

# UC DAVIS

## 2025-26 General Catalog

# TABLE OF CONTENTS

General Catalog Home .....	14	Course Materials & Service Fees .....	72
Policies, Procedures, & Regulations .....	19	Part-Time & Employee Students Fees .....	72
Registration & Course Load .....	19	Drop for Non-Payment & Student Payment Deadline .....	72
Adding & Dropping Courses .....	19	Fee Refunds .....	73
Late Actions .....	20	Additional Education Opportunities .....	74
Register for Classes .....	23	Bodega Marine Laboratory Program .....	74
Registration Pass Times .....	24	First-Year Seminar Program .....	75
Academic Credit .....	24	Global Learning Hub .....	75
Simultaneous Enrollment at a Non-University of California .....	24	Independent Study Program .....	75
Advanced Placement (AP) Credit & Chart .....	25	Internship Program .....	76
International Baccalaureate (IB) Credit & Chart .....	26	Quarter at Aggie Square .....	76
AP & IB Charts Archive .....	27	Summer Sessions .....	76
Academic Standing .....	28	UC Center Sacramento .....	77
Examinations .....	31	UC Washington Program (UCDC) .....	77
General Appeal .....	34	University Honors Program .....	78
Grades & Grading .....	34	Bachelor's Degree Requirements Archive .....	78
Honors & Awards .....	44	Graduate Education .....	79
Leaving UC Davis .....	45	Graduate Admissions .....	80
Completing Your Degree .....	48	Graduate Studies Advising .....	80
Returning to UC Davis .....	49	Professional School Admissions .....	80
Retroactive Changes .....	51	Tuition & Fees .....	80
Student Conduct & Responsibilities .....	54	Drop for Non-Payment .....	80
Academic Advising & Support Services .....	55	Financial Support .....	80
Student Support Services .....	55	Financial Aid .....	80
Undergraduate Education .....	56	Withdrawal & Readmission .....	80
University Degree Requirements .....	56	Departments, Programs, & Degrees .....	80
Entry Level Writing Requirement (ELWR) .....	58	African American & African Studies .....	86
American History & Institutions Requirement .....	59	African American & African Studies, Bachelor of Arts .....	86
Unit Requirements & Limitations .....	60	African American & African Studies, Minor .....	88
Senior Residence Requirements .....	61	Agricultural & Environmental Chemistry (Graduate Group) .....	89
General Education (GE) Requirements .....	62	Agricultural & Environmental Chemistry, Master of Science .....	89
Scholarship Requirement .....	63	Agricultural & Environmental Chemistry, Doctor of Philosophy .....	89
College Degree Requirements .....	63	Agricultural & Resource Economics .....	89
Agricultural & Environmental Sciences .....	64	Agricultural & Resource Economics, Master of Science .....	90
Biological Sciences .....	65	Agricultural & Resource Economics, Master of Science/Master of Business Administration .....	90
Engineering .....	66	Agricultural & Resource Economics, Doctor of Philosophy .....	90
Graduate School of Management .....	67	Managerial Economics, Bachelor of Science .....	90
Letters & Science .....	68	Managerial Economics, Minor .....	93
Fees, Costs, & Financial Aid .....	72	American Studies .....	94
Tuition & Residence .....	72	American Studies, Bachelor of Arts .....	94

American Studies, Minor .....	95
Animal Behavior (Graduate Group) .....	96
Animal Behavior, Master of Science .....	96
Animal Behavior, Doctor of Philosophy .....	96
Animal Biology (Graduate Group) .....	96
Animal Biology, Master of Science .....	96
Animal Biology, Doctor of Philosophy .....	97
Animal Science .....	97
Agricultural & Environmental Education, Bachelor of Science .....	97
Animal Science & Management, Bachelor of Science .....	100
Animal Science, Bachelor of Science .....	103
Animal Science, Minor .....	105
Avian Sciences, Minor .....	106
Anthropology .....	107
Anthropology, Bachelor of Arts .....	107
Anthropology, Bachelor of Science .....	114
Anthropology, Minor .....	116
Anthropology, Master of Arts .....	118
Anthropology, Doctor of Philosophy .....	119
Applied Mathematics (Graduate Group) .....	119
Applied Mathematics, Master of Science .....	119
Applied Mathematics, Doctor of Philosophy .....	119
Art History & Art Studio .....	120
Art History, Bachelor of Arts .....	120
Art History, Minor .....	122
Art History, Master of Arts .....	123
Art Studio, Bachelor of Arts .....	123
Art Studio, Minor .....	124
Art Studio, Master of Fine Arts .....	124
Museum Studies, Minor .....	124
Asian American Studies .....	125
Asian American Studies, Bachelor of Arts .....	125
Asian American Studies, Minor .....	127
Social, Ethnic & Gender Relations, Minor .....	128
Atmospheric Science (Graduate Group) .....	129
Atmospheric Science, Master of Science .....	129
Atmospheric Science, Doctor of Philosophy .....	129
Avian Sciences (Graduate Group) .....	129
Avian Sciences, Master of Science .....	129
Biochemistry, Molecular, Cellular & Developmental Biology (Graduate Group) .....	130
Biochemistry, Molecular, Cellular & Developmental Biology, Master of Science .....	130
Biochemistry, Molecular, Cellular & Developmental Biology, Doctor of Philosophy .....	130
Biological & Agricultural Engineering .....	130
Agricultural & Environmental Technology, Bachelor of Science .....	131
Biological Systems Engineering, Bachelor of Science .....	135
Biological Systems Engineering, Bachelor of Science/Master of Science Integrated .....	140
Biological Systems Engineering, Master of Engineering .....	140
Biological Systems Engineering, Master of Science .....	141
Biological Systems Engineering, Doctor of Engineering .....	141
Biological Systems Engineering, Doctor of Philosophy .....	142
Energy Efficiency, Minor .....	142
Energy Policy, Minor .....	143
Energy Science & Technology, Minor .....	143
Geographic Information Systems, Minor .....	144
Precision Agriculture, Minor .....	144
Biological Sciences .....	145
Biological Sciences, Bachelor of Arts .....	145
Biological Sciences, Bachelor of Science .....	147
Biological Sciences, Minor .....	150
Quantitative Biology & Bioinformatics, Minor .....	151
Biomedical Engineering .....	152
Biomedical Engineering, Bachelor of Science .....	152
Biomedical Engineering, Minor .....	155
Medical Device Development, Master of Engineering .....	156
Biomedical Engineering (Graduate Group) .....	156
Biomedical Engineering, Master of Science .....	157
Biomedical Engineering, Doctor of Philosophy .....	157
Biophysics (Graduate Group) .....	157
Biophysics, Doctor of Philosophy .....	157
Biostatistics (Graduate Group) .....	158
Biostatistics, Master of Science .....	158
Biostatistics, Doctor of Philosophy .....	158
Chemical Engineering .....	158
Biochemical Engineering, Bachelor of Science .....	159
Chemical Engineering, Bachelor of Science .....	161
Chemical Engineering, Master of Engineering .....	162
Chemical Engineering, Master of Science .....	163
Chemical Engineering, Doctor of Philosophy .....	163
Chemistry .....	163

Applied Chemistry, Bachelor of Science .....	164	Comparative Literature, Minor .....	197
Chemistry, Bachelor of Arts .....	166	Comparative Literature, Master of Arts .....	197
Chemistry, Bachelor of Science .....	167	Comparative Literature, Doctor of Philosophy .....	198
Chemistry, Minor .....	168	Computer Science .....	198
Chemistry & Chemical Biology, Master of Science .....	169	Computational Biology, Minor .....	199
Chemistry & Chemical Biology, Doctor of Philosophy .....	169	Computer Science & Engineering, Bachelor of Science .....	199
Chemical Physics, Bachelor of Science .....	169	Computer Science, Bachelor of Science .....	201
Medicinal Chemistry & Drug Design, Bachelor of Science .....	170	Computer Science, Minor .....	202
Pharmaceutical Chemistry, Bachelor of Science .....	171	Computer Science (Graduate Group) .....	203
Pharmaceutical Chemistry, Master of Science .....	171	Computer Science, Master of Science .....	203
Chicana/Chicano Studies .....	171	Computer Science, Doctor of Philosophy .....	203
Chicana/Chicano Studies, Bachelor of Arts .....	172	Cultural Studies (Graduate Group) .....	203
Chicana/Chicano Studies, Minor .....	173	Cultural Studies, Master of Arts .....	203
Child Development (Graduate Group) .....	174	Cultural Studies, Doctor of Philosophy .....	204
Child Development, Master of Science .....	174	Design .....	204
Cinema & Digital Media .....	174	Design, Bachelor of Arts .....	204
Cinema & Digital Media, Bachelor of Arts .....	174	Design, Master of Fine Arts .....	207
Film Studies, Minor .....	176	Designated Emphasis, Ph.D .....	207
Civil & Environmental Engineering .....	176	Biotechnology, Designated Emphasis .....	207
Civil Engineering, Bachelor of Science .....	176	Computational Social Science, Designated Emphasis .....	207
Civil & Environmental Engineering, Master of Science .....	180	Critical Theory, Designated Emphasis .....	207
Civil & Environmental Engineering, Doctor of Philosophy .....	180	Feminist Theory & Research, Designated Emphasis .....	208
Construction Engineering & Management, Minor .....	181	Global Nutrition, Designated Emphasis .....	208
Environmental Engineering, Bachelor of Science .....	181	Earth & Planetary Sciences .....	208
Sustainability in the Built Environment, Minor .....	183	Earth & Planetary Sciences, Master of Science .....	209
Classics .....	184	Earth & Planetary Sciences, Doctor of Philosophy .....	209
Classical Civilization, Bachelor of Arts .....	184	Environmental Geology, Minor .....	209
Classical Civilization, Minor .....	188	Geology, Bachelor of Arts .....	209
Greek, Minor .....	188	Geology, Bachelor of Science .....	212
Latin, Minor .....	188	Geology, Minor .....	214
Clinical Research (Graduate Group) .....	188	Geophysics, Minor .....	215
Clinical Research, Master of Advanced Studies .....	189	Marine & Coastal Science, Bachelor of Science .....	216
Cognitive Science .....	189	Oceanography, Minor .....	220
Cognitive Science, Bachelor of Arts .....	189	East Asian Languages & Cultures .....	221
Cognitive Science, Bachelor of Science .....	190	Chinese, Bachelor of Arts .....	221
Communication .....	193	Chinese, Minor .....	223
Communication, Bachelor of Arts .....	193	Japanese, Bachelor of Arts .....	223
Communication, Minor .....	195	Japanese, Minor .....	225
Communication, Master of Arts .....	195	East Asian Studies .....	226
Communication, Doctor of Philosophy .....	195	East Asian Studies, Bachelor of Arts .....	226
Comparative Literature .....	195	East Asian Studies, Minor .....	228
Comparative Literature, Bachelor of Arts .....	195	Ecology (Graduate Group) .....	228

Ecology, Master of Science .....	228	Medical-Veterinary Entomology, Minor .....	256
Ecology, Doctor of Philosophy .....	228	Nematology, Minor .....	257
Ecology, Doctor of Philosophy (Joint Doctorate with SDSU) .....	229	Environmental Policy & Management (Graduate Group) .....	257
Economics .....	229	Environmental Policy & Management, Master of Science .....	257
Economics, Bachelor of Arts .....	229	Environmental Science & Policy .....	257
Economics, Minor .....	235	Climate Science & Policy, Minor .....	258
Economics, Master of Arts .....	236	Environmental Policy Analysis & Planning, Bachelor of Science .....	258
Economics, Doctor of Philosophy .....	236	Environmental Policy Analysis & Planning, Minor .....	262
Education, School of .....	236	Environmental Science & Management, Bachelor of Science .....	262
Education, Minor .....	236	Environmental Toxicology .....	268
Education, Master of Arts .....	238	Environmental Toxicology, Bachelor of Science .....	268
Education, Doctor of Philosophy .....	238	Environmental Toxicology, Minor .....	270
Education Leadership, Doctorate in Education (CANDEL) .....	238	Epidemiology (Graduate Group) .....	270
Integrated Teaching Credential, Teaching Credential, Master of Arts .....	238	Epidemiology, Master of Science .....	271
Electrical & Computer Engineering .....	239	Epidemiology, Doctor of Philosophy .....	271
Computer Engineering, Bachelor of Science .....	239	Evolution & Ecology .....	271
Electrical & Computer Engineering, Bachelor of Science/Master of Science Integrated Degree Programs (IDP) .....	242	Evolution, Ecology & Biodiversity, Bachelor of Arts .....	271
Electrical & Computer Engineering, Master of Science .....	242	Evolution, Ecology & Biodiversity, Bachelor of Science .....	273
Electrical & Computer Engineering, Doctor of Philosophy .....	243	Evolution, Ecology & Biodiversity, Minor .....	274
Electrical Engineering, Bachelor of Science .....	243	Food Science & Technology .....	275
Electrical Engineering, Minor .....	248	Food Science, Bachelor of Science .....	275
Energy Systems (Graduate Group) .....	248	Food Science (Graduate Group) .....	276
Energy Systems, Master of Science .....	249	Food Science, Master of Science .....	277
Energy Systems, Doctor of Philosophy .....	249	Food Science, Doctor of Philosophy .....	277
Engineering, College of .....	249	Forensic Science (Graduate Group) .....	277
English .....	249	Forensic Science, Master of Science .....	277
Creative Writing, Master of Fine Arts .....	249	French & Italian .....	277
English, Bachelor of Arts .....	249	French & Francophone Studies, Master of Arts .....	277
English, Minor .....	252	French & Francophone Studies, Doctor of Philosophy .....	278
English, Master of Arts .....	252	French, Bachelor of Arts .....	278
English, Doctor of Philosophy .....	252	French, Minor .....	279
Entomology & Nematology .....	252	Italian, Bachelor of Arts .....	280
Agricultural Pest Management, Minor .....	253	Italian, Minor .....	280
Animal Biology, Bachelor of Science .....	253	Gender, Sexuality, & Women's Studies .....	281
Entomology, Bachelor of Science .....	254	Gender, Sexuality, & Women's Studies, Bachelor of Arts .....	281
Entomology, Master of Science .....	255	Gender, Sexuality, & Women's Studies, Minor .....	283
Entomology, Doctor of Philosophy .....	255	Sexuality Studies, Minor .....	284
Forensic Entomology, Minor .....	256	Geography (Graduate Group) .....	284
Insect Biology, Minor .....	256	Geography, Master of Arts .....	284
Insect Ecology & Evolution, Minor .....	256	Geography, Doctor of Philosophy .....	285

German & Russian .....	285	Immunology, Doctor of Philosophy .....	315
German, Bachelor of Arts .....	285	Individual Major .....	315
German, Minor .....	287	Agricultural & Environmental Sciences, Bachelor of Science, Individual .....	315
German, Master of Arts .....	287	Biological Sciences, Bachelor of Arts, Individual .....	315
German, Doctor of Philosophy .....	287	Biological Sciences, Bachelor of Science, Individual .....	316
Russian, Bachelor of Arts .....	287	Letters & Science, Bachelor of Arts, Individual .....	316
Russian, Minor .....	288	Letters & Science, Bachelor of Science, Individual .....	317
Global Learning Hub .....	288	Integrative Genetics & Genomics (Graduate Group) .....	318
Global Studies, Minor .....	290	Integrative Genetics & Genomics, Master of Science .....	318
Health Informatics (Graduate Group) .....	291	Integrative Genetics & Genomics, Doctor of Philosophy .....	318
Health Informatics, Master of Science .....	291	Integrative Pathobiology (Graduate Group) .....	318
Hemispheric Institute of the Americas .....	291	Integrative Pathobiology, Master of Science .....	319
Latin American & Hemispheric Studies, Minor .....	292	Integrative Pathobiology, Doctor of Philosophy .....	319
History .....	294	International Agricultural Development (Graduate Group) .....	319
History, Bachelor of Arts .....	294	International Agricultural Development, Master of Science ...	319
History, Minor .....	298	Land, Air, & Water Resources .....	319
History, Master of Arts .....	298	Atmospheric Science, Bachelor of Science .....	320
History, Doctor of Philosophy .....	299	Atmospheric Science, Minor .....	321
Jewish Studies, Minor .....	299	Hydrology, Bachelor of Science .....	322
Horticulture & Agronomy (Graduate Group) .....	300	Hydrology, Minor .....	323
Horticulture & Agronomy, Master of Science .....	300	International Science Studies, Minor .....	323
Horticulture & Agronomy, Doctor of Philosophy .....	300	Soil Science, Minor .....	324
Human Development (Graduate Group) .....	300	Sustainable Agriculture & Food Systems, Bachelor of Science .....	325
Human Development, Doctor of Philosophy .....	300	Watershed Science, Minor .....	329
Human Ecology .....	301	Law, School of .....	329
Aging & Adult Development, Minor .....	301	Master of Laws .....	329
Community & Regional Development, Bachelor of Science ...	301	Doctor of Jurisprudence .....	330
Community Development, Minor .....	306	Linguistics .....	331
Community Development, Master of Science .....	306	Linguistics, Bachelor of Arts .....	331
Geographic Studies, Minor .....	306	Linguistics, Master of Arts .....	332
Human Development, Bachelor of Science .....	307	Linguistics, Doctor of Philosophy .....	333
Human Development, Minor .....	309	Linguistics, Minor .....	333
Landscape Architecture, Bachelor of Science .....	309	Linguistics for Language Teachers, Minor .....	333
Sustainable Environmental Design, Bachelor of Science .....	311	Management, Graduate School of .....	333
Human Rights Studies .....	312	Accounting, Minor .....	334
Human Right Studies, Minor .....	312	Business Administration Online, Master of Business Administration Online .....	334
Humanities .....	313	Business Administration, Master of Business Administration .....	334
Hydrologic Sciences (Graduate Group) .....	313	Business Analytics, Master of Science .....	335
Hydrologic Sciences, Master of Science .....	313	Business, Bachelor of Science .....	335
Hydrologic Sciences, Doctor of Philosophy .....	314		
Immunology (Graduate Group) .....	314		
Immunology, Master of Science .....	314		

Master of Management, Online Master of Management .....	337
Professional Accountancy, Master of Professional Accountancy .....	337
Technology Management, Minor .....	337
Materials Science & Engineering .....	338
Materials Science & Engineering, Bachelor of Science .....	338
Materials Science, Minor .....	340
Materials Science & Engineering, Master of Engineering .....	341
Materials Science & Engineering, Master of Science .....	341
Materials Science & Engineering, Doctor of Philosophy .....	341
Mathematics .....	341
Applied Mathematics, Bachelor of Science .....	341
Mathematics, Bachelor of Arts .....	343
Mathematics, Bachelor of Science .....	345
Mathematics, Minor .....	347
Mathematics, Master of Arts .....	347
Mathematics, Doctor of Philosophy .....	348
Mathematical & Scientific Computation, Bachelor of Science .....	348
Mathematical Analytics & Operations Research, Bachelor of Science .....	349
Mechanical & Aerospace Engineering .....	351
Aerospace Science & Engineering, Bachelor of Science .....	351
Mechanical Engineering, Bachelor of Science .....	354
Mechanical & Aerospace Engineering, Master of Science .....	357
Mechanical & Aerospace Engineering, Doctor of Philosophy .....	358
Medicine, School of .....	359
Doctor of Medicine .....	359
Medieval & Early Modern Studies .....	359
Medieval & Early Modern Studies, Bachelor of Arts .....	359
Medieval & Early Modern Studies, Minor .....	361
Microbiology & Molecular Genetics .....	361
Molecular & Medical Microbiology, Bachelor of Arts .....	362
Molecular & Medical Microbiology, Bachelor of Science .....	363
Microbiology (Graduate Group) .....	365
Microbiology, Master of Science .....	365
Microbiology, Doctor of Philosophy .....	366
Middle East/South Asia Studies .....	366
Arab Studies, Minor .....	366
Arabic, Minor .....	367
India & South Asia Studies, Minor .....	368
Iran & Persian Studies, Minor .....	368
Middle East/South Asia Studies, Bachelor of Arts .....	369
Middle East/South Asia Studies, Minor .....	371
Military Science .....	372
Molecular & Cellular Biology .....	374
Biochemistry & Molecular Biology, Bachelor of Science .....	374
Cell Biology, Bachelor of Science .....	376
Genetics & Genomics, Bachelor of Science .....	378
Molecular, Cellular, & Integrative Physiology (Graduate Group) ....	380
Molecular, Cellular, & Integrative Physiology, Master of Science .....	380
Molecular, Cellular, & Integrative Physiology, Doctor of Philosophy .....	380
Music .....	380
Music, Bachelor of Arts .....	380
Music, Minor .....	388
Music, Master of Arts .....	388
Music, Doctor of Philosophy .....	388
Native American Studies .....	389
Native American Studies, Bachelor of Arts .....	389
Native American Studies, Minor .....	390
Native American Studies, Master of Arts .....	391
Native American Studies, Doctor of Philosophy .....	391
Neurobiology, Physiology, & Behavior .....	391
Exercise Biology, Minor .....	391
Human Biology, Bachelor of Science .....	392
Human Physiology, Minor .....	394
Neurobiology, Physiology, & Behavior, Bachelor of Science ....	394
Neuroscience, Minor .....	398
Neuroscience (Graduate Group) .....	398
Neuroscience, Doctor of Philosophy .....	398
Nursing Science & Health-Care Leadership .....	399
Doctor of Nursing Practice—Family Nurse Practitioner Degree Program .....	399
Doctor of Nursing Practice-Nurse Anesthesia .....	399
Master's Entry Program in Nursing .....	399
Nursing Science & Health-Care Leadership, Doctor of Philosophy .....	400
Physician Assistant Studies, Master of Health Services .....	400
Nutrition .....	400
Clinical Nutrition, Bachelor of Science .....	401
Community Nutrition, Minor .....	402
Maternal & Child Nutrition, Master of Advanced Study .....	402
Nutrition & Food, Minor .....	402

Nutrition Science, Bachelor of Science .....	403	Environmental Horticulture & Urban Forestry, Bachelor of Science .....	437
Nutrition Science, Minor .....	406	Environmental Horticulture, Minor .....	438
Nutritional Biology (Graduate Group) .....	407	International Agricultural Development, Bachelor of Science .....	439
Nutritional Biology, Master of Science .....	407	International Agricultural Development, Minor .....	441
Nutritional Biology, Doctor of Philosophy .....	407	Landscape Restoration, Minor .....	442
Performance Studies (Graduate Group) .....	407	Plant Sciences, Bachelor of Science .....	442
Performance Studies, Doctor of Philosophy .....	407	Political Science .....	445
Pharmacology & Toxicology (Graduate Group) .....	408	International Relations, Bachelor of Arts .....	446
Pharmacology & Toxicology, Master of Science .....	408	Political Science—Public Service, Bachelor of Arts .....	453
Pharmacology & Toxicology, Doctor of Philosophy .....	408	Political Science, Bachelor of Arts .....	455
Philosophy .....	408	Political Science, Minor .....	458
Philosophy, Bachelor of Arts .....	408	Political Science, Master of Arts .....	458
Philosophy, Minor .....	411	Political Science, Master of Arts/Doctor of Jurisprudence ....	458
Philosophy, Master of Arts .....	412	Political Science, Doctor of Philosophy .....	458
Philosophy, Doctor of Philosophy .....	412	Social Science Data Analysis & Visualization, Minor .....	459
Physics & Astronomy .....	412	War-Peace Studies, Minor .....	459
Applied Physics, Bachelor of Science .....	412	Population Biology (Graduate Group) .....	460
Physics, Bachelor of Arts .....	417	Population Biology, Master of Science .....	460
Physics, Bachelor of Science .....	418	Population Biology, Doctor of Philosophy .....	460
Physics, Minor .....	420	Preventive Veterinary Medicine (Graduate Group) .....	460
Physics, Master of Science .....	420	Master of Preventive Veterinary Medicine .....	460
Physics, Doctor of Philosophy .....	420	Psychology .....	460
Plant Biology .....	420	Psychology, Bachelor of Arts .....	461
Plant Biology, Bachelor of Arts .....	421	Psychology, Bachelor of Science .....	463
Plant Biology, Bachelor of Science .....	422	Psychology, Minor .....	468
Plant Biology, Minor .....	424	Psychology, Master of Arts .....	470
Systems & Synthetic Biology, Bachelor of Science .....	424	Psychology, Doctor of Philosophy .....	470
Plant Biology (Graduate Group) .....	426	Public Health Sciences .....	470
Plant Biology, Master of Science .....	426	Master of Public Health .....	470
Plant Biology, Doctor of Philosophy .....	426	Public Health Sciences, Doctor of Philosophy .....	470
Plant Pathology .....	426	Public Health Sciences, Minor .....	470
Fungal Biology & Ecology, Minor .....	426	Religious Studies .....	472
Global Disease Biology, Bachelor of Science .....	427	Medical Humanities, Minor .....	472
Global Disease Biology, Minor .....	429	Religious Studies, Bachelor of Arts .....	472
Plant Pathology, Master of Science .....	429	Religious Studies, Minor .....	474
Plant Pathology, Doctor of Philosophy .....	429	Study of Religion, Master of Arts .....	475
Plant Sciences .....	429	Study of Religion, Doctor of Philosophy .....	475
Agricultural Systems & Environment, Minor .....	430	Science & Society .....	475
Biotechnology, Bachelor of Science .....	431	Contemporary Leadership, Minor .....	475
Ecological Management & Restoration, Bachelor of Science .....	435	Science & Society, Minor .....	476

Science & Technology Studies .....	477	Wildlife, Fish, & Conservation Biology .....	514
Data in Society, Minor .....	477	Wildlife, Fish & Conservation Biology, Bachelor of Science ....	514
History & Philosophy of Science, Minor .....	478	Wildlife, Fish & Conservation Biology, Minor .....	517
Science & Technology Studies, Bachelor of Arts .....	478	About Courses .....	518
Science & Technology Studies, Designated Emphasis .....	480	Courses by Subject Code .....	520
Sociology .....	480	Aerospace Science & Engineering (EAE) .....	522
Sociology, Bachelor of Arts .....	480	African American & African Studies (AAS) .....	524
Sociology, Minor .....	489	Agricultural & Environmental Chemistry (AGC) .....	531
Sociology—Organizational Studies, Bachelor of Arts .....	489	Agricultural & Environmental Technology (TAE) .....	531
Sociology, Master of Arts .....	492	Agricultural & Resource Econ (ARE) .....	532
Sociology, Doctor of Philosophy .....	492	Agricultural Education (AED) .....	542
Soils & Biogeochemistry (Graduate Group) .....	492	American Studies (AMS) .....	544
Soils & Biogeochemistry, Master of Science .....	492	Anatomy, Physiology, & Cell Biology (APC) .....	548
Soils & Biogeochemistry, Doctor of Philosophy .....	492	Anesthesiology (ANE) .....	549
Spanish & Portuguese .....	493	Animal Behavior (ANB) .....	550
Luso-Brazilian Studies, Minor .....	493	Animal Biology (ABI) .....	552
Spanish, Bachelor of Arts .....	493	Animal Biology Graduate (ABG) .....	553
Spanish, Minor .....	495	Animal Genetics (ANG) .....	554
Spanish, Master of Arts .....	496	Animal Science (ANS) .....	555
Spanish, Doctor of Philosophy .....	496	Anthropology (ANT) .....	564
Statistics .....	496	Applied Biological Systems Technology (ABT) .....	578
Data Science, Bachelor of Science .....	497	Applied Science Engineering-Davis (EAD) .....	581
Statistics, Bachelor of Arts .....	498	Arabic (ARB) .....	582
Statistics, Bachelor of Science .....	499	Art History (AHI) .....	585
Statistics, Minor .....	502	Art Studio (ART) .....	593
Statistics, Master of Science .....	503	Asian American Studies (ASA) .....	602
Statistics, Doctor of Philosophy .....	503	Astronomy (AST) .....	606
Theatre & Dance .....	503	Atmospheric Science (ATM) .....	606
Dramatic Art, Master of Fine Arts .....	503	Avian Sciences (AVS) .....	611
Theatre & Dance, Bachelor of Arts .....	504	Biochemistry, Molecular, Cellular, & Developmental Biology (BCB)	614
Theatre & Dance, Minor .....	507	.....	614
Transportation Technology & Policy (Graduate Group) .....	508	Biological Chemistry (BCM) .....	615
Transportation Technology & Policy, Master of Science .....	508	Biological Sciences (BIS) .....	617
Transportation Technology & Policy, Doctor of Philosophy ....	508	Biological Systems Engineering (EBS) .....	622
University Writing Program .....	509	Biology (BIO) .....	628
Professional Writing, Minor .....	509	Biomedical Engineering (BIM) .....	629
Veterinary Medicine, School of .....	510	Biophotonics (BPT) .....	640
Viticulture & Enology .....	510	Biophysics (BPH) .....	641
Viticulture & Enology, Bachelor of Science .....	510	Biostatistics (BST) .....	642
Viticulture & Enology, Minor .....	513	Biotechnology (BIT) .....	643
Viticulture & Enology (Graduate Group) .....	514	Business Analytics (BAX) .....	644
Viticulture & Enology, Master of Science .....	514	Cardiology (CAR) .....	646

Cell Biology & Human Anatomy (CHA) .....	647	Epidemiology (EPI) .....	878
Chemical Engineering (ECH) .....	649	Evolution & Ecology (EVE) .....	881
Chemistry (CHE) .....	657	Exercise Biology (EXB) .....	887
Chicano Studies (CHI) .....	669	Exercise Science (EXS) .....	890
Chinese (CHN) .....	677	Family Practice (FAP) .....	890
Cinema & Digital Media (CDM) .....	683	Fiber & Polymer Science (FPS) .....	894
Cinema & Technocultural Studies (CTS) .....	689	Film Studies (FMS) .....	896
Civil & Environmental Engineering (ECI) .....	690	Fine Arts & Humanities (FAH) .....	897
Classics (CLA) .....	706	Food Science & Technology (FST) .....	897
Clinical Research (CLH) .....	712	Food Service Management (FSM) .....	903
Cognitive Science (CGS) .....	715	Forensic Science (FOR) .....	904
College of Letters & Science (LTS) .....	717	French (FRE) .....	907
Communication (CMN) .....	717	Freshman Seminar (FRS) .....	915

# GENERAL CATALOG HOME

## Chancellor's Message

A degree from UC Davis is one that commands respect in graduate schools and the workplace worldwide. As part of our thriving community, you have an incredible opportunity to learn from some of the best and brightest professors and students from around the globe.

You're joining a community that's driven by curiosity and motivated to solve the world's greatest problems. Our research and innovations help feed a growing population, sustain our natural resources, advance health worldwide, and better understand how interconnected humanity is.

At UC Davis, you can develop new ways of thinking, seeing, and being. You can challenge limitations and outgrow the expected. The personal touch, engagement, and passion for learning you bring to UC Davis elevate the university as a whole.

I wish you much success in your studies and all your future endeavors.

Gary S. May, Chancellor

## Undergraduate Colleges, Graduate Studies, & Professional Schools

UC Davis has four undergraduate colleges, a graduate division, and six graduate/professional schools; each has abundant information on their websites. To find the college or school your area of interest lies in, try using Degree Explorer (<https://catalog.ucdavis.edu/degree-explorer/>).

### Undergraduate Colleges/School

- Agricultural & Environmental Sciences (<https://caes.ucdavis.edu/>)  
The College of Agricultural & Environmental Sciences offers a diverse program of majors and courses and is committed to education emphasizing a spirit of discovery. Through a wide array of major programs, the college highlights interconnections among the

environment, plant and animal sciences, biological sciences and human sciences; prepares high-potential students for advanced studies in diverse disciplines and leadership in such arenas as public policy, research & development, managerial & natural resource economics, agricultural systems, environmental protection, safety & design, human nutrition, health & development, and food industries.

- Biological Sciences (<https://basc.biology.ucdavis.edu/>)  
The College of Biological Sciences offers undergraduate majors that cover a wide range of topics within the life sciences, including biochemistry, behavior, cell biology, evolution, ecology, genetics, physiology, neurobiology, genomics and bioinformatics. With an emphasis on hands-on learning in research labs, fieldwork, and clinical settings, students apply classroom knowledge directly to the study of microbes, plants, and animals and receive in-depth preparation for diverse careers, graduate study, and pre-med tracks. Graduate education is uniquely interdisciplinary, allowing Master's and Doctoral students to tailor their degrees with access to a broad coalition of faculty across multiple disciplines. With a strong focus on community, mentorship, and practical learning in research environments, the college equips all students with the skills and mindset to become lifelong learners and innovators in the life sciences.
- Engineering (<https://engineering.ucdavis.edu/>)  
The mission of the College of Engineering at UC Davis is to **create a sustainable world through socially responsible engineering, inspiring education and transformative research**. The College maintains a long-standing commitment to undergraduate engineering students, preparing them to contribute to the engineering professions and ongoing engineering research. The college produces well-rounded engineering graduates, who value its interdisciplinary and comprehensive approach to teaching and learning. The College of Engineering produces innovative, research-based solutions to complex problems and challenges. At the center of it all is our core value of **engineering a better world for all**, which infuses our vision to take on grand challenges, prepare tomorrow's engineers, and build a collaborative environment; all with an eye toward equity and a commitment to leave no community behind.
- Graduate School of Management (<http://gsm.ucdavis.edu/>)  
In addition to teaching undergraduate minors in accounting and technology management, the Graduate School of Management at UC Davis launches a new undergraduate Bachelor of Science in Business (p. 335) launches in fall 2025.
- Letters & Science (<http://www.ls.ucdavis.edu/>)  
The College of Letters & Science (L&S) is the liberal arts backbone of UC Davis, the University of California's most comprehensive university. Serving almost half of all UC Davis students, L&S offers among the nation's most highly ranked programs in a broad array of disciplines including Humanities, Arts, Cultural & Ethnic Studies, Mathematical & Physical Sciences, and Social Sciences. L&S's true strength stems from its faculty's commitment to increasing knowledge through research, artistic expression, and other creative endeavors; effectively communicating and applying that knowledge through teaching and public service. The results are an inclusive, supportive environment enabling students to achieve their highest potential.

### Graduate Studies

- Graduate Studies (<https://gradstudies.ucdavis.edu/>)  
Graduate Studies serves a community of nearly 7,000 graduate students (at both the master's and doctoral levels) and 1,000 postdoctoral scholars across roughly 100 graduate degree programs.

UC Davis graduate students can work with and learn from world-class faculty in state-of-the-art research facilities. Graduate students can also pursue many degrees in a collaborative and interdisciplinary curricula through graduate groups; a concept allowing students to engage with faculty in interrelated areas to broaden their intellectual experiences. As a central hub for resources and support, and in partnership with the graduate programs as well as the schools and colleges, Graduate Studies (<https://gradstudies.ucdavis.edu/>) helps ensure the success and well-being of UC Davis graduate students and scholars.

## Professional Schools

- Betty Irene Moore School of Nursing (<https://health.ucdavis.edu/nursing/>)—M.H.S., M.S., Ph.D.  
The Betty Irene Moore School of Nursing at UC Davis prepares successful leaders in health care. As one of the only graduate nursing schools committed to activating change where it's needed the most, the School of Nursing goes beyond clinical education with programs that provide graduates with the skills, confidence and vision to advance health care locally, nationally and globally. The school offers degree programs to train future nurses, physician assistants, family nurse practitioners, CRNAs, psychiatric mental health nurse practitioners, Ph.D.s, professors and researchers.
- Graduate School of Management (<http://gsm.ucdavis.edu/>)  
The Graduate School of Management at UC Davis is focused on preparing the next generation of inspired, innovative and collaborative leaders who are committed to making a positive impact. The school's nationally and internationally ranked graduate business programs are distinguished by globally visible research faculty, entrepreneurial students and innovative curricula. The school offers a Full-Time M.B.A., Master of Professional Accountancy and Master of Management at the UC Davis campus, Part-Time M.B.A. in Sacramento and the San Francisco Bay Area, a Master of Science in Business Analytics in downtown San Francisco, and an Online M.B.A. and online Master of Management that are the first of their kind in the UC system. In addition to teaching undergraduate minors in accounting and technology management, a new undergraduate Bachelor of Science in Business launches in fall 2025. The school is home to the Mike & Renee Child Institute for Innovation & Entrepreneurship.
- School of Education (<http://education.ucdavis.edu/>)  
The UC Davis School of Education is driven by its mission to confront and eliminate inequities among people and communities through impactful research and the transformative power of education. Offering teaching credential/M.A., Ph.D., and Ed.D. graduate programs, as well as an undergraduate minor, the School prepares students to become teachers, researchers, and educational leaders. Strengthening schools has been a part of UC Davis's legacy since 1922, when the first teacher-training program was held on the University Farm. Today, the School continues and expands this tradition, equipping graduates to create equitable opportunities and improve outcomes for learners in K-12 schools, higher education, policymaking, and beyond.
- School of Law (<https://law.ucdavis.edu/>)  
The University of California Davis School of Law offers a three-year professional curriculum leading to the degree of Juris Doctor. Within a uniquely supportive atmosphere, law students access a comprehensive modern law school curriculum taught by a nationally and internationally distinguished faculty. The School offers a full range of traditional law courses, opportunities for practical experience through clinical programs, and in-depth study

of an area of law in an individualized program of classroom work, research, writing, or experience in the community. It further provides professional skills training in interviewing and counseling, negotiation and dispute resolution, and trial practice. The School of Law seeks to promote critical evaluation of law and legal institutions in a broad perspective, integrating non-legal disciplines with professional legal education. The UC Davis Master of Laws (LL.M.) (p. 329) program integrates American and international law students at all levels of study and provides LL.M. candidates with a broad curriculum of many different courses over ten months of study.

- School of Medicine (<https://health.ucdavis.edu/medschool/>)  
The curriculum for the M.D. degree at the UC Davis School of Medicine is a four-year program providing comprehensive preparation for graduate medical training (internships and residencies) and the practice of medicine. It offers a highly integrated approach to basic science training and clinical experience with opportunities for research. The I-EXPLORE (Integrated Explorative Patient & Learner Oriented Education) curriculum utilizes a competency-based medical education that emphasizes the achievement of knowledge, skills, abilities, and attitudes through a variety of experiences#that span all four years of the program.#Competencies are assessed through a variety of methods that include both formative and summative events. Competency-based education is designed in a collaborative and integrative manner that allows students to grow and evolve throughout their educational experience. For more information, see UC Davis School of Medicine M.D. Program (<https://health.ucdavis.edu/mdiagram/>).
- School of Veterinary Medicine (<https://www.vetmed.ucdavis.edu/>)  
The UC Davis School of Veterinary Medicine is a top-ranked academic medical center with a school, hospital, specialty clinics, research centers and institutes. We are home to approximately 720 of the world's brightest doctors of veterinary medicine (DVM), Ph.D., and M.S. students who are dedicated to becoming the next generation of veterinarians, researchers, and industry professionals. Our premier educational, research, clinical, and public service programs serve to advance the health of animals and people, and the environment we share. Our *One Health* approach encompasses captive and free-ranging wildlife, livestock, companion animals, exotic animals, birds, aquatic mammals, and fish, and our researchers are at the forefront of discoveries that translate to improved care for humans, as well as animals

## Accreditation & Administration

### Accreditation

The University of California, Davis has been fully accredited (<https://ue.ucdavis.edu/accreditation/>) since 1954 by the WASC Senior College & University Commission (WSCUC) (<https://wasc.ucdavis.edu/>). For more information, contact the campus Accreditation Liaison Officer (ALO) (<https://wasc.ucdavis.edu/contact/>).

Individual majors may have programmatic accreditation, which may or may not be published in the catalog program description. For more information regarding the accreditations for their programs, contact the college or school; see above, under *Colleges & Schools*.

## About the General Catalog

Volume 56 | Content Effective: 2025-2026 Academic Year, unless otherwise noted.

General Catalog content is specifically structured to assist a student in acquiring their degree award. Containing the rules, requirements, & policies that apply to a student seeking a UC Davis degree, the catalog also directs students to academic advising & academic support services, campus community life & culture, and health, dining, transportation, & other essential services information.

The General Catalog reflects information as of publication (late-April, yearly). Content is subject to change without notice, unless otherwise noted. All times are local Pacific time zone (PT); unless otherwise stated.

It is the responsibility of the individual student to become familiar with the rules, requirements, and policies contained in this General Catalog.

**Programs** (majors & minors) are updated for fall term only; once-a-year at the publication.

**Courses** are updated & published with effective terms (p. 518), as they are approved. To better understand course descriptions, see About Courses (p. 518). **Courses listed in this catalog are subject to change without notice.**

UC Davis provides assistance to the visually impaired regarding the information contained in this catalog; questions should be directed to the office or department concerned.

Randall Maynard (Catalog-Comment@ucdavis.edu), Senior Editor  
Office of the University Registrar  
3100 Dutton Hall, One Shields Avenue, Davis, CA 95616-8692

# POLICIES, PROCEDURES, & REGULATIONS

From registration to graduation, there are many aspects to being a successful UC Davis student. To guide you along your path to graduation, see the following sections:

- Registration & Course Load (p. 19)
  - Adding & Dropping Courses (p. 19)
  - Late Actions (p. 20)
  - Register for Classes (p. 23)
  - Registration Pass Times (p. 24)
- Academic Credit (p. 24)
  - Simultaneous Enrollment at a Non-University of California (<https://ucdavis-preview.courseleaf.com/academic-information-policies-regulations/academic-credit/simultaneous-enrollment/>)
  - Advanced Placement (AP) Credit & Chart (p. 25)
  - International Baccalaureate (IB) Credit & Chart (p. 26)
  - AP & IB Charts Archive (p. 27)
- Academic Standing (p. 28)
- Examinations (p. 31)
- General Appeal (p. 34)
- Grades & Grading (p. 34)
- Graduate Studies Policies (<https://grad.ucdavis.edu/policies/?./>)
- Honors & Prizes (<https://catalog.ucdavis.edu/academic-information-policies-regulations/honors-prizes/>)
- Leaving UC Davis (p. 45)
- Completing Your Degree (p. 48)
- Returning to UC Davis (p. 49)
- Retroactive Changes (p. 51)
- Student Conduct & Responsibilities (p. 54)

## Registration & Course Load

### Registration

Registration includes the process of enrolling in classes, the financial obligation to pay tuition, fees and all other charges, filing current address (mailing, permanent, and emergency) information with the Office of the University Registrar, and completing and submitting any forms pertaining to your registration status. To be a continuing student at the university, you must enroll in classes each academic term. To be considered a registered student, you must also pay all tuition, fees and any outstanding balance due.

If you are a *new* student, your acceptance letter directs you to all of the required next steps to obtain student status at the university. Graduate students who previously attended UC Davis as undergraduates are considered to be *new* students. If you do not enroll in classes for a future academic term or did not take an approved leave of absence, you must apply for Readmission to return to the university and resume student status.

For complete information, see Registration (<https://registrar.ucdavis.edu/registration/>).

### Course Load

Undergraduate students need to carry a study load of at least 12 units each quarter in order to be certified as full-time students. Unless otherwise noted for the program, graduate students must also carry a study load of at least 12 units each quarter to be certified as full-time students.

Related: Full-Time Status (<https://registrar.ucdavis.edu/registration/>) | Part-Time Status for Tuition Purposes (<https://registrar.ucdavis.edu/registration/part-time/>) | Academic Standing & Undergraduate Expected & Minimum Progress (p. 28)

## Adding & Dropping Courses

Adding and dropping courses is governed by Davis Division Regulation 547 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#547-1>).<sup>1</sup>

### Adding Courses

Students may add courses during Pass One, Pass Two, Open Hours, Open Registration and Schedule Adjustment. The last day to add courses using Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>) is by the end of the 12th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>).

- To Late Add a course with a Permission to Add number (PTA), see Late Actions (<https://registrar.ucdavis.edu/registration/schedule-adjustments/late-actions/>).
- To Retroactively Add a course after the last day of instruction, see Retroactive Actions (<https://registrar.ucdavis.edu/records/retroactive/>).

### Dropping Courses

Students may drop courses using Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>) during Pass One, Pass Two, Open Hours, Open Registration & Schedule Adjustment.

All courses are designated with either a 10-day or 20-day drop deadline displayed in the details view using Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>) or the Class Search Tool (<http://registrar-apps.ucdavis.edu/courses/search/>). Courses designated with a 10-day drop can be dropped without the permission of the college Dean's Office through the end of the 10th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>). Similarly, courses designated with a 20-day drop can be dropped without the permission of the college Dean's Office through the end of the 20th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>).

- To Late Drop a course with a Permission to Drop (PTD) number, see Late Actions (<https://registrar.ucdavis.edu/registration/schedule-adjustments/late-actions/>).
- To Retroactively drop a course after the last day of instruction, see Retroactive Actions (<https://registrar.ucdavis.edu/records/retroactive/>).

Note: Students who register for a 10-day drop course or are moved from the waitlist into a 10-day drop course **after** the drop deadline have a 72-hour grace period to contact the Office of the University Registrar (<https://registrar.ucdavis.edu/about/contact/>), to drop the course. This

grace period is **only** for students who register or are added from the waitlist into a 10-day drop course **after** the 10th day of instruction.

Registered students or those added from a waitlist who do not attend or submit any work for a class will receive a failing grade and are financially liable for the registration. All students are responsible for reviewing their course schedule and should check and adjust their schedule accordingly during the designated registration and schedule adjustment periods.

## **1 Davis Division Regulation 547**

Davis Division Regulation 547 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#547->)

### 547. Adding or Dropping a Course

(A) The deadline to drop a course is the twentieth day of instruction, except for courses that a department or program has noted in the Class Search Tool to have a ten-day drop deadline. The deadline to add a course is the twelfth day of instruction. Courses may be added or dropped at any time before these dates by any method mutually agreed upon by the Registrar and the Chair of the Davis Division of the Academic Senate. (Am. 5/27/93; Eff. 9/1/93; Am. 6/8/98; Eff. 9/1/99)

(B) At any time after the add deadline and before the close of business on the last day of instruction for the term, or, for summer sessions (excluding special session) the close of business on the last day of instruction in the fifth week of the session, approval to add a course may be granted upon petition by the student and certification by the appropriate authority. Approval of such petitions may be granted only in cases where substantial evidence indicates that the student did attempt to add the course prior to the deadline, but was prevented from doing so by clerical error or other situation beyond the student's control. The petition must be approved by the appropriate dean and, in addition, by the appropriate committee of the faculty of the student's college or school or the appropriate subcommittee of the Graduate Council. The faculty committee may authorize an administrative officer to act on its behalf, but at least once each quarter the committee should receive and review a summary of the actions taken in its name. (Am. 9/1/2013)

(C) At any time after the drop deadline and before the close of business on the last day of instruction for the term, or, for summer sessions (excluding special session) the close of business on the last day of instruction in the fifth week of the session, approval may be granted upon petition by the student and certification by an appropriate authority that, due to unexpected circumstances beyond the student's control, one or more courses should be dropped. The circumstances may include illness, serious personal problems, an accident, a death in the immediate family, a large and necessary increase in working hours, or other situations deemed to be of equal gravity. The petition must be approved by the appropriate dean and, in addition, by the appropriate committee of the faculty of the student's college or school or the appropriate subcommittee of the Graduate Council. The faculty committee may authorize an administrative officer to act on its behalf, but at least once each quarter the committee should receive and review a summary of the actions taken in its name. An undergraduate student is permitted to drop a course subsequent to the drop deadline even if doing so would reduce that student's study list below 12 units, but such a student no longer can be certified as a full-time student. (Am. 9/1/2013)

(D) To drop a course or withdraw from the University after close of business on the last day of instruction for the term, or, for summer sessions (excluding special session) the close of business on the last day of instruction in the fifth week of the session, the student or an

appropriate faculty member must submit a petition to the Davis Division Grade Changes Committee or, for professional faculty or students in professional courses in their own professional schools, to the grade change committee of that school. Approval will be granted only in the most unusual circumstances and only in those cases where it is clear that by not approving the petition the student would be treated unfairly. (Am. 9/1/2013)

## **Late Actions**

The information provided below applies to published Quarter Dates & Deadlines (<https://registrar.ucdavis.edu/calendar/web/quarter/>).

Deadlines for registration actions differ during Summer Sessions. For deadlines and refund dates, see the Summer Sessions Academic Calendar (<https://summer-sessions.ucdavis.edu/calendar/master-calendar/>).

## **Late Schedule Adjustment Actions**

Adding and dropping courses is governed by Davis Division Regulation 547 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#547->).

See below for:

- Section Switch After the Add/Drop Deadline
- Late Course Add Information
  - Late Course Add with a Permission to Add PTA
  - Late Course Add After the Permission to Add (PTA) Deadline
- Late Course Drop Information
  - Dropping Courses with a Permission to Drop (PTD)
  - Late Course Drop After the Permission to Drop (PTD) Deadline
- Late Enrollment After the 12th Day of Instruction
- Variable Unit Course Change After the 25th Day of Instruction
- Late S/U Grading Options After the 25th Day of Instruction
- Late Pass/Not Passed Option After the 40th Day of Instruction
- Late Actions for Professional Program Students
- Retroactive Actions After the End of the Quarter

## **Section Switch After the Add/Drop Deadline**

### **Undergraduate Students**

If you are attempting to switch sections of the same course after the add/drop deadline, but on or before the last day of instruction, do not use a PTA and PTD; submit an Undergraduate Course Change ([https://local-resources.ucdavis.edu/local\\_resources/forms/D042-ug-course-change.pdf](https://local-resources.ucdavis.edu/local_resources/forms/D042-ug-course-change.pdf)) form.

1. Obtain instructor permission/signature for the course you are attempting to switch enrollment.
2. Submit the completed form to the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>).
3. A \$3.00 late schedule adjustment fee will be assessed to your account.

### **Graduate Students**

If you are attempting to switch sections of the same course after the add/drop deadline, approval from the instructor is required to add the new section. To drop the old section of the course, approval

from your program graduate advisor with signature authority and the Dean of Graduate Studies is required.

Request approval to add the course for the new section from the instructor. If permission is granted, the instructor or department will issue a PTA number.

To drop the course of the old section a graduate advisor with signature authority must endorse the Permission to Drop Petition Form (<http://gradstudies.ucdavis.edu/forms/>). Submit the petition to drop form to the Graduate Studies (<http://gradstudies.ucdavis.edu/about/directory.html>) for Dean's approval. If permission is granted, Graduate Studies will issue a PTD number.

With both valid PTA and PTD numbers, drop and add the course using Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>):

1. Select Actions for the course to be dropped.
2. Select Drop with PTD.
3. Enter the 9-digit PTD number.
4. Search using the CRN to be added.
5. Select Actions and select Register with PTA.
6. Enter the 9-digit PTA number.
7. Check and confirm enrollment
8. A \$3.00 fee for the late add will be charged to the student account.

## Late Course Add Information

### Late Add of a Course with a Permission to Add (PTA)

Adding a course after the 12th day of instruction (<https://registrar.ucdavis.edu/calendar/quarter/>), but on or before the last day of instruction (<https://registrar.ucdavis.edu/calendar/quarter/>), requires instructor approval. If permission is granted, a permission to add (PTA) number will be issued by the instructor or the department. A PTA number is valid for only 72 hours after it is issued and will be revoked after the third day. PTA numbers issued within the last three days of instruction must be used by the last day of instruction.

With a valid PTA number, add the course using Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>):

1. Search using the CRN.
2. Select Actions and select Register with PTA.
3. Enter the 9-digit PTA number.
4. Check and confirm enrollment
5. A \$3.00 fee for the late add will be charged to the student account.

**Note:** If waitlisted for a section of the course to be added, this section must be dropped before using the PTA. To drop a waitlisted course after the 10-day drop deadline, come to the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>) to drop the waitlisted course and process the PTA.

### Late Course Add After the PTA Deadline

To add a course **after the PTA deadline**, submit a Retroactive Change Petition ([https://local-resources.ucdavis.edu/local\\_resources/forms/D029-retro-change.pdf](https://local-resources.ucdavis.edu/local_resources/forms/D029-retro-change.pdf)).

## Late Course Drop Information

To drop a 10-day-drop course after the 10th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>), or a 20-day-drop course

after the 20th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>), but on or before the last day of instruction, (<https://registrar.ucdavis.edu/calendar/web/quarter/>) college dean's office approval is required.

A PTD number is valid for only 72 hours after it is issued by your college dean's office representative and will be revoked after the third day. PTD numbers issued within the last three days of instruction must be used by the last day of instruction.

**Note:** Students who register for a 10-day drop course or are moved from the waitlist into a 10-day drop course after the drop deadline have a 72-hour grace period to come to the Office of the University Registrar (<https://registrar.ucdavis.edu/about/contact/>) to drop the course. This grace period is only for students who register or are added from the waitlist into a 10-day drop course after the drop deadline.

Registered students or those rolled from a waitlist who do not show up or who do not submit any work for a class will receive a failing grade. All students are responsible for reviewing their course schedule and should check and adjust their schedule accordingly during the designated registration and schedule adjustment periods.

Schedule Builder will not allow you to drop your last class. If you are withdrawing from the University, you must file a Cancellation/Withdrawal Form (<https://registrar.ucdavis.edu/registration/leave/cancellation-withdrawal/>) with the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>).

## Undergraduate Students

College of Biological Sciences students can initiate the process to request permission to drop a course by accessing the Late Drop Petition available in OASIS (<https://students.ucdavis.edu/forms/?form=LateDropForm>). Students from the other colleges must initiate this process by first meeting with an advisor in their college dean's office. These forms must be submitted to the college dean's office and approved by 4 p.m. (PT) on the last day of instruction.

If permission is granted, the college dean's office will issue a PTD number that is viewable on the approved Late Drop Petition.

With a valid PTD number, drop the course using Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>):

1. Select Actions for the course to be dropped.
2. Select Drop with PTD.
3. Enter the 9-digit PTD number.
4. Check and confirm enrollment
5. A \$3.00 fee for the late drop will be charged to the student account.

## Graduate Students

To drop a course after the deadline 10-day or 20-day drop deadline, approval of a graduate advisor with signature authority and the Dean of Graduate Studies is required.

A graduate advisor with signature authority must endorse the Permission to Drop Petition Form (<http://gradstudies.ucdavis.edu/forms/>). Submit the form to Graduate Studies (<http://gradstudies.ucdavis.edu/about/directory.html>) for Dean's approval. If permission is granted, Graduate Studies will issue a PTD number.

With a valid PTD number, drop the course using Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>):

1. Select Actions for the course to be dropped.
2. Select Drop with PTD.
3. Enter the 9-digit PTD number.
4. Check and confirm enrollment
5. A \$3.00 fee for the late add will be charged to the student account.

## **Late Drop of a Course after the PTD deadline**

To drop a course after the PTD deadline, submit a Retroactive Change Petition (<https://registrar.ucdavis.edu/records/retroactive/>).

## **Late Enrollment After the 12th Day of Instruction**

Students without existing enrollment by the 12th day of instruction will not be able to register for courses on Schedule Builder. The Schedule Builder registration system shuts down at this time for students not enrolled in any courses for the current term.

### **Undergraduate Students**

To register in courses after the 12th day of instruction without any prior existing enrollment for the current term, submit a Current Term Readmission form ([http://local-resources.ucdavis.edu/local\\_resources/forms/D046-current-term-reactivation.pdf](http://local-resources.ucdavis.edu/local_resources/forms/D046-current-term-reactivation.pdf)) to the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>). For inquiries, contact the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>).

### **Graduate Students**

To register in courses after the 12th day of instruction without any prior existing enrollment for the current term:

1. Acquire a memo from the Graduate Program Faculty Advisor approving late registration, including:
  - a. A PTA number for one or all courses to be registered, obtained from the Graduate Program Coordinator.
  - b. Include the number of units if the course is a variable unit course.
  - c. The reason for the late registration and a statement regarding how fees will be paid (either personally or by the department).
2. Take the memo to Graduate Studies (<http://gradstudies.ucdavis.edu/about/directory.html>) for their approval. If approved, Graduate Studies will authorize the University Registrar's Office to enroll you in the course associated with the PTA. This enrollment will assess fees and reinstate your access to Schedule Builder registration for other schedule adjustments.

Please note that only Graduate Studies has the authority to allow graduate students late registration.

## **Variable Unit Course Change After the 25th Day of Instruction**

### **Undergraduate Students**

To change the unit value of a course after the 25th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>), but on or before the last day of instruction, obtain an Undergraduate Course Change ([http://local-resources.ucdavis.edu/local\\_resources/forms/D042-ug-course-change.pdf](http://local-resources.ucdavis.edu/local_resources/forms/D042-ug-course-change.pdf)) form.

1. Obtain instructor signature.
2. Submit the completed form to the Office of the University Registrar. (<https://registrar.ucdavis.edu/registration/schedule-adjustments/later-actions/>)
3. A \$3.00 late schedule adjustment fee will be assessed to your account.

### **Graduate Students**

To change the unit value of a course after the 25th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>), but on or before the last day of instruction, approval of a graduate advisor with signature authority and the dean of Graduate Studies is required.

1. A graduate advisor with signature authority must approve and endorse the Variable Unit Change Petition (<http://gradstudies.ucdavis.edu/forms/>) form.
2. Take the form to Graduate Studies (<http://gradstudies.ucdavis.edu/about/directory.html>) for the Dean's approval.
3. Submit the completed form to the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>).
4. A \$3.00 late schedule adjustment fee will be assessed to your account.

## **Late S/U Grading Options After the 25th Day of Instruction**

### **Graduate Students**

To modify the grading option of a course after the 25th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>), but on or before the last day of instruction, approval of a graduate advisor with signature authority and the Dean of Graduate Studies is required.

1. A graduate advisor with signature authority must approve and endorse the Grading Option Change Petition (<http://gradstudies.ucdavis.edu/forms/>).
2. Submit the form to Graduate Studies (<http://gradstudies.ucdavis.edu/about/directory.html>) for Dean's approval.
3. The completed form will be submitted to the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>).
4. A \$3.00 late schedule adjustment fee will be assessed to your account.

## **Late Pass/Not Passed Option After the 40th Day of Instruction**

### **Undergraduate Students**

To opt for P/NP grading of a letter-graded course after the 40th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>), but on or before the last day of instruction, you must obtain approval from the college Dean's office.

Late P/NP petitions submitted by College of Engineering (<http://engineering.ucdavis.edu/undergraduate/advising-q-a/#a7>) students after the 40th day of instruction will be denied.

1. Students must initiate this process by first meeting with an advisor in their Dean's Office.
2. Obtain permission and approval from your college Dean's Office.
3. If your form is approved, it will be forwarded to the Office of the University Registrar.

4. A \$3.00 late schedule adjustment fee will be assessed to your account.

## Late Actions for Professional Program Students

For late actions, contact your program office for assistance:

- School of Law (<https://law.ucdavis.edu/registrar/>)
- School of Medicine (<http://www.ucdmucdavis.edu/mdprogram/registrar/>)
- School of Veterinary Medicine (<https://www.vetmed.ucdavis.edu/index.php/departments/>)

## Retroactive Actions After the End of the Quarter

For information about making adjustments to your schedule after the last day of instruction, see Retroactive Actions (<https://registrar.ucdavis.edu/records/retroactive/>).

## **1 Davis Division Regulation 547**

Davis Division Regulation 547 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#547->)

### 547. Adding or Dropping a Course

(A) The deadline to drop a course is the twentieth day of instruction, except for courses that a department or program has noted in the Class Search Tool to have a ten-day drop deadline. The deadline to add a course is the twelfth day of instruction. Courses may be added or dropped at any time before these dates by any method mutually agreed upon by the Registrar and the Chair of the Davis Division of the Academic Senate. (Am. 5/27/93; Eff. 9/1/93; Am. 6/8/98; Eff. 9/1/99)

(B) At any time after the add deadline and before the close of business on the last day of instruction for the term, or, for summer sessions (excluding special session) the close of business on the last day of instruction in the fifth week of the session, approval to add a course may be granted upon petition by the student and certification by the appropriate authority. Approval of such petitions may be granted only in cases where substantial evidence indicates that the student did attempt to add the course prior to the deadline, but was prevented from doing so by clerical error or other situation beyond the student's control. The petition must be approved by the appropriate dean and, in addition, by the appropriate committee of the faculty of the student's college or school or the appropriate subcommittee of the Graduate Council. The faculty committee may authorize an administrative officer to act on its behalf, but at least once each quarter the committee should receive and review a summary of the actions taken in its name. (Am. 9/1/2013)

(C) At any time after the drop deadline and before the close of business on the last day of instruction for the term, or, for summer sessions (excluding special session) the close of business on the last day of instruction in the fifth week of the session, approval may be granted upon petition by the student and certification by an appropriate authority that, due to unexpected circumstances beyond the student's control, one or more courses should be dropped. The circumstances may include illness, serious personal problems, an accident, a death in the immediate family, a large and necessary increase in working hours, or other situations deemed to be of equal gravity. The petition must be approved by the appropriate dean and, in addition, by the appropriate committee

of the faculty of the student's college or school or the appropriate subcommittee of the Graduate Council. The faculty committee may authorize an administrative officer to act on its behalf, but at least once each quarter the committee should receive and review a summary of the actions taken in its name. An undergraduate student is permitted to drop a course subsequent to the drop deadline even if doing so would reduce that student's study list below 12 units, but such a student no longer can be certified as a full-time student. (Am. 9/1/2013)

(D) To drop a course or withdraw from the University after close of business on the last day of instruction for the term, or, for summer sessions (excluding special session) the close of business on the last day of instruction in the fifth week of the session, the student or an appropriate faculty member must submit a petition to the Davis Division Grade Changes Committee or, for professional faculty or students in professional courses in their own professional schools, to the grade change committee of that school. Approval will be granted only in the most unusual circumstances and only in those cases where it is clear that by not approving the petition the student would be treated unfairly. (Am. 9/1/2013)

## Register for Classes

Related: Registration Tips (<https://registrar.ucdavis.edu/registration/register-for-classes/>) | Registration Pass Times (<https://catalog.ucdavis.edu/academic-information-policies-regulations/registration-course-load/registration-pass-times/>) | Schedule Builder (<https://registrar.ucdavis.edu/registration/register-for-classes/schedule-builder/>) | Adding & Dropping Courses (<https://catalog.ucdavis.edu/academic-information-policies-regulations/registration-course-load/adding-dropping-courses/>) | Reserved Seat Registration (<https://registrar.ucdavis.edu/registration/register-for-classes/reserved-seat/>) | Course Changes (<https://registrar.ucdavis.edu/registration/register-for-classes/course-changes/>) | Part-Time Status (<https://registrar.ucdavis.edu/registration/part-time/>) | Waitlists (<https://registrar.ucdavis.edu/registration/register-for-classes/wait-lists/>)

## Preparing to Register

Using Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>), you can:

- Search for classes, and view class details and critical class messages.
- Check for registration holds and errors.
- Create and save multiple schedules with varying classes and sections for the same quarter.
- View your schedule in both list and calendar formats.
- Register for a full schedule (all classes) or one class at a time.
- Swap (add & drop) classes and sections in one action.

If you have selected a variable-unit course or course requiring the consent of the instructor for enrollment, you will see the @ symbol instead of the CRN in Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>) and the Class Search Tool (<https://registrar-apps.ucdavis.edu/courses/search/>). Obtain the CRN from the department offering the course, and then enroll using Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>).

Students without existing enrollment by the 10th day of instruction (<https://registrar.ucdavis.edu/calendar/quarter/>) will not be able to register for courses; see Late Schedule Adjustments (<https://>

[catalog.ucdavis.edu/academic-information-policies-regulations/registration-course-load/register-for-classes/](https://catalog.ucdavis.edu/academic-information-policies-regulations/registration-course-load/register-for-classes/).

## Registration Pass Times

Content on this page is updated throughout the academic year.

### Undergraduate Students

Registration takes place during two intervals called "Pass One" and "Pass Two." Each registration appointment pass time is a four-hour window. Undergraduate students are assigned a registration appointment time during each of the two pass times. Registration pass time appointments for each term are viewable in Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>) at least one week before the start of Pass One. You may view these dates on the Registration Calendar. (<https://registrar.ucdavis.edu/calendar/registration/>)

If you don't have any registration pass times, there are a variety of reasons this could be. Most often, students need to be reactivated after cancelling their graduation application or if they have been previously inactive, on PELP leave, etc. If you do not have a pass time and are attempting to register for courses, contact the Office of the University Registrar (<https://registrar.ucdavis.edu/about/contact/>).

Registration pass times are assigned based on earned credits. The earned credits considered are completed and graded courses, articulated transfer work, and up to 13 AP/IB units. For earned credit hours to be factored into your pass time, they must be processed before pass times are assigned. Students with more earned credit hours will be assigned an earlier pass time than a student who has less. For example, students with senior standing will register before freshman as they have more earned credit hours.

Some students may qualify for priority registration such as students with disabilities, TRIO scholars, foster youth, etc.

Pass times are not reassigned except for students with disabilities. Students who need to register outside of their pass time may do so after it has occurred during Open Hours, during Pass Two, or during Schedule Adjustment.

Pass Times are available to view on your Schedule Builder (<https://registrar.ucdavis.edu/registration/register-for-classes/schedule-builder/>) registration tool through the *myucdavis* portal.

Registration Periods	Pass One	Pass Two	Schedule Adjustment
<b>Max Enrollment *</b> 17 units		19 units (total)	28.5 units (total)

\* Max Enrollment units include registered and wait-listed courses.

Registration Periods	Pass One 4-hour window	Pass One Open Hours	Pass Two 4-hour window	Pass Two Open Hours	Open Hours
<b>Time</b>	Weekdays	Weekdays	Weekdays	Weekdays	Weekdays
<b>Periods</b>	6:00 a.m.– 8:00 p.m.– 7:00 p.m.	8:00 p.m.– 6:00 a.m.– midnight;	6:00 a.m.– 8:00 p.m.– 7:00 p.m.	8:00 p.m.– 6:00 a.m.– midnight;	6:00 a.m.– 8:00 p.m.– midnight;
<b>(PT)</b>		Weekends 10:00 a.m.–6:00 p.m.	Weekends 10:00 a.m.–6:00 p.m.	Weekends 10:00 a.m.–6:00 p.m.	Weekends 10:00 a.m.–6:00 p.m.

### Graduate Students

Graduate students do not have assigned appointment times and may enroll in classes anytime Monday–Friday 6:00 a.m.–midnight and Saturday & Sunday 10:00 a.m.–6:00 p.m. Graduate students can register up to 25 units during Pass One and Pass Two. After Schedule Adjustment, the unit max increases to 28.5 units.

Graduate students may not enroll in more than 16 units of upper division and graduate level courses combined, or in more than 12 units of graduate level coursework, without the approval of the Associate Dean of Students in Graduate Studies.

### Academic Credit

Related: Unit Requirements & Limitations (p. 60) | Credit by Examination (<https://registrar.ucdavis.edu/records/credit-exam/>) | Summer Sessions (<https://summer-sessions.ucdavis.edu/>)

### AP & IB Examination Credit

The University of California (<https://admission.universityofcalifornia.edu/admission-requirements/ap-exam-credits/>) awards credit for successful completion of the College Board (p. 25)Advanced Placement (AP) and the International Baccalaureate Higher Level Examinations (IB) (p. 26). Students must have official test score reports sent directly from the testing service to UC Davis (<https://www.ucdavis.edu/admissions/undergraduate/transcripts-test-scores/>) to receive credit. Students meet with advising staff during Aggie Orientation (<https://orientation.ucdavis.edu/>) to discuss which courses or requirements they may have satisfied based on transfer credit for scores in these examinations.

### Special Programs

There are a variety of special programs that allow admitted UC Davis students to take courses at other UCs, through the University of California Center Sacramento (UCCS) program, in Washington DC, or abroad, and California Community College (CCC) or California State University (CSU) students to attend UC Davis as non-degree-seeking students. Each program has its own requirements and application process.

Intercampus Visiting Programs (<https://registrar.ucdavis.edu/registration/special-programs/icv/>) | Intersegmental Cross Enrollment: Visiting California State University & California Community College Students (<https://registrar.ucdavis.edu/registration/special-programs/>) | Study Abroad (<https://studyabroad.ucdavis.edu/>) | University of California Center Sacramento (UCCS) (<https://uccs.ucdavis.edu/>) | UC (<https://washingtonprogram.ucdavis.edu/>)Washington DC Program (UCDC) (<https://washingtonprogram.ucdavis.edu/>)

### Simultaneous Enrollment at a Non-University of California

Per Davis Division Regulation A553 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A553-1>), a student may not obtain transfer credit for courses taken at a non-University of California campus in a term during which the student is registered as a full-time student at UC Davis. **A variance can be obtained only by petitioning the Dean of your College prior to enrollment.** When a

variance is granted, units earned are counted toward minimum progress for the term in which the dual registration occurs.

To petition for a variance, submit a Simultaneous Enrollment at Another University (<https://students.ucdavis.edu/forms/?form=SimultaneousEnrollment>) webform to your college.

Summer session courses are exempt from this regulation. Current students may transfer credit for courses taken during the summer at other institutions, provided the courses parallel those given in the University of California. Assurance that such credit will be accepted, however, can be given only after the courses have been completed. Students must arrange to have the transfer transcript of completed grades sent to Undergraduate Admissions (<https://www.ucdavis.edu/admissions/undergraduate/transcripts-test-scores/>) for evaluation.

## **1 Davis Division Regulation A553**

Davis Division Regulation A553 ([https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A553-\)](https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A553-)

(A) Students are prohibited from obtaining transfer credit for courses taken at a non-University of California campus in a quarter during which the student is enrolled as a full-time student at Davis. Variances to this Regulation may only be obtained via petition to the appropriate college committee or administrative officer prior to enrollment.

(B) In those instances in which a variance has been granted, units earned from courses taken at a non-University of California campus shall be counted toward minimum progress in the quarter(s) in which the dual enrollment occurred.

(C) Summer session course work is exempt from the restrictions described in Paragraph (A). (En. 4/25/83)

(D) Course work taken in intersession terms that do not overlap with UC Davis instructional dates are exempt from the restrictions described in Paragraph (A). (En. 9/1/2022)

## **Advanced Placement (AP) Credit & Chart**

*Content on this page is updated throughout the academic year.*

Students who earn scores of 3, 4, or 5 on College Board Advanced Placement (AP) Examinations taken before high school graduation will receive 2, 4, or 8 units of credit toward graduation at UC Davis for each such test completed with the required scores, provided official scores are submitted to the Office of Admissions.

Students should be advised that college courses taken before or after attending UC may duplicate AP, International Baccalaureate (IB) and/or A Level (GCE) examinations. Additionally, exams may duplicate each other; for example, an AP or IB exam in the same subject area. If the student does duplicate an exam with another exam of the same subject content, and/or an exam with a college course, we will award credit only once.

Note: Advanced Placement credit earned prior to entering the university will not be counted toward maximum unit limitations either for the selection of a major or for graduation.

AP Exam with Score of 3 or 4 or 5	Units Awarded	UC Davis Course Equivalent	Duplicate Credit Allowed
2-D Art & Design <sup>1</sup>	8	None	N/A
3-D Art & Design <sup>1</sup>	8	None	N/A
Art History	8	None	N/A
African American Studies	4	AAS 010	Yes
Biology	8	BIS 010	No
Calculus AB (or AB subscore of BC exam) <sup>2</sup>			
With score of 3	4	None	N/A

## International Baccalaureate (IB) Credit & Chart

*Content on this page is updated throughout the academic year.*

Students who earn scores of 5, 6, or 7 on International Baccalaureate (IB) Higher Level (HL) Examinations taken before high school graduation will receive 8 units of credit toward graduation at UC Davis for each such test completed with the required scores, provided official scores are submitted to the Office of Admissions. Students who complete the IB diploma with a score of 30 or above will receive 6 quarter units in addition to the units earned for individual Higher Level exams (effective S20). The university does not grant credit for Standard Level (SL) exams.

Students should be advised that college courses taken before or after attending UC may duplicate Advanced Placement (AP), IB and/or A Level examinations. Additionally, exams may duplicate each other; for example, an AP or IB exam in the same subject area. If the student does duplicate an exam with another exam of the same subject content, and/or an exam with a college course, we will award credit only once.

Note: International Baccalaureate credit earned prior to entering the university will not be counted toward maximum unit limitations either for the selection of a major or for graduation.

Note: This is not a comprehensive list. If your exam is not listed, credit will be determined in consultation with an advisor.

IB Higher Level (HL) Exam with score of 5 Awarded or 6 or 7	Units Awarded	UC Davis Course Equivalent	Duplicate Credit Allowed
Biology	8	BIS 010	No
Business Management	8	None	N/A
Chemistry			
With score of 5 or 6	8	CHE 010	No

Visual Arts	8	None	N/A
IB Diploma (30+ points)	6	None	N/A

<sup>1</sup>

6 or higher on the Standard Level (SL) exam satisfies the university Entry Level Writing Requirement, but does not result in any course credit.

Students who complete the IB diploma with a score of 30+ will receive 6 quarter units towards their UC degree, in addition to the units earned for individual Higher Level exams (effective S20).

The university does not grant credit for Standard Level (SL) exams.

**To have IB scores sent to UC Davis,** contact International Baccalaureate Office at US +1 301 202 3025; More contact options; Requesting IB transcripts & certificates.

## Academic Standing

The following provisions apply to all *Undergraduate students*. *Graduate & Professional students* with scholarship deficiencies are subject to action at the discretion of their respective deans.

For undergraduate students, the University of California Academic Senate Scholarship Regulations UCSR 900 (<https://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart4.html#rpart4-l>)<sup>1</sup> govern the scholastic status, also known as *Academic Standing*. Davis Division Regulation A552 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A552->)<sup>2</sup> specifies the minimum standards of progress requirement, and Davis Division Regulation A540(C) (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A540->)<sup>3</sup> specifies the use of the grade *Incomplete* in the determination of an undergraduate student's scholastic status.

Students should contact the dean's office of their college if they need academic advising regarding academic standing, notice, or dismissal

(<https://registrar.ucdavis.edu/registration/leave/administrative-withdrawals/>).

In the case of academic notice or subject to disqualification, the official transcript will state that the student is not in good academic standing. Once a student has met the standards of scholarship, or has satisfied all requirements for graduation, the notation will be removed from the transcript.

## Part-Time Status

Quarters during a period for which a student was officially approved for Part-Time Status (<https://registrar.ucdavis.edu/registration/part-time/>) are omitted from the degree progress calculation.

## Minimum Progress Waiver

Students with a documented disability may be eligible for a minimum progress waiver. Students apply for such a waiver through the Student Disability Center (SDC) (<http://sdc.ucdavis.edu/>). Approval of the waiver omits the specified term(s) from the degree progress calculation.

## **<sup>1</sup> University of California Academic Senate Scholarship Regulations; UCSR 900**

University of California Academic Senate Scholarship Regulations (UCSR 900) (<https://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart4.html#rpart4-l>)

## Part IV. Scholarship Regulations

### Title I. Undergraduate Regulations

#### • 900.

- A. The following minimum provisions or their equivalents, as ratified by the Assembly, govern the scholastic status of undergraduate students as indicated in strictly internal University records [see Regulations 782 (<https://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart3.html#r782>) and 902 (<https://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart4.html#r902>)]: (Am 24 May 00)
  - i. Academic Notice. An undergraduate student is normally subject to academic notice (a) if at the end of any term the student's grade-point average for that term, or the student's cumulative grade-point average, is less than 2.0 (C average) computed on the total of all courses undertaken in the University (however, see paragraph (E) below); or (b) by other provisions approved by the Assembly. (Am 21 June 24)
  - ii. Academic Disqualification. An undergraduate student is subject to disqualification for further registration in the University (a) if at the end of any term the student's grade-point average for that term is less than 1.5 (however, see paragraph (E) below), or (b) if the student has completed two consecutive terms on academic notice without achieving a cumulative grade-point average of 2.0 as provided above. (Am 21 June 24)
- B. Each Division of the Academic Senate, or each School or College within a Division, may establish minimum standards of progress towards completion of the baccalaureate degree, but only on the basis of academic regulations adopted by the Division.
  - i. Such regulations may not require a student to complete more than an average of 15 units of academic credit for each quarter or semester of enrollment.

- ii. The scholastic status, with respect to academic notice or disqualification, of a student who has failed to meet such minimum standards of progress shall be as stipulated in the academic regulations of the Division. (Am 21 June 24)
- C. i. An undergraduate student on academic notice or subject thereto is under such supervision as the Faculty of that student's college or school may determine. Continued registration of an undergraduate student subject to academic disqualification is at the discretion of the Faculty concerned, or its authorized agent, and is subject to such conditions as that Faculty may impose. (Am 21 June 24)
  - ii. Undergraduate students in particular schools or colleges may be subject to more stringent norms with respect to academic notice or disqualification, but only on the basis of regulations adopted by a Division of the Senate and approved by the Assembly of the Senate. (Am 21 June 24)
- D. To transfer from one campus of the University to another, or from one college or school to another on the same campus, a student who has been academically disqualified or is on academic notice must obtain the approval of the Faculty, or its designated agent, to whose jurisdiction transfer is sought. Upon completion of the transfer the student is subject to the supervision specified in paragraph (C). (Am 21 June 24)
- E. Each Division may enact legislation governing the use of the grade Incomplete in the determination of a student's scholastic status.
- F. Divisional variances from this regulation must be approved by the Assembly. (Am 16 Mar 71)

## **2 UC Davis Division Academic Senate Regulation A552; Expected & Minimum Progress**

Davis Division Regulation A552 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A552->)

(A) *Expected Progress Defined.* A full-time regular undergraduate student (see Davis Division Regulation C561 for definition of a part-time student) shall be considered to make expected progress with an average of 15 units passed per quarter. (Am. 05/04/05)

(B) *Minimum Progress Defined.* A full-time, regular undergraduate student (see Davis Division Regulation C561 for definition of a part-time student) shall be required to maintain an average of at least 12 units passed per quarter over all quarters of enrollment. Minimum progress shall be defined as an average of 12 units passed per quarter calculated at the end of every quarter. The average shall be calculated based on the number of quarters in which the student was enrolled full-time during that period. (En. 6/7/83; Am. 11/30/83; Am 6/8/99; Eff. 9/1/2000; Am 05/04/05) (Am. 9/1/2018)

### **(1) Units Passed.**

(a) For the purposes of calculating minimum progress, remedial non-credit courses shall be evaluated according to the "Carnegie Unit" rule and counted as units passed, subject to prior approval of such courses for this purpose by the Davis Division Committee on Courses of Instruction. The unit values associated with such courses shall not be applied toward the satisfaction of any baccalaureate degree requirement. (Am. 2/9/77; Am. 05/04/05)

- (b) If a student repeats a course under the provisions of DDR A540F and receives a passing grade in the repeated course, then the repeated course shall be counted as units passed. Not more than 16 units can be accrued in this way. (Am. 05/04/05) (Am. 9/1/2018, 9/1/2019)
- (c) Units passed at another accredited school and transferred to UCD, or passed during a summer session at UCD shall be counted as units passed during the first full-time quarter of enrollment at UCD immediately following completion of the units. (Am.05/04/05) (Am. 9/1/2018)
- (d) Units passed by examination in accordance with policies established by the Davis Division Committee on Courses of Instruction (see SR 620 and DDR 528) shall be counted as units passed during the term in which the examination was taken. (Am. 05/04/05)
- (e) Units graded as IP (in progress) shall be counted as units passed. (Am. 05/04/05)
- (f) Units graded I are not counted as units passed. When the grade I is replaced by a passing grade, the units shall be counted toward minimum progress for the quarter in which the I grade was awarded. (Am. 6/7/83; En. 11/30/83;Am. 05/04/05)
- (g) For a student who receives approval for concurrent enrollment at another college or university (approval process specified in Davis Division Regulation A553), the units transferred to the student's UCD record will be counted toward their minimum progress requirement. (En. 9/1/2018)

### **(C) Failure to Make Minimum Progress. (Renum. 6/8/87)**

(1) In accordance with the provisions of Davis Division Regulation A552(B), at the end of every quarter it shall be determined if each student enrolled full-time for that quarter has met the minimum progress requirement of an average of 12 units passed per quarter. For this determination, a "degree progress average" shall be calculated for each student. The degree progress average is defined as the quotient of the number of units passed during full-time quarters from the initial quarter of matriculation at UCD divided by the number of full-time quarters completed at UCD. (Am. 05/04/05) (Am. 9/1/2018)

(2) A student whose degree progress average is less than 12 shall be placed on "academic notice on the basis of inadequate progress" for the following quarter. An undergraduate student is in scholastic good standing if not on academic notice or subject to disqualification either on the basis of GPA, as defined in Senate Regulation 900(A), or on the basis of inadequate progress, as defined herein. (Am. 05/04/05) (Am. 9/1/2018)

(3) A student who has been on academic notice on the basis of inadequate progress for three consecutive quarters, and whose degree progress average remains below 12 at the end of the third quarter of academic notice, shall be "disqualified from the university on the basis of inadequate progress." That action shall be taken by the college faculty (or its authorized agent) and is subject to such conditions as the faculty may impose. Exceptions to disqualification on the basis of inadequate progress may be granted by the college faculty (or its authorized agent) in appropriate

circumstances under policies adopted by the college faculty. (Am. 05/04/05) (Am. 9/1/2018, 9/1/2019)

(4) An undergraduate student in scholastic good standing on the basis of GPA as defined in Senate Regulation 900(A) but who is on academic notice on the basis of inadequate progress as defined herein, may continue to opt to take courses on a Pass or Not Passed basis in line with Davis Division Regulation A545(A). (Am. 05/04/05) (Am. 9/1/2018, 9/1/2019)

(5) Colleges shall report the numbers of students disqualified on the basis of inadequate progress and the number of exceptions and reasons for those exceptions to the Undergraduate Council on an annual basis in the fall quarter. (Am. 05/04/05) (Am. 9/1/2018, 9/1/2019)

(6) A notation on a full-time student's transcript that the student has not made minimum progress or is on academic notice on the basis of inadequate progress shall be removed when the student has satisfied all other requirements for graduation. (Am. 05/04/05) (Am. 9/1/2018, 9/1/2019)

Except when a student has been disqualified from the university, all notations regarding failure to comply with the minimum progress requirement shall be redacted when copies of a student's transcript are prepared for outside persons or agencies, such as professional or graduate schools. (Am. 05/04/05)

*(D) Accommodations for Students with Documented Disabilities* (Am. 4/14/2008)

(1) Students with a documented disability seeking an accommodation to the minimum progress requirement shall provide their Dean's office with a letter from the campus Student Disability Center (SDC) containing a recommendation for either a transfer to part-time status or a waiver of the minimum progress requirement for full-time students (for a specific period not to exceed one year). It is the student's responsibility to request accommodations as soon as possible, and this notification must be made within a period of time which allows the university a reasonable opportunity to evaluate the request and offer necessary adjustments. The accommodation is subject to extension and modification, and it is the student's responsibility to submit subsequent requests as the need arises. (Am. 4/14/2008, 9/1/2018, 9/1/2019)

(2) The faculty of a college (or its authorized agent) may authorize either a transfer to part-time status (as described in Davis Division Regulations C560-C562) or a waiver of the minimum progress requirement for specific quarters (not to extend to quarters beyond those recommended by the SDC) for a student for whom the SDC has determined that an accommodation is required. In either case the units earned and the quarters attended during the period of the accommodation shall not be used in determining whether a student has satisfied the minimum progress requirement. No accommodation shall alter the nature of the academic demands made of the student nor decrease the standards and types of academic performance. (Am. 4/14/2008, 9/1/2018)

(3) If the faculty (or its authorized agent) and the SDC cannot arrive at a mutually agreeable accommodation, the matter shall be resolved by a committee convened the Vice Chancellor - Student Affairs that includes a representative from the SDC and the

authorized agent of the faculty of the college (or, in the absence of such agent, the chair of the faculty). (Am. 4/14/2008)

### **<sup>3</sup> UC Davis Division Academic Senate Regulation A540(C); Incomplete Grading**

Davis Division Regulation A540C (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A540->)

Except as provided otherwise in Davis Division Regulations A545 and A548, and in Regulation 70 of the Faculty of the School of Medicine, the following provisions apply to the grading of the work of all students subject to Davis Division Regulations.

(C) The grade Incomplete shall be assigned only when the student's completed work (judged by itself and not in relation to the work required to pass the course as a whole) is of passing quality and represents a significant portion of the requirements for a final grade, but is incomplete for good cause as determined by the instructor. "Good cause" may include illness, serious personal problems, an accident, a death in the immediate family, a large and necessary increase in working hours, or other situations deemed to be of equal gravity. The student is entitled to replace this grade by a passing grade and to receive appropriate grade points and unit credit provided the student satisfactorily completes the work of the course in a way specified by the instructor before the end of the third succeeding term of the student's academic residence as defined in Regulation 610. If a degree is conferred upon the student before the expiration of the time limit for conversion, the time limit for conversion for the graduated student shall be the end of the third regular term succeeding the term in which the Incomplete grade was assigned. If the time limit for conversion expires before a degree is conferred upon the student and the Incomplete grade has not been replaced, the grade shall revert to an F, a Not Passed, or an Unsatisfactory, depending on the grading system in effect in the particular instance. If the time limit expires after a degree has been conferred and the Incomplete grade has not been replaced, the Incomplete grade shall remain on the student's record. If the degree has not been conferred, and the work has not been completed before the end of the term three calendar years after the grade Incomplete has been assigned, and during which the student has not been in academic residence as defined in Regulation 610, the grade Incomplete shall remain on the student's record, unless the course is repeated. This time-limit for the completion of courses assigned the grade Incomplete shall apply to all and only those courses in which the grade Incomplete is assigned on or after September 1, 2010. (En. 1/20/75, Am. 5/29/75, effective Fall 1975; Am. 10/25/76, effective Winter 1977; Am. 6/4/79, Am. 11/28/79, effective Fall 1980; Am. 6/3/80, Am. 12/3/80; Am. 4/25/83; Am. 11/30/83) (Am. 9/1/2010, 2/24/2011, 9/1/2013)

In calculating an undergraduate student's grade point average, grade points and units for courses graded Incomplete shall not be counted except that, in ascertaining compliance with the 2.000 minimum grade point average required for the receipt of a bachelor's degree, all incomplete units attempted for a letter grade shall be counted and assigned a grade point value of zero. Any undergraduate student who accumulates more than 16 units of Incomplete for which final grades have not been assigned shall be subject to academic notice or disqualification. (Am. 1/27/81) (Am. 9/1/2010)

In calculating a graduate student's grade point average, grade points and units for courses graded Incomplete shall not be counted except that, in ascertaining compliance with the minimum

grade point average required for receipt of a degree, all incomplete units attempted for a letter grade shall not be counted and assigned a grade point value of zero. Any graduate student who accumulates more than 8 units of Incomplete for which final grades have not been assigned shall be subject to academic notice. (Am. 10/25/76, effective Winter 1977; Am. 1/27/81)

## Examinations

*Content on this page is updated throughout the academic year.*

### Final Examinations

You can view your final exam schedule for the term on Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>).

The times shown in Final Examination Schedule, below, indicate regular quarterly meeting times of the lecture. The Final Exam Period Groupings table indicates which exam period grouping to observe for all classes based on its meeting pattern.

Examinations are held in the same room used for class meetings during the quarter unless there is a room conflict. In these cases, a room will be assigned by the Office of the University Registrar and announced to the class, prior to the examination time, by the instructor.

Classes that do not fit into any combination of meeting times as noted are known as to-be-announced (TBA) finals. The time, date, and place of examinations of these classes are arranged by the Office of the University Registrar. Instructors will notify their students of the time, date and location.

Final Exams for Elementary/Intermediate Foreign Languages; WLD 057E, P,S (College Writing—SCC P,S), and University Writing Program 07M, 021–022; WLD 055M (Algebra Review—SCC 170M); WLD 041C (Preparatory Chem—SCC 110C); CHE 002ABC; and PHY 007ABC are in "special groups" as noted in the Final Examination Chart below.

Students wishing to adjust their final exam schedule because of multiple exams on the same day must make arrangements with the instructors of the courses. Students are responsible for ensuring they do not have conflicting exams. There is no regulation mandating a change.

Information and final examination policies are located in Davis Division Regulation 538 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#538-1>).

**Accommodation for Disabilities.** In accordance with current law, students with documented disabilities may be entitled to in-class accommodations. For more information, see Student Disability Center (<https://sdc.ucdavis.edu/faculty-and-staff/help-providing-accommodations/>).

**Religious Observances.** UC Davis seeks to accommodate any student who, in observance of their religious creed, encounters an unavoidable conflict with a test or examination schedule. The student is responsible for providing written notification of a potential conflict to the individual responsible for administering the examination and requesting accommodation. Instructors will consider such requests on a case-by-case basis and determine whether the conflict can be resolved without imposing undue hardship on the instructor or the other students in the class. If so, the instructor will determine, in consultation with the student, a time the student can take the test or examination without incurring a penalty or violating the student's religious creed. For more

details, see the UC Davis Policy, Chapter 210, Section 50 (<https://ucdavispolicy.ellucid.com/documents/view/91/111/>)<sup>2</sup>.

### Midterm Examinations

Information and policies regarding midterm Exams are located in Davis Division Regulation 538 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#538-1>).

### Final Exam Period Groupings

Classes that meet one day a week are incorporated into the Final Examination Schedule.

Day codes: M = Monday; T = Tuesday; W = Wednesday; R = Thursday; F = Friday; S = Saturday; U = Sunday

Observe Exam Group MWF

Day(s) Class Meets: M; W; F; MW; MF; WF; MWF; MTW; MTWF; MTF; MWR; MWRF; MRF; MTWRF; TWF; WRF

Observe Exam Group TR

Day(s) Class Meets: T; R; TR; MTR; MTWR; MTRF; TWR; TWRF; TR

### Final Examination Schedule—Spring 2025

Class Day	Class Time	Final Date & Exam Time
MWF	7:30 or 8:00 a.m.	Mon, Jun 9— 10:30 a.m.-12:30 p.m.
MWF	8:30 or 9:00 a.m.	Fri, Jun 6—3:30 p.m.-5:30 p.m.
MWF	9:30 or 10:00 a.m.	Wed, Jun 11— 10:30 a.m.-12:30 p.m.
MWF	10:30 or 11:00 a.m.	Wed, Jun 11—8:00 a.m.-10:00 a.m.

## 1 Davis Division Regulations 538; Examinations

Davis Division Regulations 538; Examinations (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#538->)

(A) Except under certain specified circumstances, Senate Regulation (SR) 772 requires that final examinations be given in all undergraduate courses. Final examinations may be given in graduate courses. (Am. 4/26/82)

(B) At the instructor's option, a final examination may be wholly or in part of the take-home type. In accordance with SR 772(A), in undergraduate courses, the writing time of a take-home final examination and an in-class final examination together may not exceed three hours. (Am. 5/4/04) (Am. 9/1/2017)

(C) In each course for which a final examination is required, each student shall have the right to take a final examination (or, when the instructor has so opted, to submit a take-home examination) at the time and on the date published in the Class Search Tool. For on-line courses, the University Registrar will offer to the instructor of each on-line class the option to have the final in any of the TBA slots. Additional options for administration of final exams in on-line courses include the use of testing centers, on-line proctoring services, and take-home examinations. Students shall be notified of the time and place of the final on or before the first day of instruction. (Am. 5/4/04) (Am. 9/1/2015, 9/1/2017)

(D) In each course for which a midterm examination is required, each student shall have the right to take a midterm examination (or, when the instructor has so opted, to submit a take-home examination) during one of the scheduled meetings of the class published in the Class Search Tool. (Am. 4/26/82; 5/4/04) (Am. 9/1/2017)

(E) Holding a final or midterm examination (or setting a deadline for submission of a take-home examination) at a time not specified in (C) or (D) requires the mutual consent of the instructor and all students involved in the change. Any student who does not consent in writing to the different time must be permitted to take an examination (and/or submit a take-home examination) at the officially scheduled time. A student who consents in writing to the change of examination time waives the right cited in (C) or (D). (Am. 3/13/95 and effective 9/1/95; 5/4/04) (Am. 9/1/2017)

(F) Any departures from the published examination schedule should be carried out so as not to disadvantage students who are unable to accept the alternative examination schedule. An in-class final examination may not be rescheduled for a date earlier than the first day of final week. The due date for a take-home final examination may not be rescheduled for a date earlier than the first day of finals week. In the case of on-line courses, the published examination schedule is that announced no later than the first day of class in accordance with 538(C). (Am. 10/26/87 and effective 9/1/88) (Am. 3/13/95 and effective 9/1/95; 5/4/04) (Am. 9/1/2017)

(G) A student who is improperly denied the right cited in (C) or (D) may file a petition with the Executive Council by the end of the next regular term, for appropriate action.

(H) In accordance with current law, students with documented disabilities may be entitled to in-class accommodations. The student shall provide a letter from the campus Student Disability Center (SDC) with a recommendation for those academic accommodations that the instructor is responsible for providing. It is the student's responsibility to request accommodations as soon as possible; this notification must be made within a period of time which allows the university a reasonable opportunity to evaluate the request and offer necessary adjustments. The instructor has a legal obligation to provide recommended academic accommodations, unless the instructor can demonstrate that the accommodations will fundamentally alter the nature of the academic demands made of the student, or decrease the standards and types of academic performance. It is the responsibility of the University to provide recommended physical accommodations. No accommodation shall require facilities or personnel that can be demonstrated to result in undue

financial and administrative burdens to the University. The instructor should consult with the student and the SDC if there are any questions or concerns. If the instructor and the SDC cannot arrive at a mutually agreeable accommodation, the matter shall be resolved by a committee convened by the Vice Chancellor - Student Affairs that includes the instructor, the department chair, and a representative from the SDC. (En. 6/8/87; Am 11/25/96; Am 4/14/08) (Am. 6/8/2012)

(I) An instructor may release to individual students their original final examinations (or copies thereof) at any time. Otherwise the instructor shall retain final examination materials, or a copy thereof, until the end of the next regular term, during which period students shall have access to their examinations. (En. 5/25/77; Renum. 6/8/87)

## **2 UC Davis Policy, Chapter 210, Section 50; Religious Accommodation**

UC Davis Policy, Chapter 210, Section 50 (<https://ucdavispolicy.ellucid.com/documents/view/91/111/>)

### **I. Purpose**

This section provides the requirements and procedures needed to comply with the California Education Code 92640, Accommodation of Religious Creed for granting schedule changes for examinations to students requesting accommodation for religious creed.

### **II. Policy**

- A. The University accommodates requests for alternate examination dates, without penalty, at a time when the activity would not violate a student's religious creed.
- B. Instructors must accommodate students' requests for alternate examination dates for religious creed when accommodation does not impose an undue hardship that cannot reasonably be avoided.

### **III. Roles and Responsibilities**

#### *A. Students*

1. Request, in writing, the rescheduling of an examination as soon as possible after learning of the conflict. Requests should generally be made no later than two weeks after the start of the term.
2. Work in good faith directly with the instructor to find a mutually agreeable resolution to the scheduling conflict.

#### *B. Instructors*

1. Attempt to schedule examinations to avoid conflicts with religious creed (see <https://diversity.ucdavis.edu/multicultural-calendar> (<https://diversity.ucdavis.edu/multicultural-calendar/>)).
2. Should provide a syllabus for the course that specifies exam dates.
3. Consider all requests for the rescheduling of examinations for religious creed.
4. Work in good faith directly with the student to find a mutually agreeable resolution to the scheduling conflict.
5. If a resolution cannot be found, document the reason for rejecting any request, describing the nature of the undue hardship the request would impose and the reason the hardship cannot be avoided.

#### *C. Department heads*

1. Ensure all instructors are aware of their responsibilities to accommodate students based on their religious creed.
2. Provide appropriate support or resources (e.g., alternative test locations, proctors) to accommodate requests.

#### *D. Deans provide support to departments in providing accommodations to students.*

#### IV. Further Information

A. Additional information is available from Student Affairs and Campus Diversity (<http://studentaffairs.ucdavis.edu/campus-diversity/diversity-inclusion/>), 530-752-2416.

B. Complaints regarding the violation of this policy can be submitted to the Harassment and Discrimination Assistance and Prevention Program, <http://hdapp.ucdavis.edu>.

#### V. References and Related Policies

A. California Education Code 92640, Accommodation of Religious Creed ([https://leginfo.legislature.ca.gov/faces/codes\\_displayText.xhtml?lawCode=EDC&division=9.&title=3.&part=57.&chapter=6.&article=5.](https://leginfo.legislature.ca.gov/faces/codes_displayText.xhtml?lawCode=EDC&division=9.&title=3.&part=57.&chapter=6.&article=5.)).

## General Appeal

### General Appeal

A Petition for General Appeal may only be submitted for processes or deadlines governed by the Office of the University Registrar; e.g., registration and enrollment status deadlines, fee refunds for Cancellation/Withdrawal, PELP, etc.

Readmission and admission decisions are not governed by the Office of the University Registrar. Any student who has missed the **Readmission deadline** will need to contact their college advisor directly rather than completing a General Appeal form. Additionally, those wishing to submit an appeal regarding their **admission decision** must appeal in MyAdmissions (<https://myadmissions.ucdavis.edu/applicants/>) directly.

When reviewing appeals, the General Appeal Committee looks at the student's entire record and any documentation that has been provided as support regarding why the student has missed a particular deadline. As such, there is the expectation that when submitting an appeal the student has a substantive and supported reason for the appeal; e.g., medical or family emergency, administrative error, or other extenuating circumstance. **Appeals submitted without appropriate merit or supporting documentation will be denied.**

Submit questions online regarding the General Appeal process at [registrar@ucdavis.edu](mailto:registrar@ucdavis.edu).

### Submit a General Appeal

**Online:** using your Kerberos ID and passphrase, complete the General Appeal webform (<https://registrar-apps.ucdavis.edu/forms/secure/Form.cfm?Form=GA>).

If you do not have an active UC Davis computing services account, complete the paper form ([http://local-resources.ucdavis.edu/local\\_resources/forms/D006-general-appeal.pdf](http://local-resources.ucdavis.edu/local_resources/forms/D006-general-appeal.pdf)) and submit it to the Office of the University Registrar.

## Grades & Grading

Grades are generally available approximately ten days following the end of a term (<https://registrar.ucdavis.edu/calendar/quarter/>) or term (<https://registrar.ucdavis.edu/calendar/quarter/>). Students may check their grades using myucdavis under the Academics tab in Student Records

([https://my.ucdavis.edu/student\\_records/](https://my.ucdavis.edu/student_records/)). The accuracy of students' academic records is the responsibility of the Office of the University Registrar, and procedures are structured to ensure academic records are complete. If students experience any difficulties with final grades posted to their official university record, they should contact their instructor first, and then the department offering the course, (<https://registrarnew.sf.ucdavis.edu/contact/>) to review the situation.

## Letter Grades

### Letter Grades & Definitions

Grades A-D may be modified by a plus (+) or minus (-).

- A 4.00—Excellent
- B 3.00—Good
- C 2.00—Fair
- D 1.00—Barely passing
- F 0.00—Not passing (work so poor that it must be repeated to receive recognition)

### Grade Points

Grade points are assigned for each letter grade.

### Grade Point Average

The grade point average is computed on courses taken at any University of California campus.

## Incomplete (I) Grades

According to Davis Division Regulations A540 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A540-1>), the grade of Incomplete (I) may be assigned when a student's work is of passing quality and represents a significant portion of the requirements for a final grade, but is incomplete for a good cause as determined by the instructor; good cause may include current illness, serious personal problems, an accident, a recent death in the immediate family, a large and necessary increase in working hours or other situations of equal gravity.

In courses listed in the UC Davis General Catalog (<https://catalog.ucdavis.edu/courses-subject-code/>) as being letter graded, passing quality means of D- quality or better. This standard holds in such courses whether or not the student has elected to take the course on a Passed/Not Passed (P/NP) or Satisfactory/Unsatisfactory (S/U) basis. For courses listed in the catalog as being graded on a P/NP or S/U basis only, the completed work must be of a quality consistent with a grade of Pass or Satisfactory.

Incomplete grades are not included in your grade point average at the end of a term. However, it is recommended that students not delay the clearance of incomplete grades to avoid jeopardizing graduation. At the time of graduation, any remaining I grades will be calculated as a not passing grade (F, NP, or U). This may affect the GPA or other requirements to earn a degree.

If your instructor is no longer affiliated with UC Davis, contact the department offering the course for assistance.

### Life Cycle of an Incomplete Grade

An I grade must be replaced with a final grade by the end of the third succeeding quarter (excluding summer sessions) of academic residence, or the grade reverts to a not passing grade (F, NP, or U).

If a student's degree is conferred before the expiration of the time limit for an I-grade conversion, the graduated student shall have until the end of the third quarter succeeding the quarter in which the I grade was assigned to replace the I grade. If the time limit expires after a degree has been conferred and the incomplete grade has not been replaced, the incomplete grade shall remain on the student's record.

If the degree has not been conferred, and the work has not been completed by the end of the term three calendar years after the grade incomplete has been assigned, and during which the student has not been in academic residence, then the I grade shall remain on the student's record, unless the course is repeated. The three-calendar-year limit for the completion of courses assigned the I grade shall apply to all and only those courses in which the I grade is assigned on or after September 1, 2010.

## Incomplete Grade Removal

You may replace an I grade with a passing grade and receive unit credit and grade points provided you satisfactorily complete the coursework as specified by the instructor by the end of the third succeeding term of academic residence. To remove the incomplete, you must contact the instructor offering the course who initiates the incomplete grade change via the Online Grade Change Tool (<https://oasis.ucdavis.edu/gradechanges/>). For more information, see Grade Changes (<https://registrar.ucdavis.edu/faculty-staff/ogc/>). Upon the completion of the online grade change, the professor or the department offering the course submits the online petition to the Office of the University Registrar.

Students can use OASIS (<https://students.ucdavis.edu/>) to see pending and past grade changes submitted on their records.

## Extension of Incomplete Grade

For justifiable reasons, students may petition to extend the I grade past the end of the third succeeding quarter. Petitions to extend the I grade must be obtained from the dean's office for undergraduate students or from Graduate Studies (<http://gradstudies.ucdavis.edu/>) for graduate students. Requests for extensions must be submitted before the I grade lapses to an F, NP, or U grade. The extension cannot be made retroactively. For more information regarding retroactive changes, see Grade Changes (<https://registrar.ucdavis.edu/faculty-staff/ogc/>).

## Repeating a Course with a Previous Incomplete Grade

### Undergraduate/Graduate Students

You may not re-enroll in a course if you have an unresolved incomplete grade for that course. To remove the I grade, you must contact the instructor who initiates the incomplete grade change via the Online Grade Change Tool. For more information, see Grade Changes (<https://registrar.ucdavis.edu/faculty-staff/ogc/>). If the incomplete grade remains on your record because work has not been completed within three calendar years in which you were not in academic residence, contact the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>).

Undergraduate students can use OASIS (<https://students.ucdavis.edu/>) to see pending and past grade changes submitted on their record.

## Passed/Not Passed (P/NP) or Satisfactory/Unsatisfactory (S/U) Grading

*For previous-term deadline exceptions, see P/NP & S/U Grading Deadline Exceptions (<https://registrar.ucdavis.edu/records/grades/pass-no-pass/#PNP>).*

## P/NP Grading

An undergraduate student in good academic standing (<https://registrar.ucdavis.edu/records/transcripts/academic-standing/>)†† may request to take specific courses on a P/NP basis. Such requests must be submitted and confirmed by the 40 (<https://registrar.ucdavis.edu/calendar/quarter/>)th day of instruction (<https://registrar.ucdavis.edu/calendar/quarter/>). (<https://registrar.ucdavis.edu/calendar/quarter/>)

Undergraduates should contact their dean's office for information regarding the requirements or restrictions of their particular college; see:

- College of Agricultural & Environmental Sciences (<https://caes.ucdavis.edu/students/advising/academic-planning/bachelors-degree-requirements/>)
- College of Biological Sciences (<https://biology.ucdavis.edu/undergraduate/advising/basc/FAQ/>)
- College of Engineering (<https://engineering.ucdavis.edu/undergraduates/academic-advising/pnp-policy-info/>)
- College of Letters & Science (<https://lettersandscience.ucdavis.edu/frequently-asked-questions/>)
- Graduate School of Management (p. 67)

The Pass (P) grade is awarded to undergraduate students for work in courses that otherwise would receive a grade of C– or higher. Units earned are counted in satisfaction of degree requirements but are not counted in determining your grade point average.

Not more than one-third of the units taken in residence on the Davis campus and presented for graduation by an undergraduate student may be in courses taken on a P/NP basis; Davis Division Regulation A545 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A545->)<sup>2</sup>. For information regarding additional conditions and/or restrictions, consult your dean's office. If you plan to attend graduate or professional school, you may also wish to consult with Pre-Graduate/Law Advising (<https://opportunity.ucdavis.edu/services/pre-grad-law/>) services regarding P/NP grading.

If you received a previous letter grade in a course, you may not repeat it using the P/NP option. However, if you took a course P/NP previously, you may repeat it for a letter grade. If you receive an incomplete in a course you took for a letter grade, you may not complete the course on a P/NP basis.

For registration information regarding how to select P/NP grading for a course, see P/N (<https://registrar.ucdavis.edu/registration/schedule-adjustments/pass-nopass/>) or S/U Grading Options (<https://registrar.ucdavis.edu/registration/register-for-classes/other-course-changes/>).

P/NP usage can be complex; students should consider potential consequences related to satisfactory academic progress, time to degree, financial aid, and postgraduate study requirements. If you have P/NP usage questions, consult your advisor.

## P/NP Grading in Beginning Language Courses

To enforce Davis Division Regulation 536 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#536->)<sup>3</sup>, a student who has completed a second or more advanced year of high-school-level coursework in a foreign language in tenth, eleventh, or twelfth grade shall be awarded credit for Course 1 (or its equivalent) in that language only if a student takes the course on a P/NP basis. Enforcement of this regulation occurs mid-term. For more

information, contact the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>).

## S/U Grading

The grade of S (Satisfactory) is awarded to graduate students for work in graduate courses that otherwise would receive a grade of B- or better and for work in undergraduate courses that otherwise would receive a grade of C- or better.

In accordance with Davis Division Regulations A546 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A546-1>), graduate students, under certain circumstances, may be assigned grades of S/U, but units earned in this way are not counted in calculating the grade point average. The purpose of the S/U option is to encourage graduate students to explore academic coursework in areas unrelated to their academic discipline. Graduate students must contact Graduate Studies (<http://gradstudies.ucdavis.edu/>) to request to take a letter-graded course on an S/U grading basis. Petitions to elect S/U grading must be signed by your graduate advisor for approval and filed with Graduate Studies by the end of the fifth week of the quarter (25th day of instruction) (<https://registrar.ucdavis.edu/calendar/web/quarter/>). A graduate course in which a C, D, or F grade is received may not be repeated with the S/U option.

In specifically approved courses, instructors assign only S/U grades. Such courses count toward the maximum number of units graded S allowable toward the degree, as specified by each degree program.

If you previously received a letter grade in a course, you may not repeat it using the S/U option. If you receive an incomplete in a course you took for a letter grade, you may not complete the course on an S/U basis. Ensure the grade mode you have selected reflects letter grading. For registration information regarding how to select S/U grading for a course, see P/NP or S/U Grading Options (<https://registrar.ucdavis.edu/registration/schedule-adjustments/pass-nopass/>).

## P/NP & S/U Grading Deadline Exceptions

The campus recognizes the stresses that students and instructors faced in their academic and personal lives. To reduce academic uncertainty and increase flexibility while trying to adapt to remote instruction, the Academic Senate and administrative partners modified the P/NP deadlines for the following quarters:

- Spring 2020: Jun 4, 2020; COVID-related
- Summer Session I 2020: Jul 24, 2020; COVID-related.
- Summer Session II 2020: Sep 4, 2020; COVID-related.
- Fall 2020: Dec 11, 2020; COVID-related.
- Winter 2021: Mar 12, 2021; COVID-related.
- Spring 2021: Jun 3, 2021; COVID-related.
- Summer Session I 2021: Jul 23, 2021; COVID-related.
- Summer Session II 2021: Sep 3, 2021; COVID-related.
- Winter 2022: Mar 11, 2022; COVID-related.
- Spring 2022: Jun 2, 2022; COVID-related.
- Summer Session I 2022: Jul 22, 2022; COVID-related.
- Summer Session II 2022: Sep 2, 2022; COVID-related.
- Fall 2022: Dec 2, 2022—UAW strike-related.
- Spring 2023: Extended to May 19, 2023; *Posted May 5, 2023*

All other terms/quarters are unaffected.

For the latest updates regarding P/NP & S/U grade options and deadline extension information, see Academic Policies & Guidelines for Changes in Campus Operating Status (<https://academicsenate.ucdavis.edu/academic-policies-operating-status/>).

## In-Progress (IP) Grades

For a course extending over more than one term, designated in course descriptions as “deferred grading only, pending completion of the sequence,” evaluation of student performance is deferred until the end of the final term of the course sequence. Provisional grades of IP are assigned in the intervening terms and are replaced with the final grade at the completion of the sequence. To gain credit toward graduation, a student must successfully complete the entire sequence.

## Multi-Term Courses & In-Progress Grading

Multi-term courses are not a series of courses. A multi-term course has one number and is a single course extending over multiple terms. After the first term, the IP is given, and at the last term, the grade is given to the course.

Transcripts display:

Fall Quarter: ABC 123 grade = In-Progress

Winter Quarter: ABC 123 grade = In-Progress

Spring Quarter: ABC 123 grade = Pass

The IP grade recording remains on your transcripts, however, the last term of IP grading displays the final grade.

## Deferred Courses & In-Progress Grading

Deferred courses are a series of courses (e.g., 200A, 200B, 200C). A deferred course is comprised of a series of multiple courses, each with its own number, extending over multiple terms. The IP grade is given at the first term, and at the last term the grade is assigned and then applied to all courses within the series so that all quarters are shown and display the final grade.

The instructor may assign final grades, grade points, and unit credit for completed terms when the student has not completed the entire sequence provided that the instructor has a basis for assigning the grades and certifies the course series was not completed for good cause and submits documentation to the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>); Davis Division Regulations A540-D (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A540-1>). An IP not replaced by a final grade remains on the student's record.

Transcripts display:

Fall Quarter: ABC 123A grade = Pass

Winter Quarter: ABC 123B grade = Pass

Spring Quarter: ABC 123C grade = Pass

## No Grade (NG)

In accordance with Davis Division Regulations A540-G (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A540-1>), the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>) shall enter the grade notation NG on the student's record for a student whose instructor has not yet submitted an appropriate grade (letter grade or P, NP, S, U, I, Y, or IP) upon final grade submission.

## Notification of an Existing NG Grade

The Office of the University Registrar provides written notification to all affected students to ensure awareness an NG grade has been assigned and must be removed within one academic term or the NG grade will lapse to a not passing grade (F, NP, or U). Affected students should contact the instructor of the course immediately to resolve the NG grade.

## Life Cycle of an NG Grade

An NG grade must be replaced with a final grade by the end of the succeeding quarter, excluding summer sessions, or the grade will revert to a not passing grade (F, NP, or U).

## NG Grade Removal

Conditions for removing the NG grade are as follows:

- The NG grade notation shall be replaced when the final grade is submitted by the instructor via the Online Grade Change Tool (<https://registrar.ucdavis.edu/faculty-staff/ogc/>).
- The NG grade and relevant course notation both shall be deleted from the student's transcript if it is established that an administrative error resulted in the improper assignment of NG to the student.
- The Office of the University Registrar shall change the NG notation to a not passing grade (F, NP, or U) if the NG grade has not been removed after one quarter.

