA 131A C- or better or MAT 135A C- or better; consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

STA 131C – Introduction to Mathematical Statistics (4 units)

Course Description: Testing theory, tools and applications from probability theory, Linear model theory, ANOVA, goodness-of-fit.

Prerequisite(s): STA 131B C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

STA 135 – Multivariate Data Analysis (4 units)

Course Description: Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and covariance matrix; Hotellings T2; simultaneous inference; one-way MANOVA; discriminant analysis; principal components; canonical correlation; factor analysis. Intensive use of computer analyses and real data sets.

Prerequisite(s): (STA 130B C- or better or STA 131B C- or better); (MAT 022A C- or better or MAT 027A C- or better or MAT 067 C- or better); MAT 167 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 137 – Applied Time Series Analysis (4 units)

Course Description: Time series relationships; univariate time series models: trend, seasonality, correlated errors; regression with correlated errors; autoregressive models; autoregressive moving average models; spectral analysis: cyclical behavior and periodicity, measures of periodicity, periodogram; linear filtering; prediction of time series; transfer function models.

Prerequisite(s): STA 108 C- or better; (MAT 022A C- or better or MAT 027A C- or better or MAT 067 C- or better).

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 138 – Analysis of Categorical Data (4 units)

Course Description: Varieties of categorical data, cross-classifications, contingency tables, tests for independence. Multidimensional tables and log-linear models, maximum likelihood estimation; tests of goodness-of-fit. Logit models, linear logistic models. Analysis of incomplete tables.

Packaged computer programs, analysis of real data.

Prerequisite(s): (STA 130B or STA 131B) or (STA 106, STA 108).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 141A – Fundamentals of Statistical Data Science (4 units)

Course Description: Introduction to computing for data analysis & visualization, and simulation, using a high-level language (e.g., R).

Computational reasoning, computationally intensive statistical methods, reading tabular & non-standard data.

Prerequisite(s): STA 108 C- or better or STA 106 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One & Pass Two: open to Statistics Majors, Biostatistics & Statistics graduate students; registration open to all students during schedule adjustment.

Credit Limitation(s): Not open for credit to students who have taken STA 141 or STA 242.

Grade Mode: Letter.

STA 141B – Data & Web Technologies for Data Analysis (4 units)

Course Description: Essentials of using relational databases and SQL. Processing data in blocks. Scraping Web pages and using Web services/APIs. Basics of text mining. Interactive data visualization with Web technologies. Computational data workflow and best practices. Statistical methods.

Prerequisite(s): STA 141A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One and Pass Two restricted to Statistics majors and graduate students in Statistics and Biostatistics. Open to all students during Open Registration.

Grade Mode: Letter.

STA 141C – Big Data & High Performance Statistical Computing (4 units)

Course Description: High-performance computing in high-level data analysis languages; different computational approaches and paradigms for efficient analysis of big data; interfaces to compiled languages; R and Python programming languages; high-level parallel computing; MapReduce; parallel algorithms and reasoning.

Prerequisite(s): STA 141B C- or better or (STA 141A C- or better, (ECS 010 C- or better or ECS 032A C- or better)).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One and Pass Two restricted to Statistics majors and graduate students in Statistics and Biostatistics; open to all students during Open registration.

Grade Mode: Letter.

STA 142A – Statistical Learning I (4 units)

Course Description: Fundamental concepts and methods in statistical learning with emphasis on supervised learning. Principles, methodologies and applications of parametric and nonparametric regression, classification, resampling and model selection techniques.

Prerequisite(s): STA 141A C- or better; (STA 130A C- or better or STA 131A C- or better or MAT 135A C- or better); (MAT 022A C- or better or MAT 027A C- or better or MAT 067 C- or better); STA 131A or MAT 135A preferred; MAT 167 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Statistics majors.

Credit Limitation(s): Only 2 units of credit for students who have previously taken ECS 171.

Grade Mode: Letter.

STA 142B – Statistical Learning II (4 units)

Course Description: Fundamental concepts and methods in statistical learning with emphasis on unsupervised learning. Principles, methodologies and applications of clustering methods, dimension reduction and manifold learning techniques, graphical models and latent variables modeling.

Prerequisite(s): STA 141A C- or better; (STA 130A C- or better or STA 131A C- or better or MAT 135A C- or better); (MAT 022A C- or better or MAT 027A C- or better or MAT 067 C- or better); STA 131A or MAT 135A preferred; MAT 167 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Pass One restricted to Statistics majors.

Grade Mode: Letter.

STA 144 – Sampling Theory of Surveys (4 units)

Course Description: Simple random, stratified random, cluster, and systematic sampling plans; mean, proportion, total, ratio, and regression estimators for these plans; sample survey design, absolute and relative error, sample size selection, strata construction; sampling and nonsampling sources of error.

Prerequisite(s): (STA 130B or STA 131B) or (STA 106, STA 108).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 145 – Bayesian Statistical Inference (4 units)

Course Description: Subjective probability, Bayes Theorem, conjugate priors, non-informative priors, estimation, testing, prediction, empirical Bayes methods, properties of Bayesian procedures, comparisons with classical procedures, approximation techniques, Gibbs sampling, hierarchical Bayesian analysis, applications, computer implemented data analysis.

Prerequisite(s): STA 130A C- or better or STA 131A C- or better or MAT 135A C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

STA 160 – Practice in Statistical Data Science (4 units)

Course Description: Principles and practice of interdisciplinary, collaborative data analysis; complete case study review and team data analysis project.

Prerequisite(s): STA 141A C- or better.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Enrollment Restriction(s): Open to undergraduate Statistics and Data Science majors.

Grade Mode: Letter.

STA 190X – Seminar (1-2 units)

Course Description: In-depth examination of a special topic in a small group setting.

Prerequisite(s): STA 013 or STA 013Y or STA 032 or STA 100 or STA 103.

Learning Activities: Seminar 1-2 hour(s).

Grade Mode: Letter.

STA 192 – Internship in Statistics (1-12 units)

Course Description: Work experience in statistics.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3-36 hour(s), Term Paper.

Grade Mode: Pass/No Pass only.

STA 194HA – Special Studies for Honors Students (4 units)

Course Description: Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty advisor.

Prerequisite(s): Senior qualifying for honors.

Learning Activities: Independent Study 12 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

STA 194HB – Special Studies for Honors Students (4 units)

Course Description: Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty advisor.

Prerequisite(s): Senior qualifying for honors.

Learning Activities: Independent Study 12 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

STA 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

STA 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

STA 200A – Introduction to Probability Theory (4 units)

Course Description: Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem.

Prerequisite(s): MAT 021A; MAT 021B; MAT 021C; MAT 022A; consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

STA 200B – Introduction to Mathematical Statistics I (4 units)

Course Description: Sampling, methods of estimation, bias-variance decomposition, sampling distributions, Fisher information, confidence intervals, and some elements of hypothesis testing.

Prerequisite(s): STA 200A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

STA 200C – Introduction to Mathematical Statistics II (4 units)

Course Description: Testing theory, tools and applications from probability theory, Linear model theory, ANOVA, goodness-of-fit.

Prerequisite(s): STA 200B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

STA 201 – SAS Programming for Statistical Analysis (3 units)

Course Description: Introductory SAS language, data management, statistical applications, methods. Includes basics, graphics, summary statistics, data sets, variables and functions, linear models, repetitive code, simple macros, GLIM and GAM, formatting output, correspondence analysis, bootstrap. Prepare SAS base programmer certification exam.

Prerequisite(s): Introductory, upper division statistics course; some knowledge of vectors and matrices; STA 106 or STA 108 or the equivalent suggested.

Learning Activities: Lecture 2 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

STA 205 – Statistical Methods for Research with SAS (4 units)

Course Description: Focus on linear statistical models widely used in scientific research. Emphasis on concepts, methods and data analysis using SAS. Topics include simple and multiple linear regression, polynomial regression, diagnostics, model selection, variable transformation, factorial designs and ANCOVA.

Prerequisite(s): An introductory upper division statistics course and some knowledge of vectors and matrices; STA 100, or STA 102, or STA 103 suggested or the equivalent.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

STA 206 – Statistical Methods for Research I (4 units)

Course Description: Focus on linear statistical models. Emphasis on concepts, method and data analysis. Topics include simple and multiple linear regression, polynomial regression, diagnostics, model selection, factorial designs and analysis of covariance. Use of professional level software.

Prerequisite(s): Introductory statistics course; some knowledge of vectors and matrices.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

STA 207 – Statistical Methods for Research II (4 units)

Course Description: Linear and nonlinear statistical models emphasis on concepts, methods/data analysis using professional level software. Topics include linear mixed models, repeated measures, generalized linear models, model selection, analysis of missing data, and multiple testing procedures.

Prerequisite(s): STA 206; knowledge of vectors and matrices.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

STA 208 – Statistical Methods in Machine Learning (4 units)

Course Description: Focus on linear and nonlinear statistical models. Emphasis on concepts, methods, and data analysis. Topics include resampling methods, regularization techniques in regression and modern classification, cluster analysis and dimension reduction techniques. Use professional level software.

Prerequisite(s): STA 206; STA 207; STA 135; or their equivalents.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

STA 209 – Optimization for Big Data Analytics (4 units)

Course Description: Optimization algorithms for solving problems in statistics, machine learning, data analytics. Review computational tools for implementing optimization algorithms (gradient descent, stochastic gradient descent, coordinate descent, Newton's method.)

Prerequisite(s): STA 200A; STA 208.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

STA 220 – Data & Web Technologies for Data Analysis (4 units)

Course Description: Essentials of using relational databases and SQL. Processing data in blocks. Scraping Web pages and using Web services/APIs. Basics of text mining. Interactive data visualization with Web technologies. Computational data workflow and best practices. Statistical Methods.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

STA 221 – Big Data & High Performance Statistical Computing (4 units)

Course Description: High-performance computing in high-level data analysis languages; different computational approaches and paradigms for efficient analysis of big data; interfaces to compiled languages; R and Python programming languages; high-level parallel computing; MapReduce; parallel algorithms and reasoning.

Prerequisite(s): STA 220.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

STA 222 – Biostatistics: Survival Analysis (4 units)

Course Description: Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics.

Prerequisite(s): STA 131C.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: BST 222.

Grade Mode: Letter.

STA 223 – Biostatistics: Generalized Linear Models (4 units)

Course Description: Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs.

Prerequisite(s): STA 131C.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: BST 223.

Grade Mode: Letter.

STA 224 – Analysis of Longitudinal Data (4 units)

Course Description: Standard and advanced methodology, theory, algorithms, and applications relevant for analysis of repeated measurements and longitudinal data in biostatistical and statistical settings.

Prerequisite(s): ((STA 222, STA 223) or (BST 222, BST 223)); STA 232B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: BST 224.

Grade Mode: Letter.

STA 225 – Clinical Trials (4 units)

Course Description: Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials.

Prerequisite(s): STA 223 or BST 223; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: BST 225.

Grade Mode: Letter.

STA 226 – Statistical Methods for Bioinformatics (4 units)

Course Description: Standard and advanced statistical methodology, theory, algorithms, and applications relevant to the analysis of -omics data.

Prerequisite(s): STA 131C; or consent of instructor; data analysis experience recommended.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Cross Listing: BST 226.

Grade Mode: Letter.

STA 231A – Mathematical Statistics I (4 units)

Course Description: First part of three-quarter sequence on mathematical statistics. Emphasizes foundations. Topics include basic concepts in asymptotic theory, decision theory, and an overview of methods of point estimation.

Prerequisite(s): STA 131A; STA 131B; STA 131C; MAT 025; MAT 125A; or equivalent of MAT 025 and MAT 125A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

STA 231B – Mathematical Statistics II (4 units)

Course Description: Second part of a three-quarter sequence on mathematical statistics. Emphasizes hypothesis testing (including multiple testing) as well as theory for linear models.

Prerequisite(s): STA 231A.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

STA 231C – Mathematical Statistics III (4 units)

Course Description: Third part of three-quarter sequence on mathematical statistics. Emphasizes large sample theory and their applications. Topics include statistical functionals, smoothing methods and optimization techniques relevant for statistics.

Prerequisite(s): STA 231A; STA 231B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

STA 232A – Applied Statistics I (4 units)

Course Description: Estimation and testing for the general linear model, regression, analysis of designed experiments, and missing data techniques.

Prerequisite(s): STA 106; STA 108; STA 131A; STA 131B; STA 131C; MAT 167.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

STA 232B – Applied Statistics II (4 units)

Course Description: Alternative approaches to regression, model selection, nonparametric methods amenable to linear model framework and their applications.

Prerequisite(s): STA 106; STA 108; STA 131A; STA 131B; STA 131C; STA 232A; MAT 167.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

STA 232C – Applied Statistics III (4 units)

Course Description: Multivariate analysis: multivariate distributions, multivariate linear models, data analytic methods including principal component, factor, discriminant, canonical correlation and cluster analysis.

Prerequisite(s): STA 106; STA 108; STA 131C; STA 232B; MAT 167.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

STA 233 – Design Experiments (3 units)

Course Description: Topics from balanced and partially balanced incomplete block designs, fractional factorials, and response surfaces.

Prerequisite(s): STA 131C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

STA 235A – Probability Theory (4 units)

Course Description: Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory.

Prerequisite(s): (MAT 125B, MAT 135A) or STA 131A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Cross Listing: MAT 235A.

Grade Mode: Letter.

STA 235B – Probability Theory (4 units)

Course Description: Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory.

Prerequisite(s): STA 235A or MAT 235A; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Cross Listing: MAT 235B.

Grade Mode: Letter.

STA 235C – Probability Theory (4 units)

Course Description: Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory.

Prerequisite(s): STA 235B or MAT 235B; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper/Discussion 1 hour(s).

Cross Listing: MAT 235C.

Grade Mode: Letter.

STA 237A – Time Series Analysis (4 units)

Course Description: Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering.

Prerequisite(s): STA 131B; or the equivalent of STA 131B.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

STA 237B – Time Series Analysis (4 units)

Course Description: Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering.

Prerequisite(s): STA 131B; STA 237A; or the equivalent of STA 131B.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

STA 238 – Theory of Multivariate Analysis (4 units)

Course Description: Multivariate normal and Wishart distributions, Hotellings T-Squared, simultaneous inference, likelihood ratio and union intersection tests, Bayesian methods, discriminant analysis, principal component and factor analysis, multivariate clustering, multivariate regression and analysis of variance, application to data.

Prerequisite(s): STA 131B; STA 135.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

STA 240A – Nonparametric Inference (4 units)

Course Description: Comprehensive treatment of nonparametric statistical inference, including the most basic materials from classical nonparametrics, robustness, nonparametric estimation of a distribution function from incomplete data, curve estimation, and theory of resampling methodology.

Prerequisite(s): STA 231C; STA 235A, STA 235B, STA 235C recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

STA 240B – Nonparametric Inference (4 units)

Course Description: Comprehensive treatment of nonparametric statistical inference, including the most basic materials from classical nonparametrics, robustness, nonparametric estimation of a distribution function from incomplete data, curve estimation, and theory of resampling methodology.

Prerequisite(s): STA 231C; STA 235A, STA 235B, STA 235C recommended.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

STA 241 – Asymptotic Theory of Statistics (4 units)

Course Description: Topics in asymptotic theory of statistics chosen from weak convergence, contiguity, empirical processes, Edgeworth expansion, and semiparametric inference.

Prerequisite(s): STA 231C; STA 235A, STA 235B, STA 235C desirable.

Learning Activities: Lecture 3 hour(s), Term Paper.

Grade Mode: Letter.

STA 242 – Introduction to Statistical Programming (4 units)

Course Description: Essentials of statistical computing using a general-purpose statistical language. Topics include algorithms; design; debugging and efficiency; object-oriented concepts; model specification and fitting; statistical visualization; data and text processing; databases; computer systems and platforms; comparison of scientific programming languages.

Prerequisite(s): STA 130A; STA 130B; or equivalent of STA 130A and STA 130B.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

STA 243 – Computational Statistics (4 units)

Course Description: Numerical analysis; random number generation; computer experiments and resampling techniques (bootstrap, cross validation); numerical optimization; matrix decompositions and linear algebra computations; algorithms (markov chain monte carlo, expectation-maximization); algorithm design and efficiency; parallel and distributed computing.