## Repeating a Course with an NG Grade

You may not re-enroll in a course if you have an unresolved grade. To remove the NG grade from your record, you will need to contact the instructor who assigned the NG and have them submit a grade through the Online Grade Change Tool for the prior enrollment.

## Repeating a Course

### Undergraduate Students

Undergraduate students are permitted to repeat and replace up to 16 units. Also, per Davis Division Regulations A540-F (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A540-1>), "(A)n undergraduate student may repeat only those courses in which the student received a letter grade of D+ or below, a C- or below for any course that is approved to satisfy the Entry Level Writing Requirement (see DDR 521.C.2), or a grade of Not Passed, as well as courses in which a grade of I has become permanent on the student's record because the work was not completed within three years... Departments may restrict repetition of a course if it is a prerequisite to a course already completed with a grade of C- or better. Courses in which a letter grade has been assigned may not be repeated on a Passed or Not Passed basis."

Degree credit for a repeated course is given only once, but the grade assigned at each enrollment shall be permanently recorded on the official transcript. Repeated course units excluded in a student's GPA are removed from the number of units attempted, as well as balance points so in computing the GPA, only the grade and corresponding grade points earned the second time a course is taken is used.

If the 16-unit maximum is not reached, repeated courses are annotated on the transcript as being "REPEATED, INCLUDED IN GPA" for the most recent time a course is taken and "REPEATED, EXCLUDED FROM GPA" for the prior time(s) the course is taken.

After the 16-unit maximum is reached, or if the units for the repeated course partially exceed the 16-unit repeat limit, the GPA shall be based

on all grades assigned and total units attempted and appear on the transcript for both courses as "REPEATED, INCLUDED IN GPA."

For more information on how this may affect financial aid eligibility, see Repeating a Course for a Second Time (<http://financialaid.ucdavis.edu/consumer/changes.html>).

## Graduate Students

Per Davis Division Regulations A540-F (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A540-1>), "(A) graduate student, with the consent of the appropriate graduate adviser and the Dean of Graduate Studies, may repeat any course in which the student received a letter grade of C+ or below, or a grade of Unsatisfactory, as well as courses in which a grade of I has become permanent on the student's record because the work was not completed within three years...up to a maximum of three courses for all courses repeated. Courses in which a letter grade has been assigned may not be repeated on a Satisfactory or Unsatisfactory basis."

Degree credit for a repeated course is given only once, but the grades assigned for both the first and second time a course is taken appear on the student's transcript. Repeated course units excluded in a student's GPA are removed from the number of units attempted, as well as balance points so in computing the GPA, only the grade and corresponding grade points earned the second time a course is taken are used.

If the three-course maximum is not reached, repeated courses are annotated on the transcript as being "REPEATED, INCLUDED IN GPA" for the most recent time a course is taken and "REPEATED, EXCLUDED FROM GPA" for the prior time(s) the course is taken.

After the three-course maximum is reached, the GPA shall be based on all grades assigned and total units attempted and appear on the transcript for both courses as "REPEATED, INCLUDED IN GPA."

### Second or More Repeat of a Course

Repeating a course more than once requires approval by Graduate Studies (<http://gradstudies.ucdavis.edu/>).

### Repeating a Course for Credit if Content Differs or with Limited Repeatable Units/Times Allowed

Some courses are repeatable for credit if the content of the current course enrollment differs from that of the previous enrollment or may be repeated for credit for a limited number of units or number of times enrolled in the course. Check the General Catalog (<https://catalog.ucdavis.edu/courses-subject-code/>) for repeatable courses.

## Illegal Course Repeats

Related: University of California Transfer Credit Practices (<https://admission.universityofcalifornia.edu/counselors/preparing-transfer-students/transfer-credit-practice.html#:~:text=Repeated%20courses,grade%20of%20C%20or%20better>)

### Illegal Repeat Errors

Students should not enroll in courses considered illegal repeats. (See Repeating a Course.)

The following list provides information regarding some of the most common Illegal Repeat Errors encountered by students during the registration process. Although only one illegal repeat error is displayed, multiple course repeat limitations may exist for a single course. For more

information about repeat limitations, check the course description in the General Catalog (<https://catalog.ucdavis.edu/courses-subject-code/>).

## Illegal Repeat of Course with Pending I Grade

You should not re-enroll in a course with an unresolved I grade. To remove the I grade from your records, see Incomplete (I) Grades (<https://registrar.ucdavis.edu/records/grades/incomplete/>).

If the I grade remains on your record because work has not been completed within three calendar years in which you were not in academic residence, contact the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>).

## Illegal Repeat of Previous Course with Passing Grade

If enrolling in a course before the prior attempt has been graded, you may be dropped from the new course if the prior attempt receives a passing grade.

For courses repeatable when content differs, please contact the department offering the course. The department must send confirmation the topic is different for each course to [OUREnrollment@ucdavis.edu](mailto:OUREnrollment@ucdavis.edu) and the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>) will grant repeat approval.

## Illegal Repeat of a Course Repeated for Two or More Times

Repeating a course more than once, regardless of the grade, requires the approval of the Dean's office of your college or Graduate Studies. Repeating a course more than once means you are enrolling in a course three or more times.

## Illegal P/NP or S/U Repeat of Previous Letter Graded Course

Courses in which a student previously received a letter grade may not be repeated on a P/NP or S/U basis.

# Duplication of Credit & Course Repeats: Restricted Credit

The following provides additional information regarding the most common reasons a student may receive a restricted credit warning. Please review the General Catalog (<https://catalog.ucdavis.edu/courses-subject-code/>) for additional information.

## Duplication of Credit

Students enrolling in courses with similar or overlapping content may have credit restriction warnings to prevent duplication of credit. In these instances, a student who has successfully completed one course (or multiple courses) may receive reduced or no credit for the other course. For information about possible duplication of credit for a specific course, please check the course description for that course in the General Catalog. Please note that a credit restriction warning may not be displayed for duplication of AP and/or transfer credit.

One example of a duplication of credit restriction is listed below:

*RESTRICTED CREDIT WARNING: Your enrollment in the below course(s) may have credit restrictions due to duplication of credit or course repeat limitations. For more information about the UC Davis duplication of credit and course repeat restrictions, see Restricted Credit. Note: This restricted credit warning message is for informational purposes only and will not affect your ability to register for the course(s).*

*79795 MAT 021A A01 Duplication of Credit Prior Course: MAT 016A Fall Quarter 2024*

In this example, per the course description for Mathematics 021A, in the General Catalog (<https://catalog.ucdavis.edu/courses-subject-code/mat/>), only 2 units of credit will be awarded for Mathematics 021A as a result of content overlap with a previously completed Mathematics 016A course.

## Course Repeats

Students re-enrolling into a previously taken course may have credit restriction warnings to prevent possible course repeat limitations.

Below is an example of one type of repeat warning:

*RESTRICTED CREDIT WARNING: Your enrollment in the below course(s) may have credit restrictions due to duplication of credit or course repeat limitations. For more information about the UC Davis duplication of credit and course repeat restrictions, see Restricted Credit. Note: This restricted credit warning message is for informational purposes only and will not affect your ability to register for the course(s).  
31952 MUS 070 A01 Repeat Repeat of course with possible passing grade*

Please note that although only one credit restriction warning is displayed, multiple course repeat limitations may exist for a single course. The following is a list of common course repeat restrictions that you may encounter.

### Repeat: Illegal repeat of course with Incomplete (I) grade

You may not re-enroll in a course if you have an unresolved I grade for that course. Schedule Builder prevents students from re-enrolling in a course with an unresolved I grade.

To remove the I grade from your records, see Incomplete Grades, above. If the I grade remains on your record because work has not been completed within three calendar years in which you were not in academic residence, contact the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>).

### Repeat: Illegal repeat of course with No Grade (NG)

You may not re-enroll in a course if you have an unresolved NG for that course. For information regarding the removal of the NG from your records, see No Grade (NG), above.

### Repeat: Repeat of course with passing grade

No credit may be granted to students repeating a course, or its equivalent, for which you previously received a passing grade.

### Repeat: Course repeated for two or more times

Repeating a course more than once requires approval of the Dean's office of your college or the Graduate Studies.

### Repeat: Illegal P/NP or S/U repeat of previous letter-graded course

Courses in which a student received a letter grade may not be repeated on a P/NP or S/U grading basis.

### Repeat: Exceeded catalog limit for repeatable units/times allowed

Some courses have restrictions on the number of units or times they are repeatable. If a course is approved to be repeated for credit, the description of the course in the General Catalog (<https://catalog.ucdavis.edu/courses-subject-code/>) states the restrictions for repeating the course.

## Multiple Restrictions

In some instances, a course may display a multiple restrictions warning when there is possible duplication of credit and repeat limitations:

*RESTRICTED CREDIT WARNING: Your enrollment in the below course(s) may have credit restrictions due to duplication of credit or course repeat limitations. For more information about the UC Davis duplication of credit and course repeat restrictions, see Restricted Credit. Note: This restricted credit warning message is for informational purpose only and will not affect your ability to register for the course(s). 79772 MAT 016A 002 Multiple Restrictions Possible duplication of credit and repeat restrictions*

A review of your academic record after the end of the term will be needed to determine which credit restriction will apply.

## Calculate Your Grade Point Average (GPA)

Grade Point Average (GPA) is the numeric measure of a student's average performance in all completed letter-graded courses. UC GPA is the numeric measure of a student's average performance in all completed letter-graded courses at the University of California.

### Step One: Determine Criteria and Courses to be Used in Factoring the GPA.

Determine what type of GPA is desired; e.g., major, overall UC, quarterly. Review all coursework to identify which courses should be used to factor the GPA.

Do include courses that:

- Are letter-graded; and,
- Fall within established parameters for the type of GPA desired, e.g., all upper division courses used to satisfy major or all work completed at any UC; and,
- Are units that count towards your degree.

Do not include the following:

- Courses graded P, NP, S, U, IP, NG, Y, or I.
- Excluded repeat units.
- Units reduced from a course.
- Units that fall outside of established criteria.
- Illegal repeat units.
- Courses that do not bear degree credit; e.g., workload courses.
- Courses with an Enrolled-No Work Submitted (ENWS) notation.

### Step Two: Calculate Grade Points for Each Course Being Used in the GPA.

The official UC GPA is calculated by dividing the total number of grade points by the total number of attempted UC Units. These figures can be found on the official transcript. Attempted units are found in the **ATTM** column; grade points are found in the **GPTS** column.

Example:

- A student has 116.40 grade points and 59.00 Attempted UC Units.
- $116.40 \text{ grade points} / 59.00 \text{ Attempted UC Units} = 1.973 \text{ GPA}$ .

## Step Three: Calculate the GPA

Calculate the GPA by adding all the values identified in step two and dividing this number by the total units earned in these courses.

GPA = Total Grade Points/Total Attempted UC Units Earned

**Example** - If you want to find the quarterly GPA for when courses and grades for a particular term are:

- Student completed 20 units; however, 4 of these units were P/NP. As these do not factor into the GPA calculation, this course adds nothing to the total values.
- Quarterly GPA = 55.6 grade points/16 attempted UC units = 3.475.

## About Grade Points

Grade points, also called "quality" points, are points that are assigned to every UC unit for which a student receives a letter grade. The grade point balance is a measure of how far a student is over or under the minimum performance standard—a GPA of 2.000. Grade points are commonly used in academic advising to set specific targets to reach a 2.000 GPA.

The grade point balance is particularly useful if a student's GPA is below 2.000, since it offers insight into what is necessary to get into good academic standing.

Each letter grade, except C, has an impact on the grade point balance. Each grade below C lowers the grade point balance, as indicated below; and each grade above C raises the grade point balance, as indicated below.

Grade Point values are assigned as follows:

- A+ 4.000
- A 4.000—Excellent
- A- 3.700
- B+ 3.300
- B 3.000—Good
- B- 2.700
- C+ 2.300
- C 2.000—Fair
- C- 1.700
- D+ 1.300
- D 1.000—Barely passing
- D- 0.700
- F 0.000—Not passing (work so poor that it must be repeated to receive recognition)

NOTE: Workload units and courses that are assigned grades such as P, NP, S, U, NS, NG, I, Y, and H are not assigned grade points.

Example:

- A student receives an A- in a 4-unit class so the course will provide 3.700 grade points for each unit.
- $3.700 \text{ grade points} \times 4.00 \text{ Units} = 14.8 \text{ total grade points for the course.}$

## About Balance Points

Balance points are negative or positive points that are assigned to every UC unit for which a student receives a letter grade. Balance points are designed so that a student with a UC GPA of 2.000 will have 0 balance

points (an overall 2.000 GPA is the minimum GPA allowed for a student to stay in good academic standing). The higher a student's UC GPA is above 2.000, the higher the student's positive balance point; the lower a student's UC GPA is below 2.000, the higher the negative balance point.

Balance point values are assigned as follows:

- A+ +2.000
- A +2.000
- A- +1.700
- B+ +1.300
- B +1.000
- B- +0.700
- C+ +0.300
- C 0.000
- C- -0.300
- D+ -0.700
- D -1.000
- D- -1.300
- F -2.000

Example:

- A student receives a B+ in a 4-unit course.
- +1.300 balance points x 4.00 units = +5.200 balance points.

Example:

- A student receives a D+ in a 3-unit course.
- -0.700 balance points x 3.00 units = -2.100 balance points.

## Grades & Notations

### Notation | Definition

**A-F** | Letter Grades. (Note: A-D grades may be modified by a '+' or '-'.)

**H** | Honors: Used by the School of Medicine.

**I** | Incomplete: Indicates that a student's work in a course was satisfactory but incomplete for good cause (as determined by the instructor).

**IP** | In Progress: Course or series of courses involving multi-term grading.

**NG** | No Grade: A placeholder notation that is used when an instructor does not have a student's course grade ready at the time of grade submission.

**NP** | Not passed: For courses being taken on a Passed or Not Passed basis, the grade of Not Passed shall be awarded only for work which otherwise would receive a grade of D+ or lower; Davis Division Regulation A545 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A545->)<sup>2</sup>.

**P** | Passed: For courses being taken on a Passed or Not Passed basis, the grade of Passed shall be awarded only for work which otherwise would receive a grade of C- or higher; Davis Division Regulation A545 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A545->)<sup>2</sup>.

**S** | Satisfactory: Awarded to graduate students for work in graduate courses that otherwise would receive a grade of B- or higher; Davis

Division Regulations A546 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A546->)<sup>1</sup>.

**U** | Unsatisfactory: Awarded to graduate students for work in graduate courses that otherwise would receive a grade of C+ or lower; Davis Division Regulations A546 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A546->)<sup>1</sup>.

**Y** | Placeholder notation for a pending judicial action. Questions regarding judicial actions should be directed to the Office of Student Support & Judicial Affairs (<http://sja.ucdavis.edu/>). Note: This notation is also used by the School of Medicine and the School of Veterinary Medicine for purposes of course remediation.

### Grade Suffix Key

#### Suffix | Definition

**^ (Caret)** | Student has taken more than 16 repeated units with a letter grade of D (+ or -) in most recent prior repeat enrollment. The grade is included in the GPA calculation and credit units are not allocated.

**\* (Asterisk)** | Student has opted to take letter-graded class on a P/NP or S/U basis.

**& (Ampersand)** | Graduate student has taken a lower-division undergraduate course. The course is not included in the GPA calculation.

### Cancellation/Withdrawal Notation Key

**AW** | Administrative Withdrawal (<https://registrar.ucdavis.edu/registration/leave/administrative-withdrawals/>).

**CA** | Canceled enrollment before the first day of instruction.

**DS** | Withdrawn due to dismissal (<https://registrar.ucdavis.edu/registration/leave/administrative-withdrawals/>) from university.

**N1-N9** | A new student with Federal Financial Aid that is withdrawn during the indicated week of instruction and subject to a modified refund schedule.

**RA** | Registrar Appeal (General Appeal).

**RD** | Retroactive Drop.

**RW** | Retroactive Withdrawal.

**W01-W09** | Course dropped during indicated week of instruction.

**WA** | Course dropped during the 10th week of instruction.

**WB** | Course dropped during the 11th-16th week of instruction.

**WC** | Canceled enrollment before the first day of instruction.

**WD** | Withdrawn from university.

**WDO** | Withdrawn from the university during the 10th week.

**WD1-WD9** | Withdrawn from the university during the indicated week of instruction.

**WDC** | Canceled enrollment before the first day of instruction.

**WH** | Withdrawn, hold obligation.

**WI** | Withdrawn due to dismissal (<https://registrar.ucdavis.edu/registration/leave/administrative-withdrawals/>) from university.

**WN** | Withdrawn for non-payment of fees.

**WP** | Withdrawn—Previous Term: When a student withdraws from a term and has enrollment in a future term, enrollment for both terms is canceled.

**WPO** | Went on Planned Educational Leave Program (PELP) during the 10th week.

**WP1-WP9** | Went on PELP status during indicated week.

**WPC** | PELP—Cancel: Went on PELP status prior to the first day of instruction.

**WPD** | Course dropped using Permission-to-Drop (PTD) number.

**WX** | Administrative Withdrawal. A Student may be administratively withdrawn (<https://registrar.ucdavis.edu/registration/leave/administrative-withdrawals/>) from the University.

## Administrative Drop and 'X' Notation Key

**Code** | Definition

**XB** | Administrative Drop—Returned Check.

**XN** | Administrative Drop—Non-Payment: It is unlikely that this code is still used.

**XR** | Administrative Drop—Illegal Repeat of a Course.

## Grade Changes

The Academic Senate Committee on Grade Changes (*Grade Change Committee*) reviews requests for grade changes. For more information, see the Grade Change Committee Guidelines (<http://academicsenate.ucdavis.edu/gcc/>). Questions regarding the Grade Change Committee should be directed to a Grade Change Deputy ([gradechanges@ucdavis.edu](mailto:gradechanges@ucdavis.edu)) in the Office of the University Registrar. Grade change requests should be submitted to the Office of the University Registrar by the instructor—students are not permitted to submit change of grade requests.

Academic Senate Regulations (system-wide and individual campus) mandate that grades are **final** when filed with the Office of the University Registrar by the instructor. A grade can be changed only if a clerical or procedural error occurred. Except for I, IP, NG, or Y grades, a change of grades may not be made based on reassessment of the quality of a student's work or the completion of additional work. For more information, see Davis Division Regulations A540 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A540-1>).

Instructors wishing to request a change of grade due to clerical or procedural error may do so using the Online Grade Change Tool (<https://oasis.ucdavis.edu/gradechanges/>). Students can use Online Advising Student Information System Portal (OASIS (<https://students.ucdavis.edu/>)) to see any approved or pending grade changes that have been submitted.

Related: Information on Retroactive Change Petitions (<https://registrar.ucdavis.edu/records/retroactive/>) | Online Grade Change Tool (<https://oasis.ucdavis.edu/gradechanges/>)

## Grade Grievances

Students wishing to file a grade grievance (or grade dispute) may **only** do so after they have discussed the matter with the instructor

and the department chairperson. If the Committee determines that discrimination or arbitrary treatment was the cause of or motivation behind the assignment of an incorrect grade, it may authorize a change if an appropriate grade can be determined. The student is expected to bear the burden of proving the cause of the incorrect grade.

Students may file alleged discrimination or arbitrary treatment complaints under campus grievance procedures; see UC Davis Policy & Procedure Manual, Section 400-15 (<https://ucdavispolicy.ellucid.com/documents/view/39/active/>).

## Spring 2020 Retroactive Grade Mode Changes

The Academic Senate allowed greater flexibilities for retroactive grade mode changes for courses taken in Spring 2020. These flexibilities and instructions are limited to courses taken in Spring 2020, and they only apply to undergraduate students. See Retroactive Grade Mode Changes for Courses Taken Spring 2020 ([https://academicsenate.ucdavis.edu/sites/g/files/dgvnsk3876/files/inline-files/final\\_web\\_gradchange\\_spring2020.pdf](https://academicsenate.ucdavis.edu/sites/g/files/dgvnsk3876/files/inline-files/final_web_gradchange_spring2020.pdf)).

## <sup>1</sup> Davis Division Regulation A540; Grading

Davis Division Regulation A540 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A540-1>)

Except as provided otherwise in Davis Division Regulations A545 and A548, and in Regulation 70 of the Faculty of the School of Medicine, the following provisions apply to the grading of the work of all students subject to Davis Division Regulations.

(A) The work of each student shall be reported in terms of the following grades: A (excellent), B (good), C (fair), D (poor), F (failure), I (incomplete), and IP (in progress). Grades of A, B, C, and D may be modified by plus (+) or minus (-) suffixes. (En. 4/23/78, Am. 11/28/79)

(B) Grade points per unit shall be assigned by the Registrar as follows: A - 4; B - 3; C - 2; D - 1; F, I, or IP - none. "Minus" grades shall be assigned three-tenths grade point less per unit than unsuffixed grades, and "plus" grades (except A+) shall be assigned three-tenths grade point more per unit. The grade of A+ shall be assigned 4.0 grade points per unit, the same as for an unsuffixed A; but when A+ is reported it represents extraordinary achievement.

(C) The grade Incomplete shall be assigned only when the student's completed work (judged by itself and not in relation to the work required to pass the course as a whole) is of passing quality and represents a significant portion of the requirements for a final grade, but is incomplete for good cause as determined by the instructor. "Good cause" may include illness, serious personal problems, an accident, a death in the immediate family, a large and necessary increase in working hours, or other situations deemed to be of equal gravity. The student is entitled to replace this grade by a passing grade and to receive appropriate grade points and unit credit provided the student satisfactorily completes the work of the course in a way specified by the instructor before the end of the third succeeding term of the student's academic residence as defined in Regulation 610. If a degree is conferred upon the student before the expiration of the time limit for conversion, the time limit for conversion for the graduated student shall be the end of the third regular term succeeding the term in which the Incomplete grade was assigned. If the time limit for conversion expires before a degree is conferred upon the student and the Incomplete grade has not been replaced, the grade shall revert to an F, a Not Passed, or an Unsatisfactory, depending on the grading system in effect in the particular instance. If the time limit expires after a degree has been conferred and the Incomplete grade has

not been replaced, the Incomplete grade shall remain on the student's record. If the degree has not been conferred, and the work has not been completed before the end of the term three calendar years after the grade Incomplete has been assigned, and during which the student has not been in academic residence as defined in Regulation 610, the grade Incomplete shall remain on the student's record, unless the course is repeated. This time-limit for the completion of courses assigned the grade Incomplete shall apply to all and only those courses in which the grade Incomplete is assigned on or after September 1, 2010. (En. 1/20/75, Am. 5/29/75, effective Fall 1975; Am. 10/25/76, effective Winter 1977; Am. 6/4/79, Am. 11/28/79, effective Fall 1980; Am. 6/3/80, Am. 12/3/80; Am. 4/25/83; Am. 11/30/83) (Am. 9/1/2010, 2/24/2011, 9/1/2013)

In calculating an undergraduate student's grade point average, grade points and units for courses graded Incomplete shall not be counted except that, in ascertaining compliance with the 2.000 minimum grade point average required for the receipt of a bachelor's degree, all incomplete units attempted for a letter grade shall be counted and assigned a grade point value of zero. Any undergraduate student who accumulates more than 16 units of Incomplete for which final grades have not been assigned shall be subject to academic notice or disqualification. (Am. 1/27/81) (Am. 9/1/2010)

In calculating a graduate student's grade point average, grade points and units for courses graded Incomplete shall not be counted except that, in ascertaining compliance with the minimum grade point average required for receipt of a degree, all incomplete units attempted for a letter grade shall not be counted and assigned a grade point value of zero. Any graduate student who accumulates more than 8 units of Incomplete for which final grades have not been assigned shall be subject to academic notice. (Am. 10/25/76, effective Winter 1977; Am. 1/27/81)

(D) For a course extending over more than one term, where the evaluation of the student's performance is deferred until the end of the final term, provisional grades of In Progress shall be assigned in the intervening terms. Subject to the provisions of Academic Senate Regulation 634, grade points and units for courses graded In Progress shall not be counted in calculating a student's grade point average. Provisional grades shall be replaced by final grades if the student completes the full sequence. The student may receive final grades, grade points, and unit credit for completed terms when the student has not completed the entire sequence if the instructor certifies that the course was not completed for good cause.

(E) All grades except Incomplete or In Progress are final when filed by the instructor in the end-of-term course report. The correction of clerical and procedural errors shall be governed by guidelines established by the Davis Division and shall be under the supervision of the Davis Division Grade Changes Committee. No change of grade may be made on the basis of reassessment of the quality of a student's work or, with the exception of Incomplete or In Progress grades, the completion of additional work. No term grade except Incomplete may be revised by re-examination. Students who believe that their failure to submit work subject to grading was due to circumstances beyond their control, resulting in a grade of F may petition the Grade Changes Committee for removal of the grade. (Am. 9/1/2012)

(F) Repetition of courses not authorized by the Davis Division Committee on Courses of Instruction to be taken more than once for credit is subject to the following conditions.

(1) An undergraduate student may repeat only those courses in which the student received a letter grade of D+ or below, a C- or below for any course that is approved to satisfy the Entry Level Writing Requirement (see DDR 521.C.2), or a grade of Not Passed, as well as courses in which a grade of I has become permanent on the student's record because the work was not completed within three years, as described in (C) above. Departments may restrict repetition of a course if it is a prerequisite to a course already completed with a grade of C- or better. Courses in which a letter grade has been assigned may not be repeated on a Passed or Not Passed basis. (En. 4/21/80, Am. 3/11/81) (Am. 9/1/2010, 9/1/2016, 9/1/2018)

(2) A graduate student, with the consent of the appropriate graduate adviser and the Dean of Graduate Studies, may repeat any course in which the student received a letter grade of C+ or below, or a grade of Unsatisfactory, as well as courses in which a grade of I has become permanent on the student's record because the work was not completed within three years, as described in (C) above, up to a maximum of three courses for all courses repeated. Courses in which a letter grade has been assigned may not be repeated on a Satisfactory or Unsatisfactory basis. (Am. 10/25/76, effective Winter 1977) (Am. 9/1/2010, 9/1/2011, 9/1/2016, 9/1/2018)

(3) Repetition of a course more than once requires approval by the appropriate dean in all instances.

(4) Degree credit for a course will be given only once, but the grade assigned at each enrollment shall be permanently recorded. (Am. by mail ballot 5/7/74)

(5) In computing the grade point average of an undergraduate who repeats courses in which the student received a grade of D or F, or in the case of a course that is approved to satisfy the Entry Level Writing Requirement, a C- or below (see DDR 521.C.2), only the most recently earned grade for each course and corresponding grade points shall be used for the first 16 units repeated. In the case of further repetitions, the grade point average shall be based on all grades assigned and total units attempted. (Am. 9/1/2018)

(6) In computing the grade point average of a graduate student who repeats courses in which the student received a grade of C, D, or F, only the most recently earned grade for each course and corresponding grade points shall be used. (Am. 9/1/2018)

(G) The Registrar shall enter the notation "NG" on the end-of-term course report and on the student's record for a student whose instructor has not yet submitted an appropriate grade (letter grade or P, NP, S, U, I, or IP). The instructor must indicate in the "memorandum" column on the course report the reason for not submitting a grade. Conditions for removing the NG are: (Am. 9/1/2012)

(1) The NG notation shall be replaced by the appropriate grade upon written submission of that grade by the instructor.

(2) The NG and relevant course notation both shall be deleted from the student's transcript if it is established that an administrative error resulted in improper assignment of NG to the student.

(3) The Registrar shall change the NG notation to an F grade if the NG has not been removed under the provisions of (1) or (2), unless the instructor in charge indicates otherwise to the Registrar. To ensure that the student is aware that an NG must be removed, the Registrar shall provide the following written notification to all affected students: "NG must be removed within one term or the NG will be changed to a grade

of F. If this course appeared on your midterm course check list, see your instructor immediately; if it did not appear, see the Registrar."

## **2 Davis Division Regulation A545; Passed or Not Passed Grading**

Davis Division Regulation A545 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A545->)

(A) A regular undergraduate student in good standing may opt to take specific courses on a Passed (P) or Not Passed (NP) basis up to the limits specified in Davis Division Regulation A545(B). (Am. by mail ballot 5/7/74)

(1) For spring quarter 2020, summer session(s) 2020, fall quarter 2020, winter quarter 2021, spring quarter 2021, and summer session(s) 2021, an undergraduate student not in good standing may opt to take specific courses on a Passed (P) or Not Passed (NP) basis up to the limits specified in the Davis Division Regulation A545(B) via petition and approval by the dean's office. (En. 9/1/2020, Am. 9/1/2021)

(B) Not more than one-third of the units taken in residence on the Davis campus and presented for graduation by an undergraduate student may be in courses taken on a Passed or Not Passed basis, including courses graded in accordance with Davis Division Regulations A545(C) and A545(D). The faculty of any college or school on the Davis campus may establish regulations that are more restrictive regarding use of the Passed or Not Passed option by its students.

(1) Spring quarter 2020, summer session(s) 2020, fall quarter 2020, winter quarter 2021, spring quarter 2021, and summer session(s) 2021 units taken Passed/Not Passed are exempt from the one-third calculation in both the numerator (Passed/Not Passed units taken) and the denominator (total units taken). (En. 9/1/2020, Am. 9/1/2021)

(C) With approval of the appropriate department or division and of the appropriate committees on courses of instruction, the grades assigned by instructors in specific undergraduate courses may be, for undergraduate students, Passed or Not Passed only and, for graduate students, Satisfactory or Unsatisfactory only.

(D) Each special study, directed group study, or other variable-unit undergraduate course shall be graded for undergraduate students on a Passed or Not Passed only basis and for graduate students on a Satisfactory or Unsatisfactory only basis unless specific approval for the use of a letter grade is given by the appropriate committees on courses of instruction.

(E) For courses being undertaken on a Passed or Not Passed basis, the grade of Passed shall be awarded only for work which otherwise would receive a grade of C- or better. Units thus earned shall be counted in satisfaction of degree requirements, but courses undertaken on a Passed or Not Passed basis shall be disregarded in determining a student's grade point average.

(F) The deadline to elect Passed/Not Passed grading is the 40th day of instruction in a quarter and the 20th day of instruction in a six-week summer session. (En. 9/1/2023)

(G) After the Passed/Not Passed deadline and before the close of business on the last day of instruction for the quarter, or, for summer sessions (excluding special session), before the close of business on the last day of instruction in the fifth week of the session, a grade mode

change may be granted via petition and approval by a student's dean's office. (En. 9/1/2023)

(H) To change the grading mode after close of business on the last day of instruction for the quarter, or, for summer sessions (excluding special session), after the close of business on the last day of instruction in the fifth week of the session, the student must submit a petition to the Davis Division Grade Changes Committee. (En. 9/1/2023)

## **3 Davis Division Regulation 536; Grading in Beginning Language Courses**

Davis Division Regulation 536 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#536->)

A student who has completed a second or more advanced year of high-school-level course work in a foreign language in tenth, eleventh, or twelfth grade shall be awarded credit for Course 1 (or its equivalent) in that language only if the student takes the course on a Passed or Not Passed basis under the option authorized by Davis Division Regulation A545(A), subject to the limits specified in Davis Division Regulation A545(B). (Am. and effective 2/14/78)

## **4 Davis Division Regulation A546; Satisfactory or Unsatisfactory Grading**

Davis Division Regulations A546 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A546->)

(A) Under such rules as the Graduate Council and the appropriate program may determine, a graduate student in good standing (or who receives approval from the Office of Graduate Studies) is authorized to undertake, in addition to courses graded on a Satisfactory or Unsatisfactory only basis, one course each term on an optional Satisfactory (S) or Unsatisfactory (U) basis. After a graduate student has been advanced to candidacy for the Ph.D. degree, the student may undertake an unlimited number of courses on a Satisfactory or Unsatisfactory basis. (Am. 9/1/2018)

(1) For spring term and summer session(s) 2020: A graduate student in good standing (or who receives approval from the Office of Graduate Studies) is authorized to undertake, in addition to courses graded on a Satisfactory or Unsatisfactory only basis, not more than three courses in each term or session on an optional Satisfactory (S) or Unsatisfactory (U) basis. (En. 9/1/2020, Am. 9/1/2021)

(2) For fall term 2020, winter term 2021, spring term 2021, and summer session(s) 2021: A graduate student in good standing (or who receives approval from the Office of Graduate Studies) is authorized to undertake, in addition to courses graded on a Satisfactory or Unsatisfactory only basis, not more than two courses on an optional Satisfactory (S) or Unsatisfactory (U) basis. (En. 9/1/2021)

(B) With the consent of the appropriate program and approval of the Graduate Council and of the Davis Division Committee on Courses of Instruction, the grades assigned in specific graduate courses may be, for graduate students, Satisfactory or Unsatisfactory only and, for undergraduate students, Passed or Not Passed only.

(C) Students enrolled in individual research or individual study graduate courses (299 or 299D) shall be graded on a Satisfactory or Unsatisfactory only basis.

(D) In courses being undertaken on a Satisfactory or Unsatisfactory basis, the grade of Satisfactory shall be awarded only for work which otherwise would receive a grade of B- or better and shall be awarded in undergraduate courses only for work which otherwise would receive a grade of C- or better. Units thus earned shall be counted in satisfaction of degree requirements but disregarded in determining a student's grade point average. No credit shall be allowed for work graded Unsatisfactory.

## **† UC Davis Policy & Procedure Manual, 400-15, Complaints of Discrimination or Harassment**

UC Davis Policy & Procedure Manual, Section 400-15 (<https://ucdavispolicy.ellucid.com/documents/view/39/active/>)

## **† University of California Academic Senate Scholarship Regulations; 782**

University of California Academic Senate Scholarship Regulations (782) (<https://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart3.html#r782>)

**782.** Under such regulations as each Division may determine, a student in good standing is authorized to undertake up to an average of one course per term on a Passed or Not Passed basis. A grade of Passed shall be awarded only for work which would otherwise receive a grade of C or better. Units thus earned shall be counted in satisfaction of degree requirements, but such courses shall be disregarded in determining a student's grade-point average. Divisions wishing to undertake more extensive grading experiments shall submit individual proposals for consideration by the Assembly. [See LR 3.67.B]

## **Honors & Awards**

### **Deans' Honors Lists**

According to Davis Division Regulation 551 (<https://academicseSenate.ucdavis.edu/bylaws-regulations/regulations/#551-1>), the quarterly Dean's Honors List includes names of students who have completed, for a letter grade, a minimum of 12 units in a specific quarter with a UC grade point average equal to or higher than the minimum grade point average attained by the upper 16 percent of those registered in the same class level and college during that quarter. Honors lists will be posted quarterly on deans' office websites or made available by other means and a notation of these honors will be placed on each student's permanent record by the Office of the University Registrar.

### **Graduation Honors**

Honors at graduation are awarded to students who have a UC grade point average in the top percent of their college as shown in the table below. An honors notation is made on a student's diplomas and on their permanent records in the Office of the University Registrar.

The College of (<https://lettersandscience.ucdavis.edu/deans-honors-list-and-graduation-honors/>) Letters & Science (<https://lettersandscience.ucdavis.edu/deans-honors-list-and-graduation-honors/>)

honors/) requires that additional criteria be met for high and highest honors.

Total Quarter Units at UC	Highest Honors	High Honors	Honors	Total
45-89	2%	next 2%	next 4%	8%
90-134	3%	next 3%	next 6%	12%
135+	4%	next 4%	next 8%	16%

### **Grade Point Average by College**

Grade point averages from the winter quarter *prior to graduation* are used to determine the averages that will earn an honors designation. Following are the averages for winter quarter 2025; these averages are used through winter quarter 2026.

The table, below, represents the grade point average for each percentage level per college. For example, the 2% top grade point average for Biological Sciences is 3.998, while the 2% top grade point average for Letters & Science is 3.997; Letters & Science has a slightly higher 2% grade point average than Biological Sciences. For winter quarter 2025, the top 2% for Biological Sciences is 48 students; for Letters & Science, the top 2% is 115 students.

Percentage	Agricultural & Environmental Sciences	Biological Sciences	Engineering	Letters & Science
2%	3.988	3.988	3.989	3.991
3%	3.974	3.978	3.979	3.984
4%	3.958	3.966	3.964	3.979
6%	3.927	3.945	3.944	3.956
8%	3.894	3.915	3.917	3.937
12%	3.832	3.855	3.867	3.898
16%	3.773	3.803	3.814	3.855

### **Honors & Awards Information**

- College of Agricultural & Environmental Sciences (<https://caes.ucdavis.edu/students/resources/honors/>)
- College of Biological Sciences (<https://biology.ucdavis.edu/undergraduate/awards-undergraduate/>)
- College of Engineering (<http://engineering.ucdavis.edu/undergraduate/deans-honor-list/>)
- College of Letters & Science (<https://lettersandscience.ucdavis.edu/deans-honors-list-and-graduation-honors/>)
- Graduate School of Management (<http://gsm.ucdavis.edu/>)

### **Awards**

The University Medal is the highest campus honor awarded to a graduating senior in recognition of superior scholarship and achievement. A College or School Medal is also given to the outstanding graduating student in each of the colleges and professional schools. Departmental citations and special awards are also granted to students for superior achievement and scholarship.

### **Chancellor's Award for Excellence in Undergraduate Research & Mentoring Undergraduate Research**

These prestigious awards recognize up to two graduating seniors who have distinguished themselves through their excellence in undergraduate research; and faculty, postdocs, or graduate students who have excelled

in mentoring undergraduate researchers. For complete information, see Chancellor's Award for Excellence in Undergraduate Research (<https://urc.ucdavis.edu/Chancellors-Award/>).

## **<sup>1</sup> Davis Division Regulation 551; Honors**

Davis Division Regulation 551 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#551->)

Davis Division minimum standards for Undergraduate Honors and Honors at Graduation are as follows:

(A) Undergraduate Honors. Students named on the quarterly honors list by each college shall be those who have completed, for a letter grade, a minimum of 12 units in that quarter with a grade-point average equal to or higher than the minimum grade-point average attained by the upper 16 percent of students registered in the same class and college during that quarter. (Effective 6/6/79)

(B) Honors at Graduation. Honors at Graduation shall be awarded to students who have completed at least 45 units of work in the University with a grade-point average that places them in the appropriate top percentage of the graduating class in their college or school, as indicated in the following table. For the June graduating class, the percentages in the table shall be applied to the most recent grade report available (normally the winter quarter) to determine the cut-off grade-point averages for the different honors categories. Each of the three units-completed groups in the table is considered separately. All students who tie for last position in an honors category shall be awarded honors in that category.

Total Quarter Units at UC	Highest Honors	High Honors	Honors	Total
45-89	2%	next 2%	next 4%	8%
90-134	3%	next 3%	next 6%	12%
135+	4%	next 4%	next 8%	16%

The grade-point averages representing the cut-off points for the honors categories for the June graduating class shall be used as minimum criteria for awarding honors to students who graduate in a summer session or the fall or winter quarter, immediately following. (En. May, 1978; Effective Dec., 1982. A variance for the College of Letters and Science approved 10/31/88. See L&S Bylaw 89(A))

(C) Honors Challenge. The Davis Honors Challenge (DHC) shall be a four-year program that includes Honors seminars and culminates in an honors thesis. The DHC program shall be managed by a Director and an Honors Council, all of whom are appointed by the Vice Provost of Undergraduate Studies. Admission to the program is based on an essay and letters of recommendation that are evaluated by the Honors Council. The Undergraduate Council shall review the program at intervals no longer than five years.

(D) Honors credit may be earned by satisfactorily completing either: 1) specifically designated Honors courses; or 2) ordinary courses augmented by either an Honors section or an Honors Contract. Honors courses, Honors course sections, and Honors contracts must be approved by the Honors Council, and by the normal college or school as well as Divisional reviewing agencies. Honors courses, sections and contracts shall be distinguished by the level of intellectual challenge involved, the exploration of connections, and the requirement to express verbally and in writing the critical thought that is the essence of intellectual and scholarly enterprise. Students enrolled in the Honors

Challenge Program shall have the direction of a faculty mentor. (Renum. from Guideline 1, 11/19/84)

## **Leaving UC Davis Planned Educational Leave Program (PELP)**

The Planned Educational Leave Program (PELP) allows any continuing undergraduate or graduate level student to temporarily suspend academic work at UC Davis during the academic terms (Fall, Winter, and Spring only).

### **General Information**

All students are subject to the Schedule of Refunds (<https://registrarnew.sf.ucdavis.edu/registration/leave/refunds/>).

Completed applications for PELP must be filed by the 10th day of instruction (<https://registrarnew.sf.ucdavis.edu/calendar/web/quarter/>) during the quarter for which the student is requesting a leave. However, approved applications submitted after the first day of instruction result in a partial refund of fees paid or retraction of unpaid fees, in accordance with the Schedule of Refunds (<https://registrarnew.sf.ucdavis.edu/registration/leave/refunds/>). The effective refund date is the date the PELP is submitted to the Office of the University Registrar and it is presumed that no university services are provided after that date.

A non-refundable application fee of \$70.00, excluding eligible Education Opportunity Program students, is charged to the student's account when placed on PELP. The fee amount is equivalent to the fee charged when a student withdraws and is required to submit a Readmission Application (<https://registrarnew.sf.ucdavis.edu/registration/return/readmission/>) to return to the university.

Students placed on PELP have a notation of this leave placed on their official transcript.

Students returning from PELP are considered continuing students and readmission to the university is guaranteed. It is expected that students resume their regular academic work during their return term and must satisfy any holds (<https://registrar.ucdavis.edu/registration/register-for-classes/holds/>) placed on their registration.

Undergraduate students must check Schedule Builder for their registration pass appointments (<https://registrarnew.sf.ucdavis.edu/registration/register/pass-times/>). Failure to return is a break in registration (<https://registrarnew.sf.ucdavis.edu/registration/leave/break/>) and a Readmission Application (<https://registrarnew.sf.ucdavis.edu/registration/return/readmission/>) and the readmission fee is required to return to the university.

Students are not eligible to enroll in concurrent courses through UC Continuing and Professional Education or earn academic credit at UC Davis during the time of their leave. Students who earn academic credit at other institutions to transfer that credit to UC Davis are subject to the rules concerning transfer credit. The intent of this program is to suspend academic work; students are encouraged to carefully evaluate the desirability of continuing any academic work during PELP.

**International Students in F-1 or J-1 Status.** Students in F-1 or J-1 status must contact the Services for International Students & Scholars (SISS) office through iGlobal (<https://>

[iglobal.ucdavis.edu/istart/controllers/client/ClientEngine.cfm?serviceid=EFormPELPCancelorWithdraw0ServiceProvider](https://iglobal.ucdavis.edu/istart/controllers/client/ClientEngine.cfm?serviceid=EFormPELPCancelorWithdraw0ServiceProvider)) prior to or within 24 hours of submitting an online PELP form to prevent deactivation of their SEVIS record.

**Financial Aid.** Students who participate in PELP, cancel/withdraw or are dismissed from UC Davis at any time of the academic year may be required to repay financial aid. If loans were accepted as part of financial aid, the six-month grace period before having to repay loans is reduced by the amount of time on PELP or other leave from the university.

After completing the online PELP form, all student loan borrowers (e.g., Perkins, USL, Emil Mrak, etc.) must complete exit loan counseling (<https://financeandbusiness.ucdavis.edu/student-resources/accounting-loans/exit-loan/>) with Student Accounting. Contact Student Accounting at 530-752-5870 with any questions. Students are required to update address(es) using SISWeb (<https://sisweb.ucdavis.edu/>) to ensure that important information can be delivered.

Students considering PELP should review their account balance and ensure that it is accurate and paid in full. Any credit balance may not be available for four-eight weeks after separation. For account balances, see MyBill (<https://mybill.ucdavis.edu/>).

Davis SHIP coverage for students who submit a PELP application prior to the first day of the *term* terminates once the new term begins. More information regarding continued SHIP eligibility or a refund of SHIP fees (<https://shcs.ucdavis.edu/insurance/uc-ship-forms/>) is available from Davis SHIP (<https://shcs.ucdavis.edu/insurance/>), or call Insurance Services at Student Health & Counseling Services at 530-752-6055.

Any questions regarding canceling a housing contract (<http://housing.ucdavis.edu/how-to-apply/cancel-a-contract-or-lease/>) should be directed to Student Housing; contact [studenthousing@ucdavis.edu](mailto:studenthousing@ucdavis.edu) or call 530-752-2033.

During PELP, students are not eligible for student services. The services listed below may offer optional access. Reach out to them directly to inquire.

- Student Employment Services (<https://hr.ucdavis.edu/departments/shared-services/sso/hr/student-employment-actions/>)
- Student Health & Counseling Services (<https://shcs.ucdavis.edu/>)
- Library (<https://library.ucdavis.edu/library-accounts/>)
- Activities & Recreation Center (ARC) (<https://campusrecreation.ucdavis.edu/membership-join/>)

## Undergraduate Students

Undergraduates may take one PELP leave of up to three consecutive quarters during their academic career at UC Davis. You must submit a PELP application for each term you wish to be on leave.

New undergraduate students should contact Undergraduate Admissions (<http://admissions.ucdavis.edu/faq/faqByTopic.cfm?byTopic=5>) regarding deferral of their admission term before considering PELP. New undergraduate students may apply for PELP after the first day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>) and through the 10th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>).

### Submit Your Application

The undergraduate PELP application is available each term starting with Pass One appointments (<https://registrarnew.sf.ucdavis.edu/calendar/web/registration/>) and closes on the 10th day of instruction

(<https://registrar.ucdavis.edu/calendar/web/quarter/>). Using your kerberos ID and passphrase, complete the PELP webform (<https://registrar-apps.ucdavis.edu/forms/secure/Form.cfm?Form=PELP>).

## Graduate Students

For graduate students, the maximum leave is up to one year.

New graduate students are not eligible for PELP during their first term of instruction and should contact their Graduate Program Advisor prior to the first day of instruction. Continuing graduate students apply ([http://gradstudies.ucdavis.edu/forms/GS338\\_PELP.pdf](http://gradstudies.ucdavis.edu/forms/GS338_PELP.pdf)) for PELP through their Graduate Program.

Graduate Studies (<https://grad.ucdavis.edu/academics/registration-options-non-registered-students/>) can provide additional assistance in the PELP process for graduate students.

## Professional School Students

New professional school students should contact their professional school to defer their admission term. Continuing professional students apply through their professional school.

## Cancellation & Withdrawal; Academic Terms

Cancellation/Withdrawal is the formal and official process that all students must use to notify the university that they no longer wish to continue their studies at UC Davis.

### Academic Terms

Those who cancel/withdraw from the university are no longer considered UC Davis students and will need to complete the Readmission (<https://registrarnew.sf.ucdavis.edu/registration/return/readmission/>) process to return and continue their studies at the university. The amount of any refund or retraction of tuition and fees is determined by the calendar date the Cancellation/Withdrawal webform (<https://students.ucdavis.edu/forms/?form=CancellationWithdrawal>) is received by the Office of the University Registrar, as described by the Schedule of Refunds (<https://registrarnew.sf.ucdavis.edu/registration/leave/refunds/>).

It is critical for any student who attempted to drop all of their classes through Schedule Builder as a method to leave the university to **immediately** complete the Cancellation/Withdrawal webform (<https://students.ucdavis.edu/forms/?form=CancellationWithdrawal>). Failure to complete this form on the **same day** that they have dropped their classes may negatively impact any refund or Return to Title IV Aid (<http://financialaid.ucdavis.edu/consumer/r2t4.html>).

The deadline to submit the online Cancellation/Withdrawal webform (<https://students.ucdavis.edu/forms/?form=CancellationWithdrawal>) is the last day of instruction, and a notation of the separation will be indicated on the official transcript. Notations are not placed on a student's transcript if a student cancels prior to the first day of instruction.

Students wishing to withdraw from a term after the last day of instruction, need to submit a Retroactive Withdrawal (<https://registrar.ucdavis.edu/records/retroactive/>) petition. This process does not remove you from the university.

**Newly Admitted Undergraduate Students.** If you wish to cancel/withdraw prior to the first day of instruction, you must do so using MyAdmissions (<https://myadmissions.ucdavis.edu/>).

The nonrefundable \$250 deposit, paid when you accepted admission and returned your Statement of Intent to Register (SIR), is withheld from tuition and the Schedule of Refunds is applied to the balance of tuition and student fees assessed. Therefore, on or before the first day of instruction, tuition and student fees paid are refunded in full minus \$250. After the first day of instruction, the nonrefundable \$250 deposit is withheld from tuition and the Schedule of Refunds is applied to the balance of tuition and student fees assessed.

**Newly Admitted Graduate Students.** If you wish to cancel/withdraw prior to the first day of instruction, please fill out the Cancellation/Withdrawal webform (<https://students.ucdavis.edu/forms/?form=CancellationWithdrawal>).

**International Students.** With the exception of continuing students attending summer session(s), students in F-1 or J-1 status must contact the Services for International Students & Scholars (SISS) office through iGlobal (<https://iglobal.ucdavis.edu/istart/controllers/client/ClientEngine.cfm?serviceid=EFormPELPCancelorWithdrawlServiceProvider>) prior to or within 24 hours of submitting an online Cancellation/Withdrawal form to prevent immediate termination of their SEVIS record.

## Form

The Cancellation/Withdrawal form is available each term starting with Pass One Appointments (<https://registrarnew.sf.ucdavis.edu/calendar/registration/>) and closes on the last day of instruction.

**Online:** Using your Kerberos ID and passphrase, complete the Cancellation/Withdrawal webform (<https://students.ucdavis.edu/forms/?form=CancellationWithdrawal>).

## Cancellation & Withdrawal; Summer Sessions

Cancellation/Withdrawal is the formal and official process that all students must use to notify the university that they no longer wish to continue their studies at UC Davis. It is also the official process to cancel/withdraw from Summer Session terms. Cancellation/Withdrawal from Summer Sessions does not impact fall enrollment status or registration.

### Summer Sessions

A Cancellation/Withdrawal form must be received by the deadline for **each session** as posted on the Summer Sessions calendar (<https://summer-sessions.ucdavis.edu/calendar/master-calendar/>). The amount of any refund or retraction of tuition and fees is determined by the Summer Sessions calendar (<https://summer-sessions.ucdavis.edu/calendar/master-calendar/>). Select the applicable Summer terms (Session 1, Session II, Special) on the Cancellation/Withdrawal form.

It is critical for any student who attempted to drop all of their classes through Schedule Builder as a method to leave the university to **immediately** complete the Cancellation/Withdrawal webform (<https://students.ucdavis.edu/forms/?form=CancellationWithdrawal>). Failure to complete this form on the **same day** that they have dropped their classes may negatively impact any refund or Return to Title IV Aid (<https://financialaid.ucdavis.edu/undergraduate/summer/cancel/>).

The deadline to submit the online Cancellation/Withdrawal webform (<https://students.ucdavis.edu/forms/?form=CancellationWithdrawal>) is the last day of instruction, and a notation of the separation will be indicated on the official transcript. Notations are not placed on a student's transcript if a student cancels prior to the first day of instruction.

Students wishing to withdraw from a term after the last day of instruction, need to submit a Retroactive Withdrawal (<https://registrar.ucdavis.edu/records/retroactive/>) petition. This process does not remove you from the university.

## Form

The Cancellation/Withdrawal form is available when summer Registration Appointments (<https://summer-sessions.ucdavis.edu/calendar/master-calendar/>) are available and closes on the last day of instruction.

**Online:** Using your Kerberos ID and passphrase, complete the Cancellation/Withdrawal webform (<https://students.ucdavis.edu/forms/?form=CancellationWithdrawal>).

## Administrative Withdrawals

### Entry Level Writing Requirement

The University of California requires every undergraduate student to demonstrate college-level proficiency in English composition. Satisfaction of the Entry Level Writing Requirement is a prerequisite to all other undergraduate courses in English. If the requirement has not been satisfied by the end of your third quarter, and you were not required to take courses for non-native speakers of English in the Linguistics program, you may be **disenrolled from the University**. For further information, see the Entry Level Writing Requirement (<http://elw.ucdavis.edu/>).

### Disqualification

A student will be placed on notice or subject to disqualification for failure to meet qualitative (<https://registrar.ucdavis.edu/records/transcripts/academic-standing/>) or quantitative (<https://registrarnew.sf.ucdavis.edu/registration/leave/administrative-withdrawals/>) standards of scholarship. Students should go to their college Dean's office for information and academic advising regarding notice and dismissal.

Dismissal for either qualitative (<https://registrar.ucdavis.edu/records/transcripts/academic-standing/>) or quantitative (<https://registrarnew.sf.ucdavis.edu/registration/leave/administrative-withdrawals/>) reasons is the decision of the college Dean. Such dismissal is from the University of California *system* and not simply the college or the UC Davis campus. Dismissed students will automatically receive a full refund of tuition and fees for the term.

Students who have been dismissed but wish to be readmitted to the UC Davis campus must complete an Undergraduate Readmission Application (<https://registrarnew.sf.ucdavis.edu/registration/return/readmission/>) and any contractual agreement made with the college.

### Office of Student Support & Judicial Affairs

The Office of Student Support & Judicial Affairs (OSSJA) may notify the Office of the University Registrar to administratively withdraw a student due to disciplinary action. Administrative withdrawals are subject to the Schedule of Refunds (<https://registrarnew.sf.ucdavis.edu/registration/leave/refunds/>) as determined by the date the notification

is received from OSSJA. For more information, see OSSJA (<http://sja.ucdavis.edu/discriminatory-process.html>).

## Drop for Non-Payment

Drop for Non-Payment (<https://registrar.ucdavis.edu/tuition/non-payment/>) occurs for students who do not pay their fees by the published deadlines (<https://registrarnew.sf.ucdavis.edu/calendar/fees/>).

*Students who no longer wish to remain enrolled in classes for the term **must** complete a Cancellation/Withdrawal form. They should not use or expect the drop for non-payment process to remove them from their classes, or release them from their financial responsibility and obligations for the term.*

## Break in Registration & Enrollment

If, at any time, you do not register for an active term, do not submit a Planned Educational Leave Program (PELP) form (<https://registrarnew.sf.ucdavis.edu/registration/leave/pelp/>), or do not return from PELP in the approved term, it is considered a break in registration and enrollment, and you are no longer considered a continuing student. If you wish to return to the university after a break in registration and enrollment, you must submit a Readmission Application (<https://registrarnew.sf.ucdavis.edu/registration/return/readmission/>).

## Completing Your Degree

*Content on this page is updated throughout the academic year.*

## Undergraduate Student Graduation & Commencement

To apply for graduation, undergraduate students are required to complete the Online Graduation Application (<https://registrar-apps.ucdavis.edu/graduation/>) by the posted graduation application deadlines. Students who wish to apply to graduate but have been separated from the University for at least three months must contact the Office of the University Registrar (<https://registrarnew.sf.ucdavis.edu/contact/index/>).

To participate in the Commencement Ceremony (<http://commencement.ucdavis.edu/>), a student **must** register to walk. **These are separate actions.**

To provide evidence of graduation and the completion of the degree requirements prior to the formal degree posting to the student record, please refer to the Education Verifications (<https://registrar.ucdavis.edu/records/verifications.cfm>) webpage.

### Graduation Checklist

- Submit Online Graduation Application (<https://registrar-apps.ucdavis.edu/graduation/>).
- Refer to the Commencement (<http://www.ucdavis.edu/commencement/>) website to file for participation in the commencement ceremony.
- File a M (<https://registrar.ucdavis.edu/records/changes-major-minor/>)inor Declaration w (<https://registrar.ucdavis.edu/records/changes-major-minor/>)ebform (<https://registrar.ucdavis.edu/records/changes-major-minor/>) with the appropriate college Dean's office by their respective deadline.
- If you need to declare a major change, submit your C (<https://registrar.ucdavis.edu/records/changes-major-minor/>)hange of Major webform (<https://registrar.ucdavis.edu/records/changes-major->

minor/) at least one quarter prior to the quarter in which you filed to graduate.

- See a major advisor to confirm your major requirements are satisfied.
- Request a degree check from the appropriate Dean's office to evaluate university and college requirements at least two quarters prior to graduation.
- Verify transcripts for all transfer coursework have been submitted to Undergraduate Admissions (<http://admissions.ucdavis.edu/>) for evaluation.

**Note:** This is **not** an inclusive list. For more detailed information, contact:

- College of Agricultural & Environmental Sciences (<https://caes.ucdavis.edu/>)
- College of Biological Sciences (<http://basc.ucdavis.edu>)
- College of Engineering (<http://engineering.ucdavis.edu/>)
- College of Letters & Science (<http://ls.ucdavis.edu/>)
- Graduate School of Management (p. 67)

**Note on Minors.** Minors are not added to student records until approximately a month after the student's graduation date; after their graduation is approved by the dean's office. Do not wait for your minor to show up on your record before applying to graduate. Add the minor in your application, it will be added to your record later.

### Cancelling Graduation After You Have Applied

If you need to cancel your application for graduation, return to the Online Graduation Application (<https://registrar-apps.ucdavis.edu/graduation/>) and select the option to cancel your application.

### Graduation Calendars

Undergraduate students must complete their graduation application by the appropriate deadline for the quarter in which they are filing to graduate. Late applications for graduation are **not** accepted. The application deadlines are as follows:

#### Winter Quarter 2025

Graduation Application Period	10/21-12/2/2024
Graduation Cancellation Deadline	3/7/2025
Graduation Date	3/21/2025
Degree Posting	Mid-May 2025
Diploma Distribution	Mid-June 2025

#### Spring Quarter 2025

Graduation Application Period	1/13-3/7/2025
Graduation Cancellation Deadline	7/7/2025
Graduation Date	6/12/2025
Degree Posting	Early-August 2025
Diploma Distribution	Early-September 2025

#### Summer Quarter 2025

Graduation Application Period	5/14-7/18/2025
Graduation Cancellation Deadline	9/8/2025
Graduation Date	9/12/2025
Degree Posting	Mid-October 2025
Diploma Distribution	Mid-November 2025

## Fall Quarter 2025

Graduation Application Period	7/14-9/5/2025
Graduation Cancellation Deadline	12/1/2025
Graduation Date	12/12/2025
Degree Posting	Mid-February 2026
Diploma Distribution	Mid-March 2026

## Winter Quarter 2026

Graduation Application Period	10/20-12/1/2025
Graduation Cancellation Deadline	3/6/2026
Graduation Date	3/20/2026
Degree Posting	Mid-May 2026
Diploma Distribution	Mid-June 2026

## Spring Quarter 2026

Graduation Application Period	1/12-3/6/2026
Graduation Cancellation Deadline	7/6/2026
Graduation Date	6/11/2026
Degree Posting	Early August 2026
Diploma Distribution	Early September 2026

## Terms

- **Graduation Date.** The official graduation date as it appears on the academic record.
- **Degree Posting Date.** The day your degree is posted to your academic record.
- **Diploma Distribution Date.** The date your diploma is available for mailing.

## Graduate Students

Graduate students must contact Graduate Studies for candidacy information regarding filing fee deadlines for Masters and Doctoral Students. Information for degree candidates is available at:

- Filing Your Thesis or Dissertation (<https://grad.ucdavis.edu/finishing-your-degree/>)
- Finishing the M.F.A. of the Master's Plan II (<https://grad.ucdavis.edu/finishing-your-degree/>)
- Graduate Studies Calendar & Deadlines (<http://gradstudies.ucdavis.edu/students/calendar.html>)
- Information for Degree Candidates ([http://gradstudies.ucdavis.edu/students/degree\\_candidates.html](http://gradstudies.ucdavis.edu/students/degree_candidates.html))

For further information, see Graduate Studies (<http://gradstudies.ucdavis.edu/about/directory.html>).

## Professional Program Students

Professional program students must contact their program office for information regarding candidacy information:

- School of Education (<http://education.ucdavis.edu/>)
- School of Law (<https://law.ucdavis.edu/registrar/>)
- School of Medicine (<http://www.ucdmucdavis.edu/mdprogram/registrar/>)
- School of Nursing (<https://health.ucdavis.edu/nursing/>)
- School of Veterinary Medicine (<https://www.vetmed.ucdavis.edu/contact/>)

## Returning to UC Davis

For any term a student does not register and is not on an approved leave of absence, the student is considered non-continuing and must apply for readmission to return to an active status. Undergraduate students who have not been degree awarded may apply for readmission through the Online Advising Student Information System (OASIS) (<https://students.ucdavis.edu/forms/?form=ReadmissionApplication>).

Students in graduate programs or professional schools apply for readmission through their Graduate Studies (<https://grad.ucdavis.edu/withdrawal-readmission/>) or their Professional School (<https://www.ucdavis.edu/academics/professional-programs/>).

The University of California, Davis offers limited admissions options for a second baccalaureate degree (<https://www.ucdavis.edu/admissions/undergraduate/transfer/special-situations/>).

## Undergraduate Readmission

Former UC Davis undergraduate students, who have not been degree awarded and wish to resume undergraduate studies, may apply for readmission. This includes students who have canceled/withdrawn or have been administratively withdrawn from the university.

Students on the Planned Educational Leave Program (PELP) (<https://registrar.ucdavis.edu/registration/leave/>) should not apply for readmission unless they did not return as scheduled from their approved PELP leave.

The readmission application must be completed and submitted online. There is a non-transferable/non-refundable \$70.00 application fee\* that is assessed to the student's account.

\* Students returning from United States military service and Educational Opportunity Program (EOP) eligible students are not required to pay the application fee. Students returning from US military service must upload a copy of their active-duty paperwork along with their readmission application. Eligible EOP students are not presented with payment information.

Readmission deadlines:

- Fall: August 31st
- Winter: October 31st
- Spring: January 31st

When the readmission application has been submitted and the fee has been assessed, a confirmation email is sent through *MyMessages* through myucdavis. Former students who cannot access *MyMessages*, need to provide an alternate email address when completing the application. The college Dean's Office reviews the student's file and sends a decision email to the student. Response time from the college Dean's Office varies and is dependent on the student's academic standing, and receipt of transcripts or other required items. Students approved for readmission are activated for the readmit term and assigned pass times by the Office of the University Registrar.

Students approved for readmission should review the Readmission Checklist, below, and complete all steps to gain access to registration and successfully return to the university.

Students who have completed any college or university coursework while away from UC Davis must submit an official transcript to their

college Dean's Office and an additional official copy to the Office of Undergraduate Admissions (<https://www.ucdavis.edu/admissions/undergraduate/contact/>). Failure to do so by the end of the readmitted term results in a registration hold for future registration.

Students should read the California Residence for Purposes of Tuition (<https://registrar.ucdavis.edu/tuition/residence/>) information to determine if a Statement of Legal Residence (SLR) is required after being approved for readmission.

## Submit Your Application

Using your Kerberos ID & passphrase, complete the Readmission webform. (<http://students.ucdavis.edu/login/?Form=ReadmissionApplication>)

## Readmission Checklist

Students approved for readmission should follow this checklist and complete all of the actions:

1. Residence Classification for Purposes of Tuition in Your Readmitted Quarter—Statement of Legal Residence (SLR). To request an SLR after your approved readmission, contact a Residence Deputy at [residedeputy@ucdavis.edu](mailto:residedeputy@ucdavis.edu).

- *Away less than one year.* Students who attended UC Davis one, two or three quarters ago, a Statement of Legal Residence is not required, if a U.S. Citizen.
- *Away more than one year.* Students who have been away from UC Davis more than three quarters, or are not a U.S. citizen, must complete an SLR when approved for readmission. An email notice from a Residence Deputy is sent providing a link to the online SLR, or students may also request a link to the SLR by emailing a Residence Deputy when readmission is approved.
- *Nonresident Students.* Students who were classified as nonresidents during their previous attendance and who seek resident classification for their readmitted quarter should contact a Residence Deputy, as soon as possible upon readmission approval.

### 2. Noncitizens & International Students

- If your immigration status has changed since your last term of attendance, immediately notify a Residence Deputy (<https://registrar.ucdavis.edu/tuition/residence/>) at the Office of the University Registrar, and be prepared to provide copies of your immigration documents.
- If your Readmission Application is approved, you should contact your SISS International Student Advisor (<https://siss.ucdavis.edu/contact-us/>) to learn how to update your immigration document.

### 3. Official Transfer Transcripts

- An official copy must be sent to and received by the college Dean's Office (<https://www.ucdavis.edu/academics/colleges-and-schools/>).
- An official copy must be sent to and received by the Office of Undergraduate Admissions (<https://www.ucdavis.edu/admissions/undergraduate/transcripts-test-scores/>).

4. Contact Student Accounting (<https://financeandbusiness.ucdavis.edu/student-resources/accounting/loans/holds/>), if you have any of the following hold(s) on your account:

- *ZF-Student Accounting Exit Interview Hold*, call Student Accounting at 530-752-5870. Registration is blocked until this hold is removed.

- *ZD-Student Accounting Long Term Loan Hold*, call Student Accounting at 530-752-3646. Registration is blocked until this hold is removed.

5. Financial Aid (<https://financialaid.ucdavis.edu/contact/offices/>)

- Apply for Financial Aid by filing FAFSA or California Dream Act (CADAA) Application.
  - Check for any outstanding requirements under the "Requirements tab", the "Loan tab", and the "Academic Progress tab". All requirements must be met before aid can be authorized. If you are Not in Good Standing, you will need to submit a SAP Appeal (<https://financialaid.ucdavis.edu/consumer/sap/appeal-instructions/>). Do submit a Change in Aid, to inform Financial Aid what term you will be returning. If you are not able to log into MyAwards, please contact ([https://my.ucdavis.edu/ask\\_us/?topic\\_id=400](https://my.ucdavis.edu/ask_us/?topic_id=400)) Financial Aid and Scholarships.

6. Campus Computing Account

- Three to four days after receiving approval from the college Dean's Office, activate or check on the status of your campus computing account at Information & Educational Technology (<http://computingaccounts.ucdavis.edu/>). It may take up to 48 hours for your activated account to be accessible to you.

7. Registration Process

- After your campus computing account is activated, check Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>) to see when your pass times are available.
- Register via Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>).

8. Pay Fees

- Check your account balance through MyBill (<https://mybill.ucdavis.edu/>). You will not receive a paper bill. If you have not enrolled by the end of Pass One registration, you may check the Account Detail on MyBill (<https://mybill.ucdavis.edu/>) the day after you enroll.
- Payments can be made in person (<https://financeandbusiness.ucdavis.edu/student-resources/cashier/>) by personal check, Cashier's Check, Money Order, or cash. Online payment by wire transfer, refer to UC Davis Cashier & Payment Solutions Office website (<https://cashier.ucdavis.edu/students/>) 'Electronic Funds Transfer' link for more details.
- To avoid being dropped from your classes due to non-payment (<https://registrarnew.sf.ucdavis.edu/tuition/non-payment/>), pay your student fees by the Student Fee Payment Deadline (<https://registrarnew.sf.ucdavis.edu/calendar/web/fees/>).

9. Account Balance

- If you have a prior term balance a hold will be placed on your student account which will prevent registration. Ensure any previous balances are paid so that your registration is not delayed.

10. Academic Advising (<https://registrarnew.sf.ucdavis.edu/registration/plan/academic-advising/>)

- Contact your Academic Advisor to clarify any questions you may have about selecting courses to complete your academic plan.

For other questions about the Readmission process, contact the Office of the University Registrar (<https://registrarnew.sf.ucdavis.edu/contact/>).

## Graduate Studies & Professional Schools

Students on the Planned Educational Leave Program (PELP) (<https://registrar.ucdavis.edu/registration/leave/pelp/>) should not file for readmission unless they did not return as scheduled from their approved PELP leave.

Students should read the California Residence for Purposes of Tuition (<https://registrar.ucdavis.edu/tuition/residence/>) information to determine if a Statement of Legal Residence (SLR) is required after being approved for readmission.

### Graduate Studies

Information regarding readmission to a graduate program at UC Davis is available at Graduate Studies (<https://grad.ucdavis.edu/withdrawal-readmission/>).

There is a non-transferable/non-refundable \$70.00 application fee\* that is assessed to the student's account.

\*Students returning from US military service are not required to pay the application fee and must upload a copy of their active-duty paperwork along with their readmission application.

### Professional Schools

For more information regarding readmission to a professional school, contact:

- Graduate School of Management (<http://gsm.ucdavis.edu/>)
- School of Education (<http://education.ucdavis.edu/>)
- School of Law (<http://www.law.ucdavis.edu/>)
- School of Medicine (<https://health.ucdavis.edu/medical-school/>)
- School of Nursing (<https://health.ucdavis.edu/nursing/>)
- School of Veterinary Medicine (<http://www.vetmed.ucdavis.edu/>)

## Retroactive Changes

### Retroactive Actions

Retroactive actions include any action or change to a student's academic record that alters information in a term after the start of finals for that term. Petitions for retroactive changes are governed by the Academic Senate Committee on Grade Changes (<http://academicsenate.ucdavis.edu/GCC/>)*Grade Change Committee*<sup>1</sup>. This includes petitions for retroactive withdrawal, and retroactive modification of a single course; e.g., drop, add, unit change, or grade mode change.

Questions about the retroactive petition process should be directed to a Grade Change Deputy ([gradechanges@ucdavis.edu](mailto:gradechanges@ucdavis.edu)) in the Office of the University Registrar. For information on the Grade Change Committee, review the Committee's published guidelines (<http://academicsenate.ucdavis.edu/GCC/>). For all petitions, careful writing and documentation is advisable because petitioners do not attend meetings of the Grade Change Committee. Retroactive Petitions and the accompanying supporting documentation **should not exceed eight pages** and should not include photos or prescription medication information. Petitions without documentation or exceeding the eight-page limit will not be accepted.

The Grade Change Committee generally meets once per month during the academic year (from October to June) and the submission deadline for each meeting is generally the 15th of the previous month. Scheduled meetings and current membership may be found at Grade Changes Committee ([http://academicsenate.ucdavis.edu/committees/committee-list/grade\\_changes/](http://academicsenate.ucdavis.edu/committees/committee-list/grade_changes/)).

### Retroactive Withdrawal

To withdraw from the University after close of business on the last day of instruction, students submit a Retroactive Withdrawal Petition, along with a written statement explaining the situation and any supporting documentation to the Office of the University Registrar. Petitions without supporting documentation will not be accepted. The Grade Change Committee will review all Retroactive Withdrawal Petitions and approval will be granted only in the most unusual circumstances and only in those cases where it is clear that by not approving the petition the student would be treated unfairly, Davis Division Regulation 547(D) (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#547-2>).

### Retroactive Changes

A student wishing to petition to retroactively modify an individual course; e.g., add or change units, should complete a Petition for Retroactive Change ([https://local-resources.ucdavis.edu/local\\_resources/forms/D029-retro-change.pdf](https://local-resources.ucdavis.edu/local_resources/forms/D029-retro-change.pdf)) and submit it to his or her instructor. The instructor should then note whether or not they support the petition, sign the petition, and then submit the petition on the student's behalf to the Office of the University Registrar. Students are not permitted to submit Petitions for Retroactive Change directly to the Office of the University Registrar. If the instructor for a course is not available, the student should work with the department to submit the petition.

### Retroactive Drop & Grade Mode Change

To drop or change the grade mode of a course retroactively, students need to complete a Petition for Retroactive change, along with a written statement explaining the situation and any supporting documentation to the Office of the University Registrar. Before submitting your Petition, please review the Grade Change Committee Guidelines (<http://academicsenate.ucdavis.edu/GCC/>) for Retroactive Drop and Grade Mode Change (items #5, #9, & #10). Petitions that fail to meet the Committee Guidelines or without supporting documentation will not be accepted. Please leave the Department Use Area blank and submit your Petition by email to the Grade Change Deputies ([gradechanges@ucdavis.edu](mailto:gradechanges@ucdavis.edu)).

## 1 Davis Division Grade Change Committee (GCC) Guidelines

Davis Division Grade Change Committee (GCC) guidelines (<http://academicsenate.ucdavis.edu/GCC/>)

### About

The Grade Changes Committee advises on matters of grade change policy and adjudicates grade change requests that are not unambiguously justified by the Regulations of the Academic Senate.

### Grade Change Guidelines

The Grade Change Committee (hereafter, "the Committee"), reviews all retroactive and grade change requests not unambiguously justified by the Regulations of the Academic Senate and of the Davis Division; the Committee is governed by Davis Division Bylaw 79. The Committee is dedicated to the academic standards, educational mission, and Principles

of Community (<https://diversity.ucdavis.edu/principles-community/>) of UC Davis, and will review all petitions on a case-by-case basis to determine appropriate action. Petitioners to the Committee should understand that even in cases when the Committee may be sympathetic, the Committee is still required to abide by its own published Guidelines (below) and the Regulations of the Academic Senate. Approval authority to make certain determinations on the behalf of the Committee is delegated to the Deputy to the Committee in the Office of the University Registrar (hereafter, "Grade Change Deputy"), as noted below. The Committee reserves the right to determine when a petition warrants an exception to the below Guidelines.

Petitions for Retroactive/Grade Change should be made in writing and submitted to the Office of the University Registrar; careful writing and documentation is advisable, because petitioners do not attend meetings of the Committee. Questions regarding the Committee or the Retroactive/Grade Change process should be directed to the Grade Change Deputy in the Office of the University Registrar, who may be contacted at [GradeChanges@ucdavis.edu](mailto:GradeChanges@ucdavis.edu).

Please note that petitioners are NOT permitted to contact Committee members directly regarding their petition. Doing so may result in denial of the petition or other action.

1. Any retroactive petition must be submitted within three academic quarters in residence. Petitions submitted after this time period must explain and document why the retroactive action being sought was delayed.
  - a. If the Committee defers a petition for more information, the petitioner has until the end of the following regular academic term to respond to the deferral before the petition is denied.
2. If a petition is denied by the Committee, a student may appeal one time, within one academic quarter, with substantial and new information. To appeal a denied petition, petitioners should submit a letter of appeal to the Office of the University Registrar with any additional documentation attached. A denial of an appeal is considered to be the final decision of the Committee; a second appeal will ordinarily not be considered by the Committee.
  - a. Bona fide appeals of final decisions made by the Committee may be referred to the Student Petitions Subcommittee of the Executive Council of the Academic Senate. However, appeals are limited to confirming that the Committee did not act in an arbitrary or capricious manner in making its determination and that the final decision was based on substantial evidence. The Student Petitions Subcommittee will not substitute its judgment on the substantive merits of the case for the judgment of the Committee.
3. After a degree has been awarded to a student, his or her record is closed. The Committee will consider requests only when they concern clerical or procedural error. The Committee will not consider retroactive drops or withdrawals after a degree has been awarded. Petitions made outside of the timeline specified in paragraph one will only be approved in exceptional cases.
4. Clerical or Procedural Errors. The Grade Change Deputy may approve all petitions that involve clerical or procedural errors. Such petitions must meet all other standards set forth by the Committee and the Academic Senate.
  - a. "Clerical or Procedural Error" is generally interpreted by the Committee to imply that an error made by someone other than the student (e.g. instructor or staff adviser).

- b. Ignorance on the part of a student regarding university policy is not generally considered valid justification for retroactive action.
5. Petitions to change grade modes retroactively (i.e., to or from P/NP or S/U grading) will not be approved by the Committee except in cases of clerical or procedural error, even if based on academic need.
  - a. Grade mode changes needed for graduation. The Committee may authorize a retroactive change of grade mode if the grade mode change is the only thing preventing him or her from satisfying graduation requirements. In such cases, the student is expected to provide documentation of this situation, including that an exception by the graduation certifying authority is not possible. The Committee expects students to pursue grade mode changes for this reason only as an avenue of last resort.
  - b. Grade mode changes will not be granted for the reason of raising a student's GPA, even if such a change would allow the student to graduate.
6. All grades except Incomplete or In Progress are final when filed by the instructor in the end-of-term course report (see DD Regulation A540E ([http://academicsenate.ucdavis.edu/bylaws\\_and\\_regulations/regulations.cfm#A540-](http://academicsenate.ucdavis.edu/bylaws_and_regulations/regulations.cfm#A540-))). The Committee, like the instructor, has no authority to reassess or re-evaluate student work; only if it can be documented that a clerical or procedural error was made will the Committee have authority to alter the grade.
  - a. All requests for a change of grade involving Incomplete must be accompanied by a copy of the Incomplete form filed with the original grade report, or documentation that the Incomplete grade agreement was made during the term. An instructor may not assign an Incomplete grade after a grade has been submitted, except in cases in which the Incomplete grade was not assigned due to clerical or procedural error or a documented emergency prevented the student from asking for the Incomplete until after grades were submitted.
  - b. Petitions to drop an 'F' grade (or equivalent) because the student never participated in the class should include documentation about why the course was not dropped by the normal deadline or was not dropped after that deadline through a petition to the appropriate Dean's Office. Mistakes in registration do happen, but this Committee's presumption will be that the student could have checked their registration electronically and with minimal inconvenience. It is the student's responsibility to check their schedule and be aware of the deadlines by which they can make adjustments in a timely manner.
7. If a student petitions to drop or withdraw retroactively because of a disability, the Committee will consider the disability aspect of the petition only if the student has first contacted the Student Disability Center ("SDC," <http://sdc.ucdavis.edu> (<http://sdc.ucdavis.edu/>))) and the SDC has determined that the student has a qualifying disability and is eligible to receive reasonable accommodations. The Committee will consider only the time period (generally, no more than one quarter) before the SDC disability determination. Once SDC has determined that a student is eligible to receive reasonable accommodation, the Committee assumes that such accommodations have been sought by the student and provided through SDC. The Committee will work with SDC and a student to implement any reasonable accommodations that are necessary to allow the student equitable opportunity to participate in the petition process.
8. The Grade Change Deputy may approve the following petitions to add courses retroactively, without referring the petition to the Committee:
  - a. If the student was on the waitlist for the course and this can be documented; if the student was issued a Permission-to-Add

- ("PTA") number for the course; if it can be reasonably verified that the student intended to add the course to his or her schedule during the quarter. Such petitions must meet all other standards set forth by the Committee and the Academic Senate.
- b. For the following courses, even if the conditions above are not met: PE Activity courses (PHE 1 and 6); music rehearsal courses; internship units; and research units. Such petitions must meet all other standards set forth by the Committee and the Academic Senate.
9. Petitions to drop or withdraw retroactively are the most difficult cases for the Committee to evaluate. All petitions to drop or withdraw retroactively must show evidence that a hardship occurred at a crucial time in the academic calendar (e.g., the week of final examinations), extended over a significant period, or offer sufficient justification as to why action was not taken to drop the petitioned course during the quarter. Similarly, evidence that the student attempted to rectify the situation within a few weeks is more compelling than evidence that no help was sought for months or years. The Committee will be very reluctant to grant any retroactive action for more than one quarter. The majority of requests for retroactive drops and withdrawals will offer as justification one of the following reasons, some of which are more convincing than others:
- a. Financial Hardship. Ordinarily the Committee will grant such a petition only if there has been a sudden change in the student's financial situation during the quarter. The student must provide documentation of the financial hardship.
  - b. Health Problems. In some instances health problems may be grounds for granting a request for a retroactive action even without a disability determination from the Student Disability Center (see paragraph 7 above on disabilities). These health problems must be well documented. To be persuasive, medical documentation should come from a physician or similarly licensed professional and describe the severity, timing, and duration of the health problem. Medical bills and receipts are generally not sufficient.
  - c. Disability. See paragraph 7 above.
  - d. Family Hardship. The death or severe illness of an immediate family member may be considered grounds for retroactive drop or withdrawal.
  - e. Sexual Trauma. Exposure to any sexually abusive behaviors may justify a retroactive drop or withdrawal.
  - f. Personal Problems. Breaking up with a romantic partner will not generally be considered sufficient justification for a retroactive drop or withdrawal. Difficulties with landlords or roommates will not generally be considered sufficient justification for a retroactive drop or withdrawal. The Committee will consider legal entanglements or other time consuming procedures that may arise from such problems, but these must be well documented.
  - g. Problems with drugs, alcohol, or violent behavior. Generally, these are not considered sufficient justification for a retroactive drop or withdrawal.
  - h. Academic Need. Retroactive drops or withdrawals for reasons of academic need will not be approved. That the quality of a student's work does not represent the student's academic potential is not a valid reason, in and of itself, for retroactive action. The following are some common reasons for petitioning to the Committee that are frequently cited by petitioners but routinely denied: retroactive drops or withdrawals so that a student can improve their record for applying to graduate school or other program; the retroactive drop of a course in which a student did poorly but is no longer required for degree completion; retroactive drops or withdrawals so that a student may circumvent campus repeat rules; and the retroactive drop of course for the reason that the student did poorly.
10. Requests to retroactively drop one or two courses, but not the entire quarter, will ordinarily be regarded as "selective" and will not be granted. The Committee will consider the possibility that one particular course was adversely affected more than other courses by situations as described in paragraph nine, but the Committee will require strong evidence.
- a. Incomplete Grades. A course in which a student has received an Incomplete grade notation will not normally be dropped, except in situations outlined in paragraph nine. In accepting the Incomplete grade, the student does obligate herself or himself to complete the work. The Committee does not drop Incomplete grades because too much time has passed. The Committee will not drop Incomplete grades that have become permanent (see DD Reg A540C [http://academicsenate.ucdavis.edu/bylaws\\_and\\_regulations/regulations.cfm?#A540-](http://academicsenate.ucdavis.edu/bylaws_and_regulations/regulations.cfm?#A540-))
  - b. ENWS Notations. The Enrolled - No Work Submitted ("NS") notation cannot be dropped unless a documented clerical or procedural error has occurred (NOTE: this notation has been eliminated as a grading option as of Fall 2012). The NS notation will not be dropped for the reason of refunding a student's fees for a past term.
  - c. Repeats. A course in which a student has received a passing grade will not be dropped for the purpose of allowing the student to retake the class for a higher grade. A course will not be dropped in order to allow the student to repeat the course counter to campus rules.
  - d. Y Grades. Current/prior Y grades will only be considered for retroactive drops and withdrawals under exceptional circumstances. Y grades that have converted to an F will not be approved for a retroactive drop
11. Retroactive action will not be taken by the Committee for reasons of academic need or for the purpose of refunding a student's fees. The Committee does not make decisions relating to fee refunds, admission, readmission, or dismissal/reinstatement; statements regarding these matters should not be made in petitions to the Committee.
12. If a petition to add a course retroactively is approved by the Committee or on its behalf for a course in the regular quarter or during summer session, the student is required to pay all necessary fees.
13. For retroactive petitions that concern the Education Abroad Program (EAP), a recommendation from the Committee on International Studies and Exchanges may be sought. In most situations the Grade Change Committee will support those recommendations. Because of the time involved for routing EAP petitions, said petitions are first on the agenda.
- a. Requests to retroactively change grade modes for a class taken while on an EAP or equivalent program will be held to the same standards for this type of change as those taken on-site at UC Davis.
14. The Committee will review all retroactive petitions, also including grade changes for UC Davis Extension students enrolled in UC Davis classes. The UC Davis Extension student should provide a copy of her or his Extension transcript along with the petition.
15. Grade Disputes, Discrimination, and Arbitrary Treatment:

- a. Challenging an instructor's grade. If the Committee finds that a clerical or procedural error has resulted in a student receiving an incorrect grade, it may authorize a change even if the faculty member who awarded the grade is opposed, if an appropriate grade can be determined. Generally, the Committee will require the student to have discussed the matter with the faculty member and the department chairperson. The Committee, like the instructor, has no authority to reassess or re-evaluate student work; only if it can be documented that a clerical or procedural error was made will the Committee have authority to alter the grade. The student will be expected to bear the burden of proving that a clerical or procedural error occurred and caused the incorrect grade to be assigned.
- b. Discrimination or Arbitrary Treatment. If a student petitions for a retroactive change due to alleged discrimination or arbitrary treatment (as defined by Policy and Procedural Manual 400-15, Section VI.H (<https://ucdavispolicy.ellucid.com/documents/view/39/active/>)) the Committee will consider this aspect of the petition only after the student has first contacted Harassment & Discrimination Assistance and Prevention Program ("HDAPP" <https://hdapp.sf.ucdavis.edu/contact-us> (<https://hdapp.sf.ucdavis.edu/contact-us/>)). If the Committee determines that discrimination or arbitrary treatment was the cause of or motivation behind the assignment of an incorrect grade, it may authorize a change if an appropriate grade can be determined. The Committee may also determine if discrimination or arbitrary treatment rises to the level of a retroactive drop of the affected course.
- 16. If a student cites an advising error by a university staff or faculty adviser in his or her petition to the Committee, the student should provide documentation of the advising error with the petition. Even in cases of documented advising errors, the Committee may deem it more appropriate that an exception be made by the adviser than for retroactive action to be taken by the Committee.
- 17. The Committee reserves the right to deny a petition, even if good cause for granting such a petition exists, if it determines that the petition represents a likely abuse of the retroactive petition process or attempt to circumvent other university rules and procedures.

*Revised GCC 6-19-2023 dg*

## **2 Davis Division Regulation 547(D)**

Davis Division Regulation 547(D) (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#547->)

(D) To drop a course or withdraw from the University after close of business on the last day of instruction for the term, or, for summer sessions (excluding special session) the close of business on the last day of instruction in the fifth week of the session, the student or an appropriate faculty member must submit a petition to the Davis Division Grade Changes Committee or, for professional faculty or students in professional courses in their own professional schools, to the grade change committee of that school. Approval will be granted only in the most unusual circumstances and only in those cases where it is clear that by not approving the petition the student would be treated unfairly. (Am. 9/1/2013)

# **Student Conduct & Responsibilities**

Office of Student Support & Judicial Affairs (<https://ossja.ucdavis.edu/>),  
530-752-1128

The Office of Student Support & Judicial Affairs (OSSJA) supports the University's educational mission by assisting students in need, promoting student development, and upholding standards of academic honesty and responsible behavior.

## **Student Responsibilities**

UC Davis policies serve to:

- Support the safety and security of all members of our community.
- Promote responsible and engaged involvement in the campus community.
- Uphold the University's standards of excellence in education.
- Promote the ethical, intellectual, and emotional growth and development of students involved in the disciplinary process.
- Ensure compliance with federal, state and local laws and regulations.

Students are responsible for complying with the announcements and regulations in the UC Davis General Catalog (<https://catalog.ucdavis.edu/>) and with all policies of the university and this campus. The student conduct staff in OSSJA uphold campus standards of academic honesty and student conduct by resolving alleged violations of university policies. The Code of Academic Conduct (<https://ossja.ucdavis.edu/code-academic-conduct/>) and other policies related to student conduct may be found on the Policies (<https://ossja.ucdavis.edu/policies/>) page at the Office of Student Support & Judicial Affairs (<https://ossja.ucdavis.edu/>). Students must meet all university obligations in order to register for courses or receive transcripts of record and diplomas.

We work to educate students on these policies and support them in their efforts to ensure that their academic work aligns with them. As some policies are not intuitive, please review the Code of Academic Conduct (<https://ossja.ucdavis.edu/code-academic-conduct/>) and our Suggestions for Avoiding Academic Misconduct (<https://ossja.ucdavis.edu/suggestions-avoiding-academic-misconduct/>) to ensure that you are fully aware of expectations and can take proactive steps to avoid being suspected of misconduct.

Finally, we recognize that being a student can be very stressful and, when people are feeling overwhelmed, it can be harder to make good decisions. Students who are pressed for time or trying to cope with significant stress can be more likely to succumb to the temptation to cheat. Strive to start studying and working on assignments early and attend to your stressors. Get help from the many UC Davis resources (<https://ebeler.faculty.ucdavis.edu/resources/faq-student-resources/>) as soon as you notice that you're having difficulty.

# ACADEMIC ADVISING & SUPPORT SERVICES

## Undergraduate Academic Advising

To help you get the most from your education, UC Davis offers many different types of academic advising. College advisors assist you in meeting degree requirements and taking maximum advantage of available university resources. A conference at least once a quarter with your faculty or staff advisor is especially desirable during your first year and during your final quarters preceding graduation.

For complete academic advising information, see the College of:

- Agricultural & Environmental Sciences (<http://www.caes.ucdavis.edu/students/advising/>)
- Biological Sciences (<http://basc.ucdavis.edu/>)—first-year matriculating students must meet with a Biology Academic Success Center (BASC) advisor (<https://cbsapps.ucdavis.edu/Advising/>).
- Engineering (<http://engineering.ucdavis.edu/undergraduate/advising/>)—requires an annual mandatory advising check-in (<https://engineering.ucdavis.edu/undergraduates/academic-advising/mandatory-advising/>).
- Letters & Science (<https://ls.ucdavis.edu/advising/>)—requires first-year mandatory advising (<https://lettersandscience.ucdavis.edu/mandatory-advising/>).

## Graduate Academic Advising

- Graduate Studies Advising (<https://grad.ucdavis.edu/senior-academic-advisors-graduate-studies/>)
- Filing Your Thesis or Dissertation (<https://grad.ucdavis.edu/preparing-filing-your-thesis-or-dissertation/>)
- Completing the Master's Plan II or M.F.A (<https://grad.ucdavis.edu/passing-masters-examination/>).
- Publishing Options, Embargo, & Copyright (<https://grad.ucdavis.edu/publishing-options-embargo-copyright/>)
- Diplomas, Transcripts, & Verification (<https://grad.ucdavis.edu/degree-verification/>)

## Student Disability Center (SDC)

Student Disability Center (<http://sdc.ucdavis.edu/>), 530-752-3184. The SDC is the campus unit designated to receive requests for academic accommodation, approve services, and coordinate support for students with disabilities. We are committed to equitable educational access and inclusive programming that allows students to thrive. The SDC advises students on their rights and responsibilities, as well as strategies and tools for managing their disabilities. Current and prospective students, faculty, and staff are encouraged to contact the SDC for additional information.

## Student Services & Resources

For extensive student services & resources, see MyUCDavis (<https://my.ucdavis.edu/>).

## Student Support Services

Office of Student Support & Judicial Affairs (<https://ossja.ucdavis.edu/>), 530-752-1128

The Office of Student Support & Judicial Affairs (OSSJA) supports the university's educational mission by assisting students in need, promoting student development, and upholding standards of academic honesty and responsible behavior.

## Student Support

Every year, students struggle with challenges and crisis-related issues that interfere with their academic and student life success. The non-clinical case managers in OSSJA provide support and assistance to students experiencing difficulties and to staff and faculty members who become aware of such students. Case managers serve students in distress by reaching out to understand each student's needs and then coordinating with campus and community resources for assistance and care. They also provide consultation to faculty and staff regarding students of concern, help problem-solve situations involving students of concern, and provide feedback to involved parties as needed. Finally, they serve on the Students of Concern Response Team (SCRT), an interdisciplinary group of professionals that manages situations involving students of concern who present potentially serious risk of harm to self or others. Our case managers' values include:

- Advocacy and self-advocacy.
- Affirmation of the uniqueness and inherent value of the whole person.
- Collaboration, communication, and interdependence.
- Compassion.
- Equity, inclusion, and anti-oppression.
- Integrity (fidelity, veracity, and transparency).

# UNDERGRADUATE EDUCATION

UC Davis offers Bachelor of Arts (A.B.) & Bachelor of Science (B.S.) degrees in over 120 major programs, as well as over 110 minors in a variety of disciplines; see Departments, Programs, & Degrees (p. 80).

## Bachelor's Degree Requirements

**Students are responsible for assuring that all of their degree requirements are fulfilled.**

Students must satisfy these requirements before they can become eligible for candidacy for the bachelor's degree:

- University Degree Requirements (p. 56); apply to all colleges.
- *College Degree Requirements*; may be stricter than *University Degree Requirements* for the same obligation.
- Major Requirements (p. 80); as listed in *Departments, Programs, & Degrees*.

For older Bachelor's Degree Requirements, see Bachelor's Degree Requirements Archive (<https://catalog.ucdavis.edu/undergraduate-education/bachelors-degree-requirements-archive/>).

## University Degree Requirements

*Students are responsible for seeing that all of their degree requirements are fulfilled.*

To earn a Bachelor's Degree, all students must fulfill the following requirements:

## University Degree Requirements

- Entry Level Writing Requirement (ELWR) (<https://catalog.ucdavis.edu/undergraduate-education/university-degree-requirements/entry-level-writing/>)
- American History & Institutions Requirement (<https://catalog.ucdavis.edu/undergraduate-education/university-degree-requirements/amERICAN-hISTORY-inSTITUTIONS-requirement/>)
- Unit Requirements & Limitations (<https://catalog.ucdavis.edu/undergraduate-education/university-degree-requirements/unit-requirements-limitations/>)
- Senior Residence Requirements (<https://catalog.ucdavis.edu/undergraduate-education/university-degree-requirements/senior-residence-requirements/>)
- General Education (GE) Requirements (<https://catalog.ucdavis.edu/undergraduate-education/university-degree-requirements/general-education-ge-requirements/>)
- Scholarship Requirement (<https://catalog.ucdavis.edu/undergraduate-education/university-degree-requirements/scholarship-requirement/>)
- *College Degree Requirements*
  - Agricultural & Environmental Sciences (<https://catalog.ucdavis.edu/undergraduate-education/college-degree-requirements/agricultural-environmental-sciences/>)
  - Biological Sciences (<https://catalog.ucdavis.edu/undergraduate-education/college-degree-requirements/biological-sciences/>)
  - Engineering (<https://catalog.ucdavis.edu/undergraduate-education/college-degree-requirements/engineering/>)

- Graduate School of Management (<https://catalog.ucdavis.edu/undergraduate-education/college-degree-requirements/graduate-school-of-management/>)
- Letters & Science (<https://catalog.ucdavis.edu/undergraduate-education/college-degree-requirements/letters-science/>)
- Major Requirements (<https://catalog.ucdavis.edu/departments-programs-degrees/>); as listed in *Departments, Programs, & Degrees*.

For older Bachelor's Degree Requirements, see Bachelor's Degree Requirements Archive (<https://catalog.ucdavis.edu/undergraduate-education/bachelors-degree-requirements-archive/>).

## Academic Senate Regulation: Requirements for Undergraduate Degrees

Requirements for Undergraduate Degrees (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#REQUIREMENTS%20FOR%20UNDERGRADUATE%20DEGREES>)

521. University of California Entry Level Writing Requirement (En. 6/1/2006)

A. The University of California Entry Level Writing Requirement is a reading and writing proficiency requirement governed by Academic Senate Regulation 636 and this Divisional Regulation. (En. 6/1/2006, Am. 9/1/2018)

B. Prior to enrollment at the University of California, each student may satisfy the University of California Entry Level Writing Requirement as specified by Academic Senate Regulation 636. (En. 6/1/2006, Am. 9/1/2018)

C. A student who has not satisfied the University of California Entry Level Writing Requirement prior to enrollment in the University of California, Davis must satisfy the requirement either (En. 6/1/2006)

1. by passing the University of California Analytical Writing Placement Exam administered Systemwide or on the Davis campus, or (En. 6/1/2006)

2. by passing, with a grade of at least C or above, one of the Entry Level Writing Requirement courses certified by the Committee on Preparatory Education and Undergraduate Council. A student who receives a final grade of C- or below has not fulfilled the University of California Entry Level Writing Requirement and may repeat the course(s). The list of certified courses will be maintained by the Committee on Preparatory Education and publicized by the Director of Entry Level Writing. (En. 6/1/2006, Am. 9/1/2018)

3. For spring quarter 2020, summer session(s) 2020, fall quarter 2020, winter quarter 2021, spring quarter 2021, summer session(s) 2021, and fall 2021 a student can satisfy the University Entry Level Writing Requirement by passing, with a grade of Passed or at least C-, one of the Entry Level Writing Requirement courses certified by the Committee on Preparatory Education and Undergraduate Council. The list of certified courses will be maintained by the Committee on Preparatory Education and publicized by the Director of Entry Level Writing. (En. 9/1/2020, Am. 9/1/2021, 9/1/2022)

D. If a student is identified as an English language learner (ESL) on the University of California Analytic Writing Placement Exam, or through a placement exam on the Davis campus as determined by the Director for Entry Level Writing, the student will be placed into the ESL pathway for Entry Level Writing. The procedure for the ESL pathway will be maintained

by the Committee on Preparatory Education and publicized by the Director of Entry Level Writing and the Director of ESL. (En. 6/1/2006, Am. 9/1/2018)

E. In accordance with Academic Senate Regulation 636.D, students placed into the ESL pathway will have three quarters plus one quarter for each required ESL course to meet the requirement. Other students must satisfy the University of California Entry Level Writing Requirement as early as possible during the first year in residence at the University of California. A student who has not done so within the prescribed timeframe will not be eligible to enroll for additional quarters unless the student has been granted an extension by the Committee on Preparatory Education. The Committee on Preparatory Education may delegate the authority to grant such extensions to that student's college Dean, or adviser as authorized by the Dean. In the case of such delegation, the Dean shall submit an annual report to the Committee on Preparatory Education. (En. 6/1/2006, Am. 9/1/2016, 9/1/2018)

#### 522. Baccalaureate Degree Requirement in General Education.

(A) Each candidate for a baccalaureate degree shall satisfy a General Education requirement comprising two components: Topical Breadth and Core Literacies. (Am. 6/6/2008)

1. The Topical Breadth component shall be separated into three subject matter areas: Arts and Humanities; Science and Engineering; and Social Sciences. (Am. 6/6/2008)

2. The Core Literacies component shall have four parts: Literacy with Words and Images; Civic and Cultural Literacy; Quantitative Literacy; and Scientific Literacy. (En. 6/6/2008)

(B) The Topical Breadth component shall be satisfied by passing between 12 and 20 units of courses in each subject matter area, for a total of 52 units from all three areas. (En. 6/6/2008)

(C) The Core Literacies component shall be satisfied by passing at least the specified number of units of coursework in the following four parts: (En. 6/6/2008)

(1) Literacy with Words and Images shall be satisfied with: (En. 6/6/2008)

- 8 units or the equivalent of English Composition coursework (as specified by the candidate's college); (En. 6/6/2008)
- 6 units of designated writing experience coursework in the candidate's major or elsewhere; (En. 6/6/2008)
- 3 units of additional designated coursework in either oral skills or writing experience; and (En. 6/6/2008)
- 3 units of designated coursework in visual literacy. (En. 6/6/2008)

(2) Civic and Cultural Literacy shall be satisfied with (En. 6/6/2008)

- 3 units of designated coursework in American cultures, governance and history (En. 6/6/2008, Am. 9/1/2017)
- 3 units of designated coursework in domestic diversity (En. 9/1/2017)
- 3 units of designated coursework in world cultures. (En. 6/6/2008)

(3) Quantitative Literacy shall be satisfied with 3 units of designated coursework in quantitative literacy. (En. 6/6/2008)

(4) Scientific Literacy shall be satisfied with 3 units of designated coursework in scientific literacy. (En. 6/6/2008)

(D) In satisfying the General Education requirement: (Am. 6/6/2008)

(1) Course units that satisfy requirements in the candidate's major or majors may also be counted toward satisfaction of General Education requirements.

(2) While some courses may be certified in more than one of the three subject matter areas for Topical Breadth, no student may count a given course in more than one subject matter area. (En. 6/6/2008)

(3) No course may be counted by a student toward the satisfaction of more than one of the four Core Literacies. (En. 6/6/2008)

(4) With the exception of the 8 units of designated English Composition coursework, a course offered toward the satisfaction of the Core Literacies component may also be offered in satisfaction of the Topical Breadth component. (En. 6/6/2008)

(5) No course passed prior to satisfaction of the Entry Level Writing Requirement shall be offered toward satisfaction of the General Education requirements for writing experience coursework. (Am. 6/6/2008)

(6) Candidates may not present Advanced Placement or International Baccalaureate credit in satisfaction of General Education requirements, except insofar as it may be applied to the English Composition component of the Literacy with Words and Images requirement. (En. 6/6/2008, Am. 6/3/2011)

(7) Students who have successfully completed the Intersegmental General Education Transfer Curriculum (IGETC) or the California General Education Transfer Curriculum (Cal-GETC) are exempt from all General Education requirements that may be met with lower-division courses. (Am. 6/6/2008, 6/3/2011, 9/1/2024)

(8) Students transferring to UC Davis who have not completed the IGETC or Cal-GETC curriculum shall satisfy all General Education requirements as specified by this Regulation, but may offer previously completed coursework toward their satisfaction. (Am. 6/6/2008, 6/3/2011, 9/1/2024)

(9) The Committee on Courses of Instruction has authority to delegate and to rescind prior delegation to the Deans of the undergraduate colleges the authority to determine the suitability of non-UC Davis courses presented by new and continuing undergraduate students in satisfaction of General Education requirements. (En. 6/3/2011)

(10) Subject to the limits otherwise applicable, candidates may elect Passed/Not Passed grading for courses fulfilling General Education requirements. (En. 6/6/2008)

#### 523. Criteria for General Education Certification. (Am. 6/6/2008)

(A) Any undergraduate course carrying credit toward graduation is eligible for assignment to a Topical Breadth area if it takes a critical, analytical perspective on knowledge, considering how knowledge has been acquired, and the assumptions, theories, or paradigms that guide its interpretation. Where appropriate, a course may be assigned to more than one Topical Breadth area, and most courses are expected to be assigned to one or more areas. (Am. 6/6/2008)

(B) The criteria for the English Composition requirement shall be specified by the several undergraduate colleges, subject only to the condition that no fewer than 8 units or the equivalent shall be required. (En. 6/6/2008)

(C) The Committee on General Education's criteria governing certification of courses for the Core Literacies component of General Education shall be consonant with the following: (En. 6/6/2008)

1. A course providing Writing Experience promotes the student's ability to think clearly and communicate effectively about the course material through guided writing assignments completed in stages. Guidance may take the form of class discussions, peer feedback, individual or small group conferences, or written (including online) feedback. Students must be given feedback designed to promote improvement in writing in the course. Feedback may occur in the context of one or more successive, refined submissions of a single assignment, or over a series of multiple assignments. Students receive the current version of the handout on plagiarism from Student Judicial Affairs. Grading criteria are articulated in advance of the due date. The writing is evaluated for content, clarity, organization, and logic. A 1 unit course requires a minimum of 5 pages of writing; a course of 2 or more units requires a minimum of 10 pages, possibly in a series of staged tasks or shorter assignments. Approval may be sought for shorter assignments that total fewer than 5 or 10 pages when they are appropriate and clearly justified. (En. 6/6/2008)

2. A course in Oral Skills strengthens a student's ability to understand and orally communicate ideas while using critical thinking. (En. 6/6/2008)

3. A course in Visual Literacy improves a student's ability to understand ideas presented visually and to communicate knowledge and ideas by visual means. (En. 6/6/2008)

4. A course in American Cultures, Governance and History provides an understanding of the historical processes, institutional structures, and core analytic skills necessary to think critically about the nature of citizenship, government and social relations in the United States. (En. 6/6/2008)

5. A course in Domestic Diversity provides an understanding of issues such as race, ethnicity, social class, gender, sexuality, and religion within the United States, and develops the student's ability to think critically about diverse socio-cultural perspectives. (En. 6/6/2008)

6. A course in World Cultures combines the historical and social context with the core analytic skills necessary to understand and adopt a critical perspective on society, politics and/or culture in one or more cultures outside the United States. (En. 6/6/2008)

7. A course in Quantitative Literacy develops a student's ability to reason quantitatively and to evaluate quantitative arguments encountered in everyday life. (En. 6/6/2008)

8. A course in Scientific Literacy instructs students in the fundamental ways scientists use experimentation and analysis to approach problems and generate new knowledge, and presents the ways scientific findings relate to other disciplines and to public policy. (En. 6/6/2008)

(D) In extraordinary circumstances, for example, for majors subject to external accreditation, the General Education Committee may certify that the fulfillment of the major requirements meets specified parts of the General Education requirement. The major requirements must include courses that fulfill the objectives of the relevant parts of the General Education requirement. (En. 6/6/2008)

## Entry Level Writing Requirement (ELWR)

The Entry Level Writing Requirement (ELWR) is a University of California requirement. Every first-year student in the UC system must demonstrate their college-level proficiency in writing by fulfilling the ELWR. University-level writing requires students to read carefully, analyze readings with understanding, and draw conclusions about what is read. For more information, see Entry Level Writing Requirement (<https://elw.ucdavis.edu>).

Students must fulfill ELWR by the end of their third quarter of enrollment; students who do not fulfill ELWR by the end of their third quarter of enrollment face disenrollment from the university.

### Before enrolling at UC Davis, students can fulfill ELWR two ways:

1. Earning one threshold score on one of the following exams:<sup>1</sup>
  - 30 or better on the ACT, English Language Arts.
  - 63 or better on the ACT English exam + the ACT Reading exam.
  - 680 or better on the SAT, Evidence-Based Reading and Writing.  
Note: *The digital SAT Reading & Writing section score is not approved to meet the ELWR.*
  - 3 or above on either Advanced Placement (AP) Examination in English (Language and Composition or Literature and Composition).
  - 3 or above on Advanced Placement Seminar (<https://apcentral.collegeboard.org/courses/ap-seminar/>) exam.
  - 3 or above on Advanced Placement Research (<https://apcentral.collegeboard.org/courses/ap-research/>).
  - 5 or above on an International Baccalaureate (IB) Higher Level English A: Literature exam (formerly known as Higher Level English A1 exam).
  - 6 or above on an International Baccalaureate (IB) Standard Level English A: Literature exam (formerly known as Standard Level English A1 exam).
  - 5 or above on an International Baccalaureate (IB) Higher Level English A: Language and Literature exam.
  - 6 or above on an International Baccalaureate (IB) Standard Level English A: Language and Literature exam.
2. Earning a passing grade in a transferable college writing course. For more information about transferable college writing courses, see Assist.org (<https://assist.org>).

NOTE: Official score reports/transcripts must be sent to UC Davis (<https://www.ucdavis.edu/admissions/undergraduate/transcripts-test-scores/>) for ELWR fulfillment.

### After enrolling at UC Davis, students can fulfill ELWR three ways:

1. **UC Davis Writing Placement System.** Writing Placement Survey can be taken only once and is only available to incoming first-year undergraduate students. For more information, see Entry Level Writing Requirement (<https://elw.ucdavis.edu>).
2. **UC Davis ELWR fulfilling course.** Earning a C or higher in a designated, credit-bearing writing course fulfills ELWR:

- UWP 007, a face-to-face 4 unit writing course.
- UWP 007Y, a hybrid 4 unit writing course with weekly in-person, synchronous meetings and asynchronous components.
- UWP 007V, a fully online 4 unit writing course with some synchronous and asynchronous components.
- UWP 007M, a face-to-face 4 unit writing course that offers additional academic English language development instruction and support for non-native English speakers.
- UWP 001A, a face-to-face 2 unit writing co-course that must be taken concurrently with UWP 001, UWP 1Y, or UWP 001V.
- ENL 003A, a face-to-face 2 unit writing co-course that must be taken concurrently with ENL 003.
- NAS 005A, a face-to-face 2 unit writing co-course that must be taken concurrently with NAS 005.

NOTE: Currently, P/NP grade mode is not permitted if the course is used for ELWR fulfillment.

3. **UC Online ELWR fulfilling course.** Earning a C or higher in a designated, credit-bearing writing course offered by UC Online/Cross Campus Enrollment (listed below) that fulfills ELWR.
- WR 040, a fully online 4 unit writing course offered through Cross-Campus enrollment (<https://registrar.ucdavis.edu/registration/special-programs/uc-online/>) and taught by UC Irvine.

NOTE: Students must meet certain eligibility criteria to enroll through Cross-Campus enrollment and should check in with the advisors in their Dean's Office prior to enrollment.

## American History & Institutions Requirement

The American history and institutions requirement ensures that every graduating student will have at least a minimum knowledge of the background of this country's development and an understanding of the political, economic and social interrelationships of its way of life.

You may meet this requirement in any of these ways:

- Complete one high school unit in American history, or 1/2 high school unit in American history and 1/2 high school unit in civics or American government, with a grade of C or better in each course
- Complete any one of the following courses:

Code	Title	Units
<b>African American &amp; African Studies (AAS)</b>		
AAS 010	African-American Culture & Society	4
AAS 100	Survey of Ethnicity in the US	4
<b>Asian American Studies (ASA)</b>		
ASA 001	Historical Experience of Asian Americans	4
ASA 002	Contemporary Issues of Asian Americans	4
<b>Chicana/Chicano Studies (CHI)</b>		
CHI 010	Introduction to Chicana/o Studies	4
<b>Economics (ECN)</b>		
ECN 111A or ECN 111AV or ECN 111AY	Economic History	4
ECN 111B	Economics History	4
<b>History (HIS)</b>		

HIS 017A	History of the United States	4
HIS 017B	History of the United States	4
HIS 072A	Women & Gender in America, to 1865	4
HIS 072B	Women & Gender in America, 1865-Present	4
HIS 170A	Colonial America	4
HIS 170B	The American Revolution	4
HIS 170C	The Early National Period, 1789-1815	4
HIS 171A	Slavery, Society & Expansion in the Early U.S.	4
HIS 171B	Civil War Era	4
HIS 174A	The Gilded Age & Progressive Era: United States, 1876-1917	4
HIS 174B	War, Prosperity, & Depression: United States, 1917-1945	4
HIS 174C	The United States Since World War II, 1945 to the Present	4
HIS 176A	Cultural & Social History of United States	4
HIS 176B	Cultural & Social History of United States	4
HIS 177A	History of Black People & American Race Relations: 1450-1860	4
HIS 177B	History of Black People & American Race Relations: 1860-Present	4
HIS 179	Asian American History, 1850-Present	4
HIS 180AN	American Political History, 1789-1896	4
HIS 180BN	American Political History, 1896-present	4
HIS 183A	The Frontier Experience: Trans-Mississippi West	4
HIS 183B	The Frontier Experience: Trans-Mississippi West	4
<b>Native American Studies (NAS)</b>		
NAS 001	Introduction to Native American Studies	4
NAS 010	Native American Experience	4
NAS 116	Native American Traditional Governments	4
NAS 130A	Native American Ethno-Historical Development	4
NAS 130B	Native American Ethno-Historical Development	4
NAS 130C	Native American Ethno-Historical Development	4
<b>Political Science (POL)</b>		
POL 001 or POL 001Y	American National Government	4
POL 005	Contemporary Problems of the American Political System	4
POL 100	Local Government & Politics	4
POL 102	Urban Public Policy	4
POL 104	California State Government & Politics	4
POL 105	The Legislative Process	4
POL 106	The Presidency	4
POL 108	Policy Making in the Public Sector	4
POL 109	Public Policy & the Governmental Process	4

POL 113	American Political Thought	4
POL 130	Recent U.S. Foreign Policy	4
POL 131	Analysis of U.S. Foreign Policy	4
POL 160	American Political Parties	4
POL 163	Group Politics	4

Students electing to complete one of the above courses in order to meet this requirement are subject to the rules for prerequisites and majors.

- Present evidence that the requirement has been accepted as satisfied at another campus of the university.
- Present evidence that the requirement has been satisfied through courses in the area of American history and institutions at another collegiate institution whose credits are acceptable for transfer to UC Davis.
- Successfully complete the Advanced Placement (AP) Examination in United States Government and Politics taken May 2014 or prior with a score of 3 or higher. As of May 2015, the AP examination, AP United States Government & Politics no longer satisfies the American history and institutions requirement.
- Successfully complete the International Baccalaureate (IB) Examination in History of the Americas Higher Level (HL) with a score of 5, 6, or 7.
- Successfully complete the SAT Subject Examination in U.S. History with a score of 550 or higher.

International students, regardless of the type of visa they hold, must meet the university's *American History & Institutions Requirement* for graduation.

## Unit Requirements & Limitations

### Minimum Units for Graduation

A minimum of 180 quarter units is required for graduation. These must be distributed according to the minimum requirements set forth by the faculty of your college.

### Unit Credit Limitations

For certain courses, there may be limits established on the number of units countable towards the 180-unit minimum required for the degree. To avoid discovering just before graduation that a student is short on units, a student should regularly meet with their advisor to keep track of the number of units taken and credited.

### Internship Courses

A maximum of 15 units of internship courses may be counted toward the 180-unit bachelor's degree requirement; however, some colleges have set a lower maximum. Unless the student has completed a minimum of 84 units, the student shall not receive University credit for an internship course numbered 192; Davis Division Regulations 532 ([http://academicsenate.ucdavis.edu/bylaws\\_and\\_regulations/regulations.cfm#532-1](http://academicsenate.ucdavis.edu/bylaws_and_regulations/regulations.cfm#532-1))<sup>1</sup>

### Special Study Courses

Unless the student has completed a minimum of 84 units, the student shall not receive University credit for a Special Study courses course numbered 194H or 199; Davis Division Regulations 535 ([http://academicsenate.ucdavis.edu/bylaws\\_and\\_regulations/regulations.cfm#535-2](http://academicsenate.ucdavis.edu/bylaws_and_regulations/regulations.cfm#535-2))<sup>2</sup>

## Transfer Courses

The acceptability of transfer courses (<https://registrar.ucdavis.edu/records/transfer-credit/>) for unit credit is determined by Undergraduate Admissions (<https://www.ucdavis.edu/admissions/undergraduate/transfer/planning/>). The acceptability of such courses toward specific requirements is determined by the individual college or school. To eliminate the possibility of duplication of credit, students should refer to the Advanced Placement Examination (p. 25) & International Baccalaureate (p. 26) charts and their transcripts.

## <sup>1</sup> Davis Division Regulations 532; Academic Credit for Internships

Davis Division Regulations 532 ([http://academicsenate.ucdavis.edu/bylaws\\_and\\_regulations/regulations.cfm#532-1](http://academicsenate.ucdavis.edu/bylaws_and_regulations/regulations.cfm#532-1))

(A) A maximum of 15 units of internship courses, whether taken in this Division or elsewhere, may be counted toward the 180 units required for graduation (Am 1/14/72; 4/23/79; 4/25/83; 6/05/01). Internships for which academic credit toward the baccalaureate degree may be earned shall have the following features:

- (1) Students are able to apply the concepts and methods of at least one academic discipline to an appropriate work experience or setting.
- (2) Students are able to grow intellectually by the extension of general intellectual tools of one or more academic disciplines to the workplace. Work that is clerical in nature or that involves routine maintenance or service responsibilities shall not be judged appropriate for awarding academic credit.
- (3) Faculty sponsors are able to assess the quality of academic work completed by the student.

(B) A student for whom academic credit earned in an internship may be awarded:

- (1) Possesses a suitable background in the discipline in which academic credit is sought;
- (2) Possesses the background or skills necessary to successfully complete the requirements of the internship;
- (3) Will experience significant intellectual growth as a result of the internship and the associated academic work, and;
- (4) Has completed at least 84 units toward the degree. No student shall receive University credit for an internship numbered 192 unless the student has completed a minimum of 84 units.

(C) When it is determined that an internship and student are appropriate for academic credit, arrangements for receiving it shall include the following elements:

- (1) Prior approval by the appropriate Program Manager in the Internship and Career Center (ICC) certifying that the internship situation is appropriate for awarding academic credit. The student shall submit a written description of the proposed internship to ICC, accompanied by a letter from the sponsor that describes the student's duties and responsibilities, hours, and the sponsor's expectations. Evidence must be provided that the student intern will

be directly supervised by a career professional who is aware of the University's standards for earning academic credit.

(2) Prior approval by a faculty sponsor whose background and expertise are related to the area of the internship and appropriate for supervision of the student's activities.

(3) Adherence to departmental guidelines that set forth requirements for granting academic credit. Requirements may vary depending on the nature of the discipline, but generally it is expected that a student will complete reading assignments and a research paper or project that requires the student to relate the academic discipline to the internship experience. The paper/project shall demonstrate the student's ability to perform critical reasoning and/or methods of research appropriate to the discipline. Student participation in a concurrent seminar or discussion section may also be required, but student achievement must be documented.

(4) Appropriate faculty/student contact that includes a preliminary conference to set forth the faculty member's expectations and requirements for satisfactory completion of the internship.

(D) The number of units awarded shall be contingent on the degree of commitment to the internship project, and departmental requirements shall adhere to that principle (EN. 6/04/85). The basic formula is one unit of credit per three hours per week commitment for a ten-week period; thus:

#### Commitment Per Week Units

3 - 5 hours 1

6 - 8 hours 2

9 - 11 hours 3

12 - 14 hours 4

15 - 17 hours 5

18 - 20 hours 6

21 - 23 hours 7

24 - 26 hours 8

27 - 29 hours 9

30 - 32 hours 10

33 - 35 hours 11

36 - 38 hours 12

39 - 41 hours 13

42 - 44 hours 14

45 hours and over 15 (am. 5/6/02)

(A) Special Study courses are research-oriented, variable unit courses of study designed for one student under the supervision of one faculty member. No student shall receive academic credit for a special study course numbered 194H or 199 unless the student previously has completed at least 84 units of credit toward the degree.

(B) With the approval of the Department Chair an instructor may provide a special study course to an interested student. The content of the course shall not duplicate the content of an existing course, and the amount of work proposed shall at least equal that required for a regularly offered course of corresponding academic unit value. Grading in undergraduate special study courses shall be on a "Passed/Not Passed" basis unless the instructor has approval for letter grading from the Committee on Courses of Instruction of either the college or school as well as the Division.

(C) Requests for letter grading in special study courses must be received by the Divisional Committee on Courses of Instruction no later than the fifteenth day of instruction in the quarter in which the course is offered.

(D) Special study courses for undergraduates shall be numbered 99, 199, or 194H (En. 1/24/72)

## Senior Residence Requirements

The minimum senior residence requirement for a bachelor's degree at the University of California is one academic year (three quarters). Thirty-five of the final 45 quarter units completed by each candidate must be earned while in residence on the UC Davis campus (UC Regulations of the Academic Senate 630 (<http://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart3.html#r630>))<sup>1</sup>). Each summer session in which a student completes a course of at least 2 quarter units may be counted as half a quarter's residence.

Regularly approved courses (laboratory, field, or other individual work) done outside of a regular session but under the direction of a department of instruction may be accepted upon the recommendation of the department in partial fulfillment of the senior residence requirement for the bachelor's degree. Registration is with the consent of the instructor only.

UC Davis Continuing & Professional Education (CPE) (<https://cpe.ucdavis.edu/>) courses are not accepted as part of the senior university residence requirement.

There are additional senior residence requirements for students enrolled in the College of Letters & Science (<https://www.ls.ucdavis.edu/advising/academic-resources/degree-require.html>). If you are planning to study abroad during your senior year, you should consult your college dean's office or the Biology Academic Success Center (<http://basc.ucdavis.edu/>).

With the approval of the dean of a student's college or school, a candidate for the bachelor's degree who was in active service in the armed forces of the United States in the year preceding the awarding of the degree may be recommended for the degree after only one quarter of university residence in which the candidate completes at least 16 units or passes a comprehensive examination in the major or field of concentration (UC Regulations of the Academic Senate 614 (<http://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart3.html#r614>))<sup>2</sup>.

## **2 Davis Division Regulations 535; Special Study Courses**

Davis Division Regulations 535 ([http://academicsenate.ucdavis.edu/bylaws\\_and\\_regulations/regulations.cfm#535-](http://academicsenate.ucdavis.edu/bylaws_and_regulations/regulations.cfm#535-))

## **<sup>1</sup> UC Regulations of the Academic Senate 630; General Requirements**

UC Regulations of the Academic Senate 630 (<http://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart3.html#r630>)

1. Except as otherwise provided in this section and SR 614, 35 (or 24 semester) of the final 45 (or 30 semester) units completed by each candidate for the bachelor's degree must be earned in residence in the college or school of the University of California in which the degree is to be taken. (Am 9 Mar 83; Am 23 May 01)
2. When two or more campuses of the University of California have approved a joint program of study, a student enrolled in such a program may meet the requirement stated in paragraph (A) above by completing the requisite number of units in courses offered at any or all of the participating campuses. The student's program of study must be approved by the Provost, Dean, or equivalent officer of the School of College in which the degree is to be awarded. (En 13 May 97; Am 10 Nov 04)
3. A further exception to the rule stated in paragraph (A) above is made in the case of students who meet the residence requirement as provided in SR 614 (<https://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart3.html#r614>). (Am 10 Nov 04)
4. Except when Divisional Regulations provide otherwise, a student in the Education Abroad Program, the UC Washington, D.C., Program, the UC Center in Sacramento Program, or the NRS California Ecology and Conservation Course, which are systemwide courses, may meet the residence requirement in accordance with the following provisions: (Am 27 May 99; Am 10 Mar 04; Am 10 Nov 04; Am 10 Apr 17)
  - a. A student who completes the graduation requirements while in a systemwide course may satisfy the requirements stated in paragraph (A) in the final 45 (or 30 semester) units preceding the student's entrance into a systemwide course. (Am 9 Mar 83; Am 10 Mar 04; Am 10 Apr 17)
  - b. Subject to the prior approval of the department concerned, a student who is enrolled in a systemwide course may satisfy the residence requirement by earning 35 (or 24 semester) of the final 90 (or 60 semester) units, including the final 12 (or 8 semester) units, in residence in the college or school of the University of California in which the degree is taken. (Am 7 Jun 72; Am 9 Mar 83; Am 10 Mar 04; Am 10 Apr 17)

## **<sup>2</sup> UC Regulations of the Academic Senate 614; Residence**

UC Regulations of the Academic Senate 614 (<http://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart3.html#r614>)

**614.** With the approval of the dean of the candidate's college or school, a candidate for the Bachelor's degree who was in active service in the armed forces of the United States in the year preceding the award of the degree may be recommended for the degree after only one term of University residence in which the candidate completes at least 16 units or passes a comprehensive examination in his/her major or field of concentration.

## **General Education (GE) Requirements**

For complete information, see General Education Requirements (<https://ge.ucdavis.edu/>). For a list of courses that contain GE attributes and GE search tools, see General Education Search Tool – All Courses ([https://registrar-apps.ucdavis.edu/courses/ge\\_courses/](https://registrar-apps.ucdavis.edu/courses/ge_courses/)).

### **General Education (GE) Requirements**

The General Education (GE) requirement promotes the intellectual growth of all undergraduates by ensuring that they acquire a breadth of knowledge that will enlarge their perspectives beyond the focus of a major and serve them well as participants in a knowledge-based society. It seeks to stimulate continued growth by providing knowledge of both the content and the methodologies of different academic disciplines. It involves students in the learning process by its expectation of considerable writing and class participation, and encourages students to consider the relationships between disciplines.

The GE requirement has two components, Topical Breadth and Core Literacies, and is defined in terms of units, not courses.

#### **Topical Breadth Component—52 units**

A GE course in topical breadth addresses broad subject areas that are important to the student's general knowledge. The units of most undergraduate courses at UC Davis are assigned to one of the three Topical Breadth Areas.

**Note:** In the case of a course that has been certified in more than one Topical Breadth Area, a student may count the units of the course in only one of the areas in which it has been certified.

- **Arts & Humanities—12-20 units.** Courses in this area provide students with knowledge of significant intellectual traditions, cultural achievements and historical processes.
- **Science & Engineering—12-20 units.** Courses in this area provide students with knowledge of major ideas and concepts of science and engineering and their applications.
- **Social Sciences—12-20 units.** Courses in this area provide students with knowledge of the individual, social, political and economic activities of people.

#### **Core Literacies Component—35 units**

The literacies are crucial both for success in one's profession and for a thoughtful, engaged citizenship in the community, nation and world.

**Note:** In the case of a course that has been certified in more than one Core Literacy Area, a student may count the units of the course in only one of the core literacy areas in which it has been certified.

1. **Literacy with Words & Images—20 units.** The objective of this core literacy is to help students communicate their ideas effectively in written, oral and visual forms. The requirement also seeks to enhance students' critical judgment of oral, written, and visual messages created by others.

**Note:** No course passed prior to satisfaction of the Entry Level Writing Requirement may be used to satisfy the General Education requirements for Writing Experience coursework described in b and c, below. Students should contact their college before taking courses for requirement a, as there may be limitations on credit for students who have not completed the Entry Level Writing Requirement.

- a. **English Composition—8 units.** As described by College of Agricultural & Environmental Sciences, College of Biological Sciences, College of Engineering, or College of Letters & Science.
  - b. **Writing Experience coursework in the student's major or in other departments—6 units.** Courses in writing experience provide students instruction on how to communicate ideas in the subject matter of the course. The opportunity to improve writing after having received careful commentary is crucial to this requirement.
  - c. **Oral Skills coursework or additional Writing Experience coursework—3 units.** Courses in oral literacy involve effective communication of ideas through oral presentation and build on and strengthen the critical thinking skills exercised through writing. As an alternative to developing oral communication skills, students may take additional coursework certified as writing experience (see requirement b, above).
  - d. **Visual Literacy coursework—3 units.** Courses in visual literacy provide students with the analytical skills they need to understand how still and moving images, art and architecture, illustrations accompanying written text, graphs and charts, and other visual embodiments of ideas inform and persuade people. Coursework may stress the skills needed to communicate through visual means as well as the analytical skills needed to be a thoughtful consumer of visual messages.
2. **Civic & Cultural Literacy—9 units.** The objective of this core literacy is to prepare students for thoughtful, active participation in civic society. Students will learn to think analytically about American institutions and social relations, understand the diversity of American cultures, and see the relationships between national and local cultures and the world.
- a. **American Cultures, Governance, & History—3 units.** Courses in American Cultures, Governance, & History provide students with an understanding and appreciation of the social and cultural diversity of the United States and of the relationships between these diverse cultures and larger patterns of national history and institutions.
  - b. **Domestic Diversity—3 units.** Courses in Domestic Diversity provide students with an understanding of issues such as race, ethnicity, social class, gender, sexuality, and religion within the United States, and develop the student's ability to think critically about diverse socio-cultural perspectives.
  - c. **World Cultures—3 units.** Courses in World Cultures provide students with a global perspective in a world where communication technologies, economic relationships, and the flow of people across national borders increasingly challenge national identities and create transnational cultures. Students can satisfy this requirement through coursework or through certified study abroad.
3. **Quantitative Literacy—at least 3 units.** The objective of this core literacy is to provide students with an understanding of quantitative reasoning and skills for evaluating claims and knowledge generated through quantitative methods.
4. **Scientific Literacy—at least 3 units.** The objective of this core literacy is to provide students with an understanding of the fundamental ways scientists approach problems and generate new knowledge, and an understanding of how scientific findings relate to other disciplines and to public policy.

## Approved General Education Courses

**Please note** that you cannot claim GE credit for a course you completed *before* it was an approved GE course.

## Additional Conditions

**Meeting Total Units Requirement.** With the exception of units used to satisfy the English Composition element, units approved for a Core Literacy will be accepted toward satisfaction of the appropriate Topical Breadth component. Course units that satisfy requirements in the candidate's major or majors may also be counted toward satisfaction of General Education requirements.

**Grading.** Students may take courses P/NP to fulfill their General Education requirements, up to the limits set by college and campus regulations.

**Advanced Placement & International Baccalaureate.** Students may not present Advanced Placement or International Baccalaureate credit in satisfaction of GE requirements, except insofar as it may be applied to the English Composition component of the Literacy with Words and Images requirement.

**Transfer Students** who have successfully completed the Intersegmental General Education Transfer Curriculum (IGETC) lower division course work are exempt from all General Education requirements that may be met with lower division courses. Transfer students who have not completed the IGETC are required to satisfy all General Education components under the revised requirement but may offer previously completed coursework toward their satisfaction.

## Scholarship Requirement

To receive a bachelor's degree, a student must obtain twice as many grade points as units (a 2.000 GPA) for all courses they have attempted in the university. Each college has specific requirements, as well; see College Requirements:

- Agricultural & Environmental Sciences (p. 64)
- Biological Sciences (p. 65)
- Engineering (p. 66)
- Letters & Science (p. 68)

## College Degree Requirements

To earn a Bachelor's Degree, all students must fulfill these requirements:

- University Degree Requirements (p. 56)
- *College Degree Requirements*
  - Agricultural & Environmental Sciences (p. 64)
  - Biological Sciences (p. 65)
  - Engineering (p. 66)
  - Graduate School of Management (p. 67)
  - Letters & Science (p. 68)
- Major Requirements (p. 80); as listed in *Departments, Programs, & Degrees*.

For older Bachelor's Degree Requirements, see Bachelor's Degree Requirements Archive (p. 78).

# Agricultural & Environmental Sciences

## College of Agricultural & Environmental Sciences

### Degree Requirements

A preliminary degree check can be used to help track your progress. You can also utilize the MyDegree (<https://mydegree.ucdavis.edu/>) advising tool to review requirements. It is the responsibility of the undergraduate scholar to ensure all requirements are fulfilled.

### College Units & Limitations

- A minimum of 180 quarter units is required for the degree. At least 54 of the 180 units must be in upper division or graduate courses except that a maximum of 9 units in graduate level courses (200 series) and professional courses (300 and 400 series) will be accepted toward the 54 upper division requirement.
- No more than 6 units of Physical Education 001 and/or 006 and no more than 20 units of Internship 092 and 192 and courses numbered 090X, 097T, 097TC, 099, 190C, 190X, 197T, 197TC and 199 may be counted toward the total of 180 units for the degree.
- A maximum of 12 units of Internship 092 and 192 is permitted. Credit will not be given for 192, 199 numbered courses prior to completion of 84 units.
- The Academic Senate limits the total number of courses grades *P*, including units earned in courses graded “*P/NP only*” to one third of the units completed on the UC Davis campus. The *P/NP* option should not be used for major requirements.
- Students may apply credit for courses taken in the Open Campus Program through UC Davis Continuing and Professional Education (formerly known as UC Davis Extension) towards the 180-unit undergraduate degree requirement. The grade points earned when enrolled in Open Campus courses will count toward the calculation of a student's UC GPA upon his/her admission or readmission to regular student status at UC Davis. Students registered at UC Davis may not enroll in Open Campus courses.
- University of California Extension courses can be used to satisfy graduation requirements only with approval of the dean, as long as the units are deemed as transferable units by the Undergraduate Admissions office. Only grade points from University of California, Davis Extension courses, not Extension courses from other campuses, will be counted toward the student's overall UC grade point average.
- Undergraduate students may not exceed 225 units; registration for enrollment when the limit has been reached may only be approved by the dean by petition.

### College Residence

- 35 of the final 45 units must be taken while an undergraduate scholar is in the college. University of California Extension courses can be used to satisfy graduation requirements only with approval of the dean. Only grade points from University of California, Davis extension courses will count toward the student's overall UC grade point average.
- Education Abroad Courses are not considered in residence. Please speak to the Dean's Office if you are planning to study abroad.

### College Scholarship

- The minimum grade point average (GPA) to satisfy the scholarship requirement is 2.000 for all courses counted toward the major and for all upper division courses used to satisfy major requirements.
- Only grades earned in courses taken at UC Davis will be included in the grade point computations.
- Cumulative grade point average (GPA) is a minimum of 2.000; major grade point average (GPA) is also a minimum of 2.000—both are required in order to be eligible for graduation.
- Major grade point average (GPA) calculation varies per program of study. Questions regarding major GPA should be directed to the department advisor.
- To obtain these minimum averages in the major, you may repeat courses that are graded D or F. If you have to repeat a course more than once, scholars must obtain approval from the Dean's Office prior to enrolling.

### English Composition

This requirement may be met in one of three ways:

- (1) Either two courses emphasizing written expression or one course emphasizing written expression and one course emphasizing oral expression, with a grade of C- (or P) or better. The following UC Davis courses satisfy this requirement:
  - (a) One course must be selected from English (ENL) 003; University Writing Program (UWP) 001, 048, 049, 101, 102 series, or 104 series (courses with primary emphasis in writing skills), and;
  - (b) One course selected from the courses not selected above, or from Communication (CMN) 001; Comparative Literature (COM) 001, 002, 003, 004, or Native American Studies (NAS) 005 (courses emphasizing either writing or speaking skills.)
- (2) Advanced Placement English score of 4 of 5 PLUS any course listed in 1(a) or 1(b) above EXCEPT University Writing Program (UWP) 001 or English (ENL) 003.
- (3) By successfully passing the English Composition Examination administered by the College of Letters & Science upon completion of 70 units of degree credit (the examination does not yield credit).

For specific examination dates, instructions, and to sign up to take an examination, see the University Writing Program-Upper Division Composition Exam Information (<http://writing.ucdavis.edu/compexam/>). It is recommended that students with disabilities contact the Student Disability Center at 530-752-3184 and the Entry Level Writing Program Office 530-752-0450 at least two weeks prior to the exam date to arrange accommodations.

### Degree Requirement Changes; Catalog Rights

Students may choose to fulfill the university, college, and major requirements as stated in any UC Davis General Catalog in effect at any time they were enrolled at UC Davis. Transfer students may choose a UC Davis catalog in effect either during the three years immediately preceding their transfer to Davis or at the time they first enrolled at that prior institution, whichever is most recent. Students will use the catalog year chosen to satisfy university, college, and major requirements specified in that catalog.

major/) | Multiple Majors (<http://www.caes.ucdavis.edu/students/advising/enrollment/the-major/>) | Cross-College Majors (<http://www.caes.ucdavis.edu/students/advising/enrollment/the-major/>) | Individual Major (<https://caes.ucdavis.edu/students/advising/academic-policies/the-major/>) | Minors (<https://caes.ucdavis.edu/students/academics/minors/>)

## Biological Sciences

College of Biological Sciences

### Degree Requirements Unit Requirements

#### Total Units

Complete no less than 180 units allowing for the unit credit limitations listed below. No student may exceed 225 units in their academic career without approval of the Dean. Units earned in Advanced Placement and International Baccalaureate exams are not counted toward this 225-unit limit. Upon reaching 200 units, a student must submit an Academic Graduation Plan and an Excess Unit Petition on OASIS.

#### Upper Division Units

Complete 64 upper division units.

#### Unit Credit Limitations

- **Passed/Not Passed Units.** All courses used to satisfy major requirements must be taken on a letter-graded basis, unless courses are only offered on a Passed/Not Passed basis. If a student adds or changes a major course offered for a letter grade to Passed/Not Passed, the college will return it to a letter grade. In addition, the Academic Senate limits the total number of courses graded P, including units earned in courses graded "P/NP only" to one third of the units completed on the UC Davis campus.
- **Physical Education.** Maximum of 6 units of Physical Education 001 & 006 (PHE), and similar physical activity courses including transfer work.
- **Transfer Work.** Maximum of 105 units of credit earned at two-year institutions (community college).
- **Graduate Courses.** Units from courses in the 200 series (with the exception of course 299) may apply toward the minimum 64-unit upper division requirement and/or as a substitution for undergraduate courses in the major under the following conditions:
  - Students must obtain written permission from the course instructor and the faculty advisor for their major.
  - The faculty advisor will confirm that students have a minimum 3.400 GPA in the major at the time that they register for the course.
- **Professional and teaching courses.** Maximum of 9 units in courses numbered 300-399 and 400-499. These units may not be applied toward the 64-unit upper division requirement.
- **Upper division standing.** Must complete 90 units before enrolling in 192, 194H and 199 to receive degree and upper division credit.
- **Special Study.** No more than 5 units per quarter of Special Study courses (099, 194H, 199).
- **Nonstandard Courses.** A maximum of 20 units of nonstandard courses including transfer work can be counted towards the degree.<sup>1</sup> Nonstandard courses are defined here as tutoring, internship, research, research conference, honors research and similar course activities. Some examples of these courses are, but are not limited to, courses numbered 090C, 091, 092, 092C, 097T, 097TC, 099, 189, 190C,

191, 192, 192C, 193, 194H, 197T, 197TC, 199, etc. Courses numbered 098 or 198 are not included in this 20-unit limitation.

Within these 20 units, there are additional unit credit limitations on tutoring and internship units:

- **Tutoring.** Maximum of 3 tutoring units including but not limited to 097T, 197T, 097TC and 197TC.
- **Internship.** A maximum of 6 internship units including but not limited to 092, 192, 92C, 192C.

1 Specific exceptions to these limits may be granted by the Committee on Undergraduate Curriculum and Educational Policy (CUCEP) based on the uniqueness of the experiences and their concordance with the petitioner's educational objectives.

#### Credit for Open Campus (Concurrent) Courses

Students may apply credit for courses taken in the Open Campus (Concurrent) Program through UC Davis Extension towards the 180-unit undergraduate degree requirement. The grade points earned when enrolled in Open Campus courses will count toward the calculation of a student's UC GPA upon his/her admission or readmission to regular student status at UC Davis. However, the units earned do not satisfy the university residence requirement. Students registered at UC Davis may not enroll in Open Campus courses.

#### Residence

Meet university residence requirement. No additional college residence requirements.

#### Scholarship

Students must attain at least a 2.000 GPA for all courses required in their major by graduation. Students must also attain a 2.000 GPA in all Depth Subject Matter courses required in their major.

- **Repeating Courses.** Students may repeat courses once in which they received a grade of D+ or less. To repeat a course more than once, students must submit Multiple Repeat Petition in OASIS for review prior to enrolling in the course.

#### English Composition

English Composition requirement may be satisfied in one of two ways:

1. Completing 8 units, to include 4 upper division units, in English composition courses with at least a C- or Passed grade from the following list:
  - Comparative Literature 001, 002, 003, 004
  - English 003
  - Native American Studies 005
  - University Writing Program 001, 001V, 001Y, 048, 049, 101, 101V, 101Y, 104AV, 104AY, 104FV, 104FY, 102 series, or 104 series

#### OR

2. Passing the English Composition Examination, administered by the University Writing Program, upon completion of 70 units of degree credit. This examination does not yield credit. Students interested in entering the health science field should check with the Health Professions Advising office or the Biology Academic Success Center before choosing this option.

## English Composition Examination

The no-fee, no-unit examination is typically offered on a Saturday in October, January, and April. For specific dates, see Upper Division Composition Exam (UDCE) (<http://writing.ucdavis.edu/compexam/>).

If students choose to take this challenge exam, they are strongly advised to do so in their junior year. Register for the English Composition Examination at Upper Division Composition Exam (UDCE) (<http://writing.ucdavis.edu/compexam/>) from the Monday before the exam date until Friday at noon or until no spaces remain. The AWPE/Upper Division Composition Examination form, available at the UC Davis Bookstore, is required. It is recommended that students with disabilities contact the Student Disability Center 530-752-3184 and the University Writing Program 530-752-6283 at least two weeks prior to the exam date to arrange accommodations. No examinations are given during the summer.

## Additional Bachelor of Arts Requirements

Bachelor of Arts degrees are available in Biological Sciences; Evolution, Ecology and Biodiversity; Microbiology; and Plant Biology. These degrees offer students an opportunity to broaden their education while pursuing a rigorous life science major. Candidates for the Bachelor of Arts degrees must complete two additional requirements.

### Foreign Language

The requirement can be met in one of three ways:

- Complete with passing grades 15 quarter units of college level course work, or the equivalent thereof, in a single language.
- Attain a minimal score prescribed by the Committee on Undergraduate Curriculum and Educational Policy (CUCEP), in the College Entrance Examination Board Achievement Test in Foreign Language, which may be taken at any time during the student's high school career, or any other achievement test approved by the Committee on Undergraduate Curriculum and Educational Policy.
- Placement beyond the 15-unit level on a placement/proficiency examination offered by one of the foreign language departments of the University.

### Breadth Requirements

Satisfaction of the campus General Education requirement (or IGETC for transfer students) in effect Fall 2011 will satisfy the Breadth requirement.

## Declaration of Major/Undeclared—Life Sciences

**Students must declare a major by 90 units. A hold will be placed on a student's registration if they are still undeclared after completing 90 UC Davis units.**

All changes of major and college must be completed before the beginning of the student's quarter of graduation.

Students who are enrolled in a major administered by the College of Biological Sciences and students who are Undeclared-Life Sciences see an academic advisor in the Biology Academic Success Center for their major, university, general education, and college academic advising.

Faculty advisors are also available in the department that houses their major, as listed in the catalog, or at the Biology Academic Success Center.

## Degree Check

Students are encouraged to meet with their academic advisor at least once a year to ensure timely graduation. Students are strongly encouraged to consult a Biology Academic Success Center academic advisor at the following points in their academic careers:

- First-Year Mandatory Advising for transfer students during their first two quarters on the Davis campus (required).
- Before accumulating 90 units.
- Before accumulating 135 units.
- In addition, if you are taking courses which, if passed, will cause your unit total to exceed 200 units and you intend to register for the next quarter, you must file a plan with your advisor that leads to graduation within 225 units. If the plan anticipates registering after you have accumulated 225 units, the plan must be submitted to the Dean for approval.

## Degree Requirement Changes; Catalog Rights

Students may choose to fulfill the university, college, and major requirements as stated in any UC Davis General Catalog in effect at any time they were enrolled at UC Davis. Transfer students may choose a UC Davis catalog in effect either during the three years immediately preceding their transfer to Davis or at the time they first enrolled at that prior institution, whichever is most recent. Students will use the catalog year chosen to satisfy university and college requirements. However, major requirements used are those in effect at the time the student officially declares their major.

Related: Declaring a Major (<https://basc.biology.ucdavis.edu/change-major/>) | Change of Major (<https://basc.biology.ucdavis.edu/change-major/>) | Multiple Majors (<https://basc.biology.ucdavis.edu/change-major/>) | Cross-College Majors (<https://basc.biology.ucdavis.edu/change-major/>) | Individual Major (p. 315) | Minors (<https://basc.biology.ucdavis.edu/undergraduate/majors-minors/>)

## Engineering

### College of Engineering

## Degree Requirements

### Unit

Each candidate must complete a program of study under an approved curriculum in Engineering, totaling at least 180 units.

### Residence

College of Engineering students must meet the university residence requirement. There are no additional college residence requirements.

- **Limitation on Credit for UC Davis Extension Courses.** Students may apply a maximum of 16 units of credit for courses taken in the Open Campus Program through UC Davis Extension towards the unit requirement of their major. Courses may be taken only when written approval has been obtained from the Associate Dean for Undergraduate Studies. The grade points earned when enrolled in Open Campus courses will count toward the calculation of the student's UC GPA upon your admission or readmission to regular student status at UC Davis. Students registered at UC Davis may not enroll in Open Campus courses.

## Scholarship

In addition to meeting the university scholarship requirement, College of Engineering students are required to maintain at least a 2.000 grade point average for all undergraduate course work within the College of Engineering at UC Davis.

## English Composition

All students admitted to the University must complete the Entry Level Writing Requirement (p. 58) before credit for any composition course or general education writing experience course will be granted.

Once the Entry Level Writing Requirement has been satisfied, there are two distinct composition requirements for engineering students:

- **Lower division composition.** This requirement can be satisfied by completion of an
  - Advanced Placement English exam with a score of 4 or 5;
  - International Baccalaureate credit for English 3; or
  - completion of certain coursework with a grade of C- or better.

Courses allowed vary by major. Please see your program advisor to determine coursework that has been approved for your major.

- **Upper division composition.** Requirements for upper division composition vary by major. Please see your program advisor to determine the coursework that has been approved for your major. Please note that when you use coursework to satisfy either of the composition requirements, you must earn a grade of C- or better.

## Degree Requirement Changes; Catalog Rights

In order to ensure that students graduate with the most current engineering knowledge, College of Engineering students must complete the major requirements in effect in the academic year of graduation or in the immediately preceding academic year.

Related: Declaring a Major (<http://engineering.ucdavis.edu/undergraduate/advising-q-a/>) | Change of Major (<http://engineering.ucdavis.edu/undergraduate/advising-q-a/>) | Multiple Majors (<http://engineering.ucdavis.edu/undergraduate/advising-q-a/>) | Minors (<https://engineering.ucdavis.edu/undergraduates/majors-and-minors/>)

## Graduate School of Management

Graduate School of Management

### Degree Requirements

#### Unit Requirements

##### Total Units

Complete no less than 180 units allowing for the unit credit limitations listed below. Students may not exceed 225 units in their academic career without approval of the dean. Units earned in Advanced Placement and International Baccalaureate exams are not counted toward this 225-unit limit. Upon reaching 200 units, a student must submit an Academic Graduation Plan and an Excess Unit Petition in OASIS.

##### Upper Division Units

Complete 54 upper division units.

#### Unit Credit Limitations

- Passed/Not Passed Units. The Academic Senate limits the total number of courses graded P, including units earned in courses graded "P/NP only" to one third of the units completed on the UC Davis campus. Students must complete all required courses for the major on a letter-graded basis, unless courses are only offered on a P/NP basis.
- Graduate/Professional Courses. A maximum of 9 units in graduate level courses (200 series) and professional courses (300 and 400 series) will be accepted toward the 54 upper division requirement.

- Upper division standing. Must complete 90 units before enrolling in 192 and 199 to receive degree and upper division credit.
- Internship. A maximum of 12 units of internship 92 and 192 may be counted toward the total of 180 units for the degree.

## Credit for Open Campus Courses

When written approval has been obtained from the dean before registration, students may apply credit for the courses taken in the Open Campus program towards degree requirements. Grade points earned from Open Campus courses will count toward the calculation of a student's UC GPA. However, the units earned do not satisfy the university residence requirement. Students already registered at UC Davis may not enroll in Open Campus courses.

## Residence

Meet university residence requirement. No additional college residence requirements.

## Scholarship

Students must attain at least a 2.000 GPA for all courses required in their major by graduation. Students must also attain a 2.000 GPA in all Depth Subject Matter courses required in their major.

## Repeating Courses

Students may repeat courses once in which they received a grade of D + or lower. Students must petition the dean for approval of repeating a course more than once.

## English Composition

Each student must complete, with at least C- grades, at least 8 units, including at least 4 upper division units, in English composition courses selected from the list approved by the major. Alternatively, to fulfill the upper division English composition requirement, students may opt to pass the UC Davis examination in English composition after accumulating 70 units.

## Degree Check

Students are required to consult an advisor at several points in their academic careers:

- Each student is required to meet with an advisor at least once per academic year. These meetings should seek to cover academic, career and basic needs guidance. Degree checks can be requested during advising appointments.
- A student who anticipates accumulating over 200 units must submit a graduation plan. The plan shall be submitted within one quarter after the term in which they exceed 200 units.

## Degree Requirement Changes; Catalog Rights

Students may complete any version of the university, school, and major requirements as stated in any UC Davis General Catalog in effect at any time they were enrolled at UC Davis. If a student transfers to UC Davis from another post-secondary institution of higher education (i.e., Community college, college, or university), they may follow the requirements as stated in any UC Davis General Catalog in effect either during the three years immediately preceding their transfer to Davis or at the time they first enrolled at the prior institution, whichever is most recent. Once they have chosen the year of the UC Davis General Catalog under which they wish to be governed, they must satisfy all the university, college, and major requirements specified in that catalog.

# Letters & Science

College of Letters & Science

## Degree Requirements Unit

A minimum of 180 units is required for the bachelor's degree. 64 units must be earned in upper division courses.

### Registration Beyond the 225-Unit Limit

You are expected to fulfill all degree requirements within the 180- to 225-unit range. Once 225 units have been completed (excluding units awarded for College Board Advanced Placement Examinations or International Baccalaureate Examinations), you may register only with the permission of the Letters & Science Office of Undergraduate Education and Advising. Such permission is rarely granted and then typically only to allow completion of minimum degree requirements. A hold will be placed on a student's record when they reach 200 total units, requiring submission of an academic plan to verify the degree can be completed within the 225-unit cap. You will be expected to adhere to a program of courses agreed upon and to meet other conditions that may have been set. Approval must be obtained from Undergraduate Education & Advising in the Office of the Dean before you will be permitted to register for courses for the quarter following completion of 225 or more units.

If you are in good standing, you will be able to complete 12 quarters or the equivalent (e.g., four years) of college work even if you have earned more than 225 units before you finish your fourth year. You must petition for continuation, however, and file the quarter-by-quarter course program you have planned.

### Unit Credit Limitations

For certain courses, limits have been established on the number of units that can be counted towards the 180-unit minimum required for the degree. To avoid discovering just before graduation that you are short units, meet with an advisor regularly and keep track of the number of units you have taken in each of the following categories.

### Limitation on Credit for Graduate & Professional Courses

Undergraduates may enroll in graduate and professional courses subject to the restrictions outlined on the petition to Request to Take a 200, 300 or 400 - Numbered Course for Degree Credit ([https://lettersandscience.ucdavis.edu/sites/g/files/dgvnsk10716/files/files/page/take-200-300-400-course\\_0.pdf](https://lettersandscience.ucdavis.edu/sites/g/files/dgvnsk10716/files/files/page/take-200-300-400-course_0.pdf)). Graduate and professional courses that have been completed will be listed on the student's transcript in the usual manner. However, the units earned may be counted toward degree requirements only under the conditions listed below.

Within the limitations A, B and C given below, undergraduate students in the College may count up to a combined total of 9 units in graduate 200 series courses and in 300 and 400 series professional courses toward degree requirements. These units, however, are not counted as upper division units.

1. The recommendations of the instructor in the course and the department chairperson—in addition to approval from Undergraduate Education & Advising in the Office of the Dean—must be obtained by petition in order to receive credit toward the degree for the following kinds of courses:
  - All graduate courses 200–298, whether offered by a department or program outside of or within the College of Letters & Science.

- All professional courses 300–398 for teachers offered outside of the College of Letters & Science.
- All postgraduate professional courses 400–498 offered outside of the College of Letters & Science.
- All variable unit courses 300–398 and 400–498 offered within the College of Letters & Science.

2. The minimum eligibility conditions for an undergraduate student in the College to petition for degree credit for a 200, 300, or 400 series course are a UC grade point average of 3.300 and completion of 18 upper division units basic to the subject matter of the course. These eligibility conditions may be waived, however, upon the recommendation of the course instructor and concurrence of the department chairperson if the student's preparation warrants exception.
3. Undergraduates in the College cannot receive degree credit for special study courses 299, 399, or 499.

### Limitation on Credit for Units Graded P

Students in the College of Letters & Science are subject to an additional limitation on the number of units that may be completed employing the Passed/Not Passed grading option. Graduating seniors and other students planning to undertake graduate or professional studies, should consult an advisor before electing for Passed/Not Passed grading in courses required for the major program. Excluding courses that are graded on a Passed/Not Passed (P/NP) basis only, the number of units graded P that may be accepted towards a degree in the College of Letters & Science is limited to not more than one fourth of the units completed in residence on the UC Davis campus. The Academic Senate limits the total number of courses graded P, including units earned in courses graded "P/NP only," to one third of the units completed on the UC Davis campus. This limitation applies to all UC Davis undergraduates, including Letters & Science students.

### Limitation on Credit for UC Davis Extension Courses

1. UC Davis Continuing and Professional Education courses with a designator of "X." Students may apply credit earned through lower division and upper division UC Davis Continuing & Professional Education "X" courses towards the 180-unit requirement only with written approval from Undergraduate Education & Advising in the Office of the Dean prior to registration. The degree credit allowed for such courses is usually less than the unit value listed in the course description. Additional limitations on UC Davis Continuing & Professional Education "X" courses include:
  - A maximum of 9 units may be offered for elective credit only, and
  - They may not be applied toward fulfillment of the Area, Foreign Language, Upper Division, or Residence requirements of the College.
2. UC Davis Continuing & Professional Education courses with a designator of "XD." Students may apply credit earned through lower division and upper division UC Davis Continuing & Professional Education "XD" courses towards the 180-unit requirement. Additionally, credit from such courses may be applied toward fulfillment of all university, campus, college and major unit and subject matter requirements—including the Area, Foreign Language, Upper Division and Residence requirements of the College—in the same manner that the corresponding regular UC Davis course is so accepted.
3. UC Davis Continuing & Professional Education courses with a designator of "XDC" [Open Campus (Concurrent) Program]. Subject to the following conditions, students may apply credit earned through lower division and upper division UC Davis Continuing &

Professional Education Open Campus (Concurrent) courses—e.g., those bearing the "XDC" designator, towards university unit and subject requirements, and, effective Fall 2003, the calculation of the student's UC GPA, upon admission or readmission to regular student status at UC Davis.

- Students on leave of absence and regular status students when matriculated, or regular status students for a period of one calendar year following the last term of regular enrollment at UC Davis, may not enroll in Open Campus (Concurrent) courses. Exceptions to this policy for undergraduate students may be made only under extraordinary circumstances by petition with prior approval by Undergraduate Education & Advising in the Office of the Dean and the Dean of UC Davis Continuing and Professional Education.
- Concurrent ("XDC") courses do not count toward satisfaction of the University residence requirement or the residence requirements of the campus or the college.
- Concurrent ("XDC") courses may constitute at most half of the units offered in satisfaction of the upper division requirements of the major.
- In the event that the faculty of the college imposes further restrictions on the number of units of UC Davis Continuing and Professional Education Open Campus (Concurrent) course work that may be applied to undergraduate degree programs, the allowable number of units of course work will be determined chronologically, starting with the course completed first. Grade point credit for such courses will be determined in the same manner.

### **Other Unit Credit Limitations**

The following are additional courses that have limits on the number of units that can be counted toward your degree:

- Internship courses (numbers 092, 192): 12 units maximum including internship units taken at other institutions; see *Nonstandard courses*, below.
- Music 130, 131, and 140 - 157 (combined): 19 units maximum.
- Nonstandard courses (092, 097T, 097TC, 099, 192, 194H, 197T, 197TC, 199 and similar courses): 30 units maximum or one sixth of the units taken at UC Davis, whichever is the smaller; note the separate unit limits on internship, special study and tutoring courses; and major limitations
- Physical Education 001 and 006 (combined): 6 units maximum.
- Special Study courses (099, 194H, 199): 5 units maximum in any one quarter; see *Nonstandard courses*, above.
- Tutoring courses (097T, 097TC, 197T, 197TC): 10 units maximum; see *Nonstandard courses*, above.

### **Residence**

While registered in the College of Letters & Science, a minimum of 27 upper division units, including 18 upper division units in the major, must be completed on the Davis campus; work completed while registered in the UC Education Abroad Program or the UC Davis Continuing & Professional Education Open Campus Program does not satisfy university or College Residence requirements.

### **Scholarship**

The minimum grade point average to satisfy the scholarship requirement is 2.000 for all courses counted toward the major and for all upper division courses used to satisfy major requirements. Only grades earned in courses taken at UC Davis will be included in the grade point

computations. To obtain these minimum averages in the major, you may repeat courses that are graded D or F. If you have to repeat a course more than once, you need approval from Undergraduate Education & Advising in the Office of the Dean.

### **English Composition**

All undergraduates in the College of Letters & Science must fulfill a two-course writing requirement, by completing each course with a grade of C- (or P) or higher or by testing out of one or both courses. All courses require a minimum of 6,000 words of writing, designed to introduce students to academic and professional writing, advance their analytic skills, and improve their writing process. Students may satisfy the writing requirement by completing:

1. One course from University Writing Program 001, English 003, Comparative Literature 001, 002, 003, 004, or Native American Studies 005; and,
2. After completing 84 units, one course selected from University Writing Program (UWP) 101, UWP 102 series, or UWP 104 series; or completing four units of upper division Writing Experience (WE) designated coursework approved by the English Language & Literacy (ELL) Committee of the College of Letters & Science (these units may only count for the English Composition requirement, not towards the 6 units of General Education—Core Literacy/Writing Experience requirement). Subject to the restrictions just listed, additional ELL approved courses acceptable for satisfying the upper division writing will be listed on the College of Letters & Science degree requirements (<https://lettersandscience.ucdavis.edu/degree-requirements/>).

### **Transfer Courses in English Composition**

Transfer courses considered to be equivalent or comparable to English 003, Comparative Literature 001, 002, 003, 004, Native American Studies 005, or University Writing Program 001, 001V, 001Y, 101, 102 or 104 series, will be accepted toward satisfaction of the English Composition requirement. Note that University Writing Program 101, 102 and 104 series courses or the equivalent must be taken after you have completed 84 units of degree credit.

### **Upper Division Composition Examination**

The no-fee examination is typically offered on a Saturday morning in October, January and April. No examinations are given during the summer.

For specific examination dates, instructions, and to sign up to take an examination, see the University Writing Program—Upper Division Composition Exam Information (<http://writing.ucdavis.edu/compexam/>). It is recommended that students with disabilities contact the Student Disability Center at 530-752-3184 and the Entry Level Writing Program Office, 530-752-0450, at least two weeks prior to the exam date to arrange accommodations.

Students are advised to complete this requirement in their junior year.

### **Area (Breadth)**

The College Breadth Requirement promotes the intellectual growth of students by asking them to acquire a broader background of knowledge than is provided by the usual major. The Breadth requirement also guides students in exploring the interdependence of knowledge.

### **A.B. Degree**

Satisfaction of the campus General Education requirement fulfills this requirement.

**B.S. Degree**

A total of 90 units in natural sciences/mathematics; units in the approved courses listed below used in satisfaction of the campus General Education requirement in Science & Engineering topical breath may also be used to satisfy this requirement.

Courses numbered 092, 097T, 097TC, 098, 192, 197T, 197TC, 198 and 200-499 cannot be counted toward satisfaction of the natural sciences/mathematics Area requirement. A maximum of 10 units in special study courses (099, 194H, 199) may be counted toward that portion of the Area requirement. Subject to the restrictions just listed, courses acceptable for fulfilling the 90-unit natural sciences/mathematics Area requirement are:

**Natural Sciences & Mathematics**

- Anatomy, Physiology & Cell Biology (APC) 100
- Anthropology (ANT) 001, 001Y, 013, 015, 054, 151, 152, 153, 154A, 154BN, 154C, 154CL, 155, 156A, 156B, 157, 158, 159, 160, 180, 182
- Astronomy (AST)
- Avian Sciences (AVS) 013
- Biological Sciences (BIS)
- Cell Biology & Human Anatomy (CHA) 101, 101L
- Chemistry (CHE)
- Cognitive Science (CGS) 107
- Communication (CMN) 150V
- Data Science (DSC)
- Engineering (ENG) 006, 010, 035, 102
- Engineering: Biomedical (BIM) 126
- Engineering: Computer Science (ECS) 012, 017, 020, 032A, 032B, 032C, 034, 036A, 036B, 036C, 050, 089A-L, 111, 113, 115, 116, 117, 119, 120, 122A, 122B, 124, 127, 129, 130, 132, 140A, 140B, 142, 145, 150, 152A, 152B, 152C, 153, 154A, 154B, 158, 160, 161, 162, 163, 164, 165A, 165B, 170, 171, 172, 173, 174, 175, 177, 178, 189A-N, 191, 193A, 193B
- Engineering: Electrical & Computer (EEC) 170, 173A
- Entomology (ENT) 010, 100, 153
- Environmental & Resource Sciences (ERS) 131
- Environmental Science & Policy (ESP) 100, 121
- Environmental Toxicology (ETX) 101
- Evolution & Ecology (EVE)
- Exercise Biology (EXB) 101, 103, 106, 106L, 110, 111, 112, 113, 115, 116, 117, 126
- Fiber & Polymer Science (FPS) 110
- Food Science & Technology (FST) 100A, 100B, 101A, 101B
- Geology (GEL)
- Integrated Studies (IST) 008A
- Linguistics (LIN) 127, 175, 177
- Mathematics (MAT)
- Microbiology (MIC)
- Molecular & Cellular Biology (MCB)
- Neurobiology, Physiology, & Behavior (NPB)
- Nutrition 010, 010V, 010Y, 111AV, 111B
- Pathology, Microbiology, & Immunology (PMI) 126
- Physical Education (PHE) 133, 135
- Physics (PHY)
- Plant Biology (PLB)

- Psychology (PSC) 041, 100, 100Y, 101, 103A, 103B, 104, 113, 121, 122, 123, 124, 125, 126, 127, 129, 130, 131, 132, 133, 135, 137, 146, 180B
- Statistics (STA)
- Wildlife, Fish, & Conservation Biology (WFC) 010

**College Board Advanced Placement Examination**

Units may be counted toward natural sciences/mathematics for each examination passed with a score of 5, 4 or 3 on the following exams:

- 4 units of credit allowed for Biology, Chemistry, Computer Science A, Computer Science Principles, Environmental Science, Mathematics-Calculus AB, Physics 1, Physics 2, Physics C Mechanics, Physics C Electricity and Magnetism, and Statistics.
- 8 units of credit allowed for Mathematics-Calculus BC.

**International Baccalaureate Higher Level Examination**

Units may be counted toward natural sciences/mathematics for each examination passed with a score of 7, 6 or 5, on the following exams:

- 4 units of credit allowed for Biology, Chemistry, and Computer Science.
- 8 units of credit allowed for Mathematics Analysis and Approaches and Physics.

**Transfer Students** may satisfy the natural science/mathematics requirement by attaining certification of **IGETC completion**. Transfer students who have not completed the IGETC must satisfy the requirement as listed above. Previously completed transfer coursework equivalent to a course or area on the approved list may also be used toward natural science/mathematics.

**Foreign Language (A.B. & B.A.S. Degrees)**

A key component of liberal education, the study of another language exposes students to a ubiquitous and highly diverse component of human behavior and interaction. Language learning enables students to communicate effectively in an increasingly internationalized world, enhances their ability to understand ways of thinking different from their own, gives them direct access to cultural production from another time and place, awakens in them an awareness of the conditioned nature of their assumptions about the world, and trains them to cope more effectively with intellectual and practical problems they may face in their future careers.

The College of Letters & Science encourages its students to acquire functional proficiency in at least one language other than English before graduating. At a minimum, the College requires A.B. candidates to complete three sequenced quarters (15 units) of courses, or its equivalent, in one foreign language. B.S. candidate requirements are determined by their respective major program.

**Languages Satisfying the Requirement**

The Foreign Language Requirement may be satisfied in any language offered at UC Davis, including ancient languages, or which is normally taught at—and for which transfer credit is allowed—from another institution, including American Sign Language. Students may also satisfy this requirement by examination in a language not offered on the UC Davis campus (see below).

**Satisfaction of the Requirement****At UC Davis or Another Accredited Institution**

You may satisfy the requirement by taking 15 quarter units of one foreign or classical language offered at UC Davis. You may also fulfill this requirement by taking the equivalent number of transferable quarter

units in one foreign language at an accredited institution. Transfer students should consult the Transfer Credit Evaluation, which is issued by Undergraduate Education and Advising in the Office of the Dean, within a quarter after their first enrollment at UC Davis. Students planning to continue to study the same language at UC Davis must consult the relevant language coordinator. If you have successfully completed the second or third year of a language in the tenth or higher grade in high school, you may receive unit credit for course 1 of that language when taken at UC Davis, but the grading mode will be P/NP only. Although a Passed or Not Passed grade will be charged to your P/NP option, no petition is required.

### **Through Study Abroad**

Certain study abroad programs offered by UC Davis through the Global Learning Hub (<https://globallearning.ucdavis.edu/>), UC Education Abroad Program and other accredited institutions may be used to satisfy the requirement. Some of these programs do not have a language prerequisite, but others do. If you intend to apply for a study abroad program with a language prerequisite, you should plan on completing the relevant foreign language requirement by the end of your second or third year, depending on the program.

### **With the Intersegmental General Education Transfer Curriculum (IGETC)**

IGETC is a series of courses which prospective transfer students attending California community colleges may complete to satisfy the lower division breadth/general education requirements at the University of California. Students may satisfy the Foreign Language requirement by attaining certification of **IGETC completion**.

### **By Examination: Proficiency Exam**

The UC Davis Language Center (DLC) offers proficiency tests in numerous languages. A proficiency test does not yield unit credit; it only determines whether the Foreign Language requirement has been met or at which point in the language sequence you should enroll. Students must follow the language program's placement policy if they decide to study the language at UC Davis.

### **By Examination: Standardized Tests**

College Board Subject Test: Earning a qualifying score of at least 550 on a College Board Foreign Language Subject Test satisfies the requirement. This test may be taken at any time during your high school career. Once your score is on file at Undergraduate Admissions, notify Undergraduate Education and Advising in the Office of the Dean so that satisfaction of the College requirement can be noted on your record.

### **College Board Advanced Placement Examination**

A score of 5, 4 or 3 on any foreign language College Board Advanced Placement Examination, with the exception of Latin, taken in high school will satisfy the Foreign Language requirement.

### **International Baccalaureate Higher Level Examination**

A score of 7, 6, or 5 on the French A1, A2, or B Examination, the German A1, A2 or B Examination, the Italian A1 Examination, the Latin Examination, the Portuguese A1, A2 or B Examination, or the Spanish A1 Examination taken in high school will satisfy the Foreign Language requirement.

### **By Examination: Other Means**

If you have not completed the required level language course, but assume you have attained equivalent language fluency and cultural knowledge, you may satisfy the language requirement by passing a proficiency examination. For more information, consult the appropriate foreign language department. You may validate your knowledge of a language acquired by any means before matriculating at UC Davis by taking a

proficiency test or another form of evaluation (if available in the relevant language department). A test may not be taken, however, in a language for which you have already received degree credit.

## **Major Degree Certification**

These requirements are fulfilled by completing a major program offered by a teaching department or program committee in the College of Letters & Science (see the list of majors) or an individual major program approved by the College's Committee on Individual Majors. No more than 6 units in internship courses (numbered 092, 192, or similar internship courses) may be accepted in satisfaction of the requirements of major programs. Courses numbered 097T, 097TC, 197T and 197TC do not satisfy unit or course requirements in the major. Please check with your major advisor to determine if there are any additional restrictions for your specific major. You can also learn more about the requirements for a major by talking with a Major Advisor and visiting the departmental website.

## **Degree Check**

### **Freshman Admits**

In your third year, you will be notified by Undergraduate Education & Advising in the Office of the Dean that a summary of your progress in fulfilling college and university requirements has been completed. At approximately this point, you should contact your departmental advisor for a check of your major requirements.

### **Transfer Admits**

During your UC Davis Orientation Experience, your department/program advisor will review your major requirements with you. Additionally, you will receive notification of the evaluation of your transfer institution credit summarizing your progress in fulfilling college, campus and university requirements in late summer/early fall after your official transcripts have been processed.

### **Senior Year**

Before the beginning of your senior year, take some time to consider your goals and to plan the academic program for your final year as an undergraduate. To plan properly and to ensure that you get the most out of your remaining education and complete all graduation requirements, you should know what requirements remain unsatisfied. You are encouraged to utilize the MyDegree (<https://mydegree.ucdavis.edu/>) advising tool for assistance. **While not a replacement for academic advising by your college and major advisors**, it is an online advising tool that allows you to understand your degree requirements, track your progress towards degree completion, and explore alternative and/or additional fields of study.

## **Degree Requirement Changes; Catalog Rights**

Students may choose to fulfill the university and college requirements as stated in any UC Davis General Catalog in effect at any time they were enrolled at UC Davis. Transfer students may choose a UC Davis catalog in effect at any time they were registered as a full-time student at a post-secondary institution of higher education; e.g., community college, college or university. Students will use the catalog year chosen to satisfy university and college requirements. In general, major requirements used are those in effect at the time the student officially declares their major; but students should consult their department or major program office for confirmation.

Related: Declaring a Major (<https://lettersandscience.ucdavis.edu/frequently-asked-questions/>) | Change of Major (<https://lettersandscience.ucdavis.edu/frequently-asked-questions/>)

| Multiple Majors (<https://lettersandscience.ucdavis.edu/frequently-asked-questions/>) | Cross-College Majors (<https://lettersandscience.ucdavis.edu/frequently-asked-questions/>) | Individual Major (<https://lettersandscience.ucdavis.edu/frequently-asked-questions/>) | Minors (<https://lettersandscience.ucdavis.edu/major-and-minor-advising/>)

## Fees, Costs, & Financial Aid

Give careful consideration to the total financing of your university education. If you need funds beyond those that you and your family can provide, you should apply for financial aid well in advance of enrollment. There are deadlines for applying for financial aid; grants, loans, work study, and scholarships.

Every student must pay the term tuition and fees, and any amounts charged to the student account, in full by the fee payment deadlines in the Fees & Billing calendar (<https://registrar.ucdavis.edu/calendar/fees/>). For full information, see Fees, Costs, & Financial Aid (<https://www.ucdavis.edu/admissions/cost/>).

A Deferred Payment Plan (DPP) (<https://afs.ucdavis.edu/student-resources/accounting/mybill/dpp/>) is available, allowing students to pay eligible tuition and fees in monthly installments.

## Tuition & Residence

Tuition & Fees (<http://budget.ucdavis.edu/studentfees/>) are assessed each term based on a residence classification of each student: Resident or Nonresident. Both Resident and Nonresident students are assessed tuition and fees for each term, but if the student and their supporting natural or adoptive parent(s) do not meet the UC Residence Policy definition of resident for purposes of tuition, these students, classified as Nonresident, are assessed the additional Nonresident Supplemental Tuition (<http://budget.ucdavis.edu/studentfees/current/>).

## Statement of Legal Residence (SLR)

It is important to know that **California residence is not assumed**. All incoming students **must complete** a Statement of Legal Residence (SLR) so that a residence determination can be made. If a student does not complete the SLR or submit the necessary documents, the student will be classified as a **Nonresident** and will be assessed the Nonresident Supplemental Tuition (<http://budget.ucdavis.edu/studentfees/current/>). Students classified as Nonresident may petition for change of classification once all the UC Residence requirements (<https://www.ucop.edu/residency/residency-requirements.html>) are met.

Residence Deputies in the Office of the University Registrar will determine whether the student and parent(s) are California residents for purposes of tuition and fees. The presumption of Residence Deputies is that **students and their parents** have read and understand the UC Residence requirements prior to submitting their residence information for determination of residence for tuition purposes.

## Definition of Parent

Until your student is 24 years of age, both you and your student must meet the UC Residence Policy definition of resident to be considered eligible for resident tuition. Adoptive parents, stepparents, guardians and other relatives supporting students are cautioned to read the UC Residence Policy definition of parent (<https://www.ucop.edu/residency/residency-requirements.html>).

## New & Transfer Students

New & Transfer students who are living with relatives or other adults in California, or are considering self-support or claiming financial independence from their parents are further cautioned to understand the UC Residence Policy governing Financial Independence (<https://www.ucop.edu/residency/files/rpg-2024-25-final.pdf#page=17>), which requires **one full year of financial independence and complete self-sufficiency** (as of Fall Term 2019) prior to the term resident status is claimed.

## Residence Determination

Residence Deputies apply the UC Residence Policy & Guidelines (<https://www.ucop.edu/residency/files/rpg-2024-25-final.pdf>), under the authority of the UC Office of the General Counsel, to the facts and information provided under penalty of perjury on the Statement of Legal Residence (SLR) and any additional information requested by the Residence Deputy. This determination is independent of, and can differ from, similar determinations made by the Office of Admissions and Financial Aid. Information from either of those offices indicating that the student is a resident, or that the student is financially independent, does not necessarily mean the student is a resident for purposes of tuition and fees.

## Course Materials & Service Fees

Students may be charged fees in some courses for the use, rental or consumption of materials, tools or equipment, or for the costs of materials or services necessary to provide a special supplemental educational experience. For example, course materials fees may cover the purchase of chemicals and glassware for a science laboratory or art supplies for an art studio class. They might also cover film rentals, field trips, or the purchase or rental of specific equipment. Courses that may be subject to the course materials and services fee are noted in the Class Search Tool (<https://registrar-apps.ucdavis.edu/courses/search/>) and Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>). The course materials & services fees list is available at Tuition & Fees (<https://financeandbusiness.ucdavis.edu/student-resources/tuition-fees/>).

## Part-Time & Employee Students Fees

### Part-Time Students Fees

Students approved for part-time status for tuition purposes are assessed one-half of tuition. Nonresident students are also assessed one-half of Nonresident Supplemental Tuition. There is no reduction in the Student Services Fee or in any of the campus-base fees. For more information and specific requirements, see Part-Time Status (<https://registrar.ucdavis.edu/registration/part-time/>).

### UC Employee-Student Reduced Fees

Reduced fees are available to UC career employees and certain UC retirees who are qualified for admission to the university. For full information, see UC Employee-Student Reduced Fee (<https://registrar.ucdavis.edu/tuition/employee-student-reduced-fee/>).

## Drop for Non-Payment & Student Payment Deadline

*Content on this page is updated throughout the academic year.*

## Undergraduate Student Drop for Non-Payment

Undergraduate students may be dropped from their classes if they have not paid their current university fees and any outstanding balance due by the Student Fee Payment Deadline (<https://registrar.ucdavis.edu/calendar/web/fees/>): September 15th for fall quarter, December 15th for winter quarter, and March 15th for spring quarter, June 15th for Summer Session One, and July 15th for Summer Session Two. Payments are posted to the student account on a nightly basis, and all payments must be made by 2:00 p.m. (PT) at the Campus Cashiering Office (<https://financeandbusiness.ucdavis.edu/finance/cashier/>), in Dutton Hall (<http://campusmap.ucdavis.edu/?b=52>) or via MyBill (<https://mybill.ucdavis.edu/>) by 11:59 p.m. (PT).

If an undergraduate student's classes are dropped for non-payment, all tuition & fees for that term will be removed from the student's account. Once the drop for non-payment process is completed, paid wait-listed students are rolled into open classes before the registration freeze lifts and registration is re-opened for all students. Once the registration freeze is lifted, all students may access Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/?sb>) to register or change class enrollments.

Undergraduate students who are dropped for non-payment remain eligible to register for classes. However, there is no guarantee that students who were dropped for non-payment will be able to register for the same classes that were dropped for non-payment.

*Students who no longer wish to remain enrolled in classes for the term must complete a Cancellation/Withdrawal form (<https://registrar.ucdavis.edu/registration/leave/cancellation-withdrawal/>). They should not use or expect the drop for the non-payment process to remove them from their classes, or relinquish them from their financial responsibility and obligations for the term.*

## Undergraduate Student Late Payment Deadline

### Undergraduate Student Late Payment Deadlines

- Fall 2025; Oct 7, 2025
- Winter 2026; Jan 16, 2026
- Spring 2026; Apr 12, 2026

Undergraduate students who register for the first time after the Registration Freeze (<https://registrar.ucdavis.edu/calendar/web/registration/>), or those who re-register after being dropped for non-payment must pay all tuition & fees, and any outstanding balance due, by the Student Late Payment Deadline (<https://registrar.ucdavis.edu/calendar/web/fees/>)—this deadline is always the 10th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>).

Undergraduate students who choose to pay more than five calendar days after the Student Fee Payment Deadline (<https://registrar.ucdavis.edu/calendar/web/fees/>) will be assessed a \$45 late fee to process the untimely payment. These students must then make payment by the Student Late Payment Deadline (<https://registrar.ucdavis.edu/calendar/web/fees/>)—the 10th day of instruction (<https://registrar.ucdavis.edu/calendar/web/quarter/>).

Payments are posted to the student account on a nightly basis, and all payments must be made by 2:00 p.m. (PT) at the Campus Cashiering

Office (<https://financeandbusiness.ucdavis.edu/finance/cashier/>), in Dutton Hall (<http://campusmap.ucdavis.edu/?b=52>) or via MyBill (<https://mybill.ucdavis.edu/>) by 11:59 p.m. (PT). If payment is not received by this deadline, undergraduate students will be administratively withdrawn and these students will remain financially liable for tuition & fees for the first 10 days of instruction as per the Schedule of Refunds (<https://registrar.ucdavis.edu/registration/leave/refunds/>).

Undergraduate students who are administratively withdrawn will need to apply for Readmission (<https://registrar.ucdavis.edu/registration/return/readmission/>) for a future quarter and pay the readmission application fee.

## Graduate Student Drop for Non-Payment

### Graduate Student Final Fee Payment Deadlines

Graduate students who have not paid tuition, fees, and any outstanding balance due by the Graduate Fee Payment Deadline (<https://grad.ucdavis.edu/academic-dates/>) will be canceled from their future term, and all registered classes for the future term will be dropped for non-payment. In addition, students who choose to pay more than five calendar days after the Graduate Fee Payment Deadline will be assessed a \$45 late fee to process the untimely payment.

This deadline is always the Thursday within the eighth week of instruction.

Graduate students who wish to re-register after having been dropped for non-payment for the future term must:

1. Pay all current term tuition & fees and any outstanding balance due.
2. Take proof of payment to Graduate Studies in 2001 Walker Hall.
3. Once activated, register for classes via Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/?sb>).

Graduate students who choose to withdraw from the current term or not to be reactivated for the future term, are still responsible for current term tuition, fees and any outstanding balance due. If their future term is not re-activated, they may be required to formally reapply to a UC Davis graduate program for any future term.

## Fee Refunds

*Content on this page is updated throughout the academic year.*

When considering a leave of absence or separating from the university, any refund is based upon the number of calendar days elapsed from when instruction begins for the term to when such request is submitted.

If you have experienced an extenuating circumstance that impacts your Schedule of Refunds, see General Appeal & Retroactive Actions (<https://registrar.ucdavis.edu/records/retroactive/>) for more information.

**For refunds from your UC Davis student account**, please contact Student Accounting | Finance & Business ([ucdavis.edu](https://ucdavis.edu)) (<https://financeandbusiness.ucdavis.edu/student-resources/accounting/>).

Related: Cancellation or Withdrawal From the University (<https://registrar.ucdavis.edu/registration/leave/>) | Planned Educational Leave Program (PELP) (<https://catalog.ucdavis.edu/academic-information-policies-regulations/leaving-uc-davis/>)

## Schedule of Refunds

The Schedule of Refunds refers to calendar days (not instruction days) beginning with the first day of instruction (<https://registrarnew.sf.ucdavis.edu/calendar/quarter/>). The number of days elapsed is determined from the date the completed separation or leave of absence request is filed with the Office of the University Registrar and it is presumed that no university services will be provided to the student after that date.

The refunded percentages, listed below, are applied respectively to the tuition, student services fee, and, as appropriate, Professional Degree Supplemental Tuition or Nonresident Supplemental Tuition for nonresidents of California.

The Schedule of Refunds applies to all students enrolled in a term except first-quarter students\* who receive Federal financial aid.

### Regular Academic Year Fee Refund Schedule for Continuing Students

Refund	Days in Quarter	Days in Semester
100%	0-1 (less \$10)	0-1
90%	2-7	2-11
50%	8-18	12-27
25%	19-35	28-53
0%	36+	54+

\* New students who receive federal financial aid and withdraw during the first academic term may have fees refunded according to the modified fee refund schedule below. Additionally, any new student withdrawing on the first day of instruction will not be assessed the \$10.00 processing fee.

### Regular Academic Year Fee Refund Schedule for New Students Receiving Financial Aid

Refund Amount	Days in Quarter	Days in Semester
100%	0-1	0-7
90%	2-7	8-14
80%	8-14	15-28
70%	15-21	29-35
60%	22-28	36-49
50%	29-35	50-56
40%	36-42	57-63
0%	43+	64+

UC Davis follows the University of California's systemwide refund procedures (<https://www.ucop.edu/operating-budget/fees-and-enrollments/other-fee-information/payment-refunds.html>). Any refund is based on the Schedule of Refunds, above.

## University of California Student Health Plan (SHIP) Eligibility & Refunds

UC SHIP coverage for students who submit a Cancellation/Withdraw (<https://registrar.ucdavis.edu/registration/leave/cancellation-withdrawal/>), PELP (<https://registrar.ucdavis.edu/registration/leave/pelp/>), or Filing Fee form (<https://grad.ucdavis.edu/financial-support/forms/>) with the Office of the University Registrar prior to the start of the term will terminate once the new term begins.

More information regarding continued SHIP eligibility or a refund of SHIP fees is available at Davis SHIP (<https://shcs.ucdavis.edu/insurance/>), or call Insurance Services at Student Health & Counseling Services at 530-752-6055.

## Return of Unearned Military Tuition Assistance (TA) Funds

### Department of Defense (DOD) Unearned Tuition Assistance Return Schedule

For more information, see Systemwide Tuition & Fee Levels (<https://www.ucop.edu/operating-budget/fees-and-enrollments/>) for the academic year.

Refund	Days in Quarter	Days in Semester
100%	0-1	0-1
90%	2-5	2-11
50%	6-12	12-27
25%	13-29	28-62
25% (60% of course is completed)	30	63
0%	31+	64+

## Additional Education Opportunities

- Bodega Marine Laboratory Program (p. 74)
- First-Year Seminar Program (p. 75)
- Global Learning Hub (p. 75)
- Independent Study Program (p. 75)
- Internship Program (p. 76)
- Quarter at Aggie Square (p. 76)
- Summer Sessions (p. 76)
- UC Center Sacramento (p. 77)
- UC Washington Program (UCDC) (p. 77)
- University Honors Program (p. 78)

## Bodega Marine Laboratory Program

Bodega Marine Laboratory  
P.O. Box 247  
Bodega Bay, CA 94923  
707-875-2211; Bodega Marine Laboratory (<http://bml.ucdavis.edu/>)

Integrative marine science courses at Bodega Marine Laboratory (BML) offer a multidisciplinary understanding of coastal systems through hands-on research, lab and field-based courses. The program includes courses during Fall Quarter, Summer Session One, and Summer Session Two.

## Fall Quarter Program

This integrated, in-residence program offers students a multidisciplinary understanding of coastal ecosystems and oceanography through intensive, hands-on lab and field courses taught at Bodega Marine Laboratory. Applications are due in Spring of each year. Scholarships will be available to defray the costs of housing at BML. Students are expected to be in-residence at BML. Information on the application,

classes, and scholarships can be found at Bodega Marine Laboratory (<http://bml.ucdavis.edu/>).

For more course detail, see the full description under the appropriate academic department listing or Bodega Marine Laboratory (<http://bml.ucdavis.edu/>).

### **Offerings vary by year, but may include:**

*Marine Microbial Ecology.* EVE 198

*Marine and Coastal Field Research.* ESP 124

*Physical and Chemical Oceanography.* GEL 150A

*Marine Environmental Issues.* ESP 111

### **Summer Session Courses**

This integrated program offers students a multidisciplinary understanding of coastal ecosystems and oceanography through intensive, hands-on lab and field courses taught at Bodega Marine Laboratory. Students can take up to 10 units in each Summer Session. Applications are due in Spring of each year. Scholarships are available to defray the costs of housing at BML. Information on the application, classes, and scholarships can be found at Bodega Marine Laboratory (<http://bml.ucdavis.edu/>).

For more course detail, see the full description under the appropriate academic department listing or Bodega Marine Laboratory (<http://bml.ucdavis.edu/>).

### **Offerings Include:**

#### **Summer Session One**

*Coastal Marine Research and Experimental Invertebrate Biology* (courses must be taken together). BIS 124, EVE 114

*Effects of Coastal Pollution on Marine Organisms.* ETX 127/NUT 127

#### **Summer Session Two**

*Biological Oceanography.* GEL 150C /ESP 150C

*Coastal Oceanography.* ESP 152

*Marine Environmental Issues.* EVE 111/ESP 111

For both Fall Quarter and Summer Sessions, course offerings, sequence structure and instructors may vary from year to year.

Bodega Marine Laboratory fall and summer programs can be residential, with students housed on the laboratory grounds. Residential students are assessed a room and board fee in addition to standard campus registration fees. Students may choose to commute for Summer Session Two. Financial aid may be available to eligible students from campus. Scholarships are available from Bodega Marine Laboratory. Applications and consent of instructors are required.

For additional information, contact 707-875-2211 or see Bodega Marine Laboratory (<http://bml.ucdavis.edu/>).

### **First-Year Seminar Program**

#### **Program Office**

1350 The Grove; First-Year Seminars Program (<http://fys.ucdavis.edu>)

First-Year Seminars (<http://fys.ucdavis.edu>) are an exciting program of small, innovative classes that reflect the instructor's intellectual interests. Limited to 19 first-year undergraduate students each, these once-in-a-lifetime courses promote intellectual exchange, critical thinking, and community. Students have the opportunity to study with faculty

members, often meeting in settings more informal than the ordinary classroom. For complete information, see UC Davis First-Year Seminars Program (<http://fys.ucdavis.edu>).

### **Global Learning Hub**

Through the Global Learning Hub (<https://globallearning.ucdavis.edu>), each and every UC Davis student can find global learning opportunities available on campus, in the region, virtually, and internationally. The Hub offers global learning programs, workshops, and resources that enhance all UC Davis students' academic and career pursuits through four broad areas of opportunities: Community Engagement; Global Skills & Leadership; Internships & Research; and Study Abroad. UC Davis is committed to preparing the next generation of global problem-solvers and change-makers. As such, we aim to prepare our undergraduate, graduate, and professional students to solve global challenges collaboratively, equitably, and sustainably. As part of Global Affairs, the Global Learning Hub aims to inspire global curiosity, understanding and engagement. For complete information, see the Global Learning Hub (<https://globallearning.ucdavis.edu>).

### **Independent Study Program**

Chair, Committee on Courses of Instruction, c/o Academic Senate Office; 530-752-2220.

The Independent Study Program provides an opportunity for upper division students to design and pursue a full quarter (12-15 units) of individual study in an area of special interest.

A program qualifying as Independent Study will consist of one or more courses in the 190–199 series. While the theme of such a program may be reasonably broad, a recognizable common thread should unite all the academic work you undertake during an independent study quarter. Regularly offered formal courses will only be acceptable as a part of such a program if they clearly fit its theme and contribute something essential toward the realization of its objectives. The program is not to be considered a way to take more variable-unit courses than normally permitted.

The procedure for enrolling in an Independent Study Program is as follows:

1. Develop, in general terms, a plan of study.
2. Locate a faculty sponsor or panel of sponsors and with their help and approval develop a detailed plan.
3. Complete a project proposal form (obtained from the Academic Senate office) and submit it to the Academic Senate Committee on Courses of Instruction.

The deadline for applications is the tenth day of instruction of the term before; for specific dates, see the Academic Calendar (<https://registrar.ucdavis.edu/calendar/quarter/>).

**Note.** Most courses in the 190-199 series are graded on a "Passed/Not Passed" basis unless the instructor has obtained approval for letter grading from the Academic Senate Committee on Courses of Instruction. Requests for letter grading must be received by the Senate Committee no later than the fifteenth day of instruction in the quarter in which the course is offered.

You must report the completion or termination of the project to the Academic Senate Committee on Courses of Instruction.

# Internship Program

Marcie Kirk Holland, Executive Director

Career Center (<http://icc.ucdavis.edu>); South Hall; 530-752-2855

## Program Areas

The UC Davis Career Center works with undergraduate, masters, and Ph.D. students, postdoctoral scholars and recent graduates. The Career Center can help you identify your abilities and interests and relate them to career options; gain access to practical experience to increase your competitiveness in the job market; and find employment. Career Center workshops on finding an internship or part-time job, beginning a job search, developing a resume, networking and preparing for an interview are available on our website and YouTube channel. Each academic year, the Career Center hosts four to six large internship and career fairs which give UC Davis students and alumni the opportunity to connect with employers.

The Career Center is structured to mirror the colleges at UC Davis. The program areas are: Agricultural & Environmental Sciences, Career Recruiting Programs, Engineering & Physical Sciences, Masters, Ph.D.s and Postdoctoral Scholars, Health & Biological Sciences, International Programs, and Liberal Arts & Business.

## Internship Experience

An internship (also known as experiential learning) is an experience that is either directly related to your major field of study or your career interest. Internships are an opportunity to develop your skills and knowledge under the supervision of a professional. The Career Center facilitates a campus-wide internship program. All internships, both credit and non-credit, can be taken for Transcript Notation with completion of required evaluation reports submitted through Handshake (<https://ucdavis.joinhandshake.com/login/>). The notation briefly describes the nature and location of the internship experience. Questions pertaining to Transcript Notation may be directed to the Career Center.

## Experiential Learning; Internships & More!

Gain practical skills that will transfer to the workplace. Apply your coursework. Launch your career! Take advantage of the plethora of experiences available to UC Davis students, including thousands of internships organized through the Career Center. There is literally something for everyone! An internship may be full-time or part-time, credit-bearing or non-credit bearing, voluntary or paid, depending on your skills, needs and interests, as well as the availability of openings. We are continuing to create more paid opportunities through Federal Work-Study and grants. Internship experiences emphasize learning and must be supervised by a professional. Get your approved internship documented on your UC Davis transcript by completing Transcript Notation (TN) (<https://icc.ucdavis.edu/find/internships/tn/>). Academic credit is awarded for experiences planned and approved in advance by a sponsoring faculty member.

## Course Credit

**Academic credit is granted through academic departments and graduate groups. The ICC advising staff can assist you in identifying internship opportunities and provide information about academic credit.**

Internship courses (092, 192, & 292) are available for credit on a variable-unit and Passed/Not Passed (P/NP) grading basis. For most students,

a maximum of 12 units of P/NP courses may be counted toward the 180-unit minimum needed for graduation. To qualify for the 192 course, students must have acquired 84 units of credit. All credited internships require approval and sponsorship by a faculty member from an appropriate discipline. Arrangements may be made through the department of the sponsoring faculty member and facilitated by Career Center Staff.

## Masters, Ph.D., & Postdoctoral Services

The Career Center provides comprehensive career services for UC Davis Masters and Ph.D. students, and Postdoctoral scholars (MPP). Career advisors can assist you with all aspects of your career search whether your goal is a career in industry, government or academia. Our team realizes these are complex decisions. Our career services include confidential one-to-one advising with an individualized review of curriculum vitae (CV), resumes, and cover letters; workshops and panel discussions; recruiting and networking events; and employer information sessions, all specifically designed for advanced degree holders.

## Student Employment

Student Employment, the term generally used for student jobs at UC Davis, is a great way for students to develop skills, apply coursework and build a professional network while earning money. Data shows that working up to 12 hours/week while in college correlates to higher academic performance.

Student jobs at UC Davis offer many advantages. Most on-campus student jobs are very flexible and work around student schedules and...the commute is tough to beat!

The Career Center provides students easy access to paid, part-time opportunities (on and off campus) as well as internship and career opportunities via Handshake (<https://icc.ucdavis.edu/find/resources/handshake/>).

## Quarter at Aggie Square

Quarter at Aggie Square (<https://qas.ucdavis.edu/>) provides undergraduate students opportunities to explore topics related to societal challenges unique to the Sacramento region. Over one academic quarter, student cohorts work closely with dedicated faculty and learn experientially through internships, research or clinical rotations at Aggie Square and UC Davis Health. Students build academic, personal and professional networks, gain opportunities to meet industry professionals, engage with the community and immerse themselves through regional field trips.

## Summer Sessions

Summer Sessions (<https://summer-sessions.ucdavis.edu/>) provides several classes allowing students to stay on track or get ahead by offering a range of academic courses. Summer Sessions works collaboratively with campus administrative and academic partners to create and promote UC Davis quality courses in support of students' successful advancement toward timely graduation. Incoming, transfer, freshmen, high school seniors, and non-matriculated students may also attend Summer Sessions' *fourth quarter* at UC Davis. For complete information, see Summer Sessions (<https://summer-sessions.ucdavis.edu/>).

## UC Center Sacramento

Through UC Center Sacramento (<https://uccs.ucdavis.edu/>), UC Davis students can participate in an internship-based experiential learning program in our state's capitol! UC Center Sacramento offers a personalized internship placement process, academic courses for credit, workshops, networking opportunities, and professional development support services. Students intern in a California state executive branch office, legislative office, state agency, or non-profit. Our program is geared towards students interested in pursuing a career in public service or related graduate school programs. UC Center Sacramento is committed to preparing the next generation of California leaders. For complete information, see UC Center Sacramento (<https://uccs.ucdavis.edu/>).

## UC Washington Program (UCDC) UC Davis Washington Program Office

1350 The Grove; 530-754-5718; Washington Program (<http://washingtonprogram.ucdavis.edu>)

### Residential Program Location

1608 Rhode Island Avenue, NW, Washington, D.C. 20036

The University of California hosts a system-wide academic and residential program for undergraduate students attending from each of the UC campuses. Housed within the UC Washington Center (UCDC), an 11-story, state-of-the-art facility, convenient to public transportation and located in downtown D.C., the program provide undergraduates the opportunity to enrich their education while in residence for one quarter in the nation's capital. The program's principal activities include enrollment in credit-bearing courses, participation in academic internships, and the opportunity to explore the many educational, cultural, and historical activities in the Washington D.C. area.

### Program of Study

UCDC is open to undergraduates from all majors. Preference is given to students who will have upper division standing by the start of the quarter in which they plan to participate, though 2nd-year students may participate if they have substantial work, internship, and/or volunteer experience on their resume. A GPA of at least 3.000 is recommended for admission although not required. Applicants are evaluated based on overall relevant employment, internship, and volunteer experiences, written statement, and letter(s) of recommendation (only one is required).

### Academic Quarter Option (11 weeks)

Students earn academic credit and continue to be registered as full-time UC Davis students during the quarter in which they participate.

- **Internship (Mandatory; 8 units).** Students work three to four days per week (24-32 hours per week) as interns in think-tanks, museums, Congress, federal agencies, interest groups, trade associations, research institutions, media corporations, or in other organizations related to the interests and objectives of individual students.
- **Core Seminar (Mandatory; 4 units).** Each student enrolls in a core seminar exploring a variety of topics related to Washington DC. Course subject matter varies from term to term but is typically related to international relations, history, political science, public policy and other social sciences; the arts and humanities; and science policy. In addition to regular instruction, seminars often include guest speakers, observations of congressional committees and federal agencies,

and other relevant Washington experiences. Students who would like to fulfill major requirements may do so by following the policy of their major department for receiving course equivalency. For more information, students should speak with their major advisor.

- **Elective Seminar Course (Optional; 4 units).** Each student may optionally enroll in an additional upper division seminar course taught at UCDC. Course subject matter varies from term to term but is typically related to international relations, history, political science, public policy and other social sciences; the arts and humanities; and science policy. As with the Core Seminar, students who would like to fulfill major requirements may do so by following the policy of their major department for receiving course equivalency. For more information, students should speak with their major advisor.

Courses are taught by UCDC faculty appointed by the various UC campuses or visiting faculty from the Washington area.

Financial aid eligibility and awards as determined by the UC Davis campus are maintained while enrolled in the program, and the aid package will be adjusted to reflect the additional costs of the program.

### Summer Option (10 weeks)

UCDC also offers a 10-week Summer Program with a credit or non-credit option. The credit option allows students to receive up to 8 internship units. Students pay the summer sessions rate per credit hour plus an application fee. The non-credit option (internship only) has no enrollment fee. Both options have a required housing cost and allow students to participate in many educational, cultural, historical and social activities while living in Washington D.C. and require students to intern for four to five days a week (32-40 hours per week).

## University Graduation Requirements

- All prospective applicants should carefully plan their course programs in order to satisfy university, college, and major/minor requirements for their degree.
- Although units and grade points earned at UCDC are incorporated into the University transcript and GPA calculation, departments and programs retain the right to determine which UCDC courses will be accepted in satisfaction of major and minor requirements.
- All degree candidates must meet the University residence requirement. Students should consult with their college Dean's office early during the UCDC planning process for information on the university residence requirement, particularly students who intend to study abroad or participate in UCDC during their senior year.

Recognizing the special value of UCDC, the faculty has approved two exceptions to the usual residence requirement for students participating in the Washington Program:

- Students planning to graduate immediately upon completion of participation in UCDC may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus immediately preceding entry into UCDC.
- Students who have not finished all of their degree requirements following completion of their participation in the UCDC program may satisfy the University residence requirement by completing at least 35 units, including at least 12 units after returning from UCDC, on the Davis campus within the final 90 units earned toward the degree.

Students who will not meet the residency requirements outlined may petition their Dean's office requesting an exception to policy.

- Students may satisfy GE requirements while at UCDC but should consult with their college Dean's office prior to departure for information on the certification process.
- Students with a large number of units may participate in the UCDC program provided that (1) they will not exceed 225 units prior to their departure and (2) that all their degree requirements have been fulfilled either before they leave campus or during their time at UCDC. Participants may only return to campus from UCDC to complete any outstanding degree requirements provided that they can do so within the 225-unit restriction.

## University Honors Program

Kate Andrup Stephensen, M.Ed., University Honors Program Director,  
1333 The Grove; [kstephensen@ucdavis.edu](mailto:kstephensen@ucdavis.edu); 530-752-9325

### Program Office

1350 The Grove; 530-752-3225; University Honors Program

### Faculty

The University Honors Program faculty is representative of all four UC Davis Undergraduate Colleges and all of the Graduate Schools.

### The Program of Study

The University Honors Program (UHP) course of study is designed to enhance the undergraduate experience of high-achieving, high-potential, and socially conscious undergraduate students from all academic pathways. The University Honors Program is an interdisciplinary, campus-wide honors program that fosters active and collaborative discovery through unique, small course opportunities, which facilitate close faculty contact and dynamic peer interaction.

General Education (GE) courses, seminars, and special study opportunities constitute the UHP course offerings. First-year and second-year UHP students complete six UHP courses during their first two years—one per quarter. Upper division and transfer students complete research and service learning projects, seminars, and education abroad opportunities. Students receive transcript notation for each program year successfully completed.

UHP courses and seminars provide a small, liberal arts college setting, coupled with the resources and opportunities of a world-class research university to engage critical thinking, affective learning, and interpersonal expression. Updated program information is available at University Honors Program. A complete list of courses is made available to admitted students through the UHP office.

Only active UHP students may register for HNR (p. 979) and IST (p. 999) course codes, except by consent of the program and instructor.

## African American & African Studies

**College of Letters & Science**

Mark Jerng, Ph.D., Chair of the Department; term ends June 30, 2025

### Department Office

2201 Hart Hall; African American & African Studies (<http://aas.ucdavis.edu>); Faculty (<http://aas.ucdavis.edu/people/faculty/>)  
 AAS Student Affairs Officer: 530-754-9581  
 AAS Program Coordinator: 530-752-1474

- African American & African Studies, Bachelor of Arts (p. 86)
- African American & African Studies, Minor (p. 88)

## African American & African Studies, Bachelor of Arts

**College of Letters & Science**

African American & African Studies is an interdisciplinary field of study in the humanities, arts, and social sciences. This major introduces students to the social, cultural, historical, and artistic dimensions of global African Diaspora and Black communities in the United States, Africa, Europe, Asia, the Caribbean, Latin America, and Pacific regions of the world. The instructors are creative, accessible and highly qualified, with specializations across a range of disciplines. Students are exposed to and trained to think critically about the conditions and demands of global societies. Students may choose to enrich their education by studying for a summer, a quarter, or a year in Africa, or by studying for a

quarter in the Caribbean. Majors and Minors are also encouraged to take advantage of relevant internship opportunities.

### The Program

The purpose of this program is to give students a sense of the individual characteristics and common concerns of Black communities in Africa, the United States, and the wider Diaspora. The African American emphasis includes courses on history, culture, and the impact of developments in politics and the economy on the social organization of Black people in the United States. The African Diaspora emphasis enables students to study the way Black communities outside Africa and the United States have dealt with questions of race and ethnicity. It also considers how they have defined their identity in the political arena by using religion, theater and dance, literature, and film. The African emphasis allows students to focus on Africa's recent history, social issues, and contemporary culture.

### Career Alternatives

Students majoring in African American & African Studies gain knowledge and strong critical thinking and analytical skills, problem-solving skills, and communication skills, all suited for advanced studies in all areas, including but not limited to the social sciences, law, education, business, medicine, and professional schools. Graduates in the major have pursued careers in all areas including education, the private and public sectors, the non-profit sector, international development agencies and human service. The interdisciplinary nature of African American & African Studies is excellent preparation for professions in community organizations such as the Urban League, NAACP, and the Office of Economic Opportunity.

### Major Advisor

Katherine Ampaw-Matthei M.Ed.; [kampaw@ucdavis.edu](mailto:kampaw@ucdavis.edu)  
 African American & African Studies Staff (<https://aas.ucdavis.edu/staff/>)

## American History & Institutions

This University requirement can be satisfied by completion of AAS 010, AAS 100; listed in American History & Institutions Requirement (p. 59).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the African American & African Studies Bachelor of Arts is 64.

**Note:** Although a course may be listed more than once, such a course may satisfy only one requirement.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
<i>African American &amp; African Studies</i>		
AAS 010	African-American Culture & Society	4
or AAS 012	Introduction to African Studies	
Choose one:		4
AAS 015	Introduction to African American Humanities	
AAS 017	Women in African Societies	
AAS 018	Introduction to Caribbean Studies	
AAS 050	Black Popular Culture	
AAS 051	History of Afro American Dance	
AAS 052	African Traditional Religion

## African American & African Studies, Minor

### College of Letters & Science

African American & African Studies is an interdisciplinary field of study in the humanities, arts, and social sciences. This major introduces students to the social, cultural, historical, and artistic dimensions of global African Diaspora and Black communities in the United States, Africa, Europe, Asia, the Caribbean, Latin America, and Pacific regions of the world. The instructors are creative, accessible and highly qualified, with specializations across a range of disciplines. Students are exposed to and trained to think critically about the conditions and demands of global societies. Students may choose to enrich their education by studying for a summer, a quarter, or a year in Africa, or by studying for a quarter in the Caribbean. Majors and Minors are also encouraged to take advantage of relevant internship opportunities.

### The Program

The purpose of this program is to give students a sense of the individual characteristics and common concerns of Black communities in Africa, the United States, and the wider Diaspora. The African American emphasis includes courses on history, culture, and the impact of developments in politics and the economy on the social organization of Black people in the United States. The African Diaspora emphasis enables students to study the way Black communities outside Africa and the United States have dealt with questions of race and ethnicity. It also considers how they have defined their identity in the political arena as well, by using religion, theater and dance, literature, and film. The African emphasis allows students to focus on Africa's recent history, social issues, and contemporary culture.

### Career Alternatives

Students minoring in African American & African Studies gain knowledge, strong critical thinking, and analytical, problem-solving, and communication skills, all suited for advanced studies in the social sciences, law, education, and other professional schools. Graduates in the major have pursued careers in education, the private and public sectors, the non-profit sector, international development agencies, and human service. The interdisciplinary nature of African American & African Studies is excellent preparation for professions in community organizations such as the Urban League, NAACP, and the Office of Economic Opportunity.

## Agricultural & Resource Economics, Master of Science

College of Agricultural & Environmental Sciences

### Graduate Study

The M.S. program is both an end in itself and a preparation for a Ph.D. degree in Applied Economics. The program includes courses emphasizing applications of economic theory and quantitative methods, along with elective field courses and a thesis option. The M.S. program prepares students for jobs in the academic industry and government. For more information, see M.S. program (<https://aremasters.ucdavis.edu/>).

### Degree Requirements & Program Coordinator

See Agricultural & Resource Economics (<https://grad.ucdavis.edu/programs/gare/>).

## Agricultural & Resource Economics, Master of Science/Master of Business Administration

College of Agricultural & Environmental Sciences

### Graduate Study

The program combines a course of study similar to the regular M.S. program with a complementary regime of M.B.A. courses similar to the regular M.B.A. program but with some savings in requirements and some synergy. This dual-degree program prepares students for a range of employment opportunities in business-oriented industries. For more information, see M.S./M.B.A. Joint Program (<https://aremasters.ucdavis.edu/>).

### Degree Requirements & Program Coordinator

See Agricultural & Resource Economics (<https://grad.ucdavis.edu/programs/gare/>).

## Agricultural & Resource Economics, Doctor of Philosophy

College of Agricultural & Environmental Sciences

### Graduate Study

The Ph.D. program provides intensive training in modern economic theory, econometrics, and mathematical programming, with elective fields such as natural resource and environmental economics, development economics, agricultural economics, and econometrics. Complementary fields in other areas of economics and management are also available. It is typically a four- or five-year course of study that prepares graduates for

jobs in academia, government, near-government organizations, and the private sector.

### Degree Requirements & Program Coordinator

See Agricultural & Resource Economics (<https://grad.ucdavis.edu/programs/gare/>).

## Managerial Economics, Bachelor of Science

College of Agricultural & Environmental Sciences

### The Major Program

The Managerial Economics major at UC Davis is a disciplinary program combining strong preparation in microeconomic theory and quantitative methods. It prepares students for the analysis of management and policy issues in business, finance, marketing, production, agriculture, food distribution, natural resources, the environment, resource allocation, and international trade and development. Students in the Managerial Economics program develop valuable skills and strengths that lead to careers in business and government. Students specialize in one or more emphases selected from the following:

- *Business Economics* focuses on the economic aspects of managerial decision-making essential for solving problems in business, management, marketing, and finance.
- *International Business Economics* explores the economic drivers and policy challenges in the major emerging markets and focuses on how these markets are impacting the world economy.
- *Environmental & Resource Economics* concentrates on issues related to the use of resources and environmental quality.
- *Agribusiness Economics* focuses on the economic and policy aspects of the production and marketing of foods and fibers.

### Major Advisor

Contact Managerial Economics Student Services at [manecon@ucdavis.edu](mailto:manecon@ucdavis.edu) or 530-754-9536.

### Internships & Career Alternatives

Internships for students in Managerial Economics provide additional career experience, information, and preparation in a variety of business enterprises and governmental agencies. For more information, see Career Center (<http://icc.ucdavis.edu/>). Managerial Economics majors have established careers in every area of business and industry, including marketing, analysis, consulting, financial services, accounting, entrepreneurship, real estate and government. Many graduates have entered advanced degree programs in business management, accounting, finance, agricultural and resource economics, economics, public policy, and law.

### Study Abroad

The Agricultural & Resource Economics department encourages students to complement their Managerial Economics degree with a study abroad experience. Students must seek pre-approval from a Managerial Economics staff advisor for major-related courses. A total of two upper-division courses (maximum four units each) may be applied to major requirements. However, core courses (ARE 100A, ARE 100B, ARE 106, ARE 155, and ECN 101) are excluded. Students are expected to complete ARE 100A and STA 103 prior to taking upper-division classes abroad for the major. For more detailed instructions and a list of pre-approved

Study Abroad courses, see Managerial Economics Study Abroad (<https://managerialeconomics.ucdavis.edu/education-abroad/>).

## Domestic Institutions

Upper-division coursework taken at other four-year institutions for credit in the major must be reviewed by the Managerial Economics Lead Faculty Advisor.

## Graduate Study

Students who meet the admission requirements of Graduate Studies and the Department of Agricultural and Resource Economics may pursue studies leading to M.S. and Ph.D. degrees. For information on admission to graduate study and degree requirements, consult the Graduate Program Coordinator in the Department of Agricultural & Resource Economics (p. 89).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Managerial Economics Bachelor of Science is 100.

Code	Title	Units	
<b>Major English Requirements</b>			
The following must be completed with minimum C- (or PASS) grades.			
<b>Communication; choose one:</b>		4	
CMN 001 Introduction to Public Speaking or CMN 001V Introduction to Public Speaking			
<b>OR</b>			
CMN 003 Interpersonal Communication Competence or CMN 003V Interpersonal Communication Competence or CMN 003Y Interpersonal Communication Competence			
<b>Business Writing; choose one:</b>		4	
UWP 104A Writing in the Professions: Business Writing <sup>1,2</sup> or UWP 104AV Writing in the Professions: Business Writing or UWP 104AY Writing in the Professions: Business Writing			
<b>Major English Requirements Subtotal</b>		8	
<b>Preparatory Subject Matter</b>			
All lower-division preparatory coursework must be completed with minimum C- (or PASS) grades; however, STA 103 must be taken for a letter grade.			
<b>Business Law</b>		4	
ARE 018 Business Law			
<b>Management (Accounting)</b>		8	
MGT 011A Elementary Accounting			
MGT 011B Elementary Accounting			
<b>Economics</b>		8	
ECN 001A Principles of Microeconomics or ECN 001AV Principles of Microeconomics or ECN 001AY Principles of Microeconomics			
ECN 001B Principles of Macroeconomics or ECN 001BV Principles of Macroeconomics			
<b>Mathematics; choose a series:</b>		12-13	
The preferred calculus series for Managerial Economics majors is MAT 019. The MAT 016 series is accepted if started prior to Fall 2024. PLS 021, PLS 021V, or ECS 032A is required with the MAT 016 series.			
<b>Choose 019 series, 12 units:</b>			
MAT 019A Calculus for Data-Driven Applications & MAT 019B and Calculus for Data-Driven Applications & MAT 019C and Calculus for Data-Driven Applications			
<b>OR choose 017 series, 12 units:</b>			
MAT 017A Calculus for Biology & Medicine & MAT 017B and Calculus for Biology & Medicine & MAT 017C and Calculus for Biology & Medicine			
<b>OR choose 021 series, 12 units:</b>			
MAT 021A Calculus & MAT 021B and Calculus & MAT 021C and Calculus			
<b>Statistics</b>		8	
STA 013 Elementary Statistics (Must be taken for a letter grade) or STA 013V or STA 032 Gateway to Statistical Data Science			
STA 103 Applied Statistics for Business & Economics (must be taken for a letter grade)			
<b>Preparatory Subject Matter Subtotal</b>		40-41	
<b>Depth Subject Matter</b>			
<b>Core Courses</b>			
<i>All core courses must be taken for a letter grade. It is recommended that students complete core courses during their third year.</i>			
ARE 100A Intermediate Microeconomics: Theory of Production & Consumption (Must be completed with a minimum grade of C-) <sup>3</sup>			
ARE 100B Intermediate Microeconomics: Imperfect Competition, Markets & Welfare Economics <sup>4</sup>			
ARE 106 Econometric Theory & Applications			
ARE 155 Operations Research & Management Science			
ECN 101 Intermediate Macro Theory			
<b>Restricted Electives; choose at least one emphasis:</b>			
Business Economics (p. 92) International Business Economics (p. 92) Environmental & Resource Economics (p. 92) Agribusiness Economics (p. 93)			
<b>Depth Subject Matter Subtotal</b>		52	
<b>Total Units</b>		100-101	

1

May also count for English Composition.

2

The upper-division composition exam will not satisfy this requirement.

3

Note: ECN 100A is not accepted.

Note: ECN 100B is not accepted.

ARE 139	Futures & Options Markets	
ARE 140	Farm Management	
ARE 145	Farm & Rural Resources Appraisal	
ARE 150	Agricultural Labor	

Choose the remaining 8 units from above or from any upper division course in ARE or ECN.

**Total Units** 32

## Exceptions to All Emphases

The following courses do not apply toward any emphasis:

Code	Title	Units
ARE 113	Fundamentals of Marketing Management	4
ARE 135	Agribusiness Marketing Plan Development	2
ARE 142	Personal Finance	3
ARE 147	Resource & Environment Policy Analysis	3
ARE 147M	Resource & Environmental Policy Analysis	2
ECN 102	Analysis of Economic Data	4
ECN 134	Financial Economics or ECN 134Y	4
ECN 140	Econometrics	4
ECN 151A	Economics of the Labor Market	4
ECN 162	International Economic Relations	4

## Completing More Than One Emphasis

Courses may overlap between emphases. Requirements must be fulfilled as outlined in each emphasis with a minimum of 32 units.

## Major GPA

Students must attain a major GPA of at least a C average (2.000) in courses taken for depth subject matter (core and restricted electives). These courses must be taken for a letter grade. All restricted elective courses taken will be calculated as part of the major GPA, including courses with F grades that have not been repeated.

## Managerial Economics, Minor

### College of Agricultural & Environmental Sciences

The Managerial Economics minor is 24 units of upper division ARE coursework, however, it also requires 28 units of preparatory coursework. All lower-division preparatory coursework must be completed with minimum C- (or PASS); however, STA 103 must be taken for a letter grade.

All courses to satisfy the minor must be taken for a letter grade, and students must attain a minor GPA of at least a C average (2.000). All upper division courses taken toward minor requirements will be calculated as part of the minor GPA, including courses with F grades that have not been repeated.

A total of two upper division courses (maximum 4 units each) may be taken through UC Study Abroad, all other courses must be taken in residence. Students must seek pre-approval from a Managerial Economics staff advisor for any international courses.

## Preparatory Coursework

Preparatory coursework units *do not count towards minor units*. The Managerial Economics Minor requires 28 units of preparatory coursework. All lower-division preparatory coursework must be completed with minimum C- (or PASS); STA 103 must be taken for a letter grade.

## American Studies

### College of Letters & Science

Grace Wang, Interim Vice Chair of the Department

### Department Office

1200 Hart Hall; 530-752-6429; American Studies (<http://ams.ucdavis.edu/>); Faculty (<http://ams.ucdavis.edu/faculty/>)

### The Department

The Department of American Studies approaches the “American” in our field’s name as an important and complicated idea that comes with a range of feelings (from joy to fear to pride to sadness). American Studies explores the cultures of the United States, as well as their transnational exchanges and impact. In American Studies classes, students let their curiosities guide them through the process of analyzing pieces of American culture, including food, nature, childhood, and more, through the lenses of race, class, gender, and disability. American Studies is a place for students who want to know why things are the way they are and how they could be.

American Studies takes an interdisciplinary approach, answering research questions with tools from history, sociology, anthropology, literary criticism, media studies, and science and technology studies. American Studies majors are good critical thinkers, develop excellent writing and communication skills, and most importantly, “learn how to learn”—that is, they learn to figure out what intellectual tools and specialized knowledge they will need to perform a task or solve a problem.

- American Studies, Bachelor of Arts (p. 94)
- American Studies, Minor (p. 95)

## American Studies, Bachelor of Arts

### College of Letters & Science

## The Major

American Studies provides an excellent, broad education in the liberal arts. American Studies majors create an emphasis devoted to the close study of social and cultural issues crucial to the practice of American Studies. Advanced work in at least two other departments or programs allows each student to study areas tailored to their own individual education goals. Sample emphases include Youth Education, Social Justice and Social Movements; Popular Culture; Comparative Racial and Ethnic Studies; Nature, Culture and the Environment; Militarism and Incarceration; Queer and Trans Studies; Disability, Health, and Illness; and Food and Culture. Students have the option of writing a senior thesis or completing a creative capstone project, are encouraged to study abroad or participate in other forms of global education, and are encouraged to explore new career possibilities through internships—all of which can count toward the major units with permission of the advisor.

### Career Alternatives

As an interdisciplinary major, American Studies offers students the choice of a variety of subject matter and approaches. This flexibility means that graduates are prepared to move into a broad range of career settings. Our alumni have become lawyers, teachers, social workers, urban planners, software engineers, filmmakers, professors, professional writers and comedians, marketing and communications professionals, librarians, museum curators, community organizers, and non-profit staff and leaders.

### Global Education & Study Abroad

Majors are encouraged to study abroad or engage in domestic opportunities off-campus; such as the UC Washington Program (p. 77), internships, and many other opportunities. Major requirements can be fulfilled with up to eight units from study abroad or other domestic off-campus opportunities with the permission of the undergraduate advisor.

ENL 010B	Literatures in English II: 1700-1900	
ENL 010C	Literatures in English III: 1900 to Present	
Or an equivalent course introducing critical approaches to literary and visual texts in the humanities.		
Preparatory Subject Matter Subtotal		24-25
<b>Depth Subject Matter</b>		
AMS 100	Methods in American Studies	4
AMS 160	Undergraduate Seminar in American Studies	4
<i>American Studies Elective</i>		
Three additional upper division American Studies courses.		
<i>Emphasis</i>		
In consultation with the American Studies Undergraduate Advisor, the student designs a program of 20 units (typically five courses) of upper division course work around a unifying theme, period, or subject matter in American cultures. The courses should come from two or more departments or programs and may include up to 8 units of American Studies courses. Only 4 units of AMS 192 (internship) can be included in the emphasis. Students may choose the senior thesis option (AMS 190A & AMS 190B) for 8 units of the emphasis and take the remaining 12 units outside the department.		
<i>Recommended</i>		
College requirement in English composition. <sup>1</sup>		
Depth Subject Matter Subtotal		40
<b>Total Units</b>		<b>64-65</b>

1

Completion of the college requirement in English composition before enrollment in AMS 190A.

## American Studies, Minor

College of Letters & Science

### The Minor

The culture of the United States is a distinctive blend of traditions and institutions from around the globe with innovations and concepts unique to this country. The American studies program offers students an

understanding of how America's many cultures contribute to the tapestry of American society. Through the study of interpretive works, folklore and folk life, and fine and popular culture, American studies minors celebrate the diversity of American experiences and examine difficult questions about race, gender, class and other factors that affect American lives.

## Graduate Study

**The Master of Science degree is offered only en route to the Ph.D.**

The Ph.D. program in Animal Behavior is an interdepartmental program focusing on the mechanisms underlying behavior, the evolution of behavior, and the applications of behavior to current problems in conservation biology and animal welfare. The program trains students for teaching and research in a variety of areas, including anthropology, animal science, ecology, entomology, neurobiology, psychology, physiology, veterinary science, wildlife biology, and zoology. Resources available to students, in addition to various departmental facilities, include those of the California National Primate Research Center, Bodega Marine Laboratory, and the UC Natural Reserve System.

# Agricultural & Environmental Education, Bachelor of Science

College of Agricultural & Environmental Sciences

The major serves those interested in teaching agricultural and environmental sciences in K-12 classrooms or in nonformal settings such as food production and distribution systems, nature preserves, environmental camps, or other venues. This major prepares graduates to direct programs in the agricultural and environmental sciences as well as provides them with a skill set necessary to work within social science careers related to these fields. This program of study meets state and federal requirements for entry into teacher preparation in agriculture and science, as well as requirements in Career Technical Education (CTE).

## The Program

The program is designed to provide students with a broad background in various agricultural and environmental science disciplines, e.g., animal science, environmental science, plant and soil science, agricultural engineering, business management, agro ecology, and horticulture. The program also focuses on the social sciences related to human resource development. The program provides students with practical experiences through fieldwork, school, and non-formal learning sites placements, or placement in sites related to a student's focus of study. Through this major students will have the opportunity to explore and then incorporate agricultural and environmental issues into educational and development settings.

## Career Alternatives

The need for scientists, technicians, and educators to assist in domestic and international agricultural development and environmental programs has created a continuing demand for qualified instructors and supervisory personnel. This major also provides general preparation for positions in banking, sales and service, rural recreation, and related agricultural and environmental sectors. Students interested in obtaining breadth in both agricultural and environmental sciences will appreciate the scope and flexibility the major provides.

## Lead Faculty Advisor

Kathryn Teixeira, Ph.D., Assistant Professor of Teaching

## Major Advisors

Lynn Martindale, Ed.D., Lecturer/Supervisor School of Education

# Animal Science & Management, Bachelor of Science

## College of Agricultural & Environmental Sciences

Anne Todgham, Ph.D., Chairperson of the Department

The Animal Science & Management major combines a thorough education in the basic biology of domestic animal species with a strong background in agricultural economics. Graduates of this interdisciplinary major will be well positioned to adjust to our rapidly changing world and job market.

## The Program

The interdisciplinary program in Animal Science and Management combines a fundamental background in the natural sciences (chemistry, biology, physiology, nutrition, genetics, mathematics, and behavior), with an understanding of economics and humanities. After completing preparatory courses, students focus on both the animal species that interest them (horses, cattle, sheep, companion animals, goats, fish, crustaceans or mollusks, among others) and principles of managerial economics (marketing, finance, business organization, or systems analysis). Students preparing for medical or veterinary school can meet professional entrance requirements with those of this major if they plan ahead.

## Career Alternatives

Job opportunities for successful graduates are plentiful and include positions with banking and financial institutions, agribusiness, Peace Corps, and farms of all scales. Most Animal Science and Management graduates are well prepared for professional study (medical, law, veterinary, and graduate business schools) as well as graduate research programs leading to the M.S. or Ph.D. degrees. Advanced degrees open doors to work as extension specialists, farm advisors, and teachers, and prepare students for international service.

care and management, and processing and/or marketing aspects of the animal of interest.

## Animal Science, Bachelor of Science

### College of Agricultural & Environmental Sciences

Anne Todgham, Ph.D., Chairperson of the Department

The Animal Science major is devoted to the sciences central to understanding biological function of domestic and captive animals, their care, management, and utilization by people for food, fiber, companionship, work, and recreation. Advances in science and technology, and an ever-growing human population, have increased the complexity of issues surrounding the care and management of animals. Specializations within the major allow students to develop a scientific appreciation of animals and their relationship to their environment. Graduates in Animal Science are able to advance the science and technology of animal care and management in an objective and effective manner for the betterment of animals and society.

## The Program

The curriculum provides depth in the biological and physiological sciences and allows students to specialize within the broad field of applied animal science. Study begins with introductory courses in animal science, biology, chemistry, mathematics, and statistics. Students undertake advanced courses in animal behavior, animal welfare, biochemistry, genetics, nutrition, and physiology and the integration of these sciences to animal growth, production, and performance. Students complete the curriculum by choosing a specialization in either an animal science discipline (behavior, biochemistry, genetics, nutrition, or physiology) or in the sciences particular to a class of animals (aquatic, avian, companion and captive, equine, laboratory, livestock and dairy, or poultry).

## Career Alternatives

A wide range of career opportunities are available to graduates. The primary goal of the major is to prepare students for graduate study leading to M.S. and Ph.D. degrees; for continued study in a professional school such as veterinary medicine, human medicine, or dentistry; for careers in research, agricultural production, farm and ranch management, or positions in business, sales, financial services, health care, agricultural extension, consulting services, teaching, journalism, or laboratory technology.

## Graduate Study

The Animal Biology Graduate Group offers a program of study and research leading to M.S. or Ph.D. degrees in Animal Biology. See Animal Biology (Graduate Group) (p. 96); see also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

## Lead Faculty Advisor

Russ Hovey, Ph.D., Professor

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Animal Science Bachelor of Science is 117.

## Anthropology

College of Letters & Science

James Smith, Ph.D., Chairperson of the Department

### Department Office

Blue Ridge Office Building (<https://campusmap.ucdavis.edu/?b=87>), 1050 Blue Ridge Road; 530-752-0745; Anthropology (<http://anthropology.ucdavis.edu>); Faculty (<http://anthropology.ucdavis.edu/directory-of-people/>)

- Anthropology, Bachelor of Arts (p. 107)
- Anthropology, Bachelor of Science (p. 114)
- Anthropology, Minor (p. 116)

- Anthropology, Master of Arts (p. 118)
- Anthropology, Doctor of Philosophy (p. 119)

## Anthropology, Bachelor of Arts

College of Letters & Science

Anthropology is the systematic study of humans. The student of anthropology learns about human biology, ecology, and social life—past and present—and gains a broad understanding of humans and societies. It is a diverse field, and the courses, faculty, and degree programs at UC Davis are subdivided into two wings—*Evolutionary* and *Sociocultural*.

### Evolutionary A.B.

*Evolutionary anthropologists* are united by their common application of science and evolutionary theory to understand the behavior, ecology, history, and evolution of humans & non-human primates, as individuals and as societies. These topics may be approached through archaeology, human behavioral ecology, paleoanthropology, primatology, genetics, and conservation biology.

- *Archaeology* is the study of history or prehistory by analysis of a people's artifacts, or their material culture, with the goal of reconstructing culture history and human behavior.
- *Human behavioral ecology* is the study of how variation in ecology and social organization can help us understand variation in human behavior.
- *Paleoanthropology* is the study of human evolution through the fossil and archaeological records, drawing on relevant studies in biological anthropology, Paleolithic archaeology, genetics, and geology.
- *Primateology* is the study of the behavior, ecology, and morphology of primates to address questions about the evolution and function of behavioral and morphological patterns in nonhuman primates and to test models of the origins of human morphology and behavior.
- *Genetic anthropology* uses DNA to address anthropological questions about population histories, migrations, mixing, and adaptations to local contexts.
- *Conservation biology* explores the causes of loss of biological diversity—in this department, it focuses on threatened non-human primates and the conservation of natural resources by our rapidly growing human population.

A Bachelor of Arts degree provides broad training that includes all subfields of Anthropology.