Prerequisite(s): (STA 130A, STA 130B); (MAT 067 or MAT 167); or equivalent of STA 130A and 130B, or equivalent of MAT 167 or MAT 067.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Grade Mode: Letter.

STA 250 – Topics in Applied & Computational Statistics (4 units)

Course Description: Resampling, nonparametric and semiparametric methods, incomplete data analysis, diagnostics, multivariate and time series analysis, applied Bayesian methods, sequential analysis and quality control, categorical data analysis, spatial and image analysis, computational biology, functional data analysis, models for correlated data, learning theory.

Prerequisite(s): STA 131A; STA 232A recommended, not required.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Repeat Credit: May be repeated with consent of graduate advisor.

Grade Mode: Letter.

STA 251 – Topics in Statistical Methods & Models (4 units)

Course Description: Topics may include Bayesian analysis, nonparametric and semiparametric regression, sequential analysis, bootstrap, statistical methods in high dimensions, reliability, spatial processes, inference for stochastic process, stochastic methods in finance, empirical processes, change-point problems, asymptotics for parametric, nonparametric and semiparametric models, nonlinear time series, robustness.

Prerequisite(s): STA 231B; or the equivalent of STA 231B.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated when topic differs and only with consent of graduate advisor.

Grade Mode: Letter.

STA 252 – Advanced Topics in Biostatistics (4 units)

Course Description: Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; analysis of environmental data; dose-response, nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics.

Prerequisite(s): (STA 222 or BST 222); (STA 223 or BST 223).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Repeat Credit: May be repeated when topic differs and only with consent of graduate advisor.

Cross Listing: BST 252.

Grade Mode: Letter.

STA 260 – Statistical Practice & Data Analysis (3 units)

Course Description: Principles and practice of interdisciplinary collaboration in statistics, statistical consulting, ethical aspects, and basics of data analysis and study design. Emphasis on practical consulting and collaboration of statisticians with clients and scientists under instructor supervision.

Prerequisite(s): STA 207 or STA 232B; working knowledge of advanced statistical software and the equivalent of STA 207 or STA 232B.

Learning Activities: Lecture/Discussion 3 hour(s).

Enrollment Restriction(s): Open to students enrolled in the graduate program in Statistics or Biostatistics, as the class also serves to provide professional service to clients and collaborators who work with the students.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

STA 280 – Orientation to Statistical Research (2 units)

Course Description: Guided orientation to original statistical research papers, and oral presentations in class of such papers by students under the supervision of a faculty member.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

STA 290 – Seminar in Statistics (1-6 units)

Course Description: Seminar on advanced topics in probability and statistics.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

STA 292 – Graduate Group in Statistics Seminar (1-2 units)

Course Description: Advanced study in various fields of statistics with emphasis in applied topics, presented by members of the Graduate Group in Statistics and other guest speakers.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Seminar 1-2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

STA 298 – Directed Group Study (1-5 units)

Course Description: Special topics in Statistics appropriate for study at the graduate level.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

STA 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

STA 299D – Dissertation Research (1-12 units)

Course Description: Research in Statistics under the supervision of major professor.

Prerequisite(s): Consent of instructor; advancement to candidacy for Ph.D.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

STA 390 – Methods of Teaching Statistics (2 units)

Course Description: Practical experience in methods/problems of teaching statistics at university undergraduate level. Lecturing techniques, analysis of tests and supporting material, preparation and grading of examinations, and use of statistical software. Emphasis on practical training.

Prerequisite(s): Graduate standing.

Learning Activities: Lecture/Discussion 1 hour(s), Laboratory 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

STA 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

STA 401 – Methods in Statistical Consulting (3 units)

Course Description: Introduction to consulting, in-class consulting as a group, statistical consulting with clients, and in-class discussion of consulting problems. Clients are drawn from a pool of University clients.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Students must be enrolled in the graduate program in Statistics or Biostatistics.

Repeat Credit: May be repeated with consent of graduate advisor.

Grade Mode: Satisfactory/Unsatisfactory only.

Study of Religion (REL)

College of Letters & Science

REL 200A – Historical Roots of the Study of Religion (4 units)

Course Description: Consideration of the historical and philosophical formation of religion as a concept. Treats the emergence of religion as a category of analysis and understanding from the Reformation through the Enlightenment.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

REL 200B – Foundational Theories of Religion (4 units)

Course Description: Survey of classical 19th and 20th century approaches to the study of religion.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

REL 200C – Contemporary Approaches to the Study of Religion (4 units)

Course Description: Consideration of major themes, issues and methods in the contemporary study of religion. Perspectives from diverse cultural settings employed to consider modern historical, philosophical, and social contexts that inform understandings of religion.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

REL 200D – Field Profile Seminar I & II (1-2 units)

Course Description: Individually guided research to survey the field of study, under the supervision of a faculty member. Four units total over two or more quarters are required by the end of the second year.

Learning Activities: Project.

Repeat Credit: May be repeated.

Grade Mode: Letter.

REL 210A – Special Topics in American Religious Cultures (4 units)

Course Description: Comparative, interpretive study of the treatment of specific topics in American religious cultures.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

REL 210B – Special Topics in Asian Religious Cultures (4 units)

Course Description: Comparative, interpretive study of the treatment of specific topics in Asian religious cultures.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

REL 210C – Special Topics in Mediterranean Religious Cultures (4 units)

Course Description: Comparative, interpretive study of the treatment of specific topics in Mediterranean religious cultures.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

REL 230A – Thematic Topics: Body & Praxis (4 units)

Course Description: Comparative, interpretive study of the treatment of religion through specific topics and themes relating to the body and praxis.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

REL 230B – Thematic Topics: Language, Rhetoric, & Performance (4 units)

Course Description: Comparative, interpretive study of the treatment of religion through specific topics and themes relating to language, rhetoric, and performance.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

REL 230C – Thematic Topics: Modernity, Science, & Secularism (4 units)

Course Description: Comparative, interpretive study of the treatment of religion through specific topics and themes relating to modernity, science, and secularism.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

REL 230D – Thematic Topics: Theory & Method (4 units)

Course Description: Comparative, interpretive study of the treatment of religion through specific topics and themes relating to theory and method.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

REL 230E – Thematic Topics: Values, Ethics, & Human Rights (4 units)

Course Description: Comparative, interpretive study of the treatment of religion through specific topics and themes relating to values, ethics, and human rights.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

REL 230F – Thematic Topics: Visual Culture, Media, & Technology (4 units)

Course Description: Comparative, interpretive study of the treatment of religion through specific topics and themes relating to visual culture, media, and technology.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Letter.

REL 231B – Theories of Language (4 units)

Course Description: Focuses on historical theories of language that precede and accompany post-structuralist theory. Intended to introduce graduate students to the context of modern theory formation. May cover structuralism, integrationism, and grammaticalization.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

REL 231E – History, Theory & Criticism of Human Rights (4 units)

Course Description: Introduces the advanced study of Human Rights and the theoretical and practical elaboration of the international Human Rights system. Seminar engages with criticism of Human Rights and develops research and teaching within disciplinary and interdisciplinary frameworks.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to graduate students.

Cross Listing: HMR 200A.

Grade Mode: Letter.

REL 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

REL 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

REL 299D – Dissertation Writing (1-12 units)

Course Description: Dissertation Writing.

Prerequisite(s): Consent of instructor; advanced to candidacy for the Ph.D. program.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Surgery (SUR)

School of Medicine

SUR 099 – Cardiovascular Tissue Engineering Research (1-5 units)

Course Description: Multidisciplinary research in cardiovascular tissue engineering and regeneration for acquired and congenital cardiovascular disease.

Learning Activities: Laboratory 3-15 hour(s).

Grade Mode: Letter.

SUR 192 – Internship in General Surgery (1-12 units)

Course Description: Supervised work experience in general surgery and related fields.

Prerequisite(s): Consent of instructor. Upper division standing; approval of project prior to period of internship by preceptor.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

SUR 199 – Special Study in General Surgery for Advanced Undergraduates (1-5 units)

Course Description: Special study in general surgery for advanced undergraduates.

Prerequisite(s): Advanced undergraduate student with consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

SUR 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

SUR 430 – Surgery Clerkship (3-12 units)

Course Description: Eight week general surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCDMC. Daily core material presentations and reading assignments. Student involvement includes work-up and care of surgical patients.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 430F – SJVP Surgery Clerkship at UCSF (6-12 units)

Course Description: General surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCSF Fresno. Student involvement includes work-up and care of surgical patients.

Prerequisite(s): Approval by School of Medicine Committee on Student Progress.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 430R – Rural PRIME Surgery Longitudinal Clerkship (2 units)

Course Description: Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 430RA – Rural PRIME Surgery Longitudinal Clerkship (3 units)

Course Description: Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 430RB – Rural PRIME Surgery Longitudinal Clerkship (3 units)

Course Description: Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 430RC – Rural PRIME Surgery Longitudinal Clerkship (3 units)

Course Description: Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 430RD – Rural PRIME Surgery Longitudinal Clerkship (1 unit)

Course Description: Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 45 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 439D – Directed Clinical Studies in Surgery (1-12 units)

Course Description: Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence.

Prerequisite(s): Consent of instructor; partial completion of a Clinical Rotation.

Learning Activities: Clinical Activity 40 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

SUR 439R – Directed Studies in Surgery (1-12 units)

Course Description: Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 30 hour(s), Independent Study 10 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/Fail only.

SUR 450 – Surgical Skills Boot Camp (3-6 units)

Course Description: Goal of the surgical skills boot camp didactic is to enable students to demonstrate competence in basic surgical skills and theory, using analytical thinking and hands-on simulation.

Prerequisite(s): Consent of instructor.

Learning Activities: Workshop 10 hour(s), Independent Study 30 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

SUR 461 – Surgery Burn Unit Clerkship (6-9 units)

Course Description: Rotation through Surgery Specialty Clinics: Vascular, GI, GU, Thoracic, Plastic, Radiotherapy. Student works up one new and two return visit patients. Presents consult to on-site faculty. Weekly review with preceptor and course director. Reading assignments to add perspective for in-depth discussions.

Prerequisite(s): SUR 430; and consent of instructor; fourth-year medical student or third-year medical student.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

SUR 462 – Surgery Trauma Service Clerkship (6-9 units)

Course Description: Student works as an extern on one of the two general surgery Trauma teams, participating in resuscitation and management of critically injured patients. Team hours consist of 24 hours on, and 24 hours off.

Prerequisite(s): SUR 430; and consent of instructor; fourth-year medical student, or third-year medical student.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

SUR 463 – Surgery Intensive Care Unit (6-9 units)

Course Description: Student participates in direct supervision of critically ill surgical patients in a twelve-bed surgery ICU. Each student is closely supervised. Provides in-depth experience with management of critically ill patients.

Prerequisite(s): SUR 430; and consent of instructor; fourth-year medical student, or third-year medical student.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

SUR 465 – Surgery Intensive Care Unit (3-8 units)

Course Description: Focuses on single family, attached, detached, multi-family, and light commercial development. Study factors which make up successful real estate developments. Consider financial aspects involved in land acquisition, land development, construction, and project lending.

Learning Activities: Variable.

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Honors/Pass/Fail Only.

SUR 466 – Clinical Plastic Surgery Elective (3-9 units)

Course Description: Total involvement in patient care involving surgical preparation, treatment, operative care, and follow-up. Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included. Student rotation.

Prerequisite(s): SUR 430; and consent of instructor; third- or fourth-year medical students.

Learning Activities: Clinical Activity 50 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 467 – Surgical Oncology (3-9 units)

Course Description: Students actively participate in management of patients requiring surgery for cancer, endocrine disease and selected general surgical problems. Cases include malignant melanoma, sarcomas, gastrointestinal cancer, head and neck pathology, and metastatic malignancies. Attending rounds daily. Four teaching conferences weekly.

Prerequisite(s): SUR 430; and consent of instructor; fourth-year medical student, or third-year medical student.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

SUR 468 – Cardiothoracic Surgery Clerkship (6-9 units)

Course Description: Student works as an extern on the Cardiothoracic Surgical Service, participating in perioperative management and operations on the heart, lungs, mediastinum, and other thoracic structures. Regularly scheduled teaching conferences are conducted.

Prerequisite(s): SUR 430; and consent of instructor; fourth-year medical student, or third-year medical student.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

SUR 471 – Gastrointestinal Surgery (3-9 units)

Course Description: Student participates on the GI Surgery Service, working under the immediate supervision of the faculty and surgical housestaff, involving the full spectrum of gastrointestinal diseases performed by the medical student.

Prerequisite(s): SUR 430; IMD 430; PED 430; and consent of instructor.

Fourth-year medical student or third-year medical student.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

SUR 472 – Vascular Surgery (3-9 units)

Course Description: Student participates on the vascular surgery service and in the management and operations of arterial and venous system, exclusive of diseases that require cardiopulmonary bypass for treatment. Includes patient care responsibilities with appropriate supervision.

Prerequisite(s): SUR 430; IMD 430; PED 430; and consent of instructor; fourth-year medical student or third-year medical student.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

SUR 474 – Colorectal Surgery (3-6 units)

Course Description: Students actively participate in clinic and the operating room on colon and rectal patients. This includes medical and surgical management. Assignments involve work up and care of the surgical patients.

Prerequisite(s): Consent of instructor; fourth-year medical student.

Learning Activities: Clinical Activity.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

SUR 475 – Pediatric Surgery (6-9 units)

Course Description: Care of patients with neonatal congenital surgical problems. Fluid and electrolyte management in infants. General experience with acquired surgical diseases in children.

Prerequisite(s): SUR 430; and consent of instructor; fourth-year medical student or third-year medical student.

Learning Activities: Clinical Activity 4-6 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 476 – Surgical Consult Service (6-9 units)

Course Description: Students function as acting interns working in parallel with the interns on the service. They consult on all non-trauma patients in the emergency room and on the wards and also participate in the operating room.

Prerequisite(s): SUR 430; and consent of instructor; fourth-year medical student or third-year medical student.

Learning Activities: Clinical Activity.

Grade Mode: Honors/Pass/Fail.

SUR 477 – Clinically Oriented Anatomy (3 units)

Course Description: Anatomy of selected regions of the body using cadaver dissection, prosections and interactive CD ROMs. Anatomical relationships relevant to common surgical procedures. Surgical and interventional radiology procedures.

Prerequisite(s): Completion of three years of medical school.

Learning Activities: Clinical Activity 40 hour(s).

Enrollment Restriction(s): Restricted to fourth-year medical student only.

Grade Mode: Pass/No Pass only.

SUR 478 – Surgical Preceptorship: Off Campus (3-18 units)

Course Description: Student participates in the preoperative, operative and postoperative care of surgical patients under the supervision of attending staff.

Prerequisite(s): Consent of instructor; fourth-year medical student.

Learning Activities: Clinical Activity 60 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 480 – Insights in Surgery (1-3 units)

Course Description: Individualized activities, including ward rounds, subspecialty clinics and conferences, grand rounds, and observation of a variety of surgical procedures.

Prerequisite(s): Consent of instructor; medical student in good academic standing.

Learning Activities: Clinical Activity 3-9 hour(s).

Grade Mode: Honors/Pass/Fail.

SUR 481 – Interactive Clinical Case Presentation (ICCP) (4 units)

Course Description: Case presentation of common clinical scenarios (i.e. chestpain/MI; fever/pneumonia; abdo pain/chlecy stites, etc.) from various discipline held in an auditorium with real patients exposure. Interactive session to review history, physical findings and case management. Students will be asked to perform H&P.

Prerequisite(s): Fourth-year medical students; however, course is open for third- and fourth-year student observers.

Learning Activities: Clinical Activity 1 hour(s).

Enrollment Restriction(s): Course taught as one session (4 hours) per month for three quarters (July to March); students who enroll can earn up to three credits and the minimum requirements will be to attend at least six sessions; students can do all nine sessions and work toward an honor; for the written part students will have to pick two of the nine case presentations and write a detailed paper with a literature review on "The Current management" of that disease-this can in fact be a manuscript submitted for publication with a faculty member as an advisor; maximum of 10-15 students in good standing.

Grade Mode: Honors/Pass/Fail.

SUR 482 – Vascular Surgery Virtual External Rotation (3 units)

Course Description: Vascular surgery is the field of medical and surgical management of vascular pathology ranging from lower extremity claudication to aortic aneurysms. Rotation brings a level of understanding pursuant of an intern. Instruction through daily virtual rounding and self-directed learning through readings and operation videos; direct patient care is not included.