### Sociocultural A.B.

*Sociocultural anthropologists* study the varied ways in which people around the world organize their lives and interpret the circumstances in which they operate. Their main method is extended field research, which combines attention to global issues with the close study of human relations and culture. Among the themes addressed in the department's undergraduate courses are globalization and transnationalism; human ecology and environmental change; cultures of healing, health & medicine, the anthropology of law & global legal processes, the study of resistance, rebellion, & social control, the global spread of media & technology; migration, multiculturalism and urban life; colonialism and neocolonialism development and post-development; race, class & gender; politics & the political; cultures of everyday life; language use & discourse; and self, identity and family. Sociocultural anthropology thus offers a rich set of resources for understanding and engaging pressing

issues in a globalizing world characterized by new forms of international culture and community as well as by increasing material inequality and political volatility.

## General A.B.

The General emphasis in the Bachelor of Arts in Anthropology provides an interdisciplinary approach that integrates elements of both evolutionary and sociocultural anthropology into one curriculum. This emphasis allows students to take courses covering the spectrum of anthropological subdisciplines. This emphasis develops students' abilities to apply both evolutionary and cultural concepts within anthropology as well as providing a solid theoretical foundation for both approaches. Based on the broad anthropological education covered in this emphasis, students gain transferable skills to be better equipped for a variety of careers; e.g., international development, cultural resource management, primate conservation, etc.

## The Program

The Bachelor of Arts program is divided into three emphasis areas: the *Evolutionary*, *Sociocultural*, and *General* emphases. The Evolutionary and Sociocultural emphases parallel the two wings described above while the General emphasis allows students to select courses from both wings. Students interested in the study of recent and contemporary human societies should follow the Sociocultural emphasis. To obtain an A.B. degree in sociocultural anthropology, each student is required to complete courses that provide: (1) foundational skills, (2) language & cultural skills, (3) comprehensive skills, and (4) specialized skills. Students interested in the study of archaeology, primate studies, or human biology, ecology or origins should follow the Evolutionary Track. The A.B. degree offered by the Evolutionary emphasis provides general training in anthropology from an evolutionary perspective. The A.B. degree offered by the General emphasis provides interdisciplinary training in anthropology from both an evolutionary and sociocultural perspective. The Evolutionary Track also offers a B.S. degree that requires lower division coursework in math and science and upper division coursework in biological anthropology and closely related disciplines. Students planning on pursuing jobs in medical and other health-related fields after graduation may be especially interested in the B.S. degree.

Students in both tracks are encouraged to gain practical experience through courses taken while studying abroad (under the administration of the Global Learning Hub (<https://globallearning.ucdavis.edu/>)) and through undergraduate research or internships performed for credit (under ANT 192, ANT 198, or ANT 199 units provided by the advising office). Students showing exceptional ability are welcome to seek permission from instructors to participate in graduate seminars offered by the department.

## Career Opportunities

A Bachelor of Arts degree in Anthropology is suited for students seeking a solid liberal arts education. With its broad goal to facilitate understanding across lines of cultural difference, sociocultural anthropology prepares students for lives that are influenced by increasingly pervasive cultural exchange, as well as cultural conflict, around the world. The program serves as excellent preparation for careers in which inter-cultural skills are increasingly needed, including social & environmental activism, business, diplomacy & social administration, journalism, law, education & international relations. Students who focus on evolutionary processes will be well prepared to enter fields such as medical or health anthropology, museum studies, cultural resource management, and wildlife conservation. A degree in

anthropology with appropriate courses in education is good preparation for high school teaching in social, biological, and physical sciences. It also provides the foundation for advanced study leading to careers in college-level teaching and research.

## Major Advisor

Connect with our advising office (<https://anthropology.ucdavis.edu/undergraduate/advising/advising-office/>).

## Honors Program

Candidates for high or highest honors in Anthropology must write a senior thesis under the direction of a faculty member. The thesis project will have a minimum duration of two quarters. Honors candidates must take at least 6 units of Anthropology ANT 194H. Only students who, at the end of their junior year (135 units), have attained a cumulative grade point average of 3.500 in Anthropology courses will be eligible for the honors program. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation. To learn more about participating in the ANT honors program, see Honors Program (<https://anthropology.ucdavis.edu/undergraduate/opportunities/honors-program/>).

## Teaching Credential Subject Representative

See the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

## Graduate Study

The Department offers a program of study leading to the M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department website and at Graduate Studies (<https://grad.ucdavis.edu/>).

The major requirements below are in addition to meeting University Requirements (p. 56) & College Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Anthropology Bachelor of Arts major is 57.

## A.B. Anthropology—Evolutionary Emphasis

Code	Title	Units
<b>Preparatory Subject Matter</b>

ANT 185	Lithic Analysis
ANT 186A	(Discontinued)
ANT 187	Cultural Resource Management in Archaeology
<b>Depth Subject Matter Subtotal</b>	
<b>Total Units</b>	<b>42-46</b>

1

Must be taken concurrently with ANT 154CL.

2

Must be taken concurrently with ANT 154C.

3

Up to 4 units can be ANT 192, ANT 194H, ANT 198, or ANT 199 units.

## A.B. Anthropology—Sociocultural Emphasis

Code	Title	Units
<b>Preparatory Subject Matter</b>		
ANT 002	Cultural Anthropology	5
Choose two:		8
ANT 001	Human Evolutionary Biology or ANT 001Y DIS	
ANT 003	Introduction to Archaeology	
ANT 004	Introduction to Anthropological Linguistics	
Choose one of the following two options:		0-10
(1) Complete the equivalent to five quarters of course work in foreign language or provide proof of proficiency. Please refer to the "Sociocultural Emphasis Language Requirement" tab above to see course options. Students may take a combination of courses in different languages to fulfill this requirement as long as it is 5 quarters total.		
(2) Choose two lower division sociocultural courses:		
ANT 020	Comparative Cultural Ecologies	
ANT 030	Sexualities	
ANT/STS 032	Drugs, Science & Culture	
ANT 034	Cultures of Consumerism	
ANT 036	Star Trek as Social Theory	
<b>Preparatory Subject Matter Subtotal</b>		13-23
<b>Depth Subject Matter</b>		
ANT 100	Theory in Social-Cultural Anthropology	4
Choose two upper division area-focus sociocultural track courses:		8
ANT 133	Anthropology of Ocean Worlds	
ANT 140A	(Discontinued)	
ANT 140B	Cultures & Societies of East & South Africa	
ANT 141C	People of the Arctic: Contemporary & Historic Cultures of the Circumpolar Region	
ANT 142	Peoples of the Middle East	
ANT 143A	Ethnology of Southeast Asia	
ANT 144	Contemporary Societies & Cultures of Latin America	
ANT 145	Performance, Embodiment, & Space in South Asia	
ANT 146N	Topics in the Anthropology of Europe	
ANT 147/ MSA 131B/ CTS 146B	Modern South Asia Cinema	
ANT 148A	Culture & Political Economy in Contemporary China	
Choose one of the following two options; see list below identifying upper division sociocultural courses; see list above identifying evolutionary track courses:		32
(1) Eight additional upper division anthropology courses <sup>1</sup>		

(2) Eight additional upper division courses that may combine six sociocultural track courses and either 8 units of Study Abroad credit or two related courses in a single academic discipline; including but not limited to: AAS, AMS, ART, AHI, AAS, CHI, CLA, CMN, COM, CRD, DES, ECN, EAS, ENL, GSW, HIS, LIN, MSA, MUS, NAS, NAC, PHI, POL, PSC, RST, STS, SOC, WMS.

#### Sociocultural Track Upper Division Courses

Note: Sociocultural track courses at the upper division level are those with numbers from 100 to 148A, with the exception of 101, 103, and 128A. Area-focus sociocultural track courses are those that refer in their titles to one or more peoples or regions of the world.

ANT 100	Theory in Social-Cultural Anthropology
ANT 104N	Cultural Politics of the Environment
ANT 107	Law, Power, Violence
ANT/STS 109	Visualization in Science: A Critical Introduction
ANT 111	Science & Race
ANT 120	Language & Culture
ANT/STS 121	Special Topics in Medical Anthropology
ANT 122A	Economic Anthropology
ANT 122B	Capitalism & Power
ANT 123AN	Resistance, Rebellion, & Popular Movements
ANT 124	Religion in Society & Culture
ANT 125A	(Discontinued)
ANT 125B	Postmodernism(s) & Culture
ANT 126A	Anthropology of Development
ANT 126B	Women & Development
ANT 127	Urban Anthropology
ANT 128B	(Discontinued)
ANT/STS 129	Health & Medicine in a Global Context
ANT 130A	Cultural Dimensions of Globalization
ANT 130BN	Migration & the Politics of Place & Identity
ANT 131	Ecology & Politics
ANT 132	Psychological Anthropology
ANT 133	Anthropology of Ocean Worlds
ANT 134	Buddhism in Global Culture
ANT 135	Media Anthropology
ANT 136	Ethnographic Film
ANT 137	Meditation & Culture
ANT 138	Ethnographic Research Methods in Anthropology
ANT 139AN	Race, Class, Gender Systems
ANT 139BN	Gender & Sexuality
ANT 140A	(Discontinued)
ANT 140B	Cultures & Societies of East & South Africa
ANT 141C	People of the Arctic: Contemporary & Historic Cultures of the Circumpolar Region
ANT 142	Peoples of the Middle East
ANT 143A	Ethnology of Southeast Asia
ANT 144	Contemporary Societies & Cultures of Latin America

ANT 145	Performance, Embodiment, & Space in South Asia
ANT 146N	Topics in the Anthropology of Europe
ANT 147/ MSA 131B/ CTS 146B	Modern South Asia Cinema
ANT 148A	Culture & Political Economy in Contemporary China
Depth Subject Matter Subtotal	44

**Total Units** 57-67

1

Two courses may be in the evolutionary track; and up to 4 units can be ANT 192, ANT 194H, ANT 198, or ANT 199 units.

## A.B. Anthropology—General Emphasis

Code	Title	Units

## Anthropology, Bachelor of Science

### College of Letters & Science

Anthropology is the systematic study of humans. The student of anthropology learns about human biology, ecology, and social life—past & present—and gains a broad understanding of humans and societies. *The Bachelor of Science degree in Anthropology* is interdisciplinary in nature since it requires lower division coursework in math & science and upper division coursework in biological anthropology and closely related disciplines.

## The Program

*Evolutionary anthropologists* are united by their common application of science and evolutionary theory to understand the behavior, ecology, history, and evolution of humans & non-human primates, as individuals and as societies. These topics may be approached through archaeology, human behavioral ecology, paleoanthropology, primatology, genetics, and conservation biology. *Archaeology* is the study of history or prehistory by analysis of a people's artifacts, or their material culture, with the goal of reconstructing culture history and human behavior. *Human behavioral ecology* is the study of how variation in ecology and social organization can help us understand variation in human behavior. *Paleoanthropology* is the study of human evolution through the fossil and archaeological records, drawing on relevant studies in biological anthropology, Paleolithic archaeology, genetics, and geology. *Primatology* is the study of behavior, ecology, and morphology of primates to address questions about the evolution and function of behavioral & morphological patterns in nonhuman primates and to test models of the origins of human morphology and behavior. *Genetic anthropology* uses DNA to address anthropological questions about population histories, migrations, mixing, and adaptations to local contexts. *Conservation biology* explores the causes of loss of biological diversity—in this department, it focuses on threatened non-human primates and the conservation of natural resources by a rapidly growing population. A Bachelor of Science degree, in addition to core evolutionary anthropology courses, includes the introductory sequences of biology, chemistry, organic chemistry, and calculus, as well as genetics and ecology.

Students are encouraged to gain practical experience through undergraduate research or internships performed for credit (under ANT 192, ANT 198, or ANT 199 units provided by the advising office).

Students showing exceptional ability are welcome to seek permission from instructors to participate in graduate seminars offered by the department.

## Career Opportunities

A Bachelor of Science degree in Anthropology combines a solid liberal arts education with training in the life and physical sciences. Through its interdisciplinary nature, a Bachelor of Science degree in Anthropology provides the educational background for careers in the biological sciences and a variety of health professions including pre-medical, pre-dental, and pre-veterinary, fields which increasingly need professionals with training in the social and behavioral sciences. In addition, students will be well prepared to enter fields such as medical or health anthropology, forensic sciences, museum studies, cultural resource management, and wildlife conservation. A Bachelor of Science degree in Anthropology with appropriate courses in education is good preparation for high school teaching in social, biological, and physical sciences. It also provides the foundation for advanced study leading to careers in college-level teaching and research.

## Major Advisor

Connect with our advising office (<https://anthropology.ucdavis.edu/undergraduate/advising/advising-office/>) for staff and peer advising about the Anthropology Bachelor of Science requirements and curriculum.

## Honors Program

The Department of Anthropology offers undergraduate students an opportunity to demonstrate their scholarly potential by conducting original research and writing an honors thesis or conducting an honors project under the one-on-one guidance of a faculty mentor.

The honors thesis or project will have a minimum duration of two quarters. Honors candidates must take at least 6 units of Anthropology ANT 194H. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation. See more information about the Anthropology Honors program, see Honors Program (<https://anthropology.ucdavis.edu/honors-program/>).

## Teaching Credential Subject Representative

See the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

## Graduate Study

The Department offers a program of study leading to M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies (<https://grad.ucdavis.edu/>).

The major requirements below are in addition to meeting University Requirements (p. 56) & College Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Anthropology Bachelor of Science major is 90.

Code	Title	Units	
<b>Preparatory Subject Matter</b>			
<i>Anthropology</i>			
ANT 001	Human Evolutionary Biology or ANT 001Y (DISCONTINUED)	4	Three additional upper division ANT courses.
ANT 002	Cultural Anthropology	5	
<i>Biological Science</i>			
BIS 101	Genes & Gene Expression or BIS 101V	4	Genes & Gene Expression

<b><i>Evolution &amp; Ecology</i></b>			GEL 107L	Earth History: Paleobiology Laboratory	2
EVE 100	Introduction to Evolution	4	GEL 108	Earth History: Paleoclimates	3
<b><i>Additional Units</i></b>			GEL 144	Historical Ecology	3
Additional units from the list below to achieve a minimum of 45 upper division units. (p. 116)		10-16	GEL 146	Radiogenic Isotope Geochemistry & Cosmochemistry	3
Depth Subject Matter Subtotal		39-51	HDE/ENT 117	Longevity	4
<b>Total Units</b>		<b>90-106</b>	MIC 102	Introductory Microbiology	3
<b>Additional Units</b>			MIC 103L	Introductory Microbiology Laboratory	2
<b>Code</b>	<b>Title</b>	<b>Units</b>	MCB 120	Molecular Biology & Biochemistry Laboratory Associated Lecture	3
			MCB 120L	Molecular Biology & Biochemistry Laboratory	3
			MCB 121	Advanced Molecular Biology	3
			MCB 150	Developmental Biology	4
			MCB 160L	Principles of Genetics Laboratory	5
			MCB 162	Human Genetics & Genomics	3
			MCB 163	Developmental Genetics	3
			MCB 164	(Discontinued)	
			MCB 182	Principles of Genomics	3
			NPB 101	Systemic Physiology	5
			NPB 101L	Systemic Physiology Laboratory	3
			NPB 102	Animal Behavior	3
			NPB 123/APC 100	Comparative Vertebrate Organology	4
			NPB/PSC 124	Comparative Neuroanatomy	3
			NPB 150/PSC 122	Advanced Animal Behavior	4
			NPB 152/PSC 123	Hormones & Behavior	3
			PSC 101	Introduction to Biological Psychology	4
			PSC 113	Developmental Psychobiology	4
			PSC 121	Physiological Psychology	4
			PSC 122/NPB 150	Advanced Animal Behavior	4
			PSC 123/NPB 152	Hormones & Behavior	3
			PSC/NPB 124	Comparative Neuroanatomy	3
			SPH 101	Introduction to Public Health	3
			SPH 102	Introduction to Human Epidemiology	4
			STA 100	Applied Statistics for Biological Sciences	4
			STA 104	Applied Statistical Methods: Nonparametric Statistics	4
			STA 106	Applied Statistical Methods: Analysis of Variance	4
			STA 108	Applied Statistical Methods: Regression Analysis	4
			STA 130A	Mathematical Statistics: Brief Course	4
			STA 130B	Mathematical Statistics: Brief Course	4
			STS 131	Darwin	4
			WFC 141	Behavioral Ecology	4
			WFC 154	Conservation Biology	4

## Anthropology, Minor

College of Letters & Science

## Minor Advisor

For more information about the Anthropology minor options, contact our Advising Office (<https://anthropology.ucdavis.edu/undergraduate/advising/advising-office/>).

## General Emphasis

Code	Title	Units		
Choose one:		2-5		
ANT/ESP 101	Ecology, Nature, & Society		ANT 145	Performance, Embodiment, & Space in South Asia
ANT 103	Indigenous Peoples & Natural Resource Conservation		ANT 146N	Topics in the Anthropology of Europe
ANT 122A	Economic Anthropology		ANT 147/ MSA 131B/ CTS 146B	Modern South Asia Cinema
ANT 128A	Kinship & Social Organization: From Clans to Countries		ANT 148A	Culture & Political Economy in Contemporary China
ANT 151	Primate Evolution		ANT 178	Hunter-Gatherers
ANT 152	Human Evolution		Choose two:	
ANT 153	Human Genetics: Mutation & Migration		ANT 100	Theory in Social-Cultural Anthropology
ANT 154A	The Evolution of Primate Behavior		ANT 104N	Cultural Politics of the Environment
ANT 155	Primate Conservation Biology		ANT 107	Law, Power, Violence
ANT 157	Advanced Human Genetics		ANT/STS 109	Visualization in Science: A Critical Introduction
ANT 158	The Evolution of Sex: A Biological Perspective		ANT 120	Language & Culture
Choose one:		4	ANT/STS 121	Special Topics in Medical Anthropology
ANT 170	Archeological Theory & Method		ANT 122A	Economic Anthropology
ANT 172	New World Prehistory: The First Arrivals		ANT 122B	Capitalism & Power
ANT 174	European Archaeology: First Peopling to the Bronze Age		ANT 123AN	Resistance, Rebellion, & Popular Movements
ANT 175	Andean Prehistory: Archaeology of the Incas & Their Ancestors		ANT 124	Religion in Society & Culture
ANT 176	California Archaeology		ANT 125A	(Discontinued)
ANT 177	African Archaeology: From Australopithecines to Great Zimbabwe		ANT 125B	Postmodernism(s) & Culture
ANT 179	Asian Prehistory		ANT 126A	Anthropology of Development
ANT 180	Zooarchaeology		ANT 126B	Women & Development
ANT 181	Archaeological Field Methods		ANT 127	Urban Anthropology
ANT 182	Archaeometry		ANT 128B	(Discontinued)
ANT 183	Laboratory in Archeological Analysis		ANT/STS 129	Health & Medicine in a Global Context
ANT 184	Prehistoric Technology: The Material Aspects of Prehistoric Adaptation		ANT 130A	Cultural Dimensions of Globalization
ANT 185	Lithic Analysis		ANT 130BN	Migration & the Politics of Place & Identity
ANT 187	Cultural Resource Management in Archaeology		ANT 131	Ecology & Politics
Choose one from below or any other sociocultural track course that refers in its title to one or more peoples or regions of the world:		4	ANT 132	Psychological Anthropology
ANT 133	Anthropology of Ocean Worlds		ANT 133	Anthropology of Ocean Worlds
ANT 140A	(Discontinued)		ANT 134	Buddhism in Global Culture
ANT 140B	Cultures & Societies of East & South Africa		ANT 135	Media Anthropology
ANT 141C	People of the Arctic: Contemporary & Historic Cultures of the Circumpolar Region		ANT 136	Ethnographic Film
ANT 142	Peoples of the Middle East		ANT 137	Meditation & Culture
ANT 143A	Ethnology of Southeast Asia		ANT 138	Ethnographic Research Methods in Anthropology
ANT 144	Contemporary Societies & Cultures of Latin America		ANT 139AN	Race, Class, Gender Systems
			ANT 139BN	Gender & Sexuality
			Total Units	18-21

## Archaeology Emphasis

Code	Title	Units
ANT 170	Archeological Theory & Method	4
Choose two:		8
ANT 172	New World Prehistory: The First Arrivals	
ANT 174	European Archaeology: First Peopling to the Bronze Age	
ANT 175	Andean Prehistory: Archaeology of the Incas & Their Ancestors	

ANT 176	California Archaeology	
ANT 177	African Archaeology: From Australopithecines to Great Zimbabwe	
ANT 178	Hunter-Gatherers	
ANT 179	Asian Prehistory	
Choose two:		8
ANT 156A	Human Osteology	
ANT 156B	Advanced Human Osteology	
ANT 180	Zooarchaeology	
ANT 181	Archaeological Field Methods	
ANT 181L	Field Course in Archeological Methods	
ANT 182	Archaeometry	
ANT 183	Laboratory in Archeological Analysis	
ANT 184	Prehistoric Technology: The Material Aspects of Prehistoric Adaptation	
ANT 185	Lithic Analysis	
ANT 187	Cultural Resource Management in Archaeology	

Total Units **20**

## Evolutionary Emphasis

Code	Title	Units
Any five upper division Evolutionary Anthropology courses; Evolutionary track courses at the upper division level are ANT 101, ANT 103, ANT 122A, ANT 128A, ANT 141C, & ANT 151-ANT 187.		18-25

Total Units **18-25**

## Global Human Health Emphasis

Code	Title	Units
ANT 015	From Birth to Death: The Evolution of the Human Life Cycle	5
Choose four; minimum 16 upper division units:		14-21
ANT 101	Ecology, Nature, & Society	
ANT 104N	Cultural Politics of the Environment	
ANT/STS 121	Special Topics in Medical Anthropology	
ANT/STS 129	Health & Medicine in a Global Context	
ANT 132	Psychological Anthropology	
ANT 138	Ethnographic Research Methods in Anthropology	
ANT 139BN	Gender & Sexuality	
ANT 152	Human Evolution	
ANT 153	Human Genetics: Mutation & Migration	
ANT 154A	The Evolution of Primate Behavior	
ANT 156A	Human Osteology	
ANT 156B	Advanced Human Osteology	
ANT 157	Advanced Human Genetics <sup>1</sup>	
ANT 157L	Advanced Human Genetics Lab <sup>2</sup>	
ANT 158	The Evolution of Sex: A Biological Perspective	
ANT 159	Disease Outbreaks in Humans and Other Primates	

Total Units **19-26**

1

Must be taken with ANT 157L for 6 units total.

2

Must be taken with ANT 157 for 6 units total.

## Sociocultural Emphasis

Code	Title	Units
ANT 100	Theory in Social-Cultural Anthropology	4
One upper division area-focus Sociocultural track course; area-focus Sociocultural track courses are ANT 140A-ANT 148A.		4
One additional upper division Sociocultural Anthropology course.		4
Sociocultural track courses at the upper division level are numbered ANT 100-ANT 148A, with the exception of ANT 101, ANT 103, & ANT 128A.		
Choose two:		8
ANT 104N	Cultural Politics of the Environment	
ANT 107	Law, Power, Violence	
ANT/STS 109	Visualization in Science: A Critical Introduction	
ANT 120	Language & Culture	
ANT/STS 121	Special Topics in Medical Anthropology	
ANT 122A	Economic Anthropology	
ANT 122B	Capitalism & Power	
ANT 123AN	Resistance, Rebellion, & Popular Movements	
ANT 124	Religion in Society & Culture	
ANT 125A	(Discontinued)	
ANT 125B	Postmodernism(s) & Culture	
ANT 126A	Anthropology of Development	
ANT 126B	Women & Development	
ANT 127	Urban Anthropology	
ANT 128B		
ANT/STS 129	Health & Medicine in a Global Context	
ANT 130A	Cultural Dimensions of Globalization	
ANT 130BN	Migration & the Politics of Place & Identity	
ANT 131	Ecology & Politics	
ANT 132	Psychological Anthropology	
ANT 133	Anthropology of Ocean Worlds	
ANT 134	Buddhism in Global Culture	
ANT 135	Media Anthropology	
ANT 136	Ethnographic Film	
ANT 137	Meditation & Culture	
ANT 138	Ethnographic Research Methods in Anthropology	
ANT 139AN	Race, Class, Gender Systems	
ANT 139BN	Gender & Sexuality	

Total Units **20**

## Anthropology, Master of Arts

College of Letters & Science

## Graduate Study

The Department offers a program of study leading to M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies (<https://grad.ucdavis.edu/>).

### Degree Requirements & Program Coordinator

See Anthropology (<https://grad.ucdavis.edu/programs/gant/>).

## Anthropology, Doctor of Philosophy

College of Letters & Science

## Graduate Study

The Department offers a program of study leading to M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies (<https://grad.ucdavis.edu/>).

### Degree Requirements & Program Coordinator

See Anthropology (<https://grad.ucdavis.edu/programs/gant/>).

## Applied Mathematics (Graduate Group)

College of Letters & Science

## Group Office

1130 Mathematical Sciences Bldg.; 530-754-0823; gradadvisor ([gradadvisor@math.ucdavis.edu](mailto:gradadvisor@math.ucdavis.edu))@math.ucdavis.edu  
([studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu)); Applied Mathematics Graduate Group (<http://appliedmath.ucdavis.edu/>)

## Faculty

The Group includes approximately 90 faculty members, of whom about one-third are in the Department of Mathematics. Membership comprises chemists, biologists, physicists, geologists, statisticians, computer scientists, and engineers. Research interests include biology, atmospheric sciences, mechanics, solid and fluid dynamics, optimization and control, theoretical chemistry, computer and engineering sciences, mathematical physics, signal and image processing, harmonic analysis, numerical analysis and nonlinear partial differential equations. A complete list of faculty and their research areas are available at Applied Mathematics People (<http://appliedmath.ucdavis.edu/people/>).

- Applied Mathematics, Master of Science (p. 119)
- Applied Mathematics, Doctor of Philosophy (p. 119)

## Applied Mathematics, Master of Science

College of Letters & Science

## Graduate Study

Students prepare for careers where mathematics is applied to problems in the physical and life sciences, engineering, and management. The degree requirements consist of rigorous training in applied mathematics, including course work and a research dissertation

under the direction of a member of the Graduate Group in Applied Mathematics. The M.S. degree provides preparation for further study in applied mathematics or an application area, or for a career in industry or public service. The Ph.D. degree provides preparation for a career in research and/or teaching, or in industrial or national research laboratories. For further information, please contact gradadvisor ([gradadvisor@math.ucdavis.edu](mailto:gradadvisor@math.ucdavis.edu))@math.ucdavis.edu ([studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu)) or 530-754-0823.

New applicants are admitted to the fall quarter only.

### Preparation

The program admits qualified students with a bachelor's degree in mathematics, physics, chemistry, engineering, economics, the life sciences and related fields. General and Subject GRE scores are required, and applicants should display evidence of strong quantitative skills. Undergraduate courses should include calculus (including vector calculus), linear algebra, and ordinary differential equations. Advanced calculus (introduction to real analysis) is strongly recommended. Additional background in probability, partial differential equations, and/or numerical analysis is a plus. The ability to program in a high-level computer programming language (e.g., C, MATLAB, Python, R, etc.) is assumed.

### Degree Requirements & Program Coordinator

See Applied Mathematics (<https://grad.ucdavis.edu/programs/gapm/>).

## Courses

For a list of the courses in applied mathematics and mathematics, see Mathematics (p. 341).

## Applied Mathematics, Doctor of Philosophy

College of Letters & Science

# Art History, Bachelor of Arts

College of Letters & Science

Art History studies the changing visual expression of values, beliefs and experiences across diverse cultures and over time. It provides training in historical, social and aesthetic understanding, critical thinking, scholarly research, and lucid, thoughtful analysis and writing. More than any other discipline art history sharpens its students' visual acuity and deepens their visual literacy. In so doing, it prepares them to face the increasingly complex visual world we find ourselves in today.

## The Program

The major begins with a series of courses that surveys major landmarks in the history of visual culture, art and architecture in Asia, Europe, and the United States. More advanced lecture courses and seminars focus on particularly important periods and issues. Students are encouraged to personalize their training with internships, independent study, and focused upper division study. Top students considering graduate study are encouraged to engage in more advance study by pursuing a senior honors thesis.

## Career Options

A major in Art History develops critical thinking and the integration of research, interpretation and understanding. It provides an excellent liberal arts basis for professions as far ranging as advertising, law, medicine, politics and business. The major prepares students for advanced study in Art History, Architecture, Museum Studies and Cultural Studies. It also serves as the foundation for careers in teaching, arts, administration, museums, galleries, historic preservation, art libraries, publishing, journalism, advertising, art conservation, and art investment. As the world becomes increasingly flooded with images, the critical visual literacy gained through the study of art history becomes more important for a wide variety of careers.

## Honors Program

The Honors Program in Art History is encouraged for Art History majors who are considering attending graduate school. To be eligible for the program, a student must have completed at least 135 units and have a grade point average of 3.500 GPA overall, consent of both the prospective thesis advisor, who must be a member of the Art History faculty and the major advisor. In addition to meeting the standard major requirements, the honors student completes one additional undergraduate seminar (course 100 or 190A-L), researches and writes an honors thesis (courses 194HA and 194HB), supervised by the prospective thesis advisor. Students participating in this Program are candidates for Departmental recommendation for graduation with High or Highest Honors. See Academic Information (<https://catalog.ucdavis.edu/academic-information-policies-regulations/honors-prizes/>), Letters & Science honors section (<https://lettersandscience.ucdavis.edu/deans-honors-list-and-graduation-honors/>), and consult Art History (<http://arthistory.ucdavis.edu>).

## Teaching Credential Subject Representative

Department Chairperson; see the Teacher Education program (<https://education.ucdavis.edu/teaching-credentialma>).

## Graduate Study

The Program in Art History offers studies leading to the Master of Arts degree in History of Art as preparation for further graduate study or professional work. For more information, contact the Graduate Staff Advisor at 530-752-8710, or see Art History (<http://arthistory.ucdavis.edu>).

The major requirements below are in addition to meeting University Requirements (p. 56) & College Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Art History Bachelor of Arts major is 60.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
Choose four:		16-17
AHI 001A	Ancient Mediterranean Art	
AHI 001B	Medieval & Renaissance Art	
AHI 001C	Baroque to Modern Art	
AHI 001D	Arts of Asia or AHI 001DY (D)	
AHI 001E	Islamic Art & Architecture	
AHI 005	Understanding Visual Culture	
AHI 025	Understanding Architecture	
Any lower division Art Studio (ART) course except ART 030:		4

ART 001	Introduction to Studio Art Practice	AHI 110	Cultural History of Museums
ART 002	Beginning Drawing	AHI/HMR 120A	Art, Architecture, & Human Rights
ART 005	Beginning Sculpture	AHI 121	Politics of Public Art
ART 007	Beginning Painting	AHI 123	The Museum in the Age of Spectacle
ART 008	Beginning Ceramic Sculpture	AHI 181	Latin American Art & Architecture
ART 009	Beginning Photography	AHI 188A	The American Home
ART 010D	Contemporary Art Appreciation	<i>Undergraduate Seminar in Art History, (AHI 190A-AHI 190L)</i>	
ART 010F	Contemporary Art Appreciation	Choose one:	4
ART 011	Beginning Printmaking	AHI 190A	Undergraduate Seminar in Art History: Mediterranean Antiquity
ART 012	Beginning Video	AHI 190B	Undergraduate Seminar in Art History: Medieval
ART 024	Introduction to Experimental Video & Film	AHI 190C	Undergraduate Seminar in Art History: Renaissance
Preparatory Subject Matter Subtotal	20-21	AHI 190D	Undergraduate Seminar in Art History: American
<b>Depth Subject Matter</b>		AHI 190E	Undergraduate Seminar in Art History: Gendering of Culture
<i>Distribution Areas</i>		AHI 190F	Undergraduate Seminar in Art History: Chinese
Choose six from at least five of the following areas:	24	AHI 190G	Undergraduate Seminar in Art History: Japanese
(1) The Ancient World		AHI 190H	Undergraduate Seminar in Art History: Modern-Contemporary
AHI 152 Arts of Oceania & Prehistoric Europe		AHI 190I	Undergraduate Seminar in Art History: 17th-18th Century
AHI/CLA 172A Early Greek Art & Architecture		AHI 190J	Undergraduate Seminar in Art History: Islamic
AHI/CLA 172B Later Greek Art & Architecture		AHI 190K	Undergraduate Seminar in Art History: 19th Century

<b>Total Units</b>	24		20
<b>Total Units</b>			<b>72-73</b>

Fulfilling the undergraduate seminar requirement (AHI 192) through an architectural topic is highly recommended.

## Emphasis in Museum Studies

The Emphasis in Museum Studies consists of five upper-division courses (20 units) incorporated into the 60-unit major in Art History. Two core courses for the Emphasis in Museum Studies (8 units) take the place of upper division electives in the major. Three additional electives (12 units) are chosen to complete the Emphasis. Beyond these requirements, one or more internships (AHI 192) are highly recommended.

## Art History, Master of Arts

College of Letters & Science

### Graduate Study

The Program in Art History offers studies leading to the Master of Arts degree in History of Art as preparation for further graduate study or professional work. For more information, contact the Graduate Staff Advisor at 530-752-8710, or see Art History (<http://arthistory.ucdavis.edu>).

### Degree Requirements

See Art History (<https://grad.ucdavis.edu/programs/gahi/>).

## Art Studio, Bachelor of Arts

College of Letters & Science

The Art Studio major provides the studio experience necessary for a broad understanding of the practice and interpretation of the visual arts.

### The Program

The Art Studio program is designed to deliver a broad range of hands-on studio practices to the art major. Areas of focus include painting, sculpture, drawing, photography, ceramics, printmaking, and time-based media. Course choices/sequences are determined by the student according to major distribution requirements. Students are encouraged to explore a broad range of disciplines and are expected to take advantage of beginning classes which provide a critical introduction to the research possibilities within the major, across disciplines. In addition to studio

classes, students are encouraged to participate in a distinguished visiting artist lecture series, professional practice seminars, student exhibitions/competitions, internships, and benefit from exposure to cultural events and exhibitions in Davis, Sacramento, and the Greater Bay Area.

### Major Advisor

Information on the current Academic Advisor can be obtained by contacting the Art Department main office at 530-752-0105 or Arts Group Advising Center (<http://arts.ucdavis.edu/arts-group-undergraduate-advising/>).

### Portfolio

While portfolios are not required for admission to the art major, students at all levels are expected to maintain current portfolios of completed work in order to qualify and compete for the numerous internships, fellowships, grants, awards, and exhibitions the program has to offer, as well as to better prepare for the rigors of graduate school and/or an independent studio practice.

### Career Options

Graduates of the Art Studio Program attend prestigious post-baccalaureate and graduate programs in studio art. Alumni often go on to develop professional studio practices. Commitment to the development of one's studio work leads to exhibition opportunities as well as accomplishments in the realm of fellowships, commissions, collaborations, and a host of other professional projects and opportunities. For the student wishing to explore additional arts-related trajectories, in the private or public sector, a studio arts education provides a strong foundation for careers and/or graduate work in K-12 art education, art therapy, arts administration, curatorial studies, set design, architecture, culinary arts, design, film, animation, art criticism/journalism among others.

### Teaching Credential Subject Representative

See the Teacher Education program (<https://education.ucdavis.edu/teaching-credentialma/>).

The major requirements below are in addition to meeting University Requirements (p. 56) & College Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Art Studio Bachelor of Arts major is 72.

## Art Studio, Master of Fine Arts

College of Letters & Science

### Graduate Study

The Department of Art offers programs of study and research leading to the M.F.A. degree in the practice of art. For more information contact the Graduate Staff Advisor at 530-752-8710 or see Art Studio Graduate Program (<http://arts.ucdavis.edu/art-studio-graduate-program/>).

### Degree Requirements

See Art Studio (<https://grad.ucdavis.edu/programs/gart/>).

## Museum Studies, Minor

College of Letters & Science

The Minor in Museum Studies combines study of the history of collecting and museum theory with practical training in curatorship, interpretive writing, and exhibition development. The minor introduces students to the historical development and current practices of all types of museums, including museums of natural history, science, anthropology, art, and heritage sites. Students develop an understanding of issues shared by all types of museums: organization and interpretation of exhibitions, audience engagement, the ethics of display and conservation, the

political position of museums in their communities and the role of museums as shapers of culture. Students gain practical skills related to careers in museums, galleries, and other cultural institutions. In addition to two core courses in the minor, students take three Museum Studies-specific electives from a list of choices. The electives divide into roughly five areas representing different aspects of museum work:

- Practices of contemporary museums.
- Issues of cultural property and heritage.
- Public relations and marketing.
- Writing skills relevant to museum work.
- Skills related to exhibition planning, design, and installation.

Code	Title	Units

## Asian American Studies

College of Letters & Science

Susette Min, Ph.D., Chairperson of the Department

### Department Office

3102 Hart Hall; 530-752-2069; Asian American Studies (<https://asa.ucdavis.edu/>); Facebook (<https://www.facebook.com/UCDavisAsianAmericanStudies/>); Faculty (<https://asa.ucdavis.edu/faculty/>)

### Department Background

Born out of social and global justice movements of the late 1960s, the Department of Asian American Studies at UC Davis is one of the very first programs in Asian American studies established nationally. The Department provides unique learning opportunities about the historical and contemporary experiences of Asian Americans in local and global contexts. We seek to develop and advance knowledge about the

diversity of Asian American populations as immigrants and refugees, as ethnic minorities, and as a racial group in U.S. society. In examining the complexity of Asian American experiences, we foster critical thinking and comprehensive analyses of formations of race, ethnicity, class, gender, religion, and sexuality that are manifested not only in the United States but also in other regions and nations across the globe.

A distinct feature of our department is our emphasis on applied knowledge. Our curriculum, for instance, encourages students to work in close collaboration with community groups that advance social justice and transformative social change. Many of our faculty are community-engaged scholars who work closely with Asian American and Pacific Islander (API) organizations and help to facilitate linkages between students and the broader API community. Moreover, the faculty and staff in our department are consistently recognized for their strong mentorship and close engagement with students' academic and personal growth. Our faculty and courses also focus on diverse Asian American populations as we seek to be inclusive of underrepresented Asian American groups and highlight cutting-edge research. Finally, our department has close relationships with its alumni who also help to support students and the overall curriculum.

The Department houses the George Kagiwada Library and Digital Media Lab. This unique library holds a vast collection of scholarly texts in Asian American studies as well as an archive of Asian American community newspapers and other primary source publications not found elsewhere. The Digital Media Lab helps to support course-based as well as individual students' independent projects such as podcasts, videos and the like.

- Asian American Studies, Minor (p. 127)
- Social, Ethnic & Gender Relations, Minor (p. 128)

## Asian American Studies, Bachelor of Arts

College of Letters & Science

### The Major Program

Offering both an undergraduate major and minor, our curriculum emphasizes multidisciplinary, comparative, transnational, and intersectional perspectives; original empirically-based scholarship; cultural production and analyses; and community engagement.

In consultation with our faculty and staff advisors, students in the major have the exciting opportunity to select an emphasis or specialty organized around our faculty's core areas of intellectual focus including –Immigration, Labor, and Transnationalism; Visual, Literary, and Cultural Studies; and Public/Community-Engaged Scholarship. The department is also developing an emphasis on Health through its emerging partnerships. Each emphasis incorporates a diverse array of thematic, theoretical, disciplinary, and methodological approaches—as well as a focus on a broad range of Asian American communities—allowing students to choose a course of study that aligns with their particular academic and career interests.

In order to enhance students' intellectual development and postgraduate preparation, our curriculum also requires that all majors complete an off-campus community internship. This requirement seeks to ensure students experience a deeper and more comprehensive liberal arts education that connects classroom education to real life contexts

that foster the development of new forms of knowledge and practical skills. The Department also offers an optional two-quarter thesis writing seminar for students in the major and minor that progresses through each stage of designing and completing an individualized undergraduate thesis project based on original research, which helps prepare students interested in applying for graduate school.

## Career Alternatives

With the multidisciplinary emphasis of our program, an Asian American studies major provides excellent preparation for a diverse range of careers. Our alumni have established successful careers in the arts, community-based and non-profit organizations, government and politics, human rights, journalism, international relations, law, K-12 education, public health, public policy, social work, and student affairs in higher education. Others have gone on to pursue postgraduate degrees in a wide variety of fields that include education, ethnic studies, fine arts, feminist & queer studies, history, law, literature, political science, public policy, sociology, and social work. Our department has fostered close relationships with our alumni who are committed to supporting our majors with their career plans.

## General Education Requirements

A large number of the courses offered by the Department fulfill a wide range of general education topical breadth and core literacy requirements that include:

### Topical Breadth

- Arts & Humanities
- Social Sciences

### Core Literacy

#### Literacy with Words & Images

- Writing Experience
- Oral Skills
- Visual Literacy

#### Civic & Cultural Literacy

- American Cultures, Governance, & History
- Domestic Diversity
- World Cultures

### Major Advisor

Joe Nguyen (jovnguyen@ucdavis.edu), Student Academic Advisor;  
530-752-8617

Substitutions for disciplinary track courses will be considered by the Department Chair on a case-by-case basis. Likewise, any substitutions of Major/Minor criteria will be considered by the Department Chair.

Direct questions pertaining to the following courses to the instructor or to the Department of Asian American Studies in 3102 Hart Hall; 530-752-2069. Also find relevant contact information at Asian American Studies (<https://asa.ucdavis.edu/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Asian American Studies Bachelor of Arts is 68.

## Social, Ethnic & Gender Relations, Minor

### College of Letters & Science

The interdisciplinary minor in Social, Ethnic & Gender Relations explores the racial, ethnic, class, and gender aspects of human relations in the modern world. Students study human societies and cultures from a multi-ethnic perspective and across established academic departmental lines. The minor is jointly sponsored by African American & African Studies, American Studies, Asian American Studies, Chicana/o Studies, Native American Studies, and Gender, Sexuality & Women's Studies.

### Advising

Katherine Ampaw-Matthei, [kampaw@ucdavis.edu](mailto:kampaw@ucdavis.edu); Jeremiah Thompson, [thomspo@ucdavis.edu](mailto:thomspo@ucdavis.edu) ([jthomspo@ucdavis.edu](mailto:jthomspo@ucdavis.edu))

Code	Title	Units
Choose one upper division course from five of the following six groups to total 20 units:		20
(1) African American & African Studies. (p. 524)		
(2) Asian American Studies. (p. 602)		
(3) Chicana/o Studies. (p. 669)		
(4) Gender, Sexuality & Women's Studies. (p. 917)		
(5) Native American Studies. (p. 1200)		
(6) American Studies; with Domestic Diversity GE designation. (p. 544)		

### Restriction

No more than one course applied toward the satisfaction of a major may be offered in satisfaction of the minor.

<b>Total Units</b>	<b>20</b>
--------------------	-----------

## Atmospheric Science (Graduate Group)

**College of Agricultural & Environmental Sciences**

Cort Anastasio, Ph.D., Chairperson of the Group; 530-754-6095

### Group Office

1152 Plant & Environmental Sciences Building; 530-752-1669;  
Atmospheric Science (<http://atm.ucdavis.edu>); Faculty (<http://atm.ucdavis.edu/people/faculty/>)

- Atmospheric Science, Master of Science (p. 129)
- Atmospheric Science, Doctor of Philosophy (p. 129)

## Atmospheric Science, Master of Science

**College of Agricultural & Environmental Sciences**

### Graduate Study

The Graduate Group in Atmospheric Science offers both M.S. and Ph.D. degree programs. A student may place emphasis on graduate work in one or more of the following fields: air quality meteorology, atmospheric chemistry, cloud physical processes, biometeorology, micrometeorology, numerical weather prediction, remote sensing, climate dynamics, large-scale dynamics, meso-scale and boundary-layer meteorology, computational geosciences, extreme weather, and climate change impacts. The diverse and extensive backgrounds of the faculty allow opportunities for interdisciplinary training and research.

### Preparation

The Group encourages applications from all interested students with backgrounds in the physical or natural sciences. Basic qualifications for students entering the Atmospheric Science graduate program include mathematics to the level of vector calculus and partial differential equations, and one year of college-level physics. Flexibility may be allowed for students with high academic potential, but it is expected that deficiencies in preparatory material and in key undergraduate atmospheric science courses be completed within the first year of graduate study.

### Degree Requirements & Program Coordinator

See Atmospheric Science (<https://grad.ucdavis.edu/programs/gatm/>).

## Atmospheric Science, Doctor of Philosophy

**College of Agricultural & Environmental Sciences**

### Graduate Study

The Graduate Group in Atmospheric Science offers both M.S. and Ph.D. degree programs. A student may place emphasis on graduate work in one or more of the following fields: air quality meteorology, atmospheric

chemistry, cloud physical processes, biometeorology, micrometeorology, numerical weather prediction, remote sensing, climate dynamics, large-scale dynamics, meso-scale and boundary-layer meteorology, computational geosciences, extreme weather, and climate change impacts. The diverse and extensive backgrounds of the faculty allow opportunities for interdisciplinary training and research.

### Preparation

The Group encourages applications from all interested students with backgrounds in the physical or natural sciences. Basic qualifications for students entering the Atmospheric Science graduate program include mathematics to the level of vector calculus and partial differential equations, and one year of college-level physics. Flexibility may be allowed for students with high academic potential, but it is expected that deficiencies in preparatory material and in key undergraduate atmospheric science courses be completed within the first year of graduate study.

See Atmospheric Science (<https://grad.ucdavis.edu/programs/gatm/>).

## Avian Sciences (Graduate Group)

**College of Agricultural & Environmental Sciences**

The Avian Sciences Master of Science (p. 129), is no longer accepting new students; for more information contact Animal Science (<https://animalscience.ucdavis.edu/>).

Annie King, Ph.D., Chairperson of the Group

### Group Office

1249 Meyer Hall; 530-752-2382; Animal Science (<https://animalscience.ucdavis.edu/>); Faculty (<https://animalscience.ucdavis.edu/people/faculty/>)

- Avian Sciences, Master of Science (p. 129)

## Avian Sciences, Master of Science

**College of Agricultural & Environmental Sciences**

The Avian Sciences Master of Science, is no longer accepting new students; for more information contact Animal Science (<https://animalscience.ucdavis.edu/>).

### Graduate Study

The Graduate Group in Avian Sciences offers the M.S. degree program to students who wish to pursue specialized advanced work on avian species. Specializations students may choose include behavior, nutrition, physiology, reproduction, pathology, immunology, toxicology, food chemistry, management, ecology, genetics, comparative incubation, environmental physiology, and cellular and developmental studies using wild and domestic birds as experimental animals. Both master's degree plans, thesis and comprehensive examination, are available.

### Preparation

Applicants should have undergraduate preparation in a field appropriate to the course of study selected, including courses in most of the following subjects: general biology, general and organic chemistry, biochemistry, avian biology, genetics, nutrition, physiology, and statistics.

# Biochemistry, Molecular, Cellular & Developmental Biology (Graduate Group)

## Graduate Studies

Ben Montpetit, Ph.D., Chairperson of the Group;  
[benmontpetit@ucdavis.edu](mailto:benmontpetit@ucdavis.edu)

## Group Office

227D Green Hall, formerly Life Sciences; 530-752-9091; Biochemistry, Molecular, Cellular & Developmental Biology (<http://bmcdb.ucdavis.edu/>); Faculty (<http://bmcdb.ucdavis.edu/faculty/>)

- Biochemistry, Molecular, Cellular & Developmental Biology, Master of Science (p. 130)
- Biochemistry, Molecular, Cellular & Developmental Biology, Doctor of Philosophy (p. 130)

## Biochemistry, Molecular, Cellular & Developmental Biology, Master of Science

### Graduate Studies

## Graduate Study

The Graduate Group in Biochemistry, Molecular, Cellular & Developmental Biology offers programs of study and research leading to M.S. and Ph.D. degrees. Biochemistry, Molecular, Cellular & Developmental Biology is a broad, interdepartmental program.

**While an M.S. may be obtained while pursuing a Ph.D., only Ph.D. applications will be accepted. Master's degree offered only en route to Ph.D.**

## Preparation

Appropriate preparation is an undergraduate degree in a biological or physical science. Preparation should include a year of calculus, physics, general chemistry and organic chemistry, and courses in statistics, biochemistry, genetics and cell biology.

## Degree Requirements & Program Coordinator

See Biochemistry, Molecular, Cellular & Developmental Biology (<https://grad.ucdavis.edu/programs/gbcb/>).

## Biochemistry, Molecular, Cellular & Developmental Biology, Doctor of Philosophy

### Graduate Studies

## Graduate Study

See Biochemistry, Molecular, Cellular & Developmental Biology (<https://grad.ucdavis.edu/programs/gbcb/>).

# Biological & Agricultural Engineering

## College of Agricultural & Environmental Sciences

Fadi Fathallah, Ph.D., Chair of the Department; term ends June 30, 2026  
 Stavros Vougioukas, Ph.D., Vice Chair of the Department

## Department Office

2030 Bainer Hall; 530-752-0102; Biological & Agricultural Engineering; Faculty (<https://bae.ucdavis.edu/people/>)

## Major Programs

The Department of Biological & Agricultural Engineering offers two undergraduate programs: Agricultural & Environmental Technology (p. 131) and Biological Systems Engineering (p. 135), with an integrated Bachelor of Science/Master of Science degree (p. 140) option in Biological Systems Engineering.

## Graduate Study

The Department of Biological & Agricultural Engineering offers the following graduate degrees in Biological Systems Engineering: Master of Engineering (p. 140), Master of Science (p. 141), Doctor of Engineering (p. 141), Doctor of Philosophy (p. 142); see also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

## Minor Programs

The Department of Biological & Agricultural Engineering offers two minors through the College of Agricultural & Environmental Sciences: Geographic Information Systems (p. 144) and Precision Agriculture (p. 144); and also administers three minors through the College of Engineering in Energy Science & Technology (p. 143), Energy Efficiency (p. 142), and Energy Policy (p. 143).

## Courses

Courses are listed under Applied Biological Systems Technology (ABT) (p. 578), Agricultural & Environmental Technology (TAE) (p. 531) and Biological Systems Engineering (EBS) (p. 622).

- Agricultural & Environmental Technology, Bachelor of Science (p. 131)
- Biological Systems Engineering, Bachelor of Science (p. 135)
- Biological Systems Engineering, Bachelor of Science/Master of Science Integrated (p. 140)

- Biological Systems Engineering, Master of Engineering (p. 140)
- Biological Systems Engineering, Master of Science (p. 141)
- Biological Systems Engineering, Doctor of Engineering (p. 141)
- Biological Systems Engineering, Doctor of Philosophy (p. 142)
- Energy Efficiency, Minor (p. 142)
- Energy Policy, Minor (p. 143)
- Energy Science & Technology, Minor (p. 143)
- Geographic Information Systems, Minor (p. 144)
- Precision Agriculture, Minor (p. 144)

## Agricultural & Environmental Technology, Bachelor of Science

### College of Agricultural & Environmental Sciences

The technological transformation of agriculture that began more than a century ago continues with recent advances made in sensing, data management, information processing, communications, control, modeling and simulation, gene manipulation, automation, artificial intelligence, and robotics that can radically alter resource demand and improve environmental, social and economic sustainability when appropriately implemented.

The Agricultural & Environmental Technology (AET) major aims to bridge the disciplines of agriculture, management, technology, and applied engineering, and to train students in integrating technology, leadership and design in solving complex problems in the agricultural and environmental sciences.

A key aspect of the major is to help students develop an understanding of how the next generation of technologies (including cyber#physical and knowledge#based) interact with animals, plants, and their environments, and technologies for the production and management of bio#based products and sustainable food, feed, fiber, and energy.

## The Program

Learn how to integrate the next generation of technologies such as big data, robotics, digital technology, AI and machine learning for more advanced, efficient and sustainable food, fiber and energy production.

Students specialize within the major through selection of a track. Tracks are regularly reviewed and updated by program faculty to ensure relevancy to current societal needs. We offer tracks in **Digital Agriculture, Bioproducts and Wearable Technologies, Energy and Environment**. Students choose one of the three tracks, and in the **Digital Agriculture** track, they also choose an area of emphasis.

As a new major, courses are still in the process of being approved. These are noted as "Pending" in the requirements. Please contact the staff advisor for more information.

## Career Alternatives

Graduates of the AET major will gain technical skills and experience in technology systems management, bio#based product innovation, environmental quality, energy efficiency, power systems, the next generation of smart agricultural machinery, GIS/GPS remote sensing and geo#informatics#based control, irrigation and water control, precision agriculture and other features of the diverse developing technologies in agriculture.

Opportunities for employment include **managers and entrepreneurs** to bridge between science, engineering and application, **skilled operators** to interface with smart machines and smart technologies, and **scholars and educators** to help train others.

Graduate study for the AET student may lead to M.S. or Ph.D. degrees in agricultural technology, data science, agriculture and life sciences, and related fields such as bioproducts, plant science, environmental science and policy, agricultural chemistry, and biochemistry.

## Advising

**Staff Advisor:** Janette Gonzalez (<https://www.bftv.ucdavis.edu/people/janette-gonzalez/>)

**Lead Faculty Advisor:** Ali Moghimi, Ph.D. (<https://bae.ucdavis.edu/people/ali-moghimi/>)

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Agricultural & Environmental Technology Bachelor of Science is 86.

Code	Title	Units
<b>Preparatory Subject Matter</b>

## Biological Systems Engineering, Bachelor of Science

College of Engineering

### The Biological Systems Engineering Undergraduate Program

Biological Systems Engineering is an engineering major that uses life sciences as its main scientific base. With rapid advances in biology and biotechnology, engineers are needed to work side by side with life scientists to bring laboratory developments into commercial production or field application. Industries in food and fiber production, bioenergy, bioprocessing, biotechnology, food processing, agriculture, forestry, aquaculture, plant and animal production, natural resource management, and waste reduction all need engineers with strong training in biology. In the first two years, the Biological Systems Engineering major requires sequences of courses in mathematics, physics, chemistry, engineering science, and humanities, similar to all accredited engineering programs. In addition to these courses, the major also includes courses in the life sciences and the application to engineering.

Biological Systems Engineering graduates take jobs in biotechnology, energy, food, and medical industries, work for federal, state and local agencies, and pursue graduate work. Students can also use the program as a pathway to professional schools in medicine, veterinary medicine, education, law, or business.

The Biological Systems Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>) under the commission's General Criteria and Program Criteria for Biological and Similarly Named Engineering Programs.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

### Lower Division Required Courses

See the Degree Requirements section.

## Upper Division Requirements

If your career objective is a professional degree in the health sciences (e.g., medicine, veterinary medicine, nursing, or dentistry), you should consult with advisors from the appropriate school to plan for successful admission and to ensure that you take specific courses that may be required and that you have the necessary experience. Advisors in the Office of Health Professions Advising can also assist students planning to pursue degrees in these areas.

## Areas of Specialization

Biological Systems Engineering is a broad major with many possible areas of specialization, with some examples below. Each area of specialization includes recommended electives for planning purposes. Students in the major are NOT required to select or follow an area of specialization. Following the recommended electives for a specialization does not result in specialization or concertation notation on a student's transcript or diploma.

- Biotechnical Engineering.
- Agricultural & Natural Resources Engineering.
- Food Engineering.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Biological Systems Engineering Bachelor of Science is 159.

Code	Title	Units
<b>Lower Division Required Courses</b>		
<i>Mathematics</i>		
MAT 021A	Calculus	4
MAT 021B	Calculus	4
MAT 021C	Calculus	4
MAT 021D	Vector Analysis	4
MAT 022A	Linear Algebra	3
MAT 022B	Differential Equations	3
<i>Physics</i>		
PHY 009A	Classical Physics	5
PHY 009B	Classical Physics	5
PHY 009C	Classical Physics	5
<i>Chemistry</i>		
CHE 002A	General Chemistry	5
CHE 002B	General Chemistry	5
CHE 008A or CHE 118A	Organic Chemistry: Brief Course Organic Chemistry for Health & Life Sciences	2-4
CHE 008B or CHE 118B	Organic Chemistry: Brief Course Organic Chemistry for Health & Life Sciences	4
<i>Biological Science</i>		
BIS 002A	Introduction to Biology: Essentials of Life on Earth	5
<i>Engineering</i>		
ENG 017 or ENG 017V	Circuits I	4
ENG 035	Statics	4
ECS 032A or ECS 032AV	Introduction to Programming	4

or ENG 006	Engineering Problem Solving	
<i>Biological Systems Engineering</i>		
EBS 001	Foundations of Biological Systems Engineering (Fall only)	4
EBS 075	Properties of Materials in Biological Systems (Winter only)	4
<i>Lower Division Composition/Writing; choose one; a grade of C- or better is required:</i>		
COM 001	Major Works of the Ancient World	
COM 002	Major Works of the Medieval & Early Modern World	
COM 003	Major Works of the Modern World	
COM 004	Major Works of the Contemporary World	
ENL 003 or ENL 003V	Introduction to Literature	
NAS 005	Introduction to Native American Literature	
UWP 001	Introduction to Academic Literacies (Recommended)	
or UWP 001V or UWP 001Y	Introduction to Academic Literacies: Online Introduction to Academic Literacies	
<i>Choose one:</i>		
ENG 003 or ENG 003Y	Introduction to Engineering Design	
CMN 001 or CMN 001V	Introduction to Public Speaking	
<b>Lower Division Required Courses Subtotal</b>		<b>86-88</b>
<b>Upper Division Required Courses</b>		
<i>Engineering</i>		
ENG 100	Electronic Circuits & Systems	3
ENG 102	Dynamics	4
ENG 104 or ENG 104V	Mechanics of Materials	4
ENG 105	Thermodynamics	4
ENG 106	Engineering Economics	4
<i>Biological Systems Engineering</i>		
EBS 103/HYD 103N or ENG 103	Fluid Mechanics Fundamentals	4
EBS 125	Heat Transfer in Biological Systems	4
EBS 127	Mass Transfer & Kinetics in Biological Systems	4
EBS 130	Modeling of Dynamic Processes in Biological Systems	4
EBS 165	Bioinstrumentation & Control	4
EBS 170A	Engineering Design & Professional Responsibilities	3
EBS 170B	Engineering Projects: Design	2
EBS 170BL	Engineering Projects: Design Laboratory	1
EBS 170C	Engineering Projects: Design Evaluation	1
EBS 170CL	Engineering Projects: Design Evaluation	2
<i>Statistics</i>		
STA 100	Applied Statistics for Biological Sciences	4
<i>Biological Systems Engineering Electives</i>		

Choose a minimum of 4 units from all upper division Biological Systems Engineering courses not otherwise required, with the exception of:	4	ETX 131	Environmental Toxicology of Air Pollutants
EBS 189 series		FST 102A	Malting & Brewing Science
EBS 199 Special Study for Advanced Undergraduates		FST 104L	Food Microbiology Laboratory
<i>Engineering Electives</i>		FST 119	Chemistry & Technology of Milk & Dairy Products
Choose a minimum of 8 units; all upper division courses offered by the College of Engineering may be taken as engineering electives with the exception of the following:	8	FST/ETX 128	Food Toxicology
ECI 123 Urban Systems & Sustainability		FST 159	New Food Product Ideas
ECS 188 Ethics in an Age of Technology		IDI 141	Infectious Diseases of Humans
ENG 103 Fluid Mechanics		SSC 100	Principles of Soil Science
ENG/PHY 160 Environmental Physics & Society		WFC 121	Physiology of Fishes
All courses 190-197, 199; except ENG 190, may be taken for 2 units of engineering elective credit.		Students may choose other upper division courses with substantial biological content offered by the College of Agricultural & Environmental Sciences; consultation with a faculty advisor and approval by petition is required.	
<i>Biological Science Electives</i>		<b>Upper Division Composition Requirement</b>	
All upper division courses in the College of Biological Sciences may be used as biological science electives; with the exception of:	9	Choose one; a grade of C- or better is required:	
EVE 175 Computational Genetics		UWP 101	Advanced Composition
EXB 102 Introduction to Motor Learning & the Psychology of Sport & Exercise		or UWP 101V	Advanced Composition
EXB 112 Clinical Exercise Physiology		or UWP 101Y	Advanced Composition
EXB 115 Biomechanical Bases of Movement		UWP 102B	Writing in the Disciplines: Biology
EXB 121 Advanced Sport Psychology		UWP 102E	Writing in the Disciplines: Engineering
EXB 124 Physiology of Maximal Human Performance		UWP 102F	Writing in the Disciplines: Food Science & Technology
EXB 125 Neuromuscular & Behavioral Aspects of Motor Control		UWP 102G	Writing in the Disciplines: Environmental Writing
EXB 148 Theory & Practice of Exercise Testing		UWP 104A	Writing in the Professions: Business Writing
All 190-199		or UWP 104AV	Writing in the Professions: Business Writing
May also be taken as biological science electives:		or UWP 104AY	Writing in the Professions: Business Writing
ABT 161 Water Quality Management for Aquaculture		UWP 104E	Writing in the Professions: Science
ANS 118 Fish Production		UWP 104F	Writing in the Professions: Health
ANS 143 Pig & Poultry Care & Management		or UWP 104FV	Writing in the Professions: Health
ANS 144 Beef Cattle & Sheep Production		or UWP 104FY	Writing in the Professions: Health
ANS 146 Dairy Cattle Production		UWP 104T	Writing in the Professions: Technical Writing
ATM 133 Biometeorology		Passing the Upper Division Composition Exam.	
AVS 100 Avian Biology		<b>Upper Division Required Courses Subtotal</b>	
BIS 002B Introduction to Biology: Principles of Ecology & Evolution		73-77	
BIS 002C Introduction to Biology: Biodiversity & the Tree of Life		<b>Total Units</b>	
CHA 101/EXB 106 Human Gross Anatomy		<b>159-165</b>	
CHA 101L/ EXB 106L Human Gross Anatomy Laboratory			
ENT 100 General Entomology			
ENH 102 (Discontinued)			
ESM 120 Global Environmental Interactions			
ESP 100 General Ecology			
ESP 110 Principles of Environmental Science			
ESP 155 Wetland Ecology			
ETX 101 Principles of Environmental Toxicology			

## Areas of Specialization

Biological Systems Engineering is a broad major with many possible areas of specialization, with some examples below. Each area of specialization includes recommended electives for planning purposes. Students in the major are NOT required to select or follow an area of specialization. Following the recommended electives for a specialization does not result in specialization or concertation notation on a student's transcript or diploma.

### Biotechnical Engineering

Biotechnology involves the handling and manipulation of living organisms or their components to produce useful products. Students specializing in biotechnical engineering integrate analysis and design with applied biology to solve problems in renewable energy production, bioprocessing, control of biological systems, and production of biomaterials and bioproducts.

Students may focus on the mechanisms and processes for the sustainable production and use of energy from renewable biological sources. Students may also focus on the challenges in scaling up laboratory developments to industrial production, including production, packaging, and application of biocontrol agents for plant pests and diseases; genetically altered plants; plant materials and food products; and microbial production of biological products, tissue culture, and bioremediation. Students may also focus on the development of biosensors to detect microorganisms and specific substances useful in the development of products based on biological processes and materials.

Biotechnical engineers work in the biotech industries on process design and operation, scale-up, and instrumentation, sensing, automation, and control.

### Recommended Biological Science Electives

Code	Title	Units	
BIS 101 or BIS 101V	Genes & Gene Expression Genes & Gene Expression	4	Students may focus on automation and control of field operations and engineered systems, robotics, and the biomechanics of humans and animals. They may also focus on engineering issues related to the sustainable use of natural resources, particularly energy and water, but also land and air.
BIS 102	Structure & Function of Biomolecules	3	Agricultural and natural resources engineers are employed as practicing professionals and managers with agricultural producers, equipment manufacturers, irrigation districts, food processors, consulting engineering firms, start-up companies, and government agencies.
BIS 103	Bioenergetics & Metabolism	3	Graduates with interest in biomechanics work in industry on the design, evaluation, and application of human-centered devices and systems, as well as on improving worker health and safety.
BIT 160	Principles of Plant Biotechnology	3	
BIT 161A	Genetics & Biotechnology Laboratory	6	
BIT 161B	Plant Genetics & Biotechnology Laboratory	4	
MCB 120L	Molecular Biology & Biochemistry Laboratory	3	
MCB 121	Advanced Molecular Biology	3	
MCB 126	Plant Biochemistry	3	
MCB 162	Human Genetics & Genomics	3	
MCB 182	Principles of Genomics	3	
MIC 102	Introductory Microbiology	3	
MIC 103L	Introductory Microbiology Laboratory	2	
MMG 115 or MIC 115 DISCON	Recombinant DNA Cloning & Analysis	3	
PLS 152	Plant Genetics	4	

### Recommended Engineering Electives

Code	Title	Units	
BIM 109	Biomaterials	4	
BIM 117	Modeling Strategies for Biomedical Engineering	4	
BIM 118	Microelectromechanical Systems	4	
BIM 140	Protein Engineering	4	
BIM 143	Biomolecular Systems Engineering: Synthetic Biology	4	
BIM 151	Computational Tools & Applications in Bioengineering & Biomedicine	4	
BIM 152	Molecular Control of Biosystems	4	
BIM 161A	Biomolecular Engineering	4	
BIM 162	Introduction to the Biophysics of Molecules & Cells	4	
EBS 135	Bioenvironmental Engineering	4	
EBS 161	Kinetics & Bioreactor Design	4	
ECH 160	Fundamentals of Biomanufacturing	3	
ECI 148A	(Discontinued)	4	
ECI 149	(Discontinued)	4	
ECI 150	(Discontinued)	4	
ECI 153	Deterministic Optimization & Design	4	
ENG 180	Engineering Analysis	4	

### Suggested Advisors

J. de Moura Bell, J. Fan, Y.-L. Hsieh, B. Jenkins, T. Jeoh, J. Mullin, D. Slaughter, G. Sun, R. Zhang

## Agricultural & Natural Resources Engineering

With the world population continuing to grow over the next several decades, grand challenges exist in food security and social, economic, and environmental sustainability. Meeting the needs of agriculture and the effective use of natural resources will require continuing innovation. Students specializing in agricultural and natural resources engineering combine analysis and design with applied biology to solve problems in producing, transporting, and processing biological products to provide food, fiber, energy, pharmaceuticals, and other human needs.

Students may focus on automation and control of field operations and engineered systems, robotics, and the biomechanics of humans and animals. They may also focus on engineering issues related to the sustainable use of natural resources, particularly energy and water, but also land and air.

### Recommended Biological Science Electives

Code	Title	Units
<b>Animal Emphasis</b>		
AVS 100	Avian Biology	3
ANS 112	Sustainable Animal Agriculture	3
ANS 143	Pig & Poultry Care & Management	4
ANS 144	Beef Cattle & Sheep Production	4
ANS 146	Dairy Cattle Production	5
NPB 101	Systemic Physiology	5
SSC 100	Principles of Soil Science	5
<b>Aquaculture Emphasis</b>		
ANS 118	Fish Production	4
ANS 131	Reproduction & Early Development in Aquatic Animals	4
ABT 163	Aquaculture Systems Engineering	3
WFC 120	Biology & Conservation of Fishes	3
WFC 121	Physiology of Fishes	4
<b>Biomechanics Emphasis</b>		
BIS 102	Structure & Function of Biomolecules	3
NPB 101	Systemic Physiology	5
CHA 101/EXB 106	Human Gross Anatomy	4
<b>Plant Emphasis</b>		
ENT 100	General Entomology	4
ENH 102	(Discontinued)	4
ESP 100	General Ecology	4
ETX 101	Principles of Environmental Toxicology	4

HYD 124	Plant-Water-Soil Relationships	4	Food engineers work as practicing engineers, scientists, and managers in the food industry.
MMG 120	Microbial Ecology	3	
or MIC 120 DISCONTINUED			

PLB 111	Plant Physiology	3	
SSC 100	Principles of Soil Science	5	
PLS 101	Agriculture & the Environment	3	
PLS 114	Biological Applications in Fruit Production	2	

### Recommended Engineering Electives

Code	Title	Units	
EBS 128	Biomechanics & Ergonomics	4	
EBS 145	Irrigation & Drainage Systems	4	
BIM 109	Biomaterials	4	
BIM 116	Quantitative Physiology	5	
BIM 126	Tissue Mechanics	3	
ECI 141	Engineering Hydraulics	3	
ECI 142	Engineering Hydrology	4	
ECI 144	Groundwater Systems Design	4	
ECI 145	Hydraulic Structure Design	4	
ECI 148A	(Discontinued)	4	
ECI 171	Soil Mechanics	4	
ENG 111	Electric Machinery Fundamentals	4	
ENG 121	Fluid Power Actuators & Systems	4	
ENG 180	Engineering Analysis	4	

### Additional Recommended Electives (Do not count towards major requirements)

Code	Title	Units	
ABT 150	Introduction to Geographic Information Systems	4	
ABT 161	Water Quality Management for Aquaculture	3	
ABT 163	Aquaculture Systems Engineering	3	
ABT 165	Irrigation Practices for an Urban Environment	3	

### Suggested Advisors

A. Daccache, I. Donis-Gonzalez, M. Earles, F. Fathallah, J. Fernandez-Bayo, T-C. Hung, B. Jenkins, F. Khorsandi, I. Kisekka, K. Kornbluth, P. Larbi, A. Pourreza, D. Slaughter, S. Vougioukas

## Food Engineering

Producing the food we eat every day constitutes the largest industrial sector of the U.S. economy, and this production involves the work of engineers in a wide variety of food industries, both at home and around the world. Students specializing in food engineering design food processes and operate equipment and facilities for production of high quality, safe, and nutritious food with minimal impact of these operations on the environment.

Students learn to apply engineering principles and concepts to handle, store, process, package, and distribute food and related products. In addition to engineering principles, the food engineering specialization provides an understanding of the chemical, biochemical, microbiological, and physical characteristics of food. Students study concepts of food refrigeration, freezing, thermal processing, drying, and other food operations, food digestion, and health and nutrition in food system design.

### Recommended Biological Science Electives

Code	Title	Units
ANS 112	Sustainable Animal Agriculture	3
BIS 101	Genes & Gene Expression	4
or BIS 101V	Genes & Gene Expression	
BIS 102	Structure & Function of Biomolecules	3
BIS 103	Bioenergetics & Metabolism	3
FST 100A	Food Chemistry	4
FST 100B	Food Properties	4
FST 101A	Food Chemistry Laboratory	3
FST 101B	Food Properties Laboratory	2

EBS 135	Bioenvironmental Engineering	4
EBS 161	Kinetics & Bioreactor Design	4
ECH 160	Fundamentals of Biomanufacturing	3
ENG 180	Engineering Analysis	4

### Suggested Advisors

G. Bornhorst, J. de Moura Bell, I. Donis-Gonzalez, T. Jeoh, N. Nitin, Z. Pan, D. Slaughter

### Lead Undergraduate Advisor

S. Vougioukas

Students graduating with a B.S. degree in Biological Systems Engineering from UC Davis are prepared to:

- Apply life sciences in engineering at the biochemical, cellular, organism, and macro levels.
- Solve biological systems engineering problems while employed in the private or public sector.
- Consider the environmental, economic, and social consequences of their engineering activities.
- Communicate effectively with professional colleagues and public constituencies.

- Act in an ethical manner.
- Continue their education to adapt and thrive in a changing professional world.

## **Biological Systems Engineering, Bachelor of Science/Master of Science Integrated**

College of Engineering

### **The Graduate Program in Biological Systems Engineering**

Integrated B.S./M.S., in Biological Systems Engineering

Graduate students in Biological Systems Engineering focus on finding economically and environmentally sustainable solutions to many of the most important global issues of our time—the safety, security and abundance of our food, detection of pathogens, development of bioenergy and other sustainable energy systems, control of insect-borne disease and damage, as well as the preservation of our land, air and water resources.

We enjoy the strategic advantage of being located in California, the national leader in agricultural production and crop diversity, and a major center for biotechnology. With the unique status of belonging to both the College of Engineering and the College of Agricultural & Environmental Sciences, the program benefits from a wide diversity of collaborations across multiple disciplines. We interact with colleagues in both engineering and the life sciences to create multidisciplinary approaches to our teaching and research. Students benefit from this dynamic environment that combines the strengths of nationally ranked engineering, agricultural and environmental programs.

Financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

#### **Degree Requirements & Program Coordinator**

See Biological Systems Engineering (<https://grad.ucdavis.edu/programs/gbse/>).

### **Research Highlights**

- Automation & Control
- Bioenvironmental engineering
- Renewable energy
- Industrial biotechnology
- Food safety
- Biosensors
- Bioprocess engineering
- Bioinstrumentation
- Ergonomics, health & safety
- Aquacultural engineering
- Ecological systems engineering
- Food engineering
- Forest & fiber engineering
- Postharvest engineering
- Remote sensing

- Robotics & autonomous systems
- Soil and water engineering
- Machine systems and precision agriculture

### **Research Facilities & Partnerships**

- Agricultural Ergonomics Research Center
- Fish Conservation & Culture Laboratory
- GIS Visualization Lab
- Energy & Efficiency Institute
- Bodega Marine Lab
- Western Center for Agricultural Equipment

Complete information is available on the departmental website (<https://bae.ucdavis.edu/graduate/>).

## **Biological Systems Engineering, Master of Engineering**

College of Engineering

### **The Graduate Program in Biological Systems Engineering**

M. Engr. in Biological Systems Engineering

Graduate students in Biological Systems Engineering focus on finding economically and environmentally sustainable solutions to many of the most important global issues of our time—the safety, security and abundance of our food, detection of pathogens, development of bioenergy and other sustainable energy systems, control of insect-borne disease and damage, as well as the preservation of our land, air and water resources.

## Energy Efficiency, Minor

College of Engineering

## Energy Minor Programs

There is an urgent need to develop and commercialize technologies for the sustainable conversion and use of energy. The goal of these minors is to prepare students for careers that require training in energy science and technology, efficiency, and policy. Clean technologies and green technologies including energy are some of the fastest-growing markets for new investments. Well-trained individuals in all related fields are needed to provide the level of expertise required to advance technology and policy and to satisfy national and global objectives for greater energy sustainability. The minors are designed to accommodate persons of diverse backgrounds with educational interests in areas that may include engineering, science, policy, economics, planning, and management.

### Energy Efficiency Minor

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA in the required minor courses of 2.000 or better. Only one course overlap is allowed between major and minor.

#### Minor Faculty Advisors

R. Zhang (Department of Biological & Agricultural Engineering)

#### Minor Staff Advising

The Biological & Agricultural Engineering staff advisor is available to help students create academic plans for this minor and submit minor declarations. For more information, see Undergraduate Advising.

## Energy Science & Technology, Minor

College of Engineering

### Energy Minor Programs

There is an urgent need to develop and commercialize technologies for the sustainable conversion and use of energy. This minor prepares students for careers that require training in energy science and technology, efficiency, and policy. Clean technologies and green technologies including energy are some of the fastest-growing markets for new investments. Well-trained individuals in all related fields are needed to provide the level of expertise required to advance technology and policy and to satisfy national and global objectives for greater energy sustainability. The minor accommodates persons of diverse backgrounds with educational interests in areas that may include engineering, science, policy, economics, planning, and management.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA in the required minor courses of 2.000 or better. Only one course overlap is allowed between major and minor.

#### Minor Faculty Advisors

M. S. Ahamed (Department of Biological & Agricultural Engineering)

## Minor Staff Advising

The Biological & Agricultural Engineering staff advisor is available to help students create academic plans for this minor and submit minor declarations. More information can be found on the departmental website (<https://bae.ucdavis.edu/undergraduate/undergraduate-advising/>).

Code	Title	Units
<b>Required Courses:</b>		<b>8</b>
ENG 105 or ECH 152B	Thermodynamics Chemical Engineering Thermodynamics	
ENG 188	Science & Technology of Sustainable Power Generation	
<b>Elective Courses; choose 12 units:</b>		<b>12</b>
ABT/HYD 182	Environmental Analysis Using GIS	
ARE/ESP 175	Natural Resource Economics	
ATM 116	Modern Climate Change	
EBS 161	Kinetics & Bioreactor Design	
ECH 158C	Plant Design Project	
ECH 161A	(Discontinued)	
ECH 161B	(Discontinued)	
ECH 161L	Bioprocess Engineering Laboratory	
ECH 166	Catalysis	
ECI 125	(Discontinued)	
ECI/ESP 163	Energy & Environmental Aspects of Transportation	
EME 161	Combustion & the Environment	
FST 123	Introduction to Enzymology	
ESP 167	Energy Policy	
PLS 101	Agriculture & the Environment	
<b>Total Units</b>		<b>20</b>

## Geographic Information Systems, Minor

### College of Agricultural & Environmental Sciences

The Department of Biological & Agricultural Engineering offers a minor in Geographic Information Systems with an emphasis on spatial analysis. This minor is ideal for students interested in information processing of spatial data related to remote sensing, land information systems, marine cartography, thematic mapping, surface modeling, environmental modeling resources management, public utility planning, emergency response, geomarketing, geotechnics, precision agriculture, archaeology, military exercises, and computer-aided design. Prerequisites include MAT 017A-MAT 017B or MAT 021A-MAT 021D and PHY 007A-PHY 007C or PHY 009A-PHY 009B. Some electives may have additional prerequisites.

All core courses (ABT 150/LDA 150, ESM 186, and ABT 181N or ABT 182) must be taken for a letter grade. Up to one elective course may be taken P/NP.

## Minor Advisors

I. Kisekka, A. Moghimi (Biological & Agricultural Engineering Department)

Code	Title	Units
<b>Required Courses:</b>		<b>13</b>
ABT/LDA 150	Introduction to Geographic Information Systems	
ESM 186	Environmental Remote Sensing	
ABT/HYD 182 or ABT 181N	Environmental Analysis Using GIS Concepts & Methods in Geographic Information Systems	
<b>Elective Courses; choose 5 units:</b>		<b>5</b>
ABT 181N	Concepts & Methods in Geographic Information Systems (If not chosen above.)	
ABT 182	Environmental Analysis Using GIS (If not chosen above.)	
ESM 108	Environmental Monitoring	
ESM 185	Aerial Photo Interpretation & Remote Sensing	
ESP 168A	Methods of Environmental Policy Analysis	
ESP 168B	Methods of Environmental Policy Evaluation	
ESP 171	Urban & Regional Planning	
ESP 179	Environmental Impact Assessment	
PLS 120	Applied Statistics in Agricultural Sciences	
STA 100	Applied Statistics for Biological Sciences	
<b>Total Units</b>		<b>18</b>

## Precision Agriculture, Minor

### College of Agricultural & Environmental Sciences

The Department of Biological & Agricultural Engineering (p. 130) offers the minor in Precision Agriculture, the latest farming concept that optimizes fertilizer, pesticide and water use, while minimizing environmental concerns.

This minor acquaints students with recent developments and their applications to agriculture, in Geographic Information Systems (GIS), Global Positioning Systems (GPS), Variable Rate Technologies (VRT), crop & soil sensors, and remote sensing. The minor prepares students for challenging positions in site-specific crop management as we enter the "information age" in agriculture.

All core courses (ABT 150/LDA 150 and ESM 186) must be taken for a letter grade. Up to one elective course may be taken P/NP.

## Minor Advisors

S.G. Vougioukas; A. Pourreza (Biological & Agricultural Engineering Department)

## Minor Staff Advising

The Biological & Agricultural Engineering staff advisor is available to help students create academic plans for this minor and submit minor declarations. For more information, see Undergraduate Advising (<https://bae.ucdavis.edu/undergraduate/undergraduate-advising/>).

## Biological Sciences

College of Biological Sciences

### Advising

1023 Katherine Esau Science Hall (formerly Sciences Lab Building); 530-752-0410; Biology Academic Success Center (BASC) (<http://basc.ucdavis.edu/>); Faculty (<https://biology.ucdavis.edu/faculty/>)

- Biological Sciences, Bachelor of Arts (p. 145)
- Biological Sciences, Bachelor of Science (p. 147)
- Biological Sciences, Minor (p. 150)
- Quantitative Biology & Bioinformatics, Minor (p. 151)

## Biological Sciences, Bachelor of Arts

College of Biological Sciences

Departments of Evolution & Ecology; Microbiology & Molecular Genetics; Molecular & Cellular Biology; Neurobiology, Physiology, & Behavior; and Plant Biology

### The Program

The Biological Sciences major is broad in concept, spanning the numerous core disciplines of biology. The Bachelor of Arts (A.B.) program includes preparatory work in mathematics, general and organic chemistry, physics, and introductory level biology, as well as upper division core classes emphasizing the breadth of biological sciences. Students in the Bachelor of Arts (A.B.) program can pursue upper division coursework outside of the biological sciences. Research and internships are encouraged.

### Career Alternatives

The degree program prepares students for admission to graduate schools or professional schools, leading to either a variety of professional health careers or further study in basic and applied areas of biology. The

program provides suitable preparation for careers in teaching, biological and biotechnological research with various governmental agencies or private companies, government regulatory agencies, environmental consulting, biological illustration and writing, pharmaceutical sales and biological/environmental law.

### Faculty Advisor

Lesilee Rose, Ph.D.

### Advising

Biology Academic Success Center (BASC) (<http://basc.ucdavis.edu/>) in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410.

### Teaching Credential Subject Representative

Associate Director of Teacher Education (School of Education); see the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

### Bodega Marine Laboratory Program

Students interested in Marine Biology should visit Marine & Coastal Science Major (p. 216) & Bodega Marine Laboratory (<http://bml.ucdavis.edu/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Biological Sciences Bachelor of Arts is 76.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
<i>Biological Science</i>		<b>15</b>
BIS 002A & BIS 002B & BIS 002C	Introduction to Biology: Essentials of Life on Earth and Introduction to Biology: Principles of Ecology & Evolution and Introduction to Biology: Biodiversity & the Tree of Life	
<i>Chemistry</i>		
Choose the 002 or 004 series: <sup>1</sup>		<b>10</b>
CHE 002A & CHE 002B	General Chemistry and General Chemistry	
CHE 004A & CHE 004B	General Chemistry for the Physical Sciences & Engineering and General Chemistry for the Physical Sciences & Engineering	
Choose the 008 or 118 series: <sup>2</sup>		
CHE 008A & CHE 008B	Organic Chemistry: Brief Course and Organic Chemistry: Brief Course	
CHE 118A & CHE 118B & CHE 118C	Organic Chemistry for Health & Life Sciences and Organic Chemistry for Health & Life Sciences and Organic Chemistry for Health & Life Sciences	
<i>Mathematics</i>		
Choose the 017 or 021 series: <sup>3</sup>		<b>8</b>
MAT 017A & MAT 017B	Calculus for Biology & Medicine and Calculus for Biology & Medicine	

MAT 021A & MAT 021B	Calculus and Calculus	PLB 111	Plant Physiology
<i>Physics</i>		PLB 112	Plant Growth & Development
Choose the 001 or 007 series:	6-12	PLB 113	Molecular & Cellular Biology of Plants
PHY 001A & PHY 001B	Principles of Physics and Principles of Physics	PLB/PLS 116	Plant Morphology & Evolution
PHY 007A & PHY 007B & PHY 007C	General Physics and General Physics and General Physics	PLB/MCB 126	Plant Biochemistry
<i>Recommended</i>		<i>Laboratory Requirement</i>	
<i>Chemistry</i>		Choose course(s) for a minimum total of six hours/week of laboratory or field work from the list of courses below:	
CHE 002C or CHE 004C	General Chemistry General Chemistry for the Physical Sciences & Engineering	EVE 110	Running, Swimming & Flying
<i>Mathematics</i>		EVE 140	Paleobotany
MAT 017C or MAT 021C	Calculus for Biology & Medicine Calculus	EVE/ENT 180A	Experimental Ecology & Evolution in the Field
Preparatory Subject Matter Subtotal	45-57	EVE/ENT 180B	Experimental Ecology & Evolution in the Field
<i>Depth Subject Matter</i>		MCB 185	Computer Programming for Biologists
<i>Biological Science</i>		MIC 103L	Introductory Microbiology Laboratory
BIS 101 or BIS 101V	Genes & Gene Expression Genes & Gene Expression	NPB 100L	Neurobiology Laboratory
BIS 105 or BIS 102 & BIS 103	Biomolecules & Metabolism Structure & Function of Biomolecules and Bioenergetics & Metabolism	NPB 101L	Systemic Physiology Laboratory
		NPB 121L	Physiology of Reproduction Laboratory
		NPB 123/APC 100	Comparative Vertebrate Organology
		PLB/EVE 117	Plant Ecology
		PLB/EVE 119	Population Biology of Invasive Plants & Weeds
		Other courses with approval of the faculty advisor.	
<i>Statistics</i>		Choose one with six hours lab or field work/week; a course may fulfill both the lab and a depth topic requirement:	
STA 100 or STA 013 or STA 013Y	Applied Statistics for Biological Sciences Elementary Statistics Elementary Statistics	BIS 180L	Genomics Laboratory
<i>Evolution</i>		EVE 105	Phylogenetic Analysis of Vertebrate Structure
EVE 100	Introduction to Evolution	EVE 106	Mechanical Design in Organisms
<i>Ecology</i>		EVE 112L	Biology of Invertebrates Laboratory
ESP 100 or EVE 101	General Ecology Introduction to Ecology	EVE 114	Experimental Invertebrate Biology
<i>Microbiology</i>		EXB 106L/ CHA 101L	Human Gross Anatomy Laboratory
Choose one: MIC 102 MMG 162 MMG 170 or MIC 162 DISC	3-4	MIC 104L	General Microbiology Laboratory
		MIC 105L	Microbial Diversity Laboratory
		MCB 120L	Molecular Biology & Biochemistry Laboratory
		MCB 140L	Cell Biology Laboratory
		MCB 160L	Principles of Genetics Laboratory
		NPB 141P	(Discontinued)
		PLB/PLS 102	(Discontinued)
		PLB 105	Developmental Plant Anatomy
		PLB/EVE 108	(Discontinued)
		PLB/PLS 116	Plant Morphology & Evolution
		PLB/PLP 148	Introductory Mycology
		Other courses with approval of the Faculty Advisor.	
<i>Animal Physiology, Behavior or Development</i>		Depth Subject Matter Subtotal	31-41
Choose one: BIS 104 MCB 150 NPB 100 NPB 101 NPB 102 NPB 107 NPB 141	3-5	Total Units	76-98
<i>Plant Physiology or Development:</i>			
Choose one: PLB 105	3-5		

1

With BASC advisor approval, this combination also satisfies the Chemistry requirement: CHE 004A-CHE 002A (3 units w/no lab)-CHE 002B.

2

With BASC advisor approval, this combination also satisfies the Organic Chemistry requirement: CHE 118A-CHE 008B.

3

With BASC advisor approval, this combination also satisfies the Mathematics requirement: MAT 021A-MAT 017B; MAT 017A-MAT 021B.

## Biological Sciences, Bachelor of Science

### College of Biological Sciences

Departments of Evolution & Ecology; Microbiology & Molecular Genetics; Molecular & Cellular Biology; Neurobiology, Physiology, & Behavior; and Plant Biology

## The Program

The Biological Sciences major is broad in concept, spanning the numerous core disciplines of biology. The Bachelor of Science (B.S.) program includes preparatory work in mathematics, general and organic chemistry, physics, and introductory level biology, as well as upper division core classes emphasizing the breadth of biological sciences. Students in the B.S. degree program complete additional upper division biology coursework, for which they can choose classes from a variety of different areas such as molecular biology and genetics, animal behavior, plant growth and development, bioinformatics, marine biology, forensics, and microbiology research and internships are encouraged.

### Career Alternatives

The degree program prepares students for admission to graduate schools or professional schools, leading to either a variety of professional health careers or further study in basic and applied areas of biology. The program provides suitable preparation for careers in teaching, biological and biotechnological research with various governmental agencies or private companies, government regulatory agencies, environmental consulting, biological illustration and writing, pharmaceutical sales and biological/environmental law.

## Biological Sciences, Minor

### College of Biological Sciences

The Biological Sciences minor provides an opportunity for students in programs outside of the College of Biological Sciences to complement their studies with a concentration in biology. Students in the minor experience the breadth of biology by taking courses in five core areas: molecular biology/biochemistry, animal biology, plant biology, microbiology and ecology/evolution.

Departments of Evolution & Ecology; Microbiology & Molecular Genetics; Molecular & Cellular Biology; Neurobiology, Physiology, & Behavior; and Plant Biology

### Faculty Advisor

Lesilee Rose, Ph.D.

### Advising

Information on the Biological Sciences major or minor can be obtained at the Biology Academic Success Center (BASC) (<http://basc.ucdavis.edu/>) in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410.

### Restrictions

A course can only be used once to fulfill minor requirements if it can be used to fulfill more than one group. Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

Code	Title	Units
Complete at least 3 units from each of the five numbered groups to total at least 18 units. Appropriate alternative courses may be used with approval of the faculty advisor.		
1) Genetics, Molecular Biology or Biochemistry		
BIS 101 or BIS 101V	Genes & Gene Expression Genes & Gene Expression	18
BIS 102	Structure & Function of Biomolecules	
BIS 105	Biomolecules & Metabolism	
2) Animal Physiology, Behavior or Development		
EVE 107	Animal Communication	
MCB 150	Developmental Biology	
NPB 100	Neurobiology	
NPB 101	Systemic Physiology	
NPB 102	Animal Behavior	
NPB 107	Cell Signaling in Health & Disease	

NPB 117	Avian Physiology
NPB 123/APC 100	Comparative Vertebrate Organology
NPB 141	(Discontinued)
3) Microbiology	
MIC 102	Introductory Microbiology
MMG 162	General Virology or MIC 162 DISC
MMG 170	Yeast Molecular Genetics or MIC 170 DISCONTINUED
PLP/PLB 148	Introductory Mycology
4) Plant Biology	
PLB 105	Developmental Plant Anatomy
PLB 111	Plant Physiology
PLB 112	Plant Growth & Development
PLB 113	Molecular & Cellular Biology of Plants
PLB/PLS 116	Plant Morphology & Evolution
PLB/MCB 126	Plant Biochemistry
5) Evolution & Ecology	
BIS 122	Population Biology & Ecology
ESP 100	General Ecology
EVE 100	Introduction to Evolution
EVE 101	Introduction to Ecology
EVE 105	Phylogenetic Analysis of Vertebrate Structure
EVE 112	Biology of Invertebrates
EVE 115	Marine Ecology
EVE 131	Human Genetic Variation & Evolution
EVE 138	Ecology of Tropical Latitudes
EVE 140	Paleobotany
EVE 147	Biogeography
PLB/PLS 102	(Discontinued)
PLB/EVE 108	(Discontinued)
PLB/EVE 117	Plant Ecology
PLB/EVE 119	Population Biology of Invasive Plants & Weeds
PLB 143	Evolution of Crop Plants
PLB/PLP 148	Introductory Mycology
Additional courses (if necessary) from above numbered groups to reach 18 units.	
<b>Total Units</b>	<b>18</b>

quantitative approaches, and develop the interdisciplinary perspective that is now the foundation of modern biological research and training.

The minor in Quantitative Biology & Bioinformatics is open to all undergraduates regardless of major and is sponsored by the College of Biological Sciences.

## Faculty Advisor

Mark Goldman, Ph.D.

## Advising

Biology Academic Success Center (BASC) (<https://basc.biology.ucdavis.edu/>) in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410

Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

Code	Title	Units
<b>Core Courses</b>		
<i>Programming</i>		
Choose one:		0-4
ECS 032A	Introduction to Programming	
or ECS 032AV	Introduction to Programming	
ECS 036A	Programming & Problem Solving	
<b>OR the equivalent.</b>		
The programming requirement may be satisfied by previous experience and therefore may not entail college course credit. Please see your minor advisor for this determination and its possible impact on your unit requirements for the minor.		
<i>Quantitative Biology</i>		
BIS/MAT 107	Probability & Stochastic Processes with Applications to Biology <sup>1</sup>	4
or MAT 124	Mathematical Biology	
NOTE: BIS 107 (same as MAT 107) has a prerequisite of BIS 027A/MAT 027A (preferred) or MAT 022A; MAT 124 has a prerequisite of MAT 027A & MAT 027B (preferred) or MAT 022A & MAT 022B.		
<i>Bioinformatics</i>		
ECS 124	Theory & Practice of Bioinformatics	4
or ECS 129	Computational Structural Bioinformatics	
<b>Core Courses Subtotal</b>		<b>8-12</b>
<b>Quantitative &amp; Computational Preparation</b>		
Choose one:		4
BIS/MAT 107	Probability & Stochastic Processes with Applications to Biology <sup>1</sup>	
BIM 105	Probability & Data Science for Biomedical Engineers	
ECS 122A	Algorithm Design & Analysis	
ECS 130	Scientific Computation	
ECS 165A	Database Systems	
ECS 171	Machine Learning	
MAT 128A	Numerical Analysis	
MAT 128B	Numerical Analysis in Solution of Equations	

## Quantitative Biology & Bioinformatics, Minor

### College of Biological Sciences

The interdisciplinary minor in Quantitative Biology & Bioinformatics is an integrative program that introduces students to the quantitative and computational approaches that are redefining all disciplines in the biological sciences, from molecular and cell biology, through genetics and physiology, to ecology and evolutionary biology. Students in this minor will learn research tools that apply mathematical and computational methods, increase their insight into the strengths and limitations of

MAT 128C	Numerical Analysis in Differential Equations	
MAT 135A	Probability	
STA 101	Advanced Applied Statistics for the Biological Sciences	
STA 108	Applied Statistical Methods: Regression Analysis	
STA 130A	Mathematical Statistics: Brief Course	
STA 131A	Introduction to Probability Theory	
STA 141A	Fundamentals of Statistical Data Science	
NOTE: BIS 107 (same as MAT 107) has a prerequisite of BIS 027A/MAT 027A (preferred) or MAT 022A; MAT 124 has a prerequisite of MAT 027A & MAT 027B (preferred) or MAT 022A & MAT 022B.		
Quantitative & Computational Preparation Subtotal		4
<b>Restricted Electives</b>		
Complete two or more from the following list to achieve a total of 18-26 units:		5-10
BIS 134	(Discontinued) <sup>2</sup>	
BIS 180L	Genomics Laboratory	
BIS 181	Comparative Genomics	
BIS 183	Functional Genomics	
BIM 102	Cellular Dynamics	
BIM 140	Protein Engineering	
BIM 141	Cell & Tissue Mechanics	
BIT 150	Applied Bioinformatics	
EVE 102	Population & Quantitative Genetics	
EVE 103	Phylogeny, Speciation & Macroevolution	
EVE 104	Community Ecology	
EVE 175	Computational Genetics	
MIC 105	Microbial Diversity	
MIC 117	(Discontinued)	
MCB 123	Behavior & Analysis of Enzyme & Receptor Systems	
MCB 143	Cell & Molecular Biophysics	
MCB 182	Principles of Genomics	
NPB 166	Math Tools for Neuroscience	
NPB 167	Computational Neuroscience	
ESP 121	Population Ecology	
or WFC 122	Population Dynamics & Estimation	
Restricted Electives Subtotal		5-10
Total Units		18-26

1

BIS 107 can only be used to fulfill either the Quantitative Biology Core requirement or the Quantitative & Computational Preparation requirement, not both.

2

BIS 134 has been discontinued; course is now listed as SSB 134.

Marc Facciotti, Ph.D., Vice Chair for Education

Biomedical engineers are change-agents who work to improve people's health and lives. At UC Davis, our students, faculty and staff make a real difference in the world. Here in the Department of Biomedical Engineering, our research and teaching apply engineering and life-science principles and techniques to solving medical challenges, which translate groundbreaking engineering discoveries into positive, clinical and personal changes for patients. Our amazing students, faculty and staff create better, faster and more accurate ways to tackle health challenges like cancer and heart disease, repair and regenerate body tissues and design life-saving tools like vaccines. Our work is all about collaboration: between students and faculty, between researchers and staff, and between our university and our community. Collaboration is one of the things that makes our department – and UC Davis – so unique. We encourage you to connect with us!

- Biomedical Engineering, Minor (p. 155)
- Medical Device Development, Master of Engineering (p. 156)

## Biomedical Engineering, Bachelor of Science

College of Engineering

### The Biomedical Engineering Undergraduate Major

The Biomedical Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) under the commission's General Criteria and Program Criteria for Bioengineering and Biomedical and Similarly Named Engineering Programs.

Biomedical engineering is an interdisciplinary field of study that integrates knowledge of engineering principles with the biomedical sciences. It is a very diverse field with biomedical engineers working in areas ranging from medical imaging to regenerative medicine. Some major contributions of Biomedical Engineering include the left ventricular assist device (LVAD), artificial joints, hemodialysis, bioengineered skin, coronary stents, computed tomography (CT), and flexible endoscopes.

Students who choose biomedical engineering are interested in contributing to human health and quality of life, but do not routinely interact directly with patients, as do physicians. Due to the need to complete additional coursework beyond BME degree requirements, this major is not a primary route for pre-medical studies.

The mission of the BS degree program of the Department of Biomedical Engineering is to combine exceptional teaching with state-of-the-art research for the advancement of technologies and computational techniques that meet medical and societal challenges.

The educational objectives of our program are that a B.S. degree in Biomedical Engineering should prepare students to:

## Biomedical Engineering

College of Engineering

Steven George, Ph.D., Chairperson of the Department

- Be successfully engaged in their chosen career through engineering practice, academic or clinical research, healthcare, education, service, or related activities, or through the pursuit of graduate or professional degrees; and
- Contribute effectively to society through responsible professional practice, fostering of cross-disciplinary collaboration, generation of innovative solutions to problems, and continuous pursuit of knowledge for personal and technological advancement.

The biomedical engineering curriculum is designed to provide a solid interdisciplinary foundation in life and physical sciences, mathematics and engineering, while allowing for sufficient flexibility in the upper division requirements to encourage students to explore specializations within the field. Our instructional program is designed to impart knowledge of contemporary issues at the forefront of biomedical engineering research. Employment opportunities exist in industry, hospitals, academic research and teaching institutions, national laboratories, government regulatory agencies, consulting and finance. The major also provides excellent grounding in the skills necessary for graduate-level studies in engineering disciplines and biological sciences, as well as for professional studies in health (medicine, dentistry, optometry, prosthetics), business and law.

For information about graduate degree options, see Prospective Graduate Students | Biomedical Engineering. (<https://bme.ucdavis.edu/admissions/graduate-programs/>)

## Areas of Specialization

As Biomedical engineering is a broad field, specializing in a subfield of engineering can provide more in-depth expertise in a focus area. Through the judicious selection of upper division engineering and science electives, students can create this depth in one of our suggested areas of specialization or in an area of the student's choosing. One of the strengths of the UC Davis program is the flexibility to design one's own emphasis of study. These specializations are neither required nor degree-notated.

### Biomechanics

This is a broad subfield that includes orthopedic/rehabilitation engineering and the study of mechanical forces produced by biological systems. This subfield helps us understand the fluid dynamics of blood flow and the forces acting on tissue in the artery allowing us to design better cardiovascular interventional devices. This field involves a more intensive study of mechanics, dynamics and thermodynamics.

### Cellular & Tissue

The cellular and tissue specialization applies biomedical engineering principles to control behavior at the gene, protein, cell, and tissue level. Engineers in this area work with cellular therapies, protein production, gene therapy, tissue engineering and regeneration, and biomaterials development. This subfield draws heavily from the chemical and biological sciences and can involve studying biomedical transport, natural or synthetic biomaterials, pharmacokinetics and pharmacodynamics.

### Imaging

Visualizing anatomical structure, physiological processes, metabolic activity and molecular expression in living tissues is essential for the diagnosis of disease, development of new therapeutics, evaluation of the response to therapeutics, and guidance of interventional procedures. An imaging biomedical engineer can develop instruments for imaging, create algorithms for three-dimensional reconstruction of imaging data, and generate new contrast agents to enhance image quality. Our program

has a particular strength in molecular imaging, which involves detecting molecular-scale events within living systems. Depending upon your area of interest, the imaging specialization can require further study in electronics, signal processing, chemistry or computer programming.

### Medical Devices

Biomedical engineers can develop devices, instruments and implants ranging from the nano- to macro-scale that can be used in the diagnosis, treatment or prevention of disease. This involves combining technologies like pharmaceuticals, electronics and mechanical devices to develop combination medical treatments.

### Systems & Synthetic Biology

In systems and synthetic biology, students apply engineering principles to better understand, design and build biological systems at the cellular level. They integrate cellular, biochemical, genetic, electromechanical and computational approaches in their work, which can be applied to health and other applications. Systems and synthetic biology specialists can build engineered or artificial cells for fighting cancer or antibiotic resistance, improve tissue engineering and drug production approaches and study how complex and dynamic molecular systems control cellular behavior.

### Pre-Medical Student

As engineering is playing an increasing role in the practice of medicine, students can focus on the intersection of engineering and medicine for future careers as physician-scientists. Please note that to meet admission requirements for medical school, students must complete extra coursework in addition to the listed Department of Biomedical Engineering Curriculum Requirements.

### Graduate Programs in Biomedical Engineering

Doctoral and Master of Science degrees in Biomedical Engineering are offered through the interdisciplinary Graduate Group in Biomedical Engineering; see Biomedical Engineering Graduate Group. (<https://bmegg.ucdavis.edu/>)

Biomedical Engineering also offers a Master of Engineering in Medical Device Development; see Master of Engineering in Medical Device Development | Biomedical Engineering (<https://bme.ucdavis.edu/graduate/medical-device/>).

## Major Advisors

Andrew Cones, Marquis Aaron

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Biomedical Engineering Bachelor of Science is 158.

Code	Title	Units
<b>Lower Division Required Courses</b>		
MAT 021A	Calculus	4
MAT 021B	Calculus	4
MAT 021C	Calculus	4

## Biomedical Engineering, Minor

### College of Engineering

The minor in Biomedical Engineering is restricted to enrolled College of Engineering students. The intent is to build upon the existing core strengths in other engineering majors by adding expertise in biomedical applications. This additional training makes students more attractive to employers in the medical device industry, and positions students for graduate training in health related applications of engineering.

The minor requires two life sciences courses not typically required for engineering students, one at the cellular level (BIM 102) and the other at the physiological level (NPB 101 or BIM 116). The remaining 12 units are to be selected in consultation with an advisor from this list of upper division Biomedical Engineering courses. Students will be advised to select courses that complement their existing curricula.

## Minor Advisors

Andrew Cones, Marquis Aaron, Dr. Jennifer Choi

Successful completion of the minor requires the following:

- Completing 21 units of minor coursework; all courses must be taken for a letter grade.
- Minimum overall GPA of 2.000 and no grade lower than a C- for coursework completed in the minor.
- No more than one course can be counted towards both the student's major and the minor.

Code	Title	Units
<i>Required Courses</i>		
NPB 101 or BIM 116	Systemic Physiology Quantitative Physiology	5
BIM 102	Cellular Dynamics	4
<i>Elective Courses</i>		
Choose 12 units from upper division BIM courses, in consultation with the academic advisor.		12

## Medical Device Development, Master of Engineering

College of Engineering

### Graduate Study

The Master of Engineering (M.Eng.) in Medical Device Development is a cutting-edge program that promises to accelerate the career development of aspiring engineers in all disciplines who wish to pivot into the exciting field of medical devices.

This intensive and focused nine-month graduate program provides students a carefully crafted curriculum and hands-on opportunities to develop new skills in medical product development, business and

leadership, device fabrication and the engineering design process. Students will have direct access to state-of-the-art technology at the TEAM Lab at Aggie Square, UC Davis' Sacramento-based innovation hub, and interact with experts at the Graduate School of Management, School of Medicine and throughout the health sciences community.

### Preparation

No restrictions exist on the major, but applicants are expected to possess aptitude and interest in engineering and careers in medical device development. The most competitive applicants will have an undergraduate degree in engineering or closely related STEM field. Applicants are expected to have satisfactorily completed (minimum of grade C or equivalent) the equivalent of the following UC Davis courses: 1 year (3 quarters or 2 semesters) of Physics (UC Davis Equivalent PHY 009A, PHY 009B, and PHY 009C), Mathematics through differential Calculus (UCD Equivalent MAT 022B), Minimum of two advanced (junior or senior-level) engineering topics; e.g., mechanics, thermodynamics, transport phenomena. Course work deficiencies (e.g. missing prerequisites) should be completed by taking equivalent courses or equivalent online certification courses by the end of the first quarter by earning a letter grade of "B" or better.

### Degree Requirements & Program Coordinator

See Medical Device Development (<https://grad.ucdavis.edu/programs/gmdd/>).

### Courses

See Biomedical Engineering (BIM) (p. 629) & Medical Device Development (MDD).

## Biomedical Engineering (Graduate Group)

College of Engineering

Blaine Christiansen, Ph.D., Chairperson of the Group

### Group Office

2306B Genome & Biomedical Sciences Facility; 530-752-2611; Biomedical Engineering Graduate Group (<https://bmegg.ucdavis.edu/>); Faculty (<https://bmegg.ucdavis.edu/faculty/>)

### Mission

The mission of the Biomedical Engineering Graduate Group (BMEGG) is to provide the highest standard of student education, research, and service in the area of biomedical engineering. The multidisciplinary character of biomedical engineering and operation of the program as a graduate group offers unique opportunities to fulfill this mission. The educational mission is served by capitalizing on the expertise of faculty from diverse disciplines to develop a curriculum focusing on the application of engineering principles to medicine and biology. The research mission of the program is to encourage and support collaborative research designed to produce new knowledge about fundamental mechanisms in the life sciences and to bond basic and clinical research to provide new knowledge for improving health care by way of device development and innovative medical technology.

### Graduate Study

The program of study in biomedical engineering leads to an MS and/or a PhD and is intended to prepare students for professional work in

the effective integration of engineering with the biological and medical sciences, including the modeling of biological systems and the design of devices and procedures useful for human and veterinary medicine. The program is designed to provide sufficient flexibility to meet both the needs and interests of individual students and the changes of emphasis in this new and rapidly growing field. While assuring competence in engineering and biological sciences, the program is intended to meet the conflicting demands for flexibility, breadth and depth of training, and limitation of training time. The program is designed to give each student adequate exposure to analysis, design, experimentation, and communication.

## **Preparation**

The BMEGG curriculum requires strong competence in mathematics, engineering, and biology for successful completion of study. Prior course work in these areas is emphasized in the evaluation of applications, though some undergraduate training can be acquired after admission to the BMEGG. See Academic Preparation (<https://bmeegg.ucdavis.edu/academic-preparation/>) for additional information.

## **Advising**

See BMEGG Advising & Administration (<https://bmeegg.ucdavis.edu/advising-administration/>).

- Biomedical Engineering, Doctor of Philosophy (p. 157)
- Biomedical Engineering, Master of Science (p. 157)

College of Engineering

## **Graduate Study**

The Biomedical Engineering Graduate Group (BMEGG) offers programs of study and research leading to M.S. and Ph.D. degrees. The programs of study prepare students for professional work in the effective integration of engineering with medical and biological sciences. Research strengths lie in the areas of: biomaterials & devices; biomechanics & mechanobiology; biomedical imaging & biophotonics; computational & synthetic biology; engineering education; molecular, cellular & tissue engineering; and neuroengineering & bioelectricity. Each student, together with an advisor, defines a specific course of study suited to individual goals.

# **Biophysics, Doctor of Philosophy**

Graduate Studies

## **Graduate Study**

The Biophysics Graduate Group offers a program leading to a Ph.D. degree in biophysics. The interdisciplinary program prepares students to conduct independent research at the interface of physics, chemistry, and biology. Students employ advanced quantitative research methods and models to explore biophysical mechanisms in living systems. Faculty members have particular research interests in physical biology of the cell, structural biology, computational biology, membrane mechanics, systems and synthetic biology, mechanisms of catalysis and energy transduction, neuroscience, and imaging. Students choose from the broad biophysics

research venues a research laboratory that matches their interests and career goals

**The Master of Sciences degree is offered only en route to the Ph.D.**

Danielle Harvey, Ph.D. (Public Health Sciences), Chairperson of the Group

### About

The Graduate Group in Biostatistics offers M.S. and Ph.D. programs in Biostatistics.

- Biostatistics, Master of Science (p. 158)
- Biostatistics, Doctor of Philosophy (p. 158)

## Biostatistics, Master of Science

### Graduate Studies

### Graduate Study

Biostatistics is a field of science that uses quantitative methods to study life sciences related problems that arise in a broad array of fields. The program provides students with, first, solid training in the biostatistical core disciplines and theory; second, with state-of-the art knowledge and skills for biostatistical data analysis; third, substantial exposure to the biological and epidemiological sciences; and fourth, with a strong background in theoretical modeling, statistical techniques and quantitative as well as computational methods. Programs of study and research are offered leading to M.S. and Ph.D. degrees. The program prepares students for interdisciplinary careers ranging from bioinformatics, environmental toxicology and stochastic modeling in biology and medicine to clinical trials, drug development, epidemiological and medical statistics. The program draws on the strengths of the Biostatistics faculty at UC Davis.

### Preparation

Students should have one year of calculus; a course in linear algebra or one year of biological course work; facility with a programming language; and upper division work in at least one of Mathematics, Statistics and Life Sciences.

### Degree Requirements & Program Coordinator

See Biostatistics (<https://grad.ucdavis.edu/programs/gbst/>).

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering (p. 161) and Biochemical Engineering (p. 159).

### Mission Statement

To advance through teaching and research programs, the frontiers of chemical engineering and biochemical engineering; to educate students with a sense of professionalism and community; and to serve the public of California through outreach efforts.

Our faculty forms the cornerstone of this education and research mission, preparing students for careers in fields that have tremendous impact on key areas of modern life: energy, biotechnology and nanotechnology.

- Biochemical Engineering, Bachelor of Science (p. 159)
- Chemical Engineering, Bachelor of Science (p. 161)
- Chemical Engineering, Master of Engineering (p. 162)
- Chemical Engineering, Master of Science (p. 163)
- Chemical Engineering, Doctor of Philosophy (p. 163)

# Biochemical Engineering, Bachelor of Science

## College of Engineering

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering (p. 161) and Biochemical Engineering (p. 159).

## Biochemical Engineering Undergraduate Program

The Biochemical Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) under the commission's General Criteria and Program Criteria for Chemical, Biochemical, Biomolecular, and Similarly Named Engineering Programs.

As the biotechnology industry expands and matures, there is an increasing need for engineers who can move products from the research stage to large-scale manufacturing. As they fill this need, engineers must also understand the production, purification, and regulatory issues surrounding biopharmaceutical manufacturing.

Biochemical engineers—with their strong foundations in chemistry, biological sciences, and chemical process engineering—are in a unique position to tackle these problems. Biochemical engineers apply the principles of cell and molecular biology, biochemistry, and engineering to develop, design, scale up, optimize, and operate processes that use living cells, organisms, or biological molecules for the production and purification of products (such as monoclonal antibodies, vaccines, therapeutic proteins, antibiotics, and industrial enzymes); for health and/or environmental monitoring (such as diagnostic kits, microarrays, biosensors); or for environmental improvement (such as bioremediation). An understanding of biological processes is also becoming increasingly important in the industries that traditionally employ chemical engineers, including the industries that process materials, chemicals, foods, energy, fuels, and semiconductors.

## Objectives

We educate students in the fundamentals of chemical and biochemical engineering, balanced with the application of these principles to practical problems; educate students as independent, critical thinkers who can also function effectively in a team; prepare students with a sense of community, ethical responsibility, and professionalism; prepare students for careers in industry, government, and academia; teach students the necessity for continuing education and self-learning; and foster proficiency in written and oral communications.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

## Honors Program

An Honors Program is available to qualified students in the Chemical Engineering & Biochemical Engineering majors. It is a two-year program designed to challenge the most talented students in these majors. Students are invited to participate in their sophomore year. In the upper division coursework, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade

point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Biochemical Engineering Bachelor of Science is 161.