Learning Activities: Web Virtual Lecture.

Grade Mode: Pass/Fail only.

SUR 483 – General Thoracic Surgery Acting Internship (6 units)

Course Description: This four- week Acting Internship (AI) with the Division of General Thoracic Surgery is designed to be an initial comprehensive exposure to adult general thoracic surgery, including preoperative assessment, perioperative management and postoperative care.

Learning Activities: Internship.

Grade Mode: Honors/Pass/Fail.

SUR 484 – Multidisciplinary Experience in Endocrine Neoplasia (3 units)

Course Description: Consists predominately of multidisciplinary clinical experiences focusing on the diagnosis and management of patients with benign and malignant thyroid disease, parathyroid disorders, benign and malignant adrenal disease, pituitary neoplasia, and multiple endocrine neoplasia syndromes.

Learning Activities: Clinical Activity, Web Virtual Lecture.

Grade Mode: Pass/Fail only.

SUR 493B – Critically Ill Surgical Patients SSM (6 units)

Course Description: Special Study Module, a four-week course on the topic: Application of Basic Cardiopulmonary Physiology to Problems Encountered in Critically Ill Surgical Patients.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Lecture/Lab 10 hour(s), Laboratory 16 hour(s), Clinical Activity 4 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Grade Mode: Honors/Pass/Fail.

SUR 493C – Physiological Principles in SICU SSM (6 units)

Course Description: Special Study Module, a four-week course on the topic: Care of the Critically Ill Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Lecture/Lab 10 hour(s), Laboratory 16 hour(s), Clinical Activity 4 hour(s).

Enrollment Restriction(s): Restricted to UC Davis School of Medicine students only.

Cross Listing: HPH 493.

Grade Mode: Honors/Pass/Fail.

SUR 493D – Interdisciplinary Study of Gastrointestinal Cancer (6 units)

Course Description: In-depth study of gastrointestinal, hepatic and pancreatic cancer. Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 5 hour(s), Clinical Activity 12 hour(s), Laboratory 3 hour(s), Discussion/Laboratory 20 hour(s).

Cross Listing: PMD 493.

Grade Mode: Honors/Pass/Fail.

SUR 494H – Fourth-Year Surgical Honors Program (18 units)

Course Description: To provide intensive and comprehensive training in surgery to students interested in a postgraduate surgical career, that would enable them to succeed during the internship and residency training.

Prerequisite(s): SUR 430; and consent of instructor; completion of third year of medical school with superior performance on SUR 430.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

SUR 495 – Intense Introduction to Cardiac Surgery (3 units)

Course Description: Close contact with vascular surgeon for two-week period. Includes Sunday mornings. Physiology of going on and off cardiopulmonary bypass. Atherosclerotic cardiovascular disease, structural and valvular heart disease and electrical and rhythmic heart disease.

Prerequisite(s): Consent of instructor.

Learning Activities: Clinical Activity 16 hour(s), Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to between first- and second-year medical student; 100% mandatory attendance.

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Pass/Fail only.

SUR 498 – Group Study (1-5 units)

Course Description: Directed reading and discussion and/or laboratory investigation on selected topics.

Prerequisite(s): Consent of instructor; medical student.

Learning Activities: Variable.

Grade Mode: Honors/Pass/Fail.

SUR 499 – Laboratory Research (1-12 units)

Course Description: Laboratory research on surgically related problems. Participation in projects to include the following: burn, nutrition, oncology, transplant and others.

Prerequisite(s): Consent of instructor; completion of second year of medical school.

Learning Activities: Laboratory 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Surgical & Radiological Sciences (VSR)

School of Veterinary Medicine

VSR 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

VSR 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

VSR 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

VSR 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-36 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Sustainable Agriculture & Food Systems (SAF)

College of Agricultural & Environmental Sciences

SAF 090 – SA & FS Seminar (1-2 units)

Course Description: Introductory or survey topics within Sustainable Agriculture & Food Systems.

Learning Activities: Seminar 1-3 hour(s).

Repeat Credit: May be repeated when topic differs.

Grade Mode: Pass/No Pass only.

SAF 090X – SA & FS Portfolio (1-4 units)

Course Description: SA&FS Portfolios are designed to complement interdisciplinary, academic coursework by supporting student development of each of the SA&FS Student Learning Outcomes: Systems Thinking, Experimentation & Inquiry, Understanding Values, Interpersonal Communication, Strategic Management, Civic Engagement and Personal Development.

Prerequisite(s): Consent of instructor.

Learning Activities: Workshop 3-12 hour(s).

Enrollment Restriction(s): Restricted to Sustainable Agriculture & Food Systems majors with lower-division standing or consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SAF 092 – Internship (1-12 units)

Course Description: Lower-division internship for students enrolled in the Sustainable Agriculture & Food Systems program of study.

Prerequisite(s): Consent of instructor.

Learning Activities: Internship 3-36 hour(s), Variable 1 hour(s).

Enrollment Restriction(s): Restricted to Sustainable Agriculture & Food Systems majors or with consent of instructor; non-majors by consent of instructor.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

SAF 098 – Directed Group Study (1-5 units)

Course Description: Group study on focused topics in Sustainable Agriculture & Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 3-15 hour(s).

Enrollment Restriction(s): Restricted to Sustainable Agriculture & Food Systems major or with consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SAF 099 – Special Study for Undergraduates (1-5 units)

Course Description: Under faculty supervision, students pursue a special or individualized course of study related to Sustainable Agriculture & Food Systems.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SAF 165 – Irrigation Practices for an Urban Environment (3 units)

Course Description: Basic design, installation, and operation principles of irrigation systems for turf and landscape: golf courses, parks, highways, public buildings, etc. Emphasis on hardware association with sprinkler and drip/trickle systems.

Prerequisite(s): PHY 001A.

Learning Activities: Lecture/Discussion 2 hour(s), Project.

Cross Listing: ABT 165.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL).

SAF 192 – Internship (1-12 units)

Course Description: Upper-division internship for students enrolled in the Sustainable Agriculture & Food Systems program of study.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Internship 3-36 hour(s), Variable 1 hour(s).

Enrollment Restriction(s): Restricted to Sustainable Agriculture & Food Systems majors or non-majors by consent of instructor.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

SAF 197T – Tutoring in Sustainable Agriculture & Food Systems (1-5 units)

Course Description: Undergraduates assist the instructor by tutoring students in regularly scheduled courses that fulfill SA&FS major requirements.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SAF 197TC – SA&FS Tutoring in the Community (1-5 units)

Course Description: Undergraduates assist the instructor by tutoring in the community in settings related to Sustainable Agriculture & Food Systems.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SAF 198 – Directed Group Study (1-5 units)

Course Description: Group study on focused topics in Sustainable Agriculture & Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Variable 3-15 hour(s).

Enrollment Restriction(s): Restricted to Sustainable Agriculture & Food Systems major or with consent of instructor.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

SAF 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Under faculty supervision, advanced students pursue a special or individualized course of study related to Sustainable Agriculture & Food Systems.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Independent Study 3-15 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Systems & Synthetic Biology (SSB)**SSB 134 – Systems Biology: From Biological Circuits to Biological Systems (3 units)**

Course Description: Application of systems theory to understanding the properties of biological networks in a variety of model organisms. Local biological circuits and genome-scale biological networks. Network motifs, robustness, modeling, emergent properties and integration of networks.

Prerequisite(s): BIS 101; (MCB 121 or PLB 113); (MAT 016C or MAT 017C or MAT 019C or MAT 021B or MAT 021BH); or consent of instructor; BIS 015L recommended.

Learning Activities: Lecture/Discussion 3 hour(s).

Credit Limitation(s): Not open for credit if student has taken BIS 134.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

Technocultural Studies (TCS)

College of Letters & Science

TCS 112 – New Radio Features & Documentary (4 units)

Course Description: New feature and documentary production for radio and other audiophonic media, including audio streaming websites and installation. Emphasis on new and experimental approaches to audio production for broadcast on community radio and in international arts programming.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

TCS 155 – Introduction to Documentary Studies (4 units)

Course Description: Recent evolution of the documentary. The personal essay film; found-footage/appropriation work; non-linear, multi-media forms; spoken word; storytelling; oral history recordings; and other examples of documentary expression.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL).

TCS 159 – Media Subcultures (4 units)

Course Description: Relationships between subcultural groups and media technologies. Media as the cohesive and persuasive force of subcultural activities. List-servs, websites, free radio, fan 'zines, and hip-hop culture.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: American Cultures, Governance, & History (ACGH); Visual Literacy (VL).

TCS 160 – Ghosts of the Machine: How Technology Rewires our Senses (4 units)

Course Description: Historical, aesthetic and critical approaches to how information technologies produced ghost effects or a sense of terror in response to new media like the photograph, gramophone, film, typewriter, computer, Turing Machine. Focus on technological media transforms sense perception.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Cross Listing: STS 160.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Visual Literacy (VL); Writing Experience (WE).

TCS 175 – Small Scale Film Production (4 units)

Course Description: Lecture and intensive workshop teaching small-scale film production. Appointments as a(n) director, director of photography, actor, writer, lighting designer, sound designer and other critical positions are used to produce and submit a short film to a film festival.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Repeat Credit: May be repeated 2 time(s).

Cross Listing: DRA 175.

Grade Mode: Letter.

TCS 191 – Writing Across Media (4 units)

Course Description: Introduction to experimental approaches to writing for different media and artistic practices. How written texts relate to the images, sounds, and performances in digital and media production.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Writing Experience (WE).

Textiles & Clothing (TXC)

College of Agricultural & Environmental Sciences

TXC 098 – Directed Group Study (1-5 units)*Course Description:* Group study.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Variable.*Grade Mode:* Pass/No Pass only.**TXC 099 – Special Study for Lower Division Students (1-5 units)***Course Description:* Special study.*Learning Activities:* Variable.*Grade Mode:* Pass/No Pass only.**TXC 165 – Textile Processes (3 units)***Course Description:* Physical processes involved in the production of textiles from the individual fiber to the finished fabric. Includes spinning, texturing, yarn formation, weaving preparation, weaving and knitting, tufting and fabric finishing.*Prerequisite(s):* TXC 006.*Learning Activities:* Lecture/Discussion 3 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE).**TXC 171 – Clothing Materials Science (4 units)***Course Description:* The properties, characterization, and performance evaluation of clothing materials and structures for specific functional applications. Principles and methods related to wetting and transport properties, fabric hand and aesthetic properties, clothing comfort, and material and assembly technology.*Prerequisite(s):* TXC 006; TXC 008; senior standing.*Learning Activities:* Lecture 3 hour(s), Discussion/Laboratory 3 hour(s).*Grade Mode:* Letter.*General Education:* Science & Engineering (SE); Visual Literacy (VL).**TXC 192 – Internship in Textiles & Clothing (1-12 units)***Course Description:* Work-learn experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles & Clothing faculty.*Prerequisite(s):* Consent of instructor.*Learning Activities:* Internship 3-36 hour(s).*Grade Mode:* Pass/No Pass only.**TXC 197T – Tutoring in Textiles & Clothing (1-5 units)***Course Description:* Tutoring of students in Textiles & Clothing courses. Assistance with discussion groups and laboratory sections under supervision of instructor.*Prerequisite(s):* Consent of instructor; upper division textiles-related major.*Learning Activities:* Tutorial 3-15 hour(s).*Repeat Credit:* May be repeated when tutoring another textiles course.*Grade Mode:* Pass/No Pass only.**TXC 198 – Directed Group Study (1-5 units)***Course Description:* Group study.*Learning Activities:* Variable.*Grade Mode:* Pass/No Pass only.**TXC 199 – Special Study for Advanced Undergraduates (1-5 units)***Course Description:* Special study for advanced undergraduates.*Learning Activities:* Variable.*Grade Mode:* Pass/No Pass only.**TXC 230 – Behavioral Science Concepts in Textiles (3 units)***Course Description:* Examination of theories and research concerning relationships between clothing and human behavior with emphasis on research techniques, including methods of measuring clothing variables.*Prerequisite(s):* TXC 107; upper division or graduate course in statistics (e.g., AMR 120) and one in a behavioral science (e.g., PSC 145).*Learning Activities:* Lecture 3 hour(s).*Grade Mode:* Letter.**TXC 290 – Seminar (1 unit)***Course Description:* Critical review of selected topics of current interest in textiles.*Learning Activities:* Seminar 1 hour(s).*Grade Mode:* Satisfactory/Unsatisfactory only.**TXC 290C – Research Conference (1 unit)***Course Description:* Individual faculty members meet with their graduate students. Critical presentations of original research are made by graduate students. Research activities are planned. Discussions are led by major professors for their research groups.*Prerequisite(s):* Consent of instructor; graduate standing.*Learning Activities:* Discussion 1 hour(s).*Grade Mode:* Satisfactory/Unsatisfactory only.**TXC 293 – Recent Advances in Textiles (3 units)***Course Description:* Critical reading and evaluation on selected topics of current interest in textiles. Multidisciplinary aspects of the topics selected will be stressed.*Prerequisite(s):* Two upper division courses in Textiles Clothing (TXC) or consent of instructor.*Learning Activities:* Lecture 3 hour(s).*Repeat Credit:* May be repeated.*Grade Mode:* Letter.**TXC 298 – Group Study (1-5 units)***Course Description:* Group study.*Learning Activities:* Variable.*Grade Mode:* Letter.**TXC 299 – Research (1-12 units)***Course Description:* Research.*Learning Activities:* Variable.*Grade Mode:* Satisfactory/Unsatisfactory only.**TXC 396 – Teaching Assistant Training Practicum (1-4 units)***Course Description:* Teaching assistant, training practicum.*Prerequisite(s):* Graduate standing.*Learning Activities:* Variable.*Repeat Credit:* May be repeated.*Grade Mode:* Pass/No Pass only.**Transportation Technology & Policy (TTP)****Graduate Studies**

TTP 200 – Transportation Survey Methods (4 units)

Course Description: Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis.

Prerequisite(s): STA 013 or STA 013Y; ECI 251 recommended.

Learning Activities: Lecture 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken ECI 255.

Cross Listing: GEO 281.

Grade Mode: Letter.

TTP 201 – Applied Data Analysis (4 units)

Course Description: Skills for examining, parsing, and analyzing datasets to answer research questions. Application of concepts from econometrics, statistics, and machine learning.

Prerequisite(s): STA 108, STA 141A, and STA 141B recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

TTP 210 – Fundamentals of Transportation Technology (4 units)

Course Description: Designed to prepare in the basics of thermodynamics, fluid mechanics and heat transfer as they relate to transportation.

Prerequisite(s): MAT 021A; MAT 021B; MAT 022A; and consent of instructor; graduate or junior/senior undergraduate as a technical elective.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Enrollment Restriction(s): Limited enrollment.

Credit Limitation(s): Not open for credit to students who have completed TTP 289. (Former TTP 289.)

Grade Mode: Letter.

TTP 211 – Energy & Transportation Modeling for Policy Analysis (4 units)

Course Description: Development of energy and transportation models for policy analysis. Methods for modeling transportation, electricity, fuels, resources, and infrastructure systems.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

TTP 220 – Transportation Planning & Policy (4 units)

Course Description: Transportation planning process at the regional level, including the role of federal policy in shaping regional transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of potential solutions and strategies.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Limited enrollment.

Credit Limitation(s): Students having taken this course previously as TTP 289 cannot repeat it for credit; having taken other TTP 289 offerings does not preclude taking this course for credit.

Cross Listing: GEO 236.

Grade Mode: Letter.

TTP 221 – Pavement for Managers (3 units)

Course Description: Concepts and knowledge needed by policy-makers, planners, and managers to understand pavements, including all urban hardscapes. Materials production, design, construction, maintenance and rehabilitation, use, and end-of-life. Implications for costs, environmental impacts, and societal impacts. Communicating pavement issues with decision-makers and the public.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

TTP 223 – Behavioral Theories & Applications (4 units)

Course Description: Theoretical approaches for research in transportation and behavioral outcomes. Application of behavior theories to research question and hypothesis formulation, study design, data collection and planned analysis in travel behavior.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to graduate students.

Grade Mode: Letter.

TTP 224 – Transportation Equity & Justice (4 units)

Course Description: Topics in transportation equity and justice. Theories of mobility justice, review of historical planning and policy, evaluation of equity analyses, and investigation of equity across mode and domain specific topics in transportation.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to upper division and graduate students.