Code	Title	Units
<b>Lower Division Required Courses</b>		
<i>Mathematics</i>		
MAT 021A	Calculus	4
MAT 021B	Calculus	4
MAT 021C	Calculus	4
MAT 021D	Vector Analysis	4
MAT 022A	Linear Algebra	3-4
or MAT 027A	Linear Algebra with Applications to Biology	
or BIS 027A	Linear Algebra with Applications to Biology	
MAT 022B	Differential Equations	3-4
or MAT 027B	Differential Equations with Applications to Biology	
or BIS 027B	Differential Equations with Applications to Biology	
<i>Physics</i>		
PHY 009A	Classical Physics	5

# Chemical Engineering, Bachelor of Science

## College of Engineering

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering (p. 161) and Biochemical Engineering (p. 159).

## Chemical Engineering Undergraduate Program

The Chemical Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) under the commission's General Criteria and Program Criteria for Chemical, Biochemical, Biomolecular, and Similarly Named Engineering Programs.

Chemical engineers apply the principles of chemistry and engineering to produce useful commodities, ranging from fuels to polymers. Chemical engineers are increasingly concerned with chemical and engineering processes related to the environment and food production. They work in diverse areas ranging from integrated circuits to integrated waste management. Preparation for a career in chemical engineering requires an understanding of both engineering and chemical principles to develop proficiency in conceiving, designing, and operating new processes.

The chemical engineering curriculum has been planned to provide a sound knowledge of engineering and chemical sciences so that you may achieve competence in addressing current and future technical problems.

## Objectives

The objectives of the program in Chemical Engineering are to educate students in the fundamentals of chemical engineering, balanced with the application of these principles to practical problems; to train them as independent, critical thinkers who can also function effectively in teams; to foster a sense of community, ethical responsibility, and professionalism; to prepare them for careers in industry, government, and academia; to illustrate the necessity for continuing education and self-learning; and to help students to learn to communicate proficiently in written and oral form.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

## Junior & Senior Year Options

The focus in the junior year is on fundamentals such as thermodynamics, fluid mechanics, energy transfer, and mass transfer phenomena. In the senior year, students draw these fundamentals together and apply them in a study of kinetics, process design, and process dynamics and control. The program's requirement of eight chemical engineering elective units allow students to strengthen specific areas in chemical engineering, explore new areas, or pursue new areas of specialization.

## Honors Program

An Honors Program is available to qualified students in the Chemical Engineering & Biochemical Engineering majors. It is a two-year program designed to challenge the most talented students in these majors. Students are invited to participate in their sophomore year. In the upper division coursework, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade

point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Chemical Engineering Bachelor of Science is 156.

## Chemical Engineering, Master of Engineering

College of Engineering

### Graduate Program in the Department of Chemical Engineering

The Department of Chemical Engineering is home to a top ranked graduate program in Chemical Engineering. We offer a unique environment for graduate studies- we are large enough to boast world-

renowned faculty and state-of-the-art-research facilities, yet small enough to give every graduate student personal attention.

## The Graduate Program in Chemical Engineering

M. Engr, M.S. and Ph.D.

Chemical Engineering Graduate Program (<https://che.engineering.ucdavis.edu/graduate/>); 530-752-7952

Ph.D. designated emphases are available as specializations in biotechnology, biophysics, and nuclear science.

The Chemical Engineering Graduate Program provides students with a strong grounding in the fundamentals and explores critical applications in a wide range of process systems.

Doctoral students are typically offered competitive four-year financial offers of fellowships and research/teaching assistantships which include tuition, fees, and a stipend. Financial offers are subject to satisfactory progress towards completion of degree requirements.

Major research areas include Energy, Environment, Synthetic Biology and Biotechnology.

### Degree Requirements & Program Coordinator

## Applied Chemistry, Bachelor of Science

### College of Letters & Science

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

### The Program

The Department of Chemistry offers two Bachelor of Science degree emphases under the heading of Applied Chemistry: Environmental Chemistry and Forensic Chemistry. The B.S. emphasis in Applied Chemistry falls outside of the classical chemistry degree and instead draws on significant course material from areas relevant to their particular fields. The Environmental Chemistry program provides students with tools to understand the processes governing chemical transformations in soil, air, and water, analyze key substances in the environment, and make meaningful predictions about the fates of these chemicals. The Forensic Chemistry program involves the identification and quantification of scientific evidence both in the natural environment and in urban settings, including substances sometimes available in only trace amounts.

### Career Alternatives

Environmental chemistry graduates with the bachelor's degree will be able to pursue advanced degrees in areas such as atmospheric chemistry, geochemistry, toxicology, and environmental science. They will also have access to a range of scientific careers including regulatory agencies, environmental consulting firms, and industries concerned with the environmental impacts and fates of their products. Forensic chemistry graduates will be able to pursue careers in private forensic labs as well as law enforcement and regulatory agencies at many levels, including police and sheriff's departments, district attorney crime labs, and laboratories of federal agencies including the FBI, DEA, FDA, and many others.

### Major Advisor

To contact a major advisor in the Department of Chemistry, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

### Honors & Honors Program

The student must take CHE 194HA, CHE 194HB, & CHE 194HC, and complete a capstone research project (typically a written honors thesis). For more information, see Undergraduate Research (<https://chemistry.ucdavis.edu/undergraduate/undergraduate-research/>) on the department's website.

### Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry. Detailed information

regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. Respective of the Emphasis, the minimum number of units required for the Applied Chemistry Bachelor of Science are 95 & 99.

### Environmental Chemistry Emphasis

Code	Title	Units
<b>Preparatory Subject Matter</b>		
<i>Chemistry</i>		
Choose a series:		15
CHE 002A & CHE 002B & CHE 002C	General Chemistry and General Chemistry and General Chemistry

STA 130A	Mathematical Statistics: Brief Course	
At least three additional upper division units in Chemistry (CHE) <sup>1</sup>		3
Depth Subject Matter Subtotal		51-61
<b>Total Units</b>		<b>99-115</b>

1

CHE 199 strongly encouraged. In order to enroll in CHE 199, students must first secure an undergraduate research position with a chemistry faculty member.

## Chemistry, Bachelor of Arts

### College of Letters & Science

Chemistry is the study of the composition of matter, its structure, and the means by which it is converted from one form to another.

## The Program

We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

The curriculum leading to the A.B. degree offers a substantive program in chemistry while allowing students the freedom to take more courses in other disciplines and pursue a broad liberal arts education. Students with a deeper interest in chemistry should choose one of the several programs leading to the B.S. degree.

## Career Alternatives

Chemistry graduates with bachelor's degrees are employed extensively throughout various industries in quality control, research & development, production supervision, technical marketing, and other areas. The types of industries employing these graduates include chemical, energy, pharmaceutical, genetic engineering, biotechnology, food & beverage, petroleum & petrochemical, paper & textile, electronics & computer, and environmental & regulatory agencies. The bachelor's programs also provide chemistry graduates with the rigorous preparation needed for an advanced degree in chemistry and various professional schools in the health sciences.

## Major Advisor

To contact a major advisor in the Department of Chemistry, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

## Honors & Honors Program

The student must take courses CHE 194HA, CHE 194HB, and CHE 194HC, and complete a capstone research project (typically a written honors thesis). For more information, see Undergraduate Research (<https://chemistry.ucdavis.edu/undergraduate/undergraduate-research/>).

## Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Chemistry Bachelor of Arts is 72.

## Chemistry, Bachelor of Science

### College of Letters & Science

Chemistry is the study of the composition of matter, its structure, and the means by which it is converted from one form to another.

### The Program

We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

The general B.S. degree in Chemistry is the one chemistry program offered by our department that is certified by the American Chemical Society (<http://www.acs.org/content/acs/en.html>) (ACS). Students in this program pursue a strong foundation in math and physics, in addition to chemistry, taking the higher-level sequences of all course options. This degree provides a strong foundation in experimental processes, instrumentation, and quantitative analysis. Students will be well-prepared to apply their chemistry knowledge to a wide array of applications, including environmental, pharmaceutical, materials, and industrial chemistry.

### Career Alternatives

Graduates will be able to successfully pursue their career objectives in advanced education in professional and/or graduate schools, a scientific career in government or industry, a teaching career in the school systems or other related career tracks.

### Major Advisor

To contact a major advisor in the Department of Chemistry, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

## Honors & Honors Program

The student must take courses CHE 194HA, CHE 194HB, and CHE 194HC, and complete a capstone research project (typically a written honors thesis). For more information, see Undergraduate Research (<https://chemistry.ucdavis.edu/undergraduate/undergraduate-research/>).

## Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Chemistry Bachelor of Science is 107.

## Chemistry—American Chemical Society Accredited Program

## Chemistry & Chemical Biology, Master of Science

College of Letters & Science

### Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry & Chemical Biology. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

**The Master of Science degree is offered only en route to the Ph.D.**

### Degree Requirements & Program Coordinator

See Chemistry & Chemical Biology (<https://grad.ucdavis.edu/programs/gccb/>).

## Chemistry & Chemical Biology, Doctor of Philosophy

College of Letters & Science

### Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry & Chemical Biology. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

**The Master of Science degree is offered only en route to the Ph.D.**

### Degree Requirements & Program Coordinator

See Chemistry & Chemical Biology (<https://grad.ucdavis.edu/programs/gccb/>).

## Chemical Physics, Bachelor of Science

College of Letters & Science

Chemistry is the study of the composition of matter, its structure, and the means by which it is converted from one form to another.

### The Program

We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see Academic Advising.

The B.S. degree in Chemical Physics provides students with an in-depth understanding of the fundamentals of chemistry, focusing on areas at the interface of chemistry and physics. These include, for example, the experimental measurement and theoretical calculation of the detailed properties and behavior of atoms and molecules. An important experimental tool in chemical physics is spectroscopy, which uses

conventional or laser light to probe the atomic and molecular properties of matter.

### Career Alternatives

Graduates in Chemical Physics will be prepared for employment in technology, energy, laser science, material science, solid-state chemistry, and other fields requiring a strong background in both chemistry and physics. They will also be well-suited for graduate study in a range of areas including chemistry, chemical physics, computational chemistry, material science, nanomaterials, and laser science.

### Major Advisor

To contact a major advisor in the Department of Chemistry, see Academic Advising.

### Honors & Honors Program

The student must take courses CHE 194HA, CHE 194HB, and CHE 194HC, and complete a capstone research project (typically a written honors thesis). For more information, see Undergraduate Research (<https://chemistry.ucdavis.edu/undergraduate/undergraduate-research/>).

### Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Chemical Physics Bachelor of Science is 110.

## Medicinal Chemistry & Drug Design, Bachelor of Science

College of Letters &amp; Science

Formerly Pharmaceutical Chemistry.

Chemistry is the study of the composition of matter, its structure, and the means by which it is converted from one form to another.

### The Program

We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors; see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

The B.S. in Pharmaceutical Chemistry is strongly focused on basic science while providing students with a greater understanding of the experimental and computational processes and societal

issues that surround the synthesis, discovery, and design of modern pharmaceuticals. Important relevant topics include potential drug targets, physical principles of drug action, drug synthesis & screening, computational drug design, drug delivery, and ethical concerns. The demand for pharmaceutical chemists is high and anticipated to grow, as modern chemistry allows a wide range of choices for drug synthesis and our growing knowledge of biological processes presents challenging targets for novel therapeutics.

### Career Alternatives

Graduates in Pharmaceutical Chemistry will be able to successfully pursue their career objectives in advanced education in professional and/or graduate schools and in a range of scientific careers in academia, government, or industry including the pharmaceutical, medicinal & biological sciences, medicine, pharmacy, pharmacology, and biotechnology.

### Major Advisor

To contact a major advisor in the Department of Chemistry; see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

### Honors & Honors Program

The student must take courses CHE 194HA, CHE 194HB, and CHE 194HC, and complete a capstone research project (typically a written honors thesis). For more information, see Undergraduate Research (<https://chemistry.ucdavis.edu/undergraduate/undergraduate-research/>) on the department's website.

### Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry; see also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Medicinal Chemistry & Drug Design Bachelor of Science is 97.

- Chicana/Chicano Studies, Bachelor of Arts (p. 172)
- Chicana/Chicano Studies, Minor (p. 173)

## Chicana/Chicano Studies, Bachelor of Arts

College of Letters & Science

### The Major Program

The Department of Chicana/Chicano Studies offers an interdisciplinary curriculum focusing on the Chicana/Chicano/Chicanx experience through an analysis of class, race, ethnicity, gender and sexuality, and cultural expression. The department offers a major leading to the Bachelor of Arts degree and a minor that can satisfy breadth requirements for the College of Letters and Science. Both the major and minor frame an analysis within the historical and contemporary experiences of Chicana/o/x in the Americas.

### The Program

At the lower division level, the major curriculum provides an interdisciplinary overview of various topics. Students are advised to take courses that serve as prerequisites for certain upper division courses. At the upper division level, majors pursue advanced interdisciplinary course work in both the humanities/arts and the social sciences. At this level, students will find courses in Chicana/Chicano/Chicanx history, theory, health and several courses taught from a variety of disciplinary perspectives.

### Career Alternatives

A degree in Chicana/o Studies provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including work in cross-cultural education, cultural/art centers, community development, public policy and social welfare. The interdisciplinary structure of the Bachelor of Arts degree in Chicana/o Studies also provides excellent preparation for graduate study in a variety of fields.

### Major Advisor

Alma Martinez, M.A.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Chicana/Chicano Studies Bachelor of Arts is 56.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
CHI 010	Introduction to Chicana/o Studies	4
CHI 050	Chicana & Chicano Culture	4
Choose two:		8
CHI 021	Chicana/o & Latina/o Health Care Issues	
CHI 023	Qualitative Research Methods	
CHI 030	United States Political Institutions & Chicanas/os	

CHI 040	Comparative Health: Top Leading Causes of Death	
CHI 060	Chicana & Chicano Representation in Cinema	
CHI 065	New Latin American Cinema	
CHI 070	Survey of Chicana/o Art	
CHI 073	Chicana/o Art Expression Through Silk Screen	
<b>Preparatory Subject Matter Subtotal</b>		16
<b>Depth Subject Matter</b>		
32 upper division units; from Core Group A, B, and C, a minimum of 12 units must be taken in one area and 8 units taken in the other two areas; a minimum of 4 units must be completed in Core Group D.		32
Please note that while some courses are listed in multiple groups, a given course can only fulfill one group requirement.		
<i>Group A</i>		
CHI 100	Chicana/o Theoretical Perspective	
CHI 102A	Chicana/o Feminist Theoretical Understandings of K-20 Educational Disparities	
CHI 102B	Grassroots Community Activism & Mobilization Efforts Challenging Educational Inequity	
CHI 102C	Policy & Law Challenging Segregation & Educational Inequity	
CHI 110 or CHI 110V	Sociology of the Chicana/o Experience	
CHI 111	Chicanas/Mexicanas in Contemporary Society	
CHI 112	Globalization, Transnational Migration, & Chicana/o & Latina/o Communities	
CHI 113 or CHI 113V	Latin American Women's Engagement in Social Movements	
CHI 130	Latin American Women's Engagement in Social Movements	
CHI 131	United States-Mexican Border Relations	
CHI 132	Chicanas in Politics & Public Policy	
CHI 132	Political Economy of Chicana/o Communities	
CHI 148	Decolonizing Spirit	
CHI 150	The Chicana & Chicano Movement	
CHI 181	Chicanas & Latinas in the U.S.: Historical Perspectives	
CHI 184	Latino Youth Gangs in Global Perspective	
<i>Group B</i>		
CHI 110 or CHI 110V	Sociology of the Chicana/o Experience	
CHI 112	Globalization, Transnational Migration, & Chicana/o & Latina/o Communities	
CHI 113 or CHI 113V	Latin American Women's Engagement in Social Movements	
CHI 120	Latin American Women's Engagement in Social Movements	
CHI 120	Chicana/o Psychology	

CHI 121	Chicana/o Community Mental Health	Any upper division letter-graded coursework taken abroad.
CHI 122	Psychology Perspectives Chicana/o & Latina/o Family	<i>Comparative Ethnicity/Gender</i>
CHI 123	Psychological perspectives on Chicana/o & Latina/o Children & Adolescents	Choose two upper division courses from any of the following areas: African American & African Studies (AAS) (p. 524) Asian American Studies (ASA) (p. 602) Native American Studies (NAS) (p. 1200) Gender, Sexuality & Women's Studies (GSW) (p. 917)
CHI 141	Community-Based Participatory Research & Chicana/o & Latina/o Health	
CHI 145S	Bi-National Health	
CHI 147S	Indigenous Healing & Biodiversity in Latin America	
CHI 148	Decolonizing Spirit	
<i>Group C</i>		<b>Total Units</b> 56
CHI 154	The Chicana/o Novel	
CHI 155	Chicana/o Theater	
CHI 156	Chicana/o Poetry	
CHI 157	Chicana & Chicano Narrative	
CHI 160	Mexican Film & Greater Mexican Identity	
CHI 161	Queer Latinidad	
CHI 165	Chicanas, Latinas & Mexicanas in Commercial Media	
CHI 170	Contemporary Issues in Chicano Art

- Child Development, Master of Science (p. 174)

## Child Development, Master of Science

College of Agricultural & Environmental Sciences

### Graduate Study

The Graduate Group in Child Development offers a multidisciplinary program leading to an M.S. degree. The program provides students with an opportunity to pursue a coordinated course of graduate study in the field of child development, which cuts across departmental boundaries. Students complete a practicum working with children and families, which may be in the community, as well as the University's Center for Child & Family Studies. Recipients of the degree gain sufficient background to engage in professions that directly (e.g., preschool, 4-H) or indirectly (e.g., social policy) involve children and families, obtain positions in teaching or research settings, or pursue further study leading to a doctorate in child development, human development, clinical psychology, or related fields.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 1 deadline. The final admissions deadline is March 1. For more details, see Human Development Graduate Group (<http://humandevelopment.ucdavis.edu/>).

### Degree Requirements & Program Coordinator

See Child Development (<https://grad.ucdavis.edu/programs/gchd/>).

## Cinema & Digital Media

College of Letters & Science

Jaimey Fisher, Ph.D., Chairperson of the Department; term ends June 30, 2026

### Department Office

101 Art Building; 530-752-0105; Cinema & Digital Media (<http://arts.ucdavis.edu/cinema-and-digital-media/>); Faculty (<http://arts.ucdavis.edu/cinema-digital-media-program-faculty/>)

- Cinema & Digital Media, Bachelor of Arts (p. 174)
- Film Studies, Minor (p. 176)

## Cinema & Digital Media, Bachelor of Arts

College of Letters & Science

The Cinema & Digital Media (CDM) program combines the study of audio-visual and digital media, theories about such media, and the relevant modes of artistic practice and production. CDM integrates the analysis of audio-visual and digital texts with their theoretical underpinnings and their methods of production. The program also addresses the particular impact that technology has on culture in its many forms and fields.

CDM faculty teach and research on various histories, theories, and practices of media. Current fields for teaching and research in cinema and digital media include the history and analysis of film and video, film and video production, electronic music, digital content creation and design, the digital arts, community media and activism, computer graphics, animation, and gaming—as well as the theories and politics of these various areas.

### The Program

Preparatory course work involves a solid introduction to the history, ideas and current trends in cinema and digital media. For depth subject matter, students in the major select a combination of critical studies and creative production courses. Two courses will be selected from the production/programming distribution, two from the theory/history distribution and four will be elected by the student, allowing them to take up to six production courses or six studies/theory classes, should they so choose.

### Major Advisor

Information on the current Academic Advisors can be obtained at the Arts Group Advising Center (<http://arts.ucdavis.edu/arts-group-undergraduate-advising/>) at 530-752-0616.

### Career Alternatives

Cinema & Digital Media is designed to prepare graduates to be highly adaptable analytical thinkers, collaborative, multi-skilled and current with the latest developments in media and technology. Perhaps most importantly is self-motivation: students do best when fueled by their own passions and plot their own directions, while held to very high standards. We feel this is the best education for living and working in a complex, rapidly changing world. Final research papers and creative production portfolios will provide graduate school admissions committees, employers or clients with tangible evidence of Cinema & Digital Media graduates' track records and talents.

### Course Changes

Cinema & Digital Media is working on updating all of the existing FMS, TCS, and CTS courses to the CDM course subject code. If you have any questions regarding the course subject code changes and equivalent major requirements, please contact the Arts Group Advising Center (<http://arts.ucdavis.edu/arts-group-undergraduate-advising/>) at 530-752-0616.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Cinema & Digital Media Bachelor of Arts is 60.

Code	Title	Units	
<b>Preparatory Subject Matter</b>			
Choose two:		8

  - Sustainability in the Built Environment, Minor (p. 183)

# Civil Engineering, Bachelor of Science

College of Engineering

The Civil Engineering profession is responsible for designing, building, operating and maintaining the physical infrastructure and protecting the natural environment that together support human society in an economically and environmentally sustainable manner. The need to

predict and mitigate the impact of complex human- and nature-induced stresses on large-scale, geographically-distributed systems has never been more evident than now. These challenges and inevitable societal changes result in a need to develop and adopt new technologies and improved efficiency into the infrastructure.

The Civil Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org/>) under the commission's General Criteria and Program Criteria for Civil and Similarly Named Engineering Programs.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

## **Areas of Specialization**

### **Construction Engineering & Management**

Construction engineering and management focuses on the role of civil engineers in the construction of all types of civil infrastructure. Construction engineering involves finding engineered solutions for sourcing, transporting, processing, assembling, fabricating, and testing materials and systems used to construct buildings, as well as transportation, water resources, geotechnical, and environmental infrastructure. Project management involves developing and executing plans to manage people, financial, and material resources in order to deliver projects with the correct scope, on time, within budget, and meeting engineering performance, environmental impact, and stakeholder expectations. While primarily applied to civil infrastructure projects, these principles are also applicable to many other fields.

#### **Suggested Advisors**

J. Harvey, S. Miller, J. Bolander, S. Nassiri

### **Environmental Engineering**

Environmental Engineering focuses on understanding and management of physical, chemical, and biological processes in natural and engineered systems. Areas of emphasis include improvement of air, land, and water quality in the face of increasing population, expanding industrialization, and global climate change. Examples of environmental engineering include innovative analysis and design of air, water, wastewater, and solid waste treatment systems; mathematical modeling of natural and engineered systems; life cycle analysis; sampling, analysis, transport and transformation of natural and anthropogenic pollutants; and modeling of air pollutant emissions.

#### **Suggested Advisors**

H.N. Bischel, C.E. Bronner, C. D. Cappa, R. Corsi, C. DeFinnda, A. Kendall, M.J. Kleeman, F.J. Loge, J. Pena, T.M. Young,

### **Geotechnical Engineering**

Geotechnical Engineering encompasses civil infrastructure and environmental problems that require characterization and utilization of geologic materials (soils and rocks) to develop, design, analyze and model engineered solutions. This includes, but is not limited to, foundations for buildings and bridges retaining structures, earthwork (e.g. dams, tunnels, highways), pavements, effects of earthquakes and other natural hazards (e.g. ground motions, liquefaction, soil-structure interaction, landslides, tsunamis), ground improvement methods (e.g. compaction, cement mixing), and geo-environmental problems (e.g. groundwater flow, subsurface contaminant transport and remediation).

#### **Suggested Advisors**

J.T. DeJong, M.H. Gardner, J.T. Harvey, B. Jeremic, A. Martinez, S. Nassiri, K. Ziotospoulou

### **Structural Engineering & Structural Mechanics**

Structural Engineering addresses the conception, design, analysis, construction, retrofit and modeling of all types of civil infrastructure, including buildings and bridges, dams, ports, highways, and industrial facilities subject to loadings ranging from gravity and earthquakes, to extreme environmental events, with consideration of safe, serviceable, and sustainable outcomes over the entire life-cycle. Structural Mechanics encompasses theories for solids and structures, and the associated methods of analysis, computation and materials characterization used in the practice of Structural Engineering. For both disciplines, materials of particular interest include steel, concrete, timber, advanced composites and particulate media.

#### **Suggested Advisors**

M. Barbato, J.E. Bolander, L. Cheng, J.T. Harvey, B. Jeremic, A.M. Kanvinde, S.K. Kunnath, S.A. Miller, N. Sukumar

### **Transportation Planning & Engineering**

Transportation Engineering deals with the movement of people and goods in a manner consistent with society's environmental and socio-economic goals. Transportation engineering applies engineering, physical and mathematical sciences, economics, and behavioral social science principles to plan, analyze, design, and operate resilient and sustainable transportation systems, such as highways, transit, airfields and ports. Transportation planning involves the formulation and analysis of transportation policy, program, and project alternatives. Societal goals, budgetary constraints, socio-economic (such as safety, equity and mobility) and environmental (such as air and water quality, climate change, and clean energy) objectives, and technological feasibilities (such as vehicle, infrastructure, and information technologies) are considered.

#### **Suggested Advisors**

Y. Fan, J.T. Harvey, M.A. Jaller, A. Jenn, A. Kendall, S. Nassiri, D. Sperling, K.E. Watkins, H.M. Zhang

### **Water Resources Engineering**

Water Resources Engineering includes hydrology, hydraulics, fluid mechanics, and water resources systems planning and design. Hydrology deals with quantifying and understanding all aspects of the hydrologic cycle, including the relationships between precipitation, runoff, groundwater, and surface water. Water quality and contaminant transport issues are linked to hydrologic conditions. Hydraulics and fluid mechanics deal with flows in pipes, open-channel water-distribution systems, and natural systems, such as lakes and estuaries. Water resources systems planning and design deals with the comprehensive development of water resources to meet the multiple needs of industry, agriculture, municipalities, recreation, and other activities.

#### **Suggested Advisors**

F.A. Bombardelli, A. Escriva-Bou, A.L. Forrest, J.D. Herman, M.L. Kavvas, V.L. Morales, H.J. Oldroyd, B.A. Younis

Additional information on areas of specialization and potential faculty advisors can be obtained from the departmental website.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63);

unless otherwise noted. The minimum number of units required for the Civil Engineering Bachelor of Science is 150.

Code	Title	Units	
<b>Lower Division Required Courses</b>

ENG 035	Statics	4	ECI 140B Chemical Principles for Environmental Engineers
<i>Lower Division Composition/Writing; choose one; a grade of C- or better is required:</i>		4	ECI/ATM 149N Air Pollution
COM 001	Major Works of the Ancient World		<i>Geotechnical</i>
			ECI 171 Soil Mechanics
			ECI 171L Soil Mechanics Laboratory

<b>Structures</b>		<b>Water Resources</b>
ECI 130	Structural Analysis	ECI 142 Engineering Hydrology
<i>Transportation</i>		ECI 144 Groundwater Systems Design
Choose one:		ECI 145 Hydraulic Structure Design
ECI 161	Transportation System Operations	ECI 146 Water Resources Simulation
ECI 162	Transportation Infrastructure Design	ECI 155 Water Resources Engineering Planning
ECI/ESP 163	Energy & Environmental Aspects of Transportation	<i>Civil &amp; Environmental Engineering Electives</i> <sup>2</sup>
ECI 165	Transportation Policy	Civil & Environmental Engineering electives may include any upper division, letter-graded Civil & Environmental Engineering courses; e.g., not already used towards the ECI breadth, ECI depth, and Numerical Methods requirements.
<i>Water Resources</i>		<i>Civil Engineering Competency Requirement</i>
ECI 141	Engineering Hydraulics	No additional units are necessary as students can count these as competency and another major requirement.
ECI 141L	Engineering Hydraulics Laboratory	<i>Material Science Competency; complete one of the following options:</i> 0-4
<i>Civil &amp; Environmental Engineering Depth</i>		
Choose two courses from two of the following group options selected from Civil & Environmental Engineering Breadth:	16	
<i>Construction Engineering &amp; Management</i>		
ECI 133	Structure & Properties of Civil Engineering Materials	ECI 133 Structure & Properties of Civil Engineering Materials
ECI 137	Construction Principles & Project Management	<b>OR</b>
ECI 153	Deterministic Optimization & Design	Complete two of the following courses:
ECI 178	Pavement Engineering & Design	ECI 132 Structural Design: Metallic Elements
ECI 179	Pavement Management, Evaluation, & Rehabilitation	ECI 135 Structural Design: Concrete Elements
ECI 181	Construction Cost Estimation & Analysis	ECI 171 Soil Mechanics
ECI 182	Buildings: Assemblage & Construction Quality Management	ECI 173 Foundation Design
<i>Environment</i>		ECI 178 Pavement Engineering & Design
ECI 140B	Chemical Principles for Environmental Engineers	<i>Design Competency; complete one of the following courses:</i> 0-4
ECI 140CN	Water & Wastewater Treatment System Design	ECI 140 (Discontinued) **
ECI/ATM 149N	Air Pollution	ECI 145 Hydraulic Structure Design
<i>Geotechnical</i>		ECI 149L Air Pollution Lab
ECI 173	Foundation Design	ECI 162 Transportation Infrastructure Design
ECI 175	Geotechnical Earthquake Engineering	ECI 173 Foundation Design
ECI 179	Pavement Management, Evaluation, & Rehabilitation	ECI 178 Pavement Engineering & Design
<i>Structures</i>		<i>Career Development Competency; complete one of the following:</i> 0-1
ECI 131	Matrix Structural Analysis	Internship or Relevant Work Experience; minimum ECI 192, 1 unit.
ECI 132	Structural Design: Metallic Elements	Research experience with faculty member; minimum ECI 199, 1 quarter.
ECI 133	Structure & Properties of Civil Engineering Materials	Participation in an Engineering Student Professional Organization in a design team or organizing a major event; e.g., ASCE, EWB, AWWA, etc., ECI 198 at least 1 unit.
ECI 134	Structural Loads: Calculation & Modeling	CEE Career Development Seminar; winter quarter – 10 weeks, 1 unit
ECI 135	Structural Design: Concrete Elements	Construction Engineering & Management Seminar; fall, spring – 10 weeks, 1 unit.
ECI 136	Building Design (Discontinued)	
ECI 138	Earthquake Loads on Structures	<b>Upper Division Composition Requirement</b>
<i>Transportation</i>		Choose one: a grade of C- or better is required: 0-4
ECI 153	Deterministic Optimization & Design	UWP 101 Advanced Composition
ECI 161	Transportation System Operations	or UWP 101V Advanced Composition
ECI 162	Transportation Infrastructure Design	or UWP 101Y Advanced Composition
ECI 164	Introduction to Electric Vehicles	UWP 102E Writing in the Disciplines: Engineering
ECI 179	Pavement Management, Evaluation, & Rehabilitation	UWP 102G Writing in the Disciplines: Environmental Writing
		UWP 104A Writing in the Professions: Business Writing
		or UWP 104AV Writing in the Professions: Business Writing

or UWP 104AY	Writing in the Professions: Business Writing
UWP 104E	Writing in the Professions: Science
UWP 104T	Writing in the Professions: Technical Writing
Passing the Upper Division Composition Exam.	
Upper Division Requirements Subtotal	77-90
<b>Total Units</b>	<b>150-164</b>

1

ECI 003 is required for lower-division students. Transfer students and junior-level students will take ECI 101 if they have not taken ECI 003. Students who change into the major and who do not take either of these courses by their senior year will substitute four units of additional letter graded upper-division Civil & Environmental Engineering (ECI) coursework.

2

Also can include, but not exceed, a combination of 6 units from ECI 198 & ECI 199.

\*\*

\*\* Course(s) discontinued; see your advisor for course options.

## Civil & Environmental Engineering, Master of Science

College of Engineering

### Master of Science

Civil & Environmental Engineering (<https://cee.engineering.ucdavis.edu/graduate/>)

With over forty faculty members, over \$20 million in annual research expenditures and about 200 graduate students, the Department of Civil & Environmental Engineering integrates research, education and professional service in areas related to civil infrastructure and the environment. Graduate students benefit from close working relationships with professors who are the leading international experts in their field. Students pursuing their M.S. degrees have the opportunity to follow a more coursework-focused track or research-focused track. Graduate students pursuing their M.S. will specialize in one of five core areas: environmental, geotechnical, structural/structural mechanics, transportation or water resources engineering. Our graduates go on to serve the profession and academia by advancing the leading edge of fundamental knowledge, as well as engineering practice.

Financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid. Many graduate students in our program are either fully or partially supported through one or more of these paths.

### Degree Requirements & Program Coordinator

See Civil & Environmental Engineering (<https://grad.ucdavis.edu/programs/gece/>).

### Research Area Highlights

- Alternative fuel transportation infrastructure
- Earthquake engineering
- Environmental engineering
- Environmental planning and management

- Geotechnical engineering
- Hydraulics and fluid mechanics
- Hydrology
- Structural engineering
- Structural health monitoring
- Structural mechanics
- Systems planning and design
- Transportation engineering
- Transportation planning and design
- Water resources engineering

## Research Facilities & Partnerships

- Air Quality Research Center
- Center for Bio-mediated & Bio-inspired Geotechnics
- Center for Geotechnical Modeling
- Center for Watershed Sciences
- Center for Water-Energy Efficiency
- Institute of Transportation Studies
- J. Amorocho Hydraulics Laboratory (JAHL)
- John Muir Institute of the Environment
- Pavement Research Center & Advanced Transportation Infrastructure Research Center
- Tahoe Environmental Research Center
- Western Cooling Efficiency Center

Complete Information is on our website.

## Civil & Environmental Engineering, Doctor of Philosophy

College of Engineering

### Doctor of Philosophy

Biotechnology Designated Ph.D. emphasis also available.

Civil & Environmental Engineering (<https://cee.engineering.ucdavis.edu/graduate/>)

With over forty faculty members, over \$20 million in annual research expenditures and about 200 graduate students, the Department of Civil & Environmental Engineering integrates research, education and professional service in areas related to civil infrastructure and the environment. Graduate students benefit from close working relationships with professors who are the leading international experts in their field. They are supported in their study and research by robust funding, and they have access to state-of-the-art research facilities within the program and in interdisciplinary CEE faculty-led centers across campus. Our graduates go on to serve the profession and academia by advancing the leading edge of fundamental knowledge, as well as engineering practice.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid. Nearly all Ph.D. students are fully supported through one or more of these paths, or through external fellowships.

## Construction Engineering & Management, Minor

### College of Engineering

California's construction industry continues to experience high growth as it continues to accommodate an increasing population and as it faces renewal of much of the infrastructure built by previous generations. At the same time, the construction industry faces challenges of scarce materials, a need for decreased environmental impact in terms of the construction process itself and operation of the completed project, and a more complex operational, regulatory and social context in which it must do its work.

The purpose of this minor is to better prepare professional civil and environmental engineers to thrive in this challenging industry and to improve the efficiency of delivery and sustainability of the civil infrastructure in the state through their future efforts.

It is expected that engineering students will enroll in this minor program, including Civil, Mechanical, Chemical, and Materials Science majors.

Students from other colleges can also complete this minor, but it is recommended that they review the requirements with one of the advisors before enrolling. Students who are interested in the construction of infrastructure in their discipline can make use of the skills that will be learned through the completion of this minor.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements, with an overall GPA of 2.000 or better. All prerequisites for courses must have been taken for a letter grade; no grade lower than a C- will be accepted in any prerequisite course.

The online Minor Declaration form is available via the Online Advising Student Information System (OASIS) (<https://students.ucdavis.edu/>). For more information, contact the undergraduate advisors ([civiladvising@ucdavis.edu](mailto:civiladvising@ucdavis.edu)) in the Department of Civil & Environmental Engineering.

Transcript notation must be requested no later than the quarter preceding graduation, and will appear as a minor in Construction Engineering & Management.

## Course Overlap

Please refer to your college's policies regarding overlap rules.

## Minor Advisors

C. Bronner, J. Harvey, S. Miller, J. Bolander, S. Nassiri

## Environmental Engineering, Bachelor of Science

### College of Engineering

Environmental engineers are responsible for designing processes and infrastructure to ensure society has access to safe water, clean air, and healthy ecosystems. Environmental engineers apply knowledge from physics, chemistry, biology and the social sciences to problems in a variety of areas including water & wastewater treatment and ecosystem remediation, analysis of chemical fate and transport in the natural environment, and modeling of hydrologic & atmospheric flows. As climate change creates new challenges, such as in the form of droughts and intense weather events, the field of environmental engineering evolves to meet society's needs. As an environmental engineering student at UC Davis, you will gain skills that enable you to design sustainable solutions for society.

The Environmental Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>) under the commission's General Criteria and Program Criteria for Environmental Engineering and Similarly Named Engineering Programs.

## Suggested Advisors

**Environmental Engineering:** H.N. Bischel, C.E. Bronner, C. D. Cappa, R. Corsi, C. DeFinnda, A. Kendall, M.J. Kleeman, F.J. Loge, J. Pena, T.M. Young

**Water Resources:** F.A. Bombardelli, A. Escriva-Bou, A.L. Forrest, J.D. Herman, M.L. Kavvas, V.L. Morales, H.J. Oldroyd, B.A. Younis

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Environmental Engineering Bachelor of Science is 144.

UWP 104E	Writing in the Professions: Science	
UWP 104T	Writing in the Professions: Technical Writing	
Passing the Upper Division Composition Exam.		
Upper Division Required Courses Subtotal		64-68
<b>Total Units</b>		<b>144-148</b>

1

ECI 003 is designed for lower division. Transfer students and junior-level students will take ECI 101 if they have not taken ECI 003. Students who change into the major and who do not take either of these courses by their senior year will substitute 4 units of additional letter-graded upper division Civil & Environmental Engineering (ECI) coursework.

2

A total of 4 units of ECI 198 & ECI 199 units may be counted for major requirements.

## Sustainability in the Built Environment, Minor

### College of Engineering

The built environment plays an integral role in meeting society's most basic needs of shelter, security, mobility, community, and water & waste treatment, but it also contributes significantly to the sustainability challenges of climate change, pollution, resource consumption, and land use. As society and government policy increase pressure to reduce the environmental impacts of our everyday activities, individuals must increasingly understand how the built environment they design and maintain fits into the complex environmental and human system in which we live. The minor provides a guiding framework for educating individuals who will design and maintain our future built environment in the challenges and potential solutions for improved sustainability.

The minor is designed to develop students' awareness in the three core themes of sustainability: Engineering & Science, Social Context, and Policy & Economics. The aim is both to foster the social context of engineering and to attract students from a range of departments and programs across campus to grow trans-disciplinary interactions. Students are required to take ECI 123, as well as electives as specified in the three core themes.

The minor is designed to attract students from a range of departments and programs across campus, including, Environmental Science & Policy, Plant Sciences, Landscape Architecture, Design, Engineering, Community & Regional Development, Anthropology, Agriculture & Resource Economics, Atmospheric Science, Environmental Toxicology, Applied Biological Systems Technology, Geology, Hydrology and all disciplines of Engineering. Students enrolled in the minor will acquire fundamental skills and knowledge of the elements and integrated processes necessary for a sustainable built environment.

Successful completion of the minor requires both a minimum overall UC GPA of 2.000 and a minimum 2.000 GPA for the coursework completed for the minor, with no grade lower than a C- for any course used for the minor. All courses must be taken for a letter grade. Up to 4 units can be lower division, all other units must be upper division. Substitute courses in the thematic areas may be proposed by students for the minor and are considered on a case-by-case basis.

Please refer to your college's policies regarding course overlap rules.

The Minor Declaration form is available via the Online Advising Student Information System (OASIS) (<https://students.ucdavis.edu/>). For more information, please email the undergraduate advisors ([civiladvising@ucdavis.edu](mailto:civiladvising@ucdavis.edu)) in the Department of Civil & Environmental Engineering.

Transcript notation must be requested no later than the quarter preceding graduation and will appear as a minor in Sustainability in the Built Environment.

## Minor Advisors

H.N. Bischel, C.E. Bronner, A.L. Forrest, F.J. Loge, A. Kendall, S.A. Miller

Code	Title	Units
ECI 123	Urban Systems & Sustainability	4
Complete at least 14 units of coursework from the three core thematic areas, below. <sup>1</sup>		14

### Engineering & Science

Choose at least one, 3 or 4 unit course:

ATM 116	Modern Climate Change
DES 127A	Sustainable Design
DES 127B	Studio Practice in Sustainable Design
DES 156	Graphitecture: Architecture in the Age of New Media
ECI 040	Introduction to Environmental Engineering
ECI 140A	Environmental Analysis of Aqueous Systems
ECI/ATM 149	(Discontinued)
ECI 155	Water Resources Engineering Planning
ECI/ESP 163	Energy & Environmental Aspects of Transportation
ECI 165	Transportation Policy
ENG 188	Science & Technology of Sustainable Power Generation
ETX 101	Principles of Environmental Toxicology
GEL 130	Non-Renewable Natural Resources
LDA 140	Green Building, Design, & Materials

### Social Context

Choose at least one, 3 or 4 unit course:

ANT/ESP 101	Ecology, Nature, & Society
ANT 104N	Cultural Politics of the Environment
CRD 142	Rural Change in the Industrialized World
CRD 149	Community Development Perspectives on Environmental Justice
CRD 154	Social Theory & Community Change
CRD 158	Community Governance
CRD 172	Social Inequality: Issues & Innovations
LDA 003	Sustainable Development: Theory & Practice
PLS 162	Urban Ecology

### Policy & Economics

Choose at least one, 4 unit course:

ARE/ESP 175	Natural Resource Economics
ARE 176	Environmental Economics
ESP 161	Environmental Law
ESP 162	Environmental Policy
ESP 171	Urban & Regional Planning
ESP 173	Land Use & Growth Controls

PLS 150	Sustainability & Agroecosystem Management
---------	---

Total Units	18
-------------	----

1

May include 1-3 units of ECI 198, by approval of advisor.

## Classics

### College of Letters & Science

## Department Chair

Anna Uhlig, Ph.D.

## Department Office

Classics Program; 211 Sproul Hall; 530-752-4999; Classics (<http://classics.ucdavis.edu>); Faculty (<https://classics.ucdavis.edu/faculty/>)

The Classics department offers a Classical Civilization A.B. (p. 184) and minors in Classical Civilization (p. 188), Greek (p. 188), and Latin (p. 188).

- Classical Civilization, Bachelor of Arts (p. 184)
- Classical Civilization, Minor (p. 188)
- Greek, Minor (p. 188)
- Latin, Minor (p. 188)

## Classical Civilization, Bachelor of Arts

### College of Letters & Science

Classical Civilization is an interdisciplinary major that examines the ancient Mediterranean cultures of Greece, Rome and the Near East, with courses offered on the languages, history, literature, religions, myths, art and archaeology of these societies, their achievements in rhetoric and philosophy, and their political and social institutions. Minor programs in Classical Civilization, Greek, and Latin, and many General Education courses are also offered.

## The Program

The major has two tracks: (1) Classical & Mediterranean Civilizations, and (2) Classical Languages & Literatures. The core of both major tracks consists of two years of Latin or Greek, the introductory sequence on the ancient Mediterranean world (CLA 001, CLA 002, CLA 003 or CLA 004), the advanced seminar (CLA 190), and a number of electives. The Classical & Mediterranean Civilization track allows students to choose their electives from a broadly balanced program in history, art and archaeology, literature, philosophy and rhetoric. The Classical Languages & Literatures track focuses more intensively on language and literature, requiring the study of two languages and allowing fewer electives. Students planning to go on to graduate work in Classics should take Track 2 and study as much Latin and Greek as possible. They should make a point of talking to an advisor early in their undergraduate program. They are also advised to acquire a reading knowledge of French or German.

## Prerequisite Credit

Credit will not normally be given for a lower division course in Latin or Greek if it is the prerequisite of a course already successfully completed. Exceptions can be made by the Program Director only.

## Career Opportunities

A degree in Classical Civilization represents a solid liberal arts education that provides an excellent foundation for a wide variety of careers. In the last twenty-five years, many majors have applied to law or medical schools and nearly all have been accepted. Additional career options include library and museum work, teaching, journalism, and graduate study in Classics, art, archaeology, history, literature, philosophy, and religion.

## Major Advisors

Consult the department office.

## Honors Program

Candidates for high or highest honors in Classical Civilization must write a senior honors thesis under the direction of a faculty member in Classics. Potential candidates for the honors program must enroll in Classics CLA 194HA and CLA 194HB, normally during the first two quarters of the senior year. Enrollment is limited to upper division students with a minimum of 135 units, and a 3.500 grade point average in courses in the Classical Civilization major. For further information, students should consult with the major advisor or program director. The requirements for the honors program are in addition to the regular requirements for the major in Classical Civilization.

## Graduate Study

The Department offers a master's degree in Classics with emphasis on either Greek or Latin; however, admission into the graduate program has been suspended.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. Respective of the Track, the minimum number of units required for the Classical Civilization Bachelor of Arts are 66 & 70.

- Clinical Research, Master of Advanced Studies (p. 189)

## Clinical Research, Master of Advanced Studies

School of Medicine

### Master of Advanced Studies

The Graduate Group in Clinical Research (GGCR) is an interdisciplinary graduate group in clinical and translational research offering a Master of Advanced Study degree in Clinical Research. The GGCR provides a solid clinical/translational, patient-oriented research foundation for junior faculty, clinical and post-doctoral fellows, medical students, and other health professionals interested in clinical research. The program centers around three core elements: didactic instruction, mentored research, and the capstone project.

The M.A.S. degree requirements include a core intensive curriculum and depends on a cohesive cohort model that provides access to collaborate with researchers across multiple disciplines. Students graduate with the skills necessary to design, conduct, and analyze translational research studies, and to interpret, apply and disseminate research findings.

Instruction begins with two summer courses which are followed by a one- or two-year core curriculum plan. Electives can be tailored to best meet each scholar's career development needs.

### Degree Requirements & Program Coordinator

- Cognitive Science, Bachelor of Arts (p. 189)
- Cognitive Science, Bachelor of Science (p. 190)

## Cognitive Science, Bachelor of Arts

College of Letters & Science

### The Major Programs

The Cognitive Science major is designed to provide a broad interdisciplinary approach to the study of mind that includes courses from different departments and attracts students with a variety of interests. It emphasizes a multifaceted approach to the study of the

mind integrating concepts and techniques from psychology, artificial intelligence, linguistics, neurology, philosophy and other relevant fields.

For students interested in the liberal arts the Cognitive Science major can be pursued as a Bachelor of Arts (A.B.) program. Alternatively, it can be pursued as a Bachelor of Science (B.S.) program for students with a stronger interest in the mathematical, neurological and computational foundations of the discipline. The main objective of both programs is to give the student a broad grounding in the integrated sciences of the mind and to connect approaches from different fields. Students must complete a number of core courses for the degree, as well as a number of specialty courses on such wide-ranging topics as logic for artificial intelligence, computational linguistics, cognitive neuroscience, animal cognition and the psychology of music.

### Career Pathways

A degree in Cognitive Science provides broad intellectual foundations useful for careers in a variety of areas, including teaching, business, social work/counseling and the information technology industry.

Undergraduate education in cognitive science also prepares the student for graduate study in appropriate subfields of psychology, linguistics, philosophy and informatics. It is also suitable training for pre-medicine, pre-law, and pre-management students.

### Major Advisors

Staff advisors are located in the Blue Ridge Office Building. For information about how to contact a major advisor, see Major Advising (<https://yellowcluster.ucdavis.edu/advising/undergraduate/major-advising/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Cognitive Science Bachelor of Arts is 72.

## Communication

### College of Letters & Science

Bo Feng, Chairperson of the Department; term ends June 30, 2026.

## Department Office

469 Kerr Hall; 530-752-0966; Communication (<http://communication.ucdavis.edu/>); Faculty (<http://communication.ucdavis.edu/directory-of-people/>)

- Communication, Bachelor of Arts (p. 193)
- Communication, Minor (p. 195)
- Communication, Master of Arts (p. 195)
- Communication, Doctor of Philosophy (p. 195)

## Communication, Bachelor of Arts

### College of Letters & Science

## The Major Program

The program of study in communication examines communication processes at several different levels of analysis. Courses dealing with communication at the individual, interpersonal, organizational and

societal levels of analysis are offered. The emphasis in the program reflects the changing focus in the discipline and society toward computer-mediated communication, quantitative behavioral science and cognitive science. Classes addressing such topics as communication and cognition, message systems, interpersonal communication, nonverbal communication, persuasion, organizational communication, mass media effects, computer-mediated communication and public communication campaigns explore communication at these levels of analysis. Related social science courses are also part of the major.

## Major Advisors

Contact department.

## Career Alternatives

Communication graduates have found careers in such fields as broadcast and print journalism, administration, sales, management, politics and government, education, social work, social media, and public relations. A communication degree is also excellent preparation for law school or other graduate programs.

## Grading Recommendation

Although not required, it is recommended that all courses offered in satisfaction of the major, except variable-unit courses, be taken for a letter grade.

## Graduate Study

The Department of Communication offers programs of study and research leading to M.A. and Ph.D. degrees in Communication. Detailed information may be obtained from the Graduate Advisor, Department of Communication.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Communication Bachelor of Arts is 69.

Code	Title	Units
<b>Preparatory Subject Matter</b>

- Comparative Literature, Bachelor of Arts (p. 195)
- Comparative Literature, Minor (p. 197)
- Comparative Literature, Master of Arts (p. 197)
- Comparative Literature, Doctor of Philosophy (p. 198)

## Comparative Literature, Bachelor of Arts

College of Letters & Science

Comparative Literature is a dynamic major whose own self-definition is constantly shifting. Once mostly limited to the study of western European literature and its Greco-Roman classical past, today Comparative Literature has become a global interdisciplinary study of literature in original languages and other media (including cinema, television, fine arts, and opera, for example). Thus, we can define Comparative Literature as the study of literature and culture across national boundaries and throughout historical time.

## The Program

Both the major and the minor programs in Comparative Literature allow students to combine courses in one or more national literature departments with courses in Comparative Literature. The introductory course sequence (COM 001-COM 004) provides both an overview of ancient to contemporary literature and film and offers intensive practice in analytical thought. In addition, any one of the courses in the sequence satisfies the university composition requirement. All readings in undergraduate Comparative Literature courses are in English, but majors take upper division courses in at least one foreign literature in the original language.

Students majoring in Comparative Literature choose a first and second literature of concentration, one of which may be English. After the introductory sequence, each student's major course work is divided between courses in the two literatures of concentration and Comparative Literature courses. These Comparative Literature courses encourage students to take a broad view of a historical period, a theme, a genre, or a literary movement. The wide variety of options in the program permits great flexibility and encourages interdisciplinary connections among literature and philosophy, psychology, history, and the arts. Each student's plan of study must be approved by the major advisor at the beginning and end of each calendar year.

### Advising

All Comparative Literature majors and minors must consult with their advisor, individually, at least once at the beginning and once at the end of each academic year.

### Major Advisor

Consult the Department office.

### Career Alternatives

A Comparative Literature major offers an excellent enhancement to pre-professional training, preparing students for graduate study in medicine, dentistry, veterinary medicine, and other science fields as well as law and business, besides of course journalism and publishing, teaching, or graduate study in literature.

### Honors & Honors Program

Students, who meet the grade point requirement for graduation with honors and complete the requirements established by the College of Letters and Science, may be recommended by the department for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major and in the honors project in particular. Entrance into the honors program requires that a student have completed at least 135 units with a minimum grade point average of 3.500 in courses counted toward the major.

Candidates must write a senior thesis under the direction of a faculty member approved by the major advisor. For this purpose, in addition to fulfilling all other major requirements, honors candidates must enroll in 6 units of COM 194H during the first two quarters of the senior year.

### Teaching Credential Subject Representative

See the Teaching Credential/M.A. Program ([https://education.ucdavis.edu/teaching-credential/m.a./](https://education.ucdavis.edu/teaching-credential/m.a/)).

### Education Abroad Options

The department of Comparative Literature encourages students to study abroad, in the Summer Abroad program, the Quarter Abroad Program,

or the Education Abroad Program. With the approval of a major advisor, applicable courses taken abroad may be accepted in the major or minor programs.

## Graduate Study

The Comparative Literature Program offers the Ph.D. degree with a strong emphasis on individual research under the supervision of a faculty member. Candidates for the Ph.D., in addition to research of a comparative nature, study three literatures (one of which may be English and/or American) in the original languages, acquiring an extensive knowledge of the overall development of one. Students may choose to focus on a special topic instead of on a third literary tradition.

Within this framework, each student's program will be tailored to individual interests, and may center on a major historical period, such as the Renaissance or the modern age; a genre, such as lyric poetry, epic, drama, or the novel; or any other special emphasis approved by the Graduate Advisor.

### Preparation

For admission to the Ph.D. Program candidates should have an undergraduate major in literature and reading ability in three foreign languages. The Group requires three letters of recommendation and a sample of recent written work, and it is recommended that students submit their GRE scores.

The major requirements below are in addition to meeting University Requirements (p. 56) & College Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Comparative Literature Bachelor of Arts is 56.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
COM 001 or COM 002	Major Works of the Ancient World Major Works of the Medieval & Early Modern World	4

## Comparative Literature, Master of Arts

### College of Letters & Science

The Comparative Literature thesis-based M.A. program prepares students for doctoral research or professional employment. Our graduate students are supported by a large group of core and affiliated faculty in Comparative Literature. Our faculty hold cross-appointments with

the departments of East Asian Languages & Cultures, English, French & Italian, German & Russian, Middle East/South Asian Languages, and Religious Studies. We welcome applications from students with a strong humanities background who wish to strengthen their expertise in comparative literature and criticism.

The program combines core courses on the theory and practice of comparison with broad opportunities for work in specific languages and literatures. Students will write a Masters thesis with the support of a thesis committee and a collaborative thesis-writing group.

## Preparation

Consideration for program admission requires evidence of the following:

- A strong undergraduate record in any humanities major.
- Fluent reading, writing, and speaking knowledge in one language that is not the student's native language.
- A clear commitment to the study of a second language that is not the student's native language.

For deadlines and application requirements, see Comparative Literature Graduate Admissions (<https://complit.ucdavis.edu/graduate-admissions/>).

## Degree Requirements & Program Coordinator

See Comparative Literature (<https://grad.ucdavis.edu/programs/gcom/>).

## Comparative Literature, Doctor of Philosophy

### College of Letters & Science

The Comparative Literature Program offers the Ph.D. degree with a strong emphasis on individual research under the supervision of a faculty member. Candidates for the Ph.D., in addition to research of a comparative nature, study three literatures (one of which may be English and/or American) in the original languages, acquiring an extensive knowledge of the overall development of one. Students may choose to focus on a special topic instead of on a third literary tradition.

Within this framework, each student's program is tailored to individual interests, and may center on a major historical period, such as the Renaissance or the modern age; a genre, such as lyric poetry, epic, drama, or the novel; or any other special emphasis approved by the Graduate Advisor.

## Preparation

For admission to the Ph.D. Program candidates should have an undergraduate major in literature and reading ability in three foreign languages. The Group requires three letters of recommendation and a sample of recent written work. GRE scores are not required.

## The Computer Science & Engineering Program

The Department of Computer Science administers two curricula: Computer Science & Engineering and Computer Science. It also administers two minors: Computer Science and Computational Biology. For information on the Computer Science curriculum and minor; see Computer Science.

## Mission

The University of California, Davis, is, first and foremost, an institution of learning and teaching, committed to serving the needs of society. The Department of Computer Science contributes to the mission in three ways. First, its undergraduate and graduate education programs seek to educate students in the fundamental principles of computer science and the skills needed to solve the complex technological problems of modern society. The breadth of coursework provides a framework for life-long learning and an appreciation for multidisciplinary activities. Second, through its research programs, the department contributes to the development and progress of computer science, and software and information technology, to provide innovative, creative solutions for societal needs. Finally, the department disseminates its research to enhance collaborations with the public sector, further interdisciplinary interests that benefit society, and educate the public through publications, public service, and professional activities.

## Department Objectives

**Teaching**—We seek to provide undergraduate students with a thorough understanding of the key principles and practices of computing, which include a strong theoretical background in mathematics, basic sciences, and engineering fundamentals and an ability to apply this knowledge to practical problems. We endeavor to provide students with sufficient breadth to work creatively and productively in multidisciplinary work teams; this breadth, in its broadest context, will form the basis for an appreciation and interest in life-long learning. We provide students with the opportunities to design and conduct experiments, and to collect and analyze data in core, as well as more specialized, areas of computer science. We provide students with breadth in the humanities and social sciences so they learn to communicate effectively, understand professional and ethical issues in society, and appreciate the interrelatedness between computing and society. We educate graduate students to be our next generation of teachers or leaders in industry, or to pursue meaningful, creative research in industry, government, or academia.

**Research**—We develop and maintain research programs that produce fundamental scientific advances, as well as useful technological innovations, while simultaneously training the next generation of researchers and leaders in the field of computer science.

## Objectives

We train graduates to practice computer science and engineering in a broad range of industries; we prepare interested graduates for graduate education or other professional degrees; we give students an understanding of computer software and hardware systems, and both theoretical and experimental approaches to problem-solving; we ready graduates for lifelong learning; and we encourage graduates to contribute to their profession and society.

- Computational Biology, Minor (p. 199)
- Computer Science & Engineering, Bachelor of Science (p. 199)
- Computer Science, Bachelor of Science (p. 201)
- Computer Science, Minor (p. 202)

## Computational Biology, Minor

### College of Engineering

The minor in Computational Biology will provide to students with engineering, physical science or biological science majors the foundations necessary to build efficient computational models and algorithms, use state-of-the-art techniques for scientific analysis and create scalable infrastructure environments for biological and biotechnological applications.

More information can be found on the CS Advising website (<https://cs.ucdavis.edu/minors/>).

### Minor Advisors

Faculty Advisors: V. Filkov, D. Gusfield, P. Koehl, I. Tagkopoulos  
Academic J. Clifford, K. Gage, P. Kumari

Students must take a total of 19-24 upper division units, with two required courses and 11-12 units of upper division electives, as specified below. A minimum GPA of 2.000 is required for coursework in the minor. Students should note that most of the courses listed below have lower division prerequisites. In particular, required course ECS 122A has a prerequisite chain of ECS 020, ECS 036A, ECS 036B, and ECS 036C. No more than one course of upper division work will be permitted for overlap between any major and the minor.

Code	Title	Units
<b>Required Courses</b>

BIT 150	Applied Bioinformatics
BIM 117	Modeling Strategies for Biomedical Engineering
ECS 129	Computational Structural Bioinformatics

**Total Units** 20-23

## Computer Science & Engineering, Bachelor of Science

### College of Engineering

The Computer Science Engineering major prepares students to do further work in hardware, software, theory, or electronics, either in industry or in postgraduate study.

The primary differences between the Computer Science Engineering and the Computer Science majors are the extent of course work covering hardware and the flexibility of the curriculum. The Computer Science Engineering major develops a solid understanding of the entire machine, including hands-on experience with its hardware components. The Computer Science major has some course work on hardware, at the digital-design level, on simulators. The Computer Science Engineering major has fewer free electives. The CS major's more generous electives make it easier to complete a minor or double major.

A key theme of the Computer Science Engineering curriculum is the hardware/software interaction, a theme reflected in the courses required and the orientation of the courses themselves.

The Computer Science & Engineering major provides students with a solid background in mathematics, physics, chemistry, and electronic circuits and systems, all supporting the computer hardware and computer software courses that constitute the focus of the curriculum.

# Computer Science & Engineering Undergraduate Program

The Computer Science and Engineering (BS) program is accredited by (a) the Engineering Accreditation Commission of ABET (<http://www.abet.org>) under the commission's General Criteria and Program Criteria for Electrical, Computer, Communications, Telecommunication(s), and Similarly Named Engineering Programs and by (b) the Computing Accreditation Commission, under the commission's General Criteria and Program Criteria for Computer Science and Similarly Named Computing Programs.

Students are encouraged to adhere carefully to all prerequisite requirements. The department is authorized to drop students from a course for which stated prerequisites have not been completed.

## Major Advisors

J. Clifford, K. Gage, P. Kumari

For information on how to speak to an advisor, see CS Undergraduate Advising (<https://cs.ucdavis.edu/advising/>).

Before declaring a major in Computer Science & Engineering, students must complete specific course requirements and meet GPA minimums. For a full list of requirements to declare the major, see CS Advising (<https://cs.ucdavis.edu/undergraduate/changing-majors-double-majors/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Computer Science & Engineering Bachelor of Science is 144.

Code	Title	Units
<b>Lower Division Required Courses</b>		
<i>Mathematics</i>		
MAT 021A	Calculus	4
MAT 021B	Calculus	4
MAT 021C	Calculus	4
MAT 021D	Vector Analysis	4
Choose one:		3-4
MAT 022A	Linear Algebra	
MAT/BIS 027A	Linear Algebra with Applications to Biology	
MAT 067	Modern Linear Algebra	
Choose one:		3-4
MAT 022B	Differential Equations	
MAT/BIS 027B	Differential Equations with Applications to Biology	
<i>Physics</i>		
PHY 009A	Classical Physics	5
PHY 009B	Classical Physics	5
PHY 009C	Classical Physics	5
PHY 009D	Modern Physics	4
<i>Chemistry</i>		
CHE 002A	General Chemistry	5
<i>Computer Science Engineering</i>		
ECS 020	Discrete Mathematics For Computer Science	4

ECS 050	Computer Organization & Machine-Dependent Programming	4
Choose a series option (must complete one full series in entirety; mixing of courses between series is not allowed):		
(a)		
ECS 036A	Programming & Problem Solving	
ECS 036B	Software Development & Object-Oriented Programming in C++	
ECS 036C	Data Structures, Algorithms, & Programming	
(b)		
ECS 032A or ECS 032AV or ECS 036A	Introduction to Programming Introduction to Programming Programming & Problem Solving	
ECS 032B	Introduction to Data Structures	
ECS 032C	Implementation of Data Structures in C	
ECS 034	Software Development in UNIX & C++	
<i>Engineering</i>		
ENG 017 or ENG 017V	Circuits I	4
<i>Communications</i>		
CMN 001 or CMN 001V	Introduction to Public Speaking	4
or CMN 001V Introduction to Public Speaking		
Lower Division Composition/Writing; choose one; a grade of C- or better is required:		
COM 001	Major Works of the Ancient World	
COM 002	Major Works of the Medieval & Early Modern World	
COM 003	Major Works of the Modern World	
COM 004	Major Works of the Contemporary World	
ENL 003 or ENL 003V	Introduction to Literature Introduction to Literature	
NAS 005	Introduction to Native American Literature	
UWP 001	Introduction to Academic Literacies (Recommended)	
UWP 001V	Introduction to Academic Literacies: Online (Recommended)	
UWP 001Y	Introduction to Academic Literacies (Recommended)	
Lower Division Required Courses Subtotal		78-84
<b>Upper Division Required Courses</b>

<b>Upper Division Composition Requirement</b>		
Choose one:		0-4
UWP 101	Advanced Composition (Grade of C- or better required.)	
or UWP 101V	Advanced Composition	
or UWP 101Y	Advanced Composition	
Passing the Upper Division Composition Exam administered by the College of Letters & Science.		
<b>Upper Division Required Courses Subtotal</b>		66-70
<b>Total Units</b>		<b>144-154</b>

1

Chosen from ECS courses numbered 120 to 189 inclusive; one approved course of 3-5 units from ECS 192 or ECS 199; EEC 171, EEC 180; one course may be taken from the following restricted elective list: ECN 122; LIN 127, LIN 177; MAT 135A, MAT 135B; PSC 120; STA 131A, STA 131B. No course can count as both a required course and a computer science and engineering elective.

## Computer Science, Bachelor of Science

College of Engineering

### The Major Program

The Department of Computer Science administers two majors: Computer Science & Engineering (CSE) and Computer Science (CS). It also administers two minors: Computer Science (p. 202) and Computational Biology (p. 199). For information on the Computer Science & Engineering curriculum and the minor in Computational Biology, see Computer Science Engineering (<https://www.ucdavis.edu/majors/computer-science-and-engineering/>).

The primary differences between the CSE and CS majors are the extent of hardware coverage and curricular flexibility. The CSE major develops a solid understanding of the entire machine, including hands-on experience with its hardware components. The CS major teaches some hardware, at the digital-design level, on simulators. The CSE major has fewer free electives. The CS major's more generous electives make it easier to complete a minor or double major.

Students in the CS major receive a solid grounding in the fundamentals of computer languages, operating systems, computer architecture, and the mathematical abstractions underpinning computer science. Students are prepared for both industry and postgraduate study.

### Major Advisors

J. Clifford, K. Gage, P. Kumari

For information on how to speak to an advisor, see CS Undergraduate Advising (<https://cs.ucdavis.edu/advising/>).

## Graduate Study

See Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Before declaring a major in Computer Science, students must complete specific course requirements and meet GPA minimums. Visit the CS Advising webpage (<https://cs.ucdavis.edu/undergraduate/changing-majors-double-majors/>) for a full list of requirements to declare the major.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Computer Science Bachelor of Science is 104.

## Computer Science, Master of Science

College of Engineering

### Graduate Study

The Graduate Group in Computer Science offers programs of study leading to M.S. and Ph.D. degrees in Computer Science. The diverse expertise of the faculty brings a wide variety of research interests to the program. Research strengths lie in algorithms, artificial intelligence, computational biology, computer architecture, computer graphics and visualization, computer vision, computer science education, computer security and cryptography, computer networks, data science, database systems, machine learning, molecular computing, nanotechnology, natural language processing, network science, parallel and distributed systems, program specifications and verification, programming languages and compilers, quantum computing, scientific computation, social and ethical issues of computing, and software engineering. Interdisciplinary research in computer science is encouraged.

### Preparation

Normal preparation for the program is a bachelor's degree in either computer science or in a closely related field (such as electrical engineering or mathematics, with substantial course work in computer science). Applications are also considered from students with outstanding records in other disciplines. Ph.D. students must pass a qualifying oral examination and complete a dissertation demonstrating original research in an area approved by the Graduate Group.

### Degree Requirements & Program Coordinator

See Computer Science (<https://grad.ucdavis.edu/programs/gcsi/>).

- Cultural Studies, Doctor of Philosophy (p. 204)

## Cultural Studies, Master of Arts

College of Letters & Science

### Graduate Study

The Graduate Group in Cultural Studies at UC Davis offers an interdisciplinary approach to the study of culture and society that highlights how sexuality, race, ability, citizenship, gender, nationality, class, and language organize embodied identities, social relations, and cultural objects. With the close guidance and supervision of a faculty committee, students in the program pursue interdisciplinary research in areas including studies of comparative and critical race, ecocriticism, fashion, queer theory, media and popular cultural representation, science and technology, Marxist theory, travel, and tourism, food, physical and cognitive abilities, cultural geography, transnational culture and politics, globalization, religion, rhetoric, performance, and critical theory. Although both the Ph.D. and M.A. are offered, applications are only accepted for the

Ph.D. program, and the M.A. is available as a terminal degree in route to the Ph.D.

## Preparation

Normal preparation for the program is a bachelor's degree in a related field. Terminal M.A. students must pass an examination. Ph.D. students must pass a qualifying examination, a comprehensive examination, and complete a dissertation demonstrating original research in an area approved by the Graduate Group. In addition to the standard UC Davis graduate application (which requires a statement of purpose), we also require three letters of recommendation, transcripts, GRE scores, writing sample (ten-page minimum, not exceeding twenty pages), and a fellowship application.

## Degree Requirements & Program Coordinator

See Cultural Studies (<https://grad.ucdavis.edu/programs/gclt/>).

- Design, Master of Fine Arts (p. 207)

# Design, Bachelor of Arts

College of Letters & Science

The Department of Design offers a creative, challenging, and flexible approach to the study of design with emphasis on socially responsible, human centered, and sustainable practice.

## The Program

Foundation courses: Introduction to Design; Design Drawing or Drafting and Perspective, Form & Color, and Graphic Design & Computer Technology; and one class in Design History/Theory/Criticism from the DES 040 series; are required of all design majors. Additional coursework in the student's area of interest is required for the Preparatory Subject Matter. Depth Subject Matter courses provide: (1) further exploration of design principles and conceptual, formal and technical issues; (2) conceptual and critical development through a series of history and theory classes; (3) in-depth studio experience with projects that demonstrate a research-based, iterative design process. Optional capstone class. A more detailed explanation is available through the Design Advising office in 101 Art Building; 530-752-0890.

## Portfolios

Portfolios are not required for admission to the major. However, it is highly recommended that design students maintain an updated portfolio of work for faculty and professional evaluation and consideration for enrollment in specialized courses, including independent study, group study and internship.

## Internships, Careers, & Study Abroad

Design students are encouraged to supplement their coursework with internships in design firms, museums, and design-related businesses. Design graduates go directly from this program into further graduate study, or professional work including exhibition, fashion, information, interior architecture & product (lighting & furniture), textiles, visual communications (digital, environmental & print), and sustainable design. In addition, students have become entrepreneurs through freelance and commissioned work in many related areas. The Department of Design encourages students to experience design education abroad through a variety of sponsored programs.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Design Bachelor of Arts is 68.

## Design, Master of Fine Arts

College of Letters & Science

### Master of Fine Arts

The M.F.A. in Design at UC Davis is a two-year program that encourages interdisciplinary approaches through research and practice aligning with social and environmental responsibility. We offer graduate students a unique opportunity to work with faculty in the Department of Design and across departments in one of the nation's top public research universities. Design faculty expertise includes design theory, exhibition, fashion, history, information, interactivity, interior architecture, immersion, lighting, product, textiles, time-based, visual communication, wearables, and more. Students are encouraged to build connections across campus to expand perspectives and deepen understandings. Students' progress through core courses alongside their cohort members while advancing their individual research. Core courses are augmented by graduate-level independent and group studies and upper-division undergraduate level electives. The M.F.A. program culminates in a written- and project-based thesis publicized in a major graduate exhibition. The program is committed to equity, diversity, inclusion and public engagement.

For more information, see M.F.A. Program in Design (<http://arts.ucdavis.edu/design-graduate-program/>).

### Degree Requirements & Program Coordinator

See Design (<https://grad.ucdavis.edu/programs/gdes/>).

## Designated Emphasis, Ph.D.

### Graduate Studies

This is a partial list. For more information, see Designated Emphases (<https://grad.ucdavis.edu/designated-emphases/>).

- Biotechnology, Designated Emphasis (p. 207)
- Computational Social Science, Designated Emphasis (p. 207)
- Critical Theory, Designated Emphasis (p. 207)
- Feminist Theory & Research, Designated Emphasis (p. 208)
- Global Nutrition, Designated Emphasis (p. 208)
- Science & Technology Studies, Designated Emphasis (p. 480)

## Biotechnology, Designated Emphasis

College of Agricultural & Environmental Sciences

(Office of Research)

Nitzan Shabek, Ph.D., Chairperson

### Department Office

302 Green Hall; 530-752-1048; Designated Emphasis in Biotechnology (<https://deb.ucdavis.edu/>); Faculty (<https://deb.ucdavis.edu/current-deb-faculty/>)

The Designated Emphasis in Biotechnology (DEB) is an inter-graduate group program that allows Ph.D. students to receive and be credited for training in the area of biotechnology. Currently, there are 29 STEM

graduate programs affiliated with the DEB. Coursework and program activities provide a basic understanding of the “business of biotech” and common platform technologies, develop transferable professional skills informed by interactions with industry partners, and prepare students for a diverse range of biotech-related careers. The UC Davis Biotechnology Program (<https://biotech.ucdavis.edu/>) is the administrative home for this program.

## Computational Social Science, Designated Emphasis

College of Letters & Science

Martin Hilbert, Ph.D., Chairperson of the Program

### Program Office

Communication; 370 Kerr Hall; 530-752-3464; Computational Social Science (<http://css.ucdavis.edu>); Faculty (<https://css.ucdavis.edu/our-people/>)

### Graduate Study

Computational social science provides scholars with the tools to deepen the understanding of long-standing questions in the social sciences, as well as explore new ones. The DE in Computational Social Science is both interdisciplinary in terms of requiring foundations in computational methods, data analysis, and social science theory, and it is multidisciplinary in terms of blurring the traditional boundaries between disciplines in the social sciences. This DE allows students with computational and mathematical skills to deepen their understanding of social science theory and to study unanswered social science research questions; and it allows students from the social sciences to improve their analytical skills in areas like big data analysis, computer simulations, network analysis and machine learning.

### Graduate Advisor

Consult Communication Program (<http://communication.ucdavis.edu/>) office.

## Critical Theory, Designated Emphasis

College of Letters & Science

Tobias Warner, Ph.D., Chairperson of the Program

### Program Office

207 Sproul Hall; Critical Theory (<http://crittheory.ucdavis.edu>)

### Committee in Charge

Executive Committee (<https://crittheory.ucdavis.edu/people/>); Faculty (<http://crittheory.ucdavis.edu/people/>)

### Graduate Study

The program in Critical Theory offers study and research leading to the Ph.D. with a designated emphasis in Critical Theory. The program provides theoretical emphasis and interdisciplinary perspective to students already preparing for the Ph.D. in one of 14 participating graduate programs (Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, History, Music, Psychology, Sociology, Spanish, Study of Religion, and Performance Studies).

Students complete all requirements for the Ph.D., including the dissertation, in one of the participating departments. Minimum coursework for the Critical Theory Designated Emphasis consists of four courses. The first three of these, CRI 200A, CRI 200B, and CRI 200C are taught by affiliated faculty, with CRI 200A normally being taken first. For the fourth course, students have the option of taking another section of CRI 200B or an approved course from any affiliated department.

### **Graduate Advisor**

Consult Critical Theory Program (<http://crittheory.ucdavis.edu>) office.

## **Feminist Theory & Research, Designated Emphasis**

**College of Letters & Science**

Christoph Hanssmann, Ph.D., Advisor

### **Program Office**

1200 Hart Hall; 530-752-6429; Gender, Sexuality & Women's Studies (<http://gsws.ucdavis.edu/welcome/>)

### **Graduate Study**

The Gender, Sexuality & Women's Studies Program at UC Davis offers a Designated Emphasis in Feminist Theory & Research. Currently, graduate students in the following sixteen affiliated Ph.D. programs are eligible to participate: Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, Geography, History, Native American Studies, Nursing, Performance Studies, Psychology, Sociology, Spanish, and the Study of Religion.

The Designated Emphasis in Feminist Theory & Research affords graduate students in affiliated programs the opportunity to augment their Ph.D. in a given discipline with a specialization in Feminist Theory & Research. Typically a doctoral student in good standing may seek admission to the Designated Emphasis in Feminist Theory & Research and enroll in Designated Emphasis in Feminist Theory & Research courses. Those students in affiliated Ph.D. programs who complete the requirements of the Designated Emphasis will have this noted on their transcripts and their Ph.D. diploma will note the "Special Emphasis in Feminist Theory & Research."

Students must complete all the requirements for the Ph.D. in their home department. The requirements for the Designated Emphasis in Feminist Theory & Research are the successful completion of the two core courses, Women's Studies GSW 200A & GSW 200B, and two additional courses focusing on gender, sexuality and women's studies; one in the student's home department and one outside their home department. A member of the DE affiliated faculty must be a member of the student's qualifying examination. As with the Qualifying Exam, one member of the candidate's dissertation committee must be a member of the DE. Analysis of gender or sexuality is expected to be a central component of both the student's qualifying examination and doctoral research.

Students should consult with the Chair of the Designated Emphasis in Feminist Theory & Research before enrolling in a graduate course for which they wish to receive credit to ensure that it will count toward fulfilling the requirements of the Designated Emphasis. If possible, please bring a copy of the syllabus or an expanded course description to your meeting.

### **Graduate Advisor**

Christoph Hanssmann (<https://gsws.ucdavis.edu/people/christoph-hanssmann/>); 1200 Hart Hall; 530-752-6429. For more information, see the Designated Emphasis (<https://gsws.ucdavis.edu/designated-emphasis/>).

## **Global Nutrition, Designated Emphasis**

Reina Engle-Stone, Ph.D., Chair

### **Program Office**

3253 Meyer Hall; 530-752-1992; Global Nutrition DE ([https://globalnutrition.ucdavis.edu/academics/designated\\_emphasis/](https://globalnutrition.ucdavis.edu/academics/designated_emphasis/)); Faculty (<https://globalnutrition.ucdavis.edu/people/faculty/>)

### **Graduate Study**

The Institute for Global Nutrition coordinates specialized course work and research leading to the Designated Emphasis in Global Nutrition for students in various graduate programs. The program focuses on both theoretical and practical issues concerning the identification, treatment, and prevention of human nutritional problems in low-income countries and in disadvantaged groups in the United States. Students enrolled in the Designated Emphasis are expected to (1) complete the course requirements already established by their respective graduate programs, (2) participate in a weekly advanced seminar in international and community nutrition, (3) complete additional core courses in international nutrition (NUT 219A, NUT 219B, NUT 258) and selected courses in the related disciplines of epidemiology, statistics, and social and behavioral sciences, and (4) conduct their dissertation research on a relevant topic under the supervision of a professor who is a member of the Institute for Global Nutrition.

Students enrolled in a doctoral program at UC Davis are eligible to apply for the Designated Emphasis. Upon graduation, students receive a Ph.D. in their major field, with specific recognition for the Designated Emphasis in Global Nutrition.

### **Graduate Advisor**

Contact the Program office.

## **Earth & Planetary Sciences**

**College of Letters & Science**

Magali Billen, Ph.D., Chairperson of the Department; term ends June 30, 2027

Ryosuke Motani, Ph.D., Vice-Chairperson, Undergraduate Program  
Michael Oskin, Ph.D., Vice-Chairperson, Graduate Program

### **Programs**

The Department of Earth & Planetary Sciences (<https://eps.ucdavis.edu/>) houses the following programs and courses; Faculty (<https://eps.ucdavis.edu/people/faculty/>).

### **Major Programs**

See Geology (p. 212) and Marine & Coastal Science (p. 216).

## Minor Programs

See Geology (p. 214), Environmental Geology (p. 209), Geophysics (p. 215), and Oceanography (p. 220).

## Graduate Programs

See Earth & Planetary Sciences, Master of Science (p. 209) and Earth & Planetary Sciences, Doctor of Philosophy (p. 209).

## Associated Program

Undergraduate students who might wish to become a K-12 STEM teacher should consult an advisor in the Cal Teach/Mathematics & Science Teaching Program (CalTeach/MAST) (<https://mast.ucdavis.edu/>) at their first opportunity in order to combine the prerequisites needed to apply for a credential program with general education requirements. The Teaching Credential Program (<https://education.ucdavis.edu/teaching-credentialma/>) at UC Davis resides in the School of Education.

## Courses

See courses listed under Geology (p. 925).

- Earth & Planetary Sciences, Master of Science (p. 209)
- Earth & Planetary Sciences, Doctor of Philosophy (p. 209)
- Environmental Geology, Minor (p. 209)
- Geology, Bachelor of Arts (p. 209)
- Geology, Bachelor of Science (p. 212)
- Geology, Minor (p. 214)
- Geophysics, Minor (p. 215)
- Marine & Coastal Science, Bachelor of Science (p. 216)
- Oceanography, Minor (p. 220)

# Earth & Planetary Sciences, Master of Science

College of Letters & Science

## Master of Science

The Earth & Planetary Sciences department offers programs of study and research leading to M.S. and Ph.D. degrees in Earth & Planetary Sciences. For more information, see Earth & Planetary Sciences Graduate Program (<https://eps.ucdavis.edu/students/grad/>).

## Degree Requirements & Program Coordinator

See Earth & Planetary Sciences (<https://grad.ucdavis.edu/programs/geps/>).

# Earth & Planetary Sciences, Doctor of Philosophy

College of Letters & Science

## Doctor of Philosophy

The Earth & Planetary Sciences department offers programs of study and research leading to M.S. and Ph.D. degrees in Earth & Planetary Sciences. For more information, see Earth & Planetary Sciences Graduate Program (<https://eps.ucdavis.edu/students/grad/>).

## Degree Requirements & Program Coordinator

See Earth & Planetary Sciences (<https://grad.ucdavis.edu/programs/geps/>).

# Environmental Geology, Minor

College of Letters & Science

The minor in Environmental Geology examines the multidisciplinary factors of geology and related earth science fields, and planning and resources-oriented programs. Students in the minor are encouraged to participate in internship programs that assist them in solidifying the Environmental Geology minor with their Geology major or other major field areas that include geologic components.

Students majoring in Geology (p. 212) may elect to complete a minor in Geophysics, Environmental Geology, or Oceanography. They may not complete a minor in Geology.

Students majoring in Marine & Coastal Science (p. 216) may elect to complete a minor in Geology, Geophysics, or Environmental Geology. They may not complete a minor in Oceanography.

The minor is sponsored by the Department of Earth & Planetary Sciences (p. 208).

## Advising

Visit the staff major advisor (<https://eps.ucdavis.edu/students/undergrad/advising/>) for help navigating minor requirements, policies, prerequisites, and course offerings. Visit the faculty major advisors (<https://eps.ucdavis.edu/students/undergrad/advising/>) for additional advice on courses, careers, and graduate school. Faculty Advisors: Same as Geology Major Faculty Advisors (p. 212).

Work with your major advisor and college advisors to fit a minor into your overall academic plan.

Declare your minor using the OASIS Minor Declaration form (<https://students.ucdavis.edu/forms/instructions/minordeclaration.aspx?sv=true>), due the quarter before graduation.

Total Units 27-28

# Geology, Bachelor of Arts

College of Letters & Science

"Civilization exists by geological consent—subject to change without notice." — Will Durant

Geology is the study of the Earth, and in particular its history, structure, and the processes that have molded our planet and its biosphere. Geology involves the origin of continents & ocean basins, earthquakes & volcanoes, variations in global climate, and how these physical changes impact the evolution of life. All of these planetary processes are viewed through the prism of "deep time," a perspective unique to geologists and one that distinguishes geology from most of the other physical sciences.

A significant component of geology is oriented toward the interaction between humans and the Earth. This aspect includes the study of resources such as minerals, oil, and water; identification & mitigation of Earth hazards such as earthquakes, landslides, floods, and volcanic eruptions; identification & mitigation of polluted ground water; land use planning; and the study of ancient & modern climate change.

## The Program

Students interested in becoming professional geologists or continuing their geological studies at the graduate level should choose the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into pre-college teaching. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and in-depth program of study.

### Undergraduate Research

The geosciences span many disciplines at UC Davis, and students have opportunities to participate in undergraduate research (<https://eps.ucdavis.edu/students/undergrad/gel/research/>) in a variety of interest areas. Many students choose to complete a senior thesis to develop their research and writing skills during their senior year.

### Internships & Careers

A degree in Geology provides students with knowledge and practical experience needed to pursue careers (<https://eps.ucdavis.edu/students/careers/>) in the geosciences (government, private sector, research, teaching). The major program includes flexibility to participate in research, internships, and fieldwork to help prepare students for these career paths.

### Global Learning in Geology

Consider studying or interning abroad through programs available through the Global Learning Hub (<https://eps.ucdavis.edu/students/undergrad/gel/studyabroad/>).

### Get Involved

Find your community (<https://eps.ucdavis.edu/students/undergrad/gel/involved/>) through clubs, events, seminars, and workshops relating to geoscience.

### Graduation Honors

Students graduating from the College of Letters & Science are eligible for Departmental Honors, depending on their GPA and whether or not they complete a Senior Thesis. Students who graduate with a GPA in the top percentages of their college (<https://catalog.ucdavis.edu/academic-information-policies-regulations/honors-prizes/>) will automatically graduate with Honors. Students who qualify for Honors at graduation may also be eligible for High Honors or Highest Honors, based upon the quality of their Senior Thesis (<https://eps.ucdavis.edu/students/>

[undergrad/gel/research/](#)) (course number 194A-194B) or Senior Honors Thesis (course number 194HA-194HB). It is Department of Earth and Planetary Sciences policy that an "A" grade on the thesis will earn the student High Honors, and an "A" grade will earn the student Highest Honors.

### Advising

Visit the staff major advisor (<https://eps.ucdavis.edu/students/undergrad/advising/>) for help navigating major requirements and planning for your degree. Visit the faculty major advisors (<https://eps.ucdavis.edu/students/undergrad/advising/>) for additional advice on courses, careers, and graduate school. Faculty advisors: R. Motani, D. A. Osleger, M. Rudolph.

Visit the College of Letters & Science advisors (<https://lettersandscience.ucdavis.edu/advising/>) for help navigating university requirements (<https://catalog.ucdavis.edu/undergraduate-education/university-degree-requirements/>) and college requirements (<https://catalog.ucdavis.edu/academic-information-policies-regulations/college-major-minor-information/>).

### Graduate Study

The coursework, research and internship opportunities, and fieldwork requirements in the Geology major help prepare students to enter graduate programs (<https://eps.ucdavis.edu/students/careers/gradschool/>) to continue their studies and prepare for their career. Students should meet with advisors and faculty to build a strong application for graduate school through additional independent research or other co-curricular involvements.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Geology Bachelor of Arts is 79.

LDA/ABT 150	Introduction to Geographic Information Systems		
SSC 100	Principles of Soil Science		
WFC 102	Field Studies in Fish Biology		
<i>Capstone</i>			
Choose two summer field courses. A senior thesis may only be substituted for one of the summer field courses with the consent of the thesis advisor and an undergraduate advisor. The decision to undertake a thesis in lieu of a summer field course must be declared by the end of the spring term of a student's junior year.		8-10	
Choose two:			
GEL 110A	Summer Field Geology: Structures & Neotectonics		
GEL 110B	Summer Field Geology: Volcanology		
GEL 110C	Summer Field Geology: Special Projects		
GEL 194A & GEL 194B	Senior Thesis and Senior Thesis		
or GEL 194HA & GEL 194HB	Senior Honors Project and Senior Honors Project		
		Total Units	19-24
<b>Geology, Minor</b>			
<b>College of Letters &amp; Science</b>			
The minor in Geology offers students a chance to emphasize in one of four areas: General Geology, Engineering Geology, Geochemistry, or Paleobiology.			
Students majoring in Geology (p. 212) may elect to complete a minor in Geophysics, Environmental Geology, or Oceanography. They may not complete a minor in Geology.			
Students majoring in Marine & Coastal Science (p. 216) may elect to complete a minor in Geology, Geophysics, or Environmental Geology. They may not complete a minor in Oceanography.			
The minor is sponsored by the Department of Earth & Planetary Sciences (p. 208).			
<b>Advising</b>			
Visit the staff major advisor ( <a href="https://eps.ucdavis.edu/students/undergrad/advising/">https://eps.ucdavis.edu/students/undergrad/advising/</a> ) for help navigating minor requirements, policies, prerequisites, and course offerings. Visit the faculty major advisors ( <a href="https://eps.ucdavis.edu/students/undergrad/advising/">https://eps.ucdavis.edu/students/undergrad/advising/</a> ) for additional advice on courses, careers, and graduate school. Faculty Advisors: Same as Geology Major Faculty Advisors (p. 212); except Paleobiology emphasis: R. Motani.			
Work with your major advisor and college advisors to fit a minor into your overall academic plan.			
Declare your minor using the OASIS Minor Declaration form ( <a href="https://students.ucdavis.edu/forms/instructions/minordeclaration.aspx?sv=true">https://students.ucdavis.edu/forms/instructions/minordeclaration.aspx?sv=true</a> ), due the quarter before graduation.			
<b>Code</b>	<b>Title</b>	<b>Units</b>	
Choose one of four emphases:		19-24	
General Geology Emphasis (p. 214)			
Engineering Geology Emphasis (p. 215)			
Geochemistry Emphasis (p. 215)			
Paleobiology Emphasis (p. 215)			
		Total Units	19-24
<b>General Geology Emphasis</b>			
<b>Code</b>	<b>Title</b>	<b>Units</b>	
GEL 001	The Earth	3-4	
or GEL 050	Physical Geology		
GEL 050L	Physical Geology Laboratory	2	
GEL 101	Structural Geology	3	
GEL 107	Earth History: Paleobiology	3	
GEL 108	Earth History: Paleoclimates	3	
GEL 109	Earth History: Sediments & Strata	3	
GEL/ESP 116N or GEL 134	Oceanography Environmental Geology & Land Use Planning	3	
		Total Units	20-21

## Engineering Geology Emphasis

Code	Title	Units	
ECI 171 & 171L	Soil Mechanics and Soil Mechanics Laboratory	5	
GEL 050 & 050L	Physical Geology and Physical Geology Laboratory	5	
Choose three:		9-14	
GEL 134	Environmental Geology & Land Use Planning		
GEL 161	Geophysical Field Methods		
GEL 162	Geophysics of the Solid Earth		
HYD 103N/ EBS 103	Fluid Mechanics Fundamentals		
HYD/EBS 144	Groundwater Hydrology		
HYD 146/GEL 156	Hydrogeology & Contaminant Transport		
SSC 118	Soils in Land Use & the Environment		
SSC 120	Soil Genesis, Morphology, & Classification		
Total Units		19-24	

## Geochemistry Emphasis

Code	Title	Units	
GEL 060	Earth Materials: Introduction	4	
GEL 146	Radiogenic Isotope Geochemistry & Cosmochemistry	3	
or GEL 148	Stable Isotopes & Geochemical Tracers		
CHE 110A	Physical Chemistry: Introduction to Quantum Mechanics	4	
CHE 110B	Physical Chemistry: Properties of Atoms & Molecules <sup>1</sup>	4	
Choose two electives:		6-9	
CHE 110C	Physical Chemistry: Thermodynamics, Equilibria & Kinetics		
GEL 108	Earth History: Paleoclimates		
GEL 146	Radiogenic Isotope Geochemistry & Cosmochemistry		
GEL 148	Stable Isotopes & Geochemical Tracers		
HYD 134	Aqueous Geochemistry		
SSC 102	Environmental Soil Chemistry		
Total Units		21-24	

1

Chemistry majors may substitute one of the elective courses for Chemistry CHE 110B.

## Paleobiology Emphasis

Code	Title	Units	
GEL 107	Earth History: Paleobiology	3	
GEL 107L	Earth History: Paleobiology Laboratory	2	
GEL 108	Earth History: Paleoclimates	3	
GEL 141	Evolutionary History of Vertebrates	3	
or GEL 144	Historical Ecology		
Choose at least 9 additional units:		9	
ANT 151	Primate Evolution		
Declare your minor using the OASIS Minor Declaration form ( <a href="https://students.ucdavis.edu/forms/instructions/minordeclaration.aspx?sv=true">https://students.ucdavis.edu/forms/instructions/minordeclaration.aspx?sv=true</a> ), due the quarter before graduation.			
Code	Title	Units	
Choose four:		12	
GEL 131	Risk: Natural Hazards & Related Phenomena		
GEL 160	Geological Data Analysis		

GEL 161	Geophysical Field Methods
GEL 162	Geophysics of the Solid Earth
GEL 163	Planetary Geology & Geophysics
Choose additional courses from above and/or from the following list to reach at least 18 total units for the minor.	6
ECI 175	Geotechnical Earthquake Engineering
ESM 100	Introduction to Water Science
GEL 101	Structural Geology
GEL/ESP 116N	Oceanography
GEL 130	Non-Renewable Natural Resources
GEL 134	Environmental Geology & Land Use Planning
GEL 142	Basin Analysis (Discontinued)
GEL 147	Geology of Ore Deposits (Discontinued)
GEL 149	Geothermal Systems (Discontinued)
GEL/ESP 150A	Physical & Chemical Oceanography
GEL/ESP 150B	Geological Oceanography
GEL 156/HYD 146	Hydrogeology & Contaminant Transport
HYD/EBS 144	Groundwater Hydrology

Total Units 18

## Marine & Coastal Science, Bachelor of Science

### College of Agricultural & Environmental Sciences

The major in Marine & Coastal Science focuses on the interdisciplinary nature of marine sciences by exposing students to core, breadth, and focus area courses in the discipline, in addition to a strong foundation of science preparatory material. The major builds upon UC Davis strengths in marine and coastal sciences, including field-based courses offered at Bodega Marine Laboratory to provide students a unique, interdisciplinary, "hands on" education. Advising is provided by the Department of Earth & Planetary Sciences for interested students.

### The Program

The major begins with introductory courses in mathematics, chemistry, physics, biology, and earth sciences. These are followed by core courses in Marine Science. The major requirements provide focus and breadth, so that each student gains mastery in one area and broad exposure to many facets of Marine & Coastal Science. Focus areas are:

- Coastal Environmental Processes
- Marine Ecology & Organismal Biology
- Marine Environmental Chemistry
- Oceans & the Earth System

In this major, students will be exposed to the foundation disciplines within marine science (biology, chemistry, geology, physics) as well as modern issues facing marine and coastal environments; e.g., climate change, pollution, carbon cycling, and conservation. The major requires field experience, independent research or internship, and concludes with a capstone course featuring current research in marine science. These integrative experiences will require students to synthesize the interdisciplinary topics that they have encountered through this degree program. The mastery achieved provides a strong foundation for future careers in academic science, government, policy, and the private

sector. For more information, see Marine & Coastal Science (<https://eps.ucdavis.edu/mcs/>).

### Focus Areas

The student's chosen Focus Area will determine the college into which the student is admitted, the college where the degree is awarded, and the associated department:

- **Coastal Environmental Processes.** College of Agricultural & Environmental Sciences; Environmental Science & Policy
- **Marine Ecology & Organismal Biology.** College of Biological Sciences; Evolution & Ecology
- **Marine Environmental Chemistry.** College of Agricultural & Environmental Sciences; Environmental Toxicology
- **Oceans & the Earth System.** College of Letters & Science; Earth & Planetary Sciences

### Undergraduate Research

The marine sciences span many departments and colleges at UC Davis, and so students have opportunities to participate in undergraduate research (<https://eps.ucdavis.edu/students/undergrad/mcsci/research/>) in many disciplines.

### Internships & Careers

A B.S. in Marine & Coastal Science provides students with knowledge and practical experience needed to pursue careers (<https://eps.ucdavis.edu/students/undergrad/mcsci/careers/>) in marine science (government, private sector, research). The major program includes research and internship experiences as well as field experience to help prepare students for these career paths.

### Advising

Visit the staff major advisor (<https://eps.ucdavis.edu/students/undergrad/advising/>) for help navigating major requirements and planning for your degree. Visit the faculty major advisors (<https://eps.ucdavis.edu/students/undergrad/advising/>) for additional advice on courses, careers, and graduate school. Faculty advisors: Tessa Hill (College of Letters & Science), Anne Todgham (College of Agricultural & Environmental Sciences), Rachael Bay (College of Biological Sciences).

Visit your college's advisors for help navigating University Degree Requirements and College Degree Requirements (p. 63).

### Bodega Marine Laboratory

Students in the Marine & Coastal Science major are required to complete some of their coursework at the Bodega Marine Laboratory (<https://marinescience.ucdavis.edu/bml/about/>) on the California Coast.

### Global Learning in Marine & Coastal Science

Consider studying or interning abroad through programs available through the Global Learning Hub (<https://eps.ucdavis.edu/students/undergrad/mcsci/studyabroad/>).

### Get Involved

Find your community (<https://eps.ucdavis.edu/students/undergrad/mcsci/involved/>) through clubs, events, seminars, and workshops relating to marine science.

### Graduation Honors

Students graduating from the College of Agricultural and Environmental Sciences or College of Biological Sciences are eligible for

Departmental Honors, High Honors, or Highest Honors depending on their GPA (<https://catalog.ucdavis.edu/academic-information-policies-regulations/honors-prizes/>). This is calculated automatically and added to students' final transcripts.

Students graduating from the College of Letters & Science are eligible for Departmental Honors, depending on their GPA and whether or not they complete a Senior Thesis. Students who graduate with a GPA in the top percentages of their college (<https://catalog.ucdavis.edu/academic-information-policies-regulations/honors-prizes/>) will automatically graduate with Honors. Students who qualify for Honors at graduation may also be eligible for High Honors or Highest Honors, based upon the quality of their Senior Thesis (course number 194A-194B) or Senior Honors Thesis (course number 194HA-194HB). It is Department of Earth and Planetary Sciences policy that an "A-" grade on the thesis will earn the student High Honors, and an "A" grade will earn the student Highest Honors.

## Graduate Study

The coursework, research opportunities, and fieldwork requirements in the Marine & Coastal Science major help prepare students to enter graduate programs to continue their studies and prepare for their career in the marine sciences. Students should meet with advisors and faculty to build a strong application for graduate school through additional independent research or other co-curricular involvements.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Marine & Coastal Science Bachelor of Science is 95.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
<i>Biological Science</i>		
BIS 002A & BIS 002B & BIS 002C	Introduction to Biology: Essentials of Life on Earth and Introduction to Biology: Principles of Ecology & Evolution and Introduction to Biology: Biodiversity & the Tree of Life	15
<i>Chemistry</i>		
Choose a series: <sup>1</sup>		15
CHE 002A & CHE 002B & CHE 002C	General Chemistry and General Chemistry and General Chemistry	
<b>OR</b>		
CHE 004A & CHE 004B & CHE 004C	General Chemistry for the Physical Sciences & Engineering and General Chemistry for the Physical Sciences & Engineering and General Chemistry for the Physical Sciences & Engineering	
<i>Organic Chemistry</i>		
Choose a series; only required for students in the Marine Ecology & Organismal Biology focus area: <sup>2</sup>		0-13
CHE 008A & CHE 008B	Organic Chemistry: Brief Course and Organic Chemistry: Brief Course	
<b>OR</b>		
CHE 118A & CHE 118B & CHE 118C	Organic Chemistry for Health & Life Sciences and Organic Chemistry for Health & Life Sciences and Organic Chemistry for Health & Life Sciences	
<b>OR</b>		
CHE 128A & CHE 128B & CHE 128C & CHE 129A & CHE 129B	Organic Chemistry and Organic Chemistry and Organic Chemistry and Organic Chemistry Laboratory and Organic Chemistry Laboratory	
<b>Mathematics</b>		
Choose a series; students in Marine Ecology & Organismal Biology focus area must take MAT 017A-MAT 017B-MAT 017C or MAT 021A-MAT 021B. <sup>3</sup>		8-12
MAT 016A & MAT 016B DISCC & MAT 016C DISCO	and and (Discontinued)	
<b>OR</b>		
MAT 017A & MAT 017B & MAT 017C	Calculus for Biology & Medicine and Calculus for Biology & Medicine and Calculus for Biology & Medicine	
<b>OR</b>		
MAT 019A & MAT 019B & MAT 019C	Calculus for Data-Driven Applications and Calculus for Data-Driven Applications and Calculus for Data-Driven Applications	
<b>OR</b>		
MAT 021A & MAT 021B & MAT 021C	Calculus and Calculus and Calculus	
<b>Physics</b>		
Choose a series: <sup>4</sup>		12-15
PHY 007A & PHY 007B & PHY 007C	General Physics and General Physics and General Physics <sup>6</sup>	
<b>OR</b>		
PHY 009A & PHY 009B & PHY 009C	Classical Physics and Classical Physics and Classical Physics	
<b>Recommended:</b>		
EVE 012	Life in the Sea	
GEL 016 or GEL 016V	The Oceans The Oceans	
<b>Preparatory Subject Matter Subtotal</b>		50-70
<b>Depth Subject Matter</b>		
STA 100	Applied Statistics for Biological Sciences	4
EVE/ESP 111	Marine Environmental Issues	1
Choose three of the following four:		10-11
GEL/ESP 116N	Oceanography	
GEL/ESP 150A	Physical & Chemical Oceanography	
GEL/ESP 150B	Geological Oceanography	
GEL/ESP 150C	Biological Oceanography	
<b>Choose two:</b>		
ATM 120	Atmospheric Thermodynamics & Cloud Physics	7-8

ESP 100	General Ecology	ESP 123	Introduction to Field & Laboratory Methods in Ecology
ESP 110	Principles of Environmental Science	ESP 151L	Limnology Laboratory
ETX 101	Principles of Environmental Toxicology	EVE 112L	Biology of Invertebrates Laboratory
EVE 100	Introduction to Evolution	EVE 115	Marine Ecology
EVE 101	Introduction to Ecology	GEL 109L	Earth History: Sediments & Strata Laboratory
EVE 112	Biology of Invertebrates	GEL 182	Field Studies in Marine Geochemistry (Discontinued)
HYD 103N/ EBS 103	Fluid Mechanics Fundamentals	WFC 100	Field Methods in Wildlife, Fish, & Conservation Biology
Marine Ecology & Organismal Biology Focus Area Only:		WFC 102L	Field Studies in Fish Biology: Laboratory
BIS 101 or BIS 101V	Genes & Gene Expression	WFC 157	Coastal Ecosystems
BIS 104	Cell Biology	Field Requirement Subtotal	
BIS 105 or BIS 102 & BIS 103	Biomolecules & Metabolism Structure & Function of Biomolecules and Bioenergetics & Metabolism	0-14	
Depth Subject Matter Subtotal:	22-37	<b>Internship/Research</b>	
Courses cannot be utilized to fulfill multiple requirements, with the exception that any Bodega Marine Laboratory course simultaneously fulfills the field requirement below and ETX 127/NUT 127 may satisfy both a course and the Research Requirement.		Choose three units:	3
<b>Focus Area</b>		ETX/NUT 127	Environmental Stress & Development in Marine Organisms (may satisfy both a course above and the Internship/Research Requirement.)
Complete at least four courses from one category below, totaling at least 12 units.		BIS 124	Coastal Marine Research
Coastal Environmental Processes; College of Agricultural & Environmental Sciences; Environmental Science & Policy (p. 219)		ESP 192	Internship
Marine Ecology & Organismal Biology; College of Biological Sciences; Evolution & Ecology (p. 219)		EVE 192	Internship
Marine Environmental Chemistry; College of Agricultural & Environmental Sciences; Environmental Toxicology (p. 219)		EVE 199	Special Study for Advanced Undergraduates
Oceans & the Earth System; College of Letters & Science; Earth & Planetary Sciences (p. 219)		GEL 192	Internship in Geology
Focus Area Requirement Subtotal	12	GEL 199	Special Study for Advanced Undergraduates (or the equivalent)
<b>Breadth Requirement</b>		Internship/Research Subtotal	
Complete one course from each category below, that is not the student's chosen Focus Area, totaling at least 8 units.		3	
Coastal Environmental Processes (p. 220)		<b>Total Units</b>	
Marine Ecology & Organismal Biology (p. 220)		95-144	
Marine Environmental Chemistry (p. 220)		1	
Oceans & the Earth System (p. 220)		With BASC advisor approval, these combinations also satisfy the Chemistry requirement: CHE 004A-CHE 002A (3 units w/no lab)-CHE 002B-CHE 002C; CHE 004A-CHE 004B-CHE 002C.	
Breadth Requirement Subtotal	8	2	
With BASC advisor approval, these combinations also satisfy the Organic Chemistry requirement: CHE 118A-CHE 008B; CHE 128A-CHE 128B-CHE 008B; CHE 128A-CHE 118B-CHE 118C; CHE 128A-CHE 128B-CHE 129A-CHE 118C; CHE 118A-CHE 128B-CHE 128C-CHE 129A-CHE 129B; CHE 118A-CHE 118B-CHE 128C-CHE 129B.			
<b>Field Requirement</b>		3	
Fulfill the Field Requirement	0-14	With BASC advisor approval, these combinations also satisfy the Mathematics requirement: MAT 021A-MAT 017B-MAT 017C; MAT 017A-MAT 021B.	
The Field Requirement provides exposure to field techniques, experimental design, and the marine environment itself. It is highly recommended that students fulfill this requirement by residence at Bodega Marine Laboratory for one or more courses. Bodega Marine Laboratory courses may simultaneously fulfill an additional requirement in categories above		4	
<b>OR</b>		Students may be able to complete their Physics requirement by blending the PHY 007 & PHY 009 series. For more details about how to do so and course placement, students will need to follow up with the PHY department. Students in the College of Biological Sciences will also need to follow up with a BASC advisor to discuss their plans.	
Alternatively, students may fulfill the Field Requirement by taking two of the following courses; these courses cannot fulfill multiple requirements:			

## Focus Area Requirement

Complete at least four courses from one category below, totaling at least 12 units.

### Coastal Environmental Processes

Emphasis on processes and environments of the coastal zone, and the strong physical-biological connection that exists here. Courses highlight the critical terrestrial marine interface and fundamental physical processes in the coastal zone.

*The focus area requirement can be fulfilled using:*

Code	Title	Units
ATM 121A	Atmospheric Dynamics	4
ATM 121B	Atmospheric Dynamics	4
ATM 158	Boundary-Layer Meteorology	4
ETX 102A	Environmental Fate of Toxicants	4
ESP 152	Coastal Oceanography	3
ESP 155	Wetland Ecology	4
ESP 155L	Wetland Ecology Laboratory (Discontinued)	3
ESP 166	Ocean & Coastal Policy	3
GEL 156/HYD 146	Hydrogeology & Contaminant Transport	5
GEL 182	Field Studies in Marine Geochemistry (Discontinued)	2-8
HYD 103N/EBS 103	Fluid Mechanics Fundamentals	4
HYD 134	Aqueous Geochemistry	6
HYD 143	Ecohydrology	4
HYD/EBS 144	Groundwater Hydrology	4
WFC 157	Coastal Ecosystems	4

1

HYD 134 is a 5 unit course; see your advisor (<https://lawr.ucdavis.edu/students/undergrad-programs/hydrology/>) for options.

### Marine Ecology & Organismal Biology

Focus on physiological adaptations to the marine environment, and the biology of marine species from the molecular to population levels. Courses include emphasis on the ecological processes that determine the distribution and abundance of marine organisms, and the patterns and mechanisms of evolution in the ocean.

*The focus area requirement can be fulfilled using:*

Code	Title	Units
ANS 131	Reproduction & Early Development in Aquatic Animals	4
BIS 122	Population Biology & Ecology	3
BIS 122P	Population Biology & Ecology/Advanced Laboratory Topics	5
BIS 124	Coastal Marine Research	6
ESP 100	General Ecology	4
ESP 121	Population Ecology	4
ESP 124	Marine & Coastal Field Ecology	3
ESP 155	Wetland Ecology	4
ESP 155L	Wetland Ecology Laboratory (Discontinued)	3
EVE 100	Introduction to Evolution	4
EVE 101	Introduction to Ecology	4

EVE 106	Mechanical Design in Organisms	3
EVE 112	Biology of Invertebrates	3
EVE 112L	Biology of Invertebrates Laboratory	2
EVE 114	Experimental Invertebrate Biology	3
EVE 115	Marine Ecology	4
EVE 120	Global Change Ecology	3
ETX/NUT 127	Environmental Stress & Development in Marine Organisms	10
WFC 120	Biology & Conservation of Fishes	3
WFC 120L	Laboratory in Biology & Conservation of Fishes	2
WFC 121	Physiology of Fishes	4
WFC 122	Population Dynamics & Estimation	4
WFC 130	Physiological Ecology of Wildlife	4

### Marine Environmental Chemistry

Emphasis on major themes in marine chemistry, geochemistry, the carbon cycle, and contaminant fate and transport.

*The focus area requirement can be fulfilled using:*

Code	Title	Units
CHE 100	Environmental Water Chemistry	3
ECI 140A	Environmental Analysis of Aqueous Systems (Not open for credit to students who have taken CHE 100)	4
ETX 101	Principles of Environmental Toxicology	4
ETX 102A	Environmental Fate of Toxicants	4
ETX 120	Perspectives in Aquatic Toxicology	4
ETX/NUT 127	Environmental Stress & Development in Marine Organisms	10
GEL 148	Stable Isotopes & Geochemical Tracers	3
GEL 182	Field Studies in Marine Geochemistry (Discontinued)	2-8
HYD 134	Aqueous Geochemistry	6
HYD 141	Physical Hydrology	4
WFC 153	Wildlife Ecotoxicology	4

1

HYD 134 is a 5 unit course; see your advisor (<https://lawr.ucdavis.edu/students/undergrad-programs/hydrology/>) for options.

### Oceans & the Earth System

A study of our changing oceans in the context of earth system history, including climate change, paleoceanography, ecological shifts, conservation, and marine policy.

*The focus area requirement can be fulfilled using:*

Code	Title	Units
ATM 116	Modern Climate Change	3
ESM 120	Global Environmental Interactions	4
ESM 121	Water Science & Management	3
ESP 110	Principles of Environmental Science	4
ESP 161	Environmental Law	4
ESP 162	Environmental Policy	4
ESP 166	Ocean & Coastal Policy	3

ESP 169	Water Policy & Politics	3	GEL 182	Field Studies in Marine Geochemistry	2-8
EVE 120	Global Change Ecology	3		(Discontinued)	
GEL 107	Earth History: Paleobiology	3	HYD 134	Aqueous Geochemistry	6
GEL 107L	Earth History: Paleobiology Laboratory	2	HYD 141	Physical Hydrology	4
GEL 108	Earth History: Paleoclimates	3	1		
GEL 109	Earth History: Sediments & Strata	3	HYD 134 is a 5 unit course; see your advisor ( <a href="https://lawr.ucdavis.edu/students/undergrad-programs/hydrology/">https://lawr.ucdavis.edu/students/undergrad-programs/hydrology/</a> ) for options.		
GEL 109L	Earth History: Sediments & Strata Laboratory	2			
GEL 144	Historical Ecology	3			
SAS 120	Science & Contemporary Societal Issues	3			
WFC 144	Marine Conservation Science	4			
WFC 154	Conservation Biology	4			

## Breadth Requirement

Complete one course from each category below, that is not the student's chosen Focus Area, totaling at least 8 units.

### Coastal Environmental Processes

The breadth requirement can be fulfilled using the following courses:

Code	Title	Units
ATM 158	Boundary-Layer Meteorology	4
ECI 140B	Chemical Principles for Environmental Engineers	4
ESP 110	Principles of Environmental Science	4
ESP 152	Coastal Oceanography	3
ESP 155	Wetland Ecology	4
GEL 182	Field Studies in Marine Geochemistry (Discontinued)	2-8
WFC 157	Coastal Ecosystems	4

### Marine Ecology & Organismal Biology

The breadth requirement can be fulfilled using the following courses:

Code	Title	Units
BIS 124	Coastal Marine Research	6
ESP 124	Marine & Coastal Field Ecology	3
ESP 155	Wetland Ecology	4
EVE 106	Mechanical Design in Organisms	3
EVE 114	Experimental Invertebrate Biology	3
EVE 115	Marine Ecology	4
EVE 120	Global Change Ecology	3
ETX/NUT 127	Environmental Stress & Development in Marine Organisms	10

### Marine Environmental Chemistry

The breadth requirement can be fulfilled using the following courses:

Code	Title	Units
CHE 100	Environmental Water Chemistry	3
ECI 140B	Chemical Principles for Environmental Engineers	4
ETX 120	Perspectives in Aquatic Toxicology	4
ETX/NUT 127	Environmental Stress & Development in Marine Organisms	10

## Oceans & the Earth System

The breadth requirement can be fulfilled using the following courses:

Code	Title	Units
ATM 116	Modern Climate Change	3
ESP 166	Ocean & Coastal Policy	3
EVE 120	Global Change Ecology	3
GEL 107	Earth History: Paleobiology	3
GEL 108	Earth History: Paleoclimates	3
WFC 144	Marine Conservation Science	4
WFC 154	Conservation Biology	4

## Total Units for the Major by Chosen Focus Area

Focus Area	Units
Oceans & the Earth System (Letters & Science)	95-118
Marine Ecology & Organismal Biology (Biological Sciences)	110-144
Marine Environmental Chemistry (Agricultural & Environmental Sciences)	95-118
Coastal Environmental Processes (Agricultural & Environmental Sciences)	95-118

## Oceanography, Minor

### College of Letters & Science

Oceanography is the study of the earth's oceans, investigating connections between geological, biological, chemical and physical processes in the marine realm, and the interactions between the Earth's ocean/atmosphere system. The interdisciplinary minor in oceanography is for students with backgrounds in any of these fields, as well as those interested in marine policy and conservation. The curriculum reflects the integrative nature of oceanography, with core courses covering the major disciplines in oceanography and elective courses that allow students to cater the minor to their interests. The oceanography minor includes courses taught at the Davis campus and courses offered at Bodega Marine Laboratory.

Students majoring in Geology (p. 212) may elect to complete a minor in Geophysics, Environmental Geology, or Oceanography. They may not complete a minor in Geology.

Students majoring in Marine & Coastal Science (p. 216) may elect to complete a minor in Geology, Geophysics, or Environmental Geology. They may not complete a minor in Oceanography.

The minor is sponsored by the Department of Earth & Planetary Sciences (p. 208).

## Advising

Visit the staff major advisor (<https://eps.ucdavis.edu/students/undergrad/advising/>) for help navigating minor requirements, policies, prerequisites, and course offerings. Visit the faculty major advisors (<https://eps.ucdavis.edu/students/undergrad/advising/>) for additional advice on courses, careers, and graduate school. Faculty Advisor: T. M. Hill.

Work with your major advisor and college advisors to fit a minor into your overall academic plan.

Declare your minor using the OASIS Minor Declaration form (<https://students.ucdavis.edu/forms/instructions/minordeclaration.aspx?sv=true>), due the quarter before graduation.

Code	Title	Units
GEL/ESP 116N	Oceanography	3
Choose two:		7-8
GEL/ESP 150A	Physical & Chemical Oceanography	
GEL/ESP 150B	Geological Oceanography	
GEL/ESP 150C	Biological Oceanography *	
Choose additional courses from above and/or from the following list to reach at least 18 total units for the minor:		8
ATM 121A	Atmospheric Dynamics	
ATM 121B	Atmospheric Dynamics	
ATM 158	Boundary-Layer Meteorology	
ESP 124	Marine & Coastal Field Ecology *	
ESP 152	Coastal Oceanography (Discontinued) *

## East Asian Languages & Cultures

College of Letters & Science

Mark Halperin, Ph.D.; term ends June 30, 2025

## Department Office

211 Sproul Hall; 530-752-4999; East Asian Languages & Cultures (<https://ealc.ucdavis.edu/>); Faculty (<https://ealc.ucdavis.edu/people/>)

## The Major Program

The department offers a core language program in both Chinese (p. 221) and Japanese (p. 223), and courses in literature and culture.

- Chinese, Bachelor of Arts (p. 221)
- Chinese, Minor (p. 223)
- Japanese, Bachelor of Arts (p. 223)
- Japanese, Minor (p. 225)

## Chinese, Bachelor of Arts

College of Letters & Science

### The Major Program

The department offers a core language program in Chinese, and courses in literature and culture. The core language program has two tracks: one for students who have no Chinese-language background whatsoever and one for students with prior background.

### The Program

Practical language skills are taught using contemporary methods and materials, so that upon entering the upper division a student will have attained substantial fluency in the spoken language (listening and speaking) and the written language (reading and writing). Upper division courses balance the need to further develop language skills with the need to understand and appreciate the richness and diversity of Chinese culture. All students are encouraged to combine their study of language and literature with courses in related fields, and to study abroad through the Global Learning Hub (<https://globallearning.ucdavis.edu/>) or through internships in China or Taiwan.

### Career Opportunities

UC Davis graduates have learned that a major in Chinese is a meaningful, earned distinction that facilitates entrance to graduate programs and professional schools. In addition, job opportunities abound in virtually all career paths, especially for graduates who have completed study abroad.

### Honors Program

To be eligible to receive high or highest honors in the Chinese major, students must complete a senior thesis project. A student interested in pursuing a senior thesis project must enroll in CHN 194H and complete a scholarly paper or similar research project under the direction of a senate faculty member. The thesis project will have a minimum duration of two quarters and carry a minimum of 6 units of credit. Up to 4 CHN 194H units earned can be counted toward the major requirements. To qualify to undertake the senior thesis project, a student must have completed at least 135 units with a minimum GPA of 3.500 in courses counted toward the major. Interested students should consult with faculty in their field of interest by the quarter before they hope to commence work on the project (in most cases this will be the Spring Quarter of their junior year). Students who complete the senior thesis project and have an overall GPA that qualifies them for honors may be recommended by the faculty for honors, high honors, or highest honors at graduation.

### Education Abroad Program

The university maintains study abroad programs in China, Hong Kong, and Taiwan. They offer excellent opportunities for students to polish their language skills and experience Asian cultures firsthand. Students are encouraged to participate. Appropriate courses taken abroad can be applied toward the major or the minor. For details, see the

department's undergraduate advisor or the Global Learning Hub (<https://globallearning.ucdavis.edu/>).

## Related Courses

See East Asian Studies (EAS) (p. 790) course list.

## Prerequisite Credit

No student may repeat a course if that course is a prerequisite for a course that has already been completed with a grade of C– or better.

## Placement

Chinese CHN 001 is intended for beginning students with no prior knowledge of the Chinese language. Students who do have some knowledge but wish to improve their skills should meet with an advisor to discuss appropriate placement. Students must follow departmental guidelines for placement in all language courses and instructor approval is required for enrollment.

## Backtracking

Satisfactory completion of a language course is evidence that a student's language skills are beyond the level of those expected in its prerequisite courses. Accordingly, students who have completed a language course cannot go back and take its prerequisites. If the prerequisite courses are required for the major, students may substitute other courses. Students who are not sure how this requirement applies to them should speak to the undergraduate advisor.

## Waived Language Courses

Students with exceptional language ability may waive required language courses. If lower division courses have been waived, students will not have to take courses in their place. If upper division courses have been waived, students can use other appropriate courses to earn the units they need to complete the major. Consult the undergraduate advisor regarding the selection of appropriate courses.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Chinese Bachelor of Arts is 40.

## East Asian Studies

### College of Letters & Science

Eddy U, Ph.D., Program Director; term ends June 30, 2025

### Program Office

1277 Social Science & Humanities Building; 530-752-3406; East Asian Studies (<http://eastasian.ucdavis.edu>); Faculty (<https://eastasian.ucdavis.edu/person-type/affiliated-faculty/>)

- East Asian Studies, Bachelor of Arts (p. 226)
- East Asian Studies, Minor (p. 228)

## East Asian Studies, Bachelor of Arts

### College of Letters & Science

The East Asian Studies major gives the student an understanding of East Asia and Southeast Asia through interdisciplinary studies, including courses on East Asian countries within the humanities and social sciences. Students are encouraged to pursue study abroad opportunities, as well as other guided studies pertaining to East and Southeast Asia.

### The Program

The program offers core courses in East Asian humanities and social sciences, including history, comparative literature, languages, philosophy and religion, political science, sociology, as well as courses focused on Southeast Asia. Science courses that closely engage the student of East and/or Southeast Asia are also eligible to count towards the major.

Along with taking the lower division and upper division depth subject courses; the student may choose additional courses that concentrate on a special field of interest, such as anthropology or history, or special courses such as honor thesis, independent study, internships, and study abroad.

### Programs, Internships, & Career Alternatives

To enhance the student's understanding of East and Southeast Asia, our majors are strongly encouraged to participate in UC Davis's Study Abroad Program, which gives students the opportunity to live and experience culture within East or Southeast Asia. Our majors are also encouraged to work with UC Davis's Internship and Career Center, which provides customized assistance for EAS students to obtain legislative, legal, and business internships and careers. Likewise, the UC Davis Sacramento and Washington Centers arrange internships and run full-credit academic programs in Sacramento and Washington D.C., with a wide range of opportunities for our majors. Graduating EAS majors are prepared for employment in government agencies (such as Foreign Service), state agencies, international or non-governmental organizations (NGO, such as the United Nations), foundations, journalism, teaching, counseling, and companies with international business interests, trade, or finance. The broad-based and multidisciplinary components of this major program enhance career prospects in jobs that demand knowledge of the cultures of East and Southeast Asia.

Approved courses: EAS 190, EAS 192, EAS 194H, EAS 196A-EAS 196B, EAS 198—maximum 12 units from this list

## East Asian Studies, Minor

### College of Letters & Science

Courses taken for the minor are expected to reflect a predominant interest in East Asia or Southeast Asia. All upper division courses counting towards the East Asian Studies major, may be used to fulfill the requirements for the minor program, as long as they deal predominantly with East Asia or Southeast Asia.

Code	Title	Units

## Ecology (Graduate Group)

### College of Agricultural & Environmental Sciences

Robert Hijnmans, Ph.D., Chairperson of the Group

## Group Office

1005 Wickson Hall; 530-752-6752; Ecology Graduate Group (<http://ecology.ucdavis.edu>); Faculty (<https://ecology.ucdavis.edu/gge-faculty/>)

- Ecology, Master of Science (p. 228)
- Ecology, Doctor of Philosophy (p. 228)
- Ecology, Doctor of Philosophy (Joint Doctorate with SDSU) (p. 229)

## Ecology, Master of Science

### College of Agricultural & Environmental Sciences

Robert Hijnmans, Ph.D., Chairperson of the Group

## Graduate Study

The Graduate Group in Ecology offers M.S. and Ph.D. degrees. Ecology is a science that integrates numerous fields of study to attain deep understanding of natural and societal influences on the distribution, abundances, behaviors, traits, and ecosystem functions of organisms. In order to accommodate varied student interests, the Group has developed several 'areas of emphasis' with specialized programs of study: agricultural ecology, conservation ecology, ecological genomics and genetics, ecosystems and landscape ecology, ecotoxicology and physiological ecology, environmental policy and human ecology, integrative ecology, marine ecology, and restoration ecology. For further details, contact the Group office.

## Preparation

Appropriate preparation is undergraduate work in any of the biological, social or behavioral, and physical sciences, mathematics or engineering. Applicants will normally be expected to have completed the following courses during the undergraduate years or shortly after matriculating: one course each in introductory biology, general chemistry, physics, calculus, statistics, and an upper division introduction to ecology course.

## Degree Requirements & Program Coordinator

See Ecology (<https://grad.ucdavis.edu/programs/gecl/>).

## Ecology, Doctor of Philosophy

### College of Agricultural & Environmental Sciences

Robert Hijnmans, Ph.D., Chairperson of the Group

## Graduate Study

The Graduate Group in Ecology offers M.S. and Ph.D. degrees. Ecology is a science that integrates numerous fields of study to attain deep understanding of natural and societal influences on the distribution, abundances, behaviors, traits, and ecosystem functions of organisms. In order to accommodate varied student interests, the Group has developed several 'areas of emphasis' with specialized programs of study: agricultural ecology, conservation ecology, ecological genomics and genetics, ecosystems and landscape ecology, ecotoxicology and physiological ecology, environmental policy and human ecology, integrative ecology, marine ecology, and restoration ecology. See Ecology (<https://grad.ucdavis.edu/programs/gecl/>).

# Ecology, Doctor of Philosophy (Joint Doctorate with SDSU)

College of Agricultural & Environmental Sciences

Jeremy Long, Ph.D., Chairperson of the JDPE Program

## Graduate Study

The JDPE is a doctoral degree that is run jointly by the Ecology Program at San Diego State University and the Ecology Graduate Group at UC Davis. The joint nature of the doctoral program offers two primary advantages. First, students benefit from contact and expertise in and outside of the classroom with faculty members of two strong ecology programs. Second, across the two campuses, students have the opportunity to access facilities and field sites in nearly all the major biomes of California. JDPE students spend their first year at San Diego State University with their advisor to begin the preparation of a thesis proposal. The student then moves to UC Davis for additional course work and for the Qualifying Examination. On return to San Diego State University, the thesis research is completed, and the dissertation is prepared and defended. The Ph.D. degree is awarded jointly by San Diego State University and UC Davis.

## Preparation

Appropriate preparation is undergraduate work in any of the biological, social or behavioral, and physical sciences, mathematics or engineering. Applicants will normally be expected to have completed the following courses during the undergraduate years or shortly after matriculating: one course each in introductory biology, general chemistry, physics, calculus, statistics, and an upper division introduction to ecology course.

# Economics, Bachelor of Arts

College of Letters & Science

The Department of Economics at UC Davis trains students from diverse backgrounds in pursuit of solutions to society's most pressing economic problems using research and interdisciplinary ideas at the frontier of knowledge.

## The Program

Economics majors all complete core courses that include principles, intermediate theory, quantitative methods and economic history. In addition to these core courses, students are free to take a variety of classes according to their own individual interests across the discipline. Some students choose to specialize in behavior and strategy, data analytics and economic analysis, economic history, international macro-finance, policy, or poverty and inequality.

## Major Advisors

Contact Department office at [eheadvisingcenter@ucdavis.edu](mailto:eheadvisingcenter@ucdavis.edu) or 530-752-9142.

## Internships & Career Alternatives

Internships for economics majors have been arranged at banks, brokerages, other business enterprises, and governmental units. The internships must complement the student's course work. A degree in economics is excellent preparation for students who want to go on to law school, business school, advanced work in economics, or graduate work in international relations. It is also a good background for careers in management and positions with the government.

## Course Limits

Students are expected to take ECN 100A, ECN 100B, and ECN 101 at UC Davis.

Students may receive one specialization only for the major.

Except under extraordinary circumstances, not more than two economics courses should be taken in any one quarter. In special cases, the department will accept a limited number of related upper division courses from other departments in satisfaction of the economics upper division course requirements. Approval from a departmental advisor is required in all such cases.

Graduation with High or Highest Honors. To be eligible for departmental recommendation for High or Highest Honors in Economics at graduation, a student must take all upper division courses in Economics for a letter grade, earn at least a 3.500 grade point average in those courses, and complete at least eight units of course work that result in the submission of an Honors project. Consult the College of Letters and Science section of this catalog and contact the Department for more information.

## Study Abroad

The Economics Department wishes to accommodate students who would like to complement their economics degree with a study abroad experience. Up to 20 units of upper division credit from foreign campuses (excluding ECN 100A, ECN 100B, and ECN 101) may be used towards the completion of the degree. To ensure that foreign courses will apply towards the economics degree, students need to select courses from the pre-approved list at the UC Davis Study Abroad office or seek pre-approval in the economics department for the foreign courses they wish to complete.

## Recommended

Students considering graduate study in economics are strongly urged to take MAT 021A-MAT 021B-MAT 021C and MAT 022A.

## American History & Institutions

This University requirement can be satisfied by completion of ECN 111A, ECN 111B; see also under Bachelor's Degree Requirements (p. 59).

## Graduate Study

Students who meet the admission requirements of Graduate Studies and the Department of Economics may pursue studies leading to M.A. and Ph.D. degrees. Fields of emphasis for graduate study include: Microeconomic Theory, Macroeconomic Theory, Econometrics, Economic Development, Economic History, Industrial Organization, International Economics, Labor Economics and Public Economics. For information on admission to graduate study, degree requirements, and financial aid, consult the Graduate Announcement and Department of Economics (<https://www.econ.ucdavis.edu/graduate-program/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Economics Bachelor of Arts is 64.

## Economics, Master of Arts

College of Letters & Science

### Graduate Study

Students who meet the admission requirements of Graduate Studies and the Department of Economics may pursue studies leading to a Ph.D. degree. Fields of emphasis for graduate study include: Microeconomic Theory, Macroeconomic Theory, Econometrics, Economic Development, Economic History, Industrial Organization, International Economics, Labor Economics and Public Economics. For information on admission to graduate study, degree requirements, and financial aid, consult the Graduate Announcement and Economics.

The Master of Arts degree is offered only en route to the Ph.D.

### Degree Requirements & Program Coordinator

See Economics (<https://grad.ucdavis.edu/programs/gecn/>).

### Recommended Courses

Students considering graduate study in economics are strongly urged to take MAT 021A-MAT 021B-MAT 021C and MAT 022A.

## Economics, Doctor of Philosophy

College of Letters & Science

### Graduate Study

Students who meet the admission requirements of Graduate Studies and the Department of Economics may pursue studies leading to a Ph.D. degree. Fields of emphasis for graduate study include: Microeconomic Theory, Macroeconomic Theory, Econometrics, Economic Development, Economic History, Industrial Organization, International Economics, Labor Economics and Public Economics. For information on admission to graduate study, degree requirements, and financial aid, consult the Graduate Announcement and Economics (<http://www.econ.ucdavis.edu>).

### Degree Requirements & Program Coordinator

See Economics (<https://grad.ucdavis.edu/programs/gecn/>).

### Recommended Courses

Students considering graduate study in economics are strongly urged to take MAT 021A-MAT 021B-MAT 021C and MAT 022A.

## Education, School of

School of Education

Tom Smith, Dean

Yuuko Uchikoshi Tonkovich, Ph.D., Associate Dean for Academic Programs & Instruction

Gloria Rodriguez, Ph.D., Associate Dean of Faculty Affairs

### Group Office

School of Education Building; 530-752-7259; School of Education (<https://education.ucdavis.edu>); Advising ([eduadvising@ucdavis.edu](mailto:eduadvising@ucdavis.edu)); Faculty (<https://education.ucdavis.edu/graduate-group-education-faculty>)

- Education, Minor (p. 236)
- Education, Master of Arts (p. 238)
- Education, Doctor of Philosophy (p. 238)
- Education Leadership, Doctorate of Education (CANDEL) (p. 238)
- Integrated Teaching Credential, Teaching Credential, Master of Arts (p. 238)

## Education, Minor

School of Education

Dr. Lawrence (Torry) Winn, J.D., M.Div., Ph.D., Program Chair; term ends June 30, 2026

530-752-8258; School of Education (<http://education.ucdavis.edu>); Faculty (<https://education.ucdavis.edu/faculty-and-instructors-directory>)

## Program Coordinator

Tracy Falk, M.A.  
530-752-2367; Advising ([eduadvising@ucdavis.edu](mailto:eduadvising@ucdavis.edu))

The UC Davis School of Education is committed to developing informed citizens and advocates for equitable educational environments in a democratic society. Education courses are designed for undergraduate student from all majors.

A Minor in Education helps students:

- Develop an understanding of the issues and concerns of public and private education, especially with regard to the education of students with diverse learning needs.
- Complete prerequisites for the teaching credential program.
- Work towards a master's degree or doctoral degree in education or related field.
- Seek employment in policy, advocacy, or other education-related careers.

## Courses

Students must complete 20 units in the Minor program in Education. At least 12 units of the 20-unit minimum for the minor must be in Education. The remaining units for the minor may be in education or a related field as approved on the electives list. See About the Education Minor (<https://education.ucdavis.edu/about-education-minor/>).

## Minor Advisors

A designated faculty member in the School of Education may advise students and give final approval on the minor. For additional information, contact Student Services (<https://education.ucdavis.edu/student-services/>).

PSC 132	Language & Cognition
PSC 141/HDE 101	Cognitive Development

SAS 120	Science & Contemporary Societal Issues
SOC 124	Education & Inequality in the U.S.
SPA 116 or SPA 116V	Applied Spanish Linguistics Applied Spanish Linguistics
SPA 117	Teaching Spanish as a Native Tongue in the U.S.: Praxis & Theory
UWP 104D	Writing in the Professions: Elementary & Secondary Education
UWP 197TC	Community Tutoring in Writing <sup>2</sup>
Approved Courses Outside of Education Subtotal	0
<b>Total Units</b>	<b>20</b>

1

EDU 181 and EDU 183-4 units or AED 100-3 units may serve as course substitutes for EDU 100; if EDU 100 is taken, EDU 181, EDU 183 and/or AED 100 may not be taken as electives.

2

Internship (192, 195A or B, 195TC, 197TC), Group Study (198) and Independent Study (199), or a combination of both, may not exceed a total of 4 units. Elective courses may include only one internship.

## Education, Master of Arts

### School of Education

**Admissions are suspended while our faculty review the program's current topical focus and requirements. We are not offering the Master of Arts General Track for this admissions cycle.**

### Graduate Study

The **Master of Arts in Education** provides a course of study for examining research and theory about learners, teachers, schools, and related social institutions. The program prepares professionals to conduct research about the education of children, youth, and adults in a multicultural society. Graduates may assume leadership positions in school districts, state education agencies, and private organizations concerned with instructional research, policy and practice.

### Degree Requirements & Program Coordinator

See Education (M.A.) (<https://grad.ucdavis.edu/programs/gemc/>).

### Courses

See Education (EDU) (p. 805).

## Education, Doctor of Philosophy

### School of Education

Francisco (Paco) Martorell, Ph.D., GGE Chair; term ends June 30, 2026

### Graduate Study

The Graduate Group in Education offers programs of study and research leading to the Ph.D. degree. Students may concentrate in: language, literacy and culture; learning and mind sciences; mathematics education; school organization and educational policy; or science and agriculture education. Students may also combine these fields of study with designated emphasis areas such as Critical Theory; Second Language Acquisition, Women's Studies, and Writing, Rhetoric, and Composition Studies. Detailed information regarding graduate study may be obtained

by writing the Graduate Coordinator or see Education Ph.D. Program (<https://education.ucdavis.edu/phd-education/>).

### Preparation

Students should have earned a Bachelor's or M.A. degree or the equivalent in a discipline relevant to their proposed emphasis program. For example, students applying for the mathematics education emphasis should have earned the B.A. or M.A. or M.A.T. degree in mathematics or mathematics education.

### Degree Requirements & Program Coordinator

See Education (Ph.D.) (<https://grad.ucdavis.edu/programs/gedp/>).

### Courses

See Education (EDU) (p. 805).

## Education Leadership, Doctorate in Education (CANDEL)

### School of Education

Cassandra Hart, Ed.D., Program Chair; term ends June 30, 2027

School of Education Building; Advising ([candeledd@ucdavis.edu](mailto:candeledd@ucdavis.edu)); School of Education (<http://education.ucdavis.edu>); Faculty (<https://education.ucdavis.edu/candel-program-faculty/>)

### Graduate Study

The Educational Leadership (CANDEL) Program leading to a Doctor of Education (Ed.D.) degree, is intended primarily for working professionals in schools, community colleges, and related educational capacities that reside in the greater Sacramento Valley, Bay Area, Central Valley, and Northern California. Graduates of this program will be prepared to lead in educational environments that promote learning, equity and achievement for all students. Armed with both real-world, problem-based learning, and scholarship skills, program graduates will be uniquely ready to manage the complexities of educational organizations, effect school change processes and shape the educational policies that bear on the practice of education in the public setting.

### Degree Requirements & Program Coordinator

See Educational Leadership (CANDEL) (<https://grad.ucdavis.edu/programs/gelc/>).

### Courses

See Education (EDU) (p. 805).

## Integrated Teaching Credential, Teaching Credential, Master of Arts

### School of Education

Alexis Patterson Williams, Ph.D., Program Chair

Cary Trexler, Ph.D., Graduate Advisor

Janelle Barnes, Graduate Coordinator

School of Education Building; 530-752-5887; Advising ([eduadvising@ucdavis.edu](mailto:eduadvising@ucdavis.edu)); Faculty (<https://education.ucdavis.edu/faculty-directory/>)

The Teaching Credential with Master's Degree Program offers an opportunity for qualified students to complete the requirements for both a Masters of Arts in Education degree and a Multiple Subject or Single Subject Credential in English, mathematics, science, social science or agriculture in a six-quarter program completed in less than two years. A Bilingual authorization in Spanish or Mandarin, is available to credential candidates in multiple subjects or the single subjects of English, mathematics, science or social science.

The Credential Program prepares students for the teaching profession by immersing them in the total environment of a public school classroom while enrolled in required coursework. The coursework incorporates a theoretical practical approach to the teaching-learning process, encouraging close interactions among teacher candidates and teacher education faculty. Students complete requirements for the M.A. degree during two part-time quarters following the credential year. This coursework introduces the integration of research into teaching practice, making teachers more informed and pro-active practitioners.

## **Teaching Credential/M.A. Degree Program**

Applicants are encouraged to have program prerequisites and testing requirements completed prior to submitting an application. Credential requirements are regularly revised by the State of California. To obtain the most current information, students considering a career in teaching are encouraged to see Credential/MA (<https://education.ucdavis.edu/credentialma/>) and consult with the School of Education advisors throughout their undergraduate career.

## **M.A. in Education Degree Programs**

Applicants to the General Track M.A. must have completed an undergraduate degree with a major in a field that supports their intended area of emphasis. A minimum undergraduate GPA of 3.000 is necessary for graduate admission at the University of California, Davis. Please consult with advisors in the School of Education regarding additional testing or supplemental information that may be required for application to a specific program.

### **Degree Requirements & Program Coordinator**

See Education (Credential/M.A.) (<https://grad.ucdavis.edu/programs/gemc/>).

### **Courses**

See Education (EDU) (p. 805).

## **Electrical & Computer Engineering**

### **College of Engineering**

Saif Islam, Ph.D., Chair of the Department

Hussain Al-Asaad, Ph.D., Vice Chair for Undergraduate Studies

Anh-Vu Pham, Ph.D., Vice Chair for Graduate Studies

### **Department Office**

2064 Kemper Hall; 530-752-0583; Electrical & Computer Engineering (<http://www.ece.ucdavis.edu>); Faculty (<https://ece.ucdavis.edu/directory/>)

- Electrical Engineering, Minor (p. 248)

## **Computer Engineering, Bachelor of Science**

### **College of Engineering**

Faculty (<https://ece.ucdavis.edu/directory/>)

## **The Electrical & Computer Engineering Undergraduate Programs**

The department administers two undergraduate curricula in the College of Engineering: (1) the Electrical Engineering curriculum and (2) the Computer Engineering curriculum.

### **Integrated Degree Programs (IDP)**

The IDP leads to both the Bachelor of Science and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical & Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in the Electrical Engineering, Computer Engineering or Applied Physics curricula. Applicants in their junior year must apply for the IDP by the stated date on our website. For more information on IDP, see B.S./M.S. Integrated Degree Programs.

### **Mission**

Under its land grant status, the University of California has a mission to provide the state with the trained workforce it needs and to advance knowledge and research in directions that contribute to the general welfare of the state and the nation. The Department of Electrical & Computer Engineering contributes to the mission of the University in three ways. First, its undergraduate and graduate education programs seek to provide students with an understanding of the fundamental principles of electrical and computer engineering, the skills needed to solve the complex technological problems of modern society and the ability to continue to learn and develop throughout their careers. Second, through its research programs, the department contributes to the development and progress of electronics, communications, and computer technology. Finally, the department helps to transfer research results to industry through publication, public service and professional activities.

### **Objectives**

*Teaching*—To provide undergraduate students with sufficient breadth to allow them to participate in teams, continue their own education after graduation and select a focus area intelligently; to provide undergraduate students with sufficient depth in a narrower discipline to allow them to develop the ability to solve complex engineering problems; to educate the students in the graduate program to be leaders in industry or to do meaningful research in industry, government or academia.

*Research*—To develop and maintain research programs that produce useful technological advances while simultaneously training the next generation of researchers and leaders; to update and/or shift the foci of these programs frequently in response to the needs of our constituency

and the nation; to provide a stimulating environment that encourages our graduate students to develop their abilities as far as possible.

## Computer Engineering Undergraduate Program

The Computer Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) under the commission's General Criteria and Program Criteria for Electrical, Computer, Communications, Telecommunication(s), and Similarly Named Engineering Programs.

### Objectives

The Electrical & Computer Engineering program educational objectives have been developed to address the needs of our constituencies. The objectives of the Electrical & Computer Engineering programs are as follow:

- Graduates will create value for their employers, demonstrating knowledge and initiative and making beneficial contributions beyond the workplace. This can also result in patents, awards, publications and presentations.
- Graduates will grow their capabilities through advanced education and professional development.
- Graduates will provide leadership and be proactive in their profession and/or communities.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Computer Engineering Bachelor of Science is 145.

Code	Title	Units
<b>Lower Division Required Courses</b>		
CMN 001 or CMN 001V	Introduction to Public Speaking	4
or ENG 003	Introduction to Engineering Design	
or ENG 003Y	Introduction to Engineering Design	
<i>Mathematics</i>		
MAT 021A	Calculus	4
MAT 021B	Calculus	4
MAT 021C	Calculus	4
MAT 021D	Vector Analysis	4
MAT 022A	Linear Algebra	3
MAT 022AL	Linear Algebra Computer Laboratory	1
MAT 022B	Differential Equations	3
<i>Physics</i>		
PHY 009A	Classical Physics	5
PHY 009B	Classical Physics	5
PHY 009C	Classical Physics	5
<i>Computer Science</i>		
ECS 020	Discrete Mathematics For Computer Science	4
ECS 036A	Programming & Problem Solving	4

ECS 036B	Software Development & Object-Oriented Programming in C++	4
ECS 036C	Data Structures, Algorithms, & Programming	4
<i>Electrical &amp; Computer Engineering</i>		
EEC 001	Introduction to Electrical & Computer Engineering <sup>1</sup>	2
EEC 010	Introduction to Digital & Analog Systems <sup>2</sup>	4
EEC 018	Digital Systems I	5
<i>Engineering</i>		
ENG 017 or ENG 017V	Circuits I Circuits I	4
Lower Division Composition/Writing; choose one; a grade of C- or better is required:		
COM 001	Major Works of the Ancient World	
COM 002	Major Works of the Medieval & Early Modern World	
COM 003	Major Works of the Modern World	
COM 004	Major Works of the Contemporary World	
ENL 003 or ENL 003V	Introduction to Literature Introduction to Literature	
NAS 005	Introduction to Native American Literature	
UWP 001	Introduction to Academic Literacies (Recommended)	
UWP 001V	Introduction to Academic Literacies: Online (Recommended)	
UWP 001Y	Introduction to Academic Literacies (Recommended)	
Lower Division Required Course Subtotal		
<b>Upper Division Required Courses</b>		
<i>Electrical &amp; Computer Engineering</i>		
EEC 100	Circuits II	5
EEC 111	Digital Electronic Circuits	4
EEC 161	Applied Probability for Electrical & Computer Engineers	4
EEC 170	Introduction to Computer Architecture	4
EEC 172	Embedded Systems	4
EEC 173A/ECS 152A	Computer Networks	4
EEC 180	Digital Systems II	5
EEC 196	Issues in Engineering Design	1
<i>Computer Science</i>		
ECS 122A	Algorithm Design & Analysis	4
ECS 150	Operating Systems & System Programming	4
Choose one:		
ENG/PHY 160	Environmental Physics & Society	
ENG 190	Professional Responsibilities of Engineers	
<b>Upper Division Electives</b>		
<i>Senior Design Project Electives</i>		
Both A & B need to be taken to receive credit for the Senior Design Project.		
EEC 119A	Integrated Circuit Design Project	
EEC 119B	Integrated Circuit Design Project	
EEC 134A	RF/Microwave Systems Design	
EEC 134B	RF/Microwave Systems Design	

EEC 136A	Electronic Design Project	ECN 100B	Intermediate Micro Theory: Imperfect Competition & Market Failure
EEC 136B	Electronic Design Project	ECN 101	Intermediate Macro Theory

EEC 195A	Autonomous Vehicle Design Project	MGT 120	Managing & Using Information Technology
EEC 195B	Autonomous Vehicle Design Project	MGT 140	Marketing for the Technology-Based Enterprise
<i>Upper Division Electrical &amp; Computer Engineering (EEC) or Computer Science Engineering (ECS) Electives<sup>2</sup></i>		MGT 150	Technology Management
Choose four letter-graded upper division EEC or ECS courses: <sup>3</sup>		MGT 160	Financing New Business Ventures
<i>Technical Electives</i>		MGT 170	Management Accounting & Control
Choose 8 units:		MGT 180	Supply Chain Planning & Management
<b>Chemistry</b>			
CHE 002A	General Chemistry	<i>Upper Division Composition Requirement</i>	
CHE 002B	General Chemistry	Choose one; a grade of a C- or better is required:	
CHE 002C	General Chemistry	UWP 101	Advanced Composition
Any upper division course. <sup>4</sup>		or UWP 101V	Advanced Composition
		or UWP 101Y	Advanced Composition
<b>Engineering</b>			
ENG 035	Statics	UWP 102A	Writing in the Disciplines: Special Topics
ENG 045	Properties of Materials	UWP 102B	Writing in the Disciplines: Biology
or ENG 045Y	Properties of Materials	UWP 102C	Writing in the Disciplines: History
Any upper division engineering course not used in satisfaction of core degree requirements. <sup>5</sup>		UWP 102D	Writing in the Disciplines: International Relations
A maximum of 6 units for any combination of engineering courses numbered 190C, 192, 198, and 199 may be used.		UWP 102E	Writing in the Disciplines: Engineering
<b>Mathematics</b>			
Any upper division course. <sup>6</sup>		UWP 102F	Writing in the Disciplines: Food Science & Technology
<b>Physics</b>			
Any upper division course. <sup>7</sup>		UWP 102G	Writing in the Disciplines: Environmental Writing
<b>Statistics</b>			
Any upper division course. <sup>8</sup>		UWP 102H	Writing in the Disciplines: Human Development & Psychology
<b>Biological Sciences</b>			
BIS 101	Genes & Gene Expression	UWP 102I	Writing in the Disciplines: Ethnic Studies
or BIS 101V	Genes & Gene Expression	UWP 102J	Writing in the Disciplines: Fine Arts
BIS 101D	Genes & Gene Expression Discussion	UWP 102K	Writing in the Disciplines: Sociology
BIS 102	Structure & Function of Biomolecules	UWP 102L	Writing in the Disciplines: Film Studies
BIS 103	Bioenergetics & Metabolism	UWP 104A	Writing in the Professions: Business Writing
BIS 104	Cell Biology	or UWP 104AV	Writing in the Professions: Business Writing
BIS 122	Population Biology & Ecology	or UWP 104AY	Writing in the Professions: Business Writing
BIS 122P	Population Biology & Ecology/Advanced Laboratory Topics	UWP 104B	Writing in the Professions: Law
<b>Economics</b>			
ECN 100A	Intermediate Micro Theory: Consumer & Producer Theory	UWP 104C	Writing in the Professions: Journalism
or ECN 100AV	Intermediate Micro Theory: Consumer & Producer Theory	UWP 104D	Writing in the Professions: Elementary & Secondary Education
		UWP 104E	Writing in the Professions: Science
		UWP 104F	Writing in the Professions: Health
		or UWP 104FV	Writing in the Professions: Health
		or UWP 104FY	Writing in the Professions: Health
		UWP 104I	Writing in the Professions: Internships
		UWP 104J	Writing in the Professions: Writing for Social Justice

UWP 104T	Writing in the Professions: Technical Writing
Passing the Upper Division Composition Exam.	
Upper Division Required Course Subtotal	68-76
<b>Total Units</b>	<b>145-153</b>

1

Transfer and change of major students will need 2 additional units of upper division electives instead of EEC 001.

2

Transfer and change of major students who do not take EEC 010 will substitute 4 additional units of upper division electives.

3

Excluding ECS 111, ECS 113, ECS 115, ECS 116, ECS 117, ECS 132, ECS 154A, ECS 154B, ECS 171, ECS 188.

4

Except CHE 195, CHE 197.

5

Excluding ENG 100, ENG 160, ENG 190 (each restricted to 1 unit of technical elective), ENG 198, ECS 111, ECS 113, ECS 115, ECS 116, ECS 117, ECS 132, ECS 154A, ECS 154B, ECS 171, ECS 188.

6

Except MAT 135A, MAT 197TC.

7

Except PHY 116A, PHY 116B, PHY 116C, PHY 160 (restricted to 1 unit of technical elective), PHY 195, PHY 197T.

8

Except STA 100, STA 101, STA 103, STA 104, STA 106, STA 108, STA 130A.

## Electrical & Computer Engineering, Bachelor of Science/Master of Science Integrated Degree Programs (IDP)

College of Engineering

### Bachelor of Science/Master of Science Integrated Degree Programs (IDP)

M.S. & Ph.D.

Electrical & Computer Engineering (<http://www.ece.ucdavis.edu>);  
530-752-8251

The Integrated Degree Program (IDP) leads to both a Bachelor of Science and a Master of Science degree. For more information on IDP, see Electrical & Computer Engineering (<https://ece.ucdavis.edu/undergraduate/integrated-degree-programs/>).

The Department of Electrical & Computer Engineering prepares graduate students to do meaningful research and acquire skills and insights vital to solving some of the world's most complex technological problems. Our graduate program offers a challenging and stimulating environment, covering optical, wireline and wireless communications, telecommunication networks, computer engineering, circuits, electromagnetics, physical electronics, optoelectronics, control, and signal processing. The depth of resources in the study of circuit design

alone, with one of the largest faculty groups in the field in the UC system, distinguishes us from other programs, while our program in microwave communications and devices is unique.

The Electrical & Computer Engineering Graduate Program benefits from the highly interdisciplinary culture at UC Davis and attracts faculty from biomedical, chemical, electrical, computer, civil, and mechanical engineering, as well as computer science and mathematics.

Many of our graduates go on to leadership and technology management roles in industry, returning each year for our industrial affiliates meeting to network with other industry representatives, current students and faculty.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

### Degree Requirements & Program Coordinator

See Electrical & Computer Engineering (<https://grad.ucdavis.edu/programs/geec/>).

### Research Highlights

- Communications, control, networking, and signal processing
- Computer engineering
- Electronic circuits
- Optoelectronics
- RF, micro- and millimeter waves
- Physical electronics

### Research Facilities and Partnerships

- Center for Information Technology in the Interest of Society
- Northern California Center for Nanotechnology
- Center on Polymer Interfaces and Macromolecular Assemblies
- Lawrence Livermore National Laboratory
- Lawrence Berkeley National Laboratory
- Los Alamos National Laboratory
- California Lighting Technology Center
- PlanetLab Consortium
- Sandia National Laboratory

Complete Information is on our website.

## Electrical Engineering, Bachelor of Science

College of Engineering

### The Electrical & Computer Engineering Undergraduate Programs

The department administers two undergraduate curricula in the College of Engineering: (1) the Electrical Engineering curriculum and (2) the Computer Engineering curriculum.

## Integrated Degree Program (IDP)

The IDP leads to both the Bachelor of Science and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical & Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in Electrical Engineering, Computer Engineering, Electronic Materials Engineering, or Applied Physics curricula. Applicants in their junior year must apply for the IDP indicated date on our website. For more information on IDP, see Electrical & Computer Engineering (<http://www.ece.ucdavis.edu>).

## Mission

Under its land grant status, the University of California has a mission to provide the state with the trained workforce it needs and to advance knowledge and research in directions that contribute to the general welfare of the state and the nation. The Department of Electrical & Computer Engineering contributes to the mission of the University in three ways. First, its undergraduate and graduate education programs seek to provide students with an understanding of the fundamental principles of electrical and computer engineering, the skills needed to solve the complex technological problems of modern society and the ability to continue to learn and develop throughout their careers. Second, through its research programs, the department contributes to the development and progress of electronics, communications, and computer technology. Finally, the department helps to transfer research results to industry through publication, public service and professional activities.

## Objectives

**Teaching**—To provide undergraduate students with sufficient breadth to allow them to participate in teams, continue their own education after graduation, and select a focus area intelligently; to provide undergraduate students with sufficient depth in a narrower discipline to allow them to develop the ability to solve complex engineering problems; to educate the students in the graduate program to be leaders in industry or to do meaningful research in industry, government or academia.

**Research**—To develop and maintain research programs that produce useful technological advances while simultaneously training the next generation of researchers and leaders; to update and/or shift the foci of these programs frequently in response to the needs of our constituency and the nation; to provide a stimulating environment that encourages our graduate students to develop their abilities as far as possible.

## Electrical Engineering Undergraduate Program

The Electrical Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) under the commission's General Criteria and Program Criteria for Electrical, Computer, Communications, Telecommunication(s), and Similarly Named Engineering Programs.

Electrical engineering involves the design, analysis, and effective use of electrical systems including electronic computers. Electrical systems and computers play a central role in nearly all aspects of modern life, including communication, medicine, education, environmental protection, space exploration, defense, and home entertainment.

Students who complete the Electrical Engineering curriculum will obtain a Bachelor of Science in Electrical Engineering, one of the engineering degrees recognized in all fifty states as eligible for registration as a Professional Engineer.

## Objectives

The Electrical & Computer Engineering program educational objectives have been developed to address the needs of our constituencies. The objectives of the Electrical & Computer Engineering programs are as follow:

- Graduates create value for their employers, demonstrating knowledge and initiative and making beneficial contributions beyond the workplace. This can also result in patents, awards, publications and presentations.
- Graduates grow their capabilities through advanced education and professional development.
- Graduates provide leadership and be proactive in their profession and/or communities.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Electrical Engineering Bachelor of Science is 147.

## Requirements

Code	Title	Units
<b>Lower Division Required Courses</b>		
CMN 001 or CMN 001V	Introduction to Public Speaking	4
or ENG 003 or ENG 003Y	Introduction to Engineering Design	
	Introduction to Engineering Design	
<i>Mathematics</i>		
MAT 021A	Calculus	4
MAT 021B	Calculus	4
MAT 021C	Calculus	4
MAT 021D	Vector Analysis	4
MAT 022A	Linear Algebra	3
MAT 022B	Differential Equations	3
<i>Physics</i>		
PHY 009A	Classical Physics	5
PHY 009B	Classical Physics	5
PHY 009C	Classical Physics	5
PHY 009D	Modern Physics	4
<i>Chemistry</i>		
CHE 002A	General Chemistry	5
<i>Engineering</i>		
ENG 006	Engineering Problem Solving	4
ENG 017 or ENG 017V	Circuits I	4
	Circuits I	
<i>Electrical &amp; Computer Engineering</i>		
EEC 001	Introduction to Electrical & Computer Engineering <sup>1</sup>	2
EEC 007	Introduction to Programming & Microcontrollers	4
EEC 010	Introduction to Digital & Analog Systems <sup>2</sup>	4
EEC 018	Digital Systems I	5

Lower Division Composition/Writing; choose one; a grade of a C- or better is required:

COM 001	Major Works of the Ancient World
COM 002	Major Works of the Medieval & Early Modern World
COM 003	Major Works of the Modern World
COM 004	Major Works of the Contemporary World
ENL 003 or ENL 003V	Introduction to Literature
NAS 005	Introduction to Native American Literature
UWP 001 or UWP 001V or UWP 001Y	Introduction to Academic Literacies (Recommended) Introduction to Academic Literacies: Online Introduction to Academic Literacies
Lower Division Required Courses Subtotal	77
<b>Upper Division Required Courses</b>	
<i>Electrical &amp; Computer Engineering</i>	
Take all courses, below:	26
EEC 100	Circuits II
EEC 110A	Electronic Circuits I
EEC 130A	Electromagnetics I
EEC 140A or EEC 140AV	Principles of Device Physics I Principles of Device Physics I
EEC 150	Introduction to Signals & Systems
EEC 161	Applied Probability for Electrical & Computer Engineers
EEC 196	Issues in Engineering Design
Choose one:	3
ENG/PHY 160	Environmental Physics & Society
ENG 190	Professional Responsibilities of Engineers
<i>Upper Division Electives</i>	
Choose at least eight courses for a minimum of 32 units:	32
After completion of the upper division elective requirement (at least 8 courses, 2 core, 2 with labs, 1 project) any units in excess of 32 will count toward the Technical Elective requirement.	
Two Core Electives (p. 245)	
Design Laboratory Electives (p. 245)	
<i>Technical Electives</i>	
Choose 9 units (p. 246)	9
<i>Upper Division Composition Requirement</i>	
Choose one; a grade of C- or better is required:	0-4

UWP 101 or UWP 101V or UWP 101Y	Advanced Composition Advanced Composition Advanced Composition
UWP 102A	Writing in the Disciplines: Special Topics
UWP 102B	Writing in the Disciplines: Biology
UWP 102C	Writing in the Disciplines: History
UWP 102D	Writing in the Disciplines: International Relations
UWP 102E	Writing in the Disciplines: Engineering
UWP 102F	Writing in the Disciplines: Food Science & Technology
UWP 102G	Writing in the Disciplines: Environmental Writing

UWP 102H	Writing in the Disciplines: Human Development & Psychology
UWP 102I	Writing in the Disciplines: Ethnic Studies
UWP 102J	Writing in the Disciplines: Fine Arts
UWP 102K	Writing in the Disciplines: Sociology
UWP 102L	Writing in the Disciplines: Film Studies
UWP 104A	Writing in the Professions: Business Writing
or UWP 104AV	Writing in the Professions: Business Writing
or UWP 104AY	Writing in the Professions: Business Writing
UWP 104B	Writing in the Professions: Law
UWP 104C	Writing in the Professions: Journalism
UWP 104D	Writing in the Professions: Elementary & Secondary Education
UWP 104E	Writing in the Professions: Science
UWP 104F	Writing in the Professions: Health
or UWP 104FV	Writing in the Professions: Health
or UWP 104FY	Writing in the Professions: Health
UWP 104I	Writing in the Professions: Internships
UWP 104J	Writing in the Professions: Writing for Social Justice
UWP 104T	Writing in the Professions: Technical Writing
Passing the Upper Division Composition Exam.	
Upper Division Required Courses Subtotal	

70-74

**Total Units** **147-151**

## Two Core Electives

Code	Title	Units
A maximum of one course appearing on both the Core Elective list and the Design Laboratory Elective list may be counted in both categories.		
EEC 110B	Electronic Circuits II	4
EEC 130B	Introductory Electromagnetics II	4
EEC 140B	Principles of Device Physics II	4
EEC 180	Digital Systems II	5
Only one of the following may be used:		
EEC 151	Digital Signals & Systems	
EEC 157A or EEC 157AV	Control Systems	

## Design Electives with Laboratory

Code	Title	Units
A maximum of one course appearing on both the Core Elective list and the Design Electives with Laboratory list may be counted in both categories.		
Choose at least two Design Electives with Laboratory:		
EEC 110B	Electronic Circuits II	4
EEC 112	Communication Electronics	4
EEC 113	Power Electronic Circuits	4
EEC 116	VLSI Design	4
EEC 118	Digital Integrated Circuits	4
EEC 132A	RF & Microwaves in Wireless Communication	5

EEC 132B	RF & Microwaves in Wireless Communication	5	ECS 177	Scientific Visualization	4
EEC 132C	RF & Microwaves in Wireless Communications	5	ECS 178	Geometric Modeling	4
EEC 133	Electromagnetic Radiation & Antenna Analysis	4		<b>Technical Electives</b>	
EEC 135	Optoelectronics for High-Speed Data Networking & Computing Systems	4		Code	Title
EEC 140B	Principles of Device Physics II	4			Units
EEC 145	Electronic Materials	4	CHE 002B	General Chemistry <sup>3</sup>	5
EEC 146A	Integrated Circuits Fabrication	4	ENG 035	Statics <sup>4</sup>	4
EEC 146B	Advanced Integrated Circuits Fabrication	3		A maximum of 6 units for any combination of engineering courses numbered 190C, 192, 198, and 199 may be used.	
EEC 157A or EEC 157AV	Control Systems	4		<i>Mathematics</i>	
	Control Systems			Any upper division course. <sup>5</sup>	
EEC 157B or EEC 157BY	Control Systems II	4		<i>Physics</i>	
	Control Systems II			Any upper division course. <sup>6</sup>	
EEC 160	Signal Analysis & Communications	4		<i>Statistics</i>	
EEC 165	Statistical & Digital Communication	4		Any upper division course. <sup>7</sup>	
EEC 170	Introduction to Computer Architecture	4		<i>Biological Sciences</i>	
EEC 172	Embedded Systems	4	BIS 101	Genes & Gene Expression	4
EEC 179	Applied Machine Learning for Electrical & Computer Engineers	4	or BIS 101V	Genes & Gene Expression	
EEC 180	Digital Systems II	5	BIS 101D	Genes & Gene Expression Discussion	1
Choose at least one Senior Design Project course:			BIS 102	Structure & Function of Biomolecules	3
All Senior Design Project courses are also considered Design Electives with Laboratory may be counted in both categories simultaneously. Both A & B need to be taken to receive credit for the Senior Design Project.			BIS 103	Bioenergetics & Metabolism	3
EEC 119A	Integrated Circuit Design Project	3	BIS 104	Cell Biology	3
EEC 119B	Integrated Circuit Design Project	3	BIS 122	Population Biology & Ecology	3
EEC 134A	RF/Microwave Systems Design	3	BIS 122P	Population Biology & Ecology/Advanced Laboratory Topics	5
EEC 134B	RF/Microwave Systems Design	3			
EEC 136A	Electronic Design Project	3			
EEC 136B	Electronic Design Project	3			
EEC 174AY	Applied Machine Learning	3			
EEC 174BY	Applied Machine Learning Senior Design Projects	3			
EEC 175A	Internet of Things	3			
EEC 175B	Internet of Things Senior Design Project	3			
EEC 181A	Digital Systems Design Project	3			
EEC 181B	Digital Systems Design Project	3			
EEC 193A	Senior Design Project	3			
EEC 193B	Senior Design Project	3			
EEC 195A	Autonomous Vehicle Design Project	3			
EEC 195B	Autonomous Vehicle Design Project	3			
The remaining electives may be any letter-graded upper division Electrical & Computer Engineering course not used to satisfy another major requirement or the following ECS courses:					
ECS 036B	Software Development & Object-Oriented Programming in C++	4	MGT 011A	Elementary Accounting	4
ECS 150	Operating Systems & System Programming	4	MGT 011B	Elementary Accounting	4
ECS 152B	Computer Networks	4	MGT 100	(Discontinued)	
ECS 163	Information Visualization	4	MGT 120	Managing & Using Information Technology	4
ECS 175	Computer Graphics	4	MGT 140	Marketing for the Technology-Based Enterprise	4
			MGT 150	Technology Management	4
			MGT 160	Financing New Business Ventures	4
			MGT 170	Management Accounting & Control	4
			MGT 180	Supply Chain Planning & Management	4

1 Transfer and change of major students will need 2 additional units of upper division electives instead of EEC 001.

2 Transfer and change of major students who do not take EEC 010 will substitute 4 additional units of upper-division electives.

3 CHE 002C and any upper division course; except CHE 195, CHE 197.

4 ENG 045, and any upper division engineering course not used in satisfaction of core degree requirements, excluding ENG 100, ENG 160 (restricted to 1 unit of technical elective; same as PHY 160), PHY 190 (restricted to 1 unit of technical elective), PHY 198, ECS 111, ECS 113, ECS 115, ECS 116, ECS 117, ECS 132, ECS 154A, ECS 154B, ECS 171, ECS 188 (ECS 154A & ECS 154B courses may be used by EEEL majors who did not take EEC 170).

5 Except MAT 135A & MAT 197TC.

6 Except PHY 116A, PHY 116B, PHY 116C, PHY 160 (restricted to 1 unit of technical elective), PHY 195, PHY 197T.

7 Except STA 100, STA 101, STA 103, STA 104, STA 106, STA 108, STA 130A.

## Areas of Specialization

Students are encouraged to focus on one of the following five specialty areas: Physical Electronics; Electromagnets, RF, Microwave, Wireless; Analog Electronics; Digital Electronics; and Communication Controls & Signal Processing. For updated recommended courses, see Electrical & Computer Engineering (<https://www.ece.ucdavis.edu/undergraduate/majors-and-minor/>).

### Physical Electronics

Solid-state devices, circuits and fabrication and the theory courses supporting those subjects.

Code	Title	Units
Recommended Elective Courses		
<i>Core Electives</i>		
EEC 130B	Introductory Electromagnetics II	
EEC 140B	Principles of Device Physics II	
<i>Design Electives with Laboratory (select two or more courses)</i>		
EEC 110B	Electronic Circuits II	
EEC 112	Communication Electronics	
EEC 118	Digital Integrated Circuits	
EEC 132A	RF & Microwaves in Wireless Communication	
EEC 132B	RF & Microwaves in Wireless Communication	
EEC 132C	RF & Microwaves in Wireless Communications	
EEC 146A	Integrated Circuits Fabrication	
<i>Additional Technical Electives</i>		

*Additional Technical Electives*

EEC 135	Optoelectronics for High-Speed Data Networking & Computing Systems
EEC 145	Electronic Materials

## Electromagnetics, RF, Microwave, Wireless

Microwave circuits and systems, and fiber optical systems.

Code	Title	Units

<i>Additional Technical Electives</i>			
EEC 135	Optoelectronics for High-Speed Data Networking & Computing Systems		
EEC 157A or EEC 157AV	Control Systems	4	
EEC 160	Signal Analysis & Communications		
EEC 179	Applied Machine Learning for Electrical & Computer Engineers		
mentioned fields. The minor program curriculum is designed to allow flexibility while ensuring a solid foundation of fundamental electrical engineering concepts. The program is expected to accommodate students of diverse backgrounds.			
The minor must be outside the department or program of your major and no more than one course may be counted toward both your minor and your major. The courses you take to satisfy the requirements of a minor, including those completed elsewhere, must be approved by an advisor in the Department of Electrical & Computer Engineering. You must have a minimum overall GPA of 2.000 and satisfy the minor course requirements, listed below. To receive notation of this minor on your diploma, you must obtain a minor petition and file it no later than the deadline for filing for graduation.			
Code	Title	Units	
EEC 100	Circuits II	5	
Choose at least one of the following combinations:			
<i>Analog Circuits</i>			
EEC 110A & EEC 110B	Electronic Circuits I and Electronic Circuits II		
<i>Electromagnetics</i>			
EEC 130A & EEC 130B	Electromagnetics I and Introductory Electromagnetics II		
<i>Physical Electronics</i>			
EEC 140A or EEC 140AV	Principles of Device Physics I		
EEC 140B	Principles of Device Physics II		
<i>&amp;</i>			
<i>Signals &amp; Systems</i>			
EEC 150	Introduction to Signals & Systems		
EEC 151	Digital Signals & Systems		
<i>Communication</i>			
EEC 150	Introduction to Signals & Systems		
EEC 160	Signal Analysis & Communications		
<i>Control Systems</i>			
EEC 150	Introduction to Signals & Systems		
EEC 157A or EEC 157AV	Control Systems		
<i>Digital Systems</i>			
EEC 018 & EEC 180	Digital Systems I and Digital Systems II		
Choose at least 8 additional units of EEC courses numbered 101 or above <sup>1</sup> ; If you elect to do a design project, you must be registered for both quarters.			
Electrical & Computer Engineering (EEC) courses (p. 819)			

## **Electrical Engineering, Minor**

College of Engineering

There has been an increasing need for professionals in most engineering disciplines to understand the fundamentals of electronic circuits, electronic signals, semiconductor devices, applied electromagnetics, control systems, computer systems, and communication systems.

The objective of this minor program is to prepare students with the necessary theoretical and practical training in one or many of the above

## **Energy Systems (Graduate Group)**

Graduate Studies

Alan Jenn, Ph.D., Chairperson of the Group

JoAnna Lewis, Graduate Program Coordinator

## Group Office

Energy & Efficiency Institute (<https://energy.ucdavis.edu/>), West Village, 1605 Tilia Street, Suite 100, Davis, CA 95616; 530-752-0247; Energy Graduate Group (<https://energy.ucdavis.edu/education/energy-graduate-group/>); Faculty (<https://energy.ucdavis.edu/education/energy-graduate-group-faculty/>)

- Energy Systems, Master of Science (p. 249)
- Energy Systems, Doctor of Philosophy (p. 249)

## Energy Systems, Master of Science

Graduate Studies

### Graduate Study

The Energy Graduate Group offers M.S. (Plan I—Thesis, and Plan II—Exam) and Ph.D. degrees in two tracks of study: Energy Science & Technology, and Energy Policy & Management. The program is designed to meet the world's growing needs for highly qualified, thoughtful and dedicated leaders in sustainable energy systems. Both tracks are aimed at a wide range of students, though Energy Science & Technology students are expected to come from disciplinary backgrounds in engineering or the physical sciences, while Energy Management & Policy students are expected to come from a wider range of disciplines interested in economic, policy, business and social aspects of energy systems.

### Degree Requirements & Program Coordinator

See Energy Systems (<https://grad.ucdavis.edu/programs/gegg/>).

## Energy Systems, Doctor of Philosophy

Graduate Studies

College of Letters & Science

Zinzi Clemons, Ph.D., Director

### Graduate Study

The Department of English (<http://english.ucdavis.edu/>) offers programs of study and research leading to the M.F.A. in Creative Writing. Detailed information may be obtained from the graduate advisor, the chairperson of the Department, or the English Department (<https://english.ucdavis.edu/mfa-creative-writing/>).

### Degree Requirements

See Creative Writing (<https://grad.ucdavis.edu/programs/gecw/>).

## English, Bachelor of Arts

College of Letters & Science

### The Major Program

The study of English develops skills in reading analytically and perceptively and in writing clearly and effectively. Students major in English by taking courses in a wide variety of media, genres, topics, and historical periods. All students are introduced to the major by completing 20 units spread over courses in writing, any one of many topics courses, and the gateway series to the English major that covers "Literature in English" from the earliest medieval texts to the present. Students then build their own path through the major depending upon their particular interests, eventually completing 44 more units covering different historical periods, methods of theory and criticism, and thematic focuses. After a shared set of courses, students choose to specialize either in Literary Criticism and Theory or Creative Writing. All majors have the opportunity to work with distinguished writers, critics, scholars, and teachers.

English majors learn how to:

- Write clearly and effectively.
- Think creatively and analytically.
- Organize and communicate ideas creatively and efficiently.
- Analyze and critically evaluate language and other forms of representation.
- Understand texts within their historical, political, and cultural contexts.
- Recognize and evaluate various perspectives, through creating or reading fiction, drama, and poetry.
- Evaluate how fictional and non-fictional narratives structure thought and action.

- Read long texts closely, analytically, and efficiently.
- Respond spontaneously with organized, clear statements and ideas.

## Career Options

Graduates have found the major excellent pre-professional training for careers in teaching, writing, law, medicine, library work, journalism, and more. Many graduates are employed in publishing, marketing, advertising, or the tech sector. Others have worked in local, state, and federal government agencies, as well as in industry. Many have gone on to graduate study in a wide range of fields including English, education, counseling, and more.

## Major Advisors

A. Banful, G. Bloom, S. Boluk, S. Chaganti, Z. Clemons, J. Clover, L. Corin, G. Dobbins, K. Frederickson, P. Houston, H. Hsu, M. Jerng, X. Lee, D. Martín, T. Menely, C. Milburn, E. Miller, M. Montoya, A. Naffis-Sahely, S. Nicolazzo, C. Ok, K. Peterson, M. Ronda, M. Stratton, M. Vernon, C. Waters, T. Werth, R. Zecena, M. Ziser

## Major Advising

All new and prospective English majors are encouraged to see an undergraduate staff advisor, individually, once per year, at minimum.

## Foreign Languages

Students who contemplate advanced study in English should prepare for foreign language requirements for higher degrees and should consult with the graduate advisor.

## Undergraduate Advisor

See English (<http://english.ucdavis.edu>) or the Departmental Advising Office in 179 Voorhies Hall.

## Honors & Honors Program

A Senior Honors Program is available to an invited group of English majors, who prepare and write a Senior Thesis (either a research paper or creative writing) in their final year. The critical honors program consists of 4 units of 194H and 4 units of 195H, normally taken during fall and spring quarters of the senior year. The creative writing honors program consists of 4 units of 100FA or 100PA, normally taken during spring quarter of the junior year, and 4 units of 195H, normally taken winter quarter of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Eligibility criteria and application materials may be obtained at the Undergraduate Advising office in 179 Voorhies Hall or see English (<http://english.ucdavis.edu>). For more details, see Graduation Honors.

## Education Abroad Options

The department strongly encourages interested students to pursue their studies abroad. It is possible for students to complete significant portions of the English major provided that the course is evaluated as at least 4 UC Davis units; the course is considered upper division by the standards set forth by UC Davis Study Abroad; and the student presents copies of the coursework, syllabus, and writing assignments to the department's advising staff.

## Teaching Credential Subject Representative

A major in English qualifies students for subject matter preparation for the teaching credential.

## Entry Level Writing

Students must have met the Entry Level Writing Requirement (p. 58) before taking any course in English.

## Prerequisites

ENL 003 or UWP 001 is required for admission into all preparatory courses (ENL 040, ENL 041, ENL 043, ENL 044, ENL 045, ENL 010A, ENL 010B, ENL 010C), and all upper division courses, unless otherwise stated in the course listings. COM 001, COM 002, COM 003, or COM 004 or NAS 005 may normally be substituted for ENL 003 or UWP 001.

## Coursework

Up to 4 upper division units in a literature class outside of English may count toward the requirements of the major.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the English Bachelor of Arts is 64.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
Choose one:		4
ENL 003 or ENL 003V	Introduction to Literature	
UWP 001 or UWP 001V or UWP 001Y	Introduction to Academic Literacies Introduction to Academic Literacies: Online Introduction to Academic Literacies	
Or equivalent		
ENL 010A	Literatures in English I: To 1700	4
ENL 010B	Literatures in English II: 1700-1900	4
ENL 010C	Literatures in English III: 1900 to Present	4
Choose one:		4
ENL 040 ENL 041 ENL 043 ENL 044 ENL 045	Introductory Topics in Literature Introductory Topics in Literature & Media Introductory Topics in Drama Introductory Topics in Fiction Introductory Topics in Poetry	
Preparatory Subject Matter Subtotal		
<b>Depth Subject Matter</b>		
ENL 110A or ENL 110B	Introduction to Literary Theory Introduction to Modern Literary & Critical Theory	4
<i>Historical Distribution Requirements</i>		
Choose three courses focusing on literature written in English before 1800, at least one of which must be on literature written primarily before 1500:		12
Before 1500		
ENL 111 ENL 113A ENL 113B	Topics in Medieval Literature Chaucer: Troilus & the "Minor" Poems Chaucer: The Canterbury Tales	
1500-1800		
ENL 115 ENL 117 ENL 122 ENL 123 ENL 142	Topics in 16th- & 17th-Century Literature Shakespeare Milton 18th-Century British Literature Early American Literature	

ENL 150A	British Drama to 1800	ENL 160	Film as Narrative	
ENL 155A	18th-Century British Novel	ENL 162	Film Theory & Criticism	
ENL 185A	Literature by Women Before 1800	ENL/STS 164	Writing Science	
Choose one course focusing on literature written in English between 1800 and 1900:	4	ENL 171A	The Bible as Literature: The Old Testament	
ENL 130	British Romantic Literature	ENL 171B	The Bible as Literature: Prophets & New Testament	
ENL 133	19th-Century British Literature	ENL/CDM/STS 172	Video Games & Culture	
ENL 143	19th-Century American Literature to the Civil War	ENL/STS 173	Science Fiction	
ENL 144	Post-Civil War American Literature	ENL 180	Children's Literature	
ENL 155B	19th-Century British Novel	ENL 183	Young Adult Literature	
ENL 158A	The American Novel to 1900	ENL 184	Literature & the Environment	
ENL 181A	African American Literature to 1900	ENL 186	Literature, Sexuality, & Gender	
ENL 185B	Literature by Women from 1800-1900	CDM/ENL/STS 172	Video Games & Culture	
Choose one course focusing on literature written in English between 1900 and present:	4	LIN/ENL/UWP 106	English Grammar	
ENL 125	Topics in Irish Literature	STS/CDM/ENL 172	Video Games & Culture	
ENL 137	British Literature, 1900-1945	STS/ENL 173	Science Fiction	
ENL 138	British Literature, 1945 to Present	UWP/ENL/LIN 106	English Grammar	
ENL 146	American Literature 1900-1945	Please note that while some courses are identified as fulfilling more than one distribution requirement, a given course can only fulfill one such requirement.		
ENL 147	American Literature, 1945 to the Present	<i>Area of Emphasis</i>		
ENL 150B	Drama from 1800 to the Present	Choose at least one:		
ENL 154	The Graphic Novel	12 Literature, Criticism, & Theory (p. 251)		
ENL 155C	20th-Century British Novel	Depth Subject Matter Subtotal		
ENL 156	The Short Story	44 Creative Writing (p. 252)		
ENL 157	Detective Fiction			
ENL 158B	The American Novel from 1900 to the Present			
ENL 166	Love & Desire in Contemporary American Poetry	<b>Total Units</b>		
ENL 167	20th-Century African American Poetry	<b>64</b>		
ENL 168	20th-Century American Poetry			
ENL 181B	African American Literature 1900-Present	<b>Literature, Criticism, &amp; Theory Emphasis</b>		
ENL 185C	Literature by Women after 1900	Please note that English ENL 110A or ENL 110B is a prerequisite for advanced study in the major.		
<i>Non-Historical Distribution Requirements</i>				
Choose one course on literatures, race, and ethnicity:	4			
ENL 139	Topics in Global Literatures & Cultures	<b>Code</b>		
ENL 140	Topics in Postcolonial Literatures & Cultures	<b>Title</b>		
ENL 141	Topics in Diasporic Literatures & Migration	<b>Units</b>		
ENL 167	20th-Century African American Poetry	One upper division English elective.		
ENL 178	Topics in Nations, Regions, & Other Cultural Geographies	4		
ENL 179	Topics in Comparative Racial & Ethnic Literary Studies	Choose two advanced courses, one of which can be a seminar:		
ENL 181A	African American Literature to 1900	8		
ENL 181B	African American Literature 1900-Present	ENL 149 Topics in Literature		
ENL 182	Literature of California	ENL 153 Topics in Drama		
Choose one in-depth topic course in language, media, and literature:	4	ENL 159 Topics in the Novel		
ENL 105	History of the English Language	ENL 163 Literary Study in the British Isles		
ENL/LIN/UWP 106 English Grammar				
ENL 107	Freedom of Expression	ENL 165 Topics in Poetry		
ENL 120	Law & Literature	ENL 177 Study of an Individual Author		
ENL 187A Topics in Literature & Media				
ENL 188A Topics in Literary & Critical Theory				
ENL 189 Seminar in Literary Studies				
ENL 194H Seminar for Honors Students				
ENL 195H Honors Thesis				
<b>Total Units</b>			<b>12</b>	

## Creative Writing Emphasis

Code	Title	Units
Please note that students must select courses in more than one genre.		
Three sections of:		12
ENL 100F	Creative Writing: Fiction	
ENL 100P	Creative Writing: Poetry	
ENL 100NF	Creative Writing: Non-Fiction	
ENL 100FA	Creative Writing Advanced Fiction	
ENL 100PA	Creative Writing Advanced Poetry	
Total Units		12

## English, Minor

College of Letters & Science

### The Minor Program

Pursuing a minor in English allows students to develop their abilities to read critically and to write clearly while enjoying the pleasures that great literature has to offer. To complete the minor, students take five upper division courses, at least four of which focus on literature, film, or other media. Choices within the curriculum are unlimited by historical period, and can include a course in creative writing. All minors have the opportunity to work with distinguished writers, critics, scholars, and teachers.

### Career Alternatives

Graduates have found the minor to be an excellent complement to their training in other fields, helping to demonstrate their writing and critical thinking skills to employers and graduate schools.

Code	Title	Units
Five upper division (100 level) English (ENL) courses; at least four of these must be literature courses (numbered 107-186).		20
English (ENL) (p. 843)		
Total Units		20

## English, Master of Arts

College of Letters & Science

Michael Ziser, Ph.D., Graduate Director

### Graduate Study

The department offers an M.A. in Literature en route to the Ph.D. Detailed information may be obtained from the graduate advisor or the Chairperson of the Department.

### Degree Requirements & Program Coordinator

See English (<https://grad.ucdavis.edu/programs/genl/>).

## English, Doctor of Philosophy

College of Letters & Science

Hsuan Hsu, Ph.D., Graduate Director

## Graduate Study

The Department of English offers a program of study and research leading to the Ph.D. in literature. Detailed information may be obtained from the graduate advisor or the Chairperson of the Department.

The department's affiliation with the Critical Theory Program also provides the opportunity for Ph.D. students in English to prepare for the designated emphasis in Critical Theory (an interdisciplinary program in theories and methodologies in the humanities and social sciences). There is a range of other programs in which students may pursue a Designated Emphasis; see Designated Emphasis (<https://english.ucdavis.edu/designated-emphasis/>).

### Degree Requirements & Program Coordinator

See English (<https://grad.ucdavis.edu/programs/genl/>).

## Entomology & Nematology

College of Agricultural & Environmental Sciences

Joanna Chiu, Ph.D., Chairperson of the Department; terms ends June 30, 2028.

### Department Office

367 Briggs Hall; 530-752-0492; Entomology & Nematology (<http://entomology.ucdavis.edu>); Faculty ([https://entomology.ucdavis.edu/people/?first=&last=&title=&unit=&field\\_sf\\_person\\_type\\_target\\_id%5B0%5D=26](https://entomology.ucdavis.edu/people/?first=&last=&title=&unit=&field_sf_person_type_target_id%5B0%5D=26))

### Undergraduate Program

Lead Faculty Advisor: Shahid Siddique (<https://entomology.ucdavis.edu/people/shahid-siddique/>), Ph.D., Rachel L. Vannette, Ph.D., Vice Chair Academic Advisor: Elvira Galvan Hack (<https://entomology.ucdavis.edu/resources-1/>)

Undergraduate Advising Center for the major, minors and course offerings (including peer advising) is located in 150 Hutchison Hall, 530-754-4131. Academic Advisor is in 160 Hutchison Hall, 530-754-7277, ent-advise@ucdavis.edu.

### Minor Requirements

The Department of Entomology & Nematology has six minor programs open to students in other disciplines who are interested in rounding out their academic study with a concentration in the area of entomology or nematology.

### Minor Advisors

S. Siddique, R. Vannette

### Related Courses

See courses in Entomology (p. 858) & Nematology (p. 1208).

## Graduate Study

The Department of Entomology & Nematology offers a program of study and research leading to M.S. and Ph.D. degrees. For further details, see Graduate Studies (<http://gradstudies.ucdavis.edu/>) and the Graduate Announcement.

- Agricultural Pest Management, Minor (p. 253)
- Animal Biology, Bachelor of Science (p. 253)
- Entomology, Bachelor of Science (p. 254)
- Entomology, Master of Science (p. 255)
- Entomology, Doctor of Philosophy (p. 255)
- Forensic Entomology, Minor (p. 256)
- Insect Biology, Minor (p. 256)
- Insect Ecology & Evolution, Minor (p. 256)
- Medical-Veterinary Entomology, Minor (p. 256)
- Nematology, Minor (p. 257)

## Agricultural Pest Management, Minor

### College of Agricultural & Environmental Sciences

The Department of Entomology & Nematology has six minor programs open to students in other disciplines who are interested in rounding out their academic study with a concentration in the areas of entomology or nematology.

### Minor Advisor

S. Siddique, R. Vannette

Code	Title	Units
ENT 100	General Entomology	4
ENT 100L	General Entomology Laboratory	2
ENT 110	Arthropod Pest Management	5
Choose at least three:		9-12
NEM 100	Introduction to Nematode Parasites	
PLS 105	Concepts in Pest Management	
PLS 176	Introduction to Weed Science	
PLP 120	Introduction to Plant Pathology	
ENT 135	Introduction to Biological Control	
Of the three, one can be ENT 123 or PLB 123 or PLP 123:		
ENT/PLB/PLP 123 Plant-Virus-Vector Interaction		
Total Units	20-23	

## Animal Biology, Bachelor of Science

### College of Agricultural & Environmental Sciences

Animal Biology Major (<https://abi.ucdavis.edu/>); Faculty ([https://entomology.ucdavis.edu/people/?first=&last=&title=&unit=&field\\_sf\\_person\\_type\\_target\\_id%5B0%5D=26](https://entomology.ucdavis.edu/people/?first=&last=&title=&unit=&field_sf_person_type_target_id%5B0%5D=26))

The Animal Biology major offers students training in the biological and natural sciences as they apply to animals. The major covers basic biological sciences foundational to understanding animal evolution, systematics, ecology, physiology and molecular biology. Students in the Animal Biology major are encouraged to think beyond particular groups of animals in which they are interested and to consider science as a process and a way of learning new things about them, and of advancing society. The program emphasizes biological principles used in research and in solving societal conflicts with animals in agriculture, urban areas, or natural environments.

## The Program

The major consists of core courses in the sciences that build an understanding of animal biology from the molecular to the ecological and evolutionary levels of organization. After completing these core courses, students choose an interdisciplinary practicum project from general animal biology, predicated on their ultimate career goals. They plan this emphasis of study in a required discussion-seminar course and in consultation with a mentor. The program includes a senior thesis, which each student employs the process and principles of science to propose and carry out the practicum project they choose, integrating the disciplines of the major. The Animal Biology major emphasizes research in biological principles as opposed to animal care and husbandry.

### Practicum Research & Career Alternatives

The Animal Biology program and professional research interests of each student guides him or her in Practicum and career choices. On-and off-campus Practicum research opportunities occur in research laboratories, at field situations, in zoos and public aquariums, with governmental agencies, national and state parks with private industry, and in international programs. A degree in Animal Biology prepares students for careers in research, teaching, academia, governmental regulation, health, or agriculture where these emphasize integrative biology of animals. Careers in veterinary medicine, animal husbandry and animal management remain open to Animal Biology majors as well, however, other preparation may be required. Students in the major focus on gaining research experience, and become well prepared to continue their training at the graduate or professional level in a variety of biological disciplines.

## Entomology, Bachelor of Science

College of Agricultural & Environmental Sciences

### The Major Program

The Entomology major is a general biological science program. The curriculum is designed to develop an understanding of fundamental biological concepts by studying insects. Insects offer unique opportunities to study biological systems and are model experimental animals. Many insects are either pests, or beneficial species that have great importance to the economy, environment or public health. Students may focus on specific areas of interest including agricultural entomology; insect systematics & evolution; behavior & ecology; medical entomology; and insect molecular biology, physiology & toxicology.

### The Program

Students begin their study in Entomology with selected insect biology courses. After completing these courses, students may enroll in courses in their particular area of interest. The faculty encourages students to do research internships in their laboratories.

### Career Alternatives

Entomology graduates find careers in many different areas of applied or basic biology. Graduates have the opportunity to continue in professional graduate programs such as veterinary or human medicine, or get advanced degrees leading to careers in biotechnology, conservation biology, or academic teaching and research. Many graduates have participated in internship programs with the California Department of Food and Agriculture and found careers in insect diagnostic laboratories, conducting insect surveys, and/or developing entomological collections. Other graduates have worked in agriculture in the area of insect pest management. Graduates are prepared for managerial and technical positions with state and federal agencies and in agricultural production and supporting industries. Some Entomology graduates pursue careers in primary, secondary, and college level science education.

## Environmental Policy & Management (Graduate Group)

### Graduate Studies

Affiliated with the Institute of the Environment (<https://environment.ucdavis.edu/>); Environmental Policy & Management (<https://epm.ucdavis.edu/>)

### Director

Jessica Penrose (<https://epm.ucdavis.edu/people/>), 1007 Wickson Hall, 530-752-8318

### Program Coordinator

Jessica Chalfin (<https://epm.ucdavis.edu/people/>), 1001 Wickson Hall, 530-754-1754

### Program Chair

Dr. Tyler Scott (<https://epm.ucdavis.edu/people/tyler-scott/>), 2142 Wickson Hall

- Environmental Policy & Management, Master of Science (p. 257)

## Environmental Policy & Management, Master of Science

### Graduate Studies

### Graduate Study

The Master of Science in Environmental Policy & Management (EPM) program provides advanced training in applying environmental science to real-world environmental policy and management issues. The EPM program sets itself apart by targeting students with interdisciplinary backgrounds who seek applied professional careers in environmental policy and management. The focus is on building quantitative skills for practice-oriented careers in environmental policy and management for more information, see Environmental Policy & Management (<https://epm.ucdavis.edu/>).

### Preparation

Before enrolling, a student should have completed a program of study equivalent to a B.A. or B.S. in a Science, Technology, Engineering & Math (STEM) field. Students without a prior degree in a STEM field are required to complete preparatory courses, or their equivalents to demonstrate a fundamental scientific background appropriate for environmental policy. Applicants are expected to have passed the equivalent of the following courses: one upper-division course in environmental science or ecology; one upper-division course in microeconomics or policy analysis; and one upper-division course in statistics or mathematical modeling. Prior coursework in economics (intermediate microeconomics) is recommended, but not required.

### Degree Requirements & Program Coordinator

See Environmental Policy & Management (<https://grad.ucdavis.edu/programs/gepm/>).

## Environmental Science & Policy

### College of Agricultural & Environmental Sciences

Susan Harrison, Ph.D., Chairperson of the Department  
Marissa L. Baskett, Ph.D., Co-Vice Chairperson  
Gwen Arnold, Ph.D., Co-Vice Chairperson

### Department Office

2132 Wickson Hall; 530-752-3026; Environmental Science & Policy (<http://desp.ucdavis.edu/>); Faculty (<http://desp.ucdavis.edu/faculty/>)

### The Program of Study

Environmental Science & Policy is a teaching and research department offering courses, workshops, and directed group study classes that focus on the complex trade-offs that arise from interdependencies

between natural and human systems. The department offers Bachelor of Science degrees in Environmental Science & Management (p. 262) and in Environmental Policy Analysis & Planning (p. 258). Courses in Environmental Science & Policy (p. 257) also supplement major programs in a wide variety of established disciplines.

## Current Information

Through its continuing contacts with many other departments and teaching divisions on the campus, the department develops a variety of special courses and workshops each year. Check with the Department office for up-to-date information about our courses and workshops.

## Graduate Study

The Graduate Group in Ecology (<https://ecology.ucdavis.edu/>) offers an M.S. and Ph.D. degree program. The Environmental Policy & Management (<https://epm.ucdavis.edu/>) graduate program offers an M.S. degree program.

- Climate Science & Policy, Minor (p. 258)
- Environmental Policy Analysis & Planning, Bachelor of Science (p. 258)
- Environmental Policy Analysis & Planning, Minor (p. 262)
- Environmental Science & Management, Bachelor of Science (p. 262)

## Climate Science & Policy, Minor

### College of Agricultural & Environmental Sciences

Susan Harrison, Ph.D., Chairperson of the Department  
 Gwen Arnold, Ph.D., Co-Vice Chairperson  
 Marissa Baskett, Ph.D., Co-Vice Chairperson

The Climate Science & Policy minor provides students with basic background in climate change science as well as mitigation and adaptation strategies. Students gain an understanding of scientific, social, institutional, and economic dimensions of climate change.

# **Environmental Science & Management, Bachelor of Science**

College of Agricultural & Environmental Sciences

The Environmental Science & Management (ESM) major is jointly coordinated by the Department of Environmental Science & Policy and the Department of Land, Air, & Water Resources.

The major is designed for students who are interested in solving environmental problems from an interdisciplinary perspective linking the natural and social sciences. Students who choose this major will study the interaction of physical, biological, and social components of environmental problems. Students completing the program will understand the scientific basis for environmental decision-making and the legal, economic, and political issues involved in management of the environment.

**Environmental Science & Policy**

Susan Harrison, Chairperson

2132 Wickson Hall; 530-752-3026; Environmental Science & Policy  
(<http://desp.ucdavis.edu/>); Faculty (<http://desp.ucdavis.edu/faculty/>)

# Land, Air, & Water Resources

William Horwath, Chairperson

1110 Plant & Environmental Sciences Building; 530-752-1130; Land, Air & Water Resources (<http://lawr.ucdavis.edu>); Faculty (<http://www.lawr.ucdavis.edu/people/faculty/>)

## The Program

Courses in biology, chemistry, physics, economics, geology, and calculus form the lower division preparatory foundation of the curriculum. These are then tied together with Environmental Science & Policy ESP 001, which provides an inter-disciplinary analysis of several environmental problems. The upper division core consists of foundation courses in physical, biological, and social sciences, as well as applied courses in environmental monitoring, GIS, impact reporting, and statistical analysis. In their junior year, students must choose a specialized track from the following six options:

- Climate Change & Air Quality
  - Ecology, Biodiversity, & Conservation
  - Environmental Data Science
  - Natural Resource Management
  - Soils & Biogeochemistry
  - Watershed Science

A capstone course is required for all seniors and serves to integrate the science, policy/management and biology aspects of the ESM major. All

students gain practical experience through field courses and a required internship. Selected students may also pursue an honors thesis in their senior year.

The ESM major is jointly administered by the Departments of Environmental Science & Policy (ESP) and Land, Air & Water Resources (LAWR). Any student in good standing is eligible to transfer to the major; to do so, please see the student affairs officers in 2134 Wickson Hall or in 1150 Plant & Environmental Sciences Building.

## Careers

Graduates from this program are prepared to pursue careers as practicing environmental scientists, resource analysts and planners working for public agencies and private firms specializing in environmental quality, natural resources or ecological research. The major is also excellent preparation for graduate or professional training in physical and/or biological environmental science graduate programs, as well as in environmental law, administration and environmental policy.

## Major Advisors

Marissa Basket (Environmental Science & Policy); Terrence Nathan (Land, Air & Water Resources)

**Advising centers** for the major, including peer advising, are located in both the Environmental Science & Policy and Land, Air & Water Resources departments. Students whose last names begin with the letters:

- A-L, see Melissa Whaley in 2134 Wickson Hall.
- M-Z, see Lacole Brooks in 1150 Plant & Environmental Sciences.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. Respective of the Specialized Track, the minimum number of units required for the Environmental Science & Management Bachelor of Science is 111.

Code	Title	Units
<b>English Composition &amp; Communication Requirement</b>		
Choose one:		0-4
UWP 101	Advanced Composition	
or UWP 101V	Advanced Composition	
or UWP 101Y	Advanced Composition	
*OR* any course from the UWP 102 or UWP 104 series. (p. 1434)		
UWP 102B, UWP 102G, or UWP 104E recommended		
Passing the Upper Division English Composition Exam.		
Communication; choose one:		4
CMN 001	Introduction to Public Speaking	
or CMN 001V	Introduction to Public Speaking	
CMN 003	Interpersonal Communication Competence	
or CMN 003V	Interpersonal Communication Competence	
or CMN 003Y	Interpersonal Communication Competence	
DRA 010	Introduction to Performance & Digital Media	
English Composition & Communication Requirement Subtotal		4-8
<b>Preparatory Subject Matter</b>		
<i>Biological Science</i>		
BIS 002A	Introduction to Biology: Essentials of Life on Earth	5

BIS 002B	Introduction to Biology: Principles of Ecology & Evolution	5
BIS 002C	Introduction to Biology: Biodiversity & the Tree of Life	5
<i>Geology</i>		
Choose one:		3-4
GEL 001	The Earth	
GEL 050	Physical Geology (Recommended)	
<i>Chemistry</i>		
Choose a series:		10
CHE 002A & CHE 002B	General Chemistry and General Chemistry	
CHE 002AH & CHE 002BH	Honors General Chemistry and Honors General Chemistry	
Choose one; not required: <sup>1</sup>		
CHE 002C or CHE 002CH	General Chemistry Honors General Chemistry	
<i>Physics</i>		
Choose a series:		6-12
PHY 001A & PHY 001B	Principles of Physics and Principles of Physics	
PHY 007A & PHY 007B & PHY 007C	General Physics and General Physics and General Physics	
<i>Economics</i>		
Choose one:		
ECN 001A or ECN 001AV or ECN 001AY	Principles of Microeconomics Principles of Microeconomics Principles of Microeconomics	4
<i>Mathematics</i>		
Choose one series:		6-12
MAT 016A & MAT 016B DISCC	and (Discontinued)	
MAT 017A & MAT 017B	Calculus for Biology & Medicine and Calculus for Biology & Medicine (Recommended)	
MAT 019A & MAT 019B & MAT 019C	Calculus for Data-Driven Applications and Calculus for Data-Driven Applications and Calculus for Data-Driven Applications	
MAT 021A & MAT 021B	Calculus and Calculus	
<i>Environmental Science &amp; Policy</i>		
ESP 001	Environmental Analysis	4
Satisfaction of the General Education requirement.		
Preparatory Subject Matter Subtotal		
<b>Core Subject Matter</b>		
<i>Environmental Science &amp; Management</i>		
ESM 120	Global Environmental Interactions	4
<i>Ecology</i>		
Choose one:		4
ESP 100 or EVE 101	General Ecology Introduction to Ecology	
<i>Environmental Science &amp; Policy</i>		
ESP 162	Environmental Policy	4

<b>Statistics</b>		
STA 100	Applied Statistics for Biological Sciences (Recommended)	4
or STA 013	Elementary Statistics	
or STA 013Y	Elementary Statistics	
Students completing the Environmental Data Science specialized track may also choose STA 032 and cannot choose STA 013 or STA 013Y.		
<i>Environmental Monitoring</i>		
Choose one:		3-4
ATM 124	Meteorological Instruments & Observations	
ESM 108	Environmental Monitoring	
ESP 151L	Limnology Laboratory	
ESP 179	Environmental Impact Assessment	
Students need a unique course for each requirement and cannot double-count a class towards two requirements. For example, ESP 179 can be used for either the environmental monitoring requirement or towards the environmental policy course for the student's specialized track, but not both.		
<i>Environmental Data Science</i>		
ABT/LDA 150	Introduction to Geographic Information Systems	4
or ESM 106	Environmental Data Science	
<i>Internship</i>		
Choose one or more below in any combination for a total of 3 units:		
ESM 092	Internship	
ESP 092	Internship	
ESM 192	Internship	
ESP 192	Internship	
<i>Capstone Class</i>		
ESM 195	Integrating Environmental Science & Management	2
<i>Honors Thesis; Optional</i>		
ESM 194H	Senior Honor Thesis	0-3
Core Subject Matter Subtotal		
<b>Specialized Tracks</b>		
Choose a Specialized Track:		
Climate Change & Air Quality Specialized Track (p. 264)		
Ecology, Biodiversity & Conservation Specialized Track (p. 265)		
Environmental Data Science Specialized Track (p. 266)		
Natural Resource Management Specialized Track (p. 266)		
Soils & Biogeochemistry Specialized Track (p. 267)		
Watershed Science Specialized Track (p. 268)		
Specialized Tracks Subtotal		
<b>Total Units</b>	<b>111-150</b>	
1	CHE 002C or CHE 002CH recommended, but not required.	
<b>Climate Change &amp; Air Quality Specialized Track</b>		
Code	Title	Units
<i>Atmospheric Science</i>		
ATM 060	Introduction to Atmospheric Science	4
ATM 116	Modern Climate Change	3
ESM 131	Air as a Resource	3
<i>Additional Climate Science &amp; Meteorology</i>		
Choose two:		6-8
ATM 110	Weather Observation & Analysis	
ATM 115	Hydroclimatology	
ATM 133	Biometeorology	
ATM 160	Introduction to Atmospheric Chemistry	
GEL 108	Earth History: Paleoclimates	
<i>Environmental Science</i>		
Choose three environmental science courses, must select at least one from section A and one from section B		
A—Physical		
ESM 100	Introduction to Water Science	
ESM 121	Water Science & Management	
ESP/GEL 116N	Oceanography	
ESP 152	Coastal Oceanography	
HYD 141	Physical Hydrology	
HYD 143	Ecohydrology	
SSC 100	Principles of Soil Science	
B—Biomes		
ENH 160	Restoration Ecology	
ESM 141	Role of Fire in Natural Ecosystems	
ESM/PLS 144	Trees & Forests	
ESP 124	Marine & Coastal Field Ecology	
ESP/GEL 150C	Biological Oceanography	
ESP 151	Limnology	
ESP 155	Wetland Ecology	
EVE 115	Marine Ecology	
EVE/PLB 117	Plant Ecology	
EVE 147	Biogeography	
EVE 149	Evolution of Ecological Systems	
GEL 136	Ecogeomorphology of Rivers & Streams	
PLS 101	Agriculture & the Environment	
PLS 130	Grassland Ecology	
PLS 162	Urban Ecology	
WFC 168	Climate Change Ecology	
<i>Environmental Policy</i>		
Choose two:		7-8
ESP/ECI 163	Energy & Environmental Aspects of Transportation	
ESP 165	Climate Policy	
ESP 167	Energy Policy	
ESP 171	Urban & Regional Planning	
ESP 172	Public Lands Management	
ESP 174	Environmental Justice Policy & Practice	
ESP 179	Environmental Impact Assessment	

SOC 160	Sociology of the Environment		
Total Units		32-40

HYD 143	Ecohydrology		<b>Environmental Toxicology, Bachelor of Science</b>	
HYD/EBS 144	Groundwater Hydrology		<b>College of Agricultural &amp; Environmental Sciences</b>	
HYD 145	Water Science & Design		Toxic agents in the environment include pesticides, food additives, industrial waste, and metals as well as chemicals produced by animals, plants, fungi and bacteria. Students in the Environmental Toxicology major learn how toxicants produce adverse effects by understanding their environmental fates and biological activities. They learn about monitoring concentrations and the distribution and persistence of agents found in water, soil, air and foods. Toxicity testing procedures and exposure assessments are used to help evaluate the potential for harm to humans and other species. By understanding the cellular targets and biochemical mechanisms of perturbation by toxicants, toxicologists can better estimate adverse effects. Overall, students learn mechanisms by which toxic agents act, their origin and fate and how toxicologists evaluate the risk of adverse effects and balance them against the benefits.	
<i>Physical Environments</i>				
<b>Choose one:</b>		<b>3-5</b>		
ESP 151L	Limnology Laboratory

ABT/HYD 182	Environmental Analysis Using GIS			
ESM 185	Aerial Photo Interpretation & Remote Sensing			
ESP 106	Environmental Data Science			

## The Program

Preparatory courses in biology, chemistry, mathematics, and physics are required to provide fundamental principles that underlie toxicology. Students in the major are expected to understand the environmental fates and biological activities of different classes of toxic substances, and the legislative issues that arise from chemical use. Opportunities are available to develop an in-depth understanding in areas of emphasis through a selection of electives.

### Emphases

Elective course work in many disciplines can complement the required core courses. Providing a framework for selecting restricted electives, the major offers specializations in (1) Ecotoxicology & Environmental Chemistry, (2) Forensic Science & Regulatory Toxicology, and (3) Molecular & Biomedical Toxicology. The first category includes topics in chemical fate, transport and degradation, as well as ecology, wildlife, and aquatic toxicology. The second category includes forensic science, environmental policy and management, and public health. The third category includes pharmacology, biotechnology, medicine, veterinary medicine, and food toxicology. Students are encouraged to select course work from these Emphases and beyond to match their interests.

### Internships & Career Alternatives

Occupations that use environmental toxicology include risk assessment, pharmaceutical development, food additive toxicity testing, managing regulatory compliance, residue or forensic analysis, pest control, monitoring and field sampling, industrial hygiene, and environmental health and safety. A substantial proportion of graduates elect to pursue advanced professional training in law, medical, pharmacy, or veterinary medical school, or in graduate programs in pharmacology, toxicology, agricultural and environmental chemistry, or public health. During undergraduate study, optional internships or research projects are recommended to provide training and work experience to help students pursue future goals.

### Lead Faculty Advisor

Michele La Merrill

### Environmental Toxicology Major Advisor

Erica Cefalo

**Advising Center** for the major is located in 1086 Academic Surge. Contact the Environmental Toxicology major advisor at 530-754-9796.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Environmental Toxicology Bachelor of Science is 118.

- Epidemiology, Master of Science (p. 271)
- Epidemiology, Doctor of Philosophy (p. 271)

## Epidemiology, Master of Science

### Graduate Studies

#### Graduate Study

The Graduate Group in Epidemiology offers programs of study and research leading to M.S. and Ph.D. degrees. Areas of interest include environmental/occupational epidemiology; infectious disease epidemiology; zoonotic & vector-borne diseases; epidemiologic methods & biostatistics; health services & health economics; nutritional epidemiology; reproductive, perinatal, developmental & pediatric epidemiology; wildlife epidemiology; social & behavioral epidemiology; and cancer epidemiology. For detailed information regarding the program, address the chairperson of the group or see the website.

#### Degree Requirements & Program Coordinator

See Epidemiology (<https://grad.ucdavis.edu/programs/gepd/>).

## Epidemiology, Doctor of Philosophy

### Graduate Studies

#### Graduate Study

The Graduate Group in Epidemiology offers programs of study and research leading to M.S. and Ph.D. degrees. Areas of interest include environmental/occupational epidemiology; infectious disease epidemiology; zoonotic & vector-borne diseases; epidemiologic methods & biostatistics; health services & health economics; nutritional epidemiology; reproductive, perinatal, developmental & pediatric epidemiology; wildlife epidemiology; social & behavioral epidemiology; and cancer epidemiology. For detailed information regarding the program, address the chairperson of the group or see the website.

#### Degree Requirements & Program Coordinator

See Epidemiology (<https://grad.ucdavis.edu/programs/gepd/>).

## Evolution & Ecology

### College of Biological Sciences

Peter Wainwright, Ph.D., Chairperson of the Department; term ends June 30, 2025.

#### Department Office

2320 Storer Hall; 530-752-1272; Evolution & Ecology (<https://eve.ucdavis.edu/>); Faculty (<https://eve.ucdavis.edu/people/>)

The department of Evolution & Ecology offers the majors and minor in Evolution, Ecology & Biodiversity.

- Evolution, Ecology & Biodiversity, Bachelor of Arts (p. 271)
- Evolution, Ecology & Biodiversity, Bachelor of Science (p. 273)
- Evolution, Ecology & Biodiversity, Minor (p. 274)

## Evolution, Ecology & Biodiversity, Bachelor of Arts

### College of Biological Sciences

The major in Evolution, Ecology & Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.

#### The Program

The program of study for the major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in biodiversity, evolution and ecology and various more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking. Evolution, Ecology & Biodiversity majors may earn either a Bachelor of Science or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

#### Career Alternatives

A degree in Evolution, Ecology & Biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.

#### Faculty Advisor

Laci M. Gerhart, Ph.D.

#### Advising

Biology Academic Success Center (BASC) (<https://basc.biology.ucdavis.edu/>) in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410.

#### Teaching Credential Subject Representative

Students planning for a teaching career should consult the School of Education in regards to preparation for certification; see the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Evolution, Ecology & Biodiversity Bachelor of Arts is 76.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
<i>Biological Science</i>		15
BIS 002A & BIS 002B & BIS 002C	Introduction to Biology: Essentials of Life on Earth  and Introduction to Biology: Principles of Ecology & Evolution  and Introduction to Biology: Biodiversity & the Tree of Life	

**Chemistry**

## Evolution, Ecology & Biodiversity, Minor

### College of Biological Sciences

Learn about the diversity of life of Earth, including diversity in genes, physiology, shapes, sizes, and behaviors. You will learn about how this diversity emerged, as plants, animals, and microbes became adapted to the environment and to each other. You will learn to predict whether populations of interacting organisms will persist over time.

### Faculty Advisor

Laci M. Gerhart, Ph.D.

## Advising

Biology Academic Success Center (BASC) (<https://basc.biology.ucdavis.edu/>) in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410.

Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

Code	Title	Units
EVE 100	Introduction to Evolution	4
EVE 101	Introduction to Ecology	4
Courses selected for the Biodiversity and Advanced Ecology or Evolution sections must add up to at least 10 units.		10

### Biodiversity

Choose one:

ENT 103	Insects Systematics
EVE 105	Phylogenetic Analysis of Vertebrate Structure
EVE/PLB 108	(Discontinued)
EVE 112	Biology of Invertebrates
EVE 112L	Biology of Invertebrates Laboratory
EVE 114	Experimental Invertebrate Biology
EVE 140	Paleobotany
MIC 105	Microbial Diversity
MIC 105L	Microbial Diversity Laboratory
NEM 110	Introduction to Nematology

- Food Science, Bachelor of Science (p. 275)

## Food Science, Bachelor of Science

### College of Agricultural & Environmental Sciences

Food Science is a discipline in which biological, physical, and sensory sciences are integrated for the study of foods to ensure their safety, quality, and healthful properties. The food science curriculum encompasses food chemistry and biochemistry, food safety and microbiology, food processing and preservation, and sensory and consumer sciences.

## The Program

Food Science is a multidisciplinary major that includes core competencies in food chemistry and analysis, food safety and microbiology, and food processing and engineering. After completing the preparatory course work, students focus on advanced subject courses in food chemistry and biochemistry, food processing, sensory evaluation, and food microbiology applied to improve the safety, stability, taste, nutrition, convenience, sustainability and value of foods.

## Career Alternatives

Opportunities for employment include positions in the food and allied industries, government agencies, and educational and research institutions. Graduate study for the food science student may lead to M.S. or Ph.D. degrees in food science, or in related fields such as agricultural chemistry, biochemistry, microbiology, nutrition and health sciences.

**Advising Center** for the major is located in 1204 RMI South Building; 530-752-3250.

## Lead Faculty Advisor

A.E. Mitchell (Food Science & Technology)

## Graduate Study

A program of study and research leading to M.S. and Ph.D. degrees in Food Science is available. For further information on graduate study, contact the graduate advisor.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Food Science Bachelor of Science is 123.

## Forensic Science, Master of Science

Graduate Studies

### Graduate Study

The Forensic Science Graduate Group offers the degree of MS in Forensic Science. This program, offering a Plan I-Thesis option and a Plan II-Capstone Option, has two tracks, DNA or Criminalistics, enabling the student to take core courses emphasizing the physical or biological sciences. Each track requires the student to take nine core courses, totaling 26-27 units, 3 units of seminar, 9 elective units, and 15-16 thesis research units for a total of 54 units. Students can take courses outside their specializations, but they must complete the courses required for their own track. The FOR seminar courses in the fall and winter quarters are required for new students. The FOR spring seminar may be taken in any spring quarter or students may take one additional seminar course in another department or program before graduation.

### Preparation

Appropriate preparation is an undergraduate degree in physical or natural sciences, engineering or a closely related field with a GPA of 3.000 or higher. Examples include Biochemistry, Chemistry, Molecular Biology, Biology, Genetics, and Engineering. Applicants must have completed at least one year of general chemistry, one quarter of organic chemistry, one quarter of general physics, math through calculus and a class in statistics. Other recommended courses include general biology, biochemistry and genetics.

207 Sproul Hall; 530-754-8750; French & Francophone Studies (<http://french.ucdavis.edu>); Faculty (<https://frenchanditalian.ucdavis.edu/directory/>)

## Graduate Study

The department offers programs of study and research leading to M.A. and Ph.D. degrees in French. Candidates for the Ph.D. have the option of enriching their degree program by preparing a designated emphasis in African American & African Studies, Classics & Classical Receptions, Critical Theory, Feminist Theory & Research, Second Language Acquisition, and/or Studies in Performance & Practice. Detailed information may be obtained from the graduate advisor or the department chairperson.

### Prerequisite Credit

Credit will not normally be given for a course if it is the prerequisite of a course already successfully completed. Exceptions can be made by the department chairperson only.

## French, Bachelor of Arts

**College of Letters & Science**

The major program assures proficiency in all four language skills—speaking, listening, reading, and writing—and acquaints students with the intellectual and cultural contributions of the French-speaking world through the study of its literatures, traditions, and institutions.

## The Program

The department encourages its students to work closely with the academic advisor in designing a major tailored to their needs and interests within the broad requirements prescribed by the program and to avail themselves of the guidance of an excellent teaching faculty. Each year, a substantial number of students with good preparation in French participate in the university's very popular Education Abroad Program, which maintains centers in Bordeaux, Lyon, and Paris.

### Career Alternatives

Foreign language teachers, a cardiologist, a veterinarian, a naval commander at the Pentagon, a professor of Political Science, lawyers, sales representatives, journalists, a speech pathologist, a law professor, translators, a senior applications programmer, travel agents, independent business owners, a senior museum curator, nurses, financial managers, stock brokers, and an industrial attaché for a French trade commission—all graduated with an A.B. in French from UC Davis. These represent only a small fraction of the career choices documented in a survey of department graduates.

### Major Advisor

Consult the department office.

### Honors Program

Candidates for high or highest honors in French must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in FRE 194H (4 units) and FRE 195H (4 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in French are in addition to the regular requirements for the major in French.

### Education Abroad

The department of French and Italian encourages students to study abroad in the Global Learning Hub (<https://globallearning.ucdavis.edu/>). With the approval of a major advisor, applicable courses taken abroad may be accepted in the major or minor programs.

### Prerequisite Credit

Credit will not normally be given for a course if it is the prerequisite of a course already successfully completed. Exceptions can be made by the department chairperson only.

## Graduate Study

The department offers programs of study and research leading to the M.A. and Ph.D. degrees in French & Francophone Studies. ## Italian, Bachelor of Arts

### College of Letters & Science

The major in Italian provides a solid language background that will enable the student to develop an appreciation for the numerous contributions Italians and Italophones have made to literature, the arts, political theory, science, and other expressions of human creativity. The major also emphasizes the influence Italian culture continues to have on our global world.

### The Program

The Italian program is geared to the specific needs and interests of the students, who enjoy the advantages of a small classroom setting and the individualized mentoring of dedicated professors. While the use of Italian is stressed in language and literature courses, the program is interdisciplinary in nature. Starting at the lower division level, students collaborate closely with academic advisors in order to design a major curriculum that includes culture, film, art history, history, food science, and other courses in related fields offered on campus or in Italy. The Italian program actively participates in the UC-wide Education Abroad Program (Bologna), the International Internships Program, and the Summer Abroad Program (Rome), all of which offer opportunities for travel and study in Italy.

### Career Alternatives

The Italian Program provides a solid foundation for a variety of career paths by offering training in Italian language and culture and developing skills that are vital in any professional setting: critical analysis, interpersonal skills, effective written and oral communication, and cultural sensitivity. In addition to specific career paths in foreign service and education, knowledge of the Italian language and culture enhances professional opportunities in a variety of fields, such as viticulture and enology, food science, political science, medicine, architecture, and engineering.

### Honors & Honors Program

Candidates for high or highest honors in Italian must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in ITA 194H (3 units) and ITA 195H (3 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program.

### Education Abroad Program

The department strongly encourages students to study abroad in a Summer Abroad program (Rome), the Education Abroad Program (Bologna), and other approved possibilities.

### Prerequisite Credit

Credit will not normally be given for a course if it is a prerequisite of a course already successfully completed. Exceptions can be made only by the major advisor.

### Major Advisor

## Gender, Sexuality, & Women's Studies

College of Letters & Science

Elizabeth Miller, Ph.D., Chair of the Department; term ends June 30, 2025

## Department Office

1200 Hart Hall; 530-752-6429; Gender, Sexuality, & Women's Studies (<http://gsws.ucdavis.edu/>); Faculty (<https://gsws.ucdavis.edu/people/>)

- Gender, Sexuality, & Women's Studies, Bachelor of Arts (p. 281)
- Gender, Sexuality, & Women's Studies, Minor (p. 283)
- Sexuality Studies, Minor (p. 284)

## Gender, Sexuality, & Women's Studies, Bachelor of Arts

College of Letters & Science

### The Major Program

Gender, Sexuality & Women's Studies is an interdisciplinary major founded on the understanding that the social production of gender is inseparable from that of race, sexuality, class, nationality, ability and other categories of difference. Our curriculum places feminist concerns within a transnational context, while respecting the need for geographic and historical specificity. These frameworks inform our teaching, our research, our institutional & community practices, and the principles we bring to our classrooms. Gender, Sexuality & Women's Studies offers a wide range of classes that use the lenses of gender & sexuality studies to examine colonialism and post colonialism, globalization, history, queer & trans experiences, science & technology, literature, popular culture, feminist video production, cinema & digital media, fashion, and food. The Department offers both an undergraduate major and minor. We also work collaboratively with other units on campus to sponsor two undergraduate minors, Sexuality Studies and Social, Ethnic & Gender Relations.

### The Department

One of the most exciting and challenging aspects of the Gender, Sexuality & Women's Studies Department is that students, in consultation with peer and faculty advisors, can pursue their particular academic interests and design their course of study accordingly. In devising their major plan, students will draw on courses offered in African American & African Studies, American Studies, Anthropology, Asian American Studies, Chicana/o Studies, Comparative Literature, English, French, German & Italian Studies, History, Linguistics, Native American Studies, Political Science, Psychology, Science & Technology Studies, Sociology, Spanish, and other related disciplines.

In addition to offering a broad array of courses that deal with gender, class, race, ethnicity, and sexuality, the Gender, Sexuality & Women's Studies Department affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option.

Students design a program of study in consultation with an advisor that is in accordance with their individual career goals. Many Gender, Sexuality & Women's Studies majors find it advantageous to pursue a double major, or to minor in another field of study. Upon successful completion of the degree requirements, students majoring in the program will graduate with a Bachelor of Arts in Gender, Sexuality & Women's Studies.

### Career Alternatives

A degree in Gender, Sexuality & Women's Studies opens many possibilities for future employment. The major introduces students to relevant social issues, fosters critical thinking, develops strong verbal, writing and research skills and encourages social advocacy.

Pre-professional students will discover that a major in Gender, Sexuality & Women's Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social policy, international development, social justice or gender-related work in a wide range of institutions and contexts. Students who plan to do practical work in counseling, clinical psychology, social services, education, media or politics will also find a major in Gender,

Sexuality & Women's Studies provides a strong foundation. Those who wish to pursue graduate level research in such fields as anthropology, comparative literature, cultural studies, economics, education, ethnic studies, English, cinema & digital media studies, history, languages & literatures, performance studies, philosophy, political science, and sociology will also benefit from a strong Gender, Sexuality & Women's Studies background in feminist theory, social analysis, history and a sound understanding of cultural representation and narratives of difference.

Increasingly, media & cultural institutions, corporations, and personnel firms seek to hire specialists in Gender, Sexuality, & Women Studies who are trained in institutional practices that support inclusive practices in recruitment & hiring and that foster diverse workplace environments. State & federal agencies need people who have special understanding of the workplace challenges faced by women, and by all groups who are under-represented in specific industries and professions. Educational institutions and non-profit organizations across the spectrum need specialists to develop and administer gender, sexuality & women's studies programs, multi-cultural community centers, LGBTQ organizations and other organizations designed specifically to deal with gender, social diversity and inequality, and a growing range of old and new social challenges arising in the context of globalization.

Some of our alumni have developed careers other than those described above. Gender, Sexuality & Women's Studies faculty and peer advisors can provide even more ideas about possible future careers. Doing internships related to coursework enables students to integrate theory with hands-on practice and service in the community.

### **Major Advisor**

Advising (<https://gsws.ucdavis.edu/advising/>) is located in 1200 Hart Hall; gsw-advising@ucdavis.edu; 530-752-6429.

## **Graduate Study**

## Sexuality Studies, Minor

College of Letters & Science

### The Minor

Sponsored by the Gender, Sexuality & Women's Studies Department (p. 281), the interdisciplinary minor in Sexuality Studies offers students a unique opportunity to study the concept of sexuality—including sexual identities, desires, and practices—by examining its changing meanings and effects across different political, historical, and cultural landscapes. At UC Davis, Sexuality Studies pays particular attention to how gender, race, class, nation, empire, colonialism, and globalization shape popular understandings of sexuality, and how these understandings of sexuality in turn affect social, political, and economic relations of power.

PSC 158	Sexual Orientation & Prejudice	
GSW 070	Theory & History of Sexualities	
Choose two Field B courses (below) or seminars/individual study by petition to achieve a total of 18-20 units:		8
ASA 112	Asian American Women	
CHI 160	Mexican Film & Greater Mexican Identity	
ENL 166	Love & Desire in Contemporary American Poetry	
HIS 132	Crime & Punishment in Early Modern Europe	
POL 152	The Constitutional Politics of the Equality	
SOC 120	Deviance	

WMS 140	Gender & Law
WMS 179	(Discontinued)

Total Units 19-20

## Restrictions

- Students may take no more than one lower division course to satisfy requirements for the minor.
- To satisfy the interdisciplinary component of the minor, students must either split their coursework roughly equally between two programs/departments or take coursework in at least three programs/departments.
- Students may petition the minor advisor to accept Special Topics courses and Capstone/Senior Seminars as additional courses, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.
- Students may petition the minor advisor to accept up to 4 units of registered individual study, group study or internship towards the minor program, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.

## Geography (Graduate Group)

College of Agricultural & Environmental Sciences

Diana Davis, D.V.M., Ph.D., Chairperson of the Group

### Group Office

Carrie Armstrong-Ruport ([caruport@ucdavis.edu](mailto:caruport@ucdavis.edu)), Student Affairs Officer; 129 Hunt Hall; 530-752-4119; Geography (<http://geography.ucdavis.edu>); Faculty (<http://geography.ucdavis.edu/people/faculty/>)

- Geography, Master of Arts (p. 284)
- Geography, Doctor of Philosophy (p. 285)

## Geography, Master of Arts

College of Agricultural & Environmental Sciences

### Graduate Study

The Graduate Group in Geography (GGG) offers programs of study and research leading to M.A. and Ph.D. degrees. Faculty and students share a common interest in spatial interaction between humans and the biophysical environment. The wide faculty interests attract a diverse set of students in such areas as biogeography, urban forestry and related natural science and engineering fields, as well as human geography and related social science fields. A number of faculty members use and teach geographic information systems, remote sensing, and related geographic techniques, and most have a strong field orientation. The strengths of the Davis campus and its faculty enable the program to focus on important issues including people, place and power, community and regional identity and change, people-environment interaction, agricultural sustainability, landscape architecture, environmental change, biogeography, natural resource management, and technological innovations in computing and the use of geographic information systems. Students are mentored by faculty across the many colleges of the university.

## Preparation

Most students considered for admission will have an undergraduate major in geography or in a closely related field. Generally, a student without an undergraduate degree in geography will be required to complete the equivalent of a minor in geography, consisting of one course each in human geography, physical geography and geographic methods, plus any additional undergraduate coursework required as background for the student's research emphasis, as determined by the student's guidance committee.

## Degree Requirements & Program Coordinator

- Russian, Minor (p. 288)

## German, Bachelor of Arts

College of Letters & Science

The German major explores in depth the literature and language, the culture, history, politics, and commerce of the German-speaking world (primarily Germany, Austria and Switzerland). The key to the major lies in the careful balance between solid core requirements and the possibility to explore German subject areas through the lens of other disciplines, such as music, art, philosophy, history, and economics.

## The Program

The department offers courses that highlight literary figures, movements and themes. These courses form the core of upper division literature electives, but we also offer courses that discuss contemporary culture, history, politics, and commerce in German-speaking countries. Regardless of emphasis, students will find maximum practice in spoken and written German as well as in listening comprehension in all upper division courses offered in German.

## Career Alternatives

Completion of the major prepares students for graduate study in German or for career opportunities in international fields ranging from employment in business and government to careers in the fine arts and sciences. Also, it permits admission to professional schools such as law and medicine.

## Honors & Honors Program

The honors program consists of two quarters of research (194H) terminating in an honors thesis. For details consult the undergraduate major advisor. Graduation with high or highest honors requires participation in the honors program.

## Prerequisite Credit

Credit normally will not be given on the lower division level for a course that is the prerequisite of a course already successfully completed.

## Major Advisor

Contact the Advising (<https://german.ucdavis.edu/contact-advisors/>).

## Graduate Study

The Department offers programs of study and research leading to the M.A. degree and to the Ph.D. degree in German Literature. Additional degree options for a designated emphasis are available through departmental affiliations with the programs in Social Theory & Comparative History, Critical Theory, Feminist Theory & Research, and Second Language Acquisition. Detailed information may be obtained by writing to the Department Chairperson or the Graduate Advisor.

## Graduate Advisor

## Russian, Bachelor of Arts

College of Letters & Science

The Russian major introduces students to a culture rich in art, music, theater, film, language, and literature. The major offers an opportunity to learn skills needed to enter the fields of foreign affairs, world politics, and international trade, or to begin graduate work in literature, history, cultural studies and international relations.

### The Program

The major program instructs students in speaking, understanding, reading, and writing the Russian language. The program also acquaints students with the intellectual and cultural contributions of the Russian world through the study of its literature, traditions, and institutions.