Grade Mode: Letter.

TTP 281 – ITS Transportation Seminar Series (1 unit)

Course Description: Transportation seminars by guest speakers, on varied topics.

Learning Activities: Seminar 1.50 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

TTP 282 – Transportation Orientation Seminar (1 unit)

Course Description: Ten weeks of seminars, introducing various topics in transportation research and education, focusing on topics of particular interest at UC Davis.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

TTP 283 – Professionalism, Leadership, & Ethics (1 unit)

Course Description: Speakers from industry, government, academia, and NGOs will lead discussions about succeeding and performing in the professional world. They will address leadership, ethics, and other workplace issues.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

TPP 289A – Selected Topics in Transportation Technology & Policy (1-5 units)

Course Description: Directed group study of special topics with instruction carried out through lecture or laboratory, or a combination of both.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory.

Repeat Credit: May be repeated.

Grade Mode: Letter.

TPP 289B – Selected Topics in Transportation Technology & Policy (1-5 units)

Course Description: Directed group study of special topics with instruction carried out lecture or laboratory, or a combination of both.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture, Laboratory.

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

TPP 290C – Graduate Research Group Conference (1 unit)

Course Description: Research problems, progress, and techniques in transportation.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

TPP 292 – Internship in TTP (1-5 units)

Course Description: Supervised work experience in transportation studies.

Prerequisite(s): Consent of instructor; second year standing; approval of project prior to period of internship.

Learning Activities: Internship.

Repeat Credit: May be repeated when topic differs.

Grade Mode: Satisfactory/Unsatisfactory only.

TPP 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1-5 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

TPP 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1-12 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

TPP 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

UC Davis Washington Center (WAS)

College of Letters & Science

WAS 187 – Gun Violence (4 units)

Course Description: Gun violence, viewed from the perspectives of criminology and public health. Topics include personal and societal contributing factors and critical assessment of potential solutions.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to students attending UC Washington Center program.

Grade Mode: Letter.

WAS 192 – Internship in the UC Davis Washington Program (8 units)

Course Description: Internship in Washington, DC with associated, supervised research project.

Prerequisite(s): WAS 193 (can be concurrent); junior or senior standing, admission in the UC Davis Washington Program. WAS 193 required concurrently.

Learning Activities: Internship 32 hour(s).

Grade Mode: Pass/No Pass only.

WAS 193 – Washington Center Research Seminar (4 units)

Course Description: Core academic component of Washington Program offered every quarter. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper.

Prerequisite(s): WAS 192 (can be concurrent).

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper/Discussion.

Cross Listing: POL 193W.

Grade Mode: Letter.

General Education: Social Sciences (SS); Writing Experience (WE).

University Writing Program (UWP)

College of Letters & Science

UWP 001 – Introduction to Academic Literacies (4 units)

Course Description: Introduction to reading and composing processes and key rhetorical concepts for academic literacies. Multiple drafts of composing projects in a variety of genres and modes with feedback from peers and the instructor.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken UWP 001Y or UWP 001V.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 001A – Writers' Workshop (2 units)

Course Description: Writing course focuses on the development of writing and revision strategies, exploring ways to understand a writing task; to develop appropriate content for a writing task; to revise content to reflect competence as a communicator.

Learning Activities: Discussion/Laboratory 2 hour(s).

Enrollment Restriction(s): Concurrent enrollment in a lower division writing course required, preferably UWP 001; if necessary, based upon demand and academic advisor approval, students may concurrently enroll in an equivalent course instead; e.g., ENL 003 or NAS 005.

Grade Mode: Letter.

UWP 001V – Introduction to Academic Literacies: Online (4 units)

Course Description: Introduction to reading and composing processes and key rhetorical concepts for academic literacies. Multiple drafts of composing projects in a variety of genres and modes with feedback from peers and the instructor.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open to students who have taken UWP 001 or UWP 001Y.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 001Y – Introduction to Academic Literacies (4 units)

Course Description: Introduction to reading and composing processes and key rhetorical concepts for academic literacies. Multiple drafts of composing projects in a variety of genres and modes with feedback from peers and the instructor.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture/Discussion 2 hour(s), Web Electronic Discussion 2 hour(s).

Credit Limitation(s): Not open to students who have taken UWP 001 or UWP 001V.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 007 – Practices in College Reading & Writing (4 units)

Course Description: Development of skills required for success in college-level writing across genres and disciplines. Integrates reading, critical thinking, and written communication, using texts from across the curriculum. Course is equivalent to UWP 007Y/V/M/MY.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Not open to students who have already fulfilled the Entry Level Writing Requirement (ELWR); do not change grade mode to P/NP if course is for the ELWR.

Credit Limitation(s): Students who do not earn a grade that fulfills ELWR but that confers unit credit (a grade of C-, D+, D, or D-) may repeat the course to complete the ELWR and to replace their previous grade, but will not receive additional unit credit. Students who fail the course (receive a grade of F) can repeat the course to complete the ELWR, to replace their previous grade, and to receive the unit credit for the course. Not open for credit to students who have completed the ELWR.

Grade Mode: Letter.

UWP 007M – Entry Level Writing: Practices in College Reading & Writing for Multilingual Writers (4 units)

Course Description: Development of multilingual writers' composition and English language skills across genres and disciplines. Integrates college-level reading, critical thinking, and written communication, using texts from across the curriculum. Equivalent to UWP 007/Y/V/MY.

Prerequisite(s): Enrollment via campus placement (using the English Language Placement Exam or Analytical Writing Placement Exam) or after successful completion of UWP 022.

Learning Activities: Discussion/Laboratory 4 hour(s).

Enrollment Restriction(s): For students who have not yet satisfied the Entry Level Writing Requirement (ELWR); do not change grade mode to P/NP if course is for the Entry Level Writing Requirement (ELWR); to satisfy ELWR, students must receive a letter grade of C or higher.

Credit Limitation(s): No credit for students who have completed UWP 007, UWP 023, or WLD 057.

Grade Mode: Letter.

UWP 007MY – Practices in College Reading & Writing for Multilingual Writers (4 units)

Course Description: Development of multilingual writers' composition and English language skills across genres and disciplines. Integrates college-level reading, critical thinking, and written communication, using texts from across the curriculum. Equivalent to UWP 007/Y/V/M.

Prerequisite(s): Enrollment via campus placement (using the English Language Placement Exam or Analytical Writing Placement Exam) or after successful completion of UWP 022.

Learning Activities: Lecture/Lab 2 hour(s), Web Electronic Discussion 2 hour(s).

Enrollment Restriction(s): For students who have not yet satisfied the Entry Level Writing Requirement (ELWR). Do not change grade mode to P/NP if course is for the Entry Level Writing Requirement (ELWR). To satisfy ELWR, students must receive a letter grade of C or higher.

Credit Limitation(s): No credit for students who have completed UWP 007, UWP 023, or WLD 057.

Grade Mode: Letter.

UWP 007V – Practices in College Reading & Writing (4 units)

Course Description: Development of skills required for success in college-level writing across genres and disciplines. Integrates reading, critical thinking, and written communication, using texts from across the curriculum. Course is equivalent to UWP 007/Y/M/MY.

Learning Activities: Web Virtual Lecture 2 hour(s), Web Electronic Discussion 2 hour(s).

Enrollment Restriction(s): Not open to students who have already fulfilled the Entry Level Writing Requirement (ELWR); do not change grade mode to P/NP if course is for the ELWR.

Credit Limitation(s): Students who do not earn a grade that fulfills ELWR but that confers unit credit (a grade of C-, D+, D, or D-) can repeat the course to complete the ELWR and to replace their previous grade, but will not receive additional unit credit. Students who fail the course (receive a grade of F) can repeat the course to complete the ELWR, to replace their previous grade, and to receive the unit credit for the course. Not open for credit to students who have completed the ELWR.

Grade Mode: Letter.

UWP 007Y – Practices in College Reading & Writing (4 units)

Course Description: Development of skills required for success in college-level writing across genres and disciplines. Integrates reading, critical thinking, and written communication, using texts from across the curriculum. Course is equivalent to UWP 007/V/M/MY.

Learning Activities: Lecture/Discussion 2 hour(s), Web Electronic Discussion 2 hour(s).

Enrollment Restriction(s): Not open to students who have already fulfilled the Entry Level Writing Requirement (ELWR); do not change grade mode to P/NP if course is for the ELWR.

Credit Limitation(s): Students who do not earn a grade that fulfills ELWR but that confers unit credit (a grade of C, D+, D, or D-) can repeat the course to complete the ELWR and to replace their previous grade, but will not receive additional unit credit. Students who fail the course (receive a grade of F) can repeat the course to complete the ELWR, to replace their previous grade, and to receive the unit credit for the course. Not open for credit to students who have completed the ELWR.

Grade Mode: Letter.

UWP 010 – Introduction to Professional Writing Studies (4 units)

Course Description: Introduction to writing as an object of study and to theories and research in the field. Survey of how writing is created, disseminated, and used in private, public, and academic contexts.

Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y; or the equivalent.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 011 – Popular Science & Technology Writing (4 units)

Course Description: Positioning of science and technology in society as reflected and constructed in popular texts. Topics include genre theory, demarcation, rhetorical figures, forms of qualitative and quantitative reasoning, and the epistemic role of popularization in science.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 012 – Writing & Visual Rhetoric (4 units)

Course Description: Introduction to writing needs, conventions, and genres in design contexts. Emphasis on applying critical reading, analysis, and writing skills to designed products, such as graphics, visual communications, and clothes, and designed spaces, such as exhibitions and interior architecture.

Learning Activities: Lecture/Discussion 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

UWP 013 – Video Game Rhetorics (4 units)

Course Description: Examination of video games as rhetorical texts whose meaning is produced through complex interplay of procedures, narratives, rules, and context. Writing about video games using critical perspectives and analytic methods.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

UWP 015 – Principles & Practices of Rhetoric (4 units)

Course Description: Rhetorical principles for written communication—such as audience, purpose, and genre—as well as practical application of rhetoric in both analyzing persuasive discourse and composing across a variety of genres.

Prerequisite(s): (UWP 001 C- or better; or UWP 001Y C- or better; or UWP 001V C- or better); (ENL 003 C- or better or ENL 003V C- or better); COM 001 C- or better; COM 002 C- or better; COM 003 C- or better; COM 004 C- or better; NAS 005 C- or better.

Learning Activities: Discussion 1 hour(s); Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 020 – Oral English for International Students (4 units)

Course Description: Intensive work in oral English for international students, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings; e.g., seminar, discussion, laboratory. Training in segmental features of English sounds, intonation, stress, non-verbal cues, and register.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

UWP 021 – Introduction to Academic Reading & Writing for Multilingual Students (4 units)

Course Description: Reading and writing paragraphs and short multi-paragraph texts for academic purposes. Suitable for students whose primary home language was not English.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One placed in the course via Writing Placement 2020 offered by the UWP.

Grade Mode: Letter.

UWP 022 – Intermediate Academic Reading & Writing for Multilingual Students (4 units)

Course Description: Reading and writing short multi-paragraph texts for academic purposes. Suitable for students whose primary home language was not English.

Prerequisite(s): UWP 021.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Pass One placed in the course via Writing Placement 2020 offered by the UWP.

Grade Mode: Letter.

UWP 024 – English Structures & Strategies in Academic Writing (4 units)

Course Description: Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Open to students from language backgrounds other than English.

Credit Limitation(s): Not open for credit to students who have taken LIN 024.

Grade Mode: Letter.

UWP 025 – Academic Writing for ESL Students (4 units)

Course Description: Writing skills necessary for upper division courses, including skills crucial to writing lab and project reports, summaries, critiques, abstracts, and responses to exam questions. Includes practice with the syntax, grammar, and vocabulary characteristics of academic writing.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken LIN 027.

Grade Mode: Letter.

UWP 026 – Reading in Scientific & Technical Subjects for ESL Students (4 units)

Course Description: Instruction and practice in reading scientific and technical texts. Techniques for comprehending and analyzing grammatical and organizational patterns. Notetaking skills, summarizing, vocabulary enrichment.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken LIN 028.

Grade Mode: Pass/No Pass only.

UWP 028 – Persuasive Writing for Multilingual Students (4 units)

Course Description: Instruction in analyzing style of persuasive texts, using appropriate vocabulary, and applying English grammatical structures in argumentation. Suitable for multilingual students desiring additional instruction in persuasive English writing.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 029 – Research Writing for Multilingual Students (4 units)

Course Description: Reading and writing effectively in various research genres across the disciplines. Suitable for multilingual students desiring additional instruction in the linguistic and rhetorical features of research writing in English for academic purposes.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 002 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 048 – Style in the Essay (4 units)

Course Description: Principles of style, language, and structure in the essay. Analysis and development of voice and genre, including sentence revision for force and clarity, and development of effective paragraphs and essays.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; or equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to completion of UWP 001, or equivalent, with C- (P) or better.

Credit Limitation(s): Not open for credit to students who have taken UWP 018.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 049 – Writing Research Papers (4 units)

Course Description: Principles of research writing. Analysis and development of research topics and effective arguments, including critical reading, analysis, integration, and documentation of source material.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; or equivalent.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Restricted to completion of UWP 1, or equivalent, with C- (P) or better.

Credit Limitation(s): Not open for credit to students who have taken UWP 019.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 092 – Internship in Writing (1-12 units)

Course Description: Internships in fields where students can practice their skills.

Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y or ENL 003 or ENL 003V.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

UWP 098 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y or ENL 003 or ENL 003V; or equivalent course; consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y or ENL 003 or ENL 003V or equivalent course; consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 100 – Genre Theory & Professional Writing (4 units)

Course Description: Introduction to discipline of professional writing. Examination of writing as a social practice, using genre theory as a conceptual framework. Analysis of how genres function rhetorically in specific contexts and how social systems both shape and are shaped by genres.

Prerequisite(s): (UWP 001 or UWP 001V or UWP 001Y); UWP 010; or the equivalent of UWP 001.

Learning Activities: Lecture 3 hour(s), Extensive Writing/Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 101 – Advanced Composition (4 units)

Course Description: Instruction for students in all disciplines in advanced principles of academic and professional writing. Focus on writing tasks both within and beyond the academy. May be taught abroad.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or ENL 003 C- or better or ENL 003V C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 101V – Advanced Composition (4 units)

Course Description: Instruction for students in all disciplines in advanced principles of academic and professional writing. Focus on writing tasks both within and beyond the academy.

Prerequisite(s): UWP 001 C- or better or UWP 001Y C- or better or UWP 001V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or ENL 003 C- or better or ENL 003V C- or better or NAS 005 C- or better; upper division standing.

Learning Activities: Extensive Writing, Web Electronic Discussion 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 101Y – Advanced Composition (4 units)

Course Description: Instruction for students in all disciplines in advanced principles of academic and professional writing. Focus on writing tasks both within and beyond the academy.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or ENL 003 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 1.50 hour(s), Web Electronic Discussion 1.50 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102A – Writing in the Disciplines: Special Topics (4 units)

Course Description: Advanced instruction in writing in that discipline and practice in effective styles of communication.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors or to students concurrently enrolled in an upper division course in a specific academic discipline or interdisciplinary field.

Repeat Credit: May be repeated 1 time(s) when taken in conjunction with a different subject-matter course.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102B – Writing in the Disciplines: Biology (4 units)

Course Description: Advanced instruction in writing in biology.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors in a biological science or to students concurrently enrolled in an upper division biological science course.

Credit Limitation(s): Not open for credit to students who have completed ENL 102B.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102C – Writing in the Disciplines: History (4 units)

Course Description: Advanced instruction in writing in history.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors in history or to students concurrently enrolled in an upper division course accepted for the history major.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102D – Writing in the Disciplines: International Relations (4 units)

Course Description: Advanced instruction in writing in international relations.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors in international relations or to students concurrently enrolled in an upper division course accepted for the major.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102E – Writing in the Disciplines: Engineering (4 units)

Course Description: Advanced instruction in writing in engineering.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to upper division students in the College of Engineering and to students enrolled in an upper division engineering or computer science course for the major.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102F – Writing in the Disciplines: Food Science & Technology (4 units)

Course Description: Advanced instruction in writing in food science & technology.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors in food science and technology and to students concurrently enrolled in an upper division course in food science and technology.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102G – Writing in the Disciplines: Environmental Writing (4 units)

Course Description: Advanced instruction in writing and practice in effective styles of communication in the fields of environmental study, policy, or advocacy.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to students with upper division coursework with an environmental focus.