### Internships & Career Alternatives

Russian majors may participate in internships where they can serve as translators and interpreters for schools and business firms throughout Northern California. Upon graduation, many Russian majors enter the business world or enter graduate programs in Slavic studies and international relations. The program encourages students to supplement their Russian studies with courses in related fields such as international relations, political science, computer science, cultural studies, or economics in order to maximize their career possibilities.

### Honors & Honors Program

The honors program comprises at least one quarter of study under course 194H, which will include a research paper. For details, consult the major advisor.

### Study Abroad

Students who have completed one or two years of Russian language study can participate in the Education Abroad Program (EAP) in Moscow. Many of our students also participate in summer, semester, and yearlong programs sponsored by CIEE and ACTR in St. Petersburg

and Moscow. Consult with the Russian Department for global learning opportunities.

### Prerequisite Credit

Credit normally will not be given for a course if that course is the prerequisite for a course already completed.

### Course Placement

Students who have learned Russian at home must consult the department for placement instructions. Students with two years of Russian in high school normally continue in RUS 002; those with three years, RUS 003; those with four years, RUS 004.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Russian Bachelor of Arts is 36.

## Global Learning Hub

### College of Letters & Science

Alfred Boll, SJD, Executive Director  
Aliki Dragona, Ph.D., Faculty Director, Academic Programs  
Global Learning Hub  
International Center, Suite 1120  
530-752-5763; Fax 530-752-4151; [globallearning@ucdavis.edu](mailto:globallearning@ucdavis.edu); Global Learning Hub (<http://globallearning.ucdavis.edu/>)

Through the Global Learning Hub, each and every UC Davis student can find global learning opportunities available on campus, in the region, virtually and internationally. The Hub offers global learning programs, workshops, and resources that enhance all UC Davis students' academic and career pursuits through four broad areas of opportunities: Community Engagement, Global Skills & Leadership, Internships & Research, and Study Abroad. UC Davis is committed to preparing the next generation of global problem-solvers and change-makers. As such, we aim to prepare our undergraduate, graduate, and professional students to solve global challenges collaboratively, equitably and sustainably.

The Global Learning Hub helps students navigate global learning opportunities that fit their academic, personal, and professional interests, including fit with academic schedules and requirements. Additionally, the Hub provides students with programmatic and funding resources, including two online search tools and financial aid workshops. The Global Learning Hub also administers the Global Studies minor.

## Community Engagement

Through community-engaged global learning programs, students develop skills to work with communities in person or remotely to deepen their understanding of a local context, history, and complexities of local challenges that have a global impact. The communities and local leaders are the drivers of the projects. Students work with and learn from the

local community and help develop long-term sustainable solutions. These programs stand-alone or can be found within study abroad, internship, and research opportunities.

## Global Skills & Leadership

Global skills and leadership programs provide students with the opportunity to develop professional skills and career readiness important for students' post-academic endeavors. Intercultural learning is also weaved throughout these opportunities, offering students a chance to self-reflect on their own identities and individual experiences.

## Internships & Research

The internship and research programs offered through the Global Learning Hub provide students with the opportunity to apply global concepts learned through experience and help students develop career enhancement skills they can apply on a resume, LinkedIn profile, and during interviews. In addition to for-credit and funded internships and research, the Global Learning Hub provides resources and support for students to continue global engagement after graduation.

## Study Abroad

UC Davis Study Abroad integrates global opportunities into the academic experience, supporting students each year in studying across 30 countries, exploring the world, and gaining valuable skills and networks. In the quest for Global Education for All, Study Abroad goes beyond traditional programs to meet the academic, personal and professional needs of UC Davis' diverse and driven student body.

Financial aid and scholarships apply. Applicants must have a 2.000 GPA, be in good academic and disciplinary standing, and must fulfill any prerequisites specific to the program courses.

### Types of Study Abroad Programs

#### UC Davis Quarter Abroad

##### Academic Focus

Students can earn 12-20 UC Davis quarter units through 3-6 courses taught abroad or away. Academic focus varies by program and may include subject area courses, lab work, internship/field work, and/or practical training experience. Programs range in length from 10 to 11 weeks. UC Davis faculty leaders teach one or more of the courses of the program, while other courses may be taught or co-taught by faculty of the host country, under supervision by UC Davis faculty. Students may be able to apply earned units towards their major, minor, language, or general education requirements.

#### UC Davis Summer Abroad

##### Academic Focus

Students earn 8 UC Davis quarter units through two courses taught abroad or away. All courses are taught by UC Davis faculty, sometimes with select supplemental lectures provided by local experts, or by local faculty in Partnership programs. Planned group activities and field trips enhance classroom instruction. Students may be able to apply earned units towards their major, minor, or general education requirements. Programs allow students to complete coursework in English in a wide variety of non-English-speaking locations.

#### UC Davis Internships Abroad

##### Academic Focus

Students earn 6 or more UC Davis units for internship hours and supplemental instruction. Internship programs are structured around thematic areas of study such as Global Health, Engineering, Business

and Communication, and many others. Placements are a collaboration between international organizations, the Global Learning Hub, and the UC Davis Career Center to ensure the internships meet requirements for credit and relevance to the subject area. In addition to internship hours worked, students will take an online course taught by UC Davis faculty that places their internship in a broader social and cultural context. Planned group activities and field trips enhance the formal internship work. Students may be able to apply earned units towards their major, minor, or general education requirements. Most placements are in English-speaking environments; some programs require language proficiency.

#### UC Davis Summer Virtual Internships

##### Academic Focus

Students earn 6 or more UC Davis units for internship hours and supplemental instruction. Virtual internship programs are structured around thematic areas of study such as Business and Communication, Engineering and Computer Science, Environment, Green Tech, and Sustainability, and many others. Virtual internships allow students to earn UC Davis internship credit while also gaining cross-cultural and professional work experience in diverse fields without the need to travel. In addition to internship hours worked, students will take an online course taught by UC Davis faculty that places their internship in a broader social and cultural context. Students may be able to apply earned units towards their major, minor, or general education requirements. Most placements are in English-speaking environments.

#### UC Davis Intensives Abroad

##### Academic Focus

Students earn 2-8 UC Davis units through one or more courses. These courses are taught by UC Davis faculty and may be offered as 3-week stand alone programs abroad or with a 2-3-week international component to a course taught during a regular term on campus. A heavy focus on field trips, onsite projects and group activities enhances classroom instruction. Students may be able to apply earned units toward their major, minor, or general education requirements. Travel components are typically offered in the summer or during the winter break, in some cases linked to fall or spring on-campus courses.

#### UC Davis Exchanges

##### Academic Focus

UC Davis Exchanges are department-based undergraduate exchanges that leverage new or preexisting working/research relationships among faculty to promote student mobility between institutions. UC Davis faculty and departments identify courses at the partner institution that are taught in English and can be converted into course equivalents at UC Davis. Students enroll in at least 12-15 units of advisor-approved course equivalents for each quarter they are on UC Davis Exchanges. Exchanges may be for 1, 2, or 3 academic quarters and are built around a specific thematic academic program.

#### UC Education Abroad Program (UCEAP)

Aliko Dragona, Ph.D., Faculty Director

Global Learning Hub

International Center, Suite 1120; 530-752-5763; Fax 530-752-4151

The UC Education Abroad Program (UCEAP) is one of the premier study abroad programs in the nation. UCEAP offers international study programs in association with nearly 140 host universities and institutions in some 32 countries around the world. Participating students remain registered at UC while studying abroad and receive full academic credit for their work. UCEAP students maintain their financial aid and scholarship eligibility while abroad. UCEAP has study abroad

opportunities for undergraduates at all class levels as well as for qualified graduate students who have completed at least one full year of graduate work and have the support of their graduate program and graduate dean.

UCEAP offers year, semester, quarter and summer programs for all majors. Over 50% of the programs are offered in English, while several programs allow students to learn a language while experiencing the culture first hand. Some programs include the possibility of internships or field research. In most cases, students attend courses taught by the faculty of the host institution.

UC faculty members serve as directors at most Study Centers abroad, providing in-country academic advising to students during their program. Full UC credit is granted for courses satisfactorily completed, and courses and grades are recorded on official UC transcripts. With careful planning, most UCEAP students make normal progress toward their UC degrees, even those students who study abroad for a full year. With approval of their major or college advisors, students may earn credit towards their major, minor and general education requirements.

**Graduation Requirements:** UCEAP prospective applicants, particularly students who intend to study abroad during their senior year, should carefully plan their course programs for Davis and abroad in order to satisfy university, college, and major/minor requirements for their degree.

Although units and grade points earned while studying abroad through UCEAP are incorporated into the University transcript and GPA, departments and majors retain the right to determine which UCEAP courses will be accepted in satisfaction of major and minor requirements.

All degree candidates must meet the University residence requirement. Recognizing the special value of study abroad, the faculty have approved two exceptions to the usual residence requirement for students participating on UCEAP.

- Students planning to graduate immediately upon completion of their UCEAP program may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus preceding entry into UCEAP.  
or
- Students should consult with their college Dean's office early during the UCEAP planning process for information on the university residence requirement.

Students may satisfy GE requirements while on UCEAP, but should consult with the Global Learning Hub and their college Dean's office prior to departure for information on the certification process.

Participants may only return to campus from UCEAP to complete any outstanding degree requirements. Participants who satisfy all degree requirements while abroad and expect to graduate upon completion of the term abroad should file for candidacy to receive their degree the term following program participation; candidacy filing dates are established by the Office of the University Registrar. In most cases, transcripts from abroad may not be received in time to be posted on the students' Davis transcript for UCEAP returnees to be included on the degree list for the term they are abroad. Such returning students may register to participate in the commencement ceremony; however, their graduation date will be listed as the following term.

- Global Studies, Minor (p. 290)

## Global Studies, Minor

### College of Letters & Science

The minor is overseen by the Global Studies Minor Committee. For more information, see Global Studies Minor (<https://globallearning.ucdavis.edu/resources/gs/>).

The interdisciplinary minor in Global Studies (20-24 units) enables students across disciplinary areas to learn about global issues as well as to gain first-hand experience both locally and internationally through academic coursework and experiential learning. The minor can be completed with or without international travel. A combination of coursework and experiential learning allows students to develop capacities in three areas: global awareness, global diversity, and global action. As they develop global awareness, students examine actions and relationships that influence global systems from multiple perspectives, analyzing how complex systems impact self and others. To engage global diversity, students explore complex dimensions of diversity, equity, and inclusion around the world, including language, culture, and identity. To translate knowledge into global action, students learn to create strategies to apply knowledge, skills, and abilities to collaboratively and equitably foster global well-being and resilience.

Students are expected to work closely with an academic advisor in developing an intellectually coherent global learning program. Each student's program must be approved by the student's advisor and by the Faculty Director of the Global Learning Hub (<https://globallearning.ucdavis.edu/>).

Students must meet with a Global Studies Minor advisor and complete a Global Learning Cluster Worksheet to demonstrate subject interrelatedness. The advisor must approve all courses and credited experiential learning to be counted toward the minor. If it is not feasible for a student to complete the gateway course, the advisor can approve an appropriate substitution. Students will work with the advisor to create a digital portfolio that documents their global learning, which can be shared when pursuing postgraduate employment and/or education.

## Restrictions

No more than two courses from a single UC Davis Department may satisfy the minor requirements. This will guarantee an interdisciplinary program of study. All courses used towards the minor other than the Gateway Course, EAP 001, must be upper division.

## Foreign and/or Heritage Language Study

Students are strongly encouraged to study a foreign and/or heritage language. As specified above, only upper-division coursework in languages may be used to fulfill the minor.

Students work with the advisor to create a digital portfolio that documents their global learning, which can be shared when pursuing postgraduate employment and/or education.

Code	Title	Units
<i>Gateway Course</i>		
EAP 001	Global Thinking	4
<i>Global Learning Cluster</i>		
Choose one:		
	Thematic (Global Theme)	
<b>OR</b>		
		12-16

**Regional (Area of the World)**

One of the above courses can be replaced by a course in the study of an upper-division foreign language and/or heritage language that relates to the chosen thematic or regional focus. Up to 8 units can be substituted by for-credit experiential learning and/or internship with a global dimension. One of the above courses can be replaced by a course in the study of an upper-division foreign language and/or heritage language that relates to the chosen thematic or regional focus.

Up to 8 units can be substituted by for-credit experiential learning and/or internship with a global dimension.

Note: A minimum of 8 units of classroom-based courses will satisfy Requirement 2 when combined with 4-8 units of experiential learning or internships. The variation in experiential or internship units intentionally accounts for variability in units when students pursue internships or other forms of experiential global learning. The Global Studies Minor advisor guides students and approves variable units. When no experiential learning option is pursued, a minimum of 12 classroom units will satisfy the Global Learning Cluster.

**Capstone Experience**

Choose an Option:	4
Option 1: 4 units of experiential or internship learning with a global dimension.	
Option 2: A globally-focused seminar from UC Davis offerings.	

Total Units	20-24

- Health Informatics, Master of Science (p. 291)

## Health Informatics, Master of Science

**Graduate Studies**

### Graduate Study

The Master's degree program seeks to train the next generation of researchers, clinicians and leaders to advance the science of Health Informatics. Successful applicants have backgrounds in health, biology, technology, computer or information science, and are enthused to develop new knowledge, systems and models that can improve health and be translated into practice.

The program of study provides research-oriented applied and theoretical training that spans the use of computer systems and information organization in medicine today, including methods for clinical data

acquisition, data modeling, and interoperability, to design and evaluation of representations of clinical and personal data in hospital and consumer environments. The program emphasizes the development and application of new methods that leverage the electronic medical record and advance computer-aided decision support. A research project and thesis are mandatory degree requirements.

### Clinical Professionals

Demonstrated through a completed baccalaureate or higher-level coursework, work experience, or clinical focus:

- Successful completion of Clinical Education.
- Working experience in digital health technology, ideally through computer or information science and programming.

### Healthcare Information Technology Professionals

Demonstrated through completed baccalaureate, or higher-level coursework, and aligned professional experience:

- Working experience in Healthcare IT, biotechnology, public health or similar experience.
- Knowledge and enthusiasm in the study of Human health, ideally with disease or system-specific expertise.
- Knowledge of clinical or medical systems or data representations.

### Recent Graduates

Demonstrated through a completed baccalaureate or higher-level coursework:

- Knowledge and expertise in biology, pre-health studies, socio-technology studies, information science and/or computer science.

### Researchers

Demonstrated through completed coursework, baccalaureate or higher degrees, personal research experience:

- Applied background in computer science, information science, data science, biology or related field.
- Domain experience in health information or biology research.

### Preparation

The Group encourages applications from clinicians, healthcare IT professionals, recent graduates and researchers who have had experience and interest in the access, linkage and knowledge generation from healthcare data.

### Degree Requirements & Program Coordinator

## Hemispheric Institute of the Americas

**College of Letters & Science**

Juan Diego Díaz, Ph.D., Program Director; term ends June 30, 2025.

### Program Office

Hemispheric Institute of the Americas, 1277 Social Sciences & Humanities Building; 530-752-3046; Hemispheric Institute of the Americas

Americas (<http://lia.ucdavis.edu>); Faculty (<http://lia.ucdavis.edu/people/>)

- Latin American & Hemispheric Studies, Minor (p. 292)

## Latin American & Hemispheric Studies, Minor

### College of Letters & Science

The minor in Latin American and Hemispheric Studies offers students the opportunity to explore connection throughout the Western Hemisphere from an array of perspectives across multiple academic fields.

The minor is made up of six courses, arranged in three tiers: Basic (one lower division course on the history of Latin America); Core (two introductory upper division courses chosen from a designated list of fields other than History); and Elective (three additional upper division courses from a designated list of courses that focus primarily on Latin American and/or Hemispheric issues). Students are strongly encouraged to develop proficiency in Spanish or Portuguese, either through course work (such as completion of SPA 024 or SPA 033), or through life experience such as study abroad.

### Minor Advisor

Undergraduate Advisor ([eheadvisingcenter@ucdavis.edu](mailto:eheadvisingcenter@ucdavis.edu)); 2216 Social Sciences & Humanities Building; 530-752-9241.

Code	Title	Units
Choose one:		4

Total Units	24-26

## History

### College of Letters & Science

Gregory Downs, Ph.D., Chairperson of the Department; term ends June 30, 2026.

### Department Office

2216 Social Sciences & Humanities Building; 530-752-9241; History (<http://history.ucdavis.edu>); Faculty (<https://history.ucdavis.edu/people/faculty/>)

- History, Bachelor of Arts (p. 294)
- History, Minor (p. 298)
- History, Master of Arts (p. 298)
- History, Doctor of Philosophy (p. 299)
- Jewish Studies, Minor (p. 299)

## History, Bachelor of Arts

### College of Letters & Science

The History major develops critical intelligence and fosters an understanding of ourselves and our world through the study of the past—both the "deep past" and the more recent past.

### The Program

A student electing a major in History will receive a broad education in histories of several geographic areas. Students preferring more active engagement in research and writing are encouraged to complete history seminars and/or the honors program.

### Career Alternatives

A degree in history is excellent preparation for a professional career such as teaching, law, journalism, public administration, or business management. Professional schools in these and related fields (including the health professions) are looking for students who can weigh conflicting evidence, evaluate alternative courses of action or divergent points of view, and express conclusions logically in everyday language. These analytical skills are stressed in history classes, and their mastery gives the history student a solid preparation for subsequent training in a specialized career.

### History of Science, Medicine, & Technology

Students can create a concentration in the History of Science, Medicine, & Technology upon consultation with a faculty advisor. They may draw upon the relevant History courses (History HIS 002, HIS 016, HIS 085, HIS 107, HIS 135A, HIS 135B, HIS 136, HIS 139A, HIS 139B, HIS 185A, and HIS 185B) as well as History & Philosophy of Science offerings.

### History & Philosophy of Science

Courses from the History & Philosophy of Science minor may count toward the History major. STS 130A, STS 130B, STS 150, and STS 180 fulfill upper division requirements in either the U.S. or Europe concentration.

For a more detailed description of course offerings, see History & Philosophy of Science (p. 478).

### Honors & Honors Program

A student becomes eligible for graduation with honors by meeting the minimum GPA (usually 3.500) and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the History Department honors program with a GPA of 3.500 or above and write a thesis that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project, interviews, and faculty recommendations. Students admitted into the program must complete the HIS 104A, HIS 104B, HIS 104C sequence of honors courses, which requires the completion of a senior honors thesis. Students who anticipate seeking admission to the honors program are urged to complete at least one HIS 102 course (undergraduate seminar) before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year. Students may substitute HIS 104B and HIS 104C for any courses in their program other than HIS 102 Discontinued.

Students who anticipate pursuing graduate work in history or a teaching credential, and who do not wish to opt for the research emphasis embodied in the honors program, are encouraged to select Plan II of the major.

### Study Abroad & the History Major

The department strongly encourages interested students to pursue their studies abroad. While there are no specific required courses or prerequisites, students are urged to take at least one history course that touches upon the geographic area where they plan to study abroad before departing. To receive a history degree from UC Davis, students must complete at least 18 upper division units in the history major at UC Davis (which can also include HIS 101, HIS 102 Discontinued, HIS 103). The remaining major requirements can be fulfilled abroad provided that (a) the course should be evaluated as at least four UC Davis units, (b) the course should be considered upper division by the standards set forth by the UC Davis Study Abroad Program, and (c) the course should be in the field of History. Students may present copies of the course work, syllabus, and writing assignments to the department's liaison person with the Global Learning Hub (<http://globallearning.ucdavis.edu/>) office for approval.

### Teaching Credential Subject Representative

See the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

Preparing for Careers in Teaching History majors can pursue rewarding careers in teaching. To ensure your undergraduate coursework prepares you for a subject matter competency test, please contact the History Project (<http://historyproject.ucdavis.edu/>).

### Major Advisors

History Undergraduate Advisor ([eheadvisingcenter@ucdavis.edu](mailto:eheadvisingcenter@ucdavis.edu)) or see History (<http://history.ucdavis.edu/>) for updated information.

## American History & Institutions

This University requirement can be satisfied by passing any one of the following HIS courses:

Code	Title	Units	Code	Title	Units
<b>Preparatory Subject Matter</b>					
Choose five lower division courses from the following seven concentrations, including at least one course in three different concentrations. Additional units to reach 20.					
(a) Africa			HIS 015A	Africa to 1900	20
			HIS 015B	Africa Today	
(b) Asia			HIS 008	History of Indian Civilization	
			HIS 009A	History of East Asian Civilization	
			HIS 009B	History of East Asian Civilization	
(c) Europe			HIS 009C/EAS 088	Korean Culture & Society: From Ancient Three Kingdoms to the Global K-Pop	
			HIS 004A	History of Western Civilization	
			HIS 004B	History of Western Civilization	
			HIS 004C	History of Western Civilization

**History, Minor****College of Letters & Science**

The minor in History consists of five upper division courses chosen so that at least three courses are in one field and at least one course is in another field. The two fields shall be chosen from among those defined in the catalog for the major. However, students may also, in consultation with and with the authorization of a faculty advisor, define other thematic fields.

**Minor Advisor**

For updated information, contact the Undergraduate Advisor ([eheadvisingcenter@ucdavis.edu](mailto:eheadvisingcenter@ucdavis.edu)).

<b>Total Units</b>		<b>20</b>

**History, Master of Arts****College of Letters & Science****Graduate Study**

The Department of History offers programs of study and research leading to M.A. and Ph.D. degrees in history. Detailed

information may be obtained by contacting the Graduate Advisor ([historygradadmit@ucdavis.edu](mailto:historygradadmit@ucdavis.edu)).

**The Master of Arts degree is offered only in route to the Ph.D.**

### Degree Requirements & Program Coordinator

See History (<https://grad.ucdavis.edu/programs/ghis/>).

## History, Doctor of Philosophy

College of Letters & Science

### Graduate Study

The Department of History offers programs of study and research leading to M.A. (offered *en route* to the Ph.D. only/no terminal M.A.) and Ph.D. degrees in History. Students in the Ph.D. program receive training in historical research, theory, and teaching as they make significant contributions to the scholarly community. Students graduate with the qualitative and quantitative skills necessary to conduct professional research and teaching in history.

### Degree Requirements & Program Coordinator

See History (<https://grad.ucdavis.edu/programs/ghis/>).

## Jewish Studies, Minor

College of Letters & Science

### Minor

Sven-Erik Rose, Ph.D., Program Director; term ends June 30, 2026.

### Department Office

2216 Social Sciences & Humanities Building; 530-752-9241; Jewish Studies (<http://jewishstudies.ucdavis.edu>); Faculty (<https://jewishstudies.ucdavis.edu/core-faculty/>)

The Program in Jewish Studies offers students the opportunity to explore Jewish history, communities, literature, religion, and culture in a comparative perspective and multicultural framework. Courses include Hebrew language instruction as well as the study of classical and modern Jewish texts in translation.

The interdisciplinary minor in Jewish Studies provides an introduction to the study of Jewish culture, thought, history, and literature. Students learn a broad range of methodologies and critical concepts in these areas and gain insight into the relationship between Jewish identities, histories, and representations and those of the cultures in which Jews throughout the world have lived.

The Program in Jewish Studies will be of special interest to students in History, Religious Studies, Comparative Literature and Sociology as well as other fields in the Humanities & Social Sciences.

# Horticulture & Agronomy (Graduate Group)

College of Agricultural & Environmental Sciences

Amelie Gaudin, Ph.D., Chairperson of the Group

## Group Office

1224 Plant & Environmental Sciences Building; Horticulture & Agronomy Graduate Group (<http://ggha.ucdavis.edu>); Faculty (<https://ggha.ucdavis.edu/our-people/>)

- Horticulture & Agronomy, Master of Science (p. 300)
- Horticulture & Agronomy, Doctor of Philosophy (p. 300)

# Horticulture & Agronomy, Master of Science

College of Agricultural & Environmental Sciences

## Graduate Study

The Graduate Group in Horticulture & Agronomy offers programs of study leading to M.S. and Ph.D. degrees for students interested in the science and management of agricultural crops, including their ecology, physiology, genetics, and post-harvest management, as well as the interaction of agricultural crops with the environment. The M.S. program is designed to focus on a cropping system, such as agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science. Within that cropping system, the student can specialize in one of a number of areas, including agroecology, biotechnology, breeding and crop improvement, crop physiology, crop production, floriculture, landscape horticulture, mineral nutrition, modeling, nursery production, pest management, plant growth and development, postharvest physiology, revegetation/restoration, and water relations. Research may be conducted within these areas with an applied or basic focus, but in association with a cropping system.

## Preparation

For both M.S. and Ph.D. programs, a level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, organic chemistry, physics, statistics, genetics, plant physiology, and soil science. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail on the group's website. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

## Degree Requirements & Program Coordinator

See Horticulture & Agronomy (<https://grad.ucdavis.edu/programs/ghag/>).

- Human Development, Doctor of Philosophy (p. 300)

# Human Development, Doctor of Philosophy

College of Agricultural & Environmental Sciences

## Graduate Study

The interdisciplinary and interdepartmental Graduate Group in Human Development offers a program of study leading to the Ph.D. degree. The program provides education and training in lifespan study of human development, with a balance of emphasis on biological, cognitive, and socio-emotional development in context. Recipients of the degree will be prepared to teach, conduct research, and actively engage in public service in the field of human development.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority deadline of December 1. The final admissions deadline is March 1. For more details, see Human Development Graduate Group (<http://humandevelopment.ucdavis.edu/>).

## Community & Regional Development, Bachelor of Science

### College of Agricultural & Environmental Sciences

Department of Human Ecology; 1303 Hart Hall;  
530-752-1805; Community & Regional Development; (<https://humanecology.sfs.ucdavis.edu/community-and-regional-development/>) Faculty (<http://humanecology.ucdavis.edu/crd-faculty/>)

The Community & Regional Development major provides a practical and holistic understanding of theories, methodologies, and issues relevant to understand and help improve communities and the people in them. The program focuses on the ways that economic, political, environmental and socio-cultural forces are transforming the world, countries, regions, and local communities, and helps students organize their knowledge to improve the health, sustainability, prosperity, and equity of communities.

## The Program

Principal subjects of study within the major are forces affecting community, regional, global and organizational development; social change processes; community and regional research methodologies; the role of class, ethnicity, gender, and race in shaping social life and outcomes; the impacts of innovation and technology on communities, and the effects of social, economic and political systems on regions. The major is organized flexibly to allow students to develop fields of concentration that meet their learning and career goals and to develop the capacities to grow as leaders in their chosen field.

## Lead Faculty Advisor

Jonathan K. London ([jk london@ucdavis.edu](mailto:jk london@ucdavis.edu))

## Internships & Career Alternatives

Community and Regional Development students are required to complete an internship in their field before graduation. Internships have been arranged with local, county, and state planning agencies, public health departments, schools, housing offices, businesses, and education programs, among others. Community and Regional Development graduates are prepared for occupations in city and regional planning, community development, non-profit leadership, social research, education, program evaluation, organizational and educational consulting, and business and social entrepreneurship organizations. The major also provides effective preparation for graduate or professional study in the social and behavioral sciences or for professional degrees (such as city and regional planning, law, public health, education).

## Honors Program

An Honors Program is available to Community and Regional Development majors who have demonstrated excellence in their field of study. Entrance into the honors program requires that a student completes at least 135 units with a minimum grade point average of 3.500 in upper division courses counted toward the major. The program consists of a project whose specific nature is determined in consultation with the student's Honors Advisor. It may involve completing a research project, a scholarly paper, a senior thesis, or some comparable assignment. The project will have a minimum duration of two quarters and will be noted on the student's record by a variable unit course number or special honors course designation. Successful completion of the honors program requires that a minimum of 8 units of credit be earned in course work for the project. It is expected that a student participating in the Honors Program of the Community & Regional Development major will participate in the Undergraduate Research, Scholarship and Creative Activities Conference. Additionally, students participating in the Honors Program will be required to give a public presentation of their work in a departmental seminar program.

## Honors Program Advisor

Jonathan K. London (jklondon@ucdavis.edu)

The major requirements below are in addition to meeting University Requirements (p. 56) & College Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Community & Regional Development Bachelor of Science major is 97.

## Community Development, Master of Science

College of Agricultural & Environmental Sciences

Stephen Wheeler, Ph.D., Chairperson of the Group  
(smwheeler@ucdavis.edu)

### Group Office

129 Hunt (Community Development Graduate Group);  
530-752-4119; Carrie Armstrong-Ruport (caruport@ucdavis.edu),  
Student Affairs Officer; Community Development Graduate Group  
(<http://communitydevelopment.ucdavis.edu>); Faculty (<http://communitydevelopment.ucdavis.edu/people/faculty.php>)

### Graduate Study

The Community Development Graduate Group (CDGG) offers an interdisciplinary program of study which leads to the M.S. degree. The program emphasizes interdisciplinary, collaborative, and project-based learning, as well as community-engaged scholarship. The CDGG challenges students to integrate theory and practice, to develop constructive solutions to contemporary problems, and to lead in building a healthy, sustainable, and equitable society. Graduate study in the CDGG prepares individuals to work within government, for-profit and non-profit community development organizations in the realm of social and economic change, or to prepare them for further doctoral studies in related programs. Particular strengths of the program include: community economic development; community organizing and organizations in under-served communities; environmental justice and planning; education; ethnic studies; local impacts of globalization and trans-nationalism; rural and urban political development and change; sustainable agriculture and food systems; and women and gender studies.

### Preparation

Applicants to this program can prepare themselves by enrolling for upper division courses in the social or behavioral sciences, e.g., anthropology, economics, sociology, psychology, geography, urban studies or political science, and courses in community studies.

### Degree Requirements & Program Coordinator

See Community Development (<https://grad.ucdavis.edu/programs/gcmd/>).

## Geographic Studies, Minor

College of Agricultural & Environmental Sciences

## Community Development, Minor

College of Agricultural & Environmental Sciences

The Community & Regional Development Program (Department of Human Ecology) offers a minor in Community Development.

### Minor Advisor

Jonathan London; see academic advisor Galyna Erdman  
(gerzman@ucdavis.edu) in 1331 Hart Hall.

Code	Title	Units

CRD 156	Community Economic Development	
CRD 157	Politics & Community Development	

## Minor

The minor in Geographic Studies is defined by its concern with place. Geographers strive to answer spatial questions regarding the Earth's surface; to describe and explain the character of regions; to ascertain the ways in which historical and contemporary humans have used and shaped the Earth's surface; and to understand the interactions of physical, biotic, and human systems within our global environment. The minor is compatible with a variety of environmental majors in the college.

The minor is sponsored by the Department of Human Ecology, Landscape Architecture & Environmental Design Program (p. 309).

### Minor Advisor

David De La Pena; see academic advisor Galyna Erdman (gerzman@ucdavis.edu) in 1331 Hart Hall.

20

## Human Development, Bachelor of Science

### College of Agricultural & Environmental Sciences

Department of Human Ecology; 1303 Hart Hall; 530-752-1805; Human Development (<https://humanecology.ucdavis.edu/academic-planning-resources/>), Faculty (<http://humanecology.ucdavis.edu/hdfs-faculty/>)

Human development explores the developmental process in humans throughout the life cycle. Biological, psychological, social, and contextual processes on development are studied. Students can choose emphases in Health and Well being across the Lifespan, or Children and Families across the Lifespan.

## The Program

Human development majors complete a group of preparatory courses in anthropology, biology, philosophy, psychology, and statistics. Upper division students can design their programs to specialize in one of two track areas. For instance, students can study either Health and Well being, or Children and Families, both of these tracks emphasize a lifespan developmental approach. Students can also pursue the general Human Development track which broadly exposes students to multiple influences on individual development and family processes.

### Internships & Career Alternatives

At least one practicum course is required. A second practicum or supervised internship can be used to fulfill the restricted elective requirement for the major. In addition, students can intern in schools, early childhood education or senior centers, hospitals, rehabilitation centers, probation offices, group foster homes, mental health clinics, or as tutors for handicapped or bilingual students. Human development graduates fill a wide variety of positions in preschools, elementary and special educational settings, programs designed for parents, families, and the elderly, as well as governmental jobs related to social services for people of all ages. Students who choose the Health & Well being track can apply to medical school or pursue training for positions in the health sciences. Human development prepares students to pursue advanced degrees in behavioral and social sciences, education, social work, family law, or health sciences.

### Preparatory Requirements

UC Davis students who wish to change their major to Human Development must be in good academic standing. Students must complete the following courses with a combined grade point average of at least 2.500. All of the following courses must be taken for a letter grade:

Code	Title	Units
PSC 001	General Psychology	4
or PSC 001V	General Psychology	
Choose one:		
STA 013	Elementary Statistics	
or STA 013Y	Elementary Statistics	
PSC 041	Research Methods in Psychology	

or PSC 041V	Research Methods in Psychology		NPB 010	Elementary Human Physiology
Choose one:		4-5	NPB 012	The Human Brain & Disease
ANT 001	Human Evolutionary Biology		NPB 101	Systemic Physiology
or ANT 001Y (DI)			PSC 101	Introduction to Biological Psychology
ANT 002	Cultural Anthropology			<i>Philosophy</i>

## Landscape Architecture, Bachelor of Science

### College of Agricultural & Environmental Sciences

Department of Human Ecology; 1303 Hart Hall; 530-752-1805;  
Landscape Architecture (<https://humanecology.ucdavis.edu/landscape-architecture-major/>); Faculty ([https://humanecology.ucdavis.edu/people/?first=&last=&title=&unit=Landscape%20Architecture%20%2B%20Environmental%20Design&field\\_sf\\_person\\_type\\_target\\_id%5B0%5D=26](https://humanecology.ucdavis.edu/people/?first=&last=&title=&unit=Landscape%20Architecture%20%2B%20Environmental%20Design&field_sf_person_type_target_id%5B0%5D=26))

Landscape architecture is the planning and design of urban and rural areas where human use requires environmental adaptation or conservation. Students in landscape architecture acquire skills to enhance physical environments and the people who use them. They are capable of solving physical problems and are able to visualize and think in terms of space, culture, and change over time. The program is fully accredited by the Landscape Architecture Accreditation Board (LAAB) which is the only organization professionally sanctioned to grant landscape architectural accreditations in the United States. The program was last reviewed in 2018.

## The Program

The curriculum balances creativity and visual and spatial skills with technological expertise and a thorough background in physical, natural, and social sciences. Students develop proficiency at problem solving relating to design of parks, public spaces, energy-efficient neighborhoods, land reclamation projects, city and regional planning, and landscape planning for wilderness and scenic regions, coastal and riparian environments, and other sensitive land areas. The program stresses a process-oriented approach to design and emphasizes environmental and community values.

## Preparatory Requirements

Students are admitted to the Landscape Architecture major after submitting an application for review and selection by the faculty; students may be admitted as Pre-Landscape Architecture or other majors; see Application Process (<https://humanecology.ucdavis.edu/portfolio-application-process/>).

## Career Alternatives

Graduates may find jobs in private landscape architectural firms or public agencies, non-profit organizations, and corporations employing landscape architects. The landscape architecture major provides the student with excellent preparation for graduate school or career development in a wide range of environmental and design-related fields.

## Advising Center

Jana (Snjezana) Krezo (skrezo@ucdavis.edu); 530-752-9322; Galyna Erdman (gerzman@ucdavis.edu); 530-752-2244

## Lead Faculty Advisor.

David De La Pena

## Graduate Study

Graduate-level landscape architecture courses are available to students pursuing graduate programs compatible with or directed toward landscape management, planning, and design issues. A Graduate Academic Certificate in Landscape Architecture & Environmental Design is an option for any graduate student; see Graduate Academic Certificates (<https://gradstudies.ucdavis.edu/programs/graduate-academic-certificates/>). Program faculty are active members of various graduate groups: Community Development, Geography, Transportation Technology & Policy, and Ecology. Faculty members have expertise in many areas, including landscape history, social theory, practice of public space design, historic landscape preservation, city and regional planning, community participation in urban landscape design, landscape ecology, conservation planning, resource management, bioregionalism, and regenerative landscape systems. Graduate students pursue more focused interests, expanding their professional expertise and/

or conducting advanced research in landscape architecture correlated disciplines.

The major requirements below are in addition to meeting University Requirements (p. 56) & College Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Landscape Architecture Bachelor of Science major is 145.

## Sustainable Environmental Design, Bachelor of Science

### College of Agricultural & Environmental Sciences

Department of Human Ecology; 1303 Hart Hall; 530-752-1805; Sustainable Environmental Design ([http://humanecology.ucdavis.edu/lda/academic\\_programs/sed/](http://humanecology.ucdavis.edu/lda/academic_programs/sed/)); Faculty ([https://humanecology.ucdavis.edu/people/?first=&last=&title=&unit=Landscape%20Architecture%20%20Environmental%20Design&field\\_sf\\_person\\_type\\_target\\_id%5B0%5D=26](https://humanecology.ucdavis.edu/people/?first=&last=&title=&unit=Landscape%20Architecture%20%20Environmental%20Design&field_sf_person_type_target_id%5B0%5D=26))

The Sustainable Environmental Design major is intended to build student understanding and skills related to creation of sustainable communities and landscapes. Coursework emphasizes urban and environmental design, sustainable development theory & practice, green building, local government planning & decision-making, community dynamics & organizations, and written, graphic, and oral presentation of sustainability strategies.

### The Program

The Sustainable Environmental Design major is particularly suited for students who are interested in the physical form & design of communities and related public & private processes. It is focused on the physical environment of communities and the process of designing, planning for, and regulating the built landscape and the place-making considerations involved in creating sustainable communities.

### Advising Center

See Jana Krezo ([skrezo@ucdavis.edu](mailto:skrezo@ucdavis.edu)) (Snjezana J Krezo), 530-752-9322; Galyna Erdman ([gerzman@ucdavis.edu](mailto:gerzman@ucdavis.edu)), 530-752-2244

### Lead Faculty Advisor

David De La Pena

### Career Alternatives

Graduates will choose to pursue work in government, community organizations, education, or the private sector. They will also be well-positioned to pursue graduate education in city & regional planning, landscape architecture, architecture, public policy, public administration, law, real estate, and related fields.

### Courses in Sustainable Environmental Design

See courses under Landscape Architecture (LDA) (p. 1027).

The major requirements below are in addition to meeting University Requirements (p. 56) & College Requirements (p. 63), unless otherwise noted. The minimum number of units required for the Sustainable Environmental Design Bachelor of Science major is 101.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
English Writing/Oral Communication—Also counts toward English Composition Requirement ( <a href="https://caes.ucdavis.edu/students/advising/academic-planning/bachelors-degree-requirements/">https://caes.ucdavis.edu/students/advising/academic-planning/bachelors-degree-requirements/</a> )		8

One course from ENL 003; UWP 001, UWP 001Y, UWP 001V, UWP 048, UWP 049, UWP 101, UWP 101Y, UWP 101V, UWP 102 series, or UWP 104 series; AND one course selected from the courses not selected above, or from CMN 001 or CMN 001V; COM 001, COM 002, COM 003, COM 004, or NAS 005.

## Human Rights Studies

### College of Letters & Science

Keith Watenpaugh, Ph.D., Program Director

## Program Office

213 Sproul Hall; 530-752-0835; Human Rights Studies (<http://human-rights.ucdavis.edu>); Faculty (<https://human-rights.ucdavis.edu/faculty/>)

Human Rights Studies is the newest interdisciplinary program at UC Davis and the first of its kind in the University of California system. Our new century has brought with it a host of complex, unprecedented, and daunting challenges to basic human rights; courage, creativity, and a commitment to sustained and innovative interdisciplinary collaboration are necessary to understand, address and solve these challenges. Human Rights Studies is a place for incubating, supporting, coordinating, and promoting faculty and student research, teaching, learning, service, and engagement across the campus on Human Rights and its attendant fields: humanitarianism, environmental justice, genocide, mass sexual and gender-based violence, refugee studies, memory studies, and post-conflict transitional justice. Undergraduate Human Rights students go on to join the Peace Corps, attend graduate school in the humanities and social sciences, and pursue professional programs and careers in public policy, law, education, nursing, and medicine.

- Human Right Studies, Minor (p. 312)

## Human Right Studies, Minor

### College of Letters & Science

Human Rights Minor (<https://human-rights.ucdavis.edu/human-rights-minor/>)

The Human Rights Minor provides students with an opportunity to explore human rights as a critical element of our contemporary world.

Courses in the minor approach human rights as a problem for humanity, policy, advocacy and humanitarian action, as well as a subject for historical, ethical, social scientific and cultural study. Students will examine moments of terrible human rights abuse: genocide, slavery, colonialism, Apartheid, and sexual and gender-based violence. They will also learn about movements to protect and promote human rights, including the elaboration of the contemporary human rights régime, efforts by international and local non-governmental human rights organizations, and artistic and literary responses to human rights challenges.

The minor is administered by the Human Rights Studies Program (<https://human-rights.ucdavis.edu/>).

## Program Objectives

In addition to completing HMR 134, students must take three additional Core Courses and one course from the Elective Course list.

## Advising

Consult the Department office (<http://human-rights.ucdavis.edu/>).

Code	Title	Units
HMR 134	Human Rights	4
<i>Core Courses (12 Units)</i>		
Choose three from the following:		12
HMR/AHI 120A	Art, Architecture, & Human Rights	
HMR 130	Special Topics in Human Rights	
HMR 131	Genocide	

HMR 136	Human Rights in the Middle East	WMS 145	Women's Movements in Transnational Perspective		
HMR 138	Human Rights, Gender, & Sexuality	WMS 148	(Discontinued)		
HMR 140A	Human Rights & the Popular Imagination	WMS 170	Queer Studies		
HMR 140B	Art & Politics of Memory: Truth, Justice, Reconciliation & Human Rights	WMS 175	Gender & Experience of Race		
HMR/HIS 161	Human Rights in Latin America	WMS 182	Globalization, Gender & Culture		
HMR 162Y/ HIS 126Y	The History of Human Rights in Europe	WMS 184	Gender in the Arab World		
HMR 190	Seminar	Elective Courses Subtotal			
In addition to the courses listed above, any HMR course between 100-199 will count towards the core course requirement.		4			
See HMR 100-199 courses. (p. 988)		<b>Total Units</b>			
Human Rights Studies Subtotal		<b>20</b>			
<b>Elective Courses (4 Units)</b>					
Choose one from the following or seek the approval of the program advisor for an unlisted course that treats a human rights related topic:					
<b>Suggested Electives</b>					
AAS 180	Race & Ethnicity in Latin America				
AMS 156	Race, Culture & Society in the United States				
ANT 126A	Anthropology of Development				
HIS 115E	Slavery, Africa, & the Atlantic World				
HIS 142A	History of the Holocaust				
HIS 142B	The Memory of the Holocaust				
HIS 159	Women & Gender in Latin American History				
HIS 165	Latin American Social Revolutions				
HIS 184	History of Sexuality in America				
NAS 120	Ethnopolitics of South American Indians				
POL 124	The Politics of Global Inequality				
SOC/IRE 104	The Political Economy of International Migration				
<b>Other Electives</b>					
ANT 126B	Women & Development				
ANT 130A	Cultural Dimensions of Globalization				
CHI 130	United States-Mexican Border Relations				
HIS 115D	Postcolonial Africa				
HIS 172	American Environmental History				
HIS 177B	History of Black People & American Race Relations: 1860-Present				
MSA 150	Women & Islamic Discourses				
NAS 180	Native American Women				
POL 126	Ethnic Self-Determination & International Conflict				
POL 142B	Comparative Development: Politics & Inequality				
POL 146B	Politics of Africa: Development in Africa				
POL 152	The Constitutional Politics of the Equality				
POL 166	Women in Politics				
POL 168	Latino Politics				
POL 176	Racial Politics				
SOC 130	Race Relations				
SOC 160	Sociology of the Environment				
WMS 140	Gender & Law				

## Humanities

College of Letters & Science

### Program Director

Claire Goldstein, Ph.D., Associate Professor of French

### Program Office

211 Sproul; 530-752-4999; Humanities (<http://humanities.ucdavis.edu>); Faculty (<http://humanities.ucdavis.edu/people/>)

### The Program of Study

The Humanities program is an undergraduate and graduate curriculum emphasizing innovative approaches to ideas that matter. Courses offered through the program are interdisciplinary in scope and aim to develop critical thinking and writing skills in three principal areas: major figures, works, and ideas in world cultures; major themes in world literatures and societies; and relationships between history, society, language, and culture.

## Hydrologic Sciences (Graduate Group)

College of Agricultural & Environmental Sciences

Thomas Harter, Ph.D. (Land, Air, & Water Resources), Chairperson of the Group

### Group Office

1152 Plant & Environmental Sciences Building; 530-752-1669; Hydrologic Sciences Graduate Group (<http://hsgg.ucdavis.edu/>); Faculty (<https://www.hsgg.ucdavis.edu/faculty/>)

- Hydrologic Sciences, Master of Science (p. 313)
- Hydrologic Sciences, Doctor of Philosophy (p. 314)

## Hydrologic Sciences, Master of Science

College of Agricultural & Environmental Sciences

### Graduate Study

The Hydrologic Sciences Graduate Group offers M.S. and Ph.D. degrees. Hydrologic Sciences integrates numerous and diverse fields of sciences to deepen the understanding of the physical and biogeochemical dynamics of water and water resources below, on, and above the land surface. It considers the interactions between water, the natural

environment, agriculture, urban areas, ecosystems, climate, and societal systems, and it investigates water management, regulations, water law, and societal conflicts around water. Students have the ability to take advantage of the breadth of earth, environmental, agricultural, and social sciences and engineering resources on campus that are related to water in the natural and built environment. Students deepen their understanding, advance their critical thinking and analysis skills, and gain in-depth knowledge of innovative, leading hydrologic science tools and techniques to employ for problem-solving.

## Specialization

To accommodate the diversity of preparation and interests among students, the program offers five specializations from which the student selects one for their M.S.: physical hydrology, water policy and management, hydrochemistry, hydrobiology, and earth surface processes. Two options—Plan I, a thesis option and Plan II, a comprehensive exam option—are available for obtaining the Master of Science.

## Preparation

Applicants to the program are expected to have completed or to be completing an undergraduate degree in environmental, physical, chemical, or biological sciences, mathematics, engineering, or related degrees. Undergraduate study must include one year of calculus and one course each in probability/statistics, computer programming, physical geology, and introductory hydrology. Additional undergraduate preparation, expected to be completed before entering the program, depend on the choice of specialization: physical hydrology and earth surface processes require one course each in linear algebra, differential equations, and fluid mechanics, one year of general physics, and two courses of general chemistry. Water policy and management requires one course each in microeconomics and in public policy. Hydrochemistry requires one year each in general biology and general chemistry, and one course in aqueous chemistry. Hydrobiology requires one year each in general biology and general chemistry, and one course in introductory ecology.

## Degree Requirements & Program Coordinator

See Hydrologic Sciences (<https://grad.ucdavis.edu/programs/ghys/>).

- Immunology, Master of Science (p. 314)
- Immunology, Doctor of Philosophy (p. 315)

# Immunology, Master of Science

## Graduate Studies

## Graduate Study

The Graduate Group in Immunology offers an interdisciplinary program of study in an exciting field of biology and medicine leading to M.S. and Ph.D. degrees. Participating faculty from various UC Davis Schools and Departments provide research opportunities in diverse areas of applied immunology. Areas of focus include infection and immunity (including host response regulation to parasites, viruses and bacteria), nutrition and immunity, autoimmunity, immune regulation, neuroimmunology, cancer therapy and immune mediators and their uses for diagnosis and treatment.

## Preparation

Applicants for candidacy to these programs should have completed undergraduate preparation in mathematics, physics, chemistry,

biochemistry, molecular and cellular biology or related biological and medical sciences.

For work leading to the Ph.D. degree, the requirements include cell biology, chemical immunology, cellular immunology, immunohematology, and advanced immunology. In addition to these general requirements, more specialized preparation in at least one of the following is required: (a) microbiological specialties (bacteriology, virology, parasitology, medical microbiology); (b) zoological specialties (cell biology, endocrinology, embryology, proto-zoology, histology, cytology, physiology); (c) medical specialties (pathology, anatomy, pharmacology, clinical pathology, reproduction, hematology, epidemiology); (d) biochemistry/biophysics specialties (biologically active molecules, control mechanisms); (e) genetic specialties (developmental genetics, population genetics, cytogenetics, molecular genetics).

### Degree Requirements & Program Coordinator

See Immunology (<https://grad.ucdavis.edu/programs/gimm/>).

## Individual Major

College of Agricultural & Environmental Sciences

Each college has differing rules and requirements for their Individual Majors; see:

- A&ES, Bachelor of Science, Individual (p. 315)
- Biological Sciences, Bachelor of Arts, Individual (p. 315)
- Biological Sciences, Bachelor of Science, Individual (p. 316)
- L&S, Bachelor of Arts, Individual (p. 316)
- L&S, Bachelor of Science, Individual (p. 317)

## Agricultural & Environmental Sciences, Bachelor of Science, Individual

College of Agricultural & Environmental Sciences

The Individual Major in this College has been suspended indefinitely.

### Program Office

150 Mrak Hall; 530-752-0108; Advising (<http://www.caes.ucdavis.edu/students/current/advising/>)

### Student Proposal

An Individual Major may be organized by a student having a specific academic interest not represented by an established major. Each student wishing an Individual Major should submit a proposal to the Dean's Office, prior to reaching 120 units, for review by the Student Actions & Individual Major Subcommittee. This proposal must include: (1) an essay describing the special educational aims of the student, including a statement indicating why the educational objectives cannot be met by existing majors; (2) a list of planned courses; and (3) faculty advisor recommendations. It is critical that students contact a college counselor in the Dean's Office for consultation and development of the proposal.

## Biological Sciences, Bachelor of Arts, Individual

College of Biological Sciences

Biology Academic Success Center (<https://basc.biology.ucdavis.edu/>); 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410.

### The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines. It is designed by the student and is subject to approval by an advisor and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

### Student Proposal

A student who wishes to propose an individual major must submit the proposal to the Committee on Undergraduate Curriculum & Educational Policy (CUCEP) prior to reaching 120 units. It is important for the student to make arrangements to speak with an advisor in the Biology Academic

Success Center early in the development of their major as no individual major will be approved after a student has completed 120 units.

### **Faculty Advisor (Selected By Student)**

A faculty member in a department or program in the College of Biological Sciences.

### **Advising**

Biology Academic Success Center (BASC) (<https://basc.biology.ucdavis.edu/>) in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410.

## **Letters & Science, Bachelor of Arts, Individual**

### **College of Letters & Science**

1207 Social Sciences & Humanities Building (Undergraduate Education & Advising office); Advising (<https://lettersandscience.ucdavis.edu/advising/>)

### **The Major Program**

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by the faculty advisor and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly

and specifically meet the student's educational goals as well as meet university and college academic standards.

## Student Proposal

**Prior to submission of proposal, student must meet the following criteria: minimum overall GPA or 3.0 as well as a minimum GPA of 3.0 in all preparatory courses for the selected major.** A student who wishes to propose an individual major must submit the proposal to the Faculty Committee on Individual Majors in the College of Letters & Science prior to reaching 120 units. The proposal must be submitted by the end of the fourth week of the quarter. This proposal will consist of (1) an essay, identifying the specific educational and professional objectives, including an indication of why the objectives cannot be met within existing majors, (2) a list of courses planned to complete the major, and (3) faculty advisor recommendations. The proposal will be reviewed and a decision provided the quarter of submittal. It is important that you carefully review the information in the Individual Major Handbook ([https://lettersandscience.ucdavis.edu/sites/g/files/dgvnsk10716/files/files/page/individual-major-handbook\\_0.pdf](https://lettersandscience.ucdavis.edu/sites/g/files/dgvnsk10716/files/files/page/individual-major-handbook_0.pdf)).

## Honors Program

By the fourth week of the last quarter of the junior year, students potentially eligible for high or highest honors at graduation (see Dean's Honors List & Graduation with Honors (<https://lettersandscience.ucdavis.edu/deans-honors-list-and-graduation-honors/>)), may petition the Individual Majors Committee for tentative acceptance into an honors program.

Final admission will depend upon the Committee's approval of a senior thesis prospectus that has been agreed upon by the student and faculty advisor. The prospectus must be presented to the Committee by the end of the fourth full week of instruction of the first quarter of the senior year. Graduation with high or highest honors will be conditional upon both the maintenance of the required grade point average and the satisfactory completion of the senior thesis project. Students who anticipate doing a senior honors thesis should allow up to 3 units of independent study in the program during each of two quarters in the senior year as course options.

## Major Advisor (Selected By Student)

**Principal Advisor.** A faculty member in a teaching department or program in the College of Letters & Science in the major field of emphasis.

**Secondary Advisor.** A faculty member from a secondary area of interest.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Letters & Science Individual Bachelor of Arts is 45.

Code	Title	Units
<b>Preparatory Subject Matter</b>

The proposal will be reviewed and a decision provided the quarter of submittal. It is important that you carefully review the information in the Individual Major Handbook ([https://lettersandscience.ucdavis.edu/sites/g/files/dgvnsk10716/files/files/page/individual-major-handbook\\_0.pdf](https://lettersandscience.ucdavis.edu/sites/g/files/dgvnsk10716/files/files/page/individual-major-handbook_0.pdf)).

## Honors Program

By the fourth week of the last quarter of the junior year, students potentially eligible for high or highest honors at graduation (see Dean's Honors List & Graduation with Honors (<https://lettersandscience.ucdavis.edu/deans-honors-list-and-graduation-honors/>)), may petition the Individual Majors Committee for tentative acceptance into an honors program.

Final admission will depend upon the Committee's approval of a senior thesis prospectus that has been agreed upon by the student and faculty advisor. The prospectus must be presented to the Committee by the end of the fourth full week of instruction of the first quarter of the senior year. Graduation with high or highest honors will be conditional upon both the maintenance of the required grade point average and the satisfactory completion of the senior thesis project. Students who anticipate doing a senior honors thesis should allow up to 3 units of independent study

in the program during each of two quarters in the senior year as course options.

### **Major Advisor (Selected By Student)**

**Principal Advisor.** A faculty member in a teaching department or program in the College of Letters & Science in the major field of emphasis.

**Secondary Advisor.** A faculty member from a secondary area of interest.

The major requirements below are in addition to meeting University Degree Requirements & College Degree Requirements; unless otherwise noted. The minimum number of units required for the Letters & Science Individual Bachelor of Science is 45.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.		0
<b>Preparatory Subject Matter Subtotal</b>		
		0
<b>Depth Subject Matter</b>		
Upper division units must include:		45-54
(a) Interrelated and complementary courses from two or more departments which provide a unified pattern and focus.		
(b) At least 30 units from Letters & Science teaching departments or programs.		
(c) No more than 10 units in courses numbered 194H, 198 & 199.		
(d) For the B.S. degree, a maximum of 110 units toward the major.		
Depth Subject Matter Subtotal		45-54
<b>Total Units</b>		<b>45-54</b>

## **Integrative Genetics & Genomics (Graduate Group)**

## **Integrative Genetics & Genomics, Master of Science**

### **College of Biological Sciences**

### **Graduate Study**

The Graduate Group in Integrative Genetics & Genomics (IGG) offers programs of study and research leading to M.S. and Ph.D. degrees. Students in the IGG graduate program have the opportunity to apply genomic, molecular, computational, and classical genetic approaches to study model organisms, a broad range of native and agricultural species,

humans, and companion animals. The group integrates genetic research across campus and unites over 100 faculty members from more than 25 departments spanning the College of Biological Sciences, the College of Letters & Science, the College of Agricultural & Environmental Sciences, the School of Medicine, and the School of Veterinary Medicine. Students experience an unsurpassed breadth of research and instructional opportunities from the most fundamental to applied aspects of genetics. For additional information regarding the program, contact the group coordinator at 530-752-4863.

## Graduate Study

The Graduate Group in Integrative Pathobiology (GGIP) offers programs of study and research leading to M.S. and Ph.D. degrees and participates in joint Ph.D./M.D. and Ph.D./D.V.M. programs. GGIP emphasizes advanced knowledge of the causes, progression, and resolution of disease processes in humans and animals from molecular to global scale.

### Preparation

This program is primarily for applicants with a strong background in basic biomedical sciences. Admission requires an undergraduate degree (B.S. or B.A.) in a biological science, which should include prerequisite coursework in statistics, physics, general chemistry, organic chemistry, and cellular biology. Upper division courses in molecular biology, biochemistry, and genetics are encouraged.

### Degree Requirements & Program Coordinator

See Integrative Pathobiology (<https://grad.ucdavis.edu/programs/gipb/>).

# Integrative Pathobiology, Doctor of Philosophy

School of Veterinary Medicine

## Graduate Study

The Graduate Group in Integrative Pathobiology (GGIP) offers programs of study and research leading to M.S. and Ph.D. degrees and participates in joint Ph.D./M.D. and Ph.D./D.V.M. programs. GGIP emphasizes advanced knowledge of the causes, progression, and resolution of disease processes in humans and animals from molecular to global scale.

### Preparation

Students applying to this program have varied backgrounds. Some hold professional degrees (e.g., D.V.M., M.D., or D.D.S.) while others apply after completion of an undergraduate degree.

Graduate Studies

## Graduate Study

The International Agricultural Development M.S. degree program prepares students for careers in global agricultural and rural development. This is an interdisciplinary program designed to provide students with knowledge and skills that will enable them to implement, facilitate, and manage programs that enhance agricultural development, resource management, and rural life. Coursework and research is especially, but not exclusively, focused on issues facing developing countries and less-industrialized regions.

Students are prepared to realize biological and technological improvement in agricultural and natural systems to facilitate social innovation. Training in International Agricultural Development includes both breadth and depth components. Breadth components, required of all M.S. students, aim to establish an understanding of the issues in international development as they relate to agriculture and the environment. These include the history and philosophy of development, leadership and management techniques, fundamentals of farming systems, and agricultural economics.

Through coursework and an independent research or capstone project, students acquire depth in their own area of specialization within the agricultural and social sciences. The areas are flexible and could include agricultural and resource economics, agricultural engineering, agronomy, animal science, anthropology, aquaculture, avian science, community development, ecology, economics, entomology, environmental design, environmental toxicology, food science, gender, geography, horticulture, nutrition, plant pathology, plant biology, plant protection and pest management, political science, preventive veterinary medicine, range science, sociology, soil science, sustainable agriculture, vegetable crops, viticulture, and water science.

Practical and on-site experience with development issues is encouraged through an independent research or capstone project. Students obtain guidance from partner organizations and the group's faculty members, who possess a wide range of academic experience in international development.

# Land, Air, & Water Resources

College of Agricultural & Environmental Sciences

William Horwath, Ph.D., Chairperson

## Department Office

1110 Plant & Environmental Sciences Building; 530-752-1130; Land, Air, & Water Resources (<http://lawr.ucdavis.edu>)

Land, Air & Water Resources is a multidisciplinary department with faculty who specialize in atmospheric science, plant science, soils and

biogeochemistry, hydrology, and water engineering. Teaching, research, and outreach efforts focus on agricultural and environmental aspects of these disciplines. The faculty also contributes to numerous other undergraduate and graduate programs in the Colleges of Agricultural & Environmental Sciences, Letters & Science, and Engineering.

## Major Programs

Undergraduate programs in Atmospheric Science (p. 320), Hydrology (p. 322), Environmental Science & Management (p. 262), and Sustainable Agriculture & Food Systems (p. 325) are centered in the department; see Undergrad Programs (<https://lawr.ucdavis.edu/students/undergrad-programs/>).

**Undergraduate Advising Center** is located in 1150 Plant & Environmental Sciences Building; 530-752-1603.

## Courses

See courses listed under Atmospheric Science (ATM) (p. 606), Hydrologic Sciences (HYD) (p. 993), Environmental Science & Management (ESM) (p. 864), and Soil Science (SSC) (p. 1396).

## Graduate Study

Graduate programs, offering both M.S. and Ph.D. degrees, in Soils & Biogeochemistry (p. 492), and Hydrologic Sciences (p. 313) are administered in the department; see Grad Programs (<https://lawr.ucdavis.edu/students/grad-programs/>).

**Graduate Advising Center** is located in 1152 Plant & Environmental Sciences Building; 530-752-1669.

- Watershed Science, Minor (p. 329)

## Atmospheric Science, Bachelor of Science

### College of Agricultural & Environmental Sciences

Faculty (<http://lawr.ucdavis.edu/people/faculty/atmospheric-science/>)

Atmospheric science is the study of the air that surrounds the planet. It includes all weather phenomena and climate including global and regional climate change, the chemistry of trace constituents and cloud and particle formation, interactions between ecosystems and the atmosphere, as well as quantitative studies of climate extremes and severe weather, including droughts, floods, hurricanes and tornadoes. The study of the impacts of human and other biotic activity on the quality of the air we breathe are important topics in the major.

## The Program

Modern atmospheric science is a quantitative science that is reflected in the major's curriculum. In addition to the study of daily weather events,

the program deals with fundamental dynamical and physical processes that involve the general circulation of the atmosphere; turbulent mass and energy transfer at the planetary surface as well as within the free atmosphere; the transfer of solar and terrestrial radiation throughout the atmosphere; atmospheric interaction with the biosphere; climate variations; and developments in remote sensing using satellites with modern meteorological instrumentation. In addition, the program has significant expertise in the areas of air quality and its related atmospheric chemistry. As well as providing a broad background in meteorology, the major includes an informal minor area to be chosen from mathematics, computer science, environmental studies, resource management or a physical or biological science. For more information, see Atmospheric Science (<http://atm.ucdavis.edu>).

**Note.** Alternative options for students who are interested in atmospheric science are to minor in ATM, to major in ESM and choose the climate change and air quality track, or to major in applied physics with a concentration in atmospheric physics. However, the ATM minor, the ESM climate change and air quality track, and the applied physics major do not meet the Federal civil service requirements for meteorologists.

## Internships & Career Opportunities

Atmospheric science students have participated in internships with the California Air Resources Board, various county Air Pollution Control Districts, the National Weather Service, and performing research. Job opportunities include: national weather services, weather forecasting for broadcast media or private forecasting firms, environmental consulting firms (such as environmental impact reports, wind farm siting), government agencies at all levels from local (air quality districts, planning departments, etc.) to state (Air Resources Board) to national (NOAA), and companies whose operations are impacted by weather (such as airlines, futures markets). About half of our graduates continue their education by seeking an M.S. or Ph.D. degree in atmospheric science or related areas.

## Lead Faculty Advisor

Kyaw Tha Paw U

## Atmospheric Science Major Advisor

Lacole Brooks ([lawradvising@ucdavis.edu](mailto:lawradvising@ucdavis.edu))

**Advising Center** for the major, is located in 1150 Plant & Environmental Sciences Building in Land, Air & Water Resources Teaching Center; 530-752-1603.

## Graduate Study

You can specialize in particular areas of atmospheric science through graduate study and research leading to M.S. and Ph.D. degrees. For details, see Atmospheric Science (Graduate Group) (p. 129) & Graduate Studies (<http://gradstudies.ucdavis.edu/>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Atmospheric Science Bachelor of Science is 123.

College of Agricultural & Environmental Sciences

Faculty (<http://lawr.ucdavis.edu/people/faculty/atmospheric-science/>)

### Minor Program

The minor in Atmospheric Science provides a broad treatment of weather and climate, with the option to focus on such topics as climate change, meteorological instrumentation, and satellite remote sensing. Students undertaking the minor should have completed minimum preparatory course work in calculus and physics (MAT 019A, MAT 019B, and PHY 007A). Some upper division courses in Atmospheric Science have additional prerequisites in calculus and physics (MAT 021A,

MAT 021B, MAT 021C, MAT 021D, MAT 022A, and MAT 022B, and PHY 009A, PHY 009B, PHY 009C, and PHY 009D).

# Hydrology, Bachelor of Science

## College of Agricultural & Environmental Sciences

Faculty (<http://lawr.ucdavis.edu/people/faculty/hydrology/>)

Hydrology is the study of the occurrence, distribution, circulation, and behavior of water and water-borne materials in the environment of Earth. It includes practical measurement and technical analysis of water phenomena underground, on the Earth's surface, and in the atmosphere. Contemporary hydrologic problems include environmental restoration, sustainability of groundwater and surface water resources, water pollution, and natural disasters such as floods, droughts, landslides, avalanches, and land subsidence. The management of these problems demands hydrologic scientists with the comprehensive, interdisciplinary education embodied in this program. Beyond its societal utility, hydrology can be an exciting science for the curious-minded. Hydrologists explore natural phenomena such as climate change, waterfalls, health of coral reefs, biogeochemical cycles, and aquifers.

## The Program

A hydrologist needs a strong background across the basic sciences of physics, mathematics, chemistry, and biology. Breadth of understanding comes from exposure to ecology, geology, engineering, policy, and law. Depth of experience is provided by core hydrology courses, internship opportunities, and practical outdoor training. Students choose electives to match their interests and career goals. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

## Internships & Career Alternatives

Job opportunities in hydrology exceed the available supply of trained hydrologists. Students commonly obtain internships and jobs with state and federal agencies, private consulting firms, environmental interest groups, irrigation districts, and utility companies. Federal agencies hiring

hydrologists include the U.S. Geological Survey, U.S. Department of Agriculture (Fish & Wildlife, Agricultural Research, Forest Service, and National Resource Conservation Service), Environmental Protection Agency, and national research laboratories (Lawrence Livermore National Laboratory, Lawrence Berkeley National Laboratory). State and local agency employers include California's Departments of Water Resources, Conservation, Fish & Game, and Toxic Substances as well as the Water Resources Control Board and Regional Water Quality Control Boards. To obtain higher levels of responsibility and salary, hydrologists often seek advanced degrees, and the hydrology major is designed to provide students with a highly competitive education to get into graduate school.

College of Agricultural & Environmental Sciences

### Lead Faculty Advisor

Isaya Kisekka | Faculty (<http://lawr.ucdavis.edu/people/faculty/hydrology/>)

### The Program

The Hydrology Section of the Department of Land, Air & Water Resources offers a minor in Hydrology for environmental or natural science students who have an interest in water/environmental issues. The interested student should have completed preparatory course work in calculus, chemistry (CHE 002A; CHE 002B recommended), physics (PHY 007A), and biology (BIS 002A). Course work in the minor provides fundamental skills and knowledge of the hydrologic sciences. The program is sufficiently flexible for students to pursue particular water issues or problems of interest to them.

## International Science Studies, Minor

College of Agricultural & Environmental Sciences

### Minor

This interdisciplinary minor in International Science Studies introduces College of Agricultural & Environmental Sciences students to global issues, which affect their major disciplines in the current world, and also provides an opportunity to gain first-hand experience abroad when appropriate. The goal of this minor is to enable our college students to develop greater international competence and to enhance their employability.

The minor assumes that the student will have a major in the sciences and that classes taken under one of the three tracks in the minor will

contribute depth to the existing major or establish depth in a selected additional field of study. Students will be expected to work closely with an academic advisor in developing an intellectually coherent program of the study. A minimum of 18 units of upper division work is required. Only a single course can be counted toward both major and minor and no course can be used to satisfy the requirements of more than one minor.

## Lead Faculty Advisor

Shu-Hua Chen (shachen@ucdavis.edu) (Land, Air, & Water Resources); 530-752-1822.

Code	Title	Units
Global Issue Course Requirement		7-8
Focusing on broad range of global issues and their impacts on ecological and environmental resources and biodiversity, in addition to international policy and economics. Beyond the courses taken under each track, choose two out of the three courses listed below:		
ATM 116	Modern Climate Change	
PLS 150	Sustainability & Agroecosystem Management	
ARE 115B/115BY/ ECN 115B/115BY		
Choose one of the following tracks:		16-17
Education Abroad Program courses taught overseas and relevant international internship activities will count towards the minor requirement with advisor's approval. For each track, students can take a maximum of 3 units from EAP courses, with a valid transcript, and 3 units from relevant international internship activities. The international internship activities would require a pre-approved study plan with the academic advisor before the maximum of 3 units can be awarded. Language and culture related courses are encouraged, but not required for the minor.		
Education Abroad Program (EAP) courses. (p. 818)

## Soil Science, Minor

### College of Agricultural & Environmental Sciences

The Department of Land, Air & Water Resources, Soils & Biogeochemistry Program, offers a minor program in soil science. The minor is especially geared toward students in the environmental sciences including Hydrologic Science, Environmental Science & Management, Environmental Toxicology, Ecological Management & Restoration,

International Agricultural Development, Crop Science & Management, Environmental Horticulture & Urban Forestry, Geology, and Plant Biology.

## Major Programs

See the Soils & Biogeochemistry track in Environmental Science & Management (p. 262).

## Graduate Study

Programs of study leading to the M.S. and Ph.D. degrees in Soils & Biogeochemistry (p. 492) are available. Information regarding these programs can be obtained from the graduate advisor, at Advising Information (<http://soils.ucdavis.edu/resource-guide/advising-information/>) and in the Graduate Announcement. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

## Lead Faculty Advisor

Anthony (Toby) O'Geen (Land, Air, & Water Resources)

Code	Title	Units
SSC 100	Principles of Soil Science	5
Choose 16 units:		16
HYD 124	Plant-Water-Soil Relationships	
HYD 134	Aqueous Geochemistry	
PLS 158	Mineral Nutrition of Plants	
SSC 102	Environmental Soil Chemistry	
SSC 105	Field Studies of Soils in California Ecosystems	
SSC 107	Soil Physics	
SSC 109	Sustainable Nutrient Management	
SSC 111	Soil Microbiology	
SSC 118	Soils in Land Use & the Environment	
SSC 120	Soil Genesis, Morphology, & Classification	
Total Units		21

## Sustainable Agriculture & Food Systems, Bachelor of Science

College of Agricultural & Environmental Sciences

1150 PES; 530-752-1603; Sustainable Agriculture & Food Systems (<https://www.lawr.ucdavis.edu/students/undergrad-programs/sustainable-agriculture-and-food-systems/>)

Sustainable Agriculture & Food Systems is an interdisciplinary major hosted by the Department of Land, Air, & Water Resources (<http://lawr.ucdavis.edu>).

The Sustainable Agriculture & Food Systems (SA&FS) major serves students interested in improving the sustainability of agriculture and food systems. This major prepares graduates to understand the interdisciplinary and systems-based aspects of sustainability and provides them with the knowledge, leadership skills and experiences required to excel in agricultural and food systems professions.

## The Program

This program is designed to develop students' competencies for addressing the environmental, social, and economic challenges and opportunities associated with agricultural and food systems

sustainability. The program emphasizes an experiential learning approach to sustainability education, allowing students to choose between three tracks within the major. Students in the Agriculture & Ecology track focus on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits. Students in the Food & Society track focus on issues related to the social, cultural, political and community development aspects of agriculture and food systems. Students in the Economics & Policy track focus on issues related to agricultural and resource economics, policy and management. The program provides students with practical experiences through courses with on- and off-campus fieldwork and through internship placements at sites related to students' interests and focus of study.

### Lead Faculty Advisor

**Lead Faculty Advisor.** M. Abou Najm (Land, Air & Water Resources)

**Track I Advisor.** M. Abou Najm (Land, Air & Water Resources)

**Track II Advisor.** R. Galt (Human Ecology), A. Haven Kiers (Human Ecology)

**Track III Advisor.** M. Abou Najm (Land, Air & Water Resources)

Advising Center for the major is located in 1150 PES; 530-752-1603.

### Internships & Career Alternatives

Sustainable Agriculture & Food Systems students are required to complete an internship in the field before graduation. Internships have been arranged with local, county, & state agricultural agencies, production farms and commercial processors & retailers, domestic & international non-governmental organizations, and rural & urban community development programs. Graduates are prepared to pursue a broad range of careers related to agricultural production & food system management, rural & urban community services, education & development, and agricultural & environmental sciences, as well as careers in agricultural, environmental, and economic policy & analysis. Positions may be in private industry, government and public service agencies and in the non-profit sector, nationally and internationally. The major also prepares students for graduate studies in a wide range of fields related to agriculture and food systems.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Sustainable Agriculture & Food Systems Bachelor of Science is 135.

Code	Title	Units
<b>English Composition Requirement</b>		
See College requirement. (p. 64)		4-8
(1) Either two courses emphasizing written expression or one course emphasizing written expression and one course emphasizing oral expression, with a grade of C- (or P) or better. The following UC Davis courses satisfy this requirement:		
One course from ENL 003; UWP 001, UWP 001Y, UWP 001V, UWP 048, UWP 049, UWP 101, UWP 101Y, UWP 101V, UWP 102 series, or UWP 104 series; AND one course selected from the courses not selected above, or from CMN 001 or CMN 001V; COM 001, COM 002, COM 003, COM 004, or NAS 005.		
(2) Advanced Placement English score of 4 of 5 PLUS any course listed in 1(a) or 1(b) above EXCEPT UWP 001 or ENL 003.		

(3) By successfully passing the English Composition Examination administered by the College of Letters & Science upon completion of 70 units of degree credit (the examination does not yield credit).		
Must include CMN 001 or CMN 001V.		
English Composition Requirement Subtotal	4-8	
<b>Core Courses</b>		
<i>Plant Science</i>		
PLS 015 Introduction to Sustainable Agriculture	4	
<i>Community &amp; Regional Development</i>		
CRD 020 Food Systems	4	
ANS 112 Sustainable Animal Agriculture or PLS 150 Sustainability & Agroecosystem Management	3-4

## Watershed Science, Minor

### College of Agricultural & Environmental Sciences

Will Horwath, Chairperson  
Isaya Kisekka, Lead Faculty Advisor

The Hydrology Program of the Department of Land, Air & Water Resources offers the minor in Watershed Science. This minor is intended for environmental, natural, or social science students who have an interest in the interfaces between hydrology, ecology, policy and management. The interested student should have completed preparatory course work in calculus, chemistry (CHE 002A; CHE 002B recommended), physics (PHY 007A), and biology (BIS 002A). Course work in the minor provides fundamental skills and knowledge on the science

## Law, School of

### School of Law

Jessica Berg, J.D., MPH, Dean  
Donna Shestowsky, J.D., M.S., Ph.D., Associate Dean; Academic Affairs  
Emily Scivoletto, J.D., Senior Assistant Dean; Student Affairs  
Kristen Mercado, J.D., Assistant Dean; Admission & Financial Aid  
Brett C. Burns, Senior Assistant Dean; Administration

## Dean's Office

2020 Martin Luther King, Jr. Hall; 530-752-0243; School of Law (<https://law.ucdavis.edu/>); Faculty (<https://law.ucdavis.edu/faculty/>)

- Master of Laws (p. 329)
- Doctor of Jurisprudence (p. 330)

## Master of Laws

### School of Law

Master of Laws (LL.M.) Program (<https://law.ucdavis.edu/lm/>); 530-752-6081; Fax 530-752-4704; Master of Laws (llm@ucdavis.edu)

## Graduate Study

The Law School LL.M. (Master of Laws) program integrates American and foreign law students at all levels of study. For foreign law graduates, the program provides an opportunity to gain a basic knowledge of the United States legal system. United States law school graduates and selected foreign LL.M. candidates may also seek admission on a thesis rather than a course basis. Other opportunities available to all graduate law students include developing special expertise in a particular area and doing special projects and original research under the direction of a faculty member.

Each LL.M. candidate must successfully complete a minimum of 20 semester units of work, usually 10 units each semester. Foreign LL.M. students must enroll in the 2-unit course LAW 200A and the 1-unit course LAW 207A. They earn the remainder of their required course credit in elective J.D. courses. Each foreign student must also complete an intellectually rigorous legal research and writing project, constituting at least 2 units of credit.

All LL.M. candidates begin their year of study with a complete orientation in the academic and social life of the law school, the UC Davis campus, and the city of Davis. LL.M. students are encouraged to enroll in the School of Law's Orientation in U.S.A. Law Program, given during the summer before the fall semester of LL.M. begins.

## LL.M. Degree Requirements

To earn an LL.M. degree, a graduate law student must:

- A. Pass all required courses;
- B. Earn twenty semester credits;
- C. Complete two semesters in residence;
- D. If a graduate of a United States law school, write a graded thesis having a semester credit value of between four to eight units; or
- E. If a graduate of a foreign law school, write an analytically rigorous legal research paper, either as part of a seminar or for an independent study project worth at least two semester units of credit, which is completed within the two semesters of the graduate program and is equivalent in quality and substance to the writing project required of candidates for the J.D. degree under paragraph 1.4C (<https://law.ucdavis.edu/students/registrar/regulations/#14>);
- F. Have a cumulative grade point average of at least 2.0 at the end of the program. The grade point average shall be determined on the basis of letter grades. This rule applies even for LL.M. students who elect "Satisfactory" / "Unsatisfactory" grading as provided in paragraph 6.3D (<https://law.ucdavis.edu/students/registrar/regulations/#63>) or paragraph 6.3E (<https://law.ucdavis.edu/students/registrar/regulations/#63>). The grade point average is computed to the nearest tenth; numbers 0.50 and above will be rounded off to the next highest tenth.

Additional information may be found in the Law School's Regulations (<https://law.ucdavis.edu/students/registrar/regulations/>).

## Doctor of Jurisprudence

### School of Law

The University of California Davis School of Law offers a three-year professional curriculum leading to the degree of Juris Doctor. Within a uniquely supportive atmosphere, law students have access to a comprehensive modern law school curriculum taught by a nationally and internationally distinguished faculty. The School offers a full range of traditional law courses, opportunities for practical experience through clinical programs, and in-depth study of an area of law in an individualized program of classroom work, research, writing, or experience in the community. It further provides professional skills training in interviewing and counseling, negotiation and dispute resolution and trial practice. The School of Law seeks to promote critical

evaluation of law and legal institutions in a broad perspective, integrating non-legal disciplines with professional legal education.

UC Davis Law School is fully accredited by the American Bar Association, is a member of the Association of American Law Schools, and has a chapter of the Order of the Coif.

## Program of Study

The professional curriculum requires six semesters for completion and extends over a period of three years. It is for full-time students only; no part-time or evening program is offered. New students are admitted only at the beginning of the fall semester.

After satisfactorily completing the professional curriculum of 88 semester units and the required period of resident study, you will receive the degree of Juris Doctor (J.D.). Students who fail to attain satisfactory grades may be required to withdraw from the School at the end of any academic year.

The first year's work is prescribed and provides the essential foundation for subsequent legal study. Satisfactory completion of the first-year courses is, in all cases, prerequisite to second- and third-year courses.

## J.D. Degree Requirements

To graduate, students must meet these law degree qualification requirements:

- **Pass all required courses.** The first year required courses include Law 200 Introduction to Law, Law 203 Civil Procedure, Law 205 Constitutional Law I, Law 202 Contracts, Law 206 Criminal Law, Law 207 Legal Research & Writing I, Law 208 Legal Research & Writing II, Law 200S Lawyering Process, Law 201 Property, and Law 204 Torts.
- **Earn 88 semester units.** This must be completed in no more than six semesters unless a student is approved for an extended program by the Senior Assistant Dean for Student Affairs.
- **Earn at least 68 classroom-based law units.** Courses that do not count towards the 68 classroom-based law units include independent study units (Law 419, 419A, 499, or 499A), co-curricular units (law review, law journals, and competitions), externship placement units (may not exceed 14 units), and non-law units taken in other UC Davis departments. If a student graduates with exactly 88 units, they may have a maximum of 20 non-classroom-based units.
- **Complete six semesters in residence.** "In residence" means that the student has earned at least 10 units during that semester. A "semester-away" through an approved exchange program or an approved semester-long visit at another ABA accredited law school, count as a semester in residence. (Students may not take more than 17 units per semester).
- **Complete Law 258 Professional Responsibility or 258A Legal Ethics and Organizational Practice.**
- **Satisfy the skills requirement of regulation 1.4B** (<https://law.ucdavis.edu/students/registrar/regulations/#14>). In either the second or third year, students must take one or more course(s), totaling at least six credits, designated as satisfying instruction in professional skills.
- **Satisfy the writing requirement** (<https://law.ucdavis.edu/sites/g/files/dgvnsk10866/files/inline-files/Writing-Requirement-Certificate%281%29.pdf>) **of regulation 1.4C** (<https://law.ucdavis.edu/students/registrar/regulations/#14>). In either the second or third year, students must write an individually authored work of rigorous intellectual

effort of at least 20 typewritten, double spaced pages, excluding footnotes. At least one draft of the paper is required to be exchanged between student and professor#and feedback should be incorporated before the final submission of the paper. Each semester, a number of courses are offered which can satisfy the writing requirement.

# This#is generally#noted in the course's description (<https://law.ucdavis.edu/students/registrar/course-descriptions/>).

- **Have a cumulative grade point average of at least 2.3 at the end of the final semester.**
- **Adhere to the 14-credit limit on externships.** Of the semester credits required for graduation, a total of not more than 14 total units may be earned in externship placement units (<https://law.ucdavis.edu/externships/>).
- **Satisfy the Bias, Antiracism and Cultural Competency requirement.** (Beginning with the Class of 2026). Students must successfully complete one course designated by the law school as meeting the standards of significant instruction in Bias, Antiracism and Cross-cultural competencies. The list of qualifying courses is here (<https://law.ucdavis.edu/students/registrar/course-descriptions/>).
- **Please note that a student may not use the same course to satisfy more than one of the following academic requirements:** 1) Advanced Writing, 2) Bias, Antiracism, and Cultural-Competency, and 3) Professional Skills. For example, a course that is used to satisfy the writing requirement cannot also be used to satisfy the professional skills requirement.

The full Law School Regulations are at Regulations (<https://law.ucdavis.edu/students/registrar/regulations/>).

## Concurrent Degree Programs

Individual students may find a concurrent degree involving law and another discipline such as economics, business, sociology, or science advantageous. To support this kind of study, the School, in conjunction with other schools and university departments, has established Concurrent Degree Programs. Under these programs, a student may work toward a J.D. degree and a master's degree in another discipline at the same time. Students working toward a combined degree are required to spend their first year at the law school.

Normally, a Combined Degree Program will take at least four years. You will usually be able to earn between 6 to 10 semester-hours of law school credit for work in the related discipline and may be able to complete the combined degrees in less time than it would take to earn the two degrees separately. The first year of the Concurrent Degree Program must be taken entirely in the School of Law. During the remaining years, course work may be divided between the law school and the related discipline. You must satisfy the admission requirements for both programs and file applications with both units.

Students have pursued degree programs in combination with UC Davis departments for the M.A. degree in economics, philosophy, computer science, and sociology, and with the School of Management for the M.B.A. degree. The law school will attempt to work out an additional program if you are interested in other disciplines. You may enroll in the Concurrent Degree Program any time before the beginning of your third year in law school. If you are interested in pursuing a Concurrent Degree Program, and have made a separate application to another school or department, you should notify the School of Law if that application is accepted.

- Linguistics, Minor (p. 333)
- Linguistics for Language Teachers, Minor (p. 333)

## Linguistics, Bachelor of Arts

### College of Letters & Science

Linguistics is the systematic study of human language. It focuses on theories of language structure, variation, and use, description of contemporary languages, and the examination of language change through time. Because of the pervasive influence of language in our everyday lives, work in linguistics interacts in important ways with studies carried out in many other fields, including psychology, anthropology, neuroscience, philosophy, computer science, sociology, literature, language teaching, communication and education.

## The Program

An introductory lower division course provides students with basic concepts and some of the methods needed to analyze language in a systematic way. Upper division courses probe more deeply into specific aspects of language structure, language use, and the relationship of language to other realms of human activity.

## Career Alternatives

Majors in linguistics find practical outlets for their linguistic training in a variety of fields: the computer science industry (software development); teaching English as a second language; foreign language teaching; elementary and secondary level bilingual-bicultural programs; language-oriented missionary work; bilingual-bicultural curriculum development (e.g., for publishing houses); legal work; speech therapy; lexicography (preparation of dictionaries). All of these types of employment share an interest in persons skilled in the analysis of language, spoken and/or written. Linguistics equips students with just such skills.

## Grading Recommendation

Though not required, it is recommended that all courses offered in satisfaction of the Linguistics major be taken for a letter grade.

## Faculty Advisor

Contact the Department of Linguistics (<http://linguistics.ucdavis.edu>).

## Honors & Honors Program

The honors program consists of 6 units of 194H credit normally taken in the fall and winter quarters of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Specific eligibility criteria may be obtained from the major advisor. For general

information regarding graduation with honors and Dean's Honors Lists, please see Academic Information.

## Graduate Study

The Department of Linguistics offers a program of study leading to M.A. and Ph.D. degrees. More detailed information may be obtained from the Graduate Advisor or from the Chairperson of the Linguistics Department.

### Graduate Advisor

### Program of Study

The UC Davis Graduate School of Management's Undergraduate Accounting Minor gives you the opportunity to enhance your accounting knowledge with a carefully crafted series of five upper division courses. These courses are designed to prepare you for accounting-related careers or advanced study in accounting. All five courses, 20 units total, must be completed to receive the minor certification.

The Accounting minor courses are open to all undergraduate and graduate majors at UC Davis.

The five courses required for the Accounting minor are offered by the Graduate School of Management. No substitutions (e.g., transfer courses, study abroad courses, or other UC Davis courses) are allowed. No course overlap is allowed with other minors. No more than one course can be counted towards both the student's major and the minor.

MGT 011A & MGT 011B are prerequisites for the Accounting minor. Please plan accordingly.

Recommended that MGT 101 be taken first.

Code	Title	Units
MGT 101	Sources & Uses of Accounting Information	4
MGT 103	Intermediate Financial Accounting I	4
MGT 105	Intermediate Financial Accounting II	4
MGT 107	Intermediate Financial Accounting III	4
MGT 170	Management Accounting & Control <sup>1</sup>	4

To complete the minor, students must complete the 20 units of coursework with a GPA of 2.000 or better. Only up to 1 course may be taken on a P/NP basis.

The OASIS Minor Declaration form will only be approved after the student is enrolled in the final course for the minor, one minor course has been successfully completed and minor GPA is at least 2.000.

Total Units	20
-------------	----

1

Please note that there is substantial overlap between MGT 170 & ARE 119. Students pursuing the accounting minor must complete MGT 170.

## Program of Study

The hallmark of the UC Davis Master of Business Administration (MBA) program is its flexibility. Our STEM-designated program reflects UC Davis' nationally recognized leadership in the STEM fields. Our rigorous curriculum emphasizes quantitative analysis and data-driven decision-making, which will prepare you for leadership roles in STEM fields. Innovative application of data in business decision-making has become a highly valued skill demanded by employers—especially here in Northern California and Silicon Valley.

The required core curriculum is designed to provide students foundation in the functional areas of business—accounting, economics, finance, marketing, organizational behavior, statistics, and strategy. These management disciplines are examined through the use of case studies, lectures and the analysis of a few select companies on which to base illustrations and spark discussions. As early as the first year of study, students are able to integrate elective courses into their personal curriculum.

Elective courses at the Graduate School of Management place an emphasis on real-world application of management principles through the use of executive guest speakers who present “live” case study analyses and actual “client” businesses for student projects. Many courses require team projects and emphasize managing by innovation and entrepreneurial thinking. These team projects develop your independent research abilities and hone your presentation skills. With a wide variety of electives offered every year, students can build their own MBA curriculum based on their goals.

## Program of Study

The Graduate School of Management Master of Science in Business Analytics program allows you to build competencies in analytics, data, business and practice and prepares you to be an innovative leader in this data-driven era. Advance your career by acquiring expertise in one of the most coveted skill sets in today's, modern business environment—business analytics.

### Core Competencies

**Business**—Build your business skills for achieving organizational impact through leadership, strategic thinking, communication and project management.

**Data**—Build your data skills as you learn core methods for acquiring, storing, handling and representing data.

**Analytics**—Analytics is the discovery, interpretation and communication of meaningful patterns of data. Build your skills in core statistical and computational techniques such as data modeling, databases, regression, data mining, machine learning, operations research and artificial intelligence (AI) methods.

**Practice**—Our program gives you hands-on experience working with and implementing analytic projects in a business environment. Under the direction of program faculty and in small student teams, you will learn analytics by navigating the complete project lifecycle on business problems drawn from real industry data.

## Business, Bachelor of Science

### Graduate School of Management

*Accepting freshmen in Fall 2025 and transfer students in Fall 2027; current students are accepted beginning in Fall 2027.*

Bachelor of Science in Business at the UC Davis Graduate School of Management (<https://gsm.ucdavis.edu/undergraduate/business-major/>)

The UC Davis Bachelor of Science in Business offers a core foundation anchored in math, statistics and economics while building competencies in fundamental areas of business. Business majors choose to specialize in one or two of the following areas:

- Accounting
- Finance
- Marketing & Business Analytics
- Management & Strategy

The major is a first-of-its-kind campus partnership between the Graduate School of Management, College of Letters & Science, and College of Agricultural & Environmental Sciences. The Graduate School of Management awards the Bachelor of Science in Business.

**Internships & Career Alternatives.** Internships for students in the Business Major provide valuable hands-on experience and insights into future careers that can enhance their academic and career goals. Internships may take place in various industries and organizations, including corporate enterprises, non-profits, and governmental agencies. Business majors often go on to pursue careers in diverse fields, including accounting, finance, sales, marketing, consulting, business analytics, entrepreneurship, and human resources. Additionally, graduates may pursue advanced degrees in areas such as business administration (MBA), accounting, finance, public policy, and law.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Business Bachelor of Science is 108.

Students may not double major in the Business Major and Economics or Managerial Economics. In addition, students in the Business Major may not be granted minors offered by the Graduate School of Management.

## Master of Management

Master of Management program from the University of California, Davis, is designed for recent undergraduates and early-career professionals. In nine months, you can graduate with fundamental leadership skills, a custom-tailored career roadmap and access to corporate connections across Northern California and beyond.

## Online Master of Management

The Online Master of Management from the University of California, Davis, is the first of its kind at a University of California management school. It offers early career professionals, recent undergraduates and career changers with a pathway to leadership roles in business. Students gain the knowledge, skills and network you need to jumpstart your business career in only 15 months.

## Academics & Curriculum

Modeled after UC Davis' highly regarded MBA program, the Master of Management curriculum equips you with a strong foundation in the functional areas of business, such as accounting, economics, finance, marketing and strategy.

## Powerful Connections

Through a collaborative learning environment, you will build strong connections with globally ranked professors and motivated students who will know you by name and work with you to meet your educational and professional goals.

- Guidance from research faculty and instructors who are diverse thought leaders.
- A focus on innovation, hands-on experience and trailblazing research.
- In the final quarter of the program, you will need to pass a comprehensive examination that tests your mastery of the course material as well as your ability to synthesize learning across key subject areas.

## School Office

Gallagher Hall; 530-752-7658; Graduate School of Management (<http://gsm.ucdavis.edu/>)

## Program of Study

The UC Davis Graduate School of Management offers a minor in Technology Management to undergraduate students. This minor complements students' undergraduate studies with courses in the ways in which engineering and science-based industrial enterprises manage and use knowledge from science, engineering and technology. The minor also provides students with business and management skills that should enable them to use their education more effectively in a technology environment.

The Technology Management minor courses are open to all undergraduate and graduate majors at UC Davis.

The courses that count for the Technology Management minor are offered by the Graduate School of Management. No substitutions (e.g.,

transfer courses, study abroad courses, or other UC Davis courses) are allowed for the upper division coursework.

No course overlap is allowed with other minors. No more than one course can be counted towards both the student's major and the minor.

Prerequisites for minor courses are required (e.g., MGT 011A and STA 013 for MGT 160; MGT 011A and MGT 011B for MGT 170). Please plan accordingly.

Code	Title	Units
Required preparatory course:		4
MGT 011A	Elementary Accounting	
Choose five:		20
Recommended that MGT 150 be taken first.		
MGT 120	Managing & Using Information Technology	
MGT 140	Marketing for the Technology-Based Enterprise	
MGT 150	Technology Management	
MGT 151	Management of Innovation & Entrepreneurship	
MGT 160	Financing New Business Ventures	
MGT 170	Management Accounting & Control	
MGT 180	Supply Chain Planning & Management	
To complete the minor, students must complete the 24 units of coursework with a GPA of 2.000 or better. Only up to 2 courses (including MGT 011A) may be taken on a P/NP basis.		
The OASIS Minor Declaration form will only be approved after the student is enrolled in the final course for the minor, one minor course has been successfully completed, and minor GPA is at least 2.000.		
Important: Only one course may overlap between major and minor requirements. If MGT 011A is used for completing a major requirement, then further minor coursework cannot be counted toward major requirements.		
Total Units		24

## Materials Science & Engineering

### College of Engineering

Yayoi Takamura, Ph.D., Chairperson of the Department; term ends June 30, 2025

## Department Office

3001 Ghausi Hall; 530-752-0400; Materials Science & Engineering (<http://mse.engineering.ucdavis.edu>); Faculty (<https://mse.engineering.ucdavis.edu/people/faculty/>)

The Department of Materials Science & Engineering offers one undergraduate program in Materials Science & Engineering (p. 338) and a minor in Materials Science (p. 338).

## Mission Statement

The mission of the Department of Materials Science & Engineering is to provide the highest quality of education and prepare a diverse group of students for successful careers by building a strong base of technical knowledge and professional ethics while advancing the frontiers of

materials science and engineering through teaching, research, and outreach.

## Graduate Programs in the Department of Materials Science & Engineering

The Department of Materials Science & Engineering is home to a top-ranked graduate program in Materials Science & Engineering. We offer a unique interdisciplinary environment for graduate studies, with renowned faculty and state-of-the-art research facilities.

- Materials Science & Engineering, Bachelor of Science (p. 338)
- Materials Science, Minor (p. 340)
- Materials Science & Engineering, Master of Engineering (p. 341)
- Materials Science & Engineering, Master of Science (p. 341)
- Materials Science & Engineering, Doctor of Philosophy (p. 341)

## Materials Science & Engineering, Bachelor of Science

### College of Engineering

## Materials Science & Engineering Undergraduate Program

The Materials Science and Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) under the commission's General Criteria and Program Criteria for Materials, Metallurgical, Ceramics, and Similarly Named Engineering Programs.

Materials science and engineering is directed toward an understanding of the structure, properties, and processing of materials. Society demands new and improved materials with capabilities far superior to common metals, polymers, and ceramics. New materials are needed for high-speed transportation systems, surgical and dental implants, new generations of power plants, renewable energy sources, and solid-state electronic and photonics devices in computer and communication technology. Both the development of new materials and the understanding of present-day materials demand a thorough knowledge of basic engineering and scientific principles, including crystal structure, elastic and plastic behavior, thermodynamics, phase equilibria and reaction rates, and structural and physical and chemical behavior of engineering materials.

Materials engineers study phenomena found in many different engineering operations, from fracture behavior in automobiles to fatigue behavior in aircraft frames, from corrosion behavior in petro-chemical refineries to radiation-induced damage in nuclear power plants, and from the fabrication of steel to the design of semiconductors. Materials engineers are also increasingly involved in developing the new materials needed to attain higher efficiencies in existing and proposed energy conversion schemes and will play a central role in the development of new technologies based on composites and high-temperature superconductivity.

The undergraduate materials science and engineering program provides the background for activities in research, processing, and the design of materials. The curriculum is based on a common core of courses basic to engineering; courses taken during your first two years provide a strong foundation in fundamental engineering concepts.

## Objectives

We educate students in the fundamentals of materials science and engineering, balanced with the application of these principles to practical problems; educate students as independent, critical thinkers who can also function effectively in a team; educate students with a sense of community, ethical responsibility, and professionalism; educate students for careers in industry, government, and academia; teach students the necessity for continuing education and self-learning; and foster proficiency in written and oral communications.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

## Honors Program

An Honors Program is available to qualified students in Materials Science & Engineering. It is a two-year program designed to challenge the most talented students in these majors. Students are invited to participate in their sophomore year. In the upper division coursework, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Materials Science & Engineering Bachelor of Science is 157.

ENG 035	Statics		
Remaining units must be satisfied by the following:			
BIM 106	Biotransport Phenomena		
BIM 109	Biomaterials		
ECI 130	Structural Analysis		
ECI 132	Structural Design: Metallic Elements		
EEC 140A	Principles of Device Physics I		
or EEC 140AV	Principles of Device Physics I		
EEC 140B	Principles of Device Physics II		
EEC 146A	Integrated Circuits Fabrication		

## Materials Science, Minor

College of Engineering

### Minor

There is a constant need for professionals with more knowledge and experience in understanding the behavior of materials from which products such as electronics, sensors, biological implants, transportation vehicles, medical devices and infrastructure are made. The goal of this minor is to prepare students for careers that require training in materials science, including the fundamentals of thermodynamics and kinetics and their effects on phase composition and structure, as well as the complex relationships between composition, structure, processing and behavior/performance. Topics covered include material thermodynamics and kinetics, materials structural analysis, and structure-property relationships for electronic, optical, magnetic and mechanical behavior. The minor is expected to accommodate persons of diverse backgrounds, such as those majoring in engineering, physical sciences, biological sciences, and mathematics.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements, with an overall GPA in minor requirement courses of 2.000 or better.

### Minor Advisor

## Materials Science & Engineering, Master of Engineering

College of Engineering

### The Master of Engineering Degree in Materials Science & Engineering

The one-year Master of Engineering (M.Eng.) degree is the most flexible degree we offer. With two different tracks to choose from, students can mold the degree to fit their interests and goals, whether they include training in additional engineering, computer science or management courses.

#### Degree Requirements & Program Coordinator

See Materials Science & Engineering (<https://grad.ucdavis.edu/programs/gems/>).

## Materials Science & Engineering, Master of Science

College of Engineering

### The Master of Science Degree in Materials Science & Engineering

The Master of Science (M.S.) degree is aimed at preparing students for careers in research and development, or for further study in the field. Like the doctoral degree, the M.S. degree combines coursework and research, but with a more limited scope of the research project and thesis to reflect the shorter time-to-degree. After graduation, the majority of our M.S. degree graduates find jobs in industry.

Students in this degree track must complete a master's thesis consisting of a scholarly piece of computational, experimental, or theoretical research that is rigorous in terms of design, methodology, and analysis. When students have completed the majority of their coursework, they should advance to candidacy. When advancing to candidacy, students should prepare an outline of their thesis, which should include a critical evaluation of the methods and limitations of the research project and a full description of the experimental design, protocols, and data analysis.

#### Degree Requirements & Program Coordinator

See Materials Science & Engineering (<https://grad.ucdavis.edu/programs/gems/>).

## Materials Science & Engineering, Doctor of Philosophy

College of Engineering

## The Doctoral (Ph.D.) Degree in Materials Science & Engineering

The doctoral degree in Materials Science & Engineering prepares students to solve complex, long-term research problems. Students can expect to graduate in four to five years and to work on a large research project, culminating in a dissertation. The majority of our doctoral graduates end up in industry careers, usually in research and product development positions. Others go on to careers in academia, either as a postdoctoral researcher or an assistant professor. Students enrolled in the doctoral degree have the option to complete a designated emphasis in biophotonics and bioimaging, biotechnology, and/or nuclear science.

Doctoral students complete two examinations en route to their degrees, the preliminary exam and the qualifying examination, in addition to coursework and a dissertation.

#### Degree Requirements & Program Coordinator

See Materials Science & Engineering (<https://grad.ucdavis.edu/programs/gems/>).

- Mathematical & Scientific Computation, Bachelor of Science (p. 348)
- Mathematical Analytics & Operations Research, Bachelor of Science (p. 349)

## Applied Mathematics, Bachelor of Science

College of Letters & Science

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

## The Program

After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability, modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research

or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

## Career Alternatives

A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

## Major Advisors

For a current list of faculty and staff advisors, see Math Department Advising or contact the Student Services office ([studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu)).

## Mathematics Placement Requirement

Students who wish to enroll in MAT 012, MAT 017A, MAT 019A, MAT 021A, MAT 021AH, and MAT 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see Math Placement Requirement (MPR), well in advance of enrolling.

## Department Honors

Students who meet the minimum GPA requirement for honors at graduation from the College of Letters & Science and who complete a senior project as part of MAT 194 or MAT 199 units in consultation with their faculty advisor may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see Honors & Awards (<https://www.math.ucdavis.edu/research/honors/>).

## Graduate Study

The Department offers programs of study and research leading to M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting Graduate Information (<https://www.math.ucdavis.edu/grad/>), and by email ([studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu)).

The major requirements below are in addition to meeting University Requirements (p. 56) & College Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Applied Mathematics Bachelor of Science major is 91.

Chosen from the L&S Natural Sciences & Mathematics List. ( <a href="https://catalog.ucdavis.edu/undergraduate-education/letters-science/#nat-sci-math">https://catalog.ucdavis.edu/undergraduate-education/letters-science/#nat-sci-math</a> )	
Preparatory Subject Matter Subtotal	39-45
<b>Depth Subject Matter</b>	
<i>Plans</i>	
Choose one:	39-40
Plan 1: General Mathematics (p. 344)	
Plan 2: Secondary Teaching (p. 345)	
<b>Note:</b> Students who wish to satisfy the single subject matter waiver for the teaching credential should see an advisor as early as possible.	
Depth Subject Matter Subtotal	39-40
<b>Total Units</b>	<b>78-85</b>

1

**Note:** Basic knowledge of MATLAB is required for both MAT 022A and MAT 067. Students can learn it on their own, enroll in ENG 006, or in the one 1 unit course MAT 022AL (can be taken concurrently).

## Plan 1: General Mathematics

Code	Title	Units
<b>A. Core Courses</b>		
MAT 127A	Real Analysis	4
MAT 127B	Real Analysis	4
MAT 127C	Real Analysis	4
MAT 135A	Probability	4
MAT 150A	Modern Algebra	4
<b>B. Enrichment Courses</b>		
Choose four:	16	
MAT 111-MAT 185B; up to four of these 16 units may be approved upper division courses outside of the Department of Mathematics with extensive use of mathematics. <sup>1</sup>		

<b>C. Capstone Course</b>	
Choose one:	3-4
MAT 115B	Number Theory
MAT 118B	Partial Differential Equations: Eigenfunction Expansions
MAT 119B	Ordinary Differential Equations
MAT 135B	Stochastic Processes
MAT 146	Algebraic Combinatorics
MAT 150B	Modern Algebra
MAT 150C	Modern Algebra
MAT 180	Special Topics
MAT 185B	Complex Analysis
MAT 189	Advanced Problem Solving
MAT 192	Internship in Applied Mathematics (Must take 3 units.)
MAT 194	Undergraduate Thesis

1

Excluding MAT 180, core courses, and courses being used as a capstone.

-------------	--

1

Excluding MAT 180, core courses, and courses being used as a capstone.

## Mathematics, Bachelor of Science

### College of Letters & Science

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

### The Program

Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability, modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

### Career Alternatives

A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

### Major Advisors

For a current list of faculty and staff advisors; see Math Department Advising (<https://www.math.ucdavis.edu/undergrad/advising/advisers/>) or contact Student Services ([studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu)).

### Mathematics Placement Requirement

Students who wish to enroll in MAT 012, MAT 017A, MAT 019A, MAT 021A, MAT 021AH, and MAT 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Math Placement Requirement (MPR) ([http://www.math.ucdavis.edu/undergrad/math\\_placement/](http://www.math.ucdavis.edu/undergrad/math_placement/)), well in advance of enrolling.

### Department Honors

Students who meet the minimum GPA requirement for honors at graduation for the College of Letters & Science and who complete a senior project as part of MAT 194 or MAT 199 units in consultation with their faculty advisor may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see Honors & Awards (<https://www.math.ucdavis.edu/research/honors/>).

## Teaching Credential Subject Representative

Dr. Ali Dad-del

## Graduate Study

The Department offers programs of study and research leading to M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website or contacting Student Services ([studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu)).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Mathematics Bachelor of Science is 82.

Code	Title	Units
<b>Preparatory Subject Matter</b>

2

Please note that MAT 170 has a prerequisite of MAT 167, or MAT 128B, or ECS 130. MAT 167 or MAT 128B can be used to satisfy one of the two required Enrichment A courses.

3

Excluding MAT 180, core courses, and courses being used as a capstone.

## Mechanical & Aerospace Engineering

### College of Engineering

Benjamin Shaw, Ph.D., Chairperson of the Department; term ends June 30, 2026

### Department Office

2132 Bainer Hall; 530-752-0580; Fax 530-752-4158; Mechanical & Aerospace Engineering (<http://mae.ucdavis.edu>); Faculty (<https://mae.ucdavis.edu/graduate-program-faculty/>)

- Aerospace Science & Engineering, Bachelor of Science (p. 351)
- Mechanical Engineering, Bachelor of Science (p. 354)
- Mechanical & Aerospace Engineering, Master of Science (p. 357)
- Mechanical & Aerospace Engineering, Doctor of Philosophy (p. 358)

## Aerospace Science & Engineering, Bachelor of Science

### College of Engineering

Valeria La Saponara, Ph.D., Vice Chairperson for Undergraduate Studies

## Mechanical & Aerospace Engineering Undergraduate Programs

The Department of Mechanical & Aerospace Engineering administers two undergraduate programs in the College of Engineering (1) Mechanical Engineering, (2) Aerospace Science & Engineering

For more information about our programs, please see Undergraduate Majors (<http://mae.ucdavis.edu/undergraduate/undergraduate-majors/>).

### Mission

The Department of Mechanical & Aerospace Engineering is committed to educating future engineers so that they may contribute to the economic growth and well-being of the state, the nation, and the world, and to the advancement of knowledge in the mechanical and aerospace sciences.

### Objectives

The objectives of the Mechanical Engineering and Aerospace Science & Engineering programs are to produce graduates who do one or more of the following: a. Practice mechanical engineering and/or aerospace engineering in a broad range of agencies, industries, and institutes; b. Pursue graduate education; c. Participate in research and development, and other creative and innovative efforts in science, engineering, and technology; d. Pursue entrepreneurial endeavors.

## Division of Aerospace Science & Engineering

The Division of Aerospace Science & Engineering administers the Aerospace Science & Engineering Program within the Department of Mechanical & Aerospace Engineering.

### Aerospace Science & Engineering Undergraduate Program

The Aerospace Science & Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org/>) under the commission's General Criteria and Program Criteria for Aerospace and Similarly Named Engineering Programs.

Aerospace Science & Engineering majors learn to apply the principles of physical sciences and engineering to the design of aerospace vehicles. Specific objectives include the design, development and manufacture of aerospace vehicles and other transportation systems through the integration of disciplines associated with aerodynamics, propulsion, structures, and guidance/control.

Our Bachelor of Science degree in Aerospace Science & Engineering provides a broad background and fundamental education in mathematics, the physical sciences, and the engineering sciences. These fundamentals, when complemented by the required technical courses, prepare students for employment in government or industry, while simultaneously establishing an excellent foundation for graduate studies.

### Aerodynamics & Fluid Mechanics

Relevant courses: EAE 126 & EAE 127.

### Suggested Advisors

C. Badrya, J. P. Delplanque, C. Harvey, S. Lee, S. K. Robinson, N. Sarigul-Klijn

This field of study is based on the fundamentals of fluid mechanics and applied aircraft aerodynamics. Areas of current research include computational fluid dynamics, turbulent boundary layer flows, aeroacoustics, rotorcraft aerodynamics, wind turbine aerodynamics, active flow control, subsonic wind tunnel measurement, vortex generators, fixed-wing tip vortices, parachute drag prediction and aircraft design and optimization. Many of these projects are sponsored by government agencies and leading industrial companies, such as NASA, the U.S. Army, Sandia National Laboratory, the National Science Foundation and Boeing. Computational research is conducted using UC Davis High Performance Computing (HPC), NASA HPC, DoD HPC and DoE

HPC. Experimental studies are conducted in the UC Davis Wind Tunnel Facility.

### Aerospace Control

Relevant course: EAE 129.

#### Suggested Advisors

S. Joshi, Z. Kong, N. Sarigul-Klijn

This field of study includes control theory and its application to aerospace systems. Areas of current research include adaptive control, networked system control, hybrid system control, and controller design for unmanned aerial systems, spacecraft, and other machines. Many of these projects are sponsored by government agencies and leading industrial companies, such as NASA Ames Research Center, NASA Jet Propulsion Laboratory, the National Science Foundation and Boeing.

### Aerospace Propulsion

Relevant courses: EAE 138 & EAE 140.

#### Suggested Advisors

J. P. Delplanque, S. Lee, N. Sarigul-Klijn

This field of study involves air-breathing jet engines and rocket propulsion. Areas of current research include turbomachinery, computational fluid dynamics, open rotor, jet noise, turbine cooling, innovative gas-turbine cycles, rocket engine feed systems and cooling tubes, propeller design and centrifugal compressors. Many of these projects are sponsored by government agencies and leading industrial companies, such as The Wright-Patterson Air Force Research Laboratory (AFRL), Lawrence Livermore National Laboratory, Los Alamos National Laboratory, Aerojet Rocketdyne and the University of California. Computational research is conducted using UC Davis High Performance Computing (HPC), NASA HPC, DoD HPC and DoE HPC.

### Structures & Materials

Relevant courses: EAE 133, EAE 135, EME 139, MAE 237 (graduate level/technical elective).

#### Suggested Advisors

V. La Saponara, N. Sarigul-Klijn

This field of study analyzes the structures and materials used in aerospace engineering, expanding from traditional mechanics of materials in order to correctly understand the behavior of thin-walled structures under bending, torsion and axial loads. Composite materials are being used extensively in new airplanes and helicopters, space structures, as well as in wind energy, ships, transportation, infrastructure and biomedical joints. Current research in composite structures encompasses several areas of engineering, includes durability of composites due to in service load (for example, thermo-hydro-mechanical fatigue, impact, etc.) and structural health monitoring methods. Numerical methods (particularly, Finite Elements) are needed for the modeling of complex multi-material and multi-loading structures.

### Spacecraft Engineering

Relevant courses: EAE 140, EAE 142, EAE 143A, EAE 143B.

#### Suggested Advisors

S. Joshi, S. K. Robinson, N. Sarigul-Klijn, R. Whittle

This field of study includes rocket propulsion, orbital mechanics, spacecraft design, human life-support in space, space environments, mission design and systems engineering. Current research in the MAE department includes spacecraft and habitat design, CubeSat

design, human life-support systems and safety, space robotics, autonomous systems supported by machine learning, radiation protection, atmospheric entry and metallic additive manufacturing. A variety of federally-funded national laboratories fund this research, and research projects often result in internship and employment opportunities for students in organizations like NASA, Lawrence Livermore Lab, SpaceX, Blue Origin, Sierra Nevada, Lockheed Martin, Northrup Grumman, Aerospace Corp, Space Systems Loral and Boeing.

### Aeroelasticity & Vibrations

Relevant course: EME 139

#### Suggested Advisors

N. Sarigul-Klijn

This field of study looks at aircraft structural dynamics and aeroelasticity. Areas of current research include aerospace structures, aeroelasticity, biomechanics, flow-induced vibrations, vibroacoustics and minimum weight design with aeroelastic and acoustic constraints. Research is also done on landing recovery systems, including winged, rotor, or parachute recovery system trades and scaled flight testing and the long-duration effects of space flight on the human spine. Aerospace engineers in this research area also work to develop advanced finite element methods to solve steep gradient problems of high temperature due to aerodynamic heating or shock loading, innovative power generation systems and environmental noise control methods. Many of these projects are sponsored by government agencies and leading industrial companies.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Aerospace Science & Engineering Bachelor of Science is 160.

ENG 105	Thermodynamics		Passing the Upper Division Composition Exam			
ENG 190	Professional Responsibilities of Engineers		<i>Upper Division Required Courses Subtotal</i>			
<i>Mechanical Engineering</i>			86-90			
EME 106	Thermo-Fluid Dynamics	20	<b>Total Units</b>			
EME 108	Measurement Systems		<b>160-164</b>			
1 Courses that cannot be used are ENG 160, ECS 188 or any 197T course.						
2 The following courses are historically <u>ONLY</u> offered in Fall quarter: EAE 127, EAE 133, EAE 140						
3 The following courses are historically <u>ONLY</u> offered in Winter quarter: EAE 129, EAE 135, EAE 138, EAE 142						

These courses are part of the Senior Design Capstone Project and are completed in the Winter and Spring quarter of the final year of study.