Credit Limitation(s): Not open for credit to students who have completed UWP 102A in the same academic field.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102H – Writing in the Disciplines: Human Development & Psychology (4 units)

Course Description: Advanced instruction in writing and practice in effective styles of communication in Human Development & Psychology.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors and minors or to students concurrently enrolled in an upper division course in Human Development or Psychology.

Credit Limitation(s): Not open for credit to students who have completed UWP 102A in the same academic field.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102I – Writing in the Disciplines: Ethnic Studies (4 units)

Course Description: Advanced instruction in cross-disciplinary writing about race and ethnicity and practice in effective styles of communication.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors and minors in ethnic studies, or students with upper division coursework focusing on race and ethnicity.

Credit Limitation(s): Not open for credit to students who have completed UWP 102A in the same academic field.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102J – Writing in the Disciplines: Fine Arts (4 units)

Course Description: Advanced instruction in writing about the arts and practice in effective styles of communication.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors and minors or to students concurrently enrolled in an upper division course in Art History, Art Studio, Design, Music, or Theater & Dance.

Credit Limitation(s): Not open for credit to students who have completed UWP 102A in the same academic field.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102K – Writing in the Disciplines: Sociology (4 units)

Course Description: Advanced instruction in writing and practice in effective styles of communication in Sociology and related academic and professional fields.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors and minors in Sociology or to students concurrently enrolled in an upper division Sociology course.

Credit Limitation(s): Not open for credit to students who have completed UWP 102A in the same academic field.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102L – Writing in the Disciplines: Film Studies (4 units)

Course Description: Advanced instruction in writing about film and practice in effective styles of communication.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors and minors or to students concurrently enrolled in an upper division course in Film Studies, Technocultural Studies, English, American Studies, or any other upper division course that includes the analysis and understanding of film as a medium.

Credit Limitation(s): Not open for credit to students who have completed UWP 102A in the same academic field.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102M – Writing in the Disciplines: Community & Regional Development (4 units)

Course Description: Advanced instruction in writing in the Community & Regional Development discipline and practice in effective styles of communication.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to upper division Community and Regional Development majors and minors or upper division students concurrently enrolled in an upper division Community and Regional Development course.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Writing Experience (WE).

UWP 102N – Writing in the Disciplines: Anthropology (4 units)

Course Description: Advanced instruction in writing and practice in effective styles of communication in Anthropology and related academic and professional fields.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; 4 or 5 on AP English Lit and Comp exam; or 6 or better on IB HL English Exam.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Restricted to upper division standing; Anthropology Major or Minor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 102O – Writing in Human Rights Studies (4 units)

Course Description: Rhetorical concepts and processes applied to writing in Human Rights Studies through exploration of policy briefs, academic articles, journalism, and testimony. How authors use writing to inform readers, press the audience to empathize with others, reflect on the past, learn about injustices, and propose solutions.

Prerequisite(s): UWP 001 C- or better; or UWP 001V C- or better; or UWP 001Y C- or better; or ENL 003 C- or better or ENL 003V C- or better or NAS 005 C- or better; or COM 001 C- or better; or COM 002 C- or better; or COM 003 C- or better; or COM 004 C- or better; upper-division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Writing Experience (WE).

UWP 104A – Writing in the Professions: Business Writing (4 units)

Course Description: Effective communication in and for organizations, including corporations, government agencies, and non-profit. Suitable for students entering careers such as management, public relations, and grant writing.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have taken UWP 104AY.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104AV – Writing in the Professions: Business Writing (4 units)

Course Description: Effective communication in and for organizations, including corporations, government agencies, and nonprofit. Suitable for students entering careers such as management, public relations, and grant writing.

Prerequisite(s): UWP 001 C- or better or UWP 001Y C- or better or UWP 001V C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Web Virtual Lecture 1.5 hour(s), Web Electronic Discussion 1.5 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have taken UWP 104A or 104AY.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104AY – Writing in the Professions: Business Writing (4 units)

Course Description: Effective communication in and for organizations, including corporations, government agencies, and nonprofit. Suitable for students entering careers such as management, public relations, and grant writing.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 1.50 hour(s), Web Electronic Discussion 1.50 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have taken UWP 104A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104B – Writing in the Professions: Law (4 units)

Course Description: Advanced principles of critical thinking, argumentation, and style, with special emphasis on their application in the legal profession. Suitable for students planning careers in law, business, administration, or management.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104C – Writing in the Professions: Journalism (4 units)

Course Description: Non-fiction for magazines and newspapers, with attention to style and language. Emphasis on research, interviewing, market analysis, and query letters.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104D – Writing in the Professions: Elementary & Secondary Education (4 units)

Course Description: Advanced expository writing in the contemporary American classroom. Strongly recommended for teaching credential candidates.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104E – Writing in the Professions: Science (4 units)

Course Description: Writing abstracts, research proposals, scientific papers, other forms of scientific communication. Presenting data graphically. Primarily for students engaged in or planning careers in basic or applied research.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing or enrollment in a graduate science curriculum.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104F – Writing in the Professions: Health (4 units)

Course Description: Advanced expository writing common in the health professions, emphasizing effective communication between the writer and different audiences. Topics relate to health, disability, and disease. Suitable for students planning careers in professions such as medicine, dentistry, physical therapy, optometry.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have taken UWP 104FY.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104FV – Writing in the Professions: Health (4 units)

Course Description: Effective communication in and for organizations, including corporations, government agencies, and nonprofit. Suitable for students entering careers such as management, public relations, and grant writing.

Prerequisite(s): UWP 001 C- or better or UWP 001Y C- or better or UWP 001V C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Web Virtual Lecture 1.5 hour(s), Web Electronic Discussion 1.5 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have taken UWP 104F or UWP 104FY.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104FY – Writing in the Professions: Health (4 units)

Course Description: Advanced expository writing common in the health professions, emphasizing effective communication between the writer and different audiences. Topics relate to health, disability, and disease. Suitable for students planning careers in professions such as medicine, dentistry, physical therapy, optometry.

Prerequisite(s): UWP 001 C- or better; UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 1.50 hour(s), Web Electronic Discussion 1.50 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have taken UWP 104F.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104I – Writing in the Professions: Internships (4 units)

Course Description: Advanced instruction in writing in the workplace, including public and private sectors, government agencies, profit and non-profit organizations. Collaborative work and practice in effective styles of communication. May be taught abroad.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to students concurrently enrolled in an internship and to Contemporary Leadership minors.

Credit Limitation(s): Not open for credit to students who have completed UWP 102A.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104J – Writing in the Professions: Writing for Social Justice (4 units)

Course Description: Advanced instruction in writing for Social Justice, using an interdisciplinary approach combining feminist, critical race, ethnic, cultural, and transnational studies; practice in techniques of research and styles of communication for diverse audiences. Suitable for activists in community organizing, non-profits, politics.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 104T – Writing in the Professions: Technical Writing (4 units)

Course Description: Communicating effectively about technology and other technical subjects to varied audiences for varied purposes. Suitable for students entering professions that require communicating technical information to subject matter experts, managers, technicians, and non-specialists.

Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or ENL 003V C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Credit Limitation(s): Not open for credit to students who have taken UWP 104A prior to fall 2012.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 106 – English Grammar (4 units)

Course Description: Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English.

Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y or ENL 003 or ENL 003V or LIN 001 or LIN 001Y; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Cross Listing: ENL 106, LIN 106.

Grade Mode: Letter.

General Education: Arts & Humanities (AH).

UWP 110 – Specialized Genres in Professional Writing (4 units)

Course Description: Instruction in the elements and practices of professional writing in specialized genres. May be taught abroad.

Prerequisite(s): Satisfaction of the upper division writing requirement.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Restricted to upper division students who have satisfied the upper division writing requirement; counts toward the writing minor.

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 111A – Specialized Topics in Journalism (4 units)

Course Description: Instruction in the elements and practices of advanced journalism.

Prerequisite(s): Satisfaction of the upper division writing requirement.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Restricted to upper division students with a strong interest in journalism; counts toward the writing minor.

Repeat Credit: May be repeated 1 time(s) when specialized journalism topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 111B – Specialized Topics in Journalism: Investigative Journalism (4 units)

Course Description: Instruction in the elements and practices of in-depth investigative journalism.

Prerequisite(s): Satisfaction of the upper division writing requirement.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Restricted to upper division students with a strong interest in journalism; counts toward the writing minor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 111C – Specialized Topics in Journalism: Science Journalism (4 units)

Course Description: Instruction in the elements and practices of science journalism.

Prerequisite(s): Satisfaction of the upper division writing requirement.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Restricted to upper division students with a strong interest in journalism; counts toward the writing minor.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 112A – Introduction to Professional Editing (4 units)

Course Description: Introduction to general editing practices and principles, with an emphasis on professional editing in organizational contexts, including academia and the workplace. Extensive practice in copy, comprehensive, and collaborative editing.

Prerequisite(s): Satisfaction of the upper division writing requirement.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Restricted to upper division students who have satisfied the upper division writing requirement; counts toward the writing minor, Group C: Theory, History, & Design.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); Writing Experience (WE).

UWP 115 – Writing Center Research, Theory, & Practice for Peer Writing Tutors (4 units)

Course Description: Writing course explores writing center research with an emphasis on research-based theories and practices useful to student writing center peer tutors.

Prerequisite(s): ELWR (Entry Level Writing Requirement) fulfillment required.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing/Discussion 2 hour(s), Extensive Problem Solving 1 hour(s).

Enrollment Restriction(s): Open to students who have fulfilled the ELWR (Entry Level Writing Requirement); class size limited to 25 students.

Grade Mode: Letter.

General Education: Writing Experience (WE).

UWP 120 – Rhetorical Approaches to Scientific & Technological Issues (4 units)

Course Description: Application of rhetorical theories to scientific issues. Topics include: Rhetorical dimensions of scientific knowledge-making; scientific voice; rhetorical figures in science; incommensurability and demarcation; epistemology, definition, and classification; science wars; models of scientific literacy and accommodation, and implications for risk communication.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

UWP 121 – History of Scientific Writing (4 units)

Course Description: History of scientific writing from the 17th century to the present; origins and evolution of scientific genres; role of scientific writing in producing scientific knowledge; discursive differences between disciplines; emergence of English as a global language of science.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

UWP 150 – Digital Rhetorics (4 units)

Course Description: Rhetorical concepts and processes applied to digital environments with an emphasis on user experience, universal design, and writing for networked publics. Application of rhetorical theory as both an analytic method and as a heuristic for the production of digital texts and performances.

Prerequisite(s): UWP 010 C- or better; UWP 015 C- or better.

Learning Activities: Discussion 1 hour(s), Lecture/Discussion 3 hour(s).

Grade Mode: Letter.

UWP 151 – Rhetorics & Culture (4 units)

Course Description: Relationship between written communication and cultural practices, epistemologies, and genres. Producing texts for different professional and community writing scenarios that leverage cultural rhetoric strategies.

Prerequisite(s): UWP 010 C- or better; UWP 015 C- or better.

Learning Activities: Lecture/Discussion 3 hour(s); Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 190 – Capstone Portfolio Seminar (4 units)

Course Description: Capstone course for majors. Synthesis and application of rhetorical concepts learned in the major. Development of professional digital and print portfolio for graduate school and career applications.

Prerequisite(s): UWP 100.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to majors who have completed 135 units.

Repeat Credit: May be repeated.

Grade Mode: Letter.

UWP 192 – Internship in Writing (1-12 units)

Course Description: Internships in fields where students can practice their skills. May be taught abroad.

Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y or ENL 003 or ENL 003V or equivalent course; consent of instructor.

Learning Activities: Internship 3-36 hour(s).

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

UWP 197T – Tutoring in Writing (1-5 units)

Course Description: Tutoring one-on-one or leading small voluntary discussion groups affiliated with a writing course.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated 10 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

UWP 197TC – Community Tutoring in Writing (1-4 units)

Course Description: Field experience, with individuals or in K-12 classroom instruction, focusing on reading- and writing-to-learn strategies in any subject area.

Prerequisite(s): Consent of instructor; upper division standing.

Learning Activities: Tutorial 1-4 hour(s).

Repeat Credit: May be repeated 10 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH).

UWP 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y or ENL 003 or ENL 003V or equivalent course; consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Repeat Credit: May be repeated 10 unit(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Arts & Humanities (AH); Writing Experience (WE).

UWP 220 – Rhetorical Approaches to Genre Study (4 units)

Course Description: Using genre theory and methods of analysis to understand and prepare to do research on different types of writing in varying academic and professional contexts. Emphasis on problems in organizational, professional, and/or interdisciplinary communication.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

UWP 225 – English for International/ESL Graduate Students (4 units)

Course Description: Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken LIN 025.

Grade Mode: Satisfactory/Unsatisfactory only.

UWP 226 – Writing for International Graduate Students (4 units)

Course Description: Focuses on writing needed for academic work, including summaries, critiques, research & grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Credit Limitation(s): Not open for credit to students who have taken LIN 026.

Grade Mode: Satisfactory/Unsatisfactory only.

UWP 250 – Writing Assessment (4 units)

Course Description: Examines key testing and measurement concepts; the history of writing assessment; and relationships among writing tests and methods of teaching writing; the impacts of Information and Communication Technology (ICT), and how educational policies both drive and respond to writing assessments.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

UWP 253 – Writing Program Administration (4 units)

Course Description: Theories, models, and procedures of writing programs, primarily in higher education. Developmental, first-year, and advanced writing programs, writing centers, writing-across-the-curriculum programs, writing minors and majors, and graduate programs in rhetoric and composition.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

UWP 255 – Theory & Research in Response to Student Writing (4 units)

Course Description: Intensive focus on the critical topic of response or feedback to student writers. Coverage of philosophy, theory, and empirical research on teacher written feedback, teacher-student writing conferences, peer response, and error correction.

Learning Activities: Discussion 3 hour(s), Extensive Writing, Extensive Writing/Discussion, Project.

Enrollment Restriction(s): Restricted to graduate standing.

Grade Mode: Letter.

UWP 270 – Literacy & Technology (4 units)

Course Description: Examines how the physical qualities of texts offer different affordances during production and reception; grounds these discussions in the development of literacy practices and writing technologies from ancient to contemporary; creates frameworks for research into literacy, teaching, and textual technologies.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Extensive Writing.

Grade Mode: Letter.

UWP 271 – Second Language Writing (4 units)

Course Description: Traces the history of second language writing theory and research on second language writers in a variety of academic and professional contexts. Emphasis on writer characteristics, texts, and contexts.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Extensive Writing, Project.

Enrollment Restriction(s): Restricted to graduate standing.

Grade Mode: Letter.

UWP 280 – Journal Editing Workshop: Writing on the Edge (2 units)

Course Description: Reading and critiquing manuscript submissions. Discussing relevant work in the field of writing studies. Applying principles of professional editing. Developmental editing, copy-editing, and typesetting of accepted manuscripts. Soliciting articles and communicating with contributors. Students encouraged to enroll both quarters.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

UWP 298 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

UWP 299 – Individual Study (1-12 units)

Course Description: Individual study.

Prerequisite(s): Consent of instructor. Graduate standing.

Learning Activities: Workshop 1-12 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

UWP 390 – Theory & Practice of Teaching University-Level Composition (4 units)

Course Description: Examination of current theories and practices in teaching of writing. Practical application to undergraduate writing courses. Emphasis on designing assignments and class sequences, and responding to student writing. Examination of impact of cultural, technological and theoretical changes on composition pedagogy.

Learning Activities: Seminar 3 hour(s), Extensive Writing.

Enrollment Restriction(s): Open to graduate students teaching UWP 001 in the fall quarter following this course.

Grade Mode: Letter.

UWP 391 – Oral English for ESL Students (4 units)

Course Description: Intensive work in oral English for non-native English-speaking students, particularly international student teaching assistants, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings; e.g., seminar, discussion, laboratory.

Prerequisite(s): Open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated with consent of instructor.

Grade Mode: Satisfactory/Unsatisfactory only.

UWP 392 – Teaching Expository Writing (2 units)

Course Description: Discussion of problems related to teaching expository writing at the university level, with special emphasis on teaching reading and writing skills and responding to student papers.

Prerequisite(s): UWP 390; graduate standing; appointment as Teaching Assistant in the Composition Program; or the equivalent of UWP 390.

Learning Activities: Discussion 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

UWP 394 – Theory & Practice of Teaching Writing Across the Curriculum (4 units)

Course Description: Professional development in the teaching of writing for TAs across disciplines, including theories of writing, assignment design, responding and grading, and supporting multilingual writers. Supports TAs in their current contexts and prepares them to teach writing as future faculty.

Prerequisite(s): Graduate Standing.

Learning Activities: Lecture/Discussion 3 hour(s), Conference 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory Only.

UWP 395 – Teaching Multilingual Writers (4 units)

Course Description: Preparing teachers of university-level second language writers, whether in composition courses or courses in other disciplines with a substantial writing component. Suitable for graduate students and advanced undergraduates.

Prerequisite(s): Graduate standing or advanced undergraduate standing; recommended: UWP 390, LIN 1, ENL 106/LIN 106/UWP 106.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

UWP 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable 1-4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

Urdu (URD)

College of Letters & Science

URD 097T – Tutoring in Urdu (1-5 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): (HIN 023 B or better; or consent of instructor); consent of Program Director required.

Learning Activities: Tutoring 3-15 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: P/NP only.

URD 197T – Tutoring in Urdu (1-5 units)

Course Description: Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses.

Prerequisite(s): (HIN 023 B or better; or consent of instructor); consent of Program Director required.

Learning Activities: Tutorial 3-15 hour(s).

Repeat Credit: May be repeated for credit.

Grade Mode: P/NP only.

Urology (URO)

School of Medicine

URO 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

URO 400 – Office Urology (1 unit)

Course Description: Introduction to ambulatory care of urologic patients including basic therapeutic and diagnostic procedures from case material referred to private clinic. Management of urinary tract infection will be emphasized.

Prerequisite(s): Fourth-year medical students with consent of instructor.

Learning Activities: Clinical Activity 4 hour(s).

Grade Mode: Honors/Pass/Fail.

URO 460 – Urology Clinical Clerkship (5-18 units)

Course Description: Clinical experience in diagnosis and treatment of urologic disease. Student will work closely with house staff, participate in conferences and surgery, and perform initial patient evaluation on new patients.

Prerequisite(s): Consent of instructor; third-year medical student; physical diagnosis or the equivalent.

Learning Activities: Clinical Activity 8-40 hour(s).

Enrollment Restriction(s): Limited enrollment.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

URO 461 – Externship in Urology (3-18 units)

Course Description: Under supervision, student acting as intern will assume full inpatient responsibility including admission history, physical examination, management of hospitalization, and participate in surgical procedures, outpatient clinic and learning diagnostic and therapeutic procedures.

Prerequisite(s): Consent of instructor; fourth-year medical students.

Learning Activities: Clinical Activity 60 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

URO 499 – Research in Urology (1-12 units)

Course Description: Research in oncology, male infertility, urodynamics, neurogenic bladder. Unique opportunity to apply recent technologies (nuclear medicine resonance, flow cytometry, recombinant DNA) in investigation, diagnosis and treatment of GU cancer, infectious disease, male infertility and development of genitourinary bioprosthetics.

Prerequisite(s): Medical or veterinary medical students with consent of instructor.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Honors/Pass/Fail.

Veterinary Clinical Rotation (DVM)

School of Veterinary Medicine

Courses in DVM are not displayed. For information, contact the School of Veterinary Medicine at 530-752-1360; <http://www.vetmed.ucdavis.edu>.

Viticulture & Enology (VEN)

College of Agricultural & Environmental Sciences

VEN 002 – Introduction to Viticulture (2 units)

Course Description: Fundamental principles of biology and culture of the grapevine including taxonomy, morphology, physiology, distribution, domestication, utilization, propagation, production systems, harvesting, and storage and processing of grapes. Successful completion should prepare students for upper division courses in viticulture.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 003 – Introduction to Winemaking (3 units)

Course Description: Overview of the history of wine, viticulture, fermentation, winery operations, the physiology of wine consumption, wines produced in California and other major wine-producing regions and the sensory evaluation of wine. May be taught abroad.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE) or Social Sciences (SS).

VEN 090X – Lower Division Seminar (2 units)

Course Description: Introduction to current issues surrounding wine and health as they relate to diet, nutrition, and toxicology.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Seminar 1 hour(s), Term Paper, Extensive Writing.

Grade Mode: Letter.

VEN 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

VEN 101A – Viticultural Practices (3 units)

Course Description: Identification, cultivation, and use of the major wine, table, raisin, and rootstock cultivars. Includes practices specific to the fall such as fruit contracts, maturity sampling, harvesting, cover crops, and soil-pests. One field trip required.

Prerequisite(s): VEN 002.

Learning Activities: Lecture 1.50 hour(s), Discussion/Laboratory 3.50 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 101B – Viticultural Practices (3 units)

Course Description: Theory, principles, and practices of pruning and grapevine propagation. Plant materials and the certification process, weed control and weed identification, wood diseases, and frost protection. One field trip required.

Prerequisite(s): VEN 002.

Learning Activities: Lecture 1.50 hour(s), Discussion/Laboratory 3.50 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 101C – Viticultural Practices (3 units)

Course Description: Field oriented experience in the principles and practices of grapevine production, including vineyard establishment, vine training, trellising, canopy management practices, irrigation and water management, and methods of crop adjustment for improvement of fruit quality. One field trip required.

Prerequisite(s): VEN 002.

Learning Activities: Lecture 1.50 hour(s), Discussion/Laboratory 3.50 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 110 – Grapevine Growth & Physiology (3 units)

Course Description: Botanical aspects including morphology and domestication will precede lectures covering flower development and energy budget concepts. Impact of physiological variables such as photosynthesis translocation, mineral nutrition, and water relations on fruit ripening and composition will be covered.

Prerequisite(s): VEN 002.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 111 – World Viticulture (3 units)

Course Description: Study of the diversity of viticulture, both geographical and historical. History of grape growing and its spread throughout the world will be covered, along with discussions of current viticultural practices in different parts of the world, including California.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Writing Experience (WE).

VEN 111L – Critical Evaluation of Wines of the World (1 unit)

Course Description: Critical analysis of wines produced in different parts of the world with emphasis on the relationship between sensory properties of the wines and factors associated with their place of origin.

Prerequisite(s): VEN 111 required concurrently.

Learning Activities: Discussion/Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

VEN 112 – Soils in Viticulture (3 units)

Course Description: Landscape distribution, physical and chemical processes in viticultural soils. Site evaluation procedures, best soil management practices, vineyard fertilization, and soil health monitoring.

Prerequisite(s): (CHE 002B or CHE 002BH); BIS 002A; (PHY 001A, PHY 001B (can be concurrent)) or PHY 007A (can be concurrent); or consent of instructor.

Learning Activities: Lecture 3 hour(s).

Enrollment Restriction(s): Open to Viticulture & Enology majors and grad group only or with consent of instructor.

Grade Mode: Letter.

VEN 114 – Fermented Foods (4 units)

Course Description: Physiology, biochemistry, and genetics of microorganisms important in food fermentations. How microorganisms are used in fermentations and how raw materials are converted into finished fermented foods and beverages.

Prerequisite(s): BIS 103; MIC 102; or consent of instructor.

Learning Activities: Lecture 3 hour(s), Term Paper.

Enrollment Restriction(s): Pass One restricted to upper division or graduate level Food Science and Viticulture & Enology majors.

Cross Listing: FST 114.

Grade Mode: Letter.

VEN 115 – Raisin & Table Grape Production (2 units)

Course Description: Overview of the raisin and table grape industries in California and other production areas of the world. Cultural practices associated with raisin and table grape production will also be discussed.

Prerequisite(s): VEN 002.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 118 – Grapevine Pests, Diseases & Disorders (3 units)

Course Description: Various pests and diseases of vineyards throughout California. Pest/disease identification and control methods (to include sampling techniques) also will be discussed. Integrated management approach to pest control methods will be emphasized.

Prerequisite(s): VEN 002.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 123 – Analysis of Musts & Wines (2 units)

Course Description: Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking.

Prerequisite(s): CHE 002C; (PLS 021 or PLS 021V); (CHE 008B or CHE 118B or CHE 128B).

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 123L – Analysis of Musts & Wines Laboratory (2 units)

Course Description: Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking. Laboratory exercises demonstrating various chemical, physical and biochemical methods.

Data will be analyzed and results interpreted in weekly lab reports; includes student-designed independent project and written report.

Prerequisite(s): VEN 123 (can be concurrent); CHE 002C; PLS 021 or PLS 021V; (CHE 008B or CHE 118B or CHE 128B).

Learning Activities: Laboratory 3 hour(s), Independent Study 3 hour(s).

Enrollment Restriction(s): Restricted to upper division and graduate students in Viticulture & Enology; others by approval of instructor.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

VEN 124 – Wine Production (2 units)

Course Description: Principles and practices of making standard types of wines, with special reference to grape varieties used and methods of vinification.

Prerequisite(s): VEN 003; VEN 123 (can be concurrent); (BIS 102 or BIS 105).

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

VEN 124L – Wine Production Laboratory (3 units)

Course Description: Current technologies used in production of California table wines; analysis and monitoring of impact of fermentation variables on microbial performance and product quality; student-designed independent research project.

Prerequisite(s): VEN 124 (can be concurrent).

Learning Activities: Laboratory 3 hour(s), Independent Study 3 hour(s), Term Paper 3 hour(s).

Enrollment Restriction(s): Restricted to undergraduates in fermentation science, viticulture & enology, biotechnology, microbiology, food science and applied plant biology majors; to graduate students in food science, agricultural and environmental chemistry and horticulture.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Oral Skills (OL); Writing Experience (WE).

VEN 125 – Wine Types & Sensory Evaluation (2 units)

Course Description: Principles of sensory evaluation and application to wines. Factors influencing wine flavor, data from sensory analysis of model solutions.

Prerequisite(s): PLS 120 or STA 106.

Learning Activities: Lecture 2 hour(s).

Enrollment Restriction(s): Open to upper division and graduate students in Viticulture & Enology; others by approval of instructor.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

VEN 125L – Sensory Evaluation of Wine Laboratory (2 units)

Course Description: Sensory evaluation of wines and model systems using discrimination tests, ranking, descriptive analysis and time-intensity analysis. Data will be analyzed by appropriate statistical tests and the results interpreted in extensive weekly lab reports.

Prerequisite(s): VEN 125 (can be concurrent).

Learning Activities: Laboratory 3 hour(s), Term Paper 3 hour(s).

Enrollment Restriction(s): Restricted to upper division major students in fermentation science or viticulture & enology; graduate students in the food science program.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL); Visual Literacy (VL); Writing Experience (WE).

VEN 126 – Wine Stability (3 units)

Course Description: Principles of equilibria and rates of physical and chemical reactions in wines; treatment of unstable components in wines by adsorption, ion exchange, refrigeration, filtration, and membrane processes; and protein, polysaccharide, tartrate, oxidative and color stabilities.

Prerequisite(s): VEN 124.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to Viticulture & Enology; Fermentation Science, Applied Plant Biology majors; graduate students in Food Science, Microbiology, Horticulture and Horticulture & Agronomy groups.

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 126L – Wine Stability Laboratory (2 units)

Course Description: Practical application of principles of equilibria and rates of physical and chemical reactions to wine stability.

Prerequisite(s): VEN 126 (can be concurrent); VEN 123L; and consent of instructor.

Learning Activities: Laboratory 3 hour(s), Independent Study 3 hour(s).

Enrollment Restriction(s): Restricted to upper division Fermentation Science, Viticulture & Enology majors, graduate students in the Food Science, Agricultural and Environmental Chemistry, Microbiology, or by consent of instructor.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

VEN 127L – Post-Fermentation Wine Processing Lab (3 units)

Course Description: Sensory and chemical impact of processing on wines; bench-scale analytical results to make and implement processing decisions; principles and theories of equipment operation and scale-up.

Prerequisite(s): VEN 123; VEN 123L; VEN 126; VEN 126L; VEN 135 (can be concurrent); or consent of instructor.

Learning Activities: Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to upper division or graduate standing.

Grade Mode: Letter.

VEN 128 – Wine Microbiology (2 units)

Course Description: Nature, development, physiology, biochemistry and control of yeasts and bacteria involved in the making, aging and spoilage of wine.

Prerequisite(s): (VEN 123, VEN 124, MIC 102, MIC 103L); VEN 125, VEN 126 recommended.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 128L – Wine Microbiology Laboratory (2 units)

Course Description: Nature, development, physiology, biochemistry and control of yeasts and bacteria involved in the making, aging and spoilage of wine.

Prerequisite(s): VEN 123; VEN 124; VEN 128 (can be concurrent); MIC 103L.

Learning Activities: Laboratory 6 hour(s).

Enrollment Restriction(s): Restricted to upper division major students in fermentation science or viticulture & enology; graduate students in the food science program.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL); Writing Experience (WE).

VEN 135 – Wine Technology & Winery Systems (4 units)

Course Description: Process technologies and process systems that are used in modern commercial wineries. Lectures, demonstrations, problem solving sessions, and possible field trips. Includes grape preparation and fermentation equipment; post-fermentation processing equipment; winery utilities, cleaning systems, and waste treatment.

Prerequisite(s): PLS 021 or PLS 021V; MAT 016A; MAT 016B; ((PHY 001A, PHY 001B) or PHY 007A).

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

VEN 140 – Distilled Beverage Technology (3 units)

Course Description: Distillation principles and practices; production technology of brandy, whiskey, rum, vodka, gin, and other distilled beverages; characteristics of raw materials, fermentation, distillation, and aging.

Prerequisite(s): CHE 008B; FST 110A.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Quantitative Literacy (QL).

VEN 170 – Grape & Wine Industry Regulation (1 unit)

Course Description: Regulatory and legal issues related to grape growing and winemaking. State and federal regulations for production and sale of alcoholic beverages. Land use, food and chemical safety regulations, crop insurance, wine distribution and importation, and direct-to-consumer sales.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture 1 hour(s).

Enrollment Restriction(s): Open to Viticulture & Enology undergraduate students and Graduate students only.

Grade Mode: P/NP only.

VEN 181 – Readings in Enology (1 unit)

Course Description: Critical evaluation of selected monographs in enology. Discussion leadership rotates among the students.

Prerequisite(s): VEN 003.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

VEN 190X – Winemaking Seminar (1 unit)

Course Description: Outside speakers on a specific winemaking topic chosen for the quarter. Discussion with the speaker hosted by the faculty member(s) in charge.

Prerequisite(s): VEN 003.

Learning Activities: Seminar 1 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to Viticulture & Enology majors and graduate students.

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

VEN 192 – Internship (1-12 units)

Course Description: Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be approved and supervised by a member of the department or major faculty, but are arranged by the student.

Prerequisite(s): Consent of instructor; completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

VEN 198 – Directed Group Study (1-5 units)

Course Description: Directed group study. May be taught abroad.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

VEN 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

General Education: Science & Engineering (SE).

VEN 200 – Introduction to Scientific Methods (2 units)

Course Description: Processes involved in conducting scientific research. Topics covered will include conducting literature review, formulating hypotheses, and analyzing and reporting results. Students will complete an annotated bibliography and complete a written and oral research proposal.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Lecture/Discussion 1 hour(s), Term Paper 1 hour(s).

Grade Mode: Letter.

VEN 210 – Grape Development & Composition (3 units)

Course Description: Anatomy, physiology and biochemistry of grape berry development, with emphasis on the development of grape composition relevant to winemaking.

Prerequisite(s): (BIS 102, BIS 103) or BIS 105.

Learning Activities: Discussion 1 hour(s), Lecture 2 hour(s).

Grade Mode: Letter.

VEN 213 – Flavor Chemistry of Foods & Beverages (3 units)

Course Description: Become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and processed foods.

Required to read and critically evaluate flavor chemistry literature.

Prerequisite(s): CHE 008B; ((VEN 123, VEN 123L) or FST 103); or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s).

Cross Listing: FST 213.

Grade Mode: Letter.

VEN 215 – Sensometrics (3 units)

Course Description: Experimental design and statistical analysis, including multivariate analysis, for both sensory and instrumental data in enology and food-related studies.