## Mechanical Engineering, Bachelor of Science

### College of Engineering

Valeria La Saponara, Ph.D., Vice Chairperson for Undergraduate Studies

## The Mechanical & Aerospace Engineering Undergraduate Programs

The Department of Mechanical & Aerospace Engineering administers two undergraduate programs in the College of Engineering: (1) Mechanical Engineering, (2) Aerospace Science & Engineering.

For more information about our programs, see Undergraduate Majors (<http://mae.ucdavis.edu/undergraduate/undergraduate-majors/>).

### Mission

The Department of Mechanical & Aerospace Engineering is committed to educating future engineers so that they may contribute to the economic growth and well-being of the state, the nation, and the world, and to the advancement of knowledge in the mechanical and aerospace sciences.

### Objectives

The objectives of the Mechanical Engineering & Aerospace Science and Engineering programs are to produce graduates who do one or more of the following: a. Practice mechanical engineering and/or aerospace engineering in a broad range of agencies, industries, and institutes; b. Pursue graduate education; c. Participate in research and development, and other creative and innovative efforts in science, engineering, and technology; d. Pursue entrepreneurial endeavors.

## Mechanical Engineering Undergraduate Program

The Mechanical Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) under the commission's General Criteria and Program Criteria for Mechanical and Similarly Named Engineering Programs.

The mechanical engineer uses basic science in the design and manufacture of complex engineering systems, requiring the application of physical and mechanical principles to the development of machines, energy conversion systems, materials, and equipment for guidance & control.

Work in this broad field of engineering requires a thorough knowledge of mathematics, physics, chemistry, material science, applied mechanics, thermodynamics, heat transfer, mass transfer, electricity, and manufacturing processes.

The Mechanical Engineering program is designed to provide knowledge in mechanical engineering and associated applied sciences so that graduates may practice in a broad range of industries, pursue graduate studies, participate in research & development, and/or pursue entrepreneurial endeavors.

### Areas of Interest

Students spend their third year in further study of fundamental courses, and in the fourth year they may tailor their studies to their interests by selecting courses in controls and systems analysis, fluid mechanics, heat transfer, mechanical design or thermodynamics. Students may either prepare for graduate study in mechanical engineering or obtain a broad background for entering engineering practice.

Students may select elective courses from among the areas of interest listed below.

#### Mechanical Design

The creation and improvement of products, processes, or systems that are mechanical in nature are the primary activities of a professional mechanical engineer. The development of a product from concept generation to detailed design, manufacturing process selection and planning, quality control and assurance, and life cycle considerations are areas of study and specialization in the area of mechanical design.

Solutions to such major social problems as environmental pollution, the lack of mass transportation, the lack of raw materials, and energy shortages, will depend heavily on the engineer's ability to create new types of machinery and mechanical systems.

The engineer-designer must have a solid and relatively broad background in the basic physical and engineering sciences and have the ability to synthesize the information from such a background in creative problem solving. In addition to having technical competence, the designer must be able to consider the socioeconomic consequences of a design and its possible impact on the environment. Product safety, reliability, and economics are other considerations.

#### Suggested Advisors

H.H. Cheng, M. Habibi, M.R. Hill, B.S. Linke, B. Ravani, J. Schofield, M. Soshi

Code	Title	Units
<b>Suggested Restricted Electives</b>		
ENG 122	Introduction to Mechanical Vibrations	4
EMS 180	Materials in Engineering Design	4
EMS 182	Failure Analysis	4
EME 121	Engineering Applications of Dynamics	4
EME 134	Vehicle Stability	4
EME 139	Stability of Flexible Dynamic Systems	4
EME 150B	Mechanical Design	4
EME 151	Statistical Methods in Design & Manufacturing	4
EME 152	Computer-Aided Mechanism Design	4
EME 154	Mechatronics	4
EME 161	Combustion & the Environment	4
EME 163	Internal Combustion Engines & Future Alternatives	4
EME 164	Introduction to Heating, Ventilation & Air Conditioning Systems	4
EME 171	Analysis, Simulation & Design of Mechatronic Systems	4

#### Engineering & Biomedical Fluid Mechanics

This field of study is based on the fundamentals of fluid mechanics and their broad range of applications in the biomedical and engineering

areas. Areas of current research include groundwater and atmospheric flows and their implications for pollutant transport and environmental concerns; aerodynamic flow around transportation vehicles and its impact on vehicle performance; flow in combustion engines and other energy systems with considerations of efficiency and environmental impact; compressible flows in aircraft engines or gas turbines; and computational fluid dynamics. These areas are investigated both experimentally and computationally.

#### **Suggested Advisors**

R.C. Aldredge, C. Badrya, J.P. Delplanque, C. Harvey, S. Lee, S.K. Robinson, B.D. Shaw, C.P. van Dam, A.S. Wexler

Code	Title	Units
<b>Suggested Restricted Electives</b>		
EME 161	Combustion & the Environment	4
EME 163	Internal Combustion Engines & Future Alternatives	4
EME 164	Introduction to Heating, Ventilation & Air Conditioning Systems	4

#### **Combustion & the Environment**

Combustion is widely used for energy generation, propulsion, heating, and waste disposal, as well as for many other applications. Mechanical engineers are often heavily involved with the design of combustion systems (internal combustion engines, gas turbines, furnaces, etc.) and deal with aspects of combustion ranging from increasing efficiencies to reducing pollutant emissions. This specialization is for those who would like to work in fields that use combustion, or that deal with pollution related to combustion. With the current increased emphasis on reducing pollutants while maintaining or increasing efficiency, the efforts of mechanical engineers in designing and improving combustion systems are becoming more important.

#### **Suggested Advisors**

R.C. Aldredge, P.A. Erickson, B.D. Shaw, J. Cobian-Iñiguez

Code	Title	Units
<b>Suggested Technical Electives</b>		
EME 161	Combustion & the Environment	4
EME 163	Internal Combustion Engines & Future Alternatives	4

#### **Heat Transfer, Thermodynamics, & Energy Systems**

This specialization emphasizes the fundamentals of heat transfer and thermodynamics, and their application to the design of advanced engineering systems. The objective of the program is to introduce students to the fundamental processes of heat transfer and thermodynamics in complex engineering systems so that they are able to design more efficient, cost-effective, and reliable systems with less environmental pollution and impact. An understanding of heat transfer and thermodynamics is required for the design of efficient, cost-effective systems for power generation, propulsion, heat exchangers, industrial processes, refining, and chemical processing. This area of specialization is important to many industries— aerospace, defense, automotive—as well as to the thermal design of electronic and computer packages.

#### **Suggested Advisors**

R.C. Aldredge, P.A. Erickson, J.K. Kissock, V. Narayanan, J.W. Park, B.D. Shaw, J. Cobian-Iñiguez

<b>Suggested Restricted Electives</b>		
EME 161	Combustion & the Environment	4
EME 163	Internal Combustion Engines & Future Alternatives	4
EME 164	Introduction to Heating, Ventilation & Air Conditioning Systems	4

#### **Manufacturing & Materials**

Manufacturing is concerned with the conversion of raw materials into finished products by a variety of processes, such as machining, forming, casting, and molding. Modern manufacturing technology is increasingly dependent upon integration with computer-aided design systems and precision computer controls. State-of-the-art laboratories offer the opportunity for hands-on experience with a wide spectrum of manufacturing equipment. Manufacturing engineers must have expertise in design, materials, controls, statistical methods, computer software, and microprocessor applications.

#### **Suggested Advisors**

H.H. Cheng, M. Habibi, V. La Saponara, B.S. Linke, B. Ravani, M. Soshi

Code	Title	Units
<b>Suggested Restricted Electives</b>		
EMS 180	Materials in Engineering Design	4
EME 150B	Mechanical Design	4
EME 151	Statistical Methods in Design & Manufacturing	4
EME 154	Mechatronics	4

#### **System Dynamics & Control**

Engineers are increasingly concerned with the performance of integrated dynamics systems in which it is not possible to optimize component parts without considering the overall system.

System dynamics and control specialists are concerned with the modeling, analysis, and simulation of all types of dynamic systems and with the use of automatic control techniques to change the dynamic characteristics of systems in useful ways. The emphasis in this program is on the physical systems that are closely related to mechanical engineering, but the techniques for studying these systems apply to social, economic, and other dynamic systems.

Ongoing research includes projects on continuously variable transmissions, active and semi-active suspension systems, modeling and control of vehicle dynamics, electromechanical actuator design, electronically controlled steering, the analysis of fuel management systems, and the design of flight-control systems with humans in the loop.

#### **Suggested Advisors**

F. Assadian, S. Joshi, Z. Kong, X. Lin, S. Nazari, J. Schofield, I. Soltani

EME 171	Analysis, Simulation & Design of Mechatronic Systems	4

### Ground Vehicle Systems

An important aspect of mechanical engineering is the design of more environmentally benign surface vehicles that provide efficient individual and public transportation. Innovations in the field require competence in vehicle dynamics, control of vehicle dynamics, power sources & power transmission, lightweight structures & systems, alternatively fueled power systems, including electrical drives & fuel cells, and mechanical systems.

#### Suggested Advisors

F. Assadian, P. A. Erickson, M. Hill, X. Lin, J.W. Park, N. Sarigul-Klijn

EME 139	Stability of Flexible Dynamic Systems	4
EME 152	Computer-Aided Mechanism Design	4
EME 171	Analysis, Simulation & Design of Mechatronic Systems	4

### Transportation Systems

As society recognizes the increasing importance of optimizing transportation systems to minimize environmental degradation and energy expenditure, engineers will need to consider major innovations in the way people and goods are moved. Such innovations will require competence in vehicle dynamics, propulsion and control, and an understanding of the problems caused by present-day modes of transportation. Vehicle control requires an understanding of sensors and actuators, and the integration of yet-to-be-proposed concepts into overall vehicular dynamics. Competence in these areas allows for the development of alternative propulsion concepts, such as electric, hybrid, and fuel cell.

<b>College of Engineering</b>			
<b>Mechanical &amp; Aerospace Engineering, Master of Science (M.S.)</b>			
The defining element of graduate study in the Mechanical & Aerospace Engineering Program is interdisciplinary design. Research within this graduate program advances design in diverse fields such as vehicles, biomechanics, aerostructures, sensors, combustion, and energy systems. Graduate students acquire skills both to address fundamental issues in these areas and to design complex, multi-component systems. The highly collaborative environment fosters multidisciplinary research while drawing on the study of mathematics, electrical engineering, materials science, materials modeling, molecular dynamics and numerical analysis, bioengineering, MEMS, and nanotechnology in addition to the core areas.			

Recruiters from industry are active here, knowing that, in addition to having hands-on design experience, our students are well grounded in engineering fundamentals. They study with professors who "wrote the book" on their discipline, and work on design projects with researchers who are international authorities in their field. Our graduate students are able to work closely with faculty in a friendly but demanding environment where teamwork and faculty mentoring are important, as is the cross-disciplinary, collaborative culture that is unique to UC Davis.

## Doctor of Medicine

### School of Medicine

The curriculum for the M.D. degree at the UC Davis School of Medicine is a four-year program providing comprehensive preparation for graduate medical training (internships and residencies) and the practice of medicine. It offers a highly integrated approach to basic science training and clinical experience with opportunities for research. The I-EXPLORE (Integrated EXplorative Patient & Learner Oriented Education) curriculum utilizes a competency-based medical education that emphasizes the achievement of knowledge, skills, abilities, and attitudes through a variety of experiences#that span all four years of the program.#Competencies are assessed through a variety of methods that include both formative and summative events. Competency-based education is designed in a collaborative and integrative manner that allows students to grow and evolve throughout their educational experience. For more information, see UC Davis School of Medicine M.D. Program (<https://health.ucdavis.edu/mdprogram/>).

## Medieval & Early Modern Studies, Bachelor of Arts

### College of Letters & Science

## The Major Program

The Major in Medieval & Early Modern Studies serves as the nucleus from which to examine diverse cultures, intellectual movements, religions, politics, and literary traditions from a world-historical time frame that stretches from the fifth century to the eighteenth-century CE and into contemporary medievalisms. A transdisciplinary and interdepartmental program, the major includes studies across the humanities in art, drama, history, literature, music, national languages, philosophy, politics and political theory, religion, and rhetoric.

These premodern worlds were rarely static and the major encourages dynamic work across traditional boundaries of faiths, languages, economies, and peoples. The lower division series of Medieval Studies (MST) (<https://ucdavis-curr.courseleaf.com/courses-subject-code/mst/>) courses in the program provides the foundation for the major and prepares students for advanced work within individual disciplines. At the upper division level, students may choose humanities course work across geographic areas such as the Middle East, Europe, East Asia, South Asia, Africa, and America. There is also the option for students to choose to complete a senior thesis on a selected aspect of Medieval and/or early modern culture.

## Career Alternatives

The major in Medieval & Early Modern Studies is a liberal arts degree providing excellent preparation for the rigors of professional schools as well as careers in law, museology, journalism, and teaching.

## Major Advisor

See Program office (<http://mems.ucdavis.edu>).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Medieval & Early Modern Studies Bachelor of Arts is 66.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
MST 020A	Intro to Late Antique & Early Medieval Worlds (Intro to Late Antique & Early Medieval Worlds)	4
MST 020B	Intro to Late Medieval & Early Modern Worlds (Intro to Late Medieval & Early Modern Worlds)	4
Choose 12 units:		
AHI 001B	Medieval & Renaissance Art	
AHI 001C	Baroque to Modern Art

## Medieval & Early Modern Studies, Minor

College of Letters & Science

### Minor Advisor

See Program office (<http://mems.ucdavis.edu/>).

Code	Title	Units
	The minor in Medieval & Early Modern Studies is a coherent program of interdisciplinary study. Medieval Studies units may be taken in one or more of the traditional fields of concentration, including art, history, literature, music, national languages, philosophy, political theory, and religious studies. Courses must be upper division with at least two courses each from the medieval and early modern periods. Students may also select a minor with a thematic emphasis. Although there is no foreign language requirement for the minor, knowledge of Latin or a modern European language is recommended. The minor must be designed in consultation with the Undergraduate Advisor.	24
<b>Total Units</b>		<b>24</b>

## Microbiology & Molecular Genetics

College of Biological Sciences

Wolf-Dietrich Heyer, Ph.D., Chairperson of the Department; term ends June 30, 2026

### Department Office

- Molecular & Medical Microbiology, Bachelor of Science (p. 363)

# Molecular & Medical Microbiology, Bachelor of Arts

## College of Biological Sciences

The department of Microbiology & Molecular Genetics offers the major in Molecular & Medical Microbiology.

Microbiology is the branch of biology that deals with bacteria, yeasts and other fungi, algae, protozoa, and viruses. These microorganisms are ubiquitous in nature and play a crucial role in areas such as agriculture, biotechnology, ecology, medicine, and veterinary science. The field of microbiology contributes to areas of fundamental inquiry such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis, and physiology. The ease and power of simultaneous genetic and biochemical analysis of microbes led to the emergence of the new disciplines of molecular biology & molecular genetics, and spawned the new industry of biotechnology.

## The Program

The Molecular & Medical Microbiology Undergraduate Program offers Bachelor of Science and Bachelor of Arts degrees in the College of Biological Sciences. Both degrees are designed to provide students with quantitative skills and knowledge across the breadth of Biological Sciences, while maintaining a focus on the biology of microorganisms. The B.S. degree offers more training in mathematics, biochemistry and laboratory methodology; the A.B. degree incorporates more exposure to the liberal arts. The choice of a major program and its suitability for particular career options should be discussed with a Biology Academic Success Center (BASC) advisor.

## Career Alternatives

A bachelor's degree in Molecular & Medical Microbiology serves as the foundation for advanced study in microbiology, entry into the professional schools of all health sciences, or immediate employment in biotechnology, health care and food science industries.

## Related Courses

The offerings of the Department of Microbiology & Molecular Genetics are augmented by courses in Food Science & Technology (FST) (p. 897); Medical Microbiology (MMI) (p. 1153); Molecular & Cellular Biology (MCB) (p. 1178); Pathology, Microbiology, & Immunology (PMI) (p. 1256); Plant Pathology (PLP) (p. 1297); and Soil Science (SSC) (p. 1396).

Please note, MIC courses are in the process of transitioning to MMG courses.

Faculty of the Department of Microbiology & Molecular Genetics also teach or participate in the following courses: BIS 002A, BIS 101 or BIS 101V, BIS 104, and BIS 181.

## Faculty Advisor

Miriam Markum, Ph.D., Kenjiro W. Quides, Ph.D.

## Honors & Honors Program

Miriam Markum, Ph.D., Kenjiro W. Quides, Ph.D.

## Teaching Credential Subject Representative

Miriam Markum, Ph.D.; see the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

## Advising

Biology Academic Success Center (BASC) (<https://basc.biology.ucdavis.edu/>) in 1023 Katherine Esau Hall (formerly known as Sciences Laboratory Building); 530-752-0410.

## Graduate Study

The Graduate Group in Microbiology offers programs of study and research leading to M.S. and Ph.D. degrees.

Strong preference is given to doctoral applicants. The group offers study in general microbiology, microbial physiology, microbial genetics, molecular mechanisms of microbial regulation, molecular mechanisms of microbial pathogenesis, immunology, virology, and recombinant DNA technology. For information on the graduate study and undergraduate preparation for the program contact a graduate advisor or the Chairperson of the Group.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Molecular & Medical Microbiology Bachelor of Arts is 81.

Or upper division courses in related fields, relevant to the student's interest and chosen in consultation with the advisor.

No more than 3 units of variable-unit courses (numbered 192, 198, or 199) may be used for credit in this category.

Note: Although a course may be listed in more than one category, that course may satisfy only one requirement in the entire major.

Depth Subject Matter Subtotal	45
-------------------------------	----

Total Units	105-115
-------------	---------

**1**

With BASC advisor approval, these combination also satisfies the General Chemistry requirement: CHE 004A-CHE 002A (3 units w/no lab )-CHE 002B-CHE 002C or CHE 004A-CHE 004B-CHE 002C.

**2**

With BASC advisor approval, this combination also satisfies the Organic Chemistry requirement: CHE 118A-CHE 008B.

**3**

With BASC advisor approval, this combination also satisfies the Mathematics requirement: MAT 021A-MAT 017B-MAT 017C; MAT 017A-MAT 021B.

**4**

With BASC advisor approval, these combinations also satisfy the Physics requirement: PHY 007A (<https://catalog.ucdavis.edu/search/?P=PHY%20007A>)-PHY 009A (<https://catalog.ucdavis.edu/search/?P=PHY%20009A>)-PHY 049 (<https://catalog.ucdavis.edu/search/?P=PHY%20049>)-PHY 007C (<https://catalog.ucdavis.edu/search/?P=PHY%20007C>); PHY 009A (<https://catalog.ucdavis.edu/search/?P=PHY%20009A>)-PHY 009B (<https://catalog.ucdavis.edu/search/?P=PHY%20009B>)-PHY 049 (<https://catalog.ucdavis.edu/search/?P=PHY%20049>)-PHY 049 (<https://catalog.ucdavis.edu/search/?P=PHY%20049>). \*PHY 049 (<https://catalog.ucdavis.edu/search/?P=PHY%20049>) will require approval from the Physics Department to enroll.

## Microbiology, Master of Science

### School of Medicine

### Graduate Study

The Graduate Group in Microbiology offers study and research leading to M.S. and Ph.D. degrees. Strong preference is given to doctoral applicants. The group offers study in modern molecular approaches to microbiological problems. Areas of research span fundamental, applied, and pathogenic microbiology, including bacterial and viral pathogenesis, eukaryotic microbiology, microbial genomics and genetics, microbial physiology and development, microbial ecology and environmental microbiology, cancer biology, and bioengineering and bioremediation. For information on the graduate study and undergraduate preparation for the program, contact a graduate advisor or the chairperson of the group.

The Master of Science degree is offered only en route to the Ph.D.

## Middle East/South Asia Studies, Bachelor of Arts

College of Letters & Science

### The Major Program

Are you interested in languages and culture? Do you want a global education? Middle East/South Asia Studies is a unique major where you can learn about the interconnected regions of South Asia, Central and West Asia, and North Africa. This area encompasses many countries, including Afghanistan, Algeria, Egypt, India, Iran, Iraq, Israel,

Lebanon, Morocco, Pakistan, Palestine, Sudan, Syria, Turkey, the United Arab Emirates, and Yemen. Students can explore these regions through a variety of courses: anthropology, art history, art studio, Asian American Studies, cinema, classics, comparative literature, English, gender studies, history, music, political science, religious studies, and sociology. As a ME/SA major, you will be able to learn a regional language (Arabic, Hebrew, Hindi/Urdu, Persian or Punjabi). Beyond coursework, ME/SA majors also have the opportunity to get involved in research, special projects with faculty guidance, and study abroad.

The Middle East/South Asia Studies major focuses on the comparative study of these regions and their historically intertwined cultures and societies. Students will receive a strong foundation in one regional language, with two years required in Arabic, Hebrew, Hindi/Urdu, Persian, Punjabi, or another language of this area. The two required ME/SA Studies courses lay a comparative foundation, and options for remaining requirements include coursework from a wide range of departments/programs in the College of Letters and Science.

### Language Courses

To enforce Davis Division Regulation 536 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#536-1>), a student who has completed a second or more advanced year of high-school-level course work in a foreign language in tenth, eleventh, or twelfth grade shall be awarded credit for Course 1 (or its equivalent) in that language only if he or she takes the course on a Passed or Not Passed basis. Enforcement of this regulation occurs in the sixth week of the quarter. For more information, contact the Office of the University Registrar (<https://registrar.ucdavis.edu/contact/>). Please note this UC Davis policy applies to Arabic 001, Hebrew 001, Hindi 001, Persian 001, Punjabi 001/001V, and Urdu 001.

## Middle East/South Asia Studies, Minor

### College of Letters & Science

The Middle East/South Asia Studies (ME/SA) Studies Minor features the interdisciplinary and comparative study of West Asia, North Africa, South Asia, and Central Asia, regions that have been linked for centuries by trade, migration, the exchange of scientific, mathematical, philosophical, and political ideas, religion, literature, and the arts. The ME/SA Studies Minor is open to undergraduates in all four colleges.

Additional Electives from Core Course list for major.

With prior consultation with an advisor, students can petition the Program Committee in advance to accept:<sup>1</sup>

Other elective courses toward the minor program. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

<b>Total Units</b>	<b>20-24</b>
1	No more than 4 units of MSA 192, MSA 198, and/or MSA 199 towards the minor program.

## Military Science

### College of Letters & Science

Justin Ottenwalter, Major, Chairperson of the Department; term ends June 30, 2025.

## Department Office

Reserve Officers' Training Corps (ROTC), Army; 125 Hickey Gymnasium; 530-752-5211; Faculty (<https://militaryscience.ucdavis.edu/people/>)

## Program of Study

The Military Science Department is a classroom and hands-on leadership and management program. The program stresses the following Army Values: loyalty, duty, respect, selfless service, honor, integrity, and personal courage. We cover the basics of the Army, including Army ranks, organizational structure, basic skills, and tactics. We also discuss current events, national and international politics, military affairs, ethics, and human relations. Military skills (such as drill and ceremony, map reading, and squad tactics) are taught to the extent necessary to create an environment where students can enter leadership positions and apply theories taught in the classroom. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The department offers two program tracks: (1) a purely academic track; (2) a pre-commissioning track for those desiring a commission as an Officer in the Active Duty U.S. Army, Army National Guard, or Army Reserves. The academic track entails no obligation to the military and is open to all students but is limited to MSC 012 and MSC 022B. Students pursuing the academic track do not wear a uniform or otherwise participate in extra-curricular activities designed as part of the pre-commissioning process.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extra-curricular activities designed to enhance their military leadership and tactical and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students must contract with ROTC to participate in the upper division pre-commissioning program and incur a military obligation. Extracurricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, a military honor society, and opportunities to participate in field training exercises.

## Department Programs

Students are enrolled in Military Science under one of two programs.

### Four-Year Program

There is no military obligation associated with attendance in lower division courses. Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately based on their military service experience and graduation from Basic Training, upon approval by the Department Chairperson.

During the course, all Military Science textbooks, uniforms and equipment are provided without cost. Contracted students are given leadership development experience at the ROTC Advanced Camp in Fort Knox, Kentucky, between their third and fourth years of the course. Emphasis is on military fitness, tactics, and leadership.

### Two-Year Program

The two-year program is for students, including graduate students, who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends a six-week summer program, Basic Camp, which is voluntary and carries no military obligation. Basic Camp attendees are paid and transportation costs are covered. Applications are accepted at any time prior to the student's junior year; graduate students are also accepted, as long as they have two years of academics remaining.

### Scholarship Program

There are three- and two-year scholarship opportunities available at the discretion of the Department Chairperson that covers full tuition and fees and \$1200 annually for books. Cadets also receive a \$420 monthly stipend.

Army Reserve Officers' Training Corps four-year Active Duty merit scholarships are awarded to qualified high school seniors in a national competition each year. As high school seniors, students compete for the scholarship by submitting a complete application at Army ROTC (<https://www.goarmy.com/careers-and-jobs/find-your-path/army-officers/rotc.html>).

If high school seniors are not awarded the four-year National Scholarship, there are still opportunities for campus-based three and two-year scholarships.

### Leadership Laboratory

During the course of the school year, two hours per week are spent conducting practical exercises. Classes emphasize adventure activities including military offense, defense and patrolling, operations, weapons familiarization, rappelling, leadership scenarios, and land navigation. All cadets are required to attend leadership laboratories for practical leadership experience and to prepare for attendance at Advanced Camp.

### Academic Credit

#### College of Agricultural & Environmental Sciences

The Bachelor of Science degree in agriculture requires the completion of 180 units. Military Science courses are counted in the unit allowance for electives.

#### College of Biological Sciences

The Bachelor of Science degree requires the completion of 180 units. Military Science courses are counted in the allowance for electives.

## **College of Engineering**

Military Science units are acceptable toward the requirements for the Bachelor of Science degree to the extent of the unrestricted elective units available in the curriculum being followed.

## **College of Letters & Science**

The Bachelor of Arts and Bachelor of Science degrees require the completion of 180 units. Military Science courses are counted in the allowance for electives.

## **School of Veterinary Medicine**

The number of Military Science units acceptable toward the Bachelor of Science degree in Veterinary Medicine is on an individual program basis approved by the Dean of the School. Graduates with the D.V.M. degree may apply for a direct commission in the United States Army Veterinary Corps.

## **Aerospace Studies (Air Force)**

The Air Force Reserve Officer's Training Corps (AFROTC) is an educational program providing training in leadership, management, communications and military proficiency on college and university campuses. It also provides an opportunity to obtain a commission as a second lieutenant in the Air Force and enter the active-duty forces after you complete a bachelor's or a graduate degree. The skills you acquire will become valuable assets for any subsequent career you choose.

The program is normally four years long, but a flexible design allows students to complete the curriculum in as little as two years. Undergraduate scholarships are available, but are not necessary for participation. Until you accept a scholarship or enter your junior year of the program, you have no obligation to join the Air Force. There are no costs for AFROTC uniforms, books, or classes.

UC Davis students have the option of taking the Air Force program on the UC Berkeley or CSU Sacramento campus.

## **Qualifications**

Freshmen/Sophomore applicants must:

- Be full-time college students in good academic standing
- Have good moral character
- Be in strong physical condition
- Be at least 14 years old

Additionally, Juniors/Seniors/Scholarship recipients must:

- Be United States citizens or in the process of applying for citizenship
- Be 18 years old (or 17 years old with the consent of parent or guardian)
- Pass the Air Force Officer Qualifying Test
- Pass a medical examination
- Be under the age of 31 at time of graduation (may be waived)

## **Scholarships**

Opportunities for four-year and three-year undergraduate scholarships are better than ever. Scholarships cover the full cost of tuition, books and required fees at the University of California and are available for eligible high school seniors. It also includes \$300-\$500 monthly stipend during the school year. If you are a junior or senior in high school and plan on attending a college or university in Northern California, you can write, call or visit the local AFROTC detachments for a scholarship application.

Applications are also available from local Air Force recruiters or your high school guidance counselors.

All scholarships are merit-based and consider a variety of factors: cumulative GPA, class standing, SAT/ACT scores, academic awards/achievements, leadership ability, athletic involvement, extracurricular activities, community service and letters of recommendation. A personal interview with an Air Force officer is also part of the application process. Prior to activating a scholarship, students must meet AFROTC medical and physical fitness standards. All scholarships must be used at an accredited college or university that offers AFROTC on campus or through cross-registration. The program is available at more than 1,000 universities and colleges nationwide.

If you are already in college, contact our office directly and apply for enrollment into AFROTC as a cadet. Three- and two-year full-tuition scholarships are available for all academic majors, especially scientific and technical majors such as engineering, atmospheric science, math, computer science, and physics. GPA Scholarship requirements for non-technical majors are slightly higher. Applicants are primarily evaluated on their leadership ability and academic performance.

## **Challenging Careers**

All commissioned officers enter the Air Force as second lieutenants for a 4-year active duty service commitment. Pilots and navigators serve longer commitments, based on training requirements. Once on active duty, you'll be given instant responsibility in one of 32 primary career fields. Opportunities to fly are better than ever. Whether you are piloting the F-22 fighter, supervising 150 aircraft maintainers on the flightline, or caring for sick personnel in the emergency room, you will be rewarded knowing that you are making a difference.

Air Force ROTC is offered through the Aerospace Studies departments at California State University Sacramento and U.C. Berkeley. Scholarships (including tuition, book allowance, and stipend) are available for qualified students. Students may enroll and attend one course per semester at the U.C. Berkeley or CSU Sacramento campus at no cost. Topics covered in AFROTC courses include Heritage and Values of the United States Air Force (1-credit), Team and Leadership Fundamentals (1-credit), Leading People and Effective Communication (3-credits), and U.S. National Security Affairs and Preparation for Active Duty (3-credits). Additional components of the AFROTC program include 2 hours per week of fitness activities, 2 hours per week of Leadership Lab, and a 2-week Summer Field Training between the sophomore and junior years. Upon completion of the program and granting of 4-year degree, students will commission as Second Lieutenants in the United States Air Force. To be eligible for AFROTC, applicants should be a full time student and meet additional fitness, GPA, testing, and other requirements. Interested students, please contact their department of choice:

- CSU Sacramento ROTC (<https://www.csus.edu/academic-affairs/air-force-rotc/>); 916-278-7315 or 916-278-7449; email ([sacramento@afrotdcadmissions.com](mailto:sacramento@afrotdcadmissions.com))
- UC Berkeley Air Force ROTC (<http://airforcerotc.berkeley.edu>); 510-642-3572; email ([airforce@berkeley.edu](mailto:airforce@berkeley.edu))

## **Department of Naval Science**

152 Hearst Gymnasium; UC Berkeley, Berkeley, CA 94270-3640; 510-642-3551; UC Berkeley Naval ROTC (<http://nrotc.berkeley.edu>)

UC Davis students may participate in the Navy and Marine Corps ROTC program at UC Berkeley. The program is 4 years long and includes

courses and weekly professional development laboratories (drill) at UC Berkeley. Students normally compete for national scholarships as high school seniors, although interested students may enroll as freshmen or sophomores and compete for scholarships based on successful participation in the program. A student who satisfactorily completes an ROTC program and is awarded a degree from UC Davis receives an active duty commission as a Second Lieutenant in the U.S. Marine Corps or an Ensign in the U.S. Navy.

Navy option students take the following courses:

#### **Freshman Year**

- NS 1 Introduction to Naval Science
- NS 2 Sea Power and Maritime Affairs

#### **Sophomore Year**

- NS 3 Leadership and Management
- NS 10 Naval Ship Systems I

#### **Junior Year**

- NS 12A Navigation and Naval Operations I
- NS 12B Navigation and Naval Operations II

#### **Senior Year**

- NS 401 Naval Ship Systems II
- NS 412 Leadership and Ethics

In lieu of NS401, NS10, NS12A and NS12B, Marine Corps students participate in Marine Seminars and complete MA154, History of Littoral Warfare and MA20, Evolution of Warfare (or a designated equivalent).

Scholarship students are required to complete a number of other courses at Davis, including one year each of calculus, physics, and English, and one quarter each of computer science, and military history or national security policy.

Interested students should contact the Department of Naval Science at UC Berkeley at the address above to obtain information and apply.

## **Molecular & Cellular Biology**

#### **College of Biological Sciences**

Frédéric Chédin, Ph.D., Professor, Chairperson of the Department; term ends June 30, 2026

#### **Department Office**

149 Briggs Hall; 530-752-3611; Molecular & Cellular Biology (<http://www.mcb.ucdavis.edu>); Faculty (<https://biology.ucdavis.edu/faculty/departments/molecular-and-cellular-biology/>)

- Biochemistry & Molecular Biology, Bachelor of Science (p. 374)
- Cell Biology, Bachelor of Science (p. 376)
- Genetics & Genomics, Bachelor of Science (p. 378)

## **Biochemistry & Molecular Biology, Bachelor of Science**

#### **College of Biological Sciences**

The Biochemistry & Molecular Biology major introduces students to the chemistry of living organisms and the experimental techniques that are

used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology and who are comfortable with quantitative approaches to problem solving will find this major a rewarding field of study.

## **The Program**

The upper division curriculum in the Biochemistry & Molecular Biology program begins with the three-course, upper-division common curriculum that introduces the principles of biochemistry and genetics. Majors then take a comprehensive and rigorous laboratory course to familiarize them with the most important aspects of biochemical research. Additional upper-division courses in biochemistry and molecular biology examine detailed aspects of these subjects. Students are also required to take courses in other biological sciences and a full year of physical chemistry.

## **Career Alternatives**

The Biochemistry & Molecular Biology program provides a solid scientific background for students seeking a research, teaching, or service career in the life sciences. Positions are open to biochemists in bio-medical, biotechnological, pharmaceutical, agricultural research, and some chemical industries. Also, university-affiliated research laboratories, hospital laboratories, and government-sponsored research facilities provide employment opportunities. The major provides excellent preparation for advanced study in graduate or professional schools.

## **Faculty Advisor**

David Wilson (dkwilson@UCDAVIS.EDU), Ph.D.

## **Advising**

Biology Academic Success Center (BASC), CBS Dean's Office Advising in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410; cbsundergrads@ucdavis.edu.

## **Graduate Study**

See Biochemistry, Molecular, Cellular, & Developmental Biology (Graduate Group) (p. 130).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Biochemistry & Molecular Biology Bachelor of Science is 106.

## Cell Biology, Bachelor of Science

### College of Biological Sciences

The Cell Biology major provides students with a comprehensive understanding of the cell, the basic structural and functional unit of all living organisms.

### The Program

To understand living organisms, the biologist must understand the cell. Hence, cell biology lies at the core of the biological sciences. Students taking this major gain a solid foundation in biological principles. The major emphasizes how cellular organization and function contribute to the development, maintenance, and reproduction of adult organisms. The major illustrates the ways in which principles derived from the physical sciences, genetics, biochemistry, molecular biology, and physiology are integrated in the study of living cells and emphasizes the experimental nature of the study of cell biology.

### Career Alternatives

The major provides an excellent background for students wishing to enter postgraduate and professional programs in biological, health sciences or veterinary sciences; for students pursuing careers involving teaching or research in the biological sciences; for students interested in careers in the biotechnological or pharmaceutical industries; or for students interested in careers related to the administrative, legal, or commercial aspects of biomedical science.

## Genetics & Genomics, Bachelor of Science

### College of Biological Sciences

The Genetics & Genomics major provides a broad background in the biological, mathematical, and physical sciences basic to the study of heredity, gene expression and evolution. The major is sufficiently flexible to accommodate students interested in the subject either as a basic discipline in the biological sciences or in terms of its applied aspects such as biotechnology, medicine, and agriculture.

### The Program

The upper division curriculum in the Genetics & Genomics program begins with the four-course, upper-division core curriculum that provides an introduction to the principles of genetics, biochemistry, and cell biology. Students then take additional upper-division courses in specialized areas of modern genetics including gene expression, evolution, development, human genetics, and genomics, as well as laboratory courses in the principles of genetics and genomics. Additional upper-division courses in biological sciences, as well as internship/research coursework, can be chosen to fulfill required elective units.

### Career Alternatives

The Genetics & Genomics degree provides suitable preparation for a wide variety of careers, including teaching, research, work with biotechnology companies, medicine, and all the health sciences. It is also an excellent background for students wishing to continue their education in a graduate program, a teacher-training program, medical school, veterinary school, or other professional schools.

### Faculty Advisor

Celina Juliano, ([cjuliano@ucdavis.edu](mailto:cjuliano@ucdavis.edu)) Ph.D.

### Advising

Biology Academic Success Center (BASC) in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410, [cbsundergrads@ucdavis.edu](mailto:cbsundergrads@ucdavis.edu).

### Graduate Study

See Integrative Genetics & Genomics (Graduate Group) (p. 318).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Genetics & Genomics Bachelor of Science is 99.

- Music, Minor (p. 388)
- Music, Master of Arts (p. 388)
- Music, Doctor of Philosophy (p. 388)

## Music, Bachelor of Arts

### College of Letters & Science

The Bachelor of Arts degree in music provides both a broad liberal arts education and the skills necessary to explore music through its history, composition, theory, and performance. Students majoring in music may choose from four tracks in the major: (1) composition, (2) music history, theory, and ethnomusicology, (3) performance, or (4) an independent track. After a common core of courses in the lower division, students pursue their chosen track with specialized courses leading to an appropriate senior project. All majors are expected to complete a substantial project (composition, research presentation, recital) in the senior year (MUS 195).

### The Program

A fundamental grounding in music theory, music history, and performance during the first two years of study leads to more specialized study of composition, music scholarship, or performance during the last two years of undergraduate work.

## Study Abroad & the Music Major

The department encourages students to pursue a portion of their studies abroad. In close collaboration with their undergraduate advisors, students plan a course of study abroad that complements their coursework at Davis. UC Davis Music Majors have completed upper division coursework at EAP partner institutions in Australia, England, France, Germany, and Italy.

## Career Alternatives

Students who graduate with a B.A. in music from UC Davis have gone on to careers as composers, performers, educators, scholars, and as professionals in the concert, media, and computing industries. Others have continued in medicine, law, government, and business.

## Foreign Language

Students contemplating graduate study in music are advised to consider pursuing foreign language study beyond the elementary level.

## Diagnostic Exams

Diagnostic exams in musicianship and theory are administered at the start of the school year to all incoming students.

## Student Performing Activities

The Department of Music presents more than 100 concerts each year, offering performance opportunities for both majors and non-majors in more than 15 performance ensembles including Chorus, Chamber Singers, Concert Band, Symphony Orchestra, Chamber Music Ensembles, Bluegrass & Old Time String Band, Jazz Bands and Combos, Samba Ensembles, Indonesian Gamelan, Hindustani Vocal Ensemble, Afro-Cuban Ensemble, Capoeira, and Mariachi Ensemble. Most concerts are performed in the Pitzer Center or the Margrit Mondavi Center for the Performing Arts.

Professional chamber ensembles perform frequently in the weekly series of free Thursday Noon Concerts, named after Joy S. Shinkoskey. Performance groups have collaborated with the Department of Theatre and Dance in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for qualified non-majors.

Note: A maximum of 19 units in performance courses (MUS 131 courses, MUS 140-MUS 157) apply toward the degree; see Unit Credit Guidelines, College of Letters & Science degree requirements section. Faculty of the College of Letters & Science bylaws makes it possible for students to take more than 19 units of performance classes without those additional units counting toward the 225-unit cap on units.

## Faculty & Facilities

The faculty is noted for its achievements in a variety of areas. The music scholars are active in research, writing, and performance; the music of the composers is performed and recorded nationally and internationally.

The regular faculty is joined throughout the year by visiting Artists-in-Residence, distinguished performers who give public concerts and lectures and who work with students informally.

The Empyrean Ensemble, a professional new music ensemble, is in residence at UC Davis, where it performs concerts of new music and annually premieres the work of student composers.

The department's facilities include a collection of Renaissance, Baroque, and modern instruments, along with non-western instruments including

a Sundanese & Balinese gamelan, a Brazilian Capoeira & Samba bateria, and various other percussion instruments for our world music ensembles. The arts quadrangle houses the Sound lab, practice and rehearsal rooms, and a music library with a collection of music reference materials. Opened in 2016, the Ann E. Pitzer Center, next door to the Music Building, features a state-of-the-art 399-seat concert hall, six practice rooms, and five large teaching/rehearsal studios. Scores and music monographs are housed in the Peter J. Shields Library, adjacent to the Music Building. A partnership of campus libraries affords online access to more than 100,000 tracks of classical and world music by streaming audio.

## Honors

A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters & Science. To qualify for high or highest honors, students must also complete the Music Department honors program with a GPA of 3.500 or above and write a thesis or submit a portfolio that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project. Students who anticipate seeking admission to the honors program are urged to complete at least one offering of MUS 121 or MUS 122 before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Music Bachelor of Arts is 61.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
MUS 006 Series

## Music, Minor

### College of Letters & Science

The Music minor allows students to explore and engage with a wide range of musical styles and genres, including classical music, jazz, popular music, and many musics of the world. The minor aims to enrich student experience by integrating performance experience with diverse music department ensembles, including the University Symphony, University Chorus, University Concert Band, Jazz Band, Bluegrass & Old Time String Band, world music ensembles (Indonesian Gamelan, Samba School, Hindustani Vocal Ensemble, Afro-Cuban Ensemble, Brazilian Capoeira Ensemble, Samba School, Mariachi Ensemble) and numerous chamber ensembles. By providing opportunities to build musical skills and to research and write about a variety of musical traditions, the minor helps students of all backgrounds highlight their creativity, collaborative skills, careful listening and cultural awareness.

# Native American Studies

College of Letters & Science

Liza Grandia, Chairperson of the Department

## Department Office

2407 Hart Hall; 530-752-3237; Native American Studies (<http://nas.ucdavis.edu>); Faculty (<https://nas.ucdavis.edu/faculty/>)

- Native American Studies, Bachelor of Arts (p. 389)
- Native American Studies, Minor (p. 390)
- Native American Studies, Master of Arts (p. 391)
- Native American Studies, Doctor of Philosophy (p. 391)

## Native American Studies, Bachelor of Arts

College of Letters & Science

Native American Studies provides a multi-disciplinary introduction to the indigenous cultures of North, Central, and South America. It challenges students to consider issues of cultural diversity, sovereignty, and indigenous knowledge systems in preparation for living in a world of constantly increasing social and cultural complexity.

## The Program

Students electing a major in Native American Studies may complete Plan I, Plan II, or Plan III. Plan I enables students to concentrate chiefly upon the Native experience in North America (north of Mexico). Plan II encourages interested students to focus upon Meso-America with some course work integrating Meso-America with North America and South America. Plan III focuses upon South America with some course work integrating that region with areas to the north.

## Major Advisor & Advising

All new and prospective Native American Studies majors are encouraged to see the Student Affairs Officer individually, once per year, at minimum. See Native American Studies Advising (<https://nas.ucdavis.edu/contact-information/>).

## Career Alternatives

Native American Studies is excellent preparation for a scholarly career or professional career such as teaching, law, human services, health, tribal administration, social work, and inter-ethnic relations. Graduate schools and agencies in these and related areas are looking for students with broad interdisciplinary preparation and who possess knowledge and sensitivity relating to ethnic issues and cultural diversity.

## Study Off Campus

Majors have the option of spending one to three quarters elsewhere in the Americas or on or near a reservation as part of the fulfillment of the Area of Specialization. Each student's plan must be approved by the student's advisor and by the chairperson and may fulfill from 12 to 20 of the 28 units required for the emphasis. The courses or field internship taken elsewhere must be focused upon indigenous peoples or indigenous languages and the institution of study shall be located in an area with substantial indigenous population. Students must have upper division standing and, for Plan I, course 107 or the equivalent should have been completed; for Plan II, courses 107 and 133 should have been completed;

and for Plan III, courses 107 and 120 should have been completed prior to departure. Several options may be used for receiving academic credit, including course 195. The department strongly encourages students to participate in the UC Education Abroad Program or Short-Term Programs Abroad.

## Graduate Study

The Department offers a program of study leading to M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

## Graduates Advisor

Graduate Advisors (<https://nas.ucdavis.edu/graduate-advisor/>)

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Native American Studies Bachelor of Arts is 48.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
<i>Choose two:</i>		
NAS 001	Introduction to Native American Studies or NAS 002V PENDING APPROVAL	8
NAS 005	Introduction to Native American Literature	
NAS 010	Native American Experience	
NAS 012	Native American/Indigenous Film	
<i>Choose one:</i>		
NAS 007	Indigenous & Minority Languages	4
NAS 030	Homeland History	
NAS 032	Native American Music & Dance	
NAS 033	Introduction to Native American Art	
NAS 034	Native American Art Studio	
NAS 050	Colloquium in Native American & Indigenous Studies	
NAS 099	Special Study for Undergraduates	
<b>OR</b>		
One comparable lower division course from the following departments or programs:		
African American & African Studies (AAS) courses. (p. 524)		
Anthropology (ANT) courses. (p. 564)		
American Studies (AMS) courses. (p. 544)		
Asian American Studies (ASA) courses. (p. 602)		
Chicana/o Studies (CHI) courses. (p. 669)		
Gender, Sexuality, & Women's Studies (GSW) courses. (p. 917)		
History (HIS) courses. (p. 954)		
Linguistics (LIN) courses. (p. 1060)		
Middle East and South Asia Studies (MSA) courses. (p. 1173)		
<b>OR</b>		
Another 4-unit lower division course selected in consultation with an advisor, guided by the student's interest and relevance to Native American Studies.		
<b>Preparatory Subject Matter Subtotal</b>		12

<b>Depth Subject Matter</b>		
<b>Theory &amp; Methods</b>		4-8
At least one is required, but both encouraged.		
NAS 146	Orientation to Research in Native American Studies	
NAS 190	Advanced Seminar on Sovereignty & Autonomy	
<b>Language</b>		4
Choose one:		
NAS 107	Learning Native American Languages	
NAS 108	Indigenous Languages of California	
NAS 109	Native American Language Spotlight	
NAS 110A	Quechua Language & Society: Beginning Level 1	
NAS 110B	Quechua Language & Society: Beginning Level 2	
<b>OR</b>		
Substitute a field experience credit (NAS 192) for independent language learning.		
<b>Hemispheric Perspectives</b>		4
Choose one:		
NAS 120	Ethnopolitics of South American Indians	
NAS 133B	Ethnohistory of Native Peoples of Mexico & Central America 1500 to 2000	
NAS 171	Indigenous Mesoamerica	
NAS 175V	Hemispheric Indigenous Connections	
NAS 184	Contemporary Indigenous Literature of Mexico	
NAS 191	Topics in Native American Studies	
<b>Experiential Learning</b>		4-12
Combine as needed for a minimum of 4 units, up to 12 units:		
NAS 093	Powwow Internship	
NAS 120	Ethnopolitics of South American Indians	
NAS 122	Native American Community Development	
NAS 124	Indigenous Justice Laboratory	
NAS 133	Ethnohistory of Native People of Mexico & Central America

NAS 192	Apprenticeship & Internship	
NAS 193	Leadership Training in Native American & Indigenous Organizations	
NAS 198	Directed Group Study	
NAS 199	Special Study for Advanced Undergraduates	
<b>Upper Division Courses</b>		20
Students take a variety of upper division courses in Native American Studies. Virtual & hybrid versions of all these courses any of these classes may be automatically substituted for these requirements.		
HMR 160	Human Rights & Indigenous Peoples	
NAS 101	Contemporary Native American Art	
		36-56
	<b>Total Units</b>	<b>48-68</b>

## Native American Studies, Minor

College of Letters & Science

The Native American Studies minor provides an interdisciplinary introduction to the Native experience in the Americas through coursework

in history, literature, art, performance, languages, values, philosophy, religion, current events, political economy, and environment.

Code	Title	Units
Choose one lower division Native American Studies course.		4
Native American Studies (NAS) courses. (p. 1200)		
Choose five upper division Native American Studies courses.		20
Native American Studies (NAS) courses. (p. 1200)		
UC Davis students should take at least two courses from UC Davis faculty to earn a minor. With approval of an advisor, UC Davis students may take some or the rest of their classes via the NAS/AIS/NAIS courses offered via UC Online from any campus in the system.		
Students from other campuses may also consult their departmental advisors about counting UC Online courses towards their regular degrees if NAS, AIS, or NAIS majors or minors are offered at their universities		
<b>Total Units</b>		<b>24</b>

## Native American Studies, Master of Arts

College of Letters & Science

### Graduate Study

The Department offers a program of study leading to M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

For more information, see Master's Degree (<https://nas.ucdavis.edu/masters-degree/>).

### Degree Requirements & Program Coordinator

See Native American Studies (<https://grad.ucdavis.edu/programs/gnas/>).

## Native American Studies, Doctor of Philosophy

College of Letters & Science

### Graduate Study

The Department offers a program of study leading to M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

For more information, see Ph.D. Program (<https://nas.ucdavis.edu/phd-program/>).

### Degree Requirements & Program Coordinator

See Native American Studies (<https://grad.ucdavis.edu/programs/gnas/>).

## Neurobiology, Physiology, & Behavior

### College of Biological Sciences

W. Martin Usrey, Ph.D. (<https://biology.ucdavis.edu/people/w-martin-usrey/>), Chairperson of the Department

## Exercise Biology, Minor

### College of Biological Sciences

This minor allows non-NPB and non-Human Biology majors to learn how physical activity levels impact human form and function. The courses are designed to foster intellectual curiosity, problem-solving and critical thinking skills, in the context of understanding organismal animal (including human) biology.

### Faculty Advisors

William DeBello, Ph.D. (<https://biology.ucdavis.edu/people/william-debello/>), Talitha van der Meulen, Ph.D. (<https://biology.ucdavis.edu/people/talitha-van-der-meulen/>)

### Advising

Biology Academic Success Center (BASC) (<https://basc.biology.ucdavis.edu/>) in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410, [cbsundergrads@ucdavis.edu](mailto:cbsundergrads@ucdavis.edu).

Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

## Human Biology, Bachelor of Science

### College of Biological Sciences

Frédéric Chédin, Ph.D., Professor, Chairperson of the Department of Molecular & Cellular Biology; term ends June 30, 2026  
W. Martin Usrey, Ph.D., Chairperson of the Department Neurobiology, Physiology, & Behavior

149 Briggs Hall; 530-752-3611; Molecular & Cellular Biology (<http://www.mcb.ucdavis.edu>)  
196 Briggs Hall; 530-752-0203; Neurobiology, Physiology & Behavior (<https://npb.ucdavis.edu/>)

The Human Biology major provides students with a broad biological understanding of our species, from molecules, genes, and cells to tissues, organ systems and organism/environment interactions. The curriculum includes classes on the basic principles that help us understand normal human physiology, human health, and the molecular basis of disease.

## The Program

In the freshman and sophomore years, students majoring in Human Biology build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics. As juniors or seniors, students can enroll in a variety of courses focused on biological processes and diseases that affect humans.

### Career Alternatives

The Human Biology major provides fundamental knowledge needed for a broad range of careers, including those in the areas of healthcare, biotechnology, public health, public policy, and education, and for advanced study in health-related disciplines, including medicine, dentistry, nursing, physical therapy, and pharmacy.

### Faculty

Faculty includes all members of the Departments of Neurobiology, Physiology, & Behavior, Molecular & Cellular Biology, Evolution & Ecology, Microbiology & Molecular Genetics, and Plant Biology in the College of Biological Sciences.

### Faculty Advisors

Mona Monfared, Ph.D.; Alex Nord, Ph.D.

### Advising

Biology Academic Success Center (BASC) (<https://basc.biology.ucdavis.edu/>) in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Human Biology Bachelor of Science is 96.

EVE 100	Introduction to Evolution	
EVE 131	Human Genetic Variation & Evolution	
MCB 162	Human Genetics & Genomics	

**Microbiology**

MIC 102	Introductory Microbiology	3
---------	---------------------------	---

**Neurobiology, Physiology, & Behavior**

NPB 101	Systemic Physiology	5
---------	---------------------	---

Depth Subject Matter Subtotal		25-29
-------------------------------	--	-------

**Restricted Electives**

Courses meeting this requirement must come from at least two of the following categories; any cross-listed courses taken will count for only one category; must include at least one approved lab course.

Genetics, Genomics, & Development (p. 393)

Physiology & Neurobiology (p. 393)

Origins of Disease & Human Health (p. 393)

Restricted Electives Subtotal		15-19
-------------------------------	--	-------

<b>Total Units</b>		<b>96-114</b>
--------------------	--	---------------

1

With BASC advisor approval, these combinations also satisfy the Chemistry requirement: CHE 004A-CHE 002A (3 units w/no lab)-CHE 002B-CHE 002C; CHE 004A, CHE 004B-CHE 002C.

2

With BASC advisor approval, this combination also satisfies the Organic Chemistry requirement: CHE 118A-CHE 008B.

3

With BASC advisor approval, this combination also satisfies the Mathematics requirement: MAT 021A-MAT 017B-MAT 017C; MAT 017A-MAT 021B.

**Genetics, Genomics, & Development**

Code	Title	Units
ANT 153	Human Genetics: Mutation & Migration	5
BIS 181	Comparative Genomics	3
BIS 183	Functional Genomics	3
EVE 102	Population & Quantitative Genetics	4

MIC 103L will be discontinued; this course will be offered under MMG 103L.

## Human Physiology, Minor

### College of Biological Sciences

This minor exposes non-NPB and non-Human Biology majors to general and specialized courses related to human biology including courses such as exercise and aging in health and disease and exercise metabolism. Students who obtain a human physiology minor will be able to demonstrate knowledge of the physiological processes that allow animals to function in their environment. This minor provides a foundation for further training in health-related professions.

### Faculty Advisors

William DeBello, Ph.D. (<https://biology.ucdavis.edu/people/william-debello/>), Talitha van der Meulen, Ph.D. (<https://biology.ucdavis.edu/people/talitha-van-der-meulen/>)

### Advising

Biology Academic Success Center (BASC) (<https://basc.biology.ucdavis.edu/>) in 1023 Katherine Esau Science

## Neurobiology, Physiology, & Behavior, Bachelor of Science

### College of Biological Sciences

Neurobiology, Physiology, & Behavior (NPB) is a major that emphasizes the understanding of vital functions common to all animals. All animals perform certain basic functions—they grow, reproduce, move, respond

to stimuli, and maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and highly integrated. Actions of the nervous and endocrine systems determine behavior and the interaction between organisms and their physical and social environments. Students in this major study functional mechanisms; the control, regulation, and integration of these mechanisms; and the behavior that relates to those mechanisms. They do so at the level of the cell, the organ system, and the organism.

## The Program

In the freshman and sophomore years, students majoring in Neurobiology, Physiology, & Behavior build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics. As juniors or seniors, students can enroll in a variety of Neurobiology, Physiology, & Behavior courses and related upper division courses. The NPB major contains three tracks: the Neurobiology track, the Physiology track, and the Organism-Environmental Interactions track. If you wish to propose an alternative to these tracks for yourself, please meet with your Biology Academic Success Center (BASC) advisor who can approve such individualized plans. Students can also participate in a number of advanced laboratory courses or may design an individual, independent project guided by a member of the faculty.

## Career Alternatives

Completion of the Neurobiology, Physiology, & Behavior major provides the foundation for advanced study leading to careers in high school teaching, college level teaching or research. It also serves as the basis for further training in the health professions, including but not limited to human and veterinary medicine, medical technology, physical therapy, pharmacy, nursing, dentistry, and optometry. The major is also appropriate for those intending to seek careers in biotechnology or other biologically related industries.

## Faculty Advisors

William DeBello, Ph.D. (<https://biology.ucdavis.edu/people/william-debello/>), Talitha van der Meulen, Ph.D. (<https://biology.ucdavis.edu/people/talitha-van-der-meulen/>)

## Integrative Principles Track Depth Electives

Needs to be approved by a BASC advisor. Any three courses from any of the three NPB tracks.

## Neuroscience, Minor

### College of Biological Sciences

This minor allows non-NPB and non-Human Biology majors to learn about the importance of the nervous system. The large breadth of neuroscience courses available includes molecular and cellular neurobiology, developmental neurobiology, neurobiology of addictive drugs and cell signaling in health and disease. Students who obtain a neuroscience minor will be able to demonstrate knowledge of the neurobiological processes in animals and humans.

### Faculty Advisors

William DeBello, Ph.D. (<https://biology.ucdavis.edu/people/william-debello/>), Talitha van der Meulen, Ph.D. (<https://biology.ucdavis.edu/people/talitha-van-der-meulen/>)

### Advising

Biology Academic Success Center (BASC) (<https://basc.biology.ucdavis.edu/>) in 1023 Katherine Esau Science Hall (formerly Sciences Laboratory Building); 530-752-0410, [cbsundergrads@ucdavis.edu](mailto:cbsundergrads@ucdavis.edu).

Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

## Neuroscience, Doctor of Philosophy

### Graduate Studies

### Graduate Study

The Graduate Group in Neuroscience offers programs of study leading to the Ph.D. degree. Neuroscience is a broad, interdepartmental program with faculty interests ranging from molecular biophysics of channels to cortical organization and cognition. A major goal of the program is to prepare students for careers as research scientists. Details of the program may be obtained from the Group office.

**The Master of Science degree is offered only en route to the Ph.D.**

### Degree Requirements & Program Coordinator

## Doctor of Nursing Practice—Family Nurse Practitioner Degree Program

### Graduate Studies

Charleen Singh, Ph.D., M.B.A., M.S.N./E.D., F.N.P.-B.C., C.W.O.C.N., C.N.E., W.O.C.N.F., R.N., Director for the Doctor of Nursing Practice – Family Nurse Practitioner Degree Program

## Doctor of Nursing Practice—Family Nurse Practitioner Degree Program

The Doctor of Nursing Practice—Family Nurse Practitioner Degree Program at UC Davis is a post-baccalaureate program that prepares new family nurse practitioners. The DNP-FNP program is a three-year hybrid program that combines distanced-based education with four on-campus immersions. Students learn to engage in patient- and family-centered, evidence-based primary care. Through reflective practice and interprofessional collaboration, alumni are advanced practice providers who lead bold system change and promote health care innovation by informing and advancing health policy and health equity locally, nationally and globally.

### Degree Requirements & Program Coordinator

See Doctor of Nursing Practice - Family Nurse Practitioner (<https://grad.ucdavis.edu/programs/gndp/>).

## Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, pharmacy, biostatistics, public health and various clinical specialties.

## Doctor of Nursing Practice—Nurse Anesthesia

### School of Nursing

Jakkarin Sareerak, D.N.P., C.R.N.A., C.H.S.E., Director for the Doctor of Nursing Practice – Nurse Anesthesia Degree Program

## Doctor of Nursing Practice—Nurse Anesthesia

The Doctor of Nursing Practice—Nurse Anesthesia Degree Program at UC Davis is a post-baccalaureate program that prepares experienced critical care nurses with the advanced skills and knowledge necessary to practice as nurse anesthetists to the full scope of their licensure. The DNP-NA program is a three-year hybrid program that integrates online didactic courses with in-person simulation and clinical rotations. Through immersive learning experiences, including state-of-the-art simulation training, and diverse clinical rotations, students are well-prepared for the demands of the profession. The program aims to cultivate a generation of nurse anesthetists who lead with excellence, compassion and a commitment to the delivery of state of the art evidence based anesthesia care to the community.

### Degree Requirements & Program Coordinator

See Doctor of Nursing Practice-Nurse Anesthesia (<https://grad.ucdavis.edu/programs/gnna/>).

## Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, pharmacy, biostatistics, public health and various clinical specialties.

## Master's Entry Program in Nursing

### Graduate Studies

Shana L. Ruggenberg, Ed.D., R.N.C.-O.B., C.N.S., C.N.E.; Director for the Master's Entry Program in Nursing

Charleen Singh, Ph.D., F.N.P.-B.C., C.W.O.C.N., R.N.; Assistant Director for the Master's Entry Program in Nursing

## Master's Entry Program in Nursing

The Master's Entry Program in Nursing at UC Davis prepares new nurses as leaders in quality and safety, advocates for diverse patient populations and agents of change for healthier communities. Graduates of the program earn a Master of Science in Nurse Degree, have completed the education needed to take the national licensing examination (NCLEX)

for registered nurses and are eligible for certification as a Public Health Nurse.

### Degree Requirements & Program Coordinator

See Master's Entry Program in Nursing (<https://grad.ucdavis.edu/programs/gnme/>).

### Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, health informatics, nutrition, biostatistics, public health and other fields.

## Nursing Science & Health-Care Leadership, Doctor of Philosophy

### Graduate Studies

Sheryl L. Catz, Ph.D., Doctor of Philosophy Degree Program Director

### Nursing Science & Health-Care Leadership Graduate Degree Program; Doctor of Philosophy Degree Program

The Nursing Science and Health-Care Leadership Doctor of Philosophy (Ph.D.) Degree Program at UC Davis prepares graduates as leaders in health care, health policy and education and research at the university level to conduct transformative research, educate health professionals and researchers, effect system change, influence and implement policy, and advance health from multiple settings. Through this four-year program, students work closely with their academic advisors to complete core courses and select personally tailored cognates, methods and other elective courses that support their dissertation research and education goals. Graduates will develop leadership skills that allow them to evaluate and integrate interdisciplinary perspectives, conduct transformative research and incorporate innovative technology.

### Degree Requirements

See Nursing Science-Health-Care Leadership (Ph.D.) (<https://grad.ucdavis.edu/programs/gnsl/>).

### Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, pharmacy, biostatistics, public health and various clinical specialties.

## Physician Assistant Studies, Master of Health Services

### Graduate Studies

Teresa Thetford, D.H.Sc., M.S., P.A.-C., N.P, Director for the Physician Assistant Program

## Master of Health Services—Physician Assistant Studies Degree Program

The Master of Health Services—Physician Assistant Studies Degree Program at UC Davis prepares graduates to deliver care as physician assistants. In alignment with the school's vision to advance health, the mission of the physician assistant program is to educate health care professionals to deliver care as leaders and members of interprofessional health care teams as well as to improve the availability of culturally relevant primary health care to underserved populations throughout California.

### Degree Requirements & Program Coordinator

See Physician Assistant Studies (<https://grad.ucdavis.edu/programs/gnpa/>).

### Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, pharmacy, biostatistics, public health and various clinical specialties.

- Nutrition Science, Bachelor of Science (p. 403)
- Nutrition Science, Minor (p. 406)

## Clinical Nutrition, Bachelor of Science

### College of Agricultural & Environmental Sciences

The Clinical Nutrition major provides students with training in normal and therapeutic nutrition, biological and social sciences, food science, communication, business management and food service management. This major fulfills the academic requirements for admission into a dietetics internship or the equivalent, which must be completed before qualifying for registration as a dietitian. Effective January 1, 2024, the Commission on Dietetic Registration (CDR) requires a minimum of a master's degree to be eligible to take the credentialing exam to become a registered dietitian.

### The Program

The Clinical Nutrition major includes the same basic core of nutrition classes as the Nutrition Science major, but includes additional courses such as food service management, education, sociology, and communication skills to prepare for work with the public. Clinical Nutrition students spend the first two years completing preparatory course work in the basic biological sciences, along with several of the social sciences. In the final two years, students take courses in normal and clinical nutrition, food science, biochemistry, and management techniques.

Entering freshman or transfer students are assumed to have basic computer skills and to demonstrate mathematics competency adequate to pass the Mathematics Placement Examination ([http://www.math.ucdavis.edu/undergrad/math\\_placement/](http://www.math.ucdavis.edu/undergrad/math_placement/)) with a minimum score of 25.

### Lead Faculty Advisor

Francene Steinberg, Ph.D., R.D.N.

**Advising Center** for the major is located in 3202 Meyer Hall; 530-752-2512; 530-752-7094.

### Career Alternatives

The Clinical Nutrition major qualifies students to apply for a dietetic internship accredited by the Accreditation Council for Education in Nutrition and Dietetics enabling them to become a Registered Dietitian, the professional credential necessary to work in a clinical setting. Once dietitians are registered, they generally seek employment in administrative, therapeutic, teaching, research, or public health/public service positions in clinics, hospitals, schools, or other similar institutions. There is a growing role for dietitians working in settings outside of the traditional hospital (for example, in state and federal nutrition programs, nutrition education, Peace Corps and Cooperative Extension work). Students who complete the undergraduate preparation in clinical nutrition are also qualified to enter graduate programs in

dietetics, nutrition science, public health nutrition, and food service management.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Clinical Nutrition Bachelor of Science is 138.

## Maternal & Child Nutrition, Master of Advanced Study

### College of Agricultural & Environmental Sciences

Master of Advanced Study in Maternal & Child Nutrition (<https://nutrition.ucdavis.edu/academics/grad-programs/mcn/>); MCN Faculty (<https://nutrition.ucdavis.edu/academics/grad-programs/mcn/faculty/>)

### Graduate Study

The Department of Nutrition offers the degree of M.A.S. in Maternal & Child Nutrition. The program consists of four required core courses (22 units), special topics seminars (4 units), elective (4 units) and a six-unit student capstone for a total of 36 units.

Each student will be assigned a guidance committee consisting of two members, one of the teaching faculty and an additional qualified member to advise the student in completing a student capstone project.

The program includes an option for students to complete the lactation-specific didactic education required to take the exam to be an International Board-Certified Lactation Consultant. Eligible students may have the option of enrolling in 4 additional units of clinical lactation internship during the summer between years 1 and 2 of the program.

### Preparation

Admission to the program requires a bachelor's degree with prior course work that includes (or is comparable to): one year of general chemistry, two quarters (one semester) of organic chemistry, a course in statistics, one course in general physiology, and two quarters (one semester) of the biochemistry of nutrition.

### Degree Requirements

See Maternal & Child Nutrition (<https://grad.ucdavis.edu/programs/gmcn/>).

### Courses

See courses under Maternal & Child Nutrition (MCN) (p. 1128).

## Nutrition & Food, Minor

## Nutrition Science, Bachelor of Science

### College of Agricultural & Environmental Sciences

The study of nutrition encompasses all aspects of the consumption and utilization of food and its constituents. Key areas of study include: the biochemical reactions important to the utilization of nutrients and food constituents; the impact of diet on health and disease; and, nutrition-related policy and public health issues. The nutrition science major includes two options for studying these areas: nutritional biology and nutrition in public health.

## The Program

Nutrition, as it is taught on the Davis campus, is a biological science and requires a complete background in chemistry and biology, along with calculus and physics (nutritional biology option) or economics (nutrition in public health option). These courses are generally completed during the first two years, and along with biochemistry, must be completed before most nutrition classes can be taken. During their junior and senior years, students in the nutritional biology option take additional course work in biochemistry, physiology, and toxicology. Students in the nutrition

in public health option take additional course work in social and health-related sciences.

## Career Alternatives

Both options are excellent preparation for professional or graduate training in medicine, public health, or other health sciences. The nutritional biology option also provides preparation for technical work in nutrition in the animal, food, and pharmaceutical industries. The nutrition in public health option prepares students for jobs in administrative, teaching, or public health/public service positions.

## Becoming a Registered Dietitian

The Commission on Dietetic Registration (CDR) requires a minimum of a master's degree to be eligible to take the credentialing exam to become a registered dietitian<sup>1</sup>. There are two routes for the Nutrition Science major:

- A Coordinated Graduate Program in Nutrition & Dietetics.
- A Future Graduate Program in Nutrition & Dietetics.

These master's degree programs include the didactic coursework and supervised practice (dietetic internship).

## Lead Faculty Advisor

Peng Ji, Ph.D.

Advising Center for the major is located in 3202 Meyer Hall;  
530-752-2512; 530-752-7094.

## Graduate Study

The Department of Nutrition offers programs of study and research leading to M.S. and Ph.D. degrees in Nutrition. For information on graduate study contact the graduate advisor. See Graduate Studies (<http://gradstudies.ucdavis.edu/>).

CRD 152	Community Development		
CRD 176	Comparative Ethnicity		
IAD 103	Social Change & Agricultural Development		

## Nutrition Science, Minor

The Department of Nutrition offers three minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

### Minor Advisor

Advising for the minor and course offerings is located in the Nutrition Academic Advising Center (<https://nutrition.ucdavis.edu/academics/undergrad/advising/>) in 3202 Meyer Hall; 530-752-2512; 530-752-7094.

If the student's major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor which must total 20 units.

<b>Code</b>	<b>Title</b>	<b>Units</b>
<i>Preparation</i>		
Plan in advance to include the required course prerequisites.		
<i>Biochemistry</i>		

Choose a series:		6-10
ABI 102 & ABI 103	Animal Biochemistry & Metabolism and Animal Biochemistry & Metabolism

## Nutritional Biology (Graduate Group)

### Graduate Studies

Reina Engle-Stone, Ph.D., Chairperson of the Group

### Graduate Group Office

1249 Meyer Hall; 530-754-7684; Nutritional Biology Graduate Group (<http://nutritionalbiology.ucdavis.edu/>); Faculty (<http://ggnb.ucdavis.edu/people/faculty/>)

- Nutritional Biology, Master of Science (p. 407)
- Nutritional Biology, Doctor of Philosophy (p. 407)

## Nutritional Biology, Master of Science

### Graduate Studies

### Graduate Study

The Graduate Group in Nutritional Biology offers programs of study and research leading to M.S. and Ph.D. degrees. The great diversity of research interests represented by the faculty members allows students to choose from a wide variety of themes: nutritional biochemistry, animal nutrition, nutrition and development, nutrient bioavailability, human/clinical nutrition, nutrition and behavior, nutritional energetics, community nutrition, community health, maternal and child nutrition, nutrition and endocrinology, international nutrition, obesity/body composition, physiology of digestion, nutrition and chronic disease, culture and nutrition, nutrition and gene expression, nutrition and aging, food preferences, nutrition and immunity, diet and exercise, dietary

assessment, protein and lipid metabolism, food intake regulation, nutrition education, and more.

### Degree Requirements & Program Coordinator

See Nutritional Biology (<https://grad.ucdavis.edu/programs/gnub/>).

## Nutritional Biology, Doctor of Philosophy

### Graduate Studies

### Graduate Study

The Graduate Group in Nutritional Biology offers programs of study and research leading to M.S. and Ph.D. degrees. The great diversity of research interests represented by the faculty members allows students to choose from a wide variety of themes: nutritional biochemistry, animal nutrition, nutrition and development, nutrient bioavailability, human/clinical nutrition, nutrition and behavior, nutritional energetics, community nutrition, community health, maternal and child nutrition, nutrition and endocrinology, international nutrition, obesity/body composition, physiology of digestion, nutrition and chronic disease, culture and nutrition, nutrition and gene expression, nutrition and aging, food preferences, nutrition and immunity, diet and exercise, dietary assessment, protein and lipid metabolism, food intake regulation, nutrition education, and more.

### Degree Requirements & Program Coordinator

See Nutritional Biology (<https://grad.ucdavis.edu/programs/gnub/>).

## Performance Studies (Graduate Group)

### Graduate Studies

Joseph Dumit, Chair  
Finn Brunton, Interim Graduate Advisor  
Marian Bilheimer, Graduate Coordinator

### Arts Group Graduate Office

216B Art Building; 530-754-6973; Marian Bilheimer ([mlbilheimer@ucdavis.edu](mailto:mlbilheimer@ucdavis.edu)); Performance Studies Graduate Group (<https://arts.ucdavis.edu/performancesstudies/>); Faculty (<http://arts.ucdavis.edu/theatre-dance-faculty/>)

There are over 45 affiliated faculty in departments throughout HARCS and other faculty, all of whom offer courses relevant to the discipline.

- Performance Studies, Doctor of Philosophy (p. 407)

## Performance Studies, Doctor of Philosophy

### College of Letters & Science

### Graduate Study

The Ph.D. in Performance Studies is a four-year program. In the first two years of study, students develop an understanding of performance by drawing from a range of regular course offerings in the field to identify, explore, and define a field or fields of research. Students are required

to complete four core courses out of five in performance studies, and one colloquium course. Each individual program is then built from seminar and/or practice as research courses, as well as independent or group studies, developing one or more of the four strands of the program: Comparative Medias, Embodiments, Cultures/Ecologies, and History/Text. A wide range of affiliated faculty offer courses throughout the HArCS faculty, and Designated Emphases are available in Studies in Performance & Practice, African American & African Studies, Critical Theory, Feminist Theory & Research, Native American Studies, Religious Studies, Science & Technology Studies, and Writing, Rhetoric & Composition Studies. Students are required to complete a minimum of 60 units before taking the qualifying examination. No more than 12 units may be taken below the graduate level unless specifically approved by the Ph.D. graduate program advisor.

### Degree Requirements & Program Coordinator

See Performance Studies (<https://grad.ucdavis.edu/programs/gpfs/>).

## Pharmacology & Toxicology (Graduate Group)

College of Agricultural & Environmental Sciences

Laura S. Van Winkle, Chairperson of the Group

### Group Office

Department of Environmental Toxicology, 4139 Meyer Hall; 530-752-4516;  
Pharmacology & Toxicology Graduate Group (<http://ptx.ucdavis.edu/>);  
Faculty (<https://ptx.ucdavis.edu/people/>)

### Faculty

The more than 90 faculty in the graduate group represent at least 25 academic departments and organized research units within the College of Agricultural & Environmental Sciences, the College of Biological Sciences, the School of Medicine and the School of Veterinary Medicine, as well as several organized research units.

- Pharmacology & Toxicology, Master of Science (p. 408)
- Pharmacology & Toxicology, Doctor of Philosophy (p. 408)

## Pharmacology & Toxicology, Master of Science

College of Agricultural & Environmental Sciences

### Graduate Study

The program, which offers both M.S. and Ph.D. degrees, emphasizes an interdisciplinary approach that combines coursework and experimental training in modern approaches to pharmacological and toxicological problems. Areas of research span fundamental and translational research in a broad spectrum of areas within pharmacology and toxicology, including cardiovascular pharmacology, cancer therapeutics, neuropharmacology, drug discovery and design, pharmacokinetics, neurotoxicology, pulmonary toxicology and environmental toxicology. Students complete core courses in pharmacology and toxicology. Both Plan I and Plan II MS is offered. For detailed information on the program, contact the Group office, graduate advisors, or the Group chairperson.

### Degree Requirements & Program Coordinator

See Pharmacology & Toxicology (<https://grad.ucdavis.edu/programs/gptx/>).

## Pharmacology & Toxicology, Doctor of Philosophy

College of Agricultural & Environmental Sciences

### Graduate Study

The program, which offers both M.S. and Ph.D. degrees, emphasizes an interdisciplinary approach that combines coursework and experimental training in modern approaches to pharmacological and toxicological problems. Areas of research span fundamental and translational research in a broad spectrum of areas within pharmacology and toxicology, including cardiovascular pharmacology, cancer therapeutics, neuropharmacology, drug discovery and design, pharmacokinetics, neurotoxicology, pulmonary toxicology and environmental toxicology. Students complete core courses in pharmacology and toxicology and carry out research rotations during their first year of study. All Ph.D. students receive financial support. For detailed information on the program, contact the Group office, graduate advisors, or the Group chairperson.

### Degree Requirements & Program Coordinator

See Pharmacology & Toxicology (<https://grad.ucdavis.edu/programs/gptx/>).

## Philosophy

College of Letters & Science

Elaine Landry, Ph.D., Chairperson of the Department; term ends June 30, 2026

### Department Office

1240 Social Sciences & Humanities; Business Office ([philadmin@ucdavis.edu](mailto:philadmin@ucdavis.edu)); Philosophy (<http://philosophy.ucdavis.edu>); Faculty (<https://philosophy.ucdavis.edu/people/faculty/>)

### Advising

Staff advisors are located in the Blue Ridge Office Building. For information about how to contact a major advisor, see Major Advising (<https://yellowcluster.ucdavis.edu/advising/undergraduate/major-advising/>).

- Philosophy, Bachelor of Arts (p. 408)
- Philosophy, Minor (p. 411)
- Philosophy, Master of Arts (p. 412)
- Philosophy, Doctor of Philosophy (p. 412)

## Philosophy, Bachelor of Arts

College of Letters & Science

Philosophy addresses problems and questions that arise in all areas of human thought and experience and in all disciplines. Recurring questions about the nature of value, the good life, right conduct, knowledge, truth, language, mind, and reality are central to philosophical study. Philosophy

also investigates the methodologies and assumptions of the major disciplines in the university in order to deepen our understanding of the sciences, of mathematics, art, literature, and history, and of religion and morality. It leads us to address issues about the nature of these subjects, about the methods of reasoning characteristic of them, and about the contributions they make to our understanding of ourselves and our world.

Philosophy contributes to the liberal education of its students. The department emphasizes an analytic approach to philosophical questions, which trains students to understand and evaluate arguments and to think and write precisely and clearly. These skills are of immense value in a variety of careers.

## The Program

The Department of Philosophy offers its majors a choice among three options. The General Emphasis provides a broad view of the field of philosophy. It includes a breadth requirement at the lower division level while providing students wide choice in more advanced courses. The Pre-Law and Pre-Med Emphases include courses that provide philosophical perspectives on law and medicine respectively and that also provide important preparation for professional school.

The Department offers courses in most areas of contemporary analytic philosophy including the theory of knowledge, metaphysics, logic, ethics, and political philosophy. In addition, upper division courses are offered in oral and political philosophy, and aesthetics, and in the philosophy of religion, of mind, of language, of mathematics, of law, and of the physical, biological and social sciences. The problems of philosophy have important roots in past. The history of philosophy is important not only as part of the heritage of educated persons, but also because it is relevant to contemporary issues. For these reasons, the department places great emphasis on the history of philosophy, providing courses on the major figures and traditions of western philosophy.

## Major Advisor

Staff advisors are located in the Blue Ridge Office Building. For information about how to contact a major advisor, see Major Advising (<https://yellowcluster.ucdavis.edu/advising/undergraduate/major-advising/>).

## Faculty Advisor

Rohan French, Ph.D.

## Career Pathways

Students of philosophy learn to understand and evaluate arguments and to think and write precisely and clearly. These analytical skills are assets in any career. Many of our majors have pursued graduate study in philosophy and have become philosophers in their own right. Others have pursued academic careers in related disciplines in the humanities and social sciences. Philosophy majors are well prepared for law, business, or other professional schools and have found careers in computer programming, government service, teaching, the ministry, and social work. Those wishing to attend law school or medical school should consider pursuing the Pre-Law and Pre-Med emphases, respectively.

## Honors Program

The department offers an honors program, which gives qualifying majors the opportunity to work closely with faculty and graduate students. Information can be obtained on the Honors Program (<https://philosophy.ucdavis.edu/undergraduate/honors-and-awards/honors-program/>) page of the Philosophy Department website.

## Courses for Non-Majors

Students majoring in most disciplines in the university will find courses relevant to their educational or career goals. PHI 001 is the introductory course for both majors and non-majors. PHI 005 teaches critical thinking. The following PHI courses are recommended:

Code	Title	Units
<b>(1) Pre-Law</b>		
PHI 012	Introduction to Symbolic Logic	4
PHI 014	Ethical & Social Problems in Contemporary Society	4
PHI 024	Introduction to Ethics	4
PHI 030	Introduction to Philosophy of Science	4
PHI 102	Theory of Knowledge	4
PHI 112	Intermediate Symbolic Logic	4
PHI 115	Problems in Normative Ethics	4
PHI 116	Ethical Theories	4
PHI 118	Political Philosophy	4
PHI 119	Philosophy of Law (especially)	4
<b>(2) Pre-Medical</b>		
PHI 014	Ethical & Social Problems in Contemporary Society	4
PHI 015	Introduction to Bioethics	4
PHI 030	Introduction to Philosophy of Science	4
PHI 038	Introduction to Philosophy of Biology	4

PHI 101	Metaphysics <sup>1</sup>				

## Department Activities

The Philosophy department sponsors a lecture series with well-known philosophers who present papers in their fields of expertise. The department also operates ongoing faculty and graduate student workshops. Undergraduate students are welcome to attend and join these discussions. Information can be obtained on the department website.

## Graduate Study

The Department of Philosophy offers programs of study leading to M.A. and Ph.D. degrees. Detailed information is available Graduate Program (<https://philosophy.ucdavis.edu/graduate/graduate-program-overview/>), and may also be obtained by writing to the Graduate Advisor.

## Graduate Advisor

Tina Rulli, Ph.D.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for all emphases of the Philosophy Bachelor of Arts is 52.

## General Emphasis

Code	Title	Units
<b>Preparatory Subject Matter</b>		
PHI 012	Introduction to Symbolic Logic	4
Choose one course each from any three areas:		
(a) <i>General Philosophy</i>		
PHI 001	Introduction to Philosophy

Health Professions Advising Website (<https://hpa.ucdavis.edu/>)

## Philosophy, Minor

College of Letters & Science

### Advising Office

Staff advisors are located in the Blue Ridge Office Building. For information about how to contact a major advisor, see Major Advising (<https://yellowcluster.ucdavis.edu/advising/undergraduate/major-advising/>).

Students wishing to minor in Philosophy may choose a general minor or a minor specializing in logic. There are no specific courses required for the general minor, so students may create a program to suit their own interests. The range of choice in the logic specialization is limited to the courses listed.

### Minor Faculty Advisor

Rohan French, Ph.D.

## Philosophy, Master of Arts

### College of Letters & Science

1241 Social Sciences & Humanities; Philosophy (<https://philosophy.ucdavis.edu/graduate/graduate-program-overview/>)

## Graduate Study

The Department of Philosophy graduate program has both M.A. and Ph.D. tracks. The M.A. track is designed for students who do not intend to pursue a Ph.D. in philosophy or who would benefit from enrolling first in a master's degree program. Students who enroll in the M.A. track may, however, later petition for admission to the Ph.D. track if they so desire.

### Degree Requirements & Program Coordinator

See Philosophy (<https://grad.ucdavis.edu/programs/gphi/>).

## Philosophy, Doctor of Philosophy

### College of Letters & Science

1241 Social Sciences & Humanities; Philosophy (<https://philosophy.ucdavis.edu/graduate/graduate-program-overview/>)

## Graduate Study

The Department of Philosophy graduate program has both M.A. and Ph.D. tracks. Students who aim to complete a Ph.D. should apply directly to the Ph.D. track, even if they have not yet earned an M.A. in philosophy. Ph.D. students may earn the M.A. while progressing toward completion of the Ph.D. requirements.

### Degree Requirements & Program Coordinator

See Philosophy (<https://grad.ucdavis.edu/programs/gphi/>).

## Physics & Astronomy

### College of Letters & Science

Richard Scalettar, Ph.D., Chairperson of the Department; term ends June 30, 2024

Michael Mulhearn, Ph.D., Vice Chairperson of the Department—Administration & Undergraduate Matters

Shirley Chiang, Ph.D., Vice Chairperson of the Department—Administration & Undergraduate Matters

Rena Zieve, Ph.D., Vice Chairperson of the Department—Graduate Matters

## Department Office

174 Physics Building; 530-752-1500; Physics & Astronomy (<http://www.physics.ucdavis.edu>); Faculty (<http://physics.ucdavis.edu/people/faculty/>)

- Applied Physics, Bachelor of Science (p. 412)
- Physics, Bachelor of Arts (p. 417)
- Physics, Bachelor of Science (p. 418)
- Physics, Minor (p. 420)
- Physics, Master of Science (p. 420)
- Physics, Doctor of Philosophy (p. 420)

## Applied Physics, Bachelor of Science

### College of Letters & Science

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe work. Knowledge gained using atomic-scale microscopes and high-energy particle accelerators and nuclear reactors teaches us not only what holds the atomic nucleus together but also how proteins function and why stars shine.

## The Program

The Department of Physics & Astronomy (p. 412) offers a Bachelor of Arts in Physics and two Bachelor of Science degree programs: in Physics (which also offers an emphasis in Astrophysics), and in Applied Physics. The A.B. degree provides broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession, and also provides excellent training for a wide variety of technical career options. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market upon completing a B.S. degree, the applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

## Career Alternatives

Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and

environmental physics, astrophysics and astronomy, computer science, and materials science.

## Graduate Study

The Department of Physics & Astronomy (p. 412) offers programs of study and research leading to M.S. and Ph.D. degrees. Further information regarding requirements for these degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.

The major requirements below are in addition to meeting University Requirements (p. 56) & College Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Applied Physics Bachelor of Science major is 100.

- Plant Biology, Bachelor of Arts (p. 421)
- Plant Biology, Bachelor of Science (p. 422)
- Plant Biology, Minor (p. 424)
- Systems & Synthetic Biology, Bachelor of Science (p. 424)

## Plant Biology, Bachelor of Arts

College of Biological Sciences

As organisms that sequester carbon and convert solar energy into oxygen, sugar and other usable forms, plants are a primary source of food and myriad biomaterials on the planet, and function as an important buffer against climate change. The Plant Biology major focuses on fundamental aspects of how plants function as organisms, interact with their environment, and the use of this knowledge to address global challenges. A wide variety of scientific disciplines are integrated within the Plant Biology major, including physiology, cell and molecular biology, development, biochemistry and metabolism, genetics and genomics.

## The Program

The Plant Biology Bachelor of Arts major consists of a biological sciences core covering the general principles of biology plus five plant-specific classes dealing with advanced aspects of plant biology including physiology, development, and anatomy. Electives allow students to tailor the degree to suit their interests. Independent research in a laboratory setting is a requirement, and majors in Plant Biology are guaranteed this opportunity. Because of the value of plants as a model system for research in molecular genetics, cell biology, and biochemistry, Plant Biology also can make an excellent minor or second major for students in these fields.

## Career Alternatives

A degree in Plant Biology serves as an excellent launching point for a wide range of career options, including domestic and international opportunities in business, research, management, and teaching in both governmental and private sectors. The program is excellent preparation for students wishing to enter graduate or other professional schools, including medicine, law (particularly environmental or patent law) or journalism. Plant biologists can work in the laboratory, in the field, in the forest, in botanical gardens or nurseries, in agricultural companies, or in biotechnology, pharmaceutical, energy or chemical industries, or in the area of environmental protection.

## Honors & Honors Programs

Students on the honors list may elect to include a maximum of 5 units of 194H in their major programs. For Dean's Honors List information, see the Honors & Prizes (<https://catalog.ucdavis.edu/academic-information-policies-regulations/honors-prizes/>) for the appropriate College section.

## Faculty Advisor

Philipp Zerbe, Ph.D.

## Graduate Study

Consult Plant Biology (Graduate Group) (p. 426).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63);

unless otherwise noted. The minimum number of units required for the Plant Biology Bachelor of Arts is 76.

## Plant Biology, Minor

### College of Biological Sciences

The Plant Biology minor explores plants and their dynamic means of interacting with the environment. The Plant Biology minor has an 18-unit minimum requirement. Four areas of specialization are offered with a small, strategic course selection per area:

- (a) Anatomy & Morphology
- (b) Physiology & Development
- (c) Evolution & Ecology
- (d) Biochemistry & Molecular Genetics

### Faculty Advisor

Philipp Zerbe, Ph.D.

## Systems & Synthetic Biology, Bachelor of Science

### College of Biological Sciences

The Systems & Synthetic Biology major provides students with a broad understanding of these two related and interdisciplinary fields. Systems Biology aims to understand how complex organismal properties and structures arise from simple components and interactions, and to identify design principles common to many types of biological regulation. Synthetic Biology focuses on the modification (or, ultimately, *de novo* construction) of organisms to generate novel pathways and processes. This major emphasizes integrative, computational and quantitative approaches to solving biological problems and engineering new biological outcomes.

### The Program

In the freshman and sophomore years, students majoring in Systems & Synthetic Biology build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics as well as an introduction course to computing for biologists. As juniors or seniors, students can enroll in courses that introduce them to the fundamental principles in mathematics, computer science, systems theory and application, and biological engineering.

### Career Alternatives

The biotech workforce has a growing demand for biologists that are fluent in different merging disciplines that are covered by the Systems and Synthetic Biology Major. This combination of skills will allow graduates to work at the interface between biologists and engineers found in new emerging industries related to the pharmaceutical, biomedical, bioenergy, agricultural, nutrition, and microbiome industries. The program is also an excellent background for students wishing to enter graduate or other professional schools, including medicine, law, journalism or policy Honors & Honors Programs. Refer to the Academic Information section and the appropriate College section for Dean's Honors List information.

## Graduate Studies

## Graduate Study

The Graduate Group in Plant Biology offers programs of study and research leading to M.S. and Ph.D. degrees. The program prepares students for careers in teaching and research at universities and colleges, government and industrial laboratories. The graduate curriculum provides both breadth in the discipline and in-depth study and research in one of four areas of specialization: cell and developmental biology; environmental and integrative biology; molecular biology, biochemistry and genomics; and systematics and evolutionary biology. These areas of specialization permit individual study and research into diverse aspects of plant biology, including anatomy, biochemistry, biotechnology, cell biology, cytology, developmental biology, ecology, genetics, genomics, molecular biology, morphology, paleo-botany, physiology, population biology, systematics, and weed science. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

## Preparation

For both the M.S. and Ph.D. programs, a level of scholastic development equivalent to a Bachelor's degree in biological sciences from a recognized college or university is required. Courses in the following areas are considered to be prerequisites to the advanced degrees in Plant Biology: biology, inorganic chemistry, organic chemistry, introductory physics, genetics, plant development and structure, biochemistry, introductory plant physiology, calculus, introductory statistics, ecology/systematics/evolution, and cell/molecular biology. Limited deficiencies can be made up after admission.

## Degree Requirements & Program Coordinator

See Plant Biology (<https://grad.ucdavis.edu/programs/gpbi/>).

# Plant Biology, Doctor of Philosophy

## Graduate Studies

## Graduate Study

The Graduate Group in Plant Biology offers programs of study and research leading to M.S. and Ph.D. degrees. The program prepares students for careers in teaching and research at universities and colleges, government and industrial laboratories. The graduate curriculum provides both breadth in the discipline and in-depth study and research in one of four areas of specialization: cell and developmental biology;

environmental and integrative biology; molecular biology, biochemistry and genomics; and systematics and evolutionary biology. These areas of specialization permit individual study and research into diverse aspects of plant biology, including anatomy, biochemistry, biotechnology, cell biology, cytology, developmental biology, ecology, genetics, genomics, molecular biology, morphology, paleo-botany, physiology, population biology, systematics, and weed science. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

## Preparation

For both the M.S. and Ph.D. programs, a level of scholastic development equivalent to a Bachelor's degree in biological sciences from a recognized college or university is required. Courses in the following areas are considered to be prerequisites to the advanced degrees in Plant Biology: biology, inorganic chemistry, organic chemistry, introductory physics, genetics, plant development and structure, biochemistry, introductory plant physiology, calculus, introductory statistics, ecology/systematics/evolution, and cell/molecular biology. Limited deficiencies can be made up after admission.

Advisor. Grace Gomez (grlandon@ucdavis.edu)

## Major Program

### Approach

The Global Disease Biology (GDB) major offers students the opportunity to study disease and its relationship to the health of people, animals, plants, and the environment. The program uses an integrated approach to advance student understanding of the concept(s) of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, and prevention. The program recognizes the interconnectedness of people, animals, plants, and the environment and aims to identify and address the fundamental causes of poor health around the world. Managing global disease problems requires a multifaceted, holistic approach to address the full spectrum of human, animal, plant, and environmental health risks (also known as a One Health approach). Throughout a series of core courses, issues related to human, animal, and plant health, along with tools available to solve these problems, will be introduced to provide students with real-world scenarios in which they can apply and advance their creative and critical thinking skills. The major prepares graduates with the knowledge, leadership skills and experiences required to excel in professions associated with global health, the environment, food safety and security, biological safety and

security, and health policy. For more information, see Global Disease Biology (<http://gdb.ucdavis.edu/>).

### Program

The Global Disease Biology major provides students with broad preparatory scientific course work, global disease biology core classes, flexibility in upper division electives, and a strong research experience.

**Global Disease Biology core classes** are intended to be transdisciplinary and focus on concepts that cut across human, animal, and plant diseases offering a unifying ecological and quantitative perspective on disease.

**Flexible upper division electives are known as Restricted Electives**, which allow students to plan their chosen emphasis of study as part of a required discussion course (GDB 187) and in consultation with their advisor. Students will draw from many undergraduate courses currently offered on disease and health in a way that complements the core courses required for the Global Disease Biology major. You can read more about these electives in the Guide to GBD Restricted Electives (<https://gdb.ucdavis.edu/important-documents/>).

**Strong research experience** is acquired in a senior research project, called the GDB Practicum, which each student designs to bridge the disciplines of the major. You can learn more about the Practicum project requirement by reading the Guide to the GBD Practicum (<https://gdb.ucdavis.edu/important-documents/>).

### Internships & Careers

The program and interests of each student in solving societal problems guides students to a range of internship and career choices. On and off-campus internship opportunities are available in research laboratories, in field situations, with governmental agencies, with private industry, and in international programs. A degree in Global Disease Biology prepares graduates with the knowledge, leadership skills and experiences required to excel in a vast array of professions associated with areas such as healthcare, medicine, public health, health policy, food safety and security, and nature conservation, as each relates to disease and health of people, animals, plants and the environment in developing and developed countries.

Learn more about our alumni on our GDB Blog (<https://gdb.ucdavis.edu/blog/>) and Facebook page (<https://www.facebook.com/UCD.GDB/>).

### Faculty

Includes members of the Departments of Plant Pathology in the College of Agricultural & Environmental Sciences, School of Veterinary Medicine, and School of Medicine.

### Lead Faculty Advisor

Johan H.J. Leveau, Ph.D., Professor (Plant Pathology)

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Global Disease Biology Bachelor of Science is 132.

Restricted Elective <sup>1</sup>		4
<b>Units</b>		<b>13</b>
<b>Total Units</b>		<b>13</b>

1

Restricted Electives make up 25 (or more) units of a student's GDB major requirements. Read more about them in the Guide to Restricted Electives, which you can download from our website (<https://gdb.ucdavis.edu/important-documents/>).

To make a full plan for graduation, please see the GDB Advising team—you are welcome to talk to your academic advisor or peer advisors! Email us at [gdb-advise@ucdavis.edu](mailto:gdb-advise@ucdavis.edu).

## Global Disease Biology, Minor

College of Agricultural & Environmental Sciences

### Program Office

150 Hutchison Hall; 530-754-2281; [gdb-advise@ucdavis.edu](mailto:gdb-advise@ucdavis.edu); Global Disease Biology (<http://gdb.ucdavis.edu/>)

**Advisor:** Grace Gomez ([grlandon@ucdavis.edu](mailto:grlandon@ucdavis.edu))

### The Minor

A minor in Global Disease Biology may complement a student's major program. Note that some courses have required prerequisites not included as part of the minor, and students should plan accordingly.

**If you plan to declare the GDB minor,** you MUST meet with our office to set up an academic plan **before your last year** at UC Davis. If you do not, you may not be able to declare GDB as a minor.

Our faculty includes members of the Departments of Plant Pathology from the College of Agricultural & Environmental Sciences, School of Veterinary Medicine, and School of Medicine.

- Biotechnology, Bachelor of Science (p. 431)
- Ecological Management & Restoration, Bachelor of Science (p. 435)
- Environmental Horticulture & Urban Forestry, Bachelor of Science (p. 437)
- Environmental Horticulture, Minor (p. 438)
- International Agricultural Development, Bachelor of Science (p. 439)
- International Agricultural Development, Minor (p. 441)
- Landscape Restoration, Minor (p. 442)
- Plant Sciences, Bachelor of Science (p. 442)

# Agricultural Systems & Environment, Minor

College of Agricultural & Environmental Sciences

## Minor Advisor

Advising is located in 1220 Plant & Environmental Sciences; Undergraduate Minors (<https://www.ucdavis.edu/academics/minors/>)

Plant Sciences Advising (<https://www.plantsciences.ucdavis.edu/academics/undergraduate/programs/>); [plsadvising@ucdavis.edu](mailto:plsadvising@ucdavis.edu)

Successful completion of the minor requires the following:

- All courses must be taken for a letter grade.
- Minimum overall GPA of 2.000.
- No more than one course can be counted towards both the student's major and the minor.

## Preparatory Material

Code	Title	Units
<i>Statistics</i>

WFC 151	Wildlife Ecology

Total Units **18**

## Biotechnology, Bachelor of Science

### College of Agricultural & Environmental Sciences

Every living organism, from the smallest and most primitive bacteria to every plant, insect, animal or human being, contains DNA as the primary genetic material. DNA directs all cellular processes, creating the incredible variety and diversity of living organisms in the biosphere. Biotechnology focuses on the mechanics of life processes and their application. Biotechnology means "life technology" and represents an integrated, multidisciplinary field, with a profound impact today on almost every aspect of human endeavor.

## Preparatory Requirements

UC Davis students who wish to change their major to Biotechnology must complete the following courses (representing the subject areas of Biological Sciences, Chemistry, and Mathematics) with a grade point average of at least 2.500 in each subject area. All of these courses must be taken for a letter grade:

Code	Title	Units
<b>Biological Sciences</b>		
BIS 002A	Introduction to Biology: Essentials of Life on Earth	15
& BIS 002B		
& BIS 002C	and Introduction to Biology: Principles of Ecology & Evolution	
	and Introduction to Biology: Biodiversity & the Tree of Life	
<b>Chemistry</b>		
One series:		15
CHE 002A	General Chemistry	
& CHE 002B	and General Chemistry	
& CHE 002C	and General Chemistry	
CHE 003A	Chemistry for Life Sciences: Determining Structure & Predicting Properties	
& CHE 003B	and Chemistry for Life Sciences: Predicting & Characterizing Chemical Change	
& CHE 003C	and Chemistry for Life Sciences: Controlling Processes & Synthetic Pathways	
<b>Mathematics</b>		
One series:		6-8
MAT 016A	and (Discontinued) <sup>1</sup>	
& MAT 016B DISCONTINUED		
MAT 017A	Calculus for Biology & Medicine	
& MAT 017B	and Calculus for Biology & Medicine	
MAT 019A	Calculus for Data-Driven Applications	
& MAT 019B	and Calculus for Data-Driven Applications	
MAT 021A	Calculus	
& MAT 021B	and Calculus	

<sup>1</sup>

MAT 016A & MAT 016B are discontinued.

## The Program

In the first two years, students develop a strong and general background in biological science with an emphasis on fundamental concepts and basic principles of genetics, molecular biology and cell biology. Four options, Animal Biotechnology, Plant Biotechnology, Fermentation/Microbial Biotechnology, and Bioinformatics, provide in-depth training and specialized knowledge in an aspect of biotechnology. Each option has a strong laboratory component to reinforce the theoretical concepts. Students also do an internship in a biotechnology company or university or government laboratory.

### Internships & Career Opportunities

In the last decade, more industries are turning to biotechnology to solve problems and improve products, creating a growing job market for individuals trained in biotechnology in the agricultural, food and beverage, health care, chemical, pharmaceutical and biochemical, and environmental and bioremediation industries.

Graduates trained in the technologies designed for biotechnology will find their training applicable to advanced research in molecular biology, genetics, biochemistry, and the plant and animal sciences.

### Lead Faculty Advisor

Diane Beckles in 133 Asmundson Hall (<https://www.plantsciences.ucdavis.edu/people/diane-beckles/>)

Faculty includes members of the Departments of Animal Science; Engineering: Chemical Engineering & Materials Science; Computer Science; Engineering: Biological & Agricultural; Food Science & Technology; Land, Air, & Water Resources; Plant Pathology; Plant Sciences; Viticulture & Enology; and the College of Biological Sciences.

### Major Advisor

Advising Center for the major is located in 1220 Plant & Environmental Sciences; [plsadvising@ucdavis.edu](mailto:plsadvising@ucdavis.edu).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Biotechnology Bachelor of Science is 114.

# Ecological Management & Restoration, Bachelor of Science

College of Agricultural & Environmental Sciences

As of Fall 2022, the Ecological Management & Restoration major is no longer accepting new students. It has been absorbed into the Plant Sciences major (p. 442) as an area of specialization.

This major is designed for students who are interested in understanding how to manage and restore wildland and rangeland plant communities. Courses are selected to provide an interdisciplinary background that encompasses ecology, applied plant biology, and the social sciences. Students will acquire a core understanding of natural and managed ecosystems and how they function, interact with the natural environment, are connected with human society and social change, and are restored and managed.

## The Program

The curriculum provides depth in the ecological and botanical sciences directed toward an integrated understanding of how communities and ecosystems function and how this knowledge can assist in their management and restoration. Courses in environmental policy and law expose the students to the social drivers and constraints of ecosystem management. All students gain practical experience through practical field courses and a required internship. Students may also pursue an Honors thesis in their senior year.

## Major Advisor

Advising Center for the major is located in 1220 Plant & Environmental Sciences; [plsadvising@ucdavis.edu](mailto:plsadvising@ucdavis.edu)

## Career Alternatives

Graduates from this program are prepared to pursue a wide range of careers, including positions in ecological restoration and ecosystem management; rangeland and reserve management; environmental consulting; public, private, or non-profit agencies concerned with restoration and natural resource management; Cooperative Extension; teaching; information and communication services. Graduates are qualified to pursue advanced studies in fields such as ecology, agroecology, environmental studies, geography or weed science.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Ecological Management & Restoration Bachelor of Science is 102.

Code	Title	Units
<b>Preparatory Subject Matter</b>		
<i>Biological Science</i>		
BIS 002A	Introduction to Biology: Essentials of Life on Earth	5

PLS/PLB 102	(Discontinued)	MAT 016A & MAT 016B are discontinued.	
PLS/PLB 116	Plant Morphology & Evolution	<sup>2</sup>	
Choose four restoration/conservation courses:	11-16	PLS/PLB 102 & PLB/EVE 108 replaced by PLS/EVE/PLB 127.	
PLS 130	Grassland Ecology		

# Environmental Horticulture & Urban Forestry, Bachelor of Science

College of Agricultural & Environmental Sciences

**As of Fall 2022, the Environmental Horticulture & Urban Forestry major is no longer accepting new students. It has been absorbed into the Plant Sciences major (p. 442) as an area of specialization.**

## The Major Program

Students majoring in Environmental Horticulture & Urban Forestry learn how plants improve the environment and the quality of our lives. The major focuses on the biological and physical concepts and horticultural principles of plant production, management of plants and plant ecosystems in landscape settings and sociological aspects of plant/people interactions in the urban environment. Plants are used to revegetate and restore disturbed landscapes, control erosion and reduce energy and water consumption. The ornamental use of plants to improve the aesthetic quality of urban and rural landscapes, recreational areas, interiorscapes and commercial sites is an important aspect of this major. Students may select one or more of the following three areas of specialization: Floriculture/Nursery, Plant Biodiversity/Restoration, or Urban Landscape Management.

## Internships & Career Opportunities

Students are encouraged to develop internships on or off campus to augment their activities in the classroom and laboratory. Internships are available with the department's greenhouse facility, the UC Davis Arboretum, landscape designers, local nurseries, government agencies, regional non-profits, and restoration firms. Career opportunities in this field include growing and/or managing plants in a variety of settings, including nurseries & arboreta, consulting as an arborist, or as an urban, landscape, or restoration horticulturist; business ownership; park management and landscape contracting; working in the public or private sector, or for non-profit organizations.

## Major Advisor

**Advising Center** for the major is located in 1220 Plant & Environmental Sciences; [plsadvising@ucdavis.edu](mailto:plsadvising@ucdavis.edu).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Environmental Horticulture & Urban Forestry Bachelor of Science is 114.

Code	Title	Units
<b>Preparatory Subject Matter</b>

## Environmental Horticulture, Minor

College of Agricultural & Environmental Sciences

### Related Undergraduate Programs

See the undergraduate majors in Plant Biology (p. 420) & Plant Sciences (p. 429).

### Related Courses

See Plant Biology (PLB) (p. 1294) & Plant Sciences (PLS) (p. 1299).

### Minor Advisor

Plant Sciences Advising (<https://www.plantsciences.ucdavis.edu/academics/undergraduate/programs/>); plsadvising@ucdavis.edu

Successful completion of the minor requires the following:

- All courses must be taken for a letter grade.
- Minimum overall GPA of 2.000.

- No more than one course can be counted towards both the student's major and the minor.

Code	Title	Units
ENH 006	Introduction to Environmental Plants	4
ENH 105	Taxonomy & Ecology of Environmental Plant Families (Discontinued)	4

ENH 120	Management of Container Media	
ENH 125	Greenhouse & Nursery Crop Production	
ENH 133	Woody Plants in the Landscape: Growth, Ecology & Management	

Total Units 23-25

## International Agricultural Development, Bachelor of Science

### College of Agricultural & Environmental Sciences

International Agricultural Development is an interdisciplinary major housed in the Plant Sciences department. Students learn to apply existing and emerging agricultural technologies and strategies to address global poverty. Students can choose to focus on social sciences or natural sciences. This interdisciplinary program includes courses in animal and plant sciences, soil and environmental sciences, sociology and economics, community development and Native American studies. There are four areas of specialization: Agricultural Production, Trade & Economic Development, Environmental Issues, and Rural Communities. Students participate in internships or study abroad to round out their education. Graduates move on to serve in the Peace Corps, work for governmental or non-governmental organizations, or work in international trade.

## Faculty

Includes members from various departments across colleges.

## Advisors

**Staff Advisor.** Honora Knopp; [plsadvising@ucdavis.edu](mailto:plsadvising@ucdavis.edu)

**Faculty Advisor.** Amanda Crump; [acrump@ucdavis.edu](mailto:acrump@ucdavis.edu)

# **International Agricultural Development, Minor**

College of Agricultural & Environmental Sciences

International Agricultural Development is an interdisciplinary major housed in the Plant Sciences department. Students learn to apply existing and emerging agricultural technologies and strategies to address global poverty. Students can choose to focus on social sciences or natural sciences. This interdisciplinary program includes courses in animal and plant sciences, soil and environmental sciences, sociology and economics, community development and Native American studies. There are four areas of specialization: Agricultural Production, Trade & Economic Development, Environmental Issues, and Rural Communities. Students participate in internships or study abroad to round out their education. Graduates move on to serve in the Peace Corps, work for governmental or non-governmental organizations, or work in international trade.

# Faculty

Includes members from various departments across colleges.

## Landscape Restoration, Minor

### College of Agricultural & Environmental Sciences

This minor is of particular interest to students majoring in Wildlife, Fish, & Conservation Biology, Environmental Science & Management, Landscape Architecture, Biological Sciences, Evolution & Ecology, Plant Biology, and Sustainable Environmental Design.

BIS 002C or PLS 002 is a prerequisite to most courses in the minor.

The minor is sponsored by the Department of Plant Sciences (p. 442).

### Minor Advisor

Plant Sciences Advising (<https://www.plantsciences.ucdavis.edu/academics/undergraduate/programs/>); [plsadvising@ucdavis.edu](mailto:plsadvising@ucdavis.edu)

Successful completion of the minor requires the following:

- All courses must be taken for a letter grade.
- Minimum overall GPA of 2.000.
- No more than one course can be counted towards both the student's major and the minor.

## Plant Sciences, Bachelor of Science

### College of Agricultural & Environmental Sciences

The Plant Sciences major is designed for students who are interested in a scientific understanding of how plants grow and develop in managed agricultural ecosystems and how plant products are utilized for food, fiber and environmental enhancement. Advances in science and technology have provided new insights and options for using plants to address the issues associated with providing renewable food, fiber and energy resources for a growing global population while minimizing adverse impacts on the natural environment. Graduates in Plant Sciences are able to apply their skills and knowledge to a diverse range of agricultural and environmental goals or pursue advanced degrees in plant sciences.

### The Program

The curriculum provides depth in the biological and physical sciences and a sound understanding of how plants obtain and utilize resources from their environment to sustain their growth and development. The influences of genetics, management systems and environmental inputs on crop development and productivity are emphasized along with the postharvest preservation and marketing of plant products. Students will develop an area of specialization with options in Crop Production, Plant Genetics & Breeding, or Postharvest Biology & Technology. An Individual option is also available to match specific subject matter or career goal interests in the plant sciences. All students gain practical experience through a combination of practical laboratory courses and internships. Students may also pursue an Honors thesis in their senior year.

### Advising

Advising for the major is located in 1220 Plant & Environmental Sciences; [plsadvising@ucdavis.edu](mailto:plsadvising@ucdavis.edu). For more information, see Undergraduate Advising.

### Lead Faculty Advisor

Bárbara Blanco-Ulate

### Career Alternatives

Graduates from this program are prepared to pursue a wide range of careers, including various technical and management positions in agricultural & business enterprises, farming, or consulting; public, private & non-profit agencies; Cooperative Extension; international development; teaching; or agricultural & environmental journalism and communication services. Graduates are qualified to pursue graduate studies in the natural and agricultural sciences, such as plant biology, genetics, breeding, horticulture, agronomy, biotechnology, ecology, environmental studies, pest management, education, or business management.

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the Plant Sciences Bachelor of Science is 116.

## International Relations, Bachelor of Arts

### College of Letters & Science

**Program Director.** Contact the Department of Political Science (p. 445).

469 Kerr Hall; 530-754-8098; International Relations (<https://ps.ucdavis.edu/undergraduate/majors-and-minors/international-relations-major/>)

Problems of security, development, ethnic conflict, human rights, health, and the environment are increasingly confronted at a global rather than a national level. With its theoretical models and real-world application, the study of international relations is an exciting and highly relevant interdisciplinary major.

## The Major

Graduation with a major in international relations requires the completion of introductory courses in political science, economics, statistics, and history. The major also requires fluency in English and working knowledge (approximately 24 to 30 units of course credits or equivalent fluency) of one other modern language. Students choose one of four tracks that encompass major topical areas in combination with an area studies emphasis:

- World Trade & Development
- Peace & Security
- Global Environment, Health, & Natural Resources
- Peoples & Nationalities

*Upper division coursework for Tracks I, II and III is composed of twelve courses. Students choosing Track IV, Peoples and Nationalities, are required to study or work abroad for a minimum of one quarter; upper*

*division course work is reduced to nine classes in recognition of the experience gained through education abroad.*

## Programs, Internships, & Career Alternatives

One program of special interest to international relations majors is the Education Abroad Program, which provides insights into the life and culture of other countries. At UC Davis, the Internship and Career Center assists students in obtaining legislative, legal, and business internships. In addition, the UC Davis Washington Center and UC Center Sacramento arrange internships and run a full-credit academic program in Washington, D.C. and Sacramento respectively with a full range of opportunities for International Relations majors (see also UC Washington Center (UCDC) (p. 77). International Relations graduates are prepared for employment in government agencies (such as the Foreign Service), state agencies, international or non-governmental organizations (such as the United Nations), foundations, and companies having interests in international business, trade, or finance. The stringent language requirement of the major program enhances career prospects in jobs that demand knowledge of the language and culture of other countries.

## International Relations Abroad

International Relations strongly encourages all students to participate in the UC Education Abroad Program; those who choose to study Track IV, Peoples and Nationalities, must study or work abroad for a minimum of one quarter. A maximum of five courses taken abroad may be applied toward the International Relations major. Courses are selected in consultation with an advisor for the Department of Political Science.

## Major Advisor

Contact the Department of Political Science (p. 445).

The major requirements below are in addition to meeting University Degree Requirements (p. 56) & College Degree Requirements (p. 63); unless otherwise noted. The minimum number of units required for the International Relations Bachelor of Arts is 80.