Prerequisite(s): FST 117; ((VEN 125, VEN 125L) or (FST 107A or FST 107B)); or equivalent to FTS 117.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

VEN 216 – Sustainable Vineyard Development (5 units)

Course Description: Application of plant, meteorological, soil, water, GIS, and economic sciences to sustainable vineyard development. Preparation of a comprehensive study to determine the viticultural and economic feasibility of a given site for raisin, table, or wine grape production.

Prerequisite(s): (VEN 101A, VEN 101B, VEN 101C); (VEN 115 or VEN 118); or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Fieldwork 3 hour(s), Term Paper.

Grade Mode: Letter.

VEN 217 – Field & GIS Evaluation of Soils (3 units)

Course Description: Principles and practices used to evaluate agricultural soils in the field, including soil pits, soil cores, electrical conductivity meters, ground penetrating radar, geomorphology and surface terrain analysis. Use of geographic information sciences, soil databases, digital elevation models and geostatistics.

Prerequisite(s): PLS 120; (PLS 205 or PLS 206); (SSC 100 or SSC 105 or SSC 107); VEN 101C; consent of instructor; ABT 180 is recommended.

Learning Activities: Lecture/Lab 4 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

VEN 219 – Natural Products of Wine (3 units)

Course Description: Structure, occurrence, and changes due to wine production to the natural products found in wine. Chemicals with a sensory impact will be emphasized, including flavonoids and other phenolics, terpenes and norisoprenoids, pyrazines, oak volatiles and other wine constituents.

Prerequisite(s): VEN 123; VEN 124; or natural products background, and consent of instructor.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

VEN 223 – Instrumental Analysis of Must & Wine (4 units)

Course Description: Theory and practice of instrumental analysis of wines and musts. emphasis on the principles of analytical techniques (e.g., CE, GC, HPLC, Mass Spectrometry) and factors determining correct choice of instrumental method.

Prerequisite(s): VEN 123 or FST 103; ((BIS 102 and BIS 103) or BIS 105), (CHE 107B or CHE 115) recommended.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Open to upper division students in Viticulture & Enology, Food Science and Technology; students in Food Science, Ag & Environmental Chemistry and Viticulture & Enology graduate groups.

Grade Mode: Letter.

VEN 224 – Advances in the Science of Winemaking (3 units)

Course Description: Selected topics in the science and technology of winemaking. Topics will be drawn from current research of participating enology and viticulture faculty. Critical analysis of the technical content of published material will be emphasized.

Prerequisite(s): VEN 125; VEN 126; or consent of instructor; graduate standing.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

VEN 225 – Advanced Sensory Analysis of Wines (3 units)

Course Description: Sensory descriptive analysis experiments will be designed and conducted using standard sensory science methods. Data will be analyzed by analyses of variance, principal component analyses and generalized Procrustes analysis to evaluate the judges performance and interpret the significance of the results.

Prerequisite(s): ((VEN 124, VEN 125) or FST 107); AMR 120; or the equivalent.

Learning Activities: Lecture/Discussion 2 hour(s), Laboratory 4 hour(s).

Grade Mode: Letter.

VEN 235 – Winery Design (4 units)

Course Description: Design of wineries. Includes process calculations, equipment selection, process layout and building choice and siting. Project scheduling, capital costs, and ten-year cash flow analysis for the winery. One field trip required.

Prerequisite(s): VEN 124; VEN 135; or consent of instructor.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Independent Study.

Grade Mode: Letter.

VEN 270 – Critical Evaluation of Scientific Literature (2 units)

Course Description: Contemporary research topics in biological sciences. Discussion of recent research articles in a special topic area chosen by instructor. Intended to develop skills in critical evaluation of scientific publications.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 2 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

VEN 290 – Seminar (1 unit)

Course Description: Seminar.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VEN 290C – Advanced Research Conference (1 unit)

Course Description: Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

VEN 291 – Advanced Viticulture (2 units)

Course Description: Critical evaluation of scientific and popular literature on selected topics of current interest that relate viticulture to fruit or wine sensory attributes or quality.

Prerequisite(s): VEN 110; VEN 116; VEN 124; VEN 125; VEN 210 recommended.

Learning Activities: Lecture/Discussion 2 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

VEN 292 – Advanced Internship (1-15 units)

Course Description: Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be approved and supervised by a graduate group faculty member or students major professor, but are arranged by the student.

Prerequisite(s): VEN 123; VEN 123L; VEN 124; VEN 124L; VEN 125; VEN 125L; VEN 126; VEN 126L; VEN 128; VEN 128L; and consent of instructor.

Learning Activities: Internship 3-45 hour(s), Variable.

Enrollment Restriction(s): Restricted to Viticulture & Enology Graduate Group graduate students.

Repeat Credit: May be repeated 15 unit(s).

Grade Mode: Satisfactory/Unsatisfactory only.

VEN 297T – Tutoring in Viticulture & Enology (1-5 units)

Course Description: Designed for graduate students who desire teaching experience, but are not teaching assistants. Student contact primarily in laboratory or discussion sections, and under direction of a faculty member.

Prerequisite(s): Consent of instructor; graduate standing.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

VEN 298 – Group Study (1-5 units)

Course Description: Group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

VEN 299 – Research (1-12 units)

Course Description: Research.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

VEN 396 – Teaching Assistant Training Practicum (1-4 units)

Course Description: Teaching assistant training practicum.

Prerequisite(s): Graduate standing.

Learning Activities: Variable.

Repeat Credit: May be repeated.

Grade Mode: Pass/No Pass only.

Wildlife, Fish, & Conservation Biology (WFC)**WFC 010 – Wildlife Ecology & Conservation (4 units)**

Course Description: Introduction to the ecology and conservation of vertebrates. Complexity and severity of world problems in conserving biological diversity.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

WFC 050 – Natural History of California's Wild Vertebrates (3 units)

Course Description: Examination of the natural history of California's wild vertebrates (fish, amphibians, reptiles, birds, and mammals), including their biogeography, systematics, ecology and conservation status.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL); Writing Experience (WE).

WFC 051 – Introduction to Conservation Biology (3 units)

Course Description: Introduction to conservation biology including both biological and social issues related to the loss of species and habitats. Intended for students with no background in biological sciences.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Scientific Literacy (SL).

WFC 092 – Internship (1-6 units)

Course Description: Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Internship 3-18 hour(s).

Grade Mode: Pass/No Pass only.

WFC 098 – Directed Group Study (1-5 units)

Course Description: Group study on focused topics in Wildlife, Fish, & Conservation Biology. Topic varies according to instructor.

Learning Activities: Variable.

Grade Mode: P/NP only.

WFC 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

WFC 100 – Field Methods in Wildlife, Fish, & Conservation Biology (4 units)

Course Description: Introduction to field methods for monitoring and studying wild vertebrates and their habitats, with an emphasis on ecology and conservation. Required weekend field trips.

Prerequisite(s): EVE 101 (can be concurrent) or ESP 100 (can be concurrent); (BIS 002A, BIS 002B, BIS 002C); or equivalent course of EVE 101 or ESP 100 (can be taken concurrently), and consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 3 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

WFC 101 – Field Research in Wildlife Ecology (2 units)

Course Description: Field research in ecology of wild vertebrates in terrestrial environments; formulation of testable hypotheses, study design, introduction to research methodology, oral and written presentation of results. Limited enrollment.

Prerequisite(s): Consent of instructor. One upper division course in each of ecology, statistics, and either ornithology, mammalogy, or herpetology.

Learning Activities: Lecture/Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL); Writing Experience (WE).

WFC 101L – Field Research in Wildlife Ecology: Laboratory (4 units)

Course Description: Field research in ecology of wild vertebrates in terrestrial environments; testing ecological hypotheses through field research, application of research methodology, supervised independent research projects. Held between Labor Day and fall quarter.

Prerequisite(s): WFC 101 (can be concurrent); and consent of instructor.

Learning Activities: Lecture/Discussion 2 hour(s), Fieldwork 15 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

WFC 102 – Field Studies in Fish Biology (1 unit)

Course Description: Emphasis on theory of quantitative fish capture methods and design of individual research projects on ecology, behavior, physiology or population biology of fishes.

Prerequisite(s): Consent of instructor. Upper division course in each of ecology, aquatic biology, fish biology, and statistics.

Learning Activities: Lecture/Discussion 1 hour(s).

Grade Mode: Letter.

WFC 102L – Field Studies in Fish Biology: Laboratory (6 units)

Course Description: Field investigations of fish biology are emphasized including quantitative capture methods and individual research projects on ecology, behavior, physiology or population biology of fishes at the field site in relation to their habitats.

Prerequisite(s): WFC 102 (can be concurrent); and consent of instructor.

Learning Activities: Fieldwork 15 hour(s), Laboratory 12 hour(s), Discussion/Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

WFC 103 – Applied Statistics for Wildlife Research (4 units)

Course Description: Introduction to basic statistical concepts and methods as tools for fish and wildlife research. Application of general guiding principles of developing research questions and projects, basic probability theory, statistical estimation (correlation, regression, ANOVA, Chi-square test) and hypothesis testing. Introduction of some specialized analytical techniques, such as population dynamics modeling and time series analysis.

Prerequisite(s): (MAT 016B or MAT 017B or MAT 021B); (WFC 010 or WFC 050); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 1 hour(s).

Credit Limitation(s): Only 2 units credit allowed to students who have completed STA 013, STA 100, or PLS 120.

Grade Mode: Letter.

WFC 110 – Biology & Conservation of Wild Mammals (3 units)

Course Description: Origins, evolution, diversification, and geographical and ecological distributions of mammals. Morphological, physiological, reproductive, and behavioral adaptations of mammals to their environment.

Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (EVE 101 (can be concurrent) or ESP 100 (can be concurrent)); or equivalent course to ESP 100 or EVE 101.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

WFC 110L – Laboratory in Biology & Conservation of Wild Mammals (3 units)

Course Description: Laboratory exercises in the morphology, systematics, species identification, anatomy, and adaptations of wild mammals to different habitats.

Prerequisite(s): WFC 110 (can be concurrent); and consent of instructor.

Learning Activities: Laboratory 6 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

WFC 111 – Biology & Conservation of Wild Birds (3 units)

Course Description: Phylogeny, distribution, migration, reproduction, population dynamics, behavior and physiological ecology of wild birds. Emphasis on adaptations to environments, species interactions, management, and conservation.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C; upper division ecology course recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

WFC 111L – Laboratory in Biology & Conservation of Wild Birds (3 units)

Course Description: Laboratory exercises in bird species identification, anatomy, molts, age and sex, specialized adaptations, behavior, research, with emphasis on conservation of wild birds. Several weekend field trips, after class bird walks, and independent bird study are required.

Prerequisite(s): WFC 111 (can be concurrent); and consent of instructor.

Learning Activities: Laboratory 6 hour(s), Fieldwork 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

WFC 120 – Biology & Conservation of Fishes (3 units)

Course Description: Evolution, ecology, and conservation of marine and freshwater fishes.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C; upper division ecology course recommended.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

WFC 120L – Laboratory in Biology & Conservation of Fishes (2 units)

Course Description: Morphology, taxonomy, conservation, and identification of marine and freshwater fishes with emphasis on California species.

Prerequisite(s): WFC 120 (can be concurrent); and consent of instructor.

Learning Activities: Laboratory 3 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

WFC 121 – Physiology of Fishes (4 units)

Course Description: Comparative physiology, growth, reproduction, behavior, and energy relations of fishes.

Prerequisite(s): Upper division courses in nutrition and physiology or consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

WFC 122 – Population Dynamics & Estimation (4 units)

Course Description: Description of bird, mammal and fish population dynamics, modeling philosophy, techniques for estimation of animal abundance (e.g., mark-recapture, change-inratio, etc.), mathematical models of populations (e.g., Leslie matrix, logistic, dynamic pool, stockrecruitment); case histories.

Prerequisite(s): (MAT 016A, MAT 016B); (STA 013 or STA 013Y); (BIS 002A, BIS 002B, BIS 002C); or the equivalent of STA 013; an upper division course in ecology.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

WFC 124 – Sampling Animal Populations (4 units)

Course Description: Introduction to major statistical modeling approaches for estimating animal population parameters, including: sample counts, distance sampling, repeated point counts (N-mixture modeling), capture-mark-recapture for closed and open populations, static and dynamic occupancy modeling, and richness estimation. Methods are embedded in the context of obtaining reliable estimates of abundance, survival, occurrence and other ecological parameters for management and conservation.

Prerequisite(s): (STA 100 or WFC 103 or PLS 120); (EVE 101 or ESP 100); or equivalent; upper division standing.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

WFC 125 – Tropical Ecology & Conservation (4 units)

Course Description: Ecology and natural history of the tropics. Challenges and opportunities associated with tropical conservation. Design and communicate course-based research project.

Prerequisite(s): EVE 101 or ESP 100.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Credit Limitation(s): Only 2 units credit allowed to students who have completed EVE 138.

Grade Mode: Letter.

WFC 126 – Conservation in Working Landscapes (4 units)

Course Description: Ecology, natural history, and conservation of working landscapes. Critical evaluation of tradeoffs (and potential synergies) that arise when simultaneously pursuing conservation, food production, and human livelihood objectives in crop fields, pastures, settlements, forestry systems, and patches of semi-natural habitat.

Prerequisite(s): BIS 002B; or consent of instructor; EVE 101 or ESP 100 recommended.

Learning Activities: Lecture 3 hour(s), Discussion/Laboratory 1 hour(s).

Grade Mode: Letter.

WFC 130 – Physiological Ecology of Wildlife (4 units)

Course Description: Principles of physiological ecology, emphasizing vertebrates. Ecological, evolutionary, and behavioral perspectives on physiological mechanisms used by animals to adapt to their environment, including consideration of climate-change and other threats to biodiversity. Tropical, temperate, and polar ecosystems are highlighted.

Prerequisite(s): EVE 101 or ESP 100; (BIS 002A, BIS 002B, BIS 002C); or equivalent course to ESP 100.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

WFC 134 – Herpetology (3 units)

Course Description: Evolution and ecology of the world's diverse reptiles and amphibians. Emphasis on adaptations to environments, species interactions, management, and conservation.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C; upper division ecology course recommended.

Learning Activities: Lecture 2 hour(s), Term Paper.

Grade Mode: Letter.

WFC 134L – Herpetology Laboratory (3 units)

Course Description: Diagnostic characteristics and functional attributes of amphibians and reptiles, emphasizing ecological, bio-geographic and phylogenetic patterns. Field experience with common species of reptiles and amphibians in the Davis area.

Prerequisite(s): WFC 134 (can be concurrent); and consent of instructor.

Learning Activities: Laboratory 6 hour(s).

Grade Mode: Letter.

WFC 136 – Ecology of Waterfowl & Game Birds (4 units)

Course Description: Detailed examination of distribution, behavior, population dynamics, and management of waterfowl and upland game birds.

Prerequisite(s): WFC 111; or consent of instructor. WFC 111L strongly recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Fieldwork 1 hour(s).

Grade Mode: Letter.

WFC 141 – Behavioral Ecology (4 units)

Course Description: Basic theories underlying the functional and evolutionary significance of behavior, and the role of ecological constraints. Supporting empirical evidence taken mainly from studies of wild vertebrates.

Prerequisite(s): EVE 101 or ESP 100 (can be concurrent); (BIS 002A, BIS 002B, BIS 002C); or equivalent course.

Learning Activities: Lecture 3 hour(s), Film Viewing 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

WFC 144 – Marine Conservation Science (4 units)

Course Description: Key differences between marine and terrestrial ecosystems, major stressors of marine ecosystems (e.g., fisheries, pollution, bioinvasions, climate change and habitat destruction) and their consequences. Laws and agencies responsible for addressing problems, and the policies used.

Prerequisite(s): Course in introductory ecology.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 30 students.

Grade Mode: Letter.

WFC 150 – Urban Wildlife Ecology (3 units)

Course Description: Introduction to the behavior, ecology, and evolution of wild animals in urban environments. Effects of urbanization on disease, fitness, and dynamics of animal populations. Conservation and conflict management efforts in urban settings.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

WFC 151 – Wildlife Ecology (4 units)

Course Description: Ecology of wild vertebrates, including habitat selection, spatial organization, demography, population dynamics, competition, predation, herbivory, energetics, and community dynamics, set in the context of human-caused degradation of environments in North America.

Prerequisite(s): BIS 002B; or equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

WFC 152 – Ecology of Human-Wildlife Conflicts (3 units)

Course Description: Ecological approaches to managing wild vertebrates that come into conflict with agriculture, public health, or the conservation of biodiversity.

Prerequisite(s): BIS 002B; or equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

WFC 153 – Wildlife Ecotoxicology (4 units)

Course Description: Various forms of environmental pollution in relation to fish and wildlife, the effects and mechanisms of pollutants, effects on individuals and systems, laboratory and field ecotoxicology, examples/case histories, philosophical/management considerations.

Prerequisite(s): Introductory courses in organic chemistry, ecology, and physiology, or consent of instructor; ETX 101 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Writing Experience (WE).

WFC 154 – Conservation Biology (4 units)

Course Description: Introduction to conservation biology and background to the biological issues and controversies surrounding loss of species and habitats.

Prerequisite(s): BIS 002B; or the equivalent.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

WFC 155 – Wildlife Space Use & Habitat Conservation (4 units)

Course Description: Relationships between habitat characteristics and wildlife behavior/ecology, principles of habitat conservation and management.

Prerequisite(s): EVE 101 or ESP 100; or the equivalent of EVE 101 or ESP 100.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

WFC 155L – Habitat Conservation & Restoration Laboratory (2 units)

Course Description: Analysis of the characteristics of wildlife and fish habitats, application of restoration methods, and evaluation of conservation and restoration projects in the field. Participate during the term in a restoration project.

Prerequisite(s): (EVE 101 or ESP 100); WFC 155 (can be concurrent); or the equivalent of ESP 100 or EVE 101.

Learning Activities: Fieldwork 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

WFC 156 – Plant Geography (4 units)

Course Description: Survey of the geographical distribution of vegetation types and habitats, with consideration of the environmental and historical factors that determine these patterns. Conservation and management approaches. Analytical field and lab techniques introduced.

Prerequisite(s): ESP 100 or EVE 101; PLB 102 or PLB 108 strongly recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL); Writing Experience (WE).

WFC 157 – Coastal Ecosystems (4 units)

Course Description: Overview of coastal ecosystems, physical and biological elements and processes, and coastal zone dynamics, including sandy, rocky and muddy shorelines, estuaries, dunes and coastal watersheds. Discussion of the role of historical factors and conservation, restoration, and management approaches.

Prerequisite(s): EVE 101; course work in organismal biology, physical geography, and geology recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE); Visual Literacy (VL).

WFC 158 – Infectious Disease in Ecology & Conservation (3 units)

Course Description: Introduction to the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Basic epidemiological models and their applications. Role of scientists in developing disease control policies.

Prerequisite(s): EVE 101 or ESP 100 or VET 409; or the equivalent.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

WFC 160 – Animal Coloration (3 units)

Course Description: Evolutionary and ecological significance of coloration in mammals, birds, reptiles, amphibians, fish, cephalopods, crustaceans, spiders, insects, humans as well as color in fashion, plants and the military. Topics include history, protective coloration, warning coloration, mimicry, sexual dichromatism and color change.

Prerequisite(s): BIS 002A; BIS 002B; BIS 002C.

Learning Activities: Lecture 3 hour(s).

Grade Mode: Letter.

WFC 168 – Climate Change Ecology (4 units)

Course Description: Ecological responses to current and expected future climate change, across levels of biological organization from individuals to ecosystems.

Prerequisite(s): BIS 002B; (EVE 101 or ESP 100); or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

WFC 190 – Departmental Research Seminar (1 unit)

Course Description: Reports and discussions of recent advances related to wildlife and fisheries biology.

Prerequisite(s): Upper division standing in the Biological Sciences.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 3 time(s).

Grade Mode: Pass/No Pass only.

WFC 191 – Museum Science (2 units)

Course Description: Principles and methods required to preserve and present biological specimens for research, teaching collections, and museums.

Prerequisite(s): Consent of instructor. Upper division standing.

Learning Activities: Lecture 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Pass/No Pass only.

WFC 192 – Internship (1-12 units)

Course Description: Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty.

Prerequisite(s): Consent of instructor. Completion of 84 units.

Learning Activities: Internship 3-36 hour(s).

Grade Mode: Pass/No Pass only.

WFC 195 – Field & Laboratory Research (3 units)

Course Description: Critique and practice of research methods applied to field and/or laboratory environments of wild vertebrates. Work independently or in small groups to design experimental protocol, analyze data, and report their findings.

Prerequisite(s): (WFC 110L or WFC 111L or WFC 120L); (WFC 121 or WFC 130); EVE 101; or the equivalent of EVE 101, and consent of instructor.

Learning Activities: Laboratory 6 hour(s), Discussion 1 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Letter.

General Education: Science & Engineering (SE).

WFC 197T – Tutoring in Wildlife & Fisheries (1-5 units)

Course Description: Experience in teaching under guidance of faculty member.

Prerequisite(s): Consent of instructor. Major in Wildlife, Fish, and Conservation Biology.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

WFC 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

WFC 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

WFC 223 – Conservation Biology & Animal Behavior (3 units)

Course Description: Influences of concepts of animal behavior (functional, evolutionary, developmental, mechanistic, and methodological issues) on conservation biology theory and practice.

Prerequisite(s): ECL 208 or ANB 221; and consent of instructor.

Learning Activities: Lecture 1.50 hour(s), Discussion 1.50 hour(s).

Grade Mode: Letter.

WFC 230 – Advanced Physiological Ecology of Wildlife (4 units)

Course Description: Advanced principles of physiological ecology.

Ecological, evolutionary and behavioral perspectives on physiological mechanisms used by animals to adapt to their environment in the context of climate change and other threats to biodiversity. Primary literature will form the basis of discussion.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

WFC 262 – Advanced Population Dynamics (3 units)

Course Description: Logical basis for population models, evaluation of simple ecological models, current population models with age, size, and stage structure, theoretical basis for management and exemplary case histories. Emphasis on development and use of realistic population models in ecological research.

Prerequisite(s): Graduate standing; advanced course in ecology (e.g., EVE 101), population dynamics (e.g., WFC 122), and one year of calculus; familiarity with matrix algebra and partial differential equations recommended.

Learning Activities: Lecture 3 hour(s).

Cross Listing: ECL 262.

Grade Mode: Letter.

WFC 290 – Seminar (1-3 units)

Course Description: Seminar devoted to a highly specific research topic in any area of wildlife or fisheries biology. Special topic selected for a quarter will vary depending on interests of instructor and students.

Prerequisite(s): Consent of instructor.

Learning Activities: Seminar 1-3 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

WFC 290C – Research Group Conference (1 unit)

Course Description: Weekly conference on research problems, progress and techniques in wildlife and fishery sciences.

Prerequisite(s): Consent of instructor.

Learning Activities: Discussion 1 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Satisfactory/Unsatisfactory only.

WFC 291 – Seminar in Aquatic Ecology (2 units)

Course Description: Presentation and analysis of assigned topics in aquatic ecology emphasizing fish, fisheries and aquatic conservation.

Prerequisite(s): Graduate standing in Biology.

Learning Activities: Seminar 2 hour(s).

Grade Mode: Satisfactory/Unsatisfactory only.

WFC 292 – Physiology of Fishes Seminar (1 unit)

Course Description: Seminar devoted to current topics concerning the physiological functioning of fishes.

Prerequisite(s): Consent of instructor. Graduate standing and at least two courses in physiology.

Learning Activities: Seminar 1 hour(s).

Repeat Credit: May be repeated 2 time(s).

Grade Mode: Satisfactory/Unsatisfactory only.

WFC 294 – Seminar in Behavioral Ecology of Predators & Prey (3 units)

Course Description: Presentation and analysis of research papers on social and foraging behavior of predatory animals, antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator-prey interactions.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 2 hour(s).

Repeat Credit: May be repeated 2 time(s).

Cross Listing: ANB 294.

Grade Mode: Letter.

WFC 295 – Seminar in Wildlife Ecotoxicology (3 units)

Course Description: Presentation and analysis of assigned and searched research papers on transport, exposure, and effects of environmental contaminants on wildlife-associated ecosystem components, especially at individual/population levels. Specific subjects vary each offering.

Prerequisite(s): Graduate standing in Biology.

Learning Activities: Seminar 2 hour(s), Term Paper.

Grade Mode: Satisfactory/Unsatisfactory only.

WFC 297T – Supervised Teaching in Wildlife & Fisheries Biology (1-3 units)

Course Description: Tutoring and teaching students in undergraduate courses in Wildlife, Fish, & Conservation Biology. Weekly conferences with instructor; evaluations of teaching; preparing for and conducting demonstrations, laboratories, and discussions; preparing and grading examinations.

Prerequisite(s): Consent of instructor. Meet qualifications for teaching assistant; graduate standing.

Learning Activities: Tutorial 3-9 hour(s).

Repeat Credit: May be repeated 6 unit(s) when a different course is tutored.

Grade Mode: Satisfactory/Unsatisfactory only.

WFC 298 – Group Study (1-5 units)

Course Description: Group study.

Learning Activities: Variable.

Grade Mode: Letter.

WFC 299 – Research (1-12 units)

Course Description: Research.

Learning Activities: Variable.

Grade Mode: Satisfactory/Unsatisfactory only.

Women's Studies (WMS)

College of Letters & Science

WMS 020 – Cultural Representations of Gender (4 units)

Course Description: Interdisciplinary investigation of how specific cultures represent gender difference. Examine a variety of cultural forms and phenomena including film, television, literature, music, popular movements, and institutions.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

WMS 025 – Gender & Global Cinema (4 units)

Course Description: Role gender plays in film history/culture in various geographical contexts and in aspects of contemporary globalization. Films from nations such as China, Colombia, Cuba, Ethiopia, India, Iran, Korea, New Zealand, and the U.S.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

WMS 060 – Feminist Critiques of Western Thought (4 units)

Course Description: Critical introduction to major traditions of social thinking in the West from a feminist perspective.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

WMS 104 – Feminist Research (4 units)

Course Description: Introduction to feminist applications and transformations of traditional disciplinary research practices; initial training in methodologies for feminist interdisciplinary work.

Prerequisite(s): Required for Women's Studies major.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

WMS 130 – Globalization & Politics of Family Change (4 units)

Course Description: Political/cultural changes, conflicts, and economic disparities that have led to greater mobility and dispersal of families. Transnationalism on gender relations, sexualities, and the meaning of family.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

WMS 136 – Critical Food Studies (4 units)

Course Description: Production and consumption of food at the intersections of gender, race, ethnicity, nation, and body. Individual and familial experiences as part of larger economic and political structures in the U.S. and globally.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Oral Skills (OL); Writing Experience (WE).

WMS 137 – Contemporary Debates in Western Feminist Theory (4 units)

Course Description: Interpretations of poststructuralist, postmodern, and postcolonial thought from a critical feminist perspective; includes methods of applying theory to concrete social/cultural problems of gender, race, sexuality, class.

Prerequisite(s): WMS 060; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

WMS 138 – Critical Fashion Studies (4 units)

Course Description: Feminist cultural studies of style-fashion-dress through transnational circuits, personal subjectivities. Fashion as means of gender oppression and liberation. Histories and discourses of masculinities and femininities. Clothing works on global assembly line. Use of dress in construction/regulation of identities.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

WMS 140 – Gender & Law (4 units)

Course Description: Exploration of women's legal rights in historical and contemporary context, discussing a variety of legal issues and applicable feminist theories. Topics include constitutional equal protection, discrimination in employment and education, sexual orientation discrimination, and the regulation of abortion.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD).

WMS 145 – Women's Movements in Transnational Perspective (4 units)

Course Description: Transnational perspectives on 20th- and 21st-century women's movements in Western, colonial and post-colonial contexts, examining movement's forms and political orientations and relationships between women's movements and other forces for change.

Prerequisite(s): WMS 050 recommended.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Enrollment Restriction(s): Limited to 90 students.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

WMS 146 – Gender, War & Peace (4 units)

Course Description: Applies a critical gender perspective to militarism as manifest in contexts of military rule, war, conflict, peacebuilding and security post-conflict. Addresses the changing configurations of gender and sexuality in military institutions and militarized economies and cultures from an interdisciplinary perspective.

Prerequisite(s): Consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); World Cultures (WC); Writing Experience (WE).

WMS 158 – Masculinities (4 units)

Course Description: Cultural, economic, and political forces which shape historical and contemporary masculinities. Impact of race, class, ability, nation and sexuality on experiences and cultural representations of masculinity.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

WMS 160 – Women, "Race" & Sexuality in Postcolonial Cinema (4 units)

Course Description: Feminist analysis of race, sexuality and class in the representation of women in commercial and/or independent films.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Enrollment Restriction(s): Limited to 90 students.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

WMS 162 – Feminist Film Theory & Criticism (4 units)

Course Description: Historical overview of and contemporary issues in feminist film theory, including representation, spectatorship, and cultural production. Film stars, women filmmakers, and the intersections of gender, race, sexuality, and class in films and their audiences.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

WMS 164 – Topics in Gender & Cinematic Representation (4 units)

Course Description: Examination of a specific topic within the broad rubric of gender and cinema. Possible topics include Latinas in Hollywood; gender, nation, cinema; and gender and film genre. Topics vary.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s).

Repeat Credit: May be repeated 2 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH); Visual Literacy (VL); World Cultures (WC); Writing Experience (WE).

WMS 165 – Feminist Media Production (6 units)

Course Description: Media production as a mode of cultural criticism, furthering feminist/ social justice activist goals. Fundamentals of camera, editing and distribution via a social engagement model. Study and hands-on response to key historic and contemporary feminist and social justice media discourses.

Prerequisite(s): (CTS 020 or CDM 020); or two WMS courses.

Learning Activities: Lecture/Discussion 3 hour(s), Laboratory 3 hour(s), Fieldwork 6 hour(s).

Cross Listing: CDM 105.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Visual Literacy (VL).

WMS 170 – Queer Studies (4 units)

Course Description: Study of queer sexualities, identities, theories, practices. Alternative sexualities as historical, social, and cultural constructions in intersections with race, gender, class, nationality. Interdisciplinary exploration of sexual liberation and the regulation of sexuality through history, theory and expressive cultural forms.

Prerequisite(s): WMS 070 recommended or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

WMS 175 – Gender & Experience of Race (4 units)

Course Description: Exploration of the co-construction of "race" and gender in comparative national historical contexts and contemporary lived experience. Study of intersections of race and gender in identities and how institutions, labor migration, social movements and consumption shape racialized gendered identities.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

WMS 180 – Women of Color Writing in the United States (4 units)

Course Description: Literature, especially novels, written by contemporary women of color in the United States, understood in their socio-economic, cultural and historical contexts.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

WMS 182 – Globalization, Gender & Culture (4 units)

Course Description: Critical gender analysis of globalization as a process of interconnected cultural, social and economic transformations inflected by gender, nation, class and race/ethnicity. Critical self-reflection and social observation skills.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Oral Skills (OL); World Cultures (WC); Writing Experience (WE).

WMS 184 – Gender in the Arab World (4 units)

Course Description: Examination of the history, culture, and social/political/economic dynamics of gender relations and gendering in the Arab world.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences (SS); World Cultures (WC); Writing Experience (WE).

WMS 187 – Gender & Public Policy (4 units)

Course Description: Role of gender in the creation of social policies, especially with respect to issues brought into the policy arena by contemporary feminism.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences (SS); American Cultures, Governance, & History (ACGH); Domestic Diversity (DD); Writing Experience (WE).

WMS 189 – Special Topics in Critical Gender Studies (4 units)

Course Description: In-depth examination of a women's studies topic related to the research interests of the instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

General Education: Arts & Humanities (AH) or Social Sciences (SS); Writing Experience (WE).

WMS 250 – Cultural Study of Masculinities (4 units)

Course Description: Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and national identities; criticism of oral, printed, visual, and mass mediated texts, and of social relations and structures.

Prerequisite(s): Graduate standing or consent of instructor.

Learning Activities: Seminar 3 hour(s), Term Paper.

Cross Listing: AMS 250.

Grade Mode: Letter.

Workload (WLD)

Workload courses (WLD) do not carry degree credit. For more information, see your advisor or Academic Assistance & Tutoring Centers (<https://tutoring.ucdavis.edu/>).

WLD 041C — Preparatory Chem-SCC110C (0 units)
